DESN 48105. BFA Thesis—Graphic Design

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student’s collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student’s area of interest, who serves as an advisor for the thesis project.

DESN 48203. BFA Thesis—Product Design

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student’s collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

DESN 48204. BFA Thesis—Product Design

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student’s collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student’s area of interest, who serves as an advisor for the thesis project.

DESN 48303. BFA Thesis

(3-0-3)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student’s collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

DESN 48305. BFA Thesis—DESN

(0-3-3)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

Center for Asian Studies**ASIA 20100. The Riddle of Korean Mythology**

(3-0-3)

This course aims to provide basic understanding of Modern Korean literature and drama. In this class, we will first briefly survey the history of Korean literature from 2000 years ago until now. Then we will select a few important literary texts to read. Through this lecture, students will be able to understand the various forms and contents, and important themes of Korean literature, through which deeper understanding of the lives and thoughts of the Korean people will be possible. Also, students will watch Korean TV dramas, popular in Korea and abroad, and through it have a chance to see and understand various aspects of Korean life. Through this introductory course, students will be prepared for a more in-depth study of Korean literature and culture.

ASIA 20101. Introduction to Chinese Civilization and Culture

(3-0-3)

Prerequisite: EALC 10112

This is a survey course that introduces the student with little or no knowledge of the Chinese language or culture to the major aspects of Chinese cultural tradition from the dawn of its civilization to the present time. Readings (in English translation) include traditional Chinese historical, philosophical, political, religious and literary texts as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to approach the Chinese texts from a comparative perspective. Course procedures and requirements: This course will use a combination of lectures, discussion and presentation by students. Movie documentaries will also be used from time to time. Reading assignments should be done before the lectures and in the sequence they are given in the course schedule for each class so that the students may be ready for discussion in class. Whereas their amount and level of difficulty vary, the texts always demand careful and thoughtful reading.

ASIA 20102. Culture, Media, and Entertainment in China Today

(3-0-3)

This course is designed to provide students with an introduction to aspects of contemporary Chinese culture, media, and entertainment. The class focuses on the development of China's media and entertainment industries, including the online industry, the music industry, advertising, television, and the film industry. Students will learn to critically analyze authentic cultural products, study their cultural and literary dimensions, and discuss how culture affects the political and economic aspects of these industries. This class aims to be interdisciplinary and is designed to accommodate students from a large range of academic interests, including business, marketing, political science, economics, communication, media studies, music, sociology, literature, film, cultural studies, and Asian studies. No prior knowledge of China or the Chinese language is required.

ASIA 20105. Introduction to Korea and Korean Culture

(3-0-3)

This introductory course is designed for students without extensive prior knowledge of Korea or Korean culture. Diverse aspects of Korea such as natural environment, history, religion, family relations, thought, literature and arts will be surveyed. Through this course, students will gain a greater appreciation and knowledge of Korean culture and literature, allowing them to engage in more advanced, in-depth study in subsequent semesters. The contemporary culture of Korea will be an important focus of the course, enriching students understanding of Korean society and culture today.

ASIA 20106. Intro to Modern South Asia

(3-0-3)

More than one-fifth of the world's population lives in South Asia, a region comprised of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan and the Maldives. This introductory course will provide a survey of issues and events in South Asian history from the establishment of British East India Company rule in 1757 to the decolonization of South Asia in

1947. The course will explore the following themes: the rise of a trading company, the East India Company, and its transition into a colonial power; the emergence of a colonial economy; colonial production of knowledge; nineteenth- and twentieth-century cultural, religious and political movements and formations of new identities; the emergence of elite and popular nationalisms; independence; and the partition of the subcontinent.

ASIA 20107. Understanding Korean Culture: Yesterday and Today
(3-0-3)

This course aims to help students to understand Korean society and culture. Starting from its unique historical background, students will explore and discuss various aspects of Korea such as religion, thoughts, literature, politics, arts, life styles and pop culture (“Korean Wave”) throughout the course. The in-depth examination of traditional features will guide students to extensive understanding of contemporary phenomena in Korea. Lecture-based teaching format will be enriched by a variety of supplementary channels such as movies, documentaries, and invited speakers in the field.

ASIA 20146. Music and Globalization in Asia
(3-0-3)

This course explores musical production in India and China, the “new cultural cores” that are gradually replacing the USA and Western Europe in cultural influence in Asia and the Asian diaspora. Taking into account these countries’ colonial and semi-colonial histories, their political and economic development, and the increasing transnational movement of their citizens, this course charts the development of commercially successful music from these countries—bhangra; Bollywood; Chinese pop; and fusion music popularized by bands like Twelve Girl Band and composers like Tan Dun in films like *Crouching Tiger, Hidden Dragon*—that have not only captured Asia but the West as well, and shaped the imagination of what Indian-ness and Chinese-ness are, both to the Chinese/Indians and non-Chinese/Indians. In addition, this course examines Filipino entertainers, a group of musicians who provide live entertainment of a transnational capacity throughout Asia. They represent important channels for the dissemination of Indian and Chinese popular music in that region. Globalization and cosmopolitanism theories will be discussed in this course.

ASIA 20148. Music and World Religions
(3-0-3)

Through this ethnomusicology course students will learn the roles music occupies in world religions. More than a world music course, we will examine the creative expression of the divine through the universal language of organized sound as music, as music plays a major role in the practice of most religions worldwide. This study involves all the major continents, highlighting new perspectives as to the confluence between religious culture and musical expression. Knowledge of music beneficial but not required, just open ears and minds to the diverse ontological understandings comprising various worldviews.

ASIA 20206. Modern Korean Literature and Drama in Translation
(3-0-3)

This course aims to provide basic understanding of modern Korean literature and drama. In this class, we will first briefly survey the history of Korean literature from 2000 years ago until now. Then we will select a few important literary texts to read. Through this lecture, students will be able to understand the various forms and contents, and important themes of Korean literature, through which deeper understanding of the lives and thoughts of the Korean people will be possible. Also, students will watch Korean TV dramas, popular in Korea and abroad, and through it have a chance to see and understand various aspects of Korean life. Through this introductory course, students will be prepared for a more in-depth study of Korean literature and culture.

ASIA 20301. Chinese Society and Culture
(3-0-3)

This course introduces students to the complexities of contemporary Chinese society in the context of the past. Topics covered include food, family and gender,

political activity, ethnicity and identity, urban and rural life, work and unemployment, economic complexity, multilingualism, arts, religion, medicine and the body, and literature.

ASIA 20304. Societies and Cultures of South Asia
(3-0-3)

This course provides a broad introduction to societies and cultures of South Asia (including India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, and the Maldives). Emphasis will be on the Indian subcontinent.

ASIA 20325. Business, Economics and Culture
(3-0-3)

Economic, political and cultural interactions between geographically distant groups have been intensifying over the past century and the 21st century is being seen as the Global century. In this rapidly changing world, it is becoming increasingly important to understand the role of cultural (religious, ethnic and political/socio-economic) factors in determining and shaping interactions. In this course, we will use an ethnographic-focused approach to explore the impact of cultural variations on many issues that have arisen or will potentially arise in the course of contemporary global economic interactions. These include the relationships between reciprocity, redistribution and market behaviors, cultural differences in business strategies, relationship building and formation of partnerships, marketing techniques, consumer behavior, and political and environmental situations. We will also look at the impact of business interaction on regional and local economies in Asia (India), Africa (Kenya and the Sudan) and Latin America (Mexico and Guatemala). Course work will include discussions based on readings, documentaries, an individual ethnographic project and report, and a final paper on the application of cultural factors for global interactions.

ASIA 20825. World Religions and Catholicism in Dialogue
(3-0-3) Gorski

A theological exploration of Hinduism, Buddhism, Taoism, Judaism, Islam and the relationship of Christianity to those religions. The goal of this exploration is specifically: 1) to set forth the essential characteristics of the world’s great religions; 2) to disengage the essential differences between Christianity and the other world religions; 3) to identify the distinctiveness of Catholicism within the family of Christian traditions; 4) to examine historically and systematically the Christian theological appraisal of other world religions. The ultimate goal of this course is to enable the students to gain a deeper understanding of Christianity by “passing over” into and experiencing as well as appraising the different major religious traditions of the world. To enhance the learning experience, the course will make abundant use of films. The students are required to attend class regularly and punctually. Indeed, strong emphasis is placed on the requirement to attend class faithfully. Students are allowed but one single absence during the semester.

ASIA 20828. Christianity and World Religions
(3-0-3) Malkovsky

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate Mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply in the spirituality of other traditions. By course end we ought to have a greater understanding of what is essential to Christian faith and practice as well as a greater appreciation of the spiritual paths of others. Requirements: Short papers, midterm exam, and final exam.

ASIA 20888. Survey of Pan-Asian Cinema
(3-0-3)

Corequisite: ASIA 21888

Historically, Asia represented massiveness in terms of area, population, and resources. In our present century, Asia will come to represent massiveness in

economic, technological, and military terms. Given the prominence of Asia as an integrated continent with renewed global significance, knowledge of this continent, its history, its people, its cultures, and its aspirations for the future become important to better understand the world we live in. This course is designed to provide insights into Asia by means of its cinema. The course is designed around weekly lectures, linked to a representative film, and augmented with discussions that integrate the critical readings with the films. We will cover a wide range of Asian nations and subjects ranging from popular commercial box office hits to critically acclaimed artistic masterpieces created by Asian filmmakers to highlight Asian experiences. Some of the national genres that we will address include Bollywood masala films, Japanese anime, Hong Kong martial arts, and Korean hallyu (culture wave). Prior knowledge of Asia and/or the cinema is not required. All films will be screened in their original languages with English subtitles. The course is designed to introduce students to Asia on a broad scale.

ASIA 21888. Survey of Pan-Asian Cinema—Lab

(0-0-0)

Corequisite: ASIA 20888

Certain films will be viewed for further discussion in class.

ASIA 23101. Chinese Literary Traditions

(3-0-3)

A survey course introducing students to the major themes and genres of Chinese literature through selected readings of representative texts.

ASIA 23301. Masterpieces of Classical Japanese Literature

(3-0-3)

This course was designed as a survey of Japanese poetry, fiction, and drama from the earliest times through the mid-18th century. All texts are in English; no special knowledge of Japan or Japanese is required. The course is divided into three parts. In Part I we will begin with the development of court poetry (*waka*) as found in the *Man-yōshū* (Collection of Ten Thousand Leaves), the *Kokinshū* (the first Imperial Anthology), and the *Tales of Ise*. The centerpiece of this unit, however, is Murasaki Shikibu's epic of courtly love, *The Tale of Genji* (ca. A.D.1000); we will read an abridged version of the first 17 chapters. In addition to social and historical factors influencing the development of a courtly aesthetic, we will also consider the influential role played by Buddhism and Chinese literature. In Part II, we will look at how Japanese literature developed during the medieval period (13th–16th centuries) of the samurai warrior-aristocracy with readings of plays from the No theater, linked verse (*renga*) and philosophical essays such as *An Account of My Hut* and *Essays in Idleness*. Of special interest here is the influence of Zen Buddhism on a wide range of aesthetic practices, including the tea ceremony, landscaping and painting. In Part III, we will study the “popular” literature of the 17th and 18th centuries, the products of a new merchant-class culture that flourished in Edo (now Tokyo), Kyoto and Osaka. The main topics will be haiku poetry by Matsuo Bashō.

ASIA 27463. Anti-Social Behaviors in Modern Chinese Fiction

(3-0-3)

Chinese society is often characterized as highly conformative and lacking in individuality. Is this true? What kind of behaviors then would be considered antisocial, and what are their moral, social, and political consequences? In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as antisocial, anticonventional, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications. For instance, are these behaviors justified? Are different standards applied to women? What are the temporal and spatial factors in people's conception of an antisocial behavior? To what extent are these behaviors culturally determined? No prior knowledge of the Chinese languages or China is required.

ASIA 30011. Asian-American Literature

(3-0-3)

This course will explore the development of Asian-American literature from the 1800s to the present, focusing on writers of Chinese, Filipino, Indian, Hmong, Japanese and Korean descent. Discussions will focus on questions of race/ethnicity,

identity/representation, nation and exile. Primary texts, including novels, short fiction, poetry, theory and film will be supplemented by critical articles. Some works to be discussed will include Carlos Bulosan's *America Is In the Heart*, Jessica Hagedorn's *Dogeaters*, Maxine Hong Kingston's *The Woman Warrior*, Faye Ng's *Bone*, John Okada's *No-No Boy*, in addition to other texts.

ASIA 30101. Chinese Ways of Thought

(3-0-3)

This lecture and discussion course on the religion, philosophy, and intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, Confucianism and Neo-Confucianism, and the later religious accommodation of Christianity and Islam.

ASIA 30104. Sex, Freedom, and Economy in Contemporary China

(3-0-3) Jensen

Today China is undergoing a revolution (a word used so frequently as to be meaningless, but very meaningful in this case as we will learn) in society, politics, economy, and thought perhaps as significant as that which brought the Chinese Communist Party to national power in 1949. The objective of this course, constructed through film and new media investigation, along with readings on social status, identity, sexuality, work, home, youth culture, gender, business, education, sports, and ecology, is to come to an understanding of the multiple domestic forces that have made China a global power. Furthermore, the course will familiarize the student with the very complex ramifications of the passionate national quest for international recognition as it affects every aspect of present-day life while exploring the mercurial manner in which the economic transformation of China has been represented in the media. In this last respect, it represents an experiment in cultural studies in that its avowed subject, contemporary China, is studied in dialogue with the United States—the two nations most exemplifying the promise and terror of modernization. No knowledge of Chinese or previous knowledge of China is required.

ASIA 30105. Introduction to Korean History and Culture

(3-0-3)

This introductory course is designed for students without extensive prior knowledge of Korea or Korean culture. Starting from its unique historical background, various aspects of Korea such as religion, thoughts, literature, politics, arts, life styles and pop culture (“Korean Wave”) will be explored and discussed throughout the course. The in-depth examination of traditional features will guide students to extensive understanding of contemporary phenomena in Korea. Lecture-based teaching format will be enriched by a variety of supplementary channels such as movies, documentaries, and so on. Students will have a presentation on their own topic related to Korean culture at the end of the semester.

ASIA 30106. Modern South Asia

(3-0-3) Sengupta

Home to over a billion people, just over 23% of humanity, the South Asian subcontinent is a fascinating laboratory in which to analyze the unfolding of such themes in modern history as colonialism, nationalism, partition, decolonization, post-colonial democracies, the modern state, economic development, center-region problems and relations between Asia and the West. The course will consider critical themes in social, political, economic, and cultural history, which will include imperialism, capitalism, nationalism, religious politics, regionalism, ethnicity, globalization, diaspora, ecology, social inequality, and gender, development, and democracy. It will not only provide a lively historical narrative told through lectures based on scholarly research and primary texts, but will also seek to embellish this narrative with the perception and articulation of vision and sound, as well as with readings from representative genres of South Asian literature.

ASIA 30107. Debating Empire: Themes from Modern South Asian History

(3-0-3)

This course introduces undergraduates to contentious themes in the history of British Empire in South Asia through a close examination of historiography. By focusing on the centrality of colonialism in instituting change and fundamentally transforming South Asian society, the course traces the emergence of dominant schools of South Asian (particularly Indian) historiography. Historical approaches to be examined include imperial and colonial historical writing, the Cambridge School, several forms of nationalist historiography (including secular and religious), Marxist perspectives, and the more recent Subaltern Studies collective, as well as critiques of these. Topics of analysis will include: 1) de-industrialisation and the colonial economy; 2) agriculture and the idea of private property; 3) the 1857 rebellion or *Sepoy Mutiny*; 4) continuity and change in eighteenth century India; 5) colonialism and its impact upon knowledge production; 6) gender and colonial law; 7) the construction of religious identities and communal violence in colonial India; 8) capitalist development or socialist planning; 9) affirmative action; and 10) environment and development. These debatable themes in South Asian history have generated an enormous corpus of literature, enabling us to problematize the relationship of the historian to facts by drawing attention to the ways in which diverse positions and perspectives privilege different categories, actors and modes of analysis. The course also looks at the role of history within the development of colonial governance and the rise of nationalist movements, and examines the relationship of different segments of the population to history and to the nation.

ASIA 30109. Chinese Literature and Religion

(3-0-3) Yang

This course examines interfaces of religion and literature in the Chinese tradition. Students are introduced to the essential teachings of Daoism, Buddhism, and Confucianism and ways in which such teachings are represented or reflected in literary works, including poetry, prose essays, and fiction.

ASIA 30110. Ancient Japan

(3-0-3) Thomas

History is not a single “true story,” but many competing narratives, each defined by values, interests, and political commitments. This course on ancient Japanese history provides an overview of three sets of competing narratives: first, the politically charged question of Japan’s origins, when we explore archeological evidence and chronicles of the Sun Goddess; second, the question of whether culture (through continental imports of writing, religious forms, and statecraft) or nature (as disease and environmental degradation) defined the Yamato state from the sixth to the ninth century; and, third, whether Heian court power rested on economic, political, military, judicial, or aesthetic grounds and if its foundations were undermined internally or by the invasion of the Mongols. In examining these competing narratives, we aim to develop the disciplined imagination necessary to enter another culture and another time.

ASIA 30115. Japan’s Imperial House

(3-0-3)

Japan boasts the longest, unbroken imperial line extant today, but what does this continuity really mean? This course looks at Japan’s emperors and empresses from antiquity to the present, raising questions about the nature of power, the idea of good government, gender, divinity, war responsibility, and the liberty of the family now called upon to symbolize a purportedly democratic nation. Although most of the course will focus on modern emperors, it begins with Japan’s earliest political structures in order to ask such questions as: Was the Imperial House an indigenous idea or was it an imitation of Chinese ideas of power? Why were there so many powerful women leaders in ancient Japan and why did Japan stop having empresses on the throne? What is the relationship between the imperial house and the various religions of Japan? The course will then consider the medieval and Tokugawa periods asking why powerful samurai failed to overthrow the militarily impotent emperors. Finally, the course will turn to the modern period, beginning in the middle of the 19th century with the elevation of the Meiji Emperor to unprecedented prominence. Why was the ancient imperial house used

to modernize Japan? Even though sex of emperors has been male for centuries, why were ancient emperors female and why is the imperial gender (and Japan as a whole) in the modern period often regarded as female? Was Hirohito guilty of fomenting war? What is the function of the Imperial House today? This course sweeps through myth and 1500 years of Japanese history, tracing the permutations, continuities, and discontinuities of the imperial line.

ASIA 30120. Modern Japan

(3-0-3) Thomas

This introduction to modern Japanese history focuses on political, social, economic, and military affairs in Japan from around 1600 to the early post-WWII period. It considers such paradoxes as samurai bureaucrats, entrepreneurial peasants, upper-class revolutionaries, and Asian fascists. The course has two purposes: 1) to provide a chronological and structural framework for understanding the debates over modern Japanese history, and 2) to develop the skill of reading texts analytically to discover the argument being made. The assumption operating both in the selection of readings and in the lectures is that Japanese history, as with all histories, is the site of controversy. Our efforts at this introductory level will be dedicated to understanding the contours of some of the most important of these controversies and judging, as far as possible, the evidence brought to bear in them.

ASIA 30125. Japan Through the Camera Lens

(3-0-3)

Japanese culture embraced the camera almost as soon as it was invented in Europe. Even while the Japanese government rigorously controlled contact with outside nations, this new device for recording and exploring the world entered a Japanese port and was put to use by Japanese and, eventually, by foreigners to document Japan’s opening to the West, its military adventures, its transformation into an industrial and consumer society, and its erotic longing. This course uses photography and film and writing about art and politics as a way of exploring key issues in Japanese society.

ASIA 30141. History of Chinese Medicine

(3-0-3)

In light of the contemporary currency of certain Chinese practices in the field of alternative medicine, this course will explore the phenomenon of Chinese traditional medicine in both its historical and contemporary settings. The first unit, *Medicine in Ancient China*, will explore the earliest medical ideas of the Chinese and will demonstrate how the state’s political unification gave rise to a correlative cosmology that not only included heaven and earth, but also human beings as integral elements of an organic cosmos. The second unit will explore the influences and contributions of Taoism (Daoism) and Buddhism to Chinese medicine and will explore what it meant to be both physicians and patients in late imperial China. The third unit will focus on medicine in contemporary China and will feature the experiences of Elisabeth Hsu, a student of Chinese medical anthropology who, as a part of her doctoral research, enrolled as a student in Yunnan Traditional Chinese Medical College between September 1988 and December 1989. We will conclude the course with a brief examination of the influence of Chinese medicine on the contemporary world.

ASIA 30145. Confucian China and its Modern Fate: A Broad Survey of Chinese History

(3-0-3) Murray

This course explores Chinese history from the Shang dynasty to today in terms of the development of Confucianism and its repeated reformulations in response to Buddhism, Western Imperialism, Marxism, and the global capitalism of today.

ASIA 30150. Modern China

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of the Qing dynasty) to the present. It will highlight China’s evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–1949, back to a period of strength under the Communist government from 1949 to the present.

Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

ASIA 30170. South Asia Before Europe

(3-0-3)

This course covers the history of the South Asian subcontinent from the beginning of the historical period to about 1700. During this period, the region witnessed the formation of regional states, the rise and fall of strong empires, the evolution of increasingly complex forms of caste and kinship ties, multiple religious traditions including Hinduism, Buddhism and Islam, and the coexistence of different economic organizations ranging from hunting and food-gathering to sophisticated urban communities. Discussion will focus on the transformation of local kinship ties into regional kingdoms and empires, the evolution of religion and the legacy of the expansion of Islam and the consequent rise of Turkish, Afghan and Mughal empires in the area. The main purpose of the course is to introduce students to South Asian civilization in a global context, with special emphasis on the wider linkages of transnational and world history. Finally, there will be a discussion of how interpretations of the South Asian past resonate in the region's modern politics. Besides learning about India this course will provide transferable skills about analyzing primary resources, seminar presentation and effective ways of using Internet resources.

ASIA 30189. South Asia: Colonialism and Nationalism

(3-0-3)

This course will examine the colonial encounter in the Indian subcontinent, i.e., the period of the advent, establishment, and collapse of British colonial power during the period roughly between 1750 and 1950. It will explore the nature of this encounter and its impact on the subcontinent, particularly the emergence of modern nationalisms and the making of the modern South Asian nation-states of India and Pakistan. Recent scholarship on British colonialism and Indian nationalism has been rich and diverse, examining areas ranging from the nature of "anti-colonial" nationalism to the impact on the economy, on state practices, social structures such as caste, peasant resistance, gender relations and modern history-writing itself. One of the objectives of the course is to introduce students to some of the major historical debates in South Asian history through the concepts of "nationalism", "colonialism" and "modernity." Another is to think about the ways in which this encounter has been represented in different kinds of texts ranging from scholarly texts to fiction and films.

ASIA 30280. International Relations in East Asia

(3-0-3)

This course explores the interactions of the states and societies in the East Asian region, focusing mainly on the relationships of China and Japan, their interactions with each other and with the outside-Asian powers, the United States, and Russia (Soviet Union). The first set of class discussions examines the China-centered system in East Asia prior to the intrusion of the new world system carried by Western imperialism. The course then turns to a discussion of this western impact: the colonization of most of the Southeast Asian societies, the reduction of China to a "semi-colony" and the subsequent process of revolution, both nationalist and communist, in that country, Japan's turn to "defensive modernization" and its own imperialism to ward off the West and claim status as a great power on a par with the Western countries.

ASIA 30301. Human Rights in the Age of Terrorism: The View from South Asia

(3-0-3)

This course will look at human rights and its continued relevance in the age of terrorism. Recent developments have shown the need for states to protect themselves and their populations from acts of terror while at the same time maintaining respect for human rights and the rule of law. This course examines how to uphold that balance and draws from the experience of Pakistan's involvement in the global fight against terror. It examines both the misuse of prevention of terrorism laws as well as the minimum safeguards and remedies that must be guaranteed and

provided if human rights are not to become the first casualty in the war on terror. There is no exam. Grades based 75 % on research paper; 25% on class participation. Students are expected to have done readings before the class.

ASIA 30302. Culture and Conflict in the Pacific

(3-0-3)

In recent years, many Pacific societies have been unsettled by conflict, military coups, crises of law and order, struggles for land rights, and battles over nuclear testing. This course introduces students to the diverse cultures of the Pacific by examining some of these contemporary conflicts in historical perspective. Topics of particular interest are indigenous rights, relations between indigenous people and migrants, and the role of outside powers in Pacific Island states. In addition to examining the indigenous cultures of the Pacific, we will compare and contrast societies in which indigenous islanders are disenfranchised minorities (as in Hawaii, New Zealand, and Australia) and those societies in which they are the dominant majority (as they are in Fiji and Solomon Islands).

ASIA 30305. Immigration in Comparative Perspective

(3-0-3)

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How is immigration related to urban "immigrant riots"? And what anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the U.S., Europe, Australia, and Japan will enable us to appreciate both global and U.S. distinctive trends. Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class; the mass-media; border enforcement; racism; the economy; territory and identity formation, and religion.

ASIA 30376. Place, Environment, and Society in Australia and Melanesia

(3-0-3)

Aboriginal Australian and Melanesian approaches to place have long intrigued and puzzled outsiders, challenging commonly-held assumptions about the division between nature and culture or between human societies and their physical environments. This course introduces students to some of these exotic approaches to place and encourages them to see their own environment in a new way. It also considers how indigenous Melanesian and Australian conceptualizations of place are being transformed through engagement with a global capitalist economy and in the context of modern nation states. How do notions of place change when land becomes a commodity? How are shifting connections to place transformed into legal ownership? What happens when kin networks are divided by national boundaries? Students will read several ethnographic monographs that convey a holistic sense of social life in particular locales. Topics that may be of particular interest include mythic and ritual relationships to the land, connections between language, place, and cultural identity, the ways that modern states enforce geographic boundaries, legal battles for land rights, and the relationship between global environmentalism and indigenous people.

ASIA 30403. Chinese Civilization and Culture

(3-0-3) Yang

This course surveys Chinese culture and civilization from the beginnings to the present time. Readings include traditional historical, philosophical, political, religious and literary texts as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to form comparative and reflective perspectives.

ASIA 30405. Introduction to Korean History and Culture

(3-0-3) Lee

This introductory course is designed for students without extensive prior knowledge of Korea or Korean culture. Starting from its unique historical background, various aspects of Korea such as religion, thoughts, literature, politics, arts, life

styles and pop culture (“Korean Wave”) will be explored and discussed throughout the course. The in-depth examination of traditional features will guide students to extensive understanding of contemporary phenomena in Korea. Lecture-based teaching format will be enriched by a variety of supplementary channels such as movies, documentaries, and so on. Students will have a presentation on their own topic related to Korean culture at the end of the semester.

ASIA 30412. Masterpieces of Classic Japanese Literature
(3-0-3)

This course was designed as a survey of Japanese poetry, fiction, and drama from the earliest times through the mid-18th century. All texts are in English; no special knowledge of Japan or Japanese is required. The course is divided into three parts. In Part I we will begin with the development of court poetry (*waka*) as found in the *Man-yōshū* (Collection of Ten Thousand Leaves), the *Kokinshū* (the first Imperial Anthology), and the *Tales of Ise*. The centerpiece of this unit, however, is Murasaki Shikibu’s epic of courtly love, *The Tale of Genji* (ca. A.D. 1000); we will read an abridged version of the first 17 chapters. In addition to social and historical factors influencing the development of a courtly aesthetic, we will also consider the influential role played by Buddhism and Chinese literature. In Part II, we will look at how Japanese literature developed during the medieval period (13th–16th centuries) of the samurai warrior-aristocracy with readings of plays from the No theater, linked verse (*renga*) and philosophical essays such as *An Account of My Hut and Essays in Idleness*. Of special interest here is the influence of Zen Buddhism on a wide range of aesthetic practices, including the tea ceremony, landscaping and painting. In Part III, we will study the popular literature of the 17th and 18th centuries, the products of a new merchant-class culture that flourished in Edo (now Tokyo), Kyoto and Osaka. The main topics will be haiku poetry by Matsuo Basho.

ASIA 30413. Introduction to Japanese Civilization and Culture
(3-0-3) Brownstein

The purpose of this course is to provide an overview of the historical development of Japanese civilization and culture from the prehistoric era up through the 19th century. The course is intended for students with little or no knowledge of Japan. Topics to be covered include Japanese geography, historical periods, changing class structure and political organization, and continental influences on Japanese civilization, especially Chinese literature, Buddhism and Confucianism. Students will also explore how values changed as seen through literature, drama and the arts. The format of the course is lecture/discussion, supplemented by a variety of visual materials. All readings are in English and there are no prerequisites for the course.

ASIA 30463. Comparative Economy of India and China
(3-0-3)

This course compares India and China’s different paths to political development in light of their history, institutions, and relations with the West.

ASIA 30465. Chinese Politics
(3-0-3)

Study of the contemporary Chinese political system and process in the light of Chinese history and culture. Some of the topics treated include: the traditional political order; the revolutionary movements; the rise of communism; Maoism and the rejection of Maoism; the political structure; leadership, personalities, and power struggles; economic policy; social policy and movements; problems of corruption and instability; prospects for democratic development. There will be some attention to Taiwan and to Hong Kong as special Chinese societies.

ASIA 30467. Introduction to South Asian Politics
(3-0-3)

This course will present an overview of the politics of modern South Asia focusing on Afghanistan, Bangladesh, India and Pakistan. We will begin by studying the impact of the British colonial experience, the rise of nationalism and the emergence of independent nation states. To develop a broad understanding of the political and economic experience of the region we will spend time analyzing the four countries individually before moving on to explore four important themes in political science: First, regime choice and regime survival in the four countries.

Second, the role of women in the development experience. Third, identity politics and the emergence of violent domestic and international movements. Fourth, international relations focusing on the role of three key actors—the U.S., China and the Middle East in regional politics.

ASIA 30476. Political Movements in Asia
(3-0-3)

This course analyzes a wide range of political movements including nationalist and revolutionary movements, guerrilla insurgencies, terrorist organizations, democracy movements, and peace movements. The regional scope covers East Asia, Southeast Asia, and South Asia. To understand various movements, we will study global trends, human rights values, cultural differences, religious doctrines, historical legacies, state-society relations, leadership skills, mobilization strategies, and violent vs. nonviolent trajectories. In addition to analytical readings, we will also watch a series of documentaries and read a number of prominent (auto) biographies.

ASIA 30608. The Worlds of Buddhism
(3-0-3)

A thematic introduction to the pan-Asian (i.e., South, Southeast, and Central Asian as well as East Asian) Buddhist tradition exploring the fundamentals of Buddhist doctrine and practice while also sampling major themes in the religion’s social, cultural, and material history. Among the particular topics to be covered are: the life of the Buddha (history & hagiography), the “Four Noble Truths” (the essentials of the Buddhist “creed”), the Buddhist canon (the nature and scope of Buddhist scripture), Buddhist cosmology (Buddhist conceptions of the formation and structure of the universe, i.e., of time and space), Buddhist monasticism, meditation and the Buddhist contemplative life, Buddhist ethics, the ritual lives of Buddhists, Buddhism and politics, Buddhist “family values,” Buddhism and the arts, etc.

ASIA 30609. Buddhism in China
(3-0-3)

Buddhism is the only one of the major religions traditionally regarded as Chinese that did not originate in China. China is arguably the Asian civilization in which Buddhism underwent its most extensive development and its most thoroughgoing transformations. This course is designed to be a thematic and historical overview of the development of Buddhist thought and practice in China with special emphasis on the process of mutual influence by which Buddhism, without ceasing to be Buddhist, became also a Chinese religion while China, without abandoning its indigenous religious heritage, became also a Buddhist culture. As such the course will serve a threefold purpose: it will introduce students to fundamental Buddhist beliefs and values as they took shape in China; it will acquaint them with essential elements of Chinese civilization attributable to Buddhism’s presence; and it will provide an opportunity to study what may well be world history’s most remarkable instance of successful cross-cultural religious communication.

ASIA 30611. Buddhist Meditation Traditions
(3-0-3)

Relying chiefly on English translations of primary, mostly east Asian canonical sources, this course will examine varieties of Buddhist meditation practice while posing theoretical questions about the nature of meditation as a form of religious life; its ethical implications; its relations with other elements of Buddhism like doctrine, ritual, art institutions; etc.—all considered against the background of theological and philosophical concern with the role of contemplative experience in the religious life.

ASIA 30612. Buddhism in Practice
(3-0-3)

An introduction to Buddhism in East Asia (principally China, but also Japan, Korea and Vietnam) with emphasis less on what Buddhists think or believe and more on what they actually do in their public as well as private lives—e.g., the rituals they perform; their disciplines of self-cultivation; the institutions they establish; the ethical, political and economic decisions they make.

ASIA 31105. Masters of Contemporary Chinese Cinema - Lab
(0-2-0)

Corequisite: ASIA 33105

This introductory film course showcases master directors and major films from China, Hong Kong and Taiwan. Students will learn to appreciate Chinese cinema both for its content and techniques, while familiarizing themselves with social and political changes under which these films were produced in Greater China. We will examine cinematic accomplishments by master directors and analyze how they recreate for the audience different Chinese societies on the screen. This course is taught in English. No prior knowledge of Chinese is required.

ASIA 31314. Cruel Stories of Youth: Children and Teens in Japanese Film Lab

(0-0-0)

Corequisite: ASIA 33314

Corequisite discussion lab for 33314 Cruel Stories of Youth.

ASIA 31316. Introduction to Japanese Pop Culture Lab

(0-0-0)

Corequisite: ASIA 33316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity to the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? Knowledge of Japanese is not required.

ASIA 33101. Heroism and Eroticism in Chinese Fiction

(3-0-3)

In this course we will read works in Chinese fiction from the late Imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which coincided with a general trend of “domestication” in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation, and no prior knowledge of China or the Chinese language is required.

ASIA 33103. 20th-Century Chinese Literature

(3-0-3) Ge

In this course we will read English translations of works in twentieth-century Chinese literature, especially short stories and plays written from the May 4th Movement in 1919 to the beginning of the Reform in the early eighties. We will discuss the literary expressions of China’s weal and woe in modern times and of the Chinese people’s frustrations and aspirations when their country was experiencing unprecedented social changes. No prior knowledge of the Chinese language or Chinese culture is required for taking the course.

ASIA 33105. Masters of Contemporary Chinese Cinema

(3-0-3)

Corequisite: ASIA 31105

This introductory film course showcases master directors and major films from China, Hong Kong and Taiwan. Students will learn to appreciate Chinese cinema both for its content and techniques, while familiarizing themselves with social and political changes under which these films were produced in Greater China. We

will examine cinematic accomplishments by master directors and analyze how they recreate for the audience different Chinese societies on the screen. This course is taught in English. No prior knowledge of Chinese is required.

ASIA 33108. Anti-Social Behaviors in Modern Chinese Fiction
(3-0-3) Lin

Chinese society is often characterized as highly conformative and lacking in individuality. Is this true? What kind of behaviors then would be considered antisocial, and what are their moral, social, and political consequences? In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as antisocial, anticonventional, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications. For instance, are these behaviors justified? Are different standards applied to women? What are the temporal and spatial factors in people’s conception of an antisocial behavior? To what extent are these behaviors culturally determined? No prior knowledge of the Chinese languages or China is required.

ASIA 33110. New Chinese Cinema

(3-0-3)

This class explores “underground” films produced in Mainland China since the 1980s. Many films that were produced illegally or banned in China have garnered awards in prestigious international film festivals—Cannes, Berlin, Venice, Toronto, Tribeca (and the list runs on). How and in what ways were the films subversive? What is the role of China as a nation and state in the production of film today and in the past? How do these films play to the international film festival circuit and international market? Is commercialization bringing about less government control of film and other media in China? The class will view both feature films and documentaries, including those unavailable in the U.S. (but all with English subtitles). No prior knowledge of Chinese language, culture, or history is required.

ASIA 33111. Chinese Literary Dreams and Dream in the Red Chamber

(3-0-3)

Dreams have long been objects of fascination for people in all cultures, including the Chinese. Focusing on the eighteenth-century Chinese master work *Dream of the Red Chamber*, this course examines the literary functions of dreams in the Chinese context. Dreams will be discussed as a catalyst in the process of fiction making, serving as a master trope for the “complementary oppositions” between truth and falsehood, between history and literature, between reality and fictionality, and between the subliminal and the supernatural. The goal of the course is to familiarize students with a novel that is generally considered the pinnacle of Chinese fictional literature and with some of the cultural convictions that underscore Chinese literary dreams. The primary text of the course is the 5-volume English translation of *Dream of the Red Chamber*. Supplementary readings include scholarship on the novel and modern theories on dream and the unconscious. Prior knowledge in Chinese language and culture not required.

ASIA 33112. Readings in Chinese Drama

(3-0-3)

This course studies a number of works in Chinese dramatic traditions from the premodern times up to the twentieth century. While attention will be paid to Chinese theater as performing art, the plays selected for this course will be studied primarily as literary texts. The purpose of the course is to familiarize students with some of the most outstanding formulations in Chinese drama and their underpinning cultural meanings. All readings are in English translations, and no prior knowledge of Chinese culture or language is required.

ASIA 33155. Multi-Cultural China

(3-0-3)

This course showcases the multifaceted aspects of China not only in the ethnic sense but also in the political sense. We will read literary works by writers of different ethnic backgrounds (e.g., Han, Tibetan, the Atayal tribe from Taiwan) and geographical origins (the PRC, Taiwan and Hong Kong). The objective of this course is to help students to gain a deeper understanding of the notion of Greater China and the concept of “Chineseness.” Through analyzing works by

different ethnic writers, we will learn to appreciate the diversity of Chinese culture that is often overshadowed by a misconception about Chinese homogeneity. Likewise, fictional creation by writers from the three regions will give us a broader knowledge of Chinese culture that is constantly threatened by a political need for unity. This course is taught in English and no prior knowledge of the Chinese languages is required.

ASIA 33240. Political Economy of Development

(3-0-3)

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include; rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, failed state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

ASIA 33301. Love and Death in Classical Japanese Drama

(3-0-3)

Love, death and revenge were major themes in Noh, Kabuki, and Bunraku, the three main forms of traditional Japanese drama. During the first weeks of this course, we will read plays from the Noh theater, which evolved out of a variety of performing arts and reached maturity in the fifteenth century under the patronage of the samurai aristocracy. In an effort to create an atmosphere of mystery and beauty, the plays transformed episodes from folk tales, courtly romances, and military epics into highly stylized dance-dramas imbued with the austere aesthetic of Zen Buddhism. In the play *Asumori*, for example, we witness a confrontation between the ghost of Taira Atsumori, a young warrior, and Kumagai no Jiro Naozane, the man who killed him in battle. In another play, *Dojoji*, a young woman turns into a giant serpent to kill the man who deceived her.

ASIA 33302. Human Rights Environment and Development in South Asia

(3-0-3)

The course, with the help of real-world cases, will identify that the issues of development, human rights, and the protection of the environment are of great importance to all of human society. They assume critical importance in South Asian countries where the issues are intricately linked to complex socio-political and economic factors. At first glance, development would appear to be instrumental, the prime vehicle for promoting the realization of human rights, in particular economic rights such as the right to an adequate standard of living, the right to work, the right to social security, right to education, the right to food and to the right to housing. Environmental preservation and rehabilitation also should be achieved through development. It is a sad fact however, that the development projects in the South Asian countries have overtaken poverty as the single largest cause of human rights violations and environmental degradation. Many development projects that should have brought well-being to local populations have, in fact, brought violations of human rights and environmental degradation.

ASIA 33309. Japanese Literature in the 1990s

(3-0-3)

This course looks at the Japanese literary boom of the 90s as a literary project of re-remembering the past and intervening in the present. In the last decade and a half, Japan has undergone a transformation from the economic miracle of the 60s and 70s to economic recession, and with the recession, many of the values that helped to sustain high economic growth have come to be questioned: strict gender differentiation, dedication to the company for men and to the home for women, frugality, sacrifice of the personal for the social, emphasis on high growth policies at the risk of the environment, a resurgence in narratives of national homogeneity,

etc. In this course, we will look at work by Japanese writers from the beginning of the recession until today, thinking about the way that writers are problematizing previous homogenous notions of gender, ethnicity and race; raising questions about the costs of high economic growth on society's subalterns; rethinking the emblem of that growth, the salary man, who has lately become a favorite butt of dissatisfaction; rethinking the as-of-yet unresolved significance of an ambitious and often cruel imperialist war on the Asian mainland; and finally, we will think about the significance of globalization and nationalism in Japanese literature.

ASIA 33310. The Japanese Empire and Literature

(3-0-3)

Japan emerged on the global stage as an imperialist power with the defeat of China in 1895 (over Korea) and the defeat of Russia in 1905 (again, over Korea). By the end of the First World War, the Japanese Empire included Taiwan, Korea, the south Pacific islands called Nan-yang, and the southern half of Sakhalin, not to mention the late 19th-century acquisitions Okinawa and Hokkaido. Hardly a static referent from 1895 until its dismantling upon defeat in 1945, the "Japanese Empire" must have meant something terribly different, depending on whether you were a Japanese national or colonial subject; a man or a woman; in the military or a man of letters; a domestic worker or colonial settler; businessman or maid. Even within the Japanese archipelago—indeed, even at the height of government censorship on cultural production in the early- to mid-40s—the meaning of the "Japanese Empire" was a site of cultural contestation. This class looks at the literary and artistic production—fiction, memoirs, poetry, film, visual arts, and drama of the 50-year rise and fall of the Japanese Empire. A current of this class deals with the inter-Asian, Bolshevik-inspired organizations that looked to Japanese radicals, with no little irony, for solidarity in the fight against Japanese imperialism.

ASIA 33311. Reading the Japanese Woman in Literature

(3-0-3)

The Japanese woman is a favorite site of fantasy and anxiety, both in Japan and abroad. From the famously demure Madame Chrysantheme of Pierre Loti's late 20th century novel to the sassy Modern Girl of the roaring 20s to contemporary busy batlin' babes, the Japanese woman has been available as a site of cultural imagination, and those images often tell us less about real Japanese women than they do about the dreams and nightmares of those doing the imagining. This class focuses on important works that variously glorify, orientalize, and/or trouble the idea of the Japanese woman in literature—both in Japan and in the West—over the past centuries. Readings will also include theoretical, historical, anthropological, sociological and popular sources.

ASIA 33312. Labor and Literature in Modern Japan

(3-0-3)

The modernization project begun in the late 19th century relied on new and changing labor relations and roles in order to transform Japan into a modern nation-state in a short fifty years. Central to the way men and women relate to their society, labor consequently figured prominently albeit quite differently in the literature of the early 20th-century elite as well as in the labor-conscious literature that emerged in the 20s and 30s. With "labor" as the organizing principle, then, we'll think about the intersections of gender/sex, class, and subjectivity; theories of the transformation from a feudal society to a modern one; a bourgeois and a proletarian class ethos; politically engendered "proletarian literature;" the significance of agrarian versus urban labor; Marxist/Socialist critiques of the exploitation of labor by capital; the relationship of nation-state to empire to labor; and the place of literature and its relationship to labor in Japan.

ASIA 33313. Japanese Literature in the 1990s: Lost and Found in Contemporary Japan

(3-0-3)

The bursting of the high growth economic bubble in Japan in 1991 revealed that some of the costs of high economic growth—such as socially prescribed gender differentiation which urged dedication to the company for men and to the home for women, tremendous pressure put on children to achieve academically at ever-younger ages, and emphasis on high growth policies at the risk of the environment—were simply too great to bear unreflectingly anymore. The 90s,

then, knows itself as a “lost” decade, a decade in which an American, Alex Kerr, won a prestigious literary prize for his non-fictional *Lost Japan* (originally written in Japanese); a decade in which international best-seller Murakami Haruki continuously rejects the tenets of the past decades—family and company—for a fluffy lyricism of loneliness; a decade in which the resurgence of millenarian cults captivated readers and writers; a decade featuring apocalyptic animation and adult comics; a decade well suited to the noir detective novel, with its seamy underside and lack of redemption; a decade in which even the awarding of the Nobel Prize for Literature to Oe Kenzabur in 1994 served ironically to question whether Japan has lost its tradition of high literature. As the “lost” narratives of multiply, however, so too do the “found” narratives, whether they take the forms of neo-nationalism, personal memoir, post-national globalism, estheticized alienation, or other. As the most salient features of the 90s continue, this class is also about the way that the present knows the past.

ASIA 33314. Cruel Stories of Youth: Children and Teens in Japanese Film

(3-0-3) Shamooin

Corequisite: ASIA 31314

From the wide-eyed children of anime to the crazy street fashions of Harajuku, images of kids and teens in Japanese popular culture are now distributed and consumed around the world. How then are those young audiences depicted and addressed within Japanese popular culture? What aspects of childhood or teen identity are repeated across generations? In order to answer these questions, we will look at Japanese films, including animation, from across the 20th century that represent children and teens from a variety of perspectives, from the celebration of innocence to the threat of juvenile delinquency. In addition to analyzing representations of children and teens, students will also gain familiarity with Japanese film history and genres, and develop the critical vocabulary of film analysis. Films will include *I Was Born But*, *Crazed Fruit*, *A Cruel Story of Youth*, *Battle Royale*, *All About Lily Chou Chou*, *Nobody Knows*, *Grave of the Fireflies*, and *Akira*. All films will be subtitled. There will also be secondary readings in cultural studies and film studies, relating to the films we watch in class. Assignments will include an oral presentation, several short writing assignments, a film viewing journal, and a longer paper.

ASIA 33315. Men and Women in Modern Japanese Literature

(3-0-3) Shamooin

In 20th-century Japan, as old roles such as samurai and geisha waned, both men and women had to re-define the characteristics and meaning of masculinity and femininity. This course will look at constructions of gender in modern Japanese literature by both female and male authors. As we discuss both normative and deviant depictions of male and female roles, some topics we will address include: men and women at work and at war, marriage and family life, homosociality and homosexuality. Students will also gain familiarity with some of the major authors, genres, and literary movements of modern Japanese literature. Texts will include *Kokoro* by Natsume Soseki, *Confessions of a Mask* by Mishima Yukio, *Diary of a Vagabond* by Hayashi Fumiko, and short stories by Higuchi Ichiyo, Kono Taeko, and Oe Kenzaburo. This course is taught in English and no knowledge of the Japanese language is required.

ASIA 33316. Introduction to Japanese Pop Culture

(3-0-3)

Corequisite: ASIA 31316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasize the theoretical distinctions between those media. Rather than following a chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What role did foreign influences, most importantly, American

pop culture play? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? This course is taught in English and no knowledge of the Japanese language is required.

ASIA 33317. The Samurai In Classical Japanese Literature

(3-0-3)

The sword-wielding Samurai warrior is perhaps the most familiar icon of pre-modern Japan, one that continues to influence how Japanese think of themselves (and how others think of them) even in modern times. Who were the Samurai? How did they see themselves? How did other members of Japanese society see them? How did the role (and the image) of the Samurai change over time? To answer these questions, we will explore at the way Samurai were depicted in historical chronicles, fiction and drama, primarily from the 13th century through the 18th century. All readings will be English translation and no previous knowledge of Japan is required.

ASIA 35340. Anthropology of Globalization

(3-0-3)

This course analyzes contemporary patterns of globalization drawing on recent ethnographies. We will briefly overview the historical antecedents of globalization, and then proceed to analyze globalization's cultural, socio-political, and economic complexity, often resulting in urbanization. In particular, we will tackle the global circulation of food, entertainment, fashion, capital, ideologies, violence, religious practice, migrant/trafficked labor, and even of so-called “anti-globalization” movements. Examples of specific topics include youth and free trade in Latin America; cyber-politics among transnational Chinese, Eritreans, and others; McDonald's and consumerism in Moscow; Indian cinema and global media. By locating global processes in everyday practice, we will come to understand the interconnectivity sustaining globalization, and the resulting practices of resistance. More broadly, we will appreciate on the one hand how various cultures and societies become increasingly interconnected, and on the other how people around the world appropriate large-scale processes in culturally specific ways. The course emphasizes anthropology's role as a discipline that is globally relevant and publicly engaged. Accordingly, we will focus on the discipline's methodological and theoretical contributions in the study of globalization and its inequalities, and toward a more socially just world. The course will also equip you to design and implement an original research project, and to write an ethnographic account based on such project.

ASIA 35360. Immigration in Global Perspective

(3-0-3)

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How is immigration related to urban “immigrant riots”? And what can anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the U.S., Europe, Australia, and Japan will enable us to appreciate both global and U.S. distinctive trends. Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class; the mass media; border enforcement; racism; the economy; territory and identity formation, and religion.

ASIA 40123. American Occupation of Japan

(3-0-3)

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The “Basic Initial Post-Surrender Directive” charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort, namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The big question—one that we will return to again and again in our discussions—is what is democracy and how is it created and sustained?

ASIA 40180. Gandhi's India

(3-0-3) Sengupta

The dominant figure in India's nationalist movement for nearly thirty years, M.K. "Mahatma" Gandhi has also been the twentieth century's most famous pacifist, and a figure of inspiration for peace and civil rights movements throughout the world. This course offers an examination of Gandhi and the nature of his unconventional and often controversial politics. It charts Gandhi's career against the background of events in London, South Africa, and India. Examines the evolution and practical application of his ideas and techniques of non-violent resistance, and his attitudes toward the economy, society and state. Gandhi's influence on Indian politics and society is critically assessed and his reputation as the "apostle of non-violent revolution" examined in the light of developments since his death in 1948. Some of the questions that will be discussed are: How far did the distinctive character of Gandhian politics derive from his absolute commitment to India's nationalist struggle? Was his success due to the force and originality of his political ideas and his advocacy of nonviolent action? Can his achievements be explained by political wiliness and pragmatism, or by willingness to embark on new experiments with the truth? Though helpful, a prior knowledge of Indian history is not required for this course.

ASIA 40185. History from Below: Colonialism, Nationalism, and Subalterns

(3-0-3)

This course introduces advanced undergraduates and graduate students to methods of doing and writing history that intervene within dominant historical narratives and frameworks by redefining historians' relationships with sources and the questions asked of them. The Subaltern Studies collective that emerged from South Asia in the 1980s and 1990s is now recognized as one of the more important historical interventions in recent years. Subaltern Studies' historiographic writing has questioned dominant nationalist narratives by arguing that they represent only the history of elites. The objective of the course is to draw attention to differing understandings of colonialism and nationalism by laying out the perspectives of subalterns—untouchables, tribals, peasants, workers, women and other marginalized groups. In addition subaltern perspective would also be extended to studying themes like democracy, politics, modernity, development, cities, environment, films and television in South Asia. The interventions by the Subaltern Studies collective will be situated in relationship to developments in European historiography, with special attention to the unique departures of this new school. Debates within and critiques of the collective's approach will also be examined. A background in South Asian history or culture is not a prerequisite.

ASIA 40241. Hong Kong Action Cinema

(3-0-3)

Corequisite: ASIA 41241

This course addresses the global significance of the gong fu vague [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supercedes Hollywood's dominance in the genre? Is this purely a Chinese phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic & economic significance within a larger framework or must they be critically dismissed outright? What does it mean that "everybody was kung fu fighting" and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English.

ASIA 40242. Contemporary Korean Cinema

(3-0-3) Magnan-Park

Corequisite: ASIA 41242

This course provides a historical, cultural, and aesthetic appraisal of South Korean cinema as it evolved from a Korean-centric film industry to a globally engaged film industry as evidenced by the current hallyu (Korea fever) phenomenon. Aspects of cultural continuity as well as cultural transformations and the forces that are involved in this dynamic cultural arena will be addressed. Some of the films under analysis will include *Obaltan: Aimless Bullet*, *Sopyonje*, *Peppermint Candy*, *Shiri*, *Bungee Jumping of Their Own*, *My Sassy Girl*, and *JSA*. No knowledge of Korean is required.

ASIA 40412. Topics in Classical Japanese Literature

(3-0-3)

Survey of Japanese poetry, fiction, and drama from the earliest times through the mid-18th century. All texts are in English; no special knowledge of Japan or the Japanese language is required. The content of this course is the same as "Masterpieces of Classical Japanese Literature" (LEA 30412) but students who enroll in this course will be assigned additional readings and be required to submit a 12- to 15-page paper at the end of the semester on a topic approved by the instructor. Possible topics include love, masculinity/femininity, death, and nature.

ASIA 40426. Asian-Americans Writing Sexuality

(2.5-0-3)

This course will introduce students to major works of Asian-American literature while exploring issues of sexuality and gender in this body of literature. We will focus on race/ethnicity, authenticity, and representation as contested sites in Asian-American literature and how these contested sites produce inter/intraracial tensions about the Asian body as it is viewed from within Asian-American literature and from without. Primary texts will include novels, short fiction, poetry, film, drama, the graphic novel, and critical essays.

ASIA 40606. History of Modern China

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of Qing dynasty) to the present. It will highlight China's evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–49, back to a period of strength under the Communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

ASIA 40710. International Trade

(3-0-3)

The objective of this course is to provide students with the basics of theory, institution, and practices of global trade and investment, with special references to economic integration at the regional and global levels. By mastering the basic concepts and analytical skills, you will gain a better understanding of complex economic relations in today's global economy. The course at the same time emphasizes the application of basic theories and tools you have learned in analyzing contemporary issues. The level of the course is designed to be accessible to students with a background in microeconomic theory at an intermediate level. Some classes (as such occasions call for) will begin with a discussion of current developments in global economic relations. You are urged to have access to *The Wall Street Journal* and/or other international news media (such as *The New York Times*, *Economists*, *Business Week*, the World Bank's *World Development Report*, or even listening to NPR) as lectures attempt to link theories to events out in the world. The assigned textbook is largely to complement and supplement lectures. Given the time constraint, lectures will focus on a broad, analytical overview of policy-related global issues. Detailed points and other issues are left for you to read in the relevant textbook chapters and reference readings.

ASIA 40831. Topics in Asian Anthropology: South Asia

(3-0-3) Mahmood

This course explores the latest developments in the anthropology of Asian societies and cultures. The course may include the study of nationalism and transnationalism; colonialism and post-colonialism; political economy; gender; religion; ethnicity; language; and medicine and the body. Emphasis will be on social and cultural transformations of Asian societies in specific historical contexts.

ASIA 40843. U.S. and the Vietnam War

(3-0-3)

This course examines the participation of the United States in its “longest war”—the conflict in Vietnam. The course is taught primarily from an American as opposed to a Vietnamese perspective. Broad topics to be covered include: Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–1975; how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture *and* a discussion course. Attendance at *both* is required. Approximately six books will be assigned.

ASIA 40853. The United States and the Vietnam War

(3-0-3)

This course examines the participation of the United States in its “longest war”—the conflict in Vietnam. The course is taught primarily from an American as opposed to a Vietnamese perspective. Broad topics to be covered include: Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–75; how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture *and* a discussion course.

ASIA 40860. Genocide, Witness and Memory

(3-0-3)

How are episodes of mass killing experienced, survived, and remembered? In this course we consider political, social and cultural trauma as expressed in memoir, documentary, fiction, and academic text. Witness as an ethical stance is examined; the role of memory in shaping morality is questioned. (Does “Never Again” actually work?) We also look at the perpetrators of genocidal killing: who are they? What prompts their actions? Moreover: are any of us incapable of this kind of violence?

ASIA 40870. Indian Ocean: Trade and Interaction

(3-0-3)

This course offers a multi-disciplinary approach to studying one of the oldest forums for inter-continental trade and interactions: The Indian Ocean. This geographical entity has linked peoples of Africa, Europe and Asia through the exchange of technology, ideas, goods and peoples from the dawn of the first systematic inter-continental trade between the Bronze Age polities of Egypt, Mesopotamia and India-Pakistan, (ca. 4th millennium B.C.) to the present era. The class has two objectives: 1) to understand the nature of trade and exchange mechanisms in the Indian Ocean world from both temporal and spatial perspectives; and, 2) to underscore the interdependency between trade/exchange and political-economy, climate, society and history. The required readings include works from various disciplines, including economics, history, political sciences, and geography as well as archaeology and cultural anthropology. Students will be encouraged to add to the broader understanding of Indian Ocean trade provided by the course by undertaking comparative research projects that examine two periods, two areas or two processes within this larger interactional complex.

ASIA 40875. Archaeology of South Asia

(3-0-3)

This course will survey the rich and varied past of South Asian societies and cultures including those of India, Pakistan, Afghanistan, Nepal, Bangladesh and Sri Lanka from an archaeological perspective. The topics surveyed and discussed through lectures, readings, films and group projects will include the rise and fall of the Bronze Age civilizations of South Asia, the emergence of Buddhism, and the invasion of Alexander the Great during the Imperial period in the 4th century

B.C. This course will also cover recent archaeological efforts to understand the historical period in South Asia, from the Indo-Roman trade to the rise and decline of the Mogul (Mughal) Empire.

ASIA 41201. Hong Kong Cinema

(0-1-0)

Corequisite: ASIA 40241

Certain films will be viewed for further discussion in class.

ASIA 41241. Hong Kong Action Cinema in a Global Context—LAB

(0-2-0)

Corequisite: ASIA 40241

This is a laboratory in addition to Course 40241, which addresses the global significance of the gong fu vague [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supercedes Hollywood's dominance in the genre? Is this purely a Chinese phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic & economic significance within a larger framework or must they be critically dismissed outright? What does it mean that “everybody was kung fu fighting” and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English.

ASIA 41242. Seoul Searching Lab

(0-0-0)

Corequisite: ASIA 40242

Certain films will be viewed for further discussion in class.

ASIA 41316. Introduction to Japanese Pop Culture—Lab

(0-0-0)

Lab section for the Japanese Pop Culture course.

ASIA 42115. LAC Japanese Pop Culture Discussion

(1-0-1)

Corequisite: ASIA 43316

Students who have completed third year Japanese or equivalent Japanese language skills, are eligible to sign up for an additional one credit section. The Languages Across the Curriculum (LAC) section will meet for one hour once a week for discussion of course material in Japanese. Students will also read selections of course material in the original, and submit three short (2- to 3-page) writing assignments.

ASIA 43108. Anti-Social Behaviors in Modern Chinese Fiction

(3-0-3) Lin

This advanced course is offered for students who would like to have a more in-depth analysis of literary works and the challenge of writing a longer research paper. In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as anti-social, anti-conventional, anti-government, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications as portrayed in fictional works. For instance, can we apply a universal standard or are anti-social behaviors culturally relative? How are anti-social behaviors used by writers and for what purposes? Are different standards applied to women? What are the temporal and spatial factors in people's conception of an anti-social behavior? This course is taught in English and no prior knowledge of the Chinese languages or China is required.

ASIA 43316. Introduction to Japanese Pop Culture

(3-0-3) Shamoon

Corequisite: ASIA 42115

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? The goals of this course are to gain familiarity with some key texts in postwar Japan, and to learn various methods of analyzing those texts. As we approach each medium, we will be using film, television, and comics theories to analyze them. In order to gain proficiency in the academic analysis of popular culture, you will use those theories in writing and in a formal oral presentation. Students who have completed the first semester of third year Japanese or higher, or who possess equivalent Japanese language skills, are eligible to sign up for an additional one credit section. The Languages Across the Curriculum (LAC) section will meet for one hour once a week for discussion of course material in Japanese. Students will also read selections of course material in the original, and submit three short (2- to 3-page) writing assignments.

ASIA 47498. Independent Studies for Capstone Project

(V-0-V)

Requires “contractual agreement” with the professor prior to scheduling. For advanced students who wish to pursue an independent research project. Based upon the 2011 Asian Film Festival & Conference, students will examine the recent trends in Japanese animation. Students will participate in the film festival and conference by attending the screenings and guest presentations about the films. Requirements: Students are required to actively participate in all festival and conference events, including film screenings and academic panels. Students are asked to read a selection of academic articles that are related to the films and panels. Students will submit one of the following: 1) a reflection paper, approximately 3-pages in length, double-spaced; 2) a creative project that is approved by the instructors.

ASIA 48512. Capstone Thesis

(3-0-3)

Students who are contemplating graduate study in a particular area of the world or a career in international business or government—or those who are merely curious—are well served by the minor in Asian Studies. It provides a well-rounded introduction to a particular area in the world’s most populous continent. The minor in Asian Studies is a very appropriate accompaniment to majors in Anthropology, East Asian Languages and Literatures, History, Political Science, Economics, or other Arts and Letters departments. It is also suitable for students in the College of Business. This interdisciplinary minor requires four courses in Asian Studies (12 credit hours) from at least three different departments and at least one full year of a relevant Asian language. In the senior year, students write a capstone project under the direction of a faculty member affiliated with the Center and overseen by the Director of the Center for Asian Studies.

ASIA 53001. Senior Seminar: Chinese Political Thought

(3-0-3)

Readings in translation from the works of major classical Chinese thinkers and schools, and completion of several short discussion/research/analytic essays based on those works, with the aim of understanding Chinese political thinking in its own context, for the general insights it may give into life and politics, and in comparison with other traditions of political thought, especially the classical and modern West.

Computer Applications**CAPP 20505. Introduction to Computer Systems**

(3-0-3) Berzai

As an introduction to information processing, this is a literacy course that explains computer systems, including hardware, software, systems analysis, and other related topics. The class learns some computer programming, logic, design, and documentation using the BASIC language. The students also work on teams to learn some phase of the IS environment, learn multimedia software, and make presentations to the class.

CAPP 20506. Introduction to Computer Systems

(3-0-3) Berzai

As an introduction to information processing, this is a literacy course that explains computer systems including hardware, software, systems analysis, and other related topics. The class learns some computer programming, logic, design, and documentation using the BASIC language. The students also work on teams to learn some phase of the IS environment, learn multimedia software, and make presentations to the class. First year students only. Please note: This course will not count as degree-seeking credit for ITM majors.

CAPP 23507. La telenovela: historia, el significado cultural y produccion estudiantil

(3-0-3) Barry

Prerequisite: ROSP 20202

The goal of this course is to facilitate student exploration of the genre of the telenovela. Students will sharpen oral and written language skills through exposure to authentic telenovelas from Latin America, reading of authentic texts, and through the creation and production of their own telenovela. They will hone their oral and written proficiency and learn the idiosyncrasies of Hispanic culture as they write, direct, act in, tape, and edit a telenovela. During this process students will also learn and apply basic videography and non-linear video and audio editing techniques.

CAPP 30320. Introduction to Scheme Programming

(3-0-3) Sepeta

Scheme is a modern programming language that is both powerful and easy to learn. Scheme teaches many important programming ideas and, with a knowledge of Scheme, students can readily learn other languages like C++ and Java. The Scheme course will be a beginning course and will not require programming experience. The course will emphasize problem-solving skills and it will demonstrate how data drives program development.

CAPP 30340. Artificial Intelligence

(3-0-3) Sepeta

Artificial Intelligence is the subject of trying to create human intelligence in machines (computers). In this endeavor we come to better understand the nature of intelligence and the moral and ethical ramifications of mechanizing intelligence; and, simultaneously we discover clever and ingenious uses of the computer, which enrich all of computer science. Topics covered include the history of AI, programming languages for AI, state space search, games, knowledge representation and reasoning, planning, neural networks, and program evolution. The course requirements include two papers (2–4 pages each), a presentation, two tests, and a final examination.

CAPP 30350. Visual Basic Programming

(3-0-3) Irmiger

Prerequisite: or CAPP 20506

The course will investigate object-oriented data processing concepts using Microsoft’s Visual Basic programming language. Terminology and technique will be combined to explore the object-oriented paradigm. Object-oriented will be compared to traditional procedural paradigms wherever appropriate.

CAPP 30400. Research Methods in Computer Programming and Application Development

(3-0-3) Villano

The purpose of this lab-based course is to provide students with hands-on experience in various areas of computer programming. Essential programming topics will be demonstrated and practiced in class, including basic and advanced data types, control structures (conditionals, iteration, etc.), software timing, randomization, and text file manipulation. Examples will be provided in several computer languages that are commonly found in research settings.

CAPP 30510. Management Information Systems

(3-0-3) Berzai

Students are introduced to leadership and management skills in the information processing environment. Discussions on why and how management makes decisions are an important part of the course, as are discussions of current problems of management in the business world related to computer applications.

CAPP 30515. Systems Analysis and Design

(3-0-3) Berzai

Administered in two major segments, this course first exposes students to the full scope of analyzing and designing computer systems by covering problem definition, data collection, documentation of existing systems, and definition of new systems requirements. We use the methodology of Systems Development Life Cycle (SDLC). The second segment deals first with students working on genuine business projects. A part of this segment gets into object-oriented systems analysis, which is a new concept in systems analysis and design.

CAPP 30521. E-Business Strategies

(3-0-3) Coughlin

E-business employs the use of the Internet and the Web to transact business, creating electronic markets where prices are transparent, markets are global, and trading is highly efficient. E-business has a direct impact on a firm's relationship with suppliers, customers, competitors, and partners as well as the method it uses to advertise, sell, and use products. In this course, students will analyze the business models and strategies of online companies, explore failed e-business ventures, understand the strategic, financial, marketing, and organizational challenges facing e-business firms, and consider the societal impact of e-business development.

CAPP 30523. Applied Multimedia Technology

(3-0-3) Clark

The goal of this course is to explore ways multimedia can be used to communicate information and solve problems. Students use a variety of tools, including Adobe Flash, to complete projects in the areas of animation, audio, image editing, and scripting. They also evaluate existing media for content, aesthetics, functionality, and usability. Students will often begin to learn material before class by completing tutorials. Follow-up activities in class then apply the concepts without step-by-step instruction. The course also equips students with strategies for enhancing their skills after the semester ends.

CAPP 30527. Building the Modern Web

(3-0-3) Smith

This course is designed to cut through the technology involved in the website creation process and get to the core meaning and goals of a Web project. Technological concepts will be covered, but in no real depth. Instead, you will be instructed on how certain technologies, languages, and concepts add pieces to the puzzle of a modern Web site, and how you can have a knowledgeable part in every step.

CAPP 30530. Web Development with CSS

(3-0-3) Smith

Learn the techniques used by today's top professionals to construct Web pages with XHTML and CSS. At the end of this class, you will be able to take a graphical representation of a Web page, and construct it to work in all modern browsers using valid, semantic markup and presentation.

CAPP 30550. JavaScript: Making the Web Behave

(2-0-3)

JavaScript is a forgiving and wonderfully simple, yet powerful programming language. It was designed to be easy for non-programmers to use and is now an essential part of the Web, powering rich interactions in sites like Facebook, Gmail and Mobile Me.

CAPP 40150. Current Trends in Computer Applications

(3-0-3) Berzai

The Current Trends course allows the students to think about and discuss issues openly that pertain to computer ethics, business ethics, and some social ethical issues. We start out by having an understanding of the distinction between the terms "moral" and "ethical". The class works through the generally accepted theories for resolving moral and ethical conflicts. These are egoism, natural law, utilitarianism, and respect for persons. We also discuss the reasons businesses exist and what they think their responsibility toward society is now, and how it might change in the future. The students also debate several business ethical issues. In the area of information technology, there is discussion about what the student sees as right or wrong, ethical or not ethical in the many issues of discussion that are presented. Restriction: CAPP/TBS seniors only.

CAPP 40210. The Internet and Society

(3-0-3) Rose

This course will spend the semester studying the impact the World Wide Web has had on several key areas of our society, including communications, commerce, marketing, productivity, education, collaboration, and our sense of community. It will also evaluate how the Internet continues to change based on society's evolving needs and desires. Through a combination of discussion, group presentation, guest lectures, and out-of-class research, students will be exposed to some of the profound effects this medium has had on our culture. The positive and negative forces brought on by this technology must be recognized, studied, and dealt with if we are to truly embrace the momentous opportunities brought about by the World Wide Web.

CAPP 40260. Information Security

(3-0-3) Chapple

This course provides students with a practical, hands-on exposure to information security topics. Students completing this course will be prepared to address the information security issues facing managers and leaders in any organization. This course is also an excellent starting point for those seeking a career in information security or risk management consulting. Specific objectives include: 1) Gain a working knowledge of basic information security principles and concepts. 2) Understand how information security impacts managers and leaders at all levels of an organization through the use of case studies and classroom discussion. 3) Explore information security in the context of current events including political, financial and cultural topics. 4) Understand the role of ethics and Catholic Social Teaching in the context of information security and privacy.

CAPP 40540. CAD for the Stage

(3-0-3) Cole

The study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design, and progress to 2-D and then 3-D design techniques. A basic understanding of computer systems is necessary, and significant computer work is required outside class.

CAPP 40545. Computers in Psychological Research and Education (PSY)

(3-0-3) Crowell

This course and its counterpart in Psychology (PSY 20671) is project-oriented. It is not an introductory course on computer applications. Students need to already have (or learn during the semester) the skills needed to complete whatever project is defined. Generally, projects are applications or systems that fit into the broad spectrum of the instructor's interests, which students can determine by consulting the Instructor's web page (<http://www.nd.edu/~ccrowell>). New projects are defined

each semester. Some recent projects have involved: 1) Developing a multimedia presentation on management and coaching using PowerPoint slides and audio files. 2) Creating a Visual Basic application to administer surveys on disk. 3) Exploring the capabilities of WebCT/Concourse as a teaching tool. 4) Developing a Web site for student advising in the Psychology Department. 5) Completing a database application in Microsoft Access for tracking and reporting manager coaching sessions. Students are expected to plan and develop a functional application.

CAPP 40546. Practicum in Robotics

(3-0-3) Crowell

This course will allow students to work with the Nao humanoid robot platform. Students will learn about how to control the sensory and motor capabilities of the robot to produce specific sequences of robot behaviors and/or to allow the robot to respond to particular inputs from the external environment. Students will work with the instructor to identify the specific behaviors and response sequences to be created.

CAPP 40547. Interactive Media Motion Graphics

(3-0-3) Sherman

This advanced multimedia course will give the studio, design, or CAPP major an introduction to the design of motion graphics. Students will develop short information movies, movie trailers, or movie opening sequences. The course will use Apple's Motion software and cover basic DVD and QuickTime movie development. Skill with various graphics software useful, with expertise in Adobe Photoshop very important.

CAPP 40550. Digital 3-D Modeling (Design)

(3-0-3) Shin

This is an introductory course to Rhinoceros. The focus of this class is to learn how to use the software to generate 3D virtual models with an emphasis on industrial design concerns, as well as creating manufacturable data for rapid prototyping. The class will be devoted to learning tools, interface, modeling and rendering methods. This will be achieved by completing specific assignments and tutorials. The final assignment will be to virtually model and render a product or scene from a concurrent class or personal interest.

CAPP 40553. Music through Technology (Music)

(3-0-3) Dye

This is a lecture/lab course open primarily to CAPP and music majors, with consideration of other talented students. Lecture topics include the historical evolution of technology in music, surveying the influence that technology had on the music world, both from a creative standpoint to the accessibility and distribution of music to the masses. Other examples of technology's influence in music may include the development of multi-track recording on popular music, synthesizer, and midi technology, technology's applications for musical composition, and the adaptation of CD and mp3 formats to musical performers. The historical influence of technology is an illuminating foundation to current developments in the creative processes of music. Lab topics cover an introduction to current music technology including digital audio recording and editing, midi technology (sound and notation) and the digital management and distribution of music. Students will experience all of these technologies on an introductory level, but focus their interests on a technology-based final project to develop and display their acquired skills.

CAPP 40557. Advanced Enterprise Applications

(3-0-3) Miller

This course will provide experience with a full range of applications which are employed in the 21st-century organization including enterprise business software, smartphone apps, collaborative tools such as Sharepoint, wikis, blog sites and tools for integration with Facebook, Twitter and Google. The course will also provide understanding of and experience with cloud computing and Web services which are providing a new paradigm for deployment of applications without the traditional data center. The course will focus on how all of this packaged and custom software can be integrated in the modern organization to meet organizational goals.

CAPP 40558. Motion Design 2

(0-6-3) Murnieks

Exploration of narrative, visual and aural principles to best convey a time-based message through a series of project assignments. Effective use of motion graphics through sketching, storyboarding, kinetic type, animation, narration and soundtracks. Media delivery may include digital signage, web, broadcast and other public venues such as a planetarium. Survey of the technological aspects to motion media including.

CAPP 40559. Information Design

(0-6-3) Murnieks

Visualization and sequencing of complex or abstract subject matter for the purpose of informing, educating or training the end-user. Design process includes the acquisition of information and data to become a subject matter expert on a project topic. Development of topics through the parsing of information, focusing of subject, sketching, illustration and graphical data representation. Delivery of information through an interactive, user-driven experience possibly exploring handheld devices.

CAPP 40610. Foundations of Business Thinking

(3-0-3) Sucec

This course is designed to provide an integrated understanding of the foundational business disciplines of accounting, finance, marketing, and management, especially for CAPP majors planning a career in business. Fundamental leadership and consulting skills will also be addressed. Case analysis, coupled with a highly interactive format, will be employed to ensure practical exposure to today's business environment. Primary areas of focus will address the critical elements for success in the corporate environment, the knowledge and preparation necessary to facilitate your interviewing process, and the business fundamentals for those with entrepreneurial aspirations.

CAPP 45565. Internship

(3-0-3)

The course description for this course is slightly different for each section. *CAPP 45565 Section 01 Internship*: This encompasses working with various civic, public and or private organizations using acquired computer applications knowledge and skills. Credit is given only if work is done in the information systems area of an organization. *CAPP 45565 Section 02 CAPP/TBS Community Service Internship*: This internship was created to allow an interested CAPP/TBS student to lend their skills and talents to a worthy cause in our local community.

CAPP 47567. Special Studies

(V-0-V)

The course description for this course is slightly different for each section. *CAPP 47567 Section 01 Special Studies*: This independent study course involves a programming or development project developed by a student in conjunction with a faculty advisor. Special independent study guidelines and permissions apply to this course that are described in a document available on the CAPP website (www.nd.edu/-capp). CAPP/TBS students only. Note: College guidelines apply as well. *CAPP 47567 Section 02 Special Studies*: This independent study course involves a programming or development project developed by a student in conjunction with a faculty advisor. Special independent study guidelines and permissions apply to this course that are described in a document available on the CAPP website (www.nd.edu/-capp). *CAPP 47567 Section 03 Special Studies*: Instructor permission required. The intent of this special studies experience is to mirror the major components of the classroom requirements of CAPP 40610. There are four foundational learning objectives: 1) Describe how accounting, finance marketing, management, and leadership work in an integrated fashion to guide successful business decisions. 2) Analyze the fundamental of a business or potential business to determine its short- and long-term viability. 3) Examine the roles entrepreneurship and small business perform in contributing to the economy. 4) Acquire a working vocabulary of business terms/concepts to facilitate job interview and your early career. Note: College guidelines apply as well. *CAPP 47567 Section 04 Special Studies*: The purpose of this course is to provide students with experience in various

aspects of video game development including level design, implementation, testing and deployment. The development environment will be the Half-Life 2 video game modding engine and its associated software tools. Additional third-party (and often free) utilities may also be necessary. Students will work on their own or in teams on agreed-upon areas of interest. NOTE: College guidelines apply as well.

Center for Social Concerns

CSC 20703. Health and the Latino Paradox

(3-0-3) Duarte

The objective of this course is to enhance your awareness of major theories, concepts, issues and research studies related to the physical and mental health of Latinos in the United States. Particular attention will be drawn to the diversity of the Latino experience in the U.S. and the health care system in terms of country of origin, race, class, gender, and generation. This course attempts to be an introduction to the historical, political, economic and social structures that determine how a subpopulation in the United States is defined within and navigates thru a primary institution, like health care, and the ramifications of this for the society at large.

CSC 23090. Social Concerns Seminar: Children and Poverty

(1-0-1) Brandenberger

This seminar focuses on concerns that affect the youth of our nation, especially poverty and violence, and examines efforts to foster positive youth development. Immersion in New York City. Participants read Catholic social teaching focused on youth/family issues.

CSC 23855. Social Concerns Seminar: Take Ten

(0-0-1) Brandenberger

Take Ten is a research-based violence prevention program and curriculum designed at the Robinson Community Learning Center. Volunteers work on a weekly basis with schoolchildren of all grades to teach them the skills needed to resolve conflict peacefully. Take Ten's mission is to provide youth with positive alternatives to violence and build their capacity to make more informed choices when faced with conflict. Students participating in the Take Ten seminar will serve as Take Ten volunteers during the semester (February through April with training in January), being part of a team that works at a school in the area one time per week. Additionally, the readings and reflections will allow students to focus on understanding issues of youth and violence from various perspectives. Contact: Ellen Kyes at <mailto:epaul@nd.edu>. Approval required. Apply at Robinson Community Learning Center.

CSC 33401. Animal Welfare and the Human-Animal Bond: Community Based Learning Seminar

(1-0-1) Whaley

Consider the fact that in six short years, one female dog and her offspring can give birth to 67,000 puppies. In seven years, one cat and her young can produce 420,000 kittens. Three to four million dogs and cats are euthanized each year. It is estimated that there are 60 million feral cats in the U.S. In a society that considers pets as part of their family, watches *Animal Planet*, and spends millions of dollars on pet products, it is imperative that we acknowledge and educate ourselves on the issues of over population of pet animals in our society. What is our responsibility to these animals, and how can we solve these pressing problems? The focus of this course will be on animal behavior from an evolutionary perspective. The students will learn to recognize both desirable and undesirable behaviors in pet animals. They will learn how to use evolutionary behavior training methods to alter detrimental behaviors and reinforce those that are advantageous. This course will also cover animal welfare issues, and will intimately and meaningfully connect the state of humans, to that of animals. The students will carry out community research projects of their choice and will immerse themselves in an important issue and generate a product that can help the plight of animals (and therefore humans) in our community.

CSC 33858. Social Concerns Seminar: International Issues

(1-0-1) Tomas Morgan

This course revolves around international experiential learning opportunities, examining the culture, community and life of the people encountered, including the poor. Students participate in preparation and follow-up sessions.

CSC 33931. Summer Service Learning: Microfinance and Social Venturing

(1-0-1) Shappell

The ACCION Internships run 10–12 weeks in micro-lending offices across the country. For junior business majors only.

CSC 33932. Summer Service Learning: African-American

(1-0-1) Shappell

This is a leadership internship for African-American students who work 10–12 weeks in an African-American area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 33932 and work with the Center for Social Concerns to build partnerships with the agencies and people involved. An application and interview are necessary for participation.

CSC 33933. Summer Service Learning: Latino Leadership Intern Program

(3-0-3) Shappell

This is a leadership internship for Hispanic studies working 10–12 weeks in a Hispanic/Latino area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 359 and work with the Center for Social Concerns to build partnerships with the agencies and people involved. Application and interview necessary for participation.

CSC 33936. Summer Service Learning: Confronting Social Issues

(3-0-3) Shappell

This three-credit service-learning course takes place before, during, and after student participation in eight-week “Summer Service Projects” sponsored by the Center for Social Concerns. The goals of the course are to reflect on the meaning and dynamics of Christian service, compassion and Catholic social teaching through readings and writing, along with discussion and reflection with site supervisors and alumni, and scheduled group discussions upon return to campus. Writing assignments include a journal, reflection paper of six to eight pages and responses to study questions related to the course packet. This course is completed during the first five weeks of fall semester and is graded satisfactory or unsatisfactory. Acceptance is based on the student’s application and interview.

CSC 33938. Summer Service Learning: International

(3-0-3) Tomas Morgan

This three-credit course provides students the opportunity to encounter international realities through work with poor and marginalized people. Same academic requirements as THEO 33938 with the addition of area/country specific readings and meetings.

CSC 33950. Social Concerns Seminar: Appalachia

(1-0-1) Toms Smedley

This seminar involves experiential learning during the semester break. The course is centered on a service-learning immersion in the region of Appalachia and provides preparation for and follow-up to that experience. Students may focus on particular themes (e.g., rural health care, environmental issues) at various sites while learning about the region and rural issues.

CSC 33951. Social Concerns Seminar: Sustainable Development

(1-0-1) Toms Smedley

This course centers on a trip to Washington, DC, over semester break, during which time students analyze a significant social issue through contact with various agencies, government offices, and church organizations. Students participate in preparation and follow-up sessions. Themes (e.g., Educational Reform, Violence in America) vary each year.

CSC 33954. Social Concerns Seminar: Leadership Through Solidarity

(1-0-1) Hebbeler

The Leadership through Solidarity Seminar seeks to cultivate an understanding of leadership through the lens of Catholic Social Teaching. This seminar includes an experiential learning component as undergraduate students practice relationship

building through prayer and service with the South Bend Catholic Worker community. The principles of solidarity and the common good are explored through faith sharing, service learning, and fellowship at the Worker and in the classroom.

CSC 33955. Community Leadership for Tomorrow

(1-0-1)

This community-based learning course will explore in an interdisciplinary manner various models of leadership through mentoring in sports. Among the areas dealt with will be oral and written communication skills, character development, time management, problem solving, listening and servanthood. The students will work with low-income children from the South Bend community and with local non-profit partners, gaining a deeper understanding of social issues contributing to urban poverty. Among the evaluation will be a journal and oral participation reflecting on their mentoring experiences with an aim to a more in-depth analysis of social problems. Community-based learning offers the opportunity to integrate learning and service.

CSC 33959. Social Concerns Seminar: Latino Community Organizing Against Violence

(1-0-1) Mick

The Latino Community Organizing Against Violence Seminar will examine current efforts among community activists and organizations in favor of violence prevention and intervention. As an active participant, you will be invited to explore the rich cultural heritage of Chicago during a five-day immersion. From the perspectives of the violence prevention and intervention initiatives that you will gain, you will be encouraged to reflect on the challenges and opportunities that go hand in hand with cultural diversity as it is experienced in Chicago and South Bend. In particular, we will explore cultural diversity from the standpoint of the dynamic of immigration and integration that the Latino population—especially its teenagers and young adults—is living through. The seminar is a one-credit hour course graded “S” or “U.”

CSC 33961. Social Concerns Seminar: Discernment

(1-0-1) Hebbeler

The Discernment Seminar provides senior-level undergraduate students an opportunity to reflect on their Notre Dame experience and consider postgraduate plans with one another through small-group discussion. Each session is structured to assist the students’ exploration and articulation of their respective vocations through a variety of means, including narrative theology, spiritual direction, literature, and the arts.

