UNIVERSITY OF NOTRE DAME AND SAINT MARY'S COLLEGE
JOINT ACADEMIC YEAR CALENDAR FOR 2015-2016

FALL 2015 SEMESTER

Aug. 17-18  Mon - Tues  Orientation and advising for new graduate students at Notre Dame
Aug. 19-20  Wed - Thur  Orientation for new international students at Notre Dame
Aug. 20  Thursday  Orientation, advising, and registration for new transfer students at Notre Dame
Aug. 20-22  Thur - Sat  Orientation and counseling for new students at Saint Mary’s College
Aug. 21  Friday  Undergraduate halls open for first year student move-in beginning at 9:00 a.m. for Notre Dame
Aug. 22-23  Sat - Sun  Orientation and advising for freshmen at Notre Dame
Aug. 23  Sunday  Undergraduate halls open for upperclassman move-in beginning at 9:00 a.m. for Notre Dame
Aug. 24  Monday  Classes begin for Law and Graduate Business
Classes begin for Saint Mary’s College
Advising and registration for readmitted students at Notre Dame
Aug. 25  Tuesday  Classes begin for Notre Dame
Mass - formal opening of school year at Notre Dame
Sept. 1  Tuesday  Last date for all class changes
Sept. 7  Monday  Labor Day - classes are in session
Sept. 25  Friday  Last date to drop a class at Saint Mary’s College
Oct. 17-25  Sat - Sun  Mid-Semester break
Oct. 19  Monday  Mid-Semester deficiency reports submitted through insideND by 3:45 p.m. at Notre Dame
Oct. 20  Tuesday  Mid-Semester deficiency reports due in PRISM by 8:00 a.m. at Saint Mary’s College
Oct. 30  Friday  Last day for course discontinuance at Notre Dame
Nov. 16-Dec. 2  Mon - Wed  Registration appointments for the Spring 2016 semester at Notre Dame and Saint Mary’s College
Nov. 25-29  Wed - Sun  Thanksgiving Holiday
Dec. 1-13  Tues - Sun  Course Instructor Feedback administered at Notre Dame
Dec. 10  Thursday  Last class day
Dec. 11-13  Fri - Sun  Reading days (no examinations)
Dec. 14-18  Mon - Fri  Final examinations
Dec. 19  Saturday  Undergraduate halls close at 2:00 p.m.
Dec. 21  Monday  All grades submitted through insideND by 3:45 p.m. at Notre Dame
Dec. 22  Tuesday  All grades due in PRISM by Noon at Saint Mary’s College
Jan. 3  Sunday  January graduation date (no ceremony)

Mission Statement of the University of Notre Dame

CONTEXT
This statement speaks of the University of Notre Dame as a place of teaching and research, of scholarship and publication, of service and community. These components flow from three characteristics of Roman Catholicism which image Jesus Christ, his Gospel, and his Spirit. A sacramental vision encounters God in the whole of creation. In and through the visible world in which we live, we come to know and experience the invisible God. In mediation the Catholic vision perceives God not only present in but also working through persons, events, and material things. There is an intelligibility and a coherence to all reality, discoverable through spirit, mind and imagination. God’s grace prompts human activity to assist the world in creating justice grounded in love. God’s way to us comes as communion, through the communities in which men and women live. This community includes the many theological traditions, liturgies, and spiritualities that fashion the life of the church. The emphasis on community in Catholicism explains why Notre Dame historically has fostered familial bonds in its institutional life.

A Catholic university draws its basic inspiration from Jesus Christ as the source of wisdom and from the conviction that in him all things can be brought to their completion. As a Catholic university, Notre Dame wishes to contribute to this educational mission.

THE MISSION
The University of Notre Dame is a Catholic academic community of higher learning, animated from its origins by the Congregation of Holy Cross. The University is dedicated to the pursuit and sharing of truth for its own sake. As a Catholic university, one of its distinctive goals is to provide a forum where through free inquiry and open discussion the various lines of Catholic thought may intersect with all the forms of knowledge found in the arts, sciences, professions, and every other area of human scholarship and creativity.

The intellectual interchange essential to a university requires, and is enriched by, the presence and voices of diverse scholars and students. The Catholic identity of the University depends upon, and is nurtured by, the continuing presence of a predominant number of Catholic intellectuals. This ideal has been consistently maintained by the University leadership throughout its history. What the University asks of all its scholars and students, however, is not a particular creedal affiliation but a respect for the objectives of Notre Dame and a willingness to enter into the conversation that gives it life and character. Therefore, the University insists upon academic freedom, which makes open discussion and inquiry possible.

The University prides itself on being an environment of teaching and learning that fosters the development in its students of those disciplined habits of mind, body, and spirit that characterize educated, skilled, and free human beings. In addition, the University seeks to cultivate in its students not only an appreciation for the great achievements of human beings but also a disciplined sensibility to the poverty, injustice, and oppression that burden the lives of so many. The aim is to create a sense of human solidarity and concern for the common good that will bear fruit as learning becomes service to justice.

Notre Dame also has a responsibility to advance knowledge in a search for truth through original inquiry and publication. This responsibility engages the faculty and students in all areas of the University, but particularly in graduate and professional education and research. The University is committed to constructive and critical engagement with the whole of human culture.

The University encourages a way of living consonant with a Christian community and manifest in prayer, liturgy, and service. Residential life endeavors to develop that sense of community and of responsibility that prepares students for subsequent leadership in building a society that is at once more human and more divine.

Notre Dame’s character as a Catholic academic community presupposes that no genuine search for the truth in the human or the cosmic order is alien to the life of faith. The University welcomes all areas of scholarly activity as consonant with its mission, subject to appropriate critical refinement. There is, however, a special obligation and opportunity, specifically as a Catholic university, to pursue the religious dimensions of all human learning. Only thus can Catholic intellectual life in all disciplines be animated and fostered. Notre Dame pursues its objectives through the formation of an authentic human community graced by the Spirit of Christ.

The University of Notre Dame
Notre Dame is at once a Catholic university, a national symbol, and an international community of religious faith, intellectual inquiry, and devotion to the powerless. Among its conspicuous features are its academic reputation, an elaborately designed and gold-domed administration building, a famous collegiate football team, a popular shrine to the Mother of God, two fascinating lakes, a pleasantly landscaped campus, and a spirited student body surrounded by an intensely loyal community of alumni and friends who unabashedly refer to themselves as the Notre Dame “family.”

The institution was founded on the site of an old Catholic missionary outpost in 1842. The founders were a small and impoverished band of French and Irish religious brothers whose leader was Rev. Edward F. Sorin, C.S.C., an impetuous, strong-willed, and apparently tireless priest. In a memoir titled My Notre Dame, Thomas Stritch, professor emeritus of American Studies and Notre Dame historian, wrote that Father Sorin “carved Notre Dame out of the Northern Indiana wilderness and by sheer strength of character made it go. He built and rebuilt, recruited students where he could, and gradually began the unique image Notre Dame still enjoys. In a college or university, reputation is everything. Somewhat Sorin developed a favorable one for Notre Dame, one that reverberated throughout the American Catholic world, the Eastern Seaboard as well as the Midwest. Long before football was invented, Notre Dame caught the imagination of American Catholics.”

Father Sorin was a member of the Congregation of Holy Cross, a then recently formed Catholic religious community that would own and administer the University from its foundation until 1967, when the University’s governance was legally transferred to a two-tiered, mixed board of lay and religious trustees and fellows. The University’s bylaws ensure that the Congregation will continue to exert a prominent influence on its administration. They stipulate, for example, that Notre Dame’s presidents must always be chosen from among the priests of the Congregation. The Congregation also ministers to the University it founded through the many Holy Cross priests serving on the University’s faculty, the counselors and chaplains who live with the undergraduate students in the residence halls, and the staff of the campus ministry office.

In 1972, five years after the change in governance, a new chapter of University history began to be written as the first undergraduate women were admitted to Notre Dame. A quarter of a century later, the majority of living Notre Dame alumni have been graduated from a fully coeducational institution. Obviously, many other aspects of the University have been changed by more than a century and a half of turbulent and unpredictable happenings in the Catholic Church and in American life and culture. Fires, outbreaks of infectious diseases, the Civil War, waves of European immigrants and refugees, Church controversies, the Great Depression, two world wars and several smaller bloodlettings, the civil rights movement, and other social convulsions in America, all have involved members of the Notre Dame family and have left deep and indelible imprints on the character and rich tradition of the institution. Rev. William Corby, C.S.C., a successor to Father Sorin, played a memorable national role as a Union chaplain at the Battle of Gettysburg; Rev. Julius Nieuwland, C.S.C., a scientist and faculty member, invented synthetic rubber; Notre Dame students were participants in a nationally publicized scuffle with a resurgent Ku Klux Klan; the University’s colorful football team and something of its campus atmosphere were enshrined in American history and
Student Life

Notre Dame offers its students a quality education, made possible by an excellent faculty, advanced research facilities, experienced administration, and a well-developed educational philosophy. Education here also extends far beyond coursework and research, to the development and formation facilitated by residential life, extracurricular activities, and a culture grounded in the University’s Catholic, Holy Cross mission, which seeks to educate both the mind and the heart.

The Division of Student Affairs fosters a rich community life, encourages student development through programming and its support of student groups, and nurtures the physical and emotional well-being of our students through a variety of student resources and services, including:

Residential Life. The University’s unique and cherished residential tradition is as old as the University itself. Our founder, Father Edward Sorin, established at Notre Dame the sort of residential ambience he had known at French universities. Nineteenth-century students slept, ate, studied, and attended classes en masse in wings of the Main Building. The regimen was strict: a prefect roused students at 6 a.m., supervised their prayer, meals, study, and recreation and returned them to bed 16 hours later.

Each of Notre Dame’s 29 undergraduate residence halls has an atmosphere and character of its own. Unique traditions in each hall generate a feeling of loyalty and camaraderie among its residents. Well-trained rectors, assistant rectors, and senior resident assistants provide multiple layers of pastoral care for the students who call a Notre Dame residence hall “home.” The residence halls form the base of many spiritual, athletic, social, and volunteer service activities.

First-year students are required to live on campus, and the majority of upper-class students elect to stay in their residence hall all four years. Approximately 80 percent of undergraduates live on campus. At the same time, a variety of off-campus housing is available in the South Bend area.

Spiritual Life. Notre Dame is a professedly Catholic place, which means—at its core—that all are welcome. Beliefs are strengthened by commitment to God, to one another, and to the human family in love and service, while at Notre Dame and throughout life.

The Office of Campus Ministry is rooted in Catholic tradition and inspired by the charism and spirituality of the Congregation of Holy Cross, and works to bring education, the Catholic faith and the hope of the Cross to students and the broader Notre Dame community. The office is dedicated to inspiring students to engage others about their faith and discovering their gifts for exercising leadership while at Notre Dame and within the wider Church. The office ministers faithfully and fervently to all students, regardless of denomination, faith tradition or level of education at the University.

Through undergraduate, graduate, liturgical and music ministries, Campus Ministry fosters spiritual growth, encourages participation in sacramental and liturgical life, supports personal prayer, provides opportunities for retreats, pilgrimages and service, aids in discernment, and guides students to become leaders in the practice of their faith.

Clubs and Organizations. Notre Dame has over 400 clubs and organizations for interested students, which encompass academic, athletic, cultural, performing arts, social service and special interest pursuits. For a complete listing, visit sao.nd.edu.

Recreational Sports. The Office of Recreational Sports (RecSports) is among the most comprehensive campus recreation programs in the country. Nearly 400 programs including aquatics, fitness, intramurals, special events and club sports are offered, providing a broad range of activities to meet the diverse interests of a sports-minded, active student body. RecSports also manages several recreation facilities including the Rolfs Sports Recreation Center (RSRC), Rolfs Aquatic Center (RAC), Rockne Memorial (the Rock) and St. Joe Beach on campus.

Career and Professional Development. Notre Dame is committed to helping students thoughtfully consider their choice of major and weigh their professional aspirations with their personal values through the discernment process. Resources include our world class Career Center, first-year courses and other opportunities offered throughout the Notre Dame undergraduate...
Intercollegiate Athletics

The University is committed to a well-rounded program for both men and women. The Fighting Irish athletic tradition, renowned throughout the United States, encompasses much more than football and basketball. Notre Dame boasts national contenders in many Olympic sports, including women's soccer, men's lacrosse, men's and women's fencing, and hockey; all of which ranked number one in the country at some point during the past six seasons. Since 2001, Notre Dame has won national championships in women's basketball ('01), women's soccer ('04 and '10) and fencing ('05 and '11). The women's intercollegiate athletic program, which has grown tremendously over the last 20 years, now includes 13 varsity sports (there are also 13 men's sports). Notre Dame women student-athletes compete in basketball, tennis, fencing, lacrosse, swimming and diving, volleyball, softball, golf, indoor and outdoor track and field, cross country, soccer and rowing.

The Notre Dame student body plays an important role in the success of teams that represent the University. Anyone who has attended a football pep rally or seen a top-ranked basketball team upset in the Purcell Pavilion knows why. The pride and loyalty displayed by "the greatest student body in the world" are a moving force that embodies the spirit of the Notre Dame community. Athletic contests at Notre Dame are an integral part of the social life as well as an opportunity for the athletically gifted to test their skills with the nation's best.

Family Programming is an integral part of the RecSports programming package. With roots tied deeply to Notre Dame's mission, Family Programming seeks to meet the recreational needs of Notre Dame's families in order to help families grow stronger physically, mentally, and spiritually. Even Fridays is one of our main family programs. Even Fridays occurs on the second and fourth Friday of every month. These are traditional family recreation opportunities such as bowling, swimming, game nights, and bike rides. All Even Friday events are from 5:30–7:30PM and are designed to reach a wide range of family ages and abilities. Family FIRST (Fitness Instruction, Recreation, & Sports Training) is our other main family program. Family FIRST classes focus more specifically on the fitness needs of families. Typical classes are yoga, martial arts, cardio, fixed cycling, and rock climbing.

FACILITIES

Notre Dame is home to some of the finest athletic facilities at any university. The 78,000-square-foot Rolfs Sports Recreation Center has a large state-of-the-art fitness room with more than 30 cardiovascular machines and a full complement of strength machines and free weights. The Rolfs also has a three-lane, 1/8 mile track; three courts for basketball, volleyball, and badminton; a rink-style court for soccer and inline hockey; and two activity rooms for dance, aerobics, and martial arts. In 2007–08, Rolfs Sports Recreation Center celebrated its 10th anniversary by adding new audio-visual technology in meeting rooms and installing a new "cardio theatre" in the fitness room to enhance participant experience.

The Rockne Memorial is legendary for its highly competitive pickup basketball games but also has 10 handball/racquetball courts, one combination squash/handball court, a swimming pool with a spectator gallery, a smaller pool for family use, a climbing wall, a weight room, a fitness room, and two rooms for dance and group exercise. In 2007–08, the Rockne Memorial added new audio-visual technology in the First Aid/CPR classroom, completed upgrading of all water fountains including cooling and filtration, created a "spinning studio" in the former racquetball court and upgraded to larger 50-pound washer and dryer equipment.

In addition to the nine-hole Notre Dame Golf Course, the 18-hole William K. and Natalie O. Warren Golf Course opened in the spring of 2000 on the northeast edge of campus. Other outside facilities include basketball courts in several locations, 14 outdoor tennis courts, and several multipurpose playing fields.

Built in 1968, Notre Dame's Joyce Center has been called one of the most complete sports complexes in the country. Not only is there a 9,149-seat basketball/football arena (Purcell Pavilion) but also a field house containing a two-lane track, boxing and weight rooms, and five volleyball courts. Elsewhere in the building are an auxiliary gym, two intramural gyms and a gym for fencing, six handball/racquetball courts, and two squash courts. The Rolfs Aquatic Center, with its Olympic-sized swimming pool, completes this complex.
The Spirit of Inclusion at Notre Dame

“Strangers and sojourners no longer.” (Ephesians 2:19)

The University of Notre Dame strives for a spirit of inclusion among the members of this community for distinct reasons articulated in our Christian tradition. We prize the uniqueness of all persons as God’s creatures. We welcome all people, regardless of color, gender, religion, ethnicity, sexual orientation, social or economic class, and nationality, for example, precisely because of Christ’s calling to treat others as we desire to be treated. We value gay and lesbian members of this community as we value all members of this community. We condemn harassment of any kind, and University policies proscribe it. We consciously create an environment of mutual respect, hospitality and warmth in which none are strangers and all may flourish.

One of the essential tests of social justice within any Christian community is its abiding spirit of inclusion. Scriptural accounts of Jesus provide a constant witness of this inclusiveness. Jesus sought out and welcomed all people into the Kingdom of God—the poor, as well as the wealthy, the slave as well as the free, the infirm as well as the healthy. The social teachings of the Catholic Church promote a society founded on justice and love, in which all persons possess inherent dignity as children of God. The individual and collective experiences of Christians have also provided strong warrants for the inclusion of all persons of good will in their communal living. Christians have found their life together enriched by the different qualities of their many members, and they have sought to increase this richness by welcoming others who bring additional gifts, talents and backgrounds to the community.

The spirit of inclusion at Notre Dame flows from our character as a community of scholarship, teaching, learning and service founded upon Jesus Christ. As the Word through whom all things were made, Christ is the source of the order of all creation and of the moral law which is written in our hearts. As the incarnate Word, Christ taught the law of love of God and sent the Holy Spirit that we might live lives of love and receive the gift of eternal life. For Notre Dame, Christ is the law by which all other laws are to be judged. As a Catholic institution of higher learning, in the governance of our common life we look to the teaching of Christ, which is proclaimed in Sacred Scripture and tradition, authoritatively interpreted by Church teaching, articulated in
Academic Profile

DEGREES AND ACADEMIC PROGRAMS

The University is organized into a First Year of Studies, four undergraduate colleges, an architecture school, a graduate school of four divisions; a graduate business school, a law school, and several graduate research study centers.

All incoming freshmen spend their first year in the College of First Year of Studies and then move into the college or school of their choice as sophomores—College of Arts and Letters, Mendoza College of Business, College of Engineering, College of Science, or School of Architecture.

In the 2014–15 academic year, the students enrolled in the Mendoza College of Business topped the undergraduate enrollment figures with approximately 1,979. There were 1,930 students in the College of Arts and Letters, 1,182 students in the College of Engineering, 1,156 students in the College of Science, and 128 students in the School of Architecture.

The College of Arts and Letters offers curricula leading to the degree of bachelor of fine arts in art studio or design and bachelor of arts majoring in:

- Africana Studies
- American Studies
- Anthropology
- Art, Art History, and Design
- Art Studio
- Art History
- Design
- Classics
- Arabic
- Classics
- Greek
- Latin
- Greek and Roman Civilization
- East Asian Languages & Cultures
- Chinese
- Japanese
- Economics
- English
- Film, Television, and Theatre
- Gender Studies
- German and Russian Languages and Literatures
- German
- Russian
- International Economics—Arabic
- International Economics—Chinese
- International Economics—German
- International Economics—Japanese
- International Economics—Romance Languages
- International Economics—Russian
- Irish Language and Literature
- History
- Mathematics (honors only)
- Medieval Studies
- Music
- Neuroscience and Behavior
- Philosophy
- Philosophy/Theology (joint major)
- Political Science
- Program of Liberal Studies
- Psychology
- Romance Languages and Literatures
  - French
  - Italian
  - Romance Languages and Literatures
  - Spanish
- Sociology
- Theology

The Mendoza College of Business offers the degree of bachelor of business administration with majors in:

- Accountancy
- Finance
- Information Technology Management
- Management Consulting
- Marketing

The College of Engineering offers curricula leading to degrees of:

- B.S. in Aerospace Engineering
- B.S. in Chemical Engineering
- B.S. in Civil Engineering
- B.S. in Computer Engineering
- B.S. in Computer Science
- B.S. in Electrical Engineering
- B.S. in Environmental Earth Sciences
- B.S. in Environmental Engineering
- B.S. in Environmental Geosciences
- B.S. in Mechanical Engineering

The College of Science offers degrees of bachelor of science majoring in:

- Applied and Computational Mathematics and Statistics
- Biochemistry
- Biological Sciences
- Chemistry
- Chemistry/Business
- Chemistry/Computing
- Environmental Sciences
- Mathematics
- Neuroscience and Behavior
- Physics
- Physics in Medicine
- Preprofessional Studies
- Science–Business
- Science–Computing
- Science–Education

Statistics

The School of Architecture offers the degree of bachelor of architecture (five-year program).

Supplementary majors may be taken only in conjunction with a full major. The Arts and Letters supplementary pre-health studies major provides students with an opportunity to complete a supplementary major in health-related science. Students may take supplementary majors/minors in departments of other colleges, but their dean may specify certain modifications in their curriculum. Undergraduates may obtain bachelor degrees in combination programs with other colleges in integrated five-year programs.

The course and program requirements for degrees are determined by the various colleges and schools.

These colleges are independent of one another and provide academic instruction within the various programs and departments. The dean of each college has authority, along with the college council, to determine minimum admission standards, requirements for a major and a degree from the program, and dismissal from the college and University.

The student who wishes to transfer from one college to another college within the University must have the approval of the deans of both colleges. The accepting dean has discretion regarding which credits are acceptable toward the degree in the new college.

**Dual Degree.** A program leading to two undergraduate degrees is distinct from a program in which a student receives one degree with two majors (such as a bachelor of business administration with a major in finance and a major in political science). Students should refer to the dual degree policies which are explained in each college's section of this Bulletin.

**Academic Governance.** The major source of academic governance within the University is the Academic Council, made up of administrators, faculty, and students from each of the four colleges and chaired by University President Rev. John I. Jenkins, C.S.C. All major decisions concerning academic policy and scheduling throughout the University are made by this board.

Along with the Academic Council, each college is served by a college council representing its faculty and students. The purpose of the council is to suggest and plan academic programs and to make decisions regarding academic policy within the college. Most of the colleges also have a student advisory council whose function is to elicit student ideas and concerns regarding college policy, to formulate those ideas, and to make suggestions to the college council.

**Advising.** All first-year students enter the College of First Year of Studies and are assigned an advisor from its faculty. The First Year of Studies offices are located at 219 Coleman-Morse Center. During their first year all students will receive the advising from their First Year of Studies advisor. Students
University Requirements

Application must be made to the University Registrar for a degree.

The receipt of a baccalaureate degree from the University requires the satisfactory completion of the curriculum. This includes:

University Requirements

(a) Only courses marked as “Univ. Req.” via the online Class Search can be used to fulfill a University requirement. These courses can be viewed for a particular academic term by selecting the “Class Search” link within insideND or by visiting the home page of the Office of the Registrar and clicking on the “Class Search” link.

(b) In addition to these university requirements, each college has its own requirements that must be completed. Without prior permission from the appropriate college dean, special studies and directed readings do not satisfy college requirements.

(c) First-year students are required to complete a University seminar; Writing & Rhetoric course; two semester courses in mathematics; two semester courses in science; one semester course chosen from: history, social science, philosophy, theology, fine arts; and two semester courses for the Moreau First Year Experience. The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy, theology, mathematics, or science. Foreign language is not a University requirement, but it is required in the programs of the College of Arts and Letters, the College of Science, and the School of Architecture. Three credits in a social science course (excluding economics) and three credits in a College of Arts & Letters course (excluding economics) are required in the Mendoza College of Business.

(d) Satisfactory work in a major or a concentration program of study.

(e) A minimum cumulative average of 2.000.

(f) Completion of a minimum of 50% of the degree credit hours at the University (not less than 60 credit hours) and a minimum of 75% of the degree credit hours (not less than 90 credit hours) must be earned after high school graduation through college and university courses.

(g) Enrollment in the last semester on the main university campus. Under extraordinary circumstances this requirement can be waived by the dean (or the dean’s designee) of the student’s college.

Central to undergraduate education at Notre Dame is the core curriculum, a set of University required courses intended to provide every undergraduate with a common foundation in learning. Detailed rationales for each requirement can be found at http://corecurriculum.nd.edu/.

Writing and Rhetoric. This requirement aims to better prepare students to read and write effectively. Students learn to identify an issue amid different and conflicting points of view in what they read; frame and sustain an argument that not only includes the analysis and exposition of information, but also establishes what is at stake in accepting their views; provide relevant evidence to support a given point of view; identify and analyze potential counterarguments; develop basic skills for writing a research proposal, for conducting original research (i.e., through archival research, surveys, or interviews), and for using the library’s print and electronic information resources; and learn to use and recognize conventions of language in writing academic papers.

University Seminars. The University Seminar is a distinctive opportunity for every first-year student to experience a small, writing-intensive seminar taught by a member of the University’s teaching and research faculty. With a class size of no more than 18, students have the opportunity to regularly engage in class discussions around a particular issue, problem, or topic in a given field of study. Students study the paradigms, content, methodology, or problems of a particular discipline while learning the conventions for academic writing within the parameters or discourse of that field. Each seminar also fulfills one of the University requirements in fine arts, literature, history, social science, philosophy, theology, mathematics, or science.

Mathematics. Students develop quantitative reasoning skills through the disciplined study of mathematics. Solving problems fosters deductive reasoning, while drawing conclusions from mathematical analyses promotes inductive reasoning. Students learn to convey mathematical concepts and relationships through symbols, formulas, and analytical manipulations. By modeling quantitative behavior in business, science, engineering, and the social sciences, students gain a deeper understanding of the vital role that mathematics plays in modern society.

Science. Through the study of science, students learn how knowledge of the natural world is built on observation, experiment, and evidence. They develop a basic understanding of the scientific method, including an appreciation for the interplay between theory and experiment, and how an advance in one drives the other. In addition to acquiring a working knowledge of fundamental concepts and laws in a particular field of scientific study, students learn to analyze and interpret simple sets of quantitative data and to use mathematical structures to solve problems and create models. Finally, students gain an appreciation of the important interdependence among science, technology, and society.

History. In the study of history, students explore human beings as individuals, groups, nations, or even civilizations in an attempt to comprehend the human experience. Students come to appreciate and understand the processes of continuity and change over time, and they discover how people shaped, altered, or succumbed to their environment or how, in turn, environment channeled historical experience. Thinking critically about the connections between specific events or processes and an array of contingent phenomena, students look for causes and effects, relationships, and relevance.

Social Science. Students discover the diversity of societies and world cultures, the complexity of the choices facing human beings, and the potential social and political consequences of the paths people take. Through lectures, classroom experiences, or local fieldwork, students gain an understanding of the research methods, processes and procedures used to examine human behavior. From the perspective of different social science disciplines, students uncover the competing organizations and institutional
opportunities for realizing one's conceptions of justice and the good life.

Theology. Theology, the "science of God," represents "faith seeking understanding." Through the first required course, students arrive at an understanding of the distinctive nature of the discipline of theology; encounter the authoritative texts that serve to constitute the self-understanding of Christian tradition as a response to God's self-revelation; become aware of the constitution, transmission, and interpretation of these texts within the tradition; and, develop their own skills of textual interpretation in conversation with the tradition. Through the second required course, students are introduced to the riches of the Christian theological tradition; develop their theological skills, facilitating the critical retrieval of the Christian heritage; and, come to appreciate better their rootedness in the ongoing tradition of the believing community.

Philosophy. Students engage in logical reflection on the fundamental problems of human existence and prepare to take their place as citizens capable of critically evaluating arguments which bear on public affairs. In the first course in philosophy, students read philosophical texts and identify the main lines of argument and counterargument, reason about philosophical questions, and defend their own philosophical positions. In the second course in philosophy, students explore a subset of philosophical questions or authors of special interest to them. By studying seminal philosophical texts like those that have contributed to the Catholic tradition and those that have presented challenges to it, students learn to think in depth about the problems posed by a life of faith.

Fine Arts. Students approach works of art from critical perspectives—as viewers or listeners they apply the analytical tools needed to realize the insights and pleasures that artistic texts and works offer. Students may also create their own works of art, and in so doing gain insights as to how artists interact with their media and how creativity meshes with understanding. Through study of the fine arts, students gain an appreciation of the arts as a component of lifelong learning, and they learn how the arts speak of their societies and how societies speak through their arts.

Literature. Students gain an appreciation of the literariness of the texts they read by recognizing the formal, stylistic, and rhetorical practices, as well as the inter-relations among these. By identifying connotations and denotations, figures of speech and thought, and conventions of genre, students comprehend the way in which a given literary text is embedded in a particular social, cultural, literary, or intellectual context. They analyze the claims of competing interpretations of a literary text, especially with reference to the historical position or theoretical allegiances of the interpreter. Students think more critically about themselves and about their own place in culture or society.

Moreau First Year Experience. This two-semester course sequence helps new students to make a meaningful transition to collegiate life at Notre Dame by integrating their academic, co-curricular, and residential experiences. Through weekly small group discussions, students will explore university resources and opportunities and will examine topics such as: orientation to university life; community standards; health and wellness; strategies for academic success; spiritual life; discernment; and cultural competence.

Graduation Rate

Of the students entering a full-time, first-year bachelor degree-seeking program in the fall of 2008, 96 percent graduated within six years. The complete IPEDS Graduation Rate Survey may be found in the Office of Strategic Planning and Institutional Research.

Honors at Graduation. In the undergraduate colleges, a degree will be granted with highest honors (summa cum laude) if the student’s grade point average ranks among the top 5,000 of those students graduating from the student’s college or school; for a student whose grade point average ranks among the top 15,000 of the student’s college or school, a degree will be granted with high honors (magna cum laude); for a student whose grade point average ranks among the top 30,000 of the student’s college or school, a degree will be granted with honors (cum laude). A student who meets the requirements of more than one category of honors will be awarded only the highest honor for which that student qualifies.

Academic Code of Honor

The University of Notre Dame is a scholarly community in which faculty and students share knowledge, ideas, and creative works. Notre Dame’s Academic Code of Honor expresses our common commitment and moral responsibility to represent accurately and to credit the contributions of every individual.

The Student Guide to the Academic Code of Honor (honorcode.nd.edu) describes the standards of personal academic conduct that all Notre Dame undergraduates pledge to follow and also outlines the set of procedures by which violations of the Honor Code are reported and adjudicated.

Before matriculation, each entering student must pledge:

As a Member of the Notre Dame community, I will not participate in or tolerate academic dishonesty.

The Undergraduate Academic Code

The Undergraduate Academic Code governs the attainment of academic credit and degrees by undergraduate students at the University of Notre Dame. The Academic Council of the University ratifies and retains both authority and responsibility for review and amendment of the Code. Its administration and interpretation fall under the aegis of the Officers, the Deans, and the Registrar of the University. A copy of the Undergraduate Academic Code can be found online at http://provost.nd.edu/information-for-faculty/faculty-handbook-academic-code/.

Using Notre Dame Email

The University of Notre Dame uses its email system as the official means to communicate important information to students. Students are expected to check their email regularly and are responsible for reviewing the information and responding to any inquiries or action items that they receive via email. This is particularly important as traditionally paper-based processes are increasingly replaced by electronic communications. Further details about the University of Notre Dame’s management of email can be found online at http://oithelp.nd.edu/email-and-calendaring/about-email.

Hesburgh Libraries

The Hesburgh Libraries is a diverse system featuring a main library that houses specialty libraries and eight branch libraries located throughout the Notre Dame campus. In an effort to further its core mission of “connecting people to knowledge,” the Libraries offer a vast array of expertise, services, resources and spaces to ensure the academic success of the student community. Whether through the expertise of subject librarians and specialty services or the access to various sources of knowledge, we continuously evolve to meet the ever-changing needs of Notre Dame students in the 21st century.

We often hear students say, “If only I had known sooner how much help I could get from the Libraries….my job as a student would have been much easier!” Reference and Subject Librarians offer research assistance in all academic disciplines and are available face-to-face, by email, phone and chat. Check out our website at library.nd.edu for a list of subject specialists, resource guides and special programs to help focus your efforts and develop your research skills. For example, *Pot of Gold*, an interactive web-based tutorial, is an important resource that helps students learn to efficiently locate, retrieve, evaluate and use new information. This is just one of our many programs that build information and digital literacy, essential lifelong skills for all students in every area of scholarship.

During the academic year, the Hesburgh Library is open every day, with 24-hour access 5 days per week. For more information about the services, spaces and collections at the Hesburgh Libraries visit library.nd.edu.

Main Library. The iconic Theodore M. Hesburgh Library, which just celebrated a milestone 50-year anniversary, opened in 1963 as “Memorial Library” and was one of the largest collegiate libraries of its day. Home to many core services and resources as well as reference and subject librarians, the Hesburgh Library continues to serve as the flagship building of the Hesburgh Libraries system here at Notre Dame. In addition to the general research collections on open stacks, three specialty Libraries and Centers reside within the Hesburgh Library building:

Hesburgh Library
(574) 631-6679
library.nd.edu

Center for Digital Scholarship
1st Floor NE, Hesburgh Library
(574) 631-4900
library.nd.edu/cds

Medieval Institute Library
7th Floor, Hesburgh Library
(574) 631-5724
library.nd.edu/medieval

Rare Books and Special Collections
102 Hesburgh Library
(574) 631-0290
rarebooks.library.nd.edu

Branch Libraries. Library services have expanded beyond the building adorned with the Word of Life mural to include 8 branch libraries:

Architecture Library
117 Bond Hall
(574) 631-6654
library.nd.edu/architecture

Mahaffey Business Library
L001 Mendoza College of Business
(574) 631-9098
library.nd.edu/business

Chemistry-Physics Library
231 Nieuwland Science Hall
(574) 631-7203
library.nd.edu/chemistry

Engineering Library
149 Fitzpatrick Hall
(574) 631-6665
library.nd.edu/engineering

Kellogg Kroc Library
318 Hesburgh Center for International Studies
(574) 631-8534
library.nd.edu/kelloggkroc

O’Meara Mathematics Library
001 Hayes-Healy Center
(574) 631-7278
library.nd.edu/mathematics

Radiation Chemistry Reading Room
105 Radiation Research Building
(574) 631-6163
library.nd.edu/radlab

Visual Resources Center
216 Riley Hall
(574) 631-4273
library.nd.edu/vrc

Subject Librarians. More than 40 Subject Librarians provide invaluable expertise and support services for the teaching, research and scholarship initiatives of the University community. library.nd.edu/subjects

Services offered by Subject Librarians include research consultations, materials purchase requests, and bibliographic instruction. They are responsible for collection development and management in one or more subject areas, including selection, communication with subject department faculty, de-selection, and preservation. Subject Librarians are also your liaison to specialty research services within the Hesburgh Libraries and throughout the campus community. Begin your student career at Notre Dame by initiating and building a relationship with your Subject Librarian as soon as possible. You can connect face-to-face, by email, phone or chat.

Center for Digital Scholarship. The Center for Digital Scholarship is located in Hesburgh Library’s northeast corner on the 1st floor. The Center (CDS) leverages state-of-the-art technologies, enabling students and faculty to explore new methodologies, analyze complex data and share research results in ways never before possible. The Center is nimble, capable of rapidly adopting new technologies as they emerge—transforming how teaching, research and scholarship are performed here at Notre Dame.

With partnerships campus-wide, the Center for Digital Scholarship serves as a “hub” that enhances the teaching, learning, and research process in every academic discipline. The Center empowers and equips our next generation of scientists and scholars to accelerate their research process, create new knowledge in a digital environment, and make a more profound impact in the world.

Center Expertise. The Center offers cross-disciplinary library expertise, including a Metadata Librarian, GIS Librarian, Data Analysis Librarian, Copyright Librarian, and a Digital Initiatives Librarian. Subject Librarians are also important contributors to and conduits for the Center’s impact. To meet specialty needs, The Center has developed partnerships with various campus research providers, such as the Center for Research Computing, the Center for Creative Computing, and the Office of Research. Our structure ensures that areas of expertise will evolve to meet the changing demands of our University community for research and scholarship in the 21st century.

Center Services. Current services include GIS (Geographic Information Systems) Consultation; Data Usage and Analysis; Text Mining and Analysis; Data Management Planning; Metadata Services; Copyright Services; Digitization Services and Referral Services. Workshops and introductory topic sessions will be available on a regular and recurring basis, or by request.

Interlibrary Loan. Interlibrary Loan (ILL) is a complimentary service for ND students that procures from other libraries research materials not available in the University’s collection. Delivery of electronic materials is provided through your ILL account interface—be sure to take time to create your Interlibrary Loan account to ensure service when you need it.

Document Delivery. Document Delivery is a service that can be used to retrieve materials from any of our collection locations for delivery to your preferred library location for pickup at service desks at any of the above locations. Articles are delivered via email unless you indicate a preference for paper copies; paper copies are delivered to the service desk of your choice within the Hesburgh Libraries system.

Senior Thesis Camp. Thesis Research and Writing Camps are designed to provide structured and supported time for you to focus on your research output. The camps are 5-day events offered during fall mid-term break. Meals are provided to allow your time and attention to be focused upon learning new research and writing techniques, applying time management tips, meeting members of your student community, exchanging ideas, and building your community beyond your own discipline.
Writers Consultations. Libraries feature on-site consultation with the Writing Center. The Writing Center has evening hours within the Hesburgh Library Sunday–Thursday during the regular academic year.

Additional Services. In the Libraries provide access to overhead and flatbed document scanning; ask-a-librarian online, phone and email services; remote access to research materials such as electronic books, journals and databases.

Academic Resources

Faculty. In 2014–15, Notre Dame’s instructional faculty numbered 1,119 full-time and 190 part-time. Other faculty, such as administrative, professional specialists, librarians, and research fellows, numbered 304 full-time and 7 part-time. Ninety-one percent of the full-time instructional faculty have terminal degrees; 91 percent of them have doctorates. Ninety-eight percent of the full-time instructional faculty are lay persons. (The faculty to student ratio is 1:10.)

Institutes, Centers, and Laboratories. The many and diverse institutes, centers, and laboratories maintained by the University are an indication of the spectrum of scholarly interest that students are able to join in and profit from.

Institutes, centers, and specialized research laboratories at Notre Dame include the Helen Kellogg Institute for International Studies, the Joan B. Kroc Institute for International Peace Studies, the Keough-Naughton Institute of Irish Studies, the Liu Institute for Asia and Asian Studies, the Erasmus Institute, the Nanovic Institute for European Studies, the Institute for Latino Studies, the Medieval Institute, and the Radiation Laboratory. Other institutes, centers, and similar entities are the Center for Environmental Science and Technology (CEST); the Center for Advanced Scientific Computing; the Center for Astrophysics at Notre Dame University (CANDU); the Center for Applied Mathematics; the Center for Molecularly Engineered Materials; the Center for Molecular Nanoscale Science and Technology; the Center for Civil and Human Rights; the Center for Continuing Education; the Center for Philosophy of Religion; the Center for Research in Business, and the Center for Research in Banking; the Center for Social Concerns; the Center for the Study of Contemporary Society, which embraces the Gerontological Research Center, the Laboratory for Social Research, the Multinational Management Program, and the Philosophic Institute; the Charles and Margaret Hall Cashwa Center for the Study of American Catholicism; the Ecumenical Institute (Jerusalem); the Energy Analysis and Diagnostics Center; the Center for Nano Science and Technology; the Environmental Research Center (UNDERC); the W.M. Keck Center for Transgene Research; the Walther Cancer Research Center; the Institute for Church Life; the Center for Ethics and Culture; the Institute for Scholarship in the Liberal Arts; the Jacques Maritain Center; the Reilly Center for Science, Technology and Values; the Urban Institute for Community and Educational Initiatives; the Thomas J. White Center for Law and Government; and the William and Katherine Dever Program in Dante Studies.

Other laboratories include the Hessert Center for Aerospace Research, the Air and Water Quality Analysis Laboratory, the Aquatic Biology Laboratory, the Biofluid Mechanics Laboratory, the Catalysis Laboratory, the Fluid Dynamics Laboratory, the Bernard J. Hank Family Environmental Research Laboratory, the LOBUND Laboratory, the Parasitology Laboratory, the Solid State Material and Devices Laboratory, the Vector Biology Laboratory, and the Zebrasfish Research Facility. These research centers contain specialized facilities and equipment.

Research. The University receives more than $119 million in sponsored research and sponsored program funds annually. Active programs of scholarly work occur in discipline-oriented departments in the humanities, fine arts, science, social science, engineering, law, and business areas of the University. In addition, University institutes and centers facilitate research across departmental lines.

The Office of the Vice President for Research is responsible for assisting faculty in various aspects of sponsored program activity, technology transfer, and research compliance. It reviews and transmits all formal proposals, monitors the status of proposals, negotiates contracts and grants, accepts awards for the University on behalf of faculty members, and is responsible for the administrative management of all grants, contracts, and cooperative agreements supporting research, training, service, and equipment. The Office of the Vice President for Research also provides guidance in seeking external sponsored program support, assistance in proposal and budget preparation, and support in all areas of electronic research administration, research compliance, and technology transfer.

The Office’s website is designed to assist faculty from all academic units in the identification of funding sources. Current issues related to sponsored program activity as well as proposal preparation and award management are also highlighted.

Inquiries regarding this information should be addressed to the Office of the Vice President for Research, 317 Main Building: http://or.nd.edu/.

Snite Museum of Art. The museum features collections that place it among the finest university art museums in the nation.

The Mesoamerican collection highlights the comprehensive, exceptional holdings of Olmec works, the earliest Mexican culture.

The Kress Study Collection has been the foundation for developing Italian Renaissance art, which includes a rare Ghirlandaio altarpiece panel. The Baroque collection highlights works by Bloemaert, Coppél, and van Ruisdael. Selections from the Feddersen Collection of 70 notable Rembrandt van Rijn etchings are exhibited frequently; and the 18th-century collection includes such masters as Boucher, Vigée-Lebrun, Reynolds, Conca, and de Mura.

The critically acclaimed John D. Reilly Collection of Old Master to 19th-Century Drawings includes examples by Tintoretto, Tiepolo, Oudry, Fragonard, Ingres, Gericaud, Miller, and Degas. The Noah and Muriel Burtin Collection of 19th-Century French Art is the foundation of one of the museum’s major strengths, featuring paintings and drawings by Corot, Boudin, Couture, Courbet, and Gerome.

The Decorative and Design Arts Gallery spans the 18th through 20th centuries and exhibits early porcelains from Sevres and Meissen. Exceptional ceramics, furniture, glass, and silver pieces represent both the Arts and Crafts and Art Nouveau styles of the 19th century in addition to the Art Deco and Bauhaus modern movements. Twentieth-century-designed pieces by Wright, Stickley, and Hoffman are also on view.

The Janos Scholz Collection of 19th-Century European Photography contains some 5,500 images of persons and places taken during the first 40 years of camera use.

Native American art focuses on early 19th-century, Plains Indian-painted war records and costumes; it also features Mimbres- and Anasazi-painted ceramics from the prehistoric Southwest.

The developing American collection has 19th-century landscapes by Durand and Inness and portraits by Eakins, Sargent, and Chase. Among highlights of the West and the Southwest regions are paintings by Higgins, Ufer, Russell, and Remington.

Traditional works of African art such as textiles, masks, and sculptures are in the collection as well.

Twentieth-century styles and movements are seen in paintings by Miro, O’ Keeffe, Avery, Glackens, Pearlstein, and Seuly. Modern sculptures by Barlach, Zorach, Cornell, Calder, and Rickey complement the paintings and drawings.

Croatian-American sculptor Ivan Mestrovic, who taught at Notre Dame from 1955 until his death in 1962, created many works that remain on campus. Major pieces can be seen in the museum, at the Eck Visitors’ Center, and at the Basilica of the Sacred Heart.

Loan exhibitions from major museums and private collections mounted by the Snite are offered regularly in the O’Shaughnessy Galleries, as is the annual exhibition of student art by candidates for MFA and BFA degrees. Special events and programs include lectures, recitals, films, and symposia held in the Annenberg Auditorium and in the galleries.

More information is available by calling the Snite Museum of Art at 574-631-5466, or by visiting their website at sniteartmuseum.nd.edu.
Admission

This year we expect more than 18,500 students will apply for admission to Notre Dame's entering class. Most of the applicants will have the academic aptitude and preparation necessary to complete a degree program at the University. The Committee on Admissions will decide which applicants will be among the 2,000 included in the class. To understand how this is done, it is first necessary to know the procedure for applying to Notre Dame.

ACADEMIC PREPARATION

Most applicants will have taken and successfully completed the most challenging program of studies available in their high schools. We strongly recommend a curriculum including four years each of English, mathematics, science, history, and foreign language.

All successful applicants are admitted to the First Year of Studies. However, entrance requirements differ slightly for students planning to pursue studies in science and engineering. Sixteen units are required of all students as described below.

For students intending to choose a major in the College of Arts and Letters or the Mendoza College of Business, excluding the arts and letters premedical/prendental and the combined arts-engineering program, the 16 units must be distributed as follows:

- English: 4
- Algebra, advanced algebra, trigonometry, and geometry: 3
- Foreign language: 2
- History: 2
- Science: 3
- Additional English, mathematics, science, history, social studies, and language courses: 3

For students intending to major in the College of Science, the College of Engineering, the School of Architecture, the arts and letters premedical/prendental program or the combined arts-engineering program, the distribution must be:

- English: 4
- Algebra, advanced algebra, trigonometry, and geometry: 3
- Advanced mathematics (calculus or precalculus): 1
- Foreign language: 2
- History: 2
- Chemistry: 1
- Physics: 1
- Additional English, mathematics, science, history, social studies, and language courses: 2

The unit is the credit for a year of satisfactory work in an accredited secondary school. The two language units required must be in the same language. In some cases, the Committee on Admissions waives the foreign-language requirement.

APPLICATION PROCESS

First-year students are admitted to the University of Notre Dame for only the fall semester of each academic year. A student who wishes to be considered must have the following items on file: (1) a completed application, (2) an official high school transcript, (3) a letter of evaluation from a secondary school teacher and (4) an official report of scores on the SAT or ACT.

Application. The application is your opportunity to tell us about yourself. Include any information about your personal and academic circumstances that will help us evaluate your application.

The University of Notre Dame is a member of the Common Application. Prospective first-year students can access the online application and writing supplement at www.commonapp.org. Prospective students can register for a Common Application account beginning August 1.

High School Transcript. Your high school must submit an official copy of your transcript, including a listing of your senior-year courses.

Evaluation. The Office of Undergraduate Admissions requires two letters of evaluation from every applicant. We do not encourage additional letters of recommendation. Your guidance counselor will complete a counselor evaluation, which helps us gauge your performance in your high school environment. Usually guidance counselors will include a short personal letter of evaluation. It will assess your performance in class as well as your character and personality. You may choose any high school teacher to write your letter of evaluation, as long as he or she has taught you in an academic subject area (math, science, English, social science, or foreign language) and knows you well.

Testing. All applicants are required to take the SAT or ACT. The test results are part of the evaluation process for admission. You must take one of these tests no later than January of your senior year.

The College Board code for the University of Notre Dame is 1841, and the ACT code for Notre Dame is 1252.

If you have taken other standardized tests (SAT Subject Tests, AP, IB, TOEFL), please include the results with your application. We will use these scores as supplementary information, although they cannot be used in place of the SAT or ACT.

Anyone who wishes to continue the study of French, German, Italian, or Spanish at Notre Dame can take the SAT Subject Test in that language. The results will be used for placement purposes.

Students enrolled in home-school programs or in high school programs that substitute certification of competencies for grades must take three SAT Subject Tests: science, history, and foreign language.

DECISION AND NOTIFICATION PLANS

Students seeking admission to Notre Dame's entering class must choose to have their applications reviewed under one of two procedures.

Early Action: November 1

Notre Dame has a Restrictive Early Action program.

- A student applying Early Action to Notre Dame may apply to other Early Action programs.
- A student applying Early Action may not apply to any college or university that has a binding Early Decision program.
- Students do not indicate a first-choice preference by applying early, and still may wait until May 1 to indicate their decision to attend.

Students who apply in the Early Action process receive an admissions decision before Christmas. Three decisions are possible:

- Admission to the University
- Denial of admission to the University
- Deferral of decision until regular action

Students admitted to Notre Dame have until the May 1 deadline to decide whether they would like to confirm their attendance at the University. A student is denied admissions in Early Action, then the process ends and he/she cannot apply later during the Regular process. If a student is deferred, the Admissions Committee has decided to review the application further in the Regular Action process, and so “rolls over” the application to Regular Action.

Because the Admissions Committee is unable to extend all of its offers of admission in the Early Action process, it is highly conservative when making Early Action admission decisions. The Admissions Committee advises students to apply in the Early Action process only if they are in the very top ranges of our applicant pool. Further clarification of Early Action standards for this year can be gained by seeing the Admissions Counselor who may travel near your area in the autumn or by contacting the Office of Undergraduate Admissions at admissions@nd.edu.

Regular Action: January 1

The Regular Action process at Notre Dame is also non-binding. Three decisions are possible following the Regular Action process:

- Admission to the University
- Denial of Admission to the University
- Waitlist

Students will receive one of these decisions by the beginning of April and, if admitted, are required to send in a confirmation card and deposit by May 1.

Students who are denied admission to the University may choose to attend another four year institution for one or two years and then apply to Notre Dame as a transfer student.

Waiting List. Some applicants will be notified that they have been placed on a waiting list and will receive a final decision during the period of mid-May to mid-June. If placed on the waiting list, you should make plans to attend another institution because we
cannot predict how many applicants will gain admission from the waiting list in a given year. Students admitted from the waiting list have two weeks to submit a $500 advance payment, confirming their intention to enroll in the first-year class.

The Campus Visit. We welcome visits from prospective applicants. Our staff members meet with groups of students and parents to discuss admissions policies and procedures, the First Year of Studies program, degree programs, student life, financial aid, and other topics of interest.

Appointments for weekday sessions are available from March through early December. Appointments for Saturday morning sessions are available from early September to late April. You should call our office for an appointment or register online at least two weeks in advance of your visit. Campus tours are available following information sessions when classes are in session and on most weekdays of the summer. Be sure to call us for an appointment before you confirm any travel plans. Our telephone number is 574-631-7505. Appointments may be made online at admissions.nd.edu/visit/. The Office of Undergraduate Admissions is closed on certain holidays and holiday weekends.

THE SELECTION PROCESS

Notre Dame seeks to enroll intelligent, inquisitive, energetic, and compassionate students who will bring a diversity of talents and backgrounds to our campus. In selecting the class, the Committee on Admissions evaluates thoroughly each applicant's personal and academic credentials.

Academic Achievement. In evaluating a student's academic achievement, the Committee on Admissions considers a student's curriculum, class rank, concentration of talent in the high school, test scores, teacher evaluation, and essays. Most students admitted to Notre Dame have taken the most demanding courses available, rank among the top students in their schools, and have done quite well on standardized tests. We could cite the average rank and median test results of our admitted students, but that the chances of being approved to major in business after the first year will be extremely limited.

Such students will be advised that they should reconsider enrolling in Notre Dame if they are only interested in majoring in business. If a student who is pre-approved to major in business later decides not to do so, she or he will be free to major in any other college or school at Notre Dame.

Admission

STUDENTS WITH DISABILITIES

Each year Notre Dame admits a number of academically talented students with various disabilities. Once enrolled here, students with disabilities may use a variety of services intended to reduce the effects that a disability may have on their educational experience. Services do not lower course standards or alter essential degree requirements but instead give students an equal opportunity to demonstrate their academic abilities. Students can initiate a request for services by registering with the Office for Students with Disabilities (OSD) and providing information that documents his or her disability. Individual assistance is provided in selecting the services that will provide access to academic programs and facilities of the University.

OSD provides services to students with mobility, hearing, or visual impairments, as well as students with learning disabilities. The services that are typically used include alternative formats of textbooks, modifications in the way students take exams, and readers, note takers, and academic aides. The University maintains accessible rooms in nine residence halls for students with physical disabilities.

All Notre Dame students must supply the necessary initiative and determination to discover and utilize the available campus resources. Students with disabilities will find that a truly creative ability to solve daily problems may be as important to success as developing alternative skills through academic experience. We invite admitted applicants to visit Notre Dame and become familiar with the facilities here before making a final college choice.

For more information, contact the Office for Students with Disabilities at 574-631-7157 or 574-631-7173 (TTY).

INTERNATIONAL STUDENTS

Notre Dame welcomes students from around the world. International students enhance the cultural and intellectual atmosphere of our community. The admissions process for international students who are not Permanent Residents of the United States differs slightly from the process for U.S. citizens. To complete an application, an international student must submit a Certification of Finances. This document is provided on our website: http://financialaid.nd.edu/prospective-students/applying/international-students/. Additionally, as English proficiency is critical to a student’s academic success at the University, students who do not speak fluent English must take the Test of English as a Foreign Language (TOEFL) or IELTS. The SAT or the ACT is also required for admission. Students who have difficulty locating a test center that administers the SAT or ACT should contact the American Embassy or an American school in their area.

International students wishing to apply for our limited need-based financial assistance must complete both the Certification of Finances and a CSS Foreign
Fees and Expenses

In the undergraduate colleges, the University is essentially a residence school for full-time students. As many students as accommodations will allow are housed in the campus residence halls. First-year students are obliged to live on campus. Permission to live off campus must be obtained from the dean of students. The fees listed below are for the academic year 2015–16 and are subject to change according to factors operating within the economy that affect universities as well as the country as a whole.

CAMPUS RESIDENT STUDENT. The basic fee for the academic year 2015–16 ranges from $30,881.50 to $31,137.50 per semester. This fee entitles the student to instruction and tuition for the semester; meals in the University dining halls; a room in a residence hall; the use of the general library and the departmental libraries; admission to many lectures, concerts, and entertainment in Washington Hall and DeBartolo Performing Arts Center; the use of the Rockne Memorial, the Joyce Center, the Rolfs Sports Recreation Center, the athletic fields, and the University golf course (there is a nominal fee for the use of the golf course); a copy of each issue of the Scholar's pride (a local student publication); and a copy of the Dome (the yearbook of the University) in the second semester.

OFF-CAMPUS STUDENT. The tuition and fees for the full-time off-campus student is $23,964.50 per semester for the academic year 2015–16, which entitles the student to instruction and tuition for the semester and those things listed above under the total fee for the campus resident student. For the off-campus student requiring board and lodging at the University Health Services in time of illness, there is a daily charge.

PART-TIME UNDERGRADUATE STUDENT. An undergraduate degree-seeking student must be in full-time status each semester. Any undergraduate student who is enrolled in at least 12 credit hours is considered full-time. A student who believes that special circumstances may require him or her to carry fewer than 12 semester hours in any semester (including a senior in his or her last semester) must seek approval to be part-time from his or her respective college. This request and conversion, if approved, must be made before the sixth class day of a fall or spring semester. If permission is granted, the dean will notify the Office of Student Accounts of the change of status and an adjustment to tuition will be made if necessary. There will be no adjustment of tuition unless permission is given by the dean and the class schedule is changed before the sixth class day of the fall or spring semester.

UNDERGRADUATE FEES:

- Technology Fee: $125 per semester.
- Health Center Access Fee: $75 per semester.
- Student Activity Fee: $47.50 per semester.
- Observer Fee (daily student newspaper): $6 per semester.

The above fees do not cover the cost of textbooks, stationery, etc., which is estimated at $1,050 per year for the average undergraduate student.

The technology fee provides partial funding for the University’s enterprise-wide technology infrastructure, which provides all students access to the Internet, e-mail, courseware, campus clusters, ResNet, and a wide array of the latest software. This fee provides for the growth in student services, such as course and degree requirements, Web Registration, and value-added Internet related capabilities.

The health center access fee provides students access to all services at the University Health Center and University Counseling Center, including 24-hour medical care and counseling/mental health assistance, alcohol and drug education programs, and health-education and wellness programs. This fee provides partial funding to address increasing student health and wellness needs, along with funding to maintain health facilities.

STUDENT ACCIDENT AND ILLNESS INSURANCE PLAN. To assist in financing any medical or hospital bills, a student health insurance plan is available to students. Notre Dame requires all international students to have health insurance coverage comparable to the University Plan; therefore, they are automatically enrolled and charged for the student health insurance plan.

Students who do not wish to participate in this plan, and have other comparable health insurance coverage, may submit a request to waive the health insurance. Please note that the waiver request must be submitted annually by the published deadline or the student will be responsible for paying the cost of the insurance. For information on the current insurance rates and the waiver request process, please visit the University Health Services website at https://uhs.nd.edu/insurance-billing/.

Information regarding the University-sponsored plan is mailed to the student’s home address in July and is also available online. For additional information, please visit the University Health Services website at https://uhs.nd.edu/insurance-billing/. Additional information is available in the University Health Services by calling the Office of Insurance and Accounts at 574-631-6114.

The cost of the premium for the 2015–16 academic year is detailed on the University Health Service website at https://uhs.nd.edu/insurance-billing/.

Payment Regulations. IRISHpay is the University’s online student account statement and payment system available to both students and their authorized payers. Statements are generated on a monthly basis. The fall semester student account statement is issued in mid-July; the spring statement is issued in early December. These statements list basic semester charges for tuition, fees, and room and board. Additional statements for personal charges, including bookstore, health services, laundry and other miscellaneous charges are issued on a monthly basis. All fees and required deposits are to be paid in advance of each semester.

Student Aid Application. Based upon a review of academic credentials, financial need, and availability of scholarship resources, a student may be considered for financial assistance. Financial aid packages may include student loans, student employment, and University scholarship assistance.

TRANSFER ADMISSION

Some students are admitted to Notre Dame with advanced standing. If you wish to apply for admission as a transfer student, you must have obtained the equivalent of at least 27 semester hours of transferable credit, and maintained a cumulative “B” average in all courses. The competition is such that the average GPA for admitted students is significantly higher.) The committee gives strong preference to applicants who have completed Notre Dame’s first-year course requirements. Online courses, distance-learning courses, USAFI courses, and credits earned through the College Level Examination Program (CLEP) are not transferable.

To be eligible for an undergraduate degree, you must complete a minimum of 50% of the degree credit hours at the University (not less than 60 credit hours) and a minimum of 75% of the degree credit hours (not less than 90 credit hours) must be earned after high school graduation through college and university courses. Please consult the Academic Code for details.

As a transfer applicant you must provide the Office of Admissions with (1) a completed application form, (2) an official transcript from each college attended along with course descriptions, (3) a final high school transcript, and (4) an official SAT or ACT score.

If you are interested in transferring to Notre Dame, please note that we cannot guarantee on-campus housing to transfer students. Off-campus housing close to the University is available; students are offered campus accommodations from a waiting list if rooms become available.

You must submit your transfer application for the fall semester by March 15. The Transfer Admissions Committee will notify you of its decision between June 1 and July 1.

The deadline for the spring semester is November 1. The committee will notify you of its decision between December 1 and January 5.

Please contact us to request the appropriate application form if you are interested in applying for transfer admission. Write to:

Office of Undergraduate Admissions
Attention: Transfer Admissions Committee
220 Main Building
University of Notre Dame
Notre Dame, IN 46556-5602

Students may apply online via our website: admissions.nd.edu.
The University does not accept credit card payments. Remittance should be made payable to the University of Notre Dame. Notre Dame students taking certain courses at Saint Mary's College that carry special fees will be billed for such charges according to Saint Mary's rates.

Separation Regulation. Any graduate, law, graduate business*, or undergraduate student who at any time within the school year wishes to separate from the University should contact the Office of the Registrar. To avoid failure in all classes for the semester and to receive any financial adjustment, the separating student must obtain the appropriate clearance from the dean of his or her college and from the assistant vice president for Residence Life.

Prior to the first day of classes, a full-tuition credit will be made. On or after the first day of classes, the tuition fee is subject to a prorated adjustment/credit if the student (1) separates voluntarily for any reason on or before the last day of course discontinuance at the University, or (2) is suspended, dismissed or involuntarily separated by the University, for any reason, on or before the last day for course discontinuance at the University, or (3) is later obliged to separate because of protracted illness, or (4) separates involuntarily at any time because of military service, provided no credit is received for the classes from which the student is forced to separate.

Upon return of the student forced to separate for military service, the University will allow him or her credit for that portion of tuition charged for the semester in which he or she separated and did not receive academic credit.

Room and board charges will be adjusted/credited on a prorated basis throughout the entire semester. Students receiving University and/or Federal Title IV financial assistance who separate from the University within the first sixty percent (60%) of the semester are not entitled to the use or benefit of University and/or Federal Title IV funds beyond their separation date. Such funds shall be returned promptly to the entity that issued them, on a pro rata basis, and will be reflected on the student’s University account.

This Separation Regulation may change subject to federal regulations.

*Executive MBA students are subject to a different Separation Regulation and Tuition Credit Calculation, both of which may be obtained from the Executive MBA Program.

Payment Plan for Budgeting Educational Expenses. The University makes available a monthly payment plan administered by Higher One. This plan allows families to make payments over a 9- or 10-month period rather than make two larger payments, one at the beginning of each semester.

The annual fee to enroll in the program is $40. For additional information or to enroll in the plan, call Higher One toll-free at 877-282-5933 or visit their website at: https://tuitionpay.higherone.com/nd.

Cost of Attendance. The estimated average 2015–2016 Notre Dame undergraduate student expense budget includes:

<table>
<thead>
<tr>
<th>Cost Category</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition and Fees</td>
<td>$47,929</td>
</tr>
<tr>
<td>Room &amp; Board*</td>
<td>13,846</td>
</tr>
<tr>
<td>Total</td>
<td>61,775</td>
</tr>
</tbody>
</table>

In addition to the direct costs listed above, each student should plan for the cost of books, supplies, transportation, and personal expenses. Annual increases in costs should be anticipated. Further details may be obtained from the Office of Financial Aid website.

Student Financial Aid

The Office of Student Financial Services, which includes the Offices of Financial Aid, Student Accounts, and Student Employment, administers all student financial aid programs, a broad array of financial products and services, and payment plans, to assist in helping to make a Notre Dame education affordable for all families.

Principles. Notre Dame subscribes to the principles of student financial aid administration as endorsed by the College Scholarship Service (CSS) of the College Board and the National Association of Student Financial Aid Administrators. Notre Dame, along with the hundreds of other institutions, states, and organizations that follow these principles, includes demonstrated financial need as a criterion in awarding financial aid. In addition to a student’s academic and personal credentials, financial need is an essential factor in the awarding of the University’s scholarship/grant programs.

Among the many myths that exist about the financial aid process, perhaps the most common is that which claims that only the low-income family is eligible for financial aid. Unfortunately, as a result, many students do not even apply for aid because it is assumed that the family income is too high. Although income is an important factor in determining a family’s ability to pay for college, it is only one of the many factors considered. The size of the family, age of parents, number of family members in college, assets and liabilities, and other expenses are also considered.

Inherent in the concept of need is the premise that the primary responsibility for financing a college education lies with the family. Notre Dame assumes that families will contribute to the student’s education to the extent they are capable.

The difference between the family responsibility and the student’s total collegiate expenses for a given year is financial need. Another way of expressing this concept is outlined below:

\[
\text{Cost of Attendance} - \text{Family Responsibility} = \text{Financial Need}
\]

Cost of Attendance. The estimated average 2015–2016 Notre Dame undergraduate student expense budget includes:

<table>
<thead>
<tr>
<th>Cost Description</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition and Fees</td>
<td>$47,929</td>
</tr>
<tr>
<td>Room &amp; Board*</td>
<td>13,846</td>
</tr>
<tr>
<td>Total</td>
<td>61,775</td>
</tr>
</tbody>
</table>

*Typical residence hall accommodations provide for housing with one or more roommates. The current cost of a single room (no roommate) is approximately $500 more annually.\n
Because of its national student body traditionally enrolled at the University, the transportation allowance will generally range currently from a minimum of $500 to about $1,000 with $750 representing the approximate midpoint.

Family Responsibility. The University assumes parents will contribute to their children’s education to the extent they are capable as long as the student is enrolled as an undergraduate. Notre Dame cannot accept financial responsibility for students whose parents discontinue this support for reasons other than ability to pay. It is important to note that the family includes both the parents and the student. Students seeking financial aid will be expected to contribute toward their educational expenses. This self-help may include resources from a portion of their own assets, as well as earnings resulting from work prior to and during their enrollment at Notre Dame. In a very real sense, students who borrow also contribute to their costs from their future earnings.

Financial Need. Financial need is the difference between the estimated cost of attendance for the school year and the estimated family responsibility. Because several factors in this evaluation are subject to change from one year to the next, this evaluation is made annually for each student who applies for financial aid.

Notre Dame is committed to offering a financial aid package that is designed to meet the demonstrated financial need of a student through our need-based aid programs. In most cases this may include opportunities for scholarships, loans, and/or work. The total financial aid received by a student may not exceed the total cost of attendance.

Financial Aid Application Process. The CSS/Financial Aid PROFILE Application and the Free Application for Federal Student Aid (FAFSA) serve as the official applications for need-based financial aid, including University and Club scholarship programs. Unless otherwise noted, additional applications are not required to be considered for all scholarship/grant programs the Office of Financial Aid administers.

A student should not wait for an admission decision before submitting the FAFSA and PROFILE. Applications for financial aid must be properly filed every year.

The FAFSA is available at fafsa.gov and should be filed between January 1 and February 15 for prospective first-year students, January 1 and April 25 for continuing students, and January 1 and March 31 for prospective transfer students. Students applying for federal loans and grants and not Notre Dame University aid need to complete only the FAFSA.
The federal school code for identifying Notre Dame on the FAFSA is 001840. The PROFILE is available at collegeboard.org and should be filed by January 1 and February 15 for prospective first-year students, January 1 and April 25 for continuing students, and January 1 and March 31 for prospective transfer students. The PROFILE is required for University need-based scholarship consideration. Notre Dame’s CSS code for the PROFILE is 1841.

If a student’s parents are divorced or separated, the noncustodial parent must submit the CSS Noncustodial PROFILE application. The College Board will collect the noncustodial parent’s information through an online process; details will be emailed to applicants by CSS immediately following receipt of the PROFILE from the custodial parent.

The University of Notre Dame participates in the College Board’s Institutional Documentation Service (IDOC) which is accessible at idoc.collegeboard.org.

CSS/Financial Aid PROFILE applicants will receive communication directly from IDOC regarding the submission of supporting documentation. Families should be prepared to submit this supporting documentation to IDOC. The priority deadline for prospective students is March 1, and April 30 for continuing students and prospective transfer students.

Verification. Federal regulation requires the University to verify and document certain information provided by students and their families in relation to an application for assistance. Such documents may include copies of federal income tax returns and W-2 forms. The Office of Financial Aid reserves the right to request additional documentation and/or clarification of a family’s financial situation.

Because the amount of financial aid awarded to an individual reflects the family financial situation, the University, as a matter of policy, does not publicly announce the amount of aid awarded. All information received by the Office of Financial Aid is treated as confidential.

All forms of aid awarded by the University are subject to adjustment based upon additional awards received by the student in excess of the established need. Students receiving aid from the University of Notre Dame must notify the Office of Financial Aid of all other forms of educational assistance from financial aid sources other than those directly administered by the office.

International Students. Financial aid opportunities for first-year international students are limited and at present, there is no funding to assist international transfer students. International students should be prepared to finance, either privately or through a sponsor, the full cost of their Notre Dame education. The International Student Certification of Finances must be submitted at the time of application for admission, illustrating and documenting sufficient financial support to meet the projected cost of a Notre Dame undergraduate education. The International Student Certification of Finances is available from the Office of Undergraduate Admissions website at admissions.nd.edu.

Prospective first-year students wishing to be considered for need-based financial assistance must first complete an International Certification of Finances along with a CSS/Financial Aid PROFILE adapted for international students. Based upon a review of academic qualifications, financial need, and availability of student aid resources, an applicant may be considered for financial assistance, including a self-help component of a student loan and student employment, along with University scholarship assistance. The Certification of Finances and the CSS/Financial Aid PROFILE will be reviewed along with the student’s application for admission. Additional information is available on the Office of Admissions website.

FINANCIAL AID PROGRAMS

There are numerous types of financial aid opportunities for students. The process outlined above is that which the student follows for all aid programs administered by the University’s Office of Financial Aid.

Most aid programs will fall into one of three categories of assistance: scholarships/grants, student employment, or loans.

SCHOLARSHIPS/GRANTS

Scholarship/grant assistance is a type of aid that is free of repayment obligation.

Merit Scholarships. Notre Dame offers a limited number of merit scholarships to a limited number of students accepted for admission as a first-time incoming freshman, who demonstrate exceptional accomplishment, leadership, commitment to service, and intellectual promise. The value of merit-based scholarship opportunities range from $10,000 to $25,000 annually. Typically, these scholarships are renewable for four years and recipients may be invited to participate in leadership development and enrichment opportunities as an additional benefit of their awards.

Selections for merit-based scholarships are made as part of the admission process and most scholarships do not require separate application for consideration, however, eligible students may be contacted directly with a request for additional information prior to selection. The Hesburgh-Yusko Scholars Program requires an additional application which is outlined at http://hesburgh-yusko.org. Recipients of merit-based awards are notified of their selection in early April.

Students who receive both merit scholarship and need-based scholarship from the University are subject to reduction or elimination of need-based federal and institutional financial aid in accordance with federal regulations and institutional policy.

Notre Dame Scholarships. All students accepted for admission, who have completed the financial aid process as outlined above, are automatically considered for University scholarships. The level of University assistance is first based on demonstrated financial need, and then academic performance, and will thus vary from student to student.

Renewal of University scholarship assistance is based upon a review of students’ academic performance at the University and their annually demonstrated financial need. Based on the students’ admitted class level, University scholarship consideration is given for a maximum of eight semesters (10 semesters for the Architecture program and Combination Five-Year Engineering Program with the College of Arts and Letters). Students electing to remain at Notre Dame to pursue a second major, second degree, or dual-degree program are not eligible for University scholarships.

Students not receiving scholarship/grant assistance may be considered in subsequent years based on financial need, academic performance, and the availability of University scholarship resources.

Notre Dame Club Scholarships. All applicants who complete the FAFSA and the PROFILE are considered for club scholarships. Students will be advised by participating clubs if any additional steps (e.g., interview, essay) might be required by the local club.

Similar to University scholarships, club scholarships are awarded on the basis of demonstrated financial need. Since Notre Dame meets the demonstrated financial need of the student, the receipt of any club scholarship not listed in the Financial Aid Notification (FAN) will likely result in an adjustment to the financial aid award.

Federal Pell Grant. The Pell Grant is a nonrepayable grant made available by the federal government to eligible undergraduate students enrolled in a degree-granting program.

Notre Dame cooperates with the U.S. Department of Education in administering this program. Applicants must be U.S. citizens or permanent residents of the United States.

The FAFSA serves as the application for the Pell program. Eligibility is determined by the Federal Methodology formula uniformly applied to all applicants. After applying, the student will receive a Student Aid Report (SAR) from the federal government. Eligible students will be notified by the University’s Office of Financial Aid. In 2015–16, the grants range from $626–$5,775.

Federal SEO Grant. The Federal Supplemental Opportunity Grant (SEOG) assists students demonstrating exceptional financial need in accordance with guidelines and funding allocations established by the Department of Education and the
Office of Financial Aid. SEOG awards range from $100–$4,000 annually.

State Scholarships and Grants. Although programs vary from state to state, all applicants are encouraged to seek information about the possibility of obtaining a state scholarship/grant as a student at Notre Dame. Details regarding application procedures, eligibility requirements, amounts, etc., vary from state to state. Among the states that currently award scholarship/grant assistance to Notre Dame students are Indiana, Rhode Island, and Vermont.

Reserve Officer Training Corps (ROTC). Air Force, Army, and Naval (Navy & Marine Corps) ROTC scholarships are available on a competitive basis, and the military services award them based on merit and personal qualifications. ROTC scholarships may be awarded up to the full cost of tuition, books, and fees, plus an in-school subsistence. Students should apply during the fall semester of their high school senior year. Students who do not receive an ROTC scholarship as incoming first-year students may compete for a limited number of on-campus scholarships available to ROTC midshipmen or cadets. Further information is available through high school guidance offices, military recruiting offices, and the ROTC Departments of the University.

Other Federal Assistance Benefits. Certain students may be eligible for special forms of federal agency benefits. Among these agencies are Americorps, the Veterans Administration, the Office of Vocational Rehabilitation, and the Bureau of Indian Affairs. Further details may be obtained through the appropriate local office of the particular agency.

Private Scholarships. Many private organizations provide financial assistance to Notre Dame students. Scholarship information may be obtained by contacting civic, professional, religious and other community organizations. The College Board’s Scholarship Search and fastweb.com provide scholarship search information. Caution is advised with respect to the use of fee-based scholarship search enterprises.

STUDENT EMPLOYMENT

Part-time employment opportunities, including those offered through the need-based Federal Work-Study and Paid Community Service Programs as well as other programs, are intended to help the student pay for personal and other related educational expenses.

The amount of employment eligibility indicated in the FAN is an estimate of potential earnings and not a guarantee of employment or earnings. Student employees average 10–12 hours of work per week.

STUDENT FINANCIAL AID

LOANS

Borrowing a student loan is a matter that should be undertaken with the greatest of deliberation and with full knowledge of the significant responsibilities involved. In addition, all borrowers are advised of their loan repayment options and obligation upon entering and leaving the University. In an effort to provide additional information regarding a borrower’s rights and responsibilities, the Office of Financial Aid offers general counseling to all borrowers.

Federal Perkins Loan. The Federal Perkins Loan is a need-based loan made by the University. The interest rate is fixed 5% and there are no origination fee or insurance fees. The loan is interest free while the student is enrolled in school on at least a half-time basis during the nine-month grace period following enrollment. There is a $5,500 annual loan limit; and $27,500 maximum aggregate undergraduate borrowing limit; the University typically limits the annual award to $4,000.

Federal Direct Student Loan Program. Direct Loans, from the William D. Ford Federal Direct Loan Program, are low-interest rate loans available to eligible students to help offset the cost of higher education. The lender is the U.S. Department of Education. The Direct Loan Program includes the subsidized and unsubsidized loans. For additional information on the terms and conditions of Direct Loans visit studentloans.gov.

Private Loans. After exhausting the opportunities available from the federal aid programs, many students will consider private loan programs as a source of funding. The terms and conditions of these programs vary, and as such, students are encouraged to review the details of the programs before selecting a private loan program. Private loans are not eligible for loan consolidation programs made available for federal student loans. Interest rates, fees (both at the time of borrowing and at repayment), credit checks, and annual and aggregate loan limits require careful evaluation by students as consumers. As always, taking on debt for any reason should be done deliberately and only for amounts needed. Additional information may be obtained from the Office of Financial Aid or its website.

OTHER

Monthly Payment Plan. The University makes available an interest-free monthly payment plan administered through Higher One. This plan allows families to make payments over a 9- or 10-month period versus making two larger payments at the beginning of each semester or borrowing.

For additional information or to enroll in the plan, call Higher One at (877) 282-5933 or visit their website at tuitionpay.higherone.com/nd.

Federal Direct PLUS. Parents of dependent students who have a valid FAFSA on file and whose student is enrolled at least half time may apply for the Direct PLUS Loan. The parent must be a U.S. citizen or permanent resident. Direct PLUS Loan applications are subject to Department of Education credit review. If a PLUS Loan is denied, the student may request additional unsubsidized Direct Loan funds by contacting the Office of Financial Aid. For additional information on the terms and conditions of Direct Loans visit studentloans.gov. Note: program is subject to federal legislative changes.
Standards of Progress for Recipients of Financial Aid

The United States Department of Education (Higher Education Act of 1965, as amended) requires students to maintain satisfactory progress toward completing their degree in order to receive financial aid. Recipients of federal, state, institutional and private resources, including grants, scholarships, work-study, and student and parent loans, are subject to these standards. Satisfactory academic progress requirements for financial aid recipients are not the same as the University’s requirements for academic good standing.

Satisfactory academic progress is reviewed annually after spring grades are posted by the Registrar’s Office to determine financial aid eligibility for the subsequent summer and academic year. Students returning to the University following a withdrawal or dismissal will be evaluated at the time of readmission. Students whose program is one academic year in length or shorter will be evaluated at the end of each enrolled term.

Students are required to maintain the minimum cumulative grade point average, be on pace to graduate and complete their degree within a maximum time frame as defined below. All semesters of enrollment are reviewed regardless of whether aid was received for those semesters.

Minimum Cumulative Grade Point Average (GPA)

Students are required to meet the following minimum cumulative GPA requirements:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Minimum Cumulative GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Year Freshmen</td>
<td>1.75</td>
</tr>
<tr>
<td>Upperclass Students</td>
<td>2.0</td>
</tr>
</tbody>
</table>

Pace to Graduate

Students are required to earn a minimum of 67% of cumulative hours attempted to stay on pace to graduate. Pace is calculated by dividing the cumulative number of hours earned by the cumulative number of hours attempted.

Maximum Time Frame

Students are required to complete their degree requirements within a maximum time. Based on an undergraduate student’s admitted class level, University scholarship and state aid consideration is given for a maximum of eight semesters (ten semesters for the architecture program and combination five-year engineering program with the College of Arts and Letters). Students needing additional time to complete their degree requirements due to a change in major, second major, dual degree or retaking coursework are not eligible for University scholarship.

Students may receive federal aid consideration for a maximum time frame measured by attempted credit hours equal to 150% of the published length of their degree program. Once a student reaches his/her total maximum time frame, or it has been determined he/she cannot complete their degree within this time frame, they are no longer eligible to receive federal aid.

Credits and Grades Used to Determine Pace and Maximum Time Frame

All coursework attempted, including repeated and withdrawn coursework recorded on the student’s academic record as of the seventh class day, is considered when calculating Pace and Maximum Time Frame and determining whether the student meets satisfactory academic progress.

Course/Grade | Included in Earned Credits | Included in Attempted Credits
---|---|---
AP (Advance Placement) Credits | X | X
Credit by Exam | X | X
Transfer Credits | X | X
Grades: A+, A, B+, B, C+, C, D+, D, P, S | X | X
Withdrawn courses after seventh class day | X

The University’s Grade Scale is available through the Office of the Registrar.

Failure to Maintain Satisfactory Academic Progress

Failure to maintain one or more of the requirements outlined above will result in financial aid ineligibility. Students will be notified via University email of their failure to meet satisfactory academic progress requirements and subsequent aid suspension.

Students can regain their financial aid eligibility once they have raised their cumulative GPA to 2.00 and have earned hours to put them back on pace to graduate (earned 67% of cumulative hours attempted) within the maximum time frame. Students can also regain financial aid eligibility if they have an appeal approved based on the process below.

Denied Appeals/Students Who Choose Not to Appeal

If a student does not complete the appeal process within 10 days of notification or if an appeal is denied, he/she will be notified via University email and remain ineligible for financial assistance until satisfactory academic progress is reestablished.

Appeals will not be accepted after 10 days and the student will be responsible for all charges on their University account. Financial aid will not be provided retroactively.

• Mitigating circumstances that prevented the student from meeting the requirements of academic progress (e.g., death in the family, student illness or injury, other personal circumstances). Mitigating circumstances do not include: withdrawing from classes to avoid failing grades, pursuing a second major or degree, etc.
• Documentation that supports the student’s basis for the appeal
• Steps the student has taken/will take to ensure future academic success
• Anticipated graduation date
• If it is not possible for the student to achieve satisfactory academic progress with one successful probationary semester, the student must also submit an academic plan signed by their academic advisor. This plan should outline the student’s academic goals for each semester (e.g. number of credit hours and cumulative GPA) that will enable the student to meet the requirements of academic progress at a specified future point in time.

Upon receipt of all completed appeal materials, the student will be considered for a probationary semester of financial aid in order to reestablish satisfactory academic progress. Students whose appeal is approved will be placed on financial aid probation. Academic progress will be evaluated at the conclusion of each enrollment term for students on financial aid probation.

Students who fail to meet the requirements for academic progress for their probationary semester or do not complete the requirements of their academic plan will again be ineligible for financial aid and subject to the appeal process.

Students who meet the requirements for academic progress for their probationary semester will resume good standing and again be evaluated at the conclusion of the following spring semester.

Appeal Process

At the time of notification regarding failure to meet satisfactory academic progress requirements, the student will have 10 days to submit a written appeal outlining mitigating circumstances. The appeal letter should include the following:

• Anticipated graduation date
• Mitigating circumstances that prevented the student from meeting the requirements of academic progress (e.g., death in the family, student illness or injury, other personal circumstances). Mitigating circumstances do not include: withdrawing from classes to avoid failing grades, pursuing a second major or degree, etc.
• Documentation that supports the student’s basis for the appeal
• Steps the student has taken/will take to ensure future academic success
• Anticipated graduation date
• If it is not possible for the student to achieve satisfactory academic progress with one successful probationary semester, the student must also submit an academic plan signed by their academic advisor. This plan should outline the student’s academic goals for each semester (e.g. number of credit hours and cumulative GPA) that will enable the student to meet the requirements of academic progress at a specified future point in time.

Upon receipt of all completed appeal materials, the student will be considered for a probationary semester of financial aid in order to reestablish satisfactory academic progress. Students whose appeal is approved will be placed on financial aid probation. Academic progress will be evaluated at the conclusion of each enrolled term for students on financial aid probation.

Students who fail to meet the requirements for academic progress for their probationary semester or do not complete the requirements of their academic plan will again be ineligible for financial aid and subject to the appeal process.

Students who meet the requirements for academic progress for their probationary semester will resume good standing and again be evaluated at the conclusion of the following spring semester.

Denied Appeals/Students Who Choose Not to Appeal

If a student does not complete the appeal process within 10 days of notification or if an appeal is denied, he/she will be notified via University email and remain ineligible for financial assistance until satisfactory academic progress is reestablished.

Appeals will not be accepted after 10 days and the student will be responsible for all charges on their University account. Financial aid will not be provided retroactively.
Center for Social Concerns

The Center for Social Concerns brings students, faculty, and community partners together to address community needs through analysis and reflection that leads to ethical action and social relationship. Its extensive domestic and international programming provides students with opportunities for community-based learning, community-based research, and service addressing issues of poverty and injustice.

- Students examine social, moral, and ethical issues from various perspectives through the lens of Catholic Social Teaching.
- Students choose from seminars and programs built around national and international immersion experiences that fall into two categories: fall, winter, and spring break seminars such as the Appalachia Seminar and Urban Plunge; and Summer Service Learning Projects.
- Students interested in community-based research work with faculty and community partners, as part of an existing course, an internship, a senior thesis, or special studies class on a research project that aims to generate social action and social change.
- Students participate in leadership development and senior transition programs and seminars to help with career discernment (currently 10 percent of seniors enter a year or more of full-time service or civic engagement following graduation).
- The Center cosponsors justice education events, workshops, and panel discussions with campus partners.
- The Center partners with over 60 social service and advocacy organizations to offer students diverse volunteer and learning opportunities.
- Visit the Center for Social Concerns at http://socialconcerns.nd.edu/

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Center for Social Concerns. Course descriptions can be found by clicking on the subject code and course number in the search results.

Reserve Officers Training Corps Programs

The University of Notre Dame offers the opportunity to combine the pursuit of an academic degree with earning an officer’s commission in either the United States Army, Navy, Marine Corps, or Air Force. Students enrolled in any of the colleges of the University may participate in the Reserve Officers Training Corps (ROTC). Selection of courses in the student’s academic major is independent of those selected for ROTC.

The College of Arts and Letters and the College of Business Administration accept a maximum of 12 free elective credits from the 30000- and 40000-level military sciences only. Credit from the 10000- and 20000-level courses does not count toward the degree requirements and must be subtracted from the total number of degree credits listed on the transcript.

In the College of Engineering, ROTC students who complete the ROTC program are permitted a maximum of six credits of upper-level air, military or naval science as substitutes for specified degree requirements determined by the department. More than three credits may be substituted for history or social science. All air, military or naval science credits not so substituted are not credited toward degree requirements in programs.

In the School of Architecture, ROTC students are permitted a maximum of six credits of 40000-level air, military or naval science courses as substitutes for electives within the 163 credit hours required for the bachelor of architecture degree.

The College of Science will count a maximum of six credit hours of upper-level (30000- or 40000-level) ROTC courses toward the 124-credit-hour requirements. These courses will be counted as free electives.

MILITARY SCIENCE

Chair and Professor:
Lt. Col. Christopher Pratt

Instructor:
Cpt. Raymond Mockus
Mgs. Phillip Harrison
Sfc. Matthew Lemon

As one of the premier Army ROTC programs in the country, the department’s mission is to educate, train, develop, and inspire participants to become officers and leaders of character for the U.S. Army and the nation. The program does this through a combination of classroom instruction, leadership labs, and experiential learning opportunities focused on developing the mind, body, and spirit of participants. These opportunities are designed specifically to enhance character and leadership ability in the students/cadets and to allow them to practice the essential components of leadership: influencing, acting, and improving. Participants become members of the Fighting Irish Cadet Battalion and complete a planned and managed sequence of classroom courses and practical exercises intended to develop each participant into what an officer must be—a leader of character, a leader with presence, and a leader of intelligence—to enable them to reach their full potential as individuals and as effective leaders of groups. The program affords students an excellent opportunity to serve and focuses on the role of Army officers in the preservation of peace and national security, with particular emphasis placed on ethical conduct and the officer’s responsibility to society to lead, develop themselves and others, and achieve success. The experience culminates ideally with participants earning commissions as second lieutenants in the Active Army, Army Reserve, or Army National Guard. As an organization committed to lifelong learning, participants may elect to pursue one of the Army’s numerous opportunities for follow-on postgraduate study as well.

Student Awards and Prizes.

The Dixon Award. A cash award presented to an outstanding senior who has displayed exceptional performance during the annual Dixon Challenge.

George C. Marshall Award. An award given annually to the top cadets in cadet command. Winners participate in national summer with some of nation’s highest ranking leaders.

Commander’s Award. A U.S. officer’s sabre given to the two cadet battalion commanders of the year by the Notre Dame Army ROTC Battalion Commander.

Patrick Haley Award. A wristwatch presented annually to the cadet who attains the highest academic grade point average.

Dr. Michael McKee Award. A cash award presented each year to the outstanding member of the battalion’s Drill Team and/or Honor Guard.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Military Science (Army ROTC). Course descriptions can be found by clicking on the subject code and course number in the search results.

To Table of Contents
NAVAL SCIENCE

Chair and Professor:
CAPT John Carter, USN

Associate Professor:
CDR Frederick Landau, USN

Assistant Professors:
Maj M. Regan Jones, USMC
LT Kristofer Yost, USN
LT Victor Perez, USN
LT Daniel Morden, USN
LT Sean Bakey, USN

The mission of NROTC is to educate, train, and screen officer candidates to ensure they possess the moral, intellectual, and physical qualities for commissioning and the leadership potential to serve successfully as company grade officers in the U.S. Navy and Marine Corps. The NROTC Scholarship Program fills a vital need in preparing young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps.

Non-NROTC students should consult with their college dean or advisor to determine if a Naval Science course will count toward graduation.

Additional NROTC Curriculum Requirements.
In addition to the Navy Science requirements, NROTC scholarship students are required to complete other specified university courses. These additional requirements are taken as a part of the student’s field of study or as degree electives, depending upon the college in which enrolled. Students will be notified of such requirements prior to joining the NROTC Program.

Student Organizations and Activities.
All NROTC students are integrated into the Midshipman Battalion organization. In addition to participation in all other university organizations and activities for which eligible, NROTC students may participate in specific NROTC organizations and activities such as the Color Guard, intramural athletic teams, the NROTC Unit newspaper and yearbook, and the planning of the Naval Leadership Weekend national conference.

Student Awards and Prizes.
The Chief of Naval Operations Distinguished Graduate Award. The annual recognition of the top graduating midshipman.

The Edward Easky-Smith Award. A sword is awarded to one of the top graduating Navy or Marine Option Midshipmen who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

The 1st LT Vincent J. Naimoli, USMC Award. A sword is awarded to one of the top graduating Navy or Marine Option Midshipmen demonstrating 110 percent dedication and effort in academic achievement, student activities, and leadership.

The George C. Strake Award. A sword is awarded to the top graduating Navy Option Midshipman for his or her dedication, leadership, esprit, and positive attitude throughout the four years at Notre Dame.

The Colonel Brian C. Regan, USMCR Award. A sword is awarded to the top graduating Marine Option Midshipman for his or her superior leadership and esprit de corps throughout the four years at Notre Dame.

The Captain John A. McGurty Jr., USNR, Award. A sword is awarded to one of the top graduating Navy or Marine Option Midshipmen who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

The Chicago Navy League Award. A sword is awarded to one of the top graduating Navy Option Midshipmen who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

Gallagher-Snider Award. A sword is awarded to a first class Navy or Marine Option Midshipman who displayed outstanding academic achievement, superior military bearing, and exceptional leadership and physical fitness throughout their four years at Notre Dame.

Numerous other awards are presented annually by various professional and patriotic organizations to recognize excellence in academic achievement and military aptitude.

COURSE DESCRIPTIONS
NROTC students take a total of 22 credits of Naval Science, one course one each semester. All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Naval Science (ROTC). Course descriptions can be found by clicking on the subject code and course number in the search results.

AEROSPACE STUDIES

Chair and Professor:
Colonel Frank J. Rossi, USAF

Assistant Professors:
Major John H. Pack, USAF
Captain John M. Hofmann, USAF

The Air Force Reserve Officer Training Corps (AFROTC) Detachment 225 is a premier educational and training program designed to give men and women the opportunity to become world-class leaders as Air Force officers while completing an undergraduate four-year academic degree. The AFROTC Program develops leadership and management skills students need to become effective and trusted leaders in the 21st century. In return for challenging and rewarding efforts, we offer the opportunity for advancement, education and training, and a sense of pride that comes from serving in the United States Air Force. Upon completion of the AFROTC program students are commissioned as second lieutenants in the United States Air Force. Following commissioning there are excellent opportunities for additional education in a wide variety of academic fields.

Student Organizations and Activities. All Air Force ROTC cadets are given opportunities to participate in a variety of extracurricular activities to develop their leadership skills. Activities available for AFROTC cadets include the Arnold Air Society (AAS), oriented toward service to the local community, AFROTC Career Day, Veterans Day Vigil, Junior Parents weekend, annual Flying Irish Basketball Tournament, intramural and varsity athletics, University bands and cheerleading activities as well as the Honor Guard. The Honor Guard performs at campus and community functions while developing individual drill proficiency. Foreign language programs, engineering programs, and cultural leadership studies are occasionally available during the summer.

Student Awards and Prizes.
The Notre Dame Air Force Award, and Air Force officer’s sword, are presented to the top graduating senior in Air Force ROTC.

The Niel Dubé Award is presented to the senior class Arnold Air Society member who has contributed the most to furthering the ideals and goals of the society within the University and local community.

The Paul Robérge Award, named in memory of an alumnus of the Notre Dame ROTC program, annually recognizes the top pilot candidate in the Professional Officer’s course.

Other awards are sponsored by various local and national organizations to recognize excellence within the cadet corps.

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Air Force-Aerospace Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

* Leadership Laboratory is open to students who are members of ROTC or who are eligible to pursue a commission as determined by the professor of Aerospace Studies.
Study Abroad

Notre Dame International’s Study Abroad offers over 40 study abroad programs in more than 20 countries, during both the academic year and summer.

For over 50 years, Notre Dame has made it possible for students to earn credits toward graduation by participating in study abroad programs. Study in another tradition, direct personal experience of another language and culture, and travel all broaden and deepen the liberal education of the whole person to which the University has always been committed. Study abroad programs are one of the many opportunities open to students seeking an international experience that will complement their study plan.

Without delaying graduation, international experiences make a unique contribution to the excellence of liberal education in the undergraduate colleges and frequently have proved an asset in career development. Through the study abroad programs, students earn Notre Dame credit for courses taken in Notre Dame programs and their grades are included in the Notre Dame GPA. During the semester abroad, students must carry a course load of at least 15 credits.

Qualified students from all undergraduate colleges may apply to spend a semester or a year abroad in one of our study abroad programs. Participation is normally during the junior year, but some programs are designed to accommodate sophomores as well.

Admission into most of the programs can be quite competitive and students are encouraged to apply to more than one program. Offers of admission are made in accordance with program requirements, at the discretion of the Study Abroad staff in consultation with faculty and staff of the University. Students considering more than a single semester or academic year program should carefully review their majors and minors to ensure that such study does not delay the completion of graduation requirements. Students who have previously participated in or been selected for a study abroad program may receive a lower priority in the selection process of a second program.

Participation in a summer study abroad program does not affect a student’s application to a semester or yearlong program.

Notre Dame offers semester and yearlong study abroad programs around the world. In Europe, students may apply to go to Angers or Paris, France; Berlin or Heidelberg, Germany; Athens, Greece; Dublin, Ireland; Bologna or Rome, Italy; Alcoy or Toledo, Spain; Geneva, Switzerland; or London, Norwich, St. Andrews, or Oxford, United Kingdom. Undergraduates can study in Salvador da Bahia or São Paulo, Brazil; Santiago, Chile; or Puebla, Mexico for a Latin American experience. They can participate in programs in Fremanet or Perth, Australia; Jerusalem, Israel; Amman, Jordan; Dakar, Senegal; or Kampala, Uganda. Notre Dame also offers semester-long programs in Shanghai, Beijing, and Hong Kong; China; Nagoya and Tokyo, Japan; in Seoul, South Korea; in Singapore; and in Moscow, St. Petersburg, and Vladimir, Russia.

New programs offered in 2015–16 include the Global Gateway Seminars in London and Rome for incoming freshmen. Another new program, Global Business Scholars offers a semester of study in Milan, Italy and a semester in Singapore for selected business students. The new Rome International Scholars program offers a semester of specialized study in Rome and funding for disciplinary study and/or an internship during the summer following the semester of study.

Summer programs for students who have completed at least one year of studies at Notre Dame are available in London, United Kingdom; Dublin, Ireland; Toledo, Spain and Jerusalem, Israel. Other summer programs include China Business & Culture; China Summer Engineering; China Summer Language Program; and an African Peace and Conflict Studies Program in Uganda and Rwanda. Summer programs have been conducted in Paris, France; Cape Town, South Africa; Corinthe, Greece; Rome, Italy; and Granada, Spain as well as India Studies in Mumbai. The locations of the faculty-led summer programs may vary each year.

Additional programs abroad are sponsored by the School of Architecture in Rome (yearlong) and by the College of Engineering in London (summer), Rome (summer), and Alcoy, Spain (summer).

Candidates for Alcoy, Amman, Angers, Beijing, Berlin, Bologna, Dakar, Geneva, Heidelberg, Nagoya, Paris, Puebla, Rome, Russia, Salvador da Bahia, Santiago, São Paulo, Shanghai, Tokyo, and Toledo study abroad programs must demonstrate skills in the language of the country sufficient to make their period of residence and study fully profitable. These skills may be developed through intensive or other language courses in the freshman or sophomore year. Previous study of the language in high school is mandatory for some programs.

Instruction is in Arabic and English in Amman; Chinese and English in Beijing, Shanghai, and Hong Kong; English in Athens, Dublin, Fremanet, Jerusalem, London, Norwich, Oxford, Perth, Seoul, Singapore, and St. Andrews; French in Angers and Paris; French and English in Dakar; German in Berlin and Heidelberg; Italian in Bologna; Italian and English in Rome; Japanese and English in Nagoya and Tokyo; Portuguese in Salvador da Bahia and São Paulo; Russian in Russia; and Spanish in Puebla, Santiago, and Toledo.

Students earn Notre Dame credit for courses taken abroad and grades are included in the Notre Dame GPA. Some courses taught abroad fulfill core University requirements such as fine arts, history, literature, philosophy, social science, or theology. Students are required to take 15 credit hours per semester in the study abroad programs.

An approved social science course in the field of anthropology, psychology, or sociology taken abroad will complete a behavioral science requirement in the Mendoza College of Business.

For major credit in any college department, the student must consult with the departmental advisor. Study abroad programs may sometimes be cancelled due to circumstances beyond the control of the University.

Students with compelling academic reasons for participating in non-Notre Dame programs are eligible to apply for a leave of absence for study in a program offered by another college or university. They may not, however, take a leave of absence to attend international programs at sites (schools) where Notre Dame offers its own study abroad programs.

Course descriptions for hundreds of courses taught in the following programs are available on the Study Abroad website under Courses Abroad: international.nd.edu/education-abroad/study-abroad/courses-abroad/

AUSTRALIA: FREMANTLE PROGRAM

Semester
University of Notre Dame Australia

Students in the colleges of business and arts and letters will enroll in courses at the University of Notre Dame Australia (NDA) through this program. Students enroll in five courses (15 credits) either semester in any combination depending on their major/course requirement and individual need. A list of course offerings for the fall normally is available around the end of March and for the spring term around the end of September.

A listing of approved courses offered in previous semesters is available on the Study Abroad website. Students in the Fremantle program are required to take ANTH 34392 Australian History and Society (3 credits). In the fall term, students must also take BAUD 34120 Business in Asia, also cross-listed as ECON 34783 (3 credits).

AUSTRALIA: PERTH PROGRAM

Semester
University of Western Australia

A special program has been developed for juniors in the colleges of Engineering and Science to enroll at the University of Western Australia (UWA) during the fall semester only. The program combines course work with an intensive field research program established in conjunction with several Australian mining and engineering companies. A spring semester option is possible for students whose schedule can accommodate it. All students should carry a minimum of 30 UWA points, which translates to about 12 to 15 Notre Dame credits. Course offerings are available on UWA's website: http://handbooks.uwa.edu.au/ or on the Study Abroad website.
**BRAZIL: SALVADOR DA BAHIA PROGRAM**

**Semester**
Pontifícia Universidade Católica de Salvador Universidade Federal da Bahia

Study Abroad offers this program in conjunction with the Council for International Educational Exchange (CIEE). The program begins with a five-week, intensive language and culture program (ILCP) held in Salvador da Bahia for the fall semester and São Paulo for the spring semester. During the ILCP, students are required to take an intensive Portuguese language class and the interdisciplinary core course titled “Contemporary Brazil.” Students who are near-native speakers of Spanish may be placed in a “Portuguese for Spanish Speakers” course (offered based on enrollment).

For the remainder of the semester, students must enroll in two required courses: “Portuguese Language” and “Culture and Society: Bahia and Brazil.” The remainder of the course load (two or three courses) is drawn from a combination of CIEE courses and/or the wide range of courses offered at the host universities.

**BRAZIL: SÃO PAULO PROGRAM**

**Semester**
Pontifícia Universidade Católica de São Paulo

This program is offered in conjunction with CIEE. The program begins with a five-week, intensive language and culture program (ILCP) held in Salvador da Bahia for the fall semester and São Paulo for the spring semester. During the ILCP, students are required to take an intensive Portuguese language class and the interdisciplinary core course titled “Contemporary Brazil.” Students who are near-native speakers of Spanish may be placed in a “Portuguese for Spanish Speakers” course (offered based on enrollment). The São Paulo program is open to qualified students in all majors, but may be of significant interest to students studying Portuguese, Brazilian Studies, Business, Latin American Studies, Poverty Studies, or Sociology. For the remainder of the semester, students must enroll in two required courses: “Portuguese Language” and the CIEE core course “Contemporary Brazil.” In addition to the two required CIEE courses, students choose two or three electives drawn from the wide range of courses offered at PUC for which they meet the prerequisites.

**CHILE: SANTIAGO PROGRAM**

**Semester Program**
Pontificia Universidad Católica (PUC)

This program is open to juniors who wish to study in Hong Kong for one semester. The program is suited for students in arts and letters, business, engineering, or science. No Chinese language is required. All courses except those offered by the Department of Chinese are taught in English. The University of Hong Kong is a dynamic, comprehensive university of world-class standing and a leading international institution of higher learning in Asia. With a student body of over 22,000 undergraduates and postgraduates, it has a bilingual, bicultural population of local and international students and scholars.

**CHINA: SHANGHAI PROGRAM**

**Semester or Academic Year**
East China Normal University

Study Abroad offers this option in conjunction with the Council on International Educational Exchange (CIEE). The Shanghai Program at East China Normal University is intended for students who wish to accelerate their acquisition of Chinese and is strongly recommended for all Chinese majors and minors. All students must take a Chinese-language course and other courses on Chinese history, culture, and politics offered in English. Organized group activities complement the classroom experience. Detailed program information is available at the Study Abroad website or at CIEE’s website: [http://www.ciee.org/study-abroad/](http://www.ciee.org/study-abroad/)

**FRANCE: ANGERS PROGRAM**

**Semester or Academic Year**
Université Catholique de l'Île-de-France (UCO)
Resident Director: Odette Menyard

The Angers program is open to sophomores and juniors in all colleges. Many Angers students decide to pursue a first or second major in French. Declared and prospective French majors must consult with the Department of Romance Languages and Literatures before they apply for the program. An academic year of two semesters begins after a month-long intensive summer session, the préstage. Most Angers students take the bulk of courses within the Centre International d'Études Françaises (CIDEF). CIDEF’s language institute, CIDEF students with advanced French language skills may also register for a cursus universitaire through one of the institutes at UCO. Studio art majors may pursue course work at the École Supérieure des Beaux Arts d'Angers, and in a given year, a limited number of business courses may be available at the École Supérieure des Sciences Commerciales d'Angers (ESSCA), an affiliate of UCO. All instruction is in French.

**FRANCE: PARIS PROGRAMS**

**Spring Semester or Academic Year**
Université Paris Diderot

The University of Notre Dame has an exchange program with the Université Paris Diderot (Paris 7). Offered as a yearlong or a second-semester program, the Paris program is limited to students with a high level of French, an excellent grade-point average, and a major or supplementary major in French. Students

---

To Table of Contents
will take courses in French on subjects in the arts, cinema, French language, and literature.

Institut d'Études Politiques de Paris
In 1999, the University of Notre Dame began an exchange program with the Institut d'Études Politiques de Paris (Sciences-Po). Offered as a yearlong or a second-semester program, the Paris program is limited to students with a high level of French, an excellent grade-point average, and a major in history or a social science. Students will take courses in European economics, politics, sociology, and history, and in French language. Successful completion of a year of study results in a certificate from Sciences-Po, which is widely recognized in Europe and the United States.

GERMANY: BERLIN PROGRAM
Spring Semester or Academic Year
Freie Universität-Berlin
The Berlin Program is part of the Consortium for German Studies (BCGS), which is administered by Columbia University. This program is designed for students with at least two years of university-level German language instruction and is, therefore, typically open only to juniors. This program provides in-depth study of German language, culture, and society, and the opportunity to observe first-hand the emerging impact of a reunited Berlin—now considered Germany’s cultural, political, and economic center—on the rest of Europe.

The program begins with a six-week intensive language practicum; students then enroll in one course (taught by the BCGS directors) that reflects their academic interests, focusing on such topics as culture, politics, history, literature, theater, or cinema, in addition to at least two courses at Freie Universität. Freie Universität Berlin offers a wide range of courses in the humanities, social sciences, and natural sciences. All coursework will be in German.

GERMANY: HEIDELBERG PROGRAM
Semester or Academic Year
Heidelberg Universität
This program provides in-depth study of German language, culture and society. The program begins with a four-week intensive Aspects of Society and Culture in Contemporary Germany course which provides the students with at least 60 hours of intensive language training and excursions to various cultural institutions around Heidelberg. Heidelberg Universität offers a wide range of courses in the humanities, social sciences and natural sciences. All coursework will be in German. Applicants should have a minimum of a 3.0 GPA and at least two years of college-level German (or the equivalent).

GREECE: ATHENS PROGRAM
Semester or Academic Year
College Year in Athens
Sophomores and juniors study with other international students at the College Year in Athens. Classes are taught in English and the program is organized in two curricula: Ancient Greek Civilization and East Mediterranean Area Studies. Through the Ancient Greek Civilization track, students amplify their knowledge of ancient Greece and deepen their understanding of Greece’s fundamental contribution to the development of Western civilization. The East Mediterranean Area Studies curriculum focuses attention on Southeast Europe, West Asia, and the Middle East in the time period between the founding of Constantinople (A.D. 330) to the present. It is an area of unusual importance in geopolitics, where Europe intersects with Asia and Africa and one whose problems and complexities, rooted in the past, pique the interest of students of history, politics, and international affairs.

IRELAND: DUBLIN PROGRAMS
Semester or Academic Year
University College Dublin (UCD), Trinity College Director: Kevin Whelan
The Dublin program is open to juniors in arts and letters, business, engineering, and science for a semester or a year at University College Dublin and for a semester or year at Trinity College. Students will enroll in courses in their majors at one of the two Universities and will also take courses at Keough-Naughton Notre Dame Center. For course offerings at the Irish universities, check the Study Abroad website.

Prof. Whelan will offer the course “Introduction to Ireland.” This course is mandatory for all program participants. The Keough-Naughton Notre Dame Center may also offer an Irish Literature course during certain semesters. Students are required to take 15 credits per semester of study and will live in dormitories at the respective Universities with Irish and other international students.

ISRAEL: JERUSALEM PROGRAM
Spring Semester
Tantur Ecumenical Institute
Notre Dame’s program in Jerusalem is located at Tantur on a hilltop on the road from Jerusalem to Bethlehem. Students will take required courses at Tantur focusing on ecumenism and interreligious dialogue, a modern history of the Israeli-Palestinian conflict, and the art and architecture of the Holy Land. Students will choose remaining classes from courses offered in English. The semester program also includes numerous excursions throughout Israel that enhance the material covered in the classroom.

ITALY: BOLOGNA PROGRAM
Semester or Academic Year
University of Bologna
Students matriculate at the University of Bologna (UniBo) through Notre Dame’s association with the Bologna Consorcial Studies Program (BCSP), administered by Indiana University. Typically, students are juniors at the time of participation and have completed the equivalent of four, preferably five, college-level Italian courses.

Students attend a four-week preparatory pre-session in September before beginning classes at UniBo. Organized group activities complement the classroom experience.

Direct matriculation in the University of Bologna, one of Italy’s premier universities, coupled with living in apartments with Italian students, provides a genuine experience of Italian university life and contributes to the attainment of oral and written fluency in Italian.

