

Quick Reference Guide - Class Search

The Class Search report is a filterable listing of all classes. The report contains two quick filters located directly at the top. The first quick filter is to select the desired term (single-term selection only). The second quick filter allows you to view courses that begin after a specific date (simply type the date and hit enter to apply).

The data table displayed defaults to aggregating the data up to the Course College and Academic Unit level. You can expand these views by clicking on the arrows next to them to drill down into the specific courses. Additionally, all the fields listed in the table are available as filters at the top, allowing you to narrow to only the results you would like to view at any given time.

At the top of the report are additional report tabs: Attribute w/filter, Instructor w/filter, Cross List w/filter and Co-req Break Out w/filter. These simplified views allow users the ability to easily narrow down the data results using the filters provided. For example, the 'Instructor w/ filter' would allow someone to see all courses that are being taught by a specific professor(s) by making a selection from the Course Section Affiliate Name filter.