CSC 33962. Social Concerns Seminar: Gospel of Life

(1-0-1) Toms Smedley

The Gospel of Life Seminar provides opportunities to read, reflect and be of service on a variety of life issues through service and experiential learning. Exploration begins in orientation classes where students will become familiar with the issues through reading Church documents such as *The Gospel of Life* and through meeting people of the South Bend and Notre Dame communities that work on pro-life issues. During the week of service and experiential learning in Washington DC over fall break, the seminar participants will learn from Church and government leaders, various agencies, and individuals. The follow-up classes facilitate analysis and synthesis of insights gained during the week in Washington DC.

CSC 33963. Social Concerns Seminar: Church and Social Action

(0-0-1) Purcell

This course centers on a 48-hour immersion (colloquially known as the Urban Plunge) in an urban setting during the winter break (prior to return to campus). The course includes a preparation workshop in the fall semester, readings, two reflection papers, and follow-up educational meetings.

CSC 33965. Social Concerns Seminar: Organizing Power and Hope

(0-0-1) Caponigro

This seminar focuses on diverse church, school, leadership, and community-organizing initiatives to improve life in Chicago neighborhoods. Participants will be challenged to examine perceptions of power, service and social action.

CSC 33966. Social Concerns Seminar: Border Issues

(0-0-1) Toms Smedley

The seminar examines immigration and related issues that exist between the United States and Mexico. Participants travel to El Paso, Texas, and Ciudad Juarez, Mexico, to meet with refugees, Border Patrol, parish organizations, and families who live in “squatter” villages. Participants also analyze and discuss policy issues. The immersion is in partnership with Annunciation House.

CSC 33967. Social Concerns Seminar: Migrant Experience

(0-0-1) Toms Smedley

This seminar offers a unique immersion into the lives of migrant farm workers in Florida during the spring harvest. Students pick tomatoes in the fields (donating their wages), live with migrant families, assist church and social agencies that serve migrants, and meet with community leaders, never again to take food for granted.

CSC 33968. Social Concerns Seminar: L'Arche Community

(0-0-1) Toms Smedley

This seminar centers on travel to a L'Arche community (e.g., Toronto, Canada) to share community life with developmentally challenged persons. Students draw from the philosophy of Jean Vanier, the works of theologian Henri Nouwen, and other spiritual writings to augment this participatory learning experience.

CSC 33970. Social Concerns Seminar: International Issues

(0-0-1) Tomas Morgan

This seminar serves as the required orientation course for all THEO 33938: International Service-learning Program participants. It will provide students with an introduction to international issues in developing countries through the lens of Catholic social tradition, guidance in independent country/area study, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the seminar with permission from the instructor.

CSC 33975. Social Concerns Seminar: Poverty and Development in Chile

(1-0-1) Cahill Kelly

This Seminar serves as the required orientation course for all participants in the international study program in Chile. It will provide an introduction to international issues in developing countries through the lens of Catholic social tradition, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the Seminar with permission from the Instructor.

CSC 33976. Social Concerns Seminar: Environmental Justice and Human Rights in the Gulf Coast

(1-0-1) Toms Smedley

Set in the wake of Hurricane Katrina, and centered on a journey to Louisiana during spring break, this Seminar explores domestic environmental issues from the perspective of minority communities that suffered due to Hurricane Katrina. Examines historical, political, and economic issues that created a culture of poverty in such areas. After defining key concepts such as environmental racism, culture of poverty, justice, and equality, students will consider specific issues of waste pollution and exposure to toxic substances emitted from chemical plants built in disadvantaged neighborhoods. Apply through the Center for Social Concerns.

CSC 33978. Social Concerns Seminar: Urban Poverty and Homelessness

(1-0-1) Toms Smedley

Over 16,000 people, including more than 2,000 children, live without adequate food and shelter in the state of Oregon. Although the city of Portland, Oregon, manages to provide shelter for almost half of this population, the number of individuals affected by poverty and homelessness continues to rise. This seminar examines the many myths associated with homelessness and explores the larger cycle of urban poverty from diverse interdisciplinary perspectives. Adopting a stance of solidarity and service, students will encounter the lives and stories of individuals affected by homelessness. During the weeklong immersion, students will visit social service agencies, non-for-profit groups, and faith-based outreach initiatives that provide relief to people living on the streets of downtown Portland. Particular attention will be paid to assessing the role of the Catholic Church in relation to poverty alleviation in this area of the country.

CSC 33979. Song, Caritas, and Social Justice: The Celebration Choir

(1.5-0-1) Schneider Kirner

This course allows students to integrate their faith and theology with community service/experiential learning through participation in sacred music outreach with the Notre Dame Celebration Choir under the auspices of Campus Ministry. A course goal is for students to experience the joys of service through performance of sacred music with a variety of community members, and to reflect on acts of Christian service and faith through readings from church documents, from social action theory, and on sacred music, discussing in depth such works as Pope Benedict XVI's *Deus Caritas est* encyclical letter. Requirements include participation in weekly rehearsals, occasional weekend field service projects, keeping a journal, and a short semester-end reflective paper. To enroll, contact Choir Director Karen Schneider-Kirner mailto:(karen.kirner@nd.edu) by December 1st. A brief personal interview/audition with the director should take place before December 10th.

CSC 33981. Leadership Training in Social Concerns Seminar

(8-0-1) Toms Smedley

This seminar will be aimed to improve overall seminar leader training by utilizing Center expertise and making program training more congruent across seminars. Students leading seminars in the spring—fall 2010 will enroll in a spring leadership seminar. The seminar will hold approx. 4–6 large classes around a particular leadership theme, led by a different CSC person. The format for the class will be a 30 minute training session, then breaking into small groups for particular seminar application or peer input. Unique features: This seminar will be hosted by the Experiential Learning Council which provides funding as well as student input. Since this seminar has been requested by students and many students have expressed interest, the curriculum will be heavily dictated/coordinated by student leaders. Also, there will be time budgeted for previous seminar leaders (from fall–spring 2009) to work with new seminar leaders on specific details of the seminar and itinerary. The immersion portion of this seminar is the student's participation as a seminar leader.

CSC 33985. Social Concerns Seminar: Energy Policy, the Environment and Social Change

(0-0-1) Toms Smedley

This course examines the role of energy in society and the impact of current energy use on the environment. Upon reviewing the benefits and problems associated with America's dependence on fossil fuels, attention is directed to the opportunities and challenges of transitioning to a more sustainable energy model. During an immersion in Washington, DC, students will meet with industry leaders, government officials, regulatory agencies, and environmental advocacy groups in their efforts to resolve contemporary energy and environmental issues.

CSC 33990. Social Concerns Seminar: Winter Service Learning Seminar

(0-0-1) Mick

Only for students who applied to and were accepted into a Winter Social Concerns Seminar and who study abroad that spring semester immediately following the winter immersion.

CSC 33992. Ethical Leadership Through Service and Civic Engagement

(V-0-V) Mick

This first-year course is designed to continue to develop the key characteristics of Hesburgh-Yusko Scholars: academic excellence, moral character, successful leadership, and commitment to service. Students sharpen their awareness of global social concerns through tracking and analysis of current events informed by interdisciplinary research on the historical causes of and responses to those events. As that understanding deepens, students move into the future tense: how they can propose and participate in solutions to those issues. The UN Millennium Development Goals stand as one framework from which students identify global challenges and opportunities for leadership, focusing on how disciplined foresight can help establish indicators of progress that move communities toward a preferred future, one defined by justice for all. In order to interrogate the nature of service as a form of leadership, students engage in a range of community-based learning—direct service at local agencies, experiential learning through contact with local experts (University and community-based), and a final project employing community-based research methods. This course emphasizes the development of communication skills—written, oral, and multimodal—as central to reflecting on sound decision making, conducting effective community-based research, and persuading stakeholders to invest in proposed solutions. In short, students consider and express the importance of ethical leadership through intellect, action, and word.

CSC 33993. Ethical Leaders in Service

(1-0-1) Purcell

This community-based learning course will examine in an interdisciplinary process various modes of ethics and its implementation within community engagement. Among the areas explored will be personal, professional, sexual and global ethics. The students will work with vulnerable populations in the South Bend region through local non-profit partnerships to see how ethical decision-making is lived out. Among the evaluation will be journaling and oral presentations on the experiences with the local non-profits.

CSC 33994. Social Concerns Seminar: Advanced Topics in Appalachia Seminar

(1.5-0-1) Toms Smedley

Prerequisite: CSC 33950 or THEO 33950 or CST 33950

This course allows students to explore social issues of the Appalachia region through community-based learning. Students expand on the Appalachia Seminar course through examining the socio-economic, cultural, and policy issues facing the region. The course will feature rotating focal points including: integration of Catholic Social Teaching, healthcare, environmental stewardship, and poverty studies. During the week in Appalachia students learn from individuals and community-based organizations; follow-up classes facilitate analysis and synthesis of insights gained during the week.

CSC 33995. Global Health Seminar

(1-0-1) Toms Smedley

The Center for Social Concerns, in collaboration with the Nuestros Pequeños Hermanos Holy Family Surgery Center and St. Mary's College will offer a weeklong seminar near Tegucigalpa, Honduras. During the weeklong course, students will gain exposure and insight into the medical care delivery and health conditions in rural Honduras. Students will observe orthopedic surgery. The health of populations will be considered in a global context, emphasizing health problems that transcend national borders or have a global political and economic impact. Students will examine the work of major international agencies such as the World Health Organization (WHO), United Nations Children's Fund (UNICEF),

Millennial Development Goals, and the World Food Programme (WFP), World Bank, and the IMF. They will also explore the work of the Church and the role of Catholic Social Teaching to address global health and the complex social forces that affect it.

CSC 33996. Social Concerns Seminar: U. S. Healthcare: Policy and Poverty Seminar

(1.5-0-1)

This seminar invites examine strengths and weaknesses of our health care system, explore the possibilities for the future of American health care, and ask how modifications might help create the society we hope to become and improve the common good. A survey of our current system will include an evaluation of: employer based healthcare, causes and consequences of being uninsured, public safety nets, under served populations, and the factors affecting the cost and reformation of healthcare.

CSC 36991. Directed Readings

(V-0-V)

Research and writing on an approved subject under the direction of a faculty member.

CSC 38801. From Power to Communion

(3-0-3)

Prerequisite: Six hours of theology.

This seminar explores the present and the future of the Catholic Church, placing emphasis on how its future is foreshadowed in the growing ecclesial interdependence that exists between the churches of North and Latin America. Emphasis is placed on the growing involvement of the laity in Latin America and where this may lead the North American church. In a particular way, attention is given to the role of small Christian communities.

CSC 63950. Social Concerns Seminar: Appalachia

(1-0-1) Toms Smedley

This seminar involves experiential learning during the semester break. The course is centered on a service-learning immersion in the region of Appalachia and provides preparation for and follow-up to that experience. Students may focus on particular themes (e.g., rural health care, environmental issues) at various sites while learning about the region and rural issues.

Classics

CLAS 10100. Ancient Greece and Rome

(3-0-3) Mazurek

This first-year course introduces the general history and culture of ancient Greece and Rome to students coming to the subject for the first time. Literary texts central to the ancient Greek and Roman traditions receive prime attention, including works by Homer, Plato, Cicero, and Virgil, but students are also exposed to the importance of learning from documentary texts, archeology, and art history. Topics discussed include concepts of divinity and humanity, heroism and virtue, gender, democracy, empire, and civic identity, and how they changed in meaning over time. The course allows students to develop a rich appreciation for the Greek and Roman roots of their own lives, and prepares them to study the Greco-Roman past at more advanced levels. Offered annually.

CLAS 10200. Introduction to Greco-Roman Mythology

(3-0-3) Mazurek

This first-year course introduces the mythologies of Greece and Rome—some of the foundational narratives of the Western literary and artistic tradition—and traces their transmission and influence over two-and-a-half thousand years from ancient to modern times. The course is particularly valuable as an initial course in the humanities because it pays special attention to such current interpretative theories as structuralism, psychoanalysis, feminism, and post-modernism that allow the many meanings of myths to be deciphered and understood. Offered annually.

CLAS 13186. Literature University Seminar

(3-0-3) Ladouceur

Introduces first-year students to the study of classical literature on a comparative basis, with readings from Greco-Roman and Egyptian literature.

CLAS 20100. Words in Time: Greek, Latin and the History of English

(3-0-3)

Greek and Latin language and literature exercised a profound influence on the growth and development of English, affecting everything from vocabulary to literary structure. This course examines that influence. Topics to be covered include: the phonological and morphological development of Greek, Latin and English from Indo-European; Greek, Latin, and Romance borrowings into English; borrowings as a sign of cultural interaction; the mechanics of semantic change; and the translation of literary style. Illustrative readings will include Chaucer, Milton, Shakespeare, and Tennyson. Knowledge of Greek and Latin not required.

CLAS 20400. Introduction to Ancient Art of Greece, Rome and Egypt

(3-0-3) Rhodes

This course will examine the origins of Western art and architecture, beginning with a brief look at the Bronze Age cultures of the Near East and Egypt, then focusing in detail on Greece and Rome, from the Minoan and Mycenaean world of the second millennium B.C.E. to the rule of the Roman emperor Constantine in the fourth century C.E. Among the monuments to be considered are ziggurats, palaces, and the luxuriously furnished royal graves of Mesopotamia; the pyramids at Giza in Egypt and their funerary sculpture; the immense processional temple of Amon at Luxor; the Bronze Age palaces of Minos on Crete—the home of the monstrous Minotaur and Agamemnon at Mycenae, with their colorful frescoes and processional approaches; the great funerary pots of early Athens and the subsequent traditions of red and black figure vase painting; architectural and freestanding sculpture of the Archaic and Classical periods; the Periclean Acropolis in Athens, with its monumental gateway and shining centerpiece, the Parthenon; and finally, among the cultural riches of Rome, the painted houses and villas of Pompeii; the tradition of republican and Imperial portraiture; the Imperial fora; the exquisitely carved Altar of Peace of Augustus; the Colosseum; and the Pantheon of the philhellene emperor Hadrian.

CLAS 20500. Introduction to Early Christian and Byzantine Art

(3-0-3) Barber

This course will introduce students to the visual arts of the period ca. A.D. 200 to ca. A.D. 1600. Our work will take us from the first fashioning of an identifiable Christian art through to the remarkable poetics of Late Byzantine painting. In so doing, the student will be introduced to the full array of issues that arise around the question of there being a Christian art. Working from individual objects and texts, we will construct a variety of narratives that will reveal a vital, complex, and rich culture that, in a continuing tradition, has done so much to shape the visual imagination of Christianity.

CLAS 30021. Greek Literature and Culture

(3-0-3) Bloomer

This course surveys the leading works of ancient Greek literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from a thousand years of extraordinary literary creativity. Among the authors introduced are Homer, Sappho, Aeschylus, Herodotus, Aristophanes, Plato, Theocritus, Plutarch, Lucian, and Longus. Special attention is paid to the formal structures of Greek literary works, the cultural issues they raise, and the lasting value of Greek literature to the modern age. The course prepares students for more advanced work in classical literature and culture. Offered biennially.

CLAS 30022. Roman Literature and Culture

(3-0-3)

This course surveys the leading works of ancient Roman literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from six hundred years of literary versatility that combined enormous originality with a literary tradition inherited from the Greeks. Among the authors introduced are Plautus, Lucretius, Catullus, Cicero, Horace, Livy, Lucan, Tacitus, Apuleius, Ammianus, and Augustine. Special attention is paid to the formal structures of Roman literary works, the cultural issue they raise, and the lasting value of Latin literature to the modern age. The course prepares students for more advanced study in classical literature and culture. Offered biennially.

CLAS 30025. Greek Literature from Ancient Text to Modern Screen

(3-0-3)

In this class we will study a variety of ancient Greek texts focusing on selections from Homer and Greek drama. Through the mythological content of the texts studied, we will analyze the transformations that all authors seek to create in relation to their predecessors. We will study the ways in which authors both appropriate earlier material and seek to differentiate themselves from earlier texts in order to create exciting and novel works. This same theoretical framework will inform our analysis of selected films that are inspired by the texts we have studied. For example: How is the Cyclops episode treated differently in Homer's *Odyssey*, Euripides' *Cyclops* and the Coen Brothers movie *O brother where art thou*? How is Oedipus presented differently in plays by Sophocles and Euripides and in Pasolini's film *Edipo Re*? How does recognition of the model inform our understanding of the new version? How does social and political context help to explain textual transformations? We will seek to answer these kinds of questions.

CLAS 30075. Latin Saints' Lives in Late Antiquity

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent). Hagiography is one of the most versatile literary genres of Late Antiquity, and saints' lives are among the most famous and celebrated texts of that age. Starting out as simple eye-witness accounts of martyrdom and minutes of the martyrs' trials (Acta), they soon evolved into far more sophisticated literary forms: they served not only for the edification, but also for the amusement of the Christian people, replacing the pagan novel with their fanciful narratives of persecution and constancy, and they merged with the traditions of classical poetry to create a wide range of poetic forms: epigrams for martyrs' tombs (by Pope Damascus), hymns

for liturgical use (Ambrose of Milan) and private piety (Prudentius), epic poems (the highly influential *Life of St Martin of Tours* by Venantius Fortunatus) and the laudatory “Birthday Poems” that Paulinus of Nola wrote for the patron saint of his city. In this course, we will cover both prose and poetic texts (authors, apart from the abovementioned, will include Jerome, Eusebius, Vita Severini, and the *Passio Perpetuae and Felicitatis*). Due to the historical importance and the wide later tradition of ancient hagiography, we will frequently refer to art and archaeology, history, and music. The texts are suitable for students with intermediate and advanced Latin knowledge. Some experience with classical poetry (Vergil) will be helpful.

CLAS 30105. The History of Ancient Greece

(3-0-3)

An outline introduction to the history of ancient Greece from the Bronze Age to the Roman conquest. The topics covered include the rise of the distinctive Greek city-state (the “polis”), Greek relations with Persia, Greek experiments with democracy, oligarchy, and empire, the great war between Athens and Sparta, the rise to power of Philip and Alexander of Macedon, and the Greeks’ eventual submission to Rome. Readings include narrative, documentary, and archaeological sources. The course prepares students for advanced study in ancient history. Offered biennially.

CLAS 30110. Democracy and the Greeks

(3-0-3)

This course builds on CLAS 30105, *The History of Ancient Greece*, and examines the theory, practice, and development of ancient Greek, especially Athenian, democracy. Particular attention is devoted to comparing ancient with modern forms of democracy. Among the special topics studied are the origins of democracy, its advantages and disadvantages as a form of government, Greek ideas of alternatives to democracy, and democracy as an abiding legacy of Greek civilization to the modern world.

CLAS 30112. The Age of Alexander

(3-0-3) Baron

This course examines the military achievements of Alexander of Macedon (356–323 B.C.) and their far-reaching political, social, cultural, and religious consequences. Topics covered include the Greek, Macedonian, Persian, and other cultural contexts of the time, Alexander’s attitude toward divinity (including his own), his concept of empire, his generalship, and his legacy for Greco-Roman antiquity. Particular attention is devoted to representations of Alexander through the ages, beginning during his own lifetime with the accounts of ancient writers, historians and others, down to novels and films of the present day. Ancient authors and documents are read in translation.

CLAS 30120. The Greeks and Their Gods

(3-0-3)

An introduction to the varied and unique religious beliefs and practices of the ancient Greeks. With the aid of anthropological and comparative material on religion from other cultures and societies, the course stresses the intersection of religious conventions with politics, gender, and class in the Greek city-states, and gives special attention to the religious life of the best documented Greek community of all, ancient Athens.

CLAS 30205. The History of Ancient Rome

(3-0-3) Hernandez

Corequisite: CLAS 32205

An outline introduction to the history of ancient Rome from Romulus to Constantine. The topics covered include the meteoric spread of Roman rule in the ancient Mediterranean, the brilliance of a republican form of government tragically swept away by destructive civil war, the rise of repressive autocracy under the Caesars, and the threats to empire in late antiquity posed inside by the rise of Christianity and outside by hostile invaders. Readings include narrative, documentary, and archaeological sources. The course prepares students for advanced study in ancient history. Offered biennially.

CLAS 30210. Roman Law and Governance

(3-0-3)

An introduction to the nature and influence of Roman law, one of the most celebrated and distinctive elements of ancient Roman culture. The course surveys the development of Roman civil and criminal law from the very early and enigmatic *Twelve Tables* to the very late and amazingly great *Digest of Justinian*. Topics covered include legal procedures, the creation of law, and Roman jurisprudence, all of which are studied in the broad context of Roman government and administration. The lasting effects of Roman law on modern legal systems are also considered.

CLAS 30213. Marcus Tullius Cicero (106–43 B.C.E.): Lawyer, Politician, Philosopher

(3-0-3) MacCormack

We know more about Cicero than about any other Roman individual. He was born in Arpinum, a small Italian town near Rome, and was sent for his education to Rome, where he made his name, first as a lawyer, and then also as a statesman. Law and politics were intimately related throughout Cicero’s career, because even as a young and relatively inexperienced advocate, he pleaded political cases that required not just skill but also courage. As consul in 63 B.C. he confronted a conspiracy led by the Roman nobleman Catiline to overthrow the government. His subsequent exile was in part the work of the enemies he made in the course of these events. Thanks to his opposition to Julius Caesar, Cicero was forced to withdraw into private life, but he used these years to write dialogues about politics and law, philosophy and rhetoric. After Caesar’s assassination, Cicero returned to politics in the hope of restoring some form of the traditional government of the Roman republic. This cost him his life. Cicero’s influence was enormous. In his own time he was recognized—even by his enemies—as a brilliant orator whose views had to be reckoned with. Some of his ideas on natural law entered Justinian’s *Digest*, and late Roman pagans and Christians thought long and hard about his philosophical works—but in very different ways. In the renaissance, it was Cicero’s speeches that invited imitation and emulation. Then and subsequently, the hundreds of letters he wrote to his friend Atticus and to other contemporaries have revealed his personal life, and his reflections and uncertainties about the turbulent times in which he lived. This course aims to portray Cicero in his time, seeing him through his own eyes, and the eyes of contemporaries. There will also be opportunities to read and think about Cicero’s impact on subsequent generations.

CLAS 30214. Cicero and Political Tradition

(3-0-3)

The life and writings of Marcus Tullius Cicero (106–43 B.C.) have been studied in light of the different aspects of his eventful career as a lawyer and advocate, orator, politician, statesman, and philosopher. His surviving writings political and judicial speeches, treatises on religion, law, ethics, political philosophy and rhetoric, and also many personal letters shed light on the diverse successes and reversals of his public and private life. Those who study Cicero tend to focus on one or two aspects of his achievement to the exclusion of others. In this course, we will try to understand how the different branches of Cicero’s life and work fit together, why he thought that philosophy, law and religion were relevant to politics, and why and how ethical considerations should condition one’s private and public life. In pursuing these issues, we will think about Cicero’s intellectual and political predecessors, both Greek and Roman, before reading a selection of his own writings. By way of understanding some aspect of Cicero’s enormous influence we will conclude with reading part of *The Federalist Papers*.

CLAS 30215. The Roman Revolution

(3-0-3)

This course builds on the work of CLAS 30205 “The History of Ancient Rome” and CLAS 30022 “Roman Literature and Culture” and examines the climactic events in Roman history of the late first century B.C. and early first century A.D. that changed Rome from an open republic to a repressive military monarchy. Chronologically the course begins with the appearance on the Roman political stage of the unabashedly ambitious Julius Caesar, and ends with the accession of a hereditary autocrat in the person of the morose ruler Tiberius. Exploring a variety of sources, the course focuses on the political tensions and civil commotions of

the revolutionary era associated with warlords like Pompey, Crassus, Caesar, and Antony, and concentrates especially on the rise to power of Augustus, the most ruthless warlord of all, and his creation of a personal political regime that was to last in style for centuries.

CLAS 30220. The Romans and Their Gods

(3-0-3)

An introduction to the way in which the Romans conceived of, worshipped, and communicated with the myriad gods of their pantheon. The course focuses first on conventional religious rituals and their cultural meaning, and secondly on the success of Roman polytheism in adapting to changing historical and social conditions. Particular attention is paid to the so-called “mystery religions”, including Christianity, and their relationship to conventional forms of Roman religious behavior.

CLAS 30225. Romans and Christians

(3-0-3)

The early development of the Christian religion in its historical Roman context. The course surveys the political, social, and administrative structures of the Roman Empire, examines the complexity of Rome’s religious life, and analyzes the rise of the Jesus movement and Rome’s reaction to it. Particular topics studied include pagan and Christian magic and miracle-working, the sectarian and subversive character of early Christianity, martyrdom and persecution, and Constantine’s emergence as Rome’s first Christian emperor.

CLAS 30226. History and Religion in Ancient Rome, ca. 100 B.C.–ca. A.D. 500

(3-0-3)

Religious practice entails an understanding of the past. The city of Rome in the time of Christ contained over one hundred temples and shrines each with its foundation story. Rome’s earliest law code, the Twelve Tables, which Roman boys learned by heart, contained sacred laws regulating religious conduct. The stories of temple foundations were part and parcel of Roman history, and Roman historians and poets recorded numerous divine interventions in the affairs of their city. Imperial expansion brought the gods and cults of foreign nations to Rome. This was the context of the advent first of Judaism and then of Christianity in the city of Rome and its empire. The course studies the very different understandings of history and of the presence of deity in human affairs that are expressed in the religion of the Roman state and in the foreign religions, chief of them Christianity that spread in the Roman empire. The Christian god also was thought to act in history, but not in ways that made sense in a Roman framework. Why then did Christianity prevail? The course closes with a brief outlook on the impact of Christian mission in the empires of ancient America that were conquered by the Spanish in the sixteenth century.

CLAS 30315. Sex and Gender in Greco-Roman Antiquity

(3-0-3)

This course examines the differing roles and stereotypes, forms of behavior, and values associated with women and men in Greco-Roman antiquity. Special attention is given to the preoccupations of the Greeks and Romans with the categories of “female” and “male” and to the dynamics of relations and relationships between women and men. The course both deepens knowledge of Greco-Roman society and provides an informed background for contemporary gender debates.

CLAS 30320. Family and Household in Greco-Roman Antiquity

(3-0-3)

This course is a survey of the life-course in Roman antiquity. Topics studied will include marriage, divorce, child rearing, old age, the way in which family and household were conceptualized by the Romans, and the demography of the Roman world.

CLAS 30321. Roman Society and Culture

(3-0-3)

This upper-level course in ancient history is designed to introduce students to the principal features of Roman society and culture in the central era of Rome’s history

(ca.150 B.C.–A.D. 200). After a general introduction to Rome’s historical development, the course focuses on topics such as: Roman social structure; marriage and family life; child rearing and education; demography and disease; labor and leisure; life in the Roman army; religious festivals and rituals; the lives of women; and the practice of slavery. The course concentrates at large on Roman social relations in the transitional age from rule by Republican government to rule by autocratic emperors, and is intended to display what has been called the “fabulous diversity and richness” of Roman socio-cultural life. Original sources are read in translation. Previous exposure to Roman history is recommended but not required.

CLAS 30328. War and Society in the Ancient World

(3-0-3)

The political structures, societal practices, and artistic productions of Greece and Rome were profoundly shaped by military activity. This course surveys the practice of war and its effects on art and society from Homeric Greece to the end of Roman hegemony in Western Europe. Questions to be considered include: What were the strategy and tactics of ancient armies? How did military organization affect and reflect social organization and political and economic policy? What is the ideology of war? How did the experience of war affect the attitudes of different generations? Texts to be read include Homer, Aeschylus, Thucydides, Plutarch, Caesar, Horace, Vergil, Josephus, Frontinus, and Tacitus.

CLAS 30329. Self and Society in the Ancient World

(3-0-3)

This course seeks to answer the question “Who am I and how should I present myself?” through an investigation of self and society in the ancient world. Surveying the literature of the Ancient Near East, with special emphasis on biblical texts and Classical texts from Greece and Rome, students will explore how ancient peoples defined themselves, and to what extent the methods of self-defining have changed (or not changed) up to the present. Students will read and analyze a variety of ancient texts as they explore how ancient societies conceptualized individual and group identity in ethnic, national, and religious aspects. Students will also read classic and recent historical and anthropological scholarship, which will place the texts in a greater context and invite the students to think about the problems of ethnic, national, religious, and political identities in the modern world.

CLAS 30330. The Greek and Latin Origins of Medical Terminology

(3-0-3) Ladouceur

This course offers an introduction to the ancient Greek and Latin languages that enables students to decipher the arcane and often perplexing vocabulary of modern medicine. Basic linguistic concepts are explained, the manner in which medical terms are constructed from Greek and Latin roots is analyzed, and appropriate contextual material on ancient medicine is provided. This is a course of great practical value, not least for the attention it pays to human anatomy.

CLAS 30335. The History of Ancient Medicine

(3-0-3) Ladouceur

This course traces the development of medicine in the ancient Mediterranean world, concentrating on the medical beliefs, theories, and practices of the Egyptians, Greeks, and Romans. The course emphasizes the value of studying written sources such as the Hippocratic treatises and the works of Galen with artistic evidence and human remains. A connection between ancient and modern medicine is made by considering two contrasting models of disease, the biomedical and the biopsychosocial, that figure as the focus of a contemporary debate on health care.

CLAS 30350. Introduction to Classical Archaeology

(3-0-3) Hernandez

The course examines the archaeology of the ancient Mediterranean, primarily of Ancient Greece and Rome, from prehistoric times to Late Antiquity. Students will learn how archaeologists interpret material remains and reconstruct past events. Discussions of stratigraphy, chronology, and material evidence will introduce students to the fundamental principles of archaeology. Archaeological methods and theory will be studied in relation to field excavation and intensive surface survey. Students will assess the architecture of important sites, such as Troy, Mycenae, Athens, Pompeii, and Rome, and will learn how to analyze material artifacts from

the Greco-Roman world, including ceramics, coins, glass, inscriptions, paintings, sculpture, and metalwork. The course aims to teach students how to evaluate the material culture of the ancient world on the basis of archaeological research and historical and social context.

CLAS 30360. Words and/of Power: The Theory and Practice of Persuasive Speech in Greece and Rome

(3-0-3)

Rhetoric occupied a prominent place in the democracy of the Athenians and in the republican era of Roman history. This course examines the theory, practice and context of ancient rhetoric, and pays special attention to developments caused by radical changes in the political character of the Athenian and Roman civic communities. Representative readings from Greek and Roman orators and writers on rhetorical theory.

CLAS 30365. The Art and Literature of Metamorphosis

(3-0-3)

This course begins with a critical study of Ovid's great poem, the *Metamorphoses*. The poem itself became a subject of metamorphosis in poetry and art in the hands of such figures as Statius, Dante, Botticelli, Bernini, Rembrandt, Hughes, and Heaney. The course addresses the modeling of transformation within the literary text by examining first Ovid and his sources, and second, adaptations of his poem by writers such as Shakespeare and Kafka. Connections with folklore, magic, and religion are explored. The graphic arts receive equal consideration as the course explores how Ovid's ideas of the transformation of the body, the capacity of the human body for allegory, and the fragility of identity have influenced later artists and authors.

CLAS 30405. Greek Art and Architecture

(3-0-3) Rhodes

This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period from the eighth through second century B.C., with some consideration of prehistoric Greek forebears of the Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes toward the gods, human achievement, and the relationship between the divine and the human.

CLAS 30410. Hellenistic and Roman Art and Architecture

(3-0-3)

This course explores the architecture, urban planning, sculpture, and painting of Hellenistic Greece and Rome, from the time of Alexander the Great in the fourth century B.C.E. to the reign of the Roman emperor Constantine in the fourth century C.E. The art and architecture of Greece and Rome will be analyzed as expressions of their culture and time and as tools for understanding those cultures more completely. A variety of themes will be addressed, including changing conceptions of monumentality in art and architecture; imperial propaganda in art, architecture and religion; technology as inspiration for new conceptions of art and architecture; the contrasting natures of Greek and Roman art and culture; the influence of Greek culture upon Rome; and the nature and significance of the ever-changing mixture of Greek and native Italic elements in Roman art and architecture.

CLAS 30415. Etruscan and Roman Art and Architecture

(3-0-3)

Roman Art of the Republic and the Empire is one focus of this course, but other early cultures of the Italian peninsula and their rich artistic production are also considered. In particular, the arts of the Villanovans and the Etruscans are examined and evaluated as both unique expressions of discrete cultures and as ancestors of and influences on Rome. The origins and development of monumental architecture, painting, portraiture, and historical relief sculpture are isolated and traced from the early first millennium B.C.E. through the early fourth century of the modern era.

CLAS 30416. Archaeology of Pompeii and Herculaneum: Daily Life in the Ancient Roman World

(3-0-3)

The eruption of Mount Vesuvius in A.D. 79 buried two thriving Roman cities, Pompeii and Herculaneum, in a prison of volcanic stone. The rediscovery of the cities in modern times has revealed graphic scenes of the final days and an unparalleled glimpse of life in the ancient Roman world. The course examines the history of excavations and the material record. Topics to be discussed include public life (forum, temples, baths, inns, taverns), domestic life (homes, villas), entertainment (amphitheater), art (wall paintings, mosaics, sculpture), writings (ancient literary sources, epigraphy, graffiti), the afterlife (tombs), urban design, civil engineering, the economy, and themes related to Roman society (family, slavery, religion, government, traditions, diet).

CLAS 30420. Late Antique/Early Christian Art

(3-0-3)

Art in Late Antiquity has traditionally been characterized as an art in decline, but this judgment is relative, relying on standards formulated for art of other periods. Challenging this assumption, we will examine the distinct and powerful transformations within the visual culture of the period between the third and sixth centuries A.D. This period witnesses the mutation of the institutions of the Roman Empire into those of the Christian Byzantine Empire. Parallel to these social changes we can identify the emergence of a Christian art that defines our basic assumptions about the role of art in a Christian society. The fundamental change in religious identity that was the basis for this development had a direct impact upon the visual material that survives from this period. This course examines the underlying conditions that made images so central to cultural identity at this period.

CLAS 30431. The Art of Mythology

(3-0-3)

This cross-disciplinary course explores representations of classical myth in Western literature and art from the seventh century B.C. to the 18th century of the modern era. Literary and visual narratives are compared and contrasted, and the procedures of poets, philosophers, artists, sculptors, and architects in selecting and adapting mythological subjects are analyzed. The course raises questions about the connections between myth and political power, and about such major concepts as heroism, metamorphosis, and earthly and divine love. Readings from classical sources on Greek myths, and special attention to such works of art as Raphael's Roman cycles and Bernini's sculpted dramas.

CLAS 30551. Archaeological Ethics and Law

(3-0-3)

This class explores the ethical, legal, and practical dimensions of modern archaeology through a consideration of the following topics: archaeology as a profession; archaeological ethics; the relationship between archaeology and others (the public, ethnic groups, avocational archaeologists, collectors, etc.); international and national approaches to archaeological heritage management; the antiquities market; maritime law, underwater archaeology, and treasure hunting; cultural resource management in the United States; and archaeological education.

CLAS 30799. Hieroglyphs and History

(3-0-3) Ladouceur

This course will focus on Egyptian hieroglyphs both as a means to reconstruct Egyptian history and culture as well as a reflection of that culture. The student will be taught to translate and interpret primary sources especially on monuments and archaeological finds. Material from the tomb of Tutankhamun will be read and analyzed in detail. In addition there will be lectures and discussions on specific historical topics and also on developing chronologies, understanding color symbolism, recognizing the numerous Egyptian deities, and interpreting Pharaonic names.

CLAS 30802. Death and the Afterlife in Ancient Egypt

(3-0-3)

Prerequisite: CLAS 30799

After an initial survey of historical sources, this course will focus on a wide range of texts, archaeological artifacts, and architectural remains associated with Egyptian funerary practice and conceptions of the Otherworld.

CLAS 32105. The History of Ancient Greece Discussion Group

(1-0-0)

A weekly discussion group required for those registered for CLAS 30105 "The History of Ancient Greece" or its crosslists.

CLAS 32205. History of Ancient Rome Discussion Group

(1-0-0)

Prerequisite: CLAS 30205 (may be taken concurrently) or HIST 30230 (may be taken concurrently)

A weekly discussion group required for those registered for CLAS 30205, The History of Ancient Rome, or its crosslists.

CLAS 40041. Introduction to Applied Linguistics

(3-0-3)

This course will introduce students to the properties of language and their systematic study via linguistic inquiry. Specifically, the origins and mechanisms of linguistic knowledge will be examined alongside the componential units of syntax, morphology, phonology and semantics. The course will further introduce students to applied linguistic study with an emphasis on second language acquisition and the integration of sociocultural knowledge within this process. Students will complete this course with a greater understanding of the nature of language and the mechanisms whereby it is acquired, conceptually represented and produced.

CLAS 40125. Classical Greek Tragedy

(3-0-3)

This advanced course in literature analyzes both the text and performance of classical Greek tragedy. The structures and sensibilities that inform tragedy are addressed, with special attention to plays written by the three great tragedians, Aeschylus, Sophocles, and Euripides. The form and function of Greek tragic dramas, their place in classical culture, and their exploration of fundamental human issues (gender relations, revenge, war, love, relations with foreigners, successful government) are examined. The Greeks' own responses to tragedy, as represented by Aristophanes, Plato, and Aristotle, are also discussed, as is the enormous influence Greek tragedy has had on subsequent theatre down to present times.

CLAS 40126. Ancient Comedy

(3-0-3)

This course will focus on the two models of western comedy found in the Athenian plays of Aristophanes and the Roman plays of Plautus and Terence. Students will read the plays in English translation. The course will investigate the historical contexts that gave rise to the different types of ancient dramatic comedy and read some modern theoretical work on humor and laughter; both provide clues to the mysterious operation of comedy, which can undermine authority and the status quo but can also lampoon innovation and progress. The larger purpose of the course is to identify the ideas that lie behind the conventions and devices of Greek and Roman comedic theater.

CLAS 40130. Socrates and Athens

(3-0-3)

This course examines the moral upheaval evident in classical Athens during the Peloponnesian War, the great fifth-century struggle between Athens and Sparta and their respective satellites. The history of Thucydides, the comedies of Aristophanes, and the tragedies of Euripides and Sophocles provide the basic reading. The course also draws on some of Plato's writings to assess Socrates' reaction to the Athenian moral crisis.

CLAS 40340. The Roman Empire: Governance, Society and Culture

(3-0-3)

This advanced course in ancient history examines the Roman Empire from Augustus to Constantine. It deals with the establishment of the Augustan Principate and the progression of autocracy at Rome in the first two centuries of the imperial age, leading to discussion of what is generally called the third-century crisis and the new monarchy of Diocletian and Constantine. It investigates how the Roman Empire as a geo-political unit was governed and administered (paying particular attention to the all-powerful figure of the Roman emperor), and how the diverse regional cultures of the greater Mediterranean world were affected by Roman rule. Among topics studied are contemporary debates on Roman society, economy, demography, and culture.

CLAS 40342. Christianity in the Roman World

(3-0-3)

The course studies continuity and discontinuity in the Mediterranean world during a formative period, the transition from Roman Empire to early medieval European kingdoms. Christianity played a vital role during this transformation, but not the only one. Beginning with a review of Roman institutions, law, culture and religion, we will observe the changes they underwent between ca. 150 C.E. and ca. 750 C.E. At this latter point in time, some people were still thinking of themselves as living within the Roman Empire, even though the local potentate was a non-Roman king. Also, Roman law had become Christian law, and Latin was beginning to generate the languages now collectively described as "Romance." On the fringes of Europe, in England and Ireland, meanwhile, missionaries shared with their converts not just Christianity but also the Latin language and Latin literature, along with certain Roman concepts of culture and political organization.

CLAS 40343. Augustine and the City of God

(3-0-3)

The aim of the course is to gain a detailed understanding of one of the world's important works of historical and political theology. Writing in response to the destruction of the City of Rome by Visigothic invaders in 410 A.D., Augustine devoted the first half of this "long and difficult work" to a refutation of Roman religion and ancient philosophy (Books I–X). In the second half (Books XI–XXII) he explained what he meant by City of God and Terrestrial City and traced the evolution through time of the two cities in relation to each other. We will study the *City of God* in light of the sources Augustine engaged with. For the first part, these include the philosophers Plato, Apuleius, Plotinus and Porphyry, the historians Sallust and Livy, and also the statesman Cicero and the poet Vergil. In the second part, Augustine builds on biblical theology, history and chronology. To conclude, we will devote some time to the influence of this very long book. It will be studied in English, but those with viable Latin will be encouraged to use it.

CLAS 40344. Augustine and Cicero

(3-0-3) MacCormack

Augustine of Hippo is best known and is most intensively studied as the theologian whose *Confessions*, commentaries on *Genesis*, *Trinity*, *On Christian teaching*, and *City of God* have shaped Christian thinking for centuries, and do so even now. His engagement with classical Greek and Roman authors has also been studied, but much less so. The purpose of this course is to follow Augustine's lifelong interest in the writings of the Roman orator, statesman and philosopher Cicero. It was Cicero who inspired Augustine's early interest in philosophy, and references to Cicero's ethical enquiries in the *Tusculan Disputations* and elsewhere appear frequently in Augustine's writings. He also thought about Cicero the orator when considering the tasks of Christian writers and preachers. Above all, in the *City of God*, Augustine responded to Cicero's dialogue *On the nature of the gods*, which in turn conditioned his understanding of Roman history and of the content of human history at large.

CLAS 40350. The Myths of the Greeks and Romans

(3-0-3) Torrance

This advanced course investigates the mythologies of Greece and Rome and traces their transmission to and influence on modern literature and art. Special attention is given to the wide range of media in which ancient stories about gods and heroes were expressed and communicated, and to the process by which these marvelous stories survived in later literature and the visual arts, inspiring writers and artists to adapt them to their own purposes. Current interpretative theories at the forefront of scholarship in the humanities are explored for their value in interpreting myths.

CLAS 40355. Greek and Roman Epic Poetry

(3-0-3)

This advanced course in literature provides detailed study of the major epic poems of the classical literary tradition: the *Iliad* and *Odyssey* of Homer, the *Aeneid* of Virgil, and the *Metamorphoses* of Ovid. Discussion centers on the cultural contexts in which the works were written or produced, and the literary conventions on which they rely for their ever-appealing aesthetic and emotional power.

CLAS 40358. The Roman World of Apuleius

(3-0-3)

An advanced course in Roman history and literature that investigates the Latin author Apuleius in his socio-cultural context. The course begins with the Romano-African setting into which Apuleius was born, recreates the educational travels to Carthage, Athens and Rome that occupied his early life, and focuses especially on his trial for magic in Sabratha in Tripolitania before following him back to Carthage where he spent the remainder of his life. Notice will be taken of all Apuleius' writings, but special attention will be paid to the Apology, a version of the speech of defense made at his trial, and to the socio-cultural significance of his work of imaginative fiction, the *Metamorphoses*. The course is open to students with or without Latin.

CLAS 40406. The Topography of Ancient Rome

(3-0-3)

The course examines in detail the buildings and monuments of ancient Rome from the Archaic Period to the beginning of Late Antiquity (8th century B.C. to 4th century A.D.). The primary aim of the course is to consider the problems related to the identification, reconstruction, chronology, and scholarly interpretation(s) of Rome's ancient structures. Students will investigate the history of excavations in Rome, analyze ancient literary sources, evaluate ancient art and architecture, and examine epigraphic, numismatic, and other material evidence related to Rome's ancient physical makeup. This close examination of the city of ancient Rome in its historical context also explores how urban organization, civic infrastructure, public monuments, and domestic buildings reflect the social, political, and religious outlook of Roman society.

CLAS 40410. Greek Art and Architecture

(3-0-3) Rhodes

In this course the development of Greek monumental architecture, and the major problems that define it, will be traced from the 8th to the 2nd centuries B.C., from the late Geometric through the Archaic, Classical, and Hellenistic periods. Among themes to be related are the relationship between landscape and religious architecture, the humanization of temple divinities, the architectural expression of religious tradition and even specific history, architectural procession and hieratic direction, emblem and narration in architectural sculpture, symbolism and allusion through architectural order, religious revival and archaism, and the breaking of architectural and religious canon.

CLAS 40420. Art into History: Reading the Art of Medieval Byzantium

(3-0-3) Barber

Byzantine art has often been opposed to the traditions of Western naturalism, and as such has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material we will examine the art produced in Byzantium in the period from the ninth to the 12th century, a period that marks the high point of Byzantine artistic production and

influence. Stress will be placed upon the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear upon our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue of this course.

CLAS 40450. Classical Literature and its English Reception

(3-0-3) Schlegel

Ancient Greek and Latin literature—history, epic, tragedy, novels, oratory—has a second life in English literature as it is reproduced, echoed, or recalled. Pairing important works in Greek and Roman literature (in translation) with works of English literature, this course will look at some of the ways that writers in English have used the traditions of western antiquity. Shakespeare uses Julius Caesar and Ovid, Milton reanimates Hesiod and Vergil, Alexander Pope and James Joyce share a Homeric inspiration but little else, and Victorian novelists plunder their classical educations to raise up and to tear down the social pretensions of their time. Students will study the ancient texts in their own right and will develop skills in interpreting the remarkable range of uses to which they are put by their modern translations, borrowings, and adaptations.

CLAS 40820. Writing History in Ancient Greece and Rome

(3-0-3) Baron

Herodotus has been called both the “Father of History” and the “Father of Lies.” Thucydides is revered by some as the first “scientific” historian; others deny him the title of historian altogether. The most famous tales in Roman history come from the early books of Livy, and yet it is unlikely that he had any way of obtaining reliable information for that period. The historians of the classical Greek and Roman world stand among the greatest writers of the Western tradition. But to what extent were they performing the task that we call history? In this course we will survey the works of the major historians of ancient Greece and Rome, including Herodotus, Thucydides, Livy, Tacitus and others. We will examine the origins of Greek historiography, the methods espoused and practiced by Greek and Roman historians, the effect political and social changes had on ancient historiography, and the relationship of ancient historical writing to that of the modern scholars. The class will be primarily discussion-based. All readings in the ancient authors will be in English.

CLAS 43020. Roman History Seminar

(3-0-3) Bradley

This advanced course in ancient history introduces students to major documents of the Roman imperial age and investigates how they are to be assessed as historical sources. Particular attention is paid to the Achievements of the Deified Augustus (*Res Gestae*), a dossier of senatorial decrees recently discovered in Roman Spain (especially the *Senatus Consultum de Cn. Pisone patre*), and various letters, edicts and rescripts from emperors to provincial communities. The object is to learn how the history of the Roman Empire is advanced through non-literary documents known from inscriptional, papyrological, and legal sources. Special attention is given to documents involving Christian subjects of empire, accounts for instance of the trials of figures Christians subsequently claimed as martyrs, such as Perpetua and Felicity. Study of the Acts of the Apostles is also included as a subliterate text opening up perspectives on the Roman imperial age. All documents are read in translation.

CLAS 43140. Plato

(3-0-3)

A detailed and systematic reading, in translation, of the fragments of the pre-Socratics and of the following Platonic dialogues: *Euthyphro*, *Apology*, *Crito*, *Meno*, *Protagoras*, *Phaedo*, *Republic*, *Phaedrus*, *Symposium*, and *Theaetetus*.

CLAS 43142. Plato's Republic and Statesman

(3-0-3) Hosle

The course will deal with two of Plato's three main works on political philosophy, which we will read thoroughly and in detail. Aim of the course is to render the students familiar with the main theses and arguments of the dialogues and introduce them to some of the major questions every Plato interpreter faces: Why did

Plato write dialogues? How does he himself relate to the main interlocutors in his dialogue? Is it true that he deliberately holds something back? Why are metaphysical, ethical, and political ideas intertwined in a way almost absent from modern political philosophy? What is the function of myths? How did Plato evaluate the political reality of his time? Is it true that he influenced modern totalitarianism? Can we learn something from his radical criticism of modern democracy?

CLAS 43341. Constantine and Julian

(3-0-3)

This advanced seminar in ancient history and literature examines the lives and reigns of the fourth-century Roman emperors Constantine and Julian. Constantine was a pivotal figure in world history, the founder of a new dynasty of rulers in a centuries-old empire facing many challenges, and the first Roman emperor to embrace and promote Christianity. His rule changed the complexion of the ancient world. His descendant Julian reigned only for a short time, but he is remembered above all for the concerted effort he made to return Rome to its traditional religious orientation. He failed in his attempt, in part because of his premature death, but as the last pagan emperor of Rome he remains a figure of almost mythological status. The course investigates the principal features of the history of these two rulers, political, military, socio-economic and religious. A principal theme is the question of how historical experience can be recovered. Readings from original sources (in English translation) are studied in conjunction with documentary and iconographic evidence. The course also considers how modern historians, biographers and novelists have recreated these compelling figures.

CLAS 43357. The Age of Hadrian

(3-0-3)

This advanced seminar in ancient history and literature examines the life and reign of the Roman emperor Hadrian, who is remembered as one of the most complex and enigmatic of Roman rulers: the builder of the Wall in Britain and the Pantheon and Castel Sant'Angelo in Rome, an inveterate traveler across the ancient Mediterranean world, a devotee of Greek culture, a reformer of Roman law, a poet who mused about his soul on his death-bed, a creator of new gods, the first Roman emperor to wear a beard. A principal theme of the course is the question of how historical experience can be recovered, and readings from original sources (in English translation) are studied in conjunction with documentary and iconographic evidence. The course also considers how modern historians, biographers and novelists have recreated this mysterious figure, Ronald Syme and Marguerite Yourcenar included.

CLAS 43407. Seminar: Greek and/or Roman Art

(3-0-3)

Seminar in Greek and/or Roman art. Content varies.

CLAS 43671. Latin Scientific Literature

(3-0-3) Goulding

This course is organized around the reading of Latin scientific texts, in the original language. We will read natural philosophical and scientific texts from antiquity to the seventeenth century, in a variety of genres (philosophical poetry, technical treatises, question commentaries etc.), working from manuscript and early printed editions, as well as modern editions. Equal emphasis will be paid to the content of the text, and linguistic or palaeographical issues. Intermediate level Latin required.

CLAS 46801. Directed Readings

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

CLAS 53020. Roman History Seminar

(3-0-3) Bradley

This advanced course in ancient history introduces students to major documents of the Roman imperial age and investigates how they are to be assessed as historical sources. Particular attention is paid to the Achievements of the Deified Augustus (Res Gestae), a dossier of senatorial decrees recently discovered in Roman Spain

(especially the *Senatus Consultum de Cn. Pisone patre*), and various letters, edicts and rescripts from emperors to provincial communities. The object is to learn how the history of the Roman Empire is advanced through non-literary documents known from inscriptional, papyrological, and legal sources. Special attention is given to documents involving Christian subjects of empire, accounts for instance of the trials of figures Christians subsequently claimed as martyrs, such as Perpetua and Felicity. Study of the Acts of the Apostles is also included as a subliterate text opening up perspectives on the Roman imperial age. All documents are read in translation.

CLAS 53100. Honors Seminar

(3-0-3) Schlegel

This course is offered each fall semester and is a requirement for all majors in Classics and Greek and Roman Civilization who wish to receive an honors degree. The specific content of the seminar varies from year to year, but its broad purpose is to introduce students to scholarly methods of research, and through research to reflect on the value of studying classical antiquity.

CLAS 53400. Seminar: Topics in Ancient Art

(3-0-3) Rhodes

Topics course on special areas of Greek and/or Roman art.

CLAS 53500. Literature and Empire

(3-0-3)

This seminar examines major works of literature from the Roman imperial era and the political and ideological contexts in which they were written. Its principal theme is the relationship between literature and authority from the age of Augustus through the age of Augustine. Works from a variety of genres are read as items that engaged with the rise of autocracy at Rome and the impact autocracy had on freedom of expression and creativity, with the immanence in Roman culture of Mediterranean-wide rule, and with the threats to empire, both within and without, that emerged over time. Texts to be read, in English translation, include some or all of the following: Virgil's *Aeneid*, Ovid's *Poetry of Exile*, Lucan's *Civil War*, Tacitus' *Annals*, *Germania* and *Agricola*, Pliny's *Letters*, Juvenal's *Satires*, Apuleius' *The Golden Ass*, Tertullian's *Apology*, and Augustine's *City of God*.

CLGR 10001. Beginning Greek I

(4-0-4) Mazurek

This two-semester sequence of courses introduces students to the language of the ancient Greeks for the first time. It emphasizes the fundamentals of ancient Greek grammar and vocabulary, and prepares students to read original Greek texts. An appreciation for ancient Greek culture is also fostered through secondary readings and class discussion.

CLGR 10002. Beginning Greek II

(4-0-4) Mazurek

Prerequisite: CLGR 10001

This two-semester sequence of courses introduces students to the language of the ancient Greeks for the first time. It emphasizes the fundamentals of ancient Greek grammar and vocabulary, and prepares students to read original Greek texts. An appreciation for ancient Greek culture is also fostered through secondary readings and class discussion.

CLGR 20003. Intermediate Greek

(3-0-3) Mazurek

Prerequisite: CLGR 10002 or CLGR 10111

This second-year language course builds on the work of Beginning Greek I and II. It combines a review of grammar with careful reading of classical Greek authors such as Homer and Plato. The course improves students' translating skills, introduces methods for studying Greek literature in its historical and cultural contexts, and prepares students for more advanced work in the rich literature of the ancient Greeks. Offered each fall semester.

CLGR 20004. Greek Literature and Composition

(3-0-3) Torrance

(Recommended for students who have completed CLGR 20003 or equivalent.) This second-year language course continues the review of grammar begun in CLGR 20003 and introduces students to stylistic analysis through close readings of excerpts from classical Greek authors such as Herodotus (prose) or Euripides (poetry). A special feature of the course is that students learn how to write classical Greek for themselves. Offered each spring semester.

CLGR 30011. Homer

(3-0-3)

(Recommended for students who have completed CLGR 20003 or equivalent.) This third-year course builds on CLGR 20003 and CLGR 20004, and offers close reading of passages from the *Iliad* and *Odyssey*. Homer's epic poems stand at the head of the tradition of European literature; their themes and poetic style have substantially influenced the works of Dante, Milton, and many other European writers. The poems are discussed in their cultural context, and features of poetic oral composition are examined. The course prepares students for advanced offerings in Greek literature, especially CLGR 40021 and CLGR 40031. Offered in fall semester, alternate years.

CLGR 30012. Herodotus

(3-0-3)

(Recommended for students who have completed CLGR 20003 or equivalent.) This third-year course builds on the work of CLGR 20003 and CLGR 20004, and offers close reading of passages from the *Histories* of Herodotus. The *Histories* tells of the momentous wars between the Greeks and the Persians in the early classical era, and is the earliest surviving narrative of the western historical tradition. The political, social, and cultural conditions of fifth-century Greece that inspired Herodotus are discussed, and the development of Greek history-writing is examined. The course prepares students for advanced offerings in Greek literature, especially CLGR 40022, CLGR 40032, and CLGR 40042. Offered in spring semester, alternate years.

CLGR 30013. Greek Tragedy

(3-0-3)

Greek tragedy raises some of the fundamental questions about human society. Why do states engage in warfare? How can the closest friends become the bitterest enemies? What role does the divine have in human lives? How responsible are humans for their actions? How do relationships between the sexes work? What is more important—the individual or the common good? This class will focus on a close reading and critical analysis of Aeschylus' *Seven Against Thebes*, a tragedy which addresses all these questions. We will seek to understand both the textual detail of Aeschylus' dense and renowned poetry and to comprehend the social, religious and historical contexts in which he was composing his tragedies. In the final part of the semester we will read selections from Euripides' *Phoenician Women* to assess the influence Aeschylus' *Seven Against Thebes* had on Euripides.

CLGR 30014. Athenian Oratory

(3-0-3) Baron

(Recommended for students who have completed CLGR 20003 or equivalent.) This third-year course builds on the work of CLGR 20003 and CLGR 20004 and offers close reading of passages from the speeches of Lysias and Isocrates. Athenian oratory provides valuable information on fifth- and fourth-century Greek politics and society, and on the Greek system of rhetorical education that it reflects. Lysias' and Isocrates' speeches are discussed in their historical and cultural context, and their variations in rhetorical style are examined. This course prepares students for advanced offerings in Greek literature, especially CLGR 40024, CLGR 40034, and CLGR 40044. Offered in spring semester, alternate years.

CLGR 30016. Greek Historical Writing

(3-0-3) Baron

(Recommended for students who have completed CLGR 20003 or equivalent.) This third-year course builds on the work of CLGR 20003 and CLGR 20004 and offers close reading of passages from the Greek historians of the Classical era:

Herodotus, Thucydides, and Xenophon. The works of the historians are a major source for our knowledge of classical Greek history, in terms of both political/military narrative and social and cultural life. The development of the genre of history is examined in its literary and intellectual context, and its relationship to other modes of remembering the past (such as epic poetry) is discussed. Attention is also given to the development of prose style and the unique syntactical and dialectical features of the individual historians. This course prepares students for advanced offerings in Greek literature, especially CLGR 40022, CLGR 40034, and CLGR 40042. Offered in spring semester, alternate years.

CLGR 30095. Socratic Literature

(3-0-3) Baron

(Recommended for students who have completed CLGR 20003 or equivalent.) This course will study the character and philosophical significance of Socrates within the context of the intellectual ferment of late fifth Century Athens. The Greek primary texts that constitute the heart of the course are Plato's *Laches* and *Lysis* and sections of Xenophon's *Memorabilia*. Issues that arise from those texts, like the ideal of rational character and Socrates' great interest in Eros, will provide opportunities for student research and classroom discussions. Recommended for students who have completed CLGR 20003 or equivalent.

CLGR 40020. Greek Epic Poetry

(3-0-3)

(Recommended for students with advanced Greek skills.) This advanced course includes readings from the epic poems of Homer (*Iliad* and *Odyssey*), Hesiod (*Theogony* and *Works and Days*), and Apollonius of Rhodes (*Argonautica*). It introduces students to the genre of Greek epic poetry, narratives composed in hexameters that tell of the mighty deeds of gods, heroes, and men. The course concentrates on explaining why epic was regarded in antiquity as the greatest of Greek literary forms.

CLGR 40021. Hesiod

(3-0-3) Schlegel

(Recommended for students with advanced Greek skills.) This advanced course introduces students to the poetry of Hesiod through close reading and detailed study of the *Theogony* and the *Works And Days*. Both works represent an early poetic tradition in Greek literature parallel to but separate from that of Homer, which focuses on the human condition in a cosmos controlled by all-powerful and vengeful gods. The relationship of these central works of archaic Greek literature to other archaic texts is a key theme for discussion in the course.

CLGR 40022. Thucydides

(3-0-3) Baron

(Recommended for students with advanced Greek skills.) This advanced course introduces students to the historical writing of Thucydides through close reading and detailed study of the *History of the Peloponnesian War*. Often considered the most accurate and methodical of the ancient historians, Thucydides brought to Greek history-writing a high level of precision in both language and analysis. His uniquely candid accounts of the history, politics, and social effects of the great war between Athens and Sparta, and the connection between content and literary style are key themes for discussion in the course.

CLGR 40023. Greek Comedy

(3-0-3)

(Recommended for students with advanced Greek skills.) This advanced course introduces students to Greek comedy through close reading and detailed study of the comic plays of Aristophanes. The object of intense study and scholarship even in antiquity, Aristophanes' plays were composed in Athens and combine biting social satire with delightful and sometimes farcical wit. The fifth-century Athenian context in which the plays were written and the ways in which they reveal and address the city's ideological, political and sexual tensions are key themes for discussion in the course. The role of Aristophanes in the development of Greco-Roman comedy is also considered.

CLGR 40024. Demosthenes

(3-0-3)

(Recommended for students with advanced Greek skills.) This advanced course offers accelerated reading and detailed study of the speeches of Demosthenes, one of the major orators of late Classical Greece. Demosthenes' speeches provide invaluable information on Athens' response to the rise of Philip of Macedon and his son Alexander the Great, and also on the theory and practice of Greek rhetoric. The speeches are discussed in their historical and cultural context, and the main features of Demosthenes' rhetorical style are examined.

CLGR 40026. The Age of Alexander

(3-0-3)

(Recommended for students with advanced Greek skills.) Alexander the Great (356–323 B.C.) had a stunning impact on the ancient Mediterranean world. Leading a panhellenic crusade against the Persians, he created an empire of enormous proportions that included his native Macedonia, Greece, Egypt, and much of the ancient Near East. In so doing he laid the foundations for the dispersal of Greek ideas and practices over a huge area. This course examines Alexander's meteoric and ruthless career through careful study of two Greek authors who wrote extensively about him, Arrian, and Plutarch.

CLGR 40031. Greek Lyric Poetry

(3-0-3)

(Recommended for students with advanced Greek skills.) This advanced course includes readings from Archilochus's iambic and elegiac poems, Sappho's monodies, and Pindar's choral works. It introduces students to archaic and classical Greek lyric poetry, which represents a literary tradition that drew inspiration from religious ritual, contemporary politics, and private experience. Its authors experimented with diction, style, and meter in ways distinct from those of the epic poets. The manner in which they wrote and the ways in which they responded to the epic tradition are key themes for discussion in the course.

CLGR 40034. Plato

(3-0-3)

(Recommended for students with advanced Greek skills.) This advanced course offers accelerated reading and detailed study of the philosophical dialogues of Plato, whose writings, often radical and challenging, represent a cornerstone in the Western intellectual tradition. The development of Plato's philosophical ideas in their historical context is a key theme for discussion in the course, and attention is paid to the main features of his prose style in selections of his works.

CLGR 40042. Plutarch

(3-0-3)

(Recommended for students with advanced Greek skills.) This advanced course introduces students to the most famous biographical literature from antiquity, Plutarch's *Parallel Lives*. Illuminating the virtues and vices of famous and infamous men from Greek and Roman history, the *Parallel Lives* offers an important guide to understanding the ethical imperatives of the Greco-Roman world. Plutarch's literary style, his conception of biography, and the Roman imperial context in which he wrote are key themes for discussion in this course.

CLGR 40063. Euripides

(3-0-3)

(Recommended for students with advanced Greek skills.) This advanced course offers accelerated reading and detailed study of the tragic plays of Euripides, the last of the great tragedians of classical Athens and the object of ridicule from the comic writer Aristophanes. Euripides plays depart from those of his predecessors first because of their escapist and romantic plots and secondly because of their fierce engagement with contemporary Athenian politics and society. The course dwells on this development, and also considers why Euripides is sometimes considered the most radical of the Athenian tragedians.

CLGR 40071. Greek Wisdom Literature

(3-0-3)

(Recommended for students with advanced Greek skills.) In this course we will read samples of one of the oldest and most enduring forms of literature, wisdom or sapiential literature. The wise man instructs his audience through fables, proverbs, traditional tales, and accounts of the universe in the right way to live. The texts read in Greek range from the archaic period (Hesiod) to collections of wise sayings from the Hellenistic period, the *Life of Aesop*, Lucian's account of a trip to the moon, and the *Wisdom of Ben Sirach*. The Near Eastern origins and the Jewish and Christian traditions will also be considered (in translation and some in the original Greek).

CLGR 40510. Survey of Greek Literature from Homer to Plato

(3-0-3) Bloomer

This survey of archaic and classical Greek literature traces the development of the major genres and literary movements from Homer to Plato. We shall read in Greek selections from the major texts of epic, lyric, tragedy, comedy, historiography, oratory, and philosophy. Additional readings will include other Greek literary works and a sampling of the most important scholarly studies. This course will also introduce students to scholarly interpretation and scholarly methods in the literary and cultural criticism of Greek literature.

CLGR 42091. LAC: Reading Plato's *Phaedrus*

(1-0-1)

A one-credit reading course in Greek of the *Phaedrus*, with a special emphasis on the problems of creating a readable English translation.

CLGR 46801. Directed Readings

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

CLLA 10001. Beginning Latin I

(4-0-4)

This two-semester sequence of courses introduces students to the language of the ancient Romans for the first time. It emphasizes the fundamentals of Latin grammar and vocabulary, and prepares students to read original Latin texts. An appreciation for ancient Roman culture is also fostered through secondary readings and class discussion. CLLA 10001 is offered each fall semester and CLLA 10002 is offered each spring semester. (Both courses are offered in the summer.)

CLLA 10002. Beginning Latin II

(4-0-4)

Prerequisite: CLLA 10001 or CLLA 10111

This second-semester sequence of courses introduces students to the language of the ancient Romans for the first time. It emphasizes the fundamentals of Latin grammar and vocabulary, and prepares students to read original Latin texts. An appreciation for ancient Roman culture is also fostered through secondary readings and class discussion.

CLLA 20003. Intermediate Latin

(3-0-3) Schlegel; Müller; Hernandez

Prerequisite: CLLA 10002 or CLLA 10111

This second-year language course builds on the work of Beginning Latin I and II. It combines a review of grammar with careful reading of classical Latin authors such as Cicero and Ovid. The course improves students' translating skills, introduces methods for studying Latin literature in its historical and cultural contexts, and prepares students for more advanced work in the sophisticated literature of the ancient Romans. Offered every semester.

CLLA 20004. Reading and Writing Latin Prose

(3-0-3) Krostenko

(Recommended for students who have completed CLLA 20003 or equivalent.)

This second-year language course continues the review of grammar begun in CLLA 20003 and introduces students to stylistic analysis through close readings of

Latin prose authors such as Cicero and the younger Pliny. A special feature of the course is that students learn to write classical Latin for themselves. Offered every semester.

CLLA 30011. Virgil/ or Vergil

(3-0-3) Mazurek

(Recommended for students who have completed CLLA 20003 or equivalent.) This third-year course builds on CLLA 20003 and CLLA 20004, and offers close reading of passages from the *Aeneid*. Virgil's inspired adaptation of Homer's epic poems traces the story of the flight of Aeneas from Troy to Italy, where Rome, a new Troy, will be founded. The place of Virgil's epic in the emperor Augustus cultural program, various critical approaches to the poem, and its compositional techniques provide subjects for discussion. The course prepares students for advanced study in Latin literature, especially CLLA 40021, CLLA 40031, CLLA 40041, and CLLA 40051. Offered in fall semester, alternate years.

CLLA 30012. Latin History-Writing

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent.) This third-year course builds on CLLA 20003 and CLLA 20004, and offers close reading of passages from the works of the historical writers Caesar and Sallust. Latin historiography is a sophisticated instrument for narrating past events, for showing how notions of cause and effect and change over time develop in historical thinking, and for indicating the relevance of the past to the present. The political and social conditions of Rome that informed the writings of Caesar and Sallust are discussed, and the compositional techniques of their works are examined. The course prepares students for advanced offerings in Latin literature, especially CLLA 40022, CLLA 40032, and CLLA 40052.

CLLA 30013. Roman Lyric Poetry

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent.) This third-year course builds on CLLA 20023 and CLLA 20024, and offers close reading of passages from the lyric poetry of such authors as Catullus and Horace. The lyric form gives precise and economical expression to a wide range of human thoughts and emotions, from the highly personal to the grandly patriotic. The range of Roman lyric, the technique of its practitioners, and the place of lyric poetry in Roman life are themes that receive special attention. This course prepares students for advanced offerings in Latin literature, especially CLLA 40023, CLLA 40033, CLLA 40043, and CLLA 40053. Offered in fall semester, alternate years.

CLLA 30014. Cicero's Speeches

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent.) This third-year course builds on the work of CLLA 20003 and CLLA 20004, and offers close reading of select speeches of Rome's greatest orator, Cicero. The art of persuasion was an essential requirement for success in Roman public life, and no one was more persuasive than Cicero. The flexibility and complexity of Cicero's grammatical expression, the range of his styles, and the political contexts in which his speeches were delivered are all given careful treatment. The course prepares students for advanced offerings in Latin prose, especially Latin CLLA 40024, CLLA 40034, and CLLA 40054.

CLLA 30015. Cicero, Augustine and Rhetoric: Stylistic Theory and Practice from Republic to Empire

(3-0-3) Krostenko

How did Latin rhetoricians signal their attitude towards their topic? How did those compositional techniques affect them as readers? How do compositional techniques develop over time? The classical rhetorical concept of "types of style" (*genera dicendi*) gives one point of entry into those questions. This class will center around the theory and practice of that idea, considering the relevant sections of the *Rhetorica ad Herennium*, Cicero's *Orator*, Quintilian and Augustine's *de Doctrina Christiana*, as well as Cicero's speeches, including *de lege Manilia*, *pro Rabirio perduellionis reo*, *pro Cluentio* and some of Augustine's sermons.

CLLA 30021. Lucretius

(3-0-3) Schlegel

This advanced course introduces students to Lucretius' epic poem, *De rerum natura*, whose subject is Epicurean philosophy. Close reading of passages from the poem reveals its didactic character and highlights important topics: the atomic nature of matter, the mortality of the soul, the vanity of religion, and the importance of achieving intellectual tranquillity. Lucretius' contribution to defining Epicureanism and the place of philosophy in the cultural life of Rome's elite citizens are key themes for discussion in the course. (Recommended for students who have completed CLLA 20003 or equivalent.)

CLLA 30025. The Age of Nero

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent.) The reign of the emperor Nero (A.D. 54–68) witnessed a remarkable efflorescence of Latin literature. Nero's mentor Seneca was a prolific author of moral philosophy and drama; Seneca's nephew Lucan wrote a stirring and strange epic about civil war (the *Pharsalia*); the enigmatic Persius composed brilliant satires; and the senator Petronius, a member of Nero's court, authored the famous comic novel, the *Satyricon*. Even Nero, a devotee of the arts at large, was an aspiring poet. This third-year course introduces students to this special age of Latin letters through close reading of excerpts from the major works mentioned, and also from the technical writing of the contemporary expert on farming, Columella. Whether a distinctive character to the literature of Nero's age can be discovered is the main theme for discussion.

CLLA 30070. Introduction to the Latin Vulgate

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent.) Readings in the prose and poetry of the Latin Bible. The peculiarities of its Latin, influenced by Greek and Hebrew, will be analyzed from an historical linguistic perspective and also interpreted according to Christian exegetical tradition. Special stress on the Psalms with accompanying readings in Augustine's *Enarrationes*. No knowledge of Hebrew or Greek required.

CLLA 30075. Latin Saints' Lives in Late Antiquity

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent.) Hagiography is one of the most versatile literary genres of Late Antiquity, and saints' lives are among the most famous and celebrated texts of that age. Starting out as simple eye-witness accounts of martyrdom and minutes of the martyrs' trials (*Acta*), they soon evolved into far more sophisticated literary forms: they served not only for the edification, but also for the amusement of the Christian people, replacing the pagan novel with their fanciful narratives of persecution and constancy, and they merged with the traditions of classical poetry to create a wide range of poetic forms: epigrams for martyrs' tombs (by Pope Damascus), hymns for liturgical use (Ambrose of Milan) and private piety (Prudentius), epic poems (the highly influential *Life of St Martin of Tours* by Venantius Fortunatus) and the laudatory "Birthday Poems" that Paulinus of Nola wrote for the patron saint of his city. In this course, we will cover both prose and poetic texts (authors, apart from the above-mentioned, will include Jerome, Eusebius, Vita Severini, and the *Passio Perpetuae and Felicitatis*). Due to the historical importance and the wide later tradition of ancient hagiography, we will frequently refer to art and archaeology, history, and music. The texts are suitable for students with intermediate and advanced Latin knowledge. Some experience with classical poetry (Virgil) will be helpful.

CLLA 40016. Introduction to Christian Latin Texts

(3-0-3) Müller

(Recommended for students with advanced Latin skills.) This class surveys the development of Christian Latin language and literature from their origins through Late Antiquity and the early Middle Ages. It introduces students to the various important linguistic, stylistic and literary influences that contributed to Christian Latin poetry and prose. Students will also be introduced to the varieties of

Christian Latin texts and the bibliographical and research skills needed to pursue research into these texts. All along we will be concerned to improve our abilities to read and understand the Latin of the tradition that stretches from the first translations of scripture to the treatises of Jerome and Augustine. The survey of Medieval Latin language and literature in the spring semester follows and builds upon this course.

CLLA 40017. Medieval Latin Survey

(3-0-3) Muller

Prerequisite: CLLA 40016 or MI 40003

The aim of this course is to experience a broad spectrum of Medieval Latin texts. Readings representative of a variety of genres (literary and subliterary), eras, and regions will be selected. Students planning to enroll in this course should be completing Introduction to Christian Latin Texts or they must secure the permission of the instructor. Those with interests in particular text types should inform the instructor well in advance so that he/she can try to accommodate their interests.

CLLA 40018. Introduction to Paleography

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent.) Although paleography, study of the history of letter forms, has been called “a science of the very small,” it can play a very large role: it equips philologists with otherwise unavailable resources for their studies, it furnishes historians of culture and the arts with abundant new data and comparanda, and it is a source of delight to anyone who loves books and calligraphy. This course is an introduction: it will provide an overview of the history of Latin letters and writing from the first century B.C. through the 15th century A.D. considered as products of the cultures that produced them; special attention will be given to developing facility in reading the principal script types used for the transmission of texts (bookhands) and in transcribing and editing texts so transmitted; but students will also develop a good acquaintance, a basis for future study, with the more obscure script types, display scripts, and letter forms employed on coins, inscriptions, and seals.

CLLA 40021. Lucretius

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course introduces students to Lucretius’ epic poem, *De rerum natura*, whose subject is Epicurean philosophy. Close reading of passages from the poem reveals its didactic character and highlights important topics: the atomic nature of matter, the mortality of the soul, the vanity of religion, and the importance of achieving intellectual tranquility. Lucretius’ contribution to defining Epicureanism and the place of philosophy in the cultural life of Rome’s elite citizens are key themes for discussion in the course.

CLLA 40022. Caesar

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course introduces students to the highly stylized historical writings of Julius Caesar through close reading of excerpts from the Gallic War, a commentary on Caesar’s dramatic extension of Roman power in northern Europe, and the Civil Wars, a work on the destructive conflict between Caesar and his rival Pompey the Great. The central questions Caesar’s works raise are whether an objective history can be composed by someone who participated in the events narrated, whether a record of contemporary events is real history, and why warfare was such an attractive topic to a Roman audience. These questions form the main themes of the course, which are considered in the light of Caesar’s style and compositional methods.

CLLA 40023. Roman Elegiac Poetry

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course introduces students to Latin elegy, a form of verse that served Roman poets as a vehicle for expressing and exploring personal feelings, especially those associated with love. Readings from Catullus, Propertius, Tibullus, and Ovid expose how Roman poets adapted and experimented with the elegiac form to express highly charged personal emotions often at odds with conventional Roman values.

CLLA 40024. Roman Rhetoric

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course introduces students to Roman writings on rhetoric, a vital art in Roman public and cultural life. Readings from the *Rhetorica ad herennium*, Cicero, the elder Seneca, Quintilian, and Tacitus allow differing concepts of rhetoric to be seen, the relationship between rhetorical theory and practice to be understood, and the lasting value of Roman efforts to theorize the power of speech to be appreciated.

CLLA 40025. Cicero and the Ideal and Reality of Friendship

(3-0-3)

(Recommended for students with advanced Latin skills.) In 44 B.C.E., just before and after the assassination of Caesar, Cicero wrote the dialogue *de Amicitia*, which we will be reading. Recalling his youth, when he was a student of Mucius Scaevola the augur, Cicero imagined, in this dialogue, an episode from his favorite period, the second century B.C.E., by way of having C. Laelius, the friend of the Younger Scipio, speak about the joys this friendship brought him. Cicero described an ideal, the shared pursuit of virtue and virtuous desires, but he also thought that this ideal could and should find scope in public life. By way of comparing ideal and reality, we will be reading, alongside *de Amicitia*, a selection of Cicero’s letters which shed light on the practical aspects of friendship as pursued by Cicero himself. Time allowing, we will also read Cicero’s *Somnium Scipionis* and some letters of the humanist Francesco Petrarca.

CLLA 40026. The Vulgate and Related Texts

(3-0-3)

(Recommended for students with advanced Latin skills.) Introduction to a wide range of texts drawn from Jerome’s Vulgate *Bible* with focus on understanding the peculiarities of this Hebraizing-Hellenizing Latin within its original historical linguistic context. No knowledge of Greek or Hebrew required. Special emphasis on the *Book of Psalms* which will be carefully read along with modern and ancient Christian commentaries including Augustine’s *Enarrationes in Psalmos*.

CLLA 40027. Medieval Latin Texts

(3-0-3)

(Recommended for students who have completed CLLA 20003 or equivalent.) A survey of Medieval Latin Texts, designed to introduce intermediate students to medieval Latin literature and to help them progress in translation skills.

CLLA 40028. Introduction to Meister Eckhart

(3-0-3)

This course will attempt to introduce Eckhart’s thought by reading a selection of his most important Latin works. This close textual study will demonstrate the extent to which Eckhart presents a possibly unique combination of extreme technical exactitude and exegetical flexibility and how, thanks to these skills he is able to develop a radically Neoplatonic (Dionysian) philosophy within the context of Augustinian readings and a methodology responsive to the demands of the Aristotelian or Scholastic traditions. Selections will be from works including the *Exposition of Genesis*, the *Book of the Parables of Genesis*, the *Exposition of John*, the *Parisian Questions*, the *Prologue to the Tripartite Work*, and the *Prologue to the Work of Propositions*. Although the works to be selected for study are available at least in German and sometimes also in French or English translations, a reading of knowledge of Latin is essential for this course. Requirements: regular translation exercises (written and oral) and one short oral presentation.

CLLA 40029. Anselm and His Biographer

(3-0-3)

The course will be of a philosophical-theological, historical, and literary-philological nature. It will also have two more specific aims: to introduce the philosophical work of Anselm of Canterbury, and investigate some of its sources and influences during the Middle Ages; and to pursue Latin readings in works by Anselm himself, and in works by other medieval writers about Anselm. One session of each week will be devoted to Latin reading. Students will be required to prepare a Latin text for oral translation and be prepared to comment on philological issues. Texts will be distributed in advance by the instructor. The second session of the week will be

devoted to lectures on Anselm and his milieu by the instructor, although students will be required to make a short oral presentation on a topic of their choice but approved by the instructor towards the end of the semester. Requirement: competence in Classical Latin (intermediate or advanced level).

CLLA 40031. Virgil

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course deals with the full corpus of Virgil's poetry, and explores the creative history of Rome's greatest poet through close readings of passages from his pastoral poetry, the *Georgics* and *Eclogues*, and his masterpiece the *Aeneid*. Special attention is given to the settings in which Virgil composed his works, and current and traditional critical interpretations of his poetry are considered.

CLLA 40032. Livy

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course introduces students to the historian Livy through close reading and detailed study of passages from his grand narrative of Rome's history from the founding of the city to the age of Augustus. Aeneas' flight from Troy, Rome's conquest of Italy, and Hannibal's dramatic invasion of Italy across the Alps are some of the stirring topics to which attention is given. Livy's artistic and historical methods, and his position in the emperor Augustus' cultural program are key themes for discussion in the course.

CLLA 40033. Roman Satire

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course introduces students to the genre of satire, a distinctively Roman creation in which poets express reflections on contemporary life and morals grounded in personal experience. Readings from such authors as Lucilius, Horace, Persius, and Juvenal reveal a wide range of literary tone, from the self-deprecating to the brutally acerbic. The relationship of satiric poetry to its social, cultural, and political context is a key theme for discussion in the course.

CLLA 40034. Seneca's Philosophical Works

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course provides an introduction to Seneca's philosophical letters and treatises. Seneca was a Stoic, subscribing to a philosophy that emphasized such virtues as self-control and self-sufficiency, for which many upper-class Romans had high regard. Readings from the *Moral Epistles* and essays such as "On Anger" show how Seneca understood the workings of the soul, and how he developed practical strategies for psychological self-management. The role of Stoicism in Roman cultural life is an important theme for discussion in the course.

CLLA 40035. Latin Prose Literature: The Age of Trajan and Hadrian

(3-0-3) Bradley

This advanced course in Latin literature examines prose works from the age of the emperors Trajan and Hadrian (A.D. 97–138), concentrating on selections from Tacitus (*Annals*), Pliny (*Letters*), and Suetonius (*Lives of the Caesars*). Complementary readings in translation allow comprehensive understanding of the authors studied and the literary genres to which their works belong. The main question asked in the course, and its theme, concerns the nature of the relationship between literary expression and the historical context in which the literature studied was composed. The writings of Tacitus, Pliny, and Suetonius are investigated as responses to the entrenchment in Roman society of imperial autocracy, and as windows on contemporary political, social, and cultural issues.

CLLA 40040. Roman History-Writing: The younger Pliny's Letters

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course in Latin prose literature begins with an introduction to the genre of history-writing

in classical antiquity, and examines representative readings from the major Roman historians Sallust, Livy, Tacitus and Ammianus Marcellinus. It concentrates, however, on alternative modes of preserving memory in Latin prose writing, and takes as its primary text the *Letters* of the younger Pliny, which are studied from two points of view: first as a self-conscious portrait for posterity of a prominent Roman senator of the early Antonine age, and secondly as a set of documents exposing features of Roman social, political, economic and cultural life. The biographical *Lives of the Twelve Caesars* by Pliny's contemporary Suetonius are also considered.

CLLA 40041. Ovid

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course provides an introduction to the poetry of the prolific author Ovid. It explores the creative history of the one writer who can truly be called a poet of the Augustan age through close reading of passages from his love poetry (the *Amores* and the *Ars Amatoria*, a handbook on seduction), his great mythological poem, the *Metamorphoses*, and the poems written after Ovid was exiled by Augustus to a remote spot on the shores of the Black Sea (the *Tristia* and *Epistulae ex Ponto*). Special attention is paid to the contexts in which Ovid composed his works, and current and traditional interpretations of his poetry are considered.

CLLA 40043. Roman Comedy

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course introduces students to Latin comic drama. Comic plays were a popular attraction at Roman religious festivals, and Rome produced two outstanding comic writers of completely opposite temperament, the boisterous and broad Plautus, and the wry and elegant Terence. Both continue to influence Western dramatic forms. Readings from Plautus and Terence reveal the conventions of comic drama and its use as a distinctive instrument to reflect upon the concerns of Roman life.

CLLA 40044. The Roman Novel

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course offers close reading and detailed study of excerpts from Petronius' *Satyricon* and Apuleius' *The Golden Ass*. Ribald and full of comic adventures, these works have much in common with modern picaresque novels. Petronius' Trimalchio, an ex-slave buffoon, and Apuleius' Lucius, a young aristocrat magically transformed into an ass, are two of Latin literature's most memorable creations. Narrative technique, critical interpretation, and the special perspective on Roman life the works present, are major subjects for discussion in the course.