ITALY: ROME ICCS
Semester
The Intercollegiate Center for Classical Studies (ICCS)
A select number of Notre Dame students can participate for one semester in the Intercollegiate Center for Classical Studies, a consortium of 90 colleges and universities under the management of Duke University. The ICCS provides students with an opportunity in Rome to study ancient history and archaeology, Latin and Greek language and literature, and art history. Applicants must be at least sophomores majoring in classics, classical history, or archaeology, or must be art history majors with a strong classical background. Proficiency in Italian language is not required. Participants are nominated by members of the Notre Dame Classics department. Acceptance into the Rome-ICCS Program is highly selective.

ITALY: ROME PROGRAM
Semester or Academic Year
John Cabot University (JCU)
Students from all colleges can enroll in classes at John Cabot University, an American university in Rome, which offers courses in art, business, classics, government, history, literature, philosophy, theology, and psychology. All courses are taught in English with the exception of Italian language classes. Many JCU courses have been approved by Notre Dame departments for major credit; however, students must consult with their department to confirm courses for their major and minor. All students are required to have at least one year of college-level Italian or the equivalent prior to departure and to take one Italian-language course during the semester.
Study Abroad

or year in Rome. For a listing of all courses offered at John Cabot, check the Study Abroad website.

Additionally all students enroll in one course taught at Notre Dame’s Global Gateway in Rome, “All Roads Lead to Rome.” This course is taught by ND faculty on site.

JAPAN: NAGOYA PROGRAM

Semester or Academic Year
Center for Japanese Studies, Nanzan University

The Nagoya program is designed for Japanese language majors. Students are required to take an 8-credit Japanese course at the appropriate level each semester. Students choose their other courses in the areas of Japanese society, literature, religion, business, economics, and history. Except for Japanese language classes, all courses are taught in English, and the subject matter is often placed in a larger Asian context.

JAPAN: TOKYO PROGRAMS

Spring Semester

Sophia University Study Abroad offers this option in conjunction with the Council on International Educational Exchange (CIEE). The Tokyo Program is open to sophomores and juniors who have completed a semester of Japanese. All students must take a Japanese language course and can choose from a wide variety of other courses offered in English including business, economics, history, literature, philosophy, and sociology. Students earn Notre Dame credit for courses taken in Tokyo, and grades are included in the Notre Dame GPA. Organized group activities complement the classroom experience. Detailed program information is available at CIEE’s website: http://www.ciee.org/study-abroad/

Keio University Students may choose to enroll in either the Japanese Language Program (JLP), with a focus on intensive language and culture studies, or the Keio International Program (KIP), with access to content classes taught in English. This comprehensive program is specially designed for exchange students who want to study about Japan and East/ Southeast Asia in English and take Japanese language courses as well. Students with advanced Japanese proficiency may take full-time undergraduate courses taught in Japanese.

JORDAN: AMMAN PROGRAM

Academic Year or Semester
Princess Sumaya Technical University

This program is offered in conjunction with the Council for International Educational Exchange (CIEE). Students enroll in this Arabic language program at the Princess Sumaya University of Technology. Housing options include living with a host family or in an apartment. Organized group excursions complement the classroom experience. Arabic language classes are required with elective area studies courses offered in English each semester. The Amman program is recommended for Arabic majors. Detailed program information is available at the Notre Dame International Study Abroad office, 105 Main Building or by visiting the CIEE website at www.ciee.org/study-abroad/

MEXICO: PUEBLA PROGRAM

Semester or Academic Year
Universidad Popular Autónoma del Estado de Puebla Coordinator: Lisette Monterrosos

Students may participate in the program for an academic year or a semester. The program is open to students from all colleges at Notre Dame with the equivalent of four semesters or better in Spanish language. Notre Dame offers a pre-medical program in the fall semester, which includes the first semester of General Physics (taught in English) and internships with Mexican doctors. Fall students will study at the Universidad Popular Autónoma del Estado de Puebla (UPAEP). Spring students will take courses at the university and will also have a variety of internship opportunities with a focus on business or the humanities. All participants in the Mexico program are required to enroll in one course with a focus on Mexican history or culture. Students are required to take 15 credit hours per semester.

RUSSIA: MOSCOW, ST. PETERSBURG, AND VLADIMIR PROGRAMS

Semester or Academic Year

Students may enroll in a Russian language and area studies program through the American Council of Teachers of Russian. They may choose to study in Moscow, St. Petersburg, or Vladimir for one semester or an academic year. Students should have completed two years of Russian or the equivalent at the university level before participation. Participants take courses in grammar and contemporary Russian language, vocabulary, and conversation, as well as in literature, Russian and Soviet culture, history, politics, and the mass media. Course descriptions are available on the Study Abroad website.

SENEGAL: DAKAR PROGRAM

Spring Semester Program

Students who are interested in majoring in French/ Francophone studies, African studies, international relations, or development studies and are seeking an opportunity to live and study in a French-speaking West African country considered by many to be one of the most developed and democratic nations in that region, should consider the Dakar Program. The Council on International Educational Exchange (CIEE) administers this program.

Classes are conducted at CIEE Study Center in Amistat III neighborhood near restaurants, shops, cultural centers, and the largest public university in Senegal. The program offers students the opportunity to live with a host family and study in a French-speaking West African country, to introduce them to Senegalese society, and to consider such issues as education, women’s roles, the impact of Islam and development and globalization from a West African perspective. Applicants must be Junior-level students with at least 2 semesters of college-level French or equivalent and are required to take 15 credits with 3 required courses and 2 elective courses. Senegalese professors teach program courses. For a listing of courses offered, check the CIEE website at www.ciee.org/study-abroad/

SINGAPORE: SINGAPORE PROGRAM

Semester Program
National University of Singapore (NUS)

NUS offers a global approach to education and research, with a focus on Asian perspectives and expertise. It is a vibrant English-speaking comprehensive university with 16 faculties/schools offering courses from arts and social science to history and physics. A comprehensive English course list is announced every year and is available online for students to view. Areas of study include Arts/Design, Business, Engineering, English, Foreign Languages, Global Studies, Health, Humanities, Journalism, Law, Life Sciences, Other Physical Sciences, Social Sciences, and Sustainability.

SOUTH KOREA: SEOUL PROGRAM

Spring Semester or Academic Year
Yonsei University

The Seoul exchange program is open to juniors. It is particularly suited to students in Korean Studies. Yonsei is a Christian private research institution with local and international students and scholars and is one of the oldest universities in South Korea. Yonsei receives students from over 290 academic institutions worldwide. Instruction is in Korean but students may also choose from many courses that are taught in English. While the majority of classes will be in Korean Studies, students may also choose courses from the various other faculties as well.

SPAIN: ALCOY PROGRAM

Spring Semester
Polytechnic University of Valencia-Alcoy

The program accepts Notre Dame undergraduate engineering students to study during the spring semester of their sophomore or junior academic year. The program is designed for undergraduate engineers, particularly those in Chemical, Electrical, and Computer Science. Courses are conducted through the Polytechnic University of Valencia in Alcoy, Spain. Courses will be taught in Spanish and the Polytechnic University of Valencia will provide a two-week Spanish refresher course prior to the semester, as needed.
**Study Abroad**

**SPAIN: TOLEDO PROGRAM**

**Semester or Academic Year**  
*Fundación Ortega y Gasset*  

The Toledo program is open to sophomores and juniors in all majors. Students may study for a semester or academic year in Toledo and all courses are taught in Spanish. Students must take five courses through the *Centro de Estudios Internacionales, Fundación Ortega y Gasset*.

A philosophy course is offered in the fall only; a theology course is offered in the spring. Credit-bearing internships are available in Toledo. Students may apply for internships in several areas, including government, the arts, social service, and communications. Credit toward a major must be approved by an advisor in the major department. Second semester and academic year students with advanced proficiency in Spanish may apply to do coursework at the *Universidad Castilla La Mancha* in Toledo.

**SWITZERLAND: GENEVA PROGRAM**

**Spring Semester**  
*University of Geneva, CERN*

Through Boston University's Geneva-Physics program, qualified students have the opportunity to study at the world's leading center for advanced research in particle physics. This program combines upper level coursework in quantum physics and electrodynamics at the University of Geneva (UNIGE), with directed research at the European Organization for Nuclear Research (CERN). Qualified candidates will be upper level Physics major with a minimum of two semesters of college-level French or the equivalent. Additionally, students will be required to enroll in and complete a specially-designed scientific French-language tutorial during the semester prior to studying abroad.

**UGANDA: KAMPALA PROGRAM**

**Semester Program**  
*School for International Training*

The program is designed to expose students to as many aspects of development in Uganda as possible. Students are required to enroll in all course offerings to get a better grasp of the socio-economic issues that affect development. The program combines course work with field research during which students identify topics of interest that they pursue for their final development practicum.

**UNITED KINGDOM: LONDON UNDERGRADUATE PROGRAM**

**Semester Program**  
*Notre Dame London Global Gateway*

The London Undergraduate Program was initiated in 1981 as an Arts and Letters program and has since expanded to provide an opportunity for all Notre Dame undergraduates from the colleges of arts and letters, business, engineering, and science to spend one semester of their junior year in the London Undergraduate Program. While in London, students take classes offered by Notre Dame and British professors at the Notre Dame London Global Gateway near Trafalgar Square. Notre Dame's British faculty is selected to include experts whose work is internationally recognized in their fields. Students participating in the program live as a group in Conway Hall, a Notre Dame residential facility with supervision provided by the program. The semester enables students to combine serious academic study with the opportunity to live in Europe.

We encourage students interested in London studies for the regular academic year to direct further inquiries regarding location, staff, facilities, curriculum, and requirements to Study Abroad at 105 Main Building.

**UNITED KINGDOM: ST. ANDREWS, SCOTLAND PROGRAM**

**Spring Semester**  
*University of St. Andrews*

The University of St. Andrews is renowned for its academic strength in numerous disciplines, but is particularly distinguished in Medieval Studies. Students with a major, minor, or concentration in Medieval Studies are encouraged to apply. The program is open to other majors including psychology and other disciplines for students with at least a 3.50 cumulative GPA.

Students apply in the fall semester of their sophomore year to study at St. Andrews in the spring semester of their junior year. Qualified students are selected for interview based on applications, and participants are chosen by a selection committee for Study Abroad.

**UNITED KINGDOM: NORWICH PROGRAM**

**Academic Year or Semester**  
*University of East Anglia (UEA)*

Notre Dame students can enroll in courses in UEA's American Studies Department, which offers a wide range of courses in American studies, American and English literature, and creative writing. The School of American Studies also has a special reputation in creative writing. The School houses the Arthur Miller Centre for American Studies, which hosts an annual international literary festival featuring notable writers. The UEA program is open to juniors, English or American studies majors with a GPA of 3.0 or higher are eligible to participate. Other majors may be considered depending on student qualifications.

**UNITED KINGDOM: OXFORD UNDERGRADUATE PROGRAM**

**Academic Year**  
*New College and Oriel College, Oxford University*

The Oxford Program provides juniors in the colleges of science, engineering, and arts and letters the opportunity to study at New College or Oriel College, Oxford for a full academic year. Application is by invitation only. New College and Oriel College dictate the fields in which they will accept students each year. It is required that candidates have an overall GPA of 3.7 at the time of application.

While there, students participate in Oxford's celebrated tutorial system: Students work individually with a tutor to pursue their major courses of study in depth. Tutors are full-time faculty at Oxford. They include some of the most accomplished scholars in the world in their fields. Participating students live in New College or Oriel College accommodations. Detailed program information is available at the Notre Dame International Study Abroad office, 105 Main Building.
Moreau First Year Experience

“[Education] is the art of helping young people to completeness…”
from Blessed Basil Moreau, Christian Education

The Moreau First Year Experience, a two-semester course sequence, is required of all first-year students. Taught in both fall and spring semesters, and integrating academic, co-curricular, and residential experiences of new students, the course is organized around multiple foci including: orientation to university life, health and wellness, community standards and cultural competence, academic success, spiritual life, and discernment. Students actively engage with the experience through a variety of methods such as large lectures, on-line modules, and small group discussions. Use of ePortfolios helps students to reflect on their own holistic development in intellectual, cultural, pre-professional, and social pursuits.

The Moreau First Year Experience resonates within the larger framework of the charism of the Congregation of the Holy Cross to educate in the faith. Similarly, drawing on the pedagogy of Blessed Basil Moreau, it builds upon the Five Pillars of a holy Cross Education:

- Mind: seeking understanding
- Heart: rooting choices in values
- Zeal: fueling desire
- Family: embracing community
- Hope: putting faith into action

Through the Moreau First Year Experience, students come to understand the complexity and expectations of the Notre Dame community; take advantage of crucial academic and university resources; cultivate and maintain a healthy and well-balanced lifestyle; become aware of and engage with diverse communities; and think deeply about their academic, creative, professional and spiritual lives. The Moreau First Year Experience gives students the opportunity to begin forming life-long habits of the mind as well as an engagement in faith, service, arts, wellness, and community.

The Moreau First Year Experience is a collaborative effort between First Year of Studies and the Division of Student Affairs. The course speaks to the imperatives of the University Strategic Plan for Undergraduate Education by ensuring that Catholic culture informs an integral part of new students’ education; by nurturing the formation of students’ mind, body, and spirit; by enriching the integration of students’ intellectual, extracurricular, and residential experiences; and by deepening students’ global engagement.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject First Year of Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

Information Technologies

The Office of Information Technologies (OIT) provides a robust and highly reliable technology infrastructure that supports the University’s teaching, learning, research, scholarship, community service and administrative activities. Information technology services are designed to enable and empower, transform and benefit, and serve and support the entire Notre Dame community.

The OIT provides all Notre Dame students with an @nd.edu email account hosted by Google, file space and distributed printing services. Google also provides students with Google Apps and 30GB of storage. For more information, visit: oithelp.nd.edu/applications-and-operating-systems/google-at-nd.

The ND Computer Service Center is a fee-for-service repair facility available to Notre Dame faculty, staff and students. The Service Center is an authorized provider for warranty repairs on Apple, Dell, and Lenovo computers. It also can provide non-warranty service on these and other computer brands as well as most HP monochrome laser printers. The Service Center offers competitive pricing, as well as quality service and faster turnaround time. It also offers computer rentals, so you can arrange to rent a laptop while your computer is being repaired. For information, go to: oit.nd.edu/computer-service-center.

There is a 100Mbs ethernet jack for every student living in undergraduate residence halls and graduate student residences. Network-ready devices can be connected directly to the campus computer network. Students with wireless-capable computers can also connect to the campus WiFi network present in all University residence halls and campus buildings. For more information, visit: oithelp.nd.edu/networking.

All residence hall rooms have standard cable television service with a 67-channel line-up. Additional digital cable television services, including HD, DVR and OnDemand, can be ordered directly from Comcast for an additional fee. For additional information, visit: oithelp.nd.edu/phone-and-tv/cabletv.

A distributed cellular antenna system (DAS) in various campus locations provides enhanced coverage for major cellular telephone providers, including AT&T, Verizon and Sprint. For more information on cellular telephone service, visit: oithelp.nd.edu/phone-and-tv/cellular-service.

Information technology support services are available to students from the OIT Help Desk, located at 128 DeBartolo Hall. Trained support representatives are available to answer questions and help guide computer users in diagnosing and resolving problems by phone, e-mail, chat and in person. For more information about the Help Desk, go to: oithelp.nd.edu/help-desk. Help Desk hours are:

Normal Hours
Monday–Friday: 8:00 a.m.–5:00 p.m.
(Closed Wednesday: Noon–1:30 p.m. for staff meeting)
The Help Desk remains open on Labor Day when classes are in session.

Extended Hours (available during the academic year when classes are in session)
Phone support only
Sunday: 3:00 p.m.–8:00 p.m.
Monday–Thursday: 5:00 p.m.–8:00 p.m.

Free computer training classes are available through the OIT to students on a wide range of software. For more information on training programs, go to: oit.nd.edu/training-classes.

There are five student computer labs across campus supported by the OIT. Students, faculty, and staff have access these labs that include 220 computers running Windows 7 and Mac OS X operating systems. For computer lab locations and hours, go to: oit.nd.edu/computer-lab-locations-and-hours.

Audio Video Technologies and Facilities Design works closely with the Office of the Registrar to design, build, and support technology-enhanced learning spaces on campus. Just over 98% of the Registrar’s classrooms are equipped with audio video systems that allow students and faculty to present information from a variety of sources. Small, portable devices such as cameras, audio recorders, and microphones can be checked out for academic use from the OIT facility at 115 DeBartolo Hall. Students and faculty can also take advantage of other OIT services at other locations, including video conferencing, video streaming, video and audio production, and post-production services, including media duplication.

In addition to mainstream computing services, the OIT, in partnership with the Office of Research, works with the Center for Research Computing (CRC) to support computationally intensive work, large dataset management, and data visualization for the undergraduate, graduate and campus research communities. The University provides access to national supercomputing and data resource facilities via Internet2. It provides high bandwidth access to about 200 leading research universities and supercomputing centers. For more information, visit ctc.nd.edu.

Anyone using Notre Dame computers and network resources must abide by the policies set forth in the document "Responsible Use of Information
Holy Cross Seminary Formation

The Old College undergraduate seminary program is housed in the original campus structure built in 1843 by Notre Dame's founder, Rev. Edward Sorin, C.S.C. It welcomes high school graduates with a serious interest in exploring a vocation as a priest or brother in the Congregation of Holy Cross. With more than 50 men in formation at Notre Dame, Holy Cross is a growing, international religious community with 1,400 priests, brothers, and seminarians in 15 countries throughout the world.

Old College provides an introduction to religious life and ministry in Holy Cross through participation in daily Eucharist and prayer, service placements, spiritual direction, weekly community nights, retreats, and academic preparation, including courses in philosophy and theology. Students can select their own major and tailor the rest of their academic program according to their interests. Old Collegians take all classes with other Notre Dame students and are expected to actively participate in clubs, organizations, and other aspects of campus life. They are also encouraged to spend a semester or year abroad. Old College combines a challenging religious formation structure with a complete Notre Dame undergraduate experience.

Moreau Seminary, also located on the Notre Dame campus, is the primary formation house for the Congregation of Holy Cross in the United States. The one-year Postulant Program is a pre-novitiate year designed for those with a bachelor's degree in any field who are prepared to discern a vocation to priesthood or brotherhood within vowed religious life. Postulants take 15 hours of philosophy and/or theology credits at the University each semester and have ministry placements supervised by seminary staff. Postulants reside in Moreau Seminary with other priests, brothers, and seminarians. They discern their vocation through spiritual direction and active participation in the community life of Moreau Seminary, which is centered around the daily celebration of the Eucharist and the Liturgy of the Hours. After returning from the Novitiate, newly professed seminarians begin their formal academic training in the Master of Divinity program.

Applicants to Old College and Moreau Seminary must be practicing Roman Catholics in good standing with the Church and of solid personal character, with a demonstrated commitment to apostolic ministry. Admission is selective, and personal interviews are required for acceptance into both programs. Tuition scholarship assistance is provided.

For additional information, contact:
Director, Office of Vocations
PO Box 541 Notre Dame, IN 46556

The First Year of Studies

Dean: Hugh Page Jr.
Associate Deans: Kevin Rooney; Holly Martin
Assistant Deans: Elly Brenner; Maureen Dawson
Advisors: Steve Brady; James Creech; Jennifer Fox; Don Lasalle; Cecilia Lucero; Mel Tardy; Leonor Wangensteen-Moya; Michelle Ware; Sean Wernert; Maryam Zomotodian
Special Support Services: Nahid Erfan; Molly O'Brien; Phil Sakimoto; Lisa Walenceus

The College of the First Year of Studies serves as the college for all incoming students, regardless of their intended program of study. Established in 1962, our role in the University is to provide the newest members of our Notre Dame family the opportunity to become thoroughly informed about the University and the many educational options we provide before they make a very important decision—what their future college and major will be. Over the last 50 years, the First Year of Studies has helped thousands of first-years become successful college students and find their unique calling at Notre Dame.

Discernment, the process of self-exploration, self-discovery, and self-definition is the heart of the Notre Dame first-year experience. All first-year students are asked to take a thoughtful approach to their educational path, thinking deeply about how their skills and talents, their passions and faiths, and their visions for their futures should impact their curricular decisions. We hope that every student will use their first year as an opportunity to become self-directed in their personal, intellectual, and professional development.

Our full-time advising faculty provide support for our students as they complete the First Year Curriculum and make the challenging transition to college life; our advisors are teachers, showing students how to make sense of complex curricular requirements and place them in a meaningful perspective. We also provide programs and services that foster intellectual engagement and active learning, ensure academic development, and connect with the tremendous resources Notre Dame holds.

First Year Goals

1. Lay the intellectual foundations necessary for the pursuit of advanced academic work.

2. Cultivate both a sense of curiosity about the universe and a passion for learning with an appreciation for the intrinsic value of higher education and a sense of responsibility as a steward of the knowledge that is created, learned, and applied at Notre Dame.

A Notre Dame liberal education is more than just taking classes in the liberal arts. It is the purposeful cultivation of shared intellectual values that include an appreciation for a broad spectrum of intellectual endeavors, the capacity to think analytically about complex issues, and the ability to communicate effectively in a wide variety of contexts. It also fosters an ethical, moral, and spiritual awareness that we believe will lead our Notre Dame graduates to live responsible, compassionate, and ultimately meaningful lives.

University Requirements

All Notre Dame students, no matter what their major will be, must successfully complete a broad liberal arts curriculum in addition to completing the requirements of a particular major. This curriculum, established by the University Academic Council, is commonly referred to as our University Requirements:

- 1 course in University Seminar
- 1 course in Writing and Rhetoric
- 2 courses in mathematics
- 2 courses in science
- 1 course in history*
- 1 course in social science*
- 2 courses in philosophy*
- 2 courses in theology*
- 1 course in fine arts* or literature*
- 2 courses in Moreau First Year Experience

*A University seminar will fulfill one University Requirement in one of these disciplines.

Only courses marked as “Univ. Req.” via the online Class Search can be used to fulfill a University requirement.

The First Year Curriculum contains a subset of these University Requirements that must be completed in the first year at Notre Dame to keep students on track to complete their degree within four years of entering the University.

All students are required to complete a minimum of 60 credit-hours at the University of Notre Dame and a minimum of 90 credit-hours earned through college and university courses to receive a degree from the University. For some students, meeting this requirement means that not all of their AP or IB credit can be counted toward their graduation. The applicability of advanced placement credit earned before entering the University is determined by the University department involved. First Year advisors are able to discuss the possibility of waiving advanced credit in order to take the equivalent University course instead.

The First Year Curriculum

The First Year Curriculum is designed to ensure that all Notre Dame students begin their college career by learning the analytic, mathematic, and communication skills necessary for further work in their areas of greatest interest as well as to provide the foundation for a broad liberal education. Students are encouraged to select courses that will prepare them for advanced study in their present area of interest as well as to choose elective courses that help them explore subjects they have not had an opportunity to study in high school and/or those that will deepen their knowledge in disciplines with which they already familiar.

By the end of spring semester of the first year, students must complete:

- 1 University Seminar
- 1 Writing and Rhetoric course
- 2 semesters of mathematics
- 2 semesters of a science* or foreign language
- 1 additional University Requirement
- 2 program requirements or electives
- 2 semesters of Moreau First Year Experience

Note: Elective courses may be used to sample areas of study or to further general education.

*It is recommended that the science requirement be completed by the end of the sophomore year. Foreign language is not a University Requirement, but it is required by the College of Arts and Letters, the College of Science, and the School of Architecture.

Entering students are expected to take the First-Year Curriculum of five courses per semester, along with the laboratories and tutorials that may accompany those courses, plus one Moreau First Year Experience course per semester. Additional one-credit courses offered through First Year of Studies, choir, band, social concerns seminars, and ROTC may also be added to the schedule each semester. The various colleges have restrictions on how many one-credit voluntary courses may be applied to the total number of credits required for graduation from the colleges.

Many of these elective courses satisfy University Requirements as well as requirements in the student’s intended major. These courses provide tools and experiences to help students clearly define their interests and goals while building a sound foundation of skills and knowledge for advanced study.

Descriptions and general recommendations concerning each of the courses in the First-Year Curriculum are given in the following pages. In addition,
complete instructions for making course selections and detailed course descriptions are in the First Year of Studies Academic Guide, which is available on the First Year of Studies website and is mailed to all incoming students in June.

Course 1—University Seminar/Writing & Rhetoric

University Seminar and Writing and Rhetoric are both University requirements that must be taken during the first year, one in the fall semester and one in the spring.

First-year University Seminar courses, or USEMs, are taught by some of Notre Dame’s finest scholars, members of our teaching and research faculty who are leaders in their fields and passionate about their subjects. These courses exemplify the core values of a Notre Dame liberal education and mark a first step toward the goal of “intellectual excellence.”

With a class size of no more than 18 people, this small, writing-intensive learning environment will engage students in meaningful discussions with their instructor and peers, introduce them to the rich tapestry of theory and research within a field, and show them some of the problems and issues involved in that discipline.

Each University Seminar requires students to write a minimum of 24 pages on a subject with the benefit of feedback from a leading scholar in the field and the chance to rework at least one paper. Many instructors nominate papers students produce in their classes for Fresh Writing, Notre Dame’s journal of award-winning first-year essays.

Notre Dame’s Writing and Rhetoric courses are where students will learn the art of argument and gain the persuasive ability to make a point with proper organization, evidence, logic, and style. Academic writing is an ongoing conversation with a long history: Writing and Rhetoric will prepare students to enter into this rich world of intellectual inquiry and rhetorical tradition as an outstanding communicator and an ethical and critical thinker.

The Writing and Rhetoric options offered to first-year students are each built on the values of responsible public discourse and Catholic Social Teaching, challenging students to uphold a civil, ethical, and moral ideal that encompasses the rhetorical virtues of honesty, knowledge, rationality, tolerance, wisdom, and intellectual courage.

WRITING AND RHETORIC COURSES
WR 12100: Writing and Rhetoric
WR 13100: Writing and Rhetoric Tutorial
WR 13200: Community Based Writing & Rhetoric
WR 13300: Multimedia Writing & Rhetoric
WR 13150: Writing and Rhetoric Summer Seminar
WR 11050: Writing and Rhetoric Summer Studio

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Writing and Rhetoric. Course descriptions can be found by clicking on the subject code and course number in the search results.

Course 2—Mathematics

All Notre Dame first-years must take two semesters of mathematics as a University requirement.

Students who have credit for the first level of calculus (MATH 10250, 10350, or 10550) must fulfill the University requirement by taking a second level of calculus (MATH 10270, 10360, or 10560) or a non-calculation mathematics course.

Students in the College of Arts and Letters may fulfill their mathematics requirement by taking any two courses in mathematics. They may be calculus courses, non-calculus-based courses, or one of each. Students may not, however, take two beginning level calculus courses to fulfill this requirement. All economics majors must complete a calculus sequence; the lowest level course they may take is MATH 10350–10360.

The mathematics requirement for students planning to enter the Mendoza College of Business includes one calculus course (any level except MATH 10240) and ACMS 10145: Statistics for Business and Economics I.

Students who have credit for the first level of calculus (MATH 10250, 10350, or 10550) must fulfill the University requirement by taking a second level of calculus (MATH 10270, 10360, or 10560). Also acceptable are the calculus sequences required of students in the College of Engineering or the College of Science.

Students majoring in the College of Science will fulfill their University mathematics requirement through on the following calculus sequence: MATH 10350–10360, MATH 10550–10560, MATH 10850–10860, or MATH 10450–10460. The MATH 10350–10360 and MATH 10450–10460 sequences are designed for students in programs emphasizing the life sciences, such as biological sciences, economics and the preprofessional (pre-medical and other health-related) programs in either the College of Science or the College of Arts and Letters. Students planning to major in biochemistry, chemistry, mathematics or physics must take MATH 10550–10560.

The MATH 10850–10860 sequence stresses concepts and proofs, and must be taken by both the College of Science honors mathematics major and the College of Arts and Letters honors mathematics major. It is also open to other students with very strong high school mathematics backgrounds.

A student who completes the MATH 10250–10270 calculus sequence and then decides to enter a science or engineering program will have to take additional courses in mathematics, as prescribed by the administrator of the program.

MATHEMATICS COURSES:
MATH 10110: Principles of Finite Mathematics
MATH 10120: Finite Mathematics
MATH 10130: Beginning Logic
ACMS 10140: Elements of Statistics
ACMS 10141: Statistical Reasoning in Politics
ACMS 10145: Statistics for Business and Economics I
ACMS 10150: Elements of Statistics II
MATH 10240: Principles of Calculus
MATH 10250: Elements of Calculus
MATH 10270: Elementary Calculus in Action
MATH 10350: Calculus A
MATH 10360: Calculus B
MATH 10550: Calculus I
MATH 10560: Calculus II
MATH 10850: Honors Calculus I
MATH 10860: Honors Calculus II
MATH 20550: Calculus III

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Mathematics. Course descriptions can be found by clicking on the subject code and course number in the search results.

Course 3—Science

First-year students take two semesters of science as part of the First-Year Curriculum. The courses offered by the College of Science for first-year students are broadly grouped into two main categories, laboratory sciences and topical sciences. The laboratory sciences are intended for students who are planning to major in one of the sciences or in engineering or perhaps would prefer an in-depth discussion of a particular field of study with laboratory work. The second category, topical sciences, is designed for those first-year students
who plan to enter the College of Arts and Letters, the Mendoza College of Business, or the School of Architecture. These courses are rigorous and intellectually demanding and differ from the laboratory sciences chiefly in that they are often somewhat interdisciplinary in nature and/or that they focus on themes that may have an ethical or value-related dimension, and normally they do not include an associated laboratory requirement.

In determining which course to take as Course 3, students should consider the following:

1. All Notre Dame students must, as a University Requirement, take two semesters of science and it is recommended that the science requirement be met in the first year. Students contemplating any of the College of Engineering or College of Science programs or pre-health studies in the College of Arts and Letters must take the science requirement in their first year.

2. Students planning to participate in an international study program during their sophomore year must complete the science requirement in the first year, along with the required language for international study in France or Austria (see Course 5).

3. The science course is often a prerequisite for other courses in these programs. Students planning to enter the College of Arts and Letters Pre-Health Program will also take CHEM 10171 and 10172 in their first year. Students thinking of entering any of the following programs in the College of Science are advised to take CHEM 10171 and 10172 as their science requirement in the first year: environmental sciences, science preprofessional, science collegiate sequences, biological sciences, mathematics, applied mathematics, statistics, and physics. Mathematics and physics majors who do not have an interest in the health care professions may elect to take CHEM 10171 followed by 10122. Chemistry and biochemistry majors take CHEM 10181 and 10182. A second science course is required and discussed under Course 5 for students interested in chemistry, biochemistry, biological sciences, environmental sciences, mathematics, and physics.

4. Students planning on an engineering program are required to take CHEM 10171 and 10122 as the sequence to satisfy the requirement. The CHEM 10171/10172 or 10181/10182 sequences also satisfy the chemistry requirement for engineering students.

5. Prospective Arts and Letters or Business students interested in the environmental sciences second major offered by the College of Science should take CHEM 10171 and 10172 as their science requirement.

6. Students planning on entering the Mendoza College of Business programs or the College of Arts and Letters programs, other than mathematics or pre-health studies, may select freely from among any of the science courses offered and for which they are prepared. However, the following courses are specifically designed for the students planning to enter those programs: BIOS 10101 through 10119; CHEM 10101 through 10104; PHYS 1052, 1062, 10111, 10122, 10140, 10240, 20051, 20061.

7. Students intending to enter the School of Architecture should take PHYS 10111 first semester; PHYS 10310 is also acceptable.

8. First-year students may substitute two semesters of foreign language in place of two semesters of science to complete their first-year course requirements. They may also substitute one semester of each, but should keep in mind that the science requirement must be completed by the end of the sophomore year by those students who intend to study abroad as juniors.

LABORATORY SCIENCE COURSES:
BIOS 10161: Biological Sciences I
BIOS 10162: Biological Sciences II
CHEM 10171: General Chemistry: Principles
CHEM 10172: General Chemistry: Organic Structure and Reactivity
CHEM 10122: General Chemistry: Biological Processes
CHEM 10181: Introduction to Chemical Principles
CHEM 10182: Organic Structure and Mechanism
PHYS 10310: General Physics I
PHYS 10320: General Physics II
PHYS 10411: General Physics A-M Mechanics
PHYS 10424: General Physics B-M Waves/Thermo

TOPICAL SCIENCES COURSES:
BIOS 10101: Human Genetics, Evolution, and Society
BIOS 10106: Common Human Diseases
BIOS 10107: Ecology and Evolution
BIOS 10108: Revolutions in Biology
BIOS 10114: Avian Biology
BIOS 10115: Microbes and Man
BIOS 10119: Evolution and Society
CHEM 10101: Foundations of Chemistry
CHEM 10102: Chemistry, Environment, and Energy
CHEM 10103: Chemistry and Crime
CHEM 10104: Forensic Chemistry
PHYS 10052: Concepts of Energy and Environment
PHYS 10062: Science Literacy
PHYS 10111: Principles of Physics I
PHYS 10122: Principles of Physics II
PHYS 10140: Descriptive Astronomy
PHYS 10240: Elementary Cosmology
PHYS 10262: Physical Methods in Art and Archeology
PHYS 20051: Energy and Society
PHYS 20061: Nuclear Warfare

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Science (Non-departmental). Course descriptions can be found by clicking on the subject code and course number in the search results.

Course 4—University Requirement or Elective: History, Social Sciences, Philosophy, Theology, Literature, Fine Arts, and Languages

For a Notre Dame first-year student, taking an “elective” means having the option to choose a course or courses that are not strictly a part of the University Requirements. Although not constrained by those requirements, an elective choice may be constrained by requirements from a student’s intended college and major, called Program Requirements.

All first-years have a possible slot in their schedule each term for one elective, but if students receive credit for one or more of their required first-year courses through AP exams, SAT II exams, or transfer credit, they may have two spaces for which to select an elective.

Specific recommendations for electives are made for three of the intended college programs. The College of Engineering recommends that first-year students planning on majoring in engineering take PHYS 10310 in the spring semester as their Course 4 elective. Students intending to study architecture are advised to take ARCH 11011 as their Course 4 elective in the fall semester. They will then take ARCH 11021 and ARCH 10311 in the spring semester. Students intending to study business are advised to take microeconomics, ECON 10010/10011, in either the fall or spring semester.

**University Requirements**

**COURSE DESCRIPTIONS**

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:

- History
- Social Sciences
- Philosophy
- Theology
- Literature
- Fine Arts
- Languages

Course descriptions can be found by clicking on the subject code and course number in the search results.

**Course 5—Program Requirement or Elective**

Any of the courses listed under Course 4 may be taken as a Course 5 elective, unless the student's intended major requires a particular course instead. These required courses will be discussed below. Most students should use this elective to explore areas of academic interest, and many students may want to consider continuing in or beginning foreign language study.

Language is required by the College of Arts and Letters and the College of Science. The languages available include Arabic, Chinese, French, German, Greek, Irish, Italian, Japanese, Korean, Latin, Portuguese, Quechua, Russian, and Spanish. Students with previous background in a language who want to continue their language study must take a placement exam to determine proper placement. However, students with no previous background in a language can elect a beginning-level course. See the Credit and/or Placement Examination section below for more information on placement in a language course. Regardless of their scores on the credit or placement examinations, students in the College of Arts and Letters must take at least one course in residence at Notre Dame. In the College of Science, students who place higher than the intermediate level (third semester) are considered to have fulfilled the language requirement and need not take any additional courses in the language. Students contemplating an study abroad program that requires language study should consult with the language department regarding the appropriate language preparation. All students are encouraged to start their study of language during their first year or the beginning of their second year at the latest.

First-year students who plan to participate in a study abroad program during their sophomore year must complete both their science and foreign language requirements during their first year. There is no opportunity to take a science course abroad, and it is highly recommended that the requirement be satisfied by the end of the sophomore year.
Universiy Requirements

Voluntary Courses

In addition to five academic courses and the Moreau First Year Experience, voluntary one- and two-credit courses are offered in the areas of fine arts, history, music, dance, and theology. The First Year of Studies also offers a variety of one-credit intellectual engagement and academic success courses.

These courses may not be substituted for any of the six required courses. The colleges have restrictions on the number of one- and two-credit courses that will be applied to the total number of credits required for graduation from the colleges.

Credit and/or Placement by Examination

The First Year of Studies processes advanced credit. The applicable University department and/or college, however, in coordination with First Year of Studies, determines exactly what advanced credit will be awarded. In some cases, students will be required to take their science courses at the University, even if they have advanced credit for those courses. This is especially true for students who may wish to pursue a degree in one of the preprofessional (premedical and related health professions) majors. First Year of Studies advisors are available to discuss these issues with students both in the summer and during the academic year.

Entering first-year students may become eligible for credit by examination in four ways, (1) through the Advanced Placement Program administered by the College Entrance Examination Board, (2) through the SAT II-Subject Tests in French, German, Italian, and Spanish, (3) through the International Baccalaureate North America, (4) through the Notre Dame Mathematics Credit Examination Program. Students’ placement may be determined through the online Notre Dame French, German, and Spanish placement examinations, but no credit is awarded. Placement examinations for Arabic, Chinese, Japanese, Korean, and Russian are also administered on campus.

1. Advanced Placement Program (AP)—Students who submit results of Advanced Placement examinations are eligible to receive placement and credit in accordance with the accompanying table.

2. SAT-II Subject Tests (SAT II)—Results of CEEB Advanced Placement Examinations or the SAT-II Subject Tests in French, German, Italian, or Spanish are used for course placement and credit by examination in accordance with the accompanying table.

3. International Baccalaureate Program (IB)—Students who submit results of International Baccalaureate Higher Level examinations are eligible to receive placement and credit in accordance with the accompanying table. The University does not give credit for Subsidiary Level examinations.

4. Notre Dame Mathematics Credit Examination Program—First-year students may take examinations for possible course placement and credit in mathematics after they arrive on campus. The examinations will be based on college-level courses.

Notre Dame Online French, German, Latin and Spanish Placement Examination Programs—First-year students may take online examinations for placement only. These examinations are available during the summer as well as during the academic year.

When credit is awarded, the dean of the First Year of Studies has it entered on the student’s transcript, which is maintained by the Registrar’s office. This credit can be applied toward required or elective courses if the student’s particular college program permits. If Advanced Placement, International Baccalaureate, or Notre Dame Mathematics Examination credit is not applicable to a specific college program, that credit is recorded on the student’s transcript, but it represents credit in excess of graduation requirements. Placement, but not credit, for the Notre Dame online placement examinations.

Course descriptions can be found by clicking on the subject code and course number in the search results.

Students intending to major in the College of Science’s biology, biochemistry, chemistry, environmental science, mathematics, or physics program will take more than one science each semester and need to use Course 5 to take the second science. The second science course sequence for the chemistry and mathematics programs is PHYS 10310–10320; for the environmental science, biochemistry, and biology programs, it is BIOS 10161–10162; and for the physics program, it is PHYS 10411–10424.

Students intending to major in studio art should take DESN 11100 and ARST 11201 as their fifth course. Students intending to major in music should take a three-credit theory course sequence, MUS 2001 and 2002, a one-credit music exercise course sequence, MUS 2001 and 2002, and a one-credit lesson course each semester.

Students intending to major in architecture are expected to take ARCH 11021 and 10311. College of Engineering intents should enroll in EG 10111–10112 as their fifth course.

See the various college and department summaries in this Bulletin for details on the requirements for all of these programs.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject First Year of Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

Moreau First Year Experience

All Notre Dame students must take two semesters of the Moreau First Year Experience.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject First Year of Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.
is recorded in the student's official records, but not on his or her transcript.

The general guideline is that credit by examination is counted as required or elective credit if the course is required or permitted in a particular college program. Credit by examination is not counted as required or elective credit if the number of the course for which credit is awarded is lower than the initial course required in a particular college program. For example, if a student earns a 4 on the Advanced Placement Chemistry test, the three credits awarded for CHEM 10101 would count toward graduation in the College of Arts and Letters, Mendoza College of Business, or School of Architecture program.

The credits would not count toward graduation in a College of Engineering program since the initial chemistry course in this college is CHEM 10171. On the other hand, if the number of the course for which credit is awarded is higher than the initial course required in a particular college program, the credit awarded satisfies the requirement. For example, credit awarded for MATH 10550–10560 also satisfies the mathematics requirement for programs requiring MATH 10350–10360.

**Language placement**—Students with no previous background in a language can elect a beginning-level course. Students with previous background in a language who want to continue their language study must take a placement exam to determine proper placement.

Students may use the results from a foreign language credit by examination (AP SAT II, IB) for placement, as described under the Credit by Examination table. A maximum of six credits can be granted toward graduation for performance on a foreign language examination before entering Notre Dame, may take one at Notre Dame. All foreign language departments at Notre Dame offer placement exams. The French, German, Latin, and Spanish placement exams are available online. Placement exams for other languages are given during the First Year Orientation Weekend in August and at least twice during the school year in time for fall and spring advance registration. Information on language placement is sent to incoming first-year students during the summer. The appropriate department and the First Year of Studies will guide students with previous instruction in their languages after reviewing their high school background and placement tests.

Regardless of their scores, students in the College of Arts and Letters must take at least one language course in residence at Notre Dame. Arts and Letters students must also complete at least one course at the intermediate or higher level that deals with texts in the original language. If placement allows, one course at Notre Dame at the intermediate or higher

level may satisfy both parts of this requirement. In the College of Science, students who place higher than the intermediate level (third semester) are considered to have fulfilled the language requirement and need not take any additional courses in the language. Students contemplating an international study program that requires language study should consult with language department regarding the appropriate language preparation. All students are encouraged to start their study of language during their first year or the beginning of their second year at the latest.

**College Credit from Other Institutions**

The University’s other colleges and departments, in consultation with the First Year of Studies, determine whether or not college courses completed after the junior year and prior to first-year enrollment and taken at other institutions will be accepted for credit. In order to be considered for credit, these courses must have been completed on college campuses and must not have been used to satisfy high school graduation requirements or Notre Dame requirements for first-year admission. An official transcript, a course syllabus, and a copy of the published description of the course are also necessary for consideration of the course for credit. Normally, courses specified in the First-Year Curriculum may not be satisfied through transfer credit. First-year students need to resolve all college credit situations before or during their first semester at Notre Dame.

**Learning Resource Center**

The First Year of Studies’ Learning Resource Center (LRC) offers several types of help for more difficult classes. All sessions are free of charge and meet for two hours in the evenings or twice a week.

The collaborative learning program offers weekly sessions in which small groups of students work together on homework for their classes. Collaborative learning resource leaders, upper-class students who have excelled in the relevant course, monitor the sessions, encourage problem-solving and collaboration among group members, and answer questions when necessary. Students use this group study to complete homework in a more structured setting. The program is open to all first-year students and sessions are offered in mathematics and the sciences.

The tutoring program allows students to review the concepts their professors have covered in class. Tutoring sessions consist of small groups, usually kept under fifteen students, which meet once a week for two hours. An upper-class tutor, who has excelled in the course he or she is tutoring, reviews recent concepts and homework and answers any questions the students might have. The tutoring program is open to all first-year students and sessions are offered for most first-year courses.

HELP SESSIONS

Help Sessions, held weekly for two hours, offer assistance to students who have questions regarding homework or concepts in classes they are taking. Students with questions may drop in at any point during the session to work with knowledgeable tutors. Because of the flexible nature of help sessions, tutors are often available to give personal attention to students. Help sessions are offered for selected mathematics and chemistry courses and are open to all first-year students.

The assistance offered by the LRC is supplemental and is not meant to replace a student’s own efforts, classroom instruction, meetings with the professor, or any other assistance offered by the instructor or department.

**Peer Advising Program**

The Peer Advising Program provides the opportunity for first-year students to engage in meaningful conversation with reliable and informed upper-class students. These interactions focus on the general adjustment of the first-year student to the university setting. Peer Advising endeavors to welcome all students to the Notre Dame community by reassuring and encouraging students as they begin university-level study; informing students about a variety of campus resources; emphasizing the mission and initiatives of the First Year of Studies; and listening for the challenges and concerns of new students.

**Program in Academic Excellence**

All first-year students interested in improving their skills for success in college may participate in small group workshops or schedule individual meetings with the First Year of Studies learning strategies specialist. The Program in Academic Excellence covers a variety of topics of practical value to students (e.g., time management, note taking, test preparation) and includes individual assistance with writing and reading for various academic programs.

Programs of Studies. The study of architecture has a long and distinguished history at the University of Notre Dame. Courses in architecture were taught at the University as early as 1869. Formal instruction in architecture began in 1898. The Department of Architecture, previously part of the College of Engineering, became the free-standing School of Architecture in 1994. The school offers a five-year program leading to the degree of Bachelor of Architecture, a two-year program leading to the degree of Master of Architectural Design and Urbanism; and a three-year program leading to the degree of Master of Architecture. The professional degree programs (B.Arch. and M.Arch.) are accredited by the National Architectural Accrediting Board, and the curricula conform to NAAB requirements for the professional degree in architecture.

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S., regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

The University of Notre Dame School of Architecture offers the following NAAB-accredited degree programs:

- B.Arch. (165 undergraduate credits)
- M.Arch. (preprofessional degree + 54 graduate credits)
- M.Arch. (non-preprofessional degree + 90 credits)

Next accreditation visit for all programs: 2016

While the primary objective of the curriculum is professional education, students have opportunities to explore fields such as business, engineering, environmental sciences, and the liberal arts through electives and building on University requirements.

In the spring of 2010 the School of Architecture completed its most recent NAAB accreditation evaluation and was granted a full 6-year term of accreditation.

Since the early 1990s, the school’s curriculum has been based on education in traditional and classical architecture and urbanism. Instruction teaches the skills, cultivates the talents, and imparts the knowledge necessary to produce buildings that represent innovation within long-standing traditions, use nature’s materials responsibly, and contribute to building livable communities. The school believes this is best done by learning how recurring problems in designing and constructing buildings and fitting them into existing urban and rural settings have been addressed in the past and adapting those lessons to the ever-changing circumstances of the modern world.

The goals of the curriculum include developing competence in the design of individual buildings, understanding the relationship between individual buildings and their physical and cultural contexts, and recognizing the ethical dimensions of the professional practice of architecture. Architects play a primary role in shaping the built environment and have a professional responsibility to do so in a manner that contributes to the civil life of society. Their work must also help to renew and sustain the integrity of the natural world and promote social welfare.

In addition to the first professional degree of Bachelor of Architecture (B.Arch.), the School of Architecture offers multiple paths of study leading to one of three degrees.

The two-year post-professional (Path A) graduate course of study leads to the Master of Architectural Design and Urbanism (MADU) degree, and is for those who already hold a professional degree in architecture (B.Arch. or M.Arch.). The two-year professional (Path B) graduate course of study leads to the Master of Architecture (M.Arch.) degree, and is for those who hold a four-year pre-professional degree (B.S. or B.A. in Architecture).

The three-year professional (Path C) graduate course of study leads to the Master of Architecture (M.Arch.) degree, and is for those who hold an accredited undergraduate degree in a field other than architecture.

All of these graduate courses of study entail one (Path A or B) or three (Path C) foundational studio courses, a one-year concentration in either classical architecture or urban design, and conclude with a one-semester terminal design project.

In their penultimate year, professional degree students may apply for the Path D program. Acceptance into this program extends a student’s course of study by one year, allowing for participation in both concentrations, after which the student will graduate with both the professional M.Arch. degree and the post-professional Master of Architectural Design and Urbanism (MADU) degree.
School of Architecture

The Master of Science in Historic Preservation program connects naturally to the professional degree programs within the School of Architecture as the school seeks to not only build on the living tradition of architectural language and support the future of the community, but to care for the structures, spaces, landscapes, crafts, bodies of knowledge, and traditions that represent the best of our varied cultural heritage. The Master of Science in Historic Preservation program covers two calendar years—four semesters (including one semester in Rome), one introductory summer course, and one summer internship.

The Master of Science in Historic Preservation program is open to recent graduates and working professionals with professional or non-professional degrees in architecture.

Concentrations in furniture design, in historic preservation and restoration, in practice and enterprise, in architectural practice and enterprise, and in building arts are also options within the first professional degree program.

Required courses for the concentration in furniture design are Beginning Furniture; Advanced Furniture Design; Special Studies in Furniture Design; and Special Studies in Furniture Design 2.

In addition to the professional practice course in the B.Arch. curriculum, students in the concentration in practice and enterprise take four courses from the Mendoza College of Business: Accountancy I, Principles of Management, and two other courses chosen from offerings in various aspects of business.

The concentration in building arts requires four courses: Introduction to Architectural Models, Advanced Architectural Models and Design, and Construction of Architectural Elements I and II. All four courses consist of group projects.

Concentrations are declared at the end of the third year.

Both the undergraduate and graduate programs at Notre Dame take advantage of the school's proximity to Chicago, where the school has recently acquired studio space in the historic Motorola Building (originally the Railway Exchange Building), owned by the University. In addition, all third-year undergraduate students spend the academic year in the school's Rome Studies Center in Italy. All graduate students spend a semester there. Some limited scholarship aid is available for the additional expenses incurred in Rome.

The initial phase of undergraduate architectural study is devoted to acquiring basic design and technical skills and developing an understanding of architectural concepts by learning canonical forms of classical architecture and manipulating them in design problems. The sophomore year begins with paradigmatic projects and ends by solving complex and challenging building programs. The sophomore foundation is reinforced in the third year, spent in Rome. There, 2,500 years of building tradition provide the context for contemporary design problems. Fourth-year students return to Notre Dame, where they are reintroduced to the American context. At this stage, students are encouraged to synthesize their interpretations of the historical legacy in the context of American urban centers and small cities. They are also challenged by projects that require them to engage architectural problems outside their Western focus. The undergraduate program culminates with a thesis design project completed in the fifth year.

In addition to studio instruction, students complete course work in structural, mechanical, and environmental systems and architectural history. History and theory courses in the School of Architecture include a two-semester survey of the history of architecture from the earliest times to the present and specialized upper-level course work in selected topics involving the history and theory of architecture.

Students are in contact with practicing professionals through collaboration between the School of Architecture and the Northern Indiana Chapter of the American Institute of Architects. The School of Architecture has an active chapter of the American Institute of Architecture Students.

Facilities. The School of Architecture is located in Bond Hall of Architecture. This building, the former University Library, was thoroughly rebuilt from 1995 through 1996. The 60,000-square-foot building contains classrooms, an auditorium, library, computer lab, and studios that are both functional and designed in accord with the historical limestone structure. The Rome Studies Center is in the heart of Rome's historic center.

Richard H. Driehaus Prize in Classical Architecture

Richard H. Driehaus, the founder and chairman of Driehaus Capital Management in Chicago, initiated the Richard H. Driehaus Prize in Classical Architecture to honor a major contributor in the field of traditional and classical architecture or historic preservation. In 2004, he initiated the Henry Hope Reed Prize to recognize outstanding contributions to the welfare of the traditional city and its architecture. He established the prizes through the University of Notre Dame's School of Architecture because of its reputation as a national leader in incorporating the ideals of traditional and classical architecture into the task of modern urban development.

First Year

First-year students intending to major in architecture take the following courses. Courses in italics need not be taken in the semester in which they are shown.

Student Awards and Prizes

Henry Adams Medal and Certificate. This American Institute of Architecture (AIA) award honors the graduating architecture student who has the highest grade-point average for the complete course of study.

Henry Adams Certificate. This AIA award is given to the graduating architecture student with the second-highest grade-point average for the complete course of study.

Tau Sigma Delta Bronze Medal Winner. The Tau Sigma Delta medal is awarded to a graduating student selected by his or her peers in recognition of design excellence.

Andrew F. Kervick Award for Design and Drawing. Founded by Prof. Francis W. Kervick, former head of the School of Architecture in memory of his father, this award, selected by the fourth and fifth-year faculty, honors the student whose work in freehand drawing in the fourth or fifth year has been of the highest merit.

Alpha Rho Chi. Selected by faculty; the Alpha Rho Chi Medal goes to the graduating student who has shown exceptional ability for leadership and has performed willing service for the School.

Ralph Thomas Sollitt Award. Founded in 1931 by Ralph Sollitt and Sons Construction Co., this award, selected by the Rome Studies studio faculty, honors the student whose work in freehand drawing in the third year of study has been of the highest merit.

Alice Wesoloski Scholarship. For her decades of service to the School of Architecture, this award was established in honor of Ms. Wesoloski. Selected by the faculty and the Office of Financial Aid to provide tuition assistance to a student of particular ability, character and need.

Alliance Architects Scholarship. Selected by the faculty and the Office of Financial Aid to provide tuition assistance to minority students of particular ability and character.

David M. Schwartz/Architectural Services, Inc. Internship and Traveling Fellowship Award. A two-month paid internship for a fourth-year student and a one-month travel fellowship involving independent research and study.

Ray Stuemer Memorial Award for Excellence in Design. Given in memory of former Professor Ray Stuemer, this award, selected by faculty, is given on the basis of design work through the fourth year for overall improvement and design excellence.

Frank Montana Rome Scholarship Award. Recipients are selected by the dean, second-year design faculty and the office of financial aid. The Montana scholarships were endowed by Prof. Frank Montana, chair of the Department of Architecture for 25 years and founder of the Rome program. The scholarships are for tuition assistance in connection with the Notre Dame Rome Studies Program.

Brian Crumlish Scholarship. Selected by the faculty, the Brian Crumlish Scholarship is awarded to the student who has displayed outstanding academic achievement in Building Technology and Structural Mechanics during the second year of study, and the
Building Technology II and Structural Design during the fourth year of study.

Ricardo and Cristina Alvarez-Diaz Award in Architecture. Selected by a committee of students, this award is given to an undergraduate architecture student at the end of their fourth year in the program.

Robert Amico Studio Award. Selected by the dean and faculty for design excellence in the fourth or fifth year of study.

Jane Jacobs Award. Selected by the thesis faculty and the dean, this award is for demonstrated commitment to community and urban planning.

Liang Su-Cheng Award. Selected by the fifth-year thesis jurors and the dean, this award recognizes excellence in non-Western architecture.

Michael and Julie Hanahan Architecture Prize. Selected by the students, this prize recognizes overall excellence in the study of architecture.

Rambush Prize in Religious Architecture. Selected by the fifth-year thesis jury and faculty, the Rambush Prize is given for the best solution to a problem related to a religious architecture project.

Leon Battista Alberti Award. For the graduate student with the highest grade-point average for the complete course of study in the post-professional degree program.

Ferguson & Shamamian Graduate Prize. Selected by the graduate review jury, the Ferguson & Shamamian Architects Graduate prize is awarded to a graduate student for excellence in classical/traditional design exhibited in a terminal project or graduate thesis.

Dean’s Graduate Award for Design Excellence in Architecture. Selected by the graduate thesis jurors and the dean, this award goes to overall excellence in a graduate thesis project.

Alvarez-Diaz & Villalon Internship. A two-month internship for a fourth-year student or a graduate student entering the final year of his or her program with Alvarez-Diaz & Villalon in Puerto Rico, and a stipend to cover airfare and housing.

Alvarez-Diaz & Villalon Award for Architectural Excellence in Sustainability. Selected by the faculty, the Cristina Villalon Diaz Award is given to a graduate student during their terminal year in the program.

Lochner SCTC Scholarship Award. The Lochner SCTC Award—selected by the dean, the graduate program director, and the graduate design faculty, this graduate level scholarship is for educational purposes in connection with the Notre Dame Rome Studies Program. The “SCTC” honors the tradition of Fr. Lochner’s compassionate communication: In every letter, postcard, and Christmas mailing (and in many personal discussions) he always ended with his constant reminder, “SCTC,” which stood for “Stay Close To Christ.”

Student Organizations

American Institute of Architecture Students (AIAS). Students begin to engage in the professional activities of the national AIAS by attending meetings and conventions and structuring activities within the School of Architecture. The AIAS sponsors educational, professional, and social events in the school.

Students for New Urbanism (SNU). SNU is a community of students from all majors that present, explore, discuss, and apply the ideals of New Urbanism and other “good urbanism” theories. Ideas especially focus on walkable neighborhoods, public transportation, affordable housing, new technology, sustainable architecture, and community participation in the context of creating healthy communities.

SNU looks at the vitality of urban places and how to maintain and design great urban environments. SNU is composed of three main parts: Education (to teach others and ourselves about urban design); Service (to help the communities in our area and be a part of the urban design process) and Connection (act as a facilitator between professionals and students among many disciplines that participate in the planning process).

Student Association for Women in Architecture (SAWA). SAWA is designed to encourage gender equality and diversity throughout the School of Architecture; the architecture profession, and our communities by providing a more diverse educational experience. Through collaboration with the AIAS and the SNU, we hold discussion groups with students and faculty, host guest lecturers and exhibits, create community outreach programs where architecture students educate local youth about the architecture school and the architectural profession, and support our local community through service projects.

Tau Sigma Delta. In 1961 the Sigma Chapter of Tau Sigma Delta, the national architectural honor society, was established at Notre Dame. The constitution of Tau Sigma Delta stresses as its sole function the encouragement of high scholastic standing. Election to membership is limited to the top 20 percent of the students in the School of Architecture who have completed 60 percent of their requirements for the professional degree.

Students for Classical Architecture promotes discussion regarding how best to incorporate architectural fundamentals into a contemporary curriculum. Students for Classical Architecture also supports local chapters of this organization at other institutions. We seek collaboration between these chapters and encourage dialogue between academic programs, to foster a gradual rebirth of tradition in education. Goals include: support of students around the world interested in traditions of architecture; supplementation of university curricula relevant to classical design through salons, lectures, and tours; lobbying NAAB and universities to offer classical studies, reinstate required history courses and promote an architectural curriculum based in tradition; educating public about the current state of architectural education.
College of Arts and Letters

The College of Arts and Letters is the oldest, and traditionally the largest, of the four undergraduate colleges of the University of Notre Dame. It houses 21 departments and several programs through which students at both undergraduate and graduate levels pursue the study of the fine arts, the humanities and the social sciences.

**Liberal Education.** The College of Arts and Letters provides a contemporary version of a traditional liberal arts educational program. In the college, students have the opportunity to understand themselves as heirs of a rich intellectual and spiritual tradition and as members of a complex national and international society. The faculty of the college are committed to the life of the mind, to the critical and constructive engagement with the whole of human experience. On the basis of a firm yet broad foundation, graduates of the college are equipped for a lifetime of learning in an ever-changing world. The overall curriculum and the specific major programs encourage students to approach issues reflectively, to analyze them carefully and to express their reasoned conclusions with clarity.

The intellectual quest conducted in the College of Arts and Letters takes place in an explicitly Catholic environment. Here ultimate questions of the meaning and value of human life before God are welcome, and efforts to deal with such questions utilize the immense resources of the Catholic tradition. Inquiry and faith are seen not as opposing forces but as complementary elements of the fully human pursuit of truth.

**Organization.** The college’s administrative center is the Office for Undergraduate Studies, located in 104 O’Shaughnessy Hall. All undergraduates in arts and letters are invited to consult with the assistant deans regarding questions about their academic progress, educational and career goals, and any other concerns of an academic or administrative nature. Pre-law, pre-med, and pre-graduate school advising are available in this office. In particular, sophomores in the college who have not yet declared a major should begin their pursuit for academic advising in this office.

Because education is not limited to the classroom, the college also sponsors or helps to subsidize events which are intended to enrich the undergraduate experience and facilitate faculty-student interaction both on and off campus.

**Curricula and Degrees.** The College of Arts and Letters offers curricula leading to the degree of bachelor of fine arts in Art (Studio and Design) and of bachelor of arts in:

- African Studies
- American Studies
- Anthropology
- Art:
  - Art History
  - Art Studio
  - Design
- Classics:
  - Arabic
  - Classics
  - Greek
  - Latin
  - Greek and Roman Civilization
- East Asian Languages & Cultures:
  - Chinese
  - Japanese
  - Economics
  - International Economics—Arabic
  - International Economics—Chinese
  - International Economics—German
  - International Economics—Japanese
  - International Economics—Romance Languages
  - International Economics—Russian
- English
- Film, Television, and Theatre
- Gender Studies
- German and Russian Languages and Literatures:
  - German
  - Russian
- History
- Irish Language and Literature
- Mathematics (honors only)
- Medieval Studies
- Music
- Neuroscience and Behavior
- Philosophy
- Philosophy/Theology (joint major)
- Political Science
- Program of Liberal Studies
- Psychology
- Romance Languages and Literatures:
  - French and Francophone Studies
  - Italian
  - Romance Languages and Literatures
- Spanish
- Sociology
- Theology

The college also offers supplementary majors, but not stand-alone first or degree-yielding majors, in:

- Africana Studies (24 hours)
- Arts and Letters Pre-health Studies (49 hours)
- Art History (24 hours)
- Asian Studies (24 hours)
- Chinese (24 hours)
- Classics (24 hours)
- Computer Applications (CAPP) (24 hours)
- French (24 hours)
- Gender Studies (24 hours)
- German (24 hours)
- Greek and Roman Civilization (24 hours)
- Irish Language and Literature (24 hours)
- Italian (24 hours)
- Japanese (24 hours)
- Latino Studies (24 hours)
- Medieval Studies (24 hours)
- Peace Studies (24 hours)
- Russian (24 hours)
- Russian and East European Studies (24 hours)
- Spanish (24 hours)
- Theology (25 hours)

**Admission Policies.** Admission to the College of Arts and Letters takes place at the end of the first year. The student body of the College of Arts and Letters thus comprises sophomores, juniors and seniors.

A prerequisite for admission of sophomores into the College of Arts and Letters is good standing at the end of the student’s first year.

The student must have completed at least 24 credit hours and must have satisfied all of the specified course requirements of the First Year of Studies Program: University Seminar; Writing and Rhetoric; two semester courses in mathematics; two courses in science or a foreign language, and two semester courses for the Moreau First Year Experience. (The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy or theology.) A student who does not meet these conditions is retained in the First Year of Studies until the conditions are met. The deficiencies must be removed at the Notre Dame Summer Session or in the student's third semester at Notre Dame.

**Description of General College Requirements.** Every student graduating from the College of Arts and Letters must have a minimum of 122 credit hours and must have fulfilled all University, college and major requirements. Unless special permission has been obtained in advance from the Office for Undergraduate Studies, special studies and directed readings courses do not satisfy university or college or major requirements.

* One of these requirements must be a University Seminar.
Student Awards and Prizes

Arts and Letters Degree Credit. Students may not count both examination and degree credit for the same course toward graduation hours. For example, a student who has advanced placement credit for ROSP 20201 may not take ROSP 20201 and count both toward the 120 hours required in arts and letters. Students also may not count for degree credit both of two equivalent courses taught at Notre Dame. For example, PHIL 10101 and 20201 are considered to be equivalent courses, as are ECON 10015 and 20015. Students should take only one of each pair but not both. In cases where a student has double credit for the same course, the credits for only one course will be counted toward the student’s degree credit, despite the fact that credits for both will appear on the student’s transcript. A list of equivalent math and science courses can be found at the end of the College of Science section of the Bulletin. The same rules about double credit apply to them.

No courses in logic will satisfy the University philosophy requirement. After matriculation into the college, it is the expectation that arts and letters students will complete any outstanding science requirements at Notre Dame by their second semester in the college.

ROTC Credits received for 10xxx- and 20xxx-level ROTC courses do not count toward a student’s 122 required credit hours, despite being recorded on the transcript. They will be manually subtracted from the student’s total number of hours in the graduation check and/or electronically in the Graduation Progress System (GPS) software. The College of Arts and Letters accepts a maximum of 12 free elective credits only for ROTC students from the 30xxx- and 40xxx-level military sciences only. Non-ROTC students may not take ROTC courses for credit toward graduation except by special permission obtained in advance of registering for the course from the deans in the Office for Undergraduate Studies. If a non-ROTC student registers in ROTC classes without first acquiring permission, these credits will appear on the student’s transcript, but the credits will be subtracted manually from the student’s total hours at the time the graduation check is made.

Combination Five-Year Program with the College of Engineering. In 1952, in cooperation with the College of Engineering of the University, the College of Arts and Letters instituted a five-year program that combines a liberal arts program with the requirements of the various engineering programs. Students who complete the combination program will earn two degrees: the degree of bachelor of arts and the degree of bachelor of science in the engineering major pursued. Dual degree students are eligible to join the Reilly Program in Engineering and Arts and Letters described at http://reilly.nd.edu/reilly-dual-degree-in-arts-and-letters-and-engineering/

Study Abroad. In light of the expansion of Notre Dame's education abroad opportunities, students are encouraged to participate in University programs whenever possible. For students whose academic or programmatic needs cannot be met through existing Notre Dame programs, limited exceptions to allow a student to attend non-Notre Dame programs abroad will be made on an individual basis after extensive consultation among the students, their faculty advisors, and the deans.

Student Awards and Prizes

COLLEGIATE AWARD IN MODERN AND CLASSICAL LANGUAGES
The Robert D. Nuner Modern and Classical Language Award—presented to the graduating senior in the College of Arts and Letters with a first or second major in any classical or modern foreign language, who has earned the highest cumulative grade point average.

AFRICANA STUDIES
The Wright, Flint-Hamilton & Mason Directors Award—recognizing excellence in research on a topic exploring social, political, economic and/or cultural aspects of the African and African American Diaspora.

AMERICAN STUDIES
The J. Sinnott Meyer Award for Outstanding Service to the Community—J. Sinnott Meyer was to have graduated from Notre Dame in the spring of 1920. Instead, he died in February of that year. Mr. and Mrs. A.R. Meyer of Paducah, Kentucky, established the J. Sinnott Meyer "Burse" in memory of their beloved son. The Meyer Award is given for outstanding service to the community here at Notre Dame and beyond (i.e., local, state, and national levels of service). This award is available to an American Studies senior major.

The James E. and Barbara Murphy Award for Exceptional Journalism—A 1947 graduate of Notre Dame, James E. Murphy entered the world of journalism while doing graduate work at the Medill School of Journalism, Northwestern University. He then joined ABC News Radio Network as a writer/editor. Murphy migrated to the field of public relations, returning to his alma mater as director of public information. From that day until his last assignment overseeing Notre Dame’s 150th birthday commemoration, Murphy’s influence was felt over the entire panoply of activities advancing the image of the University. After serving as the guiding hand of public relations for more than four decades, he retired as associate vice president for university relations. The Murphy award is given for exceptionally submitted journalism. This award is available to any American Studies major or journalism minor.
The Paul Neville Award for Excellence in Journalism—awarded to the anthropology student with outstanding performance in the tasks of a professional academic in one or more of the following areas: publication, presentation at professional meetings, grants, and fellowships.

The Robert DaMattia Excellence in Anthropology Award—awarded to all students who achieve a 4.0 grade point average in the anthropology major.

The Paul Farmer Applied Anthropology Award—awarded to the student who has used his/her anthropological training for public service.

The David Hoffmann Scholar/Athlete Award in Anthropology—awarded to an outstanding junior student/design major. It is presented at the beginning of the student's senior year of study.

The Helen Hritzu and Jewell Erickson Award—awarded when merited to a graduating senior for excellence in the study of Greek, Latin or Arabic.

The Dr. John E. Burke Award—awarded to an outstanding senior English major.

The Joseph P. O'Toole Jr. Award—awarded to the outstanding senior English major.

The James E. Robinson Award—presented to an outstanding senior English major.

The Richard T. Sullivan Award for Fiction Writing—awarded to the undergraduate who submits the best original fiction manuscript.

The Dr. Robert Joseph Barnet Award—presented at the beginning of the student's senior year of study.

The Eugene M. Riley Prize in Photography—awarded to the student with the best undergraduate essay in Asian Studies.

The Eleanor Meehan Medal for Literary Merit—presented to the English major who submits the best original critical essay written for an English course.

The Radwan and Allan Riley Prize in Art History and Criticism—awarded for the best essay in art history or criticism submitted by an undergraduate or graduate student.

The Richard T. Sullivan Award for Fiction Writing—awarded to the student with the best undergraduate essay in Asian Studies.

The Father Anthony F. Lauck, C.S.C. Award—awarded to an outstanding junior student/design major.

The Dr. John E. Burke Award—awarded to an outstanding Arts and Letters preprofessional senior majoring in anthropology.

The Richard T. Sullivan Award for Fiction Writing—awarded to the student with the best undergraduate essay in Asian Studies.

The Helen Hritzu and Jewell Erickson Award—awarded when merited to a graduating senior for excellence in the study of Greek, Latin or Arabic.

The David Huffman Scholar/Athlete Award in Anthropology—awarded to an American Studies major or journalism minor.

The Robert DaMattia Excellence in Anthropology Award—awarded to all students who achieve a 4.0 grade point average in the anthropology major.

The Paul Farmer Applied Anthropology Award—awarded to the student who has used his/her anthropological training for public service.

The David Hoffmann Scholar/Athlete Award in Anthropology—awarded to an outstanding junior student/design major. It is presented at the beginning of the student's senior year of study.

The Helen Hritzu and Jewell Erickson Award—awarded when merited to a graduating senior for excellence in the study of Greek, Latin or Arabic.

The Dr. John E. Burke Award—awarded to an outstanding senior English major.

The Joseph P. O'Toole Jr. Award—awarded to the outstanding senior English major.

The James E. Robinson Award—presented to an outstanding senior English major.

The Richard T. Sullivan Award for Fiction Writing—awarded to the undergraduate who submits the best original fiction manuscript.

The Dr. Robert Joseph Barnet Award—presented at the beginning of the student's senior year of study.

The Eugene M. Riley Prize in Photography—awarded to the student with the best undergraduate essay in Asian Studies.

The Eleanor Meehan Medal for Literary Merit—presented to the English major who submits the best original critical essay written for an English course.

The Radwan and Allan Riley Prize in Art History and Criticism—awarded for the best essay in art history or criticism submitted by an undergraduate or graduate student.

The Richard T. Sullivan Award for Fiction Writing—awarded to the student with the best undergraduate essay in Asian Studies.

The Helen Hritzu and Jewell Erickson Award—awarded when merited to a graduating senior for excellence in the study of Greek, Latin or Arabic.

The Dr. John E. Burke Award—awarded to an outstanding senior English major.

The Joseph P. O'Toole Jr. Award—awarded to the outstanding senior English major.

The James E. Robinson Award—presented to an outstanding senior English major.

The Richard T. Sullivan Award for Fiction Writing—awarded to the undergraduate who submits the best original fiction manuscript.

The Dr. Robert Joseph Barnet Award—presented at the beginning of the student's senior year of study.

The Eugene M. Riley Prize in Photography—awarded to the student with the best undergraduate essay in Asian Studies.

The Eleanor Meehan Medal for Literary Merit—presented to the English major who submits the best original critical essay written for an English course.

The Radwan and Allan Riley Prize in Art History and Criticism—awarded for the best essay in art history or criticism submitted by an undergraduate or graduate student.

The Richard T. Sullivan Award for Fiction Writing—awarded to the student with the best undergraduate essay in Asian Studies.

The Helen Hritzu and Jewell Erickson Award—awarded when merited to a graduating senior for excellence in the study of Greek, Latin or Arabic.

The Dr. John E. Burke Award—awarded to an outstanding senior English major.

The Joseph P. O'Toole Jr. Award—awarded to the outstanding senior English major.

The James E. Robinson Award—presented to an outstanding senior English major.

The Richard T. Sullivan Award for Fiction Writing—awarded to the undergraduate who submits the best original fiction manuscript.

The Dr. Robert Joseph Barnet Award—presented at the beginning of the student's senior year of study.

The Eugene M. Riley Prize in Photography—awarded to the student with the best undergraduate essay in Asian Studies.

The Eleanor Meehan Medal for Literary Merit—presented to the English major who submits the best original critical essay written for an English course.

The Radwan and Allan Riley Prize in Art History and Criticism—awarded for the best essay in art history or criticism submitted by an undergraduate or graduate student.

The Richard T. Sullivan Award for Fiction Writing—awarded to the student with the best undergraduate essay in Asian Studies.

The Helen Hritzu and Jewell Erickson Award—awarded when merited to a graduating senior for excellence in the study of Greek, Latin or Arabic.

The Dr. John E. Burke Award—awarded to an outstanding senior English major.

The Joseph P. O'Toole Jr. Award—awarded to the outstanding senior English major.

The James E. Robinson Award—presented to an outstanding senior English major.

The Richard T. Sullivan Award for Fiction Writing—awarded to the undergraduate who submits the best original fiction manuscript.

The Dr. Robert Joseph Barnet Award—presented at the beginning of the student's senior year of study.

The Eugene M. Riley Prize in Photography—awarded to the student with the best undergraduate essay in Asian Studies.

The Eleanor Meehan Medal for Literary Merit—presented to the English major who submits the best original critical essay written for an English course.

The Radwan and Allan Riley Prize in Art History and Criticism—awarded for the best essay in art history or criticism submitted by an undergraduate or graduate student.

The Richard T. Sullivan Award for Fiction Writing—awarded to the student with the best undergraduate essay in Asian Studies.

The Helen Hritzu and Jewell Erickson Award—awarded when merited to a graduating senior for excellence in the study of Greek, Latin or Arabic.

The Dr. John E. Burke Award—awarded to an outstanding senior English major.

The Joseph P. O'Toole Jr. Award—awarded to the outstanding senior English major.

The James E. Robinson Award—presented to an outstanding senior English major.

The Richard T. Sullivan Award for Fiction Writing—awarded to the undergraduate who submits the best original fiction manuscript.
The Genevieve D. Willis Senior Thesis Prize—awarded for the best thesis written by an undergraduate at Notre Dame on a topic related to gender studies.

The Philip L. Quinn Essay Prize—Awarded for the best academic essay written by an undergraduate at Notre Dame on a topic related to gender studies.

**LATIN AMERICAN STUDIES**

The Rev. John Considine, MM Award—awarded for outstanding student contributions to the study of, or service to, the Catholic Church in Latin America.

John J. Kennedy Prize for Latin American Studies—awarded to the senior who has written an outstanding essay on Latin America. (Occasionally there is a runner-up award).

The George Monteiro Prize—awarded to the senior who has written an outstanding essay in Portuguese.

**HISTORY**

The Monsignor Francis A. O'Brien Prize—presented to the senior who has achieved distinction with the best essay in history.

The O'Connell Award—an annual award for the best sophomore or junior essay in history.

The O'Hagan Award—awarded to the undergraduate who has submitted the best original essay on a phase of Irish history.

The Senior Honors Thesis Award—awarded for the best history thesis by a senior history major.

**IRISH LANGUAGES AND LITERATURE**

The Brother Simeon Prize for Distinction in Irish—for excellence in Irish language and literature.

**IRISH STUDIES**

The Donald and Marilyn Keough Award—for excellence in Irish Studies.

**JOHN J. REILLY CENTER**

John Jay Reilly Scholar in Arts and Letters and Engineering Dual Degree Award—for exhibiting high standards of excellence and outstanding academic achievement.

**GERMAN AND RUSSIAN LANGUAGES AND LITERATURES**

The Rev. Lawrence G. Broeckl, C.S.C., Award—presented to the graduating senior with the best academic achievement in German.

Delta Phi Alpha German Honor Society Award—awarded to a graduating senior for outstanding achievement in the study of German language and literature.

Jeffrey Engelmeier Award—presented to an outstanding student of German whose leadership and contribution to the life of the department are especially conspicuous.

The Russian Senior Award—presented to the graduating senior with the best academic achievement in Russian.

The Lauren B. Thomas Scholarship—awarded by the Russian faculty to an outstanding Russian major who exhibits financial need.

**MUSIC**

Department of Music Senior Award—awarded to an outstanding senior in the Music Department.

**PHILOSOPHY**

The Deckwilder Medal for Philosophy—presented to the senior submitting the best essay on a philosophical subject.

The John A. O'Keefe Award in Philosophy—awards given when merited to graduating philosophy majors for excellence in philosophy.

**POLITICAL SCIENCE**

The Gary F. Barnabro Political Science Writing Award—awarded for the best paper contributing to nonviolent solutions to world conflicts.

Paul Bartholomew Essay Prize—awarded to the senior major submitting the best senior honors essay in the fields of American politics or political theory.

The Guillermo O'Donnell Prize—for the best senior thesis in the field of comparative politics.

The Stephen Kertesz Prize—awarded to a senior major submitting the best senior honors essay in the field of international relations or comparative politics.

The Rooney Center for the Study of American Democracy Award—awarded to the student who submits the best senior honors thesis in the field of American politics.

**PROGRAM OF LIBERAL STUDIES**

The Otto A. Bird Award—awarded to the Program of Liberal Studies student who submits the best senior essay.

The Susan Marie Clements Award—awarded to a woman among the Program of Liberal Studies graduating seniors who exemplifies outstanding qualities of scholarly achievement, industry, compassion, and service.

**THEOLOGY**

The Gertrude Austin Marti Award in Theology—presented to a graduating senior who has evidenced qualities of personal character and academic achievement in theological studies.

**SOCIOLOGY**

The Margaret Eisch Memorial Prize in Sociology—awarded to an outstanding graduating senior majoring in sociology.

The Sociology Major Essay Award—presented to the senior sociology major who has written the best essay.

**PSYCHOLOGY**

The John F. Santos Award for Distinctive Achievement in Psychology—to a senior psychology major in recognition of outstanding achievement in research, academic performance, and student-life activities.

Senior Recognition Award in Psychology—given in recognition of outstanding achievement in research, academic performance, and student-life activities, while pursuing a major course of study in psychology.

**ROMANCE LANGUAGES AND LITERATURES**

Robert D. Nuner Award—presented to the graduating senior in the College of Arts and Letters with a first or second major in any classical or modern foreign language who has earned the highest cumulative grade point average.

Endowment for Excellence Award in Romance Languages and Literatures—presented to a graduating senior for excellence in Romance languages and literatures.

Walter Langford Awards for Excellence in Spanish Literature and Excellence in French Literature—two awards—to the graduating senior majors in French and Spanish literature whose work was deemed most outstanding by the Romance languages and literatures faculty.

The Joseph Italo Bosco Senior Award—awarded to a graduating senior for excellence in Italian Studies.

**IRISH LANGUAGES AND LITERATURE**

The Brother Simeon Prize for Distinction in Irish—for excellence in Irish language and literature.

**IRISH STUDIES**

The Donald and Marilyn Keough Award—for excellence in Irish Studies.

**JOHN J. REILLY CENTER**

John Jay Reilly Scholar in Arts and Letters and Engineering Dual Degree Award—for exhibiting high standards of excellence and outstanding academic achievement.

**GERMAN AND RUSSIAN LANGUAGES AND LITERATURES**

The Rev. Lawrence G. Broeckl, C.S.C., Award—presented to the graduating senior with the best academic achievement in German.

Delta Phi Alpha German Honor Society Award—awarded to a graduating senior for outstanding achievement in the study of German language and literature.

Jeffrey Engelmeier Award—presented to an outstanding student of German whose leadership and contribution to the life of the department are especially conspicuous.

The Russian Senior Award—presented to the graduating senior with the best academic achievement in Russian.

The Lauren B. Thomas Scholarship—awarded by the Russian faculty to an outstanding Russian major who exhibits financial need.

**MUSIC**

Department of Music Senior Award—awarded to an outstanding senior in the Music Department.

**PHILOSOPHY**

The Deckwilder Medal for Philosophy—presented to the senior submitting the best essay on a philosophical subject.

The John A. O'Keefe Award in Philosophy—awards given when merited to graduating philosophy majors for excellence in philosophy.

**POLITICAL SCIENCE**

The Gary F. Barnabro Political Science Writing Award—awarded for the best paper contributing to nonviolent solutions to world conflicts.

Paul Bartholomew Essay Prize—awarded to the senior major submitting the best senior honors essay in the fields of American politics or political theory.

The Guillermo O'Donnell Prize—for the best senior thesis in the field of comparative politics.

The Stephen Kertesz Prize—awarded to a senior major submitting the best senior honors essay in the field of international relations or comparative politics.

The Rooney Center for the Study of American Democracy Award—awarded to the student who submits the best senior honors thesis in the field of American politics.

**PROGRAM OF LIBERAL STUDIES**

The Otto A. Bird Award—awarded to the Program of Liberal Studies student who submits the best senior essay.

The Susan Marie Clements Award—awarded to a woman among the Program of Liberal Studies graduating seniors who exemplifies outstanding qualities of scholarly achievement, industry, compassion, and service.
Service Awards

AMERICAN STUDIES

J. Sinnot Meyers Award—awarded to a senior in American Studies for outstanding service to the academic community.

ECONOMICS

Lawrence J. Lewis Award—awarded to the senior in the Department of Economics who has best distinguished himself or herself in community service.

MUSIC

Band Vice President Prize—annual award to the elected vice president of the band.

Terry Baum Secretary Prize—awarded to the secretary of the band and presented by the University of Notre Dame.

Halland President’s Prize—annual award for the outgoing president of the band.

Thomas J. Kirschner Band Treasurer Prize—annual award to the elected band treasurer.

The Kobuk Memorial Scholarship—for outstanding instrument achievement for band.

Robert F. O’Brien Award—for outstanding service and dedication to the band.

Outstanding Band Member Award—for loyalty, dedication, and leadership.

Outstanding Marching Band Award—awarded for dedication, ability, and leadership during marching band season.

The Daniel H. Pokelte Memorial Award—presented to two underclassmen in the Notre Dame Glee Club in recognition of musical leadership, exemplary personal character and overall contribution to the success of the group.

Gerald J. Smith Memorial Award—awarded for citizenship and loyalty to band.

Social Chairperson Award—plaque given annually to the social chairperson in appreciation for dedication and service to the Notre Dame bands.

PEACE STUDIES

The Peter Yarrow Award in Peace Studies—awarded to an outstanding student in Peace Studies with a commitment to justice and service work.

POLITICAL SCIENCE

George Brinkley Service Award—awarded to the student who best exemplifies the Political Science Department’s ideal of public service through service to the department, the University, or the wider community.

ROMANCE LANGUAGES AND LITERATURES

Carlos Aballi Award in Hispanic Cultural Awareness—given to a graduating Hispanic student who has taken Spanish at Notre Dame and has been active in promoting Hispanic cultural awareness at Notre Dame.

The Mara Fox Award for Service to the Hispanic Community—awarded to a graduating senior who has performed outstanding service benefiting the Hispanic community.

William Richardson Award in Hispanic Culture for an African American Student—given to a graduating African American student who has shown an unusually strong interest in Hispanic culture through his or her active participation in campus and/or community projects or activities.

José Tito Sigenza Award for Service to Hispanic Youth—awarded to the senior who has studied Spanish at Notre Dame and contributed outstanding service to Hispanic youth.

Special Arts and Letters Requirements

Language Requirement. Students in arts and letters are required to reach intermediate proficiency in a foreign language, but “intermediate proficiency” is defined differently in each of the languages, depending on the complexity of the language itself and the intensity of the course. Check with the specific language department or the assistant deans in 104 O’Shaughnessy to determine which courses fulfill the requirements. Students without Advanced Placement or SAT II credit, but who come with some background in the language they elect will be placed by examinations given during first-year orientation and prior to spring preregistration. Departmental placement exams will not be credit-bearing. Students may receive up to eight hours of credit based on their scores on the AP and SAT II tests. If, for some reason, more than eight hours of credit appear on their transcript, the credits beyond eight will be non-counted and will be manually subtracted from the total number of degree credits counting for graduation. Regardless of the scores on these exams, it is impossible for a student to test out of the language requirement in the College of Arts and Letters. Every student in arts and letters must take at least one course at the appropriate level that deals with texts in the original language. For the specific details of a given language offering or program, check with the relevant department.

College Seminar. The College Seminar is a unique one-semester course shared by all students majoring in the College of Arts and Letters. Typically taken in the sophomore year, the course offers students an introduction to the diversity and distinctive focus of arts and letters at the University of Notre Dame. Specific sections of the College Seminars vary in their topics and texts, but all feature an interdisciplinary approach, commitment to engaging important questions, employment of major works, and emphasis on the development of oral skills. Every College Seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the college: the arts, humanities, and social sciences.

For descriptions of the University requirements, see “University Requirements” in the front section of this Bulletin.

Arts and Letters Programs

The programs offered by the College of Arts and Letters include majors, supplementary majors, and minors, which may be either departmental or interdisciplinary. Every student in the college must complete one major sequence. Supplementary majors and minors are optional and may be taken to supplement or enhance a student’s major but do not lead to graduation in and of themselves.

Double-Counting

In the College of Arts and Letters one course may be double-counted one time to fulfill a second major, supplementary major, or minor requirement and a University or college requirement. No course may be double-counted between majors and/or minors or between a first major and University or college requirements. University Seminar, by definition, fulfills a University or college requirement and is not considered a double count under this rule.

Majors

A major sequence is a carefully chosen combination of courses from an individual department or program that stands alone in qualifying students for an undergraduate degree. It usually consists of between 8 and 12 courses. In contrast to the University and college requirements that provide students with broad exposure to a variety of the liberal arts and sciences, the major affords the student an opportunity to gain more specialized knowledge of a particular field or discipline.

The major in liberal arts programs is normally declared during the sophomore year and is completed during the junior and senior years. Arts and Letters students must declare at least one major no later than the sixth class day of first semester of senior year. Each spring before preregistration, the college holds a series of programs and meetings to inform the students about the various majors so that they may make intelligent choices. Students pursue their majors under the direction of the departmental or program chair and its advising staff.

Supplementary majors are those that cannot stand alone in qualifying a student for an undergraduate degree but must be taken in conjunction with a...
Minors

Minors are five-course sequences that can either be departmental or interdisciplinary. The college has three categories of minors: Departmental, Interdisciplinary, and Area Studies.

### Departmental:
- Africana Studies
- Anthropology
- Art History
- Asian Studies
- Art Studio
- Chinese
- Classical Literature
- French and Francophone Studies
- German
- Greek
- Greek and Roman Civilization
- Irish Language and Literature
- Italian
- Japanese
- Korean
- Latin
- Philosophy
- Portuguese and Brazilian Studies
- Russian
- Theology

For details, see the departmental descriptions in the section "Programs of Study."

### Interdisciplinary:
- Business Economics
- Catholic Social Tradition
- Constitutional Studies
- Education, Schooling, and Society
- Gender Studies
- Hesburgh Program in Public Service
- International Development Studies
- Journalism, Ethics, and Democracy
- Liturgical Music Ministry
- Medieval Studies
- Peace Studies

### Area Studies:
- Africana Studies
- Asian Studies
- European Studies
- Irish Studies
- Latin American Studies
- Latino Studies
- Mediterranean/Middle Eastern Studies
- Russian and Eastern European Studies

### Electives

In addition to the University and college requirements and the major requirements, the balance of a student's usual five-course-per-semester program consists of elective courses, which can be drawn from the offerings of any department or college that are open to non-majors who have met the necessary prerequisites.
Africana Studies

Chair:
TBD

Joint Faculty:
Stuart Greene, Associate Professor, Department of English
Paulinus Odozor, Associate Professor, Department of Theology
(The Rev.) Hugh R. Page Jr., Dean, First Year of Studies; Associate Professor of Theology, Department of Theology
Richard B. Pierce, John Cardinal O’Hara, C.S.C., Associate Professor of History
Dianne Pinderhughes, Professor, Department of Africana Studies and Political Science

Affiliated, Concurrent, and Adjunct Faculty:
Jaimie Bleck, Assistant Professor, Political Science; Concurrent Faculty, Africana Studies
Catherine Bolten, Assistant Professor, Fellow of the Kellogg Institute for International Studies; Concurrent Faculty, Africana Studies
Darren Davis, Professor, Department of Political Science
Robert A. Dowd C.S.C., Assistant Professor, Political Science
Cyrainna Johnson-Roullier, Associate Professor, Department of English
Paul V. Kollman C.S.C., Associate Professor, Theology; Fellow, Kroc Institute for International Peace Studies
Erin McDonnell, Assistant Professor, Sociology; Concurrent Faculty, Africana Studies
Rory M. McVeigh, Department Chair; Professor, Sociology
Rahul Oka, Assistant Professor, Concurrent Faculty, Africana Studies; Fellow of the Kellogg Institute for International Studies; Fellow of the Joan B. Kroc Institute for International Peace Studies
Jacquetta Page, Adjunct Assistant Professor, Department of Africana Studies
Abby Palko, Assistant Professional Specialist, Gender Studies
Jason M. Ruiz, Assistant Professor, American Studies; Fellow, Institute for Latino Studies
Todd David Whitmore, Associate Professor, Theology; Concurrent Associate Professor, Concurrent Instructor, Fellow of the Joan B. Kroc Institute for International Peace Studies

Special Professional Faculty
Maria McKenna, Director of Undergraduate Studies, Africana Studies; Senior Associate Director, Education, School, and Society Program

Office Coordinator:
Gayle Wilson, Department of Africana Studies

Please contact the Department of Africana Studies at 631-0397 or astudies@nd.edu, or contact Maria McKenna at mmckenn9@nd.edu.

The Department of Africana Studies at the University of Notre Dame is dedicated to the holistic and integrative study of Africans and people of African descent in the Americas and the global diaspora. Building on the legacy of the former African and African American Studies Program (1967–2005), the department emphasizes a cross-regional, cross-cultural perspective, a comparative analysis of and between different diasporan groups and the national and global contexts they inhabit. This multidisciplinary department seeks to explore the history, society, politics, economic development, philosophical, theological and theoretical perspectives, literature, arts, religions, and cultures of the peoples of Africa and the African diaspora. Its comparative and relational foci highlight the connections between culture, race, gender, class, nationality, and other categories of identity and experience.

The Department of Africana Studies aspires to become a center for academic and community activity, an innovative centerpiece for the University of Notre Dame. Undergraduates draw on a range of academic and community activities designed to stimulate intellectual inquiry, excellence in scholarship, and creative engagement.

Program of Studies. The major and minor in Africana Studies offer: (1) a disciplined and rigorous intellectual environment to study the histories, literatures, languages, and cultures of African and Afrodiasporan peoples; and (2) an intellectual appreciation of the richness, diversity, and complexity of the African American experience—particularly when it is viewed within national and global contexts.

The department also has opportunities for dialogue, reflection, and social engagement within and beyond the classroom. Upon completion of all requirements, students will have received both a solid introduction to the discipline of Africana Studies and an appreciation of how it interfaces with other areas in the humanities, arts, social sciences, and theological disciplines.

Africana Studies degree options for Notre Dame undergraduates consist of a major (30 credit hours), including a “capstone” experience consisting of a senior project or thesis, an interdisciplinary minor (15 credit hours) and a supplementary major (24 credit hours).

Please note: The Introduction to Africana Studies course is often only offered in the fall of each academic year. While it is not an official pre-requisite for many Africana Studies courses, we recommend students take it prior to other coursework in the department.

Major (30 credit hours)
Introduction to Africana Studies (3 credit hours)
Interdisciplinary Requirement (9 credit hours)
Students will choose one AFST course from each of the following disciplines: literature/fine arts, history, and social science.

Senior Project or Senior Thesis (6 credit hours)
Four elective AFST courses (12 credit hours)

Supplementary Major (24 credit hours)
Introduction to Africana Studies (3 credit hours)
Interdisciplinary Requirement (9 credit hours)
Students will choose one AFST course from each of the following disciplines: literature/fine arts, history, and social science.

Four elective AFST courses (12 credit hours)

Minor (15 credit hours)
Introduction to Africana Studies (3 credit hours)
Interdisciplinary Requirement (9 credit hours)
Students will choose one course from each of the following disciplines: literature/fine arts, history, and social science.

One elective AFST course (3 credit hours)

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Africana Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.
American Studies

**Chair:**
Thomas Tweed

**Director of Undergraduate Studies:**
Annie Gilbert Coleman

**Interim Director Native American Initiatives:**
Brian Collier

**Assistant Director Native American Initiatives:**
Robert Walls

**Professor Emeritus:**
Walter H. Annenberg-Edmund P. Joyce Professor American Studies and Journalism
Robert Schumul

**W. Harold and Martha Welch Professor American Studies:**
Thomas Tweed

**Professors:**
Erika Doss; Thomas Tweed; Robert Schumul

**Professor Emeritus:**
Thomas J. Schlereth; Ronald Weber

**Associate Professors:**
Anne Gilbert Coleman; Jason Ruiz; Kathleen Spraws Cummings; Benedict Giamo; Sophie White

**Assistant Professor:**
Perin Gurel

**Assistant Professional Specialist:**
Robert Walls

**Adjunct Professor:**
F. Richard Ciccone

**Adjunct Associate Professor:**
Jack Colwell

**Concurrent Faculty:**
Gail Bederman (History); Catherine Cangany (History); Gilberto Cardenas (Sociology); Jon Coleman (History); Brian Collier (ACE); James Collins (Film, Television and Theatre); Dennis Doordan (Architecture); Stephen Fredman (English); Patrick Griffin (History); Sandra Gustafson (English); Eugene Halton (Sociology); Darlene Hampton (CUSE); Cyrain Johnson-Roullier (English); Mary Ellen Konieczny (Sociology); Jose Limon (English); Kate Marshall (English); Timothy Matovina (Theology); Terry McDonnell (Sociology); John McGreevy (History); Rebecca McKenna (History); Susan Ohmer (Film, Television, and Theatre); Richard Pierce (History); Diane Pinderhughes (History); Valerie Sayers (English); Kerry Temple (Notre Dame Magazine); Laura Dasso Walls (English); Matthew Wilkens (English); Pamela Wojcik (Film, Television and Theatre).

**The Discipline.** Since its inception in the late 1930s, the discipline of American Studies has aimed to foster new understandings of America and its multiple peoples and cultures in a rapidly changing world. Its focus on the historical and intellectual underpinnings of the cultures, societies, religions, and politics of colonial America and the United States has continually returned to one central question: What does it mean to be an American? As the answers to this question have changed in response to demographic, economic, and political transformations, the discipline of American Studies has continually re-examined its methods and central questions. Shifting from an earlier emphasis on American uniqueness, or exceptionalism, American Studies has been for the past several decades the academic discipline most creatively and rigorously engaged in analyzing the complex and multi-layered expressions of American pluralism and diversity.

**Program of Studies.** American Studies offers interdisciplinary perspectives on American cultures and societies, American identities, and American political cultures and institutions. The curriculum introduces students to the major ideas and methods of the discipline, honed critical understandings of these methods in advanced courses, and ends with senior level seminars aimed at the highest level of research. To add stature and credibility to the major, a 6-credit Senior Thesis is offered, allowing exceptional students the opportunity to sharpen their critical abilities and improve their research techniques by developing a year-long project.

Students are introduced to the themes and issues dominant in American Studies (AMST) in Introduction to American Studies, taken at the freshman or sophomore level and intended as a gateway to the major. This required course, which explores key concepts, texts, and methods in American Studies and familiarizes students with the discipline's working vocabulary and practices, is offered in the fall semester, and should be taken before students take AMST courses at the 30000 level. It may be taken concurrently with a 30000-level course in AMST, pending approval of a faculty advisor in American Studies.

The introductory course is followed by eight different upper-level courses in AMST, each of which continues to explore concepts, texts, and methods particular to the discipline of American Studies. Of the eight upper-level courses, up to two courses may be taken from different departments, either on campus or through an off-campus Notre Dame program, as long as they are cross-listed with American Studies or otherwise approved by the Director of Undergraduate Studies.

Finally, AMST majors complete their coursework with the Senior Seminar in American Studies, a required 40000-level course which serves as a capstone to the major. Requirements include seminar-style discussions and a significant research project.

**American Studies Major Requirements:**
Students must complete the general requirements of the College of Arts and Letters and 30 credit hours in American Studies, including the introduction to American Studies, eight upper-level courses, and a senior seminar.

**Internships.** Students are encouraged to pursue internships over the summer and during the semester that enhance and apply their coursework in American Studies. If the internship is not paid and relates to American Studies, students may earn elective credit for that experience, upon approval from the Director of Undergraduate Studies. For further details, please review the description for the course AMST 25001 “Internship in American Studies.”

**Study Abroad.** Upon approval of the Director of Undergraduate Studies, students may take up to 6 credit hours of course work abroad towards the major.

**American Studies Senior Thesis.** A senior thesis is a year-long research project developed with a faculty advisor that attempts to make a contribution to the field of American Studies. The final project may take on a variety of forms, including a scholarly paper, narrative nonfiction essay, journalistic article or series of articles, documentary film, or museum exhibition. The opportunity to write a Senior Thesis in American Studies is open to any major with a GPA of 3.5 or higher within the major as of January of their junior year. In exceptional circumstances students with a GPA below 3.5 may apply. Writing a thesis is a chance to do original research and explore a topic of your choice, to develop a deeper relationship with a faculty member, and to put what you’ve learned as an American Studies major into practice. It is also a significant commitment. Students need one if they want to earn departmental honors in American Studies, but they do not need one to satisfy the requirements for the major. Students writing a senior thesis must register for 6 credit hours in addition to the 30 required for the major, distributed as noted below.

Students choosing to write a senior thesis will submit a formal application to the department by April 1 of their junior year, which requires: 1) An idea for the project, including central research questions, sources and research that will answer those questions, the student's method or approach, and the shape of the final project; 2) A primary advisor who has agreed to help with the project. The primary advisor must be a full-time tenured or tenure-track faculty member in AMST and will be the instructor of record for the thesis project. 3) Information on grants applied for and won. Application forms and additional information are available through the departmental website.

Once accepted, students should confirm their plans with their primary advisor and be sure to register in the fall for the Senior Thesis AMST 43909 (3 credit hours). This course is limited to thesis writers, will meet during a regular class time, and is required. It is designed to help students develop their thesis projects, conduct research, and think about how their work relates to the field of American Studies. Students will work closely with the instructor and confer with their advisors regularly. The secondary advisor’s main responsibility is to evaluate the final draft but can also serve as a sounding board at earlier stages. In the spring students will register for Senior Thesis Writing AMST 47910 (3 credit hours). This course is independent work with the primary advisor; students will complete their research and

To Table of Contents
writing, as well as plan and give presentations of their work. The final senior thesis project is due in early April.

Thesis writers are expected to fulfill all the requirements for the major and remain in good academic standing. Those who fail to maintain a satisfactory GPA will be asked to abandon their thesis project. Theses will be evaluated by both the primary and secondary advisors. Students will present their projects to students and faculty in April at the departmental celebration of research; presentation at the Notre Dame Undergraduate Scholar's Conference is encouraged. Every thesis will be honored at the departmental commencement event and recognized on the departmental website.

Departmental Honors. Completion of a senior thesis is a central requirement for earning departmental honors, but not the only one. Honors in American Studies will be conferred upon graduating seniors in three levels: highest honors, high honors, and honors, based on 1) the originality and significance of the student's senior thesis; 2) the excellence of the student's GPA in the major as of January senior year; and 3) the student's degree of engagement with the field of American Studies, as demonstrated by participation in relevant lectures, conferences, internships, grants and fellowships, conversations with scholars, and completion of additional advanced courses. Students seeking departmental honors must submit a one page statement describing their engagement with the field to the department by April 15 of their senior year. All students receiving honors will be recognized at the departmental commencement ceremony. For more information see the departmental website or contact the Director of Undergraduate Studies.

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:
• American Studies
• Journalism, Ethics & Democracy

Program of Studies. The undergraduate program in anthropology is designed to provide each student with a broad, holistic, integrated and species-wide perspective on contemporary human behavior.

Anthropology may be the only major that provides significant intellectual and professional links with the humanities and other social science fields, while also providing separate bridges into both the natural sciences and the field of business. In so doing the anthropology major prepares students for successful entry into any number of fields and disciplines and their appropriate professional graduate schools, including medical schools, public health, and law.

Human evolutionary models, critical comparative analyses, ethnographic methods, and a variety of developmental approaches are taught and applied in our classes to such diverse topics and research areas as: health; illness; addiction; human communication (verbal and non-verbal); human origins; the nature of social groups; the family; worldwide political and socio-economic systems; religion; warfare; infancy and childhood; non-human primate ecology and behavior; archaeology; prehistory, and ethnohistory; sexuality; museum studies; evolutionary medicine; transnationalism; sex and gender; food; and medical anthropology. Geographic specialties of the faculty include China, Southeast Asia, North America, Latin America, Russia, Italy, Ireland, Egypt, Central and Southern Africa, and the Middle East.

In moving toward our goal to achieve national prominence as one of the top undergraduate research and teaching departments in the nation, our faculty stress the importance of innovative and significant undergraduate research. We aim to provide as many majors as is possible with hands-on research experiences in both the field and laboratory. Smithsonian and Chicago Field Museum summer research internships created by the department are available to majors. The department also administers a paid summer internship with J.E. New Environmental Consultants. It is common throughout the school year and summer that the faculty pair up with students to conceptualize and work together on research projects both here and abroad. Often this collaborative research leads to joint publications. Our undergraduate students receive many undergraduate research awards from the University and regularly attend national professional meetings to stand alongside graduate students and professors from around the nation to present the results of their research. Our anthropology minors also participate to a high degree.

Aside from its applicability and relevance across different disciplines, professions, and careers, one of the truly unique aspects of anthropology is that it changes in a most profound and insightful way the manner in which our students experience and come to interpret their own lives. The subject of anthropology is humankind as viewed not through a local lens limited by the biases or world view of one's own culture, but by a view that attempts to reconcile and understand the intersecting and sometimes conflicting, yet, often logical alternative ways by which our fellow human beings live and think.

Perhaps it is the result of this very personal encounter, experienced alongside exposure to the very best scholarship, that permits our anthropology students to connect so easily and successfully with diverse professional communities. This relative fluidity by which our graduates make the transition into so many varied fields, the knowledge and skills gained by studying anthropology, in addition to providing keen insights into others, enriches one's understanding of one's self. In this way anthropology maximizes the chances of personal achievement and
self-fulfillment, and proves a surprisingly powerful beginning point for just about any career.

Writing-Intensive Requirements: All courses taught in the department include writing components, which are both informal and formal and vary by course level. These assignments may include response papers, journals, in-class writing, analyses, field research, or research papers. Courses offered in anthropology develop both critical thinking skills and global awareness through written and other assignments. Every major is required to take an advanced theory seminar (ANTH 40400, Perspectives in Anthropological Analysis) where they develop analytical and synthetic skills through intensive writing assignments combined with class discussion.

PROGRAMS

1. The Major. There are no prerequisites to the major. The major requires 30 credits, nine of which must be in the sequence of fundamentals, including ANTH 20201 (Fundamentals of Biological Anthropology), ANTH 20202 (Fundamentals of Archaeology), ANTH 20203 (Fundamentals of Social and Cultural Anthropology), and ANTH 20204 (Fundamentals of Linguistic Anthropology). In addition, majors must take ANTH 40400 (Perspectives in Anthropological Analysis), one methods course (3 credits), and 15 credits of electives. At least six credits of the electives must be in the 40000 level. It is recommended that students take the fundamentals by the end of their sophomore year, whereas ANTH 40400 is usually taken as a junior or senior.

2. The Honors Track. The honors track requires 36 credits and a minimum anthropology GPA of 3.5, or faculty recommendation with vote of the department. In addition to the above program, the honors student will take one additional methods course (3 credits) and ANTH 48900 Anthropology Senior Thesis (3 credits) or equivalent.

3. The Minor. The minor requires 15 credit hours. There are no prerequisites. Students must take three of the four fundamentals, ANTH 20201, 20202, 20203, and 20204. In addition, students must take six credits of electives.

Courses taken for pass/fail credit will not satisfy requirements for the major, the honors track, or the minor.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Anthropology. Course descriptions can be found by clicking on the subject code and course number in the search results.
accept critical feedback to revise or expand an idea; can successfully communicate the value of their approach to others; and has the ability to mobilize resources to realize their ideas in an original form. In short, creative study is essential to the educational preparation needed to compete in the complex world culture we work and live in today.  

**Writing-Intensive Requirements:** The Department of Art, Art History, and Design fulfills the College of Arts and Letters writing-intensive requirement by requiring all majors in each of the three departmental areas (ARST, DESN, and ARHI) to enroll in at least one upper-level (3xxx or 4xxx) art history course. All upper-level ARHI courses include a writing component that satisfies the College of Arts and Letters writing-intensive requirement. 

**THE STUDIO ART AND DESIGN MAJOR AND MINOR IN STUDIO ART**

**Bachelor of Arts Degree in Studio Art and Design**

The Bachelor of Arts degree program in art and design is defined as a general liberal arts degree. The BA degree is ideal for the student who desires a liberal education with a strong emphasis in art. Students enrolling in the BA degree program are required to complete a five-course core curriculum during their first three semesters. These courses are Drawing I, 2-D Foundations, 3-D Foundations, one course treating material from before 1600 taught by a regular full-time artist historian in the department, and one course that treats material from after 1600 taught by a regular full-time artist historian in the department. Students are not required to select a major concentration for the BA degree, but some focus of study is encouraged. The BA degree consists of 36 hours in art and design, of which 27 are in studio and nine in art history.

**Bachelor of Arts Senior Thesis**

The BA Senior Thesis is comprised of two 3-credit independent study courses taken in sequence, fall/spring of the senior year. It is a special two-semester course sequence designed for the most talented and motivated departmental majors who wish to develop a capstone project during their senior year. These two BA Thesis courses count toward two general studio electives for the 36-credit BA degree.

**Bachelor of Fine Arts Degree in Studio Art and Design**

The bachelor of fine arts degree program in art and design is intended for the student who wishes to pursue a professional career in the visual arts. The program is organized into a four-year sequence of study that provides a solid understanding of art and art history. The student has an opportunity to explore a variety of curricular options and then chooses an intensive and professional major concentration. In addition to a primary concentration, BFA students are encouraged to select a secondary area of interest to broaden their thinking and to enrich their creative study. BFA candidates share a close working relationship with the department’s faculty who are active professional artists and designers. Intensive studio work is complemented by an academic education with strong art history and liberal arts component. The BFA degree consists of 66 credit hours in art, of which 54 are in studio and 12 in art history.