CLLA 40054. Augustine's Confessions

(3-0-3)

(Recommended for students with advanced Latin skills.) This advanced course introduces students to the thought and manner of writing of Augustine through close reading and detailed study of excerpts from his highly self-reflective autobiography, the *Confessions*. Augustine's extended analysis of his spiritual development combines in a masterful way the language and habits of thought of the Christian tradition with those of classical philosophy and literature. The style of the *Confessions*, the significance of the work, and its relation to Augustinian thought at large are major topics for discussion in the course.

CLLA 40055. Creation, Time and City of God in Augustine of Hippo

(3-0-3)

In his youth, Augustine (A.D. 354–430) received an excellent education in the Latin classics, the benefits of which remained with him throughout his life. Later, he also read philosophical writings, and, after his conversion, works by Christian authors. The book he quoted most frequently was the Bible. From his childhood, Augustine was endowed with a most unusual ability to ask awkward questions. Initially targeting his teachers, he later addressed his questions to the authors whose books he read, and to God. His writings therefore tend to take a dialogic form where the interlocutors include not only the reader but God, and among human beings Cicero, Vergil and other Romans, and also Augustine's Christian

contemporaries, including Jerome, Paulinus of Nola and Count Marcellinus to whom he addressed the *City of God*. In following these dialogues, we will read not just Augustine's best-known writings (*Confessions* and *City of God*) but also his commentaries on Genesis, and some of his letters and sermons. The purpose is to arrive at an understanding of Augustine's ideas about creation and time, and about the nature of human society and its goals. We will also ask what can be learnt from Augustine's dialogic and sometimes disputatious way of thinking, explaining and debating. Almost all of Augustine's writings have been translated into English, but obviously, an ability to read Latin will be most useful.

CLLA 40056. From Ennius to Egeria: the History of Latin
(3-0-3)

This course will examine the phonological, morphological, syntactic, semantic and stylistic development of the Latin language from Proto-Italic to early medieval Latin. Analysis of sample texts will alternate with discussion of relevant topics, which will include the principles of historical and comparative linguistics, Latin and its sister languages, the creation of the Latin inflectional system, the varieties of classical Latin, the development of Latin poetics and metrics, and the influence of Greek on Latin. Recommended for students with advanced Latin skills.

CLLA 40061. Remembering Rome: The Culture of Memory
(3-0-3)

As the Roman republic was failing, to be replaced by a system of empire, the memory of the past became a source of reflection, anxiety, and debate. Romans remembered their dead, their ancient customs, language, religion, warfare, and their vanishing liberty. Much of this remembering involved a fabrication of the past. What to remember and how to remember (writing literature, erecting monuments, passing laws, performing rites) are central concerns for Romans from Cicero through the Roman empire. Memory is theorized by philosophers, rhetoricians, and theologians. We shall study the theories and practices of remembering through an examination of texts and material culture (architecture, city planning, art history). Texts and topics will include the antiquarianism of the great republican scholar Varro, Cicero (especially in the dialogues), the early imperial historical writers Velleius Paterculus and Valerius Maximus, the encyclopedist Pliny the elder, the scholarly collector of the past Aulus Gellius, and Augustine's ideas of memory.

CLLA 40090. Latin Poetry in the Age of Augustus
(3-0-3) Bradley

This advanced course in Latin literature examines poetry of the Augustan era (31 B.C.–A.D. 14), concentrating on selections chiefly from Virgil (*Aeneid*), Horace (*Odes*), and Ovid (*Ars Amatoria*, *Tristia*, *Epistulae ex Ponto*). Comprehensive reading in translation is also required. The main question asked in the course, and its connecting theme, concerns the nature of the relationship between literary expression and the historical context in which the poetry concerned was written. In particular, the literary works read are investigated as possible responses to Rome's first emperor Augustus and the appearance at Rome in his person of a system of autocratic rule.

CLLA 40094. Augustan Poets
(3-0-3)

(Recommended for students with advanced Latin skills.) With an initial glance back to Catullus and Lucretius, this course will concentrate on the Roman poets who flourished under the aegis of Augustus. The focus of the course, alongside the basic literary and stylistic marvels of this poetry, will be the poets' use of emotion and its consequent destabilizing effects. We will look at the complexities of the poetry that belongs to this era of social and political upheaval. Our readings in Latin will consist of selections from Catullus and Lucretius, the last three books of Virgil's *Aeneid* (the whole of which students should know in translation), and readings from Horace's *Odes* and Propertius' *Elegies*. We will also look at some modern critical views of Augustan poetry. Students' mastery of the Latin texts, and their ability to speak and write about these, will be evaluated.

CLLA 40095. Ovid's *Metamorphoses*

(3-0-3)

(Recommended for students with advanced Latin skills.) In this course, we translate and discuss selected passages from the *Metamorphoses*, Ovid's idiosyncratic poetic history of the world. Topics for our discussions include the spiritual, moral, religious, political, and physical transformations portrayed between the creation story at the beginning and the deification of Caesar at the end of the text; the tension between Ovid's adherence to Roman traditions and his irreverent, sometimes subversive, artistic originality; the poem's narrative techniques, poetic style, and structure; the significance of intertextual allusions to Greek drama, Virgilian epic, and Ovid's own love poetry; the instability of gender; portraits of the poet within the work; and the innumerable faces of love, as presented through characters who are pious, raging with passion, inseparable, violent, infatuated, lovesick, devoted, and much more. Above all, this course aims at clarifying how Ovid's inexhaustible playfulness and delightful wit contributed to shaping a work of both epic grandeur and lyric intimacy that continues to inspire poets, composers, novelists, painters, and at least one playwright whose version recently made it all the way to Broadway. Daily preparation and active participation in class are essential components of the course; brief written assignments, one midterm exam, one brief project, and a final exam also count towards the final grade.

CLLA 40096. Postclassical Satire

(3-0-3)

(Recommended for students with advanced Latin skills.) This survey will begin with introductory readings in classical satire and satiric invective and narrative, and then move on to consider specimens of a variety of late antique and medieval texts written in a satiric mode: satire, invective, parody, mock epic, etc. A sound knowledge of Latin is required. Course requirements include in-class reports, an annotated translation, and an interpretative essay.

CLLA 40210. Latin Philosophical Prose

(3-0-3) Krostenko

A survey of selections of Latin philosophical prose from the late Republic to Late Antiquity. Authors to be read include Cicero, Seneca the Younger, Augustine and Boethius. Special attention will be devoted to the origins and development of philosophical idiom, the challenges of rendering Greek, and the influence of rhetorical training on philosophical works. According to the needs and interests of the class, texts from the early Medieval period may be included.

CLLA 43555. Augustine: Select Readings

(3-0-3)

In this course, we will read select passages from Augustine's earliest extant works, the so-called Cassiciacum dialogues. Augustine spent the winter between his conversion (386) and his baptism (Easter 387) at a friend's villa in Cassiciacum near Milan, where he wrote four philosophical works, *Contra Academicos*, *De Beata Vita*, *De Ordine*, and *Soliloquia*. In choosing the form of the philosophical dialogue, he paid homage to his pagan predecessors, above all Cicero. The influence of pagan philosophy, especially Neoplatonism, is present throughout the dialogues, as is the interest in classical literature and in the Liberal Arts. The dialogues represent Augustine's first attempt to express and structure his new-found belief (as well as the experience of his conversion), and the views and sentiment expressed in them sometimes widely differ from his later works; yet it is unmistakably Augustine who is speaking. We will discuss the position of the dialogues in the course of Augustine's intellectual development by comparing them to selections from later works (above all, *Confessions*) and from pagan philosophers (Cicero, Plotinus). Prerequisite: 3 years of college Latin or by permission of the instructor.

CLLA 46801. Directed Readings

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

CLSS 43221. UG Seminar: Advanced Syriac

(3-0-3)

Syriac is a form of Aramaic that was the literary language of Jews and pagans in western Asia before becoming the common dialect of Aramaic-speaking Christians in the region. Christianity had its matrix in Judaism, and early literature in Syriac preserves the only surviving sustained evidence of the distinctive character of Aramaic-speaking Christianity that is largely unhellenized and that reflects the linguistic and cultural milieu of first-century Palestine. Because of the shared literary culture of Judaism and early Syriac Christianity, examination of the intertextuality of early Syriac literature reveals a deep acquaintance with the thought and culture of Late Second Temple Judaism and the intertestamental period. A full appreciation for the dependence of Syriac literature upon Jewish literary and intellectual models requires an interdisciplinary focus that takes into account a full range of issues; among the most important are hermeneutical questions related to Jewish and Christian interpretations of scripture. Participants in the seminar will investigate a range of questions based on the following: 1) In what sense may particular texts be called Christian (Jewish, Manichaean, Gnostic)? 2) What evidence is there for intertextuality, i.e. to what extent can texts be shown to occupy the space between Judaism and Christianity? 3) From what social and cultural milieu did the texts emerge? 4) What evidence do the texts retain of possible oral or non-literary origins? 5) In what sense are the texts literary? Do peculiarities of language, diction, or genre in any way distinguish the texts? Can the texts be shown to be typical of the time and circumstances from which they emerged? 6) How are the texts to be read? Is it enough to evaluate them as historical documents, relating them to the historical circumstances in which they were generated, and the literary culture to which they originally belonged? These questions will be based on a deep reading of Syriac texts in light of their affinities to primarily Jewish, and other related texts (Manichaean, Zoroastrian, Gnostic). Participants must be able to read non-vocalized texts at least at the intermediate level. They must also be able to read related secondary literature in the history, culture, and literature of Late Second Temple Judaism and emergent Christianity in western Asia. Reading knowledge of French and German is presumed.

MEAR 10001. First-Year Arabic I

(4-0-4)

This two-semester sequence of courses is a basic introduction to all aspects of the Arabic language through a comprehensive and integrated method. The focus is on language proficiency in all areas of the language including speaking, reading, and writing. The course also introduces students to aspects of Arabic culture and everyday life in the Middle East. MEAR 10001 is offered each fall semester and MEAR 10002 is offered each spring semester.

MEAR 10002. First Year Arabic II

(4-0-4)

Prerequisite: MEAR 10001

This two-semester sequence of courses is a basic introduction to all aspects of the Arabic language through a comprehensive and integrated method. The focus is on language proficiency in all areas of the language including speaking, reading, and writing. The course also introduces students to aspects of Arabic culture and everyday life in the Middle East. MEAR 10001 is offered each fall semester and MEAR 10002 is offered each spring semester.

MEAR 20003. Second Year Arabic I

(3-0-3) Atamnia; Martin

Prerequisite: MEAR 10002 or MEAR 10101

This second-year Arabic course builds on the previous two semesters. The emphasis is on speaking and writing for self-expression with continued study of the basic grammatical structures. Proficiency remains the focus through readings and conversations in the language. Students develop skill in the use of the Arabic dictionary.

MEAR 20004. Second Year Arabic II

(3-0-3) Bualuan; Saadi

Prerequisite: MEAR 20003

This course is geared to consolidating skills gained in the previous three semesters while enhancing the ability to converse and conduct oneself in Arabic. Reading skills are enhanced by exposure to more sophisticated examples of literature. Original written expression is encouraged through the composition of short essays.

MEAR 30005. Third Year Arabic I

(3-0-3) Bualuan

Prerequisite: MEAR 20004

This third-year Arabic course emphasis is on developing listening, speaking, reading, and writing skills in interactive settings. Vocabulary building will be the focus of drills; we will cover basic vocabulary in various authentic uses of the language. Special attention will also be given to media Arabic. Basic Arabic grammar should be completed by the end of the year. We will continue with part 2 of the KITAAB sequence. Supplementary materials, mainly from Arabic media (BBC Arabic News, newspapers, magazines), will be provided. Tests, both oral and written, will cover the textbook materials, in addition to the basic grammar and the cumulative vocabulary.

MEAR 30006. Third Year Arabic II

(3-0-3) Saadi

Prerequisite: MEAR 20003 or MEAR 20004 or MEAR 30005

This third-year Arabic course emphasis is on developing listening, speaking, reading, and writing skills in interactive settings. Vocabulary building will be the focus of drills; we will cover basic vocabulary in various authentic uses of the language. Special attention will also be given to media Arabic. Basic Arabic grammar should be completed by the end of the year. We will continue with Part 2 of the KITAAB sequence. Supplementary materials, mainly from Arabic media (BBC Arabic News, newspapers, magazines), will be provided. Tests, both oral and written, will cover the textbook materials, in addition to the basic grammar and the cumulative vocabulary.

MEAR 30007. Media Arabic/Arabic Media

(3-0-3)

Prerequisite: MEAR 20004

The goal of this course is two-fold: it consists of an overview of contemporary Arabic media and an introduction to media Arabic. Simply put: It's a survey course on Arabic media with a language component. In addition to printed texts (newspapers, magazines, journals), a substantial portion of the material, of written, audio, and visual texts, is drawn from major Arabic Internet sites (al-Jazeera, al-Arabiyya, BBC Arabic, etc.) and TV programs. Texts vary according to interests of students. Some suggested topics: the social, political and institutional context of media production, the role media plays in the present debates in the Arab world of problems like cultural identity, the position of Islam in society, secularism, Nationalism, development, illiteracy, women and gender, sexuality, pop culture, etc. Taught in English, with extensive readings, and some discussion, in Arabic. The course fulfills the third year Arabic requirement for Arabic majors.

MEAR 32300. Language Across the Curriculum Arabic Discussion Group

(1-0-1)

Corequisite: MELC 40075

A one-credit reading or discussion group for students interested in reading/discussing course materials in the Arabic original. Course materials will vary term to term.

MEAR 32305. Language Across the Curriculum (LAC): Islamic Texts Seminar

(1-0-1)

This is a 1-credit reading course on Arabic texts from the classical period of Islam. Course may be repeated as topics vary. Open to students who have completed at least two years of Arabic (three years recommended).

MEAR 40007. Fourth Year Arabic I

(3-0-3) Guo

MEAR 40007 is designed as a continuation of third year Arabic for those students who have requested to continue beyond what is required for the major. The syllabus will combine lessons from the textbook *Al-Kitaab* as well as texts from print and electronic “Media Arabic.” The course will lay equal stress on Formal (fusha) as well as contemporary Middle East colloquial dialect Arabic (‘amiyya).

MEAR 40008. Fourth Year Arabic II

(3-0-3) El Makkouk

The focus of this course is the integration of formal and spoken Arabic. This is accomplished through a series of readings students prepare in advance of class. Class time is spent conversing in idiomatic Arabic about the text. Arabic media (movies, on-line resources) are intended to supplement the readings and expand contexts and vocabulary for further interaction in Arabic.

MEAR 40025. Advanced Arabic Composition and Conversation I

(3-0-3)

This course deals with aspects of Modern Standard Arabic in a comprehensive and integrated method, including vocabulary and phrases, reading comprehension, grammar, conversation, writing, and listening. The course will primarily focus on the contemporary Arabic that is understandable all over the Arab world and used in social, business, and intellectual gatherings. The students will also be exposed to the colloquial Arabic and the Arab culture through watching Arabic TV programs, movies, and other audio-visual programs accompanied with reading social magazines and other authentic materials. The course will enable the students to write relatively long Arabic essays, develop efficient reading skills, listen to and discuss topics of general and professional interest, be knowledgeable of Arabic culture, be able to express themselves fluently and conduct conversations dealing with issues presented in the course material.

MEAR 40026. Advanced Arabic Composition and Conversation II

(3-0-3)

Prerequisite: MEAR 40007 or MEAR 40008 or MEAR 40025

This course deals with the advanced level of Modern Standard Arabic. It is the continuation of Advanced Composition and Conversation I (MEAR 40025). The course deals with all aspects of reading, writing, listening and conversation following the method of proficiency. There will be carefully selected texts for reading comprehension and grammatical analysis of the topics of which are among the most heated subjects in the social, political and intellectual lives in the Middle East. Additionally, the students will be exposed to colloquial Arabic (Syrian and Lebanese) through programs in computer, as well as handouts to be shared by professor. The course will enable the students to write relatively long Arabic essays, develop efficient reading skills, listen to and discuss topics of general and professional interest, be knowledgeable of Arabic culture, be able to express themselves fluently and conduct conversations dealing with issues presented in the course material. Fourth Year Arabic or its equivalent is prerequisite for admission to this course.

MEAR 40028. Arabic Scholastic Writing

(3-0-3)

(Recommended for students with 3 years of college Arabic or equivalent.) The goal of this course is to develop an advanced knowledge of the literary/classical Arabic, with emphasis on a comprehensive overview of grammar and syntax, vocabulary acquisition, and serial readings of Arabic scholarly writings by medieval and modern authors. We read selections from a wide range of genres: religious (Qur’an exegeses, hadith commentaries, Sufism), intellectual (philosophy, political thought), legal (treatise, manual, fatwa collection), historical (chronicle, biographical dictionary), and literary (criticism, essay).

MEAR 46801. Directed Readings

(V-0-V)

Individual or small group study under the direction of a faculty member.

MEHE 10001. Elementary Hebrew I

(3-0-3) Bruning

This is a two-semester introductory course in biblical Hebrew; under normal circumstances, the student must complete the first to enroll in the second. The fall semester will be devoted to learning the grammar of biblical Hebrew. The spring semester will be divided into two parts. For the first six weeks we will finish and review the grammar. In the remaining part of the course we will read and translate texts from the Hebrew Bible, Qumran, and Rabbinic literature. The course will focus on developing reading and comprehension skills in biblical Hebrew through the study of biblical texts. In addition, students will learn how to use reference grammars, concordances, and apparatus to the *Biblia Hebraica*. The course encourages students to think about the grammatical forms and their implications for biblical interpretation.

MEHE 10002. Elementary Hebrew II

(3-0-3) Winitzer

Prerequisite: MEHE 10001

This is a two-semester introductory course in biblical Hebrew; under normal circumstances, the student must complete the first to enroll in the second. The fall semester will be devoted to learning the grammar of biblical Hebrew. The spring semester will be divided into two parts. For the first six weeks we will finish and review the grammar. In the remaining part of the course we will read and translate texts from the Hebrew Bible, Qumran, and Rabbinic literature. The course will focus on developing reading and comprehension skills in biblical Hebrew through the study of biblical texts. In addition, students will learn how to use reference grammars, concordances, and apparatus to the *Biblia Hebraica*. The course encourages students to think about the grammatical forms and their implications for biblical interpretation.

MELC 10101. Introduction to Arabic Culture and Civilization

(3-0-3) Bualuan

This course is an introductory survey of Arabic culture and civilization from the pre-Islamic era to the conquest of Constantinople in 1453. The course will trace the origins of the Arab people and their distinctive culture and literature. The revelation of the Qur’an to the Prophet Muhammad and subsequent development of Islam will be treated in detail. Following this, the course will focus on the spread of Islamic civilization, its interactions with other cultures, and its contributions to scholarship in the areas of literature, art, and architecture.

MELC 13186. Literature University Seminar in English: The Arabian Nights and World Literature

(3-0-3) Guo

This course has as its focal point the famous collection of tales, the *Thousand and One Nights* (better known as the *Arabian Nights*). We examine issues of provenance. We study the stories as literary texts as well as historical documents. We examine how these tales have been interpreted by later societies. Finally, we use this course to introduce us to the study of the Middle East, its languages, history, literature, and peoples.

MELC 20010. Modern Arabic Fiction in Translation

(3-0-3) ElMakkouk

The object of this course is to introduce the student to Arabic literature—a major world literature that remains largely unexplored in the West—from its beginning to the present. The course will read and discuss, in a seminar context and from a comparative perspective, key works of medieval Arabic narrative prose, the *Arabian Nights* and the *Maqamat*, and selected works of modern Arabic fiction by the Nobel laureate Naguib Mahfouz (Egypt), among others. There will also be several screenings of the film adaptations. Some of the issues to be discussed are: the influence of the *Arabian Nights* in Western literature, representation and interpretation, and literary compositional strategies in “domesticating” an “imported” genre—fiction—used by modern Arab writers.

MELC 20020. Revelation to Revolution: Arabic Literature in a Global Context

(3-0-3)

This basic introduction to Arabic literature links the phenomenon of literature to the larger world of Islamic studies. The course emphasizes connections between Arabic literature, the Classics, and contemporary western literary tradition from a broadly comparative perspective. Topics include: early Arabic mytho-poetics; the idea of Scripture; philosophy, science, and the Renaissance; the literature of empire; Arab Spain. No knowledge of Arabic is required.

MELC 20035. The Good Life in Medieval Islam

(3-0-3) Tor

One learns a great deal about a society from its definition of what constitutes the good life. This textually-based course will therefore examine the lifestyles of the rich, the famous, and the not-so-famous in the medieval Islamic world, in order to learn about that civilization's mores, material culture, technological sophistication, material wealth, and social customs. Issues that will be covered include the conspicuous consumption of the elite—in feasting; court ceremonial; slaves, eunuchs, and concubines; harems; hunting; extravagant parties; sartorial magnificence; retinues and private armies; jewels and objets d'art; praise poetry; and much more. In the process of exploring these issues, students will discover much about trade and agriculture in the Islamic Middle Ages; the role of women, slaves, eunuchs, and poets; the internal divisions within Muslim society; courtly life and culture; and, finally, the alternative definitions of the good life offered by religious ascetics, mystics, and chivalric brotherhoods.

MELC 20040. Islamic Societies of the Middle East and North Africa: Religion, History, and Culture

(3-0-3)

This course is an introductory survey of the Islamic societies of the Middle East and North Africa from their origins to the present day. It will deal with the history and expansion of Islam, both as a world religion and civilization, from its birth in the Arabian Peninsula in the seventh century to its subsequent spread to other parts of western Asia and North Africa. Issues of religious and social ethics, political governance, gender, social relations and cultural practices will be explored in relation to a number of Muslim societies in the region, such as in Egypt, Morocco, and Iran. The course foregrounds the diversity and complexities present in a critical area of what we call the Islamic world today.

MELC 20050. The Ancient Middle East

(3-0-3)

Discover the origins of human civilization, the first written language, and the myths that revolutionized religion. This is an introduction to the civilizations of Mesopotamia that formed the basis of the way we think, see reality, believe, and express ourselves today. Topics include: Sumerians, Akkadians, and Babylonians; Phoenicians; Aramaic and the beginnings of law, literature, and legend.

MELC 20060. Islam: Religion and Culture

(3-0-3)

This course will discuss the rise of Islam in the Arabian peninsula in the seventh century of the Common Era and its subsequent establishment as a major world religion and civilization. Lectures and readings will deal with the life of the Prophet Muhammad, the Qur'an and its role in worship and society, early Islamic history, community formation, law and religious practices, theology, mysticism, and literature. Emphasis will be on the core beliefs and institutions of Islam and on its religious and political thought from its formative period until our own time. The latter part of the course will deal with resurgent trends within Islam, both in their reformist and extremist forms, and contemporary Muslim engagements with modernity. We will also discuss the spread of Islam to the West and increasing attention focused on "political Islam" or "Islamism" today. All readings are in English translation.

MELC 20070. Introduction to Islamic Civilization

(3-0-3)

This course is designed to introduce students to Islamic civilization and Muslim culture and societies. The course will cover the foundations of Islamic belief, worship, and institutions, along with the evolution of sacred law (al-shari'a) and theology, as well as various aspects of intellectual activities. The Koran and the life of the Prophet Muhammad will be examined in detail. Both Sunni and Shi'i perspectives will be considered. Major Sufi personalities will be discussed to illuminate the mystical, and popular, tradition in Islam. Topics on arts, architecture, literary culture, and sciences will be covered. Although the course is concerned more with the history of ideas than with modern Islam as such, it has great relevance for understanding contemporary Muslim attitudes and political, social, and cultural trends in the Muslim world today. MMME minors will need to secure an override from the Department office to register.

MELC 20080. Women in Islamic Societies

(3-0-3)

This course is a broad survey of women's and gender issues in various Islamic societies, with a focus on the Arab Middle East. The first half of the semester will concentrate on the historical position of women in Islamic societies, defined by the normative values of Islam and by cultural traditions and norms. We will discuss how the interpretations of these values in diverse circumstances and who gets to do the interpreting have had an important impact on women's societal roles. The second half of the course will privilege women's voices and agency in articulating their gendered identities and roles in a number of pre-modern and modern Islamic societies. Our sources for discovering these voices are women's memoirs, fiction, magazine articles, and public speeches. We will also focus on how historical phenomena such as Western colonialism, nationalist liberation movements, civil and other forms of war have given rise to women's organized movements and a feminist socio-political consciousness in many cases.

MELC 20100. The Arab-American Experience

(3-0-3) Amar

This course follows the history of Arabic-speaking people in the United States from the first immigrants who arrived in the 1880s to the present. What motivated those first courageous immigrants to leave home and family and travel to a land they had never seen? What did they find when they arrived? How did they survive? These are all questions we will explore. We will investigate the entrepreneurial spirit that led to Arab-American contributions in business, science, the arts, and entertainment. Recent history has seriously affected American perceptions of Arabic-speaking people world-wide, and of Arab-Americans in particular. What these events mean for us as a nation will be thoughtfully explored. This course will rely on the works of Arab-American writers, actors, poets, and movie producers who will relate the Arab-American experience in their own words. Requirements: Class participation, two short papers, a final collaborative project.

MELC 20150. Contemporary Political Islam

(3-0-3)

This course is designed to provide students with an understanding of the phenomenon of political Islam in the Arab and Muslim worlds. It examines the reasons, implications, and consequences of the reassertion of Islam in today's politics. The first part of the course provides a thorough analysis of the Islamic order and the model(s) that inspires modern Islamist activists. The second part critically examines the ideas of the main ideologues of contemporary Islamic movements. The third part discusses the approaches to the understanding of contemporary political Islam and the Islamic movements and presents cases studies of mainstream and radical Islamic movements in a number of Arab and Muslim countries. Finally, the course concludes with a critical analysis of the future of political Islam and its relations with the West.

MELC 30030. Love, Death, and Exile in Arabic Literature and Cinema

(3-0-3) Guo

This course explores literary and artistic presentation of the themes of “love, death, and exile” in Arabic literature and popular culture from pre-Islamic era to the present day. Through close readings of Arabic poetry, essays, short stories, and novels (in English translation), and analyzing a number of Arabic movies (with English subtitles), we discuss the following issues: themes and genres of classical Arabic love poetry; gender, eroticism, and sexuality in Arabic literary discourse; alienation, fatalism, and the motif of *Al-Hamin Ila Al-Watan* (nostalgia for one’s homeland) in modern Arabic poetry and fiction.

MELC 30035. Medieval Middle East

(3-0-3) Tor

Corequisite: HIST 32080

This course offers a survey of Middle Eastern history from the rise of Islam in the seventh century C.E. until the rise of Mongol successor polities in the 15th century. The course is structured to cover political, religious, and cultural developments and their relationship with broader changes in society during the formative centuries of Islamic civilization. Specific topics include the career of the Prophet Muhammad and the origins of the earliest Muslim polity; the creation and breakup of the Islamic unitary state (the Caliphate); ethnic, racial, and religious tensions and movements in the medieval Islamic world; the impact of Turkic migrations on the Middle East; the diversity of approaches to Muslim piety and their social and political expression; popular culture; non-Muslims in Islamic society; and the creation of the medieval Islamic “international” cultural order. Among the more important themes will be long-term cultural and social continuities with the Islamic and ancient Near East, and concepts of religious and political authority.

MELC 30036. The Medieval Iranian World: Iran, Afghanistan, and Central Asia

(3-0-3) Tor

The Iranian cultural world, from late antiquity until the 13th century, stretched from what is today Iraq all the way to India, and from the Persian Gulf deep into Central Asia. Although in the seventh century the early Islamic conquests put an end to the Persian Empire and occupied the Iranian world, a new era of Iranian hegemony began in Islamic history with the ‘Abbasid Revolution in 750 and the establishment of the new Islamic capital, Baghdad, in the old Persian heartland. This event inaugurated a growing dominance by Iranians, and Persian traditions, in all areas of Islamic civilization—cultural, religious, military, and political—culminating in the establishment of the autonomous Persianate dynasties that ruled the Islamic heartland from the ninth century until invading Turco-Mongol tribes seized political control of the Islamic world in the twelfth century. This course will explore the many ways in which the Persianate world—today’s Iran, Afghanistan, and Central Asia—helped form the Islamic world, focusing on its contributions to political order and ideology; its leading role in the formation and elaboration of Sunnism; its rich cultural productions; and its expansion of the borders of Islam.

MELC 30040. Christianity in the Middle East

(3-0-3)

The spread of Christianity from Palestine to the West is well-documented. Less well-known is the development of Christianity in the lands of its origin, the Middle East. This course introduces students to the largely untold story of Christianity that expresses itself in the native Aramaic language and culture of the Semitic East. Topics include the origins of the indigenous Christian churches of Syria, Lebanon, Palestine, Armenia, Iraq, and Iran; the development of these traditions will be viewed in relation to western/European forms of Christianity that have come to dominate and that are viewed as mainstream and normative. The course concludes with an assessment of the impact of religious fundamentalism, the diaspora of Middle Eastern Christians throughout Europe and the United States, and the contemporary state of Christianity in the Middle East.

MELC 30050. Canon and Literature of Islam

(3-0-3)

This course is an introduction to the fundamental religious texts and literature of Islam. The list includes the Qur’an (the central, sacred scripture of Islam), the hadith (record of the speech and actions of the Prophet Muhammad), biography of the Prophet, exegetical literature, historical texts, mystical and devotional literature. Students will read primary texts in English translation with a focused discussion and analysis of form, content, historical background, religious significance, and literary allusions of the various texts. Themes such as “the unity and majesty of God,” “prophecy and revelation,” “good and evil,” “this world and the hereafter” will be dealt with in the lectures and conversation in class. The course lays heavy emphasis on class discussion and student preparedness.

MELC 30051. Islamic Religious Thought: Formation and Development

(3-0-3) Mirza

This course traces developments in the first few centuries of Islam in theology, law, and spirituality. Students will gain a solid understanding of diversity within Islam including and beyond the typical distinction between Sunnism and Shi’ism. Beginning with a brief overview of Muhammad and the Qur’an, the course explores the issue of succession, transmission of knowledge, formation of major schools of thought, and development of consensus. Students will receive both a historical survey and read excerpts of primary texts in translation. Given that most modern Islamic movements view the first few centuries of Islam as a “golden age,” this course also provides essential background for students to engage contemporary Islam.

MELC 30060. Historical Survey of the Arab Middle East

(3-0-3) Amar

This course will chart the history of the Arab Middle East from the formative period of the emergence of Islam in the seventh century through the fall of Constantinople in 1453 and the creation of the Ottoman Turkish Empire. Intended to be broad in its coverage and comprehensive in its scope, the course will introduce students to the social, cultural, and religious crosscurrents that came to define the Arab life and culture in the region.

MELC 30070. Islam and Modernity

(3-0-3)

Islam and its compatibility with modernity is a much-debated issue in the contemporary period. The course will engage this timely topic and discuss the most important “hot-button” issues involved in these debates: political Islam, democracy, pluralism, rights of women, and secularism. The historical contexts that provide the backdrop for the range of responses to the phenomenon of modernity and its attendant issues will also receive attention. What internal resources exist within Islamic thought, which are being drawn upon by modernists to make a strong case for an essential compatibility between Islam and democracy, for example? Is democracy (or Islam, for that matter) a monolithic concept? Students will be expected to actively take part in discussions centered around such questions, the assigned readings, and class lectures. Prior exposure to at least one class on Islam or the Middle East is strongly recommended.

MELC 30080. Anthropology of the Muslim World

(3-0-3)

This course will be a survey examination of ethnographic work on the Muslim world appropriate for students with all levels of background in anthropology and Islam. The course will look at the Muslim world broadly defined, including ethnographic work on the Middle East, Central Asia, South Asia, Southeast Asia, Europe, Africa, and North America. The course will consider many aspects of life in Muslim societies, not just religion, including trade, travel, identity, literature, and politics. Because of its relevance to current events, a significant portion of the course will deal with gender relations and constructions of masculinity/femininity in the Muslim context. We will consider such questions as the impact of religion on gender relations, negotiations between textual traditions and popular traditions in determining gender relations, and the circumstances in which gender

constructions in the Muslim world attract attention from the West. The aim of this course is to give students an understanding of a wide array of approaches to ethnography. Lectures and supplementary reading material will situate the central texts in the dominant theories and assumptions of the discipline.

MELC 30158. Modern Middle East

(3-0-3)

This course surveys Middle Eastern history from 1500 to the present. The primary themes to be covered include: the emergence and demise of the last Muslim unitary states; European colonial and imperial penetration of the Middle East in the 19th century; the social and cultural impact of imperialism; state-building in the 20th century; new ideologies/nationalisms; and contemporary problems of political and economic development. We will also consider the most important movements of Islamic reform and revival over the past two centuries.

MELC 30159. The Israel-Palestine Conflict

(3-0-3) Kaufman

This class discusses the roots, evolution, current situation and prospects of resolution of the Israeli-Palestinian conflict. In order to better understand this theme the class will also locate this conflict in larger regional and global perspectives. Thus, issues such as nationalism in the Middle East, colonial impact in the region, the Arab states and their involvement in the conflict, cold war and post-cold war dynamics, will all be an integral part of the class discussions. We will also juxtapose the competing narratives of Israelis and Palestinians towards this conflict. Finally, we will engage in an un-historical practice by looking at the future and thinking about possible avenues for concluding this protracted conflict.

MELC 30160. Middle East and the West

(3-0-3)

This course explores the complicated relationships between the Middle East and the Western world as they evolved over the past several centuries.

MELC 30161. Borders, Boundaries, Frontiers

(3-0-3) Kaufman

This course explores political borders, boundaries and frontiers and their changing meaning and dynamics from the beginning of the colonial era (circa 1500) until the present. We will explore the formation of political borders, life along borders and border conflicts and their resolutions (or lack thereof). Themes, including colonialism and globalization, will also be discussed through the prism of political boundaries. Geographically we will look at areas including the Middle East, Africa, Europe, South Asia and the U.S.-Mexican border in order to analyze boundaries through both global and regional perspectives.

MELC 30392. Diplomacy and Conflict in the Middle East

(3-0-3)

This course examines the role of diplomacy in shaping the Middle East and in managing conflict in the region today.

MELC 30522. Politics and Democratization in Middle Eastern and North Africa Monarchies

(3-0-3)

This course examines the politics of monarchies in the Middle East and North Africa. The course examines how these regimes developed and their effect on politics in these regions, and explores the prospect for democratization in such countries.

MELC 30523. Islam and Politics in the Middle East

(3-0-3)

This course is designed to provide students with an understanding of the phenomenon of political Islam in the Arab and Muslim worlds. It examines the reasons, implications, and consequences of the reassertion of Islam in today's politics. The first part of the course provides a thorough analysis of the Islamic order and the model(s) that inspires modern Islamist activists. The second part critically examines the ideas of the main ideologues of contemporary Islamic movements. The third part discusses the approaches to the understanding of contemporary political

Islam and the Islamic movements and presents cases studies of mainstream and radical Islamic movements in a number of Arab and Muslim countries. Finally, the course concludes with a critical analysis of the future of political Islam and its relations with the West.

MELC 30800. Muhammad and the Qur'an

(3-0-3) Mirza

Islamic law, theology, and spirituality are all derived primarily from the Qur'an and the practice (sunna) of the messenger and exemplar Muhammad. This course provides students with an in-depth introduction to these twin foundations of the Islamic religious tradition. Students will read a comprehensive biography (sira) of Muhammad based on the earliest sources. Students will also read selections from the Qur'an, contextualized within the narrative of Muhammad's prophetic career. In addition to familiarizing students with the traditional narrative of Muhammad's life and the style, content and structure of the Qur'an, this course also explores contemporary questions and debates in the historical-critical study of Islamic origins.

MELC 40075. Marriage, Divorce, and Family in Muslim Societies

(3-0-3)

High rates of divorce, often taken to be a modern and western phenomenon, were also typical of pre-modern Muslim societies. How was that possible, insofar as "Marriage is half [fulfillment of one's] religious duties," as the Prophet Muhammad once famously dictated? What, then, is the Islamic ideal of marriage? What were the patriarchal models advocated by medieval Muslim jurists and moralists? Did the historical reality of marriage and family life in the Islamic Near East have anything in common with these models? Do the assumptions about the legal inferiority of Muslim women and their economic dependence on men hold truth? These are the questions this course will try to address. To that end, we will read and discuss a wide range of primary sources (all in English translation)—the Koran and Hadith (Muhammad's saying and deeds), legal writings, narrative (chronicles, belles-lettres) sources, and documentary (archives, contracts) materials—as well as recent scholarship on the subject. While our theoretical framework is that of social history, we will also pay close attention to intimate accounts of, and reflections on, individual medieval lives. We will conduct case studies as for group projects. While the focus is on the Islamic Near East (700–1500), we will extend our inquiry to include the modern Middle East as well. No knowledge of Arabic is required. For students who have taken two years of college Arabic and are interested in reading some course materials in the Arabic original, we will organize a reading group (meets one hour a week, earning an extra credit).

MELC 40080. From Baghdad to Cordova: A History of Islamic Science

(3-0-3) Mirza

Scientists in the era of classical Islam are credited with numerous advances in fields such as mathematics, astronomy, optics, medicine, and philosophy. This course investigates the extent and significance of such contributions to world intellectual history. Our point of departure will be the translation movement from Greek into Arabic with a survey of the Hellenistic heritage in Islam. Along with examining methods and landmark achievements, we will also look at elements of classical Islamic culture, ideas and institutions that inspired and propelled scientific activity. Attention will be paid to competing theories for the rise and decline of science in the Islamic world, as well as its influence on Europe.

MELC 40700. Islamic Ethics of War and Peace

(3-0-3) Omar

Since September 11, 2001, topics related to Islam have inundated the airwaves, aroused the curiosity of many and troubled the minds of some. In order to better understand current events, it is important to have a greater understanding of the worldview of Islam. This course on Islamic Ethics of War and Peace will provide students with such an opportunity. It examines the major principles of Islamic ethics and the key theories of classical and contemporary Muslim ethicists. These principles and theories will be applied to analyze contemporary Muslim perspectives on war and peace. Cognizant of the various contexts within which ethical questions are debated, students will be encouraged to explore the impact

of modernity, post-modernity, globalization and liberalism on Muslim ethical discourses. Students will also be encouraged to compare the ethical principles and theories of Islam on war and peace with that of other philosophical and religious theories to discover points of difference as well as convergence. Students are not expected to emerge from this course as experts on Islamic ethics or any of its subfields, but rather, they will be exposed to major authors and arguments and be provided with a number of conceptual lenses that can be applied to their analysis of the diverse ways in which Islam is implicated in conflict, violence and peacebuilding on both a global and local level.

MELC 42075. LAC—Marriage, Divorce, and Family in Muslim Societies

(1-0-1)

Corequisite: MELC 40075

This course is the optional, one-credit hour weekly session that is associated with MELC 40075. No knowledge of Arabic is required. For students who have taken two years of college Arabic and are interested in reading some course materials in the Arabic original, this is the separate reading group opportunity (meets one hour a week, earning an extra credit). High rates of divorce, often taken to be a modern and western phenomenon, were also typical of pre-modern Muslim societies. How was that possible, insofar as “Marriage is half [fulfillment of one’s] religious duties,” as the Prophet Muhammad once famously dictated? What, then, is the Islamic ideal of marriage? What were the patriarchal models advocated by medieval Muslim jurists and moralists? Did the historical reality of marriage and family life in the Islamic Near East have anything in common with these models? Do the assumptions about the legal inferiority of Muslim women and their economic dependence on men hold truth? These are the questions this course will try to address. To that end, we will read and discuss a wide range of primary sources (all in English translation)—the Koran and Hadith (Muhammad’s saying and deeds), legal writings, narrative (chronicles, belles-lettres) sources, and documentary (archives, contracts) materials—as well as recent scholarship on the subject. While our theoretical framework is that of social history, we will also pay close attention to intimate accounts of, and reflections on, individual medieval lives. We will conduct case studies as for group projects. While the focus is on the Islamic Near East (700–1500), we will extend our inquiry to include the modern Middle East as well.

MELC 43300. Islamic Texts Seminar

(3-0-3) Mirza

This course offers students the opportunity to read classical Islamic texts in translation, with an optional additional credit for students of Arabic to read them in the original language (MEAR 32305). Topics will vary from semester-to-semester allowing students to take the seminar more than once. Potential topics may be thematic, such as hadith (“tradition” or reports about Muhammad’s words and deeds), tafsir (Qur’anic exegesis), fiqh and shari’a (jurisprudence and law), tasawwuf, kalam and falsafa (theology, philosophy and mysticism), or focused around a significant figure such as al-Ghazali. In addition to reading texts, we will also engage contemporary scholarly literature on the sources and their analysis.

MELC 46801. Directed Readings

(3-0-3)

Individual or small group study under the direction of a faculty member. Permission of the Department required.

Economics

ECON 10010. Principles of Microeconomics

(3-0-3)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

ECON 10011. Principles of Microeconomics

(3-0-3)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

ECON 10020. Principles of Macroeconomics

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, fiscal and monetary policy.

ECON 13181. Social Science University Seminar

(3-0-3) Kim; Leahy

Economics sections will deal with different aspects of economic analysis and policy issues. The focus will be on understanding how economists think about theoretical issues and how they apply their analytical tools to real-world economic problems and policies. No background in economics is assumed.

ECON 13191. Honors Seminar

(3-0-3)

Prerequisite: ALHN 13950

The primary lesson of economics is that incentives matter: economic agents alter their behavior in predictable ways when faced with changing costs and benefits. Over the past 30 years, the power of economics as a predictive social science has been demonstrated time and time again as scholars have shown that seemingly uneconomic decisions can be modeled from an economic perspective. In this seminar, we will use academic readings and popular books such as *Freakonomics* to indicate the breadth and scope of questions that can be analyzed from an economic perspective. A sample of topics that will be covered include why AIDS is more prevalent in Africa than in the U.S., how to efficiently combat global warming, the theory behind nuclear deterrence strategies, why obesity is on the rise, and why there is cheating in sumo wrestling.

ECON 20010. Principles of Microeconomics

(3-0-3)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

ECON 20011. Principles of Microeconomics

(3-0-3)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

ECON 20020. Principles of Macroeconomics

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, fiscal and monetary policy.

ECON 20501. Poverty in Rural America

(1-0-1)

This one-credit course examines poverty in rural America to determine in what ways it is similar and in what ways it is distinct from poverty in urban American settings.

ECON 20600. Principles of Development Policy

(3-0-3) Solis

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011 or ECON 10020 or ECON 20020

The objective of the course will be to familiarize students with the concept of development, the incidence of underdevelopment, some major theoretical controversies, and specific policy issues with examples drawn especially from Latin America. The course will explore the complex connections between theory, policy, and practice. At the end of the course students will be able to identify the contribution of economic tools to development policies, examine these tools within the context of actual agenda-setting, and make inroads into the challenge of incorporating institutional and ethical considerations into the design and implementation of development policies.

ECON 30010. Intermediate Economic Theory—Micro

(3-0-3) Sullivan

Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (MATH 10260 or MATH 10560 or MATH 10860)

An examination of the language and analytical tools of microeconomics, emphasizing the functional relationship between the factor and product markets and resource allocation.

ECON 30020. Intermediate Economic Theory—Macro

(3-0-3) Mark

Prerequisite: (ECON 10020 or ECON 20020) and (MATH 10260 or MATH 10560 or MATH 10860)

An intensive examination of macroeconomics with particular reference to the determination of economic growth, national income, employment and the general price level.

ECON 30150. Introduction to Economics and Catholic Social Thought

(3-0-3)

Prerequisite: ECON 10010 or ECON 10020 or ECON 20010 or ECON 20020
This course will discuss the relationship between economics and Catholic social teaching. We will learn about key principles in Catholic social thought, read key Papal encyclicals and other writings. We will then discuss key economic concepts and empirical facts known from the field of economics, and how these relate to Catholic social teaching. Finally, we will apply these ideas to discussions on labor, capital, finance, the environment, globalization, and development.

ECON 30200. Introduction to Political Economy

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 10020 or ECON 20010 or ECON 20011 or ECON 20020

The course is an introduction to the “other” side of economics: heterodox economics or political economy. Political economy perspectives include Marxian, post-Keynesian, radical, institutionalist, feminist, and other approaches. The course will also investigate the theoretical and social consequences of different approaches, and how policies and institutional changes that promote social justice and human dignity can be formulated in our current economic environment.

ECON 30220. Marxian Economics

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
An introduction to Marxian economic analysis. Topics include the differences between mainstream and Marxian economics, general philosophy and methodology, Marxian value theory, and critical appraisals and current relevance of Marx’s “critique of political economy.”

ECON 30260. Political Economy of Development

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 10020 or ECON 10021 or ECON 20010 or ECON 20011 or ECON 20020

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include; rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, failed state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

ECON 30330. Statistics for Economics

(3-0-3) Garin; Munnich

This course seeks to introduce the student to the principles of probability and statistical theory appropriate for the study of economics. The emphasis of the course will be on hypothesis testing and regression analysis.

ECON 30331. Econometrics

(3-0-3) Evans; Lee

Prerequisite: ECON 30330 or BAMG 20100

Provides students with an understanding of when and how to use basic econometric methods in their work as an economists, including the ability to recognize which econometric technique is appropriate in a given situation, as well as what explicit and implicit assumptions are being made using the method. Topics covered include estimation and hypothesis testing using basic regression analysis, problems with basic regression analysis, alternative econometric methods, limited dependent variables, and simultaneous equation models.

ECON 30400. Labor Economics

(3-0-3)

Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (ECON 10020 or ECON 20010)

A survey course covering the economics of employment and unemployment; wages and income distribution; poverty, education and discrimination; unions and labor and industrial relations systems; and comparative labor systems.

ECON 30460. Economics of Gender and Ethnic Discrimination

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
Women and ethnic minorities have the lowest incomes, worst jobs, and highest levels of unemployment and poverty in the United States today. This course examines the role of racism and sexism in the U.S. economy.

ECON 30481. American Labor Force

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 10020 or ECON 10021 or ECON 20010 or ECON 20011 or ECON 20020

This course uses the tools of economics to understand the major forces shaping the American labor force, in both the past and the present. Examples of course topics include: the major waves of European migration to the U.S., including waves

of Irish immigration; the development and rise of the high school in America; important trends in educational attainment particularly of women and minorities; the economic effects of civil rights legislation; and the English-language-only debate. This course is closely related to Econ 33480 (Migration, Education and Assimilation) but does not require a research paper. Prerequisites: Principles of Microeconomics. Concurrent enrollment in or completion of a statistics course, Econometrics, or Intermediate Microeconomics is helpful but not required.

ECON 30500. Introduction to Poverty Studies

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 10020 or ECON 10021 or ECON 20010 or ECON 20011 or ECON 20020

An examination of the extent and causes of poverty in the United States. The current system of government programs to combat poverty is analyzed. Reforms of this system are also considered.

ECON 30530. Environmental Economics

(3-0-3) Jensen

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011

An analysis of the welfare economics of environmental problems, emphasizing market failures due to negative environmental externalities. Air, water, and land pollution are classic examples of these externalities, which occur when third parties bear costs resulting from the transactions of the two primary market participants. The theory and practice of environmental policy to promote efficiency at the U.S. local, state, and federal levels and in other countries is explored. International problems such as transboundary pollution and global warming are also studied.

ECON 30535. Economics of Preserving Natural Resources

(3-0-3)

Prerequisite: ECON 30010

Treatises on optimal harvesting of trees and other natural resources date back at least to John Evelyn (1620–1706). This course examines a wide variety of situations in which the socially optimal economic use of a natural resource involves its preservation. Emphasis is placed on: using the logic of economics to demonstrate when preservation of a natural resource is preferable to its reduction or destruction; using examples to clarify these arguments; and broadening the definition of “natural resources” to include some nontraditional resources.

ECON 30800. Development Economics

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011

The current problems of Third World countries are analyzed in a historical context, with attention given to competing theoretical explanations and policy prescriptions. The course will combine the study of the experiences of Latin American, African, and Asian countries with the use of the analytical tools of economics.

ECON 30810. Regional Economic Development

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011

The course looks at the spatial dimensions of economics with major emphasis on where economic activity takes place and why. Theories and methods of regional analysis and regional programs will be stressed with reference to selected regions in the U.S. and elsewhere. A major part of this class will be a major research project, paper, and presentations by students on a selected region. Research presentations and discussions will be a regular feature of the class.

ECON 30840. European Economic Development

(3-0-3)

This course provides an account of the policies adopted in the former socialist states of Eastern and Central Europe during their transition from planned to market economies. It seeks to identify the economic problems faced by socialist and postsocialist governments; to set out the theoretical analysis underlying the policies adopted to deal with them; to assess their impact on economic performance and the welfare of the population.

ECON 33120. Seminar in the History of Economic Thought

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
This course is the seminar version of ECON 30120. The course explores literature on philosophy of economics, history of economic thought, and new directions in economic methodology.

ECON 33200. Introduction to Political Economy

(3-0-3) Ruccio

Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (ECON 10020 or ECON 20020)

This course is the seminar version of ECON 30200. The course is an introduction to the “other” side of economics: heterodox economics or political economy. Political economy perspectives include Marxian, post-Keynesian, radical, institutionalist, feminist, and other approaches. The course will also investigate the theoretical and social consequences of different approaches, and how policies and institutional changes that promote social justice and human dignity can be formulated in our current economic environment.

ECON 33201. Topics in Political Economy

(3-0-3) Ruccio

Prerequisite: ECON 10010 or ECON 20010 or ECON 10011 or ECON 20011

This course is the seminar version of ECON 40201. It focuses on labor and the U.S. economy. It will address the following questions: What has happened to workers’ wages, working conditions, and union organization? What has happened to family income and the distribution of wealth? How have women and people of color fared? How have workers been affected by government policies, such as tax cuts, budget deficits, deregulation, welfare reform, trade agreements, and Social Security policy? What are the possibilities for change, of policies as well as the basic structures of power and influence in our economy? The course will compare and contrast orthodox views with perspectives drawn from the writings of Marx, Keynes, Veblen, Polanyi, and other economists in the political economy tradition.

ECON 33220. Marxian Economic Theory

(3-0-3) Ruccio

Prerequisite: ECON 10010 or ECON 10011 or ECON 10020 or ECON 10021 or ECON 20010 or ECON 20011 or ECON 20020

This course is the seminar version of ECON 30220. An introduction to Marxian economic analysis. Topics include the differences between mainstream and Marxian economics, general philosophy and methodology, Marxian value theory, and critical appraisals and current relevance of Marx’s “critique of political economy.”

ECON 33250. Justice Seminar

(3-0-3) Roos

An examination of major theories of justice, both ancient and modern. Readings include representatives of liberal theorists of right, such as John Rawls, as well as perfectionist alternatives. The course also serves as the core seminar for the philosophy, politics, and economics concentration.

ECON 33260. Political Economy of Development

(3-0-3) Kim

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011

This course is the seminar version of ECON 30260. The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include: rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual

spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

ECON 33270. Economics of Science

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 10020 or ECON 20010 or ECON 20011

This course is the seminar version of ECON 30270. Economists often fret over whether they qualify as a hard science, but of late, they have begun to turn the tables and apply their theories to the operation of the sciences themselves. This phenomenon is related to the increasing commercialization of science since the 1980s, but other factors include: a shift within economics to portray the market as an ideal information system, the globalization of the modern intellectual property regime, and the transformation of the post–Cold War university. These phenomena all have profound political and social consequences for the future, and so we will not restrict the course to a few abstract models, as is frequently the case in economics curricula. Part of the course consists of a discussion of what topics the “economics of science” should take as its subject matter. The remainder explores some of the major transformations, especially with regard to intellectual property and the social structures of science. In this class we describe the changing history of the organization and subsidy of scientific research, especially (but not exclusively) in America; and then we survey the different classes of economic theories applied to the scientific process. The second half of the course is then concerned with issues in the modern globalization and privatization of science, focusing on various case studies.

ECON 33290. The Political Economy of the Financial Crises

(3-0-3) Wolfson

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
A discussion seminar. This course will examine the recent experience of the U.S. and global economies with financial crises, especially the most recent crisis involving housing speculation, financial derivatives, and banking. The course will use the tools of political economy to address this question, in particular theories and perspectives drawn from the writings of Karl Marx, John Maynard Keynes, Karl Polanyi, and Thorstein Veblen, among others. It will examine historical and structural changes in the financial system over the past 30 years, and how these changes have affected the behavior of financial crises. In addressing prospects for change, the course will examine policies, institutions, and the basic structures of power and influence in the economy.

ECON 33410. Labor Relations Law

(3-0-3)

Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (ECON 10020 or ECON 20020)

This course is the seminar version of ECON 30410. A study of the development of common and statutory law with reference to industrial relations in the United States with emphasis on the case method.

ECON 33420. Employee Relations Law and Human Resources Practices

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
This course is the seminar version of ECON 30420. A study of the development of common statutory law with reference to discrimination in the United States on the basis of race, creed, color, national origin, and disability, and giving emphasis to the case method.

ECON 33430. Collective Bargaining: Private Sector

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
This course is the seminar version of ECON 30430. The analysis of the procedures and economic implications of collective bargaining as it now operates in the United States. Emphasizes a game theory approach resulting in the negotiation of a labor contract

ECON 33440. Collective Bargaining: Public Sector

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 10020 or ECON 10021 or ECON 20010 or ECON 20011 or ECON 20020

This course is the seminar version of ECON 30440. This course will examine the relevant state and federal laws covering the public-sector collective bargaining. It will examine the various issues and techniques covering collective bargaining in government. The major part of this course will be a game theory approach in which an actual contract will be bargained.

ECON 33470. Labor Arbitration

(3-0-3)

Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (ECON 10020 or ECON 10021 or ECON 20020)

This course is the seminar version of ECON 30470. Analysis of the practice and procedures of arbitration in labor grievances with emphasis on rights and interest issues is both public and private sector employment. Course stresses an analysis of arbitral awards.

ECON 33481. Topics in the Development of the American Labor Force

(3-0-3)

This course uses the tools of economics to understand the major forces shaping the American labor force, in both the past and the present. Examples of course topics include: the major waves of European migration to the U.S., including waves of Irish immigration; the development and rise of the high school in America; important trends in educational attainment particularly of women and minorities; the economic effects of civil rights legislation; and the English-language-only debate. This course is closely related to Econ 33480 (Migration, Education and Assimilation) but does not require a research paper. Prerequisites: Principles of Microeconomics. Concurrent enrollment in or completion of a statistics course, Econometrics, or Intermediate Microeconomics is helpful but not required.

ECON 33500. Economics of Poverty

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
This course is the seminar version of ECON 30500. An examination of the extent and causes of poverty in the United States. The current system of government programs to combat poverty is analyzed. Reforms of this system are also considered.

ECON 33510. Addressing U.S. Poverty at the Local Level

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
This course focuses on four arenas where poverty manifests itself: homelessness, education, healthcare, and jobs. Writing-intensive.

ECON 33530. Environmental Economics

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
This course is the seminar version of ECON 30530. An analysis of the welfare economics of environmental problems, emphasizing market failures due to negative environmental externalities. Air, water, and land pollution are classic examples of these externalities, which occur when third parties bear costs resulting from the transactions of the two primary market participants. The theory and practice of environmental policy to promote efficiency at the U.S. local, state, and federal levels and in other countries is explored. International problems such as transboundary pollution and global warming are also studied.

ECON 33540. Restoring Economic Vitality to the Inner City: What Works, What Doesn't, and Why

(3-0-3)

This course is the seminar version of ECON 30540. This community-based learning and research course examines the political economy of U.S. inner-city revitalization, with South Bend as a case study. Community-Based Learning (CBL) requires that students both learn and apply what they are learning within a setting

outside the classroom. In addition to in-class seminar sessions, CBL activities will include meetings with local organizations that link public agencies and private enterprise, visits to varied businesses in urban South Bend, and meetings with area government representatives and relevant church and neighborhood organizations. During the first third of the semester, students will learn about the central problems of the U.S. city and their roots, viewing the issues firsthand locally. In the second third, they will study how inner-city problems are being addressed in selected areas of the country as well as in South Bend. The South Bend Heritage Foundation (SBHF) will act as a client organization for this course by posing research questions for students to investigate during the last third of the semester. The SBHF is a private, not-for-profit service and community development corporation dedicated to the stabilization, enhancement, and empowerment of South Bend's inner-city neighborhoods.

ECON 33810. Regional Economic Development

(3-0-3)

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
This course is the seminar version of ECON 30810. The course looks at the spatial dimensions of economics with major emphasis on where economic activity takes place and why. Theories and methods of regional analysis and regional programs will be stressed with reference to selected regions in the U.S. and elsewhere. A major part of this class will be a major research project, paper, and presentations by the student on a selected region. Research presentations and discussions by you will be a regular feature of the class.

ECON 36950. Directed Readings

(3-0-3)

This course provides students with an opportunity to explore readings and research as directed by an assigned faculty member in the department. It is offered by arrangement with individual instructors.

ECON 37950. Special Studies

(3-0-3)

Independent study under the direction of a faculty member. Course requirements may include substantial writing as determined by the director. The director will disenroll a student early for failure to meet course requirements. Students who have been disenrolled or who have failed at the end of the first semester are disqualified for Special Studies in the following term.

ECON 40050. Game Theory and Strategic Analysis

(3-0-3) Rath

Prerequisite: (MATH 10250 or MATH 10550) and (ECON 30010 or FIN 30210)

The objective of this course is to help students develop a good understanding of the basic concepts in game theory and learn how to employ these concepts to better understand strategic interactions. Topics covered will include normal form games, extensive form games, pure and mixed strategies, Nash Equilibrium, subgame perfect equilibrium, repeated games, and introduction to games of incomplete information. Selected applications will include competition and collusion in oligopoly, entry deterrence, political competition and rent seeking, social norms and strategic interaction.

ECON 40060. Advanced Microeconomics Theory

(3-0-3) Rath

Prerequisite: ECON 30010

This course will focus on some selective topics in modern micro economic theory. It may vary from term to term. A possible choice of a broad range of topics are: choice under uncertainty, game theory, market mechanisms, coalitional analysis, public goods and welfare economics. Each of these topics will be discussed with mathematical rigor. Some of the objectives of the course are to familiarize students with important analytical techniques of micro theory and their applications to the study of various economic phenomena and to help students to cultivate the ability to critically evaluate the usefulness and limitations of economic models.

ECON 40300. Math for Economists

(3-0-3)

Prerequisite: (ECON 30010 or FIN 30210) and ECON 30020

Exposition of mathematical methods used in economic theory and analysis with application of these methods to economic theory. Major methods covered include differential and integral calculus and matrix algebra. Recommended for students planning to go to graduate school in economics.

ECON 40330. Forecasting for Economics and Business

(3-0-3) Lugauer

Prerequisite: ECON 30331

This course is an introduction to forecasting. The course focuses on creating and working with forecasts of economic, finance, and other business data. Basic theory will also be presented. The forecasts are constructed from estimated summary statistics and parameters generated by several methods, including time series procedures and exponential smoothing. Students will learn how to interpret the uncertainty in the forecasts and in the estimated parameters. Diagnostic statistics and model selection criteria will be presented. Requirements: ECON 30331; Econometrics or some other regression-based stats class (something beyond the Stats for Econ course).

ECON 40360. Money, Credit and Banking

(3-0-3) Flood

Prerequisite: (ECON 30010 or FIN 30210) and ECON 30020

An examination of the money and credit-supply processes and the role of money and credit in the economy. Topics include financial intermediaries, financial markets, the changing regulatory environment, monetary policy, and international monetary arrangements.

ECON 40362. Monetary Policy

(3-0-3) Waller

Central banks wield enormous influence over a country's economic performance.

In this course, students will examine the evolution of monetary policy over time and analyze successes and failures of monetary policy and of measures taken to manage times of economic crisis. Special emphasis will be placed on the Federal Reserve system with some attention paid to policies of the Bank of Japan and the European Central Bank. The course will host a Fed Challenge team for the fall 2008 competition. Students interested in learning how the Fed formulates policy should take the course. Anyone interested in participating in the Fed Challenge must take the course. Prerequisites: "Intermediate Macroeconomics." "Money and Banking" desired.

ECON 40363. Bubbles, Crises and Speculative Attacks: The Economics of Extreme Events

(3-0-3) Flood

Prerequisite: ECON 30010 and ECON 30020 and ECON 30331

Individuals' economic incentives are displayed clearly during extreme events, such as hyperinflation and currency collapse. In this course we will study the history of such events, like the German Hyperinflation, during which time German prices rose at more than 50%/month, and the so-called bubbles such as 17th century Tulipmania. We will study the history and then apply modern-day modeling and econometrics. From more modern times we will look at the 1980s and 1990s currency crises in Mexico and East Asia as well as the combination crises in many developing countries hit simultaneously by currency, banking, debt and output crises. In all the experiences we will first get the facts straight and then apply modern methods. Familiarity with Econometrics is useful.

ECON 40400. Advanced Labor Economics

(3-0-3)

Prerequisite: (ECON 30010 or FIN 30210) and ECON 30331

Labor economics (ECON 30400) is not a prerequisite for this class, but those who have taken ECON 30400 are welcome to enroll. This class presents a detailed exposition of neoclassical labor market theory and empirical research in labor economics. Topics include the determinants of labor supply and demand, occupational and educational choice, mobility, wage dispersion, and discrimination.

Students will use the econometric methods introduced in ECON 30331 to analyze the effects that policies have on worker behavior and labor market outcomes. Policies that will be examined include the minimum wage, welfare reform, affirmative action, education policy, and income redistribution policies.

ECON 40520. Economics of Education

(3-0-3)

Prerequisite: (ECON 30010 or FIN 30210) and (ECON 30330 or ECON 30331 (may be taken concurrently))

This course reviews economic literature addressing current educational issues in America, including the adequacy of our K–12 public school system, the effectiveness of market-based reforms (vouchers and charter schools) and administered forms of accountability (standardized testing). We also examine the rate of return to additional years of education (how much education should individuals undertake?), access to higher education, financial aid systems, and options to offset the rising cost of higher education.

ECON 40535. Economics of Preserving Natural Resources

(3-0-3) Jensen

Prerequisite: ECON 30010

Treatises on optimal harvesting of trees and other natural resources date back at least to John Evelyn (1620–1706). This course examines a wide variety of situations in which the socially optimal economic use of a natural resource involves its preservation. Emphasis is placed on: using the logic of economics to demonstrate when preservation of a natural resource is preferable to its reduction or destruction; using examples to clarify these arguments; and broadening the definition of “natural resources” to include some nontraditional resources.

ECON 40540. Public Economics

(3-0-3)

Prerequisite: ECON 30010 or FIN 30210

This class will survey the field of public economics, showing students how economic research can address many of the most important questions and controversies facing policy makers today. Some of the issues the class will discuss are contraception, taxation, Medicare, Social Security, welfare programs, and education. The course will familiarize students with current policy programs and policy debates, introduce students to cutting-edge research methods used to study these programs, and show students what economists know and do not know about improving public policy.

ECON 40565. Health Economics

(3-0-3)

Prerequisite: ECON 30010 or FIN 30210

The course is designed to illustrate how economists analyze topics related to the production of health and the delivery of health care in the United States. Topics covered include the social and economic determinants of health, the economic control of unhealthy behavior, economic consequences of the AIDS epidemic, using economics to explain the rise of obesity, economic models of insurance, the problems of moral hazard and adverse selection, the economic impact of employer-provided health insurance, Medicare and Medicaid, the problem of the uninsured, medical technology and the pharmaceutical industry, the malpractice system, and the rise of managed care. Readings for the class will come from a required textbook and academic readings downloadable from the class web page. Class assignments will include problem sets, exams and short policy memos.

ECON 40570. Economics of the Law

(3-0-3)

Prerequisite: ECON 30010 or FIN 30210

This course will introduce students to the economics analysis of our legal framework pertaining to property, contract and tort law. Additional topics will include an examination of the legal process and the relationship between crime and punishment.

ECON 40575. Public Policy, Care for the Poor, and Religious Activity

(3-0-3)

Prerequisite: ECON 30010

This course will explore cutting-edge work by economists on care for the poor, considering both government and non-government activities. The course will also consider religious organizations' role on these topics and economic topics on religion more generally. The course will improve student's understanding of economic theory and empirical scientific economic research.

ECON 40580. The Economics of Industrial Organization

(3-0-3) Thurk

Prerequisite: ECON 30010 or FIN 30210

This course focuses on the strategic behavior of firms in imperfectly competitive markets. The course will cover the acquisition and use of market power by firms, strategic interactions amongst firms, and the role/effects of government competition policy. There will be a strong emphasis on applying the theoretical tools developed in class to assess markets and issues observed in the world.

ECON 40700. International Economics

(3-0-3)

Prerequisite: ECON 30010 or FIN 30210

A study of the general theory of international trade; the pattern of trade, gains from trade, tariffs, trade and special interest groups, trade and growth, foreign exchange markets, balance-of-payment problems, and plans for monetary reform.

ECON 40710. International Trade

(3-0-3) Gervais

Prerequisite: ECON 30010 or FIN 30210

This is a course on international microeconomics. Its primary goal is to develop analytical tools to help us to understand the causes and consequences of international trade flows. The course covers models of comparative advantage, which shows that countries engage in international trade to exploit differences in technology and resources, as well as new trade theories that emphasize increasing returns to scale in production. A substantial amount of time will also be devoted to studying the impact of trade policies, such as tariffs, quotas, export subsidies, and trade agreements on the economy.

ECON 40720. International Money

(3-0-3)

Prerequisite: ECON 30020

This course examines major institutional changes in the international financial system, theoretical developments in the field of international monetary economics, and policy issues in the contemporary global finance. Topics include balance-of-payments accounts, exchange rate markets and systems, open-economy macroeconomics, international debt, and contemporary international monetary and financial arrangements.

ECON 40820. Economic Development of Latin America

(3-0-3)

Prerequisite: ECON 30020

An examination of the roots of independence in Latin America. An analysis of the key problems of economic development and the policies prescribed for their solution.

ECON 40830. Economic Growth

(3-0-3)

Prerequisite: ECON 30010

This course is an introduction to the study of economic growth. After a brief preamble, the first two parts of the course review the “proximate determinants” of income levels and growth rates—factor accumulation, technology and efficiency—and discuss the relevant theoretical models. The third part looks at the “fundamental determinants” of differences in income levels and growth rates across countries. A final section of the course discusses current and future trends of demographic change, technical progress and the environment.

ECON 40850. The Economics of Innovation and Scientific Research

(3-0-3) Doran

Prerequisite: (ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011) and (ECON 10020 or ECON 20020)

We will use simple microeconomics principles to understand how and why innovation happens, how innovation is related to basic scientific research, what factors influence the production and diffusion of new ideas, and how government policy can help or hinder innovation. We will also study the relationship between innovation and economic welfare using recent macroeconomic models. Intermediate microeconomics and at least one semester of econometrics are recommended, though not required. There will be two midterms and a final exam, as well as written homework assignments.

ECON 43110. History of Economic Thought

(3-0-3) Mirowski

Prerequisite: ECON 30010

This course is the seminar version of ECON 40110. The course intends to ask how it is that we have arrived at this curious configuration of doctrines now called “economics”; and importantly, how differing modes of historical discourse tend to ratify us in our prejudices about our own possible involvement in this project. The course will begin in the 18th century with the rise of a self-conscious discipline, and take us through the stabilization of the modern orthodoxy in WWII. Effort will be made to discuss the shifting relationship of economics to the other sciences, natural and social. A basic knowledge of economics (including introductory economics and preferably intermediate economics) will be presumed.

ECON 43201. Topics in Political Economy

(3-0-3)

Prerequisite: ECON 10010 or ECON 20010 or ECON 10011 or ECON 20011

This course is the seminar version of ECON 40201. It focuses on labor and the U.S. economy. It will address the following questions: What has happened to workers’ wages, working conditions, and union organization? What has happened to family income and the distribution of wealth? How have women and people of color fared? How have workers been affected by government policies, such as tax cuts, budget deficits, deregulation, welfare reform, trade agreements, and Social Security policy? What are the possibilities for change, of policies as well as the basic structures of power and influence in our economy? The course will compare and contrast orthodox views with perspectives drawn from the writings of Marx, Keynes, Veblen, Polanyi, and other economists in the political economy tradition.

ECON 43202. Political Economy of Globalization

(3-0-3)

Prerequisite: ECON 30200 or ECON 33200

This course is the seminar version of ECON 40202. The course will use the tools of political economy to understand the problems of globalization, and to evaluate policies and strategies for change to address these problems. To develop students’ analytic, communication, group-process, and writing skills. This course is writing-intensive and will be run as a seminar. For Kroc M.A. students; others by permission only.

ECON 43330. Forecasting for Economics and Business

(3-0-3) Lugauer

Prerequisite: ECON 30331

This course is an introduction to forecasting. The course focuses on creating and working with forecasts of economic, finance, and other business data. Basic theory will also be presented. The forecasts are constructed from estimated summary statistics and parameters generated by several methods, including time series procedures and exponential smoothing. Students will learn how to interpret the uncertainty in the forecasts and in the estimated parameters. Diagnostic statistics and model selection criteria will be presented. Requirements: ECON 30331; Econometrics or some other regression-based stats class (something beyond the Stats for Econ course).

ECON 43350. Fed Challenge

(1-0-1)

An in-depth analysis of Federal Reserve Open Market Committee policy actions. Students must participate in college Fed Challenge competition.

ECON 43410. Labor Law

(3-0-3) Leahy

This course is the seminar version of ECON 30410. A study of the development of common and statutory law with reference to industrial relations in the United States with emphasis on the case method.

ECON 43430. Collective Bargaining—Private Sector

(3-0-3) Leahy

Prerequisite: ECON 10010 or ECON 10011 or ECON 20010 or ECON 20011
This course is the seminar version of ECON 30430. The analysis of the procedures and economic implications of collective bargaining as it now operates in the United States. Emphasizes a game theory approach resulting in the negotiation of a labor contract.

ECON 43530. Environmental Economics

(3-0-3) Lipscomb

Prerequisite: ECON 30331

This course is the seminar version of ECON 30530. An analysis of the welfare economics of environmental problems, emphasizing market failures due to negative environmental externalities. Air, water, and land pollution are classic examples of these externalities, which occur when third parties bear costs resulting from the transactions of the two primary market participants. The theory and practice of environmental policy to promote efficiency at the U.S. local, state, and federal levels and in other countries is explored. International problems such as transboundary pollution and global warming are also studied.

ECON 43550. Economics of the Family

(3-0-3) Buckles

Prerequisite: ECON 30331

This course will use economic theory and empirical economic research to study the family. Topics will include household decision making; the determinants of marriage and fertility; how marriage, fertility, and family structure are related to other outcomes; and public policies that affect the family and family formation. Students will learn to read and evaluate empirical economic research. This is a writing-intensive seminar course.

ECON 43551. Federal Challenge

(2-0-2) Bonello

Prerequisite: ECON 30010 and ECON 30020

The course is designed as a preparation for the College Fed Challenge competition to be held in November at the Federal Reserve Bank of Chicago. Students will first be responsible for the preparation of a detailed analysis of the state of the U.S. economy. Students will also be responsible for the development of a recommendation for the conduct of monetary policy based on that analysis and a thorough understanding of the tools, goals, structure, and strategies of the Federal Reserve System. Students will be organized into teams to deliver oral presentations and to defend their analysis and recommendation before other students and faculty. On the basis of these presentations, a group of students will be selected to participate in the Chicago competition.

ECON 43570. Economics and the Law

(3-0-3)

Prerequisite: ECON 30010

This course will introduce students to the economics analysis of our legal framework pertaining to property, contract and tort law. Additional topics will include an examination of the legal process and the relationship between crime and punishment.

ECON 43581. Corporate Structure and Behavior

(3-0-3)

Prerequisite: ECON 30010

This course describes and explains the range of industrial organization forms from perfect and monopolistic competition structures to oligopoly and monopoly ones; it then considers the variety of historic policy responses to those forms that were presumed or seen to be undermining or preventing desirable (i.e., competitive) outcomes. Assigned readings and class discussions feature case studies. General Motors, U.S. Steel and GE, for example, illustrate the postwar system and stand in sharp contrast to today's Wal-Mart, American Airlines and Intel. Students will research and report on selected industries and/or firms for both analytical and policy purposes.

ECON 43600. Current Economic Policy

(3-0-3)

Prerequisite: ECON 30010 or FIN 30210 or ECON 30020 or ECON 30330 or BA 20100

This course is the seminar version of ECON 40600. The purpose of this seminar is to discuss current economic policy issues. Students will be required to read newspapers (*Wall Street Journal*, *New York Times*) on a daily basis and be prepared to discuss the economics of what was in the newspapers. Periodically throughout the semester, the students will write one- to two-page critiques of the coverage of an issue they found in the newspaper and will write a major paper on a current issue, and make a presentation in the seminar.

ECON 43730. European Union

(3-0-3)

Prerequisite: (ECON 30010 or FIN 30210) and ECON 30020

This course is the seminar version of ECON 40730. This course focuses on Europe's movement towards economic and monetary union since the end of World War II. The course will discuss monetary theory, monetary policy, labor and capital market mobility, fiscal transfers political economy issues of central banking and EU enlargement. Class discussion is a critical part of the course in addition to standard lectures. Grades will be based on two exams, in-class discussion, attendance and presentations.

ECON 43850. World Poverty and Inequality Across Nations

(3-0-3)

Prerequisite: (ECON 30010 or FIN 30210) and ECON 30020 and ECON 30330

This course is the seminar version of ECON 40850. Analysis of the trends, causes and consequences of the inequality between rich and poor nations, or what are called the North and South. The course uses theoretical, empirical and broader political-economy analyses to examine the implications of international trade, capital and labor movements, technological transfers and environmental interactions between rich and poor countries. Particular emphasis is given to globalization and its effects on poor countries.

ECON 43961. Senior Honors Program Seminar

(1-0-1)

This seminar provides instructional support for economics majors completing the undergraduate economics honors program. It also provides a venue where honors program students present progress reports on their senior honors essays to their peers at regular intervals. The seminar is graded on a satisfactory/unsatisfactory basis and may be taken twice.

ECON 47950. Independent Laboratory Research

(V-0-V)

Prerequisite: ECON 30010 or ECON 30020 or ECON 30331

Independent study under the direction of a faculty member. Course requirements may include substantial writing as determined by the director. The director will disenroll a student early for failure to meet course requirements. Students who have been disenrolled or who have failed at the end of the first semester are disqualified for Special Studies in the following term.

ECON 47951. Special Studies

(2-0-2)

Independent study under the direction of a faculty member. Course requirements may include substantial writing as determined by the director.

ECON 47960. Senior Honors Essay

(3-0-3)

A tutorial requiring a completed essay on a selected topic in economics in depth. The faculty of economics awards the John Harold Sheehan Prize Essay Award with inscribed plaque to the graduating senior who has written the best senior honors essay. Senior economics majors only.

English

ENGL 13186. Literature University Seminar

(3-0-3)

An introduction to the seminar method of instruction, emphasizing the analysis of literary texts. For a full description of this section of the course, please see the enhanced course information.

ENGL 20000. Introduction to Creative Writing

(3-0-3)

This course will introduce you to the craft of writing poetry and fiction. Thus, you will study the language, forms, techniques, and conventions of poetry and fiction with the purpose of putting that knowledge into practice. The hope is that by the end of the semester you will have also discovered ways of reading creative works that are stimulating and enriching for you. A large part of the semester will be devoted to the writing and sharing of exercises and original creative works in a workshop setting.

ENGL 20001. Introduction to Fiction Writing

(3-0-3)

Prerequisite: AMST 13186 or ANTH 13181 or ARHI 13182 or LLEA 13186 or ECON 13181 or ENGL 13186 or FTT 13182 or GE 13186 or HIST 13184 or IRL 13186 or MUS 13182 or PHIL 13185 or POLS 13181 or PLS 13186 or PLS 20201 or PLS 30202 or PSY 13181 or LLRO 13186 or SOC 13181 or THEO 13183

This is a beginning course in writing short prose fiction. No experience in the form will be necessary. Students will be writing every week, primarily short fiction and other prose forms, guided by assignments. There will be in-class student discussion of each other's work. There will be readings in both traditional and contemporary fiction.

ENGL 20002. Introduction to Poetry Writing

(3-0-3)

Prerequisite: AMST 13186 or ANTH 13181 or ARHI 13182 or LLEA 13186 or ECON 13181 or ENGL 13186 or FTT 13182 or GE 13186 or HIST 13184 or IRL 13186 or MUS 13182 or PHIL 13185 or POLS 13181 or PLS 13186 or PLS 20201 or PLS 30202 or PSY 13181 or LLRO 13186 or SOC 13181 or THEO 13183

This course introduces students to the basic elements of poetry writing: language as matter and its creative organization through rhythm, form and different kinds of patterning. The course emphasizes the preeminence of sound as the distinguishing feature of poetry, with listening and speaking poetry as a necessary basis for writing it. Technical exercises, language games, writing exercises both collective and individual, and encounters with poetry in print and through attending readings are required. Original poetry by participants is discussed both online and in workshop sessions.

ENGL 20003. Fiction Writing

(3-0-3) Cornwell; O'Rourke; Trefts

Students will begin with narrative exercises in style and form and ultimately write complete drafts and revisions of literary short stories. Readings in modern and contemporary literature will provide critical perspective and vocabulary, as well as narrative possibilities.

ENGL 20004. Poetry Writing

(3-0-3) McSweeney

This course invites you to build on the basics, develop your technical abilities, and broaden your approaches to the form, genres, media, language, and performance of contemporary poetry. Students should expect to read and view works from a variety of periods and cultures, and will generate their own poems in response to course readings and prompts as well as their own impromptu in-class writing. Students will also sharpen their critical vocabulary as they analyze assigned

readings, critique peer work, and receive critiques of their poems from both peers and instructor. Specific readings, activities and assignments will differ from section to section.

ENGL 20023. Writing Center Theory and Practice

(3-0-3) Capdevielle

A three-credit course in writing pedagogy for students working as tutors in the University Writing Center.

ENGL 20104. Introduction to Poetry

(3-0-3) Betz

This course will provide an introduction to poetry as a literary art form and develop students' skills of critical analysis and interpretation. The course will address the major poetic genres and a range of literary concepts and devices. We will read a variety of material both past and contemporary, with a special emphasis on poetry from the nineteenth and twentieth centuries and particularly the Romantic period.

ENGL 20106. Point-of-View in the Novel

(3-0-3)

This course focuses on an introduction to the novel as a form, as a means to view the world of the author/artist and that of the reader.

ENGL 20107. Satire from Henry VIII to Barack Obama

(3-0-3)

Is satire necessary to the health of society or a sign of its decline? In considering the role of the satire in society, students will read key texts from the Renaissance, the eighteenth century, and the present day. We will assess the literary and social significance of the formal and thematic continuities between the current satirical outpouring on television in *South Park*, *The Daily Show*, and *The Colbert Report*, and earlier texts by Thomas More, Erasmus, the Earl of Rochester, Jonathan Swift, Voltaire, Mozart/DaPonte, and others. We will discuss the strategies and limitations of satire in a wide variety of texts including novels, poetry, drama, blogs, and opera.

ENGL 20112. Comedy

(3-0-3)

A multimedia examination of different and recurring patterns, themes, characters, types, and problems in comedy—in drama, opera, and operetta, film, fiction, and radio and TV—with particular focus on the role and treatment of women.

ENGL 20133. Catholic Fiction and Film

(3-0-3)

An examination of Catholicism in modern fiction, cinematic adaptations of those works of fiction, and other free-standing stories and films. In this course, as you might expect from its title, we will consider representations of Catholicism in the work of a number of authors and filmmakers. Our central texts are as follows: Georges Bernanos, *The Diary of a Country Priest* (novel, French, 1937); Robert Bresson (director) *The Diary of a Country Priest* (1950); Louis Malle (director) *Au Revoir Les Enfants* (1987); Leo McCarey (director) *The Bells of St. Mary's* (1945); Pat McCabe, *The Butcher Boy* (novel, 1992); Neil Jordan (director) *The Butcher Boy* (1997); Peter Mullan (director) *The Magdalene Sisters*; Brian Moore, *Black Robe* (novel, 1985); Bruce Beresford (director) *Black Robe* (1991); James Joyce, *Dubliners* (short stories, 1914); John Huston (director) *The Dead* (1987); Betty Smith, *A Tree Grows in Brooklyn* (novel, 1943); Elia Kazan (director) *A Tree Grows in Brooklyn* (1945). Alfred Hitchcock, Martin Scorsese, Frank Capra, John Ford, Robert Altman, Francis Ford Coppola, Leo McCarey, Robert Bresson, Jean Renoir, Federico Fellini—the list of great (lapsed or otherwise) Catholic film directors is staggering. In the films and novels and stories that we will be reading—for we will be reading the films just as closely as we will read the written words—Catholicism emerges in multiple ways. Some of the issues that will be raised for our analysis and discussion will be: iconography; sacrifice; mortality; sin; original sin; violence and religion; religious corruption; the tensions between the individual and the

institutions of the Church, and the clergy; the loss of innocence; grace; hypocrisy; censorship; and silence. We will aim, too, to compare and contrast the different treatments of religion and humanity in these films and novels.

ENGL 20141. Voracious Reading: Four Centuries of Food and Fiction

(3-0-3)

This course will explore the role of food, drink, and consumption in a wide range of literature spanning the 18th through 21st centuries. The course aims to whet students' appetites by introducing them to new and fruitful ways of engaging with texts that are inspired by critical perspectives and methodologies including cultural studies, feminism, and the growing interdisciplinary field of food studies. Reading assignments for the class will be "omnivorous," including material from many different genres including poetry, fairytales, cookbooks, novels, short stories, and film. Students will be encouraged to think critically about both the texts they read and foods they ingest, though the primary aim of the class is to equip students with the tools necessary to fully savor a rich variety of literary texts.

ENGL 20142. Autobiography and Subjectivity

(3-0-3) Green

Life-writing is a capacious term that can be used to describe a variety of private and public statements about the self. Some of these are easily recognizable as artistic representations of subjectivity (for example, memoirs, diaries, letters, self-portraits) and some less so (for example, legal testimony, graphic novels, blogs, even medical forms have been read as part of the complex project of articulating subjectivity). This course will attend to a wide variety of forms of life-writing in order to trace shifting notions of what counts as a self and track the complex project of defining and representing subjectivity. A broad range of critical approaches to subjectivity and definitions of the autobiographical project will assist us as we attempt to map changing notions of the self. Many, but not all, of our primary materials will be drawn from the twentieth century, some from the current decade: texts may include selections of writings by Wordsworth and Rousseau, Art Spiegelman's graphic novel *Maus*, Harriet Jacobs' *Incidents in the Life of a Slave Girl*, Virginia Woolf's *Sketch of the Past*, Maxine Hong Kingston's *The Woman Warrior*, selections from Samuel Delany's *The Motion of Light in Water*, Alison Bechdel's *Fun Home*, photography by Cindy Sherman, Jo Spence and others, self-portraits by Frieda Kahlo, considerations of Web projects, My Space sites, political and legal testimony or "witnessing," and other examples of autobiography "at work" will also be considered. Requirements: participation, short commentaries, and three essays: two around 5 pages, and one of eight-to-ten pages.

ENGL 20143. The Modern Novel: Breaking Borders: Modernism across Nations

(3-0-3) Dinsman

What we consider the "modern novel" is changing. This term no longer applies only to novels written in the United States and Western Europe from 1890–1940. Instead, studies of the modern novel are moving beyond nation; the modern novel is now being recognized as a global phenomenon. This is a new approach to Modernist studies and is one that is gaining momentum. In this course we will read some of the greatest modern novels of the nineteenth and twentieth centuries. We will look at literary Modernism from an expanded time period (1857–1966) and from nations as disparate as the United States, Russia, the Sudan, and the Dominican Republic. Along the way we will discuss themes that are common to the study of the modern novel, such as psychoanalysis, colonialism and the role of the artist. We will ask ourselves questions, such as: Should literature from disparate countries be compared, or does this international comparison lessen or even ignore the significance of the national qualities in their writing? Should novels more than 100 years apart both be considered "modern"? Should the modern novel have specific qualities, and what qualities should those be? Should texts only be read in their original language?

ENGL 20144. The Pursuits of Happiness and the Novel

(3-0-3) Mello

What does it mean to pursue happiness? Is happiness found in the fulfillment of passion, necessity, or in the rejection of both? Is it found in the acceptance

of God's providence and the realization of salvation, or is happiness an escape from history and what history has taught us about meaning? According to the Declaration of Independence, the pursuit of happiness is an inalienable human right. But what exactly does that right entail? These and other questions will be at the heart of this course's investigation of the history and formal features of the novel. The selection of novels will include works by Voltaire, Jane Austen, and Ian McEwan, just to name a few, which we will read alongside a short selection of philosophical and political texts pertinent to our investigation into what it means to pursue "happiness."

ENGL 20145. Love and Memory in Literature

(3-0-3) Dawson

This course will explore connections between the themes of love and memory, especially remembrance of the dead, in English and American literature. From the ghost of Hamlet's father with its plea of "Remember me" to the lost child in Toni Morrison's *Beloved*, the living are haunted by their memories of the dead and by the knowledge that they too will die and either survive in or vanish from human memory. Why do we, as individuals and as a culture, turn to novels, plays, and poetry to preserve or come to terms with our memories of those who have died? Can these forms of memory help us to keep "devouring time" at bay or come to terms with mortality? How are the varied literary expressions of human love shaped by concerns about memory and loss? How have writers sought to make others or themselves remembered by future generations of readers? We will consider these questions in novels, plays, and poems, including works by John Donne, John Milton, Emily Brontë, and W.H. Auden, as well as Shakespeare and Morrison. In pursuing the theme of memory, the course will encourage students to explore how later writers remember and transform the traditions of their forebears.

ENGL 20146. Heroes and the Heroic in Literature

(3-0-3)

This course focuses on depictions of heroes and heroines in British texts from the 18th to the 20th century, and on the various ways literature of this period engages the theme of the heroic. As we read examples of both poetry and prose, we will investigate how the hero/heroine functions and changes as a literary figure, and how different heroes and heroines reflect cultural values and developments. More specific topics that will be addressed include: this period's new emphasis on previously "unsung heroes," such as the rural and industrial poor; the growing importance of women as authors and as literary subjects; the portrayal of the poet as a kind of hero; and, at the same time, the ironization of the figure or concept of the hero. Potential authors on our reading list will include: Eliza Haywood, Henry Mackenzie, Thomas Gray, William Wordsworth, Lord Byron, Felicia Hemans, Jane Austen, Alfred Lord Tennyson, Robert Browning, Charles Dickens, Thomas Hardy, Wilfred Owen, T.S. Eliot, and Virginia Woolf.

ENGL 20147. Environment and Literature

(3-0-3) Drew

Thanks to climate change and Al Gore, the environment has become an increasingly urgent concern in recent years. But the question of how to live in and with nature has vexed humankind for centuries. We will explore the relationship between humans and nature as it is portrayed in prose and poetry from the late seventeenth century through today. In addition to developing an understanding of the depiction of nature in each individual work, we will also track the development of environmental ideas over the course of the centuries with the goal of understanding what the ideas we have about the environment today inherited from the literature of nature. Authors covered will include Milton, Wordsworth, Mary Shelley, the Brontës, Thoreau and Annie Dillard. Two short papers, a group presentation, mid-term, and final exam.

ENGL 20148. Introduction to Poetry

(3-0-3) Menes

An introduction to the close reading of poems, together with instruction in the standard methods of interpretation. Emphasis will be given to the language and

forms of poetry, and how these inform meaning. Besides writing critical essays on poetry, students will write their own poems inspired by those they have read in class. Therefore, this course will combine analysis with creativity.

ENGL 20149. Black Reconstruction: African American Literature and U.S. Society

(3-0-3)

If “critique” refers to the analysis of the present towards the transformation of society then this course considers how African-American literature has functioned in this creative and critical mode from its inception. Through lecture and class discussion, this course focuses on writings from African-American authors pondering the possibilities and goals of reconstructing their communities and the United States at large. We will cover various periods of literary activity, including antebellum slave narratives, the post-Reconstruction era, the Harlem Renaissance, and the black arts movement. We will cover multiple literary genres—including poetry, slave narrative, novel, and the essay, among others—used in the African-American literary tradition placed in their historical, cultural, and institutional contexts. By reading the African-American literary tradition in these contexts, we will pursue a number of questions, regarding issues of political agency, the role of the writer as intellectual, the relationship of literature to the folk, and literature as an avenue of recovering alternative histories. We will read material from Phillis Wheatley, Harriet Jacobs, Charles Chesnut, Zora Neale Hurston, Ann Petry, Amiri Baraka, and others.

ENGL 20151. Literature of Sport

(3-0-3)

Sports and athletics have held prominent roles in human societies since the beginnings of civilization. Across centuries, nation states have used athletic competition for a variety of purposes, from paying homage to distant gods to demonstrating superiority over neighboring tribes/cultures. And the individuals, the “warriors”, who excel on those “fields of battle” are venerated as heroes, champions, “gods”. In this course, we’ll look at a variety of literature (fiction, nonfiction, poetry, film, broadcasts of athletic events, etc.) related to sports and athletics. From depictions of wrestlers on temple walls in ancient Egypt to Grantland Rice’s *New York Herald Tribune* “Four Horsemen” article to podcasts of ESPN’s *SportsCenter*, our investigation of the literature of sport will cover a range of topics—race, gender, class, globalization, and the purposes and functions of athletic competition, to name a few—including the rise of the super star athlete as a “god.” Required work: quizzes, two essays, midterm, final examination.

ENGL 20152. An Introduction to Indo-European Epic: Poetry, Criticism, and Poetic Analysis

(3-0-3) Little

This course focuses on the three major divisions of Indo-European epic that are frequently studied separately, but rarely treated together. These divisions—classical European epic, Christian European epic, and non-European epic—are represented by three of the greatest literary achievements of all time: the *Aeneid*, the *Divine Comedy*, and the *Mahabharata*. We will look at these works individually and in relation to each other and to ourselves.

ENGL 20153. Happily Never After? Re-imagining the Fairy Tale

(3-0-3)

This course will examine the enduring popularity of the fairy tale, as well as the forces underlying the changes in its form and meaning. By investigating the historical development of the fairy tale, students will be introduced to various methods of literary and cultural analysis. The course will begin with the origins of the literary fairy tale in 16th-century Italy, and conclude in the 20th century with Anglophone postmodern transformations. We will consider the multi-cultural nature of the fairy tale, as we examine the transmission of various tales across linguistic and national borders. Students will be introduced to various theoretical models of interpretation; we will explore structuralist, psychoanalytical, feminist, and postmodernist readings of both traditional and modern fairy tales. This course will also involve cross-disciplinary materials from subjects like history, anthropology, philosophy, and gender studies in order to examine larger themes like identity and hierarchy. Course materials include collections of world fairy

tales, short novels, poetry, cartoons, television programs, films, and graphic novels. Students are expected to complete a short critical review, a take-home midterm, and a substantial comparative final paper. Students who are enrolled in this course and who have completed the Notre Dame language requirement in Italian are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum initiative Fridays at 12:50–1:40.

ENGL 20154. The Gothic Novel

(3-0-3) Deane-Moran

“From ghoulies and ghosties/ And long-leggeddy beasties/ And things that go bump in the night,/ Good Lord, deliver us!” Why do we enjoy being scared out of our wits? Since its inception in the late eighteenth century, generations have loved the gothic novel with its grotesque murders and bizarre terror. The course will study a number of the most celebrated gothic tales from horrors in castles and monasteries (Lewis’s *The Monk*) to mysterious love stories (Brontë’s *Wuthering Heights*) to the eerie stories of the paranormal (Shelley’s *Frankenstein*) to contemporary horror stories. The purpose will be to study the ways in which the gothic novel entertains us and what it is about us that loves to be entertained by the gothic.

ENGL 20155. Of Kings, Crowds and the Guillotine: Literary Representations of the Revolution in France

(3-0-3) Bramsen

The French Revolution, inspired by many of the same ideas as the American Revolution, followed a very different course and had an even more profound impact on Western civilization. Pop culture references to the French Revolution often dwell on the streets of Paris running with blood as angry mobs tear down historical monuments and the guillotine services countless victims. How does our understanding of the Revolution in France differ from fictional representations of it at various times over the two hundred years that have passed since it began? Who or what is considered responsible for the cataclysm that swept France and shook all of Europe? When and how are historical figures introduced into these fictional accounts? How did the French view their own Revolution as opposed to the way the British saw it from their front-row seat across the Channel? How do fictional representations of the Revolution portray the individual, the crowd, and the relationship between them? We will consider these and other related questions as we read and discuss 19th century novels like Honoré de Balzac’s *The Chouans* (1829), Charles Dickens’ *A Tale of Two Cities* (1859) and Victor Hugo’s *Ninety-Three* (1874); twentieth-century fictions like Baroness Orczy’s *Scarlet Pimpernel* (1905) and Anatole France’s *The Gods Will Have Blood* (1912); and Chantal Thomas’ twenty-first century novel *Farewell, My Queen* (2002). We will also view some films, including Sophia Coppola’s *Marie-Antoinette*, and will consider pertinent historical or critical readings in our study of each fictional text.

ENGL 20195. The Literature of Disability

(3-0-3) Duffy

“This new critical perspective [Disability Studies] conceptualizes disability as a representational system rather than a medical problem, a discursive construction rather than a personal misfortune or a bodily flaw, and a subject appropriate for wide-ranging cultural analysis within the humanities instead of an applied field within medicine, rehabilitation, or social work. Such an approach focuses its analysis, then, on how disability is imagined, specifically on the figures and narratives that comprise the cultural context in which we know ourselves and one another.”—*Rosemarie Garland Thomson, The Beauty and the Freak, p. 181.* What is disability? What does it mean to be considered disabled? What is the relationship of disability to what is thought to be non-disabled, or “normal”? In this course, we will consider writings and films about disability and individuals labeled disabled. Our readings will include fiction and nonfiction works about people with various physical and cognitive disabilities, including blindness, multiple sclerosis, autism, and others. We will explore the ways in which the disabled have been represented in such works, and the rhetorical resources for constructing disability in literature, non-fiction, and film. We will consider the ways in which writers considered disabled write about themselves, telling their own stories, and the ways in which

these writings may complicate, subvert, or defy conventional representations of the disabled. In exploring these and related issues, we will consider the implications of disability for individuals and society.

ENGL 20199. Topics in Literature

(3-0-3)

Selected topics in literature.

ENGL 20203. Shakespeare in Performance

(3-0-3)

A performance-oriented Shakespeare course based on the rapprochement of theatrical and literary disciplines, techniques, and interpretations.

ENGL 20204. Shakespeare and Film

(3-0-3)

A survey of how Shakespeare uses sex and violence as potential literary devices within his plays, and how film adaptations of the plays help us understand the effects of this sensationalism.

ENGL 20206. Dante: Divine Comedy

(3-0-3)

A study of *The Divine Comedy*, in translation with facing Italian text, with special attention to the history of ideas, the nature of mimesis and allegory, and Dante's sacramental vision of life.

ENGL 20211. Shakespeare's Comedies

(3-0-3)

A survey of the comedic plays of William Shakespeare.

ENGL 20213. The World of the Middle Ages

(3-0-3)

Cerequisite: MI 22001

The Middle Ages have been praised and reviled, romanticized and fantasized. The spectacular popularity of *Harry Potter*, *The Lord of the Rings*, and *Narnia* have brought a revival of interest in and curiosity about the Middle Ages. But what were they like, these ten centuries between Rome and the Renaissance? In this course, we will explore major themes and issues in medieval civilization in an attempt to offer some basic answers to that question. We will have in view three kinds of people: rulers, lovers, and believers. But we will also study carefully those who wrote about those kinds of people. We will constantly ask how can we know about the Middle Ages, and what kinds of things can we know? We will consider major literary texts as both works of art and historical documents. We will explore various kinds of religious literature. We will try to understand the limits, boundaries, and achievements of philosophy and theology. Some lectures will incorporate medieval art so as to add a visual dimension to our explorations. This course will constitute an extended introduction to the dynamic and fascinating world of the Middle Ages.

ENGL 20214. Arthurian Literature

(3-0-3)

The large body of history, verse chronicle, heroic narrative, poetic romance, and prose fiction—all gathered under the canopy term “Arthurian Legend”—represents one of the most fascinating and most enduring literary phenomena of western culture. In this class, which will follow a lecture-discussion format, we will read a selection of writings that reflect the textual trace of Arthur from his earliest appearances in mytho-historical chronicles beginning in the sixth century and extending from the earliest medieval poetic and prose fictions featuring Arthur and the members of his court, through the great array of writers, past and present, who have tended these myths and legends with such imaginative care. Our readings, which begin in the Middle Ages, will culminate with the “Arthurian revivals” of the nineteenth and twentieth centuries, the latter extending to theatrical and film texts ranging from *Camelot* and Eric Rohmer's *Perceval* to Monty Python and Indiana Jones in their post-modern questing for the Holy Grail. In addition to attending ways in which the sheer pleasures-of-the-text have been constructed by these gifted authors, our own “literary quest” will involve questions of historical

and social context, gender and genre, the history of reception, modes of literary representation including techniques of symbolic and allegorical figuration, and ways in which the theoretical and/or ideological positions of both writers and their audiences constrain and inspire the works they produce. While pondering how and why this vast body of myth and legend, clustered around the figure of Arthur, has managed to survive and thrive through such remarkably variant shifts of time, place, and circumstance; and while reflecting thoughtfully on our own investment in—or resistance to—the variety of assigned readings, each student will choose for particular close study an Arthurian hero, heroine, or villain (Lancelot, Gawain, Guinevere, Galahad, Merlin, Modred, etc.), as well as some mytho-historical theme like the Round Table, the Grail Quest, the Sword-in-the-Stone, the Bride Quest, the Giant Combat, the Fatherless Boy, the Childless Queen, etc., as this “character” or “motif” presents some specific problem in interpretation. These “character studies” and thematic clusters will form the basis of two short essays, one due at mid-term, one at end-term. Specific topics, which will be shaped through individual consultation with the teacher, should, in the course of their critical argument, engage a variety of formal, stylistic, and rhetorical practices that have been employed by writers from the twelfth to the twentieth century as they conform to—and create fresh versions of—the plenitude of literary exemplars that characterize Arthurian Legend. Creative projects—individual or collective—are also welcome and, with the approval of the teacher, may be substituted for one of the essays. These alternative ways of investigating the materials of Arthurian Legend might include original poetic or prose compositions, dramatic presentations, graphic arts, videos, and/or musical performances, vocal or instrumental performances.

ENGL 20215. Introduction to Shakespeare

(3-0-3)

An examination of selected plays of Shakespeare, with an emphasis on Shakespeare's development as a dramatist and his techniques of character development.

ENGL 20219. Heroic Quests in Early British Literature

(3-0-3)

Stories of questing knights and unending, heroic landscapes have enjoyed popularity in recent film versions of *The Lord of the Rings*, *The Chronicles of Narnia*, and even *Beowulf*. This course will explore the foundations of the heroic quest narrative in early British literature, focusing in particular on the transformations of the epic and romance genres in Medieval and Renaissance literature. What ties heroic tales to a given nation or culture? How do stories of knights, ladies, monsters, and faeries become vehicles for other ideas, such as religion, sex, and politics? And what happens when these stories become reimagined in early “modern” genres of drama, satire, and the novel? We will approach these questions by considering the epic ideal of the English warrior hero, and then follow it through the wanderings of the poetry, prose, and drama of Chaucer, Malory, Spenser, Shakespeare, and others. While we will spend the majority of our time on earlier British literature, we will consider, in class discussions and student presentations, contemporary versions and film representations of English epic and romance.

ENGL 20220. Migration and Identity in the New Ireland

(3-0-3)

In less than two decades, the Republic of Ireland has shifted from a relatively poor country with a high level of national, racial, and ethnic homogeneity to a country with the world's fourth highest per-capita income experiencing an exponential expansion of cultural diversity. One of the names used to describe this shift is “New Ireland,” and this course will discuss the cultural dimensions of this term. We will examine selections from contemporary Irish literature and film, which contribute to this analysis and contextualize our discussions with legal, political, and economic approaches to Irish social issues. Class work will include several short papers, a long research paper, and an exam.

ENGL 20223. *The Book of Monsters: Monstrosity and Metamorphosis in Medieval Literature*

(3-0-3)

Cyclopes, blemmyae, giants, women with the tails of lions, fairies, Chthulu-like beings from the chaotic abyss: these creatures and many more occupied the margins of human geography for centuries. In ancient thought, monsters were not merely fantastical creations, but existed as important ways of talking about humans and their society: despite their distance—living as they did in India, Africa, the depths of the sea or the burial mound, sometimes even on the moon—monsters and marvelous beings have been intimately involved with Western understandings of what it means to be a human being. While we will consider a few major works such as *Beowulf* and Shakespeare's *The Tempest*, we will also look at stories of werewolves in Norse saga and French romance, madmen, Biblical and apocryphal tales of monsters and fallen angels, classical and medieval "travelogues" (including voyages to outer space), and other sources to acquire an understanding of the historical and cultural contexts that make medieval texts different from—and yet similar to—our own. Secondary critical readings will help students toward a sense of the many different issues at play in the primary works, from historical context to more in-depth considerations of gender, geography, and race.

ENGL 20224. *The Bodies and the Blood: Shakespeare, Violence and Religion*

(3-0-3) Teller

During the English Renaissance, drama became an immensely popular art form, appealing to citizens across classes both in London and in the country. Bloody, dark, sensational, and sometimes even comical, tragic drama (and all its sub-genres) became a box-office staple of English theaters. Because English drama grew in part out of the medieval morality play tradition, and because much of this drama paradoxically emphasized violence and morality, spectacle and spirituality, this course will examine the plays of the most influential dramatist of the English Renaissance and their intersections with problems of violence, tragedy, religion, and sacrifice. What are the possible connections between dramatic violence and English Renaissance culture? To what extent is religion or spirituality bound up with Shakespeare's stage, his plots, and his characters? How does drama represent tragedy and sacrifice, and what possible relationships are there between staged violence and the audiences that witness it? And what is it about tragedy both as a dramatic genre and as a way of making spiritual or religious sense of real-life events that is so appealing to Shakespeare's age, and to our own? In addition to introducing Shakespeare's major plays and examining some of them through film and performance history, this course will also include plays by Christopher Marlowe, Thomas Kyd, and John Webster.

ENGL 20225. *Seducing God and Other Lovers: Faith, Love, and Devotion in Renaissance Poetry*

(3-0-3)

From the popular series *The Tudors* to the recent novel *Wolf Hall*, from the classic play *A Man for All Seasons* to big-screen films like *Elizabeth: The Golden Age*, our culture is fascinated by the English Renaissance, that period when religious devotion and erotic love seemed to exist side by side. In this course we will explore the secular and sacred love poetry of this fascinating period of literary history. In the sixteenth and seventeenth centuries—the period of the Reformation and the rebirth of humanism—England experienced an intense flowering of literature, both secular and religious, from the sonnets of Shakespeare to the passionate prayers of George Herbert and John Donne. Paradoxically, the period's religious verse drew its force from a reaction against "courtly" and "profane" love poetry at the same time as it was deeply influenced by that poetry both in form and content. Hence, we will examine the influences and conflicts within this body of English literature, poetry praying to and seducing lovers both human and divine. We will explore questions such as: how do the secular and erotic influence religious poetry? What are the conflicts (and similarities) between sacred and profane love? How do faith and religion shape literature? How does poetry represent or build love and communion? And what connections can we make between the self, culture, literature, and devotion? Authors covered include William Shakespeare, John Donne, George Herbert, and John Milton.

ENGL 20233. *Beowulf and Heroic Legend*

(3-0-3) Hall

Beowulf is one of the oldest poems in English, the closest thing we have to a medieval English epic, a literary monument of extraordinary complexity, and a study in heroic behavior that evaluates and problematizes every aspect of the folklore, myth, and legend that it weaves into its narrative. The relationship between *Beowulf* and early medieval heroic legend will be front and center in this course, which will undertake a close reading of the poem set against several comparable exemplars of heroic behavior in neighboring medieval traditions, including the Old English *Battle of Maldon*, the Old High German *Hildebrandslied*, the Old Welsh *Gododdin*, the Latin *Waltharius*, the Old Irish *Táin Bó Cuailnge*, the Old French *Chanson de Roland*, and the Old Icelandic *Hrólfs saga kraka* (all in modern English translation). We'll look carefully at how heroic characters are represented and defined in these texts, and we'll consider the part played by feud, revenge, honor, loyalty, and social bonds and allegiances in constructing a heroic ethos. Weekly response papers, two essays, and a final exam.

ENGL 20240. *Staging the Religious: Shakespeare and His Contemporaries*

(3-0-3)

How do we imagine religious experience? What happens when religion becomes an image, either visually, dramatically, or on the page? In this course, we will approach this question through the plays of William Shakespeare and a handful of his contemporaries, focusing on English Renaissance playwrights whose works stage the cultural tensions and competing religious claims of Protestants, Catholics, Jews, Muslims, and atheists, not to mention the supernatural (ghosts, witches, devils, etc.). While we will explore a handful of themes in relation to these works—faith and the will, religious outcasts, and violence and justice—we will spend most of our time asking how the presentation of these religious themes in dramatic form and on the stage affects their meaning. We will do so by way of comparison, both comparing Shakespeare's plays with the frequently under-read works of Christopher Marlowe and Ben Jonson, as well as setting their images of religious experience against the Bible, Renaissance painting (e.g., Bosch, Bruegel, Caravaggio, and Rembrandt), and contemporary film versions of the plays.

ENGL 20302. *The Romantic Tradition*

(3-0-3)

Between 1790 and 1830, the movement known as Romanticism profoundly changed the artistic, musical, historical, religious, and political sensibilities on the Continent and in Britain. Romanticism marked a turn from the rational formalism of the Classical period and reawakened an interest in myth, religious faith, the imagination, and emotional experience. In this course, we will focus principally on the German contribution to Romanticism and trace its origins, development, and eventual decline in works of literature, philosophy, theology, music, painting, and architecture. Works to be studied will include those by the writers Ludwig Tieck, Friedrich von Hardenberg (Novalis), and Friedrich Schlegel; the philosophers Fichte and Schelling; the theologian Friedrich Schleiermacher; the painters Caspar David Friedrich and some members of the Nazarene school; the composers Franz Schubert, Felix Mendelssohn, and Robert Schumann; and the architect Karl Friedrich Schinkel.

ENGL 20313. *Science in Fiction*

(3-0-3)

Science and poetry have always spoken to one another—today perhaps more than ever—even as our modern culture assumes they have nothing in common. This course will look at science and literature, truth and beauty, and the world-changing power of both. How do we read novels that depend on scientific concepts, or science writing that uses the strategies of fiction and poetry? We'll walk a transept across the divide between science and literature, from science fiction and realistic novels to plays, poems, popular science writing, and professional research science, taking samples all along the way and asking, how do we tell the difference? What do our answers tell us about the nature of our world, and the ways we can know it and live in it? Readings to include Mary Shelley's *Frankenstein*, Richard Powers's

Galatea 2.2, Michael Frayn's *Copenhagen*, Aldous Huxley's *Brave New World*, and James Watson's *Double Helix*, as well as an assortment of poems, essays, films, and articles by scientists and philosophers—and by a few who defy classification.

ENGL 20314. Bewildered Beginnings: Coming-of-Age Novels from Victorian England to Celtic Tiger Ireland

(3-0-3) Huang

This course will explore the ways in which the development of an individual from childhood to early adulthood is depicted in literature in different periods and cultural contexts ranging from Victorian England to late 20th-century, Celtic Tiger Ireland. The readings include canonical works by Charlotte Brontë, Charles Dickens, James Joyce, as well as more contemporary Irish novels. As we read, we will try to figure out how “coming of age” is understood and achieved in different times and also consider the social function of coming-of-age novels.

ENGL 20316. Interpreting Jane Austen

(3-0-3) Drew

Jane Austen is one of the most widely adapted authors in the English language. Over the 200 or so years since she published her first novel, scores of plays, movies, spinoffs, sequels, parodies and homages have appeared in cultures from Hollywood to Bollywood. What's less well-known is that Austen's own works themselves parody, adapt and allude to plays and novels from her own time, making her novels themselves a part of the same process of cultural recycling that produced novels like *Pride and Prejudice* and *Zombies*. In this course, we will study four of Austen's novels, two eighteenth-century novels that inspired her fiction, and several of her modern-day adaptations, including three film versions of *Pride and Prejudice*.

ENGL 20317. Beauty, Disability and the Novel of the Eighteenth and Nineteenth Centuries

(3-0-3) Joshua

The archetypal hero is handsome and the archetypal heroine is beautiful. This course examines the ways in which the novel of the eighteenth and nineteenth centuries attempts to challenge to the beauty myth. We will cover topics such as the value of beauty in the bourgeois marriage market, sighted culture, the association of deformity with evil, stigma and punishment, and the feminist social gains associated with female plainness. The course will introduce students to disability studies approaches to reading and will focus on concepts of bodily identity, impairment, stigma, monstrosity, marginalization, beauty, deviance, and difference. The main texts will be: Henry Fielding, *Amelia* (1751), Frances Burney, *Camilla* (1796), Mary Shelley, *Frankenstein* (1818), William Earle, *Obi; or The History of Three-Fingered Jack* (1800), Anne Plumtre, *Something New* (1801), Jane Austen, *Persuasion* (1818), and Charlotte Brontë, *Jane Eyre* (1847).

ENGL 20323. The British Novel

(3-0-3) Thomas

Here we survey major British novels over a two-century time span, taking stock of key genre developments along the way. Proceeding chronologically, we begin by exploring how conventions of extended “realistic” prose narratives were established in the 1700s. Then we proceed up through the Romantic and Victorian periods, when the British novel reached a high point of social prominence, narrative variety, and sophistication. Finally, looking to the first decades of the 20th century, we see how Modernists fashioned radically new narrative approaches in an effort to move beyond the topical and literary constraints of the Victorian period. Likely readings include: Daniel Defoe, *Moll Flanders*; Mary Shelley, *Frankenstein*; Charlotte Brontë, *Jane Eyre*; Charles Dickens, *Great Expectations*; Bram Stoker, *Dracula*; Virginia Woolf, *Mrs. Dalloway*. Graded work includes short papers, classroom presentations, and a final exam.

ENGL 20325. The 19th-Century British Bestseller

(3-0-3)

Rather than read the texts of high realism normally associated with the nineteenth-century, we will cover the sub-genres of the nineteenth-century novel that often are neglected in more traditional versions of such a course, including the gothic novel, the sensation novel, the detective novel, and science-fiction. Our reading

list tentatively includes, but is not limited to *The Monk*, *The Woman in White*, *The Island of Dr. Moreau*, and a number of Sherlock Holmes stories. Two essays/papers, midterm, final.

ENGL 20336. Seduction and the 1790s Novel

(3-0-3) Joshua

Attacked by Christian moralists and radical feminists alike, the re-emergence of the coquette and the aristocratic libertine rapist in the radical novel of the 1790s exposes a number of important gender and political preoccupations of the late eighteenth century. We will look at the role seduction plays in what has been called the “sex panic” of the 1790s, and at what the seduction narrative reveals about gender and agency, in the context of the moral and legal debates on seduction and sexual violence. A key strand focuses on how concepts of male and female gender identity impact on the perception and representation of seduction and rape (explored through the influence of Samuel Richardson's *Clarissa* on the writers of the period). The course places legal cases, conduct manuals, newspapers, and moral and religious tracts alongside fiction of the 1790s, and takes as its focus novels that have only recently been republished, and which push the boundaries of our understanding of gender, class, and sexualities.

ENGL 20367. Work and Desire in the Victorian Novel

(3-0-3)

This course will look at different representations of work and desire in a wide range of Victorian novels. Gender and sexuality studies will play a central role in our discussions of these novels and their representations of work and desire. We will, for example, consider the interconnections among constructions of masculinity and working men's collectives. And we will ask how heterosexuality and models of femininity inform representations of the division of labor and gendered separate spheres. Readings include novels by Elizabeth Gaskell (*North and South*), George Eliot (*Felix Holt the Radical*), William Morris (*News From Nowhere*), Oscar Wilde (*The Picture of Dorian Gray*), Isabella Ford (*On The Threshold*) and H.G. Wells (*Ann Veronica*). Course requirements include 2 papers (one 6- to 8-page paper and one 10- to 12-page research paper) and four short (2-page) response papers.

ENGL 20405. Decadent Modernity

(3-0-3)

Narrowly understood, decadence indicates a late-nineteenth century fashion-craze of debauched poets and artists. In this course, we study those materials, but we also engage a broader view of decadence, extending from the 18th century to the present. That second viewpoint broaches the prospect that modern life itself involves us in less obvious versions of decadence—not only phenomena such as conspicuous consumption but also (if you believe Nietzsche) such concerns as morality and truth-seeking. Our course emphasizes literary texts, along with numerous forays into drama, visual arts, cinema and criticism. Early on, we lay conceptual groundwork with texts by Freud and Nietzsche. Other well-known authors include Charles Baudelaire, Oscar Wilde, Joris-Karl Huysmans, Walter Pater, Virginia Woolf, and Patrick Süskind. We also study films by Ken Russell, Peter Greenaway and Sally Potter. Please note that some of our discussion matter is not for the faint-hearted. Bring a sense of humor, a tolerance for the grotesque, and a readiness to think carefully about authors who deliberately challenge deeply held western attitudes concerning morality and values.

ENGL 20410. Modernism to Punk: Poetic Communities in the 20th Century

(3-0-3)

In this course we will be focusing on the significance poetic communities have had on poetry in the 20th century. From the Modernists until today, poetic communities have been the primary center of writing, publication, collaboration, and theorizing. We will start from the premise that poets do not work alone, but cultivate a community of poets and artists with whom they write. When we look at poetry through the lens of community, rather than through individual poets, we are able to understand the art worlds they inhabited and the ways in which collaboration with painters, filmmakers, and musicians helped to create a poetry that addressed the needs and ambitions of a particular group. Poetic communities are politically engaged groups that often function as sites of resistance, critique, and exploration.

With each poetic community we study, from Modernism, to Black Mountain, to The New York School, to Minimalism, to the Beat Generation, to Punk rock, we will be asking what particular historical circumstances enabled the formation of the community, what challenge does each community address, how does one community's concerns differ politically or historically from another community, and how do these group affiliations condition their poetry. By focusing on poetry that is created within and between poetic communities we will examine how their writing is able to engage the construction of self and other, how modern poetry challenges artistic and academic institutions, and how modern poetry interacts with various media, such as painting, music, and film.

ENGL 20411. Shakespeare in Performance

(3-0-3)

Shakespeare's plays are not isolated artifacts that exist in a vacuum: as literary scholar and artistic director Kevin Ewert has said, Shakespeare's "creations were not birthed, Athena-like, from his balding pate into this world to stand alone as singular, finished and fully-formed edifices;" neither playwright nor play existed or "worked autonomously." The plays were originally produced as popular entertainment and both reflected and constructed the cultural conditions of early modern England. Modern interpretations of the plays—on paper, on stage, on film—likewise engage with their own historical moments: each interpretative act is a socially, politically, theoretically informed, and further generative, response. In this course, we will focus on six of Shakespeare's plays to develop an understanding of the formal, linguistic, and stylistic aspects of the genre. We will examine not only the literariness but also the liveliness of these texts, considering each in terms of performance by viewing contemporary theatrical and cinematic works, including the Actors From the London Stage's production of *Much Ado About Nothing* here at Notre Dame, Chicago Shakespeare Theater's staging of *Macbeth*, and various film adaptations. Through reading, discussing, watching, and maybe even performing Shakespeare, students will develop the analytical skills to consider diverse interpretations and make their own informed, critical interventions.

ENGL 20412. Inventing Modernity in Restoration and Eighteenth-Century England

(3-0-3)

Much of what we consider to be modern first emerged in the late seventeenth and eighteenth centuries. Our two-party system has its roots in the political upheavals of the seventeenth century, and our paper economy began with the creation of the Bank of England in 1694. Trade, consumerism, and advertising grew dramatically during the period, and shopping became a pastime. The scientific revolution unsettled traditional understandings of the world, and the importance of classical learning decreased. These political, economic, and intellectual changes were accompanied by significant shifts in cultural values. The sexual libertinism of many late-seventeenth-century literary works gradually gave way to celebrations of sensibility and domesticity. These new ideals contributed to the development of the conception of marriage as a loving partnership and not an economic contract between two families. This change in ideas about marriage was part of a larger reconsideration of the role of women in society. During this period, women began to make significant public contributions to the arts and society. Women actors appeared on stage for the first time, and women writers made well-regarded contributions to the formerly male-dominated literary marketplace. We will examine how writers of this period (roughly 1660–1780s) engaged with these breaks with the past and what seemed to be the emergence of modernity. In addition to tracing this theme, we will consider how the idea of modernity affected language and literary form. Assignments: A quiz, a group presentation, three short papers, two longer papers, and a final exam. Major texts: *Moll Flanders*, Daniel Defoe; *The Battle of the Books* and *Gulliver's Travels*, Jonathan Swift; *Humphrey Clinker*, Tobias Smollett; *The Man of Mode*, George Etherege; *The Rover*, Aphra Behn; *The Beggar's Opera*, John Gay; poems by the Earl of Rochester, John Dryden, Alexander Pope, Oliver Goldsmith, and William Cowper.

ENGL 20433. Modern Drama

(3-0-3)

In this course, we will trace the major developments in the past century of European drama, beginning with the "social problem play" developed by Norwegian playwright Henrik Ibsen in the 1880s and ending with the collaborative feminist theatre of Caryl Churchill in the 1980s. We will read plays by playwrights who tried to bring theatre as close to real life as possible, and by playwrights who sought to shatter audience expectations with bizarre innovations in acting, staging, and theatrical language. Along the way, we will ask ourselves some of the questions that modern playwrights and theatre audiences have struggled with: Should theatre strive merely to entertain, or should it encourage audiences to think about contemporary issues? Should plays attempt to uncover the truth about difficult issues and human problems, or should they take the position that all reality is illusory, all human life merely a performance? Should plays make sense? Are traditional plots important or is it better to use surprising, nontraditional—even nonsensical—methods to try to affect audiences emotionally or viscerally? Should stage sets try to look as much as possible like the places they are trying to represent, or should they reveal that they are stages and props? Should actors try to "become" their characters, or should they distance themselves from their characters and think analytically about them? As we consider these questions, we will read plays and short essays by influential thinkers about the theatre. Students will write five short response papers. Class participation will be a vital part of this course as students interpret, stage, and act out portions of plays, both as a regular part of class discussion and as a graded group presentation.

ENGL 20434. The City and Literature

(3-0-3)

On its most basic level, narrative involves an author and character interacting with their world, engaging it in a manner that entails a beginning, middle, and end. How can such a basic model of storytelling, however, fit the wild variety of sights, sounds, and people which greet anyone upon first entering a city? Thinking of our own experience, how can anyone hope to address the vast size and events of cities such as Chicago or New York, and moreover connect the variety of this environment in an integral way to his or her personal life? It is this basic question that I hope we can begin to answer in this class. We'll be looking at writers dealing primarily with London in the nineteenth and twentieth centuries, asking how they responded to a large metropolis undergoing drastic changes at this time. We'll look at how these writers responded to the vast crowds and new technologies which emerged in this urban space, and how race and gender impacted these authors' art. In order to place the experience of London in comparative perspective, we will also examine some literary treatments of Dublin, and of other cities such as New York and Paris by English writers. In these texts, which span from the end of the eighteenth century up to the 1960s, a number of common themes will emerge: the individual's relationship with massive crowds of strangers, the difference between the country and the city, the close proximity of wealth and poverty, the effects of gender and race on one's experience of the city, the overwhelming novelty of the city's new sensations and technologies, and, ultimately, the place of art in such a setting.

ENGL 20435. Swift to Heaney: Irish Poetry Since 1700

(3-0-3) Hamrick

This course introduces students to Irish poetry from the early eighteenth century to the present. We will cover major Anglo-Irish and English-language poets such as Jonathan Swift, William Butler Yeats and Seamus Heaney, as well as major Irish-language poets including Aogán Ó Rathaille, Brian Merriman, Seán Ó Ríordáin and Nuala Ní Dhomhnaill. The poets and their poetry will be discussed in terms of language and national identity, as well as their place in Irish history. With Swift, for example, we will discuss what it means to be Anglo-Irish, to be Protestant and to write in English in a time when the vast majority of the Irish people are Catholic and speak Irish. Students will be introduced to terms such as hybridity and colonialism and will consider the bases on which we can make claims for a poem's "Irishness." Similarly, with Irish-language poets like Ó Rathaille we will discuss both the choice and the necessity to write in Irish, the implications of language in terms of national identity and how we come to grips with the

complexities of Ireland's fundamentally bilingual literary history. Although we will be reading the poetry from Irish historical perspectives, our critical approach will take inspiration from a distinctly English poet. W.H. Auden once wrote that a critic should approach a poem by saying, "Here is a verbal contraption. How does it work?" We will indeed consider the technical question of how a poem "works," but we will at the same time consider, for example, the linguistic importance of Merriman's use of the couplet, the political implications of Thomas Moore's feminine rhymes, or how Swift uses meter and line length in imitating Hiberno-English speech.

ENGL 20506. Celtic Heroic Literature

(3-0-3)

An exciting introduction to Celtic literature and culture, this course introduces the thrilling sagas, breathtaking legends and prose tales of Ireland and Wales. Readings include battles, heroic deeds, feats of strength and daring and dilemma faced by the warrior heroes of the Celts. This course, which requires no previous knowledge of Irish or Welsh, studies the ideology, belief system and concerns of the ancient Celtic peoples as revealed in their saga literature. By examining the hero's function in society, students investigate the ideological concerns of a society undergoing profound social transformation and religious conversion to Christianity and the hero's role as a conduit for emotional and social distress. Among the heroes to be studied in depth are: Cu Chulainn, Lug, St. Patrick and the king-heroes. Wisdom literature, archaeological and historical evidence will also be considered in this course. No prior knowledge of Irish required. All texts provided in English.

ENGL 20508. The Irish in Their Own Words

(3-0-3)

This course is designed as an introduction to the literature of medieval Ireland. Particular emphasis will be placed on the prose saga texts like the *Tain Bo Cuailnge* or *Cattle Raid of Cooley*, which features the legendary hero C/Chulainn; also the various texts in both prose and poetry of the Fenian cycle of Fionn Mac Cumhaill (Finn McCool). The manner in which such texts shed light on the nature of medieval Irish society will be examined. There will be regular reading and writing assignments, and students will be expected to take part in class discussion.

ENGL 20509. Twentieth-Century Irish Literature

(3-0-3)

The cultural and political factors that have shaped Ireland's extraordinary literary achievement, paying particular attention to Irish Decolonization and the Northern Troubles. Readings from Shaw, Yeats, Joyce, Bowen, Friel, Heaney, and Deane.

ENGL 20510. The Hidden Ireland

(3-0-3)

The Hidden Ireland denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from "below" and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our understanding of Irish identity, Irish history, and Irish literature. This course will examine the book in depth and utilize it to open a window on the hidden Ireland of the 18th century. The cultural, historical, and literary issues which are raised by the book will be studied in the context of the poetry of the period. Poetry will be read in translation.

ENGL 20511. Modern British and Irish Drama

(3-0-3)

Dramatic representations of the Irish character and the Irish nation from the end of the 19th century through the 20th. Includes Yeats, Lady Gregory, O'Casey, Shaw, and Synge.

ENGL 20512. Culture and Politics in Northern Ireland

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the north of Ireland during the 20th century.

ENGL 20513. Introduction to Irish Writers

(3-0-3)

Corequisite: ENGL 22514

As the visit to campus of the most recent Irish winner of the Nobel Prize in Literature suggests, this small island has produced a disproportionate number of great writers. Designed as a general literature course, the class will introduce the student to a broad range of Irish writers in English from the eighteenth century to the present. Writers will include Jonathan Swift, Maria Edgeworth, Oscar Wilde, James Joyce, William Butler Yeats, Brian Friel, and John McGahern. We will also look at recent film versions of several of these writers' works, including Wilde's *Importance of Being Earnest*. Themes to be explored include representations of national character and the relationships between religion and national identity, gender and nationalism, Ireland and England, and "Irishness" and "Englishness." Students can expect a midterm, a paper (5–6 pages typed) and a final.

ENGL 20516. The Irish in Their Own Words

(3-0-3)

This course is designed as an introduction to the literature of medieval Ireland. Particular emphasis will be placed on the prose saga texts like the *Tain Bo Cuailnge* or *Cattle Raid of Cooley*, which features the legendary hero Cu Chulainn; also the various texts in both prose and poetry of the Fenian cycle of Fionn Mac Cumhaill (Finn McCool). The manner in which such texts shed light on the nature of medieval Irish society will be examined. There will be regular reading and writing assignments, and students will be expected to take part in class discussion.

ENGL 20517. All That You Can't Leave Behind: Exile in the Irish Literary Imagination

(3-0-3)

This course will explore the centrality of emigration and immigration in the literary production of Irish fiction and drama by both writers in Ireland and abroad. The course will range from the nationalist movements of the early 20th century and their demand for a stop to emigration from Ireland to the early 21st century, which has seen a tremendous influx of immigrants, refugees and asylum seekers into Ireland. Special attention will be paid to the homeless Irish woman and the immigrant Irish woman, domestic violence, the concept of emigration as libration or as exile, the problems of the returnee, and fantasies of gender and ethnic essentialism and of a threatened "authentic" home and nation. The course will be reading-intensive, and will emphasize close-reading skills, cultural analysis and historical contexts for each text. Students will write weekly short papers (3 pages) that perform literary analysis and incorporate historical readings and/or literary theory from library reserves. Course texts will include W.B. Yeats's and Lady Gregory's *Cathleen ni Houlihan*, Joyce's *Dubliners*, Brian Friel's *Philadelphia, Here I Come*, Maeve Brennan's *The Rose Garden*, Betty Smith's *A Tree Grows in Brooklyn*, Eugene O'Neill, *Long Day's Journey Into Night*, Edna O'Brien's *Down by the River*, Marina Carr's *By the Bog of Cats*, and Roddy Doyle's *The Woman Who Walked into Doors*.

ENGL 20518. Anglo-Irish Literature

(3-0-3)

An examination of Irish identity through an introduction to the literature, both historical and contemporary, of Anglo-Ireland.

ENGL 20521. Reading the Irish Revival

(3-0-3)

This course will examine the Irish Revival (1891–1939) as a dynamic moment in modern Irish literature in which key literary figures like W.B. Yeats, Lady Gregory, John Millington Synge and James Joyce worked to make Ireland a center of cultural innovation once again. This significance of this period to Ireland's decolonization and to related debates over the appropriate forms and language for an Irish national literature will provide a central focus. Texts to be considered will include: the drama of J.M. Synge and Lady Gregory, the poetry of W.B. Yeats and Joyce's *Dubliners*.

ENGL 20522. Mapping Ireland

(3-0-3)

In this course we will read modern Irish history, film, poetry, drama, short fiction and the novel to explore the various ways Irish artists and writers have sought to give shape to national identity and the political geography of Irish life. Our primary intention will be to read and appreciate the individual works, but over the course of the semester we shall seek to compare the different visions of nation and culture those works present. Because of Ireland's exceptional history we may in fact discover that the central element of so much of its best art is precisely to imagine what it means to be Irish. In consequence, Irish works provide us a window through which to examine the relation between art and politics, imagination and the nation. Readings will range from John Ford's *The Quiet Man*, to poems by Seamus Heaney, W.B. Yeats and Eavan Boland, to fiction by Edna O'Brien, John McGahern and James Joyce. Assignments include four short essays, several in-class presentations, and a final exam.

ENGL 20523. The Hidden Ulster

(3-0-3)

This course introduces students to the literature, language, culture and history of Ulster in Ireland and confronts the stereotypes of binary opposition that commonly mark the region. Through close textual readings of literary texts from the seventeenth century onwards, we discuss and interrogate the literary, religious, cultural and linguistic forces that shaped identity in Ulster from the colonial period onwards and explore the shared heritage of both communities —Irish/English, Catholic/Protestant, Native/Planter. This course will suit English majors and those interested in the study of identity formation and competing cultural ideologies. No prior knowledge of Irish is required for this course. All texts will be in translation.

ENGL 20524. Great Irish Writers

(3-0-3)

The early modern period (sixteenth to late-eighteenth centuries) is a time of English conquest in Ireland. It is therefore a period of cumulative crisis for the Irish and is important in the formation of their identity. We will read closely a selection of texts, both prose and poetry, representative of various facets of this crisis and of Irish responses to them. All texts, originally written in Irish, will be read in English translation. The material provides interesting contrasts and comparisons for those who have already studied some Anglo-Irish literature (we will in fact read some English writing on Ireland in this period) and it will also be of interest to students of Irish history. We will supplement the material with readings from the work of historians on early modern European nationalism in order to place it in its wider context. In addition, we will examine some recent work on the interface between language, literature and anthropology in order to deepen our cultural understanding of the texts we are studying.

ENGL 20525. Victorian Irish Literature

(3-0-3)

The nineteenth century was a dynamic period for Ireland and writers from a many different backgrounds offer a range of perspectives on these changes. The central works of the class reflect diverse ideas on Irish and British history and literature and will provide a frame for debate and discussion of violence and social change, sexuality, economics, and politics during the Victorian period. Readings will include works from a variety of genres including: Somerville & Ross, Oscar Wilde, Robert Louis Stevenson, W.B. Yeats, Sir Arthur Conan Doyle, Matthew Arnold, and James Clarence Mangan. Course work will include several brief essays and a research paper.

ENGL 20526. Writing Nations: Defining Englishness and Irishness in Victorian Era Literature

(3-0-3)

This course seeks to counter the view of English and Irish literature as unrelated during the Victorian period by exploring how both Irish and English writers of the period engage in the process of defining their respective countries and cultures. Certainly, in the Victorian Era defining Ireland's relationship to England was

anything but simple. What becomes apparent by exploring Irish and English attempts to write about their respective nations is not only the divergence in ways Irish and English writers characterized the relationship between the two countries but also how the process of defining Irish and English realities ultimately took different forms. Therefore, this course will not only explore how individual writers go about writing "nations" but how the forms these writings take also reveal certain intersections and divergences between what characterizes Irishness and Englishness.

ENGL 20531. Irish America

(3-0-3) Darcy

This course is an opportunity to see the United States and its culture from a new, sidelong perspective and to sample the rich Irish literary tradition. Emigration to the United States has been a major theme for Irish literature since the 18th century, when famine forced masses of Irish people to board the "coffin ships" and cross the Atlantic in the hope of a better life, a phenomenon treated in novels and plays by writers like Brian Moore, Brian Friel, Joseph O'Connor and Frank McCourt. Today, in an era of cheap flights, Skype and immigration control, moving Stateside has a very different slant, as we shall see from the poetry of Paul Muldoon and Vona Groarke. Finally, through works like *The Butcher Boy* and *The Commitments*, we'll look also at the export of North American culture to Ireland, where that culture has variously been seen as a route to escapism, a means to rebel or a temptation to sin.

ENGL 20533. Performing Irishness: A Century of Irish Drama

(3-0-3)

As members of a school whose sports teams are called the "Fighting Irish" and whose mascot is a leprechaun, Notre Dame students are no strangers to performances of Irish stereotypes. Yet these types of performances extend far beyond the football field, and have histories of which many Domers are unaware. In the 19th century, the "stage Irishman" was a popular comic figure on the British and American stage. Drunken, fiery-tempered, and full of blarney, the stage Irishman represented a popular and enduring stereotype of what it meant to be Irish. This course will examine how Irish playwrights of the 20th and 21st centuries have reacted to the stage Irishman in creating their own versions of Irishness: sometimes by accepting (or cashing in on) the popular stereotype and sometimes by challenging it. Students will read works by some of the best-known Irish playwrights: W.B. Yeats, Sean O'Casey, and Brian Friel, while also exploring the work of some less familiar playwrights, like Lady Augusta Gregory and Dion Boucicault. Class participation will be a vital part of this course as students interpret, stage, and act out portions of plays, both as a regular part of class discussion and as a graded group presentation. Students will also be required to write three short response papers (2 pages each) and one longer paper (7–10 pages) on a text or production of their choice.

ENGL 20534. The Irish Short Story

(3-0-3)

This course introduces students to the themes, motifs, approaches and various forms common to the Irish short story as well as the critical debates associated with the genre. We begin with a survey of the literary history and cultural politics of Ireland in the nineteenth century and the emergence of the Irish short story and compare it to the American and French short story, before considering the relationship between folklore and literature and the origins of the modern short story form. Having discussed various theories of the short story, we proceed to examine the interactive relationship between orality and print culture, tradition and modernity, native and foreign, natural/authentic and artificial/other. Among the authors we read in detail are: George Moore, P.H. Pearse, James Joyce, Pádraic Ó Conaire, Máirtín Ó Cadhain, Frank O'Connor, Sean O'Faolain, Liam Ó Flaithearta/Liam O'Flaherty, Seamus Ó Grianna, Seosamh Mac Grianna, Angela Bourke, Samuel Beckett, Máire Mhac an tSaoi, Pádraic Breathnach, Seán Mac Mathúna, Micheál Ó Conghaile, Alan Titley, Dara Ó Conaola and Eilís Ní Dhuibhne. Stories are read primarily as literary texts that shed light on evolving cultural, political and social conditions and provide incisive insights into the

Irish literary and cultural tradition. This course is an ideal introduction to literary criticism and cultural studies. No prior knowledge of Irish or Ireland is required. All texts will be available in English.

ENGL 20535. Modern British Poetry

(3-0-3)

A survey of British poetry and poets of the first half of the twentieth century.

ENGL 20536. Narrating the Mind in Modern Fiction

(3-0-3)

Anyone who has ever engaged with a great work of literature knows that it opens up new avenues of thinking. But how does one think about thinking? Better yet, how does one write about thinking? We will ponder these questions as we take a careful look at works from perhaps the most recognizable figures of modernism: Marcel Proust, Dorothy Richardson, James Joyce, and Virginia Woolf. As we investigate these authors' preoccupation with thought processes, we will think about the texts in relation to various psychoanalytical attempts, beginning with Sigmund Freud's, to conceptualize consciousness and unconsciousness (How do we distinguish the self from the other? Do our conscious and unconscious selves involve our intellect, emotions, sensations, perceptions, and/or dreams?). We will invade characters' minds to ask: How does one transfer an intangible thought to paper? How does one write a male's consciousness compared to a female's? What about an adult's compared to a child's? Can sentence structure, punctuation, and word choice articulate these differences? Finally, we will expand our inquiry to another media form to question: How does one film consciousness?

ENGL 20537. Introduction to Irish Studies

(3-0-3)

Corequisite: IRST 32375

This course will provide an outline of the field of Irish studies. We will look Ireland its internal and external relations through an interdisciplinary lens that connects literary, sociological, political, historical, and economic perspectives. We explore several key elements of the study of Ireland using critical scholarship, archival information, and a range of creative works including films (from *The Quiet Man* to *Once*), literature (from Bram Stoker and Oscar Wilde to Nuala Ní Dhomhnaill and Seamus Heaney), and music (from 18th-century harpist Turlough Carolan to U2 and Dropkick Murphys). This course is open to students at every level and there are no prerequisites for this class other than an interest in Ireland and the Irish. While this is an introductory class, the interdisciplinary focus will also benefit students who have studied Ireland in other courses. Requirements will include brief response papers, a midterm and final exam.

ENGL 20538. The Irish Novel

(3-0-3)

This course focuses on novels, memoirs and autobiographies that deal with Ireland, the Irish-language, folklore, history and cultural politics. Starting with the causes for the relatively late emergence of print culture in the Irish-language, we discuss the cultural, political and ideological forces that shaped these literary genres during the Irish Revival, the Free State and the post WWII period. We examine the impact of various literary movements on the Irish-language novel and use the memoirs and autobiographies to examine key moments in Irish cultural life as framed in the controversies surrounding Michelle Smith, Cathal Ó Searcaigh, Máire Mhac an tSaoi and Hugo Hamilton. All texts will be read in English and no prior knowledge of Irish is required, but extra credit/classes are available for students willing to read the texts in their original format (See Language Across the Curriculum). Among the authors and texts to be studied are the following: *Séadna, My Own Story, Exile, The Islandman, Twenty Years A'Growing, Peig, When I Was Young, The Poor Mouth, Schnitzer O'Shea, Cré na Cille, Lead Us Into Temptation, Lovers, A Woman's Love, Speckled People, Light on Distant Hills, Same Age as the State, Triple Gold, Remembering Ahanagrán.*

ENGL 20539. Ghosts, Ghouls and Other Victorian Nasties: British and Irish Gothic in the Victorian Period

(3-0-3)

Although the Gothic is most often associated with the Romantic period, the Victorian period was marked by a revival in interest in Gothic themes and literary strategies. This course explores how Victorian writers refashioned the Gothic to reflect the anxieties of their own period, creating in particular distinct domestic and urban versions of the Gothic. Texts will include Emily Bronte's *Wuthering Heights*, Joseph Sheridan Le Fanu's *Carmilla*, Mary Elizabeth Braddon's *Lady Audley's Secret*, Bram Stoker's *Dracula*, Robert Louis Stevenson's *Dr. Jekyll and Mr. Hyde*, and Oscar Wilde's *The Portrait of Dorian Gray* among others. Students will become familiar with Gothic influences in the art and architecture of the period.

ENGL 20540. Samuel Beckett: What is Literature? What is Philosophy?

(3-0-3)

We will read Beckett's prose, poetry and drama in a (roughly chronological) conceptual or thematic way. Our main question will be how and why can we classify Beckett's text as literary or philosophical, and we will investigate this question through Beckett's own interest in philosophy (e.g., his first poem "Whoroscope" which deals with Descartes) as well as through some philosophers' interest on Beckett (Deleuze, Badiou, Adorno, etc.). We will read some of his most famous works (e.g., *Waiting for Godot, Endgame, Molloy, Happy Days*), as well as some less known ones (e.g., *Company, Rockaby, Worstward Ho*). Finally we will look at some performances of his work, taken from the collection *Beckett on Film*. Considering his work as a major turning point in literary production, as well as a main reference in the history of 20th-century thought, we will finally try to understand what is literature after him, and how does the literary event invites us to think.

ENGL 20541. Anglo-Irish Identities

(3-0-3) Fox

Observers of the political and cultural problems which continue to plague relations between the modern Irish state, six counties in the north of Ireland, and Great Britain cannot fail to note that the unresolved differences that have festered over the last two hundred years had their roots in the traumas of the preceding centuries of English colonialism in Ireland. Focusing on that crucial period in Irish culture, this course will explore the complex and contested cultural, political, and ideological identities of a group we have come to call the Anglo-Irish. How did they imagine themselves as a community, define themselves as a group? How did they differentiate themselves from others? We will examine these questions of identity and difference in several exemplary writers, beginning with Giralduus Cambrensis and with Edmund Spenser, author of *A View of the Present State of Ireland* (1596) composed during the initial phase of Tudor colonialism and published posthumously in 1633. We will move onto works by key figures who have dominated our understanding of eighteenth-century Ireland, including selections from Jonathan Swift, George Berkeley, Edmund Burke and Maria Edgeworth. We will conclude the course with some reading of Oscar Wilde. Students can expect a term paper, a midterm, and a final.

ENGL 20545. The Modern British and Irish Short Story

(3-0-3)

This course will trace the generic development and changing structures of the short story form—there is more involved here than mere brevity—and will also provide a series of readings from the major British and Irish short story writers from the twentieth century. We will read from the short story theories of these individual authors, where such theory exists, and will examine the important connections between the form and the idea of a "national" literature. Writers will include: James Joyce, Frank O'Connor, Liam O'Flaherty, Mary Lavin, Kate Roberts, D.H. Lawrence and Virginia Woolf.

ENGL 20576. Victorian Poetry

(3-0-3)

This course is designed to introduce students to Victorian poetry and culture. We will study poems by canonical figures such as Elizabeth Barrett Browning, Robert Browning, Alfred Tennyson, Gerard Manley Hopkins, Matthew Arnold, Oscar

Wilde, A.C. Swinburne, Thomas Hardy, D.G. Rossetti, and Christina Rossetti. We will also look at poems by lesser-known figures such as Amy Levy, Alice Meynell, Charlotte Mew, Lionel Johnson, Augusta Webster, and Michael Field. Selections from Victorian prose will help us understand all of these poems in relationship to nineteenth-century developments in literary and aesthetic theory. This course will also pursue several organizing themes and topics that preoccupied much of the Victorian imagination, such as social reform, the woman question, the crisis of faith, evolutionary science, empire, self and society, aestheticism, and modernity. Learning goals: Students in this course will learn to recognize the basics of poetry, such as rhyme, meter, and the different conventions of poetic forms. This course will also provide students with the analytical tools and techniques they require in order to recognize general literary devices, such as symbolism, imagery, voice, and figurative language. Students will not only read poetry in its historical context, but will also focus on how poetry—through aesthetic, formal, and intellectual innovations—transformed this cultural landscape that is the Victorian era. The range of assignments and classroom activities are designed to further foster students' critical thinking, reading, and writing skills. Regular participation, including classroom discussion and four short in-class writing assignments (2 pages maximum), teach students to position themselves within competing interpretations and arguments. Two formal papers (8–10 pages) give students an opportunity to apply their analytical and rhetorical skills as they develop their own interpretation of a text as situated within the relevant historical and cultural contexts. Ideally, this course will not only inspire students' appreciation for Victorian poetry but also for the importance of literature and writing in their own lives. Students will learn to identify themselves as historically and intellectually situated interpreters who navigate and participate in competing discourses on a daily basis. Course requirements: regular participation, 2 papers, a mid-term exam, and a final exam. Required texts: *The Broadview Anthology of Victorian Poetry and Poetic Theory*, the Concise Edition.

ENGL 20601. Early Modern American Fiction

(3-0-3)

An examination of selected literatures written between the Civil War and World War II, specifically focusing on how this fiction shows the impact of economic and technological transformations on religious beliefs, conceptions of human identity, and work environments and men's and women's places in them.

ENGL 20602. Readings in Nineteenth-Century American Literature

(3-0-3)

This course focuses on major literary figures and works of 19th-century America, focusing chiefly on the two decades before the Civil War, a period often hailed as the first flowering of a genuine American literature.

ENGL 20604. American Fiction

(3-0-3)

An exploration of selected novels, written by a variety of American authors, that consider the question "what characteristics and values define American identity?"

ENGL 20605. American Literature: Varieties of Religious Experience

(3-0-3)

Many American authors are skeptical toward religion, yet they are, nonetheless, preoccupied with the religious experience. This course explores the relationship between these attitudes in American literature.

ENGL 20607. Religious Imagination in American Literature

(3-0-3)

A critical study of the religious and philosophical dimensions of selected American literary texts with a focus on literary forms, the history of ideas, and cultural and interpretive currents both traditional and modern. Students will be expected to write a series of brief, incisive critical papers.

ENGL 20608. The Real Contemporary Novel: American Fiction 2000–Present

(3-0-3)

Many contemporary fiction classes conclude with works published around the time that you were born in the mid-to-late 1980s. This course focuses on novels published during the decade in which you are living and examines the interpretive difficulties raised by such works. Without being able to rely on an established history of scholarly criticism or their place among the so-called "great books" of civilization, the reader of contemporary novels must actively consider why these works are worth studying as well as how they function. The major aims of this course are to introduce you to these exciting novels and to provide you with the critical and interpretive framework for determining what contemporary literature is and why it matters. We will focus on eight novels and novellas examining the intersections between self and society and between literary art and the popular cultures of film, television, hip-hop, rock, and comic books. Readings include novels and novellas by Paul Auster, Don DeLillo, Dave Eggers, Jonathan Safran Foer, Nicole Krauss, Jonathan Lethem, David Markson, and Toni Morrison. The course also includes a screening of the film adaptation of Foer's *Everything is Illuminated*. Because this course is intended for non-majors, each unit will include introductions to the basic tools of literary study including close reading, how to write a literary argument, how to incorporate secondary criticism and theory, and the basic principles of film and television. Course requirements include two 5- to 7-page papers and one 7- to 10-page paper.

ENGL 20610. From Work to Text: Representing Labor in Twentieth-Century America

(3-0-3)

This course is designed to introduce you to the ways in which American novelists, poets, artists, musicians, and filmmakers have attempted to represent labor and labor issues throughout the twentieth century. In traditional approaches to literary studies, labor is often subsumed within broader discussions of class or literature's general engagement with political or social questions. This course, on the other hand, will focus as much as possible on direct representations of actual laboring bodies and the labor movement and their evolution throughout the twentieth century. Our engagement with these issues will focus specifically on the relationship between labor and American identity and the ways in which representations of labor raise questions about the literary treatment of race and gender throughout the same time period. Although the primary objective of the class will be to get you to bring these issues to bear on literary interpretation, the course will also have to include a very basic introduction to American labor history. This will include a discussion of recent phenomena, such as the WGA strike, which bring the relationship between labor and culture into sharp relief, as well as the cultural repercussions of labor in its current form under globalization. The texts we will look at will include novels by Upton Sinclair, John Steinbeck, Jack London, and Richard Wright; labor songs by Joe Hill, Woody Guthrie, and Pete Seeger; films such as *Harlan County U.S.A.* and *Modern Times*; and poetry by Langston Hughes and Tillie Olsen.

ENGL 20612. The News from Poetry: What Contemporary Poetry Is Up To

(3-0-3)

This course will be an exploration of the themes and styles of American poetry from post-World War Two to the present. We will explore the ways the poets respond to the cultural influences of their time, as well as the conversation they have within the poetic community. To have a better sense of how poems are made, students will be expected to read as well as attempt to write in the style of some of the poets we'll study. It is my hope that sometime during the semester, we will have live poets visit the class to be interviewed by the class regarding their work, and their take on the contemporary poetry scene. Students will be graded on their short response papers, a small portfolio of the poems they write, their prep work for the interviews (if this works out) and a long final paper.

ENGL 20613. American Short Story

(3-0-3)

A carefully detailed look at the history of a particular form of American narrative. Along the way we will construct a methodology for reading stories, and a series of critical questions that can serve to open a story to our understanding and appreciation. At times we will give our attention to one or two remarkable stories by a particular writer, stories like Herman Melville's *Bartleby the Scrivener* and F. Scott Fitzgerald's *Winter Dreams* and Stephen Crane's *The Open Boat*. At other times we will work through a collection of stories to highlight the aspects of a writer's particular vision and craft. These collections might include John Updike's *Pigeon Feathers* and Ernest Hemingway's *In Our Time* and Nathaniel Hawthorne's *Mosses from an Old Manse* and Richard Brautigan's *Trout Fishing in America*.

ENGL 20614. Twentieth-Century American Fiction

(3-0-3) Brogan

In this course we will study the interconnections among six of our best fiction writers from the 20th century. Although these six authors could erroneously be divided along the lines of gender and race, as well as by periods (roughly pre- and post-World War II), the sometimes painful connections among these various authors and these texts in particular reveal the dynamic aesthetic and moral development of American fiction from Fitzgerald's *The Great Gatsby* to Morrison's *Jazz*. Texts: Scott Fitzgerald, *The Great Gatsby*, *The Jazz Age*; Ernest Hemingway, *The Sun Also Rises*, *The Garden of Eden*; William Faulkner, *The Sound and the Fury*; Zora Neale Hurston, *Their Eyes Were Watching God*; Alice Walker, *The Color Purple*; Toni Morrison, *Sula*, *Jazz*.

ENGL 20620. Coming of Age in the American Novel

(3-0-3)

What does it mean to "come of age" in America? How do we know when we have become adults? How have twentieth-century American novelists depicted the struggle of leaving childhood behind and embracing new responsibilities? What are the consequences of growing up? In this course we will approach how select groups of American youth struggle to come to terms with what it means to be an adult in America; from Sylvia Plath's harrowing narrative of a gifted young woman's psychological breakdown in *The Bell Jar* to Ernest Hemingway's fictionalization of post-WWI anomie in his classic *The Sun Also Rises*. We will explore this theme in novels by authors including Horatio Alger, Jr., Ralph Ellison, Toni Morrison, and Junot Díaz in order to better imagine how different social, racial and economic groups deal with what it means to grow up in America. Course requirements include four short response papers (2 pages each), a midterm and final exam, presentation, and final research paper (8–10 pages). Films will include *The Graduate*, *Igby Goes Down*, *Harold and Maude* and *Junio*.

ENGL 20626. American War Literature

(3-0-3)

Beginning with Mary Rowlandson's captivity narrative and ending with Tim O'Brien's *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

ENGL 20627. Violent Modernisms

(3-0-3)

Ezra Pound's battle-cry to "make it new" encapsulates one of the defining features of Modernism in the early 20th century. The hope was to tear down the old ways of writing, painting, building, and thinking, and to erect in their place something entirely new. As a result, violence—whether political, social, or artistic—constitutes the subject matter and artistic philosophy of many authors and artists at the time. For this course, we will think through the purpose of violence in aesthetic practice and attempt to understand its usefulness on its own terms. Readings will include works by canonical Anglo-American Modernist writers such as Ezra Pound, Gertrude Stein, Virginia Woolf, and Ernest Hemingway. We will also consider the legacy of "violent Modernism" and its impact on later authors who similarly feel the need to "make it new." In particular, we will look at those for whom violent social and political transformations are part and parcel of artistic

change. These other authors and texts include Richard Wright's *Native Son*, J.G. Ballard's *Empire of the Sun*, Gayl Jones' *Corregidora*, and Ronald Ruiz's *Happy Birthday Jesús*.

ENGL 20701. African-American Literature

(3-0-3)

A survey of selected seminal works of African-American literature.

ENGL 20707. American Novel

(3-0-3)

Novels from Hawthorne to Morrison.

ENGL 20708. The City in American Literature

(3-0-3)

Literary representations of the city and social identity in American texts from the 1890s to the present, including Riis, Dreiser, Wharton, Sinclair, Yeziarska, Wright, Paley, and Cisneros, as well as contemporaneous nonfiction and films.

ENGL 20709. God and Evil in Modern Literature

(3-0-3)

A study of selected modern writers whose concern with God and evil, faith and despair, and the reality and significance of suffering animates their writings. In considering the relationships between the religious imagination and experience and its expression in literature, we will discuss the ways in which writers envision the nature and purpose of narrative and of language itself—as efficacious and even sacred or as ineffectual. Before dealing with particular modern writers, we will reflect on the presuppositions of the Bible and medieval thought and literature in relation to truth, faith, and narrative. Readings will be selected from the following: St. Francis, *Little Flowers*; Dostoevsky, *The Brothers Karamazov*; DeVries, *The Blood of the Lamb*; Melville, *Billy Budd*; Greene, *The Power and the Glory* or *The End of the Affair*; Flannery O'Connor, *Everything That Rises Must Converge* or *The Violent Bear It Away*; Hammarskjöld, *Markings*; Roth, *Job*; Hawthorne, *Selected Tales*; Wiesel, *Night*; and narratives by Primo Levi, Dinesen, and Updike.

ENGL 20710. Latino/a Literatures: Stories of New America

(3-0-3)

A survey of selected 19th- and 20th-century Latino/a American writings.

ENGL 20712. Caribbean Women Writers

(3-0-3)

A sampling of novels written by Caribbean writers, with a particular emphasis on such themes as colonization, madness, childhood, and memory.

ENGL 20714. Contemporary American Literature

(3-0-3)

What does it mean to write fiction in the "naughts" (2000–2010)? In the age of MySpace, RSS feeds, *American Idol*, and YouTube, is the term "fiction" even valid anymore? Or, for that matter, books? In this class, we will read several novels published since January 2001. In addition to covering the usual topics (plot, character relationships, themes, etc.), we'll also think about what it means to write fictions, to write novels, in a world, in an America, that is increasingly being parsed into smaller and smaller pieces. A partial list of texts include (subject to change): Mark Danielewski, *Only Revolutions: A Novel*; Jennifer Egan, *Look at Me*; Joshua Ferris, *Then We Came to the End*; Dinaw Menegstu, *The Beautiful Things This Heaven Bears*; and Dana Spiotta, *Eat the Document: A Novel*. We'll also view excerpts of television shows, movies, and other media, as well as attend some campus literary events. Required work: two short essays, midterm, final, occasional quizzes.

ENGL 20715. Modern American Poetry (1945–1985)

(3-0-3)

In his masterpiece, *A Season in Hell*, French visionary and boy-genius Arthur Rimbaud proclaimed: "One must be absolutely modern." This remained at the core of the varied, radical artistic explorations that form the category "Modern Poetry." In the late 19th century and the first half of the 20th century, to be modern meant to keep up with and try to respond to vertigo-inducing, often brilliant

and often shocking changes in technology and politics, including the invention of trains and planes, films and cars, and the horrific violence of two world wars. We will study how the intense and greatly varied impulse of modern poetry took shape in the U.S., from Walt Whitman through Modernism, to the upheavals of the 1960s. In the process, we will discuss such still-pervasive questions as what is the value of the new? Must the new always be shocking? Can art be political? Should it be? We will also problematize our own positions as historians of this movement. What thinkers, writers and administrators have determined our views of these poets? Is poetry still “modern”? What does “modern” mean today?

ENGL 20716. 20th-Century American Individualism
(3-0-3)

This course will look to a selection of American literature over the 20th century to explore different ideas about what it means to be an individual in America. Examples will range from the community-oriented individuals of Steinbeck's *The Grapes of Wrath* to the confessional poetry of Sylvia Plath to postmodern ideas of the individual as an unstable, socially constructed entity. We will also consider examples of what happens to individuals who are not allowed a place in mainstream society in works like Richard Wright's *Native Son* and Nella Larsen's *Passing*. Our ideas about how different kinds of individuality are created will be informed by these text's formal elements as well as their social and political positions.

ENGL 20720. U.S. Latino/a Poetry, Art and Film
(3-0-3)

The literature of Latina/o immigration and migrancy brings together a range of contemporary concerns, from identity, to the transnational, to definitions of the literary. How does international movement inflect notions of American identity? How do writers create and describe communities in constant movement? These are only two questions that can be posed to the literatures of Latina and Latino transnational and intra-national movement. In this course, we will read a range of recent materials dealing with immigration between Mexico and Latin America and the United States, and with intra-national migrancy. Key texts will include, Luis Alberto Urrea's *The Devil's Highway*, Julia Alvarez's *How the Garcia Girls Lost Their Accents*, Cristina Garcia's *Dreaming in Cuban*, Tomas Rivera's *and the Earth did not devour him*, and Elva Treviño Hart's *Barefoot Heart: Stories of a Migrant Child*. In addition, we will draw upon various critical readings focusing on transnationalism, displacement, and new theories about contemporary globalization. Students will write three short essays and a final exam, and will be required to participate actively in class.

ENGL 20721. Modernist Poetry and the Modern Novel
(3-0-3)

“We had the experience, but missed the meaning.” So wrote T.S. Eliot, reflecting on a 30-year period that saw virtually the entire Western world experience a simultaneous and monumental spiritual, emotional, and intellectual crisis. Eliot's is just one of a tremendous variety of literary responses to a radically changing world that makes up the period called “modernism,” in which both the world and how it was written about changed dramatically. This involves engagement with questions that are central to everyone's life—from the nature of God, love, friendship, race, sex, gender, and war, to drinking, laughing, shopping, cows, crabs, and puppy dogs (seriously). We'll be reading a variety of texts—both British and American, poetry and fiction, bridging the period between the two Great Wars (Yeats, Pound, Williams, Loy, Eliot, Ford, Fitzgerald, Hemingway, Forster, Woolf, Rhys)—that, for various reasons and in myriad ways, experiment with preexisting conventional notions of genre, narrative, point of view, and language. By engaging these texts alongside short readings by the authors about their own writing, the goal of the course is to gain confidence working through texts that might otherwise be too intimidating to read in other contexts by tending to basic questions first: what did these writers and poets say themselves that they were doing, and why did they do it? Such basic questions will provide the necessary background against which the innovation and astonishing beauty of these works can take shape. As importantly, you will be introduced to an interpretive framework through which to understand literature and to think about why it matters in terms of larger social, cultural, and even personal contexts. No prior knowledge is assumed. We will cover in class

methodological instruction devoted to the skills such as poetic scansion, close reading, note taking, etc. that are necessary to read, interpret, and discuss literary texts in terms of their formal elements as well as their connections to larger social, cultural, and literary contexts. The broader goal is to develop new ways of thinking about human experience and especially language that will remain long after the surface data of names, dates, and terms has faded, and to gain the confidence and skills necessary to make you feel like you can read, and think through, anything.

ENGL 20722. Black Arts and the Diaspora
(3-0-3)

This course offers a survey of black diasporic artistry. At the same time, it answers the question, “who constitutes the black diaspora?” in unique ways. We will focus primarily on this conversation's development from the 1920s up to the present through poetry, prose fiction and nonfiction, visual art, film, and television. Attention will be devoted to how these different genres and media frame what is known (or unknown) about the black diaspora. Moreover, we will consider how these media and genres influence political activism in the black diaspora.. Due to the diversity of the materials covered, the themes will give the course its unity. Students will be urged to follow a particular theme (or two) throughout the course. Some of these themes might include race, gender, class, the body, and leadership. Some of the artists and intellectuals in this survey will include: African-American writers Zora Neale Hurston, Langston Hughes, and Nathaniel Mackey; Trinidadian-Canadian poet M. Nourbese Philip; musicians like Nigerian artist and activist Fela Kuti; Martinican philosopher and psychoanalyst Frantz Fanon; orator and activist Martin Luther King, Jr.; the Haitian-Puerto Rican visual artists Jean-Michel Basquiat; and the visual artist Kehinde Wiley. Class participation is paramount. Students will also write reader response papers and research essays.

ENGL 20725. Native Perspective in American Literature
(3-0-3)

A survey of Native American “perspective” in selected works of American literature, written by Caucasians and non-Caucasians, dating from the 17th to the 20th centuries.

ENGL 20759. The Democratic Muse: Whitman and the shaping of the American Voice (Contemporary American Poetry)
(3-0-3)

How do poetry and the concept of American democracy blend? Using Emerson and Whitman as a starting point, this course will attempt to connect the dots. Poets we will be reading will include Emerson, Whitman, Neruda, June Jordan, Ginsberg, and others. We will land somewhere at the start of the present era, with the poets who have their beginnings with the slam: Paul Beatty and Patricia Smith, among others. Students will be responsible for writing reports of the books read and the era they represent (some of this may be in the form of a team video report), and for a long paper tracing either the influences that shaped one of the poets studied or on one aspect presented by our readings.

ENGL 20760. Twentieth-Century American Drama
(3-0-3)

This class will focus on key works of modern and contemporary American drama from three plays by Eugene O'Neill (*Desire Under the Elms*, *The Iceman Cometh*, *Long Day's Journey into Night*) to Nilo Cruz's Pulitzer Prize winning 2003 play *Anna in the Tropics*. In addition to critical readings and selected European plays on reserve, focal playwrights include Edward Albee, Sam Shepherd, Paula Vogel, Amiri Baraka, Luis Valdez, David Mamet, August Wilson, Josefina López, Yellow Robe, Anna Devere Smith, Eve Ensler, and Moisés Kaufmann. Requirements will include group-staged scenes, journal entries on selected plays, and three 4-page papers. In addition, students are required to attend one campus play over the course of the semester and write a written critique of the production and performance.

ENGL 20790. Asian-American Literature
(3-0-3)

This course will explore the development of Asian-American literature from the 1800s to the present, focusing on writers of Chinese, Filipino, Indian, Hmong,

Japanese and Korean descent. Discussions will focus on questions of race/ethnicity, identity/representation, nation and exile. Primary texts, including novels, short fiction, poetry, theory and film will be supplemented by critical articles. Some works to be discussed will include Carlos Bulosan's *America Is In the Heart*, Jessica Hagedorn's *Dogeaters*, Maxine Hong Kingston's *The Woman Warrior*, Faye Ng's *Bone*, and John Okada's *No-No Boy*, in addition to other texts.

ENGL 20802. Twentieth-Century Ethnic American Novels
(3-0-3)

An exploration, based on the theme of memory, of several ethnic American novels, specifically the ways in which remembering one's own or one's ancestors' past becomes part of one's self-identification as an ethnic American.

ENGL 20803. A Survey of Black Women Writing in America
(3-0-3)

This course is designed to familiarize students with the diverse concerns of black women's writing from the first novel written in 1854 through the present.

ENGL 20806. Latin American Images of the United States
(3-0-3)

Drawing upon a wide variety of sources—novels, essays, poems, travel literature, social science texts, film, art, etc.—a survey of Latin American views of North American society, customs, politics, and individual character, with a particular emphasis on United States interventionism.

ENGL 20807. The Harlem Renaissance
(3-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in the '20s and early '30s and the writers it fostered: Hughes, Hurston, Toomer, Redmon Fauset, Larson, and Thurman.

ENGL 20808. Latino- and Latina-American Literature
(3-0-3)

Studies of Latino and Latina authors, including Chicano, Caribbean, and South American.

ENGL 20809. West Indian Poetry
(3-0-3)

Poems from the many languages and cultures of the Caribbean region.

ENGL 20811. Women in the Americas
(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

ENGL 20813. Latino/a Poetry
(3-0-3)

This course will focus on several prominent contemporary Latino poets whose work has enriched and diversified the canon of American poetry in the last 30 years. Among them are such established and acclaimed authors as Gary Soto, Lorna Dee Cervantes, Pat Mora, and Martín Espada. Because Latinos are not homogenous, emphasis will be given to these poets' diverse ethnic and cultural origins. In this regard, one important component of the course is the various ways that Latino poets respond to the spiritual and the sacred. Other topics to be discussed include social justice, the family, identity (in its multiple forms), and, of course, poetics. Readings will be assigned in individual poetry collections and in one anthology.

ENGL 20814. Introduction to African-American Literature
(3-0-3)

A survey of 300 years of African-American literature.

ENGL 20815. Writing Harlem's Americas
(3-0-3)

This course will serve as an introduction to writers of The Harlem Renaissance, with an emphasis on how black writers viewed "the black experience" in both within the black community and the larger American culture.

ENGL 20818. Thinking Through Crisis: Reading 20th- and 21st-Century African-American Literature and Cultural Theory
(3-0-3)

What does it mean to be in a "crisis?" We live only a few years after a natural disaster ravaged the southern coast of the United States; we live only a few years after incidents of racial violence and judicial mishaps culminated in national protest; finally, these issues have been swallowed up by our worry over an economic breakdown that has been called a mere downturn by some, a recession by others, and even fewer have called it a depression. But none of these descriptions help us understand what we mean by "crisis" and what potential there is to think and act in such turbulent times. The same sorts of issues troubling our present also troubled Americans living in the Great Depression. African-American writers of that period wrote novels, short stories, autobiographies, historiographies, poetry and other literary pieces that were both aesthetically rich and experiments in thinking critically about these issues. This course simply asks: How can Depression-era African-American literature help us understand what it means to think during a crisis, and see the word as a concept, not just a media buzz word? Readings will include canonical authors like W.E.B. Du Bois, Ida B. Wells, Zora Neale Hurston, Langston Hughes, and Carter G. Woodson, studied alongside artistic and theoretical responses to Hurricane Katrina, the Jena 6, and other recent events.

ENGL 20819. "Black Arts": Figuring the African Diaspora
(3-0-3)

This course offers a survey of black diasporic artistry. At the same time, it is an ongoing analysis of how these artists asked, "what constitutes the African diaspora" in divergent and convergent ways. The main goal of the course is not simply to label certain artists as part of this diasporic formation, but to understand how artists reflected upon their participation in it (and, in some ways, outside of it). We will focus primarily on this conversation's development from the Interwar period of the twentieth-century to the turn of the twenty-first century through poetry, prose fiction and nonfiction, film, television, and dance. From the United States, we will look at how creative intellectuals like the poet Langston Hughes, dancer and anthropologist Katherine Dunham, novelist and anthropologist Zora Neale Hurston, fiction writer and essayist Richard Wright, and journalist Alex Haley used art to understand their relationship to black peoples in the Caribbean, Europe, and Africa, along with key events impacting those different geographies. But the course will also consider how black creative intellectuals outside the United States reflected on their relationship to the diaspora. These will include Algerian philosopher Frantz Fanon, Cuban poet Nicolás Guillén, Nigerian musician Fela Kuti, and Pulitzer-Prize winning poet Derek Walcott. In exploring different conceptions of diaspora, we will encounter other themes including the idea of overlapping diasporas, black nationalism, the body, and the significance of translation to cultural solidarity and difference.