**BFA Freshman and Sophomore Years**

Students beginning in the program are required to complete a seven-course studio core curriculum during their first two years. Five of these courses are mandated: Drawing I, Figure Drawing, 2-D Foundations, 3-D Foundations, and Photography I. The remaining two studio courses are optional, based on the student’s interest. This intensive curriculum establishes a base for the studio practices and principles for all visual art expression. At the end of the fourth semester, students who have earned a minimum 3.25 grade point average in their studio courses will be accepted as candidates for the BFA degree. Students who do not qualify are eligible for the BA degree. BFA candidates are waived from the second history/social science requirement and the University fine arts requirement.

**BFA Junior and Senior Years**

Students accepted into the BFA program begin a two-year primary concentration in one of the following studio areas: ceramics, graphic design, industrial design, painting, photography, printmaking, or sculpture. The concentration requires 15 hours of study in a major concentration area during the last four semesters. Teaching in the major is highly individualized and stresses the creative development and preparation of the student for the professional world. In addition to pursuing a concentration, all BFA majors must enroll in the BFA Seminar and the Senior Thesis Course. The culmination of the BFA degree is the completion of a senior thesis. This two-semester senior project, directed by a faculty member, will be exhibited and approved by the faculty as a requirement for graduation.

**MINOR IN STUDIO ART**

The minor in studio art is intended for the student who wishes to add studio art experience to their undergraduate studies. Freshmen, Sophomores and Juniors are eligible to declare a minor in studio art, which requires 15 credit hours, or 5 courses in studio art. Before being able to declare a minor, a student must be enrolled in or have already taken one of the following: Drawing I, 2D Foundations, or 3D Foundations.

As with the major, students seeking the minor may elect either a general or focused course of study; that is, students may take the four studio courses selected from among any of the studio disciplines (ceramics, painting, photography, printmaking, sculpture) or they may take four studio courses from within a single discipline. Because the Department offers multiple entry-level courses, students are able to enter the program at a variety of points.

**STUDIO ART AND DESIGN CONCENTRATIONS**

**Studio Art Concentration**

The Studio Art major is designed both for the student artist and the student interested in art as a second major or minor. Courses are offered in painting and drawing, ceramics, photography and video, printmaking, and sculpture. The Studio Art major provides an excellent basis for continuing work in graduate school and pursuing art-related fields such as design, art criticism, teaching, museum and auction house work, art therapy, media and publishing, commercial photography, exhibition design, and advertising.

The Studio Art major provides students with an opportunity to develop the techniques, visual sensibility, and historical understanding necessary for working with various materials. The mission of the major is to provide students with intellectually informed, hands-on instruction in creative studies within the context of a liberal arts university. One of the inherent values of visual art is that by giving tangible form to the social, political, and private aspects of human existence, it makes visible the invisible; it provokes the expansion of intellectual boundaries, gives form to complex ideas, reveals deep but abstract emotions and extends our capacity to comprehend the lives of others. Each of the programs in our department offers a distinct means of confronting and understanding the important visual aspects of our wider engagement with and construction of the world.

**Ceramics Concentration**

Ceramics is a concentration emphasizing clay and glaze as the primary vehicles for expression. Traditional pottery, vessel making, and sculpture may be addressed through a variety of processes that include hand building, throwing, and casting. Students are encouraged to develop technical skills and a direction of their own choosing. In addition to traditional ceramic materials and processes, students will be encouraged to study and utilize other sculptural media, as well as become familiar with contemporary and historical source material that will inform their own directions in ceramics.

**Painting Concentration**

Painting, with its many traditions, is a medium put to an extraordinary diversity of contemporary uses. Capable of representing everything from the material to the intangible, painting continues to be a means for artists of vastly different interests to address their subjects in highly individual ways. The painting concentration at Notre Dame fosters the aesthetic, critical, and technical development of each student through a program of course work, independent study, and regular critiques. Emphasis is placed on being well versed in contemporary critical issues, on articulating individual themes, and on developing the technical means to give visual form to thematic concerns.
Photography Concentration
Images are arguably the most important documents of the 21st century, operating at theintersection of communication, commerce and culture. The photography program educates students to be technically skilled, visually literate and creatively prepared for a world where photography, video and streaming media permeate our everyday experiences. Beginning with foundation work through senior thesis, courses are designed to inform students about photographic traditions while engaging them in the critical issues and methodologies of contemporary practice. The photography major prepares students for a career in visual media (including fine art, media communications or advertising), education or institutional professions at galleries, museums or auction houses.

Printmaking Concentration
Printmaking is a vital, visual, graphic process by which one may engage in a conversation with the world. In fact printmakers all over the world are in constant contact, exchanging exciting information and keeping current with the ever-shifting flow of ideas.

Printmakers’ work encompasses a wide range of practice: from stenciled art spray painted on a sidewalk to very fine prints made on paper, from a one-inch square print to wrapping an entire building in a print. Printmakers are involved with a very dynamic form of art.

At Notre Dame, students learn about current cultural and critical issues and how printmaking addresses them. As students learn about the various matrices, techniques and technologies of a wide range of printmaking (including relief, photolithography, intaglio, screen-printing, digital processes, papermaking and the making of books), they will develop their aesthetic, critical and technical skills.

Sculpture Concentration
Sculpture today encompasses diverse materials and contexts for the expression of ideas in space. Within this broad description, students are encouraged to develop the technical skills that will help them expand their ideas into thoughtful individual expression. We embrace a breadth of vision and experience, which will challenge the student to investigate and respond to contemporary issues through problem-solving. A full range of traditional and non-traditional media are available in specific courses and through individual mentoring. By blending required and elective courses and independent study, students can experience a curriculum that responds to their particular needs and direction.

Design
Design is the order of form and the control of function; it is what designers do. Humans are conditioned to make decisions on the basis of appearance and contextual input, accepting or rejecting information and material goods in response to a variety of visual cues. Effective, user-centered design can do more than attract interest or manipulate perception: it can enable people. Good design and careful planning can promote understanding, simplify use, improve safety, instill confidence, add value, and create community.

At Notre Dame, undergraduate design education begins with immersion into the liberal arts curriculum. This social, philosophical, critical, ethical, and historical experience helps build a foundation of cultural understanding that naturally informs the creative and problem-solving methods. Responsible designers, consequently, approach the development process with sensitivity for human need, human aspiration, and the functional requirements for both production and implementation. At its best, design serves the spectrum of needs from individuals to constituencies in industry, society and the global environment.

Though design has been part of the Notre Dame curriculum since the early 1950s, students enjoy the advantages of a campus that provides access to current technologies. Technically advanced collaborative teaching spaces and digital labs support all student design activities, including an on-site 20-station 2D computer studio, a 16-station 3D computer studio, and a high performance digital imaging studio, all maintained by the services from Notre Dame’s Center for Creative Computing. In addition, a model shop provides rapid prototyping capabilities ranging from traditional hand tools to precision computer controlled fabrication and 3D printing. Intermediate and advanced level undergraduate students share an energized design community with defined studio spaces located in close proximity to all design-related resources and facilities in the Design Center at West Lake Hall.

Visual Communication Design Concentration
At its most basic level, visual communication design is a creative process that combines the visual arts and technology to communicate ideas. In the hands of a talented designer, these ideas are transformed into visual communication that transcends mere words and pictures. By controlling color, type, movement, symbols, and images, the designer creates and manages the production of visuals designed to inform and persuade a specific audience. By combining aesthetic judgment with project management skills, designers develop visual solutions and communications strategies. The professional designer works with writers, editors, illustrators, photographers, code writers, and printers to complete compelling designs that effectively communicate a message.

At Notre Dame, the undergraduate graphic design curriculum begins with a foundation in the liberal arts. Such a basis is a design student’s best path to meet and solve the varied communication challenges inherent in today’s complex world. Because a design solution may emerge from the humanities, an algorithm, or a scientific discovery, the curriculum provides a student with the opportunity to be firmly grounded in the fundamentals of design and the visual arts, while also taking courses in science, math, history, philosophy, and theology. As students progress through the tiered design program, they develop as a designer, as an intellectual, and as a moral person, prepared to address the social, ethical, and political circumstances influenced by the design profession.

At its core, the Notre Dame visual communication design program asserts that the designer can make a difference not only in the strategic plan of a business but also in the world. During their time on campus, students develop projects that aspire to positively influence the lives of culturally diverse people, critique the ethical dimensions of contemporary culture, and give visual form to complex social issues. As design professionals, Notre Dame graduates will be responsible for the future of our visual culture.

Industrial Design Concentration
Industrial designers give form to virtually all mass-manufactured products in our culture. They seek opportunity and advantage through identifying and solving problems. Their creative contributions impact the utility, appearance, and value of our tools and environment. Their most innovative solutions lie at an intersection of what is knowable and what is possible.

The industrial design profession demands excellent organizational skills, an awareness of visual and tactile aesthetics, human behavior, human proportion, material, process, and the responsible appropriation of resource, during and after use. Designers express conceptual proposals through a combination of well-developed drawing, physical modeling, computer modeling, writing, and verbal skills. Designers best serve the consumer through sensitive and innovative collaboration with art, science, engineering, anthropology, marketing, manufacturing, and ecology. Properly implemented, industrial design affords greater benefit, safety, and economy to all participants and recipients impacted by the product development cycle.

Notre Dame’s Industrial Design Program (NDID) is accredited by the National Association of Schools of Art and Design (NASAD) and maintains student chapter affiliation with the Industrial Designers Society of America (IDSA). NDID interacts with regional, national, and international corporate design and consulting offices in the form of annual conferences, sponsored projects, field trips, and internships.

THE ART HISTORY MAJOR
Notre Dame’s art history major is designed to equip our students with a broad overview of the development of Western art and to provide them with an in-depth knowledge of particular periods, problems, and research methods. The diversity and scholarly strength of our faculty and the research facilities of the Hesburgh Library, including the Medieval Institute, are supplemented by the rich resource of the Snite Museum of Art. With a permanent collection of over 21,000 works, the Snite Museum not only gives our students an invaluable firsthand

To Table of Contents
acquaintance with important examples from all periods and many cultures—including distinguished collections of old master drawings, 19th- and early-20th-century photographs, and Pre-Columbian art—but also provides a wide range of opportunities for our students to gain practical museum experience in both volunteer and paid positions.

The University of Notre Dame offers a 33-hour Honors Program (11 courses), a 30-hour first major (10 courses), a 24-hour (8 courses) supplementary major in art history, and a 15-hour minor (5 courses). These degrees are intended not only for students who are already intent upon pursuing a career in an art museum or gallery or as a college or university professor, but also for those individuals who simply wish to learn more about Western civilization through the examination of some of its most beautiful, provocative, and informative objects.

DEPARTMENTAL HONORS IN ART HISTORY AND THE SENIOR THESIS

The Honors Program will consist of 33 hours, as compared to 30 hours in the regular first major. First majors with a grade point average of 3.667 or above in Art History courses may petition the faculty for permission to enter the Art History Honors Program contingent upon maintaining this GPA level and the successful completion of an Honors Thesis. The student who wishes to be considered for departmental honors must select a thesis advisor with whom the student has taken courses in the area of specialization for the thesis. The student must petition the faculty with a one-page letter by the 10th week of the spring semester of the student’s junior year. The letter should be addressed to the Director of Undergraduate Studies for Art History. In the letter the student should give a brief indication of with whom and on what they are proposing to write her/his thesis and a brief account of her/his future plans. If the faculty approves, then in place of one of the elective art history courses or seminars the student will sign up for six credit hours of Honors Thesis credit, taking three hours in the fall semester of their senior year and three hours in the spring semester of their senior year. Students who maintain the required 3.667 or higher GPA and successfully complete a senior thesis with a grade of A– or higher will earn Honors in Art History.

The Honors Track in Art History (by approval)

33 Total Hours

One course or seminar in Ancient Art
One course or seminar in Medieval Art
One course or seminar in Renaissance or Baroque Art
One course or seminar in Modern, American or Contemporary Art
Theories of Art (ARHI 43576) (Taught only in the fall. To be taken during junior or senior year)
Elective art history seminar
Elective art history seminar

Elective art history course or seminar
Elective art history course or seminar
Senior thesis (3 credit hours in the fall and 3 credit hours in the spring of senior year.)

Art History First Major

Art history first majors are required to take the Theories of Art seminar. In addition, the department offers courses in four areas of Western art: ancient, medieval, Renaissance and baroque, and modern (19th through 21st centuries). An art history major must take at least one course in each of these areas. It is strongly recommended that the four-course distribution requirement be fulfilled with 20xxx or 30xxx level introductory courses taught by regular art history faculty on campus. Students must also have taken a minimum of two seminars in addition to Theories of Art. The Theories of Art seminar should be taken in either the junior or senior year.

Art History Supplemental Major

Students wishing to complete a second major in art history should take one course in each of the four departmental areas, two art history seminars, and two electives in art history. It is strongly recommended that the four-course distribution requirement be fulfilled with 20xxx- or 30xxx-level introductory courses taught by regular art history faculty on campus.

Art History Minor

Students wishing to minor in art history can do so by taking five art history courses (15 credit hours total). At least one of these courses must treat material prior to 1600, and at least one must treat material from 1600 to the present.

Courses taken for the second major or the minor cannot be counted in more than one university program. Over the last 10 years, our undergraduate majors have presented scholarly papers at conferences throughout the Midwest; held prestigious summer internships in museums in New York, Washington, Chicago, and Baltimore; found employment in galleries and museums; and pursued graduate work at Columbia, Berkeley, Cornell University, Yale University, the University of North Carolina-Chapel Hill, the University of Virginia, the University of Texas, and the University of Michigan, among other institutions.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:

- Art History
- Art Studio
- Design

Course descriptions can be found by clicking on the subject code and course number in the search results.

To Table of Contents
MINORS IN CLASSICS

Minors provide students majoring in other areas with structure and certification for a variety of approaches to the study of Greek and Latin language, literature, and civilization.

Latin Minor
The Latin Minor provides a solid grounding in the philological and literary study of Latin texts of the classical period, or, for those who prefer, of Christian Latin literature. It consists ordinarily of five courses (15 hours) in intermediate or advanced Latin (CLLA 20003 and above). Students interested in later Latin texts are directed to the joint offerings of the department and the Medieval Institute.

Greek Minor
The Greek Minor provides a solid grounding in the philological and literary study of Greek texts of the classical and Hellenistic periods. It consists ordinarily of five courses (15 hours) in intermediate or advanced Greek (CLGR 20003 and above).

Greek and Roman Civilization Minor
The Classical Civilization Minor provides a broadly based orientation to the history and civilization of the classical world. It consists of five courses, three of which are required: The History of Ancient Greece, The History of Ancient Rome, and one course in ancient archaeology. The remaining two courses may be chosen, with departmental approval, either from CLAS courses, whether offered by the department or cross-listed by other programs, or from Greek and Latin language courses.

Greek and Roman Literature (in Translation) Minor
The Classical Literature in Translation Minor provides a broad experience of Greek and Latin literature studied in English translation. It consists of five courses, three of which are required: one course in Greek literature, one course in Roman literature, and Greek and Roman Mythology. The remaining two courses may be chosen, with departmental approval, either from CLAS courses, whether offered by the department or cross-listed by other programs, or from Greek and Latin language courses.

SENIOR THESIS/HONORS TRACK

Classics majors are admitted into the honors track by approval of the Director of Undergraduate Studies. To receive honors, a student must (1) complete all requirements for the major; (2) maintain a GPA of at least 3.5 in the major; (3) complete the Honors Seminar for the senior year; (4) and receive a grade of A– or higher for a 5,000–6,000 word honors thesis. Honors students work closely with a member of the Classics faculty, who guides their research project. For more information see http://classics.nd.edu/undergraduates/honors-and-research/.

PROGRAM OF ARABIC LANGUAGES AND CULTURE

The program in Arabic offers a full range of courses in Modern Standard Arabic, and is geared toward proficiency in speaking, reading, and writing. Courses in Middle East history, culture, and religion complement the language component and give students the opportunity for a broad-based and comprehensive understanding of the Arab world.

MAJOR IN ARABIC

A total of 36 credit hours distributed in the following areas:

<td></td>
</tr>
</tbody>
</table>

MAJOR IN INTERNATIONAL ECONOMICS IN ARABIC

The new undergraduate major in International Economics in Arabic is a collaborative effort between the Department of Economics and the Classics Department. In pursuing this major, students take a minimum of eight economics courses and are also required to enroll in a one-credit “Exploring International Economics” course, preferably in their sophomore year, designed to foster the integration of the study of culture with the study of economics. Details about the requirements for this major can be found online at economics.nd.edu/undergraduate-program/academic-programs/majors/ie/.

MINOR IN MEDITERRANEAN/MIDDLE EAST STUDIES

An interdisciplinary focus defines this broad-based program that encourages a multidimensional approach to the Mediterranean world. This is achieved through a wide variety of courses and activities offered by departments that study southern Europe, North Africa, or the Middle East.

While language courses may serve as a component of the minor, students are offered opportunities to view the region in its full historical, cultural, and political context. In this way, students are given the opportunity to assemble a course of studies that best reflects their own interests.

Typical areas of focus might include the rich culture that developed in southern Spain as a result of the Christian, Muslim, and Jewish interactions there; the impact of the French language and culture on North Africa and the Middle East; or the contemporary Israeli-Palestinian conflict.

Requirements: (1) Intermediate Arabic (MEAR 20005); (2) the student’s choice of three courses that relate to the region of southern Europe, North Africa, or the Middle East; and (3) a final research thesis in consultation with the Arabic faculty that integrates coursework related to the student’s area of interest.

SYRIAC STUDIES

Syriac is a form of Aramaic that was the literary language of Jews and pagans in western Asia before expanding to become the common dialect of Aramaic-speaking Christians throughout the region. Early literature in Syriac preserves sustained evidence of the distinctive character of Aramaic-speaking Christianity that is largely unenhellized and that reflects the linguistic and cultural milieu of first-century Palestine.
Syriac literary culture reveals mutual and parallel dynamics in the development of Syriac Christianity and the emergence of Rabbinic Judaism. The study of Syriac is likewise of pivotal importance to an understanding of the thought-world of the pre-Islamic Middle East, the established Christian and Arab populations of the region, and the emergence of Islam in the seventh century.

STUDY ABROAD

Our students are encouraged to study abroad for a semester, especially in the Mediterranean basin. The Department supports programs offered by the Intercolligate Center for Classical Studies in Rome, College Year in Athens, and the American University in Cairo or an Arab-speaking country. Credits earned for course work taken in approved programs can be used to fulfill our major and minor requirements. Studying abroad during the summer is also possible. Grants are available on a competitive basis for summer language study through the Center for the Study of Languages and Cultures and the Nanovic Institute for European Studies. For more information see classics.nd.edu/summer-programs/.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:

- Classics in Translation
- Greek Language and Literature
- Latin Language and Literature
- Arabic Language and Literature
- Hebrew Language and Literature
- Middle East Literature in Translation & History

East Asian Languages & Cultures

Chair:
Yongping Zhu

Research Professor:
Robert M. Gimello

Professor:
Liangyan Ge

Associate Professors:
Michael C. Brownstein; Lionel M. Jensen; Xiaoshan Yang; Yongping Zhu

Professional Specialist:
Noriko Hanabus

Associate Professional Specialist:
Hana Kang; Chengyu Yin; Yeonhee Yoon

Assistant Professional Specialist:
Congcong Ma; Naoki Fuse; Wei Wang; Weibing Ye

Mission Statement: The peoples of East Asia comprise one quarter of the world’s population and account for a similar proportion of the world’s production and consumption. This, along with the contemporary fusion of Asia and the West politically and economically, makes knowledge of the diverse languages and cultures of East Asia vital to an understanding of our global community and indispensable for the preparation of careers in the Pacific Rim. The Department of East Asian Languages & Cultures provides the resources and instruction necessary for success in these areas. The department is dedicated to providing rigorous language training in Chinese, Japanese, and Korean, as well as courses taught in English on Chinese, Japanese, and Korean philosophy, religion, literature, and culture. Complementary courses in other disciplines are listed in this Bulletin under departments such as history, philosophy, theology, political science, economics, and anthropology.

Completion of First-Year Chinese, Korean, or Japanese (10 credits) will satisfy the language requirement for both the College of Arts and Letters and the College of Science. Although the College of Business does not have a language requirement, it strongly supports integration of language courses into its curriculum and encourages students to participate in the study abroad programs (See “Study Abroad” under Mendoza College of Business).

Placement and Language Requirement. Students who wish to enroll in a Chinese, Japanese, or Korean language course beyond the 10111 or 10112 level must take a placement examination administered by the Department. Students testing out of 10xxx-level language courses must complete at least one course at the 20xxx level or higher to satisfy the language requirement.

PROGRAM IN CHINESE AND CLASSICAL CHINESE

The program in Chinese offers language classes in Mandarin Chinese at the first-, second-, and fourth-year and advanced levels and classical Chinese, as well as courses in English on classical and modern Chinese literature and culture. Qualified students also have the opportunity to attend East China Normal University in Shanghai; Peking University in Beijing, People’s Republic of China; and Fu Jen University in Taipei, Taiwan.

The Chinese program offers first and supplementary majors and a minor.

Basic requirements: For the major, students must complete 30 credit hours, including third-year Chinese. For the supplementary major, students must complete 24 credit hours, including third-year Chinese. For the minor, students must complete 15 credit hours, including two semesters of language classes beyond the first-year. 10xxx-level language courses and University seminars on China-related topics do not count toward the major, supplementary major, or minor.

Other requirements: In addition to the language course requirements described above, all majors must take three upper-division courses in residence in Chinese literature and culture, including one course in Chinese literature, which must be taught by a department faculty member. Remaining credit hours may be satisfied by taking additional Chinese language and culture courses, or other East Asia-related courses approved by the Director of Undergraduate Studies.

THE HONORS TRACK IN CHINESE

Majors in Chinese are strongly encouraged to pursue the honors track. Those who are interested must meet the following criteria:

1. Fulfillment of all the requirements for a first major of 30 credit hours in Chinese;
2. A cumulative GPA of at least 3.3 and a GPA of at least 3.7 in the major, or permission from the department chair;
3. Completion of fourth-year Chinese.

Program Requirements: In addition to the 30 hours required for a major, the honors track requires the completion of a senior honors thesis that demonstrates the student’s originality and ability to do research in the target field. For this endeavor, the student will receive 3 hours of graded credit. This means to graduate with departmental honors, the student must earn 33 hours of credit in the major.

Students are admitted into the honors track in the spring semester of their junior year. The senior honors thesis is a year-long, one-on-one experience with a faculty mentor that comprises two semester courses of 3 credit hours each.
**PROGRAM IN JAPANESE**

The program in Japanese offers language classes in modern Japanese at the first-, second-, third-, and fourth-year and advanced levels, as well as courses in English on classical and modern Japanese literature and culture. Qualified students also have the opportunity to attend Nanzan University in Nagoya, and Sophia University in Tokyo, Japan.

The Japanese program offers first and supplementary majors and a minor.

**Basic requirements:** For the major, students must complete 30 credit hours, including two semesters of third-year Japanese. For the supplementary major, students must complete 24 credit hours, including third-year Japanese. For the minor, students must complete 15 credit hours, including two semesters of language classes beyond the first year. 10xxx-level language courses and University seminars on Japan-related topics do not count toward the major, supplementary major, or minor.

**Other requirements:** In addition to the language course requirements described above, all majors and minors must take three upper-division courses in residence in Japanese literature and culture, including one course in Japanese literature, which must be taught by a department faculty member. Remaining credit hours may be satisfied by taking additional Japanese language and literature courses, or other East Asia-related courses approved by the Director of Undergraduate Studies.

**THE HONORS TRACK IN JAPANESE**

Majors in Japanese are strongly encouraged to pursue the honors track. Those who are interested must meet the following criteria:

1. Fulfillment of all the requirements for a first major of 30 credit hours in either Chinese or Japanese;
2. A cumulative GPA of at least 3.3 and a GPA of at least 3.7 in the major, or permission from the department chair;
3. Completion of fourth-year Japanese.

**Program Requirements:** In addition to the 30 hours required for a major, the honors track requires the completion of a senior honors thesis that demonstrates the student's originality and ability to do research in the target field. For this endeavor, the student will receive 3 hours of graded credit. This means to graduate with departmental honors, the student must earn 33 hours of credit in the major.

Students are admitted into the honors track in the spring semester of their junior year. The senior honors thesis is a year-long, one-on-one experience with a faculty mentor that comprises two semester courses of 3 credit hours each.

**MAJOR IN INTERNATIONAL ECONOMICS IN CHINESE**

The newly-created undergraduate major in International Economics is a collaborative effort between the Department of Economics and affiliated departments of languages and literature. In pursuing this major, students take a minimum of eight economics courses and are also required to enroll in a one-credit “Exploring International Economics”, preferably their sophomore year, designed to foster the integration of the study of culture with the study of economics. Students must complete a minimum of four semesters of Chinese language courses through the fourth-year level, including the one-credit fourth year supplements in Business Chinese.

Students must also take a minimum of three upper division courses in Chinese literature and culture, including at least one literature course taught by EALC faculty.

In their senior year, students have the option of writing a senior capstone essay that integrates their economic and language and culture study or taking the two-semester sequence in advanced Chinese. The senior capstone project may be a senior thesis under the guidance of a faculty member from Economics or East Asian Languages and Cultures or a research seminar paper that focuses on a topic or topics related to the economic, linguistic, and cultural characteristics of a country or countries where Chinese is spoken.

Refer to the Department of Economics for the relevant course requirements in economics, which include satisfying a mathematics requirement of Calculus I and II and successful completion of ECON 10010/20010; ECON 10020/20020; ECON 30010; ECON 30020; ECON 30331; and two of the following: ECON 40700, ECON 40800, ECON 40710 and ECON 40720.

**PROGRAM IN KOREAN**

The University offers three years of Korean language instruction and a number of courses relating to Korean culture. Students who finish the sequence at Notre Dame are encouraged to continue their language study abroad. For the minor in Korean, students must complete 15 credit hours, including at least two semesters of Korean language beyond the first year, and one course in Korean culture. The remaining credit hours may be filled by additional courses in Korean language or culture courses offered by the department, or by courses approved by the Director of Undergraduate Studies.

**ASIAN STUDIES MINOR**

See “Area Studies Minors,” later in this section of the *Bulletin.* This minor provides opportunities for students to develop an interdisciplinary understanding of Asia.

**EAST ASIAN LANGUAGES & CULTURES STUDY-ABROAD PROGRAMS**

Students have opportunities to study abroad for either a semester or a year in the People’s Republic of China and Japan at the following locations:

- **Beijing, China:** The program at Peking University affords students an opportunity to improve their fluency in spoken and written Mandarin Chinese through intensive training. Participants must have completed at least two semesters of college-level Mandarin or the equivalent.
- **Shanghai, China:** The program at East China Normal University is generally designed for a semester (but it may be extended) that affords students courses in Chinese language, literature, and culture.
- **Nagoya, Japan:** The program at the Catholic Nanzan University offers mandatory courses in intensive Japanese, as well as related courses in literature, religion, business, economics, history, art, and
Economics

Director of Undergraduate Studies:
Mary Flannery

Undergraduate Advisors:
Eva Dziadula; Mary Flannery

Program of Studies. The major is designed to make a unique contribution to the student’s liberal education. The program provides students with the insights of scientific analysis and social perspective to deepen their understanding of the complex economic forces at work in society. Such an understanding is an essential ingredient in the development of an educated person. The program is also designed to prepare the student for a variety of options after graduation, including graduate programs and managerial programs in business and finance.

Requirements for the Economics Major

(i) Total Course Requirement

Students must complete the two-semester Principles of Economics sequence (10010/10011/20010/20011 and 10020/20020 or equivalent). Beyond the Principles courses, the major requires a minimum of eight (8) additional course (24 credits) in economics at the junior/senior level (numbered 3xxx or 4xxxx).

(ii) Math Requirement

A course in Calculus (MATH 10260 or equivalent) is a prerequisite for both of the intermediate theory courses. (See core requirement below). Simultaneous enrollment in Calculus II is permitted but not recommended.

Recommendation: It is strongly recommended that students, especially prospective economic majors, who have not had a course in Calculus I (MATH 10250 or equivalent) enroll in the calculus course during their first year of study.

(iii) Core Requirement

Students must include the following four courses among their minimum of eight courses in economics beyond the Principles course.

- 30010 Intermediate Economic Theory Micro
- 30020 Intermediate Economic Theory Macro
- 30330 Statistics for Economists
- 30331 Econometrics

(iv) Advanced Course Requirement

Students must include a minimum of two courses (6 credits) at the senior level (numbered 4xxx) that have either of the intermediate theory courses (30010, 30020) and/or Econometrics (30331) as a prerequisite.

(v) Writing-Intensive Requirement

In completing the minimum of 24 credits at the junior/senior 3xxx/4xxx level, the student must fulfill a writing-intensive requirement. This requirement can be satisfied in one of the following three ways: by taking a junior or senior 3xxx/4xxx-level economics seminar course; by taking a three credit special studies course consistent with the college’s writing-intensive guidelines under the direction of an economic faculty member; or by writing a senior honors essay under the direction of an economic faculty member.

Departmental advisors will assist students in designing a program of study that meets their educational and career goals. Students are also encouraged to pursue related courses in other departments of the College of Arts and Letters. The Mendoza College of Business and the College of Science. Materials relating to professional work or graduate study in economics, law, business, public policy, foreign service are available from the director of undergraduate studies.

Undergraduate Economics Honors Program

Entry Gate.

To be eligible for admission to the Undergraduate Economic Honors Program, the student must:

(i) Complete Intermediate Economic Theory-Micro (ECON 30010), Intermediate Macro Theory (ECON 30020), and Econometrics (ECON 30331) with minimum grade point average in these courses of A– (3.667). or
Economics

(ii) Have a minimum cumulative GPA of 3.4 and minimum GPA of A- (3.667) in Principles of Microeconomics (ECON 10010/10011/20010/20011), Principles of Macroeconomics (ECON 10020/20021) Intermediate Economic Theory-Micro (ECON 30010), Intermediate Macro Theory (ECON 30020), Statistics for Economists (30330), and Econometrics (ECON 30331). To apply for admission, the student must complete an application form, available from the director of undergraduate studies in Economics, between the end of the sophomore year and the end of the junior year. The application will include: (1) a paragraph explaining why the student wishes to enroll in the honors program, and (2) a signature by a member of the economics faculty who endorses the student’s application. The application will be returned to the director of undergraduate studies in Economics who will make recommendations for admission to the Undergraduate Studies Committee, which is responsible for the final decisions.

Enriching Experience.
The Undergraduate Economics Honors Program requires that the student complete an enriching experience. The following qualify as an enriching experience:

(i) Completion with a grade B+ or higher of an “advanced methods” course, defined as a 4xxxx-level course in which students are required to apply methods of modern economic research. A list of these courses is available from the director of undergraduate studies.

(ii) Completion with a grade of B or higher of a course in the core of the graduate program in economics.

(iii) Completion of some substantive out of classroom activity directly related to the study of economics, such as presentation of the student’s own original research at an external conference, an undergraduate research assistantship, an internship, or community service.

All of these activities need to be pre-approved. Students who want pre-approval for a specific activity should submit a written request with other supporting material to the director of undergraduate students in Economics who will notify applicants of the committee’s decision.

Capstone experience.
The capstone experience represents the final requirement for the Undergraduate Economic Honors Program. This experience involves three elements:

(i) Completion of a one-credit honors seminar (ECON 47961) in each semester of the senior year. The seminar not only provides instructional support for these students, but also requires each student to present progress reports to their peers at regular intervals. These seminar credits do not count as regular major (i.e., do not substitute for 3xxx or 4xxxx-level elective economics courses) and are graded on a Satisfactory/Unsatisfactory basis. These seminars are open to juniors in the honors program who want advanced insight to what the honors essay entails.

(ii) Completion of a six credit senior honors essay (with a grade of B+ or higher). The essay is directed by an economics faculty member and represents a significant research effort. The writing of the essay is accomplished over the two semesters of the student’s senior year with three credits awarded each semester (ECON 47960). These credits can be counted as economics electives toward the major and can be used to satisfy the major’s writing-intensive requirement. The results of the essay must be presented at the economics seminar open to the public during the end of the second semester of each academic year.

(ii) Participation in all College of Arts and Letters events for departmental honors students.

MAJOR IN INTERNATIONAL ECONOMICS

The undergraduate major in International Economics is a collaborative effort between the Department of Economics and the departments of languages and literatures affiliated with the International Economics major. In pursuing this major, students take a minimum of eight/economics courses and seven to ten intermediate and advanced courses in one of the following languages: Arabic, Chinese, French, German, Italian, Japanese, Russian and Spanish. Students are also required to enroll in a one-credit course “Exploring International Economics” designed to foster the integration of the study of culture with the study of economics. Students must also complete a senior research project or equivalent designed to integrate their economic and language and culture study. The senior research project is intended to provide an experience that integrates the analytical aspects of economics with the linguistic and cultural aspects of a language. Details about the thesis/capstone project are determined by the relevant language department.

Students must satisfy a mathematics requirement of Calculus I and II and successfully complete ECON 10010/20010; ECON 10020/20020; ECON 30010; ECON 30200; ECON 30330; ECON 30331; and two of the following: ECON 40700, ECON 40800, ECON 40710 and ECON 40720 or other international economics courses as approved by the Director of Undergraduate Studies. Students should refer to their language department for specific language, literature and culture requirements.

Through the major, the collaborative departments seek to blend the programs of study to ensure that students will achieve advanced linguistic and cultural competency in a foreign language as well as excellent preparation in Economics. The balance of economics with languages and culture courses should attract motivated students and inspire them to undertake a challenging course of study that will prepare them for post-graduate studies and/or professional career opportunities in the international arena. International Economics majors will learn how aesthetic and cultural categories and value judgments are shaped by economic trends and political conditions and how political conditions and economic trends are influenced by aesthetic and cultural trends.

CONCENTRATIONS IN FINANCIAL ECONOMICS AND ECONOMETRICS

The Economics department also offers a concentration in Financial Economics and Econometrics. This selective program fills a need for additional training in applied quantitative economic reasoning. The coursework for the concentration will provide a fast-paced and rigorous training in financial economics that will prepare students for careers in investment management, banking, research, and policy-making. Admission to the concentration will be selective, and Economics and International Economics majors in the College of Arts and Letters may apply. Applications for admission to the concentration should be submitted to the Economics Department by February 15 of a student’s sophomore year. The department will evaluate all applicants and will make admission decisions by March 15. Admission decisions will be based on factors including overall GPA, performance in prior economics courses, and mathematical background. Students should have completed intermediate microeconomic theory by the end of their sophomore year.

Students pursuing this concentration will be required to fulfill the core requirements of the Economics or International Economics majors, along with the additional requirement of the five courses—three core classes and two electives. These classes would jointly satisfy the electives requirements within the Economics or International Economics majors.

Core Classes
All students must take the following three courses:
Financial Economics (ECON 40354, first offering in fall 2014)
Asset Pricing (first offering in spring 2015)
Financial Econometrics (first offering in fall 2015)

Upper level electives
All students are required to take two of the following electives:
International Money (ECON 40720)
Monetary Policy (ECON 40362)
Monetary Theory and Policy (ECON 40364)
Fixed Income Markets (future course)
Forecasting for Economics and Business (ECON 43330)
Options Pricing (future course)
Corporate Finance (future course)
Introduction to Financial Mathematics (MATH 30610)
Mathematical Methods in Financial Economics (MATH 40570/FIN 40820)
Statistical Methods in Financial Risk Management (ACMS 40890)
The concentration will also offer additional out-of-classroom enrichment opportunities, such as presentations by outside researchers and practitioners. These events will complement the coursework by offering insights into the world of finance and of policymaking, and will be natural opportunities for networking and for career advancement.

**THE MINOR IN BUSINESS ECONOMICS**

The minor in Business Economics comprises 15 credits. It is open to students who have a major in the College of Arts and Letters. All students are required to take Principles of Microeconomics; Principles of Macroeconomics; Statistics; Introductory Accounting and Introductory Finance. Students may count one of the above courses to fulfill a University requirement. Students may not double-count any of the above courses to fulfill the requirements of their major—but Psychology or Sociology majors can use their respective departmental statistics course to fulfill the statistics requirement of the minor. No more than one course in the minor may be taken at another institution. Prior approval is required for this and for transfer credit that is applied to satisfy the requirements of the minor. No AP credit will be accepted as a substitute for courses in the minor but may qualify a student for a higher level course. The minor is not open to students majoring in Economics.

**COURSE DESCRIPTIONS**

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Economics. Course descriptions can be found by clicking on the subject code and course number in the search results.

Jesús Costantino; Nan Da; Johannes Göransson; Z’étoile Imma; Yasinin Solomonescu; Azareen Van der Vliet Oloomi; Matthew Wilkens

**Professional Specialists:**

Noreen Deane-Moran

**Program of Studies.** The English major features small classes in which students read, analyze, and discuss literary works, studying issues of literacy and rhetoric, investigating the symbolic systems that shape cultural meaning, and exploring the broad range of human experience. Majors enjoy an atmosphere of immediate contact with the department’s regular teaching and research faculty, who advise students on their course of study. English courses give close attention to student writing, and nearly every majors-level English course is writing-intensive.

English majors choose careers in any field valuing the ability to read, write, and analyze with intelligence and subtlety. Many of our majors find careers in law, business, education, publishing, journalism, and medicine, as well as myriad other fields. An increasing number of English majors go into service projects and programs such as Teach for America.

**Major Requirements.** The English major requires a minimum of 10 courses (30 credit hours) in addition to the literature course required of all students in the College of Arts and Letters. In completing the 10 courses, students must satisfy the following requirements:

**Introduction to Literary Studies (ENGL 30101).**

This course, which introduces students to college-level study of literature, is a conc current prerequisite for the major (i.e., students cannot take a major elective unless they have completed this course or are currently enrolled in it).

**Research Seminar.** In the research seminar (numbered ENGL 43xxx), students complete an original and substantial research project. With the approval of the director of undergraduate studies and the instructor, students may take a graduate course in place of the research seminar. The research seminar does not fulfill a distribution requirement.

**Elective courses.** Eight English courses at the 30xxx or above.

**Distribution requirement.** In selecting elective courses, students must fulfill the following distribution requirements:

**History:**

1 course in the period before 1500
1 course in the period 1500–1700
2 courses in the period 1700–1900
1 course after 1900

**Culture:**

1 course in British literature
1 course in American literature
1 course in a literature in English outside of Britain and the United States or in American ethnic minority literature

**Genre:**

1 course predominately concerned with poetry
2 courses predominantly concerned with a genre from the following list: fiction, drama or film, critical theory

A single course can fulfill the requirement in more than one distribution category, but it may not satisfy more than one category. For example, a survey of Renaissance literature might count for 1500–1700 (history), British literature (culture), and drama (genre), but would not count for both poetry and drama (two genre categories).

Creative writing courses may satisfy the genre requirement, but no more than two may count toward the major.
Film, Television, and Theatre

The number of courses needed to satisfy the distribution requirement will vary, depending on the courses the student selects, but not all electives need fulfill a distribution requirement.

Research seminars do not fulfill the distribution requirement.

**Concentration in Creative Writing.** The philosophy of the Department of English is that in order to produce good literature, you must know good literature. In order to complete the concentration, therefore, the student must be an English major and complete all of the requirements for the major.

**Requirements.** In addition to completing the requirements for the major, students must take four creative writing courses from a list approved by the department, two of which, if taken at the 30xxx or 40xxx level, may count towards the ten courses required for the English major (meaning that at least completion students will have taken a minimum of twelve English courses at the 30xxx or 40xxx level). One 20xxx-level creative writing course may count toward the concentration. One of the four creative writing courses must be either Advanced Fiction Writing (40850) or Advanced Poetry Writing (40851).

**Admission to the Concentration.** Students wishing to complete the concentration must apply to the department after taking two creative writing courses in accord with the guidelines above. The Creative Writing Committee will determine whether to admit students to the concentration on the basis of the recommendations of the instructors of those two courses. In cases in which it is not possible to obtain such recommendations, a student may supplement his or her application with a portfolio of creative writing.

**Honors Concentration.** In the English Honors Concentration, select majors create programs tailored to their own particular interest. A faculty mentor guides each of these students through this intensive experience. The English Honors Concentration is particularly beneficial to students wishing to pursue graduate studies in English. The main feature of the concentration is writing an honors thesis consisting of a work of literary scholarship.

**Eligibility.** During the junior year, students are invited to apply to the Honors Concentration after being identified in one of two ways: achieving a GPA of 3.78 or higher in three or more English courses, or 3.6 or higher with a faculty nomination. Invited students declare their interest by completing a 300-word Statement of Purpose describing the project the student intends to complete. Students may also self-nominate for Creative Writing Honors by contacting the Director of Creative Writing and/or using the online application form.

**Requirements.** Students must complete all of the requirements for the Honors Concentration. In the fall of their senior year, students will meet regularly with their thesis advisor and other faculty to develop their thesis project; in the spring of the senior year, the student enrolls in ENGL 52999 (Honors Thesis) to complete the writing of the thesis. The thesis will consist of an abstract, a critical essay on the writing project (10–15 pages), approximately forty pages of prose (e.g., a section of a novel or a selection of short stories) or twenty pages of poetry, and a works cited.

**COURSE DESCRIPTIONS**

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject English. Course descriptions can be found by clicking on the subject code and course number in the search results.

Film, Television, and Theatre

**Department Chair:**
James M. Collins

**Endowed Professors:**
McAul Family Chair in Shakespeare Studies
Peter Holland
Joseph and Elizabeth Robbie Professor of Film, Television, and Theatre:
Donald Crafton

**Endowed Associate Professors:**
The William and Helen Carey Chair in Modern Communication:
Susan Ohmer

**Professors:**

**Associate Professors:**
Reginald F. Bain (emeritus); Christine Becker; Kevin C. Dreyer; Susan Ohmer; Frederic W. Syburg (emeritus)

**Assistant Professors:**
Anne Garcia-Romero; Yael Prizant

**Professional Specialists (Teaching Professors):**
William Donaruma; Richard E. Donnelly; Sitiir Scott

Ryan Producing Artistic Director, Notre Dame Shakespeare Festival:
Grant Mudge (concurrent Assistant Professional Specialist)

**Associate Professional Specialists:**
C. Ken Cole; Theodore E. Mandell; Marcus Stephens

**Adjunct Assistant Professional Specialist, Internship Coordinator:**
Karen Heisler

**Instructor:**
Gary Sieber (adjunct); William L. Wilson (adjunct)

**The Department.** The Department of Film, Television, and Theatre curriculum includes study of the arts of theatre and performance, film and video, and television. Our goal is to provide students with intellectual and intuitive resources for analysis and production of these performing and media arts. We seek both to encourage and inspire intellectual discipline and curiosity as well as to discover and nurture student creativity. We offer, therefore, both a scholarly and creative context for education of the general liberal arts student at Notre Dame as well as the individual seeking an intensive preparation for advanced study in these fields. In an interdisciplinary spirit of collaboration, students in this department investigate film, television, and theatre (and occasionally other media) as complex cultural phenomena to develop skills in analysis, evaluation, and theory formation as well as to engage in creative production.
Students graduating from this department have numerous postgraduate choices. Many of our graduates seek careers in law, medicine, business, education, public service, or other professions. Others will pursue careers in theatre, film, or television. However, we are not a professional training program. Rather, we seek to provide the creative and technological tools for student scholar/artists to build a basis for advanced study and professional careers in the arts should they so desire. It is our hope that those whose work and determination lead them to seek careers in these fields will be challenged and assisted by their liberal arts curriculum. Our courses provide tools to understand the analytical, technical and imaginative processes of the field, whether pursued as future work, study, or as an enhancement of intellectual life.

All 40xxx-level critical studies electives in film and television, and selected theatre electives, will fulfill the writing-intensive requirement.

Many FTT courses fulfill the University fine arts requirement.

For more information and up-to-date listings of courses and FTT events, visit the Web at ftt.nd.edu.

Program of Studies. Students interested in the major are encouraged to visit the departmental office (230 Marie P. DeBartolo Performing Arts Center) for information about the programs and department faculty. You also may visit our website at ftt.nd.edu.

Step-by-step instructions for becoming a major are available on our website. Students may elect to major in the department as either a first or second major in accordance with college guidelines.

Students concentrate in either film, television or in theatre. Ten courses are needed to complete the major. The film concentration requires one elective on an international subject and three courses at the 40000 level. The television concentration requires seven electives, three at the 40000 level. The theatre concentration requires six electives, one each from Groups A, B, and C. The remaining electives may be from any Group.

The Department of Film, Television, and Theatre participates in several international programs by cross-listing courses and sponsoring internships. For more information, see the Bulletin descriptions for the international programs.

Several courses are offered in the summer session, including Introduction to Film and Video Production. See the Summer Session Bulletin for availability and further information.

FTT Honors Program
Starting with the Fall 2012 semester, the Department of Film, Television, and Theatre will transform its Honors program by combining it with a new Senior Thesis Program. The changes are intended to better serve those students who aspire to complete a major research project in their senior year and to reward the most outstanding work.

FTT majors are invited to apply during their junior year to complete a two-semester Senior Thesis project during their senior year. Upon completion of the project, as well as a one-credit writing workshop in the fall of their senior year, students will be eligible to receive the Honors designation upon graduation, provided their project is approved for that designation by the department Honors Committee.

FILM CONCENTRATION
10 courses
4 required core courses:
- Basics of Film and Television
- History of Film I (fall only)
- History of Film II (spring only)
- Film and Television Theory
6 electives (3 at the 40000 level, including 1 international elective at either the 30000 or 40000 level)

General Electives
Introduction to Film and Television Production
The Art and Science of Filmmaking
Film and Digital Culture
History of Documentary Film
Topics in Media Theory: Film and Popular Music
The Art and Science of Screenwriting
Media Internship

International Electives (30xxx and 40xxx Level)
Italian National Cinema
Comedy Italian Style
French Cinema
New Iranian Cinema
Irish Cinema and Culture
Australian Cinema
Hong Kong: Action Cinema

Upper-Level Electives
Shakespeare and Film
Intermediate Filmmaking
Advanced Filmmaking
Sex and Gender in Cinema
Walt Disney in Film and Culture
Contemporary Hollywood
Postmodern Narrative
Documentary Video Production
Sinatra

TELEVISION STUDIES CONCENTRATION
10 courses
3 required core courses:
- Basics of Film and Television
- History of Television
- Film and Television Theory
7 electives (3 at the 40000 level)
- Broadcast Journalism
- History of Film I & II
- Writing for Screen and Stage I and II
- Introduction to Film and Television Production
- Film and Digital Culture
- Topics in Media Theory, History, and Research
- Broadcasting and Cable

Sports Journalism
Entertainment and Arts Law
Media Ethics
Media and the Presidency
Media Stardom and Celebrity Culture
Advanced Filmmaking
Contemporary Hollywood
Media Culture
Media Internship
Special Studies
Issues in Film and Media
Walt Disney in Film and Culture
Sinatra

THEATRE CONCENTRATION
10 courses:
4 required core courses:
- Theatrical Production
- Script Analysis
- Theatre, History, and Society (either section)
- Performance Analysis
6 elective (1 from each groups A, B, and C)

Group A
- Science Play
- Latin American Theatre
- History of Costume
- Advanced Dramaturgy
- Early English Theatre
- Shakespeare and Film
- Dramatic Text, Production & Social Concerns

Group B
- Scene Design
- Lighting Design
- Costume Design

Group C
- Acting: Process
- Viewpoints for Actors and Directors
- Voice and Movement

Additional Electives
- Introduction to Theatre
- Stage Management
- Playwriting
- Make-up for the Stage
- Scenic Painting
- Draping and Flat Patterning
- Acting: Character
- Acting: Text and Technique
- Directing: Process
- Classical Texts and Techniques
- CAD for the Stage
- Advanced Technical Production

Complementary Nature of Departmental Concentrations. There is a strong creative and scholarly relationship in the mix of courses and activities of the department of which students should be aware. The concentrations offered by this department can provide many complementary areas of creative and technical study for students involved in film and television production, as well as overlapping topics in media theory, history, and research.
gender-related studies. Similarly, those concentrating in theatre are urged to avail themselves of the many opportunities for production experience and critical, cultural and theoretical studies offered by the theatre faculty.

Cocurricular Activities. The department encourages non-majors to elect courses, participate as audience in our extensive film and theatre series, and involve themselves in film, television, and theatre production as a means of informing and complementing their liberal arts education at Notre Dame. Occasional guest artists and lecturers are also sponsored by the department. Information on all department-sponsored activities is available in the department office and on the department’s website.

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Film, Television, and Theatre. Course descriptions can be found by clicking on the subject code and course number in the search results.

GENDER STUDIES MAJOR, SUPPLEMENTARY MAJOR AND MINOR

Objectives. Gender Studies is an interdisciplinary academic program in the College of Arts and Letters at Notre Dame. Gender Studies analyzes the significance of gender—and the cognate subjects of sex, sexuality, race, ethnicity, class, religion, and nationality—in all areas of human life, especially in the social formation of human identities, practices, and institutions. Gender Studies gives scholars the methodological and theoretical tools to analyze gender and its cognates in their chosen disciplines in the arts, humanities, social sciences, and natural sciences. Gender Studies also provides students and alumni with an intellectual framework in which the analysis of gender and its cognates can be creatively and critically applied to their personal, familial, professional, and civic roles. In the context of the Catholic identity of Notre Dame, Gender Studies facilitates the study of the intersection of gender and religion in the shaping of ethics, culture, and politics. Alongside our diverse array of courses drawn from across the University, our summer internship and academic-credit internship programs emphasize the holistic and practical life applications of a Gender Studies education at Notre Dame.

Gender Studies offers students a major, a supplementary major and a minor. In the major and supplementary major, students choose a concentration in Arts and Culture, Religion and Family, or Gender and Society. These concentrations allow students to focus their study of Gender to prepare them for their professional, familial, personal, and civic roles.

senior capstone project—senior seminar, capstone essay or a two-semester thesis.

Requirements for Primary Major:
10 courses, 30 credit hours
Two required courses:
Introduction to Gender Studies Perspectives on Gender: Theory and Practice
1 senior capstone project:
senior seminar or senior thesis
Seven (7) electives:
• at least 1 elective must fulfill diversity requirement
• at least 2 electives at 40000 level or higher
• at least 4 courses in one of the following concentrations:
  Arts and Culture
  Religion and Family
  Gender and Society

Requirements for Supplementary Major:
8 Courses, 24 credit hours
Two required courses:
Introduction to Gender Studies Perspectives on Gender: Theory and Practice
1 senior capstone project:
senior seminar or capstone essay
Free (5) electives:
• at least 1 elective must fulfill diversity requirement
• at least 1 elective at 40000 level or higher
• at least 3 courses in one of the following concentrations:
  Arts and Culture
  Religion and Family
  Gender and Society
Senior Capstone projects must be in student’s area of concentration
Perspectives on Gender and Capstone courses are taken in addition to the 40000 level or higher courses needed
Elective courses can fulfill more than one elective requirement

Requirements for Interdisciplinary Minor:
5 courses, 15 credit hours
Two required courses:
Introduction to Gender Studies Perspectives on Gender: Theory and Practice
Three (3) electives

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Gender Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

To Table of Contents
German and Russian Languages and Literatures

Chair: William C. Donahue
Rev. Edmund P. Joyce, C.S.C., Professor of German Language and Literature: Mark W. Roche
Paul G. Kimball Professor of Arts and Letters: Vittorio Hößle
John J. Cavanaugh, C.S.C., Professor of Humanities: William C. Donahue

Professors: William C. Donahue; Vittorio Hößle; Randolph J. Klwiter (emeritus); Klaus Lanzinger (emeritus); Thomas G. Marullo; Robert E. Norton; Vera B. Profit (emerita); Mark W. Roche; Konrad Schum (emeritus)
Associate Professors: Tobias Boes; David W. Gasperetti; Alyssa W. Gillespie; Albert K. Wimmer (emeritus)
Assistant Professors: Carsten Dutt; Claire Taylor Jones
Teaching Professors: Denise M. Della Rossa; Hannelore Weber

Program of Studies. The study of German and Russian languages and literatures provides educational opportunities relevant to an increasingly interdependent world. The acquisition of foreign language skills in general is an important component of liberal education because it enhances students’ powers of communication and serves to introduce them to enduring cultural achievements of other peoples. In this sense, the study of German and Russian widens students’ intellectual horizons, stimulates the understanding of several significant cultural traditions, and facilitates the examination of these traditions in a more sophisticated and cosmopolitan manner.

The German Program

Chair: William C. Donahue
Rev. Edmund P. Joyce, C.S.C., Professor of German Language and Literature: Mark W. Roche

Requirements: First Major, Supplementary Major, and Minor

Major in German Language and Literature

Successful completion of 10 courses (30 credit hours) beyond the three-semester language requirement. These 10 courses must include successful completion of 20202, 30104, and 30204 and an additional 7 electives at the 30000 or 40000 level. 20202 is a prerequisite to 30104 and 30204, which may be taken in any order. At least one of these courses, preferably both, must be completed before taking an elective. Of these 10 courses, 4 must be upper-division courses at the home institution from departmental offerings; 2 must be at the 40000 level; and 2 may be in English.

Supplementary Major in German Language and Literature

Successful completion of 8 courses (24 credit hours) beyond the three-semester language requirement. These 8 courses must include successful completion of 20202, 30104, and 30204 and an additional 5 electives at the 30000 or 40000 level. 20202 is a prerequisite to 30104 and 30204, which may be taken in any order. At least one of these courses, preferably both, must be completed before taking an elective. Of these 8 courses, 3 must be upper-division courses at the home institution from departmental offerings; 1 must be at the 40000 level; and 2 may be in English.

Minor in German Language and Literature

Successful completion of 5 courses (15 credit hours) beyond the three-semester language requirement. These 5 courses must include successful completion of 20202, 30104, and 30204 and an additional 2 electives at the 30000 or 40000 level. 20202 is a prerequisite to 30104 and 30204, which may be taken in any order. At least one of these courses, preferably both, must be completed before taking an elective. Of these 5 courses, 2 must be upper-division courses at the home institution from departmental offerings; and 1 may be in English.

Major in International Economics in German

The undergraduate major in International Economics is a collaborative effort between the Department of Economics and affiliated departments of languages and literature. In pursuing this major, students take a minimum of eight economics courses and six courses in German beyond the language requirement. Students are also required to enroll in a one-credit “Exploring International Economics” course, preferably their sophomore year, designed to foster the integration of the study of culture with the study of economics. Under the guidance of a faculty mentor, international economics majors in German integrate their economic and language and culture study into a senior research project or senior thesis. This project or thesis is intended to provide an experience that integrates the analytical aspects of economics with the linguistic and cultural aspects of German studies.

German Requirements: Successful completion of 6 courses (18 credit hours) beyond the three-semester language requirement. All students are required to take GE 33000: Exploring International Economics (one credit).

These 6 courses must include successful completion of 20202, 30104, 30204, and 40000 level; one of which must be taught in English. 20202 is a prerequisite to 30104 and 30204, which may be taken in any order. At least one of these courses, preferably both, must be completed before taking an elective.

Of these 6 courses, 2 must be upper-division courses at the home institution from departmental offerings.

Refer to the Department of Economics for the relevant course requirements in economics which include satisfying a mathematics requirement of Calculus I and II and successful completion of ECON 10011/20011; ECON 10020/20020; ECON 30010; ECON 30020; ECON 30330; ECON 30331; and two of the following: ECON 40700, ECON 40800, ECON 40710 and ECON 40720.

Supplementary Major in German Studies

Successful completion of 5 courses (15 credit hours) beyond the three-semester language requirement. These 5 courses must include successful completion of 20202, 30104, and 30204, and an additional 2 electives at the 30000 or 40000 level. 20202 is a prerequisite to 30104 and 30204, which may be taken in any order. At least one of these courses, preferably both, must be completed before taking an elective. Of these 5 courses, 2 must be upper-division courses at the home institution from departmental offerings; and 1 may be in English.

Major in German Studies

Successful completion of 10 courses (30 credit hours) beyond the three-semester language requirement. These 10 courses must include successful completion of 20202, 30104, and 30204 and an additional 7 electives at the 30000 or 40000 level. 20202 is a prerequisite to 30104 and 30204, which may be taken in any order. At least one of these courses, preferably both, must be completed before taking an elective. Of these 10 courses, 4 must be upper-division courses at the home institution; 3 must be in German and up to 4 may be in English; 2 must be at the 40000 level.

Supplementary Major in German Studies

Successful completion of 8 courses (24 credit hours) beyond the three-semester language requirement. These 8 courses must include successful completion of 20202, 30104, and 30204 and an additional 5 electives at the 30000 or 40000 level. 20202 is a prerequisite to 30104 and 30204, which may be taken in any order. At least one of these courses, preferably both, must be completed before taking an elective. Of these 8 courses, 3 must be upper-division courses at the home institution from departmental offerings; and 1 may be in English.
preferably both, must be completed before taking an elective.

Of these 8 courses, 3 must be upper-division courses at the home institution; 2 must be in German and up to 3 may be in English; 1 must be at the 40000 level.

Study Abroad: Students who participate in a study abroad program during the academic year must take at least 1 course from departmental offerings after their return to the home campus. Only one intensive language course taken abroad, whether completed during a summer program or the academic year, will count as an elective toward the first major, supplementary major, or minor.

Senior Thesis and Departmental Honors

German first majors who elect to write a Senior Thesis must meet the following requirements:

1. The student must have a GPA of 3.0 or higher in the major.
2. Should be nominated by two members of the German faculty during the spring semester of his or her junior year and no later than the first week of classes fall semester of the senior year, and
3. The thesis may be written in either German or English with a length of between 25–35 pages, including notes and references. (Exceptions beyond 35 pages require advisor approval.) Two bound copies of the final document are to be submitted to the Department of German.

For the fall semester the student will receive a satisfactory/unsatisfactory grade (3 credits) for GE 48499. At the completion of the thesis in the spring semester, the student will be given a letter grade (3 credits) for GE 48499. These credits do not count toward the 30-credit hour requirement for the first major.

German first majors who wish to receive Departmental Honors must meet the above criteria as well as the following:

1. The student will present his or her thesis work in a public forum, such as Notre Dame’s Undergraduate Scholar’s Conference held each May or at a similar conference, and
2. the student must maintain a departmental GPA of 3.5 and receive no lower than an A– on the Senior Thesis.

THE RUSSIAN PROGRAM

Director of Undergraduate Studies:
David Gasperetti

The Major in Russian

Majors in Russian must complete ten courses (thirty credit hours) beyond the three-semester language requirement, including at least six courses taught by departmental faculty. Intermediate Russian II and Advanced Russian I and II are required courses. However, participants in an approved semester-long program in Russia are automatically exempted from the language course that is offered concurrently with their semester abroad. In addition, students are required to take four three-credit literature or culture courses offered by the department at the 30000 level or above, including at least one course each at the 30000 and 40000 levels. With the permission of the Director of Undergraduate Studies, one course on a Russian subject taught in another department, such as Anthropology, History, Political Science, or Theology, may be counted toward the Russian major.

The Supplementary Major in Russian

Supplementary majors in Russian must complete eight courses (twenty-four credit hours) beyond the three-semester language requirement, including at least four courses taught by departmental faculty. Intermediate Russian II and Advanced Russian I and II are required courses. However, participants in an approved semester-long program in Russia are automatically exempted from the language course that is offered concurrently with their semester abroad. In addition, students are required to take two three-credit literature or culture courses offered by the department, one at the 30000 level and one at the 46000 level. With the permission of the Director of Undergraduate Studies, one course on a Russian subject taught in another department, such as Anthropology, History, Political Science, or Theology, may be counted toward the Russian supplementary major.

The Major in International Economics in Russian

Combining the study of economics with the knowledge of another country’s language and culture can be a powerful advantage in business. The Major in International Economics in Russian is designed to provide this edge by preparing students for the challenges of an ever more interconnected global economy. The requirements for the major include the following:

1. RU 33000 “Exploring International Economics” (one credit, preferably taken in the sophomore year), which fosters an integrated approach to the study of culture and economics; six courses (18 credits) from Russian departmental offerings beyond the three-semester language requirement, including RU 20102 “Intermediate Russian II,” RU 40101 “Advanced Russian I,” RU 40102 “Advanced Russian II,” one literature/culture elective each at the 30000 or 40000 level, and one additional three-credit literature or Russian history elective at the 30000 or 40000 level; and eight courses in economics. In addition, all international economics majors combine their study of economics and language, literature, and culture in a senior research project or senior thesis written under the guidance of a faculty mentor.

Refer to the Department of Economics for the relevant course requirements in economics, which include satisfying a mathematics requirement of Calculus I and II and successful completion of ECON 10011/20011; ECON 10020/20020; ECON 30010; ECON 30020; ECON 30330; ECON 30331; and two of the following: ECON 40700, ECON 40800, ECON 40710 and ECON 40720.

The Minor in Russian

The Russian minor consists of five courses (fifteen credits) at the 20000 level or above taught by departmental faculty. Course selection must include at least two language courses at the student's appropriate level and three additional three-credit courses at either the 30000 or the 46000 level.

The Supplementary Major in Russian and East European Studies

The supplementary major in Russian and East European Studies is designed to give students with an interest in Russia and Eastern Europe an interdisciplinary introduction to the region that supplements their primary disciplinary major. The supplementary major requires:

1. Three semesters (11 credits) of college-level Russian language (or another East European language, with the approval of the DUS);
2. Five courses (15 credits) in Russian and East European area studies at the 30000 or 40000 level, taken in residence at Notre Dame and distributed across at least three academic disciplines (literature, film, history, political science, theology, music, anthropology, etc.);
3. Two additional courses (6 credits), one or both of which may be EITHER (a) Russian and East European area studies at the 30000 or 40000 level, OR (b) Russian language at the Intermediate II level or above. (Students who place higher than Beginning Russian II upon entering Notre Dame will be required to choose option b and take two Russian language courses toward the REES supplementary major); and
4. EITHER (c) an additional course (3 credits) in Russian language or in Russian and East European area studies at the 30000 or 40000 level in any discipline, plus a 5-page paper submitted to the DUS by Nov. 1 of the senior year (this paper should reflect on the interdisciplinary connections among the different courses the student has taken and still plans to take for the major), OR (d) a substantial senior essay (3 credits) completed in the fall semester of the senior year under the guidance of a Russian and East European Studies faculty member (a 3.5 minimum GPA in the REES supplementary major and approval of the DUS are required in order for a student to elect this option; a proposal, bibliography, and thesis statement must be submitted to the DUS and faculty advisor by April 1 of the previous semester).

The Minor in Russian and East European Studies

The Minor in Russian and East European Studies is designed to give students with an interest in Russia and Eastern Europe an interdisciplinary introduction to the region. The minor requires:
History

1. Completion of Beginning Russian I and II (or another East European language, with the approval of the DUS);

2. Four full courses (12 credits) in Russian and East European area studies at the 30000 or 40000 level, taken in residence at Notre Dame and distributed across at least three academic disciplines (literature, film, history, political science, theology, music, anthropology, etc.); and

3. EITHER (a) one additional course (3 credits) in Russian and East European area studies at the 30000 or 40000 level, OR (b) one additional semester (3 credits) of Russian (or another approved East European language) at the 20000 level or above. (Students who place higher than Beginning Russian II upon entering Notre Dame will be required to choose option b.)

Study Abroad

Our students are encouraged to experience firsthand the excitement of being immersed in Russian culture through participation in a study program in Russia. Programs are available during the summer (five to nine weeks) or for an entire semester or academic year. Credits earned for course work taken in approved programs may be applied toward the Russian major or minor at Notre Dame. Grants are available on a competitive basis for summer language study through the Center for the Study of Languages and Cultures and the Nanovic Institute for European Studies.

Senior Thesis/Honors Track

Russian majors are admitted into the honors track by application. To receive honors, a student must (1) complete all requirements for the major; (2) maintain a GPA of at least 3.5 in the major; (3) register for two 1-credit enrichment courses (RU 47100) in the senior year; (4) register for two 40000-level literature courses in the senior year; and (5) receive a grade of A- or higher for a substantial honors thesis written in English. Closely supervised by one of the Russian faculty in the Department of German and Russian Languages and Literatures, the Russian honors thesis is to be the product of a 6-credit honors track directed readings course taken in the senior year. The student will receive 3 credits in the fall semester for preparation of the thesis and 3 credits in the spring semester for writing the thesis. For more information, see germanandrussian.nd.edu.

Placement and Language Requirement

At the beginning of each semester, placement tests in German and Russian will be administered that will allow students to enroll in a course commensurate with their language proficiency. The placement test is mandatory for students who had German or Russian in high school.

Students testing out of three semesters must complete an additional course at the 20000 level or higher before fulfilling the language requirement. This includes students who have taken an AP or SAT II exam.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes in German or Russian for a given semester may be found by clicking on “Class Search” and selecting either German or Russian from the Subject menu. The scheduled classes in Russian and East European Studies for a given semester may be found by clicking on “Class Search” and selecting REES from the Attribute menu. Course descriptions can be found by clicking on the subject code and course number in the search results.
Irish Language and Literature

The only one of its kind in North America, the Department of Irish Language and Literature began offering a major and a supplemental major in Irish Language and Literature in the fall 2012 semester. The department also gives undergraduates the opportunity to complete a minor in the field. These programs teach students Irish, the indigenous language of Ireland and the voice of the oldest vernacular literature in Europe. It also allows them to engage Irish culture in its native language.

Officially launched on October 1, 2004, by His Excellency Noel Fahey, Irish Ambassador to the United States of America, the Department of Irish Language and Literature recognizes Notre Dame's commitment to the Irish language and the centrality of Irish to the academic discipline of Irish Studies.

Requirements for a Major in Irish Language and Literature (with a language-intensive concentration) In addition to Intermediate Irish I, a student must take:
- Intermediate Irish II
- Advanced Irish I & II
- 2 survey courses—one covering Irish language and one covering Irish language literature
- 4 electives taken at a 30000/40000 level
- 1 elective taken at a 40000 level and taught in the Irish language

Supplemental Major (with a language-intensive concentration) Requirements are the same as those for the major except only 2 elective courses at the 30000/40000 level are required.

Requirements for a Major in Irish Language and Literature (with a literature-intensive concentration) In addition to Intermediate Irish I, a student must take:
- Intermediate Irish II
- 2 survey courses—one covering Irish language and one covering Irish language literature
- 7 electives taken at a 30000/40000 level

Supplemental Major (with a literature-intensive concentration) Requirements same as those for the major except only 5 elective courses at 30000/40000 level are required.

Students pursuing a minor in Irish language and literature are required to complete the following courses:
1. Take and pass the following Irish language courses: Beginning Irish I & II, Intermediate Irish and Advanced Readings in Irish Culture.
2. Take and pass three Irish literature courses offered by the Department of Irish Language and Literature, two of which must be a 300 level or above.

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject History. Course descriptions can be found by clicking on the subject code and course number in the search results.

Assistant Professors:
Andrei Jorza; Claudiu Raicu

Associate Special Professional Faculty:
Arthur Lim; Annette Pilkington

Program of Studies. Students in the College of Arts and Letters may pursue a major in mathematics with a concentration in honors. (Note that this program should not be confused with the Arts and Letters/Science Honors program and that several concentrations, including Honors, are available with a major in mathematics in the College of Science.) The mathematics major in arts and letters aims to give the student a thorough liberal intellectual discipline and to furnish an adequate background for other fields of study. At the same time it prepares the student for graduate work in mathematics, and many of those who have taken the program have entered graduate schools in that field. Others have entered philosophy, medicine, law, economics and industrial management.

Students intending to follow this major in the College of Arts and Letters must declare their intention to the advisor indicated by the mathematics department and the dean of arts and letters at advance registration in the spring of their freshman year. Students must have completed or be completing satisfactory work in MATH 10850 and 10860. The program of their studies is subject in its entirety to approval by the advisor.

Students whose first major is in the College of Arts and Letters may also pursue a second major in mathematics. See “Mathematics as a Second Major” in the College of Science section of this Bulletin.

THE PROGRAM OF COURSES

First Year
First Semester
English 3
History or Social Science 3
MATH 10850. Honors Calculus I 4
Natural Science 3
Language: (French, German or Russian recommended) 3
Moreau First Year Experience 1

Second Semester
Language: French, German or Russian 3
University Seminar 3
MATH 10860. Honors Calculus II 4
Natural Science 3
Electives 3
Moreau First Year Experience 1

Sophomore Year
First Semester
Core Course 3
Language: French, German or Russian 3
Fine Arts Elective 3
MATH 20810. Honors Algebra I 3
MATH 20850. Honors Analysis I 3

Second Semester
Introduction to Philosophy 3
Core Course 3
Theology 3
MATH 20820. Honors Calculus II 4
MATH 20860. Honors Calculus III 4

Junior Year
First Semester
Theology 3
MATH 30810. Honors Algebra III 3
MATH 30850. Honors Analysis I 3
Elective 5
History or Social Science 3

17
Students interested in writing a senior thesis should appear on the transcript. Citation of "Graduation with Senior Thesis" will receive 2 credits under MATH 48900 and the senior year. If the thesis is approved, the student must be expected to be expository, but based on advanced-level readings. It should represent an effort that goes beyond what is found in an undergraduate course. It is especially desirable for a student to present a somewhat novel approach to an established subject, or to explore one of the many interesting connections that mathematics has with other disciplines.

During the second semester of the junior year and the first semester of the senior year, the student will work closely with a faculty advisor on a program of readings in preparation for the thesis, receiving 2 credits for each of these two semesters of work, under MATH 48800.

The thesis is to be crafted during the second semester of the senior year. The thesis must be submitted to the director of undergraduate studies by April 15 of the senior year. If the thesis is approved, the student will receive 2 credits under MATH 48900 and the citation of "Graduation with Senior Thesis" will appear on the transcript.

Students interested in writing a senior thesis should contact the director of undergraduate studies in the Department of Mathematics.
library, but also to its ongoing commitment to the original liberal arts ideal.

Medieval Studies prepares students to enter graduate school, law school, medical school, or various careers such as business, government, education, publishing, ministry, curatorship, and research. With an emphasis on close reading, precise textual analysis, careful writing, and vigorous discussion, the program is designed to foster critical thinking, oral and written communication skills, and a heightened appreciation for history, religion, and culture.

Far from being the “dark ages,” medieval civilization witnessed the dawn of many of today’s institutions including universities, hospitals, legal and economic systems, religious communities and doctrine, architecture, engineering, science, art, and literature. Contemporary society is indebted to the Middle Ages not only for its inheritance, but also for its relevance.

The Medieval Studies program offers four undergraduate tracks, each based on an interdisciplinary model. It draws courses from Anthropology; Art, Art History, and Design; Classics; English; German and Russian Languages and Literatures; History; Irish Language and Literature; Music; Philosophy; Political Science; Romance Languages and Literatures; and Theology. From these 12 disciplines, students are encouraged to build a unique program of study, in consultation with a faculty advisor, around an area of concentration that captures an interest, prepares for a field, or contributes to an academic pursuit.

Students interested in Medieval Studies may elect one of the following four options:

1. Major in Medieval Studies
2. Honors Major in Medieval Studies
3. Supplementary Major in Medieval Studies
4. Minor in Medieval Studies

All three major tracks include two common components. Each student’s curriculum is built around a concentration chosen by the individual (from the 12 participating departments), in conjunction with a faculty advisor. The concentration requires a minimum of four interrelated courses reflecting an intellectual and curricular coherence. An advanced seminar (3 credits) is the second common element in each of the major tracks. Students in the seminar are expected to read widely and discuss vigorously a set of sources that present a particular issue from several points of view. In addition, they are also expected to write a substantial research paper. The goal of the seminar is to engage students in thinking critically and knowledgeably across the boundaries of traditional disciplines while maintaining a focus on a particular time, place, or issue.

The three major tracks and the minor track also have an introductory required course (3 credits), MI 20001, The World of the Middle Ages.

Following are brief outlines of the basic requirements for the three major tracks and the minor track. Further details can be obtained from the director of undergraduate studies in the Medieval Institute.

**Medieval Studies Major (30 credits)**

- The World of the Middle Ages course
- Four courses drawn from two or more departments representing a concentration
- Four electives in Medieval Studies drawn from at least two departments
- One advanced seminar (4xxxx-level or above) in Medieval Studies

**Medieval Studies Honors Major (36 credits)**

- Same requirements as major in Medieval Studies (see above)
- EXCEPT one intermediate Latin course and one advanced Latin course are required in lieu of two medieval electives
- PLUS an honors thesis for 6 credits

**Medieval Studies Supp. Major (24 credits)**

- The World of the Middle Ages course
- Four courses drawn from two or more departments representing a concentration
- Two or three electives in Medieval Studies
- Medieval Studies seminar (on a space-available basis and in conjunction with MI electives option)

**Medieval Studies Minor (15 credits)**

- The World of the Middle Ages course
- Three or four electives in Medieval Studies drawn from at least two departments
- Medieval Studies seminar (on a space-available basis and in conjunction with MI electives option)

**COURSE DESCRIPTIONS**

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Medieval Institute. Course descriptions can be found by clicking on the subject code and course number in the search results.

**Music**

**Chair:**
Peter H. Smith
Kough-Hesburgh Professor of Music History and Liturgy:
Margot Fassler
Michael P. Grace Chair in Medieval Studies:
Peter Jeffery
J.W. Van Gorkom Professor of Music:
Susan L. Youens

**Professors:**
Alexander Blachly; Calvin M. Bower (emeritus); William Cerny (emeritus); Craig J. Cramer; Kenneth W. Dye; Ethan T. Haimo (emeritus); Georgine Resick; Carmen Tellez

**Associate Professors:**
John Blacklow; Karen L. Buranskas; Mary E. Frandsen; Paul G. Johnson (emeritus); Rev. Patrick Maloney, C.S.C. (emeritus); Carolyn R. Plummer (emeritus)

**Assistant Professors:**
John Liberator; Tala Jarjour

**Professional Specialist:**
Mark Beudert

**Associate Professional Specialists:**
Lawrence H. Dwyer; Stephen Lancaster; Tricia Park; Daniel C. Stowe

**Assistant Professional Specialists:**
Daniel Schlosberg

**Concurrent Faculty:**
Christopher Chowrimootoo; Pierpaolo Polzonetti

**Adjunct Faculty:**
Darrel Tidaback

**Band Staff:**
Justin McManus; Matthew Merten; Sam Sanchez; Alison Thigpen

**Program of Studies.** The Department of Music offers students a variety of musical experiences in accordance with its two objectives: (1) to provide all students, regardless of their major, knowledge and training in music through introductory, historical and theoretical courses, through participation in large and small ensembles, and through applied instrumental or vocal study; and (2) to provide intensive curriculum and training for the student who chooses music as a major. Students majoring in music will choose a concentration in Theory and History or in Performance. Each concentration offers an honors option for students intending to pursue professional study in the field after graduation. These students should also continue to study at least one non-native language beyond the college’s language requirement. All the concentrations have requirements beyond the course work. These may include recitals, ensembles, juries, and so forth.

Students considering these programs should contact the department as early as possible, preferably in the first year of study. This is especially important if study abroad is anticipated.
Advising. Each major will be assigned a faculty advisor who must be consulted in person to discuss the program of study before a student may register for classes.

Lessons. Music majors in the Performance concentration qualify for a 100 percent discount on weekly one-hour applied music lessons on their primary instrument and a 50 percent discount on a secondary instrument. Students in the Theory and History concentration qualify for a 50 percent discount on lessons on a primary instrument and no discount for lessons on a secondary instrument. Applied music lessons are also available for non-majors for a fee. Lessons may count as “activity” elective credits. (The College of Arts and Letters accepts up to three activity credits toward graduation.) The fee is charged to the students’ accounts, and no refunds are made after the second lesson. Lessons do not count toward the University fine arts requirement.

Interdisciplinary Minor in Liturgical Music. This 18-credit minor consists of three 3-credit courses in theology and two 3-credit courses in music, plus three credits of music lessons or approved ensembles, to be selected in consultation with the student’s music advisor. Contact the director of undergraduate studies in the Department of Theology.

Master of Sacred Music degree. The Master of Sacred Music (MSM) is a degree program situated in the Department of Theology at the University of Notre Dame with major participation from faculty in the Department of Music. For information, contact Janet Rudasics at (574) 631-5349.

Doctor of Musical Arts degree. The Doctor of Musical Arts (DMA) is a degree program situated in the College of Arts and Letters at the University of Notre Dame with major participation from faculty in the Departments of Music and Theology. For more information, contact Janet Rudasics at (574) 631-5349.

HISTORY/THEORY

The requirements for a 33-credit major with a concentration in theory and history are:

Class |
<table>
<thead>
<tr>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Harmony and Voice Leading (Theory I) (Prerequisite course; 3 credits count as University elective)</td>
</tr>
<tr>
<td>Advanced Harmony and Voice Leading (Theory II)</td>
</tr>
<tr>
<td>Chromatic Harmony (Theory III)</td>
</tr>
<tr>
<td>Twentieth-Century Music: Structure and Style (Theory/History IV)</td>
</tr>
<tr>
<td>Musicianship I–III</td>
</tr>
<tr>
<td>History I–III</td>
</tr>
<tr>
<td>Four 3-credit courses in history and theory, 30xxx level and above</td>
</tr>
</tbody>
</table>

Music Total |
| 33 |

In order to remain in the performance program, students must be approved by faculty. In the spring semester of the freshman, sophomore, and junior years, all performance majors must participate in juries. Afterwards, the faculty will assess the level of their performance to determine if they are qualified to continue in the program. Students who demonstrate a high level of achievement in the sophomore year will be candidates for the honors program.

Students in the performance concentrate may take proficiency exams to pass out of one or more of the musicianship courses; however, if they do not pass the proficiencies, they must enroll in Musicianship I–III.

Performance concentrators must present a senior recital. (Honors majors must present an additional recital.)

Participation in ensembles (e.g., chamber music class, large ensembles, chorale, opera, etc.) is required each semester. (No credit toward the major, but may be applied toward graduation as “activity” credits.)

Students who have had previous music education may place out of Harmony and Voice Leading (Theory I), by examination.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Music. Course descriptions can be found by clicking on the subject code and course number in the search results.
Philosophy

Chair: Richard Cross
E. and H.M. O'Neill Professor of Science, Technology and Values:
Kristin Shriver-Frechette
Rev. Theodore M. Hesburgh Professor Emeritus of Arts and Letters:
Rev. David Burrell, C.S.C. (emeritus)
McMahon/Hank Professor of Philosophy:
Karl Ameriks; Michael Degele
Notre Dame Professor of Philosophy:
Gary Gutting
Rev. John A. O'Brien Professor of Philosophy:
Robert Audi; Richard Cross; Alvin Plantinga (emeritus)
John Cardinal O'Hara Professor of Philosophy:
Peter Van Inwagen
George N. Shuster Professor of Philosophy:
Michael J. Loux (emeritus); Christopher Shields
Rev. John A. O'Brien Senior Research Professor (Emeritus):
Alasdair C. MacIntyre (emeritus)
John and Jean Oesterle Professor of Thomistic Studies:
Alfred Freddoso
Glynn Family Honors II Professor of Philosophy:
Paul Weirman
William J. and Dorothy K. O'Neill Collegiate Associate Professor of Philosophy:
Samuel Newlands
Professors:
Patria Blanchette; Anjan Chakravarthy; Fred Dallmayr (emeritus); Cornelius F. Delaney;
Michael R. DePaul; Stephen Dumont; John Finnis (concurrent); Thomas P. Flint; Stephen Gersh (concurrent); Vittorio Hösle (concurrent); Don A. Howard; Rev. John I. Jenkins, C.S.C.;
Lynn Joy; Edward Manier (emeritus); Robert Norton (concurrent); Gretchen Reydams-Schils (concurrent); Jeffrey Speaks; Michael Rea; Mark Roche (concurrent); Kenneth Sayre (emeritus);
James P. Sterba; Ted A. Warfield; Stephen H. Watson
Associate Professors:
Timothy Bays; Katherine Bradin; Sheilah Brennan (emerita); Curtis Franks; Sean Kelsey; Janet A. Kourany; Vaughn R. McKim (emeritus); G. Felicitus Munzel (concurrent);
John O'Callaghan; David O'Connor; Fred Rush; David Solomon; Leopold Stubenberg; Meghan Sullivan
Assistant Professors:
Therese Cory; Joseph Karbowski; Blake Roeber; Nicholas The
Assistant Professional Specialist:
Alexander Jech

Program of Studies. There are two ways to major in philosophy: Regular philosophy majors are required to take eight courses in philosophy beyond the general two-course University requirement. Three specific courses must be included among the eight: a two-semester sequence of courses in the history of philosophy, Ancient and Medieval Philosophy (PHIL 30301) and Modern Philosophy (PHIL 30302), and a course in formal logic (PHIL 30313 or, for qualified students, PHIL 43907; the logic requirement can also be fulfilled by MATH 10130, though this course does not count toward the eight courses required for the major). In addition, regular majors must take at least two courses at the 40xxx level and three electives at either the 30xxx level or 40xxx level.

Honors philosophy majors complete all the requirements for the regular major and in addition write a senior thesis. Students writing the senior thesis enroll in PHIL 48499 Senior Thesis in both semesters of the senior year. For the honors major, and thus for the senior thesis, students must normally maintain a GPA of 3.5 or above in the majors courses. Students considering the senior thesis are strongly encouraged to have completed two of the three core courses (the two history surveys and logic) AND three 40000-level seminars by the end of the junior year.

Students majoring in other departments may take a minor in philosophy by completing the following in addition to the two-course University requirement in Philosophy:

- One 20000-level course (University-required courses; a regular 3-hour seminar).
- One course at the 30000 level or 40000 level; one course at the 40000 level.
- All 40000-level philosophy courses are writing-intensive requiring at least 20 pages of written work, that may take various forms: reflections on readings, class presentations, or shorter or longer research papers. Students planning to go on to graduate studies in philosophy or related disciplines typically write a senior thesis as well.

PHILOSOPHY AND THEOLOGY JOINT MAJOR

Director:
Gabriel Reynolds, Theology
Faculty:
Additional faculty for the joint major are drawn from the departments of philosophy and theology.

Program of Studies. The joint major is intended for undergraduates who are intrigued by philosophical and theological ideas and who have an equal commitment to both disciplines. It seeks to equip such students to handle theology and philosophy adeptly. The major is structured, providing undergraduates with a suitable introduction to the study of both disciplines, but also flexible, granting students considerable scope for the pursuit of their own interests.

The joint major offers the opportunity for an informed investigation of religious and philosophical ideas and should appeal especially to those who intend to pursue graduate work in philosophy or theology.

The joint major incorporates the University requirements in the two departments and most of the formal requirements of the first majors in theology and philosophy. Students in the joint major will take the two-semester sequence in Christian Traditions and an upper-level course in Scripture. The joint major, however, does not require the one-credit preminar in theology.

Other formal requirements are peculiar to the joint major. Students will study a classical language for two semesters. (For practical as well as pedagogical reasons, this will normally be Greek.) Majors will also be expected to take one joint seminar. Led by a theologian and a philosopher, the joint seminars are offered every spring and will examine an issue in which the differing approaches of philosophy and theology may prove fruitful. The topic and instructors will change from year to year. Finally, each major will submit a senior thesis prepared under the direction of two advisors, drawn from each department. At the option of the directors, this thesis may be presented and discussed in an informal colloquium consisting of the other students in the joint major.

The remaining courses in the joint major will be at the discretion of the student. Normally taken at the 40xxx level, there should be an equal distribution in the electives between theology and philosophy. However, students who wish may devote up to six hours within the joint major to additional language work. These hours may add to the classical language previously studied, or used to begin another language of significance for philosophical and theological work.

The joint major differs from a first major in one discipline and a supplementary major in the other in that the latter requires 55 credit hours, whereas the joint major requires 60. Furthermore, the joint major calls for language instruction beyond what the University requires for all undergraduates. Finally, the joint seminars should prove especially challenging, inviting students to explore important topics in an interdisciplinary way. These features should make the joint major particularly attractive to students preparing for advanced study.

Requirements in Philosophy:
PHIL 10100, 10101, 13185, 13195, or 20101, and 20000-level course (University-required courses; a higher-level course may be substituted for the latter).

PHIL 30301 and 30302. History of Philosophy I and II.

PHIL 30313. Formal Logic.
Requirements in Theology:
THEO 10001, 10002, 10003 or 13183 (Foundations) and a 20000 (development level) course (University-required courses).
THEO 40201 and 40202. Christian Traditions I and II.
THEO 40101 or 40108. Upper-division scripture course.

Plus:
Classical language (normally Greek)—two semesters.
Joint seminar(s).
Senior thesis.
18 credit hours of electives (up to six of these may be additional hours in language study).

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/ students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Philosophy. Course descriptions can be found by clicking on the subject code and course number in the search results.

Political Science

Chair:
David Campbell

Director of Graduate Studies:
Matthew Hall

Director of Undergraduate Studies:
Joshua B. Kaplan

Helen Conley Professor of Political Science:
Scott Mainwaring (on leave spring 2016)

Pacey J. Dee Professor Emeritus of Political Science
Fred R. Dallmayr

Pacey J. Dee Professor of Political Science
Dana Villa

Nancy derenzo Dreux Professor of Political Science:
Catherine H. Zuckert

Nancy derenzo Dreux Professor of Political Science:
Michael P. Zuckert

Joseph and Elizabeth Robbie Emeritus Professor of Political Science:
Donald P. Komninos

William M. School Professor of International Affairs:
A. James McAdams

The Rev. Theodore M. Hesburgh, C.S.C., Professor of Peace Studies:
George A. Lopez

David A. Potenziani Memorial Associate Professor of Constitutional Studies:
Patrick Deneen

Professors:
Ruth Abbey; Peri E. Arnold (emeritus); Sotirios A. Barber; George A. Brinkley (emeritus);
David E. Campbell; Michael Coppendge; Fred R. Dallmayr (emeritus); Darren Davis; Michael Desch (on leave 2015–16); Alan K. Dwyer (emeritus); Amitava Dutt; Michael J. Francis (emeritus); Gary Goertz (on leave 2015–16); Vittorio G. Hösle (concurrent); Robert Johansen (emeritus); Geoffrey Layman (on leave 2015–16); David C. Leeege (emeritus); Gilburt D. Loescher (emeritus); Peter R. Woody Jr. (emeritus); Daniel Philpott; Dianne Pinderhughes; Benjamin Radcliff; Patrick Regan (on leave 2015–16); L. John Roos (emeritus); Rev. Timothy R. Scully, C.S.C.; A. Peter Walsh (emeritus)

Associate Professors:
Eileen Hunt Botting (on leave 2015–16); Susan D. Collins (on leave fall 2015); Tanisha Fazal; Andrew C. Gould (on leave fall 2015); Matthew Hall; Victoria Hui (on leave 2015–16); Debra Javeline; Mary Keys (on leave 2015–16); Karrie Koese; Daniel A. Lindley III; Vincent P. Munoz; Ricardo Ramirez; Sebastian Rosato (on leave spring 2016); Guillermo Trejo; Christina Wohlbrect

Assistant Professors:
Jamie Bleck (on leave fall 2015); Rev. Robert Dowd, C.S.C.; Theodore B. Ivanus (emeritus); Rev. Sean McGraw, C.S.C.; Emilia Powell (on leave spring 2016); Ernesto Verdeja; Susanne Wengle; Sarah Zuckerman-Daly

Associate Professional Specialists:
Carolina Arroyo; Joshua B. Kaplan;
Rev. William Lies, C.S.C. (concurrent);
Luc Reydams

Assistant Professional Specialist:
Susan Rosato

Program of Studies. The political science major combines breadth and depth, helping students develop a general foundation for the study of politics and offering opportunities to explore particular areas of interest. Courses give students both a strong knowledge base and facility with the tools of political analysis. The department offers a substantial number of courses in all four fields of the discipline—American politics, international relations, comparative politics, and political theory—covering a range of topics and analytical perspectives. The major can prepare students for a wide variety of vocations. After graduation, many students go to law school or graduate school, or work for service organizations, government, or business.

Requirements. The major requires a minimum of 10 courses:
• four breadth requirements, consisting of a course in each of the four fields of political science: American politics, international relations, comparative politics, and political theory. Two of these must be introductory courses. The other two can be introductory courses or intermediate-level courses.
• four intermediate-level courses: students may specialize in one field or take courses in a combination of fields that suits their interests.
• two seminars. These seminars (POLS 33001/2, 43001/2, or 53001/2) fulfill the Arts and Letters directive that all majors include a writing-intensive requirement.

Senior Thesis. Students with a grade point average of 3.5 or above are encouraged to write a senior thesis. This two-semester project involves working closely with a faculty supervisor, and offers the opportunity to explore more deeply and independently a research project of the student’s choice.

Pi Sigma Alpha. Students who have taken a minimum of four political science courses, with a grade no lower than a B in their political science courses, and who are on the Dean’s List are eligible to join Notre Dame’s chapter of Pi Sigma Alpha, the national honor society for political science majors.

Graduate Courses
Many graduate courses are open to qualified undergraduates by permission.

Departmental Honors in Political Science
The honors track in political science does not involve additional political science courses, but is designed to encourage students to make better use of their courses both within and outside the major, and prepare them for research in their senior year, and advanced study and work after graduation.
To graduate with departmental honors, a student will:

1. take a cluster of four recommended enrichment courses in consultation with their advisor, including:
   a) a dedicated methodology course such as Research Design, Quantitative Political Analysis, or How to Do Political Research;
   b) Principles of Microeconomics and Principles of Macroeconomics. A student would need a compelling reason to offer a substitute for one of these two;
   c) an upper-level course related to the student's senior thesis, such as a graduate course in political science, language proficiency beyond level 3, or another course in the department or in another department chosen in conjunction with the student's advisor.
2. complete a senior thesis with a grade of B+ or higher;
3. graduate with a cumulative grade point average of 3.55 or higher. This number is subject to change from year to year.

For example:

A student primarily interested in American politics or international relations might take 1) Quantitative Political Analysis, Research Design; 2) Principles of Microeconomics; 3) Principles of Macroeconomics; and 4) a graduate political science course or an upper-level history course related to their senior thesis.

A student interested in comparative politics might take 1) Quantitative Political Analysis, Research Design; 2) Principles of Microeconomics; 3) Principles of Macroeconomics; and 4) a graduate course in political science or an upper-level history, sociology, or anthropology course related to their senior thesis, language proficiency above level 3, or a second language.

A student interested in political theory might take 1) Research Design; 2) Principles of Microeconomics; 3) a graduate course in political theory, language proficiency above level 3 or a second language; and 4) an upper-level philosophy or literature course related to their senior thesis.

The key to doing the honors track is meeting with a department advisor each semester to discuss a more careful selection of courses within the major and a better use of electives outside the major that will both complement and supplement your political science courses. The selection of recommended courses will depend in part on your own interests and career goals, so it is important to discuss these with your advisor.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/ students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:

• Constitutional Studies
• Political Science

Course descriptions can be found by clicking on the subject code and course number in the search results.

Program of Liberal Studies

Chair:
Gretchen Reydams-Schils
Rev. John J. Cavanaugh, C.S.C., Professors of Humanities:
Stephen M. Fallon; Michael J. Crowe (emeritus);
Professors:
Rev. Nicholas Ayo, C.S.C. (emeritus); Kent Emery Jr.; G. Felicitas Munzel; Walter J. Niegorski (emeritus); F. Clark Power; Gretchen Reydams-Schils; Phillip R. Sloan (emeritus); M. Katherine Tillman (emeritus); Henry M. Weinfeld
Associate Professors:
Francesca Bordogna; Robert Goulding; Julia Marvin; Pierpaolo Polzonetti; Thomas Stapleford
Assistant Professors:
Christopher Chowrimootoo; Jennifer Newsome Martin; Andrew Radde-Gallwitz; Denis Robichaud
Assistant Professional Specialist:
Joseph Elkanah Rosenberg

Program of Studies. The Program of Liberal Studies, Notre Dame’s Great Books program, offers an integrated three-year sequence of studies leading to the bachelor of arts degree. Students enter the Program at the end of the First Year of Studies.

Fundamental to the Program is a conception of a liberal arts education that aims to avoid the separation of the humanities into isolated disciplines. The Program seeks to provide a unified undergraduate education in all of the liberal arts, including music and the natural sciences. For this reason, the Program is not to be equated with a “general humanities” educational Program. The study of literature, philosophy, natural and social science, theology, history, and the fine arts will take place within a larger unifying conception of the liberal arts that cuts across many of the disciplinary boundaries suggested by these terms. Because the goal of the Program is to provide more than an introduction to various subject matters, none of the tutorials or seminars stands alone in the Program. The curriculum grows organically over the three years, with each course presuming all of its predecessors.

Although the Program provides education in the liberal arts, it also considers the liberal arts in themselves as insufficient for a complete education. The liberal arts are the critical tools of learning, but they are also to be related to the larger search for genuine understanding and philosophic wisdom. Philosophy, which explores the basic questions of epistemology, ethics, and politics, is also related to the claims of the Christian tradition. The Program maintains specific tutorials in the various disciplines to enable the relationships among them to develop systematically and also to foster a concern with what unifies or transcends them.
The normal method of instruction in the Program is through the reading and discussion of primary texts. The student is asked to take an active role in the learning process. Particularly in the seminar, the authors of the great books are considered to be the primary teachers.

The Program requires writing throughout the curriculum, especially in the tutorial classes. In the final year, all students are required to write a senior thesis, usually involving extensive research, under the direction of a faculty advisor. The senior thesis offers students a particularly intensive writing experience and an opportunity to investigate in depth a specialized topic of interest.

Despite the Program's 68-credit curriculum, Program students may carry second majors, supplementary majors, minors, and concentrations, and they may participate in study abroad programs. When necessary, students may satisfy a limited number of Program requirements by taking non-departmental courses with comparable content. Such exemptions are granted only with the permission of the Program's Director of Undergraduate Studies and are subject to strict limitations.

Students normally declare a PLS major by the beginning of April of the first year. Declaration of major forms are available by early March in the department office (215 O'Shaughnessy) and website (pls.nd.edu). Forms are available by early March in the department office (215 O'Shaughnessy) and website (pls.nd.edu). All of the courses associated with this academic program can be found by clicking on the subject code and course title.

**SEQUENCE OF COURSES**

**Sophomore Year**

**First Semester**

- 20201. Literature I: The Lyric Poem  
  20301. Ethical Inquiry  
  23101. Great Books Seminar I  
  Elective

**Second Semester**

- 20302. Bible and Its Interpretation  
  20412. Fundamental Concepts of Natural Science  
  23102. Great Books Seminar II  
  Elective

**Junior Year**

**First Semester**

- 30301. Ethics  
- 30411. Scientific Inquiry: Theories and Practices  
- 30501. Music as a Liberal Art  
- 33101. Great Books Seminar III  
  Elective

**Second Semester**

- 30202. Literature II: Shakespeare and Milton  
- 30302. Political and Constitutional Theory: Ancient and Modern  
- 33102. Great Books Seminar IV  
  Elective

**Senior Year**

**First Semester**

- 40301. Christian Theological Traditions  
- 40601. Intellectual and Cultural History  
- 43101. Great Books Seminar V  
- 48701. Essay Tutorial  
  Elective

**Second Semester**

- 40302. Metaphysics and Epistemology  
- 40412. Science, Society, and the Human Person  
- 43102. Great Books Seminar VI  
- 48702. Essay Tutorial  
  Elective

**Psychology**

**Chair:**

Daniel Lapsley

**Director of Graduate Studies:**

David Watson

**Director of Undergraduate Studies:**

André Venter

**Andrew J. McKenna Professor of Psychology:**

David Watson

**Matthew A. Fitzsimons Professor of Psychology:**

Scott E. Maxwell

**Notre Dame Chair in Psychology:**

E. Mark Cummings

**Warren Foundation Professor of Psychology:**

Scott M. Monroe

**William J. and Dorothy K. O'Neill Professor of Psychology:**

Lee Anna Clark

**Professors:**

- Cindy S. Bergeman; Julia M. Braungart-Rieker; Thomas Burish; Laura Carlson; Lee Anna Clark; E. Mark Cummings; Jeanne D. Day; Bradley S. Gibson; Anita E. Kelly; Daniel K. Lapsley; Scott E. Maxwell; Thomas W. Merluzzi; Scott M. Monroe; Darcia Fe Narvaez; G.A. Radavsky; Anne Simons; David A. Smith; David Watson; Ke-Hai Yuan

**Associate Professors:**

- James Brockmole; Ying (Alison) Cheng; Charles R. Crowell; Kathleen Eberhard; Dawn M. Gondoli; Gerald Haeffel; Gitta Lubke; Nicole McNeil; Kristin Valentino; Lijuan (Peggy) Wang; Lira Soong; Guangjian Zhang

**Assistant Professor:**

Alexandra Corting

**Assistant Professors:**

- Pascal Jean-Pierre; Jill Lany; Laura Miller; Jessica Payne; Michelle Wirth; Zhiyong (Johnny) Zhang

**Professional Specialist:**

André Venter; Mike Villano

**BACHELOR OF ARTS IN PSYCHOLOGY**

**Program of Study.** Psychology is the scientific study of the behavior of organisms with a primary focus on human behavior. It is concerned with the biological and environmental determinants of behavior as reflected in the study of physiological, sensory, perceptual, cognitive, motivational, learning, developmental, aging, and social processes. The undergraduate program seeks a balance between exposure to basic psychological principles and theories and their extension to the applied areas such as child education, counseling, mental retardation, and behavioral deviancy.

The undergraduate courses are intended to meet the needs of students who plan to (1) major in psychology and later attend graduate school in psychology or affiliated fields, (2) major in psychology as part of a general cultural program, (3) obtain training in psychology as a special supplement to their major...
Psychology

interest or (4) use psychology to satisfy social science requirements or electives.

One of the department’s main features is an emphasis on opportunities for close faculty-student involvement in research projects at the undergraduate level. The research specialties in which majors may become involved range from basic research in such areas as psychophysics, human and animal learning, child development, aging, and psycholinguistics; to applied research in a community setting. Students planning to do graduate work in psychology will plan their program in close coordination with their faculty advisors.

**Major Requirements.** All majors are required to take the Introductory Psychology Course (3 credits, in either PSY 10000 for first year students or PSY 20000 for upper-class students). This course serves as a prerequisite or corequisite for the Psychology Major courses. Students who have achieved a 5 on the AP Psychology exam are not required to take the Introductory Psychology course. The specific major requirements are as follows:

**Required Courses:**
9 credit hours—exception: APH2 supplementary majors are not required to take PSY 20010

- PSY 20010. Psychology: Science, Practice & Policy 1
- PSY 30100. Experimental Psychology I: Statistics 4
- PSY 30160. Experimental Psychology II: Research methods 4

**30000 Content Area Courses:**
A minimum of 2 courses (6 credits) from each of the following categories (total of 12 credits minimum)

**Category A**
- PSY 30290. Developmental Psychology 3
- PSY 30220. Adolescent Development
- PSY 30300. Psychology of Personality 3
- PSY 30310. Abnormal Psychology 3
- PSY 30314. Introduction to Clinical Psychology 3
- PSY 30340. Cross Cultural Psychology 3
- PSY 30600. Social Psychology 3
- PSY 30634. Psychology of Peace 3
- PSY 33651. Educational Effectiveness 4
- PSY 33694. Cybercrime and the Law

**Category B**
- PSY 30253. Introduction to Cognitive Development 3
- PSY 30358. Behavioral Medicine 3
- PSY 30400. Cognitive Psychology 3
- PSY 30430. Learning & memory 3
- PSY 30440. Sensation & Perception 3
- PSY 30500. Physiological Psychology 3
- PSY 30501. Introduction to Biopsychology 3
- PSY 30510. Behavioral Genetics 3
- PSY 30520. Introduction to Cognitive Neuroscience 3

**40000 Senior Seminar Courses:**
A minimum of 2 courses (6 credits) from this category. These are small, in-depth discussion-oriented seminars generally in the instructor’s specific area of expertise and the options may vary from semester to semester or year to year. All 40000 level seminars are designated writing-intensive courses, satisfying the College of Arts and Letters writing requirement. (See the introductory portion of the Arts and Letters section.)

**Note:**
- Introductory Psychology does not fulfill any of the 30-credit-hour requirements for the major.
- PSY 27800 Research Lab credits are strongly recommended for any student’s intent on pursuing a graduate career in psychology.
- In some cases students for whom psychology is their second major may complete another statistics course (BAMG 20150; ECON 30330, ACMS 20340 or BOS 40110) in place of the PSY 30100 course. However, these students will be required to complete an additional psychology course (from the 30000 or 40000 level categories) to complete the requisite number of psychology courses to graduate with the major.

**BACHELOR OF ARTS IN NEUROSCIENCE AND BEHAVIOR**

**Director of Undergraduate Studies:** Anette Venter

**Program of Studies.** Neuroscience is a relatively young, exciting, and fundamentally interdisciplinary field devoted to the scientific study of the nervous system. Neuroscience encompasses the study of problems from multiple disciplinary perspectives at different levels of analysis in human and non-human organisms. It includes, for example, the study of molecular mechanisms in individual neurons and the coordination of millions of neurons into neural systems. Problems range from investigation of the evolution of nervous systems in basal vertebrates to the application of neuroscience to education and law. Neuroscientists also seek to develop neurologically plausible models of human thinking, affect and behavior.

Neuroscience creates a context for scholarly conversation about the nature of mind, brain and behavior. It engages experts in collaboration across diverse fields, including biological sciences, chemistry, computer science, engineering, linguistics, mathematics, medicine, philosophy, physics and psychology. Reflecting the interdisciplinary nature of the major, the curriculum includes flexibility such that it can be customized to best prepare students for a variety of future careers. Students planning to do graduate work in psychology will plan their program in close coordination with their faculty advisors.

**Major Requirements.** The general BA in Neuroscience and Behavior consists 94 to 97 credits of required courses (including University: 40 credits; College: 12–15 credits depending on which level language course students place into; and Major requirements: 44–46 credits depending on the number of 3 versus 4 credit required courses elected) leaving a range of free electives (23 to 26) for a total of 120 credits. The specific major requirements are as follows:

**Core Major Requirements:**
14/15 credit hours (depending on which statistics course is completed)

- PSY 10000/20000. Introductory Psychology 3
- PSY 30100. Experimental Psychology I: Statistics (or equivalent) 4
- BIOS 10161. Biological Sciences I & Lab (11161) 4
- BIOS 20450. Neuroscience & Behavior & Lab (21450) 4
- (NOT: BIOS 30338)

**Foundational Science Category:**
One course required (3–5 credits depending on which course is selected)

- PSY 30160. Experimental Psychology II: Research methods 4
- BIOS 10162. Biological Sciences II & Lab (11162) 4
- CHEM 20273. Organic Chemistry II & Lab (21273) 4
- PHYS 30310. Physics I & Lab (11310) 4
- PHYS 20250. Genetics—together with 21250 4–5
- BIOS 20241. Cell Biology 3
- CHEM 40420. Biochemistry 3
- ACMS 20210. Scientific Computing 3.5
- ACMS 20550. Intro to Applied Math Methods 3.5
- MATH 20480 Intro to Dynamical Systems 3
- MATH 20630 Intro to Math Reasoning 3

**Biological Science Elective Category:**
Three courses required (9 credits)

- BIOS 30344. Human Physiology 3
- BIOS 30339. Comparative Neurobiology 3
- BIOS 30407. Animal Behavior 3

PREMED CONCENTRATION

In addition to the general BA undergraduates interested in attending Medical School are offered the option of completing a BA in Neuroscience & Behavior with a Premed concentration. The BA in Neuroscience & Behavior with the Premed Concentration consists 110 to 111 credits of required courses (including University Requirements: 40 credits; College Requirements: 12–15 credits depending on which level language course students place into; and Major Requirements including the Premed courses: 61–62 credits depending on the number of 3 versus 4 credit required courses elected) leaving a range of free electives (10 to 11) for a total of 120 credits. It should be noted that Pre-health (or Premed) students in the College of Arts & Letters typically graduate with approximately 134 credit hours so students completing this concentration do have the opportunity to take additional elective courses. The specific major requirements are as follows:

Core Major Requirements:
14/15 credit hours (depending on which statistics course is completed)

PSY 10000/20000. Introductory Psychology 3
PSY 30100. Experimental Psychology I: Statistics 4
BIOS 10161. Biological Sciences I & Lab (11161) 4
BIOS 20450. Neuroscience & Behavior (Lab) (21450) 4
( NOT BIOS 30338)

Round 1 - draft of 2016-17 Undergraduate Bulletin  
Due to Registrar: Friday, March 4, 2016

Romance Languages and Literatures

Chair:  
Thomas F. Anderson  
Director of Graduate Studies:  
Carlos Jáuregui  
Assistant Chair and Director of Undergraduate Studies:  
Shauna Williams  
Notre Dame Professor of Dante and Italian Studies:  
Zygmun Baranski  

Professors:  
Thomas F. Anderson; Maureen Boulton; Theodore J. Cáhe Jr.; JoAnn DellaNeva (Associate Dean, Arts and Letters); Julia V. Douthwaite; Maria Rosa Olivera-Williams; Dely Seidenspinner-Núñez; Alain Tournay; John P. Wells  

Associate Professors:  
Ben Heller; Carlos Jáuregui; Encarnación Juárez-Almendro; Joshua Lund; Louis MacKenzie; Christian R. Moeve; Marisel C. Moreno; Catherine Perry; Alison Rice; Juan Vitulli  

Assistant Professors:  
Sabrina Ferri; Fr. Gregory Haake; Diana R. Jorza; Vanessa Misere; Vittorio Montemaggi; Olivier Morel  

Associate Professional Specialists and Concurrent Lecturers:  
Alessia Blad; Tatiana Botero- Jáuregui; Maria Coloma; Marie- Christine Escoda-Risto; Giovanna Lenzi-Sandusky; Elena Mangione-Lora; Patrick I. Martín; Paul McDowell; Ivis Menes; Andrea Topash Rios; Sandra Teixeira; Patrick Vivirito; Shauna Williams  

Associate Professional Specialists and Concurrent Lecturers:  
Monica Jancha; Odette Menyward; Rachel Parroqui; Loren Valterza; Ty West  

Program of Studies. The Romance languages derive from Vulgar Latin spoken throughout the Roman Empire. A major course of study is offered in French, Italian, and Spanish. Minors are offered in French, Italian, and Portuguese. The study of foreign languages, literatures, and cultures provides educational opportunities relevant to an increasingly interdependent world. A crucial component of a liberal education, the acquisition of foreign-language skills enhances our powers of communication and serves to introduce us to the enduring cultural achievements of other peoples. Moreover, the study of a foreign language broadens our mental horizons, encourages us to think and act more globally, and stimulates our understanding of the traditions of other nations. Elementary and intermediate courses develop the students’ ability to understand, speak, read, and write a foreign language with facility and confidence.