ENGL 20820. Contemporary Black Literature
(3-0-3)

A survey of late 20th century black literature in the United States and its relation to other ethnic literatures.

ENGL 20821. Latino Literatures
(3-0-3)

A survey of Latino fiction, poetry, and other literary works.

ENGL 20838. Twentieth-Century American Feminist Fiction
(3-0-3)

Close readings of major 20th-century novels, written by both men and women, which may be described as feminist.

ENGL 20840. Performing Personality: Democratic Selves in the Public Sphere

(3-0-3)

From the Salem witchcraft trials to the 1960s, how Americans created, discovered, and performed their “American” identities through public social formations such as audiences, traditions, political orders, reform movements, churches, friendships, and cities.

ENGL 20900. Postmodern Fiction

(3-0-3)

This course will explore some of the most playful and ingenious fiction of the late 20th century, drawing its inspiration from critic and author John Barth’s influential essay, “The Literature of Exhaustion.” We will first gain an understanding of the concept of postmodernism, before moving on to Barth’s essays and short stories. Next, we will read stories from one of the earliest and most influential postmodern writers, Argentinean Jorge Luis Borges. We will read a deceptively simple short novel by Barth’s ideal postmodern writer, Italian author Italo Calvino. We then move on to the predominantly French experimental fiction group, Oulipo, and will read a sample of the novels, stories, and poems they produced using inventive mathematical techniques and strict constraints. We will then consider the idea of self-conscious fiction, or metafiction, through a novel by Paul Auster. Lastly we turn to the short stories known as ‘flash fiction’ of Lydia Davis and Donald Barthelme. All foreign texts are translated into English. The course requirements include an in-class presentation on a topic related to the course materials, a midterm take home exam, one 5–6 page paper on common metaphoric themes, and one 5–6 page critical review. Students who have completed the University requirement in Italian may elect to register for a one credit Language Across the Curriculum discussion section. Students choosing this option will do approximately 10–15 pages of additional reading per week, in Italian, and complete brief reflection papers. The LAC discussion section will be graded on a satisfactory/unsatisfactory basis and credited to the student’s transcript. Up to three LAC credits may be applied towards a major or minor in Italian.

ENGL 20901. Performance Theory

(3-0-3)

This class will take a philosophical approach to drama and performance. We will look at theoretical texts by theorists such as Antonin Artaud (*The Theater and Its Double*), Peggy Phelan (*The Ontology of Performance*), Philip Auslander (*Liveness*), and Jacques Derrida (*The Theater of Cruelty and the Closure of Representation*). The class will serve as an introduction to the discipline of performance studies.

ENGL 20902. Introduction to Linguistics

(3-0-3)

Presumes no previous background in linguistics. We will begin the course with technical aspects of linguistics, such as phonetic transcription, morphology, and syntax, as a necessary foundation for examining the historical and structural development of the English language (including the varieties of contemporary American dialects). In the last half of the semester, we will consider the applications of linguistics to the study of literature and will conclude with the pedagogical implications to the teaching of English, especially if ethnic dialects (primarily, in this instance, ebonics) are considered. Assignments include a mid-term (30%), a final (30%), one long paper (20%), and several exercises (20%).

ENGL 20903. Introduction to Post-Colonial Literature

(3-0-3)

Traces the development of literatures from the former colonies of various empires, but principally the British and French.

ENGL 22514. Introduction to Irish Writers/Discussion

(0-1-0)

Prerequisite: ENGL 20513 (may be taken concurrently) or IRST 30371 (may be taken concurrently)

Co-requisite discussion section for ENGL 20513.

ENGL 27999. Special Studies

(V-0-V)

Independent study under the direction of a faculty member.

ENGL 30101. Introduction to Literary Studies

(3-0-3)

This course provides beginning English majors with experience in the analysis, interpretation, and appreciation of literary works of different kinds and eras. Texts assigned will vary from one section to another, but all sections will include attention to poetry and at least one other genre (fiction, drama, non-fiction prose). Frequent writing about works studied will introduce students to the practice of critical argument and consideration of how to read criticism as well as literature critically.

ENGL 30109. Migration and Identity in the New Ireland

(3-0-3)

In less than two decades, the Republic of Ireland has shifted from a relatively poor country with a high level of national, racial, and ethnic homogeneity to a country with the world’s fourth highest per capita income experiencing an exponential expansion of cultural diversity. One of the names used to describe this shift is “New Ireland,” and this course will discuss the cultural dimensions of this term. We will examine selections from contemporary Irish literature and film that contribute to this analysis and contextualize our discussions with legal, political, and economic approaches to Irish social issues. Class work will include several short papers, a long research paper, and an exam.

ENGL 30110. British Literary Traditions I

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This is an introductory survey of English poetic and prose texts written from the eighth to the mid-seventeenth century. We will study these literary artifacts as imaginative representatives of experience, as cultural maps, and as human messages-in-a-bottle, set afloat in the seas of time. As we read these selections composed in English from past centuries past, we will be looking for both familiarity and strangeness. We will also be forming a sense of the variety and differing uses of literary genres: epic and romance (*Beowulf* and *Sir Gawain & the Green Knight*); short story (Chaucer’s *Canterbury Tales* and the *Lais* of Marie de France); religious diary (excerpts from the mystical visions of Julian of Norwich in *Revelations of Divine Love*) and autobiography (from the first written in English, authored by Marjorie Kempe, a laywoman who records her business ventures, her negotiations of marital sex life, her adventures on pilgrimage, and her religious examination by the archbishop as a potential heretic). We will also read lyric poems from the Old and Middle English periods, and from the Renaissance and seventeenth centuries, including some of Shakespeare’s sonnets; political satire (excerpts from *Utopia*, a prose fiction authored by Sir/Saint Thomas More); and at least one play—possibly two—from the Medieval and/or Renaissance performing tradition. The semester’s literary pilgrimage will conclude by coming full circle, back to the epic revisited, with selections from Milton’s *Paradise Lost*. Regular short quizzes. Midterm & final examinations. Two short (5–10 page) essays, due at mid-term and end-term. Text: *The Norton Anthology of English Literature*, Vol. I, 7th edition.

ENGL 30111. British Literary Traditions II

(3-0-3)

Intensive survey of British writers and literary forms of the 18th and 19th centuries.

ENGL 30115. American Literary Traditions I

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Introduction to American literature from its beginnings through the Civil War, emphasizing important figures, literary forms, and cultural movements.

ENGL 30116. American Literary Traditions II

(3-0-3)

Introduction to American literature from the Civil War through the 20th century, emphasizing important figures, literary forms, and cultural movements.

ENGL 30120. Satire: Jonathan Swift to Jon Stewart

(3-0-3)

A study of literary satire from the early 18th century to the present with some attention to visual satire and current popular culture. Authors to be studied will certainly include Jonathan Swift, Alexander Pope, Voltaire, William Blake, Mark Twain, Dorothy Parker, Nathanael West, and probably one or more of the following: Aldous Huxley, Langston Hughes, George Orwell, Don DeLillo, and T.C. Boyle. Some of the questions we will consider are: Does great satire, which often highly historical, complicate ideas of art as timeless or universal? How does satire differ from comedy and irony, while frequently incorporating both? Is satire fundamentally a form of moral engagement or anarchistic play? What links aggression and laughter in verbal art? What do traditional satires tell about recent phenomena such as *The Daily Show* and *The Colbert Report*—and vice versa?

ENGL 30203. Shakespeare On the Page and On the Stage

(3-0-3)

Meet—or reacquaint yourself with—Shakespeare in a class that will examine his works from both literary and performative perspectives. Close textual readings of the plays will find realization in class performances of scenes and soliloquies. Co-taught by a former chair of Princeton's English Department and a professional actor trained in London and the U.S.

ENGL 30390. Introduction to Irish Writers

(3-0-3)

This course introduces undergraduate students to Irish literature, explores its dominant themes and motifs and surveys canonical texts and major authors from the 18th century to the present day. A broad range of texts and genres—poetry, novels, short stories, folklore and drama—are studied from a historical and cultural perspective and in relation to transnational literary trends and movements. Attention is also paid to modernization and tradition as well as post-colonialism, feminism and censorship. No prior knowledge of Ireland or the Irish language is required. Irish-language texts will be available in translation.

ENGL 30850. Fiction Writing/English Majors

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This is a course in writing short fiction for English majors who come to writing with a broader literary background than non-majors. It is conducted through a discussion format centered on fiction written by students in the class, and in the context of readings drawn from the contemporary, literary landscape. Students will be encouraged to explore how style and language create aesthetic experience and convey ideas. No one type of fiction is advocated over another, and the emphasis in the class will vary from section to section; however, students will be expected to write fiction that demonstrates an awareness of the difference between serious literature and formula entertainment.

ENGL 30851. Poetry Writing for Majors

(3-0-3) Goransson

Prerequisite: ENGL 30101

This course invites students to learn about the practice of poetry writing with reference to both contemporary and traditional forms, media and genres. Though assignments and readings will vary from section to section, typically, students will build up the range and depth of their writing through impromptu exercises, homework poems, and the assembling of a final portfolio of revised, polished works. Students receive feedback on their poetry from class members as well as from the instructor and will be expected to give consistent, constructive feedback on peers' poems. Other topics under consideration might include translation, performance, hybrid genres or multimedia, depending on the section.

ENGL 30853. Fiction Writing

(3-0-3) McSweeney

This is a course in writing short fiction. It is conducted through a discussion format centered on fiction written by students in the class. Readings drawn from the contemporary, literary landscape will be included. Students will be encouraged to explore how style and language create aesthetic experience and convey ideas. No one type of fiction is advocated over another, and the emphasis in the class will vary from section to section, depending on the instructor.

ENGL 32110. British Literary Traditions I/Discussion

(0-0-0)

Corequisite: ENGL 30110

Corequisite discussion session for ENGL 30110.

ENGL 40009. Media Culture

(3-3-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Corequisite: FTT 41437

The goal of this course is to provide students concentrating in film and television with a chance to investigate some of the most significant issues in contemporary media study. The topics vary each semester but might include the effects of globalization on media production and consumption, the impact of new media technologies, other new critical approaches. Each student will write a substantial research paper that will be developed over the semester in close consultation with the instructor.

ENGL 40011. Television as a Storytelling Medium

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

Corequisite: ENGL 41011

In a communications world dominated by visual culture, television has become society's primary storyteller. Stories are packaged and presented for our consumption in scripted dramas and sitcoms, unscripted reality shows and docudramas, news broadcasts and sporting events, and even commercials and promos. Through exploring the structures, methods, meanings, and impacts of television's various narrative forms, this course will consider how the medium of television enables creators and viewers to tap into the fundamental cultural practice of storytelling. Across the semester, students will read theories of narratology and assessments of television's narrative techniques, screen a variety of narrative examples (chiefly from American television, though some non-American television might be screened), and write their own critical analyses of television's storytelling practices.

ENGL 40107. Religion and Literature

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

A consideration of the forms, ideas, and preoccupations of the religious imagination in literature and of the historical relationships between religious faith and traditions and particular literary works. The conflicts and tensions between modern Gnosticism, in literature and ideology, and the sacramental imagination will constitute a recurring point of focus. We will also lend special attention to the vision and imagery of the journey and wayfarer, and the conflicts and affinities between private and communal expressions of faith. Readings will be selected from the following: criticism by Tolstoy, T.S. Eliot, John Gardner, Flannery O'Connor, Hillis Miller, Elie Wiesel, Martha Nussbaum, Wayne Booth, George

Steiner and others on the relations among ethics, religion and literature; selections from the Bible, Dante, and saints' lives; Emily Dickinson, *Final Harvest*; Roth, *Job*; Kazantzakis, *Saint Francis*; Melville, *Billy Budd, Sailor*; DeVries, *The Blood of the Lamb*; Greene, *The Power and the Glory* and *The End of the Affair*; Wiesel, *Night*; Dostoevsky, *Crime and Punishment*; Emerson, *Sermon on the Lord's Supper*; selected O'Connor short stories or *The Violent Bear It Away*; selected Updike short stories and criticism; Weil, *Waiting for God*; Singer, *Gimpel the Fool and Other Stories*; Bernanos, *Diary of a Country Priest*; Bergman (director), *The Seventh Seal*; Hemingway, *The Old Man and the Sea*.

ENGL 40110. Studies in Comedy

(3-0-3)

A multimedia examination of recurring patterns and themes in comedy.

ENGL 40112. Understanding Story

(3-0-3)

Corequisite: ENGL 41001

An investigation of the shape(s), purposes, and multiple meanings of narratives both in the lives of individuals and within institutions and cultures by sampling the work of journalists in reporting news as story, medical professionals in collecting case histories, ethnographers in describing unfamiliar cultural practices or investigating inter-group or inter-state conflict situations, historians in interpreting the past, political leaders in establishing public policy and political power, and advertising and marketing interests.

ENGL 40114. Modern Jewish Writers

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A survey of influential 20th-century Jewish writers in Europe and the United States.

ENGL 40115. Bible and Literary Theory

(3-0-3)

An intense focus on the distinctive poetic and literary qualities of the English translation of the Bible (King James Version) through close formal analysis and through discussions of theme, image, myth, and narrative form.

ENGL 40118. Philosophy and Literature Seminar

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This intensive four-credit seminar is the introduction to the concentration in philosophy and literature and will pursue interdisciplinary approaches to literary, theoretical, and philosophical texts.

ENGL 40127. Love and the Novel

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Beginning with *The Symposium* and ending with selected modernist writings, how Eros has appeared and been expressed in the West.

ENGL 40128. 20th-Century International Poetry

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Close readings of masterpieces of 20th-century international poetry, including, among others, the works of Federico Garcia Lorca, Georg Trakl, Paul Celan, Rainer Maria Rilke, Boris Pasternak, Osip Mandelstam, Gennady Agyi, Gunnar Ekelof, Thomas Transtromer, Paul Eluard, and Dylan Thomas.

ENGL 40129. Literary Texts in Context

(5-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will investigate the relationship between literary works and their cultural and historical context, focusing specifically on how the expansion (and, eventually, disintegration) of the British Empire influenced literary production. By

looking at how the literary text reflects or transforms the ideas behind it, we will work toward an understanding of how and why literature becomes and remains culturally significant.

ENGL 40131. Poetry and Prayer

(3-0-3)

An examination of how the words "poetry" and "prayer" are connected.

ENGL 40132. Novel Graphics and Graphic Novels

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will explore novel combinations of image and text in various genres and from various periods and parts of the world. The purpose of this wide-ranging analysis will be to fuel creative projects of our own. Potential genres under study will include poster art, collage, photo-essays, performance notation, cartography, hypertext, illumination, artist's books, and, of course, the graphic novel. Course work will include brief homework responses, creative projects exploring the genres and media under study, presentations on works from the University Special Collections and on-line archives, and a final project requiring you to draw on course examples to develop a hybrid format of your own.

ENGL 40133. Soliloquy and Dialogue in Medieval Narrative

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Augustine invented the term "soliloquy" and used it as a title for one of his early dialogues, in which a fictional Augustine debates with an allegorical Reason about the nature of the soul. Thus, at its very inception, the term combines the philosophical and the literary, describing a constructed narrative that unfolds through a volley of competing ideas. This course will investigate the pre-Shakespearean history of the soliloquy and the inward narrative. It will begin with Augustine's *Confessions*, and Boethius' *Consolation of Philosophy*, and then consider how the same dialectical pattern informs works in the vernacular tradition, such as the *Pearl* poem. *Chaucer's Book of the Duchess*, *The Mirror of Simple Souls*, and Julian of Norwich's *Revelations of Divine Love*. We will consider the literary construction of the "I", its relation to the narrator, and the competing forces within the "I", that both fragment and constitute its identity. We will examine the role of memory, reason and imagination for each writer, and consider how the interplay of these forces informs the literary, philosophical and meditative dimensions of their work.

ENGL 40134. Poetry and Liberal Education

(3-0-3)

With the work of six poets and several theories of poetry from the Renaissance to now as our guides, we will take up the large question of how poetry figures, or might figure, in liberal education. Some of the more specific but abiding questions we will consider are these: Does poetry offer ways of knowing as well as ways of saying? Does learning to understand poetry affect moral as well as intellectual development? Does it deepen our awareness of other kinds of language? Why has poetry often been seen paradoxically as both more sensuous and more abstract than other kinds of expression? Does the physicality rhythm of poetry illuminate Thoreau's puzzling claim that we "think as well through our legs and arms as our brain"? Is metaphor the realm in which we find our best meanings? We will focus on poems by Andrew Marvell, Alexander Pope, John Keats, P.B. Shelley, W.B. Yeats, Wallace Stevens, and Adrienne Rich. Essays on poetry will range from Philip Sidney's *Defence of Poetry* (1595) to reflections by several 20th-century poets and philosophers and some recent work in cognitive psychology on the processing of figurative and rhythmic language.

ENGL 40136. Monstrous Mothers of Literature

(3-0-3) Palko

Images of terrible, horrifying mothers have long abounded in literature and have dominated media portrayals of motherhood for decades. Consider the mothers in Matilda or Coraline, or real-life examples like Nadya Suleman (the infamous Octomom) or Michelle Duggar: not only do a multitude of examples of "bad" mothering exist, but women's attempts to mother are also scrutinized in excruciating detail. In this course, we will read a selection of texts (novels, plays,

poems), ranging from Greek tragedies and *Beowulf* to 20th-century poetry and novels to interrogate the literary use of maternal motifs. What purpose is served by making a fictional mother monstrous? What literary effect is created? We will examine contemporary American culture (magazines, blogs, movies) to theorize possible impacts on the role of the modern mother, as well as the implications for American masculinity. What does it say about society that these images are so popular? And what is the connection between a woman's reproductive power and the urge to label her "monstrous"?

ENGL 40137. Before Freud: Dreaming in Some English Poetic and Prose Texts from the Middle Ages.

(3-0-3) Frese

Where do our dreams come from? What do they "mean"? How and why do they matter? From ancient times to the contemporary present, the power of dreams to shape public and private experience has commanded the attention of authors writing both sacred and secular texts, with the human experience of dreams figured as crucial. In this class we will read an array of works from the medieval tradition in English where dreams hold a central place in the construction of meaning. Our conversation will be grounded in an initial reading of key selections from two seminal theoretical works on dreams, one medieval; one modern: Freud, *On the Interpretation of Dreams* and Macrobius, *Commentary on the Dream of Scipio*. Subsequent readings will include the account in Bede's *History of the English Church and People* of how Caedmon's "Hymn of Creation"—the earliest surviving piece of poetry written in English—came to be composed by an illiterate cowherd under the inspiration of a dream; the Anglo-Saxon "Dream of the Rood"; some Middle English lyrics and ballads featuring dream texts; the Gawain-poet's powerful and moving dream-vision, *Pearl*; Chaucer's early "Book of the Duchess," an elegiac dream vision composed (probably for a memorial service) for Blanche, Duchess of Lancaster and wife of Chaucer's royal patron, John of Gaunt, after her death from plague. We will conclude the semester's readings with selections from the English Arthurian poetic tradition that were influential in Malory's great prose composition, *Le Morte D'Arthur*, followed by close reading of Malory's final book in that great compendium of Arthurian stories—"The Death of Arthur"—where the accumulating burden of portentous dreams, and the failure to "read" them correctly, results in those tragic and apocalyptic scenarios surrounding the death of the "once and future king." Throughout the term, we will be observing connections between biblical and secular traditions of reading and writing dreams and their imaginative entwinement by medieval fictionists. We will also be building an articulate sense of what dreams might have to do with the theory and practice of allegory, a major aesthetic mode of imaginative creation and reader-reception in the Middle Ages.

ENGL 40142. Religion and Literature

(3-0-3)

This course has as its essential context the crisis of authority of discourse in the modern period subsequent to literature gaining independence from Christianity. It focuses specifically on the three main postures literature strikes vis-à-vis confessional forms of Christianity no longer thought to have cultural capital: 1) The antithetical posture. Here Christianity is viewed in exclusively negative terms as repressive, authoritarian, and obscurantist, the very opposite of a true humanism that is literature's vocation. Readings include Voltaire and French existentialism. 2) The retrievalist posture. This posture is fundamentally nostalgic. The loss of Christianity's cultural authority is mourned, and literature is seen as an illegitimate substitute. Readings will include Dostoyevsky, T.S. Eliot, and Flannery O'Connor. 3) The parasitic posture. Here Christianity is criticized but not totally dismissed. Portions of it are savable, especially select elements of the New Testament that emphasize human being's creative capacities. Readings include Coleridge, Shelley, and Emerson.

ENGL 40143. Queer Plots: Narrative and Sexuality in 20th- and 21st-Century Fiction

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

How do you tell a story that is supposed to be unspeakable? In this course, we will investigate the ways in which gay, bisexual, and lesbian writers have transformed narrative conventions as they explore their experiences and their identities through fiction. Beginning with the short fiction of Oscar Wilde at the end of the 19th century and continuing through the modern and postwar eras into the contemporary period, we will look at gay, bisexual and lesbian British, Irish and American writers whose work engaged with or dramatically departed from the dominant conventions that typically shaped fictions of identity formation, of love and marriage, of sexual experience, of political protest, and of death and loss. We will also investigate the public responses to some of these fictions, and the changing discourses about gender identity, homosexuality, and sexual orientation that have shaped both the realities and the fictions of gay, bisexual, and lesbian writers over the past century. Students will write three papers and be responsible for one in-class presentation.

ENGL 40144. Classical Literature and its English Reception

(3-0-3) Schlegel

Prerequisite: ENGL 30101 (may be taken concurrently)

Ancient Greek and Latin literature—history, epic, tragedy, novels, oratory—has a second life in English literature as it is reproduced, echoed, or recalled. Pairing important works in Greek and Roman literature (in translation) with works of English literature, this course will look at some of the ways that writers in English have used the traditions of western antiquity. Shakespeare uses Julius Caesar and Ovid, Milton reanimates Hesiod and Vergil, Alexander Pope and James Joyce share a Homeric inspiration but little else, and Victorian novelists plunder their classical educations to raise up and to tear down the social pretensions of their time. Students will study the ancient texts in their own right and will develop skills in interpreting the remarkable range of uses to which they are put by their modern translations, borrowings, and adaptations.

ENGL 40151. Writing India

(3-0-3) Smyth

Prerequisite: ENGL 30101 (may be taken concurrently)

Salman Rushdie, in a controversial introduction to an anthology of Indian writing, argues that the best writing to emerge from India, or from writers of Indian descent, is now undeniably written in English, the language of British colonization. This course will trace the recent development of Indian writing in English, or Indo-Anglican fiction, as Rushdie and others have called it. We will, however, begin with two old, canonical novels of India written by English writers: Rudyard Kipling's *Kim* and E.M. Forster's *A Passage to India*. Other texts to be read include: Salman Rushdie, *Midnight's Children*; Arundhati Roy, *The God of Small Things*; Kiran Desai, *The Inheritance of Loss*; Jhumpa Lahiri, *The Namesake*; Vikas Swarup, *Slumdog Millionaire*; Monica Ali, *Brick Lane*; Michael Ondaatje, *The English Patient*; David Davidar, *The House of Blue Mangoes*. We will be learning about the complex cultural and political history of India, as well as studying the literary debates that have fired such an efflorescence of great fiction. Along the way, we will familiarize ourselves with aspects of post-colonial theory, and also of the enormous impact of imperialism on India. There will also be a film element to this class.

ENGL 40157. Between Religion and Literature: Meaning, Vulnerability and the Human Existence

(3-0-3) Montemaggi

This course explores the contribution that the coming together of theological and literary reflection can make to our understanding of the nature of meaning. Focusing on the work of Augustine, Aquinas, Dante, Primo Levi, Dostoyevsky and Shakespeare, students will address questions such as: What is it we are doing when speaking, reading, using language? How do the intellect and the imagination work in relation to literary texts? How might all this relate to our ways of thinking about

God, human nature, and the relationship between them? Such questions will be addressed, in particular, through reflection on how the texts studied invite us to think about the nature of love, forgiveness, vulnerability and creativity.

ENGL 40160. Political Poetry

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

What is political poetry, and what has it been? In what ways does political poetry interact with the “real”? What shape has political poetry taken in the past? What shape might it take in the future? This course is designed to provide multiple, competing answers to these questions. Course texts will include plays, manifestoes, broadsides and websites. Coursework will include brief responses, creative and collaborative projects, performances, presentations, and formal papers.

ENGL 40161. The Irish Comic Tradition

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Fantasy. Humor. Ribaldry. The Macabre. The Grotesque. Wit. Word play. Satire. Parody. This course will read diverse examples of the long and fertile comic tradition in Irish literature (in Irish and in English), from medieval to modern, in order to enjoy a good laugh, get an alternative take on the Irish literary tradition, and think about the politics of humor. Authors will include unknown acerbic medieval scribes, satiric bardic poets, Swift, Merriman, Sheridan, Wilde, and Flann O’Brien. No knowledge of Irish is assumed or necessary.

ENGL 40170. History and Theory of Literary Criticism

(3-0-3)

The evolution of modern literary criticism.

ENGL 40180. Performance Art: History, Theory, Practice

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Performance art is anti-art. Performance art is art that contradicts tradition, that aims to shock. This class will equip the student with an overview of its offenses. Class content may include: Dada’s early 20th-century assaults on the audience; absurdist experimental performance works by Yoko Ono, Lygia Clark, John Cage, and Nam June Paik from the 1960s; performance art addressing racism by Adrian Piper and William Pope L. from the 1980s; and current performance works by Internet artists and others. Discussions will focus on the aesthetics and politics of marginality. In other words: Why shock? Why experiment? Is there any market for such work today? We will also look at critical and theoretical texts about performance, modernism, and the avant-garde and consider their relation to the works themselves. These may include: manifestos by performers and artists, debates about the autonomy of art, poststructuralist writings on art and aesthetics, and theories of performativity. Finally, students themselves will be expected to create one or more performance art pieces. Students should expect to be asked to participate in other students’ pieces as well as in their own.

ENGL 40190. Literacy, Schooling, Society

(3-0-3)

An examination of several histories of education, with particular emphasis on English studies, and how these histories have helped to shape culture.

ENGL 40191. Perspectives on Literacy

(3-0-3)

What it means to be literate and the conditions that enable literacy to flourish.

ENGL 40192. Introduction to Linguistics

(3-0-3)

An examination of both the technical aspects of linguistics (phonetic transcription, morphology, syntax, etc.) as they relate to the development of the English language and the applications of linguistics to the study of literature.

ENGL 40193. Classical Rhetoric in Our Time

(3-0-3)

A survey of the history of rhetoric.

ENGL 40194. Writing Center Theory/Practice

(1-0-1)

A one-credit course for students interested in tutoring in the University Writing Program.

ENGL 40195. The Literature of Disability

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

“This new critical perspective [Disability Studies] conceptualizes disability as a representational system rather than a medical problem, a discursive construction rather than a personal misfortune or a bodily flaw, and a subject appropriate for wide-ranging cultural analysis within the humanities instead of an applied field within medicine, rehabilitation, or social work. Such an approach focuses its analysis, then, on how disability is imagined, specifically on the figures and narratives that comprise the cultural context in which we know ourselves and one another.” —*Rosemarie Garland Thomson, The Beauty and the Freak, p. 181.* What is disability? What does it mean to be considered disabled? What is the relationship of disability to what is thought to be non-disabled, or “normal”? In this course, we will consider writings and films about disability and individuals labeled disabled. Our readings will include fiction and nonfiction works about people with various physical and cognitive disabilities, including blindness, multiple sclerosis, autism, and others. We will explore the ways in which the disabled have been represented in such works, and the rhetorical resources for constructing “disability” in literature, non-fiction, and film. We will consider the ways in which writers considered disabled write about themselves, telling their own stories, and the ways in which these writings may complicate, subvert, or defy conventional representations of the disabled. In exploring these and related issues, we will consider the implications of disability for individuals and society.

ENGL 40196. The Teaching of Writing

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A theory- and practice-based course in the teaching of writing to junior and high school students.

ENGL 40197. Questions of Homosexuality in Film and Literature

(3-0-3)

This course will introduce students to many of the critical perspectives and theories that enliven contemporary literary and cultural studies on gay and lesbian film and literature. Throughout the semester we will examine a collection of films and literary texts by self-identified gay and lesbian writers and/or by authors who deal with gay and lesbian themes and characters, irrespective of their sexual identity. Through the analysis of the selected texts we will also examine the history, politics, and theoretical arguments both current and historical that deal with homosexuality to see how this human phenomenon and its cultural expression has affected and been affected by heterosexual culture and the conflicts that have arisen between them. We will also explore how sexual and gender norms are constructed historically and culturally; how sexual and gender norms affect gay, lesbian and heterosexual people’s development and self-perception; how new definitions and theories of human sexuality generated by gay and lesbian individuals and communities present alternatives to dominant heterosexist traditions. One of the main objectives of this interdisciplinary course is to open intellectual dialogue, to broaden students’ awareness of the human experience at the same time we acquaint ourselves with some of the most intellectually interesting works that have stemmed from gay inspiration. Films to be studied will include a selection from the following list: *Beautiful Thing* (Hettie Macdonald); *Boys don’t Cry* (Kimberly Peirce); *Brokeback Mountain* (Ang Lee); *Love’s the Devil* (John Maybury); *Saving Face* (Alice Wu); *Stage Beauty* (Richard Eyre); *All about my mother* (Pedro Almodóvar); *Another Gay Movie* (Todd Stephens); *Nico and Dani* (Francesc Gay), and *The Celluloid Closet* (Rob Epstein). Literary texts will include most of the following:

Walt Whitman's *Calamus* poems, Virginia Woolf's *Orlando*, E.M. Forster's *Maurice*, *The Kiss of the Spider Woman* by Manuel Puig; a selection of poems by Constantine Cavafy; *The Well of Loneliness* by Radcliff Hall; Djuna Barnes' *Nightwood*; a selection of poetry by Adrienne Rich; *Rubyfruit Jungle* by Rita Mae Brown, and Yukio Mishima's *Confessions of a Mask*.

ENGL 40198. Reading, Studying and Teaching Literature in the Contemporary Classroom

(3-0-3)

One of the most beloved storytellers of the 20th century, J.R.R. Tolkien, contemplates the power of stories within his masterwork, *The Lord of the Rings*. Resting for a while on the road to Mordor, Sam and Frodo find a measure of solace and purpose as they ruminate together on the nature of "the tales that really mattered, the ones that stay in the mind." Shakespeare also acknowledges the power of story, albeit in a different sense, when he has Hamlet assert: "The play's the thing/Wherein I'll catch the conscience of the king." Central to this course is our study of two great writers of the English tradition, Shakespeare and Tolkien. We will read and discuss works that "stay in the mind"—*Romeo and Juliet*, *Hamlet*, *King Lear*, and *The Lord of the Rings*. In one sense the contemporary classroom will be our own! Yet we will also study these works in the context of contemporary education, one in which, for example, English teachers find that many of their students either complain about reading or choose not to read much at all, at least in part because they lack the skill and patience to read long or difficult texts. So as we study Shakespeare and Tolkien, we will do so with attention to questions about the purpose of literature, issues of literacy, and the challenges and opportunities of teaching literature in the contemporary classroom.

ENGL 40199. Topics in Literature

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Selected topics in medieval literature.

ENGL 40201. Chaucer and the City

(3-0-3)

An exploration of the idea of "the city" in Chaucer's work by looking at the cities he does represent (Troy, London) in his work, by examining his relationship to urban forms of cultural expression (mystery cycles, mumblings, processions), and by investigating city life in 14th-century London.

ENGL 40202. Arthurian Legends

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

An examination of the textual traditions surrounding the once-and-future-king, Arthur, through readings of Geoffrey of Monmouth's *History of the Kings of Britain*, Chretien de Troyes' *The Story of the Grail*, *The Quest of the Holy Grail*, selected short fictions from the Welsh *Mabinogion*, Marie de France's *Lais*, *Sir Gawain & the Green Knight*, and selections from Malory's *Morte D'Arthur*, Tennyson's *Idylls of the King*, and T.H. White's *The Once & Future King*.

ENGL 40205. Shakespeare and the Supernatural

(3-0-3)

An examination of the supernatural in Shakespeare.

ENGL 40206. Advanced Topics in Theatre Studies

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Corequisite: ENGL 41206

This course explores the phenomenon of Shakespeare and film, concentrating on the ranges of meaning provoked by the conjunction. We shall be looking at examples of films of Shakespeare plays both early and recent, both in English and in other languages, and both ones that stick close to conventionalized and historicized conceptualizations of Shakespeare and adaptations at varying degrees of distance towards the erasure of Shakespeare from the text. The transposition of different forms of Shakespearean textualities (printed, theatrical, filmic) and the confrontation with the specificities of film produce a cultural phenomenon whose

cultural meanings—meaning as Shakespeare and meaning as film—will be the subject of our investigations. There will be regular (though not necessarily weekly) screenings of the films to be studied.

ENGL 40208. British Drama 1660–1775

(3-0-3)

Close readings of British dramatic literature created between the Restoration of Charles II in 1660 and the production of Sheridan's *The Rivals* in 1775.

ENGL 40209. Chaucer: Canterbury Tales

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

An introductory study of Chaucer's *Canterbury Tales*, this course will cover a range of genres (romance, fabliau, saint's life, mock-epic, legend, dream vision and allegory). We will read Chaucer's texts in the original language, and examine the historical, literary, and cultural contexts of his poetry, exploring themes like popular piety, anticlerical satire, women's issues, courtly love, magic, and social unrest.

ENGL 40211. History of the English Language

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This is a course on the history of the English language from its elusive but largely reconstructible roots in Indo-European to more or less the present, with a heavy bias towards the earlier pre-modern periods. The goals of the course are to acquaint students with the development of English morphology, phonology, syntax, semantics, graphics, and vocabulary, and to explore the cultural and historical contexts of the language's transformation from the Anglo-Saxon period onward. In working toward these goals, we'll spend time rooting around in the dustbins of English etymology, lexicography, onomastics, and dialectology, and we will explore some current problems in usage and idiom. The course is by nature heavily linguistic, which is to say we'll be spending a lot of time talking about language, grammar, and the forces that act upon spoken and written English. Students can expect to achieve a basic understanding of the cultural and linguistic phenomena that have shaped the language we now speak and write; they will become versed in the fundamental methodology and terminology of historical and descriptive linguistics; they will learn to effect a reasonably credible pronunciation of Old, Middle, and Early Modern English (including something very close to Shakespeare's probable pronunciation); they will discover the true meanings of their own given name and surname; and they will gain experience researching a couple of aspects of the language that interest them. In addition to regular reading and workbook assignments, the course's requirements include two exams, three essays, and responsible attendance.

ENGL 40212. Introduction to Old English

(3-0-3)

In November 1882, Gerard Manley Hopkins wrote to his friend and fellow-poet Robert Bridges: "I am learning Anglo-Saxon and it is a vastly superior thing to what we have now." Auden was similarly moved by his first encounter with Old English: "I was spellbound. This poetry, I knew, was going to be my dish ... I learned enough to read it, and Anglo-Saxon and Middle English poetry have been one of my strongest, most lasting influences." This course is an introduction to the language and literature that so captivated Hopkins and Auden, that later inspired Tolkien and Lewis, and that remains the historical and linguistic foundation of English literary studies. Our focus for about half the term will be the grammar of Old English, but from the very beginning we will read from a variety of texts in verse and prose (including riddles, a monastic sign-language manual, and King Alfred's preface to the Old English translation of Gregory the Great's *Pastoral Care*), and the course will culminate in a focused study of *The Wanderer* and *The Dream of the Rood*. This course may be especially useful for students interested in historical linguistics and the history of the English language, in the Anglo-Saxon foundations of British literature, and in medieval literature in general. Requirements include two exams, a series of grammar quizzes, and a

translation project. The final exam will involve a short oral recitation. Graduate students will meet for two extra class periods and will be assigned some additional reading.

ENGL 40215. Milton

(3-0-3)

This course includes close readings of Milton's work, from all stages of his career, and discussions of his highly self-conscious attempt to make himself into England's greatest poet.

ENGL 40217. Tudor-Stuart Drama

(3-0-3)

A survey of Tudor-Stuart drama.

ENGL 40219. Chaucer: Canterbury Tales

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Geoffrey Chaucer wrote in a time of great social, political, and religious upheaval, a time in which the stakes of English writing were uncertain. This course examines Chaucer's efforts during that period to create sustained fiction in English through his most ambitious and experimental work, *The Canterbury Tales*. Ultimately, we will find out what earned Chaucer the title "Father of English poetry."

ENGL 40221. *Beowulf*: Text and Culture

(3-0-3)

Using a glossed text of *Beowulf* in Old English, an examination of a wide range of critical and cultural issues: What relationship do we expect between "heroic" texts and the society that produced and enjoyed them? What cultural investments of our own lead us to read certain Old English texts and not others? How did *Beowulf* receive canonical status? What is a translation? And what strategies of reading can we bring to a thousand-year old poem?

ENGL 40222. Medieval Drama

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A study of the literary, theatrical, and religious imaginations of medieval dramatic texts through readings, critical writing, discussion, and enactments of these texts.

ENGL 40223. Dante II

(3-0-3)

An in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, *De vulgari Eloquentia*). Lectures and discussion in English; the text will be read in the original with facing-page translation.

ENGL 40224. Dante

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A study of *The Divine Comedy*, in translation with facing Italian text, with special attention to the history of ideas, the nature of mimesis and allegory, and Dante's sacramental vision of life. We will also consider the influence of Augustine's *Confessions* on Dante's imagination and experience and read selections from the *Fioretti*, or *Little Flowers* of St. Francis, and from such later figures as Teresa of Avila as well as modern writers—including T.S. Eliot—for whom Dante constitutes a powerful presence. Readings: *Inferno*, *Purgatorio*, and *Paradiso*, trans. John D. Sinclair (Oxford); St. Augustine, *Confessions*.

ENGL 40226. Essential Shakespeare

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will examine representative examples of comedy, history, tragedy, and romance in order to provide students with a broad overview of Shakespeare's work. Assignments will include a word history, a word cloud, a passage analysis, an essay (6–8 pages), a midterm, and a final.

ENGL 40227. Shakespeare II

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

In this course we will read, in roughly chronological order, the plays from the second half of Shakespeare's career as dramatist. Beginning with *Julius Caesar* and concluding with *Two Noble Kinsmen*, we will cover nineteen plays over the course of the semester. Though we will read several comedies, the syllabus is dominated by the mature tragedies—*Hamlet*, *Othello*, *Lear*, and *Macbeth*—and late romances *Pericles*, *Cymbeline*, *The Winter's Tale*, and *The Tempest*. This course is paired with Shakespeare I (Fall 2004), which covers the first half of the Shakespeare canon (though Shakespeare I is not a prerequisite for this course). Requirements will include a midterm, a final, several passage analyses, and one 5- to 7-page paper.

ENGL 40228. Restoration, Early Eighteenth-Century Literature

(3-0-3)

Questions of the developing interest in the concept of human nature in late 17th- and early 18th-century literature: What does it mean to be human? Are humans animals? Are humans naturally selfish or benevolent? Are gender differences natural or cultural? What sort of obligations do humans have to the rest of the creation? What is the relation of the sort of innocence that the pope imagined as "the eternal sunshine of the spotless mind" to mature development?

ENGL 40229. Shakespeare's Religions

(3-0-3)

A critical analysis of religious influences and iconography in selected Shakespeare plays.

ENGL 40230. Shakespeare's London

(3-0-3)

An analysis of how Shakespeare's migrations between rural England and metropolitan London affected his writings.

ENGL 40231. Renaissance Woman

(3-0-3)

This course is designed as an introduction to the study of women and literature of the Renaissance period in Europe. It will treat the subject of the Renaissance woman in three ways. First, there will be a brief historical overview of the condition of women of different social classes during this period, focusing on topics such as their education, the role of marriage, and the convent as an alternative to married life. Secondly, it will survey how women were viewed in the literature written by men in various European countries. Here we shall read excerpts from Dante and the courtly love tradition, Petrarch and the Petrarchists, Shakespeare, and Rabelais, among others. We shall also consider the portrayal of women in artistic works of this time, comparing this to their literary representation. Next, we shall study the literature created by women during the Renaissance in Europe. During this part of the course, we shall consider some of the problems generated by women's writing, using Virginia Woolf's *A Room of One's Own* as a point of departure for our discussions. At the end of the course, we will resume our study of the image of woman in the Renaissance by reading a modern play set at that time (Peter Whelan's *The Herbal Bed* on the trial of Shakespeare's daughter) that treats some of the issues facing women at that time. All foreign texts will be read in English translation.

ENGL 40232. Shakespeare Media: Book and Screen

(5-0-3)

This course will cover not only standard film versions of the plays but also adaptations and appropriations in order to examine the way in which Shakespeare circulates in popular and elite culture. Likely films include: Olivier's *Hamlet* and *The Last Action Hero* (with Arnold Schwarzenegger); Zefferelli's *Romeo and Juliet*, Luhrmann's *Romeo + Juliet*, and *Shakespeare in Love*; Polanski's *Macbeth* and Billy Morrissette's *Scotland, PA*; Derek Jarman's *The Tempest* and Peter Greenaway's *Prospero's Books*. In each case, we will begin with a reading of the play before moving on to film versions and adaptations.

ENGL 40234. The Renaissance Imagination: Thinking with Spenser and Shakespeare

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

This course focuses intensely on two of the Renaissance period's most influential writers—William Shakespeare and Edmund Spenser. Both writers engage deeply with the imaginative work that fiction can do in addressing the deepest desires and fears; both theorize the imagination's powers as well as its distortions and limitations. Through an intensive study of these writers, students will learn to reflect carefully on their own reading and interpretive processes, as well as on the capacities and horizons of imaginative writing itself.

ENGL 40235. Shakespeare's Major Tragedies

(3-0-3)

Prerequisite: ENGL 30101

This course will examine the four tragedies upon which Shakespeare's reputation most securely rests: *Hamlet*, *Othello*, *King Lear*, and *Macbeth*. Our objectives will be to acquire an in-depth knowledge of Shakespeare's four major tragedies; to become familiar with early modern English and develop an appreciation of the importance of linguistic history; to examine tragedy as a dramatic genre, as an experience, and as a cultural preoccupation; and to learn about Shakespeare's age and his afterlife. Along with our modern editions of Shakespeare, we will read Christopher Haigh's *Elizabeth I* and a number of recent scholarly essays. Work will include several short written assignments, a midterm, a final, and a paper of 7–10 pages.

ENGL 40236. Beowulf and Heroic Legend

(3-0-3) Hall

Beowulf is one of the oldest poems in English, the closest thing we have to a medieval English epic, a literary monument of extraordinary complexity, and a study in heroic behavior that evaluates and problematizes every aspect of the folklore, myth, and legend that it weaves into its narrative. The relationship between *Beowulf* and early medieval heroic legend will be front and center in this course, which will undertake a close reading of the poem set against several comparable exemplars of heroic behavior in neighboring medieval traditions, including the Old English *Battle of Maldon*, the Old High German *Hildebrandslied*, the Old Welsh *Gododdin*, the Latin *Waltharius*, the Old Irish *Táin Bó Cúailnge*, the Old French *Chanson de Roland*, and the Old Icelandic *Hrólfs saga kraka* (all in modern English translation). We'll look carefully at how heroic characters are represented and defined in these texts, and we'll consider the part played by feud, revenge, honor, loyalty, and social bonds and allegiances in constructing a heroic ethos. Weekly response papers, two essays, and a final exam.

ENGL 40237. Romantic Revolutions: British Literature and Culture, 1790–1830

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course examines the various revolutions that reshaped British literature and culture between the 1790s and 1830s, chiefly in response to the French Revolution. We will explore a wide range of works in diverse genres as they address three major areas of interest: the rights of man and woman (including the rights of slaves); the scientific and industrial revolutions; and the development of a new aesthetics (including ideas about language, style, imagination, and the role of the writer). We will tend to study these works in pairs or clusters to highlight differences of approach and emphasize the importance of dialogue and debate to Romantic creativity—the many ways that writers responded to each other and to their cultural and historical circumstances. The best-known poets of the age—Blake, Wordsworth, Coleridge, Shelley, Keats, and Byron—will figure alongside some of their most innovative and influential contemporaries, including

Edmund Burke, Tom Paine, Mary Wollstonecraft, William Godwin, John Thelwall, Charlotte Smith, William Hazlitt, and Mary Shelley. The course will take stock of key critical perspectives on these writers while honing your skills in analysis and argumentation. Instances of contemporary visual art and propaganda will help broaden our understanding of this profoundly revolutionary period in British literature and culture.

ENGL 40238. Witches, Knights, Goddesses, and a Robot: On Edmund Spenser's *Faerie Queene*

(3-0-3) Monta

On January 16, 1599, a hearse borne by poets wound its way through London to Westminster Abbey, their burden destined for burial in a tomb adjacent to Geoffrey Chaucer's in what is now known as Poet's Corner. Once there, the poets who attended the body threw elegies for the dead poet, along with their pens and their tears, into the grave. The deceased, a former scholarship boy whose contemporaries came to call him the "prince of poets," was not Shakespeare nor Donne but Edmund Spenser. Celebrated in his own day, influential for writers as varied as John Keats and C.S. Lewis, Spenser achieved much: a cheeky pastoral poem that announced an obscure twenty-seven-year old as England's new Vergil, an innovative sonnet sequence that departed from gendered norms in striking ways, and, most importantly, *The Faerie Queene*, a romance epic both dazzlingly learned and delightfully ludic. Our reading assignments will include selections from Spenser's *Shepherd's Calendar* and *Amoretti*; our main emphasis will be *The Faerie Queene* itself. Its range of characters, including a cross-dressed female knight and the first robot in English literature, and of literary forms, such as saints' lives, Ovidian myth, Arthurian legend, and Greek romance, invites its readers to reflect on questions concerning moral and political philosophy, gender and sexuality, faith and disbelief, and much else. Because of its intense, self-reflexive focus on interpretive practices and its insistence on working by induction, through interpretive trials and errors, the poem has occupied a central place in literary criticism from C.S. Lewis to Northrop Frye to Stephen Greenblatt. A good reader of *The Faerie Queene* promises to be a good reader of much else: the poem still serves as a laboratory for critical innovations in literary scholarship today. It is an excellent training ground for English majors as well as would-be knights (cross-dressed or otherwise). Course assignments will likely include a reader's theatre presentation of a passage from the poem, short response papers, one longer paper written in several installments, and a final exam.

ENGL 40241. Book Under Suspicion: Censorship and Freedom of Expression in Medieval English Literature

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

Late medieval writers operated in a world distressed by social injustice, political oppression and church controversy. Although this period saw the rise of modern English literature itself, it was also a time when starving peasants rebelled against their overlords, knights rode off on crusade amidst anti-war critique, English translations of the Bible were suppressed, women mystics struggled to be heard amidst gender prejudice, and the king Chaucer worked for was deposed and murdered. This course will examine how the major writers of late medieval England negotiated these troubled waters, writing sometimes candidly and sometimes secretly about dangerous or disturbing matters. Authors to be studied will include Geoffrey Chaucer, William Langland, the Wakefield Master playwright, Julian of Norwich, Margery Kempe, and Marguerite Porete (the only medieval woman author to have been burned at the stake for her writings). The aim is to help illuminate how literary writers sought to defend or enlarge their religious or political orthodoxies in response to the challenges of the time.

ENGL 40243. Great Irish Writers

(3-0-3) McKibben

This course will look at masterworks originally written in Ireland's first language, the oldest vernacular literature of northern Europe. We'll look at the stories from the Ulster Cycle, including the most famous love story in Irish (a.k.a. *Deirdre of the Sorrows*), tales of kings acting badly, heroes astounding others before the age of 10, and the great Irish epic the *Táin Bó Cúailnge* (*The Cattle Raid of Cooley*), which tells a rollicking good story (body-morphing battle frenzy! treachery! jokes! boasting! tricolored hair!) while tackling confounding social and political concerns (such as the dangers of chaos, jealousy, arrogance, and what you do with a bunch of overheated, underemployed young men). We'll next look at the poetic tradition in Irish between approximately 1540 and 1800, an era when England, later Britain, consolidates its conquest and colonization of the country. In this context, writers craftily defend Irish culture, manhood and authority while recalibrating Irish identity, sometimes in deadly earnest, sometimes by making fun of what they cannot necessarily change. All materials will be read in English translation.

ENGL 40244. Shakespeare and Political Theory

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course uses Shakespeare as the focal point for an inquiry into the relationship between literature and political theory, broadly understood. We will read a range of plays across the major genres—*The Merchant of Venice*, *Richard II*, *Troilus and Cressida*, *Hamlet*, *Measure for Measure*, *King Lear*, *Orhelo*, *Cymbeline*, *The Tempest*—in order to consider how Shakespeare manages the following topics: the tension between retribution and the rule of law, the nature of political community and the limits of pluralism, the emergent idea of the nation, the limits of human dignity and the political character of the household. We will thicken our inquiry by pairing a few of the plays with contemporary legal or literary works: *Orhelo* with Tayeb Salih's *Season of Migration to the North*, *Measure for Measure* with *Lawrence v. Texas* (2004), *The Merchant of Venice* with *R. vs. JFS School* (2009), *The Tempest* with *Shakespeare Behind Bars*. Course text will be *The Complete Pelican Shakespeare*, eds. Orgel and Braunnmuller.

ENGL 40245. Shakespeare I

(3-0-3) Lander

In this course we will read, in roughly chronological order, the plays from the first half of Shakespeare's career as dramatist. Beginning with *Two Gentlemen of Verona* and concluding with *Henry V*, we will cover eighteen plays over the course of the semester. Though comedy and history dominate the syllabus, *Titus Andronicus* and *Romeo and Juliet* provide two notable examples of tragedy. This course is paired with Shakespeare II (Spring 2012), which covers the second half of Shakespeare's dramatic canon. Requirements will include a variety of shorter assignments (e.g. word history, paraphrase, and passage analysis), a midterm, a final, and a paper of 8–10 pages.

ENGL 40246. Faith, Love, and Devotion: The Sacred and the Secular in 17th-Century Poetry

(3-0-3) Teller

England witnessed an explosion of religious poetry during the seventeenth century, one of the most turbulent periods in England's religious history. The devotional poems written in this period express a wide variety of attitudes toward salvation, toward divine love, and toward the Church: a longing for salvation, a fear of damnation, a deep desire to feel God's love and approval, and a turbulent vacillation between despair and ecstatic praise. Paradoxically, this poetry reacted against older models of courtly poetry and profane love at the same time as it was deeply indebted to those models. In addition, the religious debates and battles of the Reformation were far from resolved in this period: English Catholics and Protestants produced poetry that offered praise and sacrifice to God while often simultaneously criticizing the beliefs of their Christian opponents. Hence, this course examines seventeenth-century poetry through two major lenses: the conflicts and tensions between "sacred" and "profane" poetry, and the divisions and complications between Catholic and Protestant religious identities as created or expressed in that poetry. How does religious identity shape poetic devotion

toward God? What is the effect of different conceptions of the Church on religious poetry of this period? To what extent do the categories of sacred and secular overlap, complement, complicate, or antagonize one another? And what are the possible relationships between devotional poetry, the English nation, and religious identities? To explore these questions, this course includes (among others) the works of major figures like John Donne, George Herbert, John Milton, and Andrew Marvell, as well as the poems of previously neglected Catholic poets like St. Robert Southwell, William Alabaster, and John Beaumont.

ENGL 40248. Books Under Suspicion: Controversial Writers from Chaucer to St. Thomas More

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Although the period between Chaucer and St. Thomas More saw the rise of modern English literature as we know it, it was also a period of severe social injustice, political oppression, church controversy and even martyrdom. Starving peasants rebelled against their overlords, knights rode off on crusade amidst anti-war critique, English translations of the Bible were suppressed by church authorities, women writers struggled to be heard amidst gender prejudice, and the king Chaucer worked for was deposed and murdered. This course will examine how the major writers of late medieval and early Tudor England negotiated these troubled waters, writing sometimes candidly and sometimes secretly about dangerous or disturbing matters. Authors to be studied will include Geoffrey Chaucer, William Langland, Christine de Pizan, Margery Kempe, Sir Thomas Malory, William Tyndale, Anne Askew and St. Thomas More, as well as the anonymous ballads of Robin Hood. Topics to be discussed will include: knighthood, visionary writing, attitudes toward women's learning and teaching, Jews and Muslims, emerging struggles for intellectual freedom, parliamentary rights and free speech, the Peasants Rising of 1381, and the rise of dissent.

ENGL 40250. Medieval Visions

(3-0-3)

A survey of medieval literature, excluding Chaucer.

ENGL 40251. Everybody's Shakespeare

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

In this course we will read several of Shakespeare's plays (including tragedies, comedies, and romances), as well as a number of contemporary "re-visions" of those works by authors of varying cultural, ethnic, or gender backgrounds. The purpose of this course will consequently be fourfold: first, to gain an in-depth understanding of one of our most important writers, particularly in relation to his own time period; second, to discover what qualities, vision, dilemmas, and/or artistry keep this author very much alive; third, to examine the various ways in which contemporary authors are modifying, if not codifying Shakespeare's work in their own important new works; and last, to develop the critical skills and vocabulary for discussing and writing about these issues and texts. At the end of the course, you should have a firm grasp of several important literary works, from the Renaissance to the twentieth century, a sophisticated idea of how literature both reifies and resists seminal literature which has come before it, and finally a sense of how the issues raised in this literary "confluence" are important in the actual world and in our lives.

ENGL 40253. Beowulf

(3-0-3)

An intensive study of *Beowulf* and the critical literature surrounding it. We will first read the poem in translation, then move slowly through the text in Old English, addressing the key problems and questions that have dominated

recent scholarship. Previous experience reading Old English will be necessary. Requirements include regular reading and contribution to class discussion, a lexicography project, a translation exercise, and a research paper.

ENGL 40254. Shakespeare: Text and Performance

(3-0-3) Holland

Prerequisite: ENGL 30101 (may be taken concurrently)

Corequisite: ENGL 41254

What are King Lear's last words? In performances at the Globe, what did Hamlet do when he argued with Laertes? What were the costumes worn by the ghost of Hamlet's father and why? If Viola in *Twelfth Night* was played by a boy actor, what changes? What happens in recent Japanese productions of Hamlet? What is Shakespeare like on YouTube? This course will explore productions of Shakespeare plays from Shakespeare's own theatre to 2011. We will see live productions as well as web-streamed versions in many languages and from all over the world. We will see what can be recovered of early modern production methods and of 18th-century adaptations. We will, occasionally, use our lab time to watch films and TV versions but the lab will not be required every week. The aim throughout will be to investigate the history of the text of Shakespeare plays and some of the myriad ways in which the plays have been translated into performance across time and space.

ENGL 40260. Swift and the Arts

(3-0-3)

An examination of the ways in which Jonathan Swift regarded the non-literary arts in eighteenth-century Ireland and England—gardening, music, architecture, and painting—and how his views on those art forms are reflected in his poetry and prose.

ENGL 40261. Money in the Eighteenth Century: Wealth, Poverty, Debt, Gambling, Bubbles, Consumers

(3-0-3) Doody

The instruments of modern capitalism (including the Bank of England and a stock market) were invented at the end of the seventeenth century. The eighteenth century experiences the complexities and shocks of that system. The South Sea Bubble in England with the remarkable crash of the South Sea Company in 1720 gave the world its first lesson in a stock market crash. The feudal class system is pressed and reshaped to follow the nature of money. Theories about liberty cannot rightly ignore financial pressure, and personal freedom is deeply affected by relationships to money. Novelists, dramatists and poets of the late 17th and the 18th century examine a variety of forms of wealth and loss, and observe the startling effects of gains and losses of those at the bottom or the top of the social pyramid. Male and female authors observe the price and significance of luxury goods (silk, mohair, diamonds, and coaches) and of new pleasures (coffee and tea drinking, card parties); they also follow the cost of bare necessities (a loaf of bread). Slavery is part of the economic dynamic, and the new system amplifies slavery in bringing to the fore such new staples as sugar, tobacco and cotton. Gambling assumes a central role; public projects are funded by lotteries. Marriage is deeply involved in speculation. ("Speculation" is the name of a real game introduced to her family by Jane Austen.) We will examine the work of theorists such as Adam Smith and Malthus, as well as a variety of poems plays and novels from Bunyan to Austen dealing with social patterns and individual experiences of prosperity or loss.

ENGL 40302. Romanticism and the Public Theatre

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Readings of drama written during the English Romantic period.

ENGL 40303. Eighteenth-Century Literature Imagines a Future

(3-0-3)

In literature of the late 17th century and the 18th century, fascination with possible futures—desirable or undesirable, stimulates literary invention of alternative worlds. Poets may prophecy a time of great happiness to come after trial and destruction, as at the end of Dryden's *Annus Mirabilis* (The Year of Marvels), and Pope's *Windsor Forest*. Or they may imagine a time of coming catastrophe, as Pope

does in his *Dunciad*. Imaginary voyages like *Gulliver's Travels* and *Candide* offer visions of alternative societies that may or may not reflect England's or France's future. Science fiction appears, offering worlds in other planets, or fantastic cultures in this world, as in Cyrano de Bergerac's *A Voyage to the Moon*, Margaret Cavendish's *The Blazing World*, and Robert Paltock's *Peter Wilkins*. The "fairy tale" becomes a popular new form, dealing with change, stress, resourcefulness and deliverance. All of these works play in various ways with the possibilities of change—social, legal, political, sexual. Endeavors to imagine a better world stimulate creative encounters, as in Johnson's *Rasselas* (set in Abyssinia and Egypt) and Lessing's *Nathan the Wise*, envisaging harmony between Muslims, Jews and Christians. Philosophy of the period has much to say about human nature and how a better society might be made. Before the end of the 18th century, the American Revolution and the French Revolution attempt to bring ideals into actuality. Throughout the period, new literature (including popular stage farce) entertains us with counterfactual personages, including not only familiar giants and fairies but also "bear-men," "worm-men," sylphs, giants, dragons, a cat princess, an autobiographical lapdog, animated portraits and—at last—the first vampire. Theatre and music burst into fantastic farces and enchanting operas, while the graphic arts develop the art of caricature. Towards the end of the century the invention of the "Gothic" mode offers a striking means of dealing with the relation of the future to the past—a past that refuses to be quite killed off and continues to haunt us. Texts: De Bergerac, *A Voyage to the Moon*; Dryden, *Annus Mirabilis*; Cavendish, *The Blazing World*; Pope, *Windsor Forest*, *The Rape of the Lock*, *The Dunciad*; Perrault, *Fairy Tales*; Aulnoy, *The White Cat*; Swift, *Gulliver's Travels*; Voltaire, *Candide*; Johnson, *Rasselas*; Paltock, *Peter Wilkins*; Lessing, *Nathan the Wise*; Walpole, *The Castle of Otranto*; Lewis, *The Monk*; Polidori, *The Vampyre*. Texts include excerpts from philosophical writings by John Locke, Adam Smith, Thomas Jefferson and Edmund Burke. We shall enjoy operas by Handel and Mozart, as well as some art of the period (including caricatures, illustrations of myth, and theatrical designs and special effects).

ENGL 40306. Irish and British Literature, 1790–1815

(3-0-3)

Burke, Paine, Godwin, Wordsworth, Edgeworth, and Scott in the context of the French Revolution and the Irish political situation at the end of the 18th century.

ENGL 40309. Love and the Novel

(3-0-3)

Beginning with *The Symposium* and ending with selected modernist writings, how Eros has appeared and been expressed in the West.

ENGL 40310. Visits to Bedlam

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Until visitation was restricted in 1770, London's Bethlem Hospital (popularly known as "Bedlam") attracted as many as 96,000 spectators per year who paid for the privilege of watching mental patients. Like the tigers in The Tower, these patients were not simply chained, but shown, put on exhibition. The cruelty of this practice and the fact that it was stopped both point to the eighteenth-century fascination with madness, with the irrational, with what Freud would call the "unheimlich," the "uncanny." Samuel Johnson's astronomer who comes to believe that he personally controls the weather, Laurence Sterne's mad Maria, piping for her lost lover, John Locke's man who believes himself made out of glass and who acts "reasonably" to avoid hard objects, or Jonathan Swift's modest proposer who concocts a cookbook to save the Irish nation all bear witness to this other side of the eighteenth century, the subject of this course. We will begin with selections from Cervantes' *Don Quixote* and some short readings in Locke and others who attempted to analyze madness. We will then move on to explorations of Samuel Johnson, Tobias Smollett, Laurence Sterne, and Jonathan Swift. Our major focus will be on Swift, with special attention to his poetry, *Gulliver's Travels*, and *A Tale of A Tub*. Swift, who was a Governor of Bethlem Hospital, left most of his money to fund the first mental hospital in Ireland, St. Patrick's, which is still there. As he

later said, “He gave what little wealth he had, To build a house for fools and mad: And showed by one satiric touch, No nation wanted it so much.” For the sake of comparison, we will conclude with several nineteenth century selections.

ENGL 40312. The 19th-Century Novel

(3-0-3)

Prerequisite: ENGL 30310 (may be taken concurrently)

This course is an examination of major Victorian novels.

ENGL 40315. The Other 19th-Century Novel

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

An examination of neglected 19th-century British novels and novelists, including gothic novels, sensation novels, and science fiction.

ENGL 40316. Gender and the 19th-Century British Novel

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

An exploration of the treatment of gender in the nineteenth-century British novel.

ENGL 40317. The Victorian National Romance

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

By examining texts from the different nations within the British Isles—Scotland, Ireland, and England—we will explore the complex question of how national boundaries are drawn, how a sense of membership in a nation is created, and what that might have to do with falling in love, getting married, and staying married.

ENGL 40319. Virtue, Sex, and the Good Life

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

How should I behave? Do I make my own decisions, or rely on the advice of others? Am I defined by my birth and family, or do I make myself? What exactly is “virtue”? Which matters more, the individual or the community? Can I be virtuous if I’m poor—or rich? Is it not virtuous to be rich in an expanding economy? Is Virtue possible in a mobile society which values flexibility above stability? Questions such as these are taken up by 18th-century writers of fiction and by philosophers like Shaftesbury and Rousseau. Female virtue supposedly consisted mainly or only in a demonstrable chastity. Women writers of the 18th century demonstrate the degree of artifice in which even “good” women must engage. In Daniel Defoe’s *Roxana*, a wife abandoned by her husband with five children and no income finds that she can market herself, even acquiring great wealth. Should she have starved instead? Roxana plays with various selves on a road to what looks like success. In contrast, Pamela, the beautiful maidservant in the first novel about sexual harassment, tries to resist the advances of her young master. Is she just being conceited, or trying to raise her value? Can Virtue ever exist without conceit and self-consciousness? Henry Fielding in *Tom Jones, the History of a Foundling*, follows the fortunes of a male bastard who both is and is not accepted by his adoptive world. What does Virtue mean to the male life? How many affairs can he have—and with whom? Is prostitution an option for him? What does virtue mean in relation to the male life? Gothic novels and courtship novels, including Austen’s *Pride and Prejudice*, question our desires for both autonomy and social success, for spiritual identity and economic security. Novels and plays repeatedly question how a moral center may be found at a time when social and familial boundaries, sexual manners and permitted behaviors are all changing. Throughout the period, a variety of narrative modes and the development of new styles alert readers to the range of possibilities and varieties of moral reasoning.

ENGL 40321. The Victorians

(3-0-3)

Prerequisite: ENGL 30101

It was actually the generation following the Victorian era that established our narrowest stereotypes concerning Victorian prudishness, earnestness and stiff formality. This course shows how Victorian literature registers the tremendous changes and heterogeneity of British culture from the 1830s to the 1890s. Our thematic clusters include: gender and sexuality; poverty and social reform; religious doubt and self-reflection; nationalism and empire; and the arts and aestheticism. I anticipate assigning literary works by Elizabeth Gaskell, Charles Dickens, Charlotte Bronte, Anthony Trollope, Wilkie Collins, and Oscar Wilde. We will also look to numerous works in nonfiction prose, poetry, and the visual arts.

ENGL 40324. Garden to Ecosystem: Nature Poetry, 1650–2008

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A study of the changing role of the natural world in the poetic imagination of English and American writers from Andrew Marvell and James Thomson to Denise Levertov and Gary Snyder. Other writers to be studied may include Charlotte Smith, William Wordsworth, John Clare, Emily Dickinson, G.M. Hopkins, Thomas Hardy, Robert Frost, Robinson Jeffers, Ted Hughes, Maxine Kumin, Seamus Heaney, Mary Oliver, and Pattiann Rogers. Attention to the history of the idea of nature and ecological awareness as well as to poetic representation and expression.

ENGL 40325. Decadent Modernity

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course acquaints students with two understandings of decadence. We will learn about its most familiar aspect as an 1890s movement in which figures such as Oscar Wilde and Aubrey Beardsley provoked the respectable middle class with racy, sordid, overblown and/or absurdist subject matter and methods. But we will also explore a broader view of decadence stretching back to the 1700s and into the present, as traditional values and social structures come under the pressures of political and scientific revolutions. Our materials—which are not for the prudish or faint-hearted—include fiction, poetry, drama, philosophy, visual arts, cinema and criticism.

ENGL 40326. Romantic Revolutions: British Literature and Culture, 1790–1830

(3-0-3) Solomonescu

Prerequisite: ENGL 30101 (may be taken concurrently)

This course examines the various “revolutions” that reshaped British literature and culture between the 1790s and 1830s, chiefly in response to the French Revolution. We will explore a wide range of works in diverse genres as they address three major areas of interest: the rights of man and woman (including the rights of slaves); the scientific and industrial revolutions; and the development of a new aesthetics (including ideas about language, style, imagination, and the role of the writer). We will tend to study these works in pairs or clusters to highlight differences of approach and emphasize the importance of dialogue and debate to Romantic creativity—the many ways that writers responded to each other and to their cultural and historical circumstances. The best-known poets of the age—Blake, Wordsworth, Coleridge, Shelley, Keats, and Byron—will figure alongside some of their most innovative and influential contemporaries, including Edmund Burke, Tom Paine, Mary Wollstonecraft, William Godwin, John Thelwall, Charlotte Smith, William Hazlitt, and Mary Shelley. The course will take stock of key critical perspectives on these writers while honing your skills in analysis and argumentation. Instances of contemporary visual art and propaganda will help broaden our understanding of this profoundly revolutionary period in British literature and culture.

ENGL 40327. The Victorian Universe

(3-0-3) Maurer

Prerequisite: ENGL 30101 (may be taken concurrently)

The Victorian world was one made unsettlingly strange by industrialism, capitalism, technology, changing gender roles, and an increasing class mobility. Victorian authors dealt with this strange modernity by writing stories about the ways that society remained interconnected. The average Victorian novel was three volumes long and contained multiple plots in which characters were intertwined through romance, politics, money, secret identities, blackmail, disease and sometimes the sheer accident of sharing the same train. In order to become thoroughly acquainted with the Victorian novel's ambition to offer its reader a vision of society's totality, this class will focus intently on just three novels—Charles Dickens's *Dombey and Son*, George Eliot's *Middlemarch*, and Anthony Trollope's *The Way We Live Now*. We will closely study the formal techniques that each writer used to try to reproduce a sense of vast interconnectedness in Victorian society. We will also read excerpts from other Victorians who tried to explain the complexity of society—Charles Darwin, Karl Marx, Alfred Lord Tennyson, John Stuart Mill and John Ruskin among them. Students can expect to be graded on class participation, a series of short response papers, a presentation, and three longer formal writing assignments.

ENGL 40328. The Romantic Novel

(3-0-3) Solomonescu

Prerequisite: ENGL 30101 (may be taken concurrently)

Although long associated chiefly with the genre of poetry, the Romantic period in Britain saw a remarkable surge in the publication and popularity of novels. This course will examine the major categories of novel that emerged and overlapped in the period straddling the late eighteenth and early nineteenth centuries: the Gothic novel, the novel of sensibility, the ideological or propagandistic novel, and the historical novel. Focusing on the works of novelists including Radcliffe, Godwin, Wollstonecraft, Thelwall, Mary Shelley, Austen, Scott, and Peacock, we will attend to the formal and ideological development of the Romantic novel in its historical and literary contexts, as well as from several key critical perspectives. Was novel-reading the frivolous or potentially subversive activity it was feared to be? And why did this particular genre raise such concerns? A particular interest of the course will be the Romantic novel's multiple and often contradictory perspectives on its own social situatedness and potency.

ENGL 40329. Romantic Literature

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will survey the major authors, themes, and cultural movements of the Romantic era, beginning with the French Revolution ending with the coronation of Victoria. In addition to the six best-known poets (Wordsworth, Coleridge, Byron, Blake, Shelley, Keats), the course will cover other important contemporary authors.

ENGL 40330. The Victorian City

(3-0-3)

How the city was depicted in 19th-century British literature.

ENGL 40331. Victorian Radicals

(3-0-3)

"Fringe" characters in, and elements of, British Victorian literature, with a particular emphasis on a modern world being increasingly defined in economic terms.

ENGL 40332. Reforming Victorian Literature

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

The Victorian critic and poet Matthew Arnold complained about one of his own poems that it depicted a situation in which "suffering finds no vent in action." This complaint expressed a characteristic Victorian belief that literature should imagine possibilities for action—for social change, transformation, or reform. In this course, we will explore how Victorian authors sought to create literary works that would reform the members of their audience and, in turn, the society in which they lived.

In addition, we will examine the various ways in which Victorian writers sought to re-form literature, creating new literary forms and forming old ones anew, in order to achieve this aim. We will study works by Matthew Arnold, Robert Browning, Elizabeth Barrett Browning, Thomas Carlyle, Charles Dickens, George Eliot, John Henry Newman, Christina Rossetti, John Ruskin, Alfred Tennyson, and others. Prior to the start of the semester, an online syllabus will be posted at <http://www.nd.edu/~cvandenb>.

ENGL 40333. Romanticism and Revolution

(3-0-3)

The relationship between the Romantic movement and rebellions against governments around the world.

ENGL 40336. Seduction and the Novel in the Era of the French Revolution

(3-0-3)

Prerequisite: ENGL 30101

When Lionel reflects, in Charlotte Smith's *Desmond* (1792), "I found that if I would really satisfy myself with a certain view of Geraldine, I must seek some spot, where, from its elevation, I could, by means of a small pocket telescope, have an uninterrupted view of these windows," and the eponymous heroine of Mary Hays's *Memoirs of Emma Courtney* (1796) observes "I shall, I suspect, be impelled by an irresistible impulse to seek you. Though you have condemned my affection, my friendship will still follow you," they represent an extreme unrequited devotion that is part of the period's preoccupation with passion. The novel of the 1790s teems with rapists, stalkers, abusive employers, weeping men and fighting women who confront prison, madness, murder, jealousy and suicidal melancholy. This course aims to explore the significance of passion for understanding developments in the representation of femininity, masculinity, social virtue and humanitarian reform at the end of the eighteenth century.

ENGL 40338. Victorian Places

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

The British Victorians witnessed unprecedented urbanization, internal migration, and globalization. This course will survey how Victorians understood their relationship to place, how they changed their understanding of what even counted as place, and how literature mediated those understandings.

ENGL 40341. The Romantic Period 1780–1840

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

"Bliss was it in that dawn to be alive, / But to be young was very Heaven!" (William Wordsworth). One of the most exciting things about the Romantic period in Britain is its engagement with ideas and themes that attract the young: human rights, democracy, travel, satire, love, melancholy and horror. We will sail with Coleridge's ancient mariner, walk the Lake District with William and Dorothy Wordsworth, peer into Percy Shelley's soul and luxuriate with Keats. We will discover what it means to see poetry as "indeed something divine" and poets as "the unacknowledged legislators of the world." We will learn the language of sensibility and understand how Marianne Dashwood's "effusions of sorrow," in Austen's *Sense and Sensibility*, fit into a cult of writing on the expressive body. Why is John Clare so interested in birds' nests? Why are mountains "sublime" and ruins "picturesque"? Who is the "Man of Feeling"? Central themes will include Romantic historicism, revolutionary politics, the dissenting tradition, human rights, picturesque and sublime aesthetics, feminism, sensibility, experimentalism, gothic literature, and travel writing. Key authors will include Jane Austen, William and Dorothy Wordsworth, Samuel Taylor Coleridge, William Blake, Percy and Mary Shelley, Mary Wollstonecraft, William Godwin, John Keats, Robert Southey, John Clare and William Hazlitt.

ENGL 40342. Romantic Ireland

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

A study of the romantic theme in Irish literature from Edgeworth and Moore to the young Yeats and Joyce. This course will include poetry, fiction, drama and aesthetics.

ENGL 40343. Eighteenth-Century Literature Imagines a Future

(3-0-3) Doody

Prerequisite: ENGL 30101 (may be taken concurrently)

In literature of the late 17th century and the 18th century, fascination with possible futures, desirable or undesirable, stimulates literary invention of alternative worlds. Poets may prophecy a time of great happiness to come after trial and destruction, as at the end of Dryden's *Annus Mirabilis* (The Year of Marvels), and Pope's *Windsor Forest*. Or they may imagine a time of coming catastrophe, as Pope does in his *Dunciad*. Imaginary voyages like *Gulliver's Travels* and *Candide* offer visions of alternative societies that may or may not reflect England's or France's future. Science fiction appears, offering worlds in other planets, or fantastic cultures in this world, as in Cyrano de Bergerac's *A Voyage to the Moon*, Margaret Cavendish's *The Blazing World*, and Robert Paltock's *Peter Wilkins*. The "fairy tale" becomes a popular new form, dealing with change, stress, resourcefulness and deliverance. All of these works play in various ways with the possibilities of change—social, legal, political, sexual. Endeavors to imagine a better world stimulate creative encounters, as in Johnson's *Rasselas* (set in Abyssinia and Egypt) and Lessing's *Nathan the Wise*, envisaging harmony between Muslims, Jews and Christians. Philosophy of the period has much to say about human nature and how a better society might be made. Before the end of the 18th century, the American Revolution and the French Revolution attempt to bring ideals into actuality. Throughout the period, new literature (including popular stage farce) entertains us with counterfactual personages, including not only familiar giants and fairies but also "bear-men," "worm-men," sylphs, giants, dragons, a cat princess, an autobiographical lapdog, animated portraits and—at last—the first vampire. Theatre and music burst into fantastic farces and enchanting operas, while the graphic arts develop the art of caricature. Towards the end of the century the invention of the "Gothic" mode offers a striking means of dealing with the relation of the future to the past—a past that refuses to be quite killed off and continues to haunt us. Texts: De Bergerac, *A Voyage to the Moon*; Dryden, *Annus Mirabilis*; Cavendish, *The Blazing World*; Pope, *Windsor Forest*, *The Rape of the Lock*, *The Dunciad*; Perrault, *Fairy Tales*; Aulnoy, *The White Cat*; Swift, *Gulliver's Travels*; Voltaire, *Candide*; Johnson, *Rasselas*; Paltock, *Peter Wilkins*; Lessing, *Nathan the Wise*; Walpole, *The Castle of Otranto*; Lewis, *The Monk*; Polidori, *The Vampyre*. Texts include excerpts from philosophical writings by John Locke, Adam Smith, Thomas Jefferson and Edmund Burke. We shall enjoy operas by Handel and Mozart, as well as some art of the period (including caricatures, illustrations of myth, and theatrical designs and special effects).

ENGL 40350. Dickens and Wilde

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This double-author course showcases what most readers would see as an "odd couple" among Victorian authors. Charles Dickens (1812–70) was the Shakespeare of his time, a prolific creator of memorable characters and incidents, at once comic and tragic. But post-Victorian critics often see him as a prime exponent of Victorian earnestness, sentimentality and even hypocrisy. And Oscar Wilde (1854–1900) was, well, the Wilde of Victorian Britain: he was so dazzling that even those who wished to hate him often had to give up and laugh with him. But his life took a classically tragic form after his public humiliation and imprisonment for homosexual offenses. Our principal texts by Dickens will probably be *Oliver Twist*, *David Copperfield*, and *Our Mutual Friend*. Our readings in Wilde will cover

the gamut of his efforts but emphasize his society comedies and his novel *The Picture of Dorian Gray*. Graded coursework includes three papers and a final exam, along with reading quizzes and participation.

ENGL 40401. Literature Between the Wars

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A close analysis of the fiction, poetry, drama, and nonfiction written during the 1930s.

ENGL 40402. British India

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Depictions of India by British writers in the 19th and 20th centuries.

ENGL 40403. Studies in Modern Poetry

(3-0-3)

This course focuses on four highly important and innovative, though still often underrated, poets: Velimir Khlebnikov, Gertrude Stein, Mina Loy, and Miron Biaoszewski.

ENGL 40404. Early British Modernism

(3-0-3)

An analysis of the early stages of British Modernism as the novel shifted (in some cases) away from the predominant forms of Victorian Realism and toward the more experimental structures of the early 20th century.

ENGL 40405. Postmodern British Poetry

(3-0-3)

Study of competing galaxies of late-20th-century British poets, for whom more than art was at stake: agendas of race, gender, region, class, and other cultural materials.

ENGL 40407. The Modern Revolution

(3-0-3)

A focus on the first quarter of 20th-century British literature in order to tease out the relationships between revolutions in art and seismic social change.

ENGL 40408. Five Modern Poets

(3-0-3)

Close readings of three British—David Jones, W.H. Auden, and Geoffrey Hill—and two Irish poets—W.B. Yeats and Seamus Heaney.

ENGL 40411. Twentieth-Century British Women Writers

(3-0-3)

Modern and postmodern fiction (and some nonfiction prose) by British women. Authors may include Woolf, Butts, Rhys, Cunard, Richardson, Carrington, West, Mansfield, Carter, and Winterson.

ENGL 40412. Twentieth-Century British Novels

(3-0-3)

In looking at several British novels, each published at a different moment of the 20th century, students will explore how art (in this case literature) engaged, or did not engage, the social world.

ENGL 40413. 20th-Century British and Irish Poetry

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course is designed to give students a firm grasp of the major developments that occurred in poetry overseas during the last century. That grasp will depend on our linkage of rather spectacular changes in poetic form to changes in culture; students will exit the course with an understanding of how the century's unprecedented violence in warfare and grand upheavals in philosophy, science, social-psychology and political thought impacted upon the artforms of these nations. (The "United Kingdom" contains, more precisely and often uncomfortably, four entities—England, Scotland, Wales and Northern Ireland—and requires

study as a political “unity” with much internal turmoil.) We’ll focus on writing between the great stock market crash of 1929 and the present moment, and much of our conversation will involve the differences between poetic responses to changing contexts in the experimental or small-press world of writing versus the mainstream. As we go, we’ll discuss comparative issues too, like the differences between studying African-American and black British poetry, as well as differences between studying women’s poetry in the States and women’s poetry overseas. Evaluation will be based on two papers, two presentations, and class participation. No prior experience of reading poetry is expected.

ENGL 40414. The Irish Short Story

(3-0-3)

This course studies the Irish short story as a literary genre that reflects the changing political and cultural forces at play in Ireland. We begin the course by surveying various critical theories that can be applied to the genre before reading and discussing a wide selection of short stories. The course considers Irish writing in the broader sense—literature written in either Irish or English. Among the authors included are: Patrick Pearse, Pádraic Ó Conaire, Séamus Mac Grianna, James Joyce, Liam O’Flaherty, Elizabeth Bowen, Frank O’Connor, Sean O’Faolain, Éilís Ní Dhuibhne, Angeal Bourke, Seán Mac Mathúna, Micheál Ó Conghaile, Eithne Strong, Pádraic Breathnach, Alan Titley, Mary Lavin, William Trevor, Gerry Adams and Bernard MacLaverty.

ENGL 40415. The Avant-Garde: From Dada to Punk and Beyond

(3-0-3)

Considering various genres and mediums (poetry, art, cinema, music, drama, and performance) from a range of geographic locations, an investigation of the avant-garde movement of the late 19th and early 20th centuries.

ENGL 40416. Twentieth-Century Literature in Irish

(3-0-3)

This course will introduce you to the vibrant contemporary literature in Irish (Gaelic) from the Gaelic Revival, which sought to rescue the language from extinction, right up to the present. This course will focus on developing your ability to read, analyze and write about literature with care and precision. You will do a LOT of writing, both graded and ungraded, to become a stronger reader and writer. In the process, we’ll consider the particular excitement and difficulty of writing in (and about!) a minority language that also happens to be the first official language of Ireland, as well as debates about identity, belonging, symbolization, history, Anglicization, assimilation and hybridity, the new prominence of women writers, and ongoing challenges to stereotypes about Irish as tradition-bound (rather than, say, tradition-enabled), puritanical or pre-modern.

ENGL 40417. The Irish Tradition I

(3-0-3)

Ireland possesses the oldest vernacular literary tradition in Europe, spanning over 1500 years to the present day. This course will provide a survey of the origins and development of that literary tradition through more than a millennium from its beginnings until the seventeenth century, when political circumstances led to the collapse of the highly developed native system of learning, poetry and patronage. The development of the Irish literary tradition will be traced against this background of political and cultural upheavals from approximately 500 to 1650.

ENGL 40418. Gender and Space

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

A study of the spaces of modernity and gender in the novel.

ENGL 40420. 19th and 20th Century Scottish Literature

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

This course will survey major authors, genres, and themes of the literature of Scotland from the era of Burns to the present.

ENGL 40421. Queer Plots: Narrative and Sexuality in 20th and 21st Century Fiction

(3-0-3)

How do you tell a story that is supposed to be unspeakable? In this course, we will investigate the ways in which gay, bisexual, and lesbian writers have transformed narrative conventions as they explore their experiences and their identities through fiction. Beginning with the short fiction of Oscar Wilde at the end of the 19th century and continuing through the modern and postwar eras into the contemporary period, we will look at gay, bisexual and lesbian British, Irish and American writers whose work engaged with or dramatically departed from the dominant conventions that typically shaped fictions of identity formation, of love and marriage, of sexual experience, of political protest, and of death and loss. We will also investigate the public responses to some of these fictions, and the changing discourses about gender identity, homosexuality, and sexual orientation that have shaped both the realities and the fictions of gay, bisexual, and lesbian writers over the past century. Students will write three papers and be responsible for one in-class presentation.