Upper-division courses present a wealth of literary, historical, and cultural traditions and emphasize the nature and development of national cultures. Many courses focus on the literature and culture of certain historical periods. Others trace the development of literary genres or examine a theme across periods and genres. And still others inculcate the critical and analytical skills necessary for an informed interpretation of foreign language texts. Participation in Notre Dame’s international study programs in Brazil, Chile, France, Italy, Mexico, and Spain (see the International Study Programs section of this Bulletin) is highly recommended although not required to pursue a major in Romance languages and literatures. Majors and supplementary majors in French, Italian, and Spanish must complete 50 percent of their credit hours in the major in residency at Notre Dame and meet the following program requirements. For current information visit the department website: http://romancelanguages.nd.edu/.

Program in French and Francophone Studies

The Major in French and Francophone Studies  
The requirements for a major in French and Francophone Studies consist of successful completion of 30 credit hours or 10 courses above ROFR 20201. Of these 10 courses, no more than three may be at the 20xxx level (20202 and above), six must be in literature/culture studies, and at least half must be taken in residence at Notre Dame. Required among these 10 courses are ROFR 30310 (The Art of Interpretation), ROFR 30710 and ROFR 30720 (French Literature and Culture I & II), at least two courses at the 40xxx level, and the Senior Seminar (ROFR 53000). ROFR 30100 (The Art of Interpretation) is the recommended prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literature and Culture II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l’Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this Bulletin for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Composition: The Art of Writing) is strongly encouraged. AP credit may not be applied to the major.

The Supplementary Major in French and Francophone Studies: Two Tracks  
There are two tracks available for students seeking a supplementary major: The “Language and Literature” track and the “Language and Culture” track.

Language and Literature Track  
Requirements for the “Language and Literature” track consist of successful completion of 24 credit hours or eight courses above ROFR 20202. Of these eight courses, no more than two may be at the 20xxx level (20202 or above), one must be ROFR 206xx or above, and six must be in literature/culture studies, and at least half must be taken in residence at Notre Dame. Required among these eight courses are ROFR 30310 (The Art of Interpretation), ROFR 30710 and ROFR 30720 (French Literature and Culture I & II), and at least two courses at the 40xxx level or above, one of which may be the Senior Seminar (ROFR 53000). ROFR 30100 (The Art of Interpretation) is the recommended prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literature and Culture II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l’Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this Bulletin for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Composition: The Art of Writing) is strongly encouraged. AP credit may not be applied to the major.

Language and Culture Track  
Requirements for the “Language and Culture” track consist of successful completion of 24 credit hours or eight courses above ROFR 20202. Of these eight courses, no more than two may be at the 20xxx level (20202 or above), one must be ROFR 206xx or above, and six must be in language/culture/literature studies, and at least half must be taken in residence at Notre Dame. Required among these eight courses are ROFR 30310 (The Art of Interpretation), ROFR 30710 and ROFR 30720 (French Literature and Culture I & II), and at least two courses at the 40xxx level or above, one of which may be the Senior Seminar (ROFR 53000). ROFR 30100 (The Art of Interpretation) is the recommended prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literature and Culture II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l’Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this Bulletin for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Composition: The Art of Writing) is strongly encouraged. AP credit may not be applied to the major.

To Table of Contents
The Honors Track in French

The honors track major consists of 33 credits or 11 courses. In addition to the general requirements for the major, honors track students must complete an 11th course at the graduate level with a grade of A- or higher, in which they will write a substantive research paper, normally in French, which constitutes the honors thesis. By invitation only, highly motivated students may consider the option of taking a semester-long directed reading tutorial as the 11th course, completing an honors thesis under faculty direction.

French majors are admitted to the honors track by invitation, although qualified students may petition for admission in the second semester of their junior year. To be eligible for the honors track, students must be first majors with a minimum GPA of 3.8 in French and have completed at least seven courses toward the major by the end of their junior year. They must also receive the written support of a professor in one of the required language, culture, or literature courses (ROFR 30310, ROFR 30320, ROFR 30710, ROFR 30720, ROFR 306XX or ROFR 37500). For full consideration, students should contact the Assistant Chair of the Department of Romance Languages and Literatures no later than March 15 of their junior year; applications from eligible seniors will be accepted through October 1.

In order to graduate with honors, students admitted to the honors track should maintain a minimum GPA of 3.7 in French.

Combined B.A./M.A. Program in French

The Department of Romance Languages and Literatures offers its majors in French the opportunity to participate in its graduate program through a combination B.A./M.A. degree in French. This program requires students to take 30 credit hours during the normal four-year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, take the qualifying exam given to all first-year graduate students, and apply to the Graduate School for admission during the Spring semester. B.A./M.A. Students are eligible for a teaching fellowship during their fifth year that includes a tuition waiver and a generous teaching stipend. Well qualified students who are interested in this program should contact the Director of Graduate Studies and/or the graduate coordinator in French at the beginning of their junior year.

Program in Italian Literature and Culture

The undergraduate program in Italian offers a major, a supplementary major, and an honors track major in each of two possible concentrations: (1) Italian literature and culture; (2) Italian Studies. In addition, the program also offers (3) a minor in Italian, as well as the opportunity to focus on Italian through (4) the Romance Languages major or (5) the International Economics major (discussed separately in the Bulletin).

(1) Literature and Culture Concentration

The Major in Italian: Literature and Culture Concentration

The major in Italian with a concentration in literature and culture requires 30 credits or 10 courses at the 20000 level or above, including no more than two 20000-level courses (ROIT 20215 counts as two courses for the major), ROIT 30711 (Medieval-Renaissance Italian Literature and Culture), ROIT 30721 (Modern Italian Literature and Culture), ROIT 53000 (Italian Seminar), and a minimum of five elective ROIT courses in Italian literature or culture at the 30000 or 40000 level or above. ROIT 30310 (Passage to Italy) is recommended for all majors. A maximum of two of these elective ROIT courses may be conducted in English or with texts in translation, or may be substituted by courses on Italian subjects originating in other disciplines or departments (for example, architecture, art history, music, or history). Equivalent Italian language, literature, or culture courses from foreign study programs or other universities may be substituted for any of the courses by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Supplementary Major in Italian: Literature and Culture Concentration

Supplementary majors in Italian with a concentration in literature and culture are expected to demonstrate competency in the language and to complete 24 credits or eight courses at the 20xxx level or above, including no more than two 20xxx-level courses (ROIT 20215 counts as two courses for the supplementary major), ROIT 30711 (Medieval-Renaissance Italian Literature and Culture), ROIT 30721 (Modern Italian Literature and Culture), ROIT 53000 (Italian Seminar), and a minimum of three elective ROIT courses in Italian literature or culture at the 30xxx or 40xxx level or above. ROIT 30310 (Passage to Italy) is recommended for all supplementary majors. A maximum of two of these elective ROIT courses may be conducted in English or with texts in translation, or may be substituted by courses on Italian subjects originating in other disciplines or departments (for example, architecture, art history, music, or history). Equivalent Italian language, literature, or culture courses from foreign study programs or other universities may be substituted for any of the courses by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Honors Track Major in Italian: Literature and Culture Concentration

The honors track major in Italian with a concentration in literature and culture consists of 33 credits or 11 courses, including all the requirements for the major, a GPA in the major of at least 3.7, plus a substantial final essay, to be written in Italian for a graduate course or for ROIT 58000, Honors Thesis Direction, which will constitute the 11th course. No students will be accepted to the honors track after October 1 of their senior year.

(2) Italian Studies Concentration

The Major in Italian: Italian Studies Concentration

The major in Italian with a concentration in Italian Studies requires 30 credits or 10 courses at the 20000 level or above, to be chosen as follows: Five courses must be ROIT courses in Italian language, literature, and culture and taught in Italian, including at least one of ROIT 30711 (Medieval-Renaissance Italian Literature and Culture) or ROIT 30721 (Modern Italian Literature and Culture), and one course at the 40000 level or above; ROIT 41590 (Italian Theatre Workshop) does not count toward this major. No more than two of these five courses may be at the 20000 level (ROIT 20215 counts as two courses for the major). The other five courses must be on Italian subjects or strictly relevant to Italian culture, and together they must not be drawn from more than three disciplines or departments, such as history, art history, classics, FTT, music, or political science (the courses may of course be listed under ROIT). Four of these five courses must be at the 30000 level or above, and include at least one course at the 40000 level or above; no more than one of the five may be at the 20000 level. In order to create a coherent program, the selection of courses must be approved by the student’s ROIT adviser (or committee, if appropriate). Equivalent courses from foreign study programs or other universities may be substituted by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Supplementary Major in Italian: Italian Studies Concentration

The supplementary major in Italian with a concentration in Italian Studies requires 24 credits or eight courses at the 20000 level or above, to be chosen as follows: Four courses must be ROIT courses in Italian language, literature, and culture and taught in Italian, including no more than two courses at the 20000 level; ROIT 41590, Italian Theatre Workshop, does not count toward this supplementary major. The other four courses must be on Italian subjects or strictly relevant to Italian culture, and must not be drawn from more than three disciplines or departments, such as history, art history, classics, FTT, music, or political science (the courses may of course be listed under ROIT). Three of these four courses must be at the 30000 level or above; no more than one may be at the 20000 level. In order to create a coherent program, the selection of courses must be approved by the student’s ROIT adviser (or committee, if appropriate). Equivalent courses from study abroad programs or other universities may be substituted by permission. Fifty percent of the credits for the major must be taken.
in residence at Notre Dame. AP credit may not be applied toward the major.

The Honors Track Major in Italian: Italian Studies Concentration

The honors track major with a concentration in Italian Studies consists of 33 credits or 11 courses, including all the requirements for the major in Italian with a concentration in Italian Studies, a GPA in the major of at least 3.7, plus a substantial final essay, to be written for a graduate course or for ROIT 58000, Honors Thesis Direction, which will constitute the 11th course. The course or topic will be selected in consultation with the student’s advisory committee for the major. No students will be accepted to the honors track after October 1 of their senior year.

(3) The Minor in Italian

The minor in Italian comprises 15 credits or five courses at the 20000 level or above, including at least three courses at the 30000 or 40000 level. Three of the five courses must be ROIT courses in Italian literature, language, and culture, and taught in Italian; the fourth and fifth courses may be on Italian literature and culture taught in English or with texts in translation, or may be courses on Italian subjects originating in other disciplines or departments (for example, LLRO, art history, architecture, or history). Courses from study abroad programs or other universities may be substituted by permission, but at least two courses for the Italian minor must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

PROGRAM IN IBERIAN AND LATIN AMERICAN STUDIES

All majors and supplementary majors in Spanish are required to take a core sequence consisting of ROSP 30310 (Introduction to Hispanic Literature and Culture) and one course each in three of the four following areas of Spanish and Spanish American Literature: Early Peninsular, Modern Peninsular, Early Spanish American and Modern Spanish American. AP credit may not be applied toward the major.

The Major in Spanish

The major in Spanish requires 30 credits or 10 courses 20202 and above, including the required core sequence described above, two senior-level courses, and the Senior Seminar. Equivalent literature and culture courses from international study abroad programs or other universities may be substituted with departmental approval. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

Students are allowed to take one related course in English outside of the Department of Romance Languages and Literatures (for example, Colonial Latin American History, taken in the History Department) and one course in Spanish outside of the discipline of literature and culture (for example, a theology course taken in Spanish in a study abroad program), with the approval of their advisor and the Undergraduate Coordinator, and with notification of the Assistant Chair.

The Supplementary Major in Spanish

Supplementary majors in Spanish are required to complete 24 hours or eight courses 20202 and above, including the required core sequence described above and one senior-level course. Equivalent literature and culture courses from international study abroad programs or other universities may be substituted with departmental approval. Fifty percent of the credits for the supplementary major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

Students are allowed to take one related course in English outside of the Department of Romance Languages and Literatures (for example, Colonial Latin American History, taken in the History Department) and one course in Spanish outside of the discipline of literature and culture (for example, a theology course taken in Spanish in a study abroad program), with the approval of their advisor and the Undergraduate Coordinator, and with notification of the Assistant Chair.

The Honors Track Major in Spanish

The honors track major consists of 33 credits or 11 courses. In addition to the general requirements for the major, honors track students must complete an 11th course at the graduate level and must receive a grade of A- or higher to graduate with honors, in which they will write a substantive research paper. By invitation only, highly motivated students may consider the option of taking a semester-long directed reading tutorial as the 11th course, completing an honors thesis under faculty direction.

Spanish majors are admitted to the honors track by invitation, although qualified students may petition for admission in the second semester of their junior year. To be eligible for the honors track, students must be first majors with a minimum GPA of 3.7 and at least seven courses toward the major. For full consideration, students should contact the Undergraduate Coordinator no later than March 15 of their junior year; applications from eligible seniors will be accepted through October 1.

The Combined B.A./M.A. Program in Spanish

The Department of Romance Languages and Literatures offers its majors in Spanish the opportunity to participate in its graduate program through a combination B.A./M.A. degree in Spanish. This accelerated program requires students to take 30 credit hours 20202 and above during the normal four-year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, applying to the Graduate School for admission during the spring semester. During their fifth year, B.A./M.A. students are eligible for a teaching fellowship, which includes a tuition waiver and a generous teaching stipend. Students should have a strong academic record and should have made substantial progress toward their Spanish major by the second semester of their junior year. It is imperative that students interested in this program contact the director of Graduate Studies and/or the graduate coordinator in Spanish at the beginning of their junior year.

MAJOR IN ROMANCE LANGUAGES AND LITERATURES

The undergraduate major in Romance Languages and Literatures is designed for qualified students who wish to major in two programs (French, Italian, or Spanish). Cross-cultural in focus, the major recognizes the importance of studying the correspondences and differences among various Romance literatures and cultures and of reexamining traditional disciplinary boundaries. The requirements for a major in Romance languages and literatures include competency in two languages and successful completion of 36 credit hours or 12 courses, which must be distributed equally between the two respective language programs as follows:
(1) Two survey courses in each language and literature program (French or Italian); Spanish requires either four area courses (two in Peninsular and two in Latin American) or a combination of two area courses and two senior-level courses in the other areas;
(2) 30310 in one program;
(3) Two 40xxx-level courses in each program (if the area requirement in Spanish is fulfilled with two senior-level courses, these courses may count for the senior-level requirement in Spanish);
(4) One Senior Seminar (530000) in one program;
(5) Two elective courses at the 20020 or above level, one in each program (any exception requires permission).

The Honors Track in Romance Languages and Literatures
To be eligible for the honors track, students in Romance Languages and Literatures must be first majors with a minimum GPA of 3.7 in the major, and will have completed at least eight courses toward the major. It is strongly recommended that students take at least one 400-level class in the major at Notre Dame by the end of their junior year. In addition to the general requirements for the major, honors track students will maintain a 3.7 GPA in the major through graduation and complete one graduate-level course in one of the Romance languages with a grade of A- or higher. Highly motivated students who have already been accepted to the honors track may be invited to complete an honors thesis in lieu of taking the graduate course. The honors thesis option must be carried out under the direction of a department faculty member, in the area of specialization. Students will identify the professor with whom he or she intends to work, obtain approval of the topic, and submit application materials by March 15th of the junior year to the Director of Undergraduate Studies. Students are also encouraged to take at least one course that addresses cultural or literary theoretical questions and readings; this course may be a 40000-level course offered in the Department of Romance Languages, or a similar course in a related field (English, gender studies, FTT, philosophy, sociology, etc.). Romance languages and literatures majors are admitted to the honors track by invitation, although qualified students may petition for admission in the second semester of their junior year. For full consideration, students should contact the advisor for the romance languages and literatures major no later than March 15 of their junior year. Applications for eligible seniors will be accepted through October 1st.

Placement in Language Courses
For French and Spanish, there is an online placement exam for students who have not already demonstrated language proficiency through national standardized testing, such as the AP or Achievement tests. Students with previous experience are required to take one of these tests before enrolling in their first course in those languages. For Italian or Portuguese placement, please contact the department. The normal prerequisite for a 30xxx-level course is at least one 20020 or above level course or permission of the instructor. The normal prerequisite for a 40xxx-level course is at least one 300xx-level course or permission of the instructor.

Policy Regarding Romance Language Placement Examination
The placement examination is designed to place each student at an appropriate level within a language sequence. Obtain placement examination information from the Department of Romance Languages and Literatures.

MAJOR IN INTERNATIONAL ECONOMICS & ROMANCE LANGUAGES
The undergraduate major in International Economics is a collaborative effort between the Department of Economics and the Department of Romance Languages and Literatures. In pursuing this major, students take a minimum of eight economics courses and seven to ten intermediate and advanced courses in French, Italian or Spanish, including at least four courses with a cultural, economic and/or historical emphasis. Students are also required to enroll in one or more courses with a cultural, economic and/or historical emphasis. Students are also required to enroll in a one-credit course "Exploring International Economics" designed to foster the integration of the study of culture with the study of economics. Students must also complete a senior research project or equivalent designed to integrate their economic and language and culture study. The senior research project is intended to provide an experience that integrates the analytical aspects of economics with the linguistic and cultural aspects of a romance language.

Students must satisfy a mathematics requirement of Calculus I and II and successfully complete ECON 10010/20010; ECON 1020/2020; ECON 30010; ECON 30020; ECON 30330; ECON 30331; and either ECON 40700 and ECON 40800, or ECON 40710 and ECON 40720 or other international economics courses as approved by the Director of Undergraduate Studies. In addition, students must complete at least one fourth semester or above language and culture course (ROXX 20020 or above); "Exploring International Economics" (briefly described above); one introduction to literature and culture course (ROXX 30310); two 30000 level courses including literature survey courses (ROXX 30710, 30720, and/or ROSP 30810, ROSP 30820) or equivalent, and/or culture courses ROFR 306XX or ROSP 37500 or ROSP 37715, ROSP 37815 or ROSP 37825; at least two courses at the 40000 level (one may be taught in English); and the Senior Research Project (LLRO 48100).

Through the major, the collaborating departments seek to blend two programs of study to ensure that students will achieve advanced linguistic and cultural competency in a foreign language as well as excellent preparation in Economics. The balance of economics with languages and culture courses should attract motivated students and inspire them to undertake a challenging course of study that will prepare them for postgraduate studies and or professional career opportunities in the international arena. International Economics majors will learn how aesthetic and cultural categories and value judgments are shaped by economic trends and political conditions and how political conditions and economic trends are influenced by aesthetic and cultural trends.

COURSE DESCRIPTIONS
All of the courses associated with these academic programs can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:

- Romance Languages & Literature
- French
- Italian
- Portuguese
- Spanish

Course descriptions can be found by clicking on the subject code and course number in the search results.

**Adjunct Instructor:**
Russell S. Faeges

**Adjunct Assistant Professor:**
Mim Thomas

**Director of Undergraduate Studies:**
Ann R. Power

**Associate Professional Specialist:**
Ann R. Power

**Program of Studies.** The Department of Sociology has a national reputation. Its scope of interest is worldwide, yet it also is intensely concerned with the U.S. cultural and social experience and its problems.

The requirements for a sociology major reflect a program that offers both structure and flexibility. The program is designed to acquaint the student with the core of the discipline and with areas of specialization that can be studied in some depth.

Sociology deals with human interaction on the group level wherever it may occur: in family and business, law and politics, medicine and religion, and a host of other settings. What can you do with a sociology degree? With its focus on developing both critical analysis and technology-driven research skills, a sociological background will help you prepare for work in almost any field. Notre Dame's sociology alumni enter fields as diverse as business, law, medicine, health care administration, politics, religious ministries, research institutes, social work, teaching, and academia.

The requirements for the sociology major are as follows.

(a) Students must take a minimum of 31 credit hours (usually 10 courses and the proseminar which is one credit) offered by the department. Students are urged to start their major as early as possible but may declare a major or change majors at any time as long as they are able to fulfill the requirements.

(b) Central to the requirements for the major are the following four courses:
- **SOC 30900. Foundations of Sociological Theory**
- **SOC 30902. Methods of Sociological Research**
- **SOC 30903. Statistics for Sociological Research**
- **SOC 33090. Proseminar (1 credit)**

The above required courses should be taken as soon as possible, especially before taking any 4xxxx-level courses.

(c) Each major must take a minimum of three 4xxxx-level lecture, seminar or research courses. Internships (SOC 45000) and Directed Readings in Sociology (SOC 46000) do not fulfill this requirement.

(d) Each major must also acquire at least 12 credits of sociology elective courses, usually consisting of four 3-credit courses. These courses may be at any level, 10xxx–4xxxx.

The department prides itself on its program of close personal advising, in which each major can build a program of courses with the help of a faculty advisor and undergraduate director. Advisors willingly give much time to aid students in planning their course schedules and careers. Each major is assigned to a faculty advisor whose own academic interests dovetail with those of the student. Each student, working closely with a faculty advisor, can map out a personalized program of study that will satisfy the department's requirements for the major and simultaneously accommodate the student's academic interests and career aspirations.

The sociology major combines well with many majors. More recent graduates have also majored in business; pre-medical studies; psychology; political science; economics; film, television and theatre; or a foreign language. Students have also easily combined their sociology major with a minor in education, schooling, and society; international peace studies; Hesburgh Program in Public Policy; Latino studies; or business economics. It is important to note that students in another college who wish to major in sociology in addition to their first major do **not** have to meet all the other requirements of the College of Arts and Letters but rather just those of their first major's college.

The department has an active Epsilon Chapter of Alpha Kappa Delta, the international sociology honor society. Students interested in the qualifications for nomination are encouraged to contact the director of undergraduate studies (Room 823 Flanner Hall) at any time.

The department also encourages students to join the University of Notre Dame Sociology Club. The purpose of this club is to enrich the sociology major. This student organization sponsors activities oriented to careers in sociology and sociology-oriented topics, as well as purely social activities. Majors and non-majors are welcome to join.

**Sociology Undergraduate Honors Track.** The Sociology Department offers an honors track to students who excel in their sociological studies. Students must have taken at least one introductory course in sociology and be recommended by a faculty member or initiate the process by contacting the director of undergraduate studies. In addition to the usual requirements of the sociology major, students in the honors track are required to take at least one graduate-level course in sociology once they have completed the required 30xxx-level courses. When appropriate, a student may be given permission to take the graduate-level statistics sequence rather than beginning with the undergraduate statistics course (SOC 30903). In their senior year, students in the sociology honors track are required to enroll in the Senior Thesis Capstone Project (SOC 48009) for at least one semester and, under faculty mentors, carry out independent research projects. Students complete a senior thesis based on this research and submit their manuscripts to a journal for publication. Participants are also required to submit an abstract of their paper to at least one regional sociology conference during their junior or senior year. Continuation in the honors track is subject to periodic review.

**Writing in Sociology.** The College of Arts and Letters is proud of the level of writing its undergraduates achieve. One way in which the college supports students’ writing development is by requiring each department to offer at least one writing-intensive course. **SOC 30900. Foundations of Sociological Theory,** is the Sociology Department’s writing-intensive course. There, students reflect on the quality of their own and others’ writing and learn to articulate a sociological perspective in writing. Instructors in this course may spend more time doing textual analyses, going over students’ writing, holding in-class writing workshops, and giving opportunities to do re-writes than in other courses. The department’s 4xxxx-level courses also demand high-level writing within a sociological perspective. In addition, students may opt to develop their research and writing skills by undertaking a senior thesis.
Course Listings by Area of Research Focus. The following is a list of courses offered by the Sociology Department, organized by research focus. Students are encouraged (but not required) to choose at least one area of focus in the major in order to deepen their knowledge of that area. Students are also encouraged to pursue research opportunities within their area of interest.

GENERAL INTRODUCTIONS TO SOCIOLOGY
10002/20002. Understanding Societies
10033/20033. Introduction to Social Problems
10722/20722. Introduction to Social Psychology
23011. Selflessness and Selfishness

REQUIRED COURSES FOR SOCIOLOGY MAJORS
30900. Foundations of Sociological Theory
30902. Methods of Sociological Research
30903. Statistics for Sociological Research
33090. Sociology Proseminar

INDIVIDUAL WORK WITH FACULTY/ SUPERVISOR
41800. Senior Thesis Workshop
45000. Sociology Internship
46000. Directed Readings in Sociology
48000. Directed Research in Sociology
48009. Senior Thesis Capstone Project

CLASS, GENDER, RACE, ETHNICITY
20810. Gender Roles and Violence in Society
20838. Social Inequality
20870. Inner City America: Decoding “The Wire”
30806. Race and Ethnicity: Constructing Identity and Difference
30838. Poverty, Inequality, and Social Stratification
30946. Today’s Gender Roles
43839. Unequal America

CRIMINOLOGY, DEVIANCE, AND SOCIAL CONTROL
20732. Introduction to Criminology
33750. Sociology of Violence
34704. Law, Society and Criminal Justice in the U.S.
43730. Crime and Deviance in Ideological Perspective
43732. Controversies and Crises in Modern Criminology

CULTURE/MEDIA
20100. Introduction to Cultural Sociology
23195. Media, Technology, and the Good Life
30109. Sociology of Culture
33191. Consumer Culture and the Cultures of Consumption
33199. Social Networks
40001. Time and Society
43101. Telling About Society: Media, Representation, and the Sociology of Knowledge
43110. Sociology of Media, Technology, and Society
43113. Cultural Sociology
43162. The Aesthetics of Latino Culture
43165. Art in Everyday Life
43171. Materializations of America

43197. Culture, Morality and Society

DEMOGRAPHY/MEDICAL
20410. Health, Medicine, and Society
43402. Population Dynamics
43471. Social Aspects of Mental Health

ECONOMICS, POLITICAL DEVELOPMENT
20501. Globalization and Social Movements
20502. Today's Organizations
20533. Responding to World Crisis
20541. Sociology of War and Terror
20550. Development and Human Well-being
30505. Aid and Violence
30514. Social Movements
30518. Sociology of Money
30581. Racism and Activism: From Civil Rights to Tea Parties
33501. Political Protest in a Globalizing World
40505. Globalization and Its Discontents: Ethical Perspectives on Economy, Conflict, and Human Values
40604. When Tolerance is Not Enough
40606. Religion and Democracy in Comparative Perspective: Islam, Judaism, Christianity
40607. Religion, Civil Disobedience and Non-violent Resistance
43510. Governance and Africa
43513. Sociology of Development
43524. Employment in a Changing Economy
43527. Social Network Analysis
43553. Building Democratic Institutions
43555. Comparing European Societies
43563. Nationalism and Globalization
43578. Chile in Comparative Perspective
43579. Social Organization of Secrecy and Deception
43590. Sociology of Economic Life

EDUCATION
20228. Social Inequality and American Education
20260. Religion and Schooling in American Society
30235. Sociology of Education
43228. Controversies in Education
43240. Research on School Effects
43261. Racial/Ethnic Educational Inequality
43290. Education Policy in a Reform & Data-Driven World

FAMILY
20342. Marriage and Family
43377. Family, Gender, and Employment

LATINO STUDIES
20479. Introduction to Latinos in American Society
23470. Making Latinos: Race, Identity, and Immigration in the U.S.
30048. Latinos and the City
33458. Mexico-U.S. Border Immersion Seminar
43016. Visual Sociology: Exploring Society Photographically
43162. The Aesthetics of Latino Art and Cultural Expression
43404. International Migration: Mexico and the United States
43479. International Migration and Human Rights

RELIGION
20610. Sociology of Religion
20683. Religion, Gender, and Family
30408. Religion in International & Global Relations
30600. Peace vs. Justice: What is Just Peace?
30602. Jerusalem: Peace or Apocalypse?
30605. Religion, Nationalism and Peace
30671. Catholicism in Contemporary America
30672. Religion and Social Life
30675. Religion, Modernity, Secularization, Religious Persistence
34600. Society and Spirit: Religion in Classical Social Thought
34652. God, Country and Community: Religion and Public Life in America
43662. Religion and American Society
43691. Religion and Social Activism

SOCIAL PSYCHOLOGY
10722. Introduction to Social Psychology
20722. Introduction to Social Psychology
33001. Society, Self, and Catholic Social Tradition
34713. Socialization and the Life Course
34719. Self, Society, and the Environment
43774. Society and Identity

THEORY/METHODOLOGY
23951. Foundations of International Research Design
30952. International Research Design
35900. Sociology Research Apprenticeship
34901. Power and Identity in Modern Society
43991. Sociology Research Practicum

SUMMER ONLY
30019. Sociology of Sport

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/ students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Sociology. Course descriptions can be found by clicking on the subject code and course number in the search results.

Graduate Courses. Senior honors track majors may take any graduate course with the permission of the instructor and the Director of Undergraduate Studies.

THE THEOLOGY PROGRAM
UNIVERSITY OF NOTRE DAME

At the University of Notre Dame, the study of theology is carried out in the spirit of the classic formulation of theology as “Faith seeking understanding.” The Theology Department dedicates itself to critical reflection on the historic faith of Catholic Christianity in service to our students, to the larger church, to the world of the academy, and to the general public.

Why major in theology?

When the former British prime minister Tony Blair was asked what effect his embrace of Christian faith at the University of Oxford had on him, he commented simply, “I began to make sense of the faith at the University of Oxford had on him, he commented simply, ‘I began to make sense of the world.’ A major in Theology at Notre Dame will challenge you to do just that.

Our majors encounter head-on the great questions of life: Where is the God of justice? What is truth? Our majors combine日正式的 and supplementary majors take 25 hours. Including the University requirements, the supplementary majors take 25 hours. Each of these majors combines formally required courses and electives. The two University requirements (6 credits) are prerequisites for upper-level courses. All courses in the theology major, primary or supplementary, must be 3-credit courses and graded (with the exception of the proseminar).

SUMMARY OF THE PRIMARY MAJOR:

First University requirement (Foundations of Theology): THEO 10001 (first-year) or 10002 (sophomore, junior, senior) or 15183 (University seminar) or 13002 (honors). Second University requirement (a “development of theology” course): a THEO course listed between 20101 and 29999.

THEO 40201 and 40202—Christian Traditions I and II

THEO 40101 and 40108—Old Testament and New Testament

Electives (15 hours at the upper level; up to 6 may be courses in a classical language)

THEO 43001—Proseminar (1 credit)

Including the University requirements, the primary major thus consists of 34 credit hours.

SUMMARY OF THE SUPPLEMENTARY MAJOR:

First University requirement (Foundations of Theology): THEO 10001 (first-year) or 10002 (sophomore, junior, senior) or 15183 (University seminar) or 13002 (honors).

Second University requirement (a “development of theology” course): a THEO course listed between 20101 and 29999.

THEO 40201 and 40202—Christian Traditions I and II

THEO 40101 or 40108—Old Testament or New Testament

Electives (9 hours at the upper level; up to 6 may be courses in a classical language)

THEO 43001—Proseminar (1 credit)

Including the University requirements, the supplementary major thus consists of 25 credit hours.
**Theology**

**WHAT OTHER PROGRAMS ARE OFFERED?**

**The Theology Honors Thesis**
The Theology Department offers a special program for particularly gifted undergraduate majors who seek a deeper, more sustained experience in the major through the completion of a thesis project. Each spring semester, the junior class of theology majors will be invited to apply; those selected will be assigned a thesis director from among the faculty of the department. A minimum grade point average of 3.67 within the major is normally expected. Seniors in the Honors Program will enroll in a one-credit Honors Colloquium as well as a one-credit honors research course in the fall semester, and a three-credit Honors Thesis Writing course in the spring semester, culminating in the submission of a 40–55-page thesis. The Honors Program will normally consist of 36 hours, as compared to 31 hours in the regular primary major. To receive the honors designation on their transcript, students must earn an A– or higher grade on their thesis. A full description of the Theology Honors Program is available on the departmental website (see below for address).

**The Minor in Theology**
The minor is recognized by the University on the student’s transcript. To fulfill requirements for a minor, a student must take 12 credit hours beyond the required 6 hours (for a total of 18 hours). The additional 12 hours must be composed of 3-credit graded courses, which can be taken at the 20xxx or 40xxx level. The minor in theology is accepted by many parochial schools as adequate preparation for secondary school teaching.

**Contact information**

Notre Dame, IN 46556-5601

**PHILOSOPHY AND THEOLOGY JOINT MAJOR**

**Director:**
Director of Undergraduate Studies, Theology

**Faculty:**
Additional faculty for the joint major are drawn from the Departments of Philosophy and Theology.

**Program of Studies.** The joint major is intended for undergraduates who are intrigued by philosophical and theological ideas and who have an equal commitment to both disciplines. It seeks to equip such students to handle theology and philosophy adeptly. The major is structured, providing undergraduates with a suitable introduction to the study of both disciplines, but also flexible, granting students considerable scope for the pursuit of their own interests.

The joint major offers the opportunity for an informed investigation of religious and philosophical ideas and should appeal especially to those who intend to pursue graduate work in philosophy or theology.

The joint major incorporates the University requirements in the two departments and most of the formal requirements of the first majors in theology and philosophy. Students in the joint major will take the two-semester sequence in Christian Traditions and an upper-level course in Scripture. The joint major, however, does not require the one-credit proseminar in theology.

Other formal requirements are peculiar to the joint major. Students will study a classical language for the major, however, does not require the one-credit proseminar in theology. Majors will also be expected to take on one occasion the joint seminar (offered each spring). Each seminar, led by a theologian and a philosopher, will examine an issue in which the differing approaches of philosophy and theology may prove fruitful. The topic and instructors will change from year to year. Finally, each major will submit a senior thesis prepared under the direction of two advisors, drawn from each department. At the option of the directors, this thesis may be presented and discussed in an informal colloquium consisting of the other students in the joint major.

The remaining courses in the joint major will be at the discretion of the student. Normally taken at the 40xxx level, there should be an equal distribution in the electives between theology and philosophy. However, students may devote up to six hours within the joint major to additional language work. These hours may add to the classical language previously studied, or used to begin another language of significance for philosophical and theological work.

The distinctive features of the joint major should make the program particularly attractive to students preparing for advanced study.

**Requirements in Philosophy:**
PHIL 10101 or 20201, and 20xxx-level course (University-required courses; a higher-level course may be substituted for the latter).
PHIL 30301 and 30302. History of Philosophy I and II.
PHIL 30313. Formal Logic.

**Requirements in Theology:**
THEO 10001 or 10002 and 20xxx-level course (University-required courses).
THEO 40201 and 40202. Christian Traditions I and II.
THEO 40101 or 40108. Upper-division scripture course.

Plus:
Classical language (normally Greek or Latin)—two semesters.
Joint seminar.
Senior thesis.
18 credit hours of electives (up to six of these may be additional hours in language study).

**COURSE DESCRIPTIONS**
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting Theology:

Course descriptions can be found by clicking on the subject code and course number in the search results.

To Table of Contents
Supplementary Majors, Minors, and Special Programs

A supplementary major is one that cannot stand alone in qualifying a student for an undergraduate degree but must be taken in conjunction with a major. Several departments offer both majors and supplementary majors. They have been described above. Included below are interdisciplinary nondepartmental supplementary majors and minors.

LIU INSTITUTE FOR ASIA AND ASIAN STUDIES

Director: Nelson Mark
Executive Director: Jonathan Noble
Program Coordinator: Inez Suhardjo

The program in Asian Studies introduces students to the complexity of the continent of Asia. Students select courses in a wide variety of fields, such as anthropology, East Asian languages and cultures, economics, film, television, and theatre, history, political science, and psychology. The Liu Institute for Asia and Asian Studies also provides enriching activities such as lectures, films, gatherings, and grant opportunities to students interested in Asia.

Students with the supplementary major or the minor in Asian Studies will be very desirable employees of international business or accounting firms, nongovernmental organizations, and service organizations. They will be well prepared for graduate school in a discipline, or for professional school such as law or business. The supplementary major and the minor in Asian Studies provide recognition of students’ training in this significant region of the world.

THE SUPPLEMENTARY MAJOR IN ASIAN STUDIES

The supplementary major in Asian Studies emphasizes the study of Asia as an integral part of the world today. Students study both its history and current aspects of culture, society, politics, literature, language, religion, etc. Required classes stress an interdisciplinary perspective through cross-listed classes found throughout Notre Dame.

Through the interdisciplinary nature of the major, classes draw from a broad range of topics, enabling the student to come away with a holistic and comprehensive study of Asia, including both humanistic and social scientific approaches to study.

Requirements for the Supplementary Major:

Asia-related courses from each of the following disciplines: (Total of 24 credit hours)

• One history: one class in ancient, early, or modern history (3 credit hours)
• One literature/culture (East Asian Languages and Cultures, English) (3 credit hours)

• One social science (anthropology, economics, political science, psychology, or sociology) (3 credit hours)
• One humanities (theology or philosophy) OR an additional literature/culture (3 credit hours)
• Three general electives (can include up to 6 credit hours of language) (9 credit hours)
• One upper-level course taken during the senior year that culminates in a capstone essay (3 credit hours)

THE GLYNN FAMILY HONORS PROGRAM

Directors: Paul Weithman; Christopher Kolda

In the fall semester of 1983, the University inaugurated an honors program for a small number of outstanding students in the College of Arts and Letters and the College of Science. A limited number of students with academic intents for each college are identified for this program at the time of admission. Although selection criteria include the promise of outstanding academic performance as demonstrated by standardized test scores and high school performance, the program is looking for more that mere academic ability. It hopes to identify students with a deep intellectual curiosity.

The program offers honors sections to fulfill most of the University and college requirements in the students’ freshman and sophomore years. At present, there is the yearlong Honors Seminar (satisfying the writing and literature requirements), Honors Calculus, Honors Philosophy, Honors Theology, Honors Biology, Honors Physics, and an array of Honors Social Science courses. Since these courses are restricted to honors students, they are smaller than non-honors sections and are usually taught in a seminar format. The instructors for honors sections are chosen from the most outstanding faculty in each college. After the first year, students’ academic work will be mainly centered in their major field (or fields) of study, but two or more honors electives are also taken during these years. In the fall of the senior year, there is an “Honors Thesis/Research Seminar,” which is followed by the “Moral Problems Seminar” in the spring. The fall seminar is intended to be a spur to the students’ capstone project, whereas the spring seminar brings the honors students from diverse majors back together for some concluding topical discussions. At the end of senior year, students in the Glynn Program are also expected to submit a research project which reflects at least two semesters’ work under the guidance of a faculty advisor. In science, this is the culmination of a research project that is begun earlier, and in arts and letters, it is a two-semester project culminating in a thesis. Those writing senior theses work individually under the direction of a faculty advisor of their choosing in their major field. Funds are available for research projects during summers either at Notre Dame or other universities.

In addition to the more narrowly academic features of the honors program, students will be offered various opportunities for broadening personal, cultural and spiritual growth. Regular colloquia, informal discussions and cultural excursions are available.

Further information on the structure and content of the honors program or on the criteria for admission may be obtained by contacting Prof. Paul Weithman or Prof. Christopher Kolda, 309 O’Shaughnessy Hall, Notre Dame, IN 46556, 574-631-5398.

ARTS AND LETTERS PRE-HEALTH STUDIES

Director: Vicki Tounayan
Assistant Dean
College of Arts and Letters

Students in the Arts and Letters Pre-Health Program are required to complete an arts and letters primary major in addition to the pre-health profession supplementary major. The APH2 program provides students who intend to pursue a career in medicine or other health profession with an opportunity to complete a major in the College of Arts and Letters while building a firm foundation in the basics of science. Most students elect the APH2 program because they wish to go on to medical or dental school; there are, however, students who intend to pursue other health-related careers or simply prefer the integration of science classes into the arts and letters curriculum. Medical schools encourage prospective applicants to seek a broad, liberal arts education, which enables them to develop skills that will be useful throughout life. The APH2 program provides students with all of the necessary prerequisites to prepare for the Medical or Dental College Admissions Test and can easily accommodate the completion of prerequisite courses for other health professions such as physical therapy, physician assistant, nurse practitioner occupational therapy, pharmacy, veterinary medicine, optometry, and podiatry.

The APH2 major consists of 10 core courses: MATH 10350 & 10360, BIOS 20201 & 20202 and labs, CHEM 10171 & 10172 with labs, CHEM 20273 & 20274 and labs, and PHYS 30210 & 30220 with labs, plus three upper-level science electives (nine credits). For premed students Biochemistry (CHEM 40420) is required for the MCAT and the completion of one upper-level biology course (especially Cell Biology [BIOS 30341] or Physiology [BIOS 30344]) prior to the exam is strongly recommended. Students interested in one of the other health professions should choose APH2 electives in light of their prospective graduate program’s requirements.

CHEM 20204 and PHYS 20140 do not count toward the three upper-level science electives nor do research, special studies, or directed readings. Please note that a student may use no more than eight credits’ worth of AP (Calculus only) toward the APH2 major. Transfer students may transfer a maximum of 24 science credits for APH2; otherwise, credit for science classes taken outside of Notre Dame does not generally count toward the APH2 major.
Supplementary Majors, Minors, and Special Programs

Students who wish to go to medical/dental school directly after graduation should aim to take the Medical/Dental College Admissions Tests in the spring of the junior year.

All curricular advising in reference to the APH2 major is conducted by the APH2 advisor in 104 O'Shaughnessy. The sequencing of courses taken throughout the sophomore, junior, and senior years is worked out by the student in consultation with the APH2 director and the student's departmental advisor so that the best schedule for each individual is arranged. One possible sequence is the following.

SAMPLE STUDY PLAN

First Year
First Semester
WR 13100. Writing and Rhetoric 3
MATH 10370. Calculus A 4
CHEM 10171 and lab. Chemical Principles 4
Foreign Language 3
First Philosophy/First Theology 3
Moreau First Year Experience ♀ 1
— 18
Second Semester
University Seminar ♀ 3
MATH 10360. Calculus B 4
CHEM 10172 and lab. Organic Structure 4
Foreign Language ♀ 3
History/Social Science ♀ 3
Moreau First Year Experience ♀ 1
— 18

Sophomore Year
First Semester
College Seminar ♀ 3
BIOS 20201 and lab. General Biology A ♀ 4
CHEM 20273 and lab. Organic Reactions and Applications ♀ 4
Foreign Language ♀ 3
Arts and Letters Major ♀ 3
— 17
Second Semester
Arts and Letters Major ♀ 3
BIOS 20202 and lab. General Biology B ♀ 4
CHEM 20274 and lab. Chem/Periodic Table ♀ 4
First Theology/First Philosophy ♀ 3
Arts and Letters Major or Elective ♀ 3
— 17

Junior Year
First Semester
PHYS 30210 and lab. Physics I ♀ 4
Science Elective ♀ 3
Arts and Letters Major ♀ 3
Arts and Letters Major ♀ 3
Social Science ♀ 3
— 16
Second Semester
PHYS 30220 and lab. Physics II ♀ 4
Science Elective ♀ 3
Arts and Letters Major ♀ 3
Arts and Letters Major ♀ 3
Literature ♀ 3
— 16

Senior Year
First Semester
Science Elective ♀ 3
Arts and Letters Major ♀ 3
Arts and Letters Major ♀ 3
Second Theology/Second Philosophy ♀ (Medical Ethics) ♀ 3
History ♀ 3
— 15
Second Semester
Arts and Letters Major ♀ 3
Arts and Letters Major ♀ 3
Second Philosophy/Second Theology ♀ ♀ 3
Fine Art ♀ 3
Arts and Letters Major or Elective ♀ 3
— 15

Notes:
1. The MCAT includes material in psychology, sociology, and anthropology. Premed students should choose from among those disciplines in fulfilling the social science requirement(s). Introductory Psychology (PSY10000/20000) is highly recommended.
2. The MCAT includes questions on ethics. Premed students should consider fulfilling the second philosophy or theology requirement with a course on ethics.

COMPUTING AND DIGITAL TECHNOLOGIES (CDT) MINOR

Director
Prof. Charles R. Crowell
Department of Psychology
847 Plummer Hall/126 Haggar Hall
(574) 277-4774
ccrowell@nd.edu

Administrative Assistant
Claire Shely
834 Plummer Hall
(574) 631-7459
cdetlin@nd.edu

Faculty
Jeffrey Bain-Conkin, University Writing Program; Kevin Bowyer, Department of Computer Science and Engineering; Ramzi Buainain, Department of Computer Science and Engineering; Mike Chapple, Office of the Office of Information Technologies; Sidney D’Mello, Departments of Psychology and Computer Science and Engineering; Kenneth Dye, Department of Music; Michael Elwell, Department of Art, Art History, and Design; Patrick Flynn, Department of Computer Science and Engineering; Richard Gray, Department of Art, Art History, and Design; Edward Jurkowitz, John J. Reilly Center for Science, Technology, and Values; Mitch Kajzer, Department of Psychology; Martina Lopez, Department of Art, Art History, and Design; Kate Marshall, Department of English; Andre Murnieks, Department of Art, Art History, and Design; Theodore Mandell, Department of Film, Television, and Theatre; Jessica Payne, Department of Psychology; Jeff Speaks, Department of Philosophy; Jeff Spoonhower, Department of Film, Television, and Theater; Eric Tamashasky, Adjunct Instructor; Michael Villano, Department of Psychology; Matthew Wilkins, Department of English; Michelle Wirth, Department of Psychology

Program Overview
The Computing and Digital Technologies (CDT) minor is a blended program cutting across the Colleges of Arts & Letters and Engineering. Key departments in Arts & Letters have partnered with Computer Science & Engineering to offer a unique interdisciplinary minor. Program students will take CDT courses in both colleges to enhance their technical skills and increase their understanding of the ways in which technology can contribute to both personal and professional life. CDT will enrich the liberal arts educations of program students, broaden their perspectives, and give them skills and experience that prospective employers will value tremendously.

Program requirements
The Computing and Digital Technologies (CDT) minor requires five, 3-credit courses including:
• A two-semester core course sequence in programming, and
• Three additional elective courses from one or more of the sub-specialties listed below.

Required Core Courses
All program students are required to complete the two semester (fall–spring) core course sequence in the Python programming language. These courses will be offered every year by a faculty member in the Department of Computer Science and Engineering. The core sequence does not assume any prior background in programming and is intended to be an introductory experience for non-engineering students. Ideally, CDT students will complete the core sequences first before taking specialization courses, but that may not be possible or necessary in all cases.

Elective Specialty Courses
The CDT elective courses are organized into six categories reflecting the diversity of disciplines within the College of Arts and Letters along with areas of technology expertise that are attractive to potential employers. Program students are encouraged to view these categories as sub-specialty tracks within the minor and to gain depth by taking all of their elective courses in a single track. While specialization is not required, students must take at least (2) courses in a track to earn a specialization in that area.
Courses With and Without Computational or Digital Focus

Most CDT courses have a significant computational or digital focus that involves student learning/use of technology. However, some may not, instead providing background information that is highly relevant to the particular specialty in question. In those courses without a computational/digital focus, CDT students are encouraged to take advantage of any project or paper requirements in the class to reflect on how computational methods or technology can be brought to bear on the subject matter of the course. CDT students are limited to only one course without computational/digital focus in any specialization track. If a student earns a specialization in a track with only two courses, both must have a computational/digital focus. Classes with and without computational/digital focus in each track are shown where applicable on the Courses pages.

CDT Specialty Tracks

- **User Interface and Experience.** This track allows students to focus on how technology systems should be designed to enhance and maximize the user experience.

- **Cyber Safety and Security.** This track allows students to focus on the vulnerabilities, threats, protections, investigations and legalities associated with technology systems.

- **Digital Humanities.** This track allows students to focus on the ways in which technology can assist in the analysis and understanding of literature and textual information.

- **Digital Arts.** This track allows students to focus on how technology can assist in the creation and display of artistic expression.

- **Cognitive Science.** This track allows students to focus on the important role technology plays in the growing field of cognitive science.

- **Technology Development and Management.** This track allows students to focus on the ways in which technology solutions can be developed, implemented, managed, and maintained in organizations.

Requirement Completion Options

To complete CDT, a student must take five (5) courses total including:

- Two (2) core programming courses taken in sequence; and

- Three (3) elective specialty courses taken in one of the following five configurations:
  1. Three (3) courses with computational/digital focus in one track (earns track specialization); or
  2. Two (2) courses with computational/digital focus in one track and one (1) without computational/digital focus in same track (earns track specialization); or
  3. Two (2) courses with computational/digital focus in one track and one (1) with or without computational/digital focus in another track (earns track specialization); or
  4. One (1) course with computational/digital focus in each of three different tracks (does not earn track specialization); or
  5. One (1) course with computational/digital focus in each of two different tracks and one (1) without computational/digital focus in any track (does not earn track specialization).

NOTE: Fewer than three (3) specialty courses or fewer than two (2) courses with computational/digital focus will NOT fulfill CDT requirements.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Computing and Digital Technologies (CDT). Course descriptions can be found by clicking on the subject code and course number in the search results. CDT courses and their descriptions also may be found on the CDT website, at the following URL: http://cdt.nd.edu.

DUAL-DEGREE PROGRAM WITH THE COLLEGE OF ENGINEERING

Advisor:

Michael Ryan, Assistant Dean for Academic Affairs, College of Engineering

Avi Preachter, Assistant Dean, College of Arts and Letters

Program of Studies. The dual-degree, five-year program between the College of Arts and Letters and the College of Engineering enables the student to acquire degrees from both colleges—the bachelor of arts from the College of Arts and Letters and the bachelor of science degree in a chosen program from the College of Engineering.

This combination program, instituted in 1952, offers students the advantages of both a liberal and a technical education. The student completing one of these combination programs has a background in the humanities and social sciences as well as a degree from one of the programs offered by the College of Engineering. Because it is a demanding program, only students who have both the aptitude and motivation necessary for the five-year program should apply. Advisors for the program are available for consultation about the advisability of entering the program and about meeting the particular needs of each student already pursuing this program. Qualified students are eligible to receive modest scholarship support from the John J. Reilly Endowed Scholarship Program during their fifth year of study.

The decision to enter the program ordinarily should be made prior to beginning the sophomore year, although students can also enter the program at a later stage. There are three sets of requirements that must be met for the program: University requirements, College of Arts and Letters requirements, and College of Engineering requirements, as the following table indicates.

EDUCATION

Elementary Education
The Notre Dame student taking elementary education at Saint Mary's College must also complete a Notre Dame major along with the University and appropriate college requirements. Those interested in the elementary education program are encouraged to take the prerequisite course, EDU 201, at Saint Mary's in the second semester of their first year of studies. With appropriate planning, and possibly summer-school course work, both the Notre Dame major and elementary teaching certification can be completed in four years.

Secondary Education
(including middle school)
The following Notre Dame majors have been approved for secondary education licensing through the Education Department at Saint Mary's College:

In the College of Science: biology, chemistry, mathematics.

In the College of Arts and Letters: English, languages (French, Spanish, Latin), art, music, social studies (history and political science). Students interested in a secondary license in social studies must also complete additional course work in political science or history (depending on the major) and in one other area: either economics, sociology, or psychology.

In the College of Business: business education.

Notre Dame undergraduates interested in one of the professional teacher education programs should apply to the department the first semester of the sophomore year, but in some cases may start as late as the first semester of the junior year.

Students in the College of Arts and Letters, contact education advisor Stuart Greene for more information and help with planning. Students in the College of Science, contact Dr. Kathleen Cannon at 574-631-5812.

CATHOLIC SOCIAL TRADITION

Co-Directors:
Bill Purcell
(wpurcell@nd.edu/574-631-9473)
Todd David Whitmore
(wpurcell@nd.edu/574-631-6407)

Program Assistant:
Paula Muhlherr
(paulherr.1@nd.edu/574-631-9402)

The Minor in Catholic Social Tradition is an interdisciplinary minor that serves as a resource for Notre Dame undergraduates to learn Catholicism's social tradition.

Catholicism offers a long-standing and profound tradition of thought and teaching that addresses, from a normative standpoint, the full range of social spheres. Such concepts include those of solidarity, the common good, the just wage, human rights, the free economy, subsidiarity, and the option for the poor.

Sources for the tradition go back as far as the Bible and develop even in the early church fathers. Pope Leo XIII inaugurates Catholicism's effort to bring its social tradition to bear on industrial society in his 1891 encyclical, Rerum Novarum (The Condition of Labor). Since then, popes have drawn upon Rerum Novarum and the social tradition to broaden and develop Leo's set of concerns in encyclicals often titled—as with Pius XII's Quadragesimo Anno, Paul VI's Octogesima Adveniens, and John Paul II's 1991 Centesimus Annus—in accordance with their relationship to the earlier document. In doing so, the popes and the Second Vatican Council have addressed issues ranging across all spheres of social life from the family to the state to the church. The U.S. bishops have made sophisticated application of these teachings to the specific circumstances of the United States.
Unfortunately, many Catholics are unaware of this tradition. Pope John Paul II writes, “It must be asked how many Christians really know and put into practice the principles of the church’s social doctrine.” The U.S. bishops concur. While “Catholic social teaching is a central and essential element of our faith,” it is still the case that “our social heritage is unknown by many Catholics.” At the same time, graduates of Notre Dame move on to assume leadership positions, often quite advanced ones, in a broad spectrum of social spheres, including in politics, law, business, education, the media, and the military. The Catholic Social Tradition minor serves as a resource for Notre Dame undergraduates to learn the tradition so that it can inform life both before and after graduation.

The Minor in Catholic Social Tradition involves 15 credit hours of course work, including a core course (3 credits), two electives (each three credits), three one-credit colloquia/social concerns seminars, and a senior capstone course.

Contact: Prof. Todd David Whitmore at Whitmore.1@nd.edu, or Prof. Bill Purcell at wpurcell@nd.edu.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at constudies.nd.edu—click on “classes” OR at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Constitutional Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

CONSTITUTIONAL STUDIES

Director:
Vincent Phillip Muñoz
(ymunoz@nd.edu/574-631-0489)

Program Assistant:
Jennifer Smith
(jasmith70@nd.edu/574-631-5351)

Program Website:
constudies.nd.edu

Nothing has done more for justice in the modern world than the development of the rule of law under constitutional principles. But for constitutional governments to secure the common good, thoughtful and educated citizens must possess certain virtues: they must understand and be able to implement, defend, and, if need be, reform constitutional institutions. The Constitutional Studies minor seeks to nurture such citizens, thereby contributing to the University’s mission to pursue truth and to nurture the common good, that will bear fruit as learning becomes service to justice.

Building on courses across the College of Arts and Letters and the Law School, the Constitutional Studies minor is designed to encourage students to confront fundamental questions concerning justice, the rule of law, and human flourishing. From a variety of historical, cultural, disciplinary, and philosophical perspectives, constitutional studies courses ask questions such as:

• What is the proper relationship between government and civil society, between law and moral principles?
• What are the philosophical foundations of human rights and constitutional democracy?
• What principles of justice can or should lie at the foundation of a constitutional republic?
• What are the proper relationships between church and state and religion and politics, and how do these relationships reflect the more basic relationship between faith and reason?
• What are the moral, social, and political conditions necessary to sustain America’s experiment in constitutional government?
• What is the nature of international law and how are international norms created and maintained?

Constitutional Studies minors receive invitations to participate in extracurricular events associated with the Potenziani Program in Constitutional Studies, the Tocqueville Program for Inquiry into Religion and Public Life and the Law School’s Program in Constitutional Structure.

Constitutional Studies Minor Requirements:
The Constitutional Studies minor requires 15 credit hours of class work. Students must complete:

• Core topics in constitutional studies, such as, the history and philosophy of constitutional government and human rights and contemporary constitutional issues in American and international law.
• Three elective courses (total of 9 credit hours)
• Capstone experience (3 credit hours)

The elective courses are grouped into the following clusters:

• Constitutionalism: History and Philosophy
• The American Founding and American Constitutional History
• Constitutional Government and Public Policy
• Comparative Constitutionalism and International Law

These categories focus on the great political and constitutional debates in American and world history and on the underlying principles of constitutional government—natural and civil rights, social contract theory, the market economy, voluntary associations, separation of powers, popular sovereignty, and the rule of law. Elective courses that count for the Constitutional Studies minor for current and past semesters are listed on the minor’s website (constudies.nd.edu).

EDUCATION, SCHOOLING, AND SOCIETY

The primary goal of this interdisciplinary minor is to help students acquire different and diverse perspectives on important questions in education. Education is a complex and challenging aspect of human experience. It is one of the central, shared experiences of people in contemporary societies in the United States and around the world. It is both an end in itself and a means to many personal, professional, and spiritual goals. Thus, understanding its history and traditions, analyzing its processes, critiquing its goals, and studying its outcomes are of great importance to all of us.

Most societies rely on education to bring about fundamental changes in students and in society. The minor in Education, Schooling and Society (ESS) uses the tools and resources of a liberal arts perspective to help students reflect on, understand, research, and influence the role of education in society. In addition, the program will provide a rich body of resources for students who may want to pursue careers in education after graduation, including teaching, research, working for non-profits, or policy making.

Normally, students apply for admission to the minor late in their freshman year or early in their sophomore year, and this is ideal. Students should be in good academic standing and demonstrate a strong interest in issues related to the causes and consequences of learning, schooling, and educational policy.

The minor in ESS involves 15 hours of course work. The introductory course in the program is ESS 33600. This course must be completed by the second semester of the junior year. At the middle level of the program, students will select three courses from a set of approved courses: two that focus exclusively on educational issues and one that includes education as one of several course foci. Students complete a capstone project as part of the minor. This requirement may be met in one of three ways: (1) participation in the Senior Research Seminar, ESS 43640, in the fall semester of the senior year; (2) a thesis in ESS (includes an approval process and a pre-requisite of at least 2 credits of ESS 47602 Research Lab); or (3) a thesis in the major department that incorporates the study of an educational issue into the research question (includes an approval process and second reader from the IEI Fellows list). Students who choose the thesis in the major department are
Interdisciplinary Minors within the College

required to take an additional ESS elective to satisfy the 15-credit requirement of the minor. The capstone project provides students with an opportunity to build upon and extend the work they have completed in fulfilling the requirements for the minor. Students will design and execute an original research project and write a paper of 25–40 pages, depending on the option they choose. This process is writing-intensive, requiring drafts, revisions, peer review when appropriate, and individual consultations between the professor and student.

The faculty work closely with students on postgraduate planning, including employment, graduate or professional school, or service opportunities.

Course descriptions can be found by clicking on the subject code and course number in the search results.

**HESBURGH PROGRAM IN PUBLIC SERVICE**

**Director:**
Martine De Ridder

The Hesburgh Program in Public Service prepares Notre Dame students for a life of active and effective citizenship as well as for the possibility of careers in public service. The program honors the principled, dedicated leadership and public service of Notre Dame's President Emeritus, Rev. Theodore Hesburgh, C.S.C.

The health of American society is closely related to good public policy, competent, ethical public service, and leadership. Thus, awareness of public policy and public service is not only the foundation for public-sector careers, but it is also a necessity for those who will exercise leadership roles in the nonprofit sector or in the private sector and seek to be knowledgeable citizens.

The Hesburgh Program offers an interdisciplinary curriculum in public policy designed to inform students about the dimensions of policy making, public administration and policy evaluation, and to develop skills in research, sensitivity to ethical issues, and appreciation for the character and limits of constitutional democracy.

First-year students and sophomores of all colleges are invited to apply to the interdisciplinary minor, as well as first semester junior transfers. To be admitted, students will need to be in good academic standing and demonstrate a strong interest in public policy and public service. An Introduction to American Politics (POLS 10100, 20100, or equivalent) and an Introduction to Economics (ECON 1001, 20011, or equivalent) are prerequisites to the Hesburgh Program course of study. To be admitted, students should have completed or be in the process of completing these requirements. A conditional admit may be granted to allow for completion of the prerequisites during a student’s sophomore year of studies.

The public policy minor involves 15 hours of course work. The “gateway” course to the program is HESB 20010, Introduction to Public Policy, normally taken in the second semester of the sophomore year. As sophomores and juniors, Hesburgh minors choose three electives drawn from each of three categories of courses approved by the program. These are research skills, values, and institutions and processes. During the senior year, students who have been on a summer internship will register for the research seminar, HESB 43020, that builds on their field experience. Other students will take one of several senior-level policy seminars identified by the program each semester.

Many of our courses are offered through cross-listings with various Arts and Letters Departments such as American Studies, Anthropology, Computer Applications, Economics and Policy Studies, History, Philosophy, Psychology, Political Science, Sociology, and Theology.

The Hesburgh Program offers students the opportunity for summer internships in public policy contexts through the Gary Lyman Internships in Public Service. In the fall of their junior year, Hesburgh students are encouraged to apply for the Lyman Internship. Students selected as Lyman interns are aided by the program’s director in securing policy appropriate internships in Washington, D.C., or state and local level. Lyman interns receive financial aid to defray their cost of living while interning.

During the course of the academic year, the Hesburgh Program sponsors student public-policy-related forums and activities and campus visits to Notre Dame by public figures. The staff works closely with students on postgraduate planning, including employment, professional schools such as law and public policy and academic graduate programs.

For more information, visit our website at nd.edu/~hesprg/.

Interdisciplinary Minors within the College

INTERNATIONAL DEVELOPMENT STUDIES

Director:
Steve Reifenberg

The goal of the Kellogg Institute for International Studies’ minor in International Development Studies (IDS) is to provide undergraduate students with both the opportunity to learn about and contribute to international development. IDS will provide context and an academic foundation for students to analyze the dynamics of development across the globe as well as help students develop skills for effective engagement in a complex world.

Development studies is interdisciplinary in nature, so students are required to take courses in a variety of disciplines. This equips students with a broad lens through which to view and investigate development challenges. Students from all colleges and departments are encouraged to enroll.

The IDS minor prepares students for a variety of post-graduate options related to international development, including graduate work in development studies, volunteer work or employment in the field, ranging from international and advocacy organizations, businesses, consulting firms, and policy and research groups. Regardless of what career path IDS students follow, the breadth and diversity of academic and fieldwork training help prepare them to apply their learning from the classroom to the world around them.

The IDS minor was founded by the Kellogg Institute’s Ford Program in Human Development Studies and Solidarity, and today the minor is managed by the Kellogg Institute, working closely with the Ford Program. To supplement their course work, students can take advantage of the many opportunities made available by the Kellogg Institute and the Ford Program: a calendar of events, grants and internship opportunities, an annual student-led human development research conference, and other resources.

Requirements:
A central component and requirement of the IDS minor is a field-based research project in the so-called “developing” world, allowing students to contribute to the Ford Program’s mission of seeking solutions to real world challenges by examining the causes and consequences of extreme poverty. This research project will normally be conducted the summer after a student’s junior year.

Additionally, the minor in International Development Studies consists of 15 credit hours:

- Gateway Course (3 credit hours): Introduction to International Development Studies
  - This course is usually only offered in the fall and will normally be taken during sophomore year.

- Three Electives (9 credit hours):
  - Qualifying elective courses are listed each semester in the Schedule of Classes under IDS.

To Table of Contents
JOHN W. GALLIVAN PROGRAM IN JOURNALISM, ETHICS, AND DEMOCRACY

Director: Robert Schmuhl

The John W. Gallivan Program in Journalism, Ethics, and Democracy offers several courses for students interested in careers in print, broadcast, online, and multimedia journalism. Begun in 1997 with a grant from the John S. and James L. Knight Foundation and now endowed by the family of John W. Gallivan, this minor combines professional training in journalistic skills with examination of philosophical concerns related to the practice of journalism. For example, what ethical issues arise in preparing a particular story? Or what role does—and should—journalism play in a self-governing society?

The journalism minor requires completion of 15 hours in addition to a student’s major requirements and a news-related internship during either the summer or the academic year. Fundamentals of Journalism is the first, or gateway, class for the program. Other courses that count for the minor include The Craft of Journalism; Advanced Reporting; Multimedia Journalism; Persuasion, Commentary, and Criticism; Broadcast Journalism; and Ethics in Journalism.

The director of the program is Robert Schmuhl, the Walter H. Annenberg-Edmund P. Joyce Professor of American Studies and Journalism. An advisory committee of Notre Dame graduates in journalism helps guide the program. Members include Tom Bettag, television network news producer; Robert Costa, national political reporter, The Washington Post; Bill Dwyre, sports columnist, The Los Angeles Times; Michael D. (Mickey) Gallivan, former television and wire service journalist and program benefactor; Maddie Hanna, reporter, The Philadelphia Inquirer; Daniel LeDuc, senior officer and editor, The Pew Charitable Trusts; Meg Martin, associate editor, Public Insight Network at American Public Media; John McMeel, president and chairman, Andrews McMeel Universal; Anne Thompson, chief environmental affairs correspondent, NBC News; and Kelley Tuthill, reporter/anchor, WCVB-TV, Boston.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Journalism, Ethics & Democracy. LATINO STUDIES

Co-Director: Luis Ricardo Fraga
Co-Director: Timothy Matovina
Director of Undergraduate Studies: Karen Richman, Ph.D.,

Program of Studies

Latino Studies is an interdisciplinary field of academic research and scholarship engaged in understanding the past, present, and future of the youngest and fastest-growing population in the United States. Latinos encompass immigrants from every country in Latin America and the Caribbean as well as those whose ancestors were long ago incorporated during U.S. westward expansion. The supplemental major and minor in Latino Studies engage students with the latest research and analysis on the diverse Latino population in fields such as American studies, anthropology, history, literature, political science, sociology, and theology. Each semester, the Institute for Latino Studies offers approximately fourteen undergraduate courses that range from classroom lectures and seminars to community-based, service-learning courses in the local Latino community of South Bend. ILS also offers annual summer service-learning courses in Chicago, Los Angeles, and Washington, D.C. Latino Studies is relevant to practically every academic discipline and to careers in architecture, business, church leadership, community organizing, the arts, engineering, law, medicine, teaching, and much more. Latino Studies enhances students’ leadership and effectiveness in whatever pathway your life takes you beyond Notre Dame.

Supplementary Major

The supplementary major in Latino Studies consists of twenty-four (24) credits: a gateway course (3 credits), capstone/practicum course (3 credits), and eighteen (18) credit hours or the equivalent of six additional Latino Studies courses.

Requirements:

1. Gateway Course (3 credits)
ILS 20701, Introduction to Latinos in American Society. This course examines the Latino experience in the United States, including the historical, cultural, social, economic, political, and religious foundations of the diverse U.S. Latino population.

2. Capstone/Practicum Course (3 credits)
In this 4000-level course, students meet in a seminar-style class and complete a substantial research project (approximately 15-20 pages) based on bibliographic and/or experiential research in Latino Studies.

3. Elective Courses (18 credits)
Students take six more Latino Studies courses as electives chosen in consultation with the ILS Director of Undergraduate Studies.

4. Senior Thesis Option (3 credits)
A senior thesis in Latino Studies is encouraged, but not required, for students enrolled in the supplementary major. In addition, Glynn Honors Program students enrolled in the Latino Studies program as minors or supplemental majors may also write a senior thesis in Latino Studies. Thesis students take the thesis-writing course in Latino Studies (ILS 48900) under the direction of their thesis faculty supervisor. A minimum grade point average and faculty recommendation are required for acceptance. Students interested in writing a senior thesis should apply to the ILS Director of Undergraduate Studies by the spring of their junior year.

5. Directed Reading Course Option (1–3 credits)
A directed readings course (ILS 46711) allows a student to explore in depth a theme or subject in Latino Studies under the guidance of a faculty member. Directed readings cover material that is not offered as a regular classroom course. Enrollment requires the approval of the Director of Undergraduate Studies.

Minor

The minor in Latino Studies consists of fifteen (15) credit hours: a gateway course (3 credits), capstone/practicum course (3 credits), and nine (9) credit hours of elective course work.

Requirements:

1. Gateway Course (3 credits)
ILS 20701, Introduction to Latinos in American Society. This course examines the Latino experience in the United States, including the historical, cultural, social, economic, political, and religious foundations of the diverse U.S. Latino population.

2. Capstone/Practicum Course (3 credits)
In this 4000-level course, students meet in a seminar-style class and complete a substantial research project (approximately 15-20 pages) based on bibliographic and/or experiential research in Latino Studies.

3. Elective Courses (9 credits)
Students take three additional Latino Studies courses as electives chosen in consultation with the ILS Director of Undergraduate Studies.

4. Senior Thesis Option (3 credits)
A senior thesis in Latino Studies is encouraged, but not required, for students enrolled in the minor. In addition, Glynn Honors Program students enrolled in the Latino Studies program as minors or supplemental majors may also write a senior thesis in Latino Studies. Thesis students take the thesis-writing course in Latino Studies (ILS 48900) under the direction of their thesis faculty supervisor. A minimum grade point average and faculty recommendation are required for acceptance. Students interested in writing a senior thesis should apply to the ILS Director of Undergraduate Studies by the spring of their junior year.

5. Directed Reading Course Option (1–3 credits)
A directed readings course (ILS 46711) allows a student to explore in depth a theme or subject in Latino Studies.
Interdisciplinary Minors within the College

Studies under the guidance of a faculty member. Directed readings cover material that is not offered as a regular classroom course. Enrollment requires the approval of the Director of Undergraduate Studies.

Summer Service Learning Courses
The Cross-Cultural Leadership Program (CCLP) engages students in real-world applications of their academic studies through summer service learning in Chicago, Los Angeles, and Washington, D.C. Students in this three-credit, eight-week summer course will be immersed in community-based and national organizations. They will also engage in critical study related to their service learning in a class led by an ILS professor. To promote full immersion in this service-learning experience, students will not be placed in their home communities.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Medieval Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

LITURGICAL MUSIC MINISTRY

This 18-credit minor consists of three 3-credit courses in theology and two 3-credit courses in music, plus 3 credits of music lessons or approved ensembles, to be selected in consultation with the student’s music advisor. Contact the director of undergraduate studies in the Department of Theology.

MEDIEVAL STUDIES

The Minor in Medieval Studies allows students who are committed to other programs of study to pursue interests in the culture of the Middle Ages and to cross the limits of individual disciplines as a means of understanding the changing social, economic, legal, intellectual, and artistic systems of medieval society.

Students may declare their intention to undertake a minor in Medieval Studies to the director of undergraduate studies at any time before the end of their third year. The undergraduate director will then act as their minor advisor and help them select a set of courses that form a coherent program of study, often in conjunction with their major if possible. Students are required to take five courses, including the introductory course, The World of the Middle Ages, and three or four electives in Medieval Studies drawn from at least two of the 12 affiliated departments: (Anthropology; Art, Art History, and Design; Classics; English; German and Russian Languages and Literatures; History; Irish Language and Literature; Music; Philosophy; Political Science; Romance Languages and Literatures; and Theology). The Medieval Studies Advanced Seminar (3 credits) is recommended as one of the five courses, in lieu of a medieval elective, on a space-available basis. Courses counted toward a student’s major may not be used for the minor.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Medieval Institute. Course descriptions can be found by clicking on the subject code and course number in the search results.

PEACE STUDIES

Director of Undergraduate Studies: Ernesto Verdeja
Assistant Director: Anna Van Overbergh

Peace Studies at the University of Notre Dame is centered at the Kroc Institute for International Peace Studies. Profiles of the Peace Studies faculty and information about activities in Peace Studies can be found on the Kroc Institute’s website at kroc.nd.edu.

Program of Studies. Peace Studies is defined as an interdisciplinary field of study that draws on diverse academic disciplines to understand the causes of violent conflict, develop nonviolent ways to prevent and resolve war, genocide, terrorism and gross violations of human rights, and build peaceful and just societies.

As a liberal arts curriculum, Peace Studies links scholarship to practice and empowers students to become effective citizens with global perspective. It develops critical thinking skills, strengthens research and writing ability, teaches specific tactics in areas such as conflict resolution and social change, and challenges students to develop their knowledge into new ways of thinking and acting in the world. Peace Studies provides students with the capacity to imagine and build the global community as it ought to be (rather than simply how it is) and with the skills to work toward that vision.

The Undergraduate Program in Peace Studies offers two curriculum options: the Supplementary Major in Peace Studies (24 credits) and the Interdisciplinary Minor in Peace Studies (15 credits). Both require students to complete an introduction course, a mid-level course on peacebuilding and a capstone research and writing seminar. The remaining coursework consists of electives selected from the Peace Studies course catalog. Electives are designated as either core electives or support electives.

The Supplementary Major. The Supplementary Major in Peace Studies requires successful completion of eight (8) courses: the three required courses and five courses selected from a list of approved peace studies electives. At least two of the five electives must be core electives. The curriculum for the supplementary major is:

Required Courses
IIPS 20101 Introduction to Peace Studies 3 cr
IIPS 33101 Perspectives on Peacebuilding 3 cr
IIPS 43101 Peace Studies Senior Seminar 3 cr

Peace Studies Electives
2 core IIPS courses 6 cr
3 additional IIPS courses (core or support) 9 cr

The Interdisciplinary Minor. The Interdisciplinary Minor in Peace Studies requires successful completion of five (5) courses: the three required courses and two courses selected from a list of approved peace studies electives. The curriculum for the minor is:

Required Courses
IIPS 20101 Introduction to Peace Studies 3 cr
IIPS 33101 Perspectives on Peacebuilding 3 cr
IIPS 43101 Peace Studies Senior Seminar 3 cr

Peace Studies Electives
2 additional IIPS courses (core or support) 6 cr

The required courses may not be taken concurrently. Introduction to Peace Studies is a prerequisite for Perspectives on Peacebuilding, and both of those foundational courses are prerequisites for Peace Studies Senior Seminar. The senior seminar course may only be taken during the senior year.

Elective courses may be completed at any point, and they may be taken concurrently with required courses. However, students are advised to take Introduction to Peace Studies first, before completing other work in the curriculum. Courses taken abroad count only as Peace Studies electives and may not substitute for any of the required courses.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Institute for International Peace Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

PHILOSOPHY, RELIGION, AND LITERATURE

Director: Henry Weinfield

The Philosophy, Religion, and Literature minor brings together and amalgamates two formerly existing minors, Philosophy and Literature and Religion and Literature. The new minor is designed for students who want to pursue an interdisciplinary course of studies that focuses on the many intersections among philosophy, religion, and literature. The minor seeks to build bridges between disciplines and modes of thought which have traditionally been in dialogue with one another and which historically have been at the heart of teaching at Notre Dame. The aim is to create a context in which philosophical, religious, and literary approaches to thought and
Interdisciplinary Minors within the College

its expression may be studied systematically and in conjunction with each other. This integrative approach to liberal education's foundational subjects resonates deeply with the intellectual values and mission of Notre Dame.

Curricular Requirements. The Philosophy, Religion, and Literature minor will require students to complete 15 credit hours of approved coursework. These 15 credit hours will normally comprise at least one three-credit Gateway seminar, three three-credit electives, and a three-credit capstone project.

Gateway seminar. Students are required to take a three-credit Gateway seminar, either in philosophy and literature or in religion and literature. The minor is thus organized around two parallel but intersecting tracks. A Gateway seminar in each track is offered each academic year, one in the fall, the other in the spring. The purpose of the Gateway seminaries, whatever their specific topics may be, is to provide a rigorous introduction to the study of philosophy and literature or religion and literature.

Electives. In addition to the Gateway seminar, students are required to take three other courses that have been approved for the minor. The minor's advisor will help students identify courses relevant to the minor and to their own individual interests and needs.

Integrating the tracks. Students working primarily in one track are required to take one course in the other. Thus, a student focusing on religion and literature is required to take one course in philosophy and literature. That course may be either the Gateway seminar or another course. If students choose to fulfill this requirement by taking Gateway seminars in both tracks, both seminars will count toward the 15 credit hours needed for the minor.

The capstone project. For the capstone project, each student, working directly with a professor associated with the minor, will write a research essay of approximately 20 pages on a topic that embraces philosophy and literature or religion and literature, or both. Students are encouraged to consult with a professor who is working in a different subject area from the one on which the advisor has expertise. Thus, if a student's advisor is in Theology, that student will be encouraged to consult with a literature professor who has some interest in the student's topic. We recognize that some seniors in the College of Arts and Letters are writing senior theses for their majors. In many cases it is unrealistic to expect such students to write an additional capstone essay. Students in the Philosophy, Religion, and Literature minor who are already writing a senior thesis are allowed to complete the minor by taking a fifth elective course instead of the capstone project, provided that the senior thesis topic in some way resonates with the overall themes of the minor.

Events and Activities. The Notre Dame community already hosts a number of lectures, forums, and one-day seminars relevant to the minor. In addition, the minor will sponsor events and activities such as trips to the opera and theater. Students in the minor are required to attend at least three such events.

For further information, contact Prof. Henry Weinfield, Program of Liberal Studies, hweinf@nd.edu

PHILOSOPHY, POLITICS, AND ECONOMICS

The minor in philosophy, politics, and economics (PPE) is designed for students with serious interests at the intersection of political theory, political philosophy, and economic theory. Its aim is to help students acquire some fluency in each of the disciplines, and to provide a forum where all three disciplines can be brought to bear on problems which are common or complementary. PPE emphasizes the development of the analytic skills exercised in close reading, cogent writing and clear oral expression. Students are strongly encouraged to engage in undergraduate research and to write senior theses. A high percentage of PPE graduates pursue advanced degrees.

The PPE minor is 15 credits, including the 3-credit Justice Seminar, which is the core course of the minor and is required of all concentrators. The minor is open by application only; any student who wishes to take the Justice Seminar must complete the application for the minor. Most of the students who are granted admission to the PPE minor are majors in philosophy, political science or economics and the vast majority granted admission to the seminar are PPE-intents. But first-year, sophomores and juniors from across the University are welcome to submit applications, regardless of their majors.

The PPE curriculum consists of 15 credit hours usually distributed over four semesters, as follows:

- The Justice Seminar (cross-listed in Philosophy, Political Science, and Economics), an intensive 3-credit-hour seminar that is the gateway to the minor, taken in the fall semester of sophomore or junior year. (3 credit-hours)
- Three 1-credit PPE Colloquia, each devoted either to the critical reading and discussion of one or two major works or to a group project on some contemporary issue(s). The colloquia are normally taken in the three semesters following the Justice Seminar. Special arrangements can sometimes be made for students who wish to participate in a colloquium while studying abroad. (3 credit-hours in total)
- Three approved 3-credit courses from the two fields outside the student's first major, with at least one course in both non-major fields. (9 credit hours in total)

Total credit-hours: 15.

PPE students are also encouraged (but not required) to write senior theses in their majors that reflect the interdisciplinary focus of the program.

The Justice Seminar is always offered in the fall semester. An informational meeting about the PPE minor is usually held early in the March of each year, with applications for the minor normally due early in April of the year in which the Seminar will be taken.

Contact: Director Paul Weithman, Department of Philosophy, 330 Malloy Hall, weithman.1@nd.edu

PHILOSOPHY WITHIN THE CATHOLIC TRADITION

Director:

John O’Callaghan, Philosophy

This minor is only open to undergraduates who are majors in either philosophy or theology and who wish to add to their knowledge of philosophy and theology an understanding of what the distinctively Catholic tradition in philosophy is. It is unlike most interdisciplinary minors in being restricted in this way; work in this minor presupposes a background of some significant work in either philosophy or theology. A central task assigned to philosophy within the Catholic tradition has been that of understanding the relationship of theology to the secular disciplines, so that the relevance both of theology to these disciplines and of those disciplines to theology becomes clear. In this minor, political science will be the secular discipline whose relationship with theology provides a subject for philosophical enquiry.

The Catholic philosophical tradition is one of debate and constructive disagreement and the philosophers whom it will be possible to study in satisfying the requirements for this minor will include thinkers of very different standpoints: Augustine, Anselm, Aquinas, Pascal, Arnauld, Newman, Edith Stein and others. Because these thinkers have in common an allegiance to the Catholic faith, they agree in rejecting philosophical positions incompatible with that faith. But they also disagree with each other and in both cases what matters is the quality of their philosophical arguments.

The requirements of the minor are satisfied by taking 15 credit hours, beginning with Philosophy 30328, Body, Soul and the Image of God. Students have to take two appropriate courses in political science and one course on a major Catholic philosopher or set of Catholic philosophers, either in the Theology Department or in the Philosophy Department. No course can count both as satisfying one of the requirements for the student's major and as satisfying one of the requirements of this minor. All students are required to take a capstone seminar in which the question of what part philosophy can play in the integration of the secular disciplines with theology will be addressed through discussion of texts and arguments encountered in earlier courses. Lists of philosophy, theology, and political science courses that will satisfy the requirements of the minor will be available each semester from the director. For further information, please contact the director, Prof. John O’Callaghan.
POVERTY STUDIES
(povertystudies.nd.edu)

Director:
Jennifer Warlick

Co-Director:
Connie Snyder Mick

Affiliated Faculty:
Visit povertystudies.nd.edu/about/the-faculty/

The Poverty Studies Interdisciplinary Minor (PSIM) contributes to Notre Dame’s mission by requiring its students to examine poverty, social injustice, and oppression from the perspectives of the social sciences, the humanities, sciences, and business.

PSIM explicitly recognizes the interconnected nature of the causes of poverty and the problems of low-income families and individuals, and provides a framework that assists students in making the links between the contributions of multiple and varied disciplines. It also helps students contextualize their personal interactions with low-income populations and the institutions that serve them, and make the connections between classroom lessons and real-world experiences.

PSIM is an appropriate supplement to every major at the University because it is designed to help students understand how their future civic activity and professional work—in almost any area—will invariably impinge on disadvantaged persons and communities.

Requirements. An interdisciplinary minor in Poverty Studies consists of 15 or 16 credit hours, including a required gateway course, experiential learning (service learning, community-based research, or immersion); elective coursework selected from a list of courses approved by the director on the advice of the affiliated faculty; and senior capstone seminar or special studies/senior thesis.

Gateway course (3 credits). The gateway course introduces students to academic research about the nature, causes, and consequences of poverty. Throughout, the readings and lectures reveal the collaboration across the various disciplines, the array of interlocking problems that lead to poverty, and guides the formulation of policies to prevent and alleviate poverty. Equal emphasis is given to poor citizens of the United States and developing nations.

Experiential learning (3 or 4 credits). The experiential learning requirement is designed to get students into the field where the concepts discussed in classrooms come to life and disciplinary boundaries are challenged. Experiential learning enhances a student’s understanding of poverty and prepares students for the final capstone experience, whether it is the seminar or an independent research project. The experiential learning requirement may be satisfied by satisfactorily completing one of the following options:

- three designated 1-credit Center for Social Concerns seminars combined with PS 35001; or
- three credits of internship(s) with community agencies and organizations serving the poor; or
- one approved 3-credit community-based learning research course.

Three 1-credit seminars offered by the Center for Social Concerns. Participating in CSC seminars is a well-established tradition among Notre Dame students. PSIM students may satisfy the experiential learning requirements by bundling three Center for Social Concerns 1-credit experiential learning seminars with PS 35001. When choosing this option, students must take the Urban Plunge Seminar (THEO 33963/CSC 33963), the Appalachia Seminar (THEO 33950/CSC 33950), or another approved seminar.

Three credits of internship(s). Each semester, many Notre Dame students engage in internships with community agencies and organizations working to improve the well-being of low-income individuals and families. Three total credits of internship experience with the same or different agencies satisfy this requirement.

One 3-credit community-based research course/project. This requirement may be fulfilled during the academic year satisfactorily by completing a regularly scheduled course with a community-based research component, by participating in a summer service-learning project sponsored by the Center for Social Concerns, or by completing a Shepherd Program summer internship enhanced by the addition of an academic component similar to CSC’s summer service-learning courses.

Electives (6 credits). Two courses from the list of approved Poverty Studies minor electives. See http://povertystudies.nd.edu/.

Capstone Experiences (3 credits). As the final step in the PSIM, students may choose either to enroll in the capstone seminar or to undertake a 3-credit special studies project directed by one of the affiliated faculty.

Capstone Seminar (3 credits). The capstone seminar is topic-oriented drawing on literature from multiple disciplines. The students will be from different majors and will share the perspectives of their major disciplines as well as their varied experiences in the field, thus ensuring the interdisciplinary nature of the inquiry. Experts with diverse perspectives and professional experiences will join the seminar as special guests.

Special studies capstone option (3 credits). Students may also opt for research or other intellectual experience by enrolling in special studies with one of the minor’s affiliated faculty. In this case, the students will produce a project (manuscript, work of art, composition, poster board display of research results, etc.) and will present this project to the members of PSIM at a special colloquium held in the spring semester of each academic year.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject of Poverty Studies, or by highlighting all of the course subjects simultaneously and selecting the “PSIM-Poverty Studies Elect.” course attribute. Course descriptions can be found by clicking on the subject code and course number in the search results.

SCIENCE, TECHNOLOGY, AND VALUES

Chair:
Anjan Chakravartty, Professor of Philosophy

Acting Director:
Edward Jurkowitz, Assistant Director for Education, The John J. Reilly Center for Science, Technology and Values, University of Notre Dame

Affiliated faculty:
Chairholders:
Michael J. Crowe, Program of Liberal Studies and History (concurrent); Rev. John J. Cavanaugh Chair (emeritus)
Katherine Brading, William J. and Dorothy K. O’Neill Collegiate Professor of Philosophy, Department of Philosophy; Director, History and Philosophy of Science Graduate Program
Gerald McKenney, Walton Professor of Theology
Kristin Shrader-Fechette, Philosophy and Biology; O’Neill Family Chair
Philip Mirowski, Carl E. Koch Professor of Economics and Policy Studies and the History and Philosophy of Science

Professors:
Ani Aprahamian, Physics
Anjan Chakravartty, Philosophy
Celia Deane-Drummond, Theology
Michael DePaul, Philosophy
Dennis Doidson, Architecture
Christopher Fox, English
Eugene Halnon, Sociology
Christopher Hamlin, History
Don Howard, Philosophy
Özür Lizardo, Sociology
Dian Murray, History (emeritus)
Thomas Schlereth, American Studies
John Sitter, English
Phillip Sloan, Program of Liberal Studies and History (concurrent; emeritus)
James Sterba, Philosophy
Laura Walls, English
Andrew Weigert, Sociology

Associate Professors:
Matthew Ashley, Theology
Christine Becker, Film, Television, and Theatre
Anne Coleman, American Studies
Jon T. Coleman, History
Janet Kourany, Philosophy
David Ladouceur, Classics
Linda Przybyszewski, History

To Table of Contents
Science and technology are pivotal forces in modern society and play key roles in shaping cultural sensibilities in the modern world. Indeed, our technologies are reflected in our institutions, our work, our expectations, even in our moral problems. Science, Technology, and Values (STV) is an interdisciplinary minor within which faculty and students from a variety of disciplines and different colleges can reflectively explore the nature of science and technology as human enterprises, interacting in complex ways with our values and social institutions.

The program helps sponsor a wide range of cross-listed courses taught by faculty representing the humanities, the social sciences and the natural sciences. Students electing an STV minor can focus their work on areas of particular interest, such as science, technology and public policy; ethics, ecology and environment; medical ethics; ethical issues in science and technology; humanistic and social aspects of medicine; science and technology as cultural phenomena; history and philosophy of technology.

Students electing a minor in STV must take at least five courses (15 hours) from among those offered under the sponsorship of the STV program. These must include the core course (STV 20556), and one "foundation" course, a rotating sequence of courses, in addition to three freely chosen courses from among the following list of courses. Note that nearly all of the following courses are cross-listed in diverse departments, which means that students may formulate wide-ranging interdisciplinary perspectives on how science, technology and medicine intersect with society.

**CORE COURSE**

20556. Science, Technology, and Society

**FOUNDATIONAL COURSES**

20235. Technology, Society & Ethics 20997. How Pharmaceuticals...Create Us
27997. Biology and Society in the Modern Era

**CLUSTER ONE: HUMAN DIMENSIONS OF SCIENCE AND TECHNOLOGY**

**CLUSTER TWO: SCIENCE, TECHNOLOGY, AND ETHICS**

**CLUSTER THREE: SCIENCE, TECHNOLOGY, AND PUBLIC POLICY**

Area Studies Minors

30342. Understanding Food and Agricultural Policy
30382. Technology of War and Peace
30393. The Politics of Adapting to Climate Change
30396. History of Environmental Science
33370. Economics of Science
33401. Animal Welfare & the Human-Animal Bond
34366. Medical Practice and Policy UK (Taught in London)
40319. Self, Society, and Environment
40328. God, Science, and Morality
40357. Computers, Ethics, and Public Policy
40455. Water, Disease, and Global Health
43302. Population Dynamics
43328. Science Policy and Politics
43343. Health Care and the Poor
43363. Spy Culture: Surveillance, Privacy, and Society
43364. Technology, Privacy and Civil Liberties
43372. Politics of Science
43396. Environmental Justice
43410. History of Economic Thought
45332. Anthropology of War and Peace

CLUSTER FOUR: OPTIONAL ELECTIVES
20419. Brief History of Time/Space/Motion
20421. Writing Speculative Fiction
20431. Philosophy and Cosmology: A Revolution
20435. Ethics of Energy Conservation
20441. Environmental Studies
20461. Nuclear Warfare
24568. Philosophical Issues in Physics
30445. Technologies and Shaping of America
30476. Place, Environment, and Society in Australia and Melanesia
30900. Foundations of Sociological Theory
30902. Methods of Sociological Research
30986. History and Photography
40111. Molecular Revolution
40401. The Future of Energy
40402. Wireless Communications: The Technology and Impact of 24/7 Connectivity
40403. Nanotechnology; Opportunities and Challenges
40424. Technology and Development in History
40455. Water, Disease, & Global Health
40498. Energy and Climate
43400. Science, Technology, and Values in Contemporary Society
43409. Evolutionary Psychology and the Sacred
43414. Abortion, Euthanasia, and Capital Punishment
43445. The Internet—Interpretations
43717. Forbidden Knowledge
46497. Directed Readings
53451. American Towns and Cities

Because individuals attracted to the STV minor have diverse interests and differing academic backgrounds, the program advisor works closely with each student to help select courses that will complement the student's major program or be most relevant to particular career aspirations.

Contact Edward Jurkowitz, STV Program office, 442 Geddes Hall. Email: ejurkowi@nd.edu.
Web address: nd.edu/~stv.

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Science, Technology and Values. Course descriptions can be found by clicking on the subject code and course number in the search results. The Science, Technology and Values courses for the most recent semester, as well as for past semesters may be found on the Science, Technology and Values website, at the following URL: http://reilly.nd.edu/science-technology-and-values/courses/.

Area Studies Minors

Program of Studies. The College of Arts and Letters offers its students the opportunity to pursue an interdisciplinary sequence of area studies minor that may supplement the major. Currently, there are minors in African Studies, Asian Studies, Irish Studies, Latin American Studies, Mediterranean/Middle East Studies, Russian and East European Studies and West European Studies.

The purpose of these minors is to assemble the courses dealing with the language, literature, history, politics, anthropology, philosophy, sociology and economics of each area. In this way a meaningful course structure is available to students who wish to concentrate their scholarly interest upon a cultural or geographical area as well as upon an interdisciplinary approach. Such programs can be especially useful to students who plan a career in international business, international organizations or government service or who intend to do graduate work in one of these areas.

The student who wishes to complete one of the area studies minors is required to take at least four area studies courses (12 hours) distributed over three different departments. These courses must be taken in addition to those required for the major. The student must also take courses in a language of the area being studied (Russian or an East European language for the Russian Studies program; Spanish or Portuguese for the Latin American Studies program; French, German or Italian for the West European Studies program; a Mediterranean language for the Mediterranean/Middle East Studies program; Irish for the Irish Studies program; and Japanese, Korean, or Chinese for the Asian Studies program). In most cases the required number of courses will be equivalent to those required to satisfy the arts and letters language requirement, but students should check with program directors for the specific requirements of a given area. While not required to take additional language instruction for the African Studies program, students who plan to continue their African interest at the graduate level are encouraged to develop a competency in Swahili, French, Portuguese, or Arabic. In the senior year, each student must submit a satisfactory essay based upon research that combines the major discipline with the area studies curriculum.

Students interested in an area studies minor should consult the director (listed below).
ASIAN STUDIES

Director: Nelson Mark
Executive Director: Jonathan Nobel
Program Coordinator: Inez Suhardhjo

The program in Asian Studies introduces students to the complexity of the continent of Asia. They select courses in a wide variety of fields, such as anthropology, East Asian languages and cultures, economics, film, television, and theatre, history, political science, and psychology. The Liu Institute for Asia and Asian Studies also provides enriching activities such as lectures, films, gatherings, and grant opportunities to students interested in Asia.

Students with the supplementary major or the minor in Asian Studies will be very desirable employees of international business or accounting firms, nongovernmental organizations, and service organizations. They will be well prepared for graduate school in a discipline, or for professional school such as law or business. The supplementary major and the minor in Asian Studies provide recognition of students’ training in this significant region of the world.

THE MINOR IN ASIAN STUDIES

Students who are contemplating graduate study in a particular area of the world or a career in international business or government—or those who are merely curious—are well served by the minor in Asian Studies. It provides a well-rounded introduction to the world’s most populous continent. The minor in Asian Studies is a very appropriate accompaniment to majors in anthropology, East Asian languages and cultures, history, political science, economics, or other arts and letters departments. It is also suitable for students in the Mendoza College of Business.

Students should meet with the program coordinator as early as possible in their academic career in order to plan their courses wisely. They should also meet with the program coordinator each semester to select approved courses.

Requirements for the Minor:

Asia-related courses fulfilling each of the following: (Total of 15 credit hours)

- Four courses from at least three different disciplines (history, literature/culture, humanities, social sciences; may include up to one language course) (12 credit hours)
- One upper-level course taken during the senior year that culminates in a capstone essay (3 credit hours)

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Asian Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

THE MINOR IN EUROPEAN STUDIES

Director: A. James McAdams

The Nanovic Institute for European Studies

Stretching from the Atlantic Ocean to the Ural Mountains, Europe plays a critical role in global affairs. The ongoing expansion of the European Union is helping to unite many countries and people in a traditionally diverse region. As future leaders, Notre Dame students need to know about European history, politics and culture in order to succeed in the contemporary world.

The Nanovic Institute for European Studies is committed to enriching the intellectual culture of Notre Dame by creating an integrated, interdisciplinary home for students and faculty to explore the evolving ideas, cultures, beliefs, and institutions that shape Europe today.

The Minor

Administered by the Nanovic Institute, the Minor in European Studies (MES) allows students to explore topics of interest and relevance in the field of European Studies. Through both coursework and independent study, students will examine the politics, history, and culture of Europe.

The program has three component requirements:

- completion of three upper-division courses from two different departments in approved areas of European Studies
- one semester of European language study beyond the College of Arts and Letters requirement (note: this applies to students in all colleges)
- a capstone thesis essay on a topic within European Studies, to be completed during the senior year

Other Undergraduate Support

The Nanovic Institute also administers a wide range of undergraduate grant programs. European Studies minors and other undergraduates wishing to travel to Europe to conduct research, carry out internships or service projects, or to complete other academic initiatives are encouraged to apply for support.

For more information, interested students should consult the institute’s website at nanovic.nd.edu.

IRISH STUDIES

Director: Christopher Fox

The Kegough-Naughton Institute for Irish Studies provides students with a unique opportunity to explore Ireland’s extraordinary tradition in literature (in both the English and Irish languages) and distinctive historical development, including its influence on the history of the United States. The Irish Studies faculty includes leaders in several fields, including English, history, film, television, and theatre, anthropology, American studies, marketing, politics, psychology, medieval studies, classics and Irish language and literature. The Irish Studies Program also organizes a calendar of intellectual and cultural activities in which undergraduates are encouraged to participate; visitors to campus have included Seamus Heaney and John Hume, both Nobel Prize winners, and other leading Irish writers and public figures.

Minor

The core of the program is a minor in Irish Studies. The minor helps students develop their understanding of Irish society, culture, and politics through both course work and firsthand experience of Ireland. To qualify for the minor, students must (a) demonstrate proficiency in Irish language (by taking IRST 10101, 10102, and 20103); (b) complete four three-credit Irish Studies courses; (c) and, under the supervision of a professor, write a capstone essay in their senior year that links the minor with their major. To complete the capstone essay students must enroll in the fall or spring semester of their senior year in a 3 credit course, AL 48006. All qualifying courses are listed in the Schedule of Classes under IRST; the list is available each semester from 422 Flanner Hall.

Dublin Program

The home of the Dublin program is the Kegough Naughton Notre Dame Centre in O’Connell House in the historic heart of Ireland’s capital. Each semester, roughly 35 Notre Dame students enroll for courses in the Centre and at Trinity College Dublin, University College Dublin, and the National College of Art and Design. The program includes several field trips and a variety of social and cultural activities. Students taking the minor in Irish Studies have a distinct advantage when applying for this highly competitive program.

Irish Internships

The Kegough-Naughton Institute for Irish Studies annually awards Keough Irish Internships, which place undergraduates in internship positions in Dublin relating to Irish politics and commerce, culture, and society. In the past, students have been placed in the Irish parliament, government departments, the Irish Film Centre, and various social service organizations. Most internships last for a period of seven weeks. Two internships are reserved for students taking the minor in Irish Studies.

For further information, students should consult Prof. Christopher Fox, director; telephone 631-3555.
Area Studies Minors

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on "Class Search" and selecting the subject Irish Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

LATIN AMERICAN STUDIES PROGRAM

Acting Director:
Holly Rivers

This program promotes opportunities for students to deepen their understanding of the region through a variety of courses, campus activities, internships, and firsthand overseas learning experiences. Through the Kellogg Institute, the program offers a calendar of cultural events, summer research and internship grants, current affairs panels and regular talks on Latin America by Notre Dame faculty and visiting lecturers. In addition, the institute brings several visiting fellows each semester who are from Latin America or who specialize in the region; these fellows visit classes and meet with students.

The core of the program is a minor in Latin American Studies. The minor aims to give students well-rounded training that complements their major area of study and to make this training easily recognized on a graduating student’s transcript. To qualify for the minor, students must demonstrate proficiency in Spanish or Portuguese (through two courses at the University or advanced placement), and complete four courses on Latin America that are distributed across at least three departments. During the senior year, students are required to complete high quality research through a senior essay. Students writing a senior thesis in their major department with a focus on Latin America may opt to take a fifth course in lieu of the essay.

Qualifying courses are listed each semester in the Schedule of Classes under LAST. They include courses such as Contemporary Latin American History, Economic Development of Latin America, Latin American Politics, Liberation Theology, Sociology of Development, and Spanish-American and Brazilian Literature. The program offers the John J. Kennedy Prize annually for an outstanding senior essay dealing with a Latin American topic. The summer research grants are offered through Kellogg to students after their junior year to encourage undergraduates to undertake original research on international subjects. The summer internships aim to provide undergraduates real-world experience in dealing with Latin American issues. The summer fellowships offer freshmen and sophomores the opportunity to engage in initial exploratory projects in Latin America. For more complete information about courses that qualify each semester for the minor degree, the calendar of events or the summer research and internship competitions, please consult the LASP Web page at kellogg.nd.edu/students/lasp, or contact Holly Rivers at hrivers@nd.edu.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on "Class Search" and selecting the subject Latin American Studies. Course descriptions can be found by clicking on the subject code and course number in the search results.

To Table of Contents
Mendoza College of Business

The Mendoza College of Business, an accredited member of the AACSB—Association to Advance Collegiate Schools of Business—was established in 1921.

Notre Dame’s business school is noted for challenging its students to “Ask More of Business,” by placing individual integrity at the heart of every decision, by tackling tough problems and building effective organizations, and by harnessing the power of business to serve the greater good of the global community.

The undergraduate student body of the college is made up of sophomores, juniors, and seniors. Students who are accepted into the Mendoza College of Business through the admissions process (page 21) and successfully complete the requirements of the First Year of Studies are admitted to the college at the beginning of sophomore year.

Programs of Study

At the Mendoza College of Business, students should expect challenging academic coursework, an excellent faculty, and many opportunities to interact with corporate executives and industry experts who can immerse them in the realities of today’s business world.

A holistic approach to business education springs from the deepest root of Notre Dame and radiates throughout the curriculum. Education involves more than developing just specialized skills, it involves teaching every student to recognize a role of service to the human community.

The business education program at Notre Dame seeks to expand learning beyond traditional silos and to integrate knowledge across business disciplines, in order to promote critical thought. Students develop the broader perspective they will need to lead in a complex, global economy.

The business world has always required people with initiative, a willingness to take risks and the stamina to thrive in a competitive world. To meet demands for new and better goods and services, leaders must manage operations which are extensive and multifaceted. The business leader whose job it is to put the work of many specialized people together into a smooth-working whole has traditionally developed business skills by rather accidental means: by knowing instinctively, by learning from experience, or by building upon some specialized body of knowledge.

The purpose of the business program is to focus attention directly on the skills and knowledge required by a leader today. The work is especially appropriate at Notre Dame. The responsibility of each business to its employees, customers, suppliers, owners, and the common good is being recognized and studied with growing intensity.

This responsibility raises ethical issues to which Notre Dame and its graduates should respond in a sound and practical way. The continuing effort to improve the practical application of ethical principles to competent performance in leadership roles is a prime concern of the Mendoza College of Business.

In light of the responsibility of the Mendoza College of Business for guiding students toward a liberal education in the Christian tradition and toward future responsibilities as business administrators, the following mission statement has been formulated:

The mission of the Mendoza College of Business is to build a premier Catholic business school that fosters academic excellence, professional effectiveness and personal accountability in a context that strives to be faithful to the ideals of community, human development and individual integrity.

Learning Objectives. The educational objective of the undergraduate program in the Mendoza College of Business is to assist and guide students in preparation for lifelong learning, for effective citizenship and for professional careers as competent and ethical participants in business, government, and other complex organizations. This is accomplished by educating students in the professional area of business while remaining true to the scholarly, liberalizing, and Catholic mission of the college and the University.

The Mendoza College of Business has established the following program learning objectives in support of this mission and objective:

- Competence to analyze and evaluate business opportunities and challenges.
  - Students will evaluate strategies and formulate plans to realize business opportunities.
  - Students will recognize business problems, gather and analyze relevant evidence, and reach and articulate informed solutions.
  - Students will incorporate cross-border information, risks and opportunities in decision-making.
- Professional and interpersonal skills. Students will produce professional quality business documents, deliver professional quality presentations, and work collaboratively.
- Proficiency in using information technology. Students will utilize current information communications technology.
- Expertise within an academic major. Students will demonstrate an understanding of the concepts, analytical tools, and technical skills within a discipline.
- Ability to integrate ethics into decision making. Students will apply ethical frameworks to business decisions.

The Program. The educational activities of a university and a college are broader than the mere teaching of courses. Nevertheless, one of the main expressions of an educational plan is its program of instruction. Several features of the program itself and certain fundamental concepts on which it is based deserve special comment.

The college recognizes four distinguishable but interrelated types of education to which future business leaders should be exposed: (1) study in the fields traditionally called liberal arts; (2) a basic understanding of the operation of a business enterprise; (3) an understanding of the economic and legal climate or atmosphere in which business functions and of which business is a part; (4) a professional concentration in a major for the student’s in-depth educational pursuit, which will also provide some preparation for future employment.

The curriculum of the three-year business program combined with that of the First Year of Studies requires approximately one-half of the instruction to be in traditional liberal studies. These courses are provided by the College of Arts and Letters and the College of Science.

Upon entering the Mendoza College of Business at the beginning of the sophomore year, the student registers for a program which introduces the basic tools of business and the functions of accounting, information systems, financial management, management, business statistics, marketing, business law, and ethics.

In the junior and senior years the student continues his or her studies using the analytical tools developed in the sophomore year. The student enters into a consideration of the operation of the business firm and the economic and legal climate of business.

The examination of the economic climate in which business must operate is concerned with the fundamentals of money and banking, the role of the federal government in terms of its fiscal and monetary policies, and the concepts of national income accounting that afford a basis for measuring and forecasting economic change. A student gives emphasis to his or her major and may either add to minimum major requirements or elect other course areas for study.
To Table of Contents
coursework, designed to support an area of research or study that is of mutual interest to a faculty member and a student. These courses contain advanced objectives beyond those covered in regularly scheduled courses—not introductory material or material taken from the popular literature that should more properly be considered “self-improvement” than academic in nature. A directed reading/special studies course will not satisfy a University, College, or major requirement. Directed readings or special studies outside of a student’s major in business may count as free elective or non-business elective credit only. A student may register for no more than three credit hours of directed readings or special studies in any given semester. No more than a maximum of nine directed reading or special studies credit hours may be applied toward the 128-credit-hour BBA degree requirements.

Study Abroad

Students from any of the majors in the Mendoza College of Business may participate in study abroad programs.

For more than a decade, Notre Dame has made it possible for students to earn credits toward graduation in study abroad programs. Travel, direct personal experience of another language and culture, and study in another tradition all broaden and deepen the liberal education of the whole person, to which the University has always been committed.

Qualified undergraduates can spend all or part of their sophomore or junior year in such places as Angers, France; Berlin, Germany; Dublin, Ireland; London, England; Fremantle, Australia; Rome, Italy; Monterrey and Puebla, Mexico; Nagoya and Tokyo, Japan; Santiago, Chile; Salvador da Bahia and São Paulo, Brazil; Beijing, Hong Kong and Shanghai, China; Toledo, Spain; Cairo, Egypt; and Athens, Greece. New program locations are periodically added.

A new international study program for Mendoza undergraduates, Global Business Scholars, will assemble a cohort of students from the Mendoza College of Business, Bocconi University in Milan, Italy and National University of Singapore who will enroll in coursework at all three universities over the course of three consecutive semesters. This is a unique opportunity to study at two of the world’s top universities in two different regions of the world. Business students who are interested in this program will be invited to apply in the fall of their freshman year. Global Business Scholars will study in Milan in the spring of sophomore year and Singapore in the spring of junior year.

For further information and advice on international study, students of the Mendoza College of Business may contact the Office of Undergraduate Studies, Room 101 Mendoza College of Business, and/or the director of the Study Abroad Programs, 105 Main Building.

Collegiate Sequence in International Business

The Collegiate Sequence in International Business consists of courses which offer Mendoza College undergraduates a broad exposure to the global nature of the world of business. Completion of the program is acknowledged with an International Business Certificate at graduation. While not a major or minor, this program enriches the student’s academic preparedness to take advantage of the multitude of opportunities and challenges awaiting them. The International Business Certificate substantiates a student’s acquisition of knowledge and perspective in the varying aspects of our ever-evolving global economy. The multi-disciplinary aspect of the course selection enhances the student’s ability to communicate and engage in the international arena with a greater appreciation of diverse commerce, cultural and social contexts.

Since its introduction, an increasing number of students have earned the International Business Certificate each year. While a semester or summer of international study is encouraged and may be helpful in completing the certificate requirements, the certificate may be earned by taking courses on the main campus.

Fifteen credit hours of courses are required from among a variety of offerings from the Mendoza College of Business, the College of Arts and Letters and other national and international institutions. A minimum of two courses must be selected from among the contemporary international business course offerings, and the remainder from contemporary international liberal arts course offerings.

Students must indicate their intention to complete the program via the Mendoza College of Business website no later than the end of their junior year. Once a student’s intent to pursue the Collegiate Sequence in International Business has been indicated, the Graduation Process System will include an International Business Certificate section so as to assist in tracking progress toward completion of the requirements.

Courses for the International Business Certificate may not be taken on a pass/fail basis. Courses may “double count”—e.g., HIST 30432, Irish History Since 1800, would qualify as a contemporary liberal arts requirement for the certificate and would also satisfy the history requirement for graduation.

For more information, contact the Mendoza College of Business Office of Undergraduate Studies.

Student Awards and Prizes

The Deane Award. This award is given to the graduate whose leadership has contributed most significantly to the progress of the college.

The Hamilton Awards. Founded by Robert L. Hamilton ’34, Racine, Wis., these awards are given to the outstanding senior in each of the four departments of the college.

The Herman Crown Award for Outstanding Achievement in Finance. An annual award made by the Department of Finance in memory of the late Herman Crown and given to the senior finance major with the highest overall grade point average.

Raymond P. Kent Award. An annual award given to a senior finance major for outstanding performance in finance classes.

Paul D. Gilbert Award for Leadership. An annual award given to a senior in the Department of Finance who embodies the characteristics that define our tradition of excellence: a person of keen intellect who enriches the ideals of Notre Dame.

LeClair Eells Award. An annual award given to a senior finance major for outstanding leadership.

Department of Finance Outstanding Service Award. Given to a senior in the Department of Finance for rendering outstanding service to the department.

Paul D. Gilbert Award for Leadership. An annual award given to a marketing senior for overall leadership in extracurricular departmental activities. The recipient is selected by the faculty of the Department of Marketing. The award is named for the late Paul D. Gilbert, a local business executive, civic leader, and longtime friend of the department.

Wesley C. Bender Award for Outstanding Performance in Marketing. An annual award given to the senior marketing major with the highest grade point average in marketing courses. The award is named for the first chairman of the Department of Marketing, Wesley C. Bender.

John R. Malone Award. An annual award given to the junior marketing major with the highest overall grade point average.

Robert M. Satterfield Award. Given to a marketing student for bringing enthusiasm, integrity, and a spirit of teamwork to the classroom.

David A. Appel Award. Given to a marketing student for exemplary service contributions.

Tara K. Deutsch Award. An annual award given to an accounting senior who has shown exemplary social consciousness and devotion to efforts to give hope to the less fortunate.

Accountancy Chairman Award. An annual award provided to an accounting senior who demonstrates
outstanding service to the Department of Accountancy.

The Accountancy Faculty Award. This award recognizes an outstanding senior in the Department of Accountancy in the Mendoza College of Business. It is given to an outstanding senior with one of the highest cumulative grade point averages.

Accountancy Excellence Awards. Given annually to up to 25 sophomores who declare accountancy as their major and have demonstrated outstanding economic achievement. The awards are funded by annual gifts from Deloitte, Ernst & Young, KPMG, and PricewaterhouseCoopers.

Crowe Horwath LLP Outstanding Accounting Student Scholarship Award. This award is designed to assist a junior entering their senior year. The criteria for the award are exhibited leadership skills and achievement of accountancy and overall GPAs of 3.3.

Peter Brady Award. Established to honor past faculty member Peter Brady, this award is given in recognition of outstanding academic performance.

Elmer Layden Awards. Given annually to graduating accountancy seniors in recognition of academic achievement. The awards are funded by the Elmer Layden Jr. Endowed Fund.

Brother Cyprian Awards. Given annually to graduating accountancy seniors in recognition of academic achievement. The awards are granted in honor of Holy Cross Brother Cyprian O’Hare (“Brother Zip”), who helped to launch Notre Dame’s accountancy education program in 1895 and later served as department chair.

James Dincolo Awards. Given annually to graduating seniors in each major in recognition of academic achievement. The awards honor former accountancy professor James Dincolo and are funded by an endowment in his name.

The Indiana Certified Public Accountants Society Award. Founded in 1950 by the board of directors of the Indiana Association of Certified Public Accountants, this annual award provides a plaque to an outstanding senior in accounting.

The Management Award. Given to the outstanding ITM senior in the Department of Management.

The Justin Harris Brunbaugh Memorial Award. Given annually to the graduating ITM major who has excelled academically and has been selected by the graduating seniors as best representing the unique and enduring spirit of Notre Dame.

Eugene D. Fanning Award. Given to a senior man and woman who demonstrate exceptional achievement in business communication; excellence in writing, speaking, listening, and interpersonal communication; and who demonstrate leadership potential, initiative, integrity, and respect for the dignity and rights of others.

The Charles G. Morrow Award for Business Excellence. This award was established by the five children of the late Charles G. Morrow, Class of 1938, in honor of his contributions to Notre Dame and the business community. Given to a graduating senior in the Mendoza College of Business, this award recognizes business excellence through documented service, leadership, and personal integrity.

Yasuko Furushashi Award, in honor of an esteemed colleague who was a pioneer in the area of international marketing. The award will be given on a calendar year basis to a student who, in the estimation of the faculty, writes the best essay capturing the marketing insights gained by the semester abroad experience. The winner each year may be either a junior or senior, depending upon the dates spent overseas.

Business Oriented Student Organizations and Activities

Students’ academic organizations are supported and encouraged by the administration and the faculty. These associations are actively managed by student officers. Members of the faculty serve in advisory capacities.

Honorary Societies.

Beta Gamma Sigma. Notre Dame shares with selected colleges of business nationwide this honorary society’s stated purposes of encouraging scholarship and achievement among business administration majors. It promotes education in business administration and fosters integrity in the conduct of business. Undergraduate membership in this organization is restricted to the upper 10 percent or less of the senior class and the upper 5 percent or less of the junior class for all full-time students. Faculty membership is limited to those with tenure in the Mendoza College of Business at Notre Dame.

Beta Alpha Psi. Accountancy majors who have demonstrated outstanding scholastic ability and the personal characteristics requisite to professional status are eligible for membership in the Beta Alpha Psi chapter of Beta Alpha Psi, the national professional and honorary accounting society. The purposes of this society are to encourage and foster the ideal of service as the basis of the accounting profession; to promote the study of accounting and its highest ethical standards; to act as a medium between professional persons, instructors, students and others who are interested in the development of the study or profession of accountancy; to develop high moral, scholastic, and professional attainments in its members; and to encourage cordial interaction among its members and the profession generally.

Association of Latino Professionals in Finance and Accounting (ALPFA). ALPFA is the premier business organization for expanding opportunities for Latino leadership in the global market. At Notre Dame this organization is designed to provide networking, career building, and leadership opportunities to diverse students who intend to major in accountancy, finance or information technology. ALPFA also provides scholarships, internships and other career advancing opportunities to diverse students.

National Association of Black Accountants (NABA). The Student Chapter of NABA of Notre Dame shall unite through membership accounting students who have similar interests and ideals, are committed to academic and future professional excellence, have a sense of professional and civic responsibility, and are concerned with enhancing opportunities for minorities in the accounting profession.

Finance Club of Notre Dame du Lac. The Finance Club strives to educate students about different career paths in finance and to help them prepare for a career in finance. The club provides members with education on job options, interview prep courses, and networking opportunities with alumni, employers, and current students in the field.

Investment Club of Notre Dame du Lac. The club was established to serve as an opportunity for all undergraduate students who are interested in the field of investments to develop and/or increase their knowledge of this special area of finance through activities designed as rewarding educational experiences.

Notre Dame Accounting Association (NDAA). The Notre Dame Accounting Association exists to provide junior and senior accountancy majors and sophomore business majors who are considering accountancy as a major, an organization which provides support, employment contacts, social gatherings and events, and a unifying bond in the form of membership. Sophomores, juniors, and seniors majoring in, or intending to major in, accountancy are eligible for membership.

Marketing Club. The Marketing Club provides an opportunity for junior and senior marketing majors to learn about the field of marketing. Business executives who are active in the marketing profession are invited to speak to members several times during the year. These businesspeople address the club on a variety of marketing, selling, and advertising topics. The Marketing Club is also very active in promoting the students for permanent positions or internships via a career night held each fall.

Information Technology Management Club, Notre Dame (ITMND). The purpose of ITMND is to pool the resources of all persons interested in the field of Information Technology Management (ITM) to more fully develop the academic, career, and social potential of all individuals in this dynamic field of study.

Student International Business Council (SIBC). As one of the largest student organizations on campus, the SIBC is committed to its vision of
establishing peace through commerce while educating its members and providing them an avenue to develop vital business and interpersonal skills with an international focus. The council is organized into various divisions representing all majors and concentrations within the Mendoza College of Business. Members are actively a part of projects which strive to offer unmatched, hands-on experience in everything from simulating the structure and debates of the European Central Bank and forming an in-depth fundamental and technical financial analysis of an international company, to managing the council’s marketing needs and developing and maintaining our own website.

The council is also dedicated to bettering international relations by means of socially-conscious activities. One of note is the Haiti Bednet project that receives funding from both the SIBC and the W.K. Kellogg Foundation.

Within a given year, members travel to all corners of the globe. Each year, the SIBC grants around 40 students the chance to work as interns and teachers in a rapidly growing number of foreign countries—giving members the real-world experience that is highly desired in the current job market.

**Notre Dame Wall Street Club.** Through a network of current students and alumni, the Notre Dame Wall Street Club provides resources and mentoring for ND students who wish to learn about careers on Wall Street. The club works closely with the Investment Office, Career Center, alumni, and senior mentors to help students network, learn about opportunities, and prepare for a successful career on Wall Street. Students interested in getting involved are encouraged to sign up for club emails, attend meetings, and reach out to club officers to talk about interests and opportunities.

**Unleashed.** We believe that educating individuals early in life about the importance of impact investing will encourage continuous involvement and contribution to all related fields. Unleashed is an organization for people from all disciplines, and intends to collaborate with other universities and colleges to learn from each other’s experiences. Our members are challenged to think in new ways and explore alternative financial solutions to existing social issues.

## Accountancy

**Deloitte Foundation Professor of Accountancy, and Department Chair:** H. Fred Mittelstaedt

**RPMG Professor of Accountancy:** Thomas F. Schafer

**Notre Dame Alumni Professor of Accountancy:** Peter D. Easton

**Deloitte Professor of Accountancy:** David N. Ricchiute

**Professors:**
- Brad A. Badertscher; Thomas J. Frecka (emeritus);
- Kenneth W. Milani; Michael H. Morris;
- William D. Nichols; Ramachandran Ramanan;
- James L. Wittenbach

**Associate Professors:**
- Jeffrey J. Burke; Chao-Shin Liu; Jeffrey S. Miller;
- Juan M. Rivera (emeritus); James A. Seida;
- Thomas L. Sobier; Sandra C. Vera-Muñoz

**Assistant Professors:**
- Stephanie Laroche; Asis Martinez-Jerez;
- Jennifer Sustersie Stevens

**Professional Specialists:**
- Edward F. Huns; Brian R. Levey; Tonia H. Murphy;
- James A. O’Brien

**Associate Professional Specialists:**
- James L. Fuchtemeyer; Laura L. Hollig; Michael J. Meyer; Janet L. O’Toole; Samuel Rancilla;
- William J. Schmuhl

**Program Objectives.** The AACSB separately-accredited Department of Accountancy provides outstanding accounting educational experiences for its students by (a) complementing and supporting the tradition of liberal arts/general education at Notre Dame, (b) adhering to the objectives of the undergraduate program of the Mendoza College of Business, and (c) developing and continuously improving an innovative accounting curriculum for successful careers as accounting professionals. The curriculum focuses on critical thinking/analysis, research, professionalism, teamwork, and communication.

The department provides students with the skills and knowledge necessary to succeed in accounting-related careers. The department also supports the activities of the Notre Dame Career Center by (a) maintaining an outstanding record of placing high percentages of graduates with national accounting firms and other large organizations such as Citigroup, Goldman Sachs, Disney and GE; and (b) supporting student desires to pursue other postgraduate options, including graduate education, volunteer work, and military service.

**Program of Studies.** The accounting sequence begins with Accountancy I and II (ACCT 20100 and 20200). These courses, normally taken in the sophomore year and required of all business students, are designed to provide a broad introduction to the accounting function, the profession of accountancy and the role of accounting in society.

Students choosing the accountancy major must complete the following Department of Accountancy requirements.

- ACCT 30110. Accounting Measurement and Disclosure I
- ACCT 30120. Accounting Measurement and Disclosure II
- ACCT 30210. Strategic Cost Management
- ACCT 30280. Decision Processes in Accounting
- ACCT 40510. Audit and Assurance Services

**The 150-Hour Rule for CPA Certification.**

Typically, 150 hours of college credit with an accounting concentration are necessary to be licensed as a CPA. The rules vary across states. Many students meet the 150-hour requirements through AP credit and overloads during their four-year undergraduate degree. Notre Dame also offers a one-year Master of Science in Accountancy program to help our students meet the 150-hour requirement as well as other state-specific course requirements.

### COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Accountancy. Course descriptions can be found by clicking on the subject code and course number in the search results.

To Table of Contents
Finance

William and Cassie Daly Professor of Finance, and Department Chair:
Richard R. Mendenhall
Kenneth R. Meyer Chair in Global Investment Management:
Roger D. Huang
C.R. Smith Professor of Finance:
Timothy J. Loughran
John W. and Maude Clarke Professor of Finance:
Paul H. Schultz
Notre Dame Professor of Finance:
John F. Affleck-Graves

Assistant Professors:
Robert Battalio; Jeffrey H. Bergstrand; Thomas Cosimano; Martijn Cremers; Barry P. Keating; Bill D. McDonald; Richard G. Sheehan

Associate Professors:
Shane Corwin; Zhi Da; Pengjie Gao; Michael L. Hemler; Sophie Shive; D. Katherine Spiess

Assistant Professional Specialists:
Andriy Bodnaruk; Priyank Gandhi; Benjamin Goler; Peter W. Kelly; Tae Kim; Andreas Neuhierl; Quiping Xu

Professional Specialists:
Carl Ackermann; Walter Clements; Margaret Forster; Jerry Langley

Program Objectives. The department offers courses with the dual objective of (1) providing a broad foundation so that students can pursue further study at the graduate level and (2) equipping students with the base of knowledge and skills necessary for entry into the financial world.

Program of Study. All students enrolled in the Mendoza College of Business are required to take an introductory finance course during their sophomore year; this course provides an overview of issues encountered by a firm’s financial manager. Finance majors must complete FIN 20150 Corporate Financial Management with a grade of C or higher. This course cannot be repeated for a higher grade. All business students are also required to complete two courses in business economics: FIN 30210 Managerial Economics and FIN 30220 Macroeconomic Analysis. The aim of these courses is to provide students with an understanding of the economic environment within which business enterprises operate.

In addition to the courses required of all candidates for the degree of bachelor of business administration, finance majors are required to take seven courses offered by the department. The required courses are FIN 30100 Financial Statement Analysis (or ACCT 30100 Corporate Financial Reporting), FIN 30400 Advanced Corporate Finance, FIN 30600 Investment Theory, and four 40000-level finance electives chosen from the specialized courses offered by the department.

The finance elective courses are designed to equip students with the knowledge to progress in whatever area of business they choose upon graduation. The subject matter in these courses—investments, corporate finance, financial markets, financial institutions, and real estate—can be tailored to meet the student’s individual interests. Graduates of the department are currently pursuing successful careers in many areas of business, including investment banking, commercial banking, and corporate financial management, among others.

Students who intend to take the examinations leading to the Chartered Financial Analyst (CFA) designation should structure their programs with that objective in mind. An additional business law class (ACCT 40710) should be included in their program, along with appropriate courses in accounting and investments, including FIN 40660 Fixed Income Investment Strategies.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Finance. Course descriptions can be found by clicking on the subject code and course number in the search results.
INFORMATION TECHNOLOGY MANAGEMENT MAJOR

The ITM program is designed to prepare students to become leaders in the use of information technology for the benefit of organizations and society. This program of study focuses on educating students about the development and use of information systems as decision-making and problem-solving tools. The program also is intended to develop an understanding of the managerial issues encountered in the introduction or operation of IT solutions in organizations, particularly, how these tools can be used to gain a competitive edge and to re-engineer an organization.

ITM Major Required Courses

In addition to the core courses listed above, all ITM majors must take the following four courses, and are eligible to take the elective courses that follow:

- MGTI 30610: Application Development 3.0 hrs.
- MGTI 30620: Business Intelligence 3.0 hrs.
- MGTI 30640: Networking and Security 3.0 hrs.

ITM Concentrations

In addition to the courses required by the major, ITM students may elect to pursue one of three concentrations: Business Analytics, Finance and Financial Accounting, and Visual Interface Design.

Business Analytics (CBAN)

The CBAN concentration will help prepare students for rapidly growing career opportunities in the business analytics and data sciences area. Building on the required courses in Business Intelligence and Systems Analysis & Design, these courses will provide greater depth of knowledge in those areas, as well a significant exposure to specific analytical applications.

A CBAN concentrator within ITM would take:

- MGTI 40640: Data Exploration 1.0 hr.
- MGTI 40630: Enterprise Data Management 1.5 hrs.
- MGTI 40620: Business Intelligence 1.5 hrs.
- MGTI 40600: Application Development 3.0 hrs.

Finance and Financial Accounting (CFFA)

The CFFA concentration will prepare students for a wide variety of careers, from positions at the interface between traders and developers in financial firms, to consulting firms, to the IT or finance divisions in any firm. Capacity in this concentration may be restricted, so be sure to indicate your interest soon after declaring the ITM major.

A CFFA concentrator within ITM would take:

- ACCT 30100: Corporate Financial Reporting 3.0 hrs.
- FIN 30400: Advanced Corporate Finance 3.0 hrs.
- ACCT 30210: Strategic Cost Management 3.0 hrs.
- FIN 30600: Investment Theory 3.0 hrs.

Visual Interface Design (CDSN)

The CDSN concentration will prepare students with an interest in design for careers in firms that provide strategy, digital marketing and technical services in the eCommerce arena. Capacity in this concentration may be restricted, so be sure to indicate your interest soon after declaring the ITM major.

- MGTI 30610: Application Development 3.0 hrs.
- MGTI 30620: Business Intelligence 3.0 hrs.
- MGTI 30640: Networking and Security 3.0 hrs.

Consulting Major Concentration

The consulting program prepares students to manage people and processes within both large and small organizations or to advise organizations on those management issues. A particular emphasis is placed on managing within organizations facing the challenges of rapid change and increased competition. The major is designed to provide sufficient flexibility for students to prepare for several career paths by preparing students to think systematically about the processes through which organizations achieve excellence.

Consulting Major Required Courses

In addition to the core courses listed above, all consulting majors must take any four of the following five courses:

- MGTC 30300: Management Competencies 3.0 hrs.
- MGTC 30450: Strategic Human Res. Mgt. 3.0 hrs.
- MGTC 30460: International Management 3.0 hrs.
- MGTC 40410: Values-Based Leadership 3.0 hrs.
- MGTC 40420: Innovation and Design 3.0 hrs.

Entrepreneurship Minor Required Courses

- BAEN 30420: Innovation and Design 3.0 hrs
- BAEN 40570: Entrep. Sales Management 1.5 hrs
- BAEN 40580: Legal Issues in Entrepreneurship 1.5 hrs

This course may not be counted toward the management consulting major elective requirement.

ENTREPRENEURSHIP MINOR

The Gigot Center for Entrepreneurship in the Mendoza College of Business offers an interdisciplinary minor in entrepreneurship to students enrolled in the College. The minor complements a business major by providing students the opportunity to study and learn about the development of new ventures that promote self-sufficiency, create jobs, and make significant contributions to our communities. Through unique, state-of-the-art courses, the minor helps students build skills needed to identify opportunities and launch new ventures. Students who combine a minor in entrepreneurship with one of the traditional business majors can find employment in corporate areas of research and development, new product key accounts, and launch turnaround management and strategic planning and execution.

Entrepreneurship Minor Required Courses

- BAEN 30500: Intro. to Entrepreneurship 3.0 hrs
- BAEN 30505: Social Entrepreneurship 3.0 hrs
- BAEN 30510: Go-to-Market 1.5 hrs
- BAEN 30520: Funding New Ventures 1.5 hrs
- BAEN 30530: Legal Issues in Entrepreneurship 1.5 hrs
- BAEN 40420: Innovation and Design 3.0 hrs
- BAEN 40570: Entrep. Sales Management 1.5 hrs

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:

- Management
- Management - Consulting
- Management - IT
- Business Administration - Entrepreneurship

Course descriptions can be found by clicking on the subject code and course number in the search results.

To Table of Contents
Marketing

John Cardinal O’Hara C.S.C. Professor of Business and Department Chair:
Shankar Ganesan
Raymond W. and Kenneth G. Herrick Professor of Marketing:
John F. Sherry Jr.
Aloysius and Eleanor Nathe Professor of Marketing Strategy:
William L. Wilkie
John T. Ryan Jr. Chair in Business Ethics and Professor of International Ethics:
Georges Enderle

Professors:
John J. Kennedy; Patrick E. Murphy; Joel E. Urbany

Associate Professors:
John F. Gaski; Timothy J. Gilbride; Elizabeth S. Moore

Assistant Professors:
Tonya W. Bradford; Yiting Deng; Emily N. Garbinski; Frank A. Germann; James E.B. Wilkie

Professional Specialists:
Kevin D. Bradford

Program of Studies. Students completing a degree in marketing at Notre Dame should: (1) understand the decision-making processes of buyers and sellers in a market; (2) know how to apply behavioral models and quantitative tools to the analysis of marketing issues; (3) be able to develop informed marketing and organizational strategies; (4) be effective in working in a team environment; and (5) recognize the ethical and social responsibilities of marketing practitioners.

In accordance with these objectives, all students in the Mendoza College of Business take Introduction to Marketing in their sophomore year. Students choosing marketing for their professional major are required to take MARK 30100 Consumer and Organizational Buyer Behavior, MARK 30120 Marketing Research, MARK 40100 Strategic Marketing, and three marketing electives.

The Marketing Research and Consumer and Industrial Buyer Behavior courses, taken in the junior year, develop a foundation in the tools and concepts germane to marketing decision making. During the senior year, students take Strategic Marketing, an advanced marketing strategy course that integrates marketing concepts and the other business functions through projects and simulations.

These courses are supplemented by the extracurricular activities of the Marketing Club and the Advertising Club.

All courses in the department focus on the performance of the marketing process but do not restrict it to a particular situation. Thus, the student majoring in marketing is prepared for a wide range of opportunities in business and nonbusiness organizations, including professional sales, customer service, product or brand management, advertising, public relations, market research, retail merchandising, and electronic commerce. Marketing majors are being employed by an increasing number of firms specializing in areas such as consulting, retailing, and other service businesses that have traditionally underestimated the importance of this function. Additionally, nonbusiness and nonprofit organizations (hospitals, educational institutions, charitable organizations) are discovering the critical importance of marketing in their operations and are seeking well-trained graduates.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Marketing. Course descriptions can be found by clicking on the subject code and course number in the search results.

Non-Departmental Courses

Assistant Dean for Undergraduate Studies:
Dale M. Nees, Mendoza College of Business

Many courses in the college are designed to cross departmental lines and provide basic tools during the sophomore and junior years or to foster the integration of various disciplines during the junior and senior years. These courses are open to all business students with appropriate prerequisites.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:

• Business (Non-departmental)
• Business Administration
• Business Administration - A&L
• Business Administration - Communication
• Business Administration - EG
• Business Administration - Ethics
• Business Administration - Business Law
• Business Administration - Management
• Business Administration - SC
• Business Administration - UG

Chicago, Illinois
College of Engineering

The College of Engineering was established as a distinct unit of the University in 1897, although a program in civil engineering was offered in 1873. The college comprises five departments, including aerospace and mechanical engineering, chemical and biomolecular engineering, civil and environmental engineering and earth sciences, computer science and engineering, and electrical engineering.

Since its inception, the College of Engineering has regarded the primary purpose of all higher education as the development of the intellect, discriminatory power, and judgment in all students to enable them to arrive at sound decisions in their personal lives and in the professional lives they will pursue after graduation. The programs of studies offered in the various departments of the college are, therefore, constructed to give the student a good knowledge of the basic sciences and of engineering principles, and to prepare the student for the manifold duties of an educated professional and for the cultural life of an educated person. Classroom instruction is amplified by laboratory work and design experiences that give the student insight into the application of principles to practical problems. Detailed information about the College of Engineering and its many programs can be found at engineering.nd.edu.

Engineering at Notre Dame combines technical inquiry with a creative bent (novel methods of using and producing materials, components, devices, and systems) to develop innovations that can improve the health, well-being, and quality of life for all persons. Consistent with the University's Catholic mission and heritage, the College of Engineering's mission is founded on the principle that the creation and transfer of knowledge should reflect a profound and complete respect for the dignity of all persons and for the greater common good of humanity. To appropriate the words of the University's founder, Rev. Edward A. Sorin, C.S.C., the college must be, first and foremost, a force for good in the world.

To that end, the college will continue to engage in transformational research in its core competencies—energy, biomedical/bioengineering, environmental science/engineering, and national/personal security—as they address the important needs of humanity, while inspiring students of all levels to scholarship and service. It will also continue to develop its expertise in electronic materials and devices, wireless and information systems, natural hazard mitigation, flow physics and control, geochemistry and geosciences, hydrology, and computational science and engineering, translating research outcomes into commercial ventures as possible, so that the efforts of Notre Dame engineering researchers produce the greatest good for society.

Accreditation and Academic Association. The College of Engineering is a member of the American Society for Engineering Education. All engineering curricula are accredited by the Engineering Accreditation Commission of ABET, [http://www.abet.org](http://www.abet.org). The computer science curriculum is accredited by the Computing Accreditation Commission of ABET, [http://www.acrb.org](http://www.acrb.org).

Registration of Engineers. Registration of engineers is required for many fields of practice. Recent graduates need not acquire registration immediately upon graduation, but they benefit by applying early for the required state examination. Graduating from accredited programs such as those offered by Notre Dame facilitates registration as a professional engineer.

Registration of Geoscientists. Registration is required for geoscientists to practice in many states. The degree in environmental geosciences offered by the Department of Civil and Environmental Engineering and Earth Sciences provides the necessary academic background for graduates to successfully complete registration as a professional geoscientist.

Programs and Degrees

The College of Engineering offers curricula leading to the undergraduate degrees listed below:

- B.S. in aerospace engineering
- B.S. in chemical engineering
- B.S. in civil engineering
- B.S. in computer engineering
- B.S. in computer science
- B.S. in electrical engineering
- B.S. in environmental earth sciences
- B.S. in environmental engineering
- B.S. in environmental geosciences
- B.S. in mechanical engineering

To complete all degree requirements, the student must take and pass all of the courses specified in the Bulletin for the given degree and must earn the total minimum number of course credit hours specified for the degree.

To obtain two undergraduate degrees from the College of Engineering, a student must successfully carry out an approved program of courses totaling no less than 157 credit hours, depending on the programs. These must include all of the courses specified in the Bulletin for each degree.

The college offers advanced degrees in the following areas:

- M.S. in aerospace engineering
- M.S. in bioengineering
- M.S. in civil engineering
- M.S. in computer science and engineering
- M.S. in electrical engineering
- M.S. in environmental engineering
- M.S. in environmental earth sciences
- M.S. in environmental engineering
- M.S. in environmental geosciences
- M.S. in mechanical engineering
- M.S. in environmental geosciences
- Ph.D. in aerospace and mechanical engineering
- Ph.D. in bioengineering
- Ph.D. in chemical engineering
- Ph.D. in civil engineering
- Ph.D. in computer science and engineering
- Ph.D. in electrical engineering

The Department of Aerospace and Mechanical Engineering also offers a non-thesis master of engineering (M.E.) in mechanical engineering.

The details of the programs and the engineering courses offered at the graduate level are in the Graduate School Bulletin of Information.

Engineering Common Core. All engineering curricula consist of each of the following:

- Arts and Letters Core: 24 credit hours. Writing and Rhetoric (one course), University Seminar* (one course), history (one course), social science (one course), fine arts or literature (one course), philosophy (two courses) and theology (two courses).

  *The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or from the first course in theology or philosophy, and will satisfy the respective requirement.

Basic Science Core: 33 credit hours. MATH 10550 Calculus I; MATH 10560 Calculus II; MATH 20550 Calculus III/MATH 20580 Introduction to Linear Algebra and Differential Equations; CHEM 10171 General Chemistry: Fundamental Principles; PHYS 10310 General Physics I; PHYS 10320 General Physics II; EG 10111, 10112 Introduction to Engineering Systems I and II

First Year of Studies. A first-year student enters the Notre Dame First Year of Studies for one academic year of basic collegiate studies before entering a department within the college. In the spring of the first year of studies, a first-year student intending to major in engineering will select a degree program. If the student is scholastically sound for the given choice, approval will be given.

A first-year student intending to pursue any of the College of Engineering degree programs should complete the following courses by the end of the first year:
<table>
<thead>
<tr>
<th>First Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>WR 13100. Writing and Rhetoric</td>
</tr>
<tr>
<td>MATH 10550. Calculus I</td>
</tr>
<tr>
<td>CHEM 10171. General Chemistry: Fundamental Principles</td>
</tr>
<tr>
<td>EG 10111. Introduction to Engineering Systems I</td>
</tr>
<tr>
<td>Arts and Letters course†</td>
</tr>
<tr>
<td>Moreau First Year Experience</td>
</tr>
<tr>
<td><strong>Total:</strong></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Second Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>University Seminar+</td>
</tr>
<tr>
<td>MATH 10560. Calculus II</td>
</tr>
<tr>
<td>CHEM 10122. General Chemistry: Biological Processes or other technical course*</td>
</tr>
<tr>
<td>PHYS 10310. General Physics I</td>
</tr>
<tr>
<td>EG 11121. Introduction to Engineering Systems II</td>
</tr>
<tr>
<td>Moreau First Year Experience</td>
</tr>
<tr>
<td><strong>Total:</strong></td>
</tr>
</tbody>
</table>

+ The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy, and will satisfy the respective requirement. The College of Engineering recommends selecting the first courses in theology and philosophy, as well as composition, to enable maximum schedule flexibility in later semesters.

* The College requires CHEM 10171 or CHEM 10181 for all students. Aerospace, environmental and mechanical engineering all require a second chemistry class, either CHEM 10122, CHEM 10172, or CHEM 10182. Chemical engineering students must take either CHEM 10122, CHEM 20274 or another approved advanced chemistry course. CHEM 10122 will satisfy a technical elective requirement in all other degree programs, and is strongly recommended for students pursuing the bioengineering minor or any bio-focused concentration within a degree program.

† See Arts and Letters Core above.

**General Requirements.** The University of Notre Dame reserves the right to change at any time regulations included in its Bulletin with respect to admission to the University, continuance therein and graduation therefrom. Every effort is made to give advance information of such changes.

The number of credit hours carried by the undergraduate student in the College of Engineering may not exceed 19 hours without permission, granted at the discretion of the assistant dean for academic affairs.

**Engineering Scholars Program (ESP).** The College of Engineering has developed a program for those students whose achievements have identified them as among the best of entering first-year students. This program provides special opportunities for classroom interaction, cultural enrichment, and social leadership. Admission to the program is by invitation. ESP students take a special yearlong seminar in the first year that satisfies two University core requirements.

Participation in this program is independent of participation in the Engineering Honors Program.

**Engineering Honors Program (EHP).** The Engineering Honors Program provides an intensive, research-based experience for students who have shown exceptional promise during their first two years in the college. Admission to the EHP is made after application to the individual department program no earlier than fall of the student's junior year. Each student in this program will be guided by a faculty member who functions as the student's research advisor and mentor, and students and faculty meet regularly in both formal and informal settings. To graduate with recognition as an honors program student, each student must, at a minimum, engage in two semesters of research and complete a research thesis in the student's major field in the senior year, and be eligible for Latin honors at graduation. Individual departments retain the right to add other criteria to this minimum set of requirements.

**International Study Opportunities.** The University strongly supports study abroad and has encouraged the programs in the College of Engineering to participate. At present, there are semester- or year-long opportunities during the academic year for juniors in Dublin, Ireland; London, England; Perth, Australia; Puebla, Mexico; Cairo, Egypt; and Santiago, Chile. The programs in Mexico and Chile require the student to be fluent in Spanish. In each location, students must take at least two technical courses to remain on track for graduation. Programs vary by semester, and not all locations are appropriate for every major in the college. Students should contact a department adviser to work out any details.

The college currently offers two summer programs for engineering undergraduates who have completed at least the first-year engineering curriculum, in London, England, and Alcoy, Spain.

Admission to all programs is competitive and requires demonstration of satisfactory academic performance.

**ROTC Programs.** ROTC students who complete their programs may use a maximum of six credits of upper-level air, military, or naval science courses as substitutes for specified degree requirements determined by each department. Three of these credits may substitute for either a history or social science requirement; three may substitute for a technical elective at the discretion of each major program. No other air, military or naval science credits not so substituted may be credited toward degree requirements in programs in the College of Engineering.

**Liberal Arts in the Curriculum.** Students enrolled in the College of Engineering must satisfy all University degree requirements, including writing and rhetoric (three credits), University Seminar* (three credits), history (three credits), social science (three credits), fine arts or literature (three credits), philosophy (six credits) and theology (six credits).

For specific information on course offerings to satisfy these requirements, students must consult the online course registration system.

*The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy, and will satisfy the respective requirement.

**Engineering Business Practice.** The college recognizes the importance of providing its graduates with opportunities to learn how engineers function in the world of business and offers a multi-course sequence (EG 40421/40422) that provides education in this area. Students in all majors of the college may take at least the first course to satisfy technical elective requirements. The courses increase the effectiveness of engineering graduates by developing an understanding of the dynamics of business operations.

They include issues related to ethics, leadership, and business practices such as marketing, management, finance, and human resources, and they examine the professional and leadership characteristics of modern industrial leaders. In the second course, students develop a business plan and execute it using a computer simulation program.

**Combination Five-Year Programs with the College of Arts and Letters.** The college recognizes the benefits of a broad background in cultural, social, and technical subjects and, in 1952, in cooperation with the College of Arts and Letters of the University, instituted a five-year program that combines the liberal arts program with the requirements of the various engineering programs. Students who complete this combination program will earn two degrees: the degree of bachelor of arts and the degree of bachelor of science in the engineering major pursued. Dual-degree students are eligible to join the Reilly Program in Engineering and Arts and Letters described at [http://reilly.nd.edu/reilly-dual-degree-in-arts-and-letters-and-engineering/]().

Students pursuing this program must have strong scholastic ability and be acceptable to both the dean of the College of Arts and Letters and the dean of the College of Engineering. Choice of the program should be indicated by the end of the second year, but choice of a particular field in Arts and Letters may be deferred until the end of the third year.

The general sequence of courses in the five-year engineering-liberal arts program is found under “Dual Degree Programs” later in this section of the Bulletin.

**Combination Five-Year Dual-Degree with the College of Science.** Consistent with the college’s recognition that the liberal arts help students to understand the societal contexts in which engineering solutions are developed, the college also recognizes that a background in the natural sciences or mathematics, which are also foundational to a strong liberal arts experience, can provide engineering students with a broader context for solving societal problems and meeting humanity’s
needs. Thus, in 2013, the colleges of engineering and science approved a plan of study that would allow students to earn a bachelor’s degree in each college in five years. The general requirements for this program are found under “Dual Degree Programs” later in this section of the Bulletin.

Combination Five-Year Program with the Mendoza College of Business. To address the needs of engineering students who wish to integrate management and engineering, the College of Engineering and the Mendoza College of Business have established a program in which a student may earn the bachelor of science degree from the College of Engineering and the master of business administration from the Mendoza College of Business.

The program is structured so that a student who has completed the first three years of the bachelor’s degree program, if accepted through a competitive admissions process, completes the master of business administration and the bachelor of science in engineering by the end of the fifth year. This program may require summer or intercession work.

Students who wish to pursue this program should have a superior scholastic record in their undergraduate program and must apply to and be accepted by the MBA program during their third year in the College of Engineering.

The general sequence of courses in the five-year engineering-MBA program may be found under “Dual Degree Programs” later in this section of the Bulletin.

Combination Five-Year Program with Saint Mary’s College. Students at Saint Mary’s College may elect to earn a B.S. in biology, chemistry, or mathematics from Saint Mary’s while simultaneously earning a B.S. in a related engineering program at Notre Dame. This program requires five years of study, with only the fifth year at Notre Dame to satisfy residency requirements. Students interested in this program must consult the appropriate advisor(s) at Saint Mary’s College before enrolling in required courses at Notre Dame.

Through a special arrangement, students at Saint Mary’s College, Notre Dame, Ind., may take a combination program of science classes at Saint Mary’s and engineering classes at Notre Dame beginning in their sophomore year at Saint Mary’s. The student will earn her bachelor of science degree from Saint Mary’s at the end of the fourth year, and complete her bachelor of science in engineering degree in her fifth year at Notre Dame.

Combination Five-Year Programs with Other Schools. The highly desirable objective to infuse more liberal arts and sciences work into the education of engineering students has also been met also through 3-2 engineering programs with select liberal arts institutions.

The University of Notre Dame has entered into agreements with Assumption College, Worcester, Mass.; Bethel College, Mishawaka, Ind.; Carroll College, Helena, Mont.; Elon University, Elon, N.C.; Franciscan University, Steubenville, Ohio; Goshen College, Goshen, Ind.; Kings College, Wilkes-Barre, Penn.; Loyola University Chicago, Chicago, Ill.; Saint Anselm College, Manchester, N.H.; Stonehill College, Easton, Mass.; University of St. Thomas, St. Paul, Minn.; University of St. Thomas, Houston, Tex.; Xavier University of Louisiana, New Orleans, La., and the Atlanta University Center, comprising Morehouse College, Spelman College and Clark Atlanta University in Atlanta, Ga., whereby the liberal arts and sciences part of a combination five-year program is given by these respective colleges and the engineering part by Notre Dame. In these dual-degree programs, the student spends three years at a college of first choice and two years at Notre Dame. After completion of the five-year program, the student receives a bachelor of arts or bachelor of science degree from the first college and a bachelor of science in engineering degree from Notre Dame.

The sequence of courses for any of these programs will vary depending on the program of study at the other institution. No attempt has been made to set up a rigid pattern, and each participating institution has some freedom concerning the choice and arrangement of courses, provided that the coverage in the areas of mathematics, physics, chemistry, computing, introductory engineering, theology, philosophy, history, social science, and literature or fine arts is appropriate. It is expected, however, that students will complete the equivalent of the first two years of the desired College of Engineering program before applying for transfer.

To be eligible for an undergraduate degree, the student must complete a minimum of 60 credit hours at the University with a minimum of 75% of the degree credit hours (not less than 90 credit hours) earned after high school graduation through college and university courses, and be enrolled in the last semester on the main university campus. Please consult the Undergraduate Academic Code for further details.

Details of these programs may be obtained by writing to the institutions concerned or to the College of Engineering.

Graduate Programs in Engineering.* The Graduate School of the University of Notre Dame comprises four divisions: humanities, social science, science, and engineering. The division of engineering was organized in 1946 with power to grant advanced degrees in the departments of aerospace and mechanical engineering, chemical and biomolecular engineering, civil and environmental engineering and earth sciences, computer science and engineering, and electrical engineering. The general conduct of graduate work is under the jurisdiction of the Graduate Council of the University, the members of which serve as specified in the Academic Articles. Director of the program in the engineering division is the dean of the College of Engineering.

* Reference should be made to the Graduate School Bulletin of Information for details of these programs and to the Web at http://graduateschool.nd.edu/departments-and-programs/degree-programs-by-division.

MINORS

The College of Engineering offers six minors, open to all University students who have taken the appropriate pre-requisite courses for upper-level engineering and science courses. For students in the College of Engineering, only one course required for the minor may double-count towards degree requirements and the minor. Students in other colleges should consult their own program department for similar restrictions.

Bioengineering

This minor, offered by the Department of Aerospace and Mechanical Engineering and the Department of Chemical and Biomolecular Engineering, comprises a six-course sequence that teaches students how to use the tools of engineering analysis with the fundamentals of the engineering and life sciences, to enliven the understanding of living organisms, medical treatments and biochemical pathways and to provide quantitative predictions and insight towards the design of medical and biological devices and processes. The six-course minor consists of three foundational courses in bioengineering, cell biology and more advanced courses in the biology field, along with three courses specializing in areas such as biomaterials, biomechanics, biotransport/microdevices, tissue engineering and science courses. For students in the minor may double-count towards degree requirements and the minor. Students intending to pursue this minor should take CHEM 10122 prior to starting the minor. Details are provided at ame.nd.edu/undergrad-programs/minors-and-concentrations.

Computational Engineering

This minor, offered by the Department of Aerospace and Mechanical Engineering, recognizes the importance of computational tools in all disciplines of engineering and gives students exposure to the fundamentals of programming and numerical methods, experience and skills in computer usage, and knowledge of applications from a range different areas. The minor requires fifteen credit-hours (nominally five courses) selected from among a list available at ame.nd.edu/undergrad-programs/minors-and-concentrations.

Energy Engineering

This minor, offered by the Department of Aerospace and Mechanical Engineering, recognizes that Energy is an important subject of current interest that involves many engineering and non-engineering
To Table of Contents

disciplines, and enables students to develop a stronger background in and to prepare better for professional jobs or higher studies in the area. This minor differs from the Energy Studies minor as described below in that it focuses on the technical aspects of energy and requires courses concentrated in engineering and science. The minor requires five courses from among a list available at https://engineering.nd.edu/academics/undergraduatedegreeprograms/minors-and-concentrations.

Energy Studies
This minor, offered by the Center for Sustainable Energy at Notre Dame (cSEND) through the Department of Chemical and Biomolecular Engineering, differs from the minor in Energy Engineering described above in that it requires less technical content and more broadly examines the issue of energy from a variety of perspectives. Through this minor, students will learn to: quantify energy resources and use and recognize the fundamental laws of thermodynamics that govern energy conversion; develop a functional knowledge of the historical and economic frameworks that guide decision-making in the energy industry today; develop oral and written communication skills necessary to convey the critical information about energy to the non-expert; understand the environmental consequences such as pollution and climate change of today’s energy technologies; understand the linkages between ethics and energy utilization; critically assess the strengths and weaknesses and the prospective impact of alternative energy technologies; and understand the influence of geopolitics, economics and public policy on our nation’s and the world’s energy future. The minor requires:

ENER 20101
ENER 20102
Capstone project or CSC 33985
and three courses (nine credit-hours) concentrated either in a technical or non-technical area of energy studies, approved in advance by the director of the Energy Studies Minor, selected from a list maintained by cSEND.

Engineering Corporate Practice
This minor, offered by the college in cooperation with the Mendoza College of Business, is restricted to students in their final year as undergraduates in the college, and participation may be restricted due to capacity limitations in Mendoza. To qualify for consideration for the minor, a student must complete the first two courses of the Engineering Business sequence, EG 40421/44421 and EG 40422, by the end of junior year. The minor comprises those two courses, a course in economics, and accountancy and corporate finance courses offered through Mendoza. Complete details for the minor are available at https://engineering.nd.edu/academics/undergraduatedegreeprograms.

Environmental Geosciences
This minor, offered by the Department of Civil and Environmental Engineering and Earth Sciences, provides background for students interested in learning about the physical sciences, emphasizing the processes that occur near or at the surface of the Earth, and the impact of human activity on such processes. The minor requires 16 credit hours distributed across four courses, plus a field experience:

All students pursuing the minor must take:

ENERG 20110 Physical Geology & Lab 4
ENVG 20200 Mineralogy 4
ENVG 45200 Field Trip 1
And, one 4-credit and one 3-credit ENVG course.

For CE majors, either CE 20500, Engineering Geology, or CE 40320, Environmental Chemistry, may count toward the ENVG minor and the CE major. For ENVG majors and College of Science Students, ENVG/SC 20110, Physical Geology, may count toward the major.

Concentrations
Several College departments also offer concentrations, restricted to students within particular majors. Concentrations comprise a set of at least three 3-credit-hour courses focusing on a specific discipline, designed to give students greater depth of knowledge in that area. Concentrations may be completed within degree requirements, by selecting departmental and technical electives from pre-approved lists of courses. Please see each department’s web site for more information. The list of currently approved concentrations includes:

**Department of Aerospace & Mechanical Engineering**
- Aerospace Engineering
- Bioengineering
- Computational Engineering
- Control and Mechanical Systems
- Design and Manufacturing
- Energy
- Materials
- Solid Mechanics
- Thermal and Fluid Sciences

**Department of Chemical and Biomolecular Engineering**
- Biomolecular Engineering
- Energy
- Materials

**Department of Civil and Environmental Engineering & Earth Sciences**
- Hydraulics (Civil Engineers only)
- Structures (Civil Engineers only)

**Department of Computer Science & Engineering**
- Bioinformatics and Computational Biology
- Cloud Computing
- Cybersecurity
- Media Computing
- Mobile Computing

**Department of Electrical Engineering**
- BioSystems
- Communications
- Energy
- Multimedia
- Semiconductors and Nanotechnology

College Awards and Prizes

**COLLEGE OF ENGINEERING AWARDS**

*The Rev. Thomas A. Steiner Prize.* From a fund established in 1948 by former students of Rev. Thomas A. Steiner, C.S.C., former dean of the College of Engineering, a cash award is made to seniors in the college who have been selected for their all-around excellence as students.

*The Reilly Scholar Designation.* The designation of Reilly Scholar is given annually to those fifth-year seniors enrolled in the dual Engineering/Arts and Letters program who have excelled academically and otherwise during their first four years as students.

*The American Darin Prize.* From a fund set up by the Darin family in their father’s name, a cash award is made to several engineering juniors who have demonstrated exceptional and steady improvement over their first four semesters at Notre Dame.

**Departmental Awards**

**AEROSPACE AND MECHANICAL ENGINEERING**

*Patrick J. Deveny Award.* Presented each year to a junior aerospace student who has displayed the most diligence and persistence in the pursuit of undergraduate studies in aerospace engineering.

*Vincent B. Goddard Design Award.* Presented each year to a senior in aerospace engineering for outstanding performance in the aerospace design course.

*Sigma Gamma Tau Honor Award.* Presented each year to a member of the Notre Dame chapter in recognition of outstanding academic performance and demonstrated professional potential.

*Pi Tau Sigma Honor Award.* Presented each year to a member of the Notre Dame chapter in recognition of outstanding academic performance and demonstrated professional potential.

*The Aero Propulsion Award.* Presented each year to a senior in aerospace engineering for outstanding performance in the Gas Turbine and Propulsion class.

*The Zahm Prize for Aeronautical Engineering.* Founded in 1946 by Dr. Albert J. Zahm, distinguished pioneer in aeronautics and at one time professor of physics at the University of Notre Dame. The award is made to the senior aerospace engineering student who, in the estimation of the faculty of the program, has achieved the most distinguished record in professional subjects.

*The Zahm Prize for Mechanical Engineering.* Beginning with 2007–08 year, awarded to a senior mechanical major who, in estimations of the faculty, has achieved the most distinguished record in professional subject.
**CHEMICAL AND BIOMOLECULAR ENGINEERING**

**AICHE Scholarship Award.** Presented to the junior chemical engineering student who has the highest scholastic average during the first two years of study.

**American Institute of Chemists Award.** Presented to an outstanding senior in the Department of Chemical and Biomolecular Engineering.

**Chemical Engineering Alumni Award.** Presented to one or more seniors who have an outstanding combination of scholarship and extracurricular activities.

**Chemical Engineering Faculty Award.** Presented to the senior with the highest scholastic average after seven semesters of study.

**Chemical Engineering Research Award.** Presented to one or more undergraduate students who have performed outstanding undergraduate research.

**James P. John Scholarship in Chemical Engineering.** A fund dedicated to helping meet the financial need of top performing seniors.

**John C. Tracy Award.** Presented to the student with the highest score in thermodynamics.

**CIVIL AND ENVIRONMENTAL ENGINEERING AND EARTH SCIENCES**

**The American Society of Civil Engineers Activity Award.** The Indiana section each year presents an award to the two senior students most active in the student chapter of ASCE.

**Leroy D. Graves Academic Improvement Award.** Presented to a senior civil engineering student for significant development in academic performance.

**The Sydney Kelcy Outstanding Scholar Award.** Presented to a senior civil engineering student for excellence and creativity in academics.

**The Kenneth R. Laser Award.** Presented to a senior civil engineering student for leadership, integrity, and service to fellow students and community as determined by that student’s classmates.

**James A. McCarthy Scholarship in Civil Engineering.** Presented to a junior civil engineering student for outstanding academic and professional excellence.

**The Walter L. Shilts Award for Undergraduate Achievement.** Presented to a senior civil engineering student who has fully fulfilled his or her potential as a student through hard work and dedication to obtaining the best possible education.

**The Rev. Alexander Kirsch, C.S.C., Award.** To the senior receiving a degree in geological sciences who has evidenced high qualities of personal character, scholarship, and leadership.

**Dr. Raymond C. Gutsick Award.** To the graduating senior who has demonstrated the most promise in geological research as evidenced by a successful research project.

**COMPUTER SCIENCE AND ENGINEERING**

**Outstanding Computer Engineering Award.** To the graduating senior in computer engineering who has evidenced high qualities of personal character, scholarship, and leadership.

**Outstanding Computer Science Award.** To the graduating senior in computer science who has evidenced high qualities of personal character, scholarship, and leadership.

**ELECTRICAL ENGINEERING**

**The James L. Massey Award.** For achievement in electrical engineering, recalling communication theory, undergraduate teaching, and the Binary Examination.

**The Basil R. Myers Award.** For achievement in electrical engineering, recalling circuit theory, the English language, and St. George Day at Notre Dame.

**The Arthur J. Quigley Award.** For achievement in electrical engineering, recalling communication theory, undergraduate teaching, and the Binary Examination.

**The Lawrence F. Stauder Award.** For achievement in electrical engineering, recalling electrical power, the IEEE Student Branch, and the Notre Dame alumni.

**The EIC William L. Everitt Award.** For achievement in electrical engineering, computer engineering, or computer science, with an interest in the area of communications.

**HONOR SOCIETIES**

**TAU BETA PI**

In 1960, the Indiana Gamma Chapter of Tau Beta Pi was installed at Notre Dame to foster a spirit of liberal culture in the engineering college and to recognize those who have conferred honor upon Notre Dame by distinguished scholarship and exemplary character as undergraduates in engineering, or by their attainment as alumni in the field of engineering. Seniors in the top fifth of their class and juniors in the top eighth of their class are eligible for election under rigid standards of scholarship, character, leadership, and service.

**ETA KAPPA NU**

In 1962, the Delta Sigma Chapter of Eta Kappa Nu, the national honor society for electrical engineers, was installed at Notre Dame. Juniors, seniors, and alumni are elected to membership on the basis of scholastic attainment, leadership, and quality of character.

**PI TAU SIGMA**

In 1963, the Sigma Beta Chapter of Pi Tau Sigma, the national honor society for mechanical engineers, was installed at Notre Dame. Juniors, seniors, and alumni are elected to membership on the basis of scholastic attainment, leadership, quality of character, and a demonstration of probable future success in engineering.

**CHI EPSILON**

In 1966, the Notre Dame Chapter of Chi Epsilon, the national honor society for civil engineers, was installed at Notre Dame. Chi Epsilon recognizes those civil engineering students, faculty, and alumni who have displayed superior qualities in scholarship, character, practicality, and sociability during their professional careers.

**SIGMA GAMMA TAU**

In 1981, the Notre Dame Chapter of Sigma Gamma Tau, the national honor society for aerospace engineering was installed. This organization recognizes and honors those individuals in the field of aeronautics and astronautics who have distinguished themselves through scholarship, integrity, service, and outstanding achievement. Senior students who rank in the top third of their aerospace engineering class are eligible for admission.

**UPSILON PI EPSILON**

In 2004, the Notre Dame chapter of Upsilon Pi Epsilon, which recognizes the academic excellence of students in the computing and information disciplines, was installed at Notre Dame. Outstanding juniors, seniors, and graduate students from the Department of Computer Science and Engineering are honored each year with induction.
PROFESSIONAL SOCIETIES

The several departments of the college actively support student chapters of their respective professional societies; these are:

American Institute of Aeronautics and Astronautics (AIAA)
American Institute of Chemical Engineers (AIChE)
American Society of Civil Engineers (ASCE)
American Society of Mechanical Engineers (ASME)
Association of Computer Machinery (ACM)
Institute of Electrical and Electronic Engineers (IEEE)
National Society of Black Engineers (NSBE)
Society of Hispanic Professional Engineers (SPHE)
Society of Women Engineers (SWE)

The Engineering Leadership Council (ELC), a student organization with representation from the college’s professional and honor societies, coordinates the activities of all engineering organizations and encourages the pursuit of a professional attitude in the student body of the College of Engineering. The ELC sponsors activities of general interest to the engineering student body.

Aerospace and Mechanical Engineering

Aerospace and Mechanical Engineering

Chair:
Gretar Tryggvason

Associate Chair:
Joseph M. Powers

H. Clifford and Evelyn A. Brosky Professor of Mechanical Engineering:
Frank P. Incropera

Roth-Gibson Professor of Engineering:
Eric J. Jumper

Viola D. Hank Professors of Mechanical Engineering:
Hafiz M. Atassi (emeritus); Gretar Tryggvason

Clark Professor:
Thomas C. Corke

Professors:
Stephen M. Barill (emeritus); Raymond M. Brach (emeritus); Kenneth Christensen; Patrick E. Dunn (emeritus); Edward W. Jerger (emeritus); Francis M. Kobayashi (emeritus); Stuart T. McComas (emeritus); Thomas J. Mueller (emeritus); Robert C. Nelson (emeritus); Glen L. Niebur; Timothy C. Ovaert; Samuel Paolucci; Joseph M. Powers; Francis H. Raven (emeritus); Hirotsaka Sakaiue; Mihir Sen; Steven B. Skaar (emeritus); Steven R. Schmidt; Albin A. Szewczyk (emeritus); Flint O. Thomas; Meng Wang; Kwang-tzu Yang (emeritus)

Associate Professors:
David B. Go; J. William Goodwine Jr.; John W. Lucey (emeritus); Karel Matous; Scott C. Morris; Ryan K. Roeder; Hirotsaka Sakaiue; James P. Schmiedeler; Michael M. Stanisic

Assistant Professors:
Joel Boerckel; Hyungrok Do; David Hoelzle; James E. Houghton (emeritus); Thomas Juliano; Tengfei Luo; Zhangyi Peng; Pinar Zorlutuna

Associate Professional Specialists:
Rodney L. McClain; John Ott; Michael Seelinger; Richard B. Streiber

Program of Studies. The Department of Aerospace and Mechanical Engineering offers programs of study that lead to degrees of bachelor of science and master of science in aerospace engineering and mechanical engineering, respectively; master of engineering for mechanical engineers; and doctor of philosophy.

Program in Aerospace Engineering. This program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The aerospace program is designed to prepare those students interested in the design and operation of aircraft and space vehicles for entrance into a professional career. The curriculum, based on a solid foundation in mathematics, physics, chemistry and the engineering sciences, places emphasis on such basic aerospace disciplines as aerodynamics and fluid mechanics, orbital mechanics, and solid and structural mechanics, as well as such integrating disciplines as design, experimental methods and systems analysis. Technical specializations in the junior and senior year enable students to emphasize specific technical areas, including design and manufacturing, thermal and fluid sciences, bioengineering, solid mechanics, materials, control and mechanical systems and computational engineering.

The aerospace engineering program uses laboratories in Fitzpatrick Hall of Engineering and in the Hessert Laboratory for Aerospace Research. The Hessert laboratories contain superior facilities for instruction and research.

Students are encouraged to participate in the activities of the student chapter of the American Institute of Aeronautics and Astronautics and to enter the national student paper competition conducted by the parent institute. Outstanding achievement in the aerospace program is recognized by membership in Sigma Gamma Tau, the national aerospace honor society.

Further details about the standard aerospace program, the London Program and electives can be found on the Web at ame.nd.edu.

Aerospace Engineering Program Educational Objectives and Student Outcomes. The Engineering Accreditation Commission of ABET encourages the explicit statement of the Program Educational Objectives and Learning Outcomes for all engineering programs. Publication of the objectives and desired outcomes, as well as efforts to determine if these are being achieved, are part of the process of continuous improvement in engineering education.

Program Educational Objectives. The Department of Aerospace and Mechanical Engineering has established the following Program Educational Objectives that are consistent with the mission of the University and College of Engineering. These objectives have been developed in collaboration with faculty, students, and industry representatives. Program Educational Objectives are “broad statements that describe the career and professional accomplishments that the program is preparing the graduates to achieve.” These are usually recognized as accomplishments in the first few years after graduation.

The aerospace engineering program at Notre Dame appreciates the diverse set of individual goals to which our students aspire, so it has expressed the Program Educational Objectives in two forms. Graduates of the program should:

- Secure a position consistent with their personal aspirations and qualifications
- Assume a technical or managerial leadership role with their organization
- Participate as a volunteer with at least one professional or social service organization

In addition, depending on the career path selected, graduates would be prepared to achieve one or more of the following:
Aerospace and Mechanical Engineering

- Be recognized as the key technical specialist within their organization for a particular professional specialty
- Receive a graduate or professional degree
- Start their own company
- Be granted a patent

**Student Learning Outcomes.** To achieve these Program Educational Objectives, the curriculum is designed to provide the following Student Learning Outcomes that describe what students are expected to know or be able to do by the time of graduation.

**First Principles and Problem Solving:** Graduates understand fundamental scientific principles of engineering and can apply them to the solution of problems or systems by way of analytical and numerical treatment.

**Engineering Skills and Professional Practice:** Graduates understand the essential role of experimentation in engineering, and they are able to compare and gain insight from a combination of analytical, numerical, and experimental results. They are able to use modern engineering software tools, including CAD, and are capable of programming digital computers.

**Design:** Graduates have a pragmatic understanding of design and the engineering design process and are able to contribute in various ways to the design of a product, system, or process.

**Communication:** Graduates are able to communicate well, both orally and in writing, and function effectively in multidisciplinary groups, both in leadership and support roles.

**Professional Responsibility:** Graduates are familiar with the responsibilities of professional practice, the roles that aerospace engineers play in society, the kinds of issues they deal with, and their influence in society.

**First Year of Studies**
First-year students intending to major in aerospace engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

**Sophomore Year**
First Semester
MATH 20550. Calculus III 3.5
PHYS 10320. General Physics II 4
AME 20221. Mechanics I 3
AME 20211. Introduction to Aeronautics 3
AME 20214. Introduction to Engineering Computing 1
Arts and Letters course+ 3

Second Semester
MATH 20580. Introduction to Linear Algebra and Differential Equations 3.5
AME 20222. Mechanics II 3
AME 20241. Solid Mechanics 4
AME 20231. Thermodynamics 3
AME 20213. Measurements and Data Analysis or AME 30361. Computer Aided Design and Manufacturing 4/3

First Year of Studies
First Semester
AME 30314. Differential Equations, Vibrations and Controls I 3
AME 20213. Measurements and Data Analysis or AME 30361. Computer Aided Design and Manufacturing 4/3
AME 30341. Aerospace Structures 3
AME 30331. Fluid Mechanics 3
Arts and Letters course+ 3

Second Semester
AME 30315. Differential Equations, Vibrations and Controls II 3
AME 30333. Theoretical and Experimental Aerodynamics 4
AME 30332. Compressible Aerodynamics 3
AME 30334. Heat Transfer, or AME 30381. Orbital and Space Dynamics 3
Arts and Letters course+ 3

Junior Year
First Semester
AME 40461. Flight Mechanics and Introduction to Design 3
AME 40451. Aerospace Dynamics 3
AME 40431. Gas Turbines and Propulsion 3
Technical Specialization* 3
Arts and Letters course+ 3

Second Semester
AME 30381. Orbital and Space Dynamics or AME 30334. Heat Transfer 3
AME 40462. Aerospace Design 4
Technical Specialization/Prof. Development 3
Technical Specialization 3
Arts and Letters course+ 3

Total for the four years: 133 semester hours.

* A list of approved technical specialization and professional development courses is available on the department website.

+ See “Arts and Letters Core” on the first page of the College of Engineering section.

The most current information for the degree program course requirements is available on the department website, ame.nd.edu.

The Program in Mechanical Engineering. This program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The department offers a well-rounded program at the bachelor’s level. The curriculum is built on a sound foundation in mathematics, physics, chemistry and the engineering sciences. In the undergraduate curriculum the student may obtain, by suitable selection of elective courses, a program suited to enable him or her to specialize in a given sequence or to prepare as a generalist. Elective course sequences are available in aerospace, design and manufacturing, thermal and fluid sciences, bioengineering, solid mechanics, materials, control and mechanical systems, and computational engineering.

To prepare for today’s changing technological world, the program requires use of a computer in many of its courses.

Finally, for professional growth during formative years as engineers in training, students are encouraged to participate in the activities of the student chapter of the American Society of Mechanical Engineers. Outstanding achievement in the mechanical engineering program is recognized by membership in Pi Tau Sigma, the national mechanical engineering honor society.

Further details about the mechanical engineering program, the London Program and electives can be found on the Web at ame.nd.edu. The program below pertains only to the Classes of 2015 and beyond. Prior class requirements are noted below.

Mechanical Engineering Educational Objectives and Student Learning Outcomes. The Engineering Accreditation Commission of ABET encourages the explicit statement of the Program Educational Objectives and Student Learning Outcomes for all engineering programs. Publication of the objectives and desired outcomes, as well as efforts to determine if these are being achieved, are part of the process of continuous improvement in engineering education.

Program Educational Objectives. The Department of Aerospace and Mechanical Engineering has established the following Program Educational Objectives that are consistent with the mission of the University and College of Engineering. These objectives have been developed in collaboration with faculty, students, and industry representatives. Program Educational Objectives are “broad statements that describe the career and professional accomplishments that the program is preparing the graduates to achieve.” These are usually recognized as accomplishments in the first few years after graduation.

The mechanical engineering program at Notre Dame appreciates the diverse set of individual goals to which our students aspire, so it has expressed the educational objectives in two forms. Graduates of the program should:

- Secure a position consistent with their personal aspirations and qualifications

The most current information for the degree program course requirements is available on the department website: (ame.nd.edu).

Total for the four years: 131 semester hours.

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Aerospace and Mechanical Engineering. Course descriptions can be found by clicking on the subject code and course number in the search results.

A number of introductory graduate-level courses, described in the Graduate School Bulletin of Information and on the department website, are open to advanced undergraduates, with the permission of the department chair, to satisfy upper-level electives.

To Table of Contents
Chemical and Biomolecular Engineering

Chair and Dorini Family Professor of Energy Studies: Edward J. Maginn
Arthur J. Schmidt Professor of Chemical & Biomolecular Engineering: Paul W. Bohn
Benerat Keating-Crawford Professor of Engineering: Joan F. Brennecke
Bayer Corporation Professor of Engineering: Hsueh-Chia Chang
Anthony Early Professor of Energy and the Environment: Thomas F. Degnan
Matthew H. McCloskey Dean of the College of Engineering: Peter K. Kilpatrick
Keating-Crawford Professor of Chemical & Biomolecular Engineering: Mark A. Stachberr

Professors:
Jeffrey C. Kantor; David T. Leighton Jr.; Mark J. McCready; Paul J. McGinn; William F. Schneider; Y. Elaine Zhu

Associate Professors:
Basar Z. Bilgicer; Davide A. Hill

Assistant Professors:
Ruinl Guo; Jason C. Hicks; William A. Phillip; Jennifer L. Schafer; Jonathan K. Whitmer; Jeremiah J. Zartman

Professional Specialist:
Salma R. Saddawi

Program of Studies. The Department of Chemical and Biomolecular Engineering offers programs of study leading to the degrees of bachelor of science in chemical engineering, master of science in chemical engineering, and doctor of philosophy. The program leading to the bachelor of science degree is accredited by the Engineering Accreditation Commission of ABET, Inc.

The traditional role for chemical engineers of providing the principal technical guidance for the chemical and petroleum industries has been greatly augmented in recent years. Chemical engineers now direct the advancement and utilization of technology for the food processing and consumer products industries and are playing increasing roles in the manufacture of the highest density computer chips and in the invention of advanced drug delivery systems. In addition to creating remediation strategies, chemical engineers contribute to the prevention of deleterious impact of society on the environment by the development of new green process technologies that eliminate the use of dangerous solvents. They are the leaders in the field of sustainability which is the implementation of energy sources and raw material supplies that can sustain humankind indefinitely. In all of these areas, complex processes involving chemical changes of matter occur and, as such, sound training in chemistry, physics, mathematics, and allied applied sciences are prerequisites to resolving the challenges posed by these complex systems.

The undergraduate program at Notre Dame is notable for its combination of a strong fundamental focus in chemical engineering courses with a broad humanities and science education provided in courses other than chemical engineering. The science and humanities courses prepare students both for the study of chemical engineering and to understand the complex scientific, social, and moral issues of the world today. Our intention in emphasizing fundamentals is to develop students' intellect and equip them with enduring knowledge in chemical engineering and related fields. Thus, our undergraduate chemical engineering curriculum provides students with not only a preparation for a career as a chemical engineer, but for a lifetime of learning and a lifelong career in areas that may include law, medicine, or business.

University of Notre Dame Undergraduate Program Goals: Students who have graduated in Chemical Engineering at Notre Dame have successfully pursued a wide range of career paths. The faculty believe that this has resulted from the interests of students who enter our program and is facilitated by our emphasis on fundamental aspects of chemical engineering. Consistent with the mission of the University, the Department of Chemical and Biomolecular Engineering program seeks to develop students who:
1. Pursue knowledge and commensurate understanding and critically evaluate the consequences of these.
2. Communicate clearly and effectively.
3. Demonstrate proficiency in the art and science of chemical engineering with a strong understanding of the fundamental principles of pure and engineering sciences on which chemical engineering practice is based.
4. Appreciate their social and moral responsibilities both within their careers in engineering and through service in their communities.
5. Understand how chemical engineering connects with other major disciplines to produce the goods and services needed by society.

Within the chemical engineering degree program, students can complete concentrations in materials, energy and biomolecular engineering. A suggested course sequence for students interested in going to medical school is also available.

More than one-third of the chemical engineering undergraduates participate in research activities with faculty and graduate students at some time in their careers in areas such as advanced materials, ionic liquids, separations, biomaterials, microfluidic devices, catalysis, fuel cells, and drug delivery techniques.

Further details about the chemical engineering program may be found at cbe.nd.edu. The program below pertains only to the Classes of 2015 and beyond.

Total for the four years: 129 semester hours.

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:
- Chemical & Biomolecular Engineering
- Energy Studies

Course descriptions can be found by clicking on the subject code and course number in the search results.

Certain graduate courses are open to advanced undergraduates with permission from the department chair or director of undergraduate studies, and the course instructor.

We emphasize a strong foundation in science and engineering with a focus in the areas of structural engineering, environmental engineering, environmental fluid dynamics, and geochemistry. Our professions develop the fundamental and applied technologies that impact people’s health, well-being, and ability to thrive through our work on infrastructure (buildings, bridges, tunnels, waterways, ports, roads, dams, offshore energy platforms, wind farms), clean water supply (water resources, water distribution and water treatment), sewage and waste disposal (wastewater treatment), protection from natural hazards (earthquakes, tornadoes, tsunamis, riverine floods, winds, waves, hurricanes), energy systems (offshore oil extraction, wind farms, hydro-electric, nuclear fuel reprocessing), and safe and sustainable environments (pollutants in the atmosphere, groundwater, surface water, reactive transport of pollutants within these systems, biological and geochemical processes, the interplay of natural processes such as mineral-water-rock-bacteria interactions, and anthropogenic issues such as transport of toxic heavy metals and safe disposal of nuclear waste), and the larger geophysical and geochemical earth system. CEEES strives to provide a stimulating and unique interdisciplinary environment for learning and research by blending traditional disciplines of science and engineering. CEEES offers outstanding educational programs for those aspiring to contribute as leaders in the fields of Civil Engineering, Environmental Engineering, and Environmental Earth Sciences. CEEES educational objective is to provide students with the knowledge, skills, vision and ethical basis to contribute as leaders in design, construction and protection of our civil infrastructure, and understanding, management and remediation of the environment.

CEEES has very innovative undergraduate programs that synergize classroom teaching with research, field trips, lecture series and hands on experiences that expose students to the realities and professionals in their field. These programs are designed to be inspirational and lead to inquiry as well as lead to life-long connections in the field. All of our students experience in-depth fieldtrips and the majority of our students participate in research programs, thematic professional competitions, and professional lecture series. In addition, our students have a strong tradition of service in programs such as NDSEED, a student organization that proposes, designs, finances and builds bridges for poor communities in Central America, and Engineers Without Borders. The department has a long tradition of placing its graduates from both undergraduate and graduate programs into sectors that truly serve society from their most basic needs of clean water and shelter to the advanced energy and transportation systems that sustain a thriving economy and a high standard of living. Our alumni have a history of success and exemplary leadership in academia, consulting, national laboratories, construction, and industry.
PROGRAM IN CIVIL ENGINEERING.

This program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The department presents a well-rounded program for the bachelor’s degree with the first two years devoted primarily to the basic principles of science and engineering. The third and fourth years are devoted to courses in the basic areas of civil engineering—structural analysis and design, hydraulics and hydrology, water supply and wastewater disposal, materials of construction, geotechnical engineering, and transportation engineering. A student may emphasize a particular area of interest by selecting either the structures or hydraulics concentrations. Civil engineering electives in the senior year may be regular courses, individualized directed study or research courses. The civil engineering program will culminate with major design experience in the senior year. Student teams will work closely with industry professionals and faculty who act as consultants on real-world design projects to facilitate the student’s understanding of the design process. Additionally, the curriculum for all programs in the CEEES department requires students to take the Challenges and Innovation Seminar series which brings in top engineering professionals from industry, consulting, academia, and government to discuss major problems of interest and their solutions.

The program provides a firm foundation in the many basic disciplines comprising the broad field of civil engineering. This is especially desirable, for often in the course of professional development the civil engineer is asked to coordinate the planning, design, and construction of highly complex systems and must use many or all of these disciplines.

The department has excellent facilities for research available to both graduate and undergraduate students. These facilities include a structural dynamics/structural control laboratory; a materials testing and structural research laboratory; a groundwater hydrology field laboratory; and a number of analytical laboratories for water, wastewater and hazardous waste treatment.

The professional aspects of civil engineering are emphasized and promoted by the activities of a student chapter of the American Society of Civil Engineers, in which all students of the department are eligible and encouraged to participate. In addition, a junior class field trip examines major infrastructure projects and environmental systems including tall buildings, bridges, stadiums, transportation systems, navigations systems, flood protection works, clean water supply, and wastewater systems.

Further details about the civil engineering may be found on the Web at ceees.nd.edu.

First Year of Studies
First-year students intending to major in civil engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Sophomore Year
First Semester
MATH 20550. Calculus III 3.5
PHYS 10320. General Physics II 4
CE 20150. Statics 3
CE 20111. Planet Earth 3
CE 30160. CE Materials 4
CE23601. Chlg. & Innov. of CE Eng. 0

Core Concentration Elective** 3
Technical Elective** 3
CE Elective** 3
CE 43601. Chlg. & Innov. of CE Eng. Arts and Letters course+ 3

Total degree required credits 134

*See “Arts and Letters Core” on the first page of the College of Engineering section.

**Note: All electives are as defined in the academic guide for the Department of Civil and Environmental Engineering and Earth Sciences on the department’s website.

Certain graduate courses are open to advanced undergraduates with permission of the department chair.

ENVIRONMENTAL ENGINEERING

Program in Environmental Engineering. The Environmental Engineering program at Notre Dame will be seeking accreditation by the Engineering Accreditation Commission of ABET, http://www.abet.org. This program was founded by the Department of Civil and Environmental Engineering and Earth Sciences to provide students with a quantitative preparation for professional careers or continued higher education regarding the assessment and remediation of human impact on our environment. It is a unique program that prepares students to look at all aspects of water and environmental problems from a range of perspectives including the Earth system, water movement (hydrology, fluid flow), environmental chemistry, geochemistry, and reactive transport. The Environmental Engineering degree program will prepare students to understand the necessary foundational chemistry, fluid flow and mixing mechanics, all within the context of the Earth system.

The environmental engineering program combines classroom, laboratory and field studies. Students are encouraged to participate in a semester study abroad, such as the Australia program (during the fall semester, junior year), which provides additional opportunity for field-based studies. All students are encouraged to conduct independent research under faculty supervision during their junior and senior years. The environmental engineering program will culminate with major design experience in the senior year. Student teams will work closely with industry professionals and faculty who act as consultants on a real-world design projects to facilitate the student’s understanding of the design process. Additionally, the curriculum for all programs in the CEEES department requires students to take the Challenges and Innovation Seminar series which brings in top engineering professionals from industry, consulting, academia, and government to discuss major problems of interest and their solutions.

The professional aspects of civil and environmental engineering are emphasized and promoted by the activities of a student chapter of the American Society of Civil Engineers, in which all students of the department are eligible and encouraged to participate. In addition, a junior class field trip examines major infrastructure projects and environmental systems including tall buildings, bridges, stadiums, transportation systems, navigations systems, flood movement (hydrology, fluid flow), environmental chemistry, geochemistry, and reactive transport.

Total credit hours required for degree 132

Program in Environmental Earth Sciences.
The Environmental Earth Sciences program at Notre Dame was founded by the Department of Civil and Environmental Engineering and Earth Sciences to provide students with a quantitative preparation for professional careers or continued higher education in the disciplines of the earth and environmental science. This degree program blends the disciplines of fluid dynamics and hydrology, environmental chemistry and geochemistry framed within the larger context of Earth systems and focuses more on the geology side of the environment and planetary systems. The program provides a foundation in the physical sciences, with emphasis on processes that occur near or at the surface of Earth, and the impact of human activity on such processes. Students explore the geochemical, mineralogical and hydrological properties of Earth’s crust, and develop an understanding of the interplay of natural processes such as mineral-water-rock-bacteria interactions, with anthropogenic issues such as transport of toxic heavy metals and safe disposal of nuclear waste.

The environmental earth sciences program combines classroom, laboratory and field studies. Students are encouraged to participate in a semester study abroad, such as the Australia program (during the fall semester, junior year), which provides additional opportunity for field-based studies. All students are encouraged to conduct independent research under faculty supervision during their senior year. Additionally, the curriculum for all programs in the CEEES department requires students to take the Challenges and Innovation Seminar series which brings in top engineering professionals from industry, consulting, academia, and government to discuss major problems of interest and their solutions.

An undergraduate major in Environmental Earth Sciences prepares a student for graduate study (M.S., Ph.D.) in many aspects of earth science and environmental science and engineering, as well as for admission to a variety of professional schools. Graduates with a B.S. degree may enter careers in diverse areas such as the National Park Service, industry, environmental consulting, and government research laboratories. An Environmental Earth Science degree is also ideal background for those planning to teach in secondary schools at all levels.

Below you will see an example of the curriculum that can be followed by an incoming student who wishes to major in environmental earth sciences. However, the flexibility of our undergraduate program allows students to switch to environmental earth sciences if...

All of the courses associated with this academic program can be found online at registrar.nd.edu/ students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Civil Engineering. Course descriptions can be found by clicking on the subject code and course number in the search results.

Computer Science and Engineering

Schubmehl/Prein Professor and Department Chair of Computer Science and Engineering:

- Kevin W. Bower

Teledy H. McCourtney Professor of Computer Science and Engineering:

- Peter M. Kogge

Professors:

- Steven C. Bass (emeritus); Danny Z. Chen;
- Eugene W. Henry (emeritus); X. Sharon Hu;
- John J. Uhran Jr. (emeritus)

Research Professor:

- Gregory R. Maday

Duda Family Professor of Engineering:

- Patrick Flynn

Frank Freimann Collegiate Associate Professor of Computer Science and Engineering:

- Nitesh Chawla

Associate Professors:

- Jay B. Brockman; David Chiang; Jesús A. Izaguirre; Michael Niemier; Christian Poellabauer; Aaron Stiegel; Douglas Thain; Chao Li

Clare Boothe Luce Assistant Professor:

- Laurel D. Riek

Assistant Professors:

- Marina Blanton; Sidney D’Mello; Collin McMillan; Tijana Milenkovic; Raul Santeslices; Walter Scheier; Dong Wang; Timothy Weninger

Associate Professional Specialists:

- Ramzi K. Bualian

Assistant Professional Specialist:

- Peter Bull

Research Associate Professor:

- Scott Emrich

Program of Studies. The Department of Computer Science and Engineering offers programs of study that lead to the degrees of bachelor of science in computer science and bachelor of science in computer engineering. The program in computer engineering is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The program in computer science is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org. The department also offers programs that lead to a master of science in computer science and engineering, and a Ph.D.

Educational Goals. The goals of the programs in computer science and computer engineering are (1) to prepare all students for careers in the public or private sector; (2) to prepare outstanding students for graduate study; (3) to develop lifelong learning skills in all students; (4) to provide comprehensive education in computer science, including theoretical foundations, software and hardware systems, and applications; and (5) to ensure significant design experience including working in teams.

Program Outcomes. At the time of completion of the undergraduate program, all graduates should
possess (1) the ability to specify, design, test, and document software; (2) an understanding of current computer software and hardware technology; (3) an understanding of science, engineering, and mathematics; (4) a comprehensive general education; (5) the ability to continue learning in response to professional needs as well as personal desire for self-improvement; and (6) an understanding of personal and professional responsibility to society.

Programs. Programs in the Department of Computer Science and Engineering follow the four-year curricula listed below. These include required and elective courses in the basic, pure, and applied sciences, as well as the humanities, electrical engineering, computer science, and computer engineering. Emphasis is on developing a mastery of the key principles underlying the organization, operation, and application of modern computers to real problems, with a solid grounding in math and science to permit a quantitative analysis of such solutions. In addition, central to both programs is the development of the ability to function, both independently and in multidisciplinary teams, and to be prepared for continued change in future computing technology and what effects it will have on all aspects of society. Opportunities for specialization in several professional computer disciplines are available. Students are individually assisted and advised in their choices of elective courses.

The Department of Computer Science and Engineering offers concentrations in five areas: Bioinformatics and Computational Biology, Media Computing, Mobile Computing, Cloud Computing, and Cyber Security. Each concentration is designed to offer a structured set of elective courses around an organized theme. Upon a student’s successful completion of a CS/CPEG program with a chosen concentration, the concentration will appear on the student’s transcript.

Further information about computer science and computer engineering programs may be found on the Web at cse.nd.edu.

PROGRAM IN COMPUTER SCIENCE
The Program in Computer Science focuses on the application of computers to real problems, especially in the design, development, and use of software. The program is designed to foster an understanding of the key properties of algorithms (the mathematical statements of how problems are to be solved), and how to recognize and design good algorithms to solve real problems in efficient fashions. The program also includes developing the ability to design large, efficient, portable, and scalable pieces of software that implement good algorithms in ways that are useful to the end users, and to do so in ways that use modern software development tools and techniques.

First Year of Studies
First-year students intending to major in computer engineering or in computer science when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Statement of Goals and Objectives. The goals of the Department of Electrical Engineering’s academic programs are to provide quality education and to foster leading-edge research as means of training highly qualified engineers and leaders of tomorrow, in keeping with the mission of the University of Notre Dame. The educational objectives through which this goal is met are:

• Graduates will successfully participate in the electrical engineering profession.
• Graduates will enroll in and complete high quality MS, PhD, JD, MBA and MD programs.
• Graduates will exploit the breadth in their education to secure a diverse set of initial positions and will demonstrate professional agility in adapting to varied career paths and changing professional landscapes.

Program of Studies. The Department of Electrical Engineering offers programs of study that lead to the degrees of bachelor of science and master of science in electrical engineering and doctor of philosophy. The program leading to the bachelor of science degree is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Program in Electrical Engineering. The four-year curriculum, listed below, includes required and elective courses in the pure and applied sciences, the humanities, and electrical engineering. Emphasis is on the mastery of fundamental principles, with added depth and provision for specialization in the major professional areas of communications, control systems, electronic circuit design and analysis, microelectronics and integrated circuit fabrication, photonics, and signal image processing. Students are individually assisted and advised in their choices of elective courses. Departmental facilities include laboratories for electronics, circuits, electrophysics, control systems, communications, integrated circuit fabrication, photonics, microwave circuit/device characterization, and digital signal/image processing.

Further details about the electrical engineering program may be found on the Web at ee.nd.edu.

College of Arts and Letters

Program of Studies. The five-year dual degree program between the College of Arts and Letters and the College of Engineering enables the student to acquire degrees from both colleges—the bachelor of arts from the College of Arts and Letters and the bachelor of science degree in a chosen program of the College of Engineering.

This combination program, instituted in 1952, offers students the advantages of both a liberal and a technical education. The student completing one of these combination programs has a background in the humanities and social sciences as well as a degree from one of the programs offered by the College of Engineering. Advisors for the program are available for consultation about the advisability of entering the program and about meeting the particular needs of each student pursuing this program. Qualified students are eligible to receive modest scholarship support from the John J. Reilly Endowed Scholarship program during their third, fourth, and fifth years of study.

The decision to enter the program ideally should be made prior to beginning the sophomore year, although students can also enter the program at a later stage. Three sets of requirements must be met by students in the program: University requirements, Arts and Letters requirements and Engineering requirements, as the following table indicates.

DUAL DEGREE PROGRAM WITH THE COLLEGE OF SCIENCE

 coordinators:

 Michael Ryan
 Assistant Dean
 College of Engineering
 Malgorzata Dobrowolska-Furdyna
 Associate Dean
 College of Science

 Program of Studies. The five-year dual degree program between the College of Science and the College of Engineering enables the student to acquire degrees from both colleges—the bachelor of science from the College of Science and the bachelor of science degree in a chosen program of the College of Engineering.

 This combination program, instituted in 2013, offers students the advantages of the liberal arts aspects of natural science and mathematics education coupled with a strong technical education. Because a student may enter the program from either college, both colleges have agreed to a certain degree of flexibility in allowing students to meet degree requirements. The following guidelines apply to all students intending to pursue this dual degree program, regardless of the student’s initial college:

 (1) Students must complete the degree requirements of both colleges, including University requirements (satisfied only once for both degrees), college requirements (with liberal appropriate substitutions for similar courses), and major requirements (with limited appropriate substitutions for similar content). Students may double-count more than one course between both degrees as appropriate to eliminate unnecessary duplication in course content.

 (2) Students must earn 30 usable (degree-appropriate) credits past engineering degree requirements. Usable credits are defined as credits—including AP, IB, credit-by-examination and course credits—that are of high enough level that they could be applied to degree requirements. For example, additional AP credits in economics could be used to satisfy a free elective credit in a degree program, but AP credit for statistics (ACMS 10145) cannot be used in either degree program because the class level is lower than the statistics requirements for any degree program in science or engineering.

 (3) Students must complete sequences of courses in mathematics, chemistry and physics, as described in the course sequences below and the corresponding table on the following page. This requirement ensures that all necessary material is covered through a sequence of courses, and that students do not duplicate content by taking classes from more than one approved sequence.

 (4) The exact set of courses a student must complete to earn both degrees will be determined by agreement between the appropriate associate/assistant deans of each college and will, naturally, depend on the pair of majors selected. Ordinarily, a student will present a plan of study that incorporates the above rules for approval.

 Approved Math Sequences:

 1. MATH 10550, 10560, 20550, 20580, 30650

 1a. MATH 10550, 10560, 20550, 20580

 2. MATH 10550, 10560, 20610, 20750

 3. MATH 10550, 10560, ACMS 20550, 20750, 20620

 4. MATH 10550, 10560, PHYS 20451, 20452

 Approved Chemistry Sequences:

 1. CHEM 10171/11171, 10122

 2. CHEM 10171/11171, 10122, 10172/11172

 3. CHEM 10171/11171, 10172/11172

Master of Business Administration Program
Michael Ryan
Assistant Dean
College of Engineering

DUAL DEGREE PROGRAMS

The five-year dual degree program between the Mendoza College of Business and the College of Engineering enables the student to earn the bachelor of science in a chosen field of the College of Engineering and the master of business administration.

This program, instituted in 1991, offers students the opportunity to better integrate study in engineering and in management. The student completing this program has a background in the management sciences, as well as the first professional degree in one of the fields of engineering. Because it is a demanding program, only those students of superior scholastic ability, who have both the aptitude and motivation necessary for the combined graduate and undergraduate program, should apply. Advisors for the program are available for consultation about the advisability of applying for the program and about meeting the particular needs of each student pursuing this program.

This program is open only to those currently enrolled Notre Dame students who have completed three years of a degree program in the College of Engineering. Students interested in the MBA/engineering program should apply to the MBA program during their junior year. To facilitate the application process, students should take the Graduate Management Admission Test (GMAT) by December of their junior year.

An applicant who is not admitted to the dual degree engineering/MBA program continues in the undergraduate engineering program and completes his or her undergraduate engineering program in the usual four-year time frame.

As a general rule, it is expected that a student accepted to this program will take two courses required for the undergraduate engineering degree during the summer session following the junior year. The following schedule of classes is an example of how a program might be accomplished.

First Year, Sophomore Year, Junior Year:
As outlined for individual engineering degree programs in this Bulletin, 98–104 credit hours.

Summer Session Following Junior Year:

*Students have the option to take one additional two-credit-hour elective now or in any remaining module.

*Occurs during August Orientation

Total for both degrees: 128–134 undergraduate, 48 MBA

One MBA course will be accepted as an elective or technical elective by each College of Engineering program. No more than two MBA courses may be accepted toward an undergraduate degree from the College of Engineering. Students are advised to check specific program requirements.

RICHARD P. WOLSFIELD  
Chicago, Illinois
College of Science

The University of Notre Dame awarded its first bachelor of science degree in 1865. Before that time, courses had been taught in mathematics (from 1842), in biology (from 1844), and in chemistry (from 1850). In 1867, a program in general science was formulated. Subsequently, specialized programs were added, leading to the degree of bachelor of science in botany and in zoology (both now covered by one degree in biological sciences), in environmental sciences, in biochemistry, in chemistry, in physics, in mathematics, and in preprofessional studies.

Departments of the College of Science

The Department of Applied and Computational Mathematics and Statistics is housed in Hurley Hall, in the academic center of campus. The facilities include office space for faculty members, graduate students and postdoctoral associates, as well as space for these department members to collaborate with undergraduate students in research and educational activities. The department has access to the computing resources of the Center for Research Computing and computing facilities dedicated to department research groups.

The Department of Biological Sciences, located in the Galvin Life Science Center, has well-equipped laboratories for undergraduate and graduate research. The facilities include controlled-environment rooms; an optics facility containing confocal microscopes, scanning and transmission electron microscopes; molecular analysis facilities for DNA sequencing, microarrays, cell sorting; and extensive data storage and retrieval equipment.

The Hank Center for Environmental Science provides more than 20,000 square feet of state-of-the-art research space for aquatic, terrestrial, and environmental studies that includes greenhouses, wet laboratories, and a field sample processing room.

The Freimann Life Science Center provides additional laboratories, vertebrate animal care, and associated specialized modern research facilities to serve the expanding needs of life science research at Notre Dame.

The Jordan Hall of Science contains 16 state-of-the-art biology laboratories for teaching undergraduate and graduate life science laboratory courses. In addition, the collections of museum specimens, including the Greene-Nieuwland Herbarium and the Museum of Biodiversity, are available for research and teaching, housed in superb facilities in Jordan Hall.

The Department of Chemistry and Biochemistry, located in Nieuwland Science Hall and Stepan Hall of Chemistry and Biochemistry, has laboratories devoted to research in several areas of chemistry: physical, inorganic, organic, and biochemistry. The laboratories are equipped with all necessary facilities for undergraduate students, graduate students, postdoctoral investigators, and faculty. Undergraduate researchers have access to seven high-field NMR spectrometers and three state-of-the-art single crystal X-ray diffractometers, plus many other pieces of equipment such as infrared, ultraviolet, Raman, mass spectrometer, photoelectron spectroscopy; potentiostats; analytical and preparative HPLC and GC equipment; special apparatus for studying mechanisms and rates of reactions; and cell culture facilities. For theoretical work, two large parallel cluster supercomputers are available. The facilities of the Radiation Research Laboratory are used by some faculty of the chemistry department for research in physical chemistry.

The new Jordan Hall of Science houses all of the undergraduate teaching laboratories for chemistry and biochemistry. Included are spacious facilities for introductory and organic chemistry; analytical, physical, and inorganic chemistry; and biochemistry. The building also contains a new NMR spectrometer. Also within Jordan Hall are two large lecture rooms specially designed for teaching introductory science courses, along with a 150-seat multimedia visualization center.

The Department of Mathematics is housed in Hayes Healy Hall, conveniently located in central campus. The facilities for undergraduate and graduate instruction and research in mathematics include a first-rate research library; a faculty room; offices for the faculty, postdoctoral investigators, and other visitors, graduate students, and staff; several research seminar and conference rooms; and several large classrooms with state-of-the-art media capability.

The Department of Physics, located in Nieuwland Science Hall, has teaching facilities and laboratories for both undergraduate and graduate research. There are facilities for experimental work in astrophysics, biophysics, condensed-matter physics, elementary particle physics, and nuclear physics. There are three atomic spectroscopy laboratories, and some additional use is made of facilities at Argonne National Laboratory. Elementary particle experiments are done at the Stanford and Fermi national laboratories, and at CERN in Geneva, Switzerland. Detector development for the major accelerators is also being done in the department. The Nuclear Science Laboratory has two accelerators dedicated to nuclear astrophysics. This facility is home to the second largest low-energy nuclear physics program in the country. A variety of solid state facilities are available for the study of metals, high Tc superconductors, and semiconductors. Off-site facilities at Argonne, the National High Magnetic Field Laboratory, and the National Institutes of Standards and Technology are also heavily used. Notre Dame is a partner in the Large Binocular Telescope project. This will be one of the most capable facilities in the world for cutting-edge cosmology and astrophysics research. Research is conducted in many major areas of theoretical physics, including all of the above areas as well as statistical mechanics, field theory, general relativity, and astrophysics. The department has a substantial machine shop and research library and a variety of staff technicians. Many faculty members and research groups have computing facilities, and all have access to the Office of Information Technologies’ very large computers.

Jordan Hall of Science houses all of the undergraduate teaching laboratories for physics, including spacious facilities for introductory mechanics, electricity and magnetism, and modern physics. Within Jordan Hall are also a laser and optics lab and an advanced laboratory for physics majors. The building also hosts a rooftop observatory equipped with a dozen small telescopes for introductory astronomy courses, along with a separate dome housing a large, research-quality telescope for physics and astronomy students. Jordan Hall is also home to a 150-seat digital visualization theatre that serves as a planetarium for a variety of astronomy and astrophysics courses.

The Department of Preprofessional Studies is located in the Center for Health Sciences Advising in the Jordan Hall of Science. This center centralizes the advising process for all University students interested in the health professions. All courses for students enrolled in the preprofessional program and collegiate sequence programs are provided by the other departments of the College of Science and the other colleges of the University.

Undergraduate Education

The aim of the program of undergraduate education in the College of Science is to produce intellectually able graduates who are grounded in the broad fundamental principles of the basic sciences, versed in the advanced concepts of their chosen scientific discipline and educated in the humanistic and social studies. Each graduate should be a good scientist in his or her own field; a fully developed person, aware of his or her responsibilities to society and prepared to participate fruitfully in the affairs of society.

Education in science at Notre Dame is a coordinated program involving the basic sciences, the chosen advanced science, and the humanistic and social
studies, including theology and philosophy. In this education, the student should acquire a thorough, integrated, and broad understanding of the fundamental knowledge in his or her field, a competence in orderly analytical thinking, and the capacity to communicate ideas to others, orally and in writing. This system of education is so arranged to develop in each student the desire and habit of continuing to learn after graduation, advancing over the years to higher levels of professional and personal stature and keeping abreast of the changing knowledge and problems of his or her profession.

Emphasis is placed on fundamental principles so that the students can develop abilities to apply these principles to the solution of new problems never before encountered by society, to the discovery of new things and to the invention of devices not learned about in books. Notre Dame stresses basic concepts useful in later learning rather than masses of particular facts and data that can better be found in books at the time of need.

Curricula and Degrees

The College of Science offers curricula leading to the degree of bachelor of science in each of six undergraduate departments:

- Applied and Computational Mathematics and Statistics
- Biological Sciences
- Chemistry and Biochemistry
- Mathematics
- Physics
- Preprofessional Studies

The following are degree programs offered by these departments:

- Applied and Computational Mathematics and Statistics
- Biochemistry
- Biological Sciences
- Chemistry
- Chemistry combined with Business
- Chemistry combined with Computing
- Environmental Sciences
- Mathematics
- Mathematics (combined with other programs)
- Neuroscience and Behavior
- Physics
- Physics-in-medicine
- Preprofessional Studies
- Science-Business
- Science-Computing
- Science-Education
- Statistics

These degree programs are described in detail in later sections of this Bulletin.

See also the bachelor of science degree programs offered by the College of Engineering:

- Computer Science
- Environmental Geosciences

Each College of Science student must enroll in the department of his or her major beginning with the sophomore year; however, a student may freely change primary majors in the College of Science at any point up until the last drop day of the fall semester of the senior year. Concentrations, second and supplementary majors, and minors may be changed at any time.

The College of Science maintains a website at science.nd.edu. Further information related to programs offered by the college may be found at that location.

Listed below are the allowed options for students interested in double science majors, double majors between colleges, second majors in the College of Science, and supplementary majors and minors in the College of Arts and Letters.

Students pursuing one of these combination programs must have superior scholastic ability and be formally accepted by the dean of both colleges involved. Approval will not be granted if there is substantial overlap between the two programs.

Note: Courses taken toward the completion of an additional major, supplementary major or minor may not also be counted toward the student’s other major, supplemental major, supplemental major or minor.

Double Science Majors. In certain instances, students will have the option of pursuing majors in two departments of the College of Science. Details on the double science major option and lists of combinations that are normally approved are found under “Special Programs,” later in this section of the Bulletin.

Dual Degree. Notre Dame students pursuing majors in two of the undergraduate colleges may qualify for a five-year dual-degree program.

The requirements for a dual degree generally are as follows: The student completes all of the university requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a dual degree in the two colleges. While the total number of hours required does depend on the two major programs, the minimum required total number of degree credits is set to be 30 degree credits beyond the college total for the college with the greatest required number of degree credits.

Double Majors in Two Colleges. Qualified Notre Dame students pursuing majors in one of the other undergraduate colleges or schools may add another major in the College of Science. Additionally, qualified Notre Dame students pursuing a major in the College of Science may also add another major in one of the other undergraduate colleges or schools.

The requirements for a double major between colleges generally are as follows: The student completes all the University requirements, the requirements of his or her college or school, and the requirements of both majors. In general, a single course may not satisfy requirements for both majors.

Supplementary Majors and Minors. Qualified Notre Dame students pursuing majors in the College of Science may add a supplementary major or minor. Options include programs offered through the College of Arts and Letters and the Environmental Geosciences minor offered through the College of Engineering.

Science students may not add the Arts and Letters Preprofessional Studies supplementary major.

Supplementary Majors, Minors, and Concentrations in the College of Science. In the College of Science, the term “second major” is used for a supplementary major. Three departments offer a second major program specifically for students in the other colleges: Mathematics as a second major, physics as a second major, and environmental sciences as a second major. For details, see the departmental sections of this Bulletin.

Three departments in the College of Science offer concentration programs: Applied and Computational Mathematics and Statistics, Mathematics and Physics. For details, see the departmental sections of this Bulletin.

Combination Five-Year Program with the Mendoza College of Business. The College of Science and the Mendoza College of Business have established a competitive cooperative program in which a student may simultaneously earn a bachelor of science and a master of business administration degree. The program is structured so that the student who has completed the three years of a science bachelor’s degree program, if accepted, completes the master of business administration and the bachelor of science in a major in the College of Science in a summer session and two subsequent academic years.

Students who wish to pursue this program should have a superior scholastic record in their major program and must make application to, and be accepted by, the MBA program.

The general sequence of courses in the five-year Science-MBA program may be found under “Dual Degree Program with the Mendoza College of Business,” later in this section of the Bulletin.
University and College Requirements

A minimum of 124 credit hours is required for graduation from the College of Science. A minimum of 60 credit hours must be in science; however, each department may specify more than 60 credit hours for any of its programs.

All College of Science majors must fulfill University requirements, which include:

* One of these courses must be a University seminar.

In addition, all College of Science majors must take courses in:

- Chemistry (10171 and 10172 or 10122) or 10181, 10182
- Mathematics (10350, 10360 or 10550, 10560 or 10850, 10860)
- Physics (10310, 10320 or 10411, 10424, 20435 or 30210, 30220)

The appropriate sequence for a student depends on the student's major.

The College of Science requires language proficiency through intermediate level in one of the following languages: Arabic, Chinese, French, German, Greek, Irish, Italian, Japanese, Korean, Latin, Portuguese, Russian, and Spanish. "Intermediate proficiency" is defined differently in each of the languages, depending on the complexity of the language and the intensity of the course. Students may complete the language requirement by either completing a course taught at intermediate level or by demonstrating proficiency through placement examination. The college office maintains a list of language courses at intermediate level. (See the college website, science.nd.edu under Academic Information Frequently Asked Questions.)

Students with no previous background in a language should start with a beginning-level course. They take typically either nine credits over a three-semester period, eleven credits over a three semester sequence, or two semesters of an intensive language sequence (10 credits total). Students with Advanced Placement or SAT II credit may receive up to eight credit hours of language toward their degree. If for some reason more than eight credits appear on the transcript, only eight credits will count toward the required 124 credits. Students who arrive with some background in the language they elect, but without AP or SAT II credit, will be placed by departmental examination but will receive no credit hours.

The College of Science will count a maximum of one credit hour from the following types of activity courses:

- Band (Marching and Concert)
- Orchestra
- Chorale
- Glee Club
- Liturgical Choir
- Folk Choir
- Music Lessons and Ensembles
- Dance
- Debate
- Science in the Classroom

Additionally, a maximum of six credit hours of upper-level (30000- or 40000-level) ROTC courses can be counted toward the 124-credit-hour requirement. These courses will be counted as free electives.

The College of Science works with the Center for Social Concerns (see page 27 of the Bulletin) to develop relevant, community-based opportunities. Science majors may count as general electives up to 3 credits for approved Summer Service Learning Program courses (e.g., THEO 33936) or Social Concerns Seminars (e.g., CSC 33951).

All science courses will count toward degree credit or science elective credit for science majors. The survey science courses offered as options for non-science majors for their University science requirement will not count as a science elective or toward the minimum science credit hour requirement. Because of overlap in content with required courses for science majors, many of these courses will also not count toward the degree credit requirement (see “Science Degree Credit,” later in this section of the Bulletin).

Some major programs have a science elective requirement. Recommended science electives for particular science majors are found on the college’s website, science.nd.edu. For a course to be a science elective, it must meet the following rules: (1) It is offered through one of the departments of the College of Science or through the college itself. (2) It is major’s level; that is, other science majors are required to take this course to meet a major requirement or it has a prerequisite course that is offered for science majors, or the Bulletin description for the course states that it is a science elective in the College of Science. Finally, the departments may place additional restrictions on allowed science electives, e.g., in the Department of Biological Sciences, a science elective must be a non-biology course.

All College of Science courses offered by a major program must be taken at the University of Notre Dame. If a student wants to take a course outside Notre Dame for credit toward the Notre Dame degree, prior approval of the dean’s office must be obtained. This does not apply to the courses taken by a transfer student prior to attending Notre Dame.

Advising. All Notre Dame science majors have been assigned an advisor in the department of their major. All advisors are members of the faculty of the College of Science. In some departments, the director of undergraduate studies for the department advises all students. In others, the director of undergraduate studies or the department office may be contacted to find out the name of the student’s advisor. A complete list of names of advisors is kept on the science website.

Notre Dame students who have questions concerning the choice of a major or considering a change of major are urged to make appointments with the advisors of the departments involved. Students needing help choosing from similar majors may request an advising appointment with the associate or assistant dean of undergraduate studies of the College of Science, 215 Jordan Hall. Any Notre Dame student who is considering a health profession can receive advising in the Center for Health Sciences Advising in 219 Jordan Hall.

Student Organizations and Activities

In addition to participation in University-wide student activities, the undergraduate students of the College of Science may participate in activities directly related to science, including the undergraduate departmental science organizations: the Biology Club, the Notre Dame Chapter of Student Affiliates of the American Chemical Society, the Mathematics Club, the Society of Physics Students, the PreMed Club (preprofessional), the Prevet Club, the Science-Business Club, and the Notre Dame Chapter of Alpha Epsilon Delta (premedical honorary fraternity).

Student Council. The Student Council of the College of Science is composed of representatives of the majors of the College of Science. The student council serves as the official body representing the undergraduate students before the administration of the College of Science.

Student Awards and Prizes

The Dean's Award. Presented to the outstanding graduating senior in the College of Science in recognition of exemplary personal character, leadership, service, and outstanding achievement. Selected by the dean and associate dean.

The Dean’s Research Award. Presented to the outstanding graduating senior in the College of Science in recognition of exceptional research within and across the traditional boundaries of scholarly disciplines who embraces, facilitates, and fosters an environment of scientific inquiry.

Outstanding Senior Biological Scientist(s). To the senior(s) who has/have demonstrated the most promise in the biological sciences as evidenced by
both academic performance and research participation.

**Outstanding Biology Student Leader Award.** Seniors nominated for this award must be exemplary student leaders in the Department of Biological Sciences. The student will have made outstanding contributions, through their leadership and service, to advance the interests of other students in the department.

**Paul F. Ware, M.D., Excellence in Undergraduate Research Award.** The top student nominated for the Outstanding Biological Scientist award will be chosen for the Paul F. Ware award, the highest honor given to a graduating senior in the department. Leadership and service in the department, college, or university are also key qualifications for this award.

**Outstanding Environmental Scientist Award.** Seniors nominated for this award must be exemplary students in the Environmental Science major with at least 3 semesters (or 2 semesters and 1 summer) spent in a Notre Dame faculty laboratory that emphasizes any aspect of environmental science. The student must have made a significant intellectual contribution to their lab, typically evidenced by a co-authored publication and/or national or regional conference presentation.

**Mr. and Mrs. Frank McDonald Undergraduate Research Award.** Seniors nominated for this award must be exemplary undergraduate researchers with at least 3 semesters (or 2 semesters and 1 summer) spent in a Notre Dame faculty laboratory. The student must have made a significant intellectual contribution to their lab, typically evidenced by a co-authored publication and/or national or regional conference presentation.

**Robert Braco, M.D., Honors Research Award.** Seniors nominated for this award must be outstanding students in the Biology Honors program with at least 3 semesters (or 2 semesters and 1 summer) of undergraduate research in a Notre Dame faculty laboratory. The student must have made a significant intellectual contribution to their lab, resulting in a co-authored publication and/or a national or regional conference presentation. A successful candidate would also have been exemplary in all honors activities including the honors seminars, the graduate course, and the honors thesis.

**Merck Index Award.** For outstanding achievements in chemistry or biochemistry.

**Norbert L. Weich Ph.D. Award.** Given to a chemistry or biochemistry major in the junior year for outstanding achievement in academics and research.

**Outstanding Biochemist Award.** For leadership, academic achievements, research and scholarship in biochemistry.

**Outstanding Chemist Award.** For academic and research achievements in chemistry as an undergraduate.

**William R. Wischerath Outstanding Chemistry Major Award.** For academic achievements of a graduating senior chemistry major.

**Chemistry-Education Award.** For academic achievements in preparation for teaching of chemistry in a secondary education system.

**The General Electric Prizes for Honors Majors in Mathematics.** Awarded to senior honors majors in the Department of Mathematics who, in the opinion of the members of the faculty, excelled in mathematics during their undergraduate career.

**The General Electric Prizes for Majors in Mathematics.** A similar award to senior majors.

**The George Koletis Award in Mathematics.** An award established by friends of the late Prof. George Koletis, for a graduating senior who excelled in mathematics and contributed notably to the esprit de corps of the mathematics student body.

**The Aumann Prize for First Year Students in Mathematics.** A prize given by Ms. Monika Caradonna in honor of her father, Prof. Georg Aumann, awarded on the basis of a competition among First Year honors mathematics students.