ENGL 40422. Modernism and Magazines

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Attention to the circulation of ideas about literary Modernism and Modernity in a range of publications: little magazines, “slicks”, feminist periodicals, women’s magazines, and alternative/oppositional journals.

ENGL 40426. Modern and Contemporary British Drama

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Close readings of dramatic literatures written by British playwrights over the span of the twentieth century, with particular emphasis on the various aesthetic and experimental forms used by the playwrights.

ENGL 40427. War, Economic Depression and Ideological Contest in British Writing of the 1930s

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

British writing of the 1930s was shaped by economic and political crisis, and the resulting ideological and aesthetic struggles begin to look all too contemporary. This course will look at the poetry of the Auden circle and Marxism; at the early sociological work of Mass Observation and the documentaries of Humphrey Jennings; at the scientism of the Cambridge group around William Empson, Jacob Bronowski and J.D. Bernal; at responses to the Spanish Civil War, both left and conservative, including those of George Orwell, Wyndham Lewis and Roy Campbell; and at the fiction writers Elizabeth Bowen, Christopher Isherwood, Graham Greene, Evelyn Waugh and Edward Upward and their different treatments of social and political pressure points. This broad range will be focused through a group of texts selected for their mutual contentiousness. Throughout, the responsibilities and irresponsibilities of writers during perilous times will be in question.

ENGL 40430. Contemporary Women Writers

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

We will read, discuss, and write about a wide range of contemporary writing by women, with a particular concentration on the short story and the writers visiting Notre Dame's Women Writers Festival. Our readings will include realistic fiction as well as innovative and experimental work, including graphic fiction; some of our readings will focus on women's experiences and perspectives, but some will "make the leap" to imagine men's consciousness and reality. We'll also read critical essays and reflections by the writers themselves to situate the work within the history of women writers; we'll be especially interested in the publishing and critical realities facing women writers today. Reading journal, midterm and final, brief presentation, and 8- to 10-page critical paper.

ENGL 40431. Transculturation in Irish Literature

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

This course considers the vexed topic of cultural change in the context of colonialism by examining key texts originally written in Irish (or a mixture of Irish and English) from a range of time periods, including works of comedy, satire, lament and protest. We will consider the critical literature on transculturation and examine primary texts and consider how they change over time and what they seem to suggest about how people negotiate competing sociocultural and economic imperatives. Knowledge of Irish is helpful but not necessary; translations will be provided along with original texts. Requirements: enthusiastic participation, several short and one long term paper.

ENGL 40501. Contemporary Irish Drama

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A close analysis of the dramatic literature produced by Irish playwrights during the latter half of the 20th century.

ENGL 40503. Anglo-Irish Identities 1600–1800

(3-0-3)

An exploration of the complex and contested cultural, political, and ideological identities of the Anglo-Irish.

ENGL 40506. Modern Irish Drama

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

A study both the drama produced by the playwrights of the Irish literary renaissance—W.B. Yeats, J.M. Synge, Lady Gregory, and Sean O'Casey—and the political struggle for Irish independence that was taking place at the same time.

ENGL 40507. The Hidden Ireland

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

The Hidden Ireland denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a

version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from "below" and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our understanding of Irish identity, Irish history, and Irish literature. This course will examine the book in depth and utilize it to open a window on the hidden Ireland of the 18th century. The cultural, historical, and literary issues that are raised by the book will be studied in the context of the poetry of the period. Poetry will be read in translation.

ENGL 40508. Heroic Literature in Modern Adaptation

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Beginning with a study of the ethos of Irish/Celtic heroic literature in its historic and cultural context, this course examines the ideological, aesthetic, and personal uses to which that material has been put by Irish writers of the past two centuries (19th and 20th centuries) writing in English and Irish. Among the authors to be studied are: Seamus Heaney, Flann O'Brien/Myles na Gopaleen, Nuala Ní Dhomhnaill, and Eugene Watters/Eoghan ÓTuairisc. Particular attention will be paid to shifting concepts of authenticity and the degree to which various creative artists have retained, reinterpreted, or reinvented what they perceived to be the essence of their originals. This course will interest English majors, modernists and medievalists.

ENGL 40509. Modern Irish Drama

(3-0-3)

In this course, we will study both the drama produced by the playwrights of the Irish literary renaissance—Yeats, Synge, Lady Gregory, and O'Casey—and the political struggle for Irish independence that was taking place at the same time.

ENGL 40510. New Writing from Britain and Ireland: Contemporary Fiction

(5-0-3)

This course will introduce students to the contemporary fiction of Ireland, England, Scotland and Wales, as well as some of the best recent black British fiction. Some of the authors whose work we will read are: Pat McCabe, Neil Jordan, John Banville, Zadie Smith, Monica Ali, Andrea Levi, Irvine Welsh, James Kelman and Pat Barker. These writers will be read in the context of "the break-up of Britain" and a concomitant sense of the changes in British and Irish identity in the past twenty years or so.

ENGL 40511. Film, Literature, and Irish Culture

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)*Corequisite:* ENGL 41005

This course will examine some of the dominant images of Ireland in film and literature, and will place their development in a wider cultural and historical context. Comparisons between film, literature and other cultural forms will be featured throughout the course, and key stereotypes relating to gender, class and nation will be analyzed, particularly as they bear on images of romantic Ireland and modernity, landscape, the city, religion, violence, family and community. Particular attention will be paid to key figures such as Yeats, Synge, and Joyce, and contemporary writers such as John McGahern, William Trevor, Patrick McCabe and Roddy Doyle will be discussed in terms of the wider implications of their work for contemporary Irish culture. The resurgence of Irish cinema and new forms of Irish writing in the past two decades will provide the main focus of the second part of the semester, tracing the emergence of new distinctive voices and images in an increasingly globalized and multi-cultural Ireland.

ENGL 40513. Culture and Politics in Northern Ireland

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course explores the politics of culture, and the cultures of politics, in the north of Ireland during the twentieth century. Using a multiplicity of genres—drama, fiction, poetry, film, painting, and documentary material—we will

unravel the history behind partition, the causes of the Troubles, and the nature of the conflict. Among the key moments or events upon which we will concentrate are the Somme, the sinking of the Titanic, Bloody Sunday, the hunger strikes, Drumcree, the Anglo-Irish Agreement, and the Shankill Butchers. Certain key themes will stretch through our semester's work. Among these are sectarianism, the relationship between violence and culture, the role of religion in the state, borders, hatred, identity, and issues of social and political justice. Some of the writers whose work we will read are Seamus Heaney, Frank McGuinness, Sam Thompson, John Montague, Seamus Deane, Eoin MacNamee, Robert MacLiam Wilson, Colin McCann, and Thomas Kinsella.

ENGL 40514. The West of Ireland—An Imagined Space

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course interrogates and examines representations of the West of Ireland in various twentieth-century literary texts focusing, in particular on the role of “the West of Ireland” in state formation and legitimization during the early decades of independent Ireland and its role in the construction of an Irish identity. We will look at how images of the West of Ireland were constructed in various utopian or romanticized formulations as well as examining more dystopian versions. This course will take an interdisciplinary approach, drawing on the visual arts and film as well as on literary texts written in both Irish and English. (Irish language texts will be read in translation).

ENGL 40515. Contemporary British and Irish Fiction

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will introduce students to the contemporary fiction of Ireland, England, Scotland and Wales, as well as some of the best recent black British fiction. Some of the authors whose work we will read are: Pat McCabe, Neil Jordan, John Banville, Zadie Smith, Monica Ali, Andrea Levi, Irvine Welsh, James Kelman and Pat Barker. These writers will be read in the context of “the break-up of Britain” and a concomitant sense of the changes in British and Irish identity in the past twenty years or so. Expect a lot of reading, but also some superb novels. Two twelve-page papers and a presentation.

ENGL 40516. The Irish in Their Own Words

(3-0-3)

The purpose of this course is to introduce students to the richness and variety of literature produced in the Irish language during the medieval and early modern periods (we will cover primarily the period between approximately A.D. 800 and 1700). The emphasis in the first half of the semester will be on studying the mainly prose saga literature of the medieval period in its various literary, cultural and historical contexts. This will involve both a close reading of the texts themselves in English translation and an examination of the material in the light of recent scholarship in this area. The second half will investigate the literature of the early modern period, in this case largely the poetry. This period is one of cumulative crisis for the Irish and their linguistic and cultural well-being. Students read closely a selection of texts representative of various facets of this crisis and of Irish responses to them in their own language rather than in the English language of their colonizers. All the translations are accompanied by facing original text so that students gain some working knowledge of the Irish language, which will assist them in evaluating the translations that they are reading and in appreciating the sensuous beauty of much of this poetry. The material provides interesting contrasts and comparisons for those who have already studied some Anglo-Irish literature and it should also be of interest to students of modern Irish history.

ENGL 40518. Gender and Identity in Contemporary Irish Language

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will interrogate issues of gender and identity in the work of contemporary Irish language writers. We will examine the ways in which contemporary writers in Irish writing, from a constellation of identities, sexual, cultural and linguistic questions, explore these issues as they articulate them in specific cultural

forms. Drawing on recent theoretical work in gender studies and postcolonial studies the course will look at texts that question and analyze essentialist notions of cultural identity. It will explore in particular some of the tensions inherent in the articulation of a cross-cultural sexual identity and the specificity of linguistic and cultural inheritance in contemporary writing in Irish. We will read, among others, texts from writers such as Máire Mhac an tSaoi, Biddy Jenkinson, Nuala Ní Dhomhnaill, Pearse Hutchinson, Cathal Ó Searcaigh, Seán Mac Mathúna and Micheál Ó Conghaile.

ENGL 40520. Reading Ulysses

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A close analysis of James Joyce's *Ulysses*.

ENGL 40521. Late Modernist and Postmodernist Poetry

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

The distinction between late modernist and postmodernist has an ethical bearing, marked respectively by resistance to corruption and celebration of hybridity, although these strains may be mixed and politically intricate. This course considers the theories, assumptions and practice associated with work either riding or given by such ethical and political tension, notably by Barbara Guest, John Wieners, Susan Howe, Marjorie Welish, J.H. Prynne, Barry MacSweeney, Denise Riley and Lisa Robertson.

ENGL 40525. Gender, Genre, and The Short Story

(3-0-3)

This course discusses how representations of gender were explored in a survey of 19th- and 20th-century short stories from England, Ireland, France, Russia, and the southern United States.

ENGL 40526. Beckett, Theater and Visual Art

(3-0-3)

In this course we will read and watch Samuel Beckett's plays, read some of his art criticism and view work by artists he admired—where possible, we will seek out paintings by these artists in the L.A. area. As a dramatist, Beckett makes extensive use of painterly effects, both in stage design and in direction. We will be able to watch both TV productions of plays like *Krapp's Last Tape*, *Not I* and *Eh Joe* that Beckett himself closely supervised, and the newly-completed film versions of his plays (including *Waiting for Godot*, *Endgame*, and *Happy Days*) by directors that range from Neil Jordan and Atom Egoyan to Damien Hirst and David Mamet. Artists we will look at will include the Irish painter Jack B. Yeats (brother of W.B. Yeats), Bram Van Velde, the Dutch abstract painter, and Avigdor Arikha, the Israeli figurative painter and close friend of the writer from the late 1950s. We will, accordingly, read Beckett as dramatist in the context of the visual arts and their influence on his work, and learn to read visual material—painting, film, plays. We will try to understand Beckett both in the context of Irish drama and art (reading a little of the drama of Synge and W.B. Yeats) and in the context of the international avant-garde of which he was part. The dramas and visual material will be supplemented by a small number of critical works that will aid students in understanding Beckett's works. Students will be expected to do response papers and one longer research paper.

ENGL 40527. Of Guests and Aliens: Transnational Immigration and Politics of Multiculturalism in European Cinema

(3-0-3)

Corequisite: ENGL 41527

The globalization of capital and labor over the course of the 20th century, as well as innovations in technology, telecommunications and international travel has created a political, social and economic interdependence among nation states. This globalization, however, has created a paradox where the transnationalization of capital, and advances in communication and technology promote a porosity of borders which increases and even advocates the mobility of people, while at the same time individual nation-states consciously control their borders in an attempt to contain the presumed homogeneity of their cultures. This is particularly

evident in Europe, where European national borders have become unstable due to geopolitical changes like the fall of the Berlin Wall and the Balkan wars, and the constant growth of the European Union. This seminar will examine fundamental aspects of immigration in the European Union and the way this is represented in contemporary film. The course is loosely divided into four thematic units. The first will consider the paradox where on the one hand the European Union in its constant growth promotes a cosmopolitan, borderless society, while on the other hand it attempts to curb what it considers an invasion by the immigrant “other.” In the second unit we will examine the legacies of France’s and England’s colonial past and how second- and third-generation national subjects enrich and complicate the countries’ cultural terrains. In addition, we will also examine how the effects of Germany’s *gasterbeiter* (guest worker) program were initially represented in German cinema of the 1970s. In the third unit we will study how the immigration wave of the early 1990s affected the southern European countries of Spain, Italy and Greece, and how the massive influx of immigrants challenges each country’s preconceived notion of a homogeneously imagined community. We will spend the last part of the semester concentrating on subtler issues of nation, gender, politics and religion, and the possible solutions that directors offer in the beginning of the 21st century as a way of escaping the ideological and cultural impasse of the end of the 20th century.

ENGL 40529. Gender and Irish Drama

(3-0-3) Harris

This course will examine constructions of gender in the works of Irish playwrights.

ENGL 40530. Wilde and Synge: Art as Subversion

(3-0-3) Kiberd

Prerequisite: ENGL 30101 (may be taken concurrently)

On the surface Oscar Wilde and John Millington Synge seemed very different kinds of artist. Wilde won fame for his witty portrayals of the English aristocracy, whereas Synge was celebrated for his lyrical depiction of an impoverished Irish peasantry. Wilde pursued a career on the London stage and in high society, whereas Synge embraced a life of austerity and wrote for the nascent Irish national theatre in Dublin. Wilde was often dismissed as a mere entertainer, who was so fixated on his audience that he risked the alienation of his audience. Yet these products of Protestant Dublin had much in common: a fascination with fairy tales and folklore; an anarchist ideal in politics; a belief in the artistic value of lying and in the truth of masks; and a distrust of merely representational art. For both men art should be an improvement on rather than a reflection of nature, and they saw their writing as a utopian project, addressed not just to present realities but to future possibilities. This course will offer an in-depth reading of the work of Wilde and Synge, assessing the differing opportunities and constraints faced by playwrights in London and Dublin in the late nineteenth and early twentieth centuries. It will consider the ways in which both dramatists, by challenging their audiences and subverting traditional forms of art, helped to create a modern Irish literary movement.

ENGL 40535. Poetic Modernisms

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A survey of British and American modernist poets, with a particular emphasis on the aesthetic innovations made on poetry as a result of their works.

ENGL 40536. Screening the Irish Troubles

(3-0-3)

This course will look at how political conflict in Ireland from the 1916 Rebellion and the War of Independence up to and including what became known as “The Troubles” in the north of Ireland has been represented on the screen. Students will analyze a wide variety of cinematic texts, mainstream commercial Hollywood features as well as independent Irish and British films. Documentary film will also be analyzed. Certain seminal events such as Bloody Sunday and the 1981 Hunger Strikes, which have a diverse representational history on screen, will be given

particular attention. Among the films discussed will be *Mise Eire*, *Saoirse*, *Michael Collins*, *The Wind that Shakes the Barley*, *Some Mother’s Son*, *In the Name of the Father*, and *Bloody Sunday*.

ENGL 40537. Poetry in Irish Since the Revival

(3-0-3)

This course will examine the compelling poetry produced in Irish since the Gaelic Revival of the turn of the twentieth century running right up to very recent publications of the first decade of the twenty-first century. We will consider major authors whose influence on the tradition has been profound, more recent international stars, as well as emergent figures whose work is only very recently in print. Our method will be that *sine qua non* of literary study, close reading, the dogged and unsparing analysis of the inner workings of the text at hand, an enduring and essential skill for both scholars of liberal arts and the educated, thinking individual more generally. To this will we join attention to the sociocultural, linguistic and political context of the works, relating to the aftermath of Irish independence, economic hardship and emigration, the crisis of the Catholic church, transformations in gender and familial expectations, the Troubles in the north, and the new composition of Irish society with immigration and globalization. Poetry as well as selected criticism will be read in English.

ENGL 40538. Modern Irish Language Poetry in the 20th and early 21st Century

(3-0-3) Ni Dhomhnaill

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will use (often multiple) translations into English to chart the development of Irish language poetry in the 20th and early 21st century from rather meager beginnings as an instrument of the language revival movement to become a fully-fledged and highly sophisticated art form. The main poets of this period will be richly represented, and some lesser known talents will also be discussed in terms of sociological context. Though taught in English, the course will include detailed close analysis of key texts in the original Irish. This will be useful to students studying Irish, but knowledge of Irish is not mandatory for the course.

ENGL 40539. The Blasket Islands and their Literature

(3-0-3) Nic Dhiarmada

Prerequisite: ENGL 30101 (may be taken concurrently)

“The island of the Great Blasket lies three miles off the Kerry coast of Ireland, at the westernmost tip of Europe. Virtually unknown before this century, it was to produce a rich and extraordinary flowering of literature that has made it famous throughout the world.” Oxford University Press. This course will examine the phenomenon that is Blasket Island literature. Before its eventual desertion in 1953, the previous thirty years had seen the production of literary works by inhabitants of the Blaskets such as *An tOileánach!* *The Islandman* by Tomás Ó Criomhthainn; *Fiche Bliain ag Fás! Twenty Years A Growing* by Muiris Ó Súilleabháin; *Machnamb Seannbhad! An Old Woman’s Reflections* by Peig Sayers. This course will trace this remarkable flowering both to the immensely rich oral traditions of the island and the dynamic interplay of such literary and scholarly visitors as George Thompson and Robin Flower with the island authors. All texts will be read in translation.

ENGL 40540. The Irish Hunger Strikes

(3-0-3) Nic Dhiarmada

“We remember them with pride for on hunger strike they died these brave men were Ireland’s sons they were the men of ’81”—*Republican ballad*. “We’ll never forget you Jimmy Sands”—*Loyalist graffiti in East Belfast shortly after Bobby Sands’ death on hunger strike*. Thirty years ago, in 1981, Bobby Sands and nine other Irish republican prisoners died on hunger strike in the Maze Prison outside Belfast. Their deaths and the British response were pivotal in the history of the recent “Troubles.” It would hardly be an exaggeration to say that the fallout from the 1981 Hunger strike had the same momentous impact on nationalists and on Irish politics as had the executions of the leaders of 1916. This course will examine the 1981 hunger strike in the context of previous political hunger strikes in Ireland and will examine both its genesis, the strike itself and its aftermath. It will pay particular attention to the ways in which the political hunger strike and the 1981

hunger strike in particular is remembered and commemorated, drawing on the work of Paul Ricoeur among others. We will engage with a variety of texts and sources including memoirs, news reports, documentaries, film and songs.

ENGL 40545. The Modern British and Irish Short Story

(3-0-3)

This course will trace the generic development and changing structures of the short story form—there is more involved here than mere brevity—and will also provide a series of readings from the major British and Irish short story writers from the twentieth century. We will read from the short story theories of these individual authors, where such theory exists, and will examine the important connections between the form and the idea of a national literature. Writers will include: James Joyce, Frank O'Connor, Liam O'Flaherty, Mary Lavin, Kate Roberts, D.H. Lawrence and Virginia Woolf.

ENGL 40568. Women and Magazines

(3-0-3) Green

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will explore women's print culture by focusing on women as producers and consumers of periodicals. Some of the key figures in what is sometimes called a "female" modernism made their living by publishing literary pieces and journalism in periodicals or through serving as literary editors: Djuna Barnes, Rebecca West, Virginia Woolf, Jesse Fauset, to name a few; and many of the key texts of literary modernism made their first appearance in periodicals. In addition, the periodical press has been called the medium that best "articulates the unevenness and reciprocities of evolving gender ideologies" and thus is ideal for a study of the role literary culture plays in constructing and diagnosing the contradictions of femininity in modernity. The period between the coincident rise of the New Woman and New Journalism in the 1880s and the dominance of the "woman's magazine" in the interwar years is extraordinarily rich in examples of diverse approaches to understanding femininity presented in the press. As we consider the connections between women and periodical culture from various angles (reception, circulation, representations of women journalists, the centrality of Little Magazines, "slick" magazines and women's magazines as key venues for publishing modernist texts, etc.) we will meet the modern woman journalist and her close relations: female editors, "sob sisters," "stunt girls," "agony aunts" to name a few. We will take a good look at a variety of publication venues—modernist "Little Magazines," feminist periodicals, so-called "women's magazines" as well as the daily press. We will be working with periodicals in various formats: microfilm, digitalized texts, edited collections, and bound volumes. One brief essay, two mid-length (8- to 10-page) essays and one group presentation.

ENGL 40587. Literatures of the American Hemisphere

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

National borders mark our Americas today, but for the first European explorers the landscapes of their "new world" were uncharted and unbounded. The newly encountered land invited utopian dreams even as it became the arena for genocidal violence. To reconsider these moments of violence and possibility, we will approach early American literature intra-hemispherically, reading not just from the British colonial record, but also Spanish documents in English translation. We will read comparatively in order to ask key questions about American identity both then and now. For example, what do we learn when we juxtapose Cortés' invasion of the Mexican empire to King Philip's War in the New England colonies? To what degree do these legacies of imperialism still shape our modern world? What comparisons arise between the poetry of Anne Bradstreet and Sor Juana Inés de La Cruz; between the captivity adventures of Cabeza de Vaca and Mary Rowlandson? How might these contact points continue to shape our views of "others"? How have native nations across the Americas written or spoken the loss of worlds? The authors and subjects noted above will serve as key markers, but we will also read primary works by William Bradford, Bernal Diaz, John Smith, William Apess, and others as we reconsider the literatures and histories of the Americas in a cross-national paradigm. Students will be expected to write three short papers, take a final exam, and participate actively in class.

ENGL 40601. Voices of American Renaissance

(3-0-3)

A focus on the trope of "voice" as it shaped the literatures of the American renaissance period through an exploration of works by Emerson, Thoreau, Poe, Dickinson, Whitman, Douglass, Melville, Stowe, Hawthorne, and a number of lesser known authors and oral performers.

ENGL 40602. Tragedy: Shakespeare and Melville

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

In this course we will read some of the great tragic works in the English language, indeed, in all of literature. Our syllabus will cover four plays by Shakespeare and Melville's finest achievement, *Moby-Dick*. As the course title suggests, we will study these works in the context of their historical moments and in the context of tragedy as a genre. Reading *Moby-Dick* after Shakespeare will also enable us to witness in detail the nature of literary influence and to compare the tragic visions of Shakespeare and Melville as they explore such themes as good and evil, freedom and fate, and the individual and society. As we study these texts, we will consider the various reasons for their important place in the literary canon. Ultimately, let us make the most of our time together with works of art that are timeless in their beauty and ever timely in their relevance, works that continue to teach and to delight. Assignments include four essays (3 to 4 pages), a final exam, an oral presentation, and a daily question or close reading on the assigned text.

ENGL 40603. Realism and Naturalism in American Literature

(3-0-3)

An examination of American literature between the Civil War and World War I in relation to the literary movements known as realism and naturalism.

ENGL 40604. Nature in American Literature

(3-0-3)

A study of the role of nature in the work of American writers of the nineteenth century.

ENGL 40605. The American Scene

(3-0-3)

"To make much so much money that you won't, that you don't mind, don't mind anything—that is absolutely, I think, the main American formula." Henry James, *The American Scene*, 1907. "Greed, for lack of a better word, is good, is right, it works ... and it will save that malfunctioning corporation called the U.S.A.," Gordon Gecko, *Wall Street*, 1987. After a 20-year absence, Henry James returned to America to examine the country of his birth. His tour brought him to the above quoted and dismaying conclusion. This course tries to contextualize and understand James's remark by placing it within a broader atmosphere of late 19th- and early 20th-century American culture. We'll look at works that predate, are contemporary with, and follow James's American tour. We'll look at works of literature and biography, of politics and philosophy, and of theology and economics. Throughout, we will keep circling around and back to James's notion of "The Main American Formula" and asking not only what exactly he meant, but how other major thinkers of the age understood or conceived of an "American Formula," and how that formula could be measured at the level of the individual, the corporation, the country, and, with Conrad's *Nostromo*, the world. Readings will include works of the following authors: Joseph Conrad, Theodore Dreissner, Henry Ford, Henry James, Theodore Roosevelt, Thorstein Veblen, and Edith Wharton. In addition, we will view several movies whose focus is directly related to the course's central questions.

ENGL 40606. Mark Twain

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A study of Twain's life and writings in light of the history of ideas and the literary, political, philosophical, and religious currents of nineteenth-century American culture. We will also consider such figures as Harte, Stowe, Douglass, and Lincoln, who illuminate Twain's style and social and moral preoccupations. Special concerns: Twain's place in the tensions between conventional literary forms and

the emerging American vernacular; his vision and critique of American democracy, slavery, exceptionalism, and later geopolitical expansionism; his medievalism, including *Joan of Arc*, and larger interpretations of history; his treatment of women, individualism, and the family; and the later Gnosticism of *No. 44, The Mysterious Stranger*. We will also address the current (and perennial) discussions of unity and pluralism in American culture, as in Garry Will's delineation of an underlying American identity in *Under God*, and Arthur Schlesinger, Jr.'s fear of "balkanization" in *The Disuniting of America*. Readings: selected shorter works, including *Diary of Adam and Eve; Innocents Abroad; Life on the Mississippi; Tom Sawyer; Huckleberry Finn; A Connecticut Yankee; Pudd'nhead Wilson; No. 44, The Mysterious Stranger*; and selections from the *Autobiography*. Students will be expected to write a series of brief, incisive papers and a longer critical paper.

ENGL 40607. Early American Literature

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Close readings of selected 17th- and 18th-century American literature.

ENGL 40608. Novels of American Naturalism

(3-0-3)

Prerequisite: ENGL 30101

In this course we will undertake a comparative survey of twentieth-century American naturalist novels, tracing a trajectory from turn-of-the-century texts by Norris, Chesnut, and Dreiser, to the neo-naturalist fiction of a few decades later that operated alongside developments in modernist literary form (Stein, Wright), and concluding with a look at its postwar resurgence in the novels of authors such as Don DeLillo and Cormac McCarthy. We will also discuss the return to these novels in recent films including *There Will Be Blood* and *No Country for Old Men*. Students will be asked to write one short formal analysis and two mid-length papers, in addition to regular discussion assignments.

ENGL 40609. Dilemmas of American Transcendentalism

(3-0-3)

America's first great literature, and its first great reform movement, were born together just before the Civil War in the group of writers named "the Transcendentalists." The name was intended to mock their romantic ideas, but it stuck, and with it has come 150 years of debate. Were they fired more by religion, literary ambition, or social reform? Were they American nationalists or international cosmopolitans? While some of them—Emerson, Thoreau, Fuller, Alcott—wrote some great books, and they inspired the likes of Hawthorne, Whitman, Poe and Melville, their goal was not to write great literature but to change the course of American society. Did they succeed? We may not settle this debate, but in taking it on, we will find haunting lessons for our own time as well. Readings to include selected essays by Emerson, Brownson, and Fuller, Thoreau's *Walden*, poems by Whitman and Dickinson, Hawthorne's *Blithedale Romance*, Louisa May Alcott's *Little Women*, and a variety of shorter readings by a range of supporters, participants, and detractors.

ENGL 40610. Studies in American Literature

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

Special topics in the history of American literature.

ENGL 40612. Literature and Democracy in the 19th Century United States

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A survey of 19th-century American literature, emphasizing the efforts of American writers to identify and define "democracy" and the "democratic citizen."

ENGL 40613. Mexican-American Fiction

(3-0-3) Limon

Prerequisite: ENGL 30101 (may be taken concurrently)

In 1542 the Spanish explorer, Cabeza de Vaca, published his *Relacion*, an imaginatively elaborated account of his long trek through what is now the U.S. Southwest after being shipwrecked on the Texas Gulf Coast. With its occasional imaginative elaborations, some critics, in a perhaps overstated fashion, have suggested that the *Relacion*, with its themes of adversity, conflict and the "other," may be the first instance of an American literature largely set within what are now the boundaries of the United States. In later centuries and into our own time other literary examples set in the Southwest appeared from writers of Spanish and later Mexican heritage, literature written in Spanish. However, the nineteenth century brought four new inter-related developments: the incorporation of the Southwest officially into the United States; the identification of its resident and immigrant Spanish/Mexican peoples as citizens of the United States; the continuation of literary work from such peoples but now also written in English; and finally, the clear emergence of fiction within this literary discourse. This course will closely examine several examples of such English-language fiction from the nineteenth century to the present. For demographic reasons, the largest and most artistically and culturally significant work has come from the states of Texas and California, and therefore we will restrict our inquiry to those bodies of work, but we will do so in an inter-regional comparative fashion. Among others, our writers will include early authors such as Jovita González, María Amparo Ruiz de Burton, Américo Paredes and José Antonio Villarreal and later writers such as Tomás Rivera, Helena María Viramontes, Sandra Cisneros and Oscar Casares.

ENGL 40614. The Nineteenth-Century American Novel

(3-0-3) Staud

In this course we will read, discuss, and study selected American novels of significant importance within the 19th century, a time when the questions of what constitutes an authentically American literature preoccupied many authors seeking to fashion and interrogate a specifically American tradition. As we situate these novels within their historical and cultural contexts, we will consider the various reasons for their place within the canon of American literature, with an eye toward understanding better the works themselves and exploring several recurring themes of particular concern for American writers (freedom, democracy, American identity and national destiny, slavery and the problem of race, to name a few). At the same time, we will scrutinize the very nature of the literary canon and reflect on the nature and significance of this, or any, reading list. Even so, we will see that these authors share deep engagement with ideas and themes common to American literature and do so, through their art, in ways that seek both to teach and to delight. Authors we will study include Sedgwick (*Hope Leslie*), Douglass (*Narrative of the Life of Frederick Douglass, an American Slave*), Melville (*Moby-Dick*), Stowe (*Uncle Tom's Cabin*), Twain (*Huckleberry Finn*), and Chopin (*The Awakening*).

ENGL 40615. Conflict and Democracy in Classic American Literature

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

In his influential study *Democracy in America*, Alexis de Tocqueville described the United States as an unprecedented experiment in political democracy that would soon reshape the world. Tocqueville particularly noted the prominence of deliberative bodies, which ranged from town hall meetings, to voluntary associations, to local, state, and national legislatures, where social concerns could be addressed and conflicts peaceably resolved. He also observed the exclusion of many people—women, African Americans, Native Americans—from those deliberative bodies and anticipated some of the difficulties that would arise from those exclusions. In this class, which is cross-listed with the Peace Studies program, we will read iconic works of American literature that explore the main social conflicts of American history, including poverty and class difference, colonialism and westward expansion, slavery and racism, prejudices regarding gender and sexuality, religious difference, environmental degradation, and war. Beginning with colonial-era and early national statements about the good society, we will trace the themes of conflict and democracy through classic literary works that centrally and explicitly

engage the problem of how best to democratically resolve differences. Conflict is an essential element in all plots. What distinguishes this class is its focus on works that foreground the rich experiential and social sources of major conflicts and that explore the means to resolve them in a manner that respects democratic ideals. Our readings will include social and political writings such as James Madison, selections from *The Federalist Papers*; Judith Sargent Murray, *On the Equality of the Sexes*; Daniel Webster, *The Second Reply to Hayne* (opposing nullification and defending deliberative democracy); David Walker, *An Appeal to the Coloured Citizens of the World*; and William Apess, *An Indian's Looking-glass for the White Man*. We will also read a number of novels, which are likely to include James Fenimore Cooper, *The Last of the Mohicans*; Harriet Beecher Stowe, *Uncle Tom's Cabin*; Upton Sinclair, *The Jungle*; Ernest Hemingway, *A Farewell to Arms*; Ralph Ellison, *Invisible Man*; Norman Mailer, *An American Dream* (with a response by Kate Millet from *Sexual Politics*); Joan Didion, *Democracy*; and Leslie Marmon Silko, *Ceremony*.

ENGL 40616. American Literature in the World

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

In this course we will consider the place of American literature in global society. Our readings will span from the Puritans through the present, and we will focus our interpretations around the theme of conversation.

ENGL 40650. Twentieth-Century American Feminist Fiction

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

In this course we will read a number of works, by both women and men, which may be described as feminist fiction. In so doing, we will raise issues about the relation of aesthetics to politics, about the process of canonization, and about aesthetic integrity. Ultimately, we will also be examining the place of women within American culture during the twentieth century—how it has changed, how it has remained the same. At the end of the course, students should feel that they have discovered a new body of exciting literature, as well as new ways of reading some of our best-known literature. Texts: Kate Chopin, *The Awakening*, Edith Wharton, *The Age of Innocence*, Zora Neale Hurston, *Their Eyes Were Watching God*, William Faulkner, *The Sound and the Fury*, F. Scott Fitzgerald, *The Great Gatsby*, Alice Walker, *The Color Purple* and *The Temple of My Familiar*; Toni Morrison, *Sula* and *Song of Solomon*; possibly Elizabeth Dewberry Vaughn, *Many Things Have Happened Since He Died*. Requirements: Two papers, a mid-term, and a final examination (25% each).

ENGL 40651. Atmospheric: Twentieth-Century Fiction

(3-0-3)

What do we mean when we say that something is “in the air”? Are we referring to messages transmitted over a broadcast network, the foment of revolution, the shifting winds of fashion, or a powerful critical trend? In this course, we will take up the atmospheric quality of each of these forms of cultural transmission as they appear in American fiction. In doing so, we will ask how they provide models of reading, receiving messages, and decoding information. Surveying a broad range of twentieth-century fiction through to contemporary digital narratives, we will discuss both technologies and techniques for “tuning in” to broadcast media, mass movements, and ideologies. What happens to the persons populating fictional narratives when they participate in, or are even constituted by, their relations to these communication networks? This course will survey a series of prose works from the American twentieth century, beginning with turn-of-the-century spiritualism and broadcast aesthetics (Du Bois, Adams, Hopkins), moving to the realm of fashion, contagion and the zeitgeist (West, Porter, Cather), taking up the spirit of revolution in the sixties (Didion, Pynchon, rock), then discussing the idea of the “turn” in academic study through re-readings of James’ *The Turn of the Screw*,

and finishing with the future of the broadcast in what is sometimes referred to as “liquid modernity” (Markson, Baker). Short readings from media and cultural theory will accompany each topic. Students will be asked to put pressure on their conceptions of how the interaction styles that accompany media in the twentieth century and beyond might influence, derive from, or appear in the particular medium of literature across multiple flashpoints in the histories of technology and literary innovation. They will develop critical frameworks for analyzing media and narrative forms together, and use this attention to form to ask questions about the boundaries of modern selfhood and the consequences of information movement throughout the twentieth century and through to our contemporary moment.

ENGL 40701. The American Novel

(3-0-3)

A consideration of the forms and preoccupations of selected 19th- and 20th-century American novels, with special attention to their major ideas and moral concerns.

ENGL 40702. American Film

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A look at what makes a film American. The course will be structured by pairing films from the classic period with films from the more recent past, in order to highlight essential features, particularly genre characteristics, the work of directors, and the performance of “stars.” Possible films: *It Happened One Night*, *French Kiss*, *The Lady Eve*, *Double Indemnity*, *Body Heat*, *Basic Instinct*, *Zero Effect*, *Shane*, *Unforgiven*, *The Man Who Shot Liberty Valance*, *Die Hard*, *The Godfather*, *Bound*, *Silence of the Lambs*, *Crimes and Misdemeanors*, *Don Juan de Marco*, *Moulin Rouge*, *Crash*, *The Hours*, *The Maltese Falcon* and others.

ENGL 40703. Poetry and Pragmatism

(3-0-3)

An exploration of the complex relationships between poetry, philosophy, and science at the end of the 19th century and the beginning of the 20th century through American poets as evinced in the works of Emily Dickinson, Robert Frost, and Wallace Stevens.

ENGL 40705. Kerouac and the Beats

(3-0-3)

This seminar will re-examine Kerouac and his prose in relation to Beat subculture and the larger context of post-World War II American society. Although the work of other Beat writers, such as William S. Burroughs, Allen Ginsberg, and Gary Snyder will be considered, the primary focus will be on Kerouac. Moreover, the seminar will question the cultural codification of Kerouac as “King of the Beats” and advance the notion that he was a prose artist on a spiritual quest. Or, as Ginsberg aptly put it—an “American lonely Prose Trumpeter of drunken Buddha Sacred Heart.”

ENGL 40706. Lost Generation

(3-0-3)

This course studies the writings of authors, mostly Americans, who achieved prominence in the 1920s: Hemingway, Fitzgerald, H.D., Stein, Cummings, Hughes, and others.

ENGL 40707. Experimental Writing by Contemporary Women Poets

(3-0-3)

Close readings of selected contemporary experimental women poets.

ENGL 40708. Poetry and Performance

(3-0-3)

Artists are taking on many of the most crucial questions of our time, in ways that offer insight into what’s happening to us and that propose models for what to do about it. In this course, we investigate the meeting ground of poetry, conceptual art, and performance, not only through reading, discussion, and writing, but

also through seeing live performances and videos and through doing our own performance art. What this class requires is an open, exploratory mind and a keen spirit of fun. Caution: exposure to the avant-garde can be habit-forming.

ENGL 40709. The American Novel Between the Two World Wars
(3-0-3)

This course pays particular attention to the different social contexts from which narratives emerged in order to see how novels participated in the contemporary cultural and political debates. Each of these works probes some defining notion of American identity, asking who or what constitutes “America.” We will also attend to that question by discussing each narrative’s formal characteristics and how they meet the author’s aims.

ENGL 40710. Some Strains in Twentieth-Century American Fiction
(3-0-3)

This course studies the interconnections among six of our best fiction writers of the last century, tracing the dynamic aesthetic and moral development of American fiction from Fitzgerald through Hemingway, Faulkner, Hurston, and Walker to Morrison.

ENGL 40711. Women’s Autobiography
(3-0-3)

A close analysis of women’s life narratives and poetry, based on the following questions: How do women’s narratives affirm or challenge cultural norms? How do concepts such as “high” and “low” art impact the reading of women’s autobiographical literature? And can lines be drawn between fiction and nonfiction when studying autobiography?

ENGL 40712. American Fiction
(3-0-3)

A close examination of major mid-20th-century American novelists.

ENGL 40715. American Religious Imagination
(3-0-3)

Beginning with Ralph Waldo Emerson and ending with Harold Bloom, how Christianity has been refigured in America.

ENGL 40719. Hemingway and Walker: A Comparative Study
(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A comparative study of the fiction of Ernest Hemingway and Alice Walker, with particular emphasis on gender, class, and historical issues explored in each author’s works.

ENGL 40720. Poetry and Painting in Manhattan 1950–1965
(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course approaches the poetry and painting of Manhattan during its rise to international pre-eminence as an artistic center through the work and friendships of Frank O’Hara (1926–1966), poet and curator at the Museum of Modern Art. It introduces the New York School of poetry, referring to visual art from de Kooning to Warhol with side glances at film, photography, music and dance. The course will develop primarily through reading poems, although students will be directed to the critical and historical context. Readings will draw on *The Collected Poems of Frank O’Hara* (ed. Donald Allen); John Ashbery, *The Mooring of Starting Out*; Ted Berrigan, *The Sonnets*; and a course pack. Course requirements are written analyses of poems (every two weeks), a final exam, and a 5- to 7-page paper.

ENGL 40721. Some Strains in 20th Century American Fiction
(3-0-3)

Beginning with F. Scott Fitzgerald’s *Jazz Age* and ending with Toni Morrison’s *Jazz*, a study of thematic commonalities and dissonances in selected 20th-century American novels.

ENGL 40722. Latino/a Literature and Visual Culture

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

In this course, students will study traditional, folkloric, biographic, and religious texts alongside contemporary Latino/a visual and literary texts that offer new versions of old tales. In thinking about how texts exist in relation to other texts, students will consider the newness and “Latino/a-ness” of Latino/a literature as well as its emergence amidst the social, cultural, artistic, and political shifts in the latter half of the twentieth century.

ENGL 40725. Class, Labor, and Narrative

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

An exploration of short stories and novels depicting the “working stiff” in the U.S. from 1920 to the present. Our reading list will include many of the usual suspects (James Farrell, John Steinbeck, Richard Wright, Nora Zeale Hurston, William Saroyan, Langston Hughes, Grace Paley, Tillie Olsen, and Raymond Carver); writers not usually associated with labor (Jean Toomer, Gertrude Stein, and Donald Barthelme); and contemporary writers (Sherman Alexie, Sandra Cisneros, Aleksandar Hemon, Edwidge Danticat, Juno Díaz, Gish Jen, and George Saunders). We’ll question the representation of labor, laborers, and class differences, and we’ll also pose aesthetic questions: What narrative forms most provocatively explore particular kinds of work? What work do experimental texts perform that more conventional narratives cannot (and vice versa)? Many of the theorists we’ll rely on for insights about workers, class, and writing (Tillie Olsen, James Agee, and Barbara Ehrenreich) make good use of narrative themselves, and will help us contemplate how writing about labor can also reflect the labor of writing. Short response papers, group presentation, midterm, and a final project.

ENGL 40727. The American Novel, 1929–Present

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This seminar will explore representative works of U.S. fiction ranging from modernist classics through post-WWII works and contemporary novels emphasizing issues of multiculturalism. The course will be reading-intensive, and will emphasize close-reading skills, cultural analysis and historical contexts for each novel. Students will write three papers that are expected to perform literary analysis and integrate historical readings and/or literary theory from library reserves. As always, drafts are welcome and encouraged.

ENGL 40731. American Novel

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A survey of selected 19th- and 20th-century American novels.

ENGL 40735. Witnessing the Sixties in America

(3-0-3)

Beginning with a review of post-World War Two authors, a close analysis of both fiction and nonfiction written in America in the 1960s, with a particular emphasis on the Vietnam experience and the development of the counter culture.

ENGL 40736. Harlem’s Americas

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

What was the Harlem Renaissance? While traditional notions of this time in literary history have conceived of it as a brief but luminous flowering of the arts in African-American culture, not so much attention has been given to the many different voices that contributed to the movement, and which shaped its representations of race in the early twentieth century. In this course, we will examine the meaning and significance of the Harlem Renaissance as conventionally understood, then move on to an exploration of Harlem’s Americas, or the many cultural locations from which race and racial representation were being considered both inside and outside the movement’s accepted parameters. Thus, rather than studying the Harlem Renaissance solely as an African-American phenomenon, we’ll also explore the interrelationships between a number of its core works, along

with several others from the same period not generally studied in this context. In seeking to understand the writing of Harlem's Americas, we'll investigate how all of the texts we examine are engaged in a larger dialogue on the meaning of race in the early twentieth century, both in the United States and beyond. In so doing, we'll try to gain a deeper understanding of the complexity of the Harlem Renaissance, while considering what this may have to tell us about race and racial representation, not only in the early twentieth century, but on into the twenty-first. Course texts: Booker T. Washington, *Up From Slavery*; W.E.B. Du Bois, *The Souls of Black Folk*; Jessie Fauset, *Plum Bun*; Nella Larsen, *Quicksand & Passing*; Sherwood Anderson, *Dark Laughter*; Jean Toomer, *Cane*; Carl van Vechten, *Nigger Heaven*; Claude McKay, *Home to Harlem*; Anna Julia Cooper, *A Voice from the South*. Course requirements: Three five-page essays, in-class writing, 20-minute group presentation.

ENGL 40737. The Rhyming Apparatus: African-American Poetry and Poetics

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

An examination of poetry and poetics by black Americans from the beginnings to the present.

ENGL 40739. American Fiction since 1945

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Many contemporary writers began long and productive careers during the decades after the second world war. In this course we will study some of them, using representative texts to try to work out an aesthetic of the time. We will need to look at questions of personal identity, as they embrace spiritual, sexual, social, and racial dimensions. And we will also give close attention to the elasticity of the novel form itself. A very tentative reading list: Ralph Ellison, *The Invisible Man*; Richard Brautigan, *Trout Fishing in America*; Kurt Vonnegut, *Slaughterhouse-Five*; Saul Bellow, *Herzog*; John Barth, *Lost in the Funhouse*; John Updike, *Rabbit Run*; Anne Tyler, *Dinner at the Homesick Restaurant*; Walker Percy, *The Second Coming*. There will be a mid-term and final as well as an independent paper on a novel selected by each student.

ENGL 40741. The Sacred and the Divine in Latino/a Literature

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

An examination of faith, religion, the sacred, and the divine in selected Latino/a writings.

ENGL 40742. Migrating Melodramas: Latino/a Literature and Popular Culture

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course examines how various forms of popular culture from Latin America and the Caribbean migrate to the U.S. and are reappropriated by Latina/o cultural producers. Focusing particularly on theories of melodrama as a feminine discursive space, we will analyze several works of Latina/o literature that underscore women's active interpretation of music, film, and television. While this is a literature-based course, students will also examine how hybrid cultural products such as contemporary boleros, films, and telenovelas produce a transnational imaginary that connects Latinas/os in the U.S. with Latin America and the Caribbean. We will read novels such as *Loving Pedro Infante* by Denise Chavez, *The Mambo Kings Play Songs of Love* by Oscar Hijuelos, and *Tomorrow They Will Kiss* by Eduardo Santiago.

ENGL 40744. Southern Fiction

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Readings in twentieth-century southern fiction from 1900–1960, including Kate Chopin, Jean Toomer, William Faulkner, Richard Wright, Zora Neale Hurston, Ralph Ellison, Flannery O'Connor, and Eudora Welty. We will examine both the recurring subjects of the Jim Crow era—"sin, sex, and segregation," in the old

Southern phrase—and the stylistic innovations of the writers. We'll pay special attention to contemporary criticism that explores the period from historical, political, and cultural perspectives.

ENGL 40745. Perspectives on Nature and Environment in America

(3-0-3)

Throughout American history, those who took a hand to alter nature—or raised one to preserve it—have rarely been concerned exclusively with the continent's ecosystems. Rather, they saw themselves as advancing lofty ideals, such as progress or freedom. After a general introduction to American environmental history, this course examines how nineteenth- and twentieth-century American explorers, activists and writers have understood our alterations to landscape and river, and what the stakes are for modern environmentalists who seek to preserve what wilderness remains.

ENGL 40747. Contemporary American Women Poets

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Although the range and productivity of American women writers over the last two centuries has been enormous, the proliferation of extremely accomplished and important women writers has virtually mushroomed in the last few decades, embracing leading poets (such as Elizabeth Bishop and Adrienne Rich), leading novelists (such as Alice Walker, Joyce Carol Oates, and Toni Morrison) and altogether new voices (such as the Chicana poet Lorna Dee Cervantes, the Asian-American novelist Amy Tan, and the Native-American Susan Power, to name only a few). To narrow the range of this explosive development in American literature, we will primarily focus on the work of women written in this country after WW II, with special interest on the last two decades. In addition to a small sampling of a number of different writers to be found in our class reader, we will ultimately focus on seven writers: Elizabeth Bishop (poetry), Adrienne Rich (poetry and essays), June Jordan (poetry and essays), Amy Tan (fiction), Lorna Dee Cervantes (poetry), Susan Power (fiction), and Sandra Gilbert (poetry and essays).

ENGL 40748. Engendering Renaissance: Chicago, Harlem and Modern America(s)

(3-0-3) Johnson-Roullier

In answering the question, "What was American modernism?" most literary critical perspectives might commonly be expected to focus on a modernity represented by the authors of the "lost generation" in the U.S., such as F. Scott Fitzgerald, Gertrude Stein, and Ernest Hemingway. While a conventional understanding of American modernism might serve to underscore the importance of the stylistic, cultural and artistic contributions of these and other canonical moderns, such a view might also give little consideration to the significance of those modern American voices not ordinarily heard in such a context. This course poses the question, "What was American modernism?" to answer it by exploring its roots in two less conspicuous early 20th-century American modernisms: the Chicago Renaissance of 1912–1925, and the Harlem Renaissance of 1920–1929. In "engendering renaissance," these two moments suggest a literary birth and rebirth of modern American identity that questions its seemingly stable boundaries and borders, reconfiguring the idea of "American" within and opening the door to the larger and more varied cultural fabric that is modern America(s). By locating the rise of American modernism in the relation between these two literary moments, this course will broaden our understanding of the idea of "American" at this time by considering how it is created within a frame determined by the interplay of race, gender, class and nation. In this way, it seeks to deepen our understanding of U.S. American culture and the idea of "American" in the early 20th century, while suggesting new ways to engage the global social and cultural challenges facing the idea of "American" in the 21st. Course requirements: two 5–7 page papers, group presentation, several short in-class writing assignments. Course texts: Required texts may include Walt Whitman, *Song of Myself*; Jose Marti, *Our America*; Henry Blake Fuller, *The Cliff-Dwellers*; Theodore Dreiser, *Sister Carrie*; Willa Cather, *The Song of the Lark*; Waldo Frank, *Our America*; Sherwood Anderson, *Winesburg, Ohio*; Randolph Bourne, *Trans-National America*; Booker T. Washington, *Up From*

Slavery; W.E.B. Du Bois, *The Souls of Black Folk*; Anna Julia Cooper, *A Voice From the South*; Jean Toomer, *Cane*; Jessie Fauset, *Plum Bun*; Nella Larsen, *Quicksand & Passing*.

ENGL 40749. Fictions of Vietnam: The War in the American Literary Imagination

(3-0-3)

More than thirty years after its official conclusion, the Vietnam War remains a specter that continues to haunt the sphere of American political and cultural discourse. Though it is often cited as a foundational moment in modern American history, these persistent and often conflicting references to the “lessons of Vietnam,” the “legacy of Vietnam,” or even “the Vietnam Syndrome,” suggest that, even now, we may have to yet to fully come to terms with the American war in Indochina—that we remain fundamentally uncertain about its real cultural meaning. If Vietnam can indeed be considered a kind of national trauma, then have we as a nation ever really been able to move on? This course will examine how American writers have attempted to assign some kind of meaning to the American experience in Vietnam and to put that experience in conversation with a broader narrative of American history. It will call attention to the ways in which the subject of the Vietnam War compels these writers to revisit certain fundamental themes—the question of American identity, American exceptionalism, the morality of violence and war, identity and the definition of self, our relationship to nature, the Puritan “errand in the wilderness”—that have always been at issue in American literature. In addition to dealing with the work of several of the standard, or canonical, commentators on Vietnam—Tim O’Brien, Larry Heinemann, Philip Caputo, Graham Green, John M. Del Vecchio—this course will also look at some of the more recent attempts to revisit the legacy of Vietnam undertaken by writers such as Denis Johnson and Bobbie Ann Mason within the past decade.

ENGL 40752. Novels by Aliens

(3-0-3) Marshall

This course will constitute a study of the strange narrative creatures populating the contemporary novel, “persons” who are something close to but not quite human. These characters and narrators are sometimes slight genetic modifications of the traditional human, cognitive beings existing after traditional comforts such as history, or victims of technological trauma who think just a little bit differently than what we are accustomed to. By examining these novels and their techniques for rendering the interiority of such characters, we will also begin a survey and discussion of how key texts in narrative theory might be accountable to the perspectives forming each text’s experiment with fictional form. By doing so, we will also consider the alienation that always goes along with reading novels in the twenty-first century. Texts will include Kazuo Ishiguro’s *Never Let Me Go*, Michel Houellebecq’s *The Elementary Particles*, David Mitchell’s *Cloud Atlas*, Tom McCarthy’s *Remainder*, Cormac McCarthy’s *The Road*, and others.

ENGL 40753. Contemporary U.S. Novel

(3-0-3)

This course is devoted to the last decade of U.S. fiction. Its aim is to provide an overview of currently developing—and often competing—trends in contemporary literature and to offer a preliminary theorization of the literary-cultural present in the United States. To this end, we’ll read a bit of theory and six American novels published since 1996. These texts present an array of responses to the changing cultural landscape of what we might call late postmodernism, a period concerning which there is as yet little critical consensus. The books we read will provide us with material for an emerging understanding of what this moment and its aesthetic production look like; the ways in which they embrace, differ from, and reject the cultural dominants of postmodernism proper; the paths they suggest for twenty-first century fiction; and the ways in which they adapt and redeploy earlier cultural forms. By the end of the semester, you will be in a position to offer your own analysis of contemporary cultural production and to speculate on the future of American literature. Note that the reading load will be fairly heavy, especially during the first half of the semester. Primary readings: David Foster Wallace, *Infinite Jest* (1996, 1104 pp.); Barbara Kingsolver, *The Poisonwood Bible* (1998, 576 pp.); Uzodinma Iweala, *Beasts of No Nation* (2005, 142 pp.); Jonathan

Safran Foer, *Extremely Loud and Incredibly Close* (2005, 368 pp.); Junot Díaz, *The Brief Wondrous Life of Oscar Wao* (2007, 352 pp.); Rivka Galchen, *Atmospheric Disturbances* (2008, 256 pp.).

ENGL 40754. American Poetry After 1945

(3-0-3)

A survey of American poets and poetry after World War Two.

ENGL 40755. California Culture at Mid-Century

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course explores how poetry took a leading role among the arts in California at mid-century, creating a California culture that through the Beats and the Hippies became a national and international phenomenon. We begin by looking at collage, the dominant form of the arts in California, and then consider how collage meets up with four main elements of the California aesthetic: surrealism, mysticism, jazz, and anarchism. The primary poets we read and hear are Robert Duncan, Gary Snyder, Allen Ginsberg, Bob Kaufman, and D.J. Waldie. Alongside these poets, we will look at Jack Kerouac’s novel *The Dharma Bums*, artists like Jess, Wallace Berman, Bruce Conner, Joan Brown, and Jay DeFeo, and filmmakers like Kenneth Anger and Stan Brakhage. Students will gain the ability to do interdisciplinary work in the arts, to read complex contemporary poetry, and to relate art movements to the culture that surrounds them. Requirements include essays and a final exam.

ENGL 40756. American Women Writers

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

A survey of American women writers from Chopin to present.

ENGL 40757. Autobiography and the National Narrative

(3-0-3)

This course will explore 20th-century African-American autobiography in order to consider how personal narratives of freedom, struggle and development engage with dominant narratives of success and individualism. What is the relationship between individual and collective memories? If narrative is the way we come to understand the world we live in, how do Ida Wells, Richard Wright, Claude Brown, Malcolm X, Charlayne Hunter Gault, Maya Angelou and others represent African-American experience and complicate the site of memory? This course will entail archival research.

ENGL 40759. First Books/First Looks: Contemporary American Poetry

(3-0-3)

This course will be an exploration of African-American poetry as seen through the lens of the first books of some of the best known and read writers in the African-American canon. Some of the poets we may be reading include Phyllis Wheatley, Langston Hughes, Countee Cullen, Gwendolyn Brooks, Amiri Baraka, and Natasha Trethewey, among others. Students should expect to read at least 7 books, write a short report on each poet we read and the era they represent, and a long final paper on some aspect of African-American poetry touched upon in our reading.

ENGL 40760. African Americans in U.S. Society and the World: Thinking With W.E.B. Du Bois

(3-0-3)

How might thinking of the African American increase our understanding of U.S. society’s diversity and its relation to the modern world? If such a task could be addressed by looking at the work of one thinker, who would it be? This course offers writer and philosopher W.E.B. Du Bois as one avenue to answering these

questions. Not only did Du Bois predict that the problem of the twentieth century would be the “problem of the color line,” and study for his Ph.D. at the University of Berlin and Harvard University in the 1890s; not only did he found the NAACP and gained the respect of thinkers and activists like Martin Luther King and Albert Einstein; W.E.B. Du Bois was also a prolific writer of philosophy, fiction, correspondence, editorials, novels, and lectures, resulting in a 70-year career and over 175,000 pages of published and unpublished writings. This course will only read (and, in some cases, view or listen to) some of the key moments in Du Bois’s intellectual career, primarily *Souls of Black Folk*, *John Brown*, *Dark Princess*, selections from *Black Reconstruction* and *Darkwater*. We will examine how he reconfigured philosophical concepts, literary genres and tropes in specific contexts to think in innovative ways about African Americans and our modern world in general. We will also contextualize Du Bois in relation to national and international figures in Europe, Africa, and Asia. Ultimately, we will consider how his ideas can inform critical thinking about the present. Grades will consist of class participation and writing assignments based on particular themes that encountered in Du Bois’s thought.

ENGL 40761. American Culture as Collage

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

One of the exciting aspects of American culture is that we make it up as we go along; there is no historical or traditional or divine template that we all agree to follow. Without a template, American artists and thinkers have often resorted to a “kitchen-sink” approach to representing American culture, which begs the question of how to create a form to contain all the marvelous odds and ends. We will trace this urge to capture American culture through the form of a collage in R.W. Emerson’s essays, H.D. Thoreau’s *Walden*, T.S. Eliot’s *The Waste Land*, Gertrude Stein’s *Tender Buttons*, Ezra Pound’s *Cantos*, Harry Smith’s *Anthology of American Folk Music*, Charles Reznikoff’s *Testimony*, Langston Hughes’ *Montage of a Dream Deferred*, Assemblage art of the fifties and sixties, Charles Olson’s *Maximus Poems*, and *A New Literary History of America*.

ENGL 40762. Black Milk and Heart-Shaped Boxes: The Grotesque in Modern Art, Literature, Music and Film

(3-0-3) Goransson

Since the Renaissance—when ancient underground rooms were discovered beneath Rome with walls covered in scandalous depictions of human-animal hybrids—the grotesque has been a controversial presence in the various arts. In this class we’re going to look and listen to examples of the grotesque, from German Expressionist sleepwalkers to Goth singers with smeared mascara, from Kafka’s man-who-becomes-an-insect and hunger artist to Kurt Cobain’s starved body with a “mosquito” for a “libido,” from Alfred Hitchcock’s shattering swarms of cinematic birds to the violent fairytales of David Lynch, from Kara Walker’s unsettling silhouettes from Antebellum South to Matthew Barney’s body-as-spectacle, from Surrealism’s “exquisite corpses” to the Rodarte fashion shows of burnt dresses, from Sylvia Plath’s suicide sideshow to Lady Gaga’s sensational masques. We will also consider various theoretical frameworks for the grotesque. Course work will write one short paper and one longer, research-based paper.

ENGL 40770. American Modernism

(3-0-3)

Discussions of the late-nineteenth, early twentieth-century literary and cultural movement of modernism often center on those qualities of the movement described in the work of early modernist literary critics, such as Harry Levin or Edmund Wilson. Such examinations emphasize the modern movement’s experiments in form, structure, linguistic representation, characterization, etc., while paying much less attention to the role of the modernist movement in the larger context of a given culture. In this course, we will explore the significance of the modern movement from the perspective of American culture, as well as the manner and meaning of American literary participation in the movement. To that end, we will consider not only the work of authors generally accepted as modernists, such as F. Scott Fitzgerald, Ernest Hemingway and Gertrude Stein; we will also consider the role of authors such as Sherwood Anderson and Waldo Frank, of

the early Chicago Renaissance (1910–1925), and a number of authors from the Harlem Renaissance. We will examine the work of these authors not only in the context of modernism, but also as it relates to many issues of the day, including progressivism, primitivism, race and ethnicity, immigration, cosmopolitanism vs. regionalism, and the importance of the vernacular, in addition to the question of “Americanness” and its importance to an understanding of American literature during this time. Considering these different vantage points in American literary modernism, we will try to imagine the contours of “American modernisms,” and draw some conclusions about their significance within the larger modernist context. In so doing, we’ll seek to arrive at a more comprehensive, more nuanced perspective on the meaning of the modern in American literature and culture. Course texts: Edith Wharton, *Age of Innocence*; Willa Cather, *O Pioneers!*; Sherwood Anderson, *Dark Laughter*; Waldo Frank, *Holiday*; Theodore Dreiser, *Sister Carrie*; Ernest Hemingway, *Torrents of Spring*; F. Scott Fitzgerald, *The Great Gatsby*; Gertrude Stein, *Three Lives*; Jessie Fauset, *Plum Bun*; Jean Toomer, *Cane*; William Faulkner, *Absalom! Absalom!* Course requirements: Two 10-page essays, one mini-presentation, one larger presentation

ENGL 40771. American Modernisms

(3-0-3)

Prerequisite: ENGL 30101 or ENGL 30301 or ENGL 30302 or ENGL 30303 or ENGL 30304 or ENGL 30305 or ENGL 30306 or ENGL 30307 or ENGL 30308 or ENGL 30309 or ENGL 30310 or ENGL 30311 or ENGL 30312 or ENGL 30313 or ENGL 30314 or ENGL 30315 or ENGL 30316 or ENGL 30317 or ENGL 30318 or ENGL 30319 or ENGL 30320 or ENGL 30321 or ENGL 30325

A study of American literature of the modern period.

ENGL 40802. African-American Women Writers

(3-0-3)

An exploration of the works of several African-American women writers, including Alice Walker, Toni Morrison, Audre Lorde, and June Jordan, specifically the relation these writers have to the larger American culture and what they have to say about our collective vision and future.

ENGL 40803. Women of Color

(3-0-3)

A critical examination of the literature and scholarly writings about literature from “women of color” across disparate cultural backgrounds.

ENGL 40807. African-American Literature

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A historical and thematic account of the rise and achievement of African-American authors over several centuries.

ENGL 40808. Latino/a Poetry

(3-0-3)

A study of prominent contemporary Latino/a poets whose work has enriched and diversified the canon of American poetry in the last 20 years.

ENGL 40809. Latino/a Literature

(3-0-3)

This course will focus on several prominent contemporary Latino/a poets and fiction writers whose work has enriched and diversified American literature in the last 20 years. Among them are such established and acclaimed authors as Gary Soto, Lorna Dee Cervantes, Pat Mora, Martín Espada, Victor Hernández Cruz, Helena Viramontes, and Cristina García. Because Latinos are not homogenous, emphasis will be given to these writers’ diverse ethnic and cultural origins. Readings will be assigned in individual poetry collections, novels, and in one anthology of poetry. Assignments: group presentations, response papers, three 4- to 5-page papers, a final examination, and regular attendance.

ENGL 40810. Caribbean Voices

(3-0-3)

An introduction to the literature of Anglophone Caribbean.

ENGL 40811. Native-American Literature

(3-0-3)

This course serves as an introductory exploration of the literatures written by Native American authors—oral literatures, transitional literatures (a combination of oral and written expression), and contemporary poetry and prose.

ENGL 40812. African-American Poetry and Poetics

(3-0-3)

An examination of poetry and poetics by black Americans from the beginnings to the present.

ENGL 40815. African-American Poetry

(3-0-3)

Close readings of selected contemporary African-American poets.

ENGL 40816. Caribbean Migrations: An Interdisciplinary Excursion

(3-0-3)

What is the meaning of identity in a transnational space straddling the United States and the Caribbean? Migration, settlement and return are central to the historical experiences and the literary and aesthetic expressions of Caribbean societies. This course combines literary and anthropological perspectives to the study of novels and historical and anthropological texts in which themes of migration, immigration and transnationalism play central roles.

ENGL 40818. Thinking through Crisis

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

What does it mean to be in a crisis? We live only a few years after a natural disaster ravaged the southern coast of the United States; we live only a few years after incidents of racial violence and judicial mishaps culminated in national protest; finally, these issues have been swallowed up by our worry over an economic breakdown that has been called a mere downturn by some, a recession by others, and even fewer have called it a depression. But none of these descriptions help us understand what we mean by crisis and what potential there is to think and act in such turbulent times. The same sorts of issues troubling our present also troubled Americans living in the Great Depression. African-American writers of that period wrote novels, short stories, autobiographies, historiographies, poetry and other literary pieces that were both aesthetically rich and experiments in thinking critically about these issues. This course simply asks: How can Depression-era African American literature help us understand what it means to think during a crisis, and see the word as a concept, not just a media buzz word? Readings will include canonical authors like W.E.B. Du Bois, Ida B. Wells, Zora Neale Hurston, Langston Hughes, and Carter G. Woodson, studied alongside artistic and theoretical responses to Hurricane Katrina, Jena 6, and other recent events.

ENGL 40820. Writing Harlem: Race, Renaissance, and the Modern

(5-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

A multicultural study of the historical, cultural, and political circumstances behind what has come to be known as the Harlem Renaissance of the 1920s and 1930s. The course will focus on the many different cultural voices that were a part of the movement, and examine their contributions to the cultural meaning of race at this time in literary history.

ENGL 40825. Latino Literature and Visual Culture

(3-0-3)

Understanding U.S. Latino/a literature, art, and film through its many allusions to and representations of traditional icons and historic figures as well as legends,

myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/a, African, Asian, and European cultures).

ENGL 40826. South by Southwest: Literature, the U.S. South, and Greater Mexico

(3-0-3) Limon

C. Vann Woodward, the late eminent historian of the U.S. South, once noted that the study of the U.S. South stood “in great need of comparative dimensions if suitable comparative partners could be found,” comparative projects, he added, beyond the now stale North-South axis. Woodward was speaking specifically of comparative history, but other disciplines such as English, can also generate such comparative projects. This course will examine a significant range of two distinctive yet comparable bodies of American literature, mostly twentieth century, produced respectively in the U.S. South and in the culture area that Americo Paredes called “Greater Mexico.” Americo Paredes, a U.S. intellectual and literary figure akin to Woodward, coined the phrase, Greater Mexico, to refer to all peoples of Mexican-origin wherever they may be geographically found although they continue to be concentrated in Mexico and the U.S. Southwest. Our close examination of such literary works, all written in English, will proceed from a broad understanding of these two cultural-geographical areas as historically created peripheral zones relative to a dominant capitalist core even as we will also take account of direct connections between these two peoples. Authors: Jovita Gonzalez and Eve Raleigh, *Caballero: A Historical Novel*; Richard Wright, *Uncle Tom's Children*; Mariano Azuola, *The Underdogs*; William Faulkner, *Absalom, Absalom!*; Carlos Fuentes, *The Death of Artemio Cruz*; Ralph Ellison, *Invisible Man*; Americo Paredes, *George Washington Gomez: A Mexico-Texan Novel*; Walker Percy, *The Movie-Goer*; Rolando Hinojosa, *The Valley and Rites and Witnesses*; Mary Karr, *The Liars' Club*; John Phillip Santos, *Places Left Unfinished at the Time of Creation*; Bobbie Anne Mason, *Shiloh and Other Stories*; Sandra Cisneros, *Woman Hollering Creek and Other Stories*.

ENGL 40850. Advanced Fiction Writing

(3-0-3)

Prerequisite: ENGL 20000 or ENGL 20003 or ENGL 30850 or ENGL 30853 or ENGL 20001

This course is intended for students who have already taken a fiction writing course (or the equivalent) and who are seriously interested in writing fiction, and graduate students who are not in the creative writing program. The expectation is that the student is beyond the point of requiring assignments to generate stories. Over the semester, in a workshop setting, student stories will be taken through various stages: due attention will be paid to revision, rewriting, polishing, editing, with a goal that the stories be brought as close as possible to the point of submission as finished work. Practical as well as theoretical issues will be investigated; there will be assigned readings from a variety of fiction authors.

ENGL 40851. Advanced Poetry Writing

(3-0-3)

Prerequisite: ENGL 20002 or ENGL 20031 or ENGL 20032 or ENGL 20033 or ENGL 20034 or ENGL 20035 or ENGL 20036 or ENGL 20037 or ENGL 20038 or ENGL 20039 or ENGL 20040 or ENGL 30852 or ENGL 20004 or ENGL 30851

This is the most advanced undergraduate course in poetry writing offered by the Department, and while it does not require existing skills in writing poetry, it assumes an existing interest in poetry developed through reading. The course will extend students' knowledge of lyric poetry both as readers and as writers, emphasizing its distinctive, performative qualities. A safe but critical workshop environment is offered for adventures in reading and writing; the course will enrich an understanding of poetic language for those seeking to enhance their enjoyment, as well as opening creative possibilities for those drawn primarily to writing poetry.

ENGL 40903. Deconstruction and Exegesis

(3-0-3)

The aim of this course will be to compare and contrast what one might loosely term ancient (medieval, early modern) and post-modern approaches to the reading of texts, following the twin approaches of theoretical exposition and practical application, neither of which can be sustained without the intervention of the other. It will be necessary to rely on concrete examples of the ancient and contemporary methods. The examples in the first half of the semester will be Augustine's *On Christian Teaching* and *Literal Interpretation of Genesis* and Derrida's *Of Grammatology*, *Writing and Difference* and *Dissemination*. This double reading will put us in a position to take as our examples *Augustine's Confessions* and Derrida's *Circonfession* in the second half of the semester. Certain questions—which can sometimes but not always be answered in the conventional sense—will persist during our readings. These will include: What is philosophy? What is literature? What is the relation between philosophy and exegesis? What is the relation between literature and exegesis? What is the relation between philosophy and literature? Language requirement: Latin and/or French desirable but not necessary. Written requirement: one final essay (20 pages) either a) on one of the texts or authors studied in the course, or b) applying the methodologies discussed to another philosophical or literary text of your choice.

ENGL 40920. Hermeneutics and Literary Theory

(3-0-3)

What makes an interpretation of a literary text valid? The reconstruction of what the author meant by his text, intentionalists say. But does one understand enough if one just goes back to what the author had in mind, some anti-intentionalists ask. Both intentionalists and anti-intentionalists claim to derive their respective hermeneutic norms from insights into the nature of textual meaning in general and literary semantics in particular. This seminar will focus on the relationship between the theory and methodology of interpretation and literary theory. We will analyze major contributions by, among others, Hans-Georg Gadamer, E.D. Hirsch, Paul Ricœur, Frank Kermode, Umberto Eco, and Richard Rorty. Note: Readings in English and German, discussions in English.

ENGL 40957. The Post-Realist Cinema

(1-0-1) Godmilow

It is extremely useful to study the post-realist documentary films which are built out of what's understood as non-fiction materials but which refuse the pedigree of "the real"—which don't take the stance of truth-telling in the traditional documentary ways—in fact, which contradict the construct of "the real" to speak about the medium itself—all in different ways. Many of them straddle the line between the avant garde cinema and the non-fiction film. We'll screen, for instance Bunuel's *Blood of the Beasts*; Bruce Connor's *A Movie & Crossroads*; Harun Farocki's *Inextinguishable Fire*; Su Friedrich's *First Comes Love*; Kyle Kibbee's *100 NY NY 1989* and Guy Maddin's *My Winnipeg*.

ENGL 41011. Television as a Storytelling Medium Lab

(0-1-0)

Corequisite: ENGL 40011

Certain screenings will be viewed for further discussion in class.

ENGL 41206. Shakespeare and Film Lab

(0-0-0)

Corequisite: ENGL 40206

Certain films will be viewed for further discussion in class.

ENGL 41254. Shakespeare: Text and Performance Lab

(0-0-0)

Corequisite: ENGL 40254

Certain films will be viewed for further discussion in class.

ENGL 41527. Transnational Immigration in European Cinema Lab

(0-0-0)

Corequisite: ENGL 40527

Certain films will be viewed for further discussion in class.

ENGL 43102. Seminar: Religion and Literature

(3-0-3)

A consideration of the forms, ideas, and preoccupations of the religious imagination in literature and of the historical relationships between religious faith and traditions and particular literary works. The conflicts and tensions between modern Gnosticism, in literature and ideology, and the sacramental imagination will constitute a recurring point of focus. We will also lend special attention to the vision and imagery of the journey and wayfarer and the conflicts and affinities between private and communal expressions of faith.

ENGL 43105. Seminar: The Devotional Lyric

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Following the Reformation-era's massive upheavals came the greatest flowering of devotional poetry in the English language. This body of literature offers its readers the opportunity to explore questions pertaining broadly to the study of religion and literature and to the study of lyric. Early modern devotional poetry oscillates between Eros and agape, private and communal modes of expression, guilt and pride, doubt and faith, evanescence and transcendence, mutability and permanence, femininity and masculinity, success and failure, and agency and helplessness passivity. We'll follow devotional poets through their many oscillations and turns by combining careful close reading of the poetry with the study of relevant historical, aesthetic, and theological contexts. Students will learn to read lyric poetry skillfully and sensitively, to think carefully about relationships between lyric and religion, and to write incisively and persuasively about lyric. Our authors will likely include William Alabaster, Richard Crashaw, John Donne, George Herbert, Robert Herrick, Anne Locke, Andrew Marvell, Mary Sidney, Robert Southwell, Thomas Traherne, and Henry Vaughan; we may also read some work from earlier and later periods. There will be three major course requirements: 1) Regular short written responses to assigned readings; these will be revised and submitted at the end of the course in lieu of a final exam. 2) A poet project; for these projects each student will be assigned a writer on whom to prepare a brief biography, bibliographic information on the poetry's publication and/or circulation history, and an annotated bibliography of major scholarship. These projects will be made available to every student enrolled in the course; we'll leave the course with a wealth of information about the authors we study. 3) An 8- to 10-page focused interpretive essay on a topic of the student's choosing.

ENGL 43201. Seminar: The Pearl Poet

(3-0-3)

Close readings of the Arthurian romance of Gawain, *Patience* (the whimsical, pre-Pinnocchio-and-Gepetto paraphrase of the story of Jonah and the whale), *Cleanness* (a series of homiletic reflections of great power, beauty, grim wit, and compassionate insight centered on varying conceptions of "purity"), and *Pearl* (the elegiac dream-vision that begins with the mourning father who has lost a young daughter, then moves with amazing grace from the garden where he grieves into a richly envisioned earthly paradise where he is astonished to re-encounter his lost "Pearl," who then leads him to the vision of a New Jerusalem whose post-apocalyptic landscape is populated exclusively by throngs of beautiful maidens).

ENGL 43202. Seminar: Milton and His Contemporaries

(3-0-3)

A close analysis of differing, and divergent, ways of seeing and representing reality in 17th-century Dutch painting and English poetry.

ENGL 43203. Seminar: Shakespeare and His Contemporaries

(3-0-3)

This seminar places Shakespeare's plays within the vibrant world of Tudor-Stuart drama.

ENGL 43204. Seminar: Medieval Romance

(3-0-3)

An intensive analysis of medieval romance literature both in England and on the continent, beginning with the work of Chretien de Troyes and including Chaucer's *Troilus AND Criseyde* and Malory's Arthurian legends, focusing on the role of women in romance narratives, the relationship of the romance to history, modifications of and developments in the Arthurian tradition over time, and the place of the other (the foreign, the monstrous, the magical) in the romance.

ENGL 43205. Seminar: American Women Writers

(3-0-3)

This course will focus on the work of women writers after World War II and up to the end of this past century, with the idea of gaining an understanding of the range of women writers in this country during this period.

ENGL 43207. Seminar: Everybody's Shakespeare

(3-0-3)

A close analysis of Shakespeare's plays (including tragedies, comedies, and romances), as well as a number of contemporary "re-visions" of those works by authors of varying cultural, ethnic, or gender backgrounds.

ENGL 43208. Seminar: Enlightenment Drama

(3-0-3)

A close study of drama, tragic, and comic, after Shakespeare.

ENGL 43209. Seminar: The Canterbury Tales

(3-0-3)

In this course, we will read *The Canterbury Tales* from start to finish, focusing on questions of genre, poetic voice and authority, the relationship of history to literature, the development of character, and the emergence of vernacular poetry in English.

ENGL 43210. Seminar: Shakespeare's Religions

(3-0-3)

A critical analysis of religious influences and iconography in selected Shakespeare plays.

ENGL 43211. Seminar: Ideas of Justice

(3-0-3)

An examination of various ideas of justice in early modern culture, from the trials of Socrates and Jesus to Shakespeare and Milton.

ENGL 43212. Seminar: Mystic Voices

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

The divine "vision" was a special form of religious experience in medieval Europe. In this class we will read both primary texts and some modern critical theory to consider texts reporting visionary experience as problems of representation. How could experiences of such intensity be represented in writing? How were they to be interpreted? Who had the authority to do so? Why were visions so much more common to women than men?

ENGL 43215. Seminar: Love and Society in Renaissance Poetry

(3-0-3)

How depictions of love in selected Renaissance poetry reflected notions of love in the larger Renaissance society.

ENGL 43220. Seminar: The Medieval Saint

(3-0-3)

A close reading of the prose and poetry of selected medieval saints, with particular emphases on expressions of faith and the literary forms used to express that faith.

ENGL 43222. Seminar: Old English and Middle English

(3-0-3)

Close readings of selected Old English and Middle English prose.

ENGL 43223. Seminar: Shakespeare's Major Tragedies

(3-0-3)

A close reading of William Shakespeare's major tragedies, including historical and biographical aspects of the works.

ENGL 43241. Seminar: Censorship and Literary Freedom in Medieval England and Ireland

(3-0-3) Kerby-Fulton

Prerequisite: ENGL 30101 (may be taken concurrently)

Medieval writers operated in a world fraught with political and ecclesiastical controversy, sometimes extending to censorship, imprisonment and judicial execution. Yet at the same time, evidence survives of a surprising degree of tolerance for certain radical ideas. This course will examine how the major writers of late medieval England negotiated official censorship, but also exploited or earned tolerances extended by the authorities. English authors to be studied will include Geoffrey Chaucer, William Langland, John Wyclif, Julian of Norwich, Margery Kempe, Marguerite Porete (the only medieval woman author to have been burned at the stake for her writings). These texts will be read alongside excerpts from some anonymous English texts, including political lyrics like the Kildare poems, popular imitations of *Piers Plouman* and *The Canterbury Tales*, and Wycliffite writings. Articles of inquisition, statutes, legal defenses, trial records, petitions and broadsides will also be available for research. The aim is to help illuminate how literary writers sought to defend or enlarge their religious or political orthodoxies in response to the challenges of the time. Topics to be discussed will include: reception of visionary writing, attitudes toward women's learning and preaching, controversial religious doctrines (like universal salvation, millenarianism, and intellectual freedom), and political controversies over the Commons' control of royal tyranny, the Rising of 1381, the deposition of Richard II, and the problems of colonial Irish literary culture.

ENGL 43301. Seminar: Virtue, Sex, and the Good Life: Eighteenth-Century Novels

(3-0-3)

The 18th-century novel deals with the questions of social, political, sexual, and economic identities and choices in a time of great change, and this course examines several novels representative of the time period.

ENGL 43302. Seminar: Jane Austen and Her World

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Research in the novels of Jane Austen.

ENGL 43305. Seminar: Victorian Radicals

(3-0-3)

Fringe characters in, and elements of, British Victorian literature, with a particular emphasis on a modern world being increasingly defined in economic terms.

ENGL 43310. Seminar: Nature Poetry

(3-0-3)

A seminar focusing on the great body of poetry in English of the last two centuries in which nature takes center stage, rather than functioning as scenery, with a particular emphasis on the relationship between humankind, nature, and ecology.

ENGL 43315. Seminar: Poetry and Knowledge

(3-0-3)

Readings in poetry and poetics, with a particular emphasis on cognitive, educational, and truth claims for poetry from the Renaissance to the present.

ENGL 43325. Seminar: Literature of British Empire

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

We still have to ask how a little island nation managed to dominate, in one sense or another, a large proportion of the civilized world, embracing Africa, the Middle East, the West Indies, Australia, and India/South Asia. This seminar will address that big question and challenge some of our preconceptions about this great

British power. But we will do so mainly through literary works that reveal how compelling the little stories were, as well. How, and for whom, was the empire a career? A calamity? A maker and breaker of families and friendships? By reading the literature of the British Empire, we can begin to gain a nuanced, textured sense of these issues and these lives. Students will choose from a great array of research projects drawing from various critical methodologies and interests: the empire showcases problems of law, politics, gender relations, racial and interracial relations, and much more. We will strive to gain a global picture of the British Empire, but our emphasis will go to works concerning British India. Literary readings include Wilkie Collins's *Moonstone*, H. Rider Haggard's *King Solomon's Mines*, several works by Rudyard Kipling, E.M. Forster's *Passage to India*, and George Orwell's *Burmese Days*. We will encounter lesser-known but important writers (such as Sara Jeanette Duncan and Flora Annie Steel). We will also study at least one Indian film, *Lagaan*, which shows how modern-day Indian cinema represents the British Empire from a century earlier (and teaches us how the game cricket works!). Assignments include a short paper a longer research paper with preliminary exercises.

ENGL 43378. Seminar: Identifying with Characters in Nineteenth-Century Fiction

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Readers of the novel report taking pleasure in identifying with characters, assuming their points of view, and feeling their emotions along with them. This course is designed to explore the strange process through which readers come to feel they share traits with entirely imaginary beings. We will base our investigation on both the philosophy of identification (David Hume and Adam Smith), the psychology of identification (Sigmund Freud), novels featuring beloved literary characters (Charlotte Brontë's *Jane Eyre* and Charles Dickens's *Great Expectations*) and novels that respond to or even recapitulate those same characters (Bharati Mukherjee's *Jasmine* and Lloyd Jones's *Mister Pip*). Through a series of short response papers, students will form a research question touching on this topic, which they will then develop into a seminar-length paper through research, rough drafts and revision.

ENGL 43401. Seminar: Modernism and Modernity

(3-0-3)

By engaging a wide variety of modern writers ranging from D.H. Lawrence, T.S. Eliot, Larsen, Fauset, Barnes, Rhys, Woolf, Langston Hughes, and West; to Lewis, Joyce, and Beckett, the changing contours of literary modernism in the larger context of the philosophical, social, and political cultures of modernity.

ENGL 43402. Seminar: God in Postmodern British Poetry

(3-0-3)

A multifaceted analysis of modes of "belief" in postmodern British poetry, with a particular emphasis on how the operations of ancient Hebraic and Christian texts come back into practice for these writers, and why those earlier frameworks for conceptualizing language and "saying God," or failing to say it, seem newly hospitable in the face of deconstructive postmodern theories about "the word."

ENGL 43403. Seminar: Gender and Modernism

(3-0-3)

An intensive study of feminine or women's modernism: modernist aesthetics read in relation to questions of race and gender; the formation of literary modernism's often tense relation to mass culture; the development of political and literary avant-garde cultures (with specific emphasis on those marked by gender and race such as the suffrage movement and the Harlem Renaissance); the development of modern discourses of sexuality; the intimate and complex relationship between modernism and race; and the special attention given to women's experiences of modernity, especially in relation to those aspects of culture typically excluded from definitions of the modern (shopping, maternity, consuming popular, sentimental fictions, etc.).