**The Norman and Beatrice Haaser Mathematics Scholarships.** These scholarships, made possible by the generosity of Professor and Mrs. Haaser, are awarded to worthy, needy students majoring in mathematics.

**R. Catesby Taliaferro Competition for Sophomore Mathematics Honors Students.** Friends and students of the late Professor Taliaferro established this prize, which is awarded to a sophomore mathematics major on the basis of an essay submitted by the student.

**J & C Sophomore Award in Mathematics.** Exemplary performance in mathematics classes by a non-honors math major sophomore female or minority (African-American, Asian, Hispanic, Native American) student.

**Outstanding Senior Physics Major.** This award is given to the outstanding senior physics major, who, in the judgment of the departmental faculty, shows the most promise for a distinguished career in physics. Course grades, the opinion of those who have taught the candidates, and any research performance are considered in making the award.

**Paul Chagnon Award.** An award to be given to a senior physics major for demonstrated character and leadership and for service to the University, the physics department, and to his or her fellow physics majors.

**Physics Outstanding Undergraduate Research Award.** A monetary award given for excellence in research to an undergraduate physics major.

**DiNardo Award.** To the outstanding junior preprofessional student.

**Emil T. Hofman Scholarships.** To six outstanding students pursuing premedical studies.

**J. C. Lungren, M.D., Scholarships.** Awarded to three outstanding science preprofessional students.

**The Lawrence H. Baldinger Award.** To seniors in the preprofessional program who excelled in scholarship, leadership, and character.

**The Patrick J. Niland, M.D., Award.** A monetary award given to a preprofessional studies senior to purchase books for the first year of medical school.

**The Samuel Chmell, M.D., Award.** To an outstanding senior in preprofessional studies who exemplifies high academic achievement and uncompromising integrity within the program.

**The Rev. Joseph L. Walter, C.S.C., Award.** To a senior with a keen social awareness who shows great promise as a concerned physician.

---

**Glynn Family Honors Program.** In the fall of 1983, the University inaugurated an honors program for a small number of outstanding students in the College of Arts and Letters and the College of Science. A limited number of students with academic intent for each college are identified at the time of admission. Although selection criteria include the promise of outstanding academic performance as demonstrated by standardized test scores and high school performance, the program is looking for more than mere academic ability. It hopes to identify students with a deep intellectual curiosity.

The program offers honors sections to fulfill most of the University and college requirements in the students' freshman and sophomore years. At present, there is the yearlong Honors Seminar (satisfying the writing and literature requirements), Honors Calculus, Honors Philosophy, Honors Theology, Honors Biology, Honors Physics, and an array of Honors Social Science courses. Since these course are restricted to honors students, they are smaller than non-honors sections and are usually taught in a seminar format. The teachers for honors sections are chosen from the most outstanding teachers in each college. After the first year, each student's academic work will be mainly centered in his or her major field (or fields) of study, but two or more honors electives are also taken during these years. In the fall of the senior year, there is an "Honors Thesis/Research Seminar," which is followed by the "Senior Seminar" in the spring. The fall seminar is intended to be a spur to the students' capstone project, whereas the spring seminar brings the honors students from diverse majors back together for some concluding topical discussions. All honors students will also be expected to complete a special six-hour senior research honors project in their major field of study. In science, this is the culmination of a research project begun earlier, and in arts and letters, it is a two-semester project culminating in a thesis. Those writing senior theses work individually under the direction of a faculty advisor of their choosing in their major field. Funds are available for research
Applied and Computational Mathematics and Statistics

Program of Studies. The partnership of applied mathematics, computational mathematics and statistics brings the tools of modeling, simulation and data analysis to bear on real-world problems, producing solutions with the power to predict and explain complex phenomena. These methods, often applied computationally, are being used in a wide variety of areas in business, engineering, the natural sciences, and the social sciences.

The Department of Applied and Computational Mathematics and Statistics (ACMS) offers programs of study leading to the bachelor of science degree in applied and computational mathematics and statistics and to the bachelor of science in statistics. Computational skills, which are often required to solve real-world problems, will be developed continuously throughout the curriculum. For many students, significant work in an area of application will complement their core studies. Graduates of the program will be well prepared for the following post-graduate opportunities:

• Employment and further study in actuarial science and quantitative methods in business and economics.

In addition to the core bachelor of science in ACMS major, ACMS offers a concentration in biological sciences, which will prepare students for further study or employment in computational biology, bioinformatics, ecological modeling, or epidemiology.

ACMS also offers supplementary majors in applied and computational mathematics and statistics and in statistics. Students in numerous areas of study can benefit from advanced study in applied and computational mathematics and statistics. This is true for students in business and the social sciences as well as those in the natural sciences and engineering. These supplementary majors are well suited for these students.

BACHELOR OF SCIENCE WITH A MAJOR IN APPLIED AND COMPUTATIONAL MATHEMATICS AND STATISTICS

The requirements for the degree include courses that develop a strong foundation in the methods of applied mathematics and data analysis, while allowing students to also take courses in a wide variety of application areas. The specific requirements for the bachelor of science in applied and computational mathematics and statistics, beyond the university and college requirements are as follows.

Chemistry (CHEM 10171, 10122 or CHEM 10171, 10172) 1

Physics (PHYS 10310, 10320) 1

Calculus I. II (MATH 10550, 10560) 1

Introduction to Applied Mathematics Methods, I, II (ACMS 20550, 20750)

Scientific Computing (ACMS 20210)

Applied Linear Algebra (ACMS 20620)

Introduction to Probability (ACMS 30530)

Mathematical Statistics (ACMS 30540) or Statistical Methods and Data Analysis I (ACMS 30600)

Mathematical/Comp Modeling (ACMS 40730)

Numerical Analysis (ACMS 40390)

ACMS electives (6 credits in ACMS courses numbered 30000 and above) 2

MATH or ACMS elective (3 credits in MATH or ACMS courses numbered 30000 or above) 3

Science elective (3 credits) 4

These requirements total 43 credits in ACMS and MATH and 61 credits in Science.

Concentration in biological sciences. The required courses for this concentration are as follows.

Introduction to Chemical Principles (CHEM
10171) 1

Organic Chemistry (CHEM 10172, 20273, 21273) 1

Physics (PHYS 10310, 10320) 3

Biological Sciences I, II (BIOS 10161, 10162 or 20201, 21201, 20202, 21202)

To Table of Contents
Calculus I, II (MATH 10550, 10560) \(^1\)
Introduction to Applied Mathematics Methods, I, II (ACMS 20550, 20750)
Scientific Computing (ACMS 20210)
Applied Linear Algebra (ACMS 20620)
Introduction to Probability (ACMS 30530)
Mathematical Statistics (ACMS 30540) or Statistical Methods and Data Analysis I (ACMS 30600)
Mathematical/Comp Modeling (ACMS 40730)
Numerical Analysis (ACMS 40390)
ACMS electives (6 credits in ACMS courses numbered 30000 and above) \(^2\) \(^3\)
Genetics (BIOS 20303)
Cellular Biology (BIOS 30341) or Ecology (30312)
Biology Elective (3 credits in BIOS which has BIOS 10162 or BIOS 20202 as a prerequisite)
Elective in Biology, Chemistry or Physics (3 credits)
These requirements total 40 credits in ACMS and MATH and 79 credits in Science.

**ACMS Sample Curriculum:**

**First Year**

**First Semester**
- MATH 10550. Calculus I 4
- CHEM 10171. Chemical Principles 4
- PHYS 10310. General Physics I 4
- History or Social Science 5
- WR 13100. Writing and Rhetoric 3
- Moreau First Year Experience 1
  
  19

**Second Semester**
- MATH 10560. Calculus II 4
- CHEM 10172 or 10122 4
- PHYS 10320. General Physics II 4
- History or Social Science 5
- Philosophy or Theology 6
- Moreau First Year Experience 1
  
  19

**Sophomore Year**

**First Semester**
- ACMS 20550. Applied Math Methods I 3.5
- ACMS 20620. Applied Linear Algebra 3
- Language 3
- Philosophy or Theology 3
  
  15.5

**Second Semester**
- ACMS 20750. Applied Math Methods II 3.5
- ACMS 20210. Scientific Computing 3.5
- ACMS 30530. Introduction to Probability 3
  
  16.5

**Junior Year**

**First Semester**
- ACMS 40390. Numerical Analysis 3
- Language 3
- Philosophy or Theology 3
  
  15.5

**Second Semester**
- ACMS 30540. Mathematical Statistics 3
- ACMS/MATH Elective 3
- Literature or Fine Arts 3
- Elective 3
  
  15

**Senior Year**

**First Semester**
- ACMS 40730. Mathematical/Comp Modeling 3
- ACMS Elective 3
- Elective 9
  
  15

**Second Semester**
- ACMS Elective 3
- Electives 9
  
  12

**ACMS/BIOS Sample Curriculum:**

**First Year**

**First Semester**
- MATH 10550. Calculus I 4
- CHEM 10171. Chemical Principles 4
- BIOS 10161. Biological Sciences I 4
- History or Social Science 5
- WR 13100. Writing and Rhetoric 3
- Moreau First Year Experience 1
  
  19

**Second Semester**
- MATH 10560. Calculus II 4
- CHEM 10172 4
- BIOS 10162. Biological Sciences II 4
- History or Social Science 5
- Philosophy or Theology 6
- Moreau First Year Experience 1
  
  19

**Sophomore Year**

**First Semester**
- ACMS 20550. Applied Math Methods I 3.5
- ACMS 20620. Applied Linear Algebra 3
- CHEM 20735/21273 4
- Language 3
- Philosophy or Theology 3
  
  16.5

**Second Semester**
- ACMS 20750. Applied Math Methods II 3.5
- ACMS 20210. Scientific Computing 3.5
- ACMS 30530. Introduction to Probability 3
- Language 3
- Philosophy or Theology 3
  
  16

**Notes:**
1. Equivalent or higher sequences in science may be substituted, e.g., MATH 10850, 10860 for MATH 10550, 10560.
2. Some ACMS courses, ACMS 30440 in particular, are not acceptable as electives for the major. The list of acceptable courses for ACMS majors can be obtained from the student's advisor.
3. Introduction to Mathematical Reasoning (MATH 20630) is also an acceptable ACMS/MATH elective.
4. Students with an interest in attending graduate school in mathematics or applied mathematics are encouraged to take Algebra (MATH 30710) and Functional Analysis (ACMS 50550).
5. An appropriate class in bioinformatics, biophysics, or a related topic, may be substituted for 3 credits in ACMS coursework with the permission of the Director of Undergraduate Studies.
6. A student should take three core requirement courses during the first year, including one course that
is designated a University Seminar. It is recommended that one course in history or social sciences be taken in the first year and one philosophy and one theology be taken by the end of sophomore year.

7. One of the two of these courses (ACMS 30600, ACMS 30540) is a required course. If both courses are taken, the other course can be counted as an ACMS elective.

BACHELOR OF SCIENCE WITH A MAJOR IN STATISTICS

The requirements for the degree include courses that develop a strong foundation in the methods of applied mathematics and data analysis, while allowing students to also take courses in a wide variety of application areas. The specific requirements for the bachelor of science in statistics, beyond the university and college requirements are as follows.

Chemistry (CHEM 10171, 10122 or CHEM 10171, 10172)
Physics (PHYS 10310, 10320)
Calculus I, II (MATH 10550, 10560)
Introduction to Applied Mathematics Methods, I, II (ACMS 20550, 20750)

Scientific Computing (ACMS 20210 or approved alternative computing course in science)
Applied Linear Algebra (ACMS 20620)
Introduction to Probability (ACMS 30530)
Mathematical Statistics (ACMS 30540)
Statistical Methods and Data Analysis I (ACMS 30600)

ACMS statistics electives (9 credits in ACMS statistics courses chosen from a list of approved courses)
MATH or ACMS elective (3 credits in MATH or ACMS courses numbered 30000 or above)
Science elective (3 credits)

These requirements total 43 credits in ACMS and MATH and 61 credits in Science.

Notes:
1. Equivalent or higher sequences in science may be substituted, e.g., MATH 10850, 10860 for MATH 10550, 10560.
2. The acceptable elective courses are:
   a. ACMS 40842 Time Series Analysis
   b. ACMS 40852 Statistical Methods in the Biological and Health Sciences
   c. ACMS 40860 Statistical Methods in Molecular Biology
   d. ACMS 40870 Statistical Methods in Social Sciences
   e. ACMS 40880 Statistical Methods in Pattern Recognition and Prediction
   f. ACMS 40890 Statistical Methods in Financial Risk Management
   g. Any graduate ACMS course in statistics or probability
3. Introduction to Mathematical Reasoning (MATH 20630) is also an acceptable elective.
4. A student should take three core requirement courses during the first year, including one course that is designated a University Seminar. It is recommended that one course in history or social sciences be taken in the first year and one philosophy and one theology be taken by the end of sophomore year.

SUPPLEMENTARY MAJOR IN STATISTICS

The supplementary major in statistics requires 37 credits in ACMS and Mathematics. The specific requirements are as follows.

Calculus I, II (MATH 10550, 10560)
Introduction to Applied Mathematics Methods, I, II (ACMS 20550, 20750)
Scientific Computing (ACMS 20210 or approved alternative computing course in science)
Applied Linear Algebra (ACMS 20620)
Introduction to Probability (ACMS 30530)
Mathematical Statistics (ACMS 30540)
Statistical Methods and Data Analysis (ACMS 30600)

ACMS Statistics electives (6 credits)

Difference from the full major. The full Statistics major requires 43 credits in ACMS and MATH courses. This supplementary major requires one fewer statistics elective and one fewer ACMS elective.

Double counting issues. A student is permitted to double count Calculus I and II for a first major and this supplementary major. A student whose first major requires Calculus III and Ordinary Differential Equations is exempt from ACMS 20550 and 20750, but must complete an additional 6 credits of electives in ACMS. The same principle applies to any other courses required by a first major and this program.

SUPPLEMENTARY MAJOR IN APPLIED AND COMPUTATIONAL MATHEMATICS AND STATISTICS

The supplementary major in applied and computational mathematics and statistics requires 37 credits in ACMS and Mathematics. The specific requirements are as follows.

Calculus I, II (MATH 10550, 10560)
Introduction to Applied Mathematical Methods I, II (ACMS 20550, 20750)
Scientific Computing (ACMS 20210)
Applied Linear Algebra (ACMS 20620)
Introduction to Probability (ACMS 30530)
Mathematical Statistics (ACMS 30540) or Statistical Methods and Data Analysis I (ACMS 30600)
Mathematical/Comp Modeling (ACMS 40730)

Professors:
Gary Belovsky; Nora Besansky; Sunny Boyd; Frank Collins; Crislyn D’Souza-Schorey; John Dunstan; Jeffrey Feder; Michael Ferdig; Malcolm Fraser; Kasturi Haldar; David Hyde; Gary Lambert; David Lodge; Edwin Michael; Joseph O’Toole; Matthew Ravosa; Jeanne Romero-Severson; Jeffrey Schorey; Robert Schulz; David Severson; Jennifer Tank

Associate Professors:
Elizabeth Archie; Patricia Champion; Giles Duffield; Jessica Hellmann; Hope Hollocher; Shaan Lee; Lei Li; Mary Ann McDowell; Jason McLachlan; Michael Pfrender; Zachary Schafer; Kevin Vaughan

Assistant Professors:
Reginald Hill; Stuart Jones; Miguel Morales; Athanassia Panopoulos; Adrian Recha; Zain Syed; Rebecca Winger; Siyuan Zhang

Special Professional Faculty:
Karen Deak; Kenneth Filchak; Lacey Haussamen; Barbara Hellinghal; Angela Laws; Kristin Lewis; Nancy Michael; Marie Denise Milord; Rachel Novick; T. Mark Olsen; Jennifer Robichaud; Amy Stark; Thomas Steir; David Veselik; Michelle Whaley

Concurrent Faculty:
Melissa Berke; Holly Goodson; Alan Hamlet; Kristin Shadrer-Frechette; Joshua Shrou; Sharon Stack

Adjunct Faculty:
Michael Blakesly; Richard Dahl; David Halperin; Jennifer Prosperi; John O’Malley; Kenneth Olson; Molly Schell; Patrick Sheers

Program of Studies. The Department of Biological Sciences offers programs of study leading to the degrees of bachelor of science with a major in biological sciences or bachelor of science with a major in environmental sciences, master of science in biological sciences and doctor of philosophy. Also offered is a second major in environmental sciences for students in the College of Arts and Letters or in the College of Business Administration.

Program in Biological Sciences. The biological sciences encompass all aspects of life sciences, including microbial, plant, and animal life. This includes the biochemistry, genetics, development, physiology, evolution, and ecology of all living things. Every educated person must have sound knowledge of the fundamental principles and facts of the biological sciences to understand himself or herself and the world in which he or she lives. In addition, biologists, through their research, contribute to the development of theories and methods required for the solution of humanity’s problems in the fields of health, agriculture, industry, and the preservation of the environment.

An undergraduate major in biological sciences prepares a student for graduate study (M.S., Ph.D., M.D./Ph.D.) leading to a research career, and also for admission to medical, veterinary, and other professional schools. Graduates with a bachelor’s degree may enter careers in industry, government, or health-related research laboratories. Those who wish to teach at the elementary or secondary level should be sure to include required education courses such as those offered through Saint Mary’s College.

The goal of the Department of Biological Sciences is to educate its majors first as scientists prepared for the challenges of modern biology and second for any specialty area(s) in which they develop an interest, especially if that interest is directed toward graduate school and research. Also, for the approximately 70 percent of biology majors who initially express an interest in going to medical school or other health-related graduate programs, the key topic areas of modern biology emphasized in the core curriculum are also very relevant to their training as “medical biologists.”

Students majoring in biological sciences are required to follow a core curriculum. This core not only provides exposure to most areas of modern biology but also includes courses representative of all the levels of biological organization, i.e., from atoms and molecules through ecosystems. Students unsure of which area of biology most appeals to their interests will more easily arrive at that decision through the completion of the core.

Policy Statement on the Use of Organisms in Biological Sciences Teaching Laboratories. Some laboratory courses offered by the Department of Biological Sciences may involve the use of living or preserved organisms. Instructors use these animal specimens in cases where this is deemed necessary for teaching important biological concepts and principles. Students who have concerns about the use of organisms in classes must, prior to registering, submit a request for alternate materials to the course instructor. It is up to the discretion of the instructor(s) as to whether and how non-organism alternatives may be substituted for biological materials in classes. Students permitted to use alternate materials are responsible for the same knowledge and application as their classmates and may be required to complete examinations that involve the inspection or handling of biological specimens.

Biology Courses. The biology courses included in this Bulletin are those reasonably expected to be offered several times to every semester during the next four years. However, changes may occur as faculty add new courses or drop those with little demand. Courses without laboratories are indicated as lecture only.
Biology Survey Courses (10101–10119) have a prerequisite of one year of high school chemistry and biology and are designed for first-year students needing to satisfy the University science requirements. These courses will address fundamental aspects of modern biology ranging from genetics to wildlife biology. There will generally be as many as six sections of biology courses available each year; any course may have multiple sections. The listed courses and new courses are offered when demand warrants, allowing subject matter to change depending on students’ interests and needs and emerging or changing areas of life sciences. These survey courses are generally recommended University electives and are not open to science majors.

These 101xx-level survey courses satisfy the science requirement for non-science majors at Notre Dame. They do not satisfy the science requirements for science majors at Notre Dame or elsewhere. Students may not take courses with overlapping or similar lecture material such as BIOS 10101 and 10110 or BIOS 10107, 10118, and 10119, for example. A table listing these overlapping courses is on the final pages of the College of Science section of this Bulletin.

**BACHELOR OF SCIENCE WITH A MAJOR IN BIOLOGICAL SCIENCES**

The biological sciences majors take the following basic sequence of courses in the College of Science:

- General Chemistry (CHEM 10171 and 20274)
- Organic Chemistry (CHEM 10172 and 20273)
- Physics (PHYS 30210–30220)\(^1\)
- Calculus (MATH 10550–10560 or 10550–10560)\(^2\)

The requirements in biological sciences include courses from a basic six core sequence and sufficient numbers of BIOS electives to complete the 41-credit-hour requirement. All majors are strongly encouraged to complete the sequence Biological Sciences I and II (BIOS 10161–10162) in their first year to ensure the completion of all requirements in four years. Students may begin the core with General Biology A and B (BIOS 20201–20202); however, they will be at a considerable disadvantage in scheduling requirements in the two remaining years; they also will have one year less to explore their interests in biology.

There are seven components to the biology core requirement, consisting of courses in the following areas:

**Core I: Introductory Biology**

- a. Metabolism and Genetics
- b. Ecology, Diversity, and Physiology

Students choose from either:

- Biological Sciences I and II (BIOS 10161–10162) (includes two labs)\(^3\) or
- General Biology A and B (BIOS 20201-20202) (includes two labs)\(^2\)

These labs are designated Lab #1 and Lab #2 of the six required for the major.

**Core II: Genetics**

Students choose from either:

- a. Classical and Molecular Genetics (BIOS 20250 and 21250; lab #3)\(^4\) or
- b. Fundamentals of Genetics (BIOS 20303 and 21303; alternate lab #3)

**Core III: Cellular Biology**

Students choose from either:

- a. Molecular Cell Biology (BIOS 20241)\(^5\) or
- b. Cellular Biology (BIOS 30341)

Optional labs available are BIOS 27241, a research-oriented 2-credit laboratory,\(^6\) or BIOS 31341, a basic 1-credit cell biology laboratory primarily for premed majors. Students may not take both cell labs.

**Core IV: Physiology**

Students choose from either:

- a. Vertebrate (Human) Physiology (BIOS 30344)\(^7\) or
- b. Integrative Comparative Physiology (BIOS 30421) (not available all years).

Optional lab available is BIOS 41344.

**Core V: Evolutionary Biology**

Students choose from either:

- a. Evolution (BIOS 30305) or
- b. The History of Life (BIOS 30310)

**Core VI: Ecology**

Students choose from either:

- a. General Ecology (BIOS 30312; optional lab BIOS 31312 is offered fall semesters only) or
- b. Aquatic Ecology (BIOS 30420 and required lab BIOS 31420—offered fall only).

Note that select overseas courses that have been approved for science credit may satisfy the Core II through VI requirement if approved by the Director of Undergraduate Studies in Biological Sciences before taking the class.

**BIOS ELECTIVES**

The minimum required credits in the core including labs is 27. An additional 14 credits of electives in biological sciences are chosen to complete the required total of 41 credits.\(^8\) All biological sciences majors are encouraged to include non-science among their “free electives.”

**Notes:**

1. Alternatively, students may select the physics sequence PHYS 10310–10320 or PHYS 10411, 20435.
2. Students are required to take a total of six laboratories; three of the six labs will be part of the Core (Core I(a,b), II, and the remaining three of the six laboratories are chosen among the core III through Core VI and/or BIOS electives, including 50000- and 60000-level courses. Thus, there are three required “named” BIOS labs and three additional elective BIOS labs. As an option, students who conduct a minimum of three semesters of undergraduate research (BIOS 48498) in the same laboratory or research group at Notre Dame and earn a minimum of 3 credits (i.e., 3 x 1.0 credit), may substitute those research semesters for one of the six required labs.
3. Career-oriented majors in biological sciences, as well as those considering a professional school (medicine, veterinary science, others), are urged to select the courses Molecular Cell Biology (BIOS 20241) and Classical and Molecular Genetics (BIOS 20250). These should be taken in the sophomore year but no later than the junior year. The two-credit cell research lab (BIOS 27241) is especially ideal for those interested in obtaining summer research internships, doing undergraduate research at Notre Dame or elsewhere, and is especially critical to any graduate research career. Students enrolled during the summer sessions may take the 2-credit cell biology lab (BIOS 38499) as an alternative. Only one of the three available cell biology labs may count toward the required six.
4. Physiology should be completed by the end of the junior year for students planning to take the MCAT exam or the seventh semester for students planning to take the GRE biology subjects exam.
5. Most graduate (60000-level) courses (through 60679) are open to eligible juniors and seniors; often the majority of students in these advanced courses are undergraduates.
6. Students may choose additional courses in the Core areas III through VI or among courses not assigned to the core (e.g., BIOS 40411, Biostatistics, or BIOS 48498, Undergraduate Research), or 60000-level courses as BIOS electives, to meet the required total of 41 credit hours in biological science courses.
7. Select non-BIOS major-level College of Science courses (i.e., those taken to meet science major requirements and not among those designated as “Recommended University electives”) that are not being used to fulfill other specific graduation requirements can be chosen with the consent of the director of undergraduate studies for the Department of Biological Sciences and counted toward the BIOS elective credit. While majors are allowed to take one 3-credit, non-BIOS lecture course and have that count toward the 41 required credits, students may also include one non-BIOS lab if it is required for that non-BIOS lecture and have that laboratory satisfy one of the six required laboratories. For example, Physical Geology (SC 20110, ENVG 10110/20110) has a required laboratory, and majors who choose BIOS electives based on their environmental or ecological interests may elect to take Physical Geology for a total of 4 credits toward the 41 required credits. Majors who might have transferred into BIOS from BCHM and had taken the required biochemistry (CHEM 30341) lecture and laboratory course will be allowed to count both the lecture and laboratory toward the 41 credits. The same
would be true of other relevant science courses (e.g., analytical chemistry, physical chemistry) as approved by the director of their major and the associate dean of the College of Science.

8. Undergraduate Research (BIOS 48498) and Directed Readings (BIOS 46497) count toward the 41-credit biological sciences requirement; however, only a maximum of two credits per semester per course and a combined total of six credits from these two courses may be counted in fulfilling the 4-credit requirement. A maximum of two credits of BIOS 37595 (Teaching Practicum) may be included in any combination of these six credits. A maximum of only nine credits in these courses may be used toward graduation; however, additional credits do remain on a student’s permanent transcript record.

RECOMMENDED COURSE GROUPINGS

After consultation with the director of undergraduate studies or other faculty advisors including research mentors, each student is encouraged to select the curriculum which best fits his or her career goals.

A great deal of flexibility is permitted in designing each individual’s projected course schedule, within the context of the core curriculum. In essence, each student will be able to design his or her unique biology curriculum in the context of the core requirements and additional biology electives to reflect individual career intent or life science interests. For students wishing to emphasize specific areas of biology in their curricula, the following four course groupings are provided as guides that have proved to be appropriate for most of our previous graduates. Students may wish to consider these and others that are available as the equivalent of a “concentration in a specific area of biology or simply view these as examples of how a particular interest or career goal can be supported by a structure set of courses.

General Biosciences: This grouping gives the student a broad foundation in biological sciences by requiring electives from each of its major areas. This grouping may be designed as preparation for the Graduate Record Examination (GRE) or the Medical College Admission Test (MCAT). Students considering graduate school or secondary science education, or those without a clear career goal, should consider these courses.

Here, students follow the core curriculum, making choices in Cores III through VI. For MCAT preparation, it is essential for students to complete one semester of genetics (BIOS 20250 or BIOS 20303), one semester of cell biology (BIOS 20241 or BIOS 30341), and one semester of physiology (BIOS 30344 or BIOS 30421) prior to taking that exam. Majors are strongly encouraged to take additional biology courses such as developmental biology (BIOS 30342) as additional MCAT coursework preparation.

Also recommended for electives in biological sciences is a course in either vertebrate or invertebrate biology (e.g., BIOS 30404, Vertebrate Biology; or BIOS 30406, General Entomology). Depending on the credits associated with the choice of courses made in the core, students will be required to pick three to five more electives in biological sciences to complete the requirement of 41 credits.

Premedicine/Pre-Health: In addition to the core requirements in genetics, cell biology and physiology, biology premed/pre-health majors are advised to include developmental biology (BIOS 30342), one or more courses in infectious diseases or disease mechanisms, biostatistics, and additional relevant electives (neurobiology; tumor cell biology, etc.), and biochemistry (CHEM 40420) as BIOS electives to reach the required 41 credits in biology.

Majors intending to go on for an MD/Ph.D. should include multiple semesters of undergraduate research and/or summer research internships in their overall program.

Cellular and Subcellular: This grouping was designed for students considering graduate study in any of the many areas of cellular biology and biochemistry. It is also appropriate for premedical students. For this grouping, students follow the core curriculum, making choices in Cores III through VI. In the area of Core IV, Physiology, students should consider taking both courses listed. The courses Introduction to Microbiology (BIOS 30401) and Virology (BIOS 40416) are recommended. For electives in biological sciences, a course in Immunology (BIOS 40419), Genomics (BIOS 30423), or Advanced Cell Biology (BIOS 60539) is recommended. Depending on the credits associated with the choice of courses made in the core, students will generally be required to pick two more electives in biological sciences to complete the requirement of 41 credits.

Organismal and Community: This grouping is primarily intended for students planning careers in ecology, environmental biology and related areas and allows students to develop considerable expertise during their undergraduate years. It may include electives in biological sciences beyond the 41 credits required of the major. Individual interests may be accommodated by judicious choice of biological science courses and of the science elective.

Students interested in this area of biological sciences may wish to take advantage of the University of Notre Dame Environmental Research Center (UNDERC), a University facility which comprises about 7,000 acres, including more than 20 lakes, in the Upper Peninsula of Michigan. Biological research (including whole-ecosystem experiments), graduate studies and undergraduate course work take place at the center. Paid internships are available to support student participation in BIOS 35502 at UNDERC each summer. Students who participate in UNDERC (EAST) (BIOS 35502) are also eligible to participate in UNDERC WEST (BIOS 35503) and/or UNDERC (SOUTH) (BIOS 35504 or 35505). However, only a maximum of 7.0 “UNDERC” credits may count towards the required 41.0 BIOS credits for this major. Credits beyond 7 are considered as general elective credits for the purpose of graduation.

In this grouping, students follow the core curriculum, making choices in Cores III through VI. In the area of Core VI, Ecology, students should consider taking both courses listed. Students are encouraged to take Plant Science (BIOS 30325). Also recommended are Vertebrate Biology (BIOS 30404) and/or Animal Behavior (BIOS 30407).

Microbiology and Infectious Disease: This grouping is intended for students interested in microorganisms and molecular biology and who are considering graduate study in these areas. It is also appropriate for premedical students. It requires electives in biological sciences beyond the 41 credits required of the major.

Here, students follow the core curriculum, making choices in Cores III through VI. Students should take Principles of Microbiology (BIOS 30401 and the lab BIOS 31401); Virology (BIOS 40416); or Medical and Veterinary Parasitology (BIOS 40415); Immunology (BIOS 40419); Cellular and Molecular Basis of Human Disease (BIOS 40435); and/or AIDS (BIOS 40440).

Sample Curriculum: The sample curriculum for the four-year program listed below is only one of a number of ways a student can complete all the requirements for a biology major. Students should discuss their specific interests with their departmental advisor and plan their semesters accordingly. Alternative sample curricula can be developed with the assistance of the biology advisor.

Note that this sample curriculum assumes that no AP or language CE credits are included.

First Year

Fall Semester
- BIOS 10161 (Core Ia: Principles) (Lab #1) 4
- MATH 10350 or 10550 4
- CHEM 10171 (or 10181) 4
- History or Sociology 2 3
- WR 13100 3
- Moreau First Year Experience 1

19

Spring Semester
- BIOS 10162 (Core Ib: Principles) (Lab #2) 4
- MATH 10360 or 10560 4
- CHEM 10172 (or 10182) 4
- History or Sociology 2 3
- Theology or Philosophy 2 3
- Moreau First Year Experience 1

19
Sophomore Year

Fall Semester
B IOS 20250 (Core II: Genetics) 4
B IOS 21250 (required LAB #3) 1
CHEM 20273 4
Theology/Philosophy 3
Language 4
16

Spring Semester
B IOS 20241 (Core III: Cell Biology) 3
Elective Lab 4 (e.g., 27241 Cell Biology) 2
CHEM 20274 4
Theology/Philosophy 3
Language 4
16

Junior Year

Fall Semester (V overseas BIOS class(es) are an option)
B IOS Core V (Evolutionary Biology) 3
Physics 30210, 31210 4
Free Elective 3
Theology/Philosophy 3
Language 3
Elective BIOS Lab #4 1
17

Spring Semester
B IOS 40411 (Biostatistics) 4
B IOS Core IV (Physiology) 3
Physics 30220, 31220 4
Fine Art/Literature 3
14

Senior Year

Fall Semester
B IOS Core VI (Ecology) 3
B IOS or Science Elective 3
Free Elective 3
Free Elective 3
Elective BIOS Lab #5 1
13

Spring Semester
B IOS Elective 3
B IOS Elective 3
Free Elective 3
Free Elective 3
Elective BIOS Lab #6 1
12/13

TOTAL: 124 minimum

1 Students who begin with the CHEM 10181–10182 sequence and select BIOS as their major would complete the four-semester sequence with CHEM 20273–20274.
2 One of these courses must be a University seminar.
3 For premedical students, it is strongly recommended that the student take a 20000-level English literature course. This ensures that the student will be able to meet the standard medical-school admission requirement of two English courses. Medical ethics and biochemistry are also generally required or highly recommended.

4 While not required, many students choose to take a supporting 3-credit non-BIOS science course that counts toward the required 41 credits in their major.

Also, Biostatistics (B IOS 40411/42411) is highly recommended for all students planning on a health-related professional program or a graduate program, especially in ecology, environmental biology, or other field of life science. A non-BIOS/Science elective can be any 30000- 50000-level course other than those required, and approved by the director of undergraduate studies for the Department of Biological Sciences. Biochemistry (e.g., CHEM 40420) is especially recommended.

In addition to the undergraduate curriculum, the Department of Biological Sciences offers programs of graduate study leading to the degrees of master of science and doctor of philosophy, as described in the Graduate School Bulletin of Information.

UNDER FIELD BIOLOGY PROGRAMS

Seven-credit programs for undergraduates that emphasize field biology are offered at the University’s Environmental Research Centers (Michigan and Montana). The programs entail course work, group research projects, and an independent research project. Application to the programs occurs in the fall of the sophomore and junior years and enrollment is limited by housing at each location. If selected, students enroll in BIOS 35501 during the spring semester and BIOS 35502 during the summer. To participate in the Montana (BIOS 35505) or other programs (BIOS 35504, 35505), one must first participate in the Michigan program.

SELECT GRADUATE-LEVEL COURSES

Many 60000-level courses in biological sciences are open to qualified undergraduates, subject to the approval of the course instructors and the director of undergraduate studies. Graduate-level courses generally include a majority of upper-class students and are recommended to undergraduate majors. These include:

- 60508. Population Genetics
- 60515. Vector Genetics
- 60523. Practicum in Environmental Biology
- 60527. Stream Ecology
- 60529. Population and Disease Ecology
- 60530. Immunobiology of Infectious Diseases
- 60531. Molecular Biology I
- 60532. Molecular Biology II
- 60558. Biological Electron Microscopy
- 60562. Aquatic Insects
- 60570–60579. Topics Courses

Additional undergraduate and graduate-level courses are expected to be added during the next four years.

The above 60000-level courses are described in the Graduate School Bulletin of Information.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting one or more of the following subjects:

- Biological Sciences
- Global Health - Eck Institute
- Sustainability

Course descriptions can be found by clicking on the subject code and course number in the search results.

MINOR IN SUSTAINABILITY

Director of the Minor in Sustainability:
Rachel Novick

Advisory Committee:
Samantha Salden (Chair)
Jon Coleman
Jessica Hellmann
Samuel Miller
Patrick Murphy
Anthony Serianni
John Sitter
Andrew Weigert
Eduardo Wolf

The Minor in Sustainability is a course of study for undergraduates from broadly diverse academic disciplines. It examines the footprint of humanity on Earth’s systems and ways to reduce that footprint to achieve social well-being and environmental protection. Faculty from multiple Colleges teach the principles and practices of sustainability from varied perspectives to provide a unique and dynamic curriculum. The curriculum is designed to augment disciplinary coursework in an area of major study so that students learn to integrate diverse ways of thinking and appreciate interdisciplinary problem-solving.

Students in the minor receive training in the principles and practices of sustainability through formal coursework and independent study. Graduates of the minor will be equipped with knowledge and skills about sustainability, an ability to communicate about sustainability, and an imperative to implement sustainable practices. Graduates will be prepared to make substantive contributions to the development of more sustainable practices, practices that benefit their personal and professional lives, the lives of others, and the lives of future generations. Students will also be well positioned for in-depth study on sustainability at the post-baccalaureate level. Finally, the study of Catholic traditions and social and environmental ethics will help students understand the role that religious commitment can play in achieving sustainability.

Students can apply for admission to the minor in their first year, sophomore year, or junior year by contacting the director of the minor. They are required to take a gateway course “Sustainability:
Biological Sciences

Principles and Practices”, an interdisciplinary course taught by at least three faculty from multiple departments across the University. This course should be taken at the beginning of study in the minor, but students do not need to declare the minor to enroll.

Students then select from a list of approved courses totaling at least 3 classes of at least 9 credits. These courses fall into four categories (Design, Impacts, Social Institutions, and Individual Behavior and Values) and are tagged as such using the course attributes which are searchable via the University’s online Class Search. Students must take two courses outside of their College, except for Arts and Letters students who may take one liberal arts course and one social science course. They also must take courses from three out of the four elective categories. Students who wish to take two electives in the same category may petition for an exception, provided that the two classes are providing substantially different disciplinary approaches to sustainability. One-credit seminars such as those offered by the Center for Social Concerns can be accumulated to give the equivalent of one 3-credit course. Students planning to study abroad are encouraged to petition for approval of relevant courses at their international institution before they leave campus.

Students must meet with the director of the minor in sustainability to discuss their capstone projects during the spring semester of their penultimate year, but they are encouraged to set up an initial meeting sooner. They are required to submit a brief description of their project proposal at the end of their penultimate year and identify a faculty member who has agreed to serve as their advisor. Students will receive feedback on their proposals from the Sustainability Minor Advisory Board and may be required to resubmit their proposals with modifications to gain approval. Students wishing to start their research earlier (for example, the summer before their junior year) should submit their project proposal before they begin their research. During the fall of their final year, students will enroll in a capstone seminar (SUS 43000) and one credit of independent study (SUS 48001). As part of the requirements for SUS 48001, they will complete a research paper thoroughly exploring existing scholarship on their project topic. During the spring of their final year, students will enroll in a second credit of independent study (SUS 48002) and complete their capstone project.

Additional details about the Minor in Sustainability can be found online at http://science.nd.edu/sustainability.

### BIOLOGICAL SCIENCES HONORS PROGRAM

The goal of the biology honors program is to give our most talented students an exceptional background in biological research. Participation in this program will increase their level of commitment and productivity while preparing them for successful postgraduate work.

The program will accept junior biological sciences and environmental science majors in good academic standing who have already completed one semester of undergraduate research at Notre Dame. Selection by the Undergraduate Research Committee will be based on a research statement, transcript, a minimum GPA of 3.25 in College of Science courses, and a recommendation letter from their research advisor.

To graduate with honors, students will have to complete:

1. At least three semesters (for at least 4 credits total) and one summer of independent research at Notre Dame. Students are expected to apply for REU, COS-SURF or other summer funding as appropriate.
2. A thesis of at least 20 pages (a manuscript can substitute only if the student has made substantial writing contributions to the work).
3. A graduate-level course in the area of course in the area of research.
4. A presentation at a national or regional meeting or manuscript submitted to a peer-reviewed journal.
5. One disciplinary research seminar each year (1 credit seminar, see below).

**Thesis Requirements:**

Students will write a draft of their thesis in the senior research seminar with input from the advisor and the seminar coordinator. The final draft of the thesis will be written with the advisor, and will be submitted by April 1. Each thesis will be reviewed by one member of the Undergraduate Research Committee. If the thesis is not approved, a second committee member will read the thesis and confer. The students will be notified by April 15 if a rewrite is needed. The rewrite will be due May 1.
Guidelines for the thesis and thesis reviewers will be provided.

Disciplinary Research Seminar (Graded S/U)
The purpose of these disciplinary groups is to create a small learning community where students and practicing scientists can connect. The seminar learning goals are to support and develop each student’s independence, scientific communication skills, critical review skills, and understanding of their research in the context of the larger field. As appropriate, the groups will meet as a whole to foster interdisciplinary habits of mind and skills. The seminar will have the added benefit of helping students prepare for graduate applications and fellowships.

Seminar coordinator: Michelle Whaley

Possible junior year topics (offered each spring):
1. Critical reading of research articles
2. Project/experimental design, creativity in research
T&R faculty will share their research agenda, but also why they chose their research questions and approaches.
3. Research presentations (posters and talks)
4. Research ethics
5. Career exploration that includes guest speakers—seminar speakers, alumni speakers.

Possible senior year topics (offered each fall):
1. Thesis preparation
2. The publication process
3. Graduate fellowship and graduate school personal statements
4. Attend biology seminars and discuss research methods and results with faculty
5. Journal club (with grad students if possible).

ENVIRONMENTAL SCIENCES

Director of Undergraduate Studies: Kenneth Filchak

Program in Environmental Sciences. All life, including humans, directly depends on the functioning of Earth’s ecosystems. Further, it has become apparent that human activities have altered Earth’s environments. Factors such as pollution, invasive species introductions, anti-biotic resistance, and global climate change can all be traced to human activity. Increasing the knowledge and awareness of the link between humans and the environment is one of the most important endeavors of the twenty-first century.

The environmental sciences major stresses interdisciplinary knowledge and logic. The curriculum is designed to expose students to a scientific understanding of our environment from biological, chemical, and geologic perspectives. Particular emphasis is placed on understanding how humans interact chemically and biologically with the environment. Material and energy resource limitations, chemical and thermal pollution, and effects of environmental pollution on public health are major considerations within the environmental sciences curriculum. Emphasis is also placed on understanding interactions between human societies and the environment from social, ethical, economic, anthropological, and governmental points of view. Students are also encouraged to strengthen their mathematical and computational skills and to participate voluntarily in environmentally oriented research projects or summer internships.

Depth can be gained through the addition of a concentration in Earth Sciences. With this collaboration students will explore how geologic processes affect humans and how human activity is changing earth systems, studying a range of topics including earthquakes, volcanic activity, global climate change, subsurface transport of toxic heavy metals, carbon sequestration, and safe disposal of nuclear waste. The Earth Science concentration program combines classroom, laboratory and field studies, and all students are encouraged to conduct independent research under faculty supervision. The flexibility of the undergraduate program allows students to switch to this concentration if they have followed either an engineering or science track during their first or even their second years.

An undergraduate major in Environmental Science with a concentration in Earth Science prepares a student for graduate study (M.S., Ph.D.) in many aspects of geological and environmental science, as well as for admission to a variety of professions. Graduates with a B.S. degree may enter careers in diverse areas such as state geological offices, the National Park Service, oil and mining industries, environmental consulting, and government national research laboratories or policy offices.

The First Major. College of Science students who major in Environmental Sciences will earn the degree of bachelor of science. Students following the Environmental Sciences first major program complete a total of 69 credits of science.

CONCENTRATION IN EARTH SCIENCES

The following outlines the course requirements (totaling 34 credits) for Earth Sciences concentration:

<table>

The Second Major for Arts and Letters and Business. Most students in the College of Arts and Letters or in the Mendoza College of Business may participate in the Environmental Sciences Program as a second major. Second majors are required to complete a minimum of 37 credits of science. Students considering this program should investigate options brought to a first major by adding course work in environmental sciences. For example, students majoring in government and in environmental sciences could consider postgraduate study or careers in public policy. Students majoring in economics and in environmental sciences would have a good background for the developing field of environmental economics. A second major in Environmental Sciences also complements majors in the other sociological fields of anthropology, psychology, or sociology. Similarly, business students will likely find environmental sciences to be useful background when working with local or federal governments on issues of environmental compliance or when considering the impact of business decisions on the environment (environmental assessment). All students are urged to discuss their long-range career plans with advisors in both majors.

Relationship with Other Programs: The Environmental Sciences Major Program has a special collaborative relationship with the Science, Technology, and Values (STV) Concentration program housed in the Reilly Center in O’Shaughnessy Hall. Select courses required of environmental sciences first majors are also cross-listed as STV courses. Thus, students in the STV program from across the university are expected to benefit in the curricular endeavors of the Environmental Sciences Program. Environmental sciences first majors often enroll in the STV program. (Environmental science students with flexibility in their program often have room to complete an STV concentration by taking STV courses beyond those required by the first major or university requirements.) However, arts and letters students with second majors in environmental science will be encouraged to participate in further interdisciplinary course work through the STV concentration. Second majors are especially encouraged to take the capstone course, SC 40491, Current Topics in Environmental Science, provided it completes that second program.

Related Options: A similar bachelor’s degree program, Environmental Geosciences (ENVG), is offered by the College of Engineering.

Also available through the College of Engineering is the Environmental Geosciences minor. Note, for students in ES (or SCBU, SCCO, and SCED); the College of Science will allow the course SC/ENVG 20110 to count toward both the science major and this major. Any courses taken for completion of this minor may not also be counted as science electives or science requirements for a science major.
BACHELOR OF SCIENCE WITH A MAJOR IN ENVIRONMENTAL SCIENCES

All environmental sciences first majors take the following courses in science:

- Introductory Biology (BIOS 10161–10162 and 11161–11162) or (20201–20202 and 21201–21202)
- Chemistry (CHEM 10171 and 10172)

Calculus (MATH 10350–10360) or (10550–10560)1,2

Planet Earth (SC 20110/21110)

Physics (PHYS 10310–10320 or 30210–30220)

Biostatistics (BIOS 40411)4

Ecology (BIOS 30312 and 31312)5

Chemistry Elective6

Current Topics in Environmental Science (SC 40491)

Students also choose science electives from an approved list, completing a required minimum total of 69 credits in science.

Also required for the major are the following non-science courses:

An ethics course with emphasis on environmental biology or life science issues, i.e., Environmental Ethics or Science, Technology, and Society, or other approved arts and letters courses.

Introduction to Microeconomics (ECON 10010 or 20010).8

Students are also urged to choose their electives from a recommended list of arts and letters courses.11

Requirements for the program are summarized in the table in this section.

Notes:

1. Equivalent or higher-level sequences in mathematics may be substituted, e.g., MATH 10850–10860 for MATH 10350–10360.

2. Students interested in the area of ecological modeling are strongly urged to take MATH 10550–10560 for their mathematics requirement. Other mathematics courses should be taken as science electives.

3. Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350–10360 or MATH 10550–10560. Students having taken MATH 10250, 10110 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found later in this section of the Bulletin.)

4. Students transferring into the ES or ES2 major, or transfer students who have previously taken a statistics course equivalent to ACMS 20340, MAY BE allowed to have this course count for BIOS 40411 (Biostatistics) with the permission of the ES Director. Students will be allowed to substitute ACMS 20340, or an equivalent statistics course (e.g., PSY 30100) as ES or ES2 majors in exceptional cases with the permission of the director of their major and the associate dean of the College of Science.

5. While General Ecology (BIOS 30312 and BIOS 31312) is normally required for ES and ES2 majors, students may substitute an alternative ecology lecture and laboratory course (e.g., BIOS 30420 Aquatic Ecology) when their career interests indicate the alternative is a more appropriate introductory ecology course as determined by the director of their major and approved by the associate dean of the College of Science. An ecology course taken overseas in one of the OIS programs will only rarely substitute for the ND course. Permission to substitute must come from the director of the Environmental Science major and the associate dean, College of Science, prior to taking the class.

6. The 4-credit chemistry elective requirement is satisfied by either one additional course in organic chemistry (CHEM 20273) or Inorganic Chemistry (CHEM 20243) or by Analytical Chemistry (CHEM 30333, 31333) or by an alternative 4-credit CHEM course as approved by the director of their major and by the associate dean of the College of Science. Students are also allowed to take the 3-credit CHEM 10122 lecture or CHEM 20204 with the understanding that if a laboratory is established for that course, they will be required to take that lab prior to graduation.

7. The following are examples of many approved science electives for this program:

- Botany (BIOS 30304) or at St. Mary’s Evolution (BIOS 30305)
- The History of Life (BIOS 30310)
- Genetics (BIOS 20250 or 20303)
- Principles of Microbiology (BIOS 30401)
- Animal Behavior (BIOS 30407)
- Aquatic Ecology (BIOS 30420)
- Stream Ecology (BIOS 60527)

Numerous other BIOS courses as designated by the ES director, including 6000-level graduate courses are accepted.

Environmental Chemistry (CHEM 20204)

Further chemistry electives (from Note 6 above)

Second course in general chemistry (CHEM 20274)

Principles of Biochemistry (CHEM 40420)

Computer Programming and Problem Solving (MATH 20210)

Calculus III (MATH 20550)

Introduction to Linear Algebra and Differential Equations (MATH 20580)

Differential Equations (MATH 30650)

Topics in Computing

Historical Geology (SC 20120)

Mineralogy and Optical Mineralogy (SC 20220)

Environmental Geology (SC 30111)

Sedimentation and Stratigraphy (SC 30230)

Biological Sciences

Geochemistry

Paleontology (SC 40350)

Select CE courses may be allowed with the approval of the associate dean, College of Science.

Other SC courses as approved by the ES director may be included as they become available. Select courses offered in Study Abroad (UC-Dublin, UWA-Perth) also may be counted toward the ES science electives as well as select ENVG courses not cross-listed with SC, with permission of the ES director.

Students interested in attending graduate school in environmental sciences should consider taking science electives beyond requirements of this major. For example, for admission into some graduate programs, a year of organic chemistry would be a requirement. Deviations from the approved list of science electives must be approved by the advisor for the major.

8. For this major, the University requirement of a second philosophy or theology or other University-required course may be fulfilled by one of these courses.

9. The economics requirement for this major is fulfilled by taking Introduction to Economics (Microeconomics) either in the first year (ECON 10010) or in the second through fourth years (ECON 20010). Note, the course ECON 13181 (Social Science University Seminar) will not fulfill the economics requirement for this major.

10. For this major, the University social science requirement will be fulfilled by the required microeconomics course.

11. Numerous STV courses are recommended as electives, including Environment and Environmentalism in History (STV 30175), Self, Society, and the Environment (STV 40319) and others as approved by the ES director. The STV courses may be taken either under the STV label or from the primary departmental cross-list.

12. As is the case for science first majors, six credits of the science course work in this program may also be counted toward the student’s university science requirement.

13. While Biostatistics (BIOS 40411) is the preferred course, other 3- or 4-credit statistics courses required for completion of a first major (i.e., economics, psychology) may be substituted for BIOS 40411 with the permission of the ES2 director. MATH 101430 is not an acceptable substitute for BIOS 40411 or other statistics courses. Although mathematics course work is not specifically required of this program, several required courses (BIOS 40411 or some of the first courses in physics) do have a prerequisite of one year of calculus (MATH 10350–10360 or equivalent). For all students in the College of Arts and Letters or the Mendoza College of Business, the mathematics sequence MATH 10350–10360 is acceptable for completion of the university mathematics requirement; thus, this sequence is recommended for students considering Environmental Sciences as a second major. Students lacking this mathematics background may have to take further course work in mathematics to meet the prerequisites in mathematics of courses in this program.
14. Chosen from approved biology or geology electives listed in note 7 above or one first course in physics (PHYS 10111 or 10310 or 10411 or 30210) or an approved survey course: Concepts of Energy and the Environment (PHYS 10052) or Energy and Society (PHYS 20051) and others as designated.

Sample Curriculum (B.S. Degree Majors):

First Year
First Semester*
- Biological Sciences I and lab 4
- Calculus A 4
- General Chemistry I and lab 4
- WR 13100 or History** 3
- Theology I** or Philosophy I** 3
- Moreau First Year Experience 1

Second Semester
- Biological Sciences II and lab 4
- Calculus B 4
- Organic Chemistry I and lab 4
- WR 13100 or History** 3
- Theology I** or Philosophy I** 3
- Moreau First Year Experience 1

Sophomore Year
First Semester
- Planet Earth and lab 4
- Ecology and lab 4
- Language I 3
- Microeconomics 3

Second Semester
- Chemistry II and lab 4
- Biostatistics 4
- Language II 4
- General Elective 3

Junior Year
First Semester
- Physics I and lab 4
- Theology II** or Philosophy II** 3
- Language III (intermediate level) 3
- Science Elective #1 3
- Science Elective #2 3

Second Semester
- Physics II and lab 4
- Science Elective #3 3
- Theology II** or Philosophy II** 3
- General Elective 3
- Conservation Seminar 1

Senior Year
First Semester
- Current Topics (SC 40491) 3
- Science Elective #4 3
- Science Elective #5 3
- Fine Art/Literature 3
- General Elective 3

Second Semester
- Science Elective #6 3
- General Elective 3
- General Elective 3
- General Elective 3
- General Elective 1

*Ideally, students who decide to major in environmental sciences before beginning their first year should take BIOS 10161–10162. This will allow for an additional year of relevant science and other electives to be included in their total curriculum. See notes accompanying BIOS 10161–10162 and BIOS 20201–20202 for additional information.

15

ENVIRONMENTAL SCIENCES MAJOR WITH A CONCENTRATION IN EARTH SCIENCES

First Year (see core environmental sciences major)

Second Semester
- Global Change, Water & Energy 3
- Biostatistics and tutorial 4
- Chemistry Elective 4
- Language II 3
- University Requirement Course** 3

Junior Year
First Semester
- Environmental Mineralogy 3
- Sedimentation and Stratigraphy 4
- Physics I and lab 4
- Fall Field Trip 1
- Language III 3

Second Semester
- Petrology of Earth Materials 4
- Environmental Microbiology 3
- University Requirement Course* 3
- Physics II and lab 4
- Spring Field Trip 1

Senior Year
First Semester
- Org. Geochem/Stable Isotopes 3
- Geochemistry 3
- General Elective 3
- Surficial Processes 3
- University Requirement Course* 3

Second Semester

- Environmental Aquatic Chemistry 3
- General Elective 3
- University Requirement Course* 3

ENVIRONMENTAL SCIENCES AS A SECOND MAJOR

Most students in the College of Arts and Letters or in the Mendoza College of Business may participate in the Environmental Sciences Program as second majors. Students who are considering the environmental sciences second major must have a first major in one of the departments of the College of Arts and Letters or the Mendoza College of Business. Because of the sizable overlap in requirements, students in the College of Arts and Letters who have a second major in preprofessional studies will not be allowed to add this second major program.

The requirements for second majors consist of the following science courses: 15
- General Biology (BIOS 10161+11161 and BIOS 10162+11162) or (BIOS 20211+21210 and BIOS 20212+21202)
- Ecology (BIOS 30312, 31312)
- Chemistry (CHEM 10171, 10172) or (CHEM 10171, 10122)
- Environmental Chemistry (CHEM 20204) or approved alternative
- Geology (SC 20110 with lab)
- Biostatistics (BIOS 40411) 15
- Biology or Geology elective (3 or 4 credits) 15

The total required course work requires a minimum total of 32 credits in science beyond the University math requirement.

Note, the same policy applies for Environmental Sciences first and second majors: All College of Science courses specified by the major program must be taken at the University of Notre Dame. (An exception is made for any science courses taken for...
Sample Curriculum (Second Majors):
Students should remember that all science major programs require course work that builds upon prerequisites and thus require careful planning. A sample curriculum for second majors is given below. Note: Only the courses for the second major are listed.

**First Year**

| Total Science                     | 124     |

**Notes:**

- MATH 10350–10360 or equivalent are not included in the minimum total of 37 credits in this sequence; satisfies the University math requirement.
- Students may take CHEM 20204 (Environmental Chemistry) or SC 20100 (Environmental Geosciences) or SC 30111 (Environmental Geology) or other approved CHEM, ENVG, or SC electives.
- Students whose final requirement is a three-credit class in BIOS, ENVG, or SC may take SC 40491 to complete the major with the permission of the director of the ES major.

Program of Studies: Chemistry is the science of substances that comprise the world about us and is concerned with their structure, their properties and the reactions that change them into other substances. Chemists and biochemists practice their profession in many ways—in educational institutions, government laboratories, private research institutions and foundations and in many commercial areas, including the chemical, drug, health, biotechnology, pharmaceutical and food industries.

The Department of Chemistry and Biochemistry has a strong undergraduate program together with a strong graduate education and research program. The graduate program greatly benefits undergraduate education by attracting highly qualified faculty and results in the availability of excellent research.

Chemistry and Biochemistry
Chair: Kenneth W. Henderson
George and Winifred Clark Professor of Chemistry: Marvin J. Miller
Grace-Bupley Professor of Chemistry: Norman Dowichi
Emil T. Hofman Professor of Chemistry: Bradley D. Smith
Charles L. Huisking Professor of Chemistry: Xavier Creary
Kleiderer/Pezold Professor of Biochemistry: Francis J. Castellino
Navari Family Professor of Life Sciences: Shahrar Mobashery
Rev. John Cardinal O’Hara Professor: Patricia L. Clark
Arthur J. Schmidt Professor of Chemical and Biomolecular Engineering: Paul Bohn
Rev. John A. Zahn Professor of Science: Prashant V. Kamat

Professors:
Brian M. Baker; Seth Brown; Ian Carmichael; J. Daniel Gezelter; Holly V. Goodson; Gregory V. Hartland; Paul Helquist; Kenneth W. Henderson; Paul W. Huber; A. Graham Lappin; Anthony Serianni; Slavi Sevov; Sharon Stack; Richard E. Taylor; Olaf G. Wiest

Associate Professors:
Brandon L. Ashfeld; Jon P. Camden; Steven A. Corcelli; Amanda B. Hummon; S. Alexander Kandel; Masaru Kenneth Kuno; Marya Lieberman; Jeffrey W. Peng; Zachary D. Schultz

Assistant Professor:
Haifeng Gao; Vlad M. Ilic; Laurie E. Littlepage; John Parkhill

Emeriti:
Subhash C. Basu; Roger K. Bretthauer; Thomas P. Fehlner; Richard W. Fessenden; Emil T. Hofman; Joseph P. Marino; Dan Meisel; Thomas L. Nowak; W. Robert Scheidt; Robert H. Schuler; Anthony M. Trozzolo

Program of Studies: Chemistry is the science of substances that comprise the world about us and is concerned with their structure, their properties and the reactions that change them into other substances. Chemists and biochemists practice their profession in many ways—in educational institutions, government laboratories, private research institutions and foundations and in many commercial areas, including the chemical, drug, health, biotechnology, pharmaceutical and food industries.

The Department of Chemistry and Biochemistry has a strong undergraduate program together with a strong graduate education and research program. The graduate program greatly benefits undergraduate education by attracting highly qualified faculty and results in the availability of excellent research.
facilities and modern instrumentation necessary to train the scientists of tomorrow. This department is able to provide an excellent program of undergraduate research to complement regular course work. Student participation in research is highly encouraged as a key part of the education of chemistry and biochemistry majors.

The programs in chemistry and biochemistry described in the following pages prepare students for graduate studies and professional work in the chemical and biochemical sciences, as well as in interdisciplinary areas that rely heavily on chemistry. Bachelor of science degrees are offered with a major in chemistry or a major in biochemistry. At the graduate level, the Department of Chemistry and Biochemistry offers programs leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

**BACHELOR OF SCIENCE WITH A MAJOR IN CHEMISTRY**

The chemistry curriculum at Notre Dame includes two programs: the Chemistry Career Program, designed for students interested in a professional career in chemistry, and the Chemistry Combination Program, designed for those students who are interested in combining chemistry with business or with computing.

All chemistry majors take the following basic sequence of courses:

<table>
<thead>
<tr>

BACHELOR OF SCIENCE WITH A MAJOR IN BIOCHEMISTRY

The biochemistry curriculum emphasizes the chemical basis of biological processes. All biochemistry majors are required to take the following courses:

General Chemistry (CHEM 10181 AND 11181 recommended; or optionally CHEM 10171, 11171)
Organic Chemistry (CHEM 10182, 11182, 20283, 21283)¹
Inorganic Chemistry (CHEM 20284, 21284)
Physical Chemistry (CHEM 30321, 30322)
Analytical Chemistry (CHEM 30333, 31333)
Chemistry Seminars (CHEM 23201, 23202, 23203); three seminars
Biochemistry Seminar (CHEM 23212)
Biochemistry (CHEM 30341, 31341, 30342)
Mathematics (MATH 10550, 10560, and CHEM 20262)
Physics (PHYS 30210-30220 or PHYS 10310, 10320)
General Biology (BIOS 10161–10162 or 20201, 21201, 20202, 21202)
Genetics (BIOS 20303)
Cell Biology (BIOS 30341)
Molecular Biology (BIOS/CHEM 50531)

Notes:
1. Substitution with permission only.
2. The student should take three general requirement courses during the first year, including one course that is designated a University Seminar. Economics is required for the Chemistry with Business program.
3. One course in theology and philosophy should be completed by the end of the sophomore year. These courses may be taken in either semester of the first or second year.

4. Undergraduate research, CHEM 48498, is a recommended science elective in all programs beginning in the sophomore year with typically one or two credits per semester. BIOS 21303 and BIOS 31341 are also recommended.

5. In all the programs, one chemistry seminar is generally taken in each of the sophomore, junior and senior years.

Honors in Chemistry and Biochemistry

Junior majors in chemistry and biochemistry may apply for the departmental honors program to receive the designation “honors in chemistry” or “honors in biochemistry” in their student transcript if they have a minimum grade point average of 3.5 and are enrolled in undergraduate research CHEM 48498 or CHEM 48499. The requirements for completion of the honors program are a minimum of two semesters of undergraduate research after the beginning of the junior year and the course CHEM 48500, with a grade of B or better. CHEM 48500 has to be taken in the semester the thesis is presented.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on "Class Search" and selecting the subject Chemistry and Biochemistry. Course descriptions can be found by clicking on the subject code and course number in the search results.

Graduate courses in chemistry are open to qualified advanced undergraduate students, subject to the approval of the departmental advisor. These courses are listed in the Graduate School Bulletin of Information.

Associate Special Professonal Faculty:
  Arthur Lim; Annette Pilkington

Program of Studies. Mathematics has had a profound effect upon civilization since ancient times, when the legend originally inscribed on the entrance to Plato's academy was "Let no one ignorant of geometry enter here." It was equally true during the medieval period, when arithmetic and geometry constituted two of the seven subjects considered essential for a liberal education. It has been said that the second most influential book in the span of Western civilization—after the Bible—is Euclid's Elements. Although mathematics is usually associated with science and technology in the modern mind, it seems apparent from the writings of the great mathematicians of the 17th and 18th centuries that religious belief played a great role in their pursuit of mathematics. They saw the "system of the world" obeying mathematical laws and as a consequence
Mathematics

felt impelled to study mathematics so as to better appreciate the world’s Creator.

Mathematics continues to have a profound influence in our century. From the theory of relativity, with its applications to the study of the large-scale structure of the universe, to the development of the modern computer, with its manifold applications in science, technology and business, mathematics has played a fundamental role. It is surely the most universal of all scientific tools, and the student equipped with a strong mathematical background will be in the enviable position of being able to employ his or her expertise in any area in which rigorous thought and precision of results are mandated.

The department is dedicated to the development of undergraduate studies, to the teaching of mathematics to scientists, engineers and teachers, to graduate education and research, and to the discovery of new mathematics. The entire faculty is involved with undergraduate affairs, and students have the opportunity of associating with scholars of international repute. Mathematics at Notre Dame provides students with a discipline of the mind and a stimulation of the imagination par excellence.

Programs in mathematics prepare students for graduate studies or for professional work in fields in which mathematics plays a dominant role. They provide an excellent preparation for law school, medical school, business school and secondary school teaching. Graduates may enter careers in research institutes or industrial or government positions.

In addition to its undergraduate programs, the department offers programs of graduate study leading to the degree of doctor of philosophy, as described in the Graduate School Bulletin of Information.

The department recognizes that, besides those students who wish to pursue a career devoted primarily to mathematical research and teaching, many will wish to take positions in business, industry or government where they will be using their mathematical skills in close collaboration with engineers as well as biological, physical and social scientists. These students will find among the listed programs one well suited to their needs. Besides these programs a student may, in consultation with the director of undergraduate studies and the department chair, create a program especially tailored to his or her career goals.

BACHELOR OF SCIENCE WITH A MAJOR IN MATHEMATICS

The mathematics curriculum at Notre Dame includes seven course sequences or areas of concentration within the College of Science. These programs are designed to accommodate the academic and professional interests of all mathematics majors. Brief descriptions are given below, and more detailed descriptions of these programs are available on request from the Department of Mathematics.

College Requirements. All must take the following College of Science courses: (CHEM 10171, 10172) or (CHEM 10171, 10122); PHYS (10310 or 10093) and PHYS (10520 or 10094); and an additional science elective.

A student who takes two semesters of organic chemistry or two semesters of general biology is only required to take PHYS (30210 or 10095) and (30220 or 10096).

Mathematics Honors Program

This program is suited to students who are interested in graduate work in one of the mathematical sciences and to those whose career plans require a strong background in modern mathematics.

Honors Calculus I (MATH 10850)
Honors Calculus II (MATH 10860)
Honors Calculus III (MATH 20850)
Honors Calculus IV (MATH 20860)
Honors Algebra I (MATH 20810)
Honors Algebra II (MATH 20820)
Honors Algebra III (MATH 30810)
Honors Algebra IV (MATH 30820)
Honors Analysis I (MATH 30850)
Honors Analysis II (MATH 30860)
Electives (12 credit hours with six at the 40000 level)

Mathematics Courses for the Other Programs

All other mathematics programs (except the computing program) require the following mathematics core courses:

Calculus I (MATH 10550)
Calculus II (MATH 10560)
Calculus III (MATH 20550)
Ordinary Differential Equations (MATH 20750)
Linear Algebra (MATH 20610)
Introduction to Math Reasoning (MATH 20630)
Algebra (MATH 30710)
Real Analysis (MATH 30750)

In addition to this basic sequence, the following courses are required for each program:

Mathematics Career Program

This program is designed to give students a general background in mathematics. In addition to the basic sequence of courses listed above, 15 hours of mathematics electives are required, at least three of which are at the 40000 level.

Mathematics and Life Sciences Program

This program is designed for mathematics majors who are interested in life-science-oriented careers.

The following mathematics courses are required in addition to the basic sequence of courses listed above:

Introduction to Probability (MATH 30530)
Mathematical Statistics (ACMS 30540)
Elective in Mathematics (three credit hours at the 40000 level)

The following College of Science courses are required:

Chemistry (CHEM 10171, 10172, 20273, 20274)
General Biology (BIOS 20201, 21201; 20202, 21202)
Genetics (BIOS 20303, 21303)

Mathematics and Computing Program

This program is designed for students who plan to pursue graduate study or industrial careers in computing science. All of the mathematics core courses listed above are required, as well as 15 hours of mathematics electives, at least three hours of which are at the 40000 level.

In addition, the student must complete one of the following sequences of computing courses:

Software design option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 30246, fourth elective
Theory option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 30151, CSE 40113
Theory and compilers option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 30151, CSE 40243
Computer architecture option: CSE 20211, CSE 20212, CSE 20221, CSE 30321, CSE 40322, fourth elective

Mathematics Education Program

This program is designed for students who plan a career in secondary education. The following mathematics courses are required in addition to the basic sequence listed above:

Introduction to Probability (MATH 30530)
Mathematical Statistics (ACMS 30540)
Geometry (MATH 361 at Saint Mary’s College, 3 credit hours)
Discrete Math (MATH 30210, 40210 or 40220, 3 credit hours)
One Mathematics elective (3 credit hours)

(One of these classes must be at the 40000 level)

The following education courses are to be taken at Saint Mary’s College: EDUC 201; 220, 340, 345, 346, 356, 451, and 475.

Mathematics and Business Administration Program

This program is designed to prepare students for a career in business or in the actuarial profession. The following mathematics courses are required in addition to the basic sequence:

Introduction to Probability (MATH 30530)
Mathematical Statistics (ACMS 30540)
Introduction to Operations Research (MATH 30210)
Two electives in Mathematics (including three credits at the 40000 level)

Also required are ECON 20010 or its equivalent and the following courses from the College of Business: BASC 20100, BASC 20150, BASC 20200, BASC 20250 and one course from the following list: ACCT 20200, FIN 30210, FIN 30220, FIN 30220, FIN 30600.
Mathematics and Engineering Science Program
This program is designed for students interested in applied or industrial mathematics. In addition to the mathematics core courses, the student is required to take one of MATH 40480, MATH 40390 or MATH 40750, and 12 more credits of mathematics electives. The student must also complete one of the following two sequences of engineering classes:

- Thermal option: AME 20221, AME 20222, AME 30331, AME 20231, AME 30334, Structures and design option: AME 20221, AME 20241, AME 20231, CE 30200, CE 30210

Mathematics as a Second Major
Students in the Mendoza College of Business or the College of Arts and Letters may pursue a second major in mathematics by completing all mathematics courses required for the career mathematics concentration. See the list below. To list mathematics as a second major on the transcript, the student must satisfy all of the requirements for a major in the department of the Mendoza College of Business or the College of Arts and Letters.

- MATH 10550-10560-20550, Calculus I-III 11.5
- MATH 20750, Ordinary Differential Equations 3.5
- MATH 20610, Linear Algebra 3
- MATH 20630, Introduction to Abstract Math 3
- MATH 30710, Algebra 3
- MATH 30750, Real Analysis 3
- Mathematics Electives 9*

* The student should take three general requirement courses during the first year, including one course that is designated a University Seminar. It is recommended that one course in history or social science be taken in the first year and one philosophy and one theology course be taken by the end of the sophomore year.

The Senior Thesis for Mathematics Majors
Students in the mathematics program have the option of writing a thesis on a subject in mathematics, or in an interdisciplinary area connected to mathematics. Such a thesis is strongly encouraged for math honors students and required of students in the SUMR program. This project is intended to give the student a better sense of how mathematics is done and used, and to develop in the student the habit of learning mathematics and its applications in an independent setting. In most cases, this work would be expected to be expository, but based on advanced-level readings. It should represent an effort that goes beyond what is found in an undergraduate course. It is especially desirable for a student to present a somewhat novel approach to an established subject, or to explore one of the many interesting connections that mathematics has with other disciplines.

During the second semester of the junior year and the first semester of the senior year, the student will work closely with a faculty advisor on a program of readings in preparation for the thesis, receiving two credits for each of these two semesters of work, under MATH 48800.

The thesis is to be crafted during the second semester of the senior year. The thesis must be submitted to the director of undergraduate studies by April 15 of the senior year. If the thesis is approved, the student will receive two credits under MATH 48900 and the citation of “Graduation with Senior Thesis” will appear on the transcript.

Students interested in writing a senior thesis should contact the director of undergraduate studies in the Department of Mathematics.

MINOR IN ACTUARIAL SCIENCE
The Department of Mathematics offers actuarial science as an academic minor. There is a heavy demand for the business courses which are required for this minor, and students are not guaranteed registration availability for these courses. Please see the academic advisor for more information. The actuarial science minor requires completion of the following ten courses:

- MATH 30530, Probability
- ACMS 30540, Statistics
- MATH 30610, Introduction to Financial Mathematics
- One mathematics elective at the 30000-level or above
- BASC 20100 or ACCT 20100, Accountancy I
- BASC 20150 or FIN 20150, Corporate Financial Management
- FIN 30220, Macroeconomic Analysis
- FIN 30600, Investment Theory
- ECON 10010, Principles of Microeconomics
- ECON 30331, Econometrics

Total: 30

Among the ten courses required for the minor, up to five courses can be double-counted for the student’s major.

COURSE DESCRIPTIONS
All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Mathematics. Course descriptions can be found by clicking on the subject code and course number in the search results.

Certain graduate courses in mathematics are open to qualified advanced undergraduates, subject to the approval of the director of undergraduate studies. Other graduate courses are described in the Graduate School Bulletin of Information.
# Neuroscience and Behavior

**Director of Undergraduate Studies:**
Nancy Michael

## Program in Neuroscience and Behavior

Neuroscience is a relatively young, exciting, and fundamentally interdisciplinary field devoted to the scientific study of the nervous system. Neuroscience encompasses the study of problems from multiple disciplinary perspectives at different levels of analysis in human and non-human organisms. It includes, for example, the study of molecular mechanisms in individual neurons and the coordination of millions of neurons into neural systems. Problems range from investigation of the evolution of nervous systems in basal vertebrates to the application of neuroscience to education and law. Neuroscientists also seek to develop neurologically plausible models of human thinking, affect and behavior.

The neuroscience and behavior major is an interdisciplinary program that includes both Bachelor of Science and Bachelor of Arts tracks. This description covers the BS track only (see the Arts & Letters section for description of the BA track). The requirements for the major are essentially the same for both tracks, with a foundational requirement of an introductory neuroscience course with a laboratory in the spring of the sophomore year. The two tracks differ in how they satisfy college level requirements. Both required courses and electives that will satisfy the major credit requirements are drawn primarily from the Departments of Biological Sciences and Psychology. Undergraduate research and approved electives in other departments are also encouraged.

This major requires a minimum of 61 credits in the College of Science. The list of approved courses for the major is still under development. Students should discuss their specific choices with the program’s undergraduate adviser.

## Bachelor of Science with a Major in Neuroscience and Behavior

All neuroscience and behavior majors (BS track) take the following courses in science:

- Introductory Biology (BIOS 10161/11161) or (20201/21201)
- Mathematics (MATH 10350 or 10550 or 10850) and (MATH 10360 or 10560 or 10860)
- General Chemistry (CHEM 10171/11171 or 10181/11181)
- Organic Chemistry (CHEM 10172/11172 or 10182/11182) and (CHEM 20273/21273 or 20283/21283)
- Physics (PHYS 10310/11310 or 30210/31210 or 10411/11411) and (PHYS 10520/11520 or 20435/21435 or 30220/31220)

Neuroscience and Behavior Lecture and Lab (under development)

One additional lab in Biological Sciences (genetics, cell bio, physiology accepted; others with prior approval)

All majors to choose an additional 9 credits from the foundational science elective choices below:

- Biological Sciences II & Lab BIOS 10162/11162 or 20202/21202
- Genetics BIOS 20250/21250 (taken together) or 20303
- Cell Biology BIOS 20241 or 30341
- Biochemistry CHEM 40420
- Scientific Computing ACMS 20210
- Intro Applied Mathematical Methods I ACMS 20550
- Intro Dynamical Systems for Scientists MATH 20480
- Intro to Mathematical Reasoning MATH 20630

All neuroscience and behavior majors take the following courses in Psychology:

- Intro to Psychology PSY 10000 or 20000
- Intro to Mathematical Reasoning MATH 20630
- Intro to Psychology PSY 10000 or 20000
- Intro to Mathematical Reasoning MATH 20630

All majors to take an additional 9 credits from a list of approved Biological Sciences electives, 9 more credits from a list of approved Psychology electives, and an additional 12 credits that may include a maximum of 6 credits of undergraduate research (with approved faculty advisers) and/or approved electives across several departments. See the undergraduate adviser for lists of approved courses and approved research advisers.

The major allows significant flexibility, depending on interests and career goals. The following is one example but students are urged to discuss their personal plans with the undergraduate adviser. The term “neuroelective” refers to elective choices pre-approved for the major.

## Sample Curriculum for a BS in Neuroscience and Behavior

**Note that this sample curriculum assumes that no AP or language CE credits are included.**

### First Year

**Fall Semester**

- BIOS 10161 and 11161
- MATH 10350 or 10550
- CHEM 10171 and 11171
- PSYCH 10000
- WR13100
- Moreau First Year Experience

**Spring Semester**

- BIOS 10162 and 11162
- MATH 10360 or 10560
- CHEM 10172 and 11172
- Moreau First Year Experience

### Second Year

**Fall Semester**

- BIOS 20250 and 21250
- CHEM 20273 and 21273
- PSYCH 30501
- Language

**Spring Semester**

- BIOS 20241
- Bios NeuroSci and lab
- Philosophy *
- Language

### Third Year

**Fall Semester**

- BIOS 30407 Animal Behavior
- PHYS 30210 and 31210
- PSYCH 30520 Intro Cognitive Psych
- Theology *
- Language

**Spring Semester**

- BIOS 30339 Comparative Neuro
- ACMS 20340
- PHYS 30220 and 31220
- Fine Art or Literature *
- Addtl Neuroelective/UG research

### Fourth Year

**Fall Semester**

- BIOS Neuroelective
- PSYCH Neuroelective
- Addtl Neuroelective/UG research
- Philosophy *
- Free elective

**Spring Semester**

- BIOS Neuroelective
- PSYCH Neuroelective
- Addtl Neuroelective
- Philosophy *
- Free elective

* One of these must be a University seminar.

## Course Descriptions

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Neuroscience and Behavior. Course descriptions can be found by clicking on the subject code and course number in the search results.
Physics

Chair: Christopher F. Kolda
Director of Graduate Studies: J. Christopher Howk
Director of Undergraduate Studies: Philippe Collon
Frank M. Freimann Professor of Physics: Michael C.F. Wiescher
Aurora and Tom Marquez Professor of Physics: Jacek K. Furdyna
Grace-Rupley II Professor of Physics: Ikaro I. Bigi
Frank M. Freimann Professor of Physics: Ani Abramian
Rev. John Cardinal O'Hara C.S.C., Professor of Physics: Margaret Dobrowolska-Furdyna
Glyn Family Honors Collegiate Professor of Physics: Christopher F. Kolda
Frank M. Freimann Assistant Professors of Physics: Justin R. Crepp; Kenjiro K. Gomes
Aurora and Tom Marquez Assistant Professor of Biophysics: Sylwia Prasinska

Professors:
Mark Alber (concurrent); Timothy C. Beers; Bruce A. Bunker; Motten Eskildsen; Stefan G. Fraenendorf; Umesh Garg; Peter M. Garnavich; Michael D. Hildreth; Anthony K. Hyder; Boldizsár Jánkó; Colin Jessop; Christopher F. Kolda; John M. LoSecco; Grant Mathews; Kathie E. Newman; Terrence W. Rettig; Randal C. Ruchti; Steven T. Ruggiero; Jonathan R. Sapienstein; Carol E. Tanner; Zoltan Toroczkai; Mitchell R. Wayne

Associate Professors:
Dinshaw Balsara; Daniel Bardayan; Mark A. Caprio; Philippe Collon; Antonio Delgado; J. Christopher Howk; Kevin F. Lennon; Jeffrey Peng (concurrent); Rebecca Surman

Assistant Professors:
Tan Ahn; Maxime Brodeur; Manoel Couder; Justin Crepp; Kenjiro Gomes; Adam Martin; Sylwia Prasinska; Anna Simon; Dervis Can Vural

Emeriti:
Gerald B. Arnold; H. Gordon Berry; Howard A. Blackstead; Samir K. Bose; Neal M. Cason; Paul R. Chagnon; Emerson G. Funk; Walter R. Johnson; Gerald L. Jones; V. Paul Kenney; James J. Kolata; A. Eugene Livingston; William D. McGinn; John W. Mihelich; John A. Poirier; Paul E. Shanley; William D. Shephard; Walter J. Tomash

Program of Studies. Physics is the study and description of the structure and behavior of the physical universe. As such, it is fundamental to all physical sciences, pure and applied. A knowledge of physics is basic to an understanding of astronomy, chemistry, geology and even biology in that physics contributes to the interpretation and detailed description of many of the natural phenomena which constitute the proper subjects of investigation in these sciences.

In addition to the undergraduate curricula, the Department of Physics offers programs for graduate study leading to the degrees of master of science and doctor of philosophy, as described in the Graduate School Bulletin of Information.

BACHELOR OF SCIENCE WITH A MAJOR IN PHYSICS

Science undergraduates may choose from two different majors within the Department of Physics: physics, and physics-in-medicine. The course sequences in these two programs are designed to accommodate the academic and professional interests of the majority of physics majors.

The basic physics major is a particularly flexible option for students, and is the one that will be chosen by the majority of undergraduates majoring in the department. Students following the physics major program will gain a broad understanding of physics. Depth is gained through the addition of one or more supplemental concentration programs offered through the department. Two of these concentration programs, advanced physics and astrophysics, help to prepare the student for graduate work in physics and astronomy or astrophysics. Students with interests in other areas have time to explore second-major, minor, or concentration options offered through departments in the College of Arts and Letters. Students with alternative interests are encouraged to discuss these with the director of undergraduate studies.

The physics-in-medicine major is designed for those students planning to attend medical school after completion of their degree, or who intend to work or study in the fields of biophysics or biomedical technology. The degree contains a core set of requirements in physics, augmented with courses in organic chemistry, biochemistry, biology, and biophysics.

No supplemental concentration is required of physics majors, but interested students are allowed and encouraged to follow as many concentrations as their interests and schedules allow. Students following the physics-in-medicine major program are not allowed to add concentrations; their major program is designed to accommodate the special interests of students intending careers in medicine, medical technology, or biophysics.

Physics as a second major is an option for students in the colleges of engineering, arts and letters, or business.

Requirements for the Physics Major
A total of 60 credits in science and mathematics is required for the physics major. The following outlines the course requirements:

- General Physics A-M, B-M, C-M (PHYS 10411, 10422, 20433)
- Intro to Chemical Principles (CHEM 10171) and General Chemistry Biological Processes (CHEM 10122)
- Calculus I, II, III (MATH 10550, 10560, 20550)
- Intro to Circuitry and Electronics (PHYS 20430)
- Sophomore Seminar (PHYS 23411)
- Mathematical Methods in Physics I, II (PHYS 20451, 20452)
- Intermediate Mechanics (PHYS 20545)
- Electricity and Magnetism (PHYS 30471)
- Modern Physics I (PHYS 20464)
- Topics in Modern Physics II (PHYS 30465) or Particle Physics & Cosmology (PHYS 40602) or Intro to Solid State Physics (PHYS 50501) or Intro to Nuclear Physics (PHYS 50701)
- Modern Physics I Laboratory (PHYS 40441)
- Thermal Physics (PHYS 30461)
- Quantum Mechanics I (PHYS 40453)

Physics majors may add as many of the following concentrations as their interests and schedules allow. Completion of these concentrations is indicated on the student’s final transcript.

Concentration in Advanced Physics
The following outlines the course requirements (totaling 14 credits) for the advanced physics concentration:

- Junior Seminar (PHYS 33441)
- Electromagnetic Waves (PHYS 30472)
- Quantum Mechanics II (PHYS 40544)
- Senior Seminar (PHYS 43441)
- Modern Physics II Laboratory (PHYS 40442) or 4000-level ACMS or MATH level elective
- Physics Elective

Concentration in Astrophysics
The following outlines the course requirements (totaling 14 credits) for the astrophysics concentration:

- Junior Seminar (PHYS 33441)
- Intro, Astronomy and Astrophysics M (PHYS 20481)
- Modern Observational Techniques (PHYS 30481)
- Senior Seminar (PHYS 43441)
- Advanced Astrophysics (PHYS 50201)
- Relativity: Special and General (PHYS 50472)

Concentration in Applied Physics
The requirements are that the student completes at least 15 credits of engineering courses, chosen with the aid of the Director of Undergraduate Studies.

Requirements for the Physics-in-Medicine Major
A total of 77 credits in science and mathematics is required for the physics-in-medicine major. The following outlines the course requirements:
Physics

General Physics A-M, B-M, C-M (PHYS 10411 1, 10424, 20435 2)
Intro to Circuitry and Electronics (PHYS 20430)
General Chemistry I–IV (CHEM 10171, 11171, 10172, 11172, 20273, 21273, 20274, 21274 9)
Calculus I, II, III (MATH 10550 4, 10560 4, 20550 4)
Sophomore Seminar (PHYS 23411)
Mathematical Methods in Physics I, II (PHYS 20451, 20452)
Intermediate Mechanics (PHYS 20454)
Electricity and Magnetism (PHYS 30471)
Modern Physics I (PHYS 20464)

Requirements for Physics as a Second Major
The requirements for physics as a second major, for students in the colleges of engineering, arts and letters or business, consists of the physics and mathematics courses listed above for the physics major, except the chemistry sequence. To list physics as a second major on the transcript, the student must satisfy all of the requirements for a major in some department and college of the university.

Sample Curricula

MAJOR: PHYSICS

First Year
First Semester
MATH 10550, 12550 4
PHYS 10411, 11411 4
CHEM 10171, 11171 4

Second Semester
PHYS 40442, 41442 or MATH/ACMS elective at 40000-level 3
PHYS 40602 or 50701 or other electives 12
Physics

HONORS TRACK IN PHYSICS

The goal of this honors track is to give our most talented students an exceptional background in physics research. Participation in this program will increase their level of commitment and productivity while preparing them for successful postgraduate work.

The track will accept physics majors in good academic standing in the spring of their sophomore year, who have identified their research advisor in the Physics Department and have already completed one semester of undergraduate research. Acceptance will be based on a research statement and transcript. Acceptance into the track a formal agreement will be set up between the student and the advisor.

To graduate with this honor, students will have to complete:

1. Typically at least three semesters and one summer of independent research either at Notre Dame or another university or research laboratory. Alternate research/internship venues and opportunities must be approved in advance by the DUS or Department Chair. Students are expected to apply for REU, COS-SURF or other summer funding as appropriate.

2. A substantial thesis that needs to be approved by the advisor (a manuscript submitted for publication can substitute only if the student has made substantial contributions to the work).

3. A presentation at a national or regional meeting, or at the Notre Dame COS-JAM conference.

4. Successful completion of all requirements for one of the physics concentrations, or completion of the physics in medicine degree.

5. A GPA of at least 3.33 in College of Science physics.

Thesis Requirements:

The final draft of the thesis will be written under the supervision of the advisor, and will be submitted by April 1. Each thesis will be reviewed by one member of the Undergraduate Research Committee. If the thesis is not approved, a second committee member will read the thesis and confer. The students will be notified by April 15 if a rewrite is needed. The rewrite will be due May 1.

The thesis is intended to support and develop each student's independence, scientific communication skills, critical review skills, and understanding of their research in the context of the larger field. It will have the added benefit of helping students prepare for successful postgraduate work.

The student's transcript will carry the notation "Honors Physics" to distinguish it from the Glynn Family Honors Program. If the student is also in the Glynn Family Honors program, the thesis presented in that program could be considered for the Honors Track in Physics, but would need approval by the Physics Undergraduate Research Committee.

MAJOR: PHYSICS-IN-MEDICINE

PHYS 40432 3
Electives 6

Notes

1. Alternatively, PHYS 10310 and its laboratory and tutorial.
2. Alternatively, PHYS 10320 and its laboratory and tutorial.
3. Alternatives for CHEM 10171 and 10122 include CHEM 10171–10172 or CHEM 10181–10182 plus the associated laboratories and tutorials.
4. Honors Calculus I through III (MATH 10850, 10860, and 20850) may substitute for Calculus I to III.
5. Options include PHYS 20420 (Comp Methods in Physics), PHYS 20481 (Introduction to Astronomy and Astrophysics), PHYS 30481 (Modern Observational Techniques), PHYS 30492 (Lasers and Modern Optics), PHYS 48480 (Undergraduate Research: The student must take at least 3 credits in research with one advisor and the credits taken must be distributed over at least two semesters), PHYS 50201 (Astrophysics), PHYS 50472 (Relativity: Special and General), MATH 40480 (Complex Variables). Physics electives cannot be double counted with requirements for the Astrophysics concentration.
6. BIOS 10161, 11161, 10162, 11162 may substitute for BIOS 20201, 21201, 20202, 21202.
7. Students take three from the following: CHEM 40420 (Principles of Biochemistry), BIOS 20303 (Fundamental of Genetics), BIOS 30344 (Vertebrate Physiology), BIOS 30341 (Cellular Biology), PHYS 40371 (Medical Physics), PHYS 40432 (Biological Physics).
8. One of these courses must be a University Seminar.
10. PHYS 30481 (Modern Observational Techniques) is offered in the fall of odd years.

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/student/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Physics. Course descriptions can be found by clicking on the subject code and course number in the search results.
Preprofessional Studies

Chair and Assistant Dean:
Rev. James K. Foster, C.S.C., M.D.
Associate Dean:
Sr. Kathleen Cannon, O.P.
Assistant Dean:
Kathleen J.S. Kolberg, Ph.D.

Program of Studies. The Department of Preprofessional Studies offers several programs in the two major sequences, namely the program sequence in premedical science studies and the programs in the Collegiate Sequence.

All of the programs are quite flexible and allow the student to design a curriculum, in consultation with the chair or the associate dean in the College of Science, to enable the student to enter the profession best suited for his or her talents. The program in premedical science studies enables the student to obtain an excellent preparation to enter any of the professions of medicine, dentistry or the other ancillary fields of the healing professions. The interdisciplinary programs of the collegiate sequence have been designed to offer significant flexibility to prepare students for the professions of science-education, science-business, and science-computing. All of the programs allow for a strong science background while also allowing a diverse background in the arts and humanities for individuals with a desire to obtain a broad educational background.

The major goal of this department is to provide an education in the best of liberal traditions of scientific thought and analysis, which the student can utilize for career opportunities in a variety of fields.

The program sequence in premedical science studies is a special program within the Department of Preprofessional Studies for students preparing to enter the professions of medicine, dentistry, osteopathy, veterinary medicine, podiatry, optometry, or other allied-health professions.

Notre Dame has been recognized as an accredited institution for premedical studies for more than 100 years. A proper selection of courses leading to the degree of bachelor of science will qualify the student for admission to any medical or dental school. The year before his or her expected entrance to medical school, the student takes the Medical College Admission Test or Dental Admission Test. Students taking this test should have completed the basic courses in chemistry, biology and physics. The curricula leading to the degree of bachelor of science in other departments in the College of Science also satisfy the requirements for admission to medical or dental school.

Information concerning the requirements for admission to schools of medicine, dentistry, osteopathy, veterinary medicine, optometry and podiatry, as well as information on several ancillary health careers, is available from the new office in the Center for Health Science Advising, 219 Jordan Hall of Science.

Summary of Requirements for the Degree of Bachelor of Science in Preprofessional Studies

**COURSE DESCRIPTIONS**

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Science Preprofessional. Course descriptions can be found by clicking on the subject code and course number in the search results.

**COLLEGIATE SEQUENCE PROGRAMS**

The three collegiate sequence programs, science-business, science-computing, and science-education, were instituted in 1987. These three programs allow students to obtain a strong science background while simultaneously preparing them for professions in health care, business, computing or education.
SCIENCE-BUSINESS COLLEGIATE SEQUENCE

The Science-Business Collegiate Sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates courses from the basic areas of business along with the four basic areas of science. The major prepares students to pursue health professional education such as medical school, dental school, public health, or health care administration. It also enables students to attain a diversified background to enter an MBA program leading to a position in the scientific or health professions business area. It is also a complete and sufficient program to enable the B.S. graduate of the sequence to enter the scientific business market immediately upon graduation.

Information on the areas of public health and hospital administration, as well as the business needs of the pharmaceutical, biological and chemical industries are available in the office of the Department of Health Professions, 219 Jordan Hall of Science.

The other departments in the College of Science as well as the colleges of arts and letters and business administration provide all course instruction in the curricula of the Science-Business Collegiate Sequence.

BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-BUSINESS

All science-business majors take the following basic sequence of science courses:

- General Biology (BIOS 20201–20202 and 21201 and 21202) (3)
- CHEM 10171 and 11171 and 10172 and 11172 and two of the following: CHEM 20273 and 21273, CHEM 20274 and 21274, ENVG 20110, CHEM 10122 (3)
- Calculus (MATH 10350–10360 or 10550–10560) (3)
- Physics (PHYS 30210–30220) and 31210, 31220 (3)
- Statistics (ACMS 20340 or BIOS 40411) (3)

They also are required to take 20–21 credits of science electives, completing a minimum of 64 credits of science courses.

Also required for the major are the following business and economics courses:

- Principles of Microeconomics (ECON 10010 or 20010) (3)
- Accountancy I (BASC 20100) (3)
- Corporate Financial Management (BASC 20150) (3)
- Principles of Management (BASC 20200) (3)
- Principles of Marketing (BASC 20250) (3)

One upper-level business elective for which prerequisites are completed.

Requirements for the program are summarized in the table following this section.
SCIENCE-COMPUTING COLLEGIATE SEQUENCE

The science-computing collegiate sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates courses from the four basic areas of science along with a sequence of computing courses. The program will give the student working knowledge of various computer languages and experience using current computer technology. By choosing science electives appropriately, the student has the option of focusing in an area in science of particular interest. Graduates of this program earn a B.S. degree and are able to enter the scientific computing job market immediately upon graduation.

The other departments in the College of Science as well as the colleges of arts and letters and engineering provide all course instruction in the curricula of the Science-Computing Collegiate Sequence.

BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-COMPUTING

All science-computing majors take the following basic sequence of science courses:

- General Biology (BIOS 20201–20202 and 21201 and 21202)
- CHEM 10171 and 11171, 10172 and 11172 and two of (CHEM 20273 and 21273; CHEM 20274 and 21274; SC 20110; CHEM 10122 Calculus (MATH 10350–10360 or 10550–10560)1,2
- Physics (PHYS 30210–30220 and 31210–31220)3 and 31212
- Statistics (ACMS 20340 or BIOS 40411)
- They also are required to take 20–21 credits of science elective,4 completing a minimum of 64 credits of science courses.
- They also are required to complete 14–15 credits in computing courses.

Please see advisor for information on possible sequences in computing.

Requirements for the program are summarized in the table on the following page.

Notes:

1. Equivalent or higher-level sequences in science may be substituted, e.g., BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.

2. Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found later in this section of the Bulletin.)

3. PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.

4. The choice by the student of the elective courses in science for the Science-computing program will be based on the student’s scientific interest as developed during his or her studies of the four basic areas of science. Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as “Recommended University electives”) and that are not being used to fulfill other specific graduation requirements can be used to satisfy the “Science Elective” requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits of courses such as Undergraduate Research or Directed Readings in the science elective total.

Suggested Curriculum for the Degree of Bachelor of Science in the Science-Computing Collegiate Sequence (124 semester hour credits: 64 science hour credits, minimum)

**First Year**

**First Semester**

- CHEM 10171 and 11171
- MATH 10550 Calculus (Note 2)

* One of these must be a University Seminar.

SCIENCE-EDUCATION COLLEGIATE SEQUENCE

The science-education collegiate sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates many courses from the four basic areas of science along with education courses that most states require to give the student the background necessary to receive a certificate to teach in a secondary education system. Information concerning the requirements for secondary education in the various states, as well as the general course requirements for a certificate necessary to teach science in a secondary education program, is available in the College of Science office, 248 Nieuwland.

The other departments in the College of Science and the other colleges of the University, as well as the Education Department at Saint Mary's College, provide all course instruction in the curricula of the Science-Education Collegiate Sequence.
**Bachelor of Science with a Major in Science-Education**

All science-education majors take the following basic sequence of science courses:

- General Biology (BIOS 20201–20202 and 21201 and 21202)
- CHEM 10171 and 10172 and [(CHEM 20273 and 21273, CHEM 20274 and 21274) or (CHEM 20273 AND 21273, ENVG 20110) OR (ENVG 20110, ENVG 20120)]

Calculus (MATH 10350–10360 or 10550–10560) 1,2

Physics (PHYS 30210–30220) 1,2

They also are required to take 20 credits of science electives, 4,5 completing a minimum of 60 credits of science courses.

Also required for the major are the following education courses taught by Saint Mary's College:

- EDUC 201 Teaching in a Multicultural Society
- EDUC 220 Applied Media and Instructional Technology
- EDUC 345 Curriculum and Assessment in the High School Setting
- EDUC 346 Instructional Strategies and Classroom Management in the High School Setting
- EDUC 350 Educational Psychology: Human Growth and Development of the Adolescent
- EDUC 356 Educational Psychology: Educating Exceptional Learners
- EDUC 449 Teaching Science in the Secondary School
- EDUC 475 Student Teaching in the Secondary School (spring of senior year)

The education courses are those required in the State of Indiana but are also those that are required most often by the educational accrediting agencies of most states. The practical teaching experience which is required will also be arranged through the Education Department at Saint Mary's College.

Requirements for the program are summarized in the table above.

Notes:
1. Equivalent or higher-level sequences in science may be substituted, e.g., BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.
2. Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found in this section.)
3. PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.
4. The choice by the student of the elective courses in science for the Science-education program will be based upon the requirements and list of courses suggested by the various state educational systems. Since the timing of the course work is particularly constrained for this major, the student should work closely with his or her advisor: an associate dean in the College of Science and an assigned advisor in the Education Department at Saint Mary’s College.
5. Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as “Recommended University electives”) and that are not being used to fulfill other specific graduation requirements can be used to satisfy the “Science Elective” requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits of courses such as Undergraduate Research or Directed Readings in the science elective total.

Suggested Curriculum for the Degree of Bachelor of Science in the Science-Education Collegiate Sequence (124 semester hour credits: 60 science hour credits, minimum)

Special Programs

DOUBLE MAJORS IN SCIENCE

In certain instances, students have the option of pursuing majors in two departments in the College of Science. Combinations that are normally approved include: Biological Sciences with Chemistry; Biological Sciences with Mathematics; Biological Sciences with Physics; Biochemistry with Mathematics; Biochemistry with Physics; Chemistry with Mathematics; Chemistry with Physics; Environmental Sciences (first major) with Mathematics; Mathematics with Physics; and Science Business, Science Computing, Science Education with supplementary major in ACMS or Statistics. Examples of combinations that are normally forbidden include: Preprofessional Studies with any other science majors, Collegiate Sequence majors (Science Business, Science Computing, Science Education) with any other science majors except supplementary majors in ACMS and Statistics, parallel subprograms such as Mathematics and Life Sciences with Physics-in-Medicine and either of those with Biological Sciences or Biochemistry, any majors among Mathematics, ACMS and Statistics. All requirements of each major must be met, with no exceptions. Failing to complete a required course terminates that major for a student. Every student who wishes to major in two departments in the College of Science must prepare an agenda of specific courses to be taken, which both advisors and the dean must approve. This should be done as early as possible, but absolutely no later than the seventh day of the senior year. In certain instances, a student may possibly receive approval of a normally forbidden combination of majors, but only if a specific program has been set up by the seventh day of the sophomore year.

All double major programs in science are extremely challenging programs that require that the student take four or five science courses at a time. Thus, only students of superior scholastic ability should consider this as an option.

Students are warned that it is almost certain that completing a double major in two sciences will require total credits well over the college minimum of 124. Conflicts in scheduling of required courses may occur; neither the college nor the departments undertake to reschedule courses for the sake of double majors. For these reasons, it must be emphasized that completing a double major may well require more than four years. Only one degree is awarded (degrees in science do not specify a field).

Dual Degree Program with the College of Engineering

Please refer to the Bulletin section under the heading “College of Engineering.”

Dual Degree Program with the Mendoza College of Business

Program of Studies. The dual degree five-year program in the Mendoza College of Business and the College of Science enables the student to earn the master of business administration and bachelor of science degrees in a major in one of the five undergraduate departments in the College of Science. This program, instituted in 1994, offers students the opportunity to better integrate studies in science and in management. The student completing this program will have a background in management as well as the first professional degree in one of the undergraduate majors of the College of Science. Because it is a demanding program, only those students of superior scholastic ability who have the aptitude, motivation and maturity necessary for the combined graduate and undergraduate program should apply. Those with outstanding internship experiences in business will be looked upon favorably. Advisors for the program are available for consultation about the advisability of applying for the program and about meeting the particular needs of students pursuing this program.

The program is open only to those currently enrolled Notre Dame students who have completed three years of an undergraduate science first major. Students interested in making application for the MBA/Science program should apply to the MBA program during their junior year. They should take the GMAT by December of their junior year. All candidates must schedule a personal interview as a part of the MBA admissions process. Students must also declare their intentions to the dean’s office in the College of Science and request that a dean’s eligibility letter be sent to the MBA Office for them.

An applicant who is not admitted to the dual degree MBA/Science program continues in the undergraduate program and completes his or her science major in the usual four-year period.

As a general guide, it is expected that a student accepted to this program will take two courses for the undergraduate degree during the summer session...
following his or her junior year. Every dual-degree student is also expected to participate in the orientation for the MBA program. This program will occupy the entire day for the two weeks prior to the first day of classes. Orientation is mandatory for all students beginning the MBA program.

Students in the five-year science/MBA program are also required to:

1. Complete a minimum of 48 MBA credit hours and maintain a GPA of at least 3.0 to successfully complete the program.
2. Take all MBA courses in their fourth year.
3. Maintain full-time student status (minimum course load of 12 credit hours per semester). Credit hours can come from science or MBA programs.

The MBA curriculum divides each semester into two modules. In addition to the courses required to complete undergraduate and University requirements, students must complete the following MBA coursework:

**Summer Session Following Junior Year:**
- Math Review Workshop* 0
- Accrict Review Workshop* 0
- (Science Undergraduate Requirements 6)

**Senior Year—(Science Undergraduate Requirements Each Semester)**

**First Semester, Module 1:**
- ACCT 60100. Financial Accounting 2
- MBET 60340. Conceptual Foundation of Business Ethics 2
- MGT 60100. Statistics 2
- MGT 60300. Organizational Behavior 2
- *First Semester, Interterm Week:* Professional Development Seminar Communications Seminar++ 1

**First Semester, Module 2:**
- ACCT 60200. Cost Accounting 2
- FIN 60400. Finance I 2
- FIN 60210. Microeconomic Analysis 2
- MARK 60100. Marketing Management 2

**Second Semester, Module 3:**
- FIN 70600. Finance II 2
- FIN 60220. Macroeconomic Analysis 2
- MGT 60900. Strategic Decision Making 2
- Free Elective 2

**Second Semester, Interterm Week:**
- Values in Decision Making 1
- Elective Course 1

**Second Semester, Module 4:**
- MGT 60400. Leadership and Teams 2
- MGT 60700. Operations Management 2

**Fifth Year—(Science Undergraduate Requirements Each Semester)**

**First Semester, Module 1:**
- MGT 60200. Problem Solving 2
- Management Communication Elective I 2
- Free Elective* 2

**Interterm Week:**

**Optional:** Two one-credit-hour electives (TBD) OR
- Corporate Case Studies OR
- Offshore Program: China or Brussels 2
- First Semester, Module 2:
- Ethics Elective 2
- Management Communication Elective II 2
- Second Semester, Module 3:
- Free Electives 4
- (Floating Optional Elective 2)

*Students have the option to take one additional two-credit-hour elective now or in any remaining module.

**Second Semester, Interterm Week:**
- (Optional: Two one-credit-hour electives OR
- Corporate Case Studies OR
- Offshore Program: China or Brussels 2)
- Second Semester, Module 4:
- Free Electives 4
- (Floating Optional Elective 2)

*See "Arts and Letters Core" on the first page of the College of Engineering section.

++Special one/two-week courses. All other MBA courses are seven weeks in length.

*Occurs during August Orientation

Total for both degrees: 126–132 undergraduate, 48 MBA

Students involved in the MBA/Science program will complete their undergraduate program while completing MBA requirements. MBA course work will not apply to the undergraduate degree. Sample schedules for particular majors are available from advisors or the dean’s office. Students who are behind in the completion of their major requirements are strongly recommended to obtain permission and advising before applying to the joint program.

Nondepartmental Courses

COURSE DESCRIPTIONS

All of the courses associated with this academic program can be found online at registrar.nd.edu/students/class_search.php. The scheduled classes for a given semester may be found by clicking on “Class Search” and selecting the subject Science (Non-departmental). Course descriptions can be found by clicking on the subject code and course number in the search results.

Science Degree Credit

Courses are generally taken in the College of Science for one of three reasons: (1) for students in either the College of Arts and Letters, or the Mendoza College of Business, or the School of Architecture, to fulfill a University requirement; (2) for students in either the College of Engineering or the College of Science to fulfill a college requirement; and (3) for students in the College of Science, to fulfill a major requirement. As a result, the College of Science offers different sequences of courses which overlap considerably in content but not level. Thus it is possible for a student who has changed his or her college or major to have taken two courses which overlap in content. Both courses will appear on the student’s transcript, but only one will count for degree credit.

As a guideline for the student and the student’s advisors, listed below are the groups of courses that overlap considerably in content. (Courses within the same group are shown in the same row and are also enclosed within parentheses; courses listed within the same column generally show a typical normal progression through course work.) In every case, only one course per group should be counted for degree credit. Generally, only the course taken last should be counted. Students and advisors are warned not to use these groups when moving between course sequences but rather to seek advice from the offering department or the College of Science office.

For overlap with courses no longer taught in the year of publication of this Bulletin, please refer to previous editions of this Bulletin.

Credit is not given for both ACMS and MATH courses with the numbers 10140, 10150, 20210, 20340, 20610, 20750, 30440, 30530, 30540, 30610, or any course cross-listed between ACMS and MATH. In the following table the restrictions on MATH courses numbered 10140 and 20340 also apply to the ACMS courses with the same numbers.

Faculty

The following is the official faculty roster for the 2015–16 academic year as of June 19, 2015. This roster includes faculty members who are on leave during the academic year. The date in parentheses at the close of each entry is the year the individual joined the Notre Dame faculty.

Ruth Maree Abbey. Professor, Political Science; Interim Director, Joan B. Kroc Institute for International Peace; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Monash University, 1984; Master of Arts, McGill University, 1989; Philosophiae Doctor, ibid., 1995 (2005)

Christopher Paul Abram. Associate Professor, English. Bachelor of Arts, University of Cambridge, 1998; Master of Philosophy, University of St. Andrews, 1999; Philosophiae Doctor, ibid., 2004 (2013)

Nicole Louise Achee. Research Associate Professor, Biological Sciences. Master of Science, Texas A&M University, 1995; Philosophiae Doctor, Uniformed Services Health Sci., 2004 (2013)

Kristin M Ackerman. Research Assistant Professor, Biological Sciences. B.S. Biology, Ohio Northern University, 2002; Philosophiae Doctor, Ohio State University, 2009 (2009)

Idris Adjerid. Assistant Professor, Management. Bachelor of Arts, Virginia Polytechnic Institute, 2005; Master of Business Admin, ibid., 2008; Philosophiae Doctor, Carnegie Mellon University, 2013 (2013)

John Felix Affleck-Graves. Executive Vice President; The Notre Dame Chair in Finance; Professor, Finance. B.S. Mathematics, University of Cape Town, 1972; Master of Science, ibid., 1974; Philosophiae Doctor, ibid., 1977; B.S. Commerce, ibid., 1982 (1986)

Tan Ahn. Assistant Professor, Physics. Bachelor of Science, SUNY at Stony Brook, 2002; Master of Science, ibid., 2004; Philosophiae Doctor, ibid., 2008 (2014)

Maurizio Albahari. Assistant Professor, Anthropology. Bachelor of Arts, Universita Degli Studi, 2000; Master of Arts, University California Irvine, 2002; Philosophiae Doctor, ibid., 2006 (2008)

Mark S. Alber. The Vincent J. Duncan Family Professor of Applied Mathematics; Professor, Applied Computational Mathematics & Statistics; Director, Center for Study of Biocomplexity; Concurrent Professor, Computer Science and Engineering. Master of Science, Moscow Institute of Technology, 1983; Philosophiae Doctor, University of Pennsylvania, 1990 (1990)

Simeon Alder. Assistant Professor, Department of Economics. Bachelor of Arts, Graduate Inst of Intl Studies, 1998; Master of Arts, UCLA, 2005; Philosophiae Doctor, ibid., 2009 (2009)

Alex Himonas Alexandrou. Professor, Mathematics. Bachelor of Science, University of Patras, 1976; Master of Science, Purdue University, 1982; Philosophiae Doctor, ibid., 1985 (1989)

Nahid Erfan Alexander. Associate Professional Specialist, First Year of Studies. Bachelor of Science, Purdue University, 1979; Master of Science, ibid., 1981; M.S. Engineering, ibid., 1985 (1991)

Joseph Phillip Amar. Professor, Classics; Concurrent Professor, Theology. Bachelor of Arts, Catholic University of America, 1970; Bachelor of Sacred Theology, ibid., 1973; Licentiate in Sacred Theology, ibid., 1974; Master of Arts, ibid., 1983; Philosophiae Doctor, ibid., 1988 (1988)

George Alex Ambrose. Associate Professional Specialist, Kaneh Center for Teaching and Learning; Associate Professor of the Practice; Associate Program Director, ePortfolio Assessment. Bachelor of Arts, Rutgers State University of NJ, 2002; Master of Arts Education, Rutgers University, 2003; Philosophiae Doctor, Nova University, 2013 (2008)

Karl P. Ameriks. The McMahon-Hank Chair in Philosophy. Professor, Philosophy. Bachelor of Arts, Yale University, 1969; Philosophiae Doctor, ibid., 1973 (1973)

Mike Amezcua. Assistant Professor, History. Bachelor of Arts, UCLA, 2004; Master of Arts, Yale University, 2006; Philosophiae Doctor, ibid., 2011 (2014)

Selena Kathleen Anders. Assistant Professional Specialist, School of Architecture. Bachelor of Arts, DePaul University, 2005; Master of Arts in Architecture, University of Notre Dame, 2009 (2009)

Thomas Francis Anderson. Professor, Romance Languages and Literatures; Department Chair, Romance Languages and Literatures; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Bowdoin College, 1992; Master of Arts, University of Pennsylvania, 1994; Philosophiae Doctor, ibid., 1998 (1998)

Megan Andrew. Assistant Professor, Sociology. Bachelor of Science, Utah State University, 1999; Master of Science, University of Wisconsin-Madison, 2004; Philosophiae Doctor, ibid., 2009 (2011)

Wendy Angst. Associate Professional Specialist, Management. Bachelor of Science, Michigan State University, 1995; Master in Health Administratio, University of La Verne, 2000 (2010)
Corey M. Angst. Associate Professor, Management. Bach of Sci in Mech Engr, Western Michigan University, 2001; Master of Business Admin, University of Delaware, 2006; Philosophiae Doctor, University of Maryland, 2007 (2007)

Panos J. Antsaklis. H. Clifford & Evelyn A. Bresoy II Chair; Professor, Electrical Engineering; Concurrent Professor, Applied Computational Mathematics & Statistics; Concurrent Professor, Applied Computational Mathematics. Diploma, Natl Technical University of Athens, 1972; Master of Science, Brown University, 1974; Philosophiae Doctor, ibid., 1977 (1980)

Robert Scott Appleby. Dean, Keough School of Global Affairs; Professor, History. Bachelor of Arts, University of Notre Dame, 1978; Master of Arts, University of Chicago, 1979; Philosophiae Doctor, ibid., 1985 (1994)

Ani Apramanian. The Frank M. Freimann Professor of Physics; Professor, Physics. Bachelor of Arts, Clark University, 1980; Philosophiae Doctor, ibid., 1986 (1989)

Elizabeth A. Archie. Associate Professor, Biological Sciences. Bachelor of Arts, Bowdoin College, 1997; Philosophiae Doctor, Duke University, 2005 (2009)

S. M. Niaz Arifin. Research Assistant Professor, Computer Science and Engineering. M.S. Computer Sci and Engr, University of Texas at Dallas, 2006; Bach of Sci in Computer Engr, Bangladesh University of Eng. & Tech, (2013)

Neil Arner. Assistant Professor, Theology. Bachelor of Science, Georgia Institute of Technolog, 2001; Master of Divinity, Princeton Theological Seminary, 2006; Master of Sacred Theology, Yale University-Div School, 2007; Master of Philosophy, Yale University, 2011; Master of Arts, ibid., 2011; Philosophiae Doctor, ibid., 2012 (2013)

Julie Ellen Arnot. Librarian, Hesburgh Libraries. Bachelor of Arts, University of Missouri-St. Lou, 1976; M.S. Library Science, University of IL Urbana-Champaign, 1986 (2005)

Carolina Arroyo. Associate Professional Specialist, Political Science. Bachelor of Arts, SUNY at Buffalo, 1983; Master of Arts, Stanford University, 1990 (1996)

Brandon Lee Ashfeld. Associate Professor, Chemistry and Biochemistry. Bachelor of Science, University of Minnesota, 1998; Philosophiae Doctor, University of Texas-Austin, 2004 (2007)

James Matthew Ashley. Associate Professor, Theology, Department Chair, Theology. Bachelor of Science, Saint Louis University, 1982; Master of Teacher Science, Weston School of Theology, 1988; Philosophiae Doctor, University of Chicago, 1993 (1993)

Robert Audi. The David E. Gallo Chair in Business Ethics; Professor, Philosophy, Tenured and Tenure Track, Management. Bachelor of Arts, Colgate University, 1963; Master of Arts, University of Michigan, 1965; Philosophiae Doctor, ibid., 1967 (2003)

Ruediger Bachmann. Associate Professor, Department of Economics. Master of Arts, University of Mainz, 1999; Master of Arts, ibid., 1999; Master of Arts, ibid., 2001; Master of Arts, ibid., 2001; Master of Arts, Yale University, 2002; Master of Philosophy, ibid., 2004; Philosophiae Doctor, ibid., 2007 (2014)

Brad Alan Badertscher. Professor, Accountancy. Master of Business Admin, University of Iowa, 2001; Bachelor of Arts, Univ. of Nebraska at Kearney, 2001; Philosophiae Doctor, University of Iowa, 2007 (2007)

Brian M. Baker. Professor, Chemistry and Biochemistry; Associate Dean of Research and Graduate Studies, College of Science. Bachelor of Science, New Mexico State Univ, Park, 1992; Philosophiae Doctor, University of Iowa, 1997 (2001)

Mary Bales. Research Assistant Professor, Management. Bachelor of Arts, Indiana Univ-Bloomington, 2002; Philosophiae Doctor, Purdue University, 2013 (2013)

Christopher Gordon Ball. Assistant Professor, Anthropology. Fellow, Kellogg Institute for International Studies. Bachelor of Arts, University of California Sta Barbara, 1996; Master of Arts, University of Chicago, 2003; Philosophiae Doctor, ibid., 2007 (2013)

Dinshaw S. Balsara. Associate Professor, Physics; Concurrent Associate Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, Jai Hind College, 1977; Master of Science, Indian Inst of Tech Kanpur, 1982; Master of Science, University of Chicago, 1986; Philosophiae Doctor, University of IL Urbana-Champaign, 1990 (2001)

Rashna Dinshaw Balsara. Research Associate Professor, Center For Transgene Research. Bachelor of Science, University of Bombay, 1985; Master of Science, ibid., 1991; Philosophiae Doctor, ibid., 1998 (2007)

Zygmunt Guido Baranski. Professor, Romance Languages and Literatures; Notre Dame Professor of Dante and Italian Studies. Bachelor of Arts, University of Hull, 1973; Philosophiae Doctor, ibid., 1976 (2007)

Sotirios Angel Barber. Professor, Political Science. Bachelor of Arts, University of IL Urbana-Champaign, 1964; Master of Arts, University of Chicago, 1967; Philosophiae Doctor, ibid., 1973 (1986)

Daniel W Bardayan. Associate Professor, Physics. B.S. Physics, Tennessee Technological Univ, 1993; Master of Science, Yale University, 1994; Master of Philosophy, ibid., 1997; Philosophiae Doctor, ibid., 1999 (2013)
Faculty

Christopher Andrew Baron. Associate Professor, Classics; Fellow, Nanovic Institute for European Studies; Concurrent Associate Professor, History. Bachelor of Arts (Latin), Illinois Wesleyan University, 1995; Master of Arts, University of Chicago, 2000; Philosophiae Doctor, University of Pennsylvania, 2006 (2000)

Matthew James Barrett. Professor, Law School; Bachelor of Business Admin., University of Notre Dame, 1982; Juris Doctor, ibid., 1985 (1990)

Amy Coney Barrett. Diane and M. O. Miller II Professor of Law; Professor, Law School. Bachelor of Arts, Rhodes College, 1994; Juris Doctor, University of Notre Dame, 1997 (2002)

Katrina D. Barron. Associate Professor, Mathematics. B.S. Mathematics, University of Chicago, 1986; B.S. Physics, ibid., 1987; Philosophiae Doctor, Rutgers University, 1996 (2001)

Kevin Barry. Fellow, Institute for Latino Studies; Professional Specialist, Kanel Center for Teaching and Learning. Bachelor of Science, Florida Institute of Technolog, 1988; Master of Science, ibid., 1990 (1994)

Viva Ona Bartkus. Associate Professor, Management; Fellow, Kellogg Institute for International Studies; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, Yale University, 1989; Master of Arts, ibid., 1989; Master of Arts, University of Oxford, 1991; Philosophiae Doctor, ibid., 1993 (2004)

Christiane Baumeister. Assistant Professor, Department of Economics. Bachelor of Arts, University of Bayreuth, 1999; Master of Arts, University of Siena, 2003; Philosophiae Doctor, University of Ghent, 2010 (2015)

Laura A. Bayard. Librarian, Hesburgh Libraries. Bachelor of Arts, Shippensburg University, 1969; Master Degree - Unspecified, University of Pittsburgh, 1974 (1989)

Timothy James Bays. Associate Professor, Philosophy. Bachelor of Arts, Northwestern University, 1988; Philosophiae Doctor, UCLA, 1994; Philosophiae Doctor, ibid., 1994; Philosophiae Doctor, ibid., 1999 (1999)

Mary Louise Beard. Research Assistant Professor, Physics. Bachelor of Science, University of Surrey, 2003; Master of Science, ibid., 2003; Philosophiae Doctor, University of Notre Dame, 2014 (2010)

Edward N. Beatty. Associate Professor, History; Associate Dean,Keough School of Global Affairs; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Princeton University, 1983; Master of Arts, University of New Mexico Main, 1992; Philosophiae Doctor, Stanford University, 1996 (2000)

Emily Scott Beck. Assistant Professional Specialist, Art, Art History, and Design. Bachelor of Arts, Meredith College, 2001; Master of Fine Arts, UNC at Chapel Hill, 2010 (2013)

Christine Ann Becker. Associate Professor, Film, Television, and Theatre. Bachelor of Arts, University of II. Urbana-Champaign, 1993; Master of Arts, University of Wisconsin-Madison, 1995; Philosophiae Doctor, ibid., 2001 (2000)

Mary Patricia Beckman. Professional Specialist, Center for Social Concerns; Associate Director for Academic Affairs and Research. Bachelor of Arts, University of Notre Dame, 1975; Master of Arts, ibid., 1983; Philosophiae Doctor, ibid., 1986 (2001)

Gail Bederman. Associate Professor, History; Concurrent Associate Professor, American Studies; Concurrent Associate Professor, Gender Studies. Bachelor of Fine Arts, New York University, 1978; Master of Arts, Brown University, 1984; Philosophiae Doctor, ibid., 1992 (1992)

Timothy C. Beers. Notre Dame Professor of Astrophysics; Professor, Physics. Bachelor of Science, Purdue University, 1979; B.S. Physics, ibid., 1979; Master of Arts, Harvard University, 1980; Philosophiae Doctor, ibid., 1983 (2014)

Mark Joseph Behrens. Professor, Mathematics. Bachelor of Science, University Alabama Tuscaloosa, 1998; Bachelor of Science, ibid., 1998; Bachelor of Science, ibid., 1998; Master of Arts, ibid., 1998; Philosophiae Doctor, University of Chicago, 2003 (2014)

Alexander Daniel Beilhammer. Associate Professor, History. Bachelor of Arts, University of Vienna, 1995; Master of Arts, ibid., 1995; Philosophiae Doctor, ibid., 1999 (2015)

Kimberly Hope Belcher. Assistant Professor, Theology. Bachelor of Science, University of Florida, 2001; Master of Theological Studies, University of Notre Dame, 2003; Philosophiae Doctor, ibid., 2009 (2013)

Anthony Joseph Bellia. Professor, Law School; O’Toole Professorship in Constitutional Law; Concurrent Professor, Political Science; Notre Dame Presidential Fellow. Bachelor of Arts (Latin), Harvard University, 1991; Juris Doctor, Yale University, 1995 (2000)

Gary E. Belovsky. Professor, Biological Sciences; Martin J. Gillen Director of the Environmental Research Center. Bachelor of Business Admin., University of Notre Dame, 1972; Master of Science, Yale University, 1974; Philosophiae Doctor, Harvard University, 1977 (2001)

Jada Perdita Benn Torres. Assistant Professor, Anthropology. Bachelor of Arts, University of Notre Dame, 1999; Master of Science, University of New Mexico Main, 2001; Philosophiae Doctor, ibid., 2006 (2008)

Edward L Bensman. Research Associate Professor, Civil Engineering and Geological Sciences. Philosophiae Doctor, Florida State University, 2000; Bach of Sci in Envrl Earth Sci, Purdue University, ; Master of Engineering, Florida State University, (2006)

Mark Berends. Professor, Sociology; Director, Center for Research Educational Opportunity. Bachelor of Arts, Calvin College, 1985; Master of Science, University of Wisconsin-Madison, 1988; Philosophiae Doctor, ibid., 1992 (2009)
Faculty

Cindy S. Bergeman. Professor, Psychology. Bachelor of Science, University of Idaho, 1979; Master of Science, Pennsylvania State University, 1987; Philosophiae Doctor, ibid., 1989 (1990)

Jeffrey Harold Bergstrand. Associate Dean, Mendoza College of Business, Concurrent Professor, Department of Economics; Professor, Finance; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Northwestern University, 1974; Master of Arts, University of Wisconsin-Madison, 1979; Philosophiae Doctor, ibid., 1981 (1986)

Melissa Berke. Assistant Professor, Civil Engineering and Geological Sciences; Concurrent Assistant Professor, Biological Sciences. Bachelor of Arts, Oberlin College, 2000; Master of Science, University of California Riverside, 2003; Philosophiae Doctor, University of Minnesota at Dul, 2011 (2013)

Anne Hostetler Berry. Assistant Professional Specialist, Art, Art History, and Design; Assistant Professor of the Practice. Master of Fine Arts, Kent State University, 2008 (2013)

Nora J. Besansky. Professor, Biological Sciences. Bachelor of Science, Oberlin College, 1982; Master of Science, Yale University, 1987; Philosophiae Doctor, ibid., 1990 (1997)

David M. Betson. Associate Professor, College of Arts and Letters. Bachelor of Arts, Kalamazoo College, 1972; Master of Arts, University of Wisconsin-Madison, 1975; Philosophiae Doctor, ibid., 1980 (1982)

John Renner Betz. Associate Professor, Theology; Fellow, Nanovic Institute for European Studies. Bachelor of Arts, Wake Forest University, 1991; Philosophiae Doctor, University of Virginia, 1999 (2010)

Kraig Beyerlein. Assistant Professor, Sociology; Associate Director, Center for Study of Religion & Society. Bachelor of Arts, Concordia University, 1998; Master of Arts, UNC at Chapel Hill, 2002; Philosophiae Doctor, University, ibid., 2006 (2009)

Souvik Bhattacharjee. Research Assistant Professor, Biological Sciences. Bachelor of Science, University of Delhi, 1995; Master of Science, Madurai Kamaraj University, 1997; Philosophiae Doctor, Inst. of Microbial Technology, 2003 (2008)

Zihni Basar Bilgicer. Associate Professor, Chemical and Biomolecular Engineering; Concurrent, Chemistry and Biochemistry. Bachelor of Science, Bogazici Universitesi, 1998; Philosophiae Doctor, Tufts University, 2004 (2008)

Richard E. Billo. Associate Vice President for Research; Professor, Computer Science and Engineering; Associate Vice President for Research. Bachelor of Arts, West Virginia University, 1978; Master of Arts, University of the Pacific, 1981; Master of Science, Arizona State University, 1986; Philosophiae Doctor, ibid., 1989 (2013)

Alessia Blad. Associate Professional Specialist, Romance Languages and Literatures. Bachelor Degree - Unspecified, Indiana University South Bend, 2008; Master of Arts, University of Notre Dame, 2008 (2010)

Patricia A. Blanchette. Professor, Philosophy. Bachelor of Arts, University California San Diego, 1983; Philosophiae Doctor, Stanford University, 1990 (1993)

Marina Blanton. Assistant Professor, Computer Science and Engineering. Master of Science, Ohio University, 2002; Master of Science, Purdue University, 2004; Philosophiae Doctor, ibid., 2007 (2007)

Jaimie Bleck. Assistant Professor, Political Science; Fellow, Kellogg Institute for International Studies; Concurrent Assistant Professor, African and African American Studies. Bachelor of Arts, University of IL at Chicago, 2003; Master of Arts, Cornell University, 2008; Philosophiae Doctor, ibid., 2011 (2011)

Emily Sarah Block. Fellow, Kellogg Institute for International Studies; Assistant Professor, Management. Bachelor of Business Admin., University of Notre Dame, 1999; Philosophiae Doctor, University of IL Urbana-Champaign, 2009 (2008)

Gianluca Blois. Research Assistant Professor, Aerospace and Mechanical Engineering. Bachelor of Engineering, Polytechnic Institute of Milan, 2001; Master of Science, ibid., 2003; Philosophiae Doctor, ibid., 2007 (2015)

Matt Bloom. Associate Professor, Management; Fellow, Kellogg Institute for International Studies. Bachelor of Science, Baker University, 1983; Master of Arts, University of Kansas, 1989; Philosophiae Doctor, Cornell University, 1996 (1996)

W. Martin Bloomer. Professor, Classics; Director, PhD Literature; Fellow, Nanovic Institute for European Studies. Bachelor of Arts, Yale University, 1982; Master of Arts, ibid., 1983; Master of Philosophy, ibid., 1984; Philosophiae Doctor, ibid., 1987 (1998)

Susan D. Blum. Professor, Anthropology. Bachelor of Arts (Latin), Stanford University, 1980; Master of Arts, University of Michigan, 1986; Master of Arts, ibid., 1988; Philosophiae Doctor, ibid., 1994 (2000)

Andriy Bodnaruk. Assistant Professor, Finance. Bachelor of Science, Univ. of Kiev-Mohyla Academy, 1997; Master of Arts, ibid., 1999; Philosophiae Doctor, Stockholm School of Economics, 2005 (2008)

Joel David Boercel. Assistant Professor, Aerospace and Mechanical Engineering. Bach of Sci in Mech Eng, Grove City College, 2006; Master of Science, Georgia Institute of Technology, 2009; Philosophiae Doctor, ibid., 2011 (2014)

Tobias Boc. Associate Professor, German and Russian Languages and Literature. Bachelor of Arts, Reed College, 1999; Master of Philosophy, Yale University, 2003; Philosophiae Doctor, University Tennessee Knoxville, 1994 (1994)

Diogo Bolster. Assistant Professor, Civil Engineering and Geological Sciences; Concurrent Assistant Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, University College Dublin, 2002; Master of Science, University California San Diego, 2005; Philosophiae Doctor, ibid., 2007 (2010)

Catherine Elizabeth Bolten. Assistant Professor, Anthropology; Concurrent Assistant Professor, African and African American Studies; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Williams College, 1998; Master of Philosophy, University of Cambridge, 2000; Master of Arts, University of Michigan-Dearborn, 2003; Philosophiae Doctor, University of Michigan, 2008 (2009)

Christine M Bonfiglio. Associate Professional Specialist, Alliance for Catholic Education; Director Professional Standards. Bachelor of Arts, Indiana University South Bend, 1996; Master of Arts, Western Michigan University, 2002; Philosophiae Doctor, ibid., 2003 (2012)

Francesca Maria Bordogna. Associate Professor, Program of Liberal Studies; Concurrent Associate Professor, History, Philosophiae Doctor, University of Chicago, 1998 (2011)

Tatiana Botero. Associate Professional Specialist, Romance Languages and Literatures; Associate Teaching Professor. Associate in Arts, Miami-Dade Community College, 1896; Bachelor of Arts, West Virginia University, 1996; Master of Arts Education, ibid., 1997 (2011)

Eileen Hunt Botting. Associate Professor, Political Science; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, Bowdoin College, 1993; Bachelor of Arts, University of Cambridge, 1995; Master of Arts, Yale University, 1997; Master of Philosophy, ibid., 1998; Master of Arts, University of Cambridge, 1999; Philosophiae Doctor, Yale University, 2001 (2001)

Maureen B. M. Boulton. Professor, Romance Languages and Literatures, Bachelor of Arts, College of New Rochelle, 1970; Master of Arts, University of Pennsylvania, 1972; Philosophiae Doctor, ibid., 1976; Master of Liberal Arts, University of Oxford, 1980 (1985)

Kevin W. Bowyer. Schubmehl-Peirn Family Chair in Computer Science & Engineering; Professor, Computer Science and Engineering; Department Chair, Computer Science and Engineering; Concurrent Professor, Electrical Engineering. B.S. Economics, George Mason University, 1976; Philosophiae Doctor, Duke University, 1980 (2001)

Sunny K. Boyd. Professor, Biological Sciences. Bachelor of Arts, Princeton University, 1981; Master of Science, Oregon State University, 1984; Philosophiae Doctor, ibid., 1987 (1987)

Fernand D. Boze. Associate Librarian, Hesburgh Libraries. Bachelor of Arts, University of II. Urbana-Champaign, 1977; Master of Science, ibid., 1989 (1991)

Tonya Patrice-Williams Bradford. Assistant Professor, Marketing. Bachelor of Arts, Northwestern University, 1986; Master of Science in Management, ibid., 1991; Philosophiae Doctor, ibid., 2007 (2007)

Katherine A. Brading. Associate Professor, Philosophy. Bachelor of Science, University of London, 1992; Bachelor of Philosophy, University of Oxford, 1996; Philosophiae Doctor, ibid., 2003 (2004)

Steven James Brady. Associate Professional Specialist, First Year of Studies; Concurrent Associate Professional Specialist, History. Bachelor of Arts, Roosevelt University, 1989; Master of Arts, University of Notre Dame, 1992; Philosophiae Doctor, ibid., 1998 (1998)

Robert Joseph Brandt. Professional Specialist, School of Architecture. Bachelor of Science, University of Southern Indiana, 1986; Master of Fine Arts, Indiana State University Main, 1989 (1992)

Julia Margaret Braungart-Rieker. Professor, Psychology. Bachelor of Science, Syracuse University, 1987; Master of Science, Pennsylvania State University, 1990; Philosophiae Doctor, ibid., 1992 (1992)

Joan Frances Brenneck. The Bernard Keating-Crawford Chair in Engineering; Professor, Chemical and Biomolecular Engineering. Bachelor of Science, University of Texas-Austin, 1984; Master of Science, University of Illinois-Chicago, 1987; Philosophiae Doctor, University of Ill. Urbana-Champaign, 1989 (1989)

Paul Raymond Brenner. Research Assistant Professor, Computer Science and Engineering. Bachelor of Science, University of Notre Dame, 1998; Master of Science, Ohio State University, 2000; Philosophiae Doctor, University of Notre Dame, 2007 (2007)

Robert D. Bretz. The Joe and Jane Giovannini Chair in Management; Professor, Management. Bachelor of Arts, Bethany College, 1980; Master of Business Admin, University of Kansas, 1984; Philosophiae Doctor, ibid., 1997 (1997)

James Robert Brockmole. Associate Professor, Psychology. Bachelor of Arts, University of Notre Dame, 1999; Master of Arts, University of Illinois Urbana-Champaign, 2001; Philosophiae Doctor, ibid., 2003 (2009)

Maxime Brodeur. Assistant Professor, Physics. B.S. Physics, University of Montreal, 2003; Master of Science, Univ. of British Columbia, 2006; Philosophiae Doctor, ibid., 2010 (2013)

Catherine L. Bronson. Assistant Professor, Specialist, Classics; Assistant Teaching Professor. Bachelor of Arts, Saint Xavier University, 1994; Master of Arts, University of Chicago, 2003; Philosophiae Doctor, ibid., 2012 (2014)

Wyatt Brooks. Fellow, Kellogg Institute for International Studies; Assistant Professor, Department of Economics. Bachelor of Science, University of Washington, 2007; Master of Arts, University of Minnesota, 2011; Philosophiae Doctor, ibid., 2012 (2012)

Seth Nathaniel Brown. Professor, Chemistry and Biochemistry. Bachelor of Science, Massachusetts Institute of Tec, 1988; Philosophiae Doctor, University of Washington, 1994 (1996)

Ramzi Kamal Bualuan. Associate Professor, Specialist, Computer Science and Engineering; Assistant Teaching Professor. Bachelor of Science, American University of Beirut, 1983; M.S. Electrical Engr, University of Notre Dame, 1986 (1990)

Ghada Nemr Bualuan. Associate Professor, Specialist, Classics; Associate Teaching Professor. Bachelor of Business Admin., American University of Beirut, 1993; Master of Business Admin, Lebanese American University, 1999 (2008)

Aime Prati Buccellato. Assistant Professor, School of Architecture. Bachelor of Architecture, University of Notre Dame, 2000; M of Arch Design & Urbanism, Harvard University, 2005 (2008)

Kevin Michael Buccellato. Professor, Specialist, School of Architecture. Bachelor of Architecture, University of Notre Dame, 2000 (2008)

Kasey S. Buckles. Associate Professor, Department of Economics, Concurrent Associate Professor, Gender Studies. Bachelor of Arts, University of Kentucky, 2000; Master of Arts, Boston University, 2003; Philosophiae Doctor, ibid., 2005 (2005)

Steven Allen Buechler. Professor, Applied Computational Mathematics & Statistics. Bachelor of Arts, Eastern Illinois Univ, 1975; Bachelor of Science, ibid., 1975; Master of Arts, University of Maryland, 1979; Philosophiae Doctor, University of Maryland, 1981 (1987)

Peter James Bui. Assistant Professor, Specialist, Computer Science and Engineering, designation of assistant teaching professor. Bachelor of Science, University of Notre Dame, 2006; Master of Engineering, ibid., 2010; Philosophiae Doctor, ibid., 2012 (2015)

Martina Bukac. Assistant Professor, Applied Computational Mathematics & Statistics. M.S. Applied Mathematics, University of Zagreb, 2008; Bachelor of Science, ibid., 2008; Philosophiae Doctor, University of Houston, 2012 (2014)

Richard S. Bullene, CSC. Assistant Dean, School of Architecture; Associate Professor, Specialist, School of Architecture. Bachelor of Architecture, University of Notre Dame, 1978; Master of Divinity, ibid., 1981; Master of Science, University of Pennsylvania, 1992; Philosophiae Doctor, ibid., 1994 (1993)

Bruce A. Bunker. Professor, Physics. Bachelor of Science, University of Washington, 1974; Philosophiae Doctor, ibid., 1980 (1983)

Thomas Gerard Burish. Provost, Provost Office; Professor, Psychology. Bachelor of Arts, University of Notre Dame, 1972; Master of Arts, University of Kansas, 1975; Philosophiae Doctor, ibid., 1976 (2005)

Leo Francis Burke. Professional Specialist, Executive Education. Bachelor of Arts, University of Notre Dame, 1970; Master of Arts, Indiana Univ-Bloomington, 1979; Master of Business Admin, Aurora University, 1988 (2007)

Kevin J Burke. Assistant Professor, Specialist, Alliance for Catholic Education. Bachelor of Arts, Boston College, 2002; Master of Education, University of Notre Dame, 2004; Master of Arts, Boston College, 2006; Philosophiae Doctor, Michigan State University, 2010 (2010)

Jeffrey John Burks. Associate Professor, Accountancy. Bachelor of Business Admin., University of Notre Dame, 1997; Master of Business Admin, Creighton University, 2002; Philosophiae Doctor, University of Iowa, 2007 (2007)

Peter C. Burns. Henry Masman Chair in Civil Engineering (Collegiate Chair II); Professor, Civil Engineering and Geological Sciences; Director, Center for Sustainable Energy; Concurrent Professor, Chemistry and Biochemistry. Bachelor of Science, University of New Brunswick, 1988; Master of Science, University of Western Ontario, 1990; Philosophiae Doctor, University of Minnesota, 1994 (1997)

Jorge Agustín Bustamante. The Eugene P. and Helen Conley Chair in Sociology; Professor, Sociology. Master of Arts, University of Notre Dame, 1970; Philosophiae Doctor, ibid., 1975 (1986)

Joseph A. Buttigieg. The William R. Kenan Jr. Chair in English; Professor, English; Director, Heythrop-Yusko Scholars Program. Bachelor of Arts, University of Malta, 1968; Bachelor of Philosophy, Heythrop College, 1970; Master of Arts, University of Malta, 1972; Philosophiae Doctor, State University of NY--Binghamton, 1976 (1980)

Theodore J. Cachey. Ravarino Directorship Professor, Romance Languages and Literatures; Director, Rome Global Gateway. Bachelor of Arts, Northwestern University, 1978; Master of Arts, UCLA, 1982; Philosophiae Doctor, ibid., 1986 (1990)

Mayland Chang. Research Professor, Chemistry and Biochemistry. Bachelor of Science, Sorbonne University, 1977; Bachelor of Science, University of Southern California, 1981; Philosophiae Doctor, University of Chicago, 1985 (2003)  

Alex E. Chavez. Assistant Professor, Anthropology; Concurrent Assistant Professor, Institute for Latino Studies. Bachelor of Arts, University of Texas-Austin, 2004; Master of Arts, ibid., 2006; Philosophiae Doctor, ibid., 2010 (2014)  

Danny Ziyi Chen. Professor, Computer Science and Engineering; Concurrent Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, University of San Francisco, 1985; Master of Science, Purdue University, 1988; Philosophiae Doctor, ibid., 1992 (1992)  

Ying Cheng. Associate Professor, Psychology. Bachelor of Arts, Anhui Institute of Technology, 2003; Bachelor of Engineering, University of Science and Technology, 2003; Master of Science, University of IL Urbana-Champaign, 2007; Philosophiae Doctor, ibid., 2008 (2008)  

Meredith S. Chesson. Associate Professor, Anthropology; Concurrent Associate Professor, Gender Studies. Bachelor of Arts, Brown University, 1989; Master of Arts, Harvard University, 1993; Philosophiae Doctor, ibid., 1997 (2000)  

David Chiang. Associate Professor, Computer Science and Engineering. Bachelor of Arts, Harvard University, 1997; Master of Science, ibid., 1997; Philosophiae Doctor, University of Pennsylvania, 2004 (2014)  

Jonathan David Chisum. Assistant Professor, Electrical Engineering. Bachelor of Science, Seattle Pacific University, 2003; Master of Science, University of Colorado-Boulder, 2008; Philosophiae Doctor, ibid., 2011 (2015)  

Peter Abe Cholak. Professor, Mathematics. Bachelor of Arts, Union College University, 1984; Master of Science, University of Wisconsin-Madison, 1988; Master of Arts, University of Wisconsin Center, 1988; Philosophiae Doctor, ibid., 1991 (1994)  

Christopher Chowrimootoo. Assistant Professor, Program of Liberal Studies; Concurrent Assistant Professor, Music. Bachelor of Arts, Jesus College Oxford, 2006; Master of Arts, University of Oxford, 2007; Master of Arts, Harvard University, 2009; Philosophiae Doctor, ibid., 2013 (2013)  

Kenneth Christensen. Professor, Aerospace and Mechanical Engineering. Bach of Sci in Mech Engr, University of New Mexico Main, 1995; M.S. Mechanical Engr, California Institute of Techno, 1996; Philosophiae Doctor, University of IL Urbana-Champaign, 2001 (2014)  

Andrea Lynn Christensen. Assistant Professional Speicilists, Institute for Educational Initiatives . Bachelor of Arts, University of Notre Dame, 2006; Master of Arts, ibid., 2009; Philosophiae Doctor, ibid., 2012 (2012)  

Mathew A. Chrystal. Assistant Professional Specialist, Science Computing. Bachelor of Science, California State Polytechnic, 1983; Master of Science, University of Minnesota, 1997; Philosophiae Doctor, ibid., 2001 (2001)  

David Ashton Claimont. Tsich Family Associate Professor of Theology; Associate Professor, Theology. Bachelor of Business Admin., University of Notre Dame, 1996; Master of Arts, University of Chicago, 2000; Master of Arts, U of Chicago School Divinity, 2000; Master of Arts, ibid., 2000; Master of Arts, ibid., 2000; Master of Arts, ibid., 2000; Master Degree - Unspeicified, ibid., 2000; Philosophiae Doctor, ibid., 2005; Philosophiae Doctor, University of Chicago, 2005; Philosophiae Doctor, U of Chicago School Divinity, 2005 (1994)  

Lee Anna Clark. The William J. and Dorothy K. O'Neill Professor of Psychology. Bachelor of Arts, Cornell University, 1972; Master of Arts, ibid., 1977; Philosophiae Doctor, University of Minnesota of Minneapol, 1982 (2010)  

Patricia L. Clark. Professor, Chemistry and Biochemistry; Concurrent Professor, Chemical and Biomolecular Engineering. Bachelor of Science, Georgia Institute of Technolog, 1991; Philosophiae Doctor, University Texas Medical Schoo, 1997 (2001)  

G. Christopher Clark. Associate Professional Specialist, Kanel Center for Teaching and Learning. Bachelor of Arts, Cornell University, 1975; Master of Arts, University of Rochester, 1980 (1997)  

Patrick J. Clauss. Professional Specialist, University Writing Program; Professor of the Practice. Bachelor of Science, Indiana Univ-Bloomington, 1990; Master of Arts, Indiana State University Main, 1992; Philosophiae Doctor, Ball State University, 1999 (2008)  

Joanne E. Clifford. Associate Professional Specialist, Law School. Bachelor of Science, Ohio State University, 1993; Juris Doctor, University of Virginia, 2001 (2011)  

Jon Thomas Coleman. Professor, History; Concurrent Professor, American Studies. B.A. History, University of Colorado-Boulder, 1992; Master of Arts, ibid., 1992; Doctorate Degree, Yale University, 2003 (2004)  

Anne G. Coleman. Associate Professor, American Studies. Bachelor of Arts, Williams College, 1987; Master of Arts, University of Colorado-Boulder, 1992; Philosophiae Doctor, ibid., 1996 (2009)  

Jessica L Collett. Associate Professor, Sociology; Concurrent Associate Professor, Gender Studies; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, Winthrop College, 1998; Master of Arts, University of Arizona, 2002; Philosophiae Doctor, ibid., 2006 (2006)
Faculty

Brian Scott Collier. Associate Professional Specialist, Alliance for Catholic Education; Coordinator of Supervision of the ACE Master of Education Program. Bachelor of Arts, Loyola University Chicago, 1995; Master of Arts, Colorado State University, 2000; Philosophiae Doctor, Arizona State University, 2006 (2009)

Frank Hadley Collins. George and Winifred Clark Professor of Biological Sciences; Professor, Biological Sciences. Bachelor of Arts, Johns Hopkins University, 1966; Master of Arts, University of East Anglia, 1973; Philosophiae Doctor, University California Davis, 1981 (1997)

James Michael Collins. Professor, Film, Television, and Theatre; Department Chair, Film, Television, and Theatre; Concurrent Professor, American Studies; Concurrent Professor, English. Bachelor of Arts, University of Iowa, 1975; Philosophiae Doctor, ibid., 1984 (1995)

Susan Collins. Associate Professor, Political Science. Bachelor of Arts, University of Alberta, 1984; Master of Arts, ibid., 1987; Philosophiae Doctor, Boston College, 1994 (2013)

Sandra Dean Collins. Associate Professional Specialist, Management. Bachelor of Arts, Indiana University South Bend, 1994; Master of Arts, University of Notre Dame, 1997; Philosophiae Doctor, ibid., 1999 (1994)

Austin Ignatius Collins, CSC. Professor, Art, Art History, and Design; Religious Superior of Carby Hall. Bachelor of Arts, University of Notre Dame, 1977; Master of Divinity, Graduate Theological Union, 1981; Master of Fine Arts, Claremont Graduate School, 1985 (1986)

Philippe A. Collon. Associate Professor, Physics; Associate Chair, Physics. Bachelor of Science, Universite Catholique De Louva, 1993; Philosophiae Doctor, Wirtschaftsuniversitat Wien, 1999 (2003)

Maria S. Coloma. Associate Professional Specialist, Romance Languages and Literatures. Bachelor of Arts, Nat'L University of San Marcos, 1984; Master of Arts, University of Pittsburgh, 1998 (2000)

Edward Joseph Conlon. Edward Frederick Sorin Society, Professor of Management; Professor, Management. Bachelor of Science, Pennsylvania State University, 1972; Master of Science, Carnegie Mellon University, 1975; Philosophiae Doctor, ibid., 1978 (1992)

Ann-Marie Conrado. Assistant Professor, Art, Art History and Design; Concurrent Assistant Professor, Anthropology; Fellow, Center for Social Concerns. Bachelor of Fine Arts, University of Notre Dame, 1993; Master of Arts, University of Chicago, 2003 (2007)

Steven A Corcelli. Associate Professor, Chemistry and Biochemistry; Director of Graduate Studies, Chemistry and Biochemistry. Bachelor of Science, Brown University, 1997; Doctor of Science, Yale University, 2002 (2005)

Thomas C. Corke. Professor, Aerospace and Mechanical Engineering; Clark Equipment Professor of Engineering. Bachelor of Science, Illinois Institute of Techno, 1974; Master of Science, ibid., 1976; Philosophiae Doctor, ibid., 1981 (1999)

Alexandra F. Corning. Research Associate Professor, Psychology. Bachelor of Science, University of Florida, 1988; Master of Science, Loyola University Chicago, 1990; Philosophiae Doctor, Ohio State University, 1994 (2000)

David Bernard Cortright. Professional Specialist, Joan B. Kroc Institute for International Peace; Professor of the Practice. Bachelor of Arts, University of Notre Dame, 1968; Master of Arts, New York University, 1970; Philosophiae Doctor, The Union Institute, 1975 (2008)

Shane A. Corwin. Associate Professor, Finance; Faculty Director of the Notre Dame Institute for Global Investing. Bachelor of Science, Mankato State University, 1990; Master of Business Admin, ibid., 1992; Philosophiae Doctor, Ohio State University, 1996 (2000)

Therese Charlotte Cory. Assistant Professor, Philosophy. Master of Arts, Catholic University of America, 2007; Philosophiae Doctor, ibid., 2009 (2015)

Thomas F. Cosimano. Professor, Finance. Bachelor of Science, State University of NY-Buffalo, 1974; Master of Arts, ibid., 1977; Philosophiae Doctor, ibid., 1979 (1987)

Jesus Costantino. Assistant Professor, English. Bachelor of Arts, University California Davis, 1998; Philosophiae Doctor, University of California Berkeley, 2011 (2012)

Donald Crafton. Professor, Film, Television, and Theatre; The Joseph and Elizabeth Robbie Professor of Film, Television and Theatre. Bachelor of Arts, University of Michigan, 1969; Master of Arts, University of Iowa, 1970; Master of Arts, Yale University, 1974; Philosophiae Doctor, ibid., 1977 (1997)

Michael J. Cramer. Assistant Professional Specialist, University of Notre Dame Environmental Research Center. Bachelor of Arts, Earlham College, 1994; M.S. Biology, Texas Tech University, 1998; Philosophiae Doctor, University of Cincinnati, 2006 (2007)

Xavier Creary. The Charles L. Huisking Professor of Chemistry and Biochemistry; Professor, Chemistry and Biochemistry. Bachelor of Science, Seton Hall University, 1968; Philosophiae Doctor, Ohio State University, 1973 (1974)

Klaas Jan Martijn Cremers. Professor, Finance; Concurrent Professor, Law School. Master of Science, Vrije Universiteit, 1997; Philosophiae Doctor, New York University, 2002 (2012)
Justin Crepp. Assistant Professor, Physics. B.S. Physics, Pennsylvania St University, 2003; Philosophiae Doctor, University of Florida, 2008 (2012)

Christopher J. Cronin. Instructor, Department of Economics. Bachelor of Arts, Georgetown College, 2008; Bachelor of Science, ibid., 2008; Master of Science, UNC at Chapel Hill, 2011; Philosophiae Doctor, ibid., 2014 (2014)

Richard Alan Cross. The Rev. John A. O'Brien Chair in Philosophy; Department Chair. Philosophy, Professor, Philosophy; Concurrent Professor, Theology; Concurrent Professor, Theology, Bachelor of Theology; University of Oxford, 1986; Master of Arts, Keble College Oxford, 1991; Philosophiae Doctor, University of Oxford, 1991 (2007)

Craig Richard Crossland. Assistant Professor, Management. Bachelor of Science, University of Queensland, 1995; Master of Business Admin, University College Dublin, 2001; Philosophiae Doctor, Pennsylvania State University, 2008 (2013)

Charles Robert Crowell. Associate Professor, Psychology; Concurrent Associate Professor, Computer Applications Programs - Arts & Letters; Director of Computing and Digital Technology. Bachelor of Arts, University Notre Dame, 1969; Master of Arts, University of Iowa, 1972; Philosophiae Doctor, ibid., 1973 (1974)

Hal Robert Culbertson. Professional Specialist, Joan B. Kroc Institute for International Peace; Associate Dean for Operations, Keough School of Global Affairs. Bachelor of Arts, Wheaton College, 1986; Master of Philosophy, University of IL Urbana-Champaign, 1990; Juris Doctor, ibid., 1991; Master of Arts, University of Notre Dame, 1996 (1997)

Kathleen Spruws Cummings. Associate Professor, History; Associate Professor, American Studies; Concurrent Associate Professor, Gender Studies; Fellow, Nanovic Institute for European Studies; Concurrent Associate Professor, Theology; Director, Cushwa Center for Study American Catholicism. Bachelor of Arts, University of Scranton, 1993; Master of Arts, ibid., 1993; Master of Arts, University of Notre Dame, 1994; Philosophiae Doctor, ibid., 1999 (2001)

Edward Mark Cummings. Professor, Notre Dame Chair in Psychology; Professor, Psychology. Bachelor of Arts, Johns Hopkins University, 1972; Master of Arts, UCLA, 1973; Philosophiae Doctor, ibid., 1977 (1996)

Paula G. Curtis. Associate Professional Specialist, First Year of Studies; Concurrent Associate Professional Specialist, Anthropology. Bachelor of Arts (Latin), Harvard College, 1992; Philosophiae Doctor, Harvard University, 2003 (2009)

Barry Cushman. Murphy Foundation Professor of Law; Professor, Law School; Concurrent Professor, Political Science; Concurrent Professor, History. Bachelor of Philosophy, Amherst College, 1982; Juris Doctor, University of Virginia, 1986; Master of Arts, ibid., 1986; Philosophiae Doctor, ibid., 1995 (2012)

Zhi Da. Associate Professor, Finance. Bachelor of Arts, National University of Singapo, 1999; M.S. Engineering, ibid., 2001; Philosophiae Doctor, Northwestern University, 2006 (2006)

Nan Zhang Da. Assistant Professor, English. Bachelor of Arts, University of Chicago, 2006; Philosophiae Doctor, University of Michigan, 2014 (2014)

Yacine Daddi Addoun. Assistant Professor, History. Bachelor of Arts, University of Algiers, 1989; Master of Arts, Cours de Civilisation Francais, 1990; Philosophiae Doctor, York University Toronto, 2010 (2015)

Christian Michael Dallavis. Associate Professor, Political Science; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, University of Notre Dame, 1997; Master of Arts, University of Portland, 1999; Philosophiae Doctor, University of Michigan, 2008 (2008)

Sarah Zukerman Daly. Assistant Professor, Political Science. Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Stanford University-Palo Alto, 2003; Master of Science, London School of Economics, 2004; Philosophiae Doctor, Massachusetts Institute of Tec, 2011 (2013)

Mary R. D’Angelo. Associate Professor, Theology. Bachelor of Arts, Fordham University, 1969; Master of Philosophy, Yale University, 1972; Philosophiae Doctor, ibid., 1976 (1993)

Suman Datta. Professor, Electrical Engineering. Bachelor of Science in EE, Indiana Institute of Technology, 1995; Philosophiae Doctor, University of Cincinnati, 1999 (2015)

Darren Wayne Davis. Professor, Political Science; Concurrent Professor, Psychology; Director, Center for Social Research. B.S. Political Science, Lamar University, 1988; Master of Arts, Louisiana State University, 1990; Philosophiae Doctor, University Texas Houston, 1994 (2007)

Keith Wayne Davis. Director, Science Computing; Assistant Professional Specialist, Science Computing; Concurrent Assistant Professional Specialist, Physics. Bachelor of Science, University of Tulsa, 1999; Master of Science, Clemson University, 2003; Philosophiae Doctor, ibid., 2007 (2008)

Maureen Gillespie Dawson. Assistant Dean for Cultural Competency and Engagement, First Year of Studies; Associate Professional Specialist, First Year of Studies. Bachelor of Science, Cook College, 1984; Master of Arts, Middlebury College, 1987; Philosophiae Doctor, New York University, 1996 (2014)

Jeanne D. Day. Professor, Psychology. Bachelor of Arts, University California San Diego, 1974; Master of Arts, University of IL Urbana-Champaign, 1977; Philosophiae Doctor, ibid., 1980 (1980)

John Deak. Assistant Professor, History. Bachelor of Arts, UNC at Chapel Hill, 1998; Master of Arts, University of Chicago, 2000; Philosophiae Doctor, ibid., 2009 (2009)

Karen I. Deak. Assistant Professional Specialist, Biological Sciences; Assistant Professor of the Practice; Director, Masters of Science in Patent Law. Bachelor of Science, UNC at Chapel Hill, 2000; Philosophiae Doctor, University of Chicago, 2008 (2011)
Celia Deane-Drummond. Professor, Theology; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, University of Cambridge, 1977; Philosophiae Doctor, University of Reading, 1980; Bachelor of Arts, Trinity College, 1989; Philosophiae Doctor, Victoria University of Manchester, 1992 (2011)

Noreen Deane-Moran. Associate Professional Specialist, English; Associate Teaching Professor. Bachelor of Arts, College of New Rochelle, 1963; Master of Arts, University of Notre Dame, 1964; Master of Arts, ibid., 1968; Philosophiae Doctor, ibid., 1982 (1982)

Mark Dehmlow. Associate Librarian, Hesburgh Libraries. Bachelor of Arts, University of Maine at Orono, 2000; Bachelor of Mathematics, ibid., 2000; Master of Library & Info Sci, University of Illinois-Chicago, 2004 (2001)

Cornelius F. Delaney. Professor, Philosophy. Bachelor of Arts, St. John’s Seminary, 1961; Master of Arts, Boston College, 1962; Philosophiae Doctor, Saint Louis University, 1967 (1967)

Louis A. DelFra, CSC. Associate Professional Specialist, Alliance for Catholic Education. Bachelor of Arts, University of Notre Dame, 1992; Master of Divinity, ibid., 2003 (2007)

Antonio Delgado. Associate Professor, Physics. Bachelor of Science, Universidad Autonoma, 1997; Philosophiae Doctor, ibid., 2001 (2007)

JoAnn DellaNeva. Professor, Romance Languages and Literatures; Associate Dean, College of Arts and Letters. Bachelor of Arts, Bryn Mawr College, 1976; Master of Arts, University of Pennsylvania, 1978; Master of Arts, Princeton University, 1980; Philosophiae Doctor, ibid., 1982 (1982)

Denise M. DellaRossa. Professional Specialist, German and Russian Languages and Literature; Teaching Professor. Bachelor of Arts (Latin), Montana State University, 1989; Master of Arts (Latin), Mississippi St Univ, 1991; Philosophiae Doctor, University of Wisconsin-Madison, 2002 (2006)

Patrick Deneen. Associate Professor, Political Science. Bachelor of Arts, Rutgers University, 1986; Philosophiae Doctor, ibid., 1995 (2012)

Yiting Deng. Assistant Professor, Marketing. Bachelor of Arts, Peking University, 2006; Bachelor of Science, ibid., 2006; Master of Arts, ibid., 2009; Master of Science, Duke University, 2012; Philosophiae Doctor, ibid., 2015 (2015)

Michael Raymond DePaul. Professor, Philosophy. Bachelor of Arts, University of Notre Dame, 1976; Master of Arts, Ohio State University, 1979; Philosophiae Doctor, Brown University, 1983 (1982)

Michael Desch. Professor, Political Science; Fellow, Kellogg Institute for International Studies; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, Marquette University, 1982; Master of Arts, University of Chicago, 1984; Philosophiae Doctor, ibid., 1988 (2008)

Michael Detlefsen. McMahon-Hank Professor of Philosophy; Professor, Philosophy; Editor, Journal of Formal Logic. Bachelor of Arts, Wheaton College, 1971; Philosophiae Doctor, Johns Hopkins University, 1976 (1983)

Sarvanan Devaraj. Professor, Management; Fred V. Duda Professor of Business; Department Chair, Management. Bachelor of Science, Bangalore University, 1989; Master of Science, University of Alabama, 1991; Philosophiae Doctor, University of Minnesota, 1997 (1996)

Jean A. Dibble. Professor, Art, Art History, and Design. Bachelor of Science, University of Wisconsin-Madison, 1979; Master of Arts, University of New Mexico Main, 1981; Master of Fine Arts, University of Wisconsin Complete, 1988 (1989)

Erin Dietel-McLaughlin. Associate Professional Specialist, University Writing Program; Associate Teaching Professor. Bachelor of Arts, Eastern Washington University, 2003; Master of Arts, Bowling Green State University, 2007; Philosophiae Doctor, ibid., 2010 (2010)

Jeffrey Alan Diller. Professor, Mathematics. Bachelor of Science, University of Dayton, 1988; Philosophiae Doctor, University of Michigan, 1993 (1998)

Sidney Keith D’Mello. Assistant Professor, Psychology. Bachelor of Science, Christian Brothers College, 2002; Master of Science, University of Memphis, 2004; Philosophiae Doctor, ibid., 2009 (2012)

Hyungrok Do. Assistant Professor, Aerospace and Mechanical Engineering. Bachelor of Science, Seoul National University, 2002; Master of Science, Stanford University, 2006; Philosophiae Doctor, ibid., 2009 (2011)

Malgorzata Dobrowolska-Furdyna. Professor, Physics; Associate Dean for Undergraduate Studies, College of Science. Master of Science, Warsaw University, 1972; Philosophiae Doctor, Polish Academy of Science, 1980 (1987)

Darren Theodore Dochuk. Associate Professor, History. Bachelor of Arts, Simon Fraser University, 1995; Master of Arts, Queen’s University, 1998; Philosophiae Doctor, University of Notre Dame, 2005 (2015)

Anselma Dolchic-Ashley. Assistant Professional Specialist, Glynn Family Honors Program; Assistant Professor of the Practice. Bachelor of Science, Georgetown University, 1981; Master of Science, ibid., 1983; Master of Divinity, Weston Jesuit School of Theology, 1988; Philosophiae Doctor, 2011 (2015)

Marie Collins Donahue. Associate Professional Specialist, Biological Sciences. BS in Nursing, Catholic University of America, 1982; Master of Science, Columbia University, 1989; Master of Public Health, Harvard University, 1995 (2015)

Deborah Lynn Donahue. Associate Professional Specialist, Center For Transgene Research. Associate - Unspecified, Columbia Greene Community Coll, 1994; Bachelor of Science, Cornell University, 1996 (2001)

William C. Donahue. The Rev. John F. Cavanaugh, C.S.C., Professor of the Humanities; Professor, German and Russian Languages and Literature; Department Chair, German and Russian Languages and Literature. Bachelor of Science, Georgetown University, 1981; Master of Theological Studies, Harvard Divinity School, 1984; Master of Arts, Middlebury College, 1987; Philosophiae Doctor, Harvard University, 1995 (2015)

William Leon Donaruma. Director, Center for Creative Computing; Professional Specialist, Film, Television, and Theatre; Professor of the Practice. Bachelor of Arts, University of Notre Dame, 1989 (1998)

Mary Flannery. Professional Specialist, Department of Economics. Bachelor of Arts, University of Notre Dame, 1978; Master of Arts, ibid., 1979; Philosophiae Doctor, University of Maryland, 1996 (2012)

Thomas Patrick Flint. Professor, Philosophy. Bachelor of Arts, Saint Ambrose College, 1975; Philosophiae Doctor, University of Notre Dame, 1980 (1982)

Patrick Joseph Flynn. Duda Family Chair in Engineering; Professor, Computer Science and Engineering; Concurrent Professor, Electrical Engineering. Bach of Sc in Electrical Engr, Michigan State University, 1985; Master of Science, ibid., 1986; Philosophiae Doctor, ibid., 1990 (2001)

Margaret Mary Forster. Professional Specialist, Finance. B.S. Industrial Engineering, University of Sao Paulo, 1982; Master of Business Admin, Cornell University, 1985; Master of Science, ibid., 1987; Doctor of Science, ibid., 1990 (2005)

James Kieran Foster, C.S.C. Associate Professional Specialist, Preprofessional Studies; Chair of the Preprofessional Studies Program; Assistant Dean, Health Sciences; Director, Center for Health Sciences Advising; Larry Baldinger Professorship, Bachelor of Science, University of Notre Dame, 1977; Doctorate of Medicine, University of Illinois Medical, 1981; Master of Divinity, University of Notre Dame, 1994 (1997)

Christopher Fox. Professor, English; Director, Koughnagh Institute for Irish Studies. Bachelor of Arts, Cleveland State University, 1971; Master of Arts, State University of NY—Binghamton, 1974; Philosophiae Doctor, ibid., 1978 (1986)

Jennifer Rager Fox. Associate Professional Specialist, First Year of Studies. Bachelor of Arts, Marquette University, 2003; Master of Arts, Boston College, 2005 (2008)

James Mario Frabutt. Professional Specialist, Alliance for Catholic Education. Bachelor of Arts, University of Notre Dame, 1995; Master of Science, University of NC at Greensboro, 1998; Philosophiae Doctor, ibid., 2000 (2007)

Luis Ricardo Fraga. Arthur Foundation Professor in Transformative Latino Leadership; The Joseph and Elizabeth Robbie Professor of Political Science; Professor, Political Science; Co-Director, Institute for Latino Studies. Bachelor of Arts, Harvard College, 1978; Master of Arts, Rice University, 1981; Philosophiae Doctor, ibid., 1984 (2014)

Mary Elizabeth Fransen. Associate Professor, Music. Bachelor of Music, SUNY College at Potsdam, 1980; Master of Arts, University of Rochester, 1985; Philosophiae Doctor, ibid., 1997 (1997)

Malcolm J. Fraser. Rev. Julius A. Nieuwland, C.S.C., Professor of Biological Sciences; Professor, Biological Sciences. Bachelor of Science, Wheeling College, 1975; Master of Science, Ohio State University, 1979; Philosophiae Doctor, ibid., 1981 (1983)

Alfred Joseph Freedoso. J.A. Oesterle Chair; Professor, Philosophy. Bachelor of Arts, St John Vianney Minor Seminary, 1968; Philosophiae Doctor, University of Notre Dame, 1976 (1979)

Stephen A. Fredman. Professor, English; Concurrent Professor, American Studies. Bachelor of Fine Arts, California Institute of Arts, 1971; Master of Arts, California State College Sonom, 1976; Philosophiae Doctor, Stanford University, 1980 (1980)

James L. Fuehrmeyer. Faculty Director of the M.S. in Accountancy program; Associate Professional Specialist, Accountancy. Bachelor of Science, U. S. Military Academy, 1973; Master of Business Admin, University of Chicago, 1980 (2007)

Agustin Fuentes. Professor, Anthropology; Department Chair, Anthropology. Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, University of California Berkeley, 1989; Master of Arts, ibid., 1991; Philosophiae Doctor, ibid., 1994 (2002)

Timothy S. Fuerst. William and Dorothy O'Neill Chair in Economics; Endowed Professor, Department of Economics. Bachelor of Science, Ohio Northern University, 1985; Master of Arts, University of Chicago, 1987; Philosophiae Doctor, ibid., 1990 (2012)

Thomas E. Fuja. Professor, Electrical Engineering; Department Chair, Electrical Engineering. Bachelor of Science, University of Michigan, 1981; Master of Engineering, Cornell University, 1983; Philosophiae Doctor, ibid., 1987 (1998)

Susan Fullerton Shirey. Research Assistant Professor, Electrical Engineering. Bach of Sc in Chemical Engr, Pennsylvania St University, 2002; Philosophiae Doctor, ibid., 2009 (2009)
Faculty

Jacek K. Furdyina. *Aurora and Thomas Marquez Professor of Information Theory and Computer Technology; Professor, Physics.* Bachelor of Science, Loyola University Chicago, 1955; Philosophiae Doctor, Northwestern University, 1960 (1986)

Naoki Fuse. *Assistant Professional Specialist, East Asian Languages and Cultures; Assistant Teaching Professor.* Bachelor of Arts, University of Nihon, 2002; Master of Arts, ibid., 2004; Master of Arts, Portland State University, 2008 (2014)

Patrick D. Gaffney, CSC. *Fellow, Kellogg Institute for International Studies; Associate Professor, Philosophy.* Bachelor of Arts, University of Notre Dame, 1969; Master of Arts, ibid., 1970; Master of Arts, ibid., 1973; Master of Arts, University of Chicago, 1977; Philosophiae Doctor, ibid., 1982 (1980)

David Galvin. *Associate Professor, Mathematics.* Bachelor of Mathematics, University of Cambridge, 1995; Philosophiae Doctor, Rutgers University, 2002 (2007)

Mary E. Galvin. *The William K. Warren Foundation Dean of the College of Science; Professor, Chemistry and Biochemistry.* B.A. Chemistry, Manhattanville College, 1973; Master of Science, Massachusetts Institute of Technology, 1982; Philosophiae Doctor, ibid., 1984 (2015)

Priyank Gandhi. *Assistant Professor, Finance.* Bachelor of Engineering, Bangalore University, 1998; Master of Business Admin, Management Develop, Institute, 2001; Master of Engineering, University of California Berkeley, 2006; Philosophiae Doctor, UCLA, 2012 (2012)

Haifeng Gao. *Assistant Professor, Chemistry and Biochemistry.* Bachelor of Science, Fudan University, 2000; Master of Science, ibid., 2003; Philosophiae Doctor, Carnegie Mellon University, 2008 (2011)

Pengjie Gao. *Associate Professor, Finance.* Bachelor of Engineering, Qingdao University, 1998; Master of Science, University Tennessee Knoxville, 2002; Philosophiae Doctor, Northwestern University, 2007 (2007)

Emily N. Garbinsky. *Assistant Professor, Marketing.* Bachelor of Science, Carnegie Mellon University, 2010; Philosophiae Doctor, Stanford University, 2015 (2015)

Kenneth Neil Garcia. *Professional Specialist, College of Arts and Letters; Associate Director, Institute for Scholarship in the Liberal Arts; Associate Director, Institute for Scholarship in the Liberal Arts.* Bachelor of Arts, Old College School Humanities, 1983; Master of Arts, Catholic University of America, 1986; Master of Arts, ibid., 1997 (1996)

Anne Garcia-Romero. *Thomas J. and Robert T. Rolski Assistant Professor of Film, Television and Theatre; Fellow, Institute for Latino Studies; Assistant Professor, Film, Television, and Theatre.* Bachelor of Arts, Occidental College, 1987; Master of Fine Arts, Yale University, 1995; Philosophiae Doctor, University of California Santa Barbara, 2009 (2010)

Umesh Garg. *Professor, Physics.* Bachelor of Science, Birla Institute of Technology, 1972; Master of Science, ibid., 1974; Master of Science, SUNY at Stony Brook, 1975; Philosophiae Doctor, ibid., 1978 (1982)

Peter M. Garnavich. *Professor, Physics.* Bachelor of Science, University of Maryland, 1980; Master of Science, Massachusetts Institute of Tec, 1983; Philosophiae Doctor, University of Washington, 1991 (2000)

Nicole S. Garnett. *Professor, Law School; John P. Murphy Foundation Professor of Law.* Bachelor of Arts (Latin), Stanford University, 1992; Juris Doctor, Yale University, 1995 (1999)

Richard Garnett. *Professor, Law School; Concurrent Professor, Political Science.* Bachelor of Arts, Duke University, 1990; Juris Doctor, Yale University, 1995 (1999)

John Francis Gaski. *Associate Professor, Marketing.* Bachelor of Science, Lawrence University, 1971; Master of Business Admin., ibid., 1973; Master of Business Admin, University of Wisconsin-Madison, 1979; Philosophiae Doctor, ibid., 1982 (1980)

David W. Gasperetti. *Associate Professor, German and Russian Languages and Literature.* Bachelor of Arts, Lawrence University, 1976; Master of Arts, UCLA, 1978; Philosophiae Doctor, ibid., 1985 (1989)

Liangyan Ge. *Professor, East Asian Languages and Cultures.* Bachelor of Arts, Hefei Polytechnic University, 1982; Master of Arts, Nanjing University, 1984; Philosophiae Doctor, Indiana Univ-Bloomington, 1995 (1995)

Michael Gekhtman. *Professor, Mathematics; Department Chair, Mathematics.* Bachelor of Science, Kiev State University, 1985; Master of Science, ibid., 1985; Philosophiae Doctor, National Academy of Science, 1990 (1998)

Frank Axel Germann. *Assistant Professor, Marketing.* Bachelor of Arts, Reutlingen University, 2001; Master of Business Admin, University of Notre Dame, 2005; Master Degree - Unspecified, Pennsylvania State University, 2012; Philosophiae Doctor, Pennsylvania St University, 2012 (2012)

Stephen E. Gersh. *Professor, Medieval Institute; Concurrent Professor, Philosophy.* Bachelor of Arts, University of Cambridge, 1969; Master of Arts, ibid., 1973 (1977)

Antoine Gervais. *Assistant Professor, Department of Economics.* Bachelor of Business Admin., Universite du Quebec/Montreal, 2003; Master of Arts, University of Toronto, 2004; Philosophiae Doctor, University of Maryland, 2009 (2010)

Lee Thomas Gettler. *Assistant Professor, Anthropology.* Bachelor of Arts, University of Notre Dame, 2005; Philosophiae Doctor, Northwestern University, 2012 (2007)

J. Daniel Gezelter. *Director of Undergraduate Studies, Chemistry and Biochemistry.* Professor, Chemistry and Biochemistry, Bachelor of Science, Duke University, 1989; Philosophiae Doctor, University of California Berkeley, 1995 (1999)

Nasir Ghiazeddin. *Associate Professor, Management.* Bachelor of Science, Arya-Mehr University of Technology, 1970; Master of Science, Purdue University, 1975; Philosophiae Doctor, ibid., 1982 (1982)

Chloe Rae Gibbs. Assistant Professor, Department of Economics. Bachelor of Arts, University of Notre Dame, 2000; Master of Arts, University of Michigan, 2003; Master of Arts, University of Chicago, 2008; Philosophiae Doctor, ibid., 2012 (2015)

Bradley Stephen Gibson. Professor, Psychology. Bachelor of Science, Colorado State University, 1982; Philosophiae Doctor, University of Arizona, 1992 (1994)

Timothy J. Gilbride. Associate Professor, Marketing. Bachelor of Business Admin., University of Dayton, 1988; Master of Business Admin, Ohio State University, 1993; Philosophiae Doctor, ibid., 2004 (2006)

Alyssa W. Gillespie. Associate Professor, German and Russian Languages and Literature; Director, Office of Arts & Letters Undergraduate Study. Bachelor of Arts, Brandeis University, 1990; Master of Arts, University of Wisconsin-Madison, 1992; Philosophiae Doctor, ibid., 1998 (1999)

Donna Marie Glowacki. Associate Professor, Anthropology. Bachelor of Arts, Miami University, 1992; Master of Arts, University of Missouri-Columbia, 1995; Philosophiae Doctor, Arizona State University, 2006 (2007)

David Batten Go. Associate Professor, Aerospace and Mechanical Engineering. Bachelor of Science, University of Notre Dame, 2001; Master of Science, University of Cincinnati, 2004; Philosophiae Doctor, Purdue University, 2008 (2008)

Joachim Goeres. Research Professor, Physics. Bachelor of Science, University of Munster, 1974; Philosophiae Doctor, ibid., 1983 (1987)

Gary Goertz. Professor, Political Science. Bachelor of Arts, Bethel College, 1976; Master of Science, University of Iowa, 1982; Philosophiae Doctor, University of Michigan, 1988 (2012)

Benjamin Golez. Assistant Professor, Finance. Bachelor of Science, Universidad de Lujibiana, 2005; Master of Science, Universitat Pompeu Fabra, 2006; Philosophiae Doctor, ibid., 2011 (2011)

Kenjiro Gomes. The Frank M. Freimann Assistant Professor of Physics; Assistant Professor, Physics. Bachelor of Science, Pontificia Universidade Cat., 2001; Master of Science, ibid., 2002; Philosophiae Doctor, University of IL Urbana-Champaign, 2009 (2012)

Luis Gomez-Mejia. The Ray and Milann Siegfried Professor of Management; Professor, Management. Associate - Unspecified, Miami-Dade Community College, 1971; B.A. Economics, University of Minnesota, 1973; Master of Arts, ibid., 1974; Philosophiae Doctor, ibid., 1982 (2013)

Dawn M. Goodson. Assistant Professor, Psychology. Bachelor of Arts, State University of NY-Buffalo, 1986; Master of Science, University of Arizona, 1991; Philosophiae Doctor, ibid., 1994 (1994)

DecAnne M. Goodenough-Lashua. Associate Professional Specialist, Chemistry and Biochemistry; Teaching Professor. Bachelor of Science, Valparaiso University, 1994; Philosophiae Doctor, University of Michigan, 2001 (2001)

Victoria Elizabeth Goodrich. Assistant Professional Specialist, College of Engineering. Bach of Sci in Chemical Eng, University of Oklahoma-Norman, 2006; Master of Science, University of Notre Dame, 2009 (2013)

Holly V. Goodson. Professor, Chemistry and Biochemistry; Director, Integrated Biomedical Sciences; Concurrent Professor, Biological Sciences. Bachelor of Arts (Latin), Princeton University, 1988; Philosophiae Doctor, Stanford University, 1995 (2000)

Denise M. Goraliski. Associate Professional Specialist, Physical Education. Bachelor of Science, Saint Louis University, 1982; Master of Science, Southern Illinois University at Carbondale, 1985 (1998)

Johannes Goransson. Assistant Professor, English. Bachelor of Arts, University of Minnesota, 1996; Master of Fine Arts, University of Iowa, 2000; Philosophiae Doctor, University of Georgia, 2008 (2007)

Gilbert James Gorski, CSC. The James A. and Louisa E. Nolen Visiting Professor of Architecture; Associate Professor, School of Architecture. Bachelor of Arts, Illinois Institute of Technolo, 1978; Master of Architecture, ibid., 2010 (2009)

Andrew Cleveland Gould. Associate Professor, Political Science; Fellow, Kellogg Institute for International Studies. Bachelor of Arts (Latin), Harvard University, 1985; Master of Arts, University of California Berkeley, 1986; Philosophiae Doctor, ibid., 1992 (1993)

Robert D. Goulding. Associate Professor, Program of Liberal Studies; Director, University Seminars; Concurrent Associate Professor, History. Bachelor of Science, University of Canterbury, 1989; Bachelor of Arts, ibid., 1990; Master of Arts, The Warburg Institute, 1992; Philosophiae Doctor, ibid., 1999 (2003)

Daniel A. Graff. Director, Center for Social Concerns; Professional Specialist, History. Bachelor of Arts, University of IL Urbana-Champaign, 1990; Master of Arts, University of Wisconsin-Madison, 1993; Philosophiae Doctor, ibid., 2004 (2001)

Karen Graubart. Associate Professor, History. Bachelor of Arts, Barnard College, 1984; Philosophiae Doctor, University of Massachusetts, 2000 (2007)

Richard L. Gray. Associate Professor, Art, Art History, and Design; Department Chair, Art, Art History, and Design. Bachelor of Science, Illinois State University, 1976; Master of Fine Arts, Rochester Inst of Technology, 1982 (1982)

Barbara Jean Green. Associate Professor, English; Concurrent Associate Professor, Gender Studies. Philosophiae Doctor, University of Virginia, 1991 (1991)
Faculty

Stuart Greene. Associate Professor, English; Concurrent Associate Professor, University Writing Program; Joint Appointment, African and African American Studies; Associate Professor Africana Studies. Bachelor of Arts, State University of NY–Binghamton, 1978; Master of Arts, ibid., 1980; Philosophiae Doctor, Carnegie Mellon University, 1990 (1997)

Brad S. Gregory. Professor, History; Director, ND Institute for Advanced Study; Editor, Archive of Reformation History. Bachelor of Arts, Universite Catholique De Louva, 1984; Bachelor of Science, Utah State University, 1985; Master of Arts, Catholique University of Louvain, 1987; Master of Arts, University of Arizona, 1989; Philosophiae Doctor, Princeton University, 1996 (2003)

Thomas A. Gresik. Professor, Department of Economics. Bachelor of Arts, Northwestern University, 1981; Master of Science, California Institute of Techno, 1982; Philosophiae Doctor, Northwestern University, 1987 (2000)

John Paul Grieco. Research Associate Professor, Biological Sciences; Associate Director-Research, of the Eck Family Institute for Global Health. Bachelor of Science, University of Notre Dame, 1990; Master of Science, Texas A&M University, 1994; Philosophiae Doctor, Uniformed Services Health Sci., 2001 (2014)

Patrick N. Griffin. The Madden Hennfrey Family Collegiate Professor of Irish American Studies; Professor, History; Concurrent Professor, Law School; Concurrent Professor, American Studies; Department Chair, History. Bachelor of Arts, University of Notre Dame, 1987; Master of Arts, Columbia University, 1991; Philosophiae Doctor, Northwestern University, 1999 (2008)

Daniel Gerard Groody, CSC. Associate Professor, Theology. Fellow, Kellogg Institute for International Studies; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, University of Notre Dame, 1986; Master of Divinity, Jesuit School of Theology, 1992; Philosophiae Doctor, Graduate Theological Union, 2000; Licentiate in Sacred Theology, Jesuit School of Theology, 2001 (2000)

Anastasia Guimaraes. Assistant Librarian, Hesburgh Libraries. Bachelor of Arts, Moscow State Linguistic Univ, 1993; Master in Library Science, Indiana-Purdue University Indpls, 2007 (1999)

Li Guo. Professor, Classics. Bachelor of Arts, Shanghai International Studies, 1979; Philosophiae Doctor, Yale University, 1994 (1999)

Ruihan Guo. Assistant Professor, Chemical and Biomolecular Engineering. Bachelor of Engineering, Beijing University of Tech., 1998; Master of Engineering, ibid., 2001; Philosophiae Doctor, Georgia Institute of Technolog, 2008 (2012)

Hong Guo. Assistant Professor, Management. Bachelor of Engineering, Renmin University Beijing, 1999; Master of Engineering, ibid., 2002; Master of Science, University of Rochester, 2005; Philosophiae Doctor, University of Florida, 2009 (2009)

Vijay Gupta. Associate Professor, Electrical Engineering. Bachelor of Science, Indian Inst of Tech-Delhi, 2001; Master of Science, California Institute of Techno, 2002; Philosophiae Doctor, ibid., 2006 (2008)

David Gura. Assistant Librarian, Hesburgh Libraries. Bachelor of Arts, Ohio State University, 2003; Master of Arts, ibid., 2005; Philosophiae Doctor, ibid., 2010 (2010)

Perin Gurel. Assistant Professor, American Studies. Bachelor of Arts, University of California Berkeley, 2004; Master of Arts, Yale University, 2007; Master of Philosophy, ibid., 2008; Philosophiae Doctor, ibid., 2010 (2013)

Susan Kay Gursky. Assistant Professional Specialist, Preprofessional Studies. Bachelor of Science, University of Michigan, 1985; Master of Science, University of Southern California, 1991; Philosophiae Doctor, University of Chicago, 1998 (2009)

Sandra Marie Gustafson. Professor, English; Concurrent Professor, American Studies; Fellow, Juan B. Knov Institute for International Peace; Editor, Early American Literature Journal. Bachelor of Arts, Cornell University, 1985; Philosophiae Doctor, University of California Berkeley, 1993 (1993)

Gary M. Gutting. The Notre Dame Chair in Philosophy; Professor, Philosophy; Editor, Notre Dame Philosophical Review. Bachelor of Arts, Saint Louis University, 1964; Philosophiae Doctor, ibid., 1968 (1969)

Gregory Paul Haake. Assistant Professor, Romance Languages and Literatures. Bachelor of Arts, University of Notre Dame, 1999; Master of Divinity, ibid., 2006; Master of Arts, Middlebury College, 2009; Philosophiae Doctor, Stanford University, 2015 (2015)

David S. Hachen. Associate Professor, Sociology. Bachelor of Arts, Lake Forest College, 1974; Master of Arts, University of Wisconsin-Madison, 1978; Philosophiae Doctor, ibid., 1983 (1987)

Gerald Haefeli. Associate Professor, Psychology. Bachelor of Arts (Latin), Lawrence University, 1997; Philosophiae Doctor, University of Wisconsin-Madison, 2005 (2006)

Alexander J. Hahn. Professor, Mathematics. Bachelor of Science, Loyola University New Orleans, 1965; Master of Science, University of Notre Dame, 1968; Philosophiae Doctor, ibid., 1970 (1972)

Kasturi Haldar. James C. Parsons and Carrie Ann Quinn Director of the Center for Rare and Neglected Diseases; The Rev. Julis A. Niewland, C.S.C., Professor of Biological Sciences; Professor, Biological Sciences. Bachelor of Arts, Bryn Mawr College, 1978; Philosophiae Doctor, Massachusetts Institute of Tec, 1982 (2008)

Douglas Carleton Hall. Associate Professor, Electrical Engineering. Bachelor of Science, Miami University, 1985; Master of Science, University of IL Urbana-Champaign, 1988; Philosophiae Doctor, ibid., 1991 (1994)

Brian C. Hall. Professor, Mathematics. B.S. Engineering Physics, Cornell University, 1988; Bachelor of Arts, ibid., 1988; Philosophiae Doctor, ibid., 1993 (1999)

Matthew Eric Kane Hall. Associate Professor, Political Science; Concurrent Assistant Professor, Law School. Bachelor of Science, Northwestern Univ. - Chicago, 2005; Master of Arts, Yale University, 2007; Master of Philosophy, ibid., 2008; Philosophiae Doctor, ibid., 2009 (2013)
Faculty

Marie Diane-Kateri Halvorsen-Ganepola. Assistant Professional Specialist, Management; Teaching Professor. Bachelor of Arts, University of Kansas, 1999; B.S. Biology, ibid., 2003; Master of Business Admin, University of Notre Dame, 2007 (2013)

Alan Hamlet. Assistant Professor, Civil Engineering and Geological Sciences; Concurrent Assistant Professor, Biological Sciences. Bachelor of Arts, University of Rochester, 1981; Bachelor of Science, University of Washington, 1992; M.S. Engineering, ibid., 1996; Philosophiae Doctor, ibid., 2006 (2013)

Christopher Stone Hamlin. Professor, History. Bachelor of Arts, Antioch University, 1974; Master of Arts, University of Wisconsin-Madison, 1977; Philosophiae Doctor, ibid., 1982 (1985)

Qing Han. Professor, Mathematics. Bachelor of Science, Beijing University, 1986; Master of Science, New York University, 1991; Philosophiae Doctor, ibid., 1993 (1994)

Noriko Hanabusa. Professional Specialist, East Asian Languages and Cultures; Professor of the Practice. Bachelor of Arts, Keio University, 1988; Master of Arts, University of Wisconsin-Madison, 1994 (1994)

Sean Michael Handley. Assistant Professor, Management. Bachelor of Science, University of Cincinnati, 1999; Master of Business Admin, Ohio State University, 2002; Philosophiae Doctor, ibid., 2008 (2012)

Lin Hao. Assistant Professor, Management. Bachelor of Science, Tsinghua University, 2005; Master of Science, ibid., 2007; Master of Science, University of Washington, 2010; Philosophiae Doctor, ibid., 2012 (2012)

Chad Harms. Associate Professor, Management. Bachelor of Arts, Iowa State University, 1995; Master of Arts, Michigan State University, 2000; Philosophiae Doctor, ibid., 2004 (2010)

Susan Cannon Harris. Associate Professor, English; Concurrent Associate Professor, Gender Studies. Bachelor of Arts, Yale University, 1991; Master of Arts, UNC at Chapel Hill, 1993; Philosophiae Doctor, University of Texas-Austin, 1998 (1998)

Jonathan David Hauenstein. Assistant Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, The University of Findlay, 2003; M.S. Mathematics, Miami University, 2005; Philosophiae Doctor, University of Notre Dame, 2009 (2009)

Lacy Nicole Haussamen. Assistant Professional Specialist, Biological Sciences. Bachelor of Science, University of Notre Dame, 2003; Master of Public Health, Emory University, 2008 (2009)

Mandy Lynn Havert. Assistant Librarian, Hesburgh Libraries. Bachelor of Arts, Ball State University, 1996; Master of Library & Info Sci, Indiana-Purdue University Indpls, 2007 (2008)

Stephen M. Hayes. Librarian, Hesburgh Libraries. Bachelor of Science, Michigan State University, 1972; Master in Library Science, Western Michigan University, 1974; Master of Science in Admin., University of Notre Dame, 1979 (1974)

Barbara J. Hellenthal. Associate Professional Specialist, Biological Sciences; Curator of Museum of Biodiversity & Greene-Nieuwland Herbarium. Bachelor of Science, University of Minnesota, 1974 (1980)

Ben A. Heller. Associate Professor, Romance Languages and Literatures. Bachelor of Arts, University of Pennsylvania, 1981; Philosophiae Doctor, Washington University, 1990; Master of Arts, ibid., 1990 (2000)

Jessica J. Hellmann. Associate Professor, Biological Sciences; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Science, University of Michigan, 1996; Philosophiae Doctor, Stanford University, 2000 (2003)

Paul Helquist. Professor, Chemistry and Biochemistry; Associate Chair, Chemistry and Biochemistry. Bachelor of Arts, University of Minnesota at Dul, 1969; Master of Science, Cornell University, 1971; Philosophiae Doctor, ibid., 1972 (1984)

Kenneth W. Henderson. Professor, Chemistry and Biochemistry; Senior Assistant Provost, Internationalization; Department Chair, Chemistry and Biochemistry. Bachelor of Arts, University of Strathclyde, 1990; Philosophiae Doctor, ibid., 1993 (2002)

David Ray Hernandez. Assistant Professor, Classics; Concurrent Assistant Professor, Anthropology. Bachelor of Arts, University of California Berkeley, 1996; Master of Arts, University of Cincinnati, 2004; Philosophiae Doctor, ibid., 2010 (2009)

Jason C. Hicks. Assistant Professor, Chemical and Biomolecular Engineering. Bachelor of Science, Kentucky Wesleyan College, 2001; Bachelor of Engineering, Vanderbilt University, 2003; Philosophiae Doctor, Georgia Institute of Technolog, 2007 (2010)

Faculty

M. Catherine Hilkert, OP. Professor, Theology. Bachelor of Arts, University of Dayton, 1971; Master of Arts, Catholic University of America, 1979; Philosophiae Doctor, ibid., 1984 (1995)

Davide A. Hill. Associate Professor, Chemical and Biomolecular Engineering. M.S. Chemical Engineering, University of Naples, 1983; Philosophiae Doctor, University of California Berkeley, 1989 (1990)

Reginald Hill. The Archibald Assistant Professor of Cancer Biology; Assistant Professor, Biological Sciences. Bachelor of Science, Florida Agricultural-Mechanics, 1998; Philosophiae Doctor, UNC at Chapel Hill, 2005 (2012)

Amy E. Hixon. Assistant Professor, Civil Engineering and Geological Sciences. Bachelor of Science, Radford University, 2006; Master of Science, Clemson University, 2008; Philosophiae Doctor, ibid., 2013 (2013)

Daniel Bruce Hobbins. Associate Professor, History. Bachelor of Science, Pensacola Christian College, 1989; Master of Arts, Bowling Green State University, 1995; Master of Medieval Studies, University of Notre Dame, 1997; Philosophiae Doctor, ibid., 2002 (2012)

Bertrand M. Hochwald. Freimann Endowed Chair in Electrical Engineering; Professor, Electrical Engineering. Bachelor of Science, Swarthmore College, 1984; Master of Science, Duke University, 1986; Master of Arts, Yale University, 1993; Philosophiae Doctor, ibid., 1995 (2011)

David Hoelzle. Assistant Professor, Aerospace and Mechanical Engineering. Bachelor of Science, Ohio State University, 2005; Master of Science, University of IL Urbana-Champaign, 2007; Philosophiae Doctor, ibid., 2011 (2012)

Anthony James Hoffman. Assistant Professor, Electrical Engineering. Bachelor of Science, University of Maryland Baltimore Cou, 2004; M.S. Engineering, Princeton University, 2006; Philosophiae Doctor, ibid., 2009 (2012)

John Mark Hofmann. Assistant Professor, Air Science. Bachelor of Science, Wright State University, 2006; Master of Arts, University of Oklahoma, 2010 (2014)

Peter D. Holland. Professor, McNeil Chair. Shakespeare Studies: Professor, Film, Television, and Theatre; Associate Dean for the Arts, College of Arts and Letters. Bachelor of Arts, Trinity Hall Cambridge, 1972; Philosophiae Doctor, ibid., 1977; Philosophiae Doctor, ibid., 1977 (2002)

Gary Edward Hollibaugh. Assistant Professor, Political Science. Bachelor of Arts, University California San Diego, 2006; Master of Arts, University of Rochester, 2010; Philosophiae Doctor, ibid., 2012 (2014)

Hope Hollocher. Associate Professor, Biological Sciences; Editor-in-Chief of the American Midland Naturalist (AMN). Bachelor of Arts, University of Pennsylvania, 1982; Philosophiae Doctor, Washington University, 1991 (2000)

Vittorio G. Hosie. The Paul G. Kimball Chair in Arts and Letters; Professor, German and Russian Languages and Literature; Fellow, Joan B. Kroc Institute for International Peace. Philosophiae Doctor, Eberhard Karl University of Tubingen, 1982 (1999)

Don A. Howard. Professor, Philosophy. Bachelor of Science, Michigan State University, 1971; Master of Arts, Boston University, 1973; Philosophiae Doctor, ibid., 1979 (1997)

Scott Sheridan Howard. Assistant Professor, Electrical Engineering. Bachelor of Science, University of Notre Dame, 2003; Philosophiae Doctor, Princeton University, 2008 (2011)

Jay Christopher Howk. Associate Professor, Physics; Associate Chair, Physics. Bachelor of Science, Hanover College, 1994; Philosophiae Doctor, University of Wisconsin-Madison, 1999 (2005)

Xiaobo Hu. Professor, Computer Science and Engineering; Associate Dean of Professional Development, Graduate School. Bachelor of Science, Tianjin University, 1982; Master of Science, Polytechnic Institute of New Y, 1984; Philosophiae Doctor, Purdue University, 1989 (1996)

Bei Hu. Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, East China Normal University, 1982; Master of Science, ibid., 1984; Master of Science, University of Minnesota, 1989; Philosophiae Doctor, ibid., 1990 (1990)

Jia Hu. Assistant Professor, Management. Bachelor of Arts, Central University of Finance & Econ, 2005; Master of Arts, Renmin University Beijing, 2007; Philosophiae Doctor, University of Illinois-Chicago, 2012 (2012)

Yih-Fang Huang. Professor, Electrical Engineering; Senior Associate Dean for Education and Undergraduate Programs, College of Engineering. Bach of Sci in Electrical Engt, National Taiwan University, 1976; Master of Science, University of Notre Dame, 1979; Philosophiae Doctor, Princeton University, 1982 (1982)

Roger D. Huang. Dean, Mendoza College of Business; Kenneth R. Meyer Professor of Global Investment Management; Professor, Finance. Bachelor of Science, Purdue University, 1975; Master of Arts, University of Pennsylvania, 1978; Philosophiae Doctor, ibid., 1980 (2000)

Paul W. Huber. Professor, Chemistry and Biochemistry. Bachelor of Science, Boston College, 1973; Philosophiae Doctor, Purdue University, 1978 (1985)

Bruce Robert Huber. Associate Professor, Law School. Bachelor of Arts, Stanford University, 1996; Juris Doctor, University of California Berkeley, 2000; Master of Arts, ibid., 2006; Philosophiae Doctor, ibid., 2010 (2011)

Alan Huebner. Assistant Professional Specialist, Applied Computational Mathematics & Statistics. Bachelor of Arts, Concordia University, 2001; Master of Science, DePaul University, 2003; Philosophiae Doctor, University of IL Urbana-Champaign, 2008 (2011)

Victoria Tin-bor Hui. Associate Professor, Political Science; Fellow, Kellogg Institute for International Studies. Bachelor of Social Science, Chinese University of Hong Kon, 1990; Master of Arts, Columbia University, 1995; Master of Philosophy, ibid., 1997; Philosophiae Doctor, ibid., 2000 (2004)

Romana Christina Huk. Associate Professor, English; Editor, Religion and Literature Journal. Bachelor of Arts, Coll of William & Mary, 1981; Master of Arts, University of Notre Dame, 1984; Philosophiae Doctor, ibid., 1987 (2002)
Amanda Beth Hummon. *Huiiking Foundation, Inc.* Assistant Professor of Chemistry and Biochemistry. Associate Professor, Chemistry and Biochemistry. Bachelor of Arts (Latin), Cornell University, 1999; Philosophiae Doctor, University of IL Urbana-Champaign, 2004 (2009)

Daniel Michael Hungerman. Associate Professor, Department of Economics. Bachelor of Arts, Miami University, 2000; Philosophiae Doctor, Duke University, 2005 (2005)

Charlice Glen Hurst. Assistant Professor, Management. Bachelor of Arts, Harvard College, 1994; M International Bus Admin, University of South Carolina, 2004; Philosophiae Doctor, University of Florida, 2010 (2014)

Huy Huynh. Assistant Professional Specialist, Applied Computational Mathematics & Statistics; Assistant Professor of the Practice. Associate in Science, Georgia Perimeter College, 2004; Bachelor of Science, Kennesaw State University, 2006; Master of Science, Georgia Institute of Technol, 2009; Philosophiae Doctor, *ibid.,* 2012 (2012)

David R. Hyde. The Rev. Howard J. Kenna, C.S.C., Memorial Director of the Zebrafish Research Center; Professor, Biological Sciences. Bachelor of Science, Michigan State University, 1980; Philosophiae Doctor, Pennsylvania State University, 1985 (1988)

Vlad Mihai Iloc. Assistant Professor, Chemistry and Biochemistry. Bachelor of Science, Univ. of Politehnica-Bucharest, 2000; Master of Science, University of Illinois-Chicago, 2003; Philosophiae Doctor, *ibid.,* 2009 (2011)

Z‘etoile Imma. Assistant Professor, English. Bachelor of Arts, CUNY College of Staten Island, 2004; Philosophiae Doctor, University of Virginia, 2012 (2012)

Jesus Antonio Izaguirre. Associate Professor, Computer Science and Engineering. Bachelor of Science, University of Monterrey, 1991; Master of Science, University of IL Urbana-Champaign, 1996; Philosophiae Doctor, *ibid.,* 1999 (1999)

Monica Nicole Jancha. Assistant Professional Specialist, Romance Languages and Literatures. Bachelor of Arts, University of Notre Dame, 2006; Master of Arts, *ibid.,* 2007 (2010)

Ireneusz Janik. Research Assistant Professor, Radiation Laboratory. Master of Science, University of Lodz, 1995; Philosophiae Doctor, Technical University of Lodz, 2001; Philosophiae Doctor, University of Lodz, 2001 (2004)

Tala Jarjour. Assistant Professor, Music; Concurrent, Anthropology; Fellow, Kellogg Institute for International Studies; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Music, Higher Institute of Music, 1997; Master of Music, Ohio University, 2002; Master of Philosophy, University of Cambridge, 2005; Philosophiae Doctor, *ibid.,* 2010 (2012)

Carlos Alberto Jauregui. Associate Professor, Romance Languages and Literatures; Concurrent Associate Professor, Anthropology; Fellow, Kellogg Institute for International Studies. Bachelor of Laws, National University of Colombi, 1993; Master of Arts, West Virginia University, 1997; Philosophiae Doctor, University of Pittsburgh, 2001; Certificate Program, *ibid.,* (2011)

Debra Javeline. Associate Professor, Political Science; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts (Latin), Brown University, 1989; Philosophiae Doctor, Harvard University, 1997 (2004)

Pascal Jean-Pierre. Assistant Professor, Psychology. Bachelor of Arts, Brooklyn College, 1999; Master of Arts, University of Rhode Island, 2003; Philosophiae Doctor, *ibid.,* 2005; Master of Public Health, University of Rochester, 2009 (2012)

Alexander Jech. Assistant Professional Specialist, Philosophy; Assistant Professor of the Practice. Bachelor of Arts, University of Washington, 2002; Master of Arts, University of Notre Dame, 2007; Philosophiae Doctor, *ibid.,* 2009 (2014)

Peter Grant Jeffery. Michael P. Grace Chair in Medieval Studies; Professor, Music; Concurrent Professor, Anthropology; Concurrent Professor, Theology. Bachelor of Arts, Brooklyn College, 1975; Philosophiae Doctor, Princeton University, 1980 (2009)

Richard A. Jensen. Gilbert Schafer Chair in Economics; Professor, Department of Economics. Bachelor of Arts, University of Kansas, 1971; Philosophiae Doctor, Northwestern University, 1980 (2000)
Lionel M. Jensen. Associate Professor, East Asian Languages and Cultures; Concurrent Associate Professor, History; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, Williams College, 1976; Master of Arts, Washington University, 1980; Philosophiae Doctor, University of California Berkeley, 1992 (2000)

Robin Jensen. Patrick O'Brien Professor of Theology; Professor, Theology. Bachelor of Arts, Concordia College at Moorhead, 1973; Master of Arts, Columbia University, 1977; Philosophiae Doctor, ibid., 1986 (2015)

Michael James Jenuwine. Professional Specialist, Clinical Law Center; Clinical Professor, Clinical Law Center. Bachelor of Science, University of Michigan, 1988; Master of Arts, University of Chicago, 1990; Juris Doctor, Loyola University Chicago, 2000 (2005)

Kaifeng Jiang. Instructor, Management. Bachelor of Arts, Renmin University Beijing, 2005; Master of Arts, ibid., 2007; Philosophiae Doctor, Rutgers State University of NJ, 2013 (2013)

Ick Hoon Jin. Assistant Professor. Bachelor of Science, Yonsei University, 2007; Master of Science, ibid., 2008; Philosophiae Doctor, ibid., 2015 (2015)

Maxwell Edwin Johnson. Professor, Theology. Bachelor of Arts, Augustana College, 1974; Master of Divinity, Wartburg Theological Seminary, 1978; Master of Arts, Saint John’s University, 1982; Master of Arts, University of Notre Dame, 1989; Philosophiae Doctor, ibid., 1992 (1997)

Terence Robert Johnson. Fellow, Kellogg Institute for International Studies; Assistant Professor, Department of Economics. Bachelor of Arts, Syracuse University, 2006; Philosophiae Doctor, University of Maryland, 2011 (2011)

James Franklin Johnson. Associate Professorial Specialist, Chemistry and Biochemistry; Teaching Professor. Bachelor of Science, University of Saint Francis, 1970; Master of Science, University of Notre Dame, 1975 (1975)

Cyraina Evelene Johnson-Roullier. Associate Professor, English; Concurrent Associate Professor, American Studies; Concurrent Associate Professor, Gender Studies. Bachelor of Science, Ohio University, 1982; Master of Arts, Ohio State University, 1985; Master of Arts, State University of NY at Albany, 1990; Philosophiae Doctor, State University of NY-Buffalo, 1992 (1991)

Jennifer Ann Meri Jones. Assistant Professor, Sociology. Bachelor of Arts, Pomona College, 2003; Master of Arts, University of California Berkeley, 2006; Philosophiae Doctor, ibid., 2011 (2013)

Stuart Jones. Assistant Professor, Biological Sciences. Bachelor of Science, University of Wisconsin Center, 2003; Philosophiae Doctor, ibid., 2008 (2010)

Mackenzie Regan Jones. Assistant Professor, Naval Science. Bachelor of Arts, SUNY at Albany, 2002; Master of Business Admin, Florida State University, 2010 (2014)

Claire Taylor Jones. Assistant Professor, German and Russian Languages and Literature. Bachelor of Arts, Mount Holyoke College, 2005; Master of Arts, Dartmouth College, 2006; Master of Arts, University of Pennsylvania, 2008; Philosophiae Doctor, ibid., 2012 (2012)

Louis Edward Jordan. Librarian, Hesburgh Libraries; Associate University Librarian, Academic Services and Collections. Bachelor of Arts, University of Massachusetts Bo, 1972; Master of Arts, University of Chicago, 1974; Doctor of Medieval Studies, University of Notre Dame, 1980; Master in Library Science, Indiana Univ-Bloomington, 1981 (1980)

Andrei Jorza. Assistant Professor, Mathematics. Bachelor of Arts, Harvard University, 2005; Philosophiae Doctor, Princeton University, 2010 (2013)

Diana Jorza. Assistant Professor, Romance Languages and Literatures; Fellow, Nanovic Institute for European Studies. Bachelor of Arts, Babes Bolyai University, 2000; Master of Arts, ibid., 2002; Master of Arts, Johns Hopkins University, 2006; Philosophiae Doctor, Princeton University, 2013 (2012)

Madhav Raj Joshi. Research Assistant Professor, Joan B. Kroc Institute for International Peace. Master of Arts, Tribhuvan University, 2001; Philosophiae Doctor, University of North Texas, 2010 (2010)

Michelle Viglietta Joyce. Associate Professional Specialist, Chemistry and Biochemistry; Fellow, Institute for Educational Initiatives. Bachelor of Science, University of Notre Dame, 1999; Diploma in Philosophy, Duke University, 2003 (2004)

Anthony Juan. Professor, Film, Television, and Theatre; Fellow, Kellogg Institute for International Studies. Philosophiae Doctor, University of Athens, 1990 (2005)

Timothy Judge. Franklin D. Schurz Prof. Schurz Professor of Management; Concurrent Professor, Psychology; Professor, Management; Provost Fellow. Bachelor of Business Admin., University of Iowa, 1985; Master of Business Admin, University of IL Urbana-Champaign, 1988; Philosophiae Doctor, ibid., 1990 (2010)

Faculty

Thomas Juliano.  Assistant Professor, Aerospace and Mechanical Engineering.  Bach of Sci in Aerospace Engr, California Institute of Techno, 2004; Master of Science, Purdue University, 2006; Philosophiae Doctor, ibid., 2010 (2014)

Eric John Jumper.  Roth-Gibbon Professor of Aerospace and Mechanical Engineering; Professor, Aerospace and Mechanical Engineering.  Bachelor of Science, University of New Mexico Main, 1968; Master of Science, University Wyoming, 1969; Philosophiae Doctor, Air Force Institute Technology, 1975 (1989)

Joseph Paul Kaboski.  The David F and Erin M. Seng Foundation Professor of Economics; Professor, Department of Economics; Fellow, Kellogg Institute for International Studies.  Bach of Sci in Chemical Engr, Cornell University, 1994; Master of Arts, University of Chicago, 1998; Philosophiae Doctor, ibid., 2001 (2010)

Juhi Kaboski.  Research Assistant Professor, Psychology.  Bachelor of Arts, University of IL Urbana-Champaign, 1995; Master of Social Work, ibid., 1999; Philosophiae Doctor, University of Chicago, 2012 (2013)

Kristine Joy Kalanges.  Associate Professor, Law School; Fellow, Kellogg Institute for International Studies; Concurrent Associate Professor, Political Science; Fellow, Joan B. Kroc Institute for International Peace.  Bachelor of Arts, University of Puget Sound, 2000; Master Degree - Unspeified, Georgetown University, 2005; Juris Doctor, Yale Law School, 2008; Philosophiae Doctor, Georgetown University, 2008 (2012)

Prashant V. Kamat.  Reverend John A. Zahm Professor of Science; Professor, Chemistry and Biochemistry.  Bachelor of Science, Karnataka University, 1972; Master of Science, University of Bombay, 1974; Philosophiae Doctor, ibid., 1979 (1983)

S. Alex Kandel.  Associate Professor, Chemistry and Biochemistry.  Bachelor of Science, Yale University, 1993; Philosophiae Doctor, Harvard University, 1999 (2001)

Hana Kang.  Associate Professional Specialist, East Asian Languages and Cultures.  Bachelor of Arts, Rutgers State University of NJ, 2001; Master of Arts, Ohio State University, 2004; Philosophiae Doctor, ibid., 2011 (2014)

Jeffrey C. Kantor.  Professor, Chemical and Biomolecular Engineering.  Bachelor of Science, University of Minnesota of Minneapolis, 1976; Master of Arts, Princeton University, 1977; Philosophiae Doctor, ibid., 1981 (1981)

Joshua B. Kaplan.  Associate Professional Specialist, Political Science; Director of Undergraduate Studies.  Bachelor of Arts (Latin), University California Santa Cruz, 1974; Master of Arts, University of Chicago, 1977 (1987)

Joseph Karbowski.  David F and Erin M. Professor of Economics; Assistant Professor, Philosophy.  Bachelor of Arts, University of Pittsburgh, 2003; Philosophiae Doctor, University of California Berkeley, 2009 (2009)

Ahsan Kareem.  The Robert M. Moran Chair in Engineering; Professor, Civil Engineering and Geological Sciences.  Bachelor of Science, W Pakistan U of Engr and Tech, 1968; Master of Science, University Hawaii Honolulu, 1975; Philosophiae Doctor, Colorado State University, 1978 (1990)

Daniel J. Karmgard.  Research Assistant Professor, Physics.  Bachelor of Science, UCLA, 1993; Master of Science, California State U-Long Beach, 1995; Philosophiae Doctor, Florida State University, 1999 (1999)

Emmanuel Katongole.  Associate Professor, Theology; Fellow, Kellogg Institute for International Studies.  Bachelor of Philosophy, Pontifica Universita Gregorian, 1983; Bachelor of Divinity, Pontificia Universitias Urbania, 1987; Master of Philosophy, Catholic University of Louvain, 1993; Master of Religious Education, ibid., 1995; Philosophiae Doctor, ibid., 1996 (2013)

Mary Celeste Kearney.  Associate Professor, Film, Television, and Theatre; Concurrent Associate Professor, Gender Studies; Director, Gender Studies Program.  Bachelor of Arts, University of San Diego, 1984; Master of Arts, Georgetown University, 1992; Philosophiae Doctor, University of Southern California, 1998 (2013)

Barry Patrick Keating.  Professor, Finance.  Bachelor of Business Admin., University of Notre Dame, 1967; Master of Arts, Lehigh University, 1968; Philosophiae Doctor, University of Notre Dame, 1974 (1978)

Kenneth Kelley.  Professor, Management; Concurrent Associate Professor, Psychology.  Bachelor of Arts, University of Cincinnati, 2000; Master of Arts, University of Notre Dame, 2003; Philosophiae Doctor, ibid., 2005 (2008)

James Joseph Kelly.  Professional Specialist, Clinical Law Center; Clinical Professor in the Law School.  Bachelor of Philosophy, University of Virginia, 1987; Juris Doctor, Columbia University, 1994 (2011)

Anita Elena Kelly.  Professor, Psychology.  Bachelor of Arts, Northwestern University, 1986; Master of Science, University of Florida, 1988; Philosophiae Doctor, ibid., 1991 (1994)

Peter Wiest Kelly.  Assistant Professor, Finance.  Bachelor of Science, University of Notre Dame, 2009; Master of Accountancy, Yale University, 2012; Master of Philosophy, ibid., 2012; Philosophiae Doctor, ibid., 2015 (2015)

Daniel Bruce Kelly.  Professor, Law School.  Bachelor of Arts, University of Notre Dame, 2002; Juris Doctor, Harvard University, 2005 (2009)

Sean Kelsey.  Associate Professor, Philosophy.  Bachelor of Arts, Thomas Aquinas College, 1992; Philosophiae Doctor, Princeton University, 1997 (2009)

John J. Kennedy.  Professor, Marketing.  Bachelor of Science, Newark College Engineering, 1955; Master of Business Admin, Ohio State University, 1957; Philosophiae Doctor, ibid., 1962 (1963)

Faculty

Andrew Brian Kennedy. Associate Professor, Civil Engineering and Geological Sciences. Bachelor of Science, Queen's University, 1991; Master of Science, Univ. of British Columbia, 1993; Philosophiae Doctor, Monash University, 1998 (2008)

Elizabeth Ann Kerr. Assistant Professional Specialist, Civil Engineering and Geological Sciences. Bachelor of Science, University of Evansville, 2003; Master of Science, University of Notre Dame, 2007; Philosophiae Doctor, ibid., 2008 (2009)

Mary Martha Keys. Associate Professor, Political Science. Bachelor of Arts, Boston College, 1988; Master of Arts, University of Toronto, 1989; Philosophiae Doctor, ibid., 1998 (1994)

Kapil Khandelwal. Associate Professor, Civil Engineering and Geological Sciences. Master of Arts, Indian Inst of Tech-Delhi, 2000; Philosophiae Doctor, University of Michigan, 2008 (2008)

Declan Kiberd. Donald and Marilyn Keough Professor of Irish Studies; Professor, English; Concurrent Professor, Irish Language and Literature. Philosophiae Doctor, University of Oxford, 1977 (2011)

Tracy Lynn Kijewski-Correia. Leo E. and Patti Ruth Linbeck Professor of Engineering; Associate Professor, Civil Engineering and Geological Sciences; Fellow, Kellogg Institute for International Studies. Bach of Sci in Civil Engr, University of Notre Dame, 1997; M.S. Civil Engr, ibid., 2000; Philosophiae Doctor, ibid., 2003 (2003)

Peter K. Kilpatrick. Professor, Chemical and Biomolecular Engineering; Dean, College of Engineering. Bachelor of Arts, Occidental College, 1978; Philosophiae Doctor, University of Minnesota, 1983 (2008)

Oleg V. Kim. Research Assistant Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, Moscow Inst. Physics & Thec., 2002; Master of Science, ibid., 2004; Master of Science, University of Notre Dame, 2008; Philosophiae Doctor, ibid., 2010 (2010)

Michael Patrick Kitz. Assistant Professional Specialist, College of Engineering. Bachelor of Arts, University of Notre Dame, 1985; Bachelor of Science, ibid., 1985; Master of Business Admin, University of Michigan, 1989 (2012)

Tanya Kizilete Bilgicer. Research Assistant Professor, Chemical and Biomolecular Engineering. Bachelor of Science, Bilkent University, 1998; Philosophiae Doctor, Massachusetts Institute of Tec, 2005 (2008)

Matthew Joseph Kloser. Assistant Professional Specialist, Institute for Educational Initiatives; Concurrent Assistant Professional Specialist, College of Science. Bachelor of Arts, University of Notre Dame, 2002; Master of Education, ibid., 2004; Master of Science, Stanford University, 2010; Philosophiae Doctor, ibid., 2011 (2012)

Julia F. Knight. The Charles L. Huisking Professor of Mathematics; Professor, Mathematics. Bachelor of Arts, Utah State University, 1964; Philosophiae Doctor, University of California Berkeley, 1972 (1977)

Laura L. Knoppers. Professor, English. Bachelor of Arts, Calvin College, 1979; Master of Arts, Harvard University, 1981; Philosophiae Doctor, ibid., 1986 (2014)

Karrie J Koesel. Associate Professor, Political Science. Bachelor of Arts, Drake University, 1997; Master of Arts, University of Notre Dame, 2001; Master of Arts, Cornell University, 2005; Philosophiae Doctor, ibid., 2009 (2015)

Peter Michael Kogge. The Ted H. McCourtney Chair in Computer Science and Engineering; Professor, Computer Science and Engineering. Bachelor of Science, University of Notre Dame, 1968; Master of Science, Syracuse University, 1970; Philosophiae Doctor, Stanford University, 1973 (1994)

Christopher F. Kolda. Professor, Physics; Department Chair, Physics; The Glynn Family Honors Collegiate Professor of Physics. Bachelor of Arts, Johns Hopkins University, 1990; Master of Arts, University of Michigan, 1992; Philosophiae Doctor, ibid., 1995 (2000)

Elisabeth Koll. Associate Professor, History. Bachelor of Arts, Fudan University, 1988; Master of Arts, University of Bonn, 1992; Philosophiae Doctor, University of Oxford, 1998 (2015)