ENGL 43404. Seminar: Modernism, Modernity, and Modernization

(3-0-3)

A study of questions relating to modernism as a literary period and historical concept.

ENGL 43409. Seminar: Woolf and Bloomsbury

(3-0-3)

The modernist feminist writer Virginia Woolf lived and worked with a loose collective of writers, painters, and social thinkers that we now call the Bloomsbury Group (though many members of the group disliked the phrase). We will look at the novels, essays, art, interior design, and political writings of some of the members of Bloomsbury—including works by Virginia Woolf, E.M. Forster, Roger Fry, Leonard Woolf, Vanessa Bell, and Clive Bell—to explore the complex moments of cross-fertilization, critique, and revision that define their encounters. In addition, we will attend to a few areas that have dominated discussions of Bloomsbury modernism: ideas of nation, civilization, and critiques of Empire; the formation of literary modernism's often tense relation to mass culture; the development of modern discourses of sexuality; the relationship between literature and the modern metropolis; and explorations of women's experience of modernity. Because members of the Bloomsbury Group worked in a number of fields beyond the literary—painting, economics, social thought, publishing, and interior design to name a few—students often find that they can easily develop projects that engage more than one area of interest and that combine skills developed in a second major with those that belong to literary criticism. Requirements include one seminar paper (written in stages in consultation with me) of at least 20 pages, participation in one group presentation.

ENGL 43410. Seminar: Feminism, Print, and Spectacle in the 20th Century

(3-0-3)

How feminist cultures of the 20th century have engaged print culture and visual culture in imaginative ways to carve a space for discussions of women's issues.

ENGL 43411. Seminar: 20th-Century British Women Writers

(3-0-3)

Modern and postmodern fiction (and some nonfiction prose) by British women. Authors may include Woolf, Butts, Rhys, Cunard, Richardson, Carrington, West, Mansfield, Carter, and Winterson.

ENGL 43501. Seminar: James Joyce

(3-0-3)

Close readings and discussion of Joyce's *Dubliners*, *A Portrait of the Artist As A Young Man*, and *Ulysses*.

ENGL 43502. Seminar: Contemporary Irish Literature

(3-0-3)

Irish drama, fiction, and poetry of the second half of the 20th century.

ENGL 43503. Seminar: Anglo-Irish Identities 1600–1800

(3-0-3)

Focusing on the 200-year historical period that was crucial in the formation of "Ireland," this course explores the complex and contested cultural, political, and ideological identities of a group we have come to call the Anglo-Irish, including Swift, Berkeley, Edgeworth, and Goldsmith.

ENGL 43504. Seminar: Modern Irish Fiction

(3-0-3)

A close examination of the works of major Irish writers of fiction after the Second World War—Flann O'Brien, Frank O'Connor, Mary Lavin, Patrick Kavanagh, Edna O'Brien, Michael MacLaverty, Sam Hanna Bell, and Brian Moore.

ENGL 43505. Seminar: Gender Troubles: Contemporary Irish Fiction

(3-0-3)

In this course we will be looking at the relationship between gender politics and national politics as it plays out in the development of Irish fiction after the era of James Joyce. Focusing on Irish novels and short stories that were groundbreaking and/or controversial in terms of their exploration of gender and sexuality, the course will also investigate the historical contexts in which they were produced and the controversies they produced. Our investigation will focus on the question of how the “trouble” generated around these controversial explorations of gender and sexuality relates to other kinds of trouble that have shaped the history of twentieth-century Ireland. We will begin with the reaction against government censorship in the Irish Free State during the 1930s and 1940s, follow the emergence of Irish women writers and Irish feminism from the 1950s to the 1980s, and conclude with the rise of gay and lesbian Irish writers in the 1990s and early twenty-first century.

ENGL 43506. Seminar: Irish Fiction: 1914–1945

(3-0-3)

It was during the years 1914–1945, which encompass the two World Wars, that the twenty-six southern counties of Ireland emerged as an independent state, but at the cost of partition from the six counties of Northern Ireland, which have remained loyal to the British crown. In this course we investigate how Irish fiction of the period responds to these historical events, as well as to the draconian censorship imposed on film and literature in the Irish Free State. Reading will include novels and short stories by James Joyce, Liam O’Flaherty, Eimar O’Duffy, Sean O’Faolain, Frank O’Connor, Kate O’Brien, Seamus O’Kelly, Kathleen Coyle, Samuel Beckett, and Elizabeth Bowen. Requirements consist of class presentations, regular postings to Concourse, and a final research paper of 15 pages.

ENGL 43515. Seminar: Contemporary British and Irish Fiction

(3-0-3)

This course will focus on the contemporary fiction of Ireland, England, Scotland and Wales, as well as some of the best recent black British fiction. Some of the authors whose work we will read are: John Banville, Zadie Smith, Monica Ali, Andrea Levi, Irvine Welsh, James Kelman and Pat Barker. These writers will be read in the context of “the Break-up of Britain” and a concomitant sense of the changes in British and Irish identity in the past twenty years or so.

ENGL 43601. Seminar: Landscape in American Literature

(3-0-3)

A thematic reading of “landscape” in American Literature from the Puritans to Toni Morrison.

ENGL 43602. Seminar: Gender and Emotion in American Literature

(3-0-3)

An examination of the changing representations of men’s and women’s emotions in literature and other cultural forms, with a focus on nineteenth-century American literature.

ENGL 43603. Seminar: Voices of the American Renaissance

(3-0-3) Gustafson

Prerequisite: ENGL 30101 (may be taken concurrently)

The human voice manifested tremendous cultural, spiritual, and political power for antebellum Americans. “Vox populi, vox dei” (“The voice of the people is the voice of God”) proclaimed the political slogan, while Transcendentalist writers such as Ralph Waldo Emerson considered the living voice to be superior to the dead letter. Vernacular literatures, Native American and African-American oral traditions, and sacred and political oratory all contributed distinctive models of voice to the antebellum Babel. In this course we will focus on the trope of voice as it shaped the literatures of the American Renaissance period (roughly 1835–1865). We will explore the cluster of meanings that antebellum Americans attached to voice and examine the social and literary issues that these conceptions of voice prefigured. Our readings will include works by Emerson, Henry David Thoreau,

Emily Dickinson, Walt Whitman, Frederick Douglass, Herman Melville, Harriet Beecher Stowe, Nathaniel Hawthorne, and Edgar Allen Poe. The major requirement for the course is a research paper of approximately twenty pages, produced in stages.

ENGL 43604. Seminar: The Institution of Henry James

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

In this research seminar, we will examine the forms of institutionality that inform literary study in the American academy and beyond by looking at the many lives of Henry James. Objects that will be included in this study include: the novels and essays of James himself; his literary legacy; the influence of James studies on literature departments and scholars; his celebrated biographer Leon Edel; film adaptations of key works; and the figure of “the Jamesian” in recent fiction by Colm Toibin and Alan Hollinghurst. Students will encounter a range of methods—from new critical readings to the statistical analysis of titles of James criticism—in their project to develop a broad view of modern institutionality as indexed by this fascinating figure.

ENGL 43616. Seminar: American Literature in the World

(3-0-3)

How does the world influence America? What is the place of America in the world? In this course we will read poetry, plays, manifestoes, and works of fiction that suggest many answers to these questions. Conversation will provide an organizing theme as we venture around the globe and range across time from Shakespeare to the present. Our readings will be grouped into units that focus on different modes of literary relationship and are likely to include *The Tempest*, *The Scarlet Letter*, and *The Last of the Mohicans*; poetry by Anne Bradstreet, Walt Whitman and Langston Hughes; fiction by Honoré de Balzac, Joseph Conrad, Chinua Achebe, Maryse Condé, Jhumpa Lahiri, and Toni Morrison; Thoreau’s *Civil Disobedience* and works it influenced by Mahatma Gandhi, Martin Luther King, Jr., and Nelson Mandela; and plays by Arthur Miller and Melinda Lopez. Course requirements include regular participation and in-class assignments; several short papers; one 5-page paper; and a ten-page paper.

ENGL 43701. Seminar: Southern Fiction

(3-0-3)

Close readings of Southern fiction from 1900 to 1960, including Chopin, Glasgow, Toomer, Faulkner, Wright, Ellison, Hurston, Warren, Welty, and O’Connor.

ENGL 43702. Seminar: Suffragettes and Literature

(3-0-3)

A close study devoted to tracing and defining the feminist literary cultures of the 20th century through, first, reading the writings created during the “First Wave” of feminist activism that defined women’s militant and nonmilitant struggle for the vote at the beginning of the last century, followed by exploration of the feminist writing and thought that followed the suffrage movement and paved the way for discussions of Women’s Liberation in the “Second Wave.”

ENGL 43703. Seminar: Writing Harlem’s America

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course will serve as an introduction to writers of the Harlem Renaissance, with an emphasis on how black writers viewed “the black experience” in both within the black community and the larger American culture.

ENGL 43704. Seminar: American Visions

(3-0-3)

An intra-hemispherical study of literatures of the Americas from the mid-16th to the 18th centuries.

ENGL 43705. Seminar: Realism and Naturalism

(3-0-3)

A close examination of American literature written between 1800 and 1900.

ENGL 43706. Seminar: Latino/a Literature

(3-0-3)

Close readings of several seminal works of 20th-century Latino/a literature.

ENGL 43707. Seminar: Contemporary American Women Poets

(3-0-3) Brogan

Although the range and productivity of American women writers over the last two centuries has been enormous, the proliferation of extremely accomplished and important women writers has virtually mushroomed in the last few decades, embracing leading poets (such as Elizabeth Bishop and Adrienne Rich), leading novelists (such as Alice Walker, Joyce Carol Oates, and Toni Morrison) and altogether new voices (such as the Chicana poet Lorna Dee Cervantes, the Asian-American novelist Amy Tan, and the Native-American Susan Power, to name only a few). To narrow the range of this explosive development in American literature, we will primarily focus on the work of women written in this country after World War II, with special emphasis on the last two decades. In addition to a small sampling of a number of different writers to be found in our class reader, we will ultimately focus on seven writers: Elizabeth Bishop (poetry), Adrienne Rich (poetry and essays), June Jordan (poetry and essays), Amy Tan (fiction), Lorna Dee Cervantes (poetry), Susan Power (fiction), and Sandra Gilbert (poetry and essays). Students will be expected to participate in genuine class discussion, to develop a rationale for how to interpret these works (i.e., the most suitable critical perspective for given works or authors), and to do some external readings by and/or on one author of their choice for the final project. Written assignments will range from an occasional 1-page response to the longer, final project, with two shorter papers in between. At the end of the course, I hope students will have been inspired by these writers to produce creative work of their own. If this is true, students' own creative work (if of high quality and if also clearly related to the themes of the course and the writers studied) can be substituted for one of the assignments. Texts: Elizabeth Bishop, *The Complete Poems*; Adrienne Rich, *An Atlas of the Difficult World* and selected essays; Lorna Dee Cervantes, *Emplumada*; June Jordan, *Naming Our Destiny* and selected essays; Amy Tan, *The Joy Luck Club*; Susan Power, *The Grass Dancer*; Sandra Gilbert, *Belongings and selected essays*.

ENGL 43721. 20th-Century American Fiction

(3-0-3)

Beginning with F. Scott Fitzgerald's *Jazz Age* and ending with Toni Morrison's *Jazz*, a study of thematic commonalities and dissonances in selected 20th-century American novels.

ENGL 43730. Seminar: American Film

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Presentations and discussions of the several genres of film produced in America since the early 1900s.

ENGL 43748. Seminar: Engendering Renaissance: Chicago, Harlem and Modern America(s)

(3-0-3) Johnson-Roullier

In answering the question "What was American modernism?" most literary critical perspectives might commonly be expected to focus on a modernity represented by the authors of the "lost generation" in the U.S., such as F. Scott Fitzgerald, Gertrude Stein, and Ernest Hemingway. While a conventional understanding of U.S. American modernism might serve to underscore the importance of the stylistic, cultural and artistic contributions of these and other canonical moderns, such a view might also give little consideration to the significance of those modern U.S. American voices not ordinarily heard in such a context. This course poses the question "What was American modernism?"—to answer it by exploring its roots in two less conspicuous early 20th-century U.S. American modernisms: the Chicago Renaissance of 1912–1925, and the Harlem Renaissance of 1920–1929. In "engendering renaissance," these two moments suggest a literary birth and rebirth of modern U.S. American identity that questions its seemingly stable boundaries and borders, reconfiguring the idea of "American" within and opening the door to the larger and more varied cultural fabric that is modern America(s).

By locating the rise of U.S. American modernism in the relation between these two literary moments, this course will broaden our understanding of the idea of "American" at this time by considering how it is created within a frame determined by the interplay of race, gender, class and nation. In this way, it seeks to deepen our understanding of U.S. American culture and the idea of "American" in the early 20th century, while suggesting new ways to engage the global social and cultural challenges facing the idea of "American" in the 21st. Course requirements: Four short thesis practice papers, two essay introductions, two 5-page essays, presentations. Course texts: Alan Trachtenberg, *The Incorporation of America*, excerpts; Thorstein Veblen, *The Theory of the Leisure Class*, excerpts; Henry Blake Fuller, *The Cliff-Dwellers*; Theodore Dreiser, *Sister Carrie*; Sherwood Anderson, *Winesburg, Ohio*; Willa Cather, *The Song of the Lark*; Booker T. Washington, *Up From Slavery*, excerpts; W.E.B. Du Bois, *The Souls of Black Folk*, excerpts; Jean Toomer, *Cane*; Jessie Fauset, *There is Confusion*; Claude McKay, *Banjo*; Zora Neale Hurston, *Their Eyes Were Watching God*.

ENGL 43755. Seminar: California Culture at Mid-Century

(3-0-3)

This course explores how poetry took a leading role among the arts in California at mid-century, creating a California culture that through the Beats and the Hippies became a national and international phenomenon. We begin by looking at collage, the dominant form of the arts in California, and then consider how collage meets up with four main elements of the California aesthetic: surrealism, mysticism, jazz, and anarchism. The primary poets we read and hear are Robert Duncan, Gary Snyder, Allen Ginsberg, Bob Kaufman, and D.J. Waldie. Alongside these poets, we will look at Jack Kerouac's novel *The Dharma Bums*, artists like Jess, Wallace Berman, Bruce Conner, Joan Brown, and Jay DeFeo, and filmmakers like Kenneth Anger and Stan Brakhage. Students will gain the ability to do interdisciplinary work in the arts, to read complex contemporary poetry, and to relate art movements to the culture that surrounds them.

ENGL 43801. Seminar: Women of Color

(3-0-3)

An examination of the literatures of women of color, encompassing the linguistic, national, ethnic, and cultural experiences and connections among women of color in cultural diasporas around the world, and how these women use their work to (re)map the "margin," recreating it as a place of connection and conversation, rather than exclusion and otherness.

ENGL 43802. Seminar: Black Cultural Studies

(3-0-3)

This interdisciplinary course considers the conflicted ways in which "racial" identities and differences have been constructed throughout U.S. culture.

ENGL 43803. Seminar: American War Literature

(3-0-3)

Beginning with Mary Rowlandson's captivity narrative and ending with Tim O'Brien's *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

ENGL 43805. Seminar: Twentieth-Century Black Women Writers

(3-0-3)

A close examination of major 20th-century African-American women writers.

ENGL 43806. Seminar: Caribbean Voices

(3-0-3)

An introduction to the literature of the anglophone Caribbean.

ENGL 43809. Seminar: Literatures of Early American Contact

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

This course explores the history, narrative, and poetry emanating from the early centuries of European exploration and conquest in the Americas. Beginning with texts attributed to Columbus, working through accounts of Spanish conquests, and ending with New England history and literature, we ask questions about the

role of violence, empire, religion, and Native American resistance in the shaping and development of culture and identity in Latin America as well as in the United States.

ENGL 43810. Seminar: Latino Literature

(3-0-3)

A close examination of the historic, cultural, and artistic foundations of selected Latino writers.

ENGL 43812. Seminar: The First Amendment and the Literature of Rights

(3-0-3) Visconsi

Prerequisite: ENGL 30101 (may be taken concurrently)

This is a cross-disciplinary course that surveys the literary and cultural history of First Amendment protections for free speech and religious liberty from the early modern period into the global present. We will look at the intellectual genealogy, development and contestation of those concepts in Anglo-American literature, jurisprudence, and political thought, and we will attend with special care to the function of literature as a medium of public constitutional commentary. We will also study the modalities of constitutional interpretation, read some First Amendment case law and its UK equivalents, and consider a few contemporary cases in which literature and other cultural forms test the limits of permissible speech in pluralist democracies. The course may be of special interest to students considering law school.

ENGL 43920. Seminar: Contemporary Women Writers

(3-0-3)

Prerequisite: ENGL 30101 (may be taken concurrently)

Although the range and productivity of American women writers over the last two centuries has been enormous, the proliferation of extremely accomplished and important women writers has virtually mushroomed in the last few decades, embracing leading poets (such as Elizabeth Bishop and Adrienne Rich), leading novelists (such as Toni Morrison and Alice Walker), and altogether new voices (such as the Chicana poet Lorna Dee Cervantes, the Asian-American novelist Amy Tan, the Native American fiction writer Susan Power, to name only a few). As a consequence, we will focus on the work of women writers after World War II and up to the end of this past century, with the idea of gaining an understanding of the range of women writers in this country during this period, but then with a tight focus on four of the best (two poets and two fiction writers). Since this is a seminar, students will be expected to participate in genuine class discussion, to develop a rationale for how to interpret these works (i.e., the most suitable critical perspective for given works or authors), and to do some external readings by and on one author of their choice for the final project. Written assignments will range from occasional one-page responses to the longer final project, with one short and one medium-length paper in between. At the end of the course we will hope that students, male and female, will have been inspired by one of these writers to produce creative work of their own. And if this is true, students' own work (if of high quality) can be substituted for one of the assignments.

ENGL 47999. Special Studies

(V-0-V)

Independent study under the direction of a faculty member.

ENGL 52998. Honors Thesis

(3-0-3)

Arranged by department honors advisor. Credits for research and writing honors thesis.

ENGL 52999. Honors Thesis

(3-0-3)

Arranged by department honors program advisor. Credits for research and writing honors thesis.

ENGL 53001. Honors Colloquium

(3-0-3) Vanden Bossche

The Honors Colloquium will introduce students completing the honors thesis to research methods in literary studies. Students will complete a series of assignments designed to enable them to develop their thesis topic. They will conduct research in consultation with their thesis advisor and begin work on the thesis project, which will be completed in the spring semester.

ENGL 53002. Creative Writing Honors Colloquium

(3-0-3) Menes; Sayers

This colloquium is for students completing a creative writing honors thesis. Students will participate in Advanced Fiction Writing. Students will complete a series of extra assignments designed to enable them to develop their thesis topics. They will also work in consultation with their thesis advisor and begin drafting the thesis, which will be completed in the spring semester.

ENGL 58999. Thesis Research

(0-0-3)

Research and composition of a thesis in English.

University Writing Program

WR 11050. First Year Writing and Rhetoric Summer Studio

(2-0-2)

Students in the First-Year Writing and Rhetoric Summer Program also enroll in the Summer Seminar, WR 13150, which meets in a computer lab on campus. In the studio, students practice academic writing conventions, draft and revise assignments, and conference with a writing specialist. This course is a corequisite of WR 13150.

WR 12100. Writing and Rhetoric Tutorial

(1-0-1)

Students enrolled in the Writing and Rhetoric Tutorial either will have completed or will be concurrently enrolled in first year Writing and Rhetoric. The tutorial will provide supplemental one-on-one writing instruction, with a focus on developing the fundamental skills needed to think critically and write clearly. This course will require intensive practice discovering topics, drafting ideas into essay form, evaluating drafts, and revising writing. Students will learn strategies to clarify their ideas, organize their writing, and successfully use academic writing conventions. These skills will be practiced within the context of writing assignments students are working on in Writing and Rhetoric and other first-year classes.

WR 13100. Writing and Rhetoric

(3-0-3)

Writing and Rhetoric is designed to help students learn how to identify an issue amid conflicting points of view and craft an argument based on various sources of information. The course stresses the identification and analysis of potential counter-arguments and aims to develop skills for writing a research proposal, for conducting original research, and for using print and electronic resources from the library.

WR 13150. Writing and Rhetoric Summer Seminar

(3-0-3) Capdevielle

Identical in its aims, assignments, and grading criteria as first-year composition courses offered during the traditional school year, students in WR 13150 learn how to identify an issue amid conflicting points of view and craft arguments based on various sources of information. The course stresses the identification and analysis of potential counter-arguments and aims to develop skills for writing a research proposal, for conducting original research, and for using print and electronic resources from the library.

WR 13200. Community Based Writing and Rhetoric

(3-1-3)

In cooperation with the Center for Social Concerns, these sections of composition place students in learning situations in the wider community where they are in contact with people who are dealing with the specific content issue of their section. We welcome students with commitment to social justice and community service to enroll.

WR 13300. Multimedia Writing and Rhetoric

(3-0-3)

Because researching and composing arguments is increasingly linked to technological tools, multimedia sections of Writing and Rhetoric teach students how to make the most of a wide array of resources. From standard tools, such as Microsoft Word, to more powerful Web sites and software, students in multimedia sections use composition technology to its fullest while exploring the unique opportunities and challenges of composing in the 21st century. While students do not need any prior technological skills, they should be ready to learn many of these skills over the course of the semester. Students will be required to bring a wireless laptop to class and to keep their laptops functioning properly throughout the semester.

Film, Television, and Theatre

FTT 10101. Basics of Film and Television

(3-0-3)

Corequisite: FTT 11101, FTT 12101

This class is designed to enhance your understanding and appreciation of film and television. You will learn about the basic elements that distinguish films and television programs from other aesthetic forms, such as editing, cinematography, sound and set design, and how these components work together to develop stories and characters. We will also work with interpretive frameworks that uncover deeper meanings and patterns in film and television, such as genre theory, the idea of authorship, and ideological analysis. The class presents a range of films, from such Hollywood classics as *Casablanca* and *The Departed*, to award-winning international films and projects from our very own student film festival. Television shows we will screen include *Mad Men*, *Grey's Anatomy*, and *Ugly Betty*. This course is required for all majors in film, television, and theatre.

FTT 10701. Introduction to Theatre

(3-0-3)

A study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Through lectures, readings, and discussion, students will study this art form and understand its relevance to their own life as well as to other art forms. A basic understanding of the history of theatre and the recognition of the duties and responsibilities of the personnel involved in producing live theatre performances will allow students to become more objective in their own theatre experiences.

FTT 12101. Basics of Film and Television Tutorial

(0-0-0)

Corequisite: FTT 10101

FTT 11101

A tutorial in conjunction with Basics of Film & Television.

FTT 13182. Fine Arts University Seminar

(3-0-3)

This writing intensive course will be devoted to a variety of different topics in film, television, new media and theatre depending on the individual instructor's interests. Note: freshmen only.

FTT 20009. Broadway Theatre Experience

(1-0-1) Donnelly

This short course offers students the opportunity to experience professional theatre at its finest. The course will include three days, two nights in NYC where we will see four professional productions: three Broadway shows (a musical, a comedy, a drama) and one off-Broadway show. The course has a lab fee, which includes round-trip bus and air transportation from Notre Dame to a Times Square hotel in Manhattan, two nights at the hotel, and best seats available for the four shows. Prior to the tour the class will meet to discuss the shows that will be seen, to become familiar with production practices, and to understand the structure and development of professional theatre in America. The course will culminate with a paper discussing aspects of the plays that were seen. This class will meet for three Wednesdays (April 6, 13, 20, 2011) from 6:00–9:00 p.m. Department approval required. No pre-requisites. Field Trip New York City, April 15–17, 2011, is required. This course may be repeated for credit.

FTT 20101. Basics of Film and Television

(3-0-3)

Corequisite: FTT 21101, FTT 22101

This class is designed to enhance your understanding and appreciation of film and television. You will learn about the basic elements that distinguish films and television programs from other aesthetic forms, such as editing, cinematography, sound and set design, and how these components work together to develop stories and characters. We will also work with interpretive frameworks that uncover deeper meanings and patterns in film and television, such as genre theory, the

idea of authorship, and ideological analysis. The class presents a range of films, from such Hollywood classics as *Casablanca* and *The Departed*, to award-winning international films and projects from our very own student film festival. Television shows we will screen include *Mad Men*, *Grey's Anatomy*, and *Ugly Betty*. This course is required for all majors in film, television, and theatre.

FTT 20260. La telenovela: history-culture-production

(3-0-3)

In this course you will explore the genre of the telenovela (a major social, cultural, political, and economic force in Latin America and, more recently, in the United States) by reading about the genre (in Spanish) and watching two condensed telenovelas (also in Spanish). You will demonstrate your understanding of the telenovela and its importance in Hispanic culture through writing and discussion and through application of these ideas as you write, produce, direct, act in, record and edit a mini-telenovela as a class. During this process you will learn and apply basic production (videography) and post-production (computer-based video and audio editing) techniques. Course taught in Spanish.

FTT 20280. Culture, Media, and Entertainment in China Today

(3-0-3)

This course is designed to provide students with an introduction to aspects of contemporary Chinese culture, media, and entertainment. The class focuses on the development of China's media and entertainment industries, including the online industry, the music industry, advertising, television, and the film industry. Students will learn to critically analyze authentic cultural products, study their cultural and literary dimensions, and discuss how culture affects the political and economic aspects of these industries. This class aims to be interdisciplinary and is designed to accommodate students from a large range of academic interests, including business, marketing, political science, economics, communication, media studies, music, sociology, literature, film, cultural studies, and Asian studies. No prior knowledge of China or the Chinese language is required. Fulfills international requirement.

FTT 20700. Introduction to Theatre

(3-0-3)

A summer introductory study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Students will gain a basic understanding of live theatre performances with the goal of becoming more objective about their own theatre experiences.

FTT 20701. Introduction to Theatre

(3-0-3)

A study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Through lectures, readings, and discussion, students will study this art form and understand its relevance to their own life as well as to other art forms. A basic understanding of the history of theatre and the recognition of the duties and responsibilities of the personnel involved in producing live theatre performances will allow students to become more objective in their own theatre experiences.

FTT 20702. Stage Management

(3-0-3)

This course will explore the duties and functions of the stage manager in both the pre-production and production phases of the mounting of a show. Students will learn how to produce a promptbook and to track and block a show. They will also learn performance etiquette and documentation of a production. Students will be required to attend some rehearsals, performances, and develop a promptbook and related forms. Grading is based on active class participation and regular attendance, a final project, a journal, a paper, and a written final. Students are also encouraged to serve as a stage manager or an assistant stage manager on a film, television, and theatre production during the semester.

FTT 20703. Theatrical Production

(3-0-3)

A practical introduction to techniques, processes, and material. The student will explore traditional and modern theatrical production methods: carpentry, rigging, scenic painting, lighting, basic technical drafting, equipment use, safety, material handling, and costume construction sewing techniques. Students will gain practical experience participating on realized projects and productions.

FTT 20704. Theatre, History, and Society

(3-0-3)

This course analyzes and evaluates the art form of theatre within its larger historical and societal context. Treating the art form as a culture industry, the course examines periods and sites to understand the theatrical event, its audiences, and its methods. Each unit emphasizes theatre as a site of cultural debate and political and social change and considers the larger role of representation in human society throughout time.

FTT 20705. Performance Analysis

(3-0-3)

Performance Analysis moves beyond analysis of scripts to teach a student how to "read" a performance. How do we understand an artist's choices in a given performance? Can we determine who is responsible for every choice in a production? Attention will be given to the role of each individual theatre artist and how the collaborative process evolves. This course will introduce theories of representation and interpretation and will involve analysis of both performances and text.

FTT 20707. Latin American Theatre

(3-0-3)

This course will serve as a basic introduction to plays from Latin America. Models from South America, Central America, North America and the Caribbean will be included in order to give students a general overview of significant contemporary plays (in English) from a sampling of countries in the Spanish-speaking world. Students will read plays and articles, see and analyze footage of performances (when available), give creative and/or historical presentations, participate in discussions about the theatrical methods and materials, and further research areas that particularly interest them. Making connections between ideas and life experiences, while deepening appreciation for the arts and literature in Latin America are crucial goals of this class.

FTT 20800. Introduction to Musical Theatre

(3-0-3) Prizant

An introductory summer course on the history, development, and cultural relevance of musical theatre. This survey will emphasize a critical analysis of musical theatre aesthetics and narratives, productions and films, as well as how musicals are created and marketed in the United States. Students will learn about significant musical theatre artists, productions, and producers. Requirements: screenings, in-class comparative studies, selected readings, written research assignments, and a final exam.

FTT 20888. Survey of Pan-Asian Cinema

(3-0-3)

Corequisite: FTT 21888

Historically, Asia represented massiveness in terms of area, population, and resources. In our present century, Asia will come to represent massiveness in economic, technological, and military terms. Given the prominence of Asia as an integrated continent with renewed global significance, knowledge of this continent, its history, its people, its cultures, and its aspirations for the future become important to better understand the world we live in. This course is designed to provide insights into Asia by means of its cinema. The course is designed around weekly lectures, linked to a representative film, and augmented with discussions that integrate the critical readings with the films. We will cover a wide range of Asian nations and subjects ranging from popular commercial box office hits to critically acclaimed artistic masterpieces created by Asian filmmakers to highlight Asian experiences. Some of the national genres that we will address include Bollywood masala films, Japanese anime, Hong Kong martial arts, and Korean

hallyu (culture wave). Prior knowledge of Asia and/or the cinema is not required. All films will be screened in their original languages with English subtitles. The course is designed to introduce students to Asia on a broad scale.

FTT 20900. Script Analysis and Dramaturgy

(3-0-3)

In this course, students will learn: (1) how to read and interpret a playscript for production (script analysis) and (2) how to read and understand a dramatic text in terms of its historical and literary contexts (dramaturgical analysis).

FTT 21000. Dynamic Movement for the Actor

(3-0-3)

This course is an introduction to Russian-based movement for the stage. Students will learn beginning acrobatics, circus technique, yoga and rhythm games to increase strength, flexibility and comedic timing. In addition, class performances will allow students to play with integrating their new-found physical skills into storytelling. The focus of the course is to help actors increase their physical awareness and malleability in order to portray a wider range of characters.

FTT 21001. Acting: Process

(3-0-3)

The purpose of this class is self-discovery and growth as an actor. You will be introduced to basic principles and techniques for preparation and performance, as well as a context for developing a working methodology for personal creative growth as an actor, the creation of a role, realization of a scene, and an introduction to the production process. You are expected, therefore, to know and apply these principles and processes. Scene work is prepared and rehearsed with a partner(s) outside of class for presentation in class. Written textual analysis (including detailed character study) is required for all scene work. A critical journal will reflect on assigned readings, responses to the work, and continuing assessment of personal growth.

FTT 21005. Viewpoints for Actors and Directors

(3-0-3)

Prerequisite: FTT 21001

This course is designed to introduce actors and directors to the fundamentals of a dynamic technique known as Viewpoints. Viewpoints allows a group of actors to function together spontaneously and intuitively and to generate bold work quickly. It develops flexibility, articulation, and strength in movement and makes ensemble playing truly possible. The Viewpoints further gives directors a vocabulary with which to create and transform their work on stage or in film.

FTT 21006. Playwriting

(3-0-3)

This course is designed to introduce students to creating original work for the theater. The course will explore the writing process as well as models from contemporary U.S. theater with the aim to present a variety of paths toward creating new, vibrant plays. This is primarily a writing course. In addition, by reading and discussing ten separate dynamic play texts, we will analyze dramatic writing. Weekly writing exercises, movement work, visual arts approaches, improvisation techniques and collaborative discussions will create resources for rich play material, which each student will eventually use in a final scene, presented in a public reading at the end of the semester.

FTT 21007. Writing for Screen and Stage I

(3-0-3)

This class focuses on the basics of dramatic writing: story, dialogue, character, and style. Students will develop three short scenes as stage plays or as screenplays. The last section will be devoted to developing one of these for public reading. This class is a prerequisite for Writing for Screen and Stage II, FTT 31007, which will be offered during the spring semester.

FTT 21008. Playwriting Towards Production: New Strategies, New Voices

(3-0-3)

This playwriting workshop course introduces the student to new playwriting strategies and current shifts in writing techniques for performance, with the objective of the actual production of his/her own original dramatic text at the end of the course. Students apply strategies and techniques learned in class to exercises in writing and to the creation of a dramatic text, as they conceive of their text in both dramatic and theatrical terms. Through the progressive workshop and critique of their work in class, students understand the strengths and weaknesses of the text in terms of the actor's total instrument, the aspirations and obstacle of character, narrative strategies, approaches to form, metaphor and image, design and movement, language and meaning, and, most importantly, their vision as playwright. As students embark on this process, they visualize, hear, imagine, and eventually execute the transfer of their work from the original concept to a performance that will convey their urgent message and ask our world new questions.

FTT 21101. Basics/Film and Television Lab

(0-0-0)

Corequisite: FTT 20101, FTT 22101

During the lab times, certain films will be viewed for further discussion in class.

FTT 22101. Basics of Film and Television Tutorial

(0-0-0)

Corequisite: FTT 20101, FTT 21101

A tutorial to be taken in conjunction with the Basics of Film & Television course.

FTT 30004. Makeup for the Stage

(3-0-3) Donnelly

The theory and practice of makeup design, including: basic techniques, corrective, old age, and special character makeup. Requirements: attend class and makeup demonstrations, practical makeup design projects, mid-term exam, and final exam project. Students will provide their own supplies. Due to the practical nature of the class, all male students need to be clean-shaven.

FTT 30005. History of Costume

(4-0-4)

This course is a survey of the history of costume and fashion from the Egyptian cultures through the 20th century. The course will look at the ever-changing trends in clothing and provide an understanding of the cultural and historical effects of those changes. The class will investigate how fabric, style, color, and the psychology of clothing reflects personal choice, cultural impressions and historical perspectives. The course will include a research trip to England.

FTT 30008. Love and Death in Classical Japanese Drama

(3-0-3)

An introduction to Japanese classical theater (Noh, Kyogen, Bunraku, and Kabuki) through readings and videotapes of selected plays.

FTT 30009. Contemporary Plays

(3-0-3)

This course will familiarize you with major plays and playwrights of the past twenty years. You will examine the style, structure and societal context of each play. Specific focus will be given to the demands each play requires of the artistic staff. Emphasis will also be placed on your ability to evaluate and articulate thoughts about theatrical concepts and performances. This course fulfills the dramatic literature requirement for the theatre major.

FTT 30014. Acting for the Camera

(3-0-3)

Prerequisite: FTT 21001 or FTT 30410

Corequisite: FTT 31014

This is an upper level acting class is designed for both acting and film/video students. The course will focus on techniques for effective on-camera performance.

Students will learn the mechanics of working on a set in addition to methods for applying traditional acting training to film, television/industrial and commercial work.

FTT 30101. History of Film I

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101

Corequisite: FTT 31101

This course traces the major developments within the history of U.S. and international cinema from its beginnings to 1946. It will look at films from the major cinematic movements and genres and from major filmmakers. These films and filmmakers will be considered in terms of the social, economic, technological, and aesthetic forces that have shaped them.

FTT 30102. History of Film II

(3-0-3)

Prerequisite: FTT 30101 or FTT 30461

Corequisite: FTT 31102

This course traces the major developments in world cinema from the post-WWII era to the present. The course will examine the shifting social, economic, technological, and aesthetic conditions of this period, especially the demise of the Hollywood studio system, the rise of new technologies and auxiliary marketing outlets, and the globalization of cinema. The course will not be limited to Hollywood filmmaking, but will also look at various international movements, including Italian Neorealism, the French New Wave, and recent Asian cinemas.

FTT 30103. Teen Culture

(3-0-3)

Prerequisite: (FTT 10101 or FTT 20101) and (FTT 30101 or FTT 30102 or FTT 30460)

Corequisite: FTT 31103

Adolescence has long been recognized as a period of life marked by physical and psychological changes, but it was only in the twentieth century that people experiencing these changes became known as “teenagers.” This class examines the history and significance of teens’ culture and the films and television programs that have represented teens’ experiences.

FTT 30231. Comedy, Italian Style!

(3-0-3) Welle

Corequisite: FTT 31231

An exploration of comic traditions in Italy: the popular film genre known as “comedy Italian style” is analyzed in its historical development in the 1950s and ’60s, together with Italian film comedies from the silent period through the present. Requirements include attendance at mandatory film screenings, participation in class discussions, a number of short papers, and midterm and final exams. The class will be conducted in English.

FTT 30233. New Iranian Cinema

(3-0-3)

Corequisite: FTT 31233

This seminar course will take up a selection of the best of the new wave of Iranian cinema (films by Abbas Kiarostami, *Close-Up*, *Where is the Friend's House?*, *Taste of Cherry*; Samira Mahkmalbaf, *The Apple*; Jafar Panahi, *The Circle*; Naderi, *The Runner*, and others) and debate its sources and its paradoxical arrival on the international film scene. We will consider the role of censorship, limited budgets, Islamic proscriptions, national history and aspirations, issues of gender and, in particular, the persistent influence of a 2500 year-old, popular poetic Sufi tradition in the inspiration and refinement of this unexpected cultural phenomenon. All written course work responses to the Iranian films will be done in poetic forms, then performed in class. Finally, teams of students will develop short Iranian films and pitch them to a student board of Iranian censors that will have the power to approve or disapprove these scripts for production.

FTT 30235. Italian National Cinema

(3-0-3)

Corequisite: LLRO 41545

Conducted in English, this course examines the concept and reality of “national cinema” in the Italian case. A history of one of the world’s most renowned national cinemas focusing on the construction of national identity in film.

FTT 30236. Introduction to Japanese Popular Culture

(3-0-3) Shamoon

Corequisite: FTT 31236

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasize the theoretical distinctions between those media. Rather than following a chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What role did foreign influences, most importantly, American pop culture play? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? This course is taught in English and no knowledge of the Japanese language is required.

FTT 30237. Masterpieces of German Cinema

(3-0-3)

Corequisite: FTT 31237

German cinema has been from the start one of the most impressive, distinctive, and influential national traditions of cinema. This course, taught in English, will introduce students to some of the greatest works of German cinema, from the wake of World War I and the beginning of the Weimar Republic to the present day. The two-fold focus will be historical and aesthetic. Students will gain an appreciation of some of the fascinating complexities of German history, including the ways in which German films have tended to reflect contemporary issues, often indirectly, and some of the distinctive features of German film, also as an industry. In addition, we will interpret the films with appropriate attention not only to themes but also to the ways in which film as an art form expresses meaning indirectly, by integrating genre and narrative form as well as film-specific dimensions such as setting, lighting, sound, camera work, and editing.

FTT 30238. Writing the Short Film

(1-0-1)

Filmmaking is always, at first, thinking and writing. This is a workshop for would-be screenwriters, to develop original ideas for the screen and to practice those techniques whereby ideas can be translated into cinema on the page. There is a stress of using script form to explore ways to enhance your ideas for adapting prose materials. Coursework will involve short writing exercises and finally a script for a 6- to 10-minute film. In class we will screen many shorts—some made by students and some by professionals—to demonstrate the range of sources and styles that are possible in the short film.

FTT 30241. New Chinese Cinema

(3-0-3)

This class explores underground films produced in Mainland China since the 1980s. Many films that were produced illegally or banned in China have garnered awards in prestigious international film festivals—Cannes, Berlin, Venice, Toronto, Tribeca (and the list runs on). How and in what ways were the films subversive? What is the role of China as a nation and state in the production of film today and in the past? How do these films play to the international film festival circuit and international market? Is commercialization realizing less government control of film and other media in China? The class will view both feature films and documentaries, including those unavailable in the U.S. (but all with English subtitles). No prior knowledge of Chinese language, culture, or history is required.

FTT 30244. Cruel Stories of Youth: Children and Teens in Japanese Film

(3-0-3) Shamoon

From the wide-eyed children of anime to the crazy street fashions of Harajuku, images of kids and teens in Japanese popular culture are now distributed and consumed around the world. How then are those young audiences depicted and addressed within Japanese popular culture? What aspects of childhood or teen identity are repeated across generations? In order to answer these questions, we will look at Japanese films, including animation, from across the 20th century, that represent children and teens from a variety of perspectives, from the celebration of innocence to the threat of juvenile delinquency. In addition to analyzing representations of children and teens, students will also gain familiarity with Japanese film history and genres, and develop the critical vocabulary of film analysis. All films will be subtitled. There will also be secondary readings in cultural studies and film studies, relating to the films we watch in class. Assignments will include an oral presentation, several short writing assignments, a film viewing journal, and a longer paper.

FTT 30246. New Russian Cinema (in English)

(3-0-3)

Freed from the constraints of Soviet-era censorship, in the period 1990–2005 Russian filmmakers exploited the unique qualities of the film medium in order to create compelling portraits of a society in transition. The films we will watch cover a broad spectrum: reassessing Russia's rich pre-Revolutionary cultural heritage as well as traumatic periods in Soviet history (World War II, the Stalinist era); grappling with formerly taboo social issues (gender roles, anti-Semitism, alcoholism); taking an unflinching look at new social problems resulting from the breakdown of the Soviet system (the rise of neo-fascism, the war in Chechnya, organized crime); and meditating on Russia's current political and cultural dilemmas (the place of non-Russian ethnicities within Russia, Russians' love-hate relationship with the West). From this complex cinematic patchwork emerges a picture of a new, raw Russia, as yet confused and turbulent, but full of vitality and promise for the future.

FTT 30247. Screening the Irish Troubles

(3-0-3) Nic Dhiarmada

This course will look at how political conflict in Ireland from the 1916 Rebellion and the War of Independence up to and including what became known as “The Troubles” in the North of Ireland has been represented on the screen. Students will analyze a wide variety of cinematic texts, mainstream commercial Hollywood features as well as independent Irish and British films. Documentary film will also be analyzed. Certain seminal events such as Bloody Sunday and the 1981 Hunger Strikes that have a diverse representational history on screen will be given particular attention. Among the films discussed will be *Mise Eire*, *Saoirse*, *Michael Collins*, *The Wind that Shakes the Barley*, *Some Mother's Son*, *In the Name of the Father*, and *Bloody Sunday*.

FTT 30248. Black Arts and the Diaspora

(3-0-3)

This course offers a survey of black diasporic artistry. At the same time, it answers the question, “who constitutes the black diaspora?” in unique ways. We will focus primarily on this conversation's development from the 1920s up to the present through poetry, prose fiction and nonfiction, visual art, film, and television. Attention will be devoted to how these different genres and media frame what is known (or unknown) about the black diaspora. Moreover, we will consider how these media and genres influence political activism in the black diaspora. Due to the diversity of the materials covered, the themes will give the course its unity. Students will be urged to follow a particular theme (or two) throughout the course. Some of these themes might include race, gender, class, the body, and leadership. Some of the artists and intellectuals in this survey will include: African-American writers Zora Neale Hurston, Langston Hughes, and Nathaniel Mackey; Trinidadian-Canadian poet M. Nourbese Philip; musicians like Nigerian artist and activist Fela Kuti; Martinican philosopher and psychoanalyst Frantz Fanon;

orator and activist Martin Luther King, Jr; the Haitian-Puerto Rican visual artists Jean-Michel Basquiat; and the visual artist Kehinde Wiley. Class participation is paramount. Students will also write reader response papers and research essays.

FTT 30249. Masters of Contemporary Chinese Cinema

(3-0-3)

Corequisite: FTT 31249

This introductory film course showcases master directors and major films from China, Hong Kong and Taiwan. Students will learn to appreciate Chinese cinema both for its content and techniques, while familiarizing themselves with social and political changes under which these films were produced in Greater China. We will examine cinematic accomplishments by master directors and analyze how they recreate for the audience different Chinese societies on the screen. This course is taught in English. No prior knowledge of Chinese is required.

FTT 30300. The West of Ireland—An Imagined Space

(3-0-3)

This course will interrogate and examine representations of the West of Ireland in various twentieth century texts focusing, in particular on the role of “the West of Ireland” in state formation and legitimization during the early decades of independent Ireland and its role in the construction of an Irish identity. We will look at how images of the West of Ireland were constructed in various utopian or romanticized formulations as well as examining more dystopian versions. This course will take an interdisciplinary approach, drawing on the visual arts and film as well as on literary texts in both Irish and English. (Irish language texts will be read in translation).

FTT 30400. The Film Producer: From Concept to Distribution

(3-0-3)

This course will provide an in-depth explanation of the little understood job of producer; the program manager of a film, as well as gardener, mother hen, cheerleader, drill sergeant, counselor, and eternal optimist. With a moderate emphasis on low-budget narrative films, the course will examine the tasks of selecting or developing projects, attaching talent, securing funding, overseeing production, and reaching the audience. Overarching subjects such as legal matters, leadership, and helpful personality traits will also be covered. The course will be a combination of lecture and discussion, and the assignments will include an investor presentation to the class, a pitch letter to distributors, and some short papers, plus a midterm and final exam.

FTT 30406. The Art and Practice of Screenwriting

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101

Corequisite: FTT 31406

Filmmaking is always, at first, thinking and writing. This is a workshop for current and would-be screenwriters, to develop original ideas for the screen and to practice those techniques whereby those ideas can be translated into cinema on the page. Coursework will involve many short writing exercises and finally a script for a 20-minute film. There will also be a required lab screening.

FTT 30410. Introduction to Film and Television Production

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101 or FTT 20102

Corequisite: FTT 31410

An introductory course in the fundamentals of shooting, editing, and writing for film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. The course requires significant amounts of shooting and editing outside class. Students produce short video projects using digital video and Super 8mm film cameras and edit digitally on computer workstations. The principles of three-camera studio production are also covered.

FTT 30412. Digital 3-D

(3-0-3)

This course introduces students to Alias Wavefront software, a powerful conceptual tool for modeling and animating complex objects. In this digital exploration, computer technology will be used to generate, modify, and present design ideas.

FTT 30413. Multimedia Motion Graphics

(3-0-3)

This advanced multimedia course will give the studio, design, FTT, or CAPP major an introduction to the design of motion graphics. Students will develop short information movies, movie trailers, or movie opening sequences. The course will use Apple's Motion software and cover basic DVD and QuickTime movie development. Skill with various graphics software useful, with expertise in Adobe Photoshop very important.

FTT 30414. JavaScript: Making the Web Behave

(3-0-3) Nunemaker

JavaScript is a forgiving and wonderfully simple, yet powerful programming language. It was designed to be easy for non-programmers to use and is now an essential part of the web, powering rich interactions in sites like Facebook, Gmail and Mobile Me.

FTT 30430. History of Documentary Film

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101*Corequisite:* FTT 31430

This course will track the history of nonfiction film and television, examining various structures and formats including expository, narrative, experimental, formalist, docudrama, and "reality TV." It will also examine the uses of actuality footage in films that make no pretense to objectivity. At the center of the course will be a deconstruction of the notion of "film truth." Students will develop skills in the critical analysis of documentary and examine the standards by which we evaluate them.

FTT 30431. Women and Documentary

(3-0-3)

Corequisite: FTT 31431

Women shoot film! Women direct! Women run sound! They ask questions! Hard ones! When only 6% of Hollywood fiction films were directed by women in 2007, how is it that the number of documentaries crafted by women was estimated to be as high as 50% that same year? In this course we will explore some of the most potent, groundbreaking, funny, inspiring and thought-provoking American and international documentaries made by women. We will learn why the form has routinely attracted female filmmakers, what advantages they bring to the genre, and why the documentary film industry has welcomed women in all roles. Social justice, autobiographical, *cinéma-vérité* and traditional forms will be featured, including works by Barbara Kopple, Sadie Benning, Pirjo Honkasalo, Emiko Omori, Agnes Varda and Jill Godmilow. Academy Award winners, to a girl with a toy camera—you'll find them all in this course.

FTT 30437. Topics: Film and Popular Music

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101*Corequisite:* FTT 31437

This course examines the relationship between popular music and film through an examination of film scores, the genre of the musical, musical performance, the use of prerecorded pop songs in films, rockumentaries, music video, and pop biopics. We'll see films using popular music of all kinds: Tin Pan Alley, '50s rock 'n' roll, jazz, disco, country, French pop, and more. We'll consider the role of the star—ranging from Astaire to Travolta, Dylan to Madonna—and films by directors such as Scorsese and Welles. Looking at films from the 1930s to the present, we'll consider the narrative function and meaning of music, industrial practices, changing social values, how songs get Academy Awards, how soundtracks circulate,

and how film relates to various other musical media, such as radio and MTV.

Throughout, we will pay special attention to how pop music affects film's ideologies of gender, race, and sexuality. Students do not need a background in music.

FTT 30450. Television Criticism and Aesthetics

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101 or FTT 20102*Corequisite:* FTT 31450

This course builds upon the concepts that students are introduced to in Basics of Film and Television and offers more advanced study of television criticism and aesthetics. We will seek, first of all, to understand television as a unique meaning-producing medium, dissecting television's narrative and non-narrative structures and its distinctive visual and aural aesthetic. Second, we will confront the critical methodologies that have been applied to the medium under the rubric of academic television studies: semiotics, genre study, ideological analysis, cultural studies, and so on. Thus, our goals will be to understand how television makes meaning and to explore how media scholars approach television in meaningful ways. The course will be a combination of lecture and discussion, and the assignments will include a midterm and final, as well as a handful of short papers and reading responses.

FTT 30460. Girl's Media Culture

(3-0-3)

Corequisite: FTT 31460

Although media made for girls has long been derided as silly and undeserving of close attention, to the millions of preteen and teen girls who consume it, it is anything but insignificant. From Nancy Drew novels in the 1930s to beach party movies in the 1960s, from 1970s sitcoms such as *The Partridge Family* and *Good Times* to contemporary films and TV shows such as *Mean Girls*, *Whip It*, *That's So Raven*, *Hannah Montana*, and *90210*, girls' media forms have functioned as important historical sites for the negotiation of cultural politics and youthful feminine ideals. In order to shed light on the oft-overlooked history of girls' media in the U.S., this course offers a critical investigation of popular girls' media from the late 1930s to the present, including films, TV shows, music videos, and teen magazines. We will investigate girls' media artifacts as commercial and aesthetic texts through which girls have interfaced with lessons about gender, sexuality, race, and class at different times in U.S. history. We will also consider how the landscape of girls' media production has both changed, and resisted change, over time. Finally, we will examine the expansion of female youth culture beyond consumer-oriented activities to those involving girls' cultural production. The course will be a combination of lecture, discussion, and screenings, and the assignments will include a midterm and a final as well as 2–3 short papers.

FTT 30461. History of Television

(3-0-3)

Corequisite: FTT 31461

Television has been widely available in the United States for only half a century, yet already it has become a key means through which we understand our culture. Our course examines this vital medium from three perspectives. First, we will look at the industrial, economic and technological forces that have shaped U.S. television since its inception. These factors help explain how U.S. television adopted the format of advertiser-supported broadcast networks and why this format is changing today. Second, we will explore television's role in American social and political life: how TV has represented cultural changes in the areas of gender, class, race and ethnicity. Third, we will discuss specific narrative and visual strategies that characterize program formats. Throughout the semester we will demonstrate how television and U.S. culture mutually influence one another, as television both constructs our view of the world and is affected by social and cultural forces within the U.S.

FTT 30462. Broadcast Journalism

(3-0-3)

Four major topics are covered: (1) Writing for broadcast with emphasis on developing the student's understanding of grammar and style in the construction of effective news stories; (2) newsroom structure: understanding who does what in

today's broadcast newsroom and how economics affects the flow of information; (3) journalism ethics: analysis of personal values, ethical principles, and journalistic duties that influence newsroom decisions; and (4) legal considerations in news gathering with special attention paid to libel laws and invasion of privacy.

FTT 30463. Broadcasting and Cable

(3-0-3)

This course examines the history and current practices of the broadcast and cable television industry and looks at its effect on American culture and society. Topics of discussion include important issues in the industry, government regulation, news, sports, and entertainment programming strategies and practices, ratings, and advertising. Taught in the spring only.

FTT 30464. Intro to New Media

(3-0-3) Lagerwey

Corequisite: FTT 31464

This course will explore the history and theory of so-called new media including the Internet, games, mobile technologies like cell phones and iPods, and their apps like Twitter, Facebook, and Google. It will use representations of new media and technologies in films, television, and journalism to figure out the cultural meanings and value given to new media. Over the course of the semester, we will analyze four aspects of new media: aesthetics, politics, economics, and interpretations. How do digital or new media aesthetics influence the look and production techniques of "old" media? How is social networking borrowing from fan practices to change how we organize politically or receive news? Who owns, who has access to and knowledge of emerging technologies? And how do we interpret new media's actual uses in relation to all the hype that surrounds every new innovation?

FTT 30465. Sports and Television

(3-0-3)

Sports have played an integral role in the television industry since the medium's early days. This course will highlight the history of sports on television and focus on the nuts and bolts of how television sports programming works today. The course will also examine the impact of televised sports on our culture as well as the ethical issues raised by the media's coverage of sports. Taught in the fall only.

FTT 30466. Film and Digital Culture

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101

Corequisite: FTT 31466

This class examines the many and varied ways in which new digital technologies are changing traditional methods of film production, distribution, exhibition and reception. Some of the topics we will explore include: the impact of digital cameras and editing on film production; new narrative structures that result from the temporal and spatial manipulations of digital technology; new media in animation; the legal issues raised by digital technologies and the industry's efforts to combat piracy; new forms of audience engagement through fan websites; the implications of DVD extras and the future of digital video in the home.

FTT 30491. Debate

(V-0-V)

This course will focus on research of current events and the efficacy of proposed resolutions toward the alleviation or reduction of societal harms. It will also involve discussion of debate theory and technique. Permission required.

FTT 30500. Questions of Homosexuality in Film and Literature

(3-0-3)

This course will introduce students to many of the critical perspectives and theories that enliven contemporary literary and cultural studies on gay and lesbian film and literature. Throughout the semester we will examine a collection of films and literary texts by self-identified gay and lesbian writers and/or by authors who deal with gay and lesbian themes and characters, irrespective of their sexual identity. Through the analysis of the selected texts we will also examine the history, politics, and theoretical arguments both current and historical that deal with homosexuality to see how this human phenomenon and its cultural expression has

affected and been affected by heterosexual culture and the conflicts that have arisen between them. We will also explore how sexual and gender norms are constructed historically and culturally; how sexual and gender norms affect gay, lesbian and heterosexual people's development and self-perception; how new definitions and theories of human sexuality generated by gay and lesbian individuals and communities present alternatives to dominant heterosexist traditions. One of the main objectives of this interdisciplinary course is to open intellectual dialogue, to broaden students' awareness of the human experience at the same time we acquaint ourselves with some of the most intellectually interesting works that have stemmed from gay inspiration.

FTT 30800. Scenic Painting

(3-0-3)

An introduction to the tools and techniques used in painted and textured scenery for the stage and screen. Students will learn and apply the variety of methods used in creating a wide range of painted effects; from the basic wood treatments to the advanced marbling and faux finishes. Outside of class painting time will be required.

FTT 30801. Scene Design

(3-0-3)

This is a beginner's course in basic scenic design techniques and hand drafting for the stage. This course will take the student through the process of design from how to read a script, research, presentation, rendering, basic drafting, and if time allows, model building. No previous experience necessary. Materials fee TBA.

FTT 30802. Lighting Design

(3-0-3)

This class will teach you what is involved in creating and executing a lighting design. We will cover lighting equipment and safety. You will design and draft a light plot, and you will learn how to write and use paperwork. Most importantly, the goal of this class will be to teach you how to see light. There will be lectures, videos, projects (take-home and in-class), hands-on training, and required attendance at TWO performances. The semester culminates with a final design project, as well as written components.

FTT 30803. Costume Design

(3-0-3)

This course teaches the principles of costume design for the stage. The course will explore the use of costumes to express character traits by analyzing play scripts. Students will design costumes, and explore the process of organizing the script from the costume designer's viewpoint. The course will include projects, discussions, and lectures. The course will end with a portfolio presentation of the work completed throughout the semester. Students will be expected to provide their own materials and supplies. Must be enrolled in FTT. Non-majors must receive permission of instructor.

FTT 30804. Draping and Flat Patternmaking

(3-0-3)

Prerequisite: FTT 20703

Corequisite: FTT 31804

Students will learn how to develop sewing patterns for theatre costumes through the two standard methods used in the profession: draping and flat patternmaking. Students will learn the basics of creating various patterns needed to construct contemporary and period costumes for stage and film.

FTT 30900. Advanced Dramaturgy

(3-0-3)

Prerequisite: FTT 20900

This course will give students the opportunity to create their own full-length dramaturgical projects, such as adaptations, translations, preparing texts for the stage, and/or creating program and study guides for particular plays. Independent, individual projects will be central. Students will be expected to present their work (as staged readings, presentations, etc) for the public.

FTT 30901. The Hyphenated American

(3-0-3)

This course will engage theatrical works for, by, and about hyphenated Americans (African-Americans, Asian-Americans, etc.). Students will see live theatre, theatre on video, and interviews with dramatists and performers. Reading and understanding plays and various theoretical materials on race, culture and immigration will also be vital components of the course. The course will require a large research project based on a topic of the student's choosing.

FTT 30902. Beyond Beans and Rice: Theatre from Latin America

(3-0-3)

What does popular theatre look like beyond our borders? What can we learn from artistic choices in Mexico, Argentina or Cuba? This course will serve as an introduction to contemporary plays, playwrights and performances from Latin America. Models from South America, Central America, North America and the Caribbean will be included (in English) to give students an overview from a sampling of the Spanish-speaking world. Students will be expected to read plays and articles, analyze scripts and performances, give creative and/or historical presentations about contexts in Latin American countries, participate in discussions about theatrical methods and materials, and research areas of particular interest to them. No previous Spanish language or acting experience is necessary.

FTT 31001. Acting: Character

(3-0-3)

The second course in the acting progression, this course expands on basic methodology and incorporates physical techniques for building a character. Students explore psychological gestures, Laban effort shapes, and improvisation as they develop a personal approach to creating a role.

FTT 31002. Voice and Movement

(3-0-3)

A course designed to help the advanced acting student focus on kinesthetic awareness. The actor will identify and work to remove physical and vocal tensions that cause habituated movement and impede natural sound production. Through movement and vocal exercises created for actors, students will experience what "prepared readiness" for the stage is, and how to meet the demands of a live performance.

FTT 31003. Acting: Role—Contemporary

(3-0-3)

Advanced exploration of technique and methodology, focusing on problem solving in approaching roles from the literature of the contemporary theatre.

FTT 31004. Creating Solo Performance

(3-0-3)

Prerequisite: FTT 21001

This class will examine the entire theatrical creative process, from inception to performance, arriving at a presentable one-person show by the end of the semester. Each student will find a character—alive or dead—which they relate to, and for whom there exists enough information to support exhaustive research. Stage by stage, we will assemble everything the student wishes to include in his or her text, and then turn it into a script which meets the criteria of dramatic presentation. The students will comment on all the scripts and contribute their own suggestions as the plays take shape, thereby learning from the formation of all the pieces of work, not just their own. Finally, I will direct the completed texts, and they will be performed to an audience that has taken no part in their formation, and can therefore evaluate the work with a fresh eye.

FTT 31005. Theatre Production Workshop

(3-0-3)

Prerequisite: FTT 21001

A workshop course in the process of theatre production in which students assume a major nonperformance production responsibility including, but not limited to:

stage manager, assistant stage manager, prop master, costumer, technical director or assistant director. This course can be repeated for up to four hours credit. Requires instructor's permission.

FTT 31006. Directing: Process

(3-0-3)

Prerequisite: FTT 21001

This course introduces students to the basic philosophies and techniques of stage directing, and is appropriate for any student interested in learning how to tell compelling stories through the use of textual analysis, dramatic action, and persuasive visuals. Students will learn how to analyze text, select a script for production, strategize for production meetings and rehearsals, and represent ideas visually. Students will have the opportunity to prepare, cast, and rehearse scenes outside of class that will culminate in an end-of-semester showcase performance. Script analyses will be required in relation to scripts read throughout the semester while both script analyses and prompt books will be required in relation to your final scene showing at the end of the semester.

FTT 31008. Acting: Text and Technique

(3-0-3)

Prerequisite: FTT 21001

This upper-level acting course will focus on the intersection between written and embodied (performed) text. The class will use scripts from film, television and theatre to practice the actor's craft of close reading: students can learn to look beyond the explicit facts in a given scene to uncover the implicit information that feeds objectives and intentions. Daily classes will explore the relationship between close reading and strong artistic choices. We will begin the semester solidifying the basic acting techniques of improvisation, physicality, intention and subtext, and move quickly into textual analysis. Students will be required to create detailed scene breakdowns with scene studies and to rehearse weekly outside of class time.

FTT 31012. Approaches to Acting for Stage and Screen

(3-0-3)

An active and participatory overview of several techniques that actors and directors can employ for the best results in any given situation whether it be on the stage or in front of the camera. Discover what process will work for you and/or your actors! Methods explored in the course will include Stanislavski, Grotowski, Meisner, Viewpoints and Suzuki.

FTT 31013. Performance, Culture and Creativity

(3-0-3)

This course seeks to integrate cultural experiences with the intellectual practice of examination and discovery. The focal point of the course requires students to identify the cultural and universal semiotics in stage plays and then to create performances based on their research. Theatre becomes the framework you will use to make sense of disparate realities. We will look at theatre as both an artistic endeavor, and more specifically, as subjective experiences that occur for each individual in drastically different ways—dependent upon that person's cultural background and current environment. This course is intended for the student who has recently returned from studying abroad, but all students are welcome.

FTT 31403. Moving Media

(3-0-3)

This is an introductory course in creating time-based imagery with digital still cameras and video cameras. Students will work with their own photographs, video footage and recorded sound to create works that blur the boundaries of photography and video. Assignments will explore a variety of visual possibilities including non-traditional narratives, sound-works and conceptual constructions. Students will be responsible for producing several assigned projects using Final Cut Express including an independently designed final project. Final projects will be screened publicly at the end of the semester.

FTT 33112. Readings in Chinese Drama

(3-0-3)

This course studies a number of works in Chinese dramatic traditions from the premodern times up to the twentieth century. While attention will be paid to Chinese theater as performing art, the plays selected for this course will be studied primarily as literary texts. The purpose of the course is to familiarize students with some of the most outstanding formulations in Chinese drama and their underpinning cultural meanings. All readings are in English translations, and no prior knowledge of Chinese culture or language is required.

FTT 35501. FTT Internship

(V-V-V)

Students who successfully complete at least two of the following courses, FTT 30410, FTT 30462 or FTT 30463, may be eligible for an internship at a television station or network, radio station, video production company, film production company or similar media outlet. Interns must work 10–15 hours per week and compile 150 work hours by the end of the semester (120 hours for the summer session) to obtain three credits. Interns will complete a project, mid-semester progress report and a final evaluation paper. NOTE: This course does not count as an upper level course toward the FTT major.

FTT 40000. CAD for the Stage

(3-0-3) Cole

This course is a study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design and progress to 2-D and then 3-D design techniques. A basic understanding of computer systems is necessary, and significant computer work is required outside class.

FTT 40002. Directing: Practice

(3-0-3)

Prerequisite: FTT 31006

Advanced independent projects in directing. Students considering this course should consult with the instructor for departmental guidelines.

FTT 40003. Advanced Technical Production

(3-0-3)

Fly like Peter Pan? Blow things up (safely)? Program moving lights? What makes *Les Miserables* go round? This course explores entertainment technology at the edge, from special effects to digital design. Coursework covers pneumatics, robotics, rigging (i.e. flying) and other technologies used to create the special and mundane effects used in theatre, film and television. A grant for a class trip to a national conference in Charlotte, NC, is pending.

FTT 40004. Advanced Makeup for the Stage

(3-0-3) Donnelly

The advanced theory and practice of makeup design, including: basic techniques, corrective, old age, and special character makeup. Requirements: attend class and makeup demonstrations, practical makeup design projects, mid-term exam, and final exam project. Students will provide their own supplies.

FTT 40008. Dramatic Text, Production, and Social Concerns from the 1900s to the Present

(3-0-3)

This course will explore dramatic text, and production as an artistic expression and social comment on social problems and issues affecting a cultural condition from the 1900s to the present. It will study the use of modern tragedy, farce, burlesque, satire, symbolic drama, religious drama, social realism, street theatre forms, chameleon plays and performance art as expressions and agents of social change.

FTT 40009. Creating Original Performance

(3-0-3)

Veering away from the concept of transferring existing dramatic text onstage, this course focuses on devising theatre. The participants embark on a participatory and

process of writing and creating a new performance text based on collective planning and sharing, experimentation and improvisation, investigation and research, and inter-disciplinary material.

FTT 40014. Anglo-Irish Theatre since 1700

(3-0-3)

Students of English theatre and drama often ignore both the overt and covert contributions made by Ireland, its people, and its culture. Many of the greatest English playwrights since the Restoration have in fact been Irish, Anglo-Irish, or heavily influenced by Ireland; and this discussion-oriented course will examine and explore this important symbiosis in terms of theatre, history, and society. Both in terms of internal aspects and external relations, the course will examine a dozen significant Anglo-Irish playwrights writing in English including Congreve, Goldsmith, Sheridan, O’Keeffe, Boucicault, Yeats, Lady Gregory, Synge, O’Casey, Shaw, Wilde, Beckett, Behan, and Friel. We will relate a play (the drama) to the production history of that play (the theatre) while exploring both the larger societal issues of the times, internally to Ireland and externally to England, France, and the United States while also looking at the important World Drama component (as seen with Yeats and Japanese Noh).

FTT 40101. Film and Television Theory

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101 or FTT 30461*Corequisite:* FTT 41101

This course offers an introduction to the philosophical, aesthetic, cultural, and historical issues that inform current scholarship and production in film and television. The focus of the course may vary from semester to semester.

FTT 40233. Italian National Cinema

(3-0-3)

Corequisite: FTT 41233

Examining the interaction of history and film history, this course frames the question of “national cinema” in the Italian case. Providing an overview of one of the most renowned and beloved national cinemas, topics to be treated include: 1) “Making Italians” and the beginnings of Italian cinema; 2) the golden age of Italian silent film; 3) the transition to sound; 4) Hollywood and the Italian film industry under fascism; 5) neo-realism and the post WWII period; 6) politics and popular film genres of the 1950s and ’60s; 7) comedy Italian style and changing gender roles; 8) Fellini, Pasolini, Visconti, Antonioni: auteurs and the international success of Italian film in the ’60s and ’70s; 9) women directors of the ’80s and ’90s; and, 10) representations of recent Italian history in contemporary cinema: terrorism and the “years of lead.” Attention will also be given to the history of governmental film policies and attempts to produce a putatively Italian national cinema, the construction of national identity in film, the interaction of writers and cinema, and an examination of the ways in which images of the nation are understood and received by audiences both at home and abroad. Requirements include attendance at mandatory film screenings, preparation of readings and participation in class discussions, two short interpretive papers, an oral presentation, a midterm and a final exam. The class will be conducted in English.

FTT 40238. Film, Literature, and Irish Culture

(3-0-3)

Corequisite: FTT 41238

This course will examine some of the dominant images of Ireland in film and literature, and will place their development in a wider cultural and historical context. Comparisons between film, literature and other cultural forms will be featured throughout the course, and key stereotypes relating to gender, class and nation will be analyzed, particularly as they bear on images of romantic Ireland and modernity, landscape, the city, religion, violence, family and community. Particular attention will be paid to key figures such as Yeats, Synge, and Joyce, and contemporary writers such as John McGahern, William Trevor, Patrick McCabe and Roddy Doyle will be discussed in terms of the wider implications of their work for contemporary Irish culture. The resurgence of Irish cinema and new

forms of Irish writing in the past two decades will provide the main focus of the second part of the semester, tracing the emergence of new distinctive voices and images in an increasingly globalized and multi-cultural Ireland.

FTT 40239. Brazilian Cinema and Popular Music

(3-0-3)

This course offers social, cultural, and historical perspectives on Brazil through film and popular music. Topics include the reception of Cinema Novo and post-Cinema Novo films, bossa nova, samba and Tropicalia (a movement with key manifestations in literature, cinema and popular music) and the circumstances surrounding its creation, the repressive military regime that governed Brazil from 1964 to 1985.

FTT 40240. The Irish Hunger Strikes

(3-0-3) Nic Dhiarmada

“We remember them with pride for on hunger strike they died these brave men were Ireland’s sons they were the men of ’81” (Republican ballad.) “We’ll never forget you Jimmy Sands” (Loyalist graffiti in East Belfast shortly after Bobby Sands death on hunger strike.) Course description: Thirty years ago, in 1981, Bobby Sands and nine other Irish republican prisoners died on hunger strike in the Maze Prison outside Belfast. Their deaths and the British response were pivotal in the history of the recent “Troubles”. It would hardly be an exaggeration to say that the fallout from the 1981 hunger strike had the same momentous impact on nationalists and on Irish politics as had the executions of the leaders of 1916. This course will examine the 1981 hunger strike in the context of previous political hunger strikes in Ireland and will examine both its genesis, the strike itself and its aftermath. It will pay particular attention to the ways in which the political hunger strike and the 1981 hunger strike in particular is remembered and commemorated, drawing on the work of Paul Ricoeur among others. We will engage with a variety of texts and sources including memoirs, news reports, documentaries, film and songs.

FTT 40241. Hong Kong Action Cinema

(3-0-3)

Corequisite: FTT 41241

This course addresses the global significance of the gong fu vague (kung fu new wave) that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supercedes Hollywood’s dominance in the genre? Is this purely a Chinese phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic and economic significance within a larger framework or must they be critically dismissed outright? What does it mean that “everybody was kung fu fighting” and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English.

FTT 40242. Seoul Searching

(3-0-3)

Corequisite: FTT 41242

This course provides a historical, cultural, and aesthetic appraisal of South Korean cinema as it evolved from a Korean-centric film industry to a globally engaged film industry as evidenced by the current hallyu (Korea fever) phenomenon. Aspects of cultural continuity as well as cultural transformations and the forces that are involved in this dynamic cultural arena will be addressed. Some of the films under analysis will include *Obaltan: Aimless Bullet*, *Sopyonje*, *Peppermint Candy*, *Shiri*, *Bungee Jumping of Their Own*, *My Sassy Girl*, and *JSA*. No knowledge of Korean is required. Fulfills FTT international film requirement.

FTT 40249. Italian Cinema: Realities of History

(3-0-3)

This course explores the construction and development of the Italian cinematic realist tradition from the silent era to the early 1970s, although its primary focus is on the period 1934–1966, which stretches from the appearance of Blasetti’s openly fascist “historical” reconstruction, *La vecchia guardia*, to Pasolini’s “eccentric” exercise in left-wing commitment, *Uccellacci e uccellini*, with its mix of expressionist and hyper-realist techniques. At the centre of this period are found some of Italy’s most highly regarded films made by directors, such as Vittorio DeSica, Roberto Rossellini, and Luchino Visconti, who belonged to the neo-realist movement (1945–53). These filmmakers rejected escapist cinema and tried to make films that examined the contemporary experiences of ordinary Italians. As well as analyzing the films in themselves, the course examines the formal and ideological continuities and differences between neo-realist films and their silent and fascist predecessors. In a similar way, it analyses neo-realism’s impact on later film-makers, such as Federico Fellini, Pietro Germi, Pier Paolo Pasolini, Gillo Pontecorvo, Dino Risi, and Francesco Rosi, who attempted to develop new versions of cinematic realism. Finally, the course aims to locate the films in their historical and cultural contexts and to address theoretical issues arising from the concept of realism.

FTT 40410. Intermediate Filmmaking

(3-0-3)

Prerequisite: FTT 30410

Corequisite: FTT 41410

This is both a 16mm film and HD video production course, which will focus on the short narrative film using both 16mm color film stock and DVCPROHD video. We will explore both the technical and aesthetic aspects of cinematography of both formats using Arri SR cameras and the Panasonic HVX200 P2 card system. Students will also learn to use a variety of grip and lighting equipment. We will look at the collaborative roles of the director and cinematographer along with various crew positions. Students will first shoot in-class lighting and composition tests and then produce a 3- to 4-minute color, silent film, in teams of two, by the semester break. In the second half of the semester, those teams will then learn the HVX camera system, shooting the same film narrative on HD video. We will compare and analyze the techniques and results of both formats. All projects will be edited digitally on Final Cut Pro. All students will also be crew members working on the other films in the class. This is a very hands-on class with emphasis on a practical set experience. Attendance and participation are mandatory. Written mid-term and final exams. Materials fee required. Course DVD to be provided. Book: *Cinematography: The Classic Guide to Filmmaking*, 3rd edition.

FTT 40411. Documentary Video Production

(3-0-3) Mandell

Prerequisite: FTT 30405 or FTT 30410

Corequisite: FTT 41411

A hands-on creative course for the advanced production student interested in both the storytelling techniques of the documentarian and the technology of the professional video production world. Students will write, shoot, and edit two non-fiction based video projects, while learning advanced non-linear editing techniques using Avid Media Composer software, and post production audio sweetening with DigiDesign Pro Tools. Materials fee required.

FTT 40412. Advanced Filmmaking

(3-0-3)

Prerequisite: FTT 40410

Corequisite: FTT 41412

This is a film/video production workshop for advanced students, focusing on the scripting and development of sync sound, 16 mm. short color films in the fiction mode. It stresses writing skills with an emphasis on innovations that expand the existing traditions of and boundaries between fiction and non-fiction practices. Students will work in teams of two to produce and prepare films for shooting.

FTT 40414. High Definition Production

(3-0-3)

Prerequisite: FTT 40410

Through both practical application and critical analysis, this class will explore the use of high definition formats in both film and video. Starting with tests in 16mm color film and the new Panasonic HVX200 camera and P2 card system, you will explore the differences in color and light rendition and then go on to create short, narrative productions in groups each month. We will utilize the P2 digital workflow and incorporate compositing and color effects techniques.

FTT 40415. Screenwriting: Writing the Feature Film

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101*Corequisite:* FTT 41415

Filmmaking is always, at first, thinking and writing. This is a workshop for current and would-be screenwriters, to develop original ideas for the screen and to practice those techniques whereby those ideas can be translated into cinema on the page. Coursework will involve many short writing exercises and finally a script for a 20-minute film. There will also be a required lab screening.

FTT 40430. Post-Modern Narrative

(3-0-3)

Prerequisite: FTT 30101 or FTT 30102

In this course we will begin by focusing on the emergence of post-modernism and then trace its evolution through the present. Initially, our primary concern will be the conflicted conceptualization of the term, i.e. just what did post-modern mean in terms of a narrative practice and in terms of a “cultural condition”? Once we have established some operating definitions, and become familiar with some of the narratives that were first called post-modern (Pynchon’s *Crying of Lot 49*, Scott’s *Blade Runner*, etc.) we will begin to discuss the novels and films which became synonymous with post-modern textuality (Rushdie’s *Midnight’s Children*, Winterson’s *Sexing the Cherry*, DeLillo’s *Libra*, Barnes’ *Flaubert’s Parrot*). In the last third of the course, we will focus on the increasing interdependency of literary, film, and television cultures through the analysis of specific narratives (Ondaatje’s *The English Patient*, Cunningham’s *The Hours*) and specific phenomena (superstore bookshops, Miramax adaptations, and television book clubs) in order to gain a better understanding of what constitutes “literary culture” at the turn of the twenty-first century. In addition to these titles there will be a substantial course packet that will include relevant theoretical material. Course requires permission of professor.

FTT 40431. Sex and Gender in Cinema

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101*Corequisite:* FTT 41431

This course analyzes representations of and theories about sex and gender in cinema. Students will read major texts in feminist theory, queer theory, and masculinity studies, in order to become familiar with important concepts and debates within the field. Topics covered will include “the male gaze,” spectatorship, performance and stardom, camp, “reading against the grain,” consumption, gender and genre, race and gender, masquerade, authorship, and masculinity in crisis. Class requirements include a weekly screening, online journals, and essays.

FTT 40433. Cinema Ideologies

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101*Corequisite:* FTT 41433

Cinema, both in fiction and nonfiction forms, is one of the major contributing forces to the construction of ourselves and our perception of “others” in terms of class, gender, and race and sexual preference. This course will dissect these constructions in films like *Hoop Dreams*, *Schindler’s List*, *Philadelphia*, *The Killing Fields*, and *Dancing With Wolves* through a close-reading practice.

FTT 40436. The Post-Realist Cinema

(1-0-1) Godmilow

It is extremely useful to study the post-realist documentary films which are built out of what’s understood as non-fiction materials but which refuse the pedigree of “the real”—which don’t take the stance of truth-telling in the traditional documentary ways—in fact, which contradict the construct of “the real” to speak about the medium itself—all in different ways. Many of them straddle the line between the avant garde cinema and the non-fiction film. We’ll screen, for instance Bunuel’s *Blood of the Beasts*; Bruce Connor’s *A Movie & Crossroads*; Harun Farocki’s *Inextinguishable Fire: Su Friedrich’s First Comes Love*; Kyle Kibbee’s *100 NY NY 1989* and Guy Maddin’s *My Winnipeg*.

FTT 40437. Media Culture

(3-0-3)

Prerequisite: FTT 30101 or FTT 30461*Corequisite:* FTT 41437

An advanced investigation of selected topics concerning media or cultural studies.

FTT 40442. The Horror Film: Theories and Histories

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101*Corequisite:* FTT 41442

This seminar examines one of the most enduring and popular movie genres: the horror film. We will consider the genre from a historical perspective, tracking how it has evolved over time and across movements (examples: silent-era German Expressionism, Hollywood’s classic monster movies of the 1930s, the nuclear anxiety pictures of the ’50s, the slasher films of the ’80s, contemporary Japanese horror cinema). In addition to the social, political and industrial factors that have influenced horror’s development, we will also examine several influential (and competing) theories that attempt to explain horror’s seemingly paradoxical appeal.

FTT 40443. Walt Disney in Film and Culture

(3-0-3)

Prerequisite: (FTT 10101 or FTT 20101) and (FTT 30101 or FTT 30102 or FTT 30461)*Corequisite:* FTT 41443

The name “Disney” has achieved nearly mythic status in U.S. and international film and culture. For many, the name evokes treasured childhood memories of watching *The Lion King* or *The Little Mermaid* or of discovering Mickey Mouse and Donald Duck for the first time. Among film scholars, Disney cartoons stand as some of the finest examples of carefully crafted, naturalistic, character-centered animation. For business majors and professionals, The Walt Disney Company has come to symbolize a modern, competitive corporation that seeks to leverage its stories and characters across a variety of media platforms in a global marketplace. While many love Disney films, and see Walt Disney as an American icon, his popularity and “American-ness” have sparked controversy in other countries and in various historical periods. This class examines Walt Disney, Disney films, and the Disney Company from a variety of perspectives that will help us understand both Disney’s enduring popularity and the kinds of suspicions its worked has raised. Our readings will draw from biographies of Walt Disney; histories of the Disney studio and of the animation industry in general; critical analyses of the films; and cultural studies of Disney merchandising, theme parks and theatrical productions. Screenings will include the classic films of the studio era, such as *Snow White and the Seven Dwarfs*, *Pinocchio*, *Dumbo*, *Cinderella*, and *Peter Pan*, as well as more recent works such as *Mary Poppins*, *Aladdin*, and *Beauty and the Beast*. Requirements include weekly reading responses, exams, and an extended research paper.

FTT 40444. Sinatra

(3-0-3)

Corequisite: FTT 41444

This course examines the career and image of Frank Sinatra. As an entertainer who worked in numerous media—radio, the music industry, television, cinema, and live performance—Sinatra provides a lens through which to examine American

20th-century media. Moreover, as an iconic figure, Sinatra enables an explanation of masculinity, American identity, ethnic identity, race, liberalism, and more. Sinatra will be paired with various other performers, especially Bing Crosby, Dean Martin, and Gene Kelly, to consider his star image comparatively. Sinatra will be situated within discourses on Italian immigration, urbanism, the Depression, prohibition and war. Students will listen to Sinatra music and radio programs, watch Sinatra films and TV shows, and read a wide range of materials—including contemporary accounts of Sinatra performances, analyses of his career and meaning, essays and articles about the star system, recording technology, film genre, acting styles, the mob, and more. Throughout, we will consider what model of American masculinity Sinatra embodies—ranging from early concerns that his female fans and lack of military service rendered him effeminate, to his image as family man, and later incarnation as playboy. We will consider what Sinatra means today through an analyses of his entertainment heirs, like George Clooney; parodies, like Joe Piscopo's; the use of his music in film soundtracks and advertising; and in performances like the Twyla Thorpe "Come Fly With Me."

FTT 40492. Media Stardom and Celebrity Culture

(3-0-3)

Corequisite: FTT 41492

Much of America's contemporary popular culture, movies, TV, music, even sports revolves around stars, and yet few of us understand the implications of, or even the reasons for, our society's fascination with fame and celebrity. This course interrogates the cultural phenomenon of stardom from a variety of historical and theoretical perspectives. Across the semester, we will explore how stardom developed as a concept across the twentieth century, learn how to "read" star images, look at the development of the Hollywood star system, consider what the popularity of certain film stars might tell us about the issues of social identity, examine stardom as a global phenomenon, and question why celebrity is such an obsession today. Overall, our goal will be to develop tools for investigating the cultural significance of stardom and to use those tools to uncover what stardom and celebrity reveal about both our society and ourselves.

FTT 40493. Media Industries: History, Structure, Current Issues

(3-0-3)

Prerequisite: (FTT 10101 or FTT 20101) and (FTT 30102 or FTT 30461)

Corequisite: FTT 41493

This class is designed for students planning to seek jobs in film and television companies and for those wanting a better understanding of how the media industry has taken the shape it has today. We will explore the histories of particular companies and broader changes in the structure of the media industry as a whole in the last century. Some of the topics to be considered include: the impact on projects and performers of multimedia conglomerates such as GE/NBC/Universal and Disney/ABC/ESPN; the effects of recent mergers between Disney and Pixar and the WB and UPN; the increasing globalization of media companies, such as News Corp/Fox; and the trend towards media convergence, as evidenced by AOL Time Warner and Sony. Readings and discussions will familiarize students with concepts from historiography and political economy.