Paul Vincent Kollman, CSC. Associate Professor, Theology. Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, University of Notre Dame, 1984; Master of Divinity, ibid., 1990; Philosophiae Doctor, University of Chicago, 2001 (2001)

Mary Ellen Konieczny. Assistant Professor, Sociology. Concurrent Assistant Professor, American Studies. Bachelor of Science, University of Notre Dame, 1981; Master of Divinity, Weston School of Theology, 1985; Philosophiae Doctor, University of Chicago, 2005 (2008)
**Faculty**

Janet A. Kourany. Associate Professor, Philosophy; Concurrent Associate Professor, Gender Studies. Bachelor of Science, Columbia University, 1965; Philosophiae Doctor, ibid., 1977 (1998)

Monica Jane Kowalski. Assistant Professional Specialist, Alliance for Catholic Education. Bachelor of Arts, University of Notre Dame, 2003; Master of Education, ibid., 2005; Philosophiae Doctor, Ohio State University, 2013 (2012)

Brian Alexander Krostenko. Associate Professor, Classics; Director of the Gaska Program. Bachelor of Arts, Princeton University, 1986; Master of Arts, Harvard University, 1989; Philosophiae Doctor, ibid., 1993 (2001)

Thomas A. Kselman. Professor, History. Bachelor of Arts, St. Joseph’s University, 1970; Master of Arts, University of Michigan, 1972; Philosophiae Doctor, ibid., 1978 (1979)

Gregory Peter Kucich. Professor, English. Bachelor of Arts, San Francisco State University, 1978; Master of Arts, University of Michigan, 1979; Philosophiae Doctor, ibid., 1983 (1983)

Ian Kuijt. Professor, Anthropology. Bachelor of Arts, University of Lethbridge, 1984; Master of Arts, Simon Fraser University, 1988; Master of Arts, Harvard University, 1991; Philosophiae Doctor, ibid., 1995 (2000)

Yahya C. Kurama. Professor, Civil Engineering and Geological Sciences. Bachelor of Science, Bogazici University, 1990; Master of Science, Lehigh University, 1993; Philosophiae Doctor, ibid., 1997 (1998)

Robert Lee Kusmer. Associate Librarian, Hesburgh Libraries; Fellow, Nanovic Institute for European Studies. Bachelor of Arts, Cleveland State University, 1972; Master of Arts, Northwestern University, 1977; Philosophiae Doctor, ibid., 1983; Master in Library Science, Kent State University, 1988 (1997)

Dae Kun Kwon. Research Assistant Professor, Civil Engineering and Geological Sciences. Bach of Sci in Civil Engr, Yonsei University, 1993; M.S. Civil Engr, Korea Advanced Institute of Sc, 1995; Philosophiae Doctor, ibid., 2001 (2006)

Jason Richard Lahr. Assistant Professor, Art, Art History, and Design. Bachelor of Fine Arts, Clarion University of PA, 1997; Master of Fine Arts, Pennsylvania St University, 1999 (2010)

Stephen J Lancaster. Associate Professional Specialist, Music; Associate Professor of the Practice. Bachelor of Music, Moody Bible Institute, 2003; Master of Music, University of Notre Dame, 2005; Doctor of Music, University of Michigan, 2008 (2007)

Frederick William Landau. Associate Professor, Naval Science. B.A. History, Pennsylvania St University, 1991; Master of Business Admin, University of Massachusetts, 2009 (2013)

Jesse M. Lander. Associate Professor, English; Department Chair, English. Bachelor of Arts, Columbia College, 1988; Bachelor of Arts, University College Oxford, 1991; Philosophiae Doctor, Columbia University, 1998 (1999)

Amy Gill Langenkamp. Assistant Professor, Sociology. Bachelor of Arts, Villanova University, 1997; Master of Arts, University of Texas-Austin, 2001; Philosophiae Doctor, ibid., 2007 (2011)

Andrea Marie Langhurst. Associate Librarian, Hesburgh Libraries. Bachelor of Arts, University of Kansas, 2001; Master of Arts, University of Iowa, 2004 (2008)

Kevin Lannon. Associate Professor, Physics. Bachelor of Arts, St. Norbert College, 1997; Philosophiae Doctor, University of Illinois Urbana-Champaign, 2003 (2008)

Jill Amanda Lany. Assistant Professor, Psychology. Bachelor of Arts, New College University S Flori, 1998; Philosophiae Doctor, University of Arizona, 2007 (2010)

Daniel K. Lapsley. The Alliance for Catholic Education Collegiate Professor of Psychology (ACE); Professor, Psychology; Department Chair, Psychology. Bachelor of Arts, Indiana University of Pennsylvania, 1977; Master of Science, University of New Orleans, 1979; Philosophiae Doctor, University of Wisconsin-Madison, 2006 (2006)

Stephanie Laroque. Assistant Professor, Accountancy. Bachelor of Arts, University of Western Ontario, 1992; Philosophiae Doctor, University of Toronto, 2009 (2009)

Donald G LaSalle. Assistant Professional Specialist, First Year of Studies. Bachelor of Arts, Fontaul, 1976; Master of Theology, Catholic University of America, 1980; Philosophiae Doctor, ibid., 1997 (2013)

Jay A. LaVerne. Professional Specialist, Radiation Laboratory; Concurrent Professional Specialist, Physics. Bachelor of Science, Lamar University, 1972; Philosophiae Doctor, University of Nebraska-Lincoln, 1981 (1978)

Angela Nardoni Laws. Assistant Professional Specialist, Biological Sciences. Bachelor of Science, Utah State University, 1999; Master of Science, ibid., 2004; Philosophiae Doctor, University of Notre Dame, 2007 (2013)

Geoffrey Layman. *Professor, Political Science.* Bachelor of Arts, Virginia Polytechnic Institute and State University, 1994; Master of Arts, Indiana University-Bloomington, 1992; Philosophiae Doctor, *ibid.*, 1995 (2009)

Byung-Joo Lee. *Associate Professor, Department of Economics.* Bachelor of Science, Seoul National University, 1982; Master of Arts, Pennsylvania State University, 1984; Master of Science, University of Wisconsin-Madison, 1986; Philosophiae Doctor, *ibid.*, 1988 (1996)

Shaun Wook Lee. *Associate Professor, Biological Sciences.* Bachelor of Arts, University of California Berkeley, 1994; Bachelor of Architecture, *ibid.*, 1994; Philosophiae Doctor, Oregon Health Sciences University, 2003 (2009)

W. Matthew Leevy. *Research Associate Professor, Biological Sciences.* Bachelor of Science, University of Illinois-Urbana-Champaign, 2000; Philosophiae Doctor, Washington University, 2005 (2008)

Nicolas Lehner. *Research Associate Professor, Physics.* Bachelor of Science, Louis Pasteur University Strasbourg, 1994; Master of Science, *ibid.*, 1995; Philosophiae Doctor, Queens University of Belfast, 2000 (2005)

Craig Stanley Lent. *The Frank M. Freimann Chair in Engineering (IV).* Professor, Electrical Engineering. Bachelor of Science, University of California Berkeley, 1978; Philosophiae Doctor, University of Minnesota of Minneapolis, 1984 (1985)

Giovanna Lenzi-Sandusky. *Associate Professor, Romance Languages and Literatures.* Laurea, University of Florence, 1979 (1990)

Anne C. Leone. *Research Assistant Professor, Romance Languages and Literatures.* Bachelor of Arts, Yale University, 2003; Master of Arts, Philosophy, University of Cambridge, 2005; Philosophiae Doctor, *ibid.*, 2010 (2011)

Robert Lewandowski. *Assistant Professor, Management.* Bachelor of Arts, Purdue University, 1996; Master of Science, *ibid.*, 2002 (2004)

Kristin Marie Lewis. *Associate Professor, Biological Sciences.* Bachelor of Science, University of Notre Dame, 1991; Master of Science, *ibid.*, 1997 (1997)

Blake Leyerle. *Associate Professor, Theology.* Bachelor of Arts, Yale University, 1982; Master of Arts, Duke University, 1988; Philosophiae Doctor, *ibid.*, 1991 (1990)

Lei Li. *Associate Professor, Biological Sciences.* Bachelor of Science, Shandong University, 1985; Philosophiae Doctor, Georgia State University, 1995 (2003)

Mei Li. *Assistant Professor, Management.* Bachelor of Science, Arizona State University, 2011; Master of Science, *ibid.*, ; Bachelor of Arts, Foreign Affairs University, ; Master of Science, Arizona State University, ; Master of Science, *ibid.*, ; Master of Science, *ibid.*, (2013)

Jun Li. *Assistant Professor, Applied Computational Mathematics & Statistics.* Bachelor of Engineering, Tsinghua University, 2004; Master of Science, *ibid.*, 2007; Philosophiae Doctor, Stanford University, 2012 (2012)

John Stephen Liberatore. *Assistant Professor, Music.* Bachelor of Arts, Syracuse University, 2007; Master of Arts, Eastman School of Music, 2009; Philosophiae Doctor, *ibid.*, 2014 (2015)

Kathryn Ann Lichon. *Assistant Professional Specialist, Institute for Educational Initiatives.* Bachelor of Business Administration, University of Notre Dame, 2005; Master of Education, University of Notre Dame, 2007 (2012)

Marya Lieberman. *Associate Professor, Chemistry and Biochemistry.* Bachelor of Science, Massachusetts Institute of Technology, 1989; Philosophiae Doctor, University of Washington, 1994 (1996)

Jose E Limon. *Our Dame Professor of American Literature, Professor Emeritus.* Bachelor of Arts, American Studies; Concurrent Professor, Anthropology; Fellow, Institute for Latino Studies. Associate in Arts, Del Mar College, 1964; Bachelor of Arts, University of Texas-Austin, 1966; Master of Arts, *ibid.*, 1969; Philosophiae Doctor, *ibid.*, 1978 (2011)

Hai Lin. *Associate Professor, Electrical Engineering.* Bachelor of Science, University of Science & Technology, 1997; Master of Science, Chinese Academy of Sciences, 2000; Master of Science, University of Notre Dame, 2002; Philosophiae Doctor, *ibid.*, 2005 (2012)

Daniel A. Lindley. *Associate Professor, Political Science.* Bachelor of Arts, Tufts University, 1983; Philosophiae Doctor, Massachusetts Institute of Technology, 1999 (1999)
Faculty

Alan Euan Lindsay. Assistant Professor, Applied Computational Mathematics & Statistics. B.S. Mathematics, University of Edinburgh, 2005; Philosophiae Doctor, Univ. of British Columbia, 2010 (2013)

Laurie Elizabeth Littlepage. Campbell Family Assistant Professor of Cancer Research; Assistant Professor, Chemistry and Biochemistry. Bachelor of Science, University of Texas-Austin, 1995; Philosophiae Doctor, Harvard University, 2003 (2012)

Chao-Shin Liu. Associate Professor, Accountancy. Bachelor of Business Admin., National Taiwan University, 1979; Master of Business Admin, National Chengchi University, 1983; Philosophiae Doctor, University of IL-Urbana-Champaign, 1992 (1992)

Lei Liu. Assistant Professor, Electrical Engineering. Bachelor of Science, Nanjing University, 1998; M.S. Electrical Engr, ibid., 2001; Philosophiae Doctor, University of Virginia, 2007 (2009)

Xinyu Liu. Research Associate Professor, Physics. Bachelor of Science, Univ. of Sci. & Tech. of China, 1993; Master of Science, ibid., 1996; Philosophiae Doctor, University of Notre Dame, 2003 (2002)

Fang Liu. Huisking Foundation, Inc. Assistant Professor of Applied and Computational Mathematics and Statistics; Assistant Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, Peking University, 1997; Master of Science, Iowa State University, 1999; Philosophiae Doctor, University of Michigan, 2003 (2011)

Cheng Liu. Research Assistant Professor, Psychology. Bachelor of Science, Univ. of Sci. & Tech. of China, 2004; Philosophiae Doctor, University of Illinois at Urbana-Champaign, 2011 (2015)

Omar A Lizardo. Associate Professor, Sociology. Bachelor of Science, Brooklyn College, 1997; Master of Arts, University of Arizona, 2002; Philosophiae Doctor, ibid., 2006 (2006)

Neil Francis Lobo. Research Associate Professor, Biological Sciences. B.S. Microbiology, St. Joseph’s College, 1995; Philosophiae Doctor, University of Notre Dame, 2001 (2000)

Timothy James Loughran. C.R. Smith Professor of Finance. Bachelor of Arts, University of IL-Urbana-Champaign, 1984; Bachelor of Science, ibid., 1985; Master of Business Admin, Indiana Univ-Bloomington, 1989; Philosophiae Doctor, University of IL-Urbana-Champaign, 1993 (1999)

Jiacai Lu. Research Assistant Professor, Aerospace and Mechanical Engineering. Bachelor of Science, Xian Jiaotong University, 1994; Philosophiae Doctor, ibid., 1999 (2014)

Gitta Lubke. Associate Professor, Psychology. Bachelor of Science, Johann W Goethe’s U of Frankfurt, 1979; Master of Arts, University of Amsterdam, 1997; Philosophiae Doctor, Free University Amsterdam, 2002 (2004)

John Ryan Lubker. Associate Professional Specialist, Graduate School; Concurrent Associate Professional Specialist, Psychology. Bachelor of Arts, University of Notre Dame, 2000; Master of Arts, James Madison University, 2003; Doctorate of Education, West Virginia University, 2006 (2011)

Cecilia Lucero. Assistant Professional Specialist, First Year of Studies. Bachelor of Arts, University of Notre Dame, 1984; Master of Arts, University of Colorado, 1990; Philosophiae Doctor, University of Michigan, 2002 (1998)

Steven Lugauer. Assistant Professor, Department of Economics; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, University of Chicago, 1998; Master of Business Admin, University of Miami, 2003; Master of Science, Carnegie Mellon University, 2005; Philosophiae Doctor, ibid., 2008 (2008)

Joshua Kristofer Lund. Associate Professor, Romance Languages and Literatures. Bachelor of Arts, Gustavus Adolphus College, 1991; Master of Arts, University of Minnesota, 1998; Philosophiae Doctor, ibid., 2002 (2015)

Tengfei Luo. Assistant Professor, Aerospace and Mechanical Engineering. Bachelor of Science, Xian Jiaotong University, 2005; Philosophiae Doctor, Michigan State University, 2009 (2012)

Semion Lyandres. Professor, History. Bachelor of Arts, St Petersburg University, 1980; Master of Arts, Boston University, 1987; Master of Arts, Stanford University, 1988; Philosophiae Doctor, ibid., 1992 (2001)

Natalia Lyandres. Librarian, Hesburgh Libraries. Bachelor of Arts, Moscow State University, 1990; M.S. Librarianship, San Jose State University, 1993 (2001)

Michael N. Lykoudis. Francis and Kathleen Rooney Dean of Architecture; Professor, School of Architecture; Dean, School of Architecture; Fellow, Nanovic Institute for European Studies. Bachelor of Architecture, Cornell University, 1979; Master of Architecture, University of IL-Urbana-Champaign, 1983 (1991)

Congcong Ma. Assistant Professional Specialist, East Asian Languages and Cultures. Bachelor of Arts, Minzu University, 2009 (2012)

Louis MacKenzie. Associate Professor, Romance Languages and Literatures. Bachelor of Arts, University of Notre Dame, 1969; Master of Arts, Middlebury College, 1972; Philosophiae Doctor, Cornell University, 1977 (1983)

Nicole R MacLaughlin. Associate Professional Specialist, University Writing Program; Assistant Teaching Professor; Associate Teaching Professor. Bachelor of Arts, University of IL-Urbana-Champaign, 1992; Master of Arts, ibid., 1995; Master of Arts, ibid., 1995 (2007)

Tara Aine MacLeod. Associate Professional Specialist, Irish Language and Literature; Associate Teaching Professor. Bachelor of Science, University College Dublin, 1991; Master of Science, University College Cork, 1997 (2008)
Gregory R. Madey. Research Professor, Computer Science and Engineering. Bachelor of Science, Cleveland State University, 1974; Master of Science, ibid., 1975; Master of Science, Case Western Reserve Univ., 1979; Philosophiae Doctor, ibid., 1984 (2008)

Edward Joseph Maginn. Professor, Chemical and Biomolecular Engineering; The Dorini Family Chair of Energy Studies; Department Chair, Chemical and Biomolecular Engineering. Bach of Sci in Chemical Eng, Iowa State University, 1987; Philosophiae Doctor, University of California Berkeley, 1995 (1999)

Scott P. Mainwaring. The Eugene P. and Helen Conley Professor of Political Science; Professor, Political Science. Bachelor of Arts, Yale University, 1976; Master of Arts, ibid., 1976; Philosophiae Doctor, Stanford University, 1983 (1983)

Edward A. Malloy, CSC. Professor, Theology; President Emeritus. Bachelor of Arts, University of Notre Dame, 1963; Master of Arts, ibid., 1967; Master of Theology, ibid., 1969; Philosophiae Doctor, Vanderbilt University, 1975 (1974)

Theodore Eugene Mandell. Associate Professional Specialist, Film, Television, and Theatre. Bachelor of Arts, University of Notre Dame, 1986; Master of Arts, University of Iowa, 1989 (1988)

Elena Maria Mangione-Lora. Associate Professional Specialist, Romance Languages and Literatures. Bachelor of Arts, Saint Mary’s College, 1990; Master of Arts, University of Notre Dame, 1998 (1998)

Nicolette Manglos-Weber. Research Assistant Professor, Center for Study of Religion & Society. Bachelor of Arts, Wheaton College, 2004; Master of Arts, University of Texas-Austin, 2008; Philosophiae Doctor, ibid., 2012 (2013)

Michael Joseph Mannor. Associate Professor, Management. Bachelor of Science, Aquinas College, 2002; Master of Business Admin, Grand Valley State Univ, 2004; Philosophiae Doctor, Michigan State University, 2007 (2008)

Nancy Marinelli. Research Associate Professor, Physics. Bachelor of Arts, University of Bari, 1993; Philosophiae Doctor, ibid., 1997 (2008)

Nelson Mark. The Alfred C. DeCrane Jr. Chair in International Economics; Professor, Department of Economics. Bachelor of Arts, University of California Sta Barbara, 1978; Philosophiae Doctor, University of Chicago, 1983 (2002)

Kate Elizabeth Marshall. Associate Professor, English; Concurrent Assistant Professor, American Studies. Bachelor of Arts, University California Davis, 1997; Master of Arts, University of Southern California, 2006; Philosophiae Doctor, UCLA, 2009 (2009)

Adam Martin. Assistant Professor, Physics. Bachelor of Science, University of Wisconsin-Madison, 2001; Philosophiae Doctor, Boston University, 2007 (2012)

Holly Elizabeth Martin. Professional Specialist, First Year of Studies; Associate Dean, First Year of Studies. Bachelor of Arts, Saint Olaf College, 1978; Master of Arts, University of Notre Dame, 1979; Philosophiae Doctor, ibid., 1983 (1983)

Jennifer Newsome Martin. Assistant Professor, Program of Liberal Studies; Concurrent Assistant Professor, Theology. Bachelor of Arts, Atlanta Christian College, 2002; Master of Theological Studies, University of Notre Dame, 2007; Philosophiae Doctor, ibid., 2012 (2005)

Amaya Martin. Assistant Professional Specialist, Classics. Bachelor of Science, University of Kent, 1996; Philosophiae Doctor, Georgetown University, 2009 (2011)

Thomas G. Marullo. Professor, German and Russian Languages and Literature. Bachelor of Arts, College of the Holy Cross, 1970; Master of Arts, Cornell University, 1971; Philosophiae Doctor, ibid., 1975; Master of Business Admin, Indiana University South Bend, 1989 (1975)

Julia J. Marvin. Associate Professor, Program of Liberal Studies. Bachelor of Arts, Princeton University, 1988; Master of Arts, ibid., 1992; Philosophiae Doctor, ibid., 1997 (1997)

Nancy Masters. Assistant Professional Specialist, Alliance for Catholic Education. Bachelor of Arts, Saint Mary's College, 1976; Master of Science, Indiana University South Bend, 1979 (2001)

Grant James Mathews. Professor, Physics. Bachelor of Science, Michigan State University, 1972; Philosophiae Doctor, University of Maryland Univers, 1977 (1994)

Karel Matous. Associate Professor, Aerospace and Mechanical Engineering. Bachelor of Science, Czech Technical University of Prague, 1996; Master of Science, ibid., 1998; Philosophiae Doctor, ibid., 2000 (2009)

Timothy M. Matovina. Professor, Theology; William and Agna Jean Cushwa Director of the Cushwa Center for the Study of American Catholicism; Concurrent Professor, American Studies; Co-Director, Institute for Latino Studies. Bachelor of Arts in Education, Indiana Univ-Bloomington, 1978; Master of Divinity, University of St Michaels Coll, 1983; Philosophiae Doctor, Catholic University of America, 1993 (2000)

Sara L. Maurer. Associate Professor, English. Bachelor of Arts, Rice University, 1995; Master of Arts, Indiana Univ-Bloomington, 1997; Philosophiae Doctor, ibid., 2003 (2003)

Patricia Ann Maurice. Professor, Civil Engineering and Geological Sciences. Bachelor of Arts, Johns Hopkins University, 1982; Master of Science, Dartmouth College, 1985; Philosophiae Doctor, Stanford University, 1994 (2000)
Faculty

George Mavroeidis. Assistant Professor, Civil Engineering and Geological Sciences. Diploma, Natl Technical University of Athens, 1997; Master of Science, Rensselaer Polytechnic Insti, 1998; Philosophiae Doctor, State University of NY-Buffalo, 2004 (2013)

Scott E. Maxwell. The Matthews A. Fitzsimmons Chair in Psychology; Professor, Psychology. Bachelor of Science, Duke University, 1972; Master of Arts, UNC at Chapel Hill, 1974; Philosophiae Doctor, ibid., 1977 (1982)

David Thomas Mayernik. Associate Professor, School of Architecture. Bachelor of Architecture, University of Notre Dame, 1983 (2002)

Julliet Namutebi Mayinja. Associate Director, Off-Campus Programs; Associate Professional Specialist, Off-Campus Programs. Bachelor of Science, Makerere University, 1989; Master of Arts, University of Notre Dame, 1994; Master of Science in Admin., ibid., 1997 (1993)

Gail Anne Mayotte, SASV. Academic Director of ACE Master of Education Program; Associate Professional Specialist, Alliance for Catholic Education. Bachelor Degree - Unspecified, University of Lowell, 1983; Master Degree - Unspecified, Boston College, 1991; Doctorate Degree, ibid., 2001 (2004)

Christine M. Mazias. Professor, Electrical Engineering; Vice President and Senior Associate Provost for Budget and Planning. Bachelor of Science in Electrical Engt, Purdue University, 1981; M.S. Electrical Engt, ibid., 1984; Philosophiae Doctor, ibid., 1986 (2004)

Elizabeth F Mazurek. Associate Professor, Classics; Department Chair, Classics. Bachelor of Arts, Dickinson College, 1983; Master of Arts, UNC at Chapel Hill, 1985; Philosophiae Doctor, ibid., 1988 (1990)

Tadeusz R. Mazurek. Associate Professional Specialist, Classics; Assistant Teaching Professor; Associate Teaching Professor. Bachelor of Arts, Yale University, 1985; Philosophiae Doctor, UNC at Chapel Hill, 1997 (1997)

A. James McAdams. Dr. Scholl Professor of International Affairs; Professor, Political Science; Director, Nanovic Institute for European Studies; Fellow, Kellogg Institute for International Studies; Fellow, Nanovic Institute for European Studies; Fellow, Joan B. Kroc Institute for International Peace; Concurrent Professor, History. Bachelor of Arts, Earlham College, 1976; Master of Arts, University of California Berkeley, 1977; Philosophiae Doctor, ibid., 1983 (1992)

Jennifer Mason McAward. Associate Professor, Law School; Acting Director, Center for Civil and Human Rights. Bachelor of Arts, University of Notre Dame, 1994; Juris Doctor, New York University, 1998 (2006)

Rodney Lee McClain. Associate Professional Specialist, Aerospace and Mechanical Engineering. Bachelor of Science in Mech Engt, Purdue University, 1972; M.S. Mechanical Engt, University of Notre Dame, 1982 (1980)

Elizabeth Aura McClintock. Assistant Professor, Sociology. Bachelor of Arts, Princeton University, 2003; Master of Arts, Stanford University, 2005; Philosophiae Doctor, ibid., 2011 (2011)

Barry McCrea. Donald R. Keough Family Professor of Irish Studies; Professor, English; Concurrent Professor, Romance Languages and Literature; Concurrent Professor, Irish Language and Literature. Bachelor of Arts, University of Dublin Trinity College, 1997; Philosophiae Doctor, Princeton University, 2004 (2012)

Mark J. McCready. Senior Associate Dean of Research and Graduate Studies, College of Engineering; Professor, Chemical and Biomolecular Engineering. Bachelor of Science in Civil Engt, University of Delaware, 1979; Master of Science, University of IL Urbana-Champaign, 1981; Philosophiae Doctor, ibid., 1984 (1984)

Bill D. McDonald. Thomas A. and James J. Bruder Chair in Administrative Leadership; Professor, Finance; College Information Officer. Bachelor of Science, Central Missouri State Univers, 1975; Master of Business Admin, Arizona State University, 1976; Philosophiae Doctor, ibid., 1979 (1979)

Nyree Valeah McDonald. Associate Dean of Admissions and Recruitment, Graduate School; Associate Professional Specialist, Graduate School. Bachelor of Science, Tuskegee Institute, 1994; Master of Science, University Alaska Anchorage, 2000; Master of Science, University of Notre Dame, 2003; Philosophiae Doctor, ibid., 2006 (2009)

Erin McDonnell. Assistant Professor, Sociology; Concurrent Assistant Professor, African and African American Studies; Fellow, Kellogg Institute for International Studies; Fellow, Joan B. Kroc Institute for International Peace. B.S. Education, Northwestern University, 2002; Philosophiae Doctor, ibid., 2012 (2011)

Terence McDonnell. Assistant Professor, Sociology; Concurrent Assistant Professor, American Studies; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, University of Virginia, 2000; Philosophiae Doctor, Northwestern University, 2009 (2011)

Mary Ann McDowell. Associate Professor, Biological Sciences. Bachelor of Science, University of Nebraska-Lincoln, 1988; Master of Science, ibid., 1990; Philosophiae Doctor, University of Wisconsin-Madison, 1995 (2001)

Paul Robert McDowell. Associate Professional Specialist, Romance Languages and Literature; Fellow, Nanovic Institute for European Studies. Bachelor of Arts, Northern Illinois Univ, 1988; Master of Arts, University of Pennsylvania, 1991 (1991)

Paul J. McGinn. Professor, Chemical and Biomolecular Engineering. Bachelor of Science, University of Notre Dame, 1980; M.S. Metallurgical Engt, ibid., 1983; Philosophiae Doctor, ibid., 1984 (1987)

Sean David McGraw, CSC. Assistant Professor, Political Science; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, University of Notre Dame, 1992; Master of Science, London School of Econ & Pol Sc, 1993; Master of Divinity, University of Notre Dame, 2000; Philosophiae Doctor, Harvard University, 2009 (2009)

John Thomas McGreevy. The I.A. O'Shaughnessy Dean of the College of Arts and Letters; Professor, History, Concurrent Professor, American Studies; Dean, College of Arts and Letters. Bachelor of Arts, University of Notre Dame, 1986; Master of Arts, Stanford University, 1987; Philosophiae Doctor, ibid., 1992 (1997)

Amanda McKendree. Associate Professional Specialist, Management. Bachelor of Arts, Chatham College, 2001; Master of Public Administration, University of Pittsburgh, 2003 (2009)

Mark Philip McKenna. Professor, Law School. Bachelor of Arts, University of Notre Dame, 1997; Juris Doctor, University of Virginia, 2000 (2008)
Faculty

Rebecca Tinio McKenna. Assistant Professor, History; Concurrent Assistant Professor, American Studies. Bachelor of Arts, Columbia University, 1999; Master of Arts, Yale University, 2005; Master of Philosophy, ibid., 2007; Philosophiae Doctor, ibid., 2010 (2011)

Maria Kathleen McKenna. Assistant Professional Specialist, Institute for Educational Initiatives; Assistant Professor of the Practice, Africana Studies. Specialist, Institute for Educational Initiatives; Ireland Dublin, 1997; Master of Arts, Cornell University, 2003 (2006)

Jessica McManus Warnell. Associate Professional Specialist, Accountancy. Bachelor of Arts, University of Notre Dame, 1989; Master of Science, University College Dublin, 1997; Master of Science, Northwestern University, 1998; Philosophiae Doctor, Saint Louis University, 2010 (2009)

Gerald P. McKenny. Walter Professor of Theology; Professor, Theology. Bachelor of Arts, Wheaton College, 1979; Master of Divinity, Princeton Theological Seminary, 1982; Philosophiae Doctor, University of Chicago, 1989 (2001)

Sarah E. McKibben. Associate Professor, Irish Language and Literature. Bachelor of Arts, University of California Berkeley, 1993; Master of Philosophy, National University of Ireland Dublin, 1997; Master of Arts, Cornell University, 2000; Philosophiae Doctor, ibid., 2003 (2002)

Collin McMillan. Assistant Professor, Computer Science and Engineering. Bachelor of Science, University of Tulsa, 2007; Master of Science, Coll of William & Mary, 2009; Philosophiae Doctor, ibid., 2012 (2012)

Peter Thomas McQuillan. Department Chair, Irish Language and Literature; Associate Professor, Irish Language and Literature. Bachelor of Arts, University College Dublin, 1981; Master of Arts, ibid., 1983; Philosophiae Doctor, Harvard University, 1991 (1994)

Joyelle McSweeney. Director, Creative Writing Program; Associate Professor, English. Bachelor of Arts (Latin), Harvard University, 1997; Master of Philosophy, University of Oxford, 1999; Master of Fine Arts, University of Iowa, 2001 (2006)

Rory M. McVeigh. Professor, Sociology; Department Chair, Sociology. Co-Editor, American Sociological Review. Bachelor of Arts, University of Arizona, 1991; Master of Arts, UNC at Chapel Hill, 1993; Doctor of Social Science, ibid., 1996 (2002)

Leo Hubbard McWilliams. Associate Professional Specialist, College of Engineering. Bachelor of Arts, University of Notre Dame, 1981; Bachelor of Science, ibid., 1982; Bach of Science in Electrical Engr, ibid., 1982; M.S. Electrical Engr, ibid., 1985; Philosophiae Doctor, ibid., 1993 (2001)

Bruce J Melancon. Research Assistant Professor, Chemistry and Biochemistry. Bachelor of Science, Louisiana State University, 2002; Doctor of Philosophy, University of Notre Dame, 2008 (2015)

John Christopher Mellor. Professional Specialist, Architecture; Professor of the Practice. Bachelor of Architecture, University of Notre Dame, 1995; Master of Architecture, ibid., 2010 (2011)

Richard R. Mendenhall. The William and Cassie Daly Professor of Finance; Professor, Finance; Department Chair, Finance. Bachelor of Science, U. S. Naval Academy, 1974; Master of Business Admin, Indiana Univ-Bloomington, 1980; Philosophiae Doctor, University of Ill. Urbana-Champaign, 1985 (1985)

Ivis Menes. Associate Professional Specialist, Romance Languages and Literatures. Associate in Arts. Miami-Dade Community College, 1993; Bachelor of Arts, Florida International Universi, 1994; Master of Arts, Loyola University Chicago, 1996 (2000)

Thomas V. Merluzzi. Professor, Psychology; Director, Institute for Scholarship in the Liberal Arts. Associate in Arts, Saint Thomas Seminary, 1966; Bachelor of Arts, Central Connecticut State Coll, 1969; Master of Arts, Ohio State University, 1971; Philosophiae Doctor, ibid., 1975 (1974)

Margaret H. Mesarvey. Associate Professor, History. Associate Dean, College of Arts and Letters. Bachelor of Arts (Latin), Harvard University, 1992; Master of Arts, The Warburg Institute, 1993; Philosophiae Doctor, ibid., 2001 (2003)

Ronald Metoyer. Associate Professor, Computer Science and Engineering. Bach of Sc in Computer Engr, University of Southern California, 1994; Philosophiae Doctor, Georgia Institute of Technolog, 2002 (2015)

Michael John Meyer. Associate Professional Specialist, Accountancy. Bachelor of Arts, University of Notre Dame, 1988; Master of Accountancy, Virginia Polytechnic Institute, 1993; Philosophiae Doctor, Mississippi State University, 1998 (2010)
Faculty

Natalie K. Meyers. Associate Librarian, Hesburgh Libraries; E-Research Librarian. Bachelor of Arts, DePaul University, 1988; Master of Arts, University of Wisconsin-Milwaukee, 1989; Master in Library Science, University of California Berkeley, 1994 (2011)

Nancy Alice Michael. Assistant Professional Specialist, Biological Sciences; Assistant Teaching Professor. Bachelor of Science, Western Michigan University, 2001; Philosophiae Doctor, University of Minnesota, 2012 (2014)

Edwin Michael. Professor, Biological Sciences; Fellow, Kellogg Institute for International Studies. Bachelor of Science, Madras Christian College, 1982; Master of Science, ibid., 1984; Philosophiae Doctor, Imperial Coll of Science & Tec, 1990 (2011)

Connie L. Mick. Associate Professional Specialist, Center for Social Concerns; Assistant Director, Center for Social Concerns. Bachelor of Arts, Manchester College, 1994; Master of Arts, Boston College, 1997; Philosophiae Doctor, Loyola University Chicago, 2007 (2010)

Juan C. Migliore. Professor, Mathematics; Associate Chair, Mathematics. Bachelor of Arts, Haverford College, 1978; Philosophiae Doctor, Brown University, 1983 (1989)

Kenneth W. Milani. Professor, Accountancy. Bachelor of Science, Bradley University, 1962; Master of Business Admin, ibid., 1967; Philosophiae Doctor, University of Iowa, 1972 (1972)

Tijana Milenkovic. Assistant Professor, Computer Science and Engineering. Bachelor of Science, University of Sarajevo, 2005; Master of Science, University California Irvine, 2008; Philosophiae Doctor, ibid., 2010 (2010)

Jeffrey S. Miller. Associate Professor, Accountancy. Bachelor of Science, Ohio State University, 1982; Master of Business Admin, University of Michigan, 1988; Philosophiae Doctor, University of Texas-Austin, 2000 (2000)

Marvin J. Miller. The George and Winifred Clark Professor of Chemistry; Professor, Chemistry and Biochemistry. Bachelor of Science, North Dakota State University, 1971; Master of Science, Cornell University, 1974; Philosophiae Doctor, ibid., 1976 (1977)

Laura Elizabeth Miller. Assistant Professor, Psychology. Bachelor of Arts, University of Notre Dame, 2008; Master of Science, University of Michigan, 2010; Philosophiae Doctor, ibid., 2013 (2013)

Douglas Andrew Miller. Assistant Professional Specialist, Chemistry and Biochemistry; Teaching Professor. Bachelor of Arts, Drew University, 1981; Philosophiae Doctor, Pennsylvania St University, 1989 (1997)

Marie Denise Milord. Assistant Professional Specialist, Biological Sciences; Director, Biological Sciences. Doctorate of Medicine, University of Puebla, 1992 (2009)

Philip E. Mirowski. The Carl E. Koch Professor of Economics; Professor, College of Arts and Letters. Bachelor of Arts, Michigan State University, 1973; Master of Arts, University of Michigan, 1976; Philosophiae Doctor, ibid., 1979 (1990)

Vanessa A. Miseres. Assistant Professor, Romance Languages and Literatures; Fellow, Kellogg Institute for International Studies; Fellow, Nanovic Institute for European Studies. Bachelor of Arts, National University of Rosario, 2004; Master of Arts, Vanderbilt University, 2006; Philosophiae Doctor, ibid., 2010 (2011)

Gerard Krzysztof Misiolek. Professor, Mathematics. Master of Science, Technical University of Warsaw, 1987; Master of Arts, University of Warsaw, 1988; Philosophiae Doctor, SUNY at Stony Brook, 1992 (1993)

H. Fred Mittelstaedt. Deloitte Foundation Professor of Accountancy; Professor, Accountancy; Department Chair, Mendoza College of Business. Bachelor of Science, Illinois State University, 1979; Master of Science, ibid., 1982; Philosophiae Doctor, University of IL Urbana-Champaign, 1987 (1992)

Shahriar Mobashery. Nasavi Family Professor of Life Sciences; Professor, Chemistry and Biochemistry. Bachelor of Science, University of Southern California, 1980; Bachelor of Science, ibid., 1981; Philosophiae Doctor, University of Chicago, 1985 (2003)

Raymond A. Mockus. Assistant Professor, Army Science. Master of Engineering, Missouri U of Science & Tech., 2010 (2013)

Christian Robert Moews. Associate Professor, Romance Languages and Literatures. Bachelor of Arts, Harvard University, 1980; Master of Arts, Columbia University, 1989; Philosophiae Doctor, ibid., 1994 (1994)

Scott M. Monroe. The William K. Warren Foundation Professor of Psychology; Professor, Psychology. Bachelor of Arts, Saint Olaf College, 1972; Master of Arts, Southern Illinois University at Carb, 1975; Philosophiae Doctor, State University of NY-Buffalo, 1979 (2006)

Susannah Brietz Monta. Associate Professor, English. Bachelor of Arts, Urbana University, 1992; Bachelor of Science, ibid., 1992; Master of Arts, University of Wisconsin-Madison, 1993; Philosophiae Doctor, ibid., 1998 (2007)

Vittorio Montemaggi. Assistant Professor, Romance Languages and Literatures; Concurrent Assistant Professor, Theology. Bachelor of Arts, University of Cambridge, 2000; Master of Philosophy, ibid., 2001; Philosophiae Doctor, ibid., 2006 (2009)

Ebrahim Moosa. Professor, History. Co-Director, Contending Modernities Initiative. Bachelor of Arts, University of Kanpur, 1982; Master of Arts, University of Cape Town, 1989; Philosophiae Doctor, ibid., 1995 (2014)

Maria R. Olivera-Williams. Professor, Romance Languages and Literatures; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, University Toledo, 1976; Master of Arts, Ohio State University, 1978; Philosophiae Doctor, ibid., 1983 (1982)

T. Mark Olsen. Associate Professional Specialist, Biological Sciences. Bachelor of Arts (Latin), Saint Michael’s College, 1981; Master of Science, University of Notre Dame, 1989; Philosophiae Doctor, ibid., 1994 (1994)

Timothy Patrick O’Malley. Associate Professional Specialist, ND Center for Liturgy; Concurrent Assistant Professional Specialist, Theology. Bachelor of Arts, University of Notre Dame, 2004; Master of Theological Studies, ibid., 2006; Philosophiae Doctor, Boston College, 2010 (2004)

Atalia Omer. Associate Professor, Sociology. Bachelor of Arts, University of California Sta Barbara, 1998; Master of Arts, Harvard University, 2002; Philosophiae Doctor, ibid., 2008 (2008)

Kathleen C. Opel. Director, Off-Campus Programs; Associate Professional Specialist, Off-Campus Programs. Bachelor of Arts, Pennsylvania State University, 1973; Master of Arts, Fairfield University, 1977 (1999)

Cyril J. O’Regan. The Catherine F. Huisking Chair in Theology; Professor, Theology. Bachelor of Arts, University College Dublin, 1974; Master of Arts, ibid., 1978; Master of Arts, Yale University, 1983; Master of Philosophy, ibid., 1984; Philosophiae Doctor, ibid., 1989 (1999)

Joseph Edward O’Toosa. Professor, Biological Sciences. Bachelor of Science, University of Notre Dame, 1976; Philosophiae Doctor, University of Washington, 1980 (1985)

Timothy C. Ovaert. Professor, Aerospace and Mechanical Engineering. Bachelor of Science, University of IL Urbana-Champaign, 1981; Master of Engineering, Northwestern University, 1985; Philosophiae Doctor, ibid., 1989 (2000)

Hugh Rowland Page. Vice President and Associate Provost for Undergraduate Affairs; Joint Appointment, African and African American Studies; Professor, Theology. Bachelor of Arts, Hampton University, 1977; Master of Divinity, General Theological Seminary, 1980; Master of Sacred Theology, ibid., 1983; Master of Arts, Harvard University, 1988; Philosophiae Doctor, ibid., 1990 (1992)

Abigail L. Palko. Assistant Professional Specialist, Gender Studies; Assistant Teaching Professor; Associate Director, Gender Studies. Bachelor of Arts, Chestnut Hill College, 1996; Master of Arts, Rutgers University, 2000; Philosophiae Doctor, University of Notre Dame, 2010 (2010)

Athanasia Demetra Panopoulos. Elizabeth and Michael Gallagher Family Assistant Professor in Adult Stem Cell Research; Assistant Professor, Biological Sciences. B.S. Chemistry, University of Michigan, 1997; Master of Science, U of TX MD Anderson Cancer Ctr, 2001; Philosophiae Doctor, ibid., 2007 (2014)

Faculty

James Anthony Parise. Associate Professional Specialist, Chemistry and Biochemistry; Associate Teaching Professor. B.S. Chemistry, SUNY College at Oswego, 2000; Philosophiae Doctor, Duke University, 2007 (2011)

Tricia Park. Associate Professional Specialist, Music; Associate Professor of the Practice. Bachelor of Music, The Juilliard School, 1998; Master of Music, ibid., 2000 (2011)

Jennifer Noelle Parker. Associate Librarian, Hesburgh Libraries. Bachelor of Arts, California State U-Long Beach, 2000; Master of Arts, University of Virginia, 2002; Master of Library & Info Sci, University of Maryland Univer., 2003 (2008)

John Parkhill. Assistant Professor, Chemistry and Biochemistry. Bachelor of Science, University of Chicago, 2005; Bachelor of Science, ibid., 2005; Bachelor of Science, ibid., 2005; Bachelor of Science, ibid., 2005; Philosophiae Doctor, University of California Berkeley, 2010 (2013)

Rachel Parroquin. Assistant Professional Specialist, Romance Languages and Literatures; Assistant Professor of the Practice. Bachelor of Arts, Valparaiso University, 1985; Bachelor of Science, ibid., 1985; Master of Education, ibid., 1990; Philosophiae Doctor, Loyola University Chicago, 2008 (2010)

Jessica Payne. Associate Professor, Psychology. The Nancy O'Neill Assistant Professor of Psychology. Bachelor of Arts, University of San Diego, 1995; Master of Arts, Mount Holyoke College, 1999; Philosophiae Doctor, University of Arizona, 2005 (2009)

Zhangli Peng. Assistant Professor. Bachelor of Science, Tong Ji University, 2004; Master of Science, Zhejiang Inst. of Technology, 2006; Philosophiae Doctor, University California San Diego, 2011 (2014)

Jeffrey W. Peng. Associate Professor, Chemistry and Biochemistry. Bachelor of Science, Cornell University, 1987; Philosophiae Doctor, University of Michigan, 1993 (2003)

Jaime M Pensado. The Carl E. Koch Assistant Professor of History; Fellow, Kellogg Institute for International Studies; Director of Latin American Studies Program Minor; Associate Professor, History. Bachelor of Arts, California State U Los Angeles, 1997; Master of Arts, ibid., 2000; Master of Arts, University of Chicago, 2002; Philosophiae Doctor, ibid., 2008 (2008)

Troy Alexander Perkins. Assistant Professor, Biological Sciences; Concurrent Assistant Professor, Applied Computational Mathematics & Statistics. Bachelor of Arts, University Tennessee Knoxville, 2006; Philosophiae Doctor, University California Davis, 2011 (2014)

Catherine Perry. Associate Professor, Romance Languages and Literatures. Bachelor of Arts, Indiana Univ-Bloomington, 1987; Master of Arts, ibid., 1989; Master of Arts, Princeton University, 1992; Philosophiae Doctor, ibid., 1995 (1993)

Margaret Rose Pfeil. Associate Professional Specialist, Theology. Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, University of Notre Dame, 1987; Master of Theological Studies, Weston School of Theology, 1994; Master of Arts, University of Notre Dame, 1997; Philosophiae Doctor, ibid., 2000 (2002)

Michael Pfrender. Associate Professor, Biological Sciences. Bachelor of Science, University of Michigan, 1988; Master of Science, ibid., 1992; Philosophiae Doctor, Oregon, 1998 (2009)

William Anthony Phillips. Assistant Professor, Chemical and Biomolecular Engineering. Bachelor of Science, University of Notre Dame, 2004; Philosophiae Doctor, University of Minnesota, 2009 (2011)

Lara Arielle Phillips. Research Assistant Professor, Physics. Bachelor of Science, McGill University, 1996; Philosophiae Doctor, Princeton University, 2003 (2009)

James Daniel Philpott. Professor, Political Science; Fellow, Kellogg Institute for International Studies; Concurrent Professor, Law School. Bachelor of Arts, University of Virginia, 1989; Master of Arts, Harvard University, 1991; Philosophiae Doctor, ibid., 1996 (2001)

Alessandro Pierattini. Assistant Professor, School of Architecture. B.Arch, Roma Tre University, 2002, Master in Preservation, ibid., 2005; Philosophiae Doctor, LaSapienza University, 2015 (2015)

Richard B. Pierce. Associate Professor, History; Concurrent Associate Professor, American Studies. Bachelor of Arts, Valparaiso University, 1985; Master of Arts, University of Wisconsin-Milwaukee, 1988; Philosophiae Doctor, Indiana Univ-Bloomington, 1996 (1996)

Rodney Pierre-Antoine. Assistant Professional Specialist, Alliance for Catholic Education; Director, Alliance for Catholic Education. Bachelor of Arts, University of Maryland, 1998; M.A. Educational Admin, University of Notre Dame, 2009 (2014)

Anne Bernardette Pilkington. Associate Professional Specialist, Mathematics; Assistant Professor of Practice, Mathematics. Bachelor of Arts, University College Dublin, 1984; Master of Arts, ibid., 1985; Philosophiae Doctor, University of Notre Dame, 1991 (2009)

Mark C. Pilkington. Professor, Film, Television, and Theatre. Bachelor of Science, University of Memphis, 1969; Master of Arts, University of Virginia, 1971; Philosophiae Doctor, University of Bristol, 1975 (1984)

Anand Pillay. The William J. Hank Family Professor of Mathematics; Professor, Mathematics. Bachelor of Arts, Balliol College Oxford, 1973; Master of Science, King’s College, 1974; Philosophiae Doctor, Bedford College, 1977 (2013)

Dianne M. Pinderhughes. Professor, African and African American Studies; Concurrent Professor, American Studies; Concurrent Professor, Political Science; Department Chair, African and African American Studies. Bachelor of Arts, Albertus Magnus College, 1969; Master of Arts, University of Chicago, 1973; Philosophiae Doctor, ibid., 1977 (2006)

Nathan Wesley Piwowar. Assistant Professional Specialist, Physical Education. Bachelor of Science, Western Michigan University, 2003; Master of Arts, ibid., 2008 (2008)

Jeffrey A Pojanowski. The Robert and Marion Short Scholar; Associate Professor, Law School. Bachelor of Arts (Latin), Princeton University, 2000; Juris Doctor, Harvard University, 2004 (2010)
Claudia Polini. Professor, Mathematics. Bachelor of Science, University of Padua, 1990; Philosophiae Doctor, Rutgers University, 1995 (2001)

Pierpaolo Polzonetti. Associate Professor, Program of Liberal Studies; Concurrent Associate Professor, Music. Bachelor of Arts (Latin), University of Rome, 1995; Master of Arts, Cornell University, 2001; Philosophiae Doctor, ibid., 2003 (2006)

Wolfgang Porod. Frank M. Freimann Chair in Electrical & Computer Engineering(II); Professor, Electrical Engineering. Master of Science, University of Graz, 1979; Philosophiae Doctor, ibid., 1981 (1986)

Natalie Porter. Assistant Professor, Anthropology. Bachelor of Arts, University of California Santa Barbara, 2002; Master of Arts, University of Wisconsin-Madison, 2006; Philosophiae Doctor, ibid., 2012 (2015)

Emilia Justyna Powell. Fellow, Kellogg Institute for International Studies; Assistant Professor, Political Science; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, Copernicus University, 2001; Master of Arts, Florida State University, 2003; Philosophiae Doctor, ibid., 2006 (2011)

AnnMarie R. Powers. Associate Professional Specialist, Sociology. Bachelor of Science, West Chester University, 1974; Masters in Education, Boston University, 1977; Master of Arts, University of Notre Dame, 1993; Philosophiae Doctor, ibid., 1999 (1999)

Gerard Francis Powers. Professional Specialist, Joan B. Kroc Institute for International Peace; Professor of the Practice, Catholic Peacebuilding; Director, Policy Studies. Bachelor of Arts (Latin), Princeton University, 1980; Juris Doctor, University of Notre Dame, 1986; Master of Arts, ibid., 1988 (2004)

Thomas Gregory Pratt. Research Associate Professor, Electrical Engineering. Bachelor of Science, University of Notre Dame, 1985; Master of Science, Georgia Institute of Technology, 1989; Philosophiae Doctor, ibid., 1999 (2008)

Christopher Daniel Pratt. Professor of Military Science. Bachelor of Arts, Canisius College, 1996; Master of Science, Naval Postgraduate School, 2009 (2015)

Ava Preghiera. Associate Professional Specialist, Office of Arts & Letters Undergraduate Study, Concurrent Associate Professional Specialist, Film, Television, and Theatre; Associate Director, Arts and Letters Office for Undergraduate Studies; Assistant Dean, Arts and Letters Office for Undergraduate Studies. Bachelor of Arts, University of Iowa, 1975; Master of Arts, ibid., 1981 (1989)

Lynette Anne Prezyna. Associate Professional Specialist, College of Science. B.S. Chemistry, Daemen College, 1987; Master of Science, Rensselaer Polytechnic Institute, 1989; Philosophiae Doctor, ibid., 1993 (2010)

Michael Jason Pries. Associate Professor, Department of Economics. Bachelor of Arts, University of Notre Dame, 1993; Philosophiae Doctor, Stanford University, 1999 (2007)

Linda Przybylszewski. Associate Professor, History. Bachelor of Arts, Northwestern University, 1984; Master of Arts, Stanford University, 1986; Philosophiae Doctor, ibid., 1989 (2005)

Sylwia Ptasińska. Tom and Carolyn Marquez Assistant Professor of Biophysics; Assistant Professor, Physics. Master of Science, Marie Curie-Sklodowska Univ, 2001; Philosophiae Doctor, University of Innsbruck, 2004 (2010)

To Table of Contents
Matthew J. Ravosa. Professor, Biological Sciences; Concurrent Professor, Anthropology. Bachelor of Arts, University of Rochester, 1983; Master of Arts, Northwestern Univ. - Chicago, 1986; Philosophiae Doctor, ibid., 1989 (2011)

Michael Cannon Rea. Professor, Philosophy; Director, Center for Philosophy of Religion. Bachelor of Arts, UCLA, 1991; Master of Arts, University of Notre Dame, 1994; Philosophiae Doctor, ibid., 1996 (2000)

Jason R. Reed. Assistant Professional Specialist; Assistant Teaching Professor, Finance. Bachelor of Art, Grand Valley State University, 2005, Bachelor of Science, ibid., 2005, Master of Art, Wayne State University, 2010, Philosophiae Doctor, ibid., 2015 (2015)

Patrick M. Regan. Professor, Political Science. Bachelor of Science, Western Michigan University, 1981; Master of Arts, New York University, 1986; Philosophiae Doctor, University of Michigan, 1992 (2012)

Stephen J Reifenberg. Associate Professional Specialist, Political Science; Associate Professor of the Practice; Fellow, Joan B. Kroc Institute for International Peace; Concurrent; Associate Professional Specialist, Kellogg Institute for International Studies; Executive Director, Kellogg Institute for International Studies. Bachelor of Arts, University of Notre Dame, 1981; Master of Science, Boston University, 1986; Master of Public Affairs, Harvard University, 1988 (2010)

Robert Mark Rennie. Research Associate Professor, Aerospace and Mechanical Engineering. Bachelor of Science, Queen’s University, 1987; B.S. Engineering Physics, ibid., 1987; M.S. Aerospace Engr, University of Notre Dame, 1994; Philosophiae Doctor, ibid., 1996 (2004)

Terrence W. Retting. Professor, Physics. Bachelor of Arts, DePauw College, 1968; Master of Science, Ball State University, 1970; Master of Arts, Indiana University, 1972; Philosophiae Doctor, Indiana Univ-Bloomington, 1976 (1983)

Luc Henri Reydams. Fellow, Nanovic Institute for European Studies; Associate Professional Specialist, Political Science; Associate Professor of the Practice. Legum Magister, University of Notre Dame, 1995; Juridicae Scientiae Doctor, ibid., 2001 (1997)

Gretchen J. Reydams-Schils. Professor, Program of Liberal Studies; Department Chair, Program of Liberal Studies; Concurrent Professor, Theology. Bachelor of Arts, Katholieke University Te Leuven, 1987; Master of Arts, University of Cincinnati, 1989; Philosophiae Doctor, University of California Berkeley, 1994 (1994)

Gabriel S. Reynolds. Professor, Theology. Bachelor of Arts, Columbia University, 1994; Master of Arts, Yale University, 2001; Master of Philosophy, ibid., 2001; Philosophiae Doctor, ibid., 2003 (2003)

Robin Francis Rhodes. Associate Professor, Art, Design and Architecture; Concurrent Associate Professor, School of Architecture. Bachelor of Arts, UNC at Chapel Hill, 1974; Philosophiae Doctor, ibid., 1984 (1996)

David N. Ricchiute. Associate Professor, Romance Languages and Literatures; Concurrent Associate Professor, Gender Studies. Bachelor of Arts, Loma Linda University La Sier, 1996; Master of Arts, California State U Los Angeles, 1999; Philosophiae Doctor, UCLA, 2003 (2005)

Karen Ellen Richman. Associate Professional Specialist, Institute for Latino Studies; Director, Border and Inter-American Affairs, Instituto for Latino Studies; Concurrent Associate Professional Specialist, Romance Languages and Literatures; Concurrent Associate Professional Specialist, Anthropology; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Wesleyan University, 1978; Master of Arts, University of Virginia, 1981; Philosophiae Doctor, ibid., 1992 (2007)

David Richter. Assistant Professor, Civil Engineering and Geological Sciences; Concurrent Assistant Professor, Civil Engineering and Geological Sciences. Bachelor of Science, University of Massachusetts, 2006; M.S. Mechanical Engr, Stanford University, 2007; Philosophiae Doctor, ibid., 2011 (2013)

Theresa Ricke-Kiely. Assistant Professional Specialist, Joan B. Kroc Institute for International Peace; Associate Director, Joan B. Kroc Institute for International Peace. Doctorate of Education, University of Sarasota, 2005 (2009)

Laurel Riek. Clare Boothe Luce Assistant Professor; Assistant Professor, Computer Science and Engineering. Bachelor of Science, Carnegie Mellon University, 2000; Philosophiae Doctor, University of Cambridge, 2011 (2011)

Shahir S. Rizk. Research Assistant Professor, Biological Sciences. B.S. Biology, Indiana University South Bend, 2000; Philosophiae Doctor, Duke University, 2006 (2012)

Daniel John Robertson. Research Assistant Professor, Physics. Bachelor of Arts, University of Surrey, 2003; Master of Science, ibid., 2003; Philosophiae Doctor, University of Notre Dame, 2010 (2010)

Denis Jean-Jacques Robichaud. Assistant Professor, Program of Liberal Studies; Concurrent Assistant Professor, Romance Languages and Literatures. Bachelor of Arts, Concordia University, 2005; Master of Arts, Johns Hopkins University, 2010; Master of Arts, ibid., 2010; Master of Arts, ibid., 2010; Master of Arts, ibid., 2010; Philosophiae Doctor, ibid., 2011 (2011)

Adrian V. Rocha. Assistant Professor, Biological Sciences; Concurrent, Civil Engineering and Geological Sciences. Bachelor of Science, CA State Univ. Monterey Bay, 2001; Master of Science, Ohio State University, 2003; Philosophiae Doctor, University California Irvine, 2008 (2012)
Faculty

Mark William Roche. Rev. Edmund Joyce, C.S.C., Endowed Chair in German Language and Literature; Professor, German and Russian Languages and Literature; I.A. O'Shaughnessy Dean of the College of Arts and Letters. Bachelor of Arts, Williams College, 1978; Master of Arts, Eberhard Karl University of Tubingen, 1980; Philosophiae Doctor, Princeton University, 1984 (1996)

Daniel Blake Roche. Assistant Professor, Philosophy. Bachelor of Arts, Wheaton College, 2002; Master of Arts, Northern Illinois Univ, 2008; Philosophiae Doctor, Rutgers State University of NJ, 2013 (2013)

Ryan K. Roeder. Associate Professor, Aerospace and Mechanical Engineering. Bachelor of Science, Purdue University, 1994; Philosophiae Doctor, ibid., 1999 (2001)

Kimberly Ann Rollings. Assistant Professor, School of Architecture. Bachelor of Architecture, University of Notre Dame, 2003; Master of Science, Cornell University, 2010; Philosophiae Doctor, ibid., 2013 (2013)

Jeanne Romero-Severson. Professor, Biological Sciences. Bachelor of Science, University of Wisconsin-Madison, 1974; Master of Science, ibid., 1975; Philosophiae Doctor, ibid., 1984 (1997)

Kevin Michael Rooney. Associate Professional Specialist, First Year of Studies; Senior Associate Dean, First Year of Studies. Bachelor of Arts, University of Notre Dame, 1970; Master of Science, State University of NY at Albany, 1973 (1984)

Sebastian Rosato. Associate Professor, Political Science; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, University of Cambridge, 1994; Master of Philosophy, University of Oxford, 1996; Master of Arts, University of Chicago, 2000; Philosophiae Doctor, ibid., 2006 (2006)

Robert Jason Rosenbaum. Assistant Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, University of Houston, 2006; M.S. Mathematics, ibid., 2008; Philosophiae Doctor, ibid., 2011 (2014)

Joseph Rosenberg. Assistant Professional Specialist, Program of Liberal Studies; Fellow, Nanovic Institute for European Studies. Bachelor of Arts, Dalhousie University Halifax, 2001; Master of Arts, Queen’s University, 2002; Philosophiae Doctor, Trinity Hall Cambridge, 2008 (2011)

Lauren Faulkner Rossi. Assistant Professor, History. Bachelor of Arts, Simon Fraser University, 2001; Master of Arts, ibid., 2003; Philosophiae Doctor, Brown University, 2009 (2009)

Deborah Lynn Rotman. Associate Professional Specialist, CUSE-Cnr Undergrad Scholarly Enggmt; Director, CUSE-Cnr Undergrad Scholarly Enggmt; Concurrent Associate Professional Specialist, Anthropology. Bachelor of Arts, Grand Valley State Univ, 1993; Master of Arts, Western Michigan University, 1995; Philosophiae Doctor, University of Massachusetts Bo, 2001 (2006)

Ingrid Drake Rowland. Professor, School of Architecture. Bachelor of Arts, Pomona College, 1974; Master of Arts, Bryn Mawr College, 1976; Philosophiae Doctor, ibid., 1980 (2005)

David F. Ruccio. Professor, College of Arts and Letters. Bachelor of Arts, Bowdoin College, 1976; Philosophiae Doctor, University of Massachusetts, 1984 (1982)

Randal C. Rucht. Professor, Physics. Bachelor of Science, University of Wisconsin-Madison, 1968; Master of Science, University of IL Urbana-Champaign, 1970; Philosophiae Doctor, Michigan State University, 1973 (1977)

Kristin Joy Rudenga. Assistant Professional Specialist, Kaneb Center for Teaching and Learning. Bachelor of Science, Purdue University, 2005; Bachelor of Arts, ibid., 2005; Master of Philosophy, Yale University, 2008; Philosophiae Doctor, ibid., 2012 (2014)

Jason Michael Ruiz. Associate Professor, American Studies. Bachelor of Arts, University of Minnesota, 2001; Philosophiae Doctor, ibid., 2008 (2008)

Nicholas Vincent Russo. Associate Professional Specialist, Office of Arts & Letters Undergraduate Study Assistant Dean; Concurrent Assistant Professional Specialist, Theology. Bachelor of Arts, University of Virginia, 1998; Master of Arts, University of Notre Dame, 2002; Philosophiae Doctor, ibid., 2009 (2011)

Maura Anne Ryan. Associate Provost and Vice President for Faculty Affairs; Associate Professor, Theology. Bachelor of Arts. St. Bonaventure University, 1979; Master of Arts, Boston College, 1987; Master of Philosophy, Yale University, 1990; Philosophiae Doctor, ibid., 1993 (1993)

Stephanie L. Ryckman. Assistant Professional Specialist, Physical Education. Bachelor of Science, University of Wisconsin-Whitewater, 2007 (2009)

Salma Saddawi. Professional Specialist, Chemical and Biomolecular Engineering. Bachelor of Science, University of Baghdad, 1977; Master of Science, Technical University of Warsaw, 1984; Philosophiae Doctor, ibid., 1989 (1996)

Philip J. Sakimoto. Professional Specialist, First Year of Studies. Bachelor of Arts, Pomona College, 1976; Master of Arts, University of Southern California, 1979; Philosophiae Doctor, ibid., 1985 (2005)

Samantha Lynn Salden. Assistant Professional Specialist, School of Architecture; Assistant Dean of the Graduate Programs, School of Architecture. Bachelor of Architecture, University of Notre Dame, 2002; Master of Architecture, ibid., 2008 (2008)

Kevin John Sandberg. Assistant Professional Specialist, Center for Social Concerns; Concurrent Assistant Professional Specialist, Theology. Bachelor of Arts, University of Notre Dame, 1988; Master of Arts, Jesuit School of Theology, 1994; Master of Divinity, University of Notre Dame, 2004; Philosophiae Doctor, Fordham University, 2014 (2014)

Valerie L. Sayers. Professor, English; Concurrent Professor, American Studies. Bachelor of Arts, Fordham University, 1973; Master of Fine Arts, Columbia University, 1976 (1993)

Thomas F. Schaefer. The KPMG Chair in Accountancy, Professor, Accountancy. Bachelor of Arts, Northern Illinois Univ, 1974; Master of Accounting Science, University of IL Urbana-Champaign, 1976; Philosophiae Doctor, ibid., 1982 (1998)

Jennifer Lyn Schaefer. Assistant Professor, Chemical and Biomolecular Engineering. Bachelor of Science, Widener University, 2008; M.Eng., ibid., 2008; Philosophiae Doctor, 2014 (2015)

Zachary Thomas Schafer. The Coleman Assistant Professor of Cancer Biology; Associate Professor, Biological Sciences. Bachelor of Science, University of Notre Dame, 2001; Philosophiae Doctor, Duke University, 2006 (2009)

Diane Marie Scherzer. Associate Professional Specialist, Physical Education. Bachelor of Science, University Wisconsin La Crosse, 1979; Master of Science, University of NC at Greensboro, 1986 (1991)

James Patrick Schmiedeler. Associate Professor, Aerospace and Mechanical Engineering. Bachelor of Science, University of Notre Dame, 1996; Master of Science, Ohio State University, 1998; Philosophiae Doctor, ibid., 2001 (2008)

Robert P. Schmuhl. The Walter H. Annenberg-Edmund P. Joyce Professor of American Studies and Journalism; Director, John W. Gallivan Program in Journalism, Ethics Gamp; Democracy; Krouth Naughton Institute Faculty Fellow; Professor, American Studies. Bachelor of Arts, University of Notre Dame, 1970; Master of Arts, Indiana Univ-Bloomington, 1978; Philosophiae Doctor, ibid., 1978 (1980)

William Frederick Schneider. Professor, Chemical and Biomolecular Engineering; Concurrent Professor, Chemistry and Biochemistry. B.S. Chemistry, University of Michigan-Dearborn, 1986; Philosophiae Doctor, Ohio State University, 1991 (2004)

Jeffrey S. Schoery. George Craig, Jr. Collegiate Professor of Biological Sciences; Professor, Biological Sciences. Bachelor of Science, Southeast Missouri St Univ, 1985; Philosophiae Doctor, University of Texas-San Antonio, 1991 (1998)

Michael John Schreffler. Associate Professor, Art, Art History, and Design. Bachelor of Arts, University of Virginia, 1989; Master of Arts, Arizona State University, 1994; Philosophiae Doctor, University of Chicago, 2000 (2015)

Zachary Dale Schultz. Associate Professor, Chemistry and Biochemistry. Bachelor of Science, Ohio State University, 2000; Philosophiae Doctor, University of IL Urbana-Champaign, 2005 (2009)

Robert A. Schulz. The Notre Dame Professor of Biological Sciences; Professor, Biological Sciences. B.A. Chemistry, UNC at Chapel Hill, 1976; Philosophiae Doctor, Georgetown University, 1981 (2007)

Mark Richard Shurr. Professor, Anthropology; Associate Dean, Social Sciences and Research, College of Arts and Letters. Bachelor of Science, Purdue University, 1977; Philosophiae Doctor, Indiana Univ-Bloomington, 1989 (1991)

Timothy Richard Scully, CSC. Professor, Political Science; The Hackett Family and Timothy R. Scully, CSC Directorship for the Institute for Educational Initiatives; Fellow, Kellogg Institute for International Studies; Director, Institute for Educational Initiatives; Bachelor of Arts, University of Notre Dame, 1976; Master of Divinity, ibid., 1979; Master of Arts, University of California Berkeley, 1985; Philosophiae Doctor, ibid., 1989 (1989)

Alan C. Seabaugh. The Frank M. Freimann Director of the Midwest Institute for Nanoelectronics Discovery; Professor, Electrical Engineering; Bach of Sci in Electrical Engr, University of Virginia, 1977; M.S. Electrical Engr, ibid., 1979; Philosophiae Doctor, ibid., 1985 (1999)

James Herbert Seckinger. Professor, Law School. Bachelor of Science, Saint John’s University, 1964; Master of Science, Vanderbilt University, 1968; Juris Doctor, University of Notre Dame, 1968 (1974)

Michael James Seelinger. Associate Professor Specialista, College of Engineering. Bach of Sci in Mech Engr, University of Notre Dame, 1994; Master of Science, University of IL Urbana-Champaign, 1990; Philosophiae Doctor, Texas A&M University, 1997 (2001)

Dayle Seidenspinner-Nunez. Professor, Romance Languages and Literatures. Bachelor of Arts, University of California Berkeley, 1968; Master of Arts, ibid., 1971; Philosophiae Doctor, Stanford University, 1977 (1997)

Steven Wayne Semes. Associate Professor, School of Architecture; Director of Graduate Studies for the Historic Preservation Program, School of Architecture. Bachelor of Science, University of Virginia, 1975; Master of Architecture, Columbia University, 1980 (2005)

Satyajyoti Senapati. Research Assistant Professor, Chemical and Biomolecular Engineering. Philosophiae Doctor, University of Pune, 2006 (2006)

Anthony S. Serianni. Professor, Chemistry and Biochemistry. Bachelor of Science, Albright College, 1975; Philosophiae Doctor, Michigan State University, 1980 (1982)

David William Severson. Professor, Biological Sciences. Associate in Arts, Rochester Community College, 1970; Bachelor of Arts, Winona State University, 1975; Master of Science, University Wisconsin La Crosse, 1978; Philosophiae Doctor, University of Wisconsin-Madison, 1983 (1997)

Slav Christov Sevov. Professor, Chemistry and Biochemistry. Bachelor of Science, University of Sofia, 1983; Master of Science, ibid., 1985; Philosophiae Doctor, Iowa State University, 1993 (1995)

Sunny S Shah. Assistant Professional Specialist, College of Engineering. Bachelor of Science, University California Davis, 2006; Philosophiae Doctor, ibid., 2011 (2013)

Andrea Smith Shappell. Associate Professor Specialista, Center for Social Concerns; Assistant Director, Center for Social Concerns.. Bachelor of Arts, University of Notre Dame, 1979; Master of Theology, ibid., 1985 (1997)

Mei-Chi Shaw. Professor, Mathematics. Bachelor of Science, National Taiwan University, 1977; Master of Science, Princeton University, 1978; Philosophiae Doctor, ibid., 1981 (1987)

Susan Guise Sheridan. Associate Professor, Anthropology. Bachelor of Arts, University of Maryland, 1984; Master of Arts, ibid., 1986; Philosophiae Doctor, University of Colorado-Boulder, 1992 (1992)

John Francis Sherry. The Ray W. and Kenneth G. Herrick Chair in Marketing; Professor, Marketing; Concurrent Professor, Anthropology; Fellow, Kellogg Institute for International Studies; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, University of Notre Dame, 1974; Master of Arts, University of IL Urbana-Champaign, 1978; Doctor of Philosophy, ibid., 1983 (2005)

Zongqiao Shi. Research Assistant Professor, Chemistry and Biochemistry. Master of Science, Suzhou University, 1995; Philosophiae Doctor, Fudan University, 2001 (2011)

Christopher J. Shields. Professor, Philosophy; George N. Shuster Chair in Philosophy; Concurrent Professor, Classics. Bachelor of Arts, Bowling Green State University, 1979; Master of Arts, ibid., 1981; Master of Arts, Cornell University, 1984; Philosophiae Doctor, ibid., 1986 (2014)

Sophie Anne Shive. Associate Professor, Finance. Bachelor of Science, Cornell University, 1998; Master of Science, ibid., 2000; Philosophiae Doctor, University of Michigan, 2006 (2005)

Kristin Shrader-Frechette. The O’Neill Family Chair in Philosophy; Professor, Philosophy. Concurrent Professor, Biological Sciences; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, Xavier University, 1967; Philosophiae Doctor, University of Notre Dame, 1971 (1998)

Gina Venice Shropshire. Assistant Professional Specialist, Management. Bachelor of Arts, University of Notre Dame, 1983; Master of Arts, Purdue University, 1993; Philosophiae Doctor, ibid., 1999 (1998)

Joshua Shrouf. Associate Professor, Civil Engineering and Geological Sciences; Concurrent Associate Professor, Biological Sciences. Bachelor of Science, Northwestern University, 1994; Master of Science, Marquette University, 1998; Philosophiae Doctor, University of Iowa, 2002 (2007)

Anna Maria Simon. Assistant Professor, Physics. Master of Science, Jagellonian University, 2006; Philosophiae Doctor, ibid., 2010 (2014)

Antonio Simonetti. Associate Professor, Civil Engineering and Geological Sciences. Bachelor of Science, McGill University, 1987; Master of Science, ibid., 1989; Philosophiae Doctor, Carleton University Ottawa, 1994 (2008)

Stefanie Simonetti. Assistant Professional Specialist, Civil Engineering and Geological Sciences. Bachelor of Science, Eberhard Karl University of Tubingen, 1993; Master of Science, ibid., 1996; Philosophiae Doctor, McGill University, 2002 (2011)

Anne D. Simons. Professor, Psychology. Bachelor of Arts, Stanford University, 1974; Philosophiae Doctor, Washington University, 1982 (2010)
Faculty

Marcy Lynn Simons. Assistant Librarian, Hesburgh Libraries. Bachelor of Arts, Indiana University South Bend, 1997; Master Degree - Unspecified, ibid., 2002; Master in Library Science, Indiana-Purdue University Indpls, 2008 (1988)

Eric Russell Sims. Associate Professor, Department of Economics. Bachelor of Arts, Trinity University, 2003; Master of Arts, University of Michigan, 2006; Philosophiae Doctor, ibid., 2009 (2009)

Josh Skube. Associate Professional Specialist, Physical Education. Bachelor of Science, Indiana Univ-Bloomington, 1998; Master of Science, ibid., 2002 (2001)

Roxana Smarandache. Associate Professor, Mathematics. Bachelor of Science, University of Bucharest, 1996; Master of Science, University of Notre Dame, 1997; Philosophiae Doctor, ibid., 2001 (2012)

Christian Smith. The William R. Kenan Jr. Professor of Sociology; Professor, Sociology; Concurrent Professor, Theology; Fellow, Kellogg Institute for International Studies; Director, Center for Study of Religion and Society. Bachelor of Arts, Gordon College, 1983; Master of Arts, Harvard University, 1990; Philosophiae Doctor, ibid., 1990 (2006)

David Alan Smith. Professor, Psychology. Bachelor of Arts, University of Minnesota, 1983; Master of Arts, ibid., 1986; Philosophiae Doctor, SUNY at Stony Brook, 1991 (1997)

Bradley Dennis Smith. Emil T. Hofman Professor of Science; Professor, Chemistry and Biochemistry. Bachelor of Science, University of Melbourne, 1983; Philosophiae Doctor, Pennsylvania State University, 1988 (1991)

Peter Howard Smith. Professor, Music; Department Chair, Music. Bachelor of Music, The Juilliard School, 1986; Master of Music, ibid., 1986; Master of Arts, Yale University, 1987; Master of Philosophy, ibid., 1989; Philosophiae Doctor, ibid., 1992 (1991)

Brian James Smith. Assistant Professional Specialist, Civil Engineering and Geological Sciences. Bach of Sci in Civil Eng, University of Notre Dame, 2001; M.S. Civil Engr, Georgia Institute of Technolog, 2002; Philosophiae Doctor, University of Notre Dame, 2012 (2012)

Michelle Kimberly Smith Ware. Assistant Professional Specialist, First Year of Studies. Bachelor of Science, Xavier University, 2002; Master of Science, Springfield College, 2004 (2011)

Brian Brendan Smyth. Professor, Mathematics. Bachelor of Science, National University of Ireland Dublin, 1961; Master of Science, ibid., 1962; Philosophiae Doctor, Brown University, 1966 (1966)

Cheryl K. Snay. Assistant Professional Specialist, Suite Museum; Curator of European Art. Bachelor of Arts, Oakland University, 1987; Master of Arts, Michigan State University, 1991; Philosophiae Doctor, Pennsylvania State University, 2000 (2010)

Orlando Carter Snead. The William P. and Hazel B. White Director of the Center for Ethics and Culture; Professor, Law School; The William P. and Hazel B. White Director, Center for Ethics and Culture. Bachelor of Arts, Saint Johns College Main Campu, 1996; Juris Doctor, Georgetown University, 1999 (2005)

Gregory Lynn Snider. Professor, Electrical Engineering. Bachelor of Science, Calif St Poly U Pomona, 1983; Master of Science, University of California Sta Barbara, 1987; Philosophiae Doctor, ibid., 1991 (1994)

Dennis Michael Snow. Professor, Mathematics. Bachelor of Science, Merrimack College, 1975; Master of Science, University of Notre Dame, 1977; Philosophiae Doctor, ibid., 1979 (1982)

William D. Solomon. Associate Professor, Philosophy. Bachelor of Arts, Baylor University, 1964; Philosophiae Doctor, University of Texas-Austin, 1972 (1977)

Brittany Solomon. Research Assistant Professor, Management. Bachelor of Arts, University of Arizona, 2007; Master of Arts, Washington University, 2012; Philosophiae Doctor, ibid., 2015 (2015)

Yasmin Hana Solomonescu. Assistant Professor, English. Bachelor of Science, Carleton University Ottawa, 2001; Master of Philosophy, University of Cambridge, 2002; Philosophiae Doctor, ibid., 2007 (2011)

Andrew John Sommese. The Vincent J. and Annamarie Micus Duncan Professor of Mathematics; Professor, Applied Computational Mathematics & Statistics; Department Chair, Applied Computational Mathematics & Statistics. Bachelor of Arts, Fordham University, 1969; Philosophiae Doctor, Princeton University, 1973 (1979)

Elyse Deeb Speaks. Assistant Professional Specialist, Art, Art History, and Design. Bachelor of Arts, University of Notre Dame, 1997; Master of Arts, Brown University, 2001; Philosophiae Doctor, ibid., 2005 (2013)

Jeffrey Joseph Speaks. Professor, Philosophy. Bachelor of Arts, University of Notre Dame, 1997; Philosophiae Doctor, Princeton University, 2003 (2006)

Forrest Rule Spence. Assistant Professional Specialist, Department of Economics; Assistant Teaching Professor. Bachelor of Science, University of South Carolina, 2009 (2015)

D. Katherine Spiess. Associate Professor, Finance; Assistant Department Chair, Finance. Philosophiae Doctor, University of Missouri-Columbia, 1991; Bachelor of Science, ibid., 1994 (1991)

Lynette Patrice Spillman. Professor, Sociology; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Australian National University, 1982; Master of Arts, University of California Berkeley, 1985; Philosophiae Doctor, ibid., 1991 (1991)

Jeffrey Vincent Spoonhower. Assistant Professor, Film, Television, and Theatre. Bachelor of Arts, University of Notre Dame, 1999; Master of Fine Arts, Rochester Inst of Technology, 2002 (2012)
Jason Andrew Springs. Associate Professor. Sociology. Bachelor of Arts, Georgetown University, 1995; Master of Arts, Baylor University, 1996; Master of Divinity, Princeton Theological Seminary, 2000; Philosophiae Doctor, Harvard University, 2005 (2008)

Sharon Stack. Kleidost-Pezold Professor of Biochemistry. Ann F. Dunn and Elizabeth M. Riley Director, Mike and Josie Harper Cancer Research Institute; Professor, Chemistry and Biochemistry; Concurrent Professor, Biological Sciences. Bachelor of Science, Clemson University, 1981; Master of Science, East Tennessee State University, 1985; Philosophiae Doctor, University of Louisville, 1989 (2011)

Mark Allen Stadtherr. Keating-Crawford Chair in Chemical & Biomolecular Engineering II; Professor, Chemical and Biomolecular Engineering; Concurrent Professor, Applied Computational Mathematics and Statistics; Concurrent Professor, Applied Computational Mathematics & Statistics. Bachelor of Science, University of Minnesota, 1972; Philosophiae Doctor, University of Wisconsin-Madison, 1976 (1996)

John W. Stamper. Associate Dean, School of Architecture; Professor, School of Architecture. Bachelor of Science, University of IL Urbana-Champaign, 1973; Master of Architecture, ibid., 1975; Master of Arts, Williams College, 1977; Philosophiae Doctor, Northwestern University, 1985 (1984)

Joseph B. Stanfield. Associate Professional Specialist, College of Arts and Letters; Assistant Dean, Office of Arts & Letters Undergraduate Study. Bachelor of Arts, University of Georgia, 1985; Master of Arts, ibid., 1997; Philosophiae Doctor, University of London, 2001 (2006)

Zachary Ronald Stangebye. Instructor, Department of Economics. Bachelor of Science, University of Michigan, 2010 (2015)

Michael M. Stanisic. Associate Professor, Aerospace and Mechanical Engineering. Bach of Sci in Mech Engr, Purdue University, 1979; M.S. Mechanical Engr. ibid., 1982; Philosophiae Doctor. ibid., 1986 (1988)

Amy Stark. Assistant Professional Specialist, Biological Sciences. B.S. Biology, Valparaiso University, 2006; Philosophiae Doctor, University of Chicago, 2011 (2014)

John Joseph Staud. Professional Specialist, Alliance for Catholic Education; Concurrent Professional Specialist, Institute for Educational Initiatives; Sr. Director, Pastoral Formation and Administration. Bachelor of Arts, University of Notre Dame, 1987; Master of Arts, University of Michigan, 1990; Philosophiae Doctor, ibid., 1992 (1996)

Lucien Francois Steil. Associate Professor, School of Architecture; Fellow, Nanovic Institute for European Studies. Bachelor of Arch in Arch, Ecole des Beaux-Arts, 1980 (2010)

Marcus Stephens. Associate Professional Specialist, Film, Television, and Theatre. Bachelor of Arts, Southeast Missouri St Univ, 2004; Master of Fine Arts, Northwestern University, 2006 (2007)

James P. Sterba. Professor, Philosophy; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, La Salle University, 1966; Master of Arts, University of Pittsburgh, 1972; Philosophiae Doctor, ibid., 1973 (1973)

Jennifer Sustersic Stevens. Assistant Professor, Accountancy. Bachelor of Sci in Business, Miami University, 2001; Master of Accountancy, ibid., 2002; Philosophiae Doctor, Ohio State University, 2012 (2012)

Robert L. Stevenson. Professor, Electrical Engineering. B Electrical Engineering, University of Delaware, 1986; Philosophiae Doctor, Purdue University, 1990 (1990)

Kay Lorraine Stewart. Associate Professional Specialist, Freimann Animal Care Facility. Associate in Applied Science, Purdue University, 1982 (1985)

Thomas L. Stober. Associate Professor, Accountancy. B.S. Business Administration, Ohio State University, 1974; Master of Business Admin, University of Minnesota, 1975; Philosophiae Doctor, University of Chicago, 1983 (1995)

Stephan Alfred Stolz. The Rev. John A. Zahn, C.S.C., Professor of Mathematics; Professor, Mathematics. Bachelor of Science, University of Bielefeld, 1975; Master of Science, Rhenish Friedrich Wilhelm U Bo, 1979; Philosophiae Doctor, Johannes Gutenberg University of Mai, 1984 (1986)

Daniel Charles Stowe. Associate Professional Specialist, Music; Director, Glee Club; Associate Teaching Professor. Bachelor of Arts (Latin), University California Davis, 1984; Master of Music, University of Southern California, 1986; Master of Arts, Cornell University, 1989 (1993)

Aaron Striegel. Associate Professor, Computer Science and Engineering. Bachelor of Science, Iowa State University, 1998; Philosophiae Doctor, ibid., 2002 (2003)

Duncan G. Stroik. Professor, School of Architecture; Fellow, Nanovic Institute for European Studies. Bachelor of Architecture, University of Virginia, 1984; Master of Architecture, Yale University, 1987 (1990)

Leopold Stubenberg. Associate Professor, Philosophy. Bachelor of Arts, University of Graz, 1984; Master of Arts, University of Arizona, 1988; Philosophiae Doctor, ibid., 1992 (1990)
James Xavier Sullivan. Rev. Thomas J. McDonagh, C.S.C., Associate Professorship of Economics; Associate Professor, Department of Economics; Co-director Laboratory for Economic Opportunity. Bachelor of Arts, University of Notre Dame, 1993; Master of Arts, Northwestern University, 1997; Philosophiae Doctor, ibid., 2002 (2002)

Meghan Elizabeth Sullivan. Rev. John A. O'Brien Associate Professor of Philosophy; Associate Professor, Philosophy. Bachelor of Arts, University of Virginia, 2005; Bachelor of Philosophy, University of Oxford, 2007; Philosophiae Doctor, Rutgers State University of NJ, 2011 (2011)

Daewon Sun. Associate Professor, Management. Bachelor of Business Admin., Korea University, 1994; Master of Business Admin, Bowling Green State University, 1999; Philosophiae Doctor, Pennsylvania St University, 2004 (2004)

Liangliang Sun. Research Assistant Professor, Chemistry and Biochemistry. Bachelor of Science, Dalian University of Technolog, 2005; Philosophiae Doctor, Dalian Institute of Chemical P, 2011 (2011)

Rebecca Surman. Associate Professor, Physics. Bachelor of Arts, SUNY College at Geneseo, 1993; Master of Science, Michigan State University, 1995; Philosophiae Doctor, UNC at Chapel Hill, 1998 (2014)

Mary-Geraldine Navoa Svarovsky. Assistant Professional Specialist, Institute for Educational Initiatives and College of Engineering, Bachelor of Science, University of Notre Dame, 1999; Master of Education, ibid., 2001; Master of Science, University of Wisconsin-Madison, 2003; Philosophiae Doctor, ibid., 2009 (2014)

Christopher Richard Sweet. Research Assistant Professor, Computer Science and Engineering. B.S. Mathematics, University of Leicester, 2001; Doctorate Degree, ibid., 2004 (2005)

Zainulabeuddin Syed. Assistant Professor, Biological Sciences. Bachelor of Science, Osmania University, 1992; Master of Science, Aligarh Muslim University, 1994; Philosophiae Doctor, University of Neuchatel, 2002 (2011)

Gabor Szekelyhidi. The Rev. Howard J. Kenna, C.S.C., Memorial Associate Professor of Mathematics; Associate Professor, Mathematics. Bachelor of Mathematics, Trinity College Cambridge, 2002; Philosophiae Doctor, Imperial Coll of Science & Tec, 2006 (2011)

Alexandros A. Taflanidis. Associate Professor, Civil Engineering and Geological Sciences, Concurrent Associate Professor, Aerospace and Mechanical Engineering; Fellow, Kellogg Institute for International Studies. Bachelor of Arts, Aristotle University of Thess, 2002; Master of Science, ibid., 2003; Philosophiae Doctor, California Institute of Techno, 2007 (2008)

Wanpeng Tan. Research Associate Professor, Physics. B.S. Physics, Beijing University, 1994; Philosophiae Doctor, Michigan State University, 2002; Master of Science, Chinese Academy of Sciences, 2002 (2002)

Tetsuya Tanaka. Research Associate Professor, Chemical and Biomolecular Engineering. Bachelor of Science, Osaka University, 1992; Master of Science, ibid., 1994; Philosophiae Doctor, ibid., 1997 (2012)

Julie K Tanaka. Assistant Librarian, Hesburgh Libraries. Bachelor of Humanities, San Jose State University, 1997; Master of Arts, University California Irvine, 1999; Philosophiae Doctor, University of California Berkeley, 2006; M.S. Library Science, University of Washington, 2012 (2012)

Jennifer Leah Tank. The Ludmilla F., Stephen J., and Robert F. Gallo Professor of Biological Sciences; Professor, Biological Sciences. Bachelor of Science, Michigan State University, 1988; Master of Science, Virginia Polytechnic Institute, 1992; Philosophiae Doctor, ibid., 1996 (2000)

Carol E. Tanner. Professor, Physics. Bachelor of Science, University of IL Urbana-Champaign, 1980; Master of Science, University of California Berkeley, 1982; Philosophiae Doctor, ibid., 1985 (1990)

Melvin Raymond Tardy. Assistant Professional Specialist, First Year of Studies. Bachelor of Arts, University of Notre Dame, 1986; Master of Business Admin, ibid., 1990 (1990)

Richard Edmund Taylor. Professor, Chemistry and Biochemistry; Associate Vice President for Research. Bachelor of Science, SUNY College at Oswego, 1987; Master of Science, Rensselaer Polytechnic Institu, 1990; Philosophiae Doctor, ibid., 1992 (1995)

Katherine Ann Taylor. Professional Specialist, College of Science. B.S. Biology, Purdue University, 1979; Master of Science, University of Notre Dame, 1985; Philosophiae Doctor, Vrije Universiteit Brussel, 1997 (2009)

Nicholas Joshua Y. Teh. Assistant Professor, Philosophy. Bachelor of Arts, Princeton University, 2005; Master of Arts, University of Pittsburgh, 2008; Philosophiae Doctor, University of Cambridge, 2012 (2015)

Sandra M. Teixeira. Associate Professional Specialist, Romance Languages and Literatures. Bachelor of Arts, Pontific Cah University Sao Paulo, 1975; Master of Arts, ibid., 1975; Bachelor of Arts in Education, Faculade Mozarteum Sao Paulo, 1976 (2007)

Carmen Helena Tellez. Professor, Music; Concurrent Professor, Theology; Fellow, Kellogg Institute for International Studies; Fellow, Nanovic Institute for European Studies. Bachelor of Arts, Indiana Univ-Bloomington, 1980; Master of Music, ibid., 1982; Doctor of Music, ibid., 1989 (2012)

Ann Elizabeth Tenbrunsel. Professor, Management; Co-Director, College of Business Ethics; David E. Gallo Professor of Business Ethics. Bachelor of Science, University of Michigan, 1986; Master of Arts, Northwestern University, 1990; Philosophiae Doctor, ibid., 1995 (1995)

Faculty

Julia A. Thomas. Associate Professor, History. Bachelor of Arts (Latin), Princeton University, 1981; Master of Arts, University of Chicago, 1984; Philosophiae Doctor, ibid., 1993 (2001)

Christopher J. Wailer. The Gilbert F. Schafer Chair in Economics; Professor, Department of Economics. Bachelor of Science, Bemidji State University, 1981; Master of Arts, Washington State University, 1984; Philosophiae Doctor, ibid., 1985 (2003)
Laura Dassow Walls. William P. and Hazel B. White Professor; Professor, English; Concurrent Professor, American Studies. Bachelor of Arts, University of Washington, 1976; Master of Arts, ibid., 1978; Philosophiae Doctor, Indiana Univ-Bloomington, 1992 (2011)

Robert E. Walls. Assistant Professional Specialist, American Studies; Assistant Teaching Professor. Bachelor of Arts, University of Washington, 1980; Master of Arts, Indiana Univ-Bloomington, 1987; Philosophiae Doctor, ibid., 1997 (2011)

Chaoli Wang. Associate Professor, Computer Science and Engineering. Bachelor of Engineering, Fuzhou University, 1998; Master of Engineering, ibid., 2001; Philosophiae Doctor, Ohio State University, 2006 (2014)

Qiong Wang. Assistant Professional Specialist, Department of Economics; Assistant Professor of the Practice. Bachelor of Arts, Beijing Foreign Studies Univ, 2003; Master of Philosophy, Yale University, 2004; Philosophiae Doctor, ibid., 2010 (2015)

Lijuan Wang. Associate Professor, Psychology. Bachelor of Science, Renmin University Beijing, 2000; Master of Science, ibid., 2003; Master of Arts, University of Virginia, 2006; Philosophiae Doctor, ibid., 2008 (2008)

Wei Wang. Assistant Professional Specialist, East Asian Languages and Cultures; Assistant Teaching Professor. Bachelor of Arts, Capital Normal University, 2010; Master of Arts, University of Iowa, 2012 (2012)

Leonor Laverne Wängensteen-Moya. Assistant Professional Specialist, First Year of Studies. Bachelor of Arts, University of Notre Dame, 2003; Master of Arts, ibid., 2009 (2009)

David Bruce Watson. Andrew J. McKenna Family Professor of Psychology. Professor, Psychology. Bachelor of Science, Santa Clara University, 1975; Philosophiae Doctor, University of Minnesota of Minneapolis, 1982 (2010)

Stephen H. Watson. Professor, Philosophy. Bachelor of Arts, Carroll College, 1972; Master of Arts, Duquesne University, 1975; Philosophiae Doctor, ibid., 1980 (1983)

Joseph Peter Wawrykow. Associate Professor, Theology. Bachelor of Arts, University of Manitoba, 1978; Master of Arts, ibid., 1980; Master of Arts, Yale University, 1981; Master of Philosophy, ibid., 1985; Philosophiae Doctor, ibid., 1986 (1986)

Hannelore Helena Weber. Professional Specialist, German and Russian Languages and Literature; Teaching Professor. Bachelor of Arts, Mount Mary College, 1966; Master of Arts, University of Notre Dame, 1994 (1991)

Jerry C. Wei. Associate Professor, Management. Bachelor of Science, National Tsing Hua University, 1979; Master of Engineering, Rochester Inst of Technology, 1983; Philosophiae Doctor, Texas A&M University, 1987 (1987)

Na Wei. Assistant Professor, Civil Engineering and Geological Sciences. B.S. Engineering & Environ Sci, Sichuan University, 2006; Master of Engineering, University of I. Urbana-Champaign, 2008; Philosophiae Doctor, ibid., 2011 (2015)

Andrew J. Weigert. Professor, Sociology. Bachelor of Arts, Saint Louis University, 1958; Master of Philosophy, ibid., 1959; Master of Arts, ibid., 1960; Philosophiae Doctor, University of Minnesota, 1968 (1968)

Henry Michael Weinfield. Professor, Program of Liberal Studies; Concurrent Professor, English. Bachelor of Arts, City College of New York, 1970; Master of Arts, State University of NY--Binghamton, 1973; Philosophiae Doctor, City University of New York, 1985 (1991)

Paul Jude Weithman. Glynn Family Honors II Professor of Philosophy; Professor, Philosophy; Director, interdisciplinary minor, Philosophy, Politics, and Economics; Director, Honors Program in Arts and Sciences; Director, Interdisciplinary minor, Philosophy, Politics, and Economics. Bachelor of Arts, University of Notre Dame, 1981; Master of Arts, Harvard University, 1986; Philosophiae Doctor, ibid., 1988 (1990)

John P. Welle. Professor, Romance Languages and Literature; Concurrent Professor, Film, Television, and Theatre. Bachelor of Arts, Saint John’s University, 1974; M.A. Teaching, St Thomas College, 1975; Master of Arts, Indiana Univ-Bloomington, 1980; Philosophiae Doctor, ibid., 1983 (1983)

Susanne Wengle. Assistant Professor, Political Science. Bachelor of Science, London School of Economics, 2000; Master of Arts, University of California Berkeley, 2004; Philosophiae Doctor, ibid., 2010 (2015)

Timothy Weninger. Assistant Professor, Computer Science and Engineering. Bachelor of Science, Kansas State University, 2007; Master of Science, ibid., 2008; Philosophiae Doctor, University of I. Urbana-Champaign, 2013 (2013)

Sean Patrick Wernert. Associate Professional Specialist, First Year of Studies. Bachelor of Arts, Xavier University, 2002; Master of Arts, University Toledo, 2008 (2008)

Sarah E. West. Assistant Professional Specialist, Chemistry and Biochemistry; Teaching Professor. Bachelor of Arts, Augustana College, 1996 (1998)
Joannes J. Westerink. Joseph and Nona Ahbarn Professor of Computational Engineering and Science; Professor, Civil Engineering and Geological Sciences; Henry J. Massman Chairman of Civil and Environmental Engineering and Earth Sciences; Concurrent Professor, Applied Computational Mathematics & Statistics; Concurrent Professor, Aerospace and Mechanical Engineering; Concurrent Professor, Computer Science and Engineering. Bachelor of Science, State University of NY-Buffalo, 1979; Master of Science, ibid., 1981; Philosophiae Doctor, Massachusetts Institute of Tech., 1984 (1990)

Michelle A. Whaley. Professional Specialist, Biological Sciences; Fellow, Institute for Educational Initiatives; Teaching Professor, Biological Sciences. Bachelor of Arts, Scrpps College, 1987; Philosophiae Doctor, University of Notre Dame, 1993 (1993)

Sophie K. White. Associate Professor, American Studies; Concurrent Associate Professor, African and African American Studies; Concurrent Associate Professor, Gender Studies. Master of Arts, University of Edinburgh, 1980; Master of Arts, Cournauil Institute of Art, 1993; Philosophiae Doctor, ibid., 2000 (2001)

Jonathan Whitmer. Assistant Professor, Chemical and Biomolecular Engineering. Bachelor of Science, Kansas State University, 2005; Master of Science, University of Illinois-Chicago, 2009; Philosophiae Doctor, ibid., 2011 (2014)

Todd David Whitmore. Associate Professor, Theology; Concurrent Associate Professor, Anthropology; Fellow, Kellogg Institute for International Studies; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Arts, Wabash College, 1979; Master of Divinity, Harvard Divinity School, 1985; Philosophiae Doctor, University of Chicago, 1990 (1990)

Erin Nicole Wibbens. Assistant Profesional Specialist, Alliance for Catholic Education. Bachelor of Arts, University of Notre Dame, 2002; Masters in Education, Loyola University Chicago, 2006; Philosophiae Doctor, Michigan State University, 2013 (2013)

Thanuka L. Wickramaratne. Research Assistant Professor, Electrical Engineering. Bachelor of Science, University of Moratuwa, 2006; Master of Science, University of Miami, 2008; Philosophiae Doctor, ibid., 2012 (2012)

Michael Caspar Wiescher. The Frank M. Freimann Professor of Physics; Professor, Physics; Director, Joint Institute for Nuclear Astrophysics. Bachelor of Arts, University of Munster, 1972; Master of Arts, ibid., 1975; Philosophiae Doctor, ibid., 1980 (1986)

Steven Milo Wietstock. Associate Professional Specialist, Chemistry and Biochemistry; Teaching Professor, B.S. Chemistry, Alma College, 1982; Philosophiae Doctor, Uniformed Services Health Sci., 1988 (2005)

Matthew Wilkens. Assistant Professor, English; Concurrent Assistant Professor, American Studies. Bachelor of Arts, Coll of William & Mary, 1996; Master of Science, University of California Berkeley, 1998; Master of Arts, University of Wisconsin-Madison, 2000; Philosophiae Doctor, Duke University, 2006 (2011)

James Everett Willkie. Assistant Professor, Marketing. Bachelor of Business Admin., University of Notre Dame, 2005; Master of Science, Northwestern University, 2011; Philosophiae Doctor, ibid., 2012 (2012)

Richard Allen Williams. Associate Professor, Sociology. Bachelor of Arts, Creighton University, 1977; Master of Science, University of Wisconsin-Madison, 1981; Philosophiae Doctor, ibid., 1986 (1986)

Oliver F. Williams, CSC. Associate Professor, Management; Fellow, Joan B. Kroc Institute for International Peace. Bachelor of Science, University of Notre Dame, 1961; Master of Arts, ibid., 1969; Philosophiae Doctor, Vanderbilt University, 1974 (1973)

Rebecca Ann Winger. Elizabeth and Michael Gallagher Family Professorship in Adult Stem Cell Research; Assistant Professor, Biological Sciences. Bachelor of Arts, Muhlenberg College, 1999; Philosophiae Doctor, Harvard University, 2005 (2010)

Abraham Winitzer. Assistant Professor, Theology; Jordan H. Kapron Assistant Professor of Jewish Studies. Bachelor of Arts, Brandeis University, 1992; Master of Arts, ibid., 1995; Philosophiae Doctor, Harvard University, 2006 (2008)

Damrongkak Wirasat. Research Assistant Professor, Civil Engineering and Geological Sciences. Bachelor of Engineering, King Mongkut’s Inst of Tech-Th, 1997; Master of Engineering, ibid., 1999; M.S. Mechanical Engr, University of Notre Dame, 2005 (2008)

Michelle Marie Wirth. Assistant Professor, Psychology. Bachelor of Arts, Swarthmore College, 1999; Master of Arts, University of Michigan, 2003; Philosophiae Doctor, ibid., 2006 (2009)

Mark Wistey. Assistant Professor, Electrical Engineering. Bachelor of Science, Montana State University, 1994; Master of Science, Stanford University, 1999; Philosophiae Doctor, ibid., 2004 (2009)

Pamela Wójcik. Professor, Film, Television, and Theatre; Concurrent Professor, American Studies; Concurrent Professor, Gender Studies. Bachelor of Arts, Wellesley College, 1986; Master of Arts, University of Chicago, 1988; Philosophiae Doctor, ibid., 1993 (1998)

Christina Katherine Wobreck. Associate Professor, Political Science; Director, Rooney Center; Academic Director, Washington Program. Bachelor of Arts, Pacific Lutheran University, 1992; Master of Arts, Washington University, 1994; Philosophiae Doctor, ibid., 1997 (1997)

Eduardo E. Wolf. Professor, Chemical and Biomolecular Engineering. Bachelor of Science, University of Chile, 1969; Master of Science, University California Davis, 1972; Philosophiae Doctor, University of California Berkeley, 1975 (1975)

Nicole Lynn Woods. Assistant Professor, Art, Art History, and Design. Bachelor of Arts, UCLA, 1999; Master of Arts, ibid., 2005; Philosophiae Doctor, University California Irvine, 2010 (2013)
Faculty

Kaitlin Dunn Wowak. Assistant Professor, Management. Associate in Arts, Tacoma Community College, 2004; Bachelor of Science, University of Florida, 2006; Master of Science, Johns Hopkins University, 2008; Philosophiae Doctor, Pennsylvania State University, 2012 (2012)

Adam J. Wowak. Assistant Professor, Management. Bachelor of Science, Pennsylvania State University, 2000; Philosophiae Doctor, ibid., 2011 (2010)

Abigail Kaethe Wozniak. Assistant Professor, Department of Economics. Bachelor of Arts, University of Chicago, 1998; Master of Arts, University of Notre Dame, 2000; Philosophiae Doctor, ibid., 2005 (2005)

Timothy Everett Wright. Research Assistant Professor, Computer Science and Engineering; Assistant Director, Information Systems Security and Compliance, Center for Research Computing. Bachelor of Arts, Indiana University South Bend, 1991; M.S. Computer Sci and Engr, University of NC-Charlotte, 2000; Philosophiae Doctor, University of Notre Dame, 2009 (2009)

Melodie Wytenbach. Assistant Professor Specialist, Alliance for Catholic Education. Bachelor of Science, Saint Louis University, 2000; Master of Education, Mount Mary College, 2004; Master of Education Leadership, Marquette University, 2010 (2015)

Huili Xing. Professor, Electrical Engineering. Bachelor of Science, Peking University, 1996; Master of Science, Lehigh University, 1998; Philosophiae Doctor, University of California Sta Barbara, 2003 (2004)

Qiping Xu. Instructor, Finance. Bachelor of Arts, Zhejiang University, 2007; Master of Arts, Ohio State University, 2010; Master of Arts, ibid., 2010; Master of Arts, ibid., 2010; Master of Arts, ibid., 2010; Philosophiae Doctor, University of Chicago, 2015 (2015)

Xiaoshan Yang. Associate Professor, East Asian Languages and Cultures. Bachelor of Arts, Anhui Normal University, 1982; Master of Arts, Peking University, 1985; Philosophiae Doctor, Harvard University, 1994 (1997)

Weibing Ye. Assistant Professional Specialist, East Asian Languages and Cultures; Assistant Teaching Professor. Bachelor of Science, China Agriculture Univ., 2004; Master of Arts, Beijing Language & Culture Uni., 2010 (2014)

Chengxu Yin. Associate Professional Specialist, East Asian Languages and Cultures; Assistant Teaching Professor. Bachelor of Arts, Peking University, 1984; Master of Arts, University of Massachusetts, 1990 (2000)

Yoonhee Yoon. Associate Professional Specialist, East Asian Languages and Cultures; Coordinator, Korean Program. Bachelor of Science, Ewha Womens University, 1986; Master of Arts, University of Hawai Hawaii at Manoa, 2006; Philosophiae Doctor, ibid., 2010 (2013)

Kathleen Lira Yoon. Associate Professor, Psychology. Bachelor of Arts, Yonsei University, 1997; Master of Arts, ibid., 1999; Master of Science, Northwestern University, 2002; Philosophiae Doctor, ibid., 2006 (2014)

Kristofer Lee Yost. Assistant Professor, Naval Science. B.S. Political Science, University of Akron, 2006; MS in International Relations, Naval Postgraduate School, 2013; Undeclared, Urbana University, (2014)

Samir Younes. Professor, School of Architecture; Interim Associate Dean, School of Architecture. Bachelor of Science, University of Texas at Dallas, 1981; Master of Architecture, ibid., 1984 (1991)

Randall Carrington Zachman. Professor, Philosophy. Editor, Archive of Reformation History. Bachelor of Arts, Colgate University, 1975; Master of Divinity, Yale University-Div School, 1980; Philosophiae Doctor, University of Chicago, 1990 (1991)

Jeremiah Zartman. Assistant Professor, Chemical and Biomolecular Engineering. Bachelor of Science, University of Colorado, 2004; Master of Arts, Princeton University, 2006; Philosophiae Doctor, ibid., 2009 (2012)

William F. Zech. Assistant Professional Specialist, Physics. Associate in Science, Lake Michigan College, 1999; Bachelor of Science, Indiana University South Bend, 2002; Master of Science, University of Notre Dame, 2005; Philosophiae Doctor, ibid., 2009 (2009)

Zhiyong Zhang. Assistant Professor, Psychology. Bachelor of Arts, Renmin University Beijing, 2000; Master of Arts, ibid., 2003; Master of Arts, University of Virginia, 2005; Philosophiae Doctor, ibid., 2008 (2008)

Guangjian Zhang. Associate Professor, Psychology. Bachelor of Medicine, Tianjin Medical College, 1994; Masters in Education, Beijing University, 1999; Master of Science, Ohio State University, 2004; Philosophiae Doctor, ibid., 2006 (2006)

Siuyan Zhang. Nancy Dre Assistant Professor of Cancer Research; Assistant Professor, Biological Sciences. Doctorate of Medicine, Peking University, 1998; Philosophiae Doctor, National University of Singapore, 2005 (2012)

Wenhui Zhang. Research Assistant Professor, Chemistry and Biochemistry. Bachelor of Science, Beijing University of Iron and, 1999; Master of Science, ibid., 2002; Doctor of Philosophy, University of Notre Dame, 2009 (2013)

Xuying Zhao. Associate Professor, Management. Bachelor of Science, Zhejiang University, 2000; Master of Science, University of Texas at Dallas, 2005; Philosophiae Doctor, Zhejiang University, 2007 (2007)

Yongping Zhu. Associate Professor, East Asian Languages and Cultures; Department Chair, East Asian Languages and Cultures. Bachelor of Arts, Shaanxi Normal University, 1982; Master of Arts, ibid., 1987; Master of Arts, University of Minnesota, 1994; Philosophiae Doctor, ibid., 2002 (2013)

Yingxi Elaine Zhu. Professor, Chemical and Biomolecular Engineering; Concurrent Associate Professor, Chemistry and Biochemistry. Bachelor of Science, Tsinghua University, 1997; Philosophiae Doctor, University of IL Urbana-Champaign, 2001 (2004)

Maryam Meechka Jose Zomorodian. Assistant Professional Specialist, First Year of Studies. Bachelor of Arts, UCLA, 2002; Master of Arts, University of Chicago, 2003; Philosophiae Doctor, University of Notre Dame, 2013 (2013)

Pinar Zorlutuna. Assistant Professor, Aerospace and Mechanical Engineering. B.S. Biology, University of Ankara, 2002; Master of Science, Middle East Technical University, 2005; Philosophiae Doctor, ibid., 2009 (2014)

Michael P. Zuckert. The Nancy Reeves Dreux Chair in Political Science; Professor, Political Science. Bachelor of Arts, Cornell University, 1964; Philosophiae Doctor, University of Chicago, 1974 (1998)

Catherine Heldt Zuckert. The Nancy Reeves Dreux Chair in Political Science; Professor, Political Science. Bachelor of Arts, Cornell University, 1964; Master of Arts, University of Chicago, 1967; Philosophiae Doctor, ibid., 1970 (1998)