FTT 40494. Gender and Space

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101

Corequisite: FTT 41494

This course will investigate the many intersections and problematics of gender, place, and space. Space, place and gender have been key topics in areas such as architecture, law, history, sociology, urban studies, area studies, literary criticism, cultural studies, film studies, and gender; and the class will draw from those various disciplines. Students will address the issue of gender, place and space through a variety of disciplinary approaches, investigating a wide range of real and imagined places and spaces, including masculine spaces, feminine spaces, queer spaces, or virtual spaces; spaces such as the home, the office, the railroad, the apartment, the skyscraper, the museum, the store, the church; the urban, the rural, the suburban; spaces as represented in various texts and discourses; uses of space; theories of space, and more. The course will pay particular attention to how space and place

are produced and negotiated as spaces of fantasy in mid-20th century American films and popular literature, including the films *Baby Face*, *How to Succeed in Business*, *The Boys in the Band*, *The Killing of Sister George*, *All That Heaven Allows*, *That Funny Feeling*, *The Lady Vanishes*, and *Rear Window*; and the novels, *The Girls in 3B*, *The Women's Room*, *Fear of Flying*, *The Fountainhead*, *The Best of Everything*.

FTT 40495. Television as a Storytelling Medium

(3-0-3) Becker

Prerequisite: FTT 10101 or FTT 20101

Corequisite: FTT 41495

In a communications world dominated by visual culture, television has become society's primary storyteller. Stories are packaged and presented for our consumption in scripted dramas and sitcoms, unscripted reality shows and docudramas, news broadcasts and sporting events, and even commercials and promos. Through exploring the structures, methods, meanings, and impacts of television's various narrative forms, this course will consider how the medium of television enables creators and viewers to tap into the fundamental cultural practice of storytelling. Across the semester, students will read theories of narratology and assessments of television's narrative techniques, screen a variety of narrative examples (chiefly from American television, though some non-American television might be screened), and write their own critical analyses of television's storytelling practices. The class meetings will be primarily driven by discussions, supplemented by lectures, and the assignments will include periodic writing assignments, a final exam, and a term paper on a topic of the student's choosing.

FTT 40496. Contemporary Television Genres

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101

Corequisite: FTT 41496

The concept of genre has been fundamentally important to television throughout the medium's history, but it has grown into an even more complex object of study today. Genres allow producers and networks to more efficiently produce, schedule, and market television shows, while viewers often define their viewing by genre, seeking out shows within specific genres. Given the vast growth in programming and channel options today, genre has become ever more central and expansive, while individual genres themselves have grown increasingly heterogeneous. This course will examine the industrial, aesthetic, and cultural functions and effects of genre classification in contemporary television, covering a range of contemporary genres and theoretical approaches to understanding the role of genre on television today.

FTT 40497. Religion and Television

(3-0-3)

Corequisite: FTT 41497

According to polls, some 95% of Americans believe in God, and over 75% of them identify themselves as Christians. With such large proportions of the population claiming some kind of religious belief, it is impossible to ignore their presence in media and popular culture. This course will explore representations of religious faith onscreen, behind the camera, and in the audience. We'll focus on television, but also investigate how different forms of media including film, novels, and the Internet create or challenge the ideas we hold about different faiths as well as the role they play in public life.

FTT 40498. Advanced Newsgathering and Visual Storytelling

(3-0-3)

Prerequisite: FTT 30462 AND FTT 31410

This hands-on course requires students to research, shoot, write, and edit *packaged* stories for television and other visual media, building on skills taught in Broadcast Journalism (FTT 30462) which serves as a prerequisite. Class time is used for instruction and critique. The bulk of the student's time commitment for this course is in the field, producing well-written, accurate, balanced and visually compelling stories with feedback from the instructor. Each student will complete a minimum of six fully-edited stories for selective use on NDTV News.

FTT 40499. Quality Television

(3-0-3)

Prerequisite: FTT 30461*Corequisite:* FTT 41499

In this course we'll trace the evolution of television programming that has been acclaimed as something more than "just TV." We'll set up shop with the anthology dramas of the fifties, and then focus on the emergence of what was called "quality television" in the seventies and eighties, concentrating on series such as *Hill Street Blues*, *St. Elsewhere*, and *Twin Peaks*. We'll also investigate the roles PBS played during this same period, focusing specifically on Julia Child and *Masterpiece Theater* (and how they established audiences for quality lifestyle programming and literary adaptations). Once we've constructed a template for understanding quality television as the interplay between industry, programming, popular taste, and audience demographics, we'll move on to the advent of HBO and the cable network series which came to define quality television within the past decade. We'll look closely at *Sex and the City* and *The Sopranos*, and then do extended close analysis of *The Wire* and *Mad Men*.

FTT 40501. Media and the Presidency

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101*Corequisite:* FTT 41501

As the brouhaha over Howard Dean's "yell" illustrates, media have come to play a key role in the coverage of presidential elections. This course examines how print and broadcast media have functioned in U.S. elections since the way we choose a president was first established. After a brief overview of changing relationships between journalists and presidential candidates in the 19th century, we will focus on elections since the 1920s, when radio first broadcast election updates. We will analyze how candidates have used radio, television, and the Internet to construct images of themselves and their platforms, and how journalists have become an active force in representing the political process. Rather than see electronic media as neutral or "objective," we will assess the narrative strategies and visual and verbal codes by which media present politics to us, the voters.

FTT 40510. Shakespeare: Text and Performance

(3-0-3) Holland

Corequisite: FTT 41510

What are King Lear's last words? In performances at the Globe, what did Hamlet do when he argued with Laertes? What were the costumes worn by the ghost of Hamlet's father and why? If Viola in *Twelfth Night* was played by a boy-actor, what changes? What happens in recent Japanese productions of *Hamlet*? What is Shakespeare like on YouTube? This course will explore productions of Shakespeare plays from Shakespeare's own theatre to 2011. We will see live productions as well as web-streamed versions in many languages and from all over the world. We will see what can be recovered of early modern production methods and of 18th century adaptations. We will, occasionally, use our lab time to watch films and TV versions but the lab will not be required every week. The aim throughout will be to investigate the history of the text of Shakespeare plays and some of the myriad ways in which the plays have been translated into performance across time and space.

FTT 40600. Shakespeare and Film

(3-0-3) Holland

Corequisite: FTT 41600

This course explores the phenomenon of Shakespeare and film, concentrating on the meanings provoked by the "and" in the course-title. We shall be looking at examples of films of Shakespeare plays both early and recent, both in English and in other languages, and both ones that stick close to conventional concepts of how to film Shakespeare and adaptations at varying degrees of distance from his language, time, plot, reaching a limit in versions that erase Shakespeare from the film. The transposition of different forms of Shakespearean texts (printed, theatrical, filmic) and the confrontation with the specificities of film production

have produced and continue to produce a cultural phenomenon whose cultural meanings will be the subject of our investigations. There will be screenings of the films to be studied in the lab.

FTT 40701. Screen Culture: Vampiric Convergence

(3-0-3)

Prerequisite: FTT 10101 or FTT 20101*Corequisite:* FTT 41701

This course will focus on the current mania for vampire narratives in order to develop a more sophisticated understanding of how genre works in convergence cultures. We'll set up shop by looking closely at the origins of the genre through a close reading of Stoker's *Dracula*. Once we establish our operating definition of genre, we'll explore the ways in which vampire texts since the eighties have become increasingly self-conscious about their own history (most spectacularly in the form of Rice's *The Vampire Lestat*). We'll then turn to the *Twilight*, *True Blood*, and *Vampire Diaries* phenomena and investigate the elaborate interplay between the publishing, film, television, music, and new media industries. Central questions: How do cross-media franchises work at the beginning of the twenty-first century? How has quality television become franchise television? How has the entire category of genre been changed profoundly by new delivery systems and ever more active fan communities? What does the increasing diversification of audiences for vampire narrative tell us about how gender and generation factor into both "genericity" and convergence?

FTT 40702. Audition Seminar

(3-0-3)

Corequisite: FTT 41702

This course is a preparation for acting professionally and/or the advanced study of acting, directing and performance. A course of study is developed between the student and the faculty advisor(s) at the beginning of the semester. Students who are interested in taking this course but are not FTT majors should consult the instructor. Senior acting majors only. Offered fall only.

FTT 40800. Advanced Scenic Painting

(3-0-3)

This course is an in-depth look and discussion of problem solving techniques of the scenic artist. The class will examine master work of both fine and scenic artists, through small group discussion and project critique. We will also discuss modern three-dimensional construction materials of today's scenic artist and the profession itself.

FTT 40803. Advanced Costume Design

(3-0-3) Donnelly

This advanced course teaches the principles of costume design for the stage. The course will explore the use of costumes to express character traits by analyzing play scripts. Students will design costumes, and explore the process of organizing the script from the costume designer's viewpoint. The course will include projects, discussions, and lectures. The course will end with a portfolio presentation of the work completed throughout the semester. Students will be expected to provide their own materials and supplies.

FTT 40900. Contemporary Media Practices: Industry Alliance Master Class

(1-0-1) Mandell

A unique insiders' view of the entertainment industry, this course features seven guest lecturers/industry professionals who will share the inner workings of the many aspects of the film and television world. Members of Notre Dame's iNdustry Alliance alumni group will speak on aspects of development, marketing, production, distribution, new media and other areas. A one-of-a-kind chance for students to meet and learn from working professionals in a classroom environment. Meets every other Friday.

FTT 40906. Contemporary Irish Drama

(3-0-3)

A close analysis of the dramatic literature produced by Irish playwrights during the later half of the 20th century.

FTT 41000. French Theatre Production

(1-0-1)

Students transform into actors of the Illustre Theatre de l'Universite de Notre Dame du Lac in a creative collaboration that has come to be known as the French play. We rehearse during the fall semester, and perform the play in late January. Students from all levels are encouraged to audition; theatrical experience is not expected.

FTT 41001. Advanced Scene Study

(3-0-3)

Prerequisite: FTT 21001

This course will be an in-depth look at the acting process through a workshop study of monologues and scenes from the masters of modern theatre. The course begins with the plays of Chekhov and works through the 20th century to contemporary times.

FTT 41004. Advanced Theatre Production Workshop

(3-0-3)

A workshop course in the process of theatre production, in which students learn to do a dramaturgical analysis of a play for production as well as assume a major production responsibility including, but not limited to, that of performer, stage manager, assistant stage manager, prop master, costumer, technical director, and assistant director.

FTT 41005. Acting Shakespeare

(3-0-3)

Prerequisite: FTT 21001 and (FTT 31001 or FTT 31002)

This course is an active and participatory exploration of the works of the world's greatest playwright from the perspective of the actor. You will be acquainted with basic analytical, physical and vocal techniques for unlocking the meaning and emotional content of Shakespeare's texts. The structure of this course allows you the opportunity to create and present multiple roles through performance of both scenes and monologues.

FTT 43101. Telling About Society: Media, Representation, and the Sociology of Knowledge

(3-0-3) McDonnell

How do we see the world? How do these modes of representation determine our social reality? How can we use media to create social change? This rigorous seminar interrogates the lenses through which we see, and more importantly make, our world. We open with an interrogation of theories of media, representation, and the sociology of knowledge so as to develop a critical eye towards how these lenses shape our everyday reality. From there we discuss particular modes of representation: photography, ethnography, statistics, journalism, maps, and more. We consider the inherent biases within these ways of seeing, and debate the appropriate uses of these technologies. From this starting point, the course turns its eye to particular historical periods and phenomena: the Great Depression, Vietnam War, the era of HIV/AIDS, and the growing surveillance society. We compare across different media representations of each event to evaluate how different media tell very different kinds of stories about that moment. Ultimately, this class presses students to consider the capacities of these media for encouraging mobilization and change—to redesign the world. To work through these issues, students will engage in fieldwork on a local topic of their choosing. Their final project will consider how different media have shaped our knowledge of a local issue, and in response students will create a final multimedia campaign designed to alter people's "ways of seeing" that topic. In this project, students will persuade their audience using a variety of lenses to make their case: from ethnography to documentary film to radio journalism to new media and more.

FTT 43601. Issues in Film and Media

(3-0-3)

Prerequisite: FTT 30101 or FTT 30102

Corequisite: FTT 41601

The purpose of this capstone course is to provide students concentrating in film and media with a senior seminar in which they may participate in some of the current critical debates in advanced film, television, and new media studies, through class discussion and in individual projects. The topics vary each semester, but might include the role of government control of and social influence on the media, the effects of new global markets, concerns about representing race and gender, and new critical and aesthetic approaches. The course will be formatted as the kind of seminar that one might encounter in a graduate program, with students sitting around a table giving oral presentations based on readings and screenings. The class will meet in one 150-minute session, with a short mid-session break. There will be guest faculty visiting the class. Each student will write a 15- to 20-page term paper that will be developed over the semester in close consultation with the instructor. Lab attendance at screenings is required.

FTT 43602. Honors Seminar: Hitchcock

(3-0-3)

Corequisite: FTT 41602

This course aims to teach honors students research methods, project development and advanced writing techniques through an examination of the films of Alfred Hitchcock. Students will see numerous Hitchcock films and TV shows, and read and research extensively in the literature on Hitchcock. Students will consider different approaches to Hitchcock, including auteurism, genre studies, feminist and psychoanalytic theories, reception studies and industrial histories. Films we will screen include *Rear Window*, *Psycho*, *North by Northwest*, *Blackmail*, *The 39 Steps*, *Rope*, and *Rebecca*.

FTT 43603. Honors Seminar: Shakespeare

(3-0-3)

Corequisite: FTT 41603

This course aims to teach honors students research methods, project development and advanced writing techniques through an examination of Shakespeare, primarily—though not necessarily exclusively—in relation to performance. Students will research performances past, visit theatre productions/see films present, imagine performances future. They will read and research extensively in the materials of Shakespeare performance and its critical literature. Students will consider different approaches to Shakespeare performance, including bibliographical, historical, nationalist, generic, feminist, and queer methodologies. Students will also consider the forms of representation of performance in Shakespeare editing and the work of selected actors, directors and designers. The lab will not be used every week but will be available for screenings of Shakespeare films.

FTT 43604. Honors Seminar: English Drama Before Shakespeare

(3-0-3)

This course focuses on research methods, project development, and advanced writing techniques through an examination of early English theatre and drama, primarily in relation to performance. Students will research English theatre and drama from the beginnings to Marlowe in the 1590s, with special attention to the English cyclic drama and such plays as *The Castle of Perseverence*. Students will consider different historiographical approaches and the value of primary records research. They will take advantage of the unique opportunities afforded them by the "Faust at Notre Dame" project that includes the department's production of *Doctor Faustus*. Screenings of relevant films will be available at the library.

FTT 43606. Honors Seminar: Disney and Performance

(3-0-3)

Prerequisite: (FTT 10101 and FTT 20101) or FTT 30101 or FTT 30461

Corequisite: FTT 41606

This honors seminar is intended for majors from all areas within FTT: film, theatre and television. As a multimedia company, the Walt Disney Studio forms an intriguing site for examining performance across a range of cultural spaces: in

films, television programs, theme parks, and theatrical productions. Performance itself is both a construction—of character, of space, of a period in time, of narratives—and can itself be seen as a construction that embodies culturally specific ideas about humanity, realism, and the artistic process. We will analyze the multiple performances of “Disney” through a range of topics. Disney films from the 1930s and 1940s, as well as the more recent *Enchanted*, encourage us to think about how the studio has performed animation. In *Snow White*, *Dumbo*, and *High School Musical*, we consider how contemporary performance styles influenced Disney. Films such as *Pinocchio*, *The Three Caballeros*, and *Mary Poppins* offer an opportunity to interrogate the performance and meaning of “liveness” in Disney. Looking at television, we will examine such programs as *The Mousketeers* and *Walt Disney’s Wonderful World of Color* for their performances of teen culture, leisure, and of Disney himself. Films such as *The Jungle Book*, *The Lion King*, and *The True-Life Adventures* enable us to consider how Disney has performed animal life, while *The Little Mermaid* and *Beauty and the Beast* spur us to analyze the performance of humanity. Throughout the course we will juxtapose Disney’s naturalistic style with the contrasting performance styles of other animation studios such as Warner Bros. and Pixar and will highlight works that the studio has adapted for both film and theatre. Readings will draw from film and theater history and theory and you will be asked to write weekly reading responses. There will be two exams and a final research paper of 15–20 pages.

FTT 43607. Honors Seminar: Film, Television, and Theatre Now (3-0-3)

This course’s primary aim is to teach honors students research methods, project development, presentation skills, and advanced writing techniques. However, the broad topic through which we will steer those efforts is “film, television, and theatre now,” meaning we will analyze what is currently happening in these three areas of art and entertainment. Each week will have a pre-set general topic (such as economics, aesthetics, marketing, ideology, authorship, etc.), but the case study focus for the week will be chosen based on current events in film, TV, and theatre at the given moment. As a result, you should be aware that this class requires great flexibility on the students’ part, as some readings will be assigned on short notice, certain class session topics will be chosen and directed by students, and there will be required outside-class attendance at occasional screenings, plays, and talks. The assignments for the course will include short essays, a presentation, a research paper, and assorted in-class writing and discussion exercises.

FTT 46000. Acting Pedagogy and Practice (V-V-V)

This course introduces the advanced acting student to various methods of acting training. In addition to directed readings, the student serves as the teaching assistant for Acting: Process or Acting: Character under the supervision of the instructor. The student is expected to attend all class meetings and supervise weekly rehearsals outside of class.

FTT 46600. Thesis/Undergraduate Research (V-0-V)

Research for the advanced student. Taken S/U only.

FTT 47001. Practicum (V-0-V)

Individual practical projects for the advanced student. May be repeated up to six hours of credit. Taken S/U only.

FTT 47600. Notre Dame Film Society (V-0-V)

The Film Society is a film screening-and-discussion group that meets once a week in the Browning Cinema to watch an independent, foreign or classic film. Students can take the course for either zero credit or one credit. Those taking it for one credit will have a minimum attendance and writing requirement. The meeting times and requirements may vary from semester to semester. Contact the sponsoring professor for more information. NOTE: This course does not count as an upper level course toward the FTT major.

FTT 47601. Special Studies (V-0-V)

This course gives students an opportunity to conduct research and is intended for advanced students. Application and permission of the individual instructor is required. Application may be obtained from the departmental website at <http://ftt.nd.edu/> or by visiting the FTT departmental office.

FTT 47700. Honors Special Studies (V-V-V)

For FTT honors students thesis research. By permission and application only.

FTT 50000. How to Teach Film Across the Humanities (V-V-V) Collins

This summer course is intended for Notre Dame faculty and graduate students who would like to incorporate films into their courses but have hesitated to do so because they have had little or no formal training in film studies. I have designed a week-long intensive course that will solve that problem by exposing seminar participants to the different pedagogical strategies they might use to incorporate films in their courses. We will begin with a crash-course in close visual analysis because I think that’s the chief source of anxiety. So I’ve got this image up on the wall, what do I do with it? How do I get my students to be analytical about those images? Then we’ll explore the various ways that really productive interdisciplinary study can be achieved through film analysis. How can we use films effectively to pursue aesthetic, political, philosophical, or theological issues? Most importantly, how can we talk about film as a “way of knowing” in what are increasingly visual cultures? During each morning session, I’ll introduce a variety of approaches through lecture, scene analysis, and short selected readings. We’ll have a screening each day, right after lunch, and then we’ll discuss pragmatic utilization of those methods in our afternoon discussions of the film, focusing on specific applications in courses now being taught or in the process of being developed. Screenings and discussions in the Browning Cinema in the Performing Arts Center.

FTT 50300. DR: Postmodern Narrative/Film (3-0-3)

In this course we will begin by focusing on the emergence of post-modernism in the sixties and then trace its evolution through the nineties. Initially, our primary concern will be the conflicted conceptualization of the term, i.e. just what did postmodern mean in terms of a narrative practice and in terms of a “cultural condition”. Once we have established some operating definitions, and become familiar with some of the narratives that were first called postmodern (Pynchon’s *Crying of Lot 49*, Scott’s *Blade Runner*, etc.) we will begin to discuss the novels and films which became synonymous with postmodern textuality in the eighties (Rushdie’s *Midnight’s Children*, Barnes’ *A History of the World in 101/2 Chapters*, Winterson’s *Sexing the Cherry*, Auster’s *Moon Palace*, etc.) In the last third of the course we will turn to more recent narratives which expand our understanding of the term, particularly in regard to the increasingly complicated relationships between literary, film and television cultures (Ondaatje’s *The English Patient*, Tarantino’s *Pulp Fiction*, Wallace’s *The Girl With Curious Hair*, Amis’ *The Information*). In addition to these titles there will be a substantial course packet that will include relevant theoretical material. Permission by professor only.

FTT 50505. Introduction to Film and Television Production (3-0-3) Mandell

This is an introductory course in the fundamentals of writing, shooting, editing, and lighting for narrative film and video productions. It is a summer hands-on course emphasizing creativity, aesthetic, and technical expertise. Students learn the many aspects of filmmaking while making short films of their own using the new facilities in the Marie P. DeBartolo Performing Arts Center. Requirements: three short digital video assignments, selected readings, and a final exam.

FTT 50530. Contemporary Hollywood (3-0-3)

This course concentrates on the most important developments in American cinema and culture since the 1960s. Beginning with the collapse of the classic studio system at the end of the 1950s, this course explores the profound changes that the

film industry has undergone over the decades, and investigates the major aesthetic developments that occurred in film and other media during the same period—pop art, metafiction, and postmodernism.

FTT 50591. Entertainment and Arts Law

(3-0-3)

One of the largest industries in the United States, the entertainment business is heavily intertwined with the law. From contracts to First Amendment issues, from rights of publicity to copyright and trademark issues, both talent and management need to have a working awareness of the legal issues that affect the industry. In this course we will examine these problems in depth using real cases involving well-known (and, in some instances, some not-so-well-known) people, including Aerosmith, Woody Allen, Shirley MacLaine, and Jim Croce, just to name a few. No prior study of the law is required.

FTT 53601. Methods and Issues in Screen Cultures

(3-0-3)

This course is a rigorous overview of key texts and methods in film and media theory, history and historiography. It includes an introduction to archival research in media. Students should plan to visit the Chicago Film Seminar at least once during the semester.

FTT 56602. Thesis Direction

(V-0-V)

Permission required

FTT 57601. Special Studies

(V-0-V)

Permission required. This course gives a student the opportunity to work with a faculty member.

Gender Studies

GSC 10001. Introduction to Gender Studies

(3-0-3)

This course provides students with an introduction to the field of gender studies as practiced across a range of disciplines and in relation to various kinds of texts, issues, and contexts. Students will explore issues in gender studies related to concepts of femininity, masculinity, heterosexuality, homosexuality, sexuality, identity, and more. Students will consider the ways in which gender identities and roles are produced and performed, and the ways that ideology and representation shape our understanding of gender. The course will take up debates and discourses around gender from anthropology, film and visual culture, history, sociology, literature, political science, philosophy, theology, and other areas of study, thus providing students with an introduction to those fields as well as gender studies. Theories, criticism, films, literature, art, and everyday life will be analyzed through a perspective informed by gender. Gender will be analyzed in contexts that bring out debates and differences related to race, national identity, globalization, and historical and ideological shifts. Thus, rather than assume that masculinity or femininity or queer or straight or transgender are stable or static concepts, we will attempt to unpack and explore their changing meanings.

GSC 20001. Introduction to Gender Studies

(3-0-3)

This course provides students with an introduction to the field of gender studies as practiced across a range of disciplines and in relation to various kinds of texts, issues, and contexts. Students will explore issues in gender studies related to concepts of femininity, masculinity, heterosexuality, homosexuality, sexuality, identity, and more. Students will consider the ways in which gender identities and roles are produced and performed, and the ways that ideology and representation shape our understanding of gender. The course will take up debates and discourses around gender from anthropology, film and visual culture, history, sociology, literature, political science, philosophy, theology, and other areas of study, thus providing students with an introduction to those fields as well as gender studies. Theories, criticism, films, literature, art, and everyday life will be analyzed through a perspective informed by gender. Gender will be analyzed in contexts that bring out debates and differences related to race, national identity, globalization, and historical and ideological shifts. Thus, rather than assume that masculinity or femininity or queer or straight or transgender are stable or static concepts, we will attempt to unpack and explore their changing meanings.

GSC 20221. Gender Roles and Violence in Society

(3-0-3)

Much of the violence in contemporary society—whether it is domestic abuse, school shootings, gang warfare, video games, or inter-ethnic conflict—has something to do with gender. This course explores the connection between gender role socialization and the expression of conflict or aggression. Through readings, discussions, films, and projects, students will be encouraged to examine sex differences in violent behavior as the outcome of complex processes. We will try to understand those processes better and develop the ability to describe the causes and their effects.

GSC 20466. Marriage and the Family

(3-0-3)

The family is the most fundamental institution of all known societies, and the study of families is a core area of sociological inquiry. The word “family” is one that is pervasive in society, but it can have multiple meanings in various contexts, and it is a more difficult concept to define than we may initially think. What family means changes over time and varies across cultures, and there is much continual debate about what a family should be. By the end of this course, you should have a much broader understanding of what a family is and the significance of families for our society. It is within the family that socialization occurs and the family is the site where we derive many of our personal experiences, which may give the impression that family is very personal. Yet, the institution of the family is fundamentally intertwined with larger institutions such as the economy, the workplace, and the

state. Additionally, families can both reflect and reinforce societal inequities, such as those based on class, race, and gender. We therefore assess these linkages by taking a sociological approach to studying the family.

GSC 20503. Autobiography and Subjectivity

(3-0-3)

Life-writing is a capacious term that can be used to describe a variety of private and public statements about the self. Some of these are easily recognizable as artistic representations of subjectivity (for example, memoirs, diaries, letters, self-portraits) and some less so (for example, legal testimony, graphic novels, blogs, even medical forms have been read as part of the complex project of articulating subjectivity). This course will attend to a wide variety of forms of life-writing in order to trace shifting notions of what counts as a self and track the complex project of defining and representing subjectivity. A broad range of critical approaches to subjectivity and definitions of the autobiographical project will assist us as we attempt to map changing notions of the self. Many, but not all, of our primary materials will be drawn from the twentieth century, some from the current decade: texts may include selections of writings by Wordsworth and Rousseau, Art Spiegelman's graphic novel *Maus*, Harriet Jacobs' *Incidents in the Life of a Slave Girl*, Virginia Woolf's *Sketch of the Past*, Maxine Hong Kingston's *The Woman Warrior*, selections from Samuel Delany's *The Motion of Light in Water*, Alison Bechdel's *Fun Home*, photography by Cindy Sherman, Jo Spence and others, self-portraits by Frieda Kahlo, considerations of Web projects, My Space sites, political and legal testimony or "witnessing," and other examples of autobiography "at work" will also be considered. Requirements: participation, short commentaries, and three essays: two around 5 pages, and one of eight to ten pages.

GSC 20505. Seduction and the 1790s Novel

(3-0-3)

Attacked by Christian moralists and radical feminists alike, the re-emergence of the coquette and the aristocratic libertine rapist in the radical novel of the 1790s exposes a number of important gender and political preoccupations of the late eighteenth century. We will look at the role seduction plays in what has been called the "sex panic" of the 1790s, and at what the seduction narrative reveals about gender and agency, in the context of the moral and legal debates on seduction and sexual violence. A key strand focuses on how concepts of male and female gender identity impact on the perception and representation of seduction and rape (explored through the influence of Samuel Richardson's *Clarissa* on the writers of the period). The course places legal cases, conduct manuals, newspapers, and moral and religious tracts alongside fiction of the 1790s, and takes as its focus novels that have only recently been republished, and which push the boundaries of our understanding of gender, class, and sexualities.

GSC 20506. Anthropology of Gender

(3-0-3)

Gender is a fundamental organizing principle in societies through time and across space. Gender is a cultural construction that is grounded in perceived biological differences. Gender shapes what it means to be masculine and feminine; how economic resources and social power are distributed; and how marriage, kinship and reproduction are understood, among many other things. Are there gender universals? What role do politics and economic systems play in the determinations of gender? We will use interdisciplinary examples from economics, political science, anthropology, psychology, art, architecture, and history to explore the various ways in which gender defines differences, organizes societies, and shapes human experiences.

GSC 20507. Social Inequality: Social Construction of Difference and Inequality

(3-0-3)

Many of us are aware of our own experiences of disadvantage (or perhaps privilege), but people are generally not aware of how structural arrangements in society result in systems of difference and inequality. Further, only occasionally do we question whether or not things are really black and white, right and wrong, true or false, and even less often do we contemplate the repercussions of such binary assumptions. This class will challenge these taken-for-granted beliefs about race

and ethnicity, social class, sex and gender, and sexuality by learning more about both structural causes and individual experiences of inequality. This class embraces the idea of social construction—that our subjective reality, which we gain through interaction, is as, if not more, important than objective fact—because situations perceived to be true will be true in their consequences. We will discuss how "constructed" categories of difference (racial and ethnic groups, social classes, women and men, and so forth) are given significant meaning and how this process subsequently results in real differences in experiences, expectations, and achievements between groups and individuals.

GSC 20508. Beauty, Disability and the Novel

(3-0-3)

The archetypal hero is handsome and the archetypal heroine is beautiful. This course examines the ways in which the novel of the eighteenth and nineteenth centuries attempts to challenge to the beauty myth. We will cover topics such as the value of beauty in the bourgeois marriage market, sighted culture, the association of deformity with evil, stigma and punishment, and the feminist social gains associated with female plainness. The course will introduce students to disability studies approaches to reading and will focus on concepts of bodily identity, impairment, stigma, monstrosity, marginalization, beauty, deviance, and difference. The main texts will be: Henry Fielding, *Amelia* (1751), Frances Burney, *Camilla* (1796), Mary Shelley, *Frankenstein* (1818), William Earle, *Obi; or The History of Three-Fingered Jack* (1800), Anne Plumptre, *Something New* (1801), Jane Austen, *Persuasion* (1818), and Charlotte Brontë, *Jane Eyre* (1847).

GSC 27999. Gender Studies Gateway Course

(0-0-0)

This course is used as a co-requisite for administrative purposes so that students in the Gender Studies program will be able to Web register for other GSC courses.

GSC 30178. American Marriage

(3-0-3)

Although we often think of marriage as a "natural" or timeless institution, the social, political, and economic meanings of marriage in the U.S. have actually changed dramatically and often over the last two centuries, and varied across America's diverse social and geographic spaces. This course explores those changes and differences, asking what role marriage has played in the definition and re-definition of formations such as citizenship, capitalism, gender, race, and family in the U.S. As we chart the history of marriage as an American institution, we'll focus in particular on protest movements since the 19th century that have questioned or challenged the politics of marriage, including abolitionist, anarchist, feminist, Marxist, civil rights, and queer political thought and activism. Evaluation will be based on participation, online reading journals, in-class presentations, and a final project.

GSC 30224. Today's Gender Roles

(3-0-3)

Current changes in male and female roles and the reasons for these changes are examined. Existing gender differences, various explanations for them, and proposals for change are discussed and evaluated.

GSC 30255. Men and Women in Modern Japanese Literature

(3-0-3)

In 20th-century Japan, as old roles such as samurai and geisha waned, both men and women had to re-define the characteristics and meaning of masculinity and femininity. This course will look at constructions of gender in modern Japanese literature by both female and male authors. As we discuss both normative and deviant depictions of male and female roles, some topics we will address include: men and women at work and at war, marriage and family life, homosociality and homosexuality. Students will also gain familiarity with some of the major authors, genres, and literary movements of modern Japanese literature. Texts will include *Kokoro* by Natsume Soseki, *Confessions of a Mask* by Mishima Yukio, *Diary of a Vagabond* by Hayashi Fumiko, and short stories by Higuchi Ichiyo, Kono Taeko, and Oe Kenzaburo. This course is taught in English and no knowledge of the Japanese language is required.

GSC 30309. Labor and America since 1945

(3-0-3)

This course explores the relationships among and between workers, unions, employers, and government policymakers since the end of World War II, as well as the ways in which those relationships have shaped and been shaped by American politics and culture more broadly. Fast-forward to today, however, and the labor movement appears marginal to the American political economy, as unions represent only 8% of workers in the private sector. Meanwhile, income inequality and wealth disparities have grown every year over the past three decades. What accounts for the decline of organized labor since 1970, and why have the people of the mythic “land of milk and honey” experienced declining upward mobility and widening gaps between the rich and everyone else? Are these phenomena linked? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, modern conservatism, and the fortunes of individual freedom more broadly? What is globalization, and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and films, this course will try to answer these questions and others. It will also address the prospects for working people and labor unions in the twenty-first century.

GSC 30310. American “Chicks” in a Global World: The Politics of Postfeminist Culture

(3-0-3)

Since the mid 1990s, a new wave of American popular culture has featured (and been marketed toward) the figure of the “chick”: a single woman in her twenties or thirties who finds individual empowerment, sexual agency, and self-esteem as she navigates the muddy waters of careers, relationships, and shopping. Most academic readings of this cultural explosion have understood it as a symptom of “postfeminism”: the myth that the political goals of American feminism have been accomplished, and that women in the U.S. can now seize freedom by making empowered choices at work, at home, and at the mall. Our study of “chick” culture will use this academic literature on postfeminism as a starting place. We will then expand existing critiques of postfeminist culture by putting them in conversation with critical race and transnational feminist scholarship, in order to critically read various examples of postfeminist popular culture. We will assess how these examples—including film (chick flicks), literature (chick lit), video games (action chicks), and music (rock chicks), as well as television, video, and Internet texts—define “Americanness” in relation to social and political formations such as gender, generation, race, sexuality, globalization, and political economy.

GSC 30425. Love, Death, and Exile in Arabic Literature and Cinema

(3-0-3)

This course explores literary and artistic presentation of the themes “love, death, and exile” in Arabic literature and popular culture from pre-Islamic era to the present day. Through close readings of Arabic poetry, essays, short stories, and novels (in English translation), and analyzing a number of Arabic movies (with English subtitles), we discuss the following issues: themes and genres of classical Arabic love poetry; gender, eroticism, and sexuality in Arabic literary discourse; alienation, fatalism, and the motif of *al-hanin ila al-watan* (nostalgia for one’s homeland) in modern Arabic poetry and fiction.

GSC 30516. Gender and Science

(3-0-3)

Thanks to former Harvard University President Lawrence Summers and his suggestion, back in 2005, that women are neither motivated enough nor smart enough to succeed in science (at least not as motivated and smart as men), widespread attention has again been directed to the “gender gap” in science. But the full story has yet to be told. In this course we shall try to uncover at least key elements of that story, especially the key factors, past and present, that have kept the female/male success gap in science in place. We shall concentrate, however, on the importance of closing that gap: the significant difference it has made to

both scientific knowledge and the society shaped by that knowledge when the gap has been narrowed. In the process we shall find reason to challenge the prevailing house philosophy in both science and philosophy of science, the one that assumes that such differences as gender have no bearing on the production of scientific knowledge.

GSC 30524. Women and Documentary

(3-0-3)

Corequisite: GSC 31524

Women shoot film! Women direct! Women run sound! They ask questions! Hard ones! When only 6% of Hollywood fiction films were directed by women in 2007, how is it that the number of documentaries crafted by women was estimated to be as high as 50% that same year? In this course we will explore some of the most potent, groundbreaking, funny, inspiring and thought-provoking American and international documentaries made by women. We will learn why the form has routinely attracted female filmmakers, what advantages they bring to the genre, and why the documentary film industry has welcomed women in all roles. Social justice, autobiographical, *cinéma-vérité* and traditional forms will be featured, including works by Barbara Kopple, Sadie Benning, Pirjo Honkasalo, Emiko Omori, Agnes Varda and Jill Godmilow. Academy Award winners, to a girl with a toy camera—you’ll find them all in this course.

GSC 30525. Rebel Youth in Latino/a America

(3-0-3)

This course will explore the history of youth and youth movements of Latino descent in the United States during the 20th century with particular emphasis on the historical evolution of two representative communities: Mexican Americans in the South West and Puerto Ricans in New York. How was youth discovered and defined as an age group in these two communities? More specifically, what did it mean to be a “pelona” or a “flapper” of Mexican descent during the roaring 1920s, a “pachuco” in East Los Angeles during WWII, a “rebel without a cause” of Puerto Rican descent in postwar New York, a young Chicano/a or a young Mexican American during the 1960s and 1970s, a young Nuyorican or a member of the Young Lords Movement in Spanish Harlem in the same turbulent period, a so-called “cholo” in the streets of San Antonio and Los Angeles during the 1980s, or a Latino/a hip-hop artist in the Bronx and Miami during the 1990s? Did young people construct these identities and/or labels different in any way or fashion, as the media, the state, the conservative right, the left, or the cultural industry? Moreover, what were some of the social and political consequences that negative as well as positive perceptions of Latino/a youth had on mainstream America? Finally, how did young people of Latin American descent organize politically to challenge labels imposed on them from above, shape their respective identities from below, and improve their local communities? Were they successful in achieving their goals; if so, how?

GSC 30526. Military Regimes and “Dirty Wars” in Latin America

(3-0-3)

Between 1964 and 1990 most South American countries lived under dictatorial military regimes. In this period of extreme political radicalization, these societies were divided alongside contending visions of their national states. Under the premise that they were assuming office in order to save their nations, the South American military established regimes characterized by widespread repression, human rights violations and impunity. Violence, however, was resisted by different sections of society and a particular type of motherhood—embodied by the women who looked for their missing children—acquired subversive connotations in countries like Argentina and Peru. In this course we will seek to understand why military institutions played such a prominent role in the region in the twentieth century, how their doctrines of national security and U.S. assistance enabled them to assume power, and the mechanisms that the military used in order to establish cultures of fear and death in their countries. We will also focus on the responses by individuals and organized civil society to state repression and violence. Although the course keeps a regional approach, it pays particular attention to three countries: Chile, Argentina, and Peru. What were the similarities and differences among the “dirty wars” that occurred in these countries? How did the categories

of class, gender and race interplay in the implementation of military and insurgent violence? What memories about repression were crafted in these countries? How did successor regimes make a break with the past, establish a new set of social norms, and work toward the administration of justice, redress and reconciliation? We will approach to this subject by using a variety of primary and secondary sources, fiction and documentary films, as well as elements of pop culture. We aim to see how these lengthy military and authoritarian interventions have shaped present-day societies in South America, and what mechanisms Chile, Argentina and Peru have established to deal with the legacies from their troubled pasts.

GSC 30527. Feminism and the American Empire

(3-0-3)

Since the earliest movements for women's rights in the U.S., American feminisms have been defined in relation to empire. And since the earliest days of westward expansion, American imperial projects have interacted with multiple feminisms around the world. This course investigates the connections between feminism and U.S. empire, asking 1) how U.S. empire has been central to a wide range of feminist political and intellectual work—both within and outside the U.S.—since the mid-nineteenth century, and 2) how discourses of feminism and female empowerment have been mobilized in the service of American imperialism. Our study will take two overlapping paths. First, students will read primary and secondary materials that document and analyze American feminist movements in the nineteenth, twentieth, and twenty-first centuries that have a) utilized the tools of U.S. empire and/or b) sought to “civilize” or “save” non-white and non-American women, as part of their strategies for claiming political and citizenship rights. Examples will include nineteenth-century suffrage movements and missionary projects; twentieth century struggles over birth control and abortion rights; and contemporary feminist debates about such issues as hijab, genital cutting, reproductive justice, and war. At the same time, students will read a wide variety of feminist work, produced both within and outside the U.S., that critiques or resists both U.S. imperialism and imperial feminisms. This study will include historical and contemporary anti-racist, anti-imperial, and transnational feminisms based in the U.S. (such as black, Chicana, Asian American, and Native American feminist scholarship and activism), as well as feminist work taking place in regions directly impacted by U.S. empire, such as Puerto Rico, the Philippines, and the Middle East. Evaluation will be based on a reading journal, four in-class quizzes, and a final research paper.

GSC 30528. Art, Feminism and Gender since 1960

(3-0-3)

This course considers issues in contemporary art since the feminist movement took hold in the 1960s and 1970s. In looking at artworks and ideas that precipitated the rise and followed in the wake of feminist art, we will consider such questions as whether or not there is such a thing as “women’s art”; what has constituted an art of resistance; and how art has aided in the renegotiation of questions regarding gender and identity. We will examine theoretical issues concerning the roles that media and spaces have played in the constitution and reconstitution of these concepts, as well as the roles of cultural institutions, film, and advertising. Case studies will focus on women artists, including Martha Rosler, Cindy Sherman, Adrian Piper, Mona Hatoum, Rachel Whiteread, Zoe Leonard, and Doris Salcedo.

GSC 30530. Men, Women and Work in America

(3-0-3)

From the current fixation on TV “housewives” to political battles over workers’ rights, ideas about gender and work surround us. This course focuses on work as a framework for understanding American culture. The gender division of labor has never been static, and we will examine the process whereby the same jobs get characterized at different times as masculine or feminine, just as work categories were alternately identified as appropriate to whites versus non-white, free versus enslaved, and paid versus “stay-at-home.” This course has a strong “learning beyond the classroom” component. There will be opportunities throughout the semester for experiential and community-based learning experiences, for example through activities at the Center for the Homeless and interactions with pioneer sportswomen.

GSC 30531. Global Activism

(3-0-3)

Take action now! This course is about transnational networking, organizing, and campaigning for social change, with equal attention for conceptual and substantive issues. Conceptual issues include framing, strategies, tactics, and actors. The issue areas examined are labor, human rights, women’s rights, the environment, peace and disarmament, and anti-globalization. The course zooms in on specific campaigns like global warming, violence against women, and ban-the-bomb. Counter-campaigns are also reviewed and readings on any given issue or campaign always include a critical or dissident voice.

GSC 30532. Working to Eat: A Labor History of American Food

(3-0-3)

This social and cultural history course explores the unpaid and paid work related to the production, processing, distribution, sale, serving, and clean-up of what Americans have eaten, from the colonial era to the present. Sites of investigation will include the farm and the factory, the kitchen table and the drive-through window, and everywhere Americans have worked to feed themselves or others. Close attention will be paid to gender and race as organizing features of the American food economy over the past four centuries.

GSC 30533. Literacies: Education, Schooling and Power

(3-0-3)

Literacy matters for schooling. Actually, literacies matter. The ability to code switch within and to a given literacy that’s been granted “most-favored-nation” status for political reasons is a valuable skill for students today. When it comes to schooling, socioeconomic background, gender, sexuality, racial identity, ethnicity and country of origin (among any number of other social identities given short shrift here as in society at large) all bear significant influence on the literacies a student brings to the classroom. These literacies, in turn, have great influence on student motivation, persistence and achievement. This course will engage students in a conversation about the role that literacies play in (de) limiting possibilities for students in the American educational system. In the process we’ll look at the concept of literacy as a fraught political vehicle used as a tool to communicate myriad—and often troubling—messages.

GSC 30534. Race, Ethnicity and Indigeneity in Latin America

(3-0-3)

This seminar examines the historical production of “race,” ethnicity, and indigeneity in the Latin American context. We will begin with the creation of “Indians” by European colonists, who attempted to erase social differentiation in the peoples they conquered but then had to deal with the consequences of early forms of resistance and solidarity. We will then investigate the degree to which race and ethnicity were important concepts to non-Europeans in the colonial context, and the beginnings of scientific racism in the Americas. Slavery, especially in Brazil and the Caribbean, obviously added another dimension to social differentiation and the development of racial thinking, which we will investigate. The second half of the course will address contemporary issues that stem from these colonial concerns: nationalism, the romantic invocation of the indigenous past, cultural practices, land rights, political representation, and racism.

GSC 30625. U.S. Sex, Sexuality and Gender from 1880

(3-0-3)

Topics may include representations of sexuality in movies and advertising; new courtship practices among unmarried heterosexuals (from courting to dating to hooking up); changing concepts of same-sex love (from inversion to homosexuality to gay liberation to LGBTQ); the demographic shift to smaller families; the twentieth-century movements for and against birth control and legal abortion; and the late-twentieth-century politicization of sexual issues.

GSC 31524. Women and Documentary Lab

(0-2-0)

Corequisite: GSC 30524

Certain films will be viewed for further discussion in class.

GSC 31654. Cruel Stories of Youth: Children and Teens in Japanese Cinema lab

(0-2-0)

Corequisite: GSC 33654

Corequisite discussion lab for 33314 Cruel Stories of Youth.

GSC 33653. Can Latin American Social Inequality Be Tamed?

(3-0-3)

Scholarly interest in Latin American welfare regimes has grown significantly in recent years. By addressing the most unequal region in the planet, experts grapple with the complex and dynamic relationship between social policies and structures as played out through families and labor markets. We will concern ourselves with novel research addressing gender relations as organizational pillars of welfare regimes and engage in South-South comparisons as we look beyond the largest and most studied Latin American countries (e.g., Argentina and Chile). Drawing from the work of leading scholars in the area, we will examine theories, methods, findings and policy implications of contemporary research as we struggle to understand one of the world's most daunting ethical and political questions: Can social inequality be tamed?

GSC 33654. Cruel Stories of Youth: Children and Teens in Japanese Cinema

(3-0-3)

Corequisite: GSC 31654

From the wide-eyed children of anime to the crazy street fashions of Harajuku, images of kids and teens in Japanese popular culture are now distributed and consumed around the world. How then are those young audiences depicted and addressed within Japanese popular culture? What aspects of childhood or teen identity are repeated across generations? In order to answer these questions, we will look at Japanese films, including animation, from across the 20th century, that represent children and teens from a variety of perspectives, from the celebration of innocence to the threat of juvenile delinquency. In addition to analyzing representations of children and teens, students will also gain familiarity with Japanese film history and genres, and develop the critical vocabulary of film analysis. Films will include *I Was Born But*, *Crazed Fruit*, *A Cruel Story of Youth*, *Battle Royale*, *All About Lily Chou Chou*, *Nobody Knows*, *Grave of the Fireflies*, and *Akira*. All films will be subtitled. There will also be secondary readings in cultural studies and film studies, relating to the films we watch in class. Assignments will include an oral presentation, several short writing assignments, a film viewing journal, and a longer paper.

GSC 35000. Internship

(3-0-3)

In collaboration with the Director of Undergraduate Studies in Gender Studies, students choose an organization or business in the South Bend area for which they serve as a non-paid intern, performing 6–8 hours of internship service per week for their chosen internship site. The hours per week may be spread across several days, or completed in one long block. The student will be expected to complete a minimum of 80 total hours. This course serves an elective in either the gender studies supplementary major or the gender studies minor.

GSC 35500. Anthropology of Everyday Life

(3-0-3)

Have you ever pondered how people live(d) in a world without television, YouTube, iPhones, Lady Gaga, and cellphones? Why have bellbottoms come and gone twice in the last 50 years? Will we be forced to relive the fashion mistakes of the 1980s? What new stuff will people invent and sell next? In asking and answering these questions, we must focus on one underlying query: What does our stuff really say about who we are and who we want to be? This course combines lectures, discussions, and interactive small group activities to explore the nature and breadth of peoples' relationships with their things. We will investigate why and how people make and use different types of objects, and how the use of these material goods resonates with peoples' identities in the deep past, recent history, and today. Since everyone in the class will already be an expert user and consumer of things, we will consider how people today use material objects to assert, remake, reclaim, and

create identities, and compare today's practices to those of people who lived long ago. Class members will learn about how anthropologists, including ethnographers (studying people today) and archaeologists (studying past peoples) think about and approach the material nature of our social, economic, and political lives. We will discuss why styles and technologies change through time, and why, in the end, there is very little new under the sun in terms of human behaviors and the way people produce and consume goods. The topical breadth of this workshop encompasses most social science disciplines, including history, economics, psychology, and anthropology, and resonates with classics, art history, and gender studies.

GSC 40001. Perspectives on Gender: Theory and Practice

(3-0-3)

This course encourages you to develop your own perspective on gender and gender issues by reading across a span of thinkers who have engaged issues related to sex and gender including: debates over women's rights, difference, the body, sexuality, gender performance, gender surgery, gay marriage, masculinity, race, transgender politics, and more. Students will read and analyze texts by diverse writers from the 19th century to the present day, speaking from perspectives informed by suffrage and abolition movements, second wave feminism, third wave feminism, black liberation and black pride movements, gay liberation and queer pride movements, and men's movements; and from disciplines such as political science, anthropology, psychology, literary criticism, film theory, history, biology, sociology, cultural studies, and more. Throughout, students will consider how ideas about gender have changed over time and why, how the ideas and debates relate to their lives and everyday practices, and which ideas can or should be put into practice and how.

GSC 40370. Anthropology of War and Peace

(3-0-3)

This class will explore the human capacity for war and for peace. Research suggests that for 90% of human history (which extends back tens of thousands of years) there was no war. Today, war is firmly entrenched in the world. At the same time, peace is critical to human advancement, social stability, and, some would argue, cultural creativity. Anthropology provides a unique perspective on violence and conflict resolution as anthropologists often go to the frontlines to document the experience of war and peacebuilding firsthand. They observe and collect stories of war and peace told by those directly involved; across cultural, ethnic, gender, and age differences—they interview soldiers and civilians, rogues and heroes, adults and children. The course will explore examples of the many forms of war in the world today, from tribal conflicts through guerrilla warfare to conventional and nuclear war. It will also study societies without war and populations with innovative ideas about peace. Questions about war and peace are really questions about the human condition. The class will discuss such issues as what is the place of war and peace in human society; whether violence is inherent in human nature or learned; and what the future of war and peace is likely to be on our planet. We will investigate answers that range from four-star generals to tribal elders; from arms merchants to ND students.

GSC 40502. Women and Magazines

(3-0-3)

This course will explore women's print culture by focusing on women as producers and consumers of periodicals. Some of the key figures in what is sometimes called a "female" modernism made their living by publishing literary pieces and journalism in periodicals or through serving as literary editors: Djuna Barnes, Rebecca West, Virginia Woolf, Jesse Fauset, to name a few, and many of the key texts of literary modernism made their first appearance in periodicals. In addition, the periodical press has been called the medium that best "articulates the unevenness and reciprocities of evolving gender ideologies" and thus is ideal for a study of the role literary culture plays in constructing and diagnosing the contradictions of femininity in modernity. The period between the coincident rise of the New Woman and New Journalism in the 1880s and the dominance of the "woman's magazine" in the interwar years is extraordinarily rich in examples of diverse approaches to understanding femininity presented in the press. As we consider the connections between women and periodical culture from various angles (reception, circulation, representations of women journalists, the centrality

of Little Magazines, “slick” magazines and women’s magazines as key venues for publishing modernist texts, etc.) we will meet the modern woman journalist and her close relations: female editors, “sob sisters,” “stunt girls,” “agony aunts” to name a few. We will take a good look at a variety of publication venues—modernist Little Magazines, feminist periodicals, so-called “women’s magazines” as well as the daily press. We will be working with periodicals in various formats: microfilm, digitalized texts, edited collections, and bound volumes. One brief essay, two mid-length (8- to 10-page) essays and one group presentation.

GSC 40512. Monstrous Mothers of Literature

(3-0-3)

Images of terrible, horrifying mothers have long abounded in literature and have dominated media portrayals of motherhood for decades. Consider the mothers in *Matilda* or *Coroline*, or real-life examples like Nadya Suleman (the infamous Octomom) or Michelle Duggar: not only do a multitude of examples of “bad” mothering exist, but women’s attempts to mother are also scrutinized in excruciating detail. In this course, we will read a selection of texts (novels, plays, poems), ranging from Greek tragedies and *Beowulf* to 20th-century poetry and novels to interrogate the literary use of maternal motifs. What purpose is served by making a fictional mother monstrous? What literary effect is created? We will examine contemporary American culture (magazines, blogs, movies) to theorize possible impacts on the role of the modern mother, as well as the implications for American masculinity. What does it say about society that these images are so popular? And what is the connection between a woman’s reproductive power and the urge to label her “monstrous?”

GSC 40513. Engendering Renaissance: Chicago, Harlem and Modern America(s)

(3-0-3)

In answering the question, “What was American modernism?” most literary critical perspectives might commonly be expected to focus on a modernity represented by the authors of the “lost generation” in the U.S., such as F. Scott Fitzgerald, Gertrude Stein, and Ernest Hemingway. While a conventional understanding of American modernism might serve to underscore the importance of the stylistic, cultural and artistic contributions of these and other canonical moderns, such a view might also give little consideration to the significance of those modern American voices not ordinarily heard in such a context. This course poses the question, “What was American modernism?” to answer it by exploring its roots in two less conspicuous early 20th-century American modernisms: the Chicago Renaissance of 1912–1925, and the Harlem Renaissance of 1920–1929. In engendering renaissance, these two moments suggest a literary birth and rebirth of modern American identity that questions its seemingly stable boundaries and borders, reconfiguring the idea of “American” within and opening the door to the larger and more varied cultural fabric that is modern America(s). By locating the rise of American modernism in the relation between these two literary moments, this course will broaden our understanding of the idea of “American” at this time by considering how it is created within a frame determined by the interplay of race, gender, class and nation. In this way, it seeks to deepen our understanding of U.S. American culture and the idea of “American” in the early 20th century, while suggesting new ways to engage the global social and cultural challenges facing the idea of “American” in the 21st. Course requirements: two 5- to 7-page papers, group presentation, several short in-class writing assignments. Required texts may include Walt Whitman, *Song of Myself*; Jose Martí, *Our America*; Henry Blake Fuller, *The Cliff-Dwellers*; Theodore Dreiser, *Sister Carrie*; Willa Cather, *The Song of the Lark*; Waldo Frank, *Our America*; Sherwood Anderson, *Winesburg, Ohio*; Randolph Bourne, *Trans-National America*; Booker T. Washington, *Up From Slavery*; W.E.B. Du Bois, *The Souls of Black Folk*; Anna Julia Cooper, *A Voice From the South*; Jean Toomer, *Cane*; Jessie Fauset, *Plum Bun*; Nella Larsen, *Quicksand & Passing*.

GSC 40514. Gender and Irish Drama

(3-0-3)

This course will examine constructions of gender in the works of Irish playwrights.

GSC 40516. Decadent Modernity

(3-0-3)

This course acquaints students with two understandings of decadence. We will learn about its most familiar aspect as an 1890s movement in which figures such as Oscar Wilde and Aubrey Beardsley provoked the respectable middle class with racy, sordid, overblown and/or absurdist subject matter and methods. But we will also explore a broader view of decadence stretching back to the 1700s and into the present, as traditional values and social structures come under the pressures of political and scientific revolutions. Our materials—which are not for the prudish or faint-hearted—include fiction, poetry, drama, philosophy, visual arts, cinema and criticism.

GSC 40517. The Matriarchate in Spanish Film and Literature

(3-0-3)

Drawing upon the literature and film of the last one hundred years or so in Spain, we will explore archetypal women in the context of matriarchal and patriarchal value system, with emphasis on the former. Some of the texts to be studied include Galdo’s *Doña Perfecta*, Lorca’s *La casa de Bernarda Alba*, Carlos Saura’s *Cria cuervos*, Almodovar’s *Todo sobre mi madre* and Victor Erice’s *El espíritu de la colmena*. These representations of the matriarchate will be read against a background of contemporary feminist theories on the subject. Taught in Spanish.

GSC 40601. Gender and Health

(3-0-3)

This course looks at the intersection of gender, health policy, and health care organization around the world. Some of the issues to be discussed include: medicalization of the female body; critical medical anthropology; the politics of reproduction; social production of illness and healing; politics, poverty, and health; national and international health and development policies.

GSC 43301. Seminar: Narratives of Modern Art

(3-0-3)

Permission required. Seminar on specific subjects in 19th-century and 20th-century European art.

GSC 43505. American “Chicks” in a Global World: The Politics of Postfeminist Culture

(3-0-3)

Since the mid 1990s, a new wave of American popular culture has featured (and been marketed toward) the figure of the “chick”: a single woman in her twenties or thirties who finds individual empowerment, sexual agency, and self-esteem as she navigates the muddy waters of careers, relationships, and shopping. Most academic readings of this cultural explosion have understood it as a symptom of “postfeminism”: the myth that the political goals of American feminism have been accomplished, and that women in the U.S. can now seize freedom by making empowered choices at work, at home, and at the mall. Our study of “chick” culture will use this academic literature on postfeminism as a starting place. We will then expand existing critiques of postfeminist culture by putting them in conversation with critical race and transnational feminist scholarship, in order to critically read various examples of postfeminist popular culture. We will assess how these examples—including film (chick flicks), literature (chick lit), video games (action chicks), and music (rock chicks), as well as television, video, and Internet texts—define “Americanness” in relation to social and political formations such as gender, generation, race, sexuality, globalization, and political economy. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Throughout the semester, students will keep a reading journal and be responsible for occasional presentations of course readings. Requirements will also include seminar-style discussions and either a final research paper of approximately 20 pages or a creative project accompanied by a critical essay, based on primary source research.

GSC 43506. Seminar: Engendering Renaissance: Chicago, Harlem and Modern America(s)

(3-0-3)

In answering the question “What was American modernism?” most literary critical perspectives might commonly be expected to focus on a modernity represented by the authors of the “lost generation” in the U.S., such as F. Scott Fitzgerald, Gertrude Stein, and Ernest Hemingway. While a conventional understanding of U.S. American modernism might serve to underscore the importance of the stylistic, cultural and artistic contributions of these and other canonical moderns, such a view might also give little consideration to the significance of those modern U.S. American voices not ordinarily heard in such a context. This course poses the question “What was American modernism?”—to answer it by exploring its roots in two less conspicuous early 20th-century U.S. American modernisms: the Chicago Renaissance of 1912–1925, and the Harlem Renaissance of 1920–1929. In engendering renaissance, these two moments suggest a literary birth and rebirth of modern U.S. American identity that questions its seemingly stable boundaries and borders, reconfiguring the idea of “American” within and opening the door to the larger and more varied cultural fabric that is modern America(s). By locating the rise of U.S. American modernism in the relation between these two literary moments, this course will broaden our understanding of the idea of “American” at this time by considering how it is created within a frame determined by the interplay of race, gender, class and nation. In this way, it seeks to deepen our understanding of U.S. American culture and the idea of “American” in the early 20th century, while suggesting new ways to engage the global social and cultural challenges facing the idea of “American” in the 21st. Course requirements: Four short thesis practice papers, two essay introductions, two 5-page essays, presentations. Course texts: Alan Trachtenberg, *The Incorporation of America*, excerpts; Thorstein Veblen, *The Theory of the Leisure Class*, excerpts; Henry Blake Fuller, *The Cliff-Dwellers*; Theodore Dreiser, *Sister Carrie*; Sherwood Anderson, *Winesburg, Ohio*; Willa Cather, *The Song of the Lark*; Booker T. Washington, *Up From Slavery*, excerpts; W.E.B. Du Bois, *The Souls of Black Folk*, excerpts; Jean Toomer, *Cane*; Jessie Fauset, *There is Confusion*; Claude McKay, *Banjo*; Zora Neale Hurston, *Their Eyes Were Watching God*.

GSC 43507. Seminar: Woolf and Bloomsbury

(3-0-3)

The modernist feminist writer Virginia Woolf lived and worked with a loose collective of writers, painters, and social thinkers that we now call the Bloomsbury Group (though many members of the group disliked the phrase). We will look at the novels, essays, art, interior design, and political writings of some of the members of Bloomsbury—including works by Virginia Woolf, E.M. Forster, Roger Fry, Leonard Woolf, Vanessa Bell, and Clive Bell—to explore the complex moments of cross-fertilization, critique, and revision that define their encounters. In addition, we will attend to a few areas that have dominated discussions of Bloomsbury modernism: ideas of nation, civilization, and critiques of Empire; the formation of literary modernism’s often tense relation to mass culture; the development of modern discourses of sexuality; the relationship between literature and the modern metropolis; and explorations of women’s experience of modernity. Because members of the Bloomsbury Group worked in a number of fields beyond the literary—painting, economics, social thought, publishing, and interior design to name a few—students often find that they can easily develop projects that engage more than one area of interest and that combine skills developed in a second major with those that belong to literary criticism. Requirements include one seminar paper (written in stages in consultation with me) of at least 20 pages, participation in one group presentation.

GSC 43508. Seminar: Gender Troubles: Contemporary Irish Fiction

(3-0-3)

In this course we will be looking at the relationship between gender politics and national politics as it plays out in the development of Irish fiction after the era of James Joyce. Focusing on Irish novels and short stories that were groundbreaking and/or controversial in terms of their exploration of gender and sexuality, the course will also investigate the historical contexts in which they were produced

and the controversies they produced. Our investigation will focus on the question of how the “trouble” generated around these controversial explorations of gender and sexuality relates to other kinds of trouble that have shaped the history of twentieth-century Ireland. We will begin with the reaction against government censorship in the Irish Free State during the 1930s and 1940s, follow the emergence of Irish women writers and Irish feminism from the 1950s to the 1980s, and conclude with the rise of gay and lesbian Irish writers in the 1990s and early twenty-first century.

GSC 43509. Women and American Religion

(3-0-3)

This seminar introduces students to major themes in the history of gender and religion in America. Topics explored include: the role of religious belief and practice in shaping understandings of gender difference; gender in the context of family and religious life; gender, education, and work; religion and reform; and faith and feminism. Most of the readings and class sessions will focus on Christianity, though there will be ample opportunities to explore the religious lives of American Jewish and Muslim women. The class will meet several times at the Center for History in downtown South Bend, where a major, interactive, exhibit on Catholic sisters in America will be on display from September 2 through December 31, 2011. (For more information, see <http://www.womenandspirit.org/>) This course is a senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Throughout the semester, students will keep a reading journal and be responsible for occasional presentations of course readings. Requirements will also include seminar-style discussions and either a final research paper of approximately 20 pages or a creative project accompanied by a critical essay, based on primary source research.

GSC 43510. Economics of the Family

(3-0-3)

Prerequisite: ECON 30331

This course will use economic theory and empirical economic research to study the family. Topics will include household decision-making; the determinants of marriage and fertility; how marriage, fertility, and family structure are related to other outcomes; and public policies that affect the family and family formation. Students will learn to read and evaluate empirical economic research. This is a writing-intensive seminar course.

GSC 43511. Miranda Speaks: Caribbean Women Writers

(3-0-3)

The Caribbean has fascinated Europe since Columbus’s 15th century voyages, rapidly inspiring the Shakespearean figures of Caliban, Prospero, and Miranda. In the 20th century, Caribbean (male) intellectuals appropriated these tropes, figuring themselves as Caliban to Europe’s Prospero. This new configuration of power, however, still silenced Miranda, an exclusion that Caribbean women have sought to rectify for the past four decades. This course will begin with two plays written by men in order to contextualize the trope of Caliban and Miranda, illustrating the ways in which the Caribbean has figured in Western imaginations since its “discovery”; it will then focus on the development of women’s voices in their attempts to define and describe their unique concerns. Novels have been chosen to represent the diversity of authors at work in this region; as such, they come from six different islands (plus the U.S. and France) with varied cultures and traditions, representing three of the dominant linguistic traditions (English, French, and Spanish) in the Caribbean. Readings are grouped thematically, exploring themes such as colonization, madness, childhood, memory, and subjugation (also touching on family relationships, love, and sexuality), with the objective of arriving at a fundamental, but necessarily incomplete, understanding of this complex region and its concerns as expressed in its radical rereading of Western culture. As early as our reading of Sylvia Wynter’s essay “Beyond Miranda’s Meanings: Un/silencing the ‘Demonic Ground’ of Caliban’s ‘Woman,’” we will begin to see why the course title is necessarily problematic and to explore the various restrictions of women’s voices in the Caribbean and the implications of overcoming them. Authors to be

read include: Mayotte Capécia, Michelle Cliff, Maryse Condé, Edwidge Danticat, Cristina Garcia, Merle Hodge, Elizabeth Núñez, Gisèle Pineau, Jean Rhys, and Sylvia Wynter. Course requirements include five short response papers.

GSC 43600. Global Sociology

(3-0-3)

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline as one that seeks to understand human society as a nested collection of interdependent societies. In particular, the course draws from world systems theory and institutional approaches—as well as from related disciplines such as anthropology—to consider how the “development project” of the 20th century evolved over time. The impacts of global economic integration on cultural and institutional change, inequality, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how the World Bank, IMF, and United Nations are impacting the experiences of people around the world as well as for those who expect to do further research in the field.

GSC 43603. Mother Nature?: An Interdisciplinary Introduction to Motherhood Studies

(3-0-3)

Over the last decade, “Motherhood Studies” has emerged as a distinct, interdisciplinary field of scholarly inquiry with associations, journals, and conferences devoted to its development. In this course, we will consider motherhood as an institution and as a practice, questioning the nature of motherhood in the ideologies that society promulgates. We will read the classic texts upon which this field is founded, including Adrienne Rich’s *Of Woman Born* (1976) and Sara Ruddick’s *Maternal Thinking* (1989), and contemporary responses to their work. We will investigate the ways that disciplines as diverse as economics, literature, and theology have shaped our perception of motherhood as an institution; we will explore topics like the relationship between motherhood studies and feminism; the decision to work or stay home after the birth of a child; and the different faces of motherhood, including partnered mothers, single mothers, and lesbian mothers. Assignments: Students will submit weekly responses to the readings; create an annotated bibliography; write an article-length paper that draws on scholarship from multiple disciplines. There may be an opportunity to attend a conference devoted to motherhood issues.

GSC 43652. Families, Employment, and Their Interrelation with Gender

(3-0-3)

The title of the course, which is cross-listed in Sociology and Gender Studies, is ‘Families, Employment, and Their Interrelations with Gender’. The purpose of the course is to look at how the two genders’ relations in the paid labor force are affecting family behaviors, and the reverse. The expectations we have learned from childhood, and the education we are receiving about the tasks men and women should do with respect to household and childcare affect the kind of jobs we look for. The kinds of jobs people seek and obtain vary according to gender, even though women and men have the same education. Recently, however, women have been obtaining more education than men, but they still tend to go into jobs that pay less money and have fewer opportunities for promotions than those of men. Women continue to be the persons most involved in the household work and childcare. Thus, as we will learn, women with families tend to have less freedom and less opportunity to choose applying within a range of jobs, and women’s wages even within the same jobs tend to be less. This course gives you the opportunity to discuss the assigned reading material and to see whether it applies to a woman and man job holder, each in a different partnership whom you will be interviewing for an interview report. This latter report will be based upon your initial study of the research that is done on some aspect of family life and paid work relations. The latter would include such programs as family leave, varying hours on the job, childcare opportunities, and flexibility of job requirements. All in all, the

course can be a demanding one but one that also expands your perspectives on the interrelations of family life, employment requirements and opportunities as they are affected by gender.

GSC 45103. Mexican Immigration: A South Bend Case Study

(3-0-3)

This course uses experiential learning in the Mexican community of South Bend in order to understand how Mexican migrants conduct their lives across the vast distances separating South Bend and their homeland. The course begins with readings in social science and fiction about transnationalism, Mexican-U.S. migration and the history and sociology of the local community. Next we learn ethical fieldwork methods in preparation for community research. Students working in two-person teams will gather data on local and transnational households and kin networks, gender relations, political involvement, employment, consumption practices, cultural activities and religious life, working through contacts with social service agencies, the Mexican consulate, and Mexican- or Latino-run media, businesses, food stores, and sports leagues. We will document the innovative adaptations of this migrant community, especially the growth of an ethnic enclave of small businesses that both unite Mexicans as an ethnic group and sustain their ties to their homeland. We intend to compile the research in a volume published by Latino Studies to be given to those who shared their lives with us and to entities that are committed to helping them.

GSC 46000. Directed Readings

(3-0-3)

Reading and research on specialized topics that are immediately relevant to the student’s interests and not routinely covered in the regular curriculum. Letter grade given.

GSC 47000. Special Studies

(3-0-3)

Special studies are available with gender studies-affiliated faculty.

GSC 48000. Capstone Essay

(3-0-3)

In collaboration with the Director of Undergraduate Studies in Gender Studies, students choose a gender studies faculty member who will guide them through the semester-long composition of a capstone essay. The capstone essay is an original and professional piece of scholarly writing based on the student’s interdisciplinary research in their primary and supplementary majors. The capstone essay may build upon, but cannot replicate, the work done for a senior thesis or paper in another major or course. This course fulfills the senior capstone project requirement for gender studies supplementary majors. It can only be taken in the fall semester of the senior year. In the spring semester of the junior year, interested students should speak to the gender studies academic advisor about planning their thesis topic and research and securing a faculty advisor. For the essay to be accepted by Gender Studies, the minimum page requirement is 20 pages.

Hesburgh Program in Public Service

HESB 20000. Introduction to American Government

(3-0-3) Campbell

This course provides students with an overview of the American political system. Topics include the presidency, Congress, the Supreme Court, bureaucracy, separation of powers, federalism, political parties, interest groups, the public policy process, voting, public opinion, and participation. This course cannot be taken if you have already taken POLS 10100.

HESB 20001. American Politics

(3-0-3) Layman

Corequisite: POLS 22100

This course provides students with an overview of the American political system. Topics include the presidency, Congress, the Supreme Court, bureaucracy, separation of powers, federalism, political parties, interest groups, the public policy process, voting, public opinion, and participation.

HESB 20002. Principles of Microeconomics

(3-0-3)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

HESB 20010. Introduction to Public Policy

(3-0-3) De Ridder

The Hesburgh Program in Public Service prepares students for an active and informed life in public service, and HESB 20010 is the gateway course to the Hesburgh interdisciplinary minor. This course explores the character and substance of public policy making in the United States. We shall consider why and how government responds to some issues (and not others). We shall examine how public problems are conceptualized in the public arena and focus our attention to the elements of the policy process and its operation, and students will develop some knowledge of substantive areas of public policy. Finally, we will turn our attention to leadership to link a conception of effective and ethical public service with our analytic understanding of the policy process. The course will conclude with students participating in policy hearings based on their research on substantive public policy controversies.

HESB 20210. U.S. Latino Spirituality

(3-0-3) Elizondo

U.S. Latino spirituality is one of the youngest spiritualities among the great spiritual traditions of humanity. The course will explore the indigenous, African, and European origins of U.S. Latino spirituality through the devotions, practices, feasts, and rituals of the people.

HESB 20211. Rich, Poor, and War

(3-0-3) Whitmore

This course examines the interrelationships between economic injustice and violence. It begins by investigating the gap between rich and poor both in the U.S. and worldwide. We also look at the history of Christian thought on wealth and poverty. We then address the ways in which economic disparity intersects with the problem of violence in both domestic (violence against women) and political realms (war and revolution). Next, we canvass Christian thought on the use of violence. This raises the question of whether Christianity itself contributes more to violence or to peace. Finally, we pose the question of whether forgiveness for violence is advisable or feasible.

HESB 20212. War, Law, and Ethics

(3-0-3)

This course is designed to explore the ethical and legal considerations related to war and the use of force. Beginning with a historical overview of Christian thinking on war and peace, we will develop an account of various ethical positions on

the use of force, including views rooted in the just war tradition and in pacifism. We will also consider the ethical implications of contemporary issues related to the use of force, e.g., sanctions, war crimes, humanitarian intervention, and terrorism. In collaboration with the Center for Social Concerns and La Casa de Amistad, students will have the opportunity to engage in service-learning by working with students from Washington High School to collect stories from local war veterans as part of the Library of Congress, "Veterans History Project."

HESB 20215. Medical Ethics

(3-0-3)

A discussion of ethical problems in the medical profession in light of natural law and Christian moral principles.

HESB 30015. Analyzing Public Policy

(3-0-3) Betson

Public policy can be viewed as the adoption of a collective response to a perceived problem facing society. But what differentiates one course of action from another? What makes one policy better than others? This course will provide students with instruction into the welfare economics paradigm as a basis to develop and analyze policy alternatives.

HESB 30100. Methods Sociological Research

(3-0-3) Guntz; Hachen

Limited to sociology majors. Begins with discussion of scientific method, conceptualization of research problems and measurement. The course then explores the dominant modes of social science research: field work and participant observation, survey and interviewing, experimental designs, and evaluation research.

HESB 30101. Statistics for Social Research

(3-0-3) Workman

This course is designed to show students how to interpret and critically evaluate statistics commonly used to describe, predict, and evaluate in the social sciences, as well as many areas of the business and/or medical world. The focus is on a conceptual understanding of what the statistic does, means and what assumptions are made from it. Hands-on experience in using data analysis is part of the course.

HESB 30102. Intermediate Economic Theory—Micro

(3-0-3) Sullivan

An examination of the language and analytical tools of microeconomics, emphasizing the functional relationship between the factor and product markets and resource allocation.

HESB 30103. Quantitative Political Analysis

(3-0-3)

Students in this course will learn to understand the most common statistical techniques used in political science and acquire the skills necessary to use these techniques and interpret their results. Mastery of these techniques is essential for understanding research on public opinion and voting behavior, electoral studies, and comparative research on the causes of democracy. For each topic, students will read works to orient them to key issues and debates. They will learn the reasoning behind the statistical analysis in these readings and create their own spreadsheet programs to execute such analyses. They will then download and clean datasets actually used in the published research, replicate selected analyses from these readings using a statistical package, and write short papers evaluating the inferences defended in the published research.

HESB 30104. Statistics for Economics

(3-0-3) Garin

This course seeks to introduce the student to the principles of probability and statistical theory appropriate for the study of economics. The emphasis of the course will be on hypothesis testing and regression analysis.

HESB 30106. How to do Political Research

(3-0-3)

This is a course primarily intended for juniors and seniors who are writing, or are planning to write, a senior essay, although it is open to all majors. It helps students acquire the practical skills that are essential for completing a substantial empirical research project: posing a research question, finding out what is already known, staking out an original argument, identifying counterarguments, deciding what kind of evidence is required to figure out who is right, clarifying concepts and boundary conditions, gathering the evidence, analyzing the evidence, and interpreting the analysis. The course encourages students to consider a variety of approaches and helps them decide whether to use quantitative methods, qualitative methods, or both. Students will do independent research to compile a bibliography, gather and analyze evidence, and write an outline, but will not write a paper. Instead, they will present and defend their findings orally and visually. All students are expected to participate vigorously in evaluation of their peers' research.

HESB 30107. Research Design and Methods

(3-0-3) Gould

This course is designed to provide students with the tools to accomplish original research in political science, and is appropriate for students who are preparing to write a senior thesis, who are interested in graduate work in the social sciences, whose careers will involve research, or who are simply interested in making the transition to accomplishing original research in political science. Students will learn the skills necessary for an original research project, including how to formulate an empirical question, how to gather and analyze relevant data or evidence, and how to interpret this analysis. Students will be exposed to a variety of qualitative and quantitative techniques for the analysis of political data. During this course, students will create an original research proposal for which they will compile a bibliography, gather and analyze relevant data, write a research outline, and present their research to fellow students.

HESB 30108. Applied Quantitative Methods

(3-0-3) Radcliff

Students in this course will learn to understand, and to use, the most common statistical techniques used in political science. They will apply this methodological training to the development of a research project that will culminate in a paper modeled upon, and suitable for submission for publication in, peer reviewed scholarly journals. No prior understanding of or experience with statistical methods is expected. While students are encouraged to develop their own projects, and course time will be devoted to precisely the question of how we develop and craft ideas into do-able research projects, some recommended paper topics will be provided. This course is especially recommended to students contemplating graduate work in the social sciences.

HESB 30207. Politics and Conscience

(3-0-3) Keys

Against a backdrop of large-scale society, mass movements, and technological bureaucracy, the invocation of "conscience" recalls the individual human person as a meaningful actor in the political sphere. But what is conscience, and what are its rights and responsibilities? What is it about conscience that ought to command governmental respect? Are there limits to its autonomy? What role should conscience play in questions of war and peace, law-abidingness and civil disobedience, citizenship and political leadership? And how does the notion of conscience relate to concepts of natural law and natural rights, rationality and prudence, religion and toleration? This course engages such questions through readings from the Catholic intellectual tradition (Augustine, Thomas Aquinas, Thomas More, Francisco de Vitoria, Desiderius Erasmus, John Henry Newman, Karol Wojtyła/John Paul II, and Joseph Ratzinger/Benedict XVI) and other writers of the history of ethical-political thought (Cicero, Seneca, John Locke, Mahatma Gandhi, Jan Patočka, and Alexandr Solzhenitsyn). We consider also various contemporary reflections on conscience expressed in films, essays, letters, plays, short stories, speeches, and declarations, beginning with Martin Luther King, Jr.'s "Letter from a Birmingham Jail" and Václav Havel's speech "Politics and Conscience." This class

serves as both the capstone course for the interdisciplinary minor Philosophy in the Catholic Tradition and an upper-level elective for political science majors and peace studies minors. Its format combines lecture and seminar-style discussion.

HESB 30217. American Political Thought

(3-0-3) Munoz

In this course we shall attempt to understand the nature of the American regime and its most important principles. Since we lack the time for a comprehensive survey of American political thinkers, we shall focus on select statesmen and critical historical periods, specifically the founding era, Lincoln and the slavery crisis, and the Progressives. We shall also reflect upon how the American regime relates to the larger tradition of Western political thought.

HESB 30218. Civil Liberties

(3--3) Barber

Most courses in constitutional law narrate the Supreme Court's evolving positions on constitutional rights and institutions. This course starts not with the Supreme Court but with *The Federalist Papers*, from which it develops a general theory of the social and economic goals or ends of constitutional government in America. It then uses this theory as a framework for assessing the Supreme Court's position on property rights, race relations, personal privacy, and the place of religion in American life. This exercise can yield results that make for lively class discussion, not only about the Court, but about the adequacy of the Constitution itself. Grades will be based on a midterm and a final exam, with a paper option in lieu of the final.

HESB 30219. American Intellectual History I

(3-0-3)

This lecture course will survey major developments in American thought from the first English contacts with North America to the mid-19th century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our own ways of thinking. Especially in the first weeks of the course, European backgrounds will also receive attention. Students will write a midterm and a final exam, as well as a 10-page research paper.

HESB 30222. Modern Political Thought

(3-0-3)

In this course, students will study the focal ideas and arguments that helped shape the development of Western modernity through close readings of the classic texts of modern European political thought. Political theorist Charles Taylor's recent book, *Modern Social Imaginaries*, will provide a helpful historical and philosophical framework for the course and will be read and discussed gradually over the semester. Machiavelli's *The Prince* will give students insight into the philosophical origins of the modern Western experience of secular, power politics. Hobbes's *Leviathan*, Locke's *Second Treatise of Government*, Rousseau's *Second Discourse* and *Social Contract*, and selected political essays by Kant will offer students the opportunity to understand the evolution of the social contract tradition, and how it helped produce the fundamental Western "modern social imaginaries" of natural rights, the contractual social order, popular sovereignty and the public sphere.

HESB 30227. Faction: A Perennial Problem of Politics

(3-0-3)

Since the heated election of 2000, the terms 'red-state' and 'blue-state' have become a part of our political lexicon. But the phenomenon of faction/internal political conflict is neither new or unique to the United States. After beginning with an assessment of contemporary politics, this course will survey a variety of thinkers—ancient, modern, and American—on the problem of factions.

HESB 30228. Health Care Ethics for the 21st Century

(3-0-3)

This course explores the importance of religious and moral values for the life and death choices we make, individually and as a society. Basic principles and methods of contemporary bioethics will be introduced, and a range of issues considered,

e.g., medical research, physician assisted suicide, health care reform, new genetic technologies, responding to AIDS. Especially recommended for students planning on a career in medicine or science. Lecture/ discussion format.

HESB 30230. Religion and Social Life

(3-0-3) Christiano

How does social life influence religion? How does religion influence society? What is religion's social significance in a complex society like ours? Is religion's significance declining? This course will consider these and other questions by exploring the great variety in social expressions of religion. The course examines the social bases of churches, sects, and cults, and it focuses on contemporary religion in the United States.

HESB 30231. Moral Problems

(3-0-3) Rabbitt

An introduction to the field of moral philosophy, with major emphasis on contemporary moral issues.

HESB 30232. Morality and Modernity

(3-0-3) Solomon

Corequisite: PHIL 22415

An examination of the many of the deepest contemporary moral disputes that rest on philosophical disagreements about the nature of modernity. These disputes focus particularly on the modern commitments to individualism and the idea of progress.

HESB 30233. Philosophy of Religion

(3-0-3)

A discussion of some basic issues: the nature of the philosophy of religion, the notion of God, grounds for belief and disbelief in God, faith, revelation, religious language and knowledge, verification, immortality.

HESB 30234. Continental Political Thought

(3-0-3)

This course examines the response of leading theorists to the promise and pathologies of the modern age. Among other topics, we will consider the political implications of the decline of authority, community, and the public sphere; the problem of institutionalizing freedom in the modern nation state; and the fate of political and moral agency in a bureaucratized, massified polity. Special attention will be paid to the continental tradition's critique of liberal institutions and political philosophy. Readings from Hegel, Tocqueville, Marx, Nietzsche, Weber, Schmitt, the Frankfurt School, Arendt, and Foucault.

HESB 30237. Medical Ethics

(3-0-3) Solomon

Corequisite: PHIL 22602

An exploration from the point of view of ethical theory of a number of ethical problems in contemporary biomedicine. Topics discussed will include euthanasia, abortion, the allocation of scarce medical resources, truth-telling in the doctor-patient relationship, the right to medical care and informed consent, and human experimentation.

HESB 30239. Environmental Philosophy

(3-0-3)

A philosophically integrated examination of current environmental issues drawing on familiar literature from ecology, economics and ethics, as well as recent fiction.

HESB 30240. Feminist Political Thought

(3-0-3)

This course will examine different ideas, approaches, and issues within feminist political thought. The first part of the course will compare different theoretical perspectives, from liberalism to Marxism, that have been employed by contemporary feminists. We will pay particular attention to the meanings ascribed to "woman" and her roles in society. The second part of the course will examine how women have been represented throughout Western political thought, and the

values ascribed to them by political theorists. Finally, in the last part of the course, we will turn to an examination of several contemporary political issues particularly relevant to feminist thought.

HESB 30241. Contemporary Political Thought

(3-0-3)

This course is an introduction to contemporary American and European political thinkers. The goal of the course is to identify the characteristic questions of modern politics and the challenges to freedom in the modern age.

HESB 30242. The Religious Factor in American Culture

(3-0-3)

This course is about understanding American culture and its history, taking religion into account as one important factor among many—but one often neglected. Subjects include how religion has interacted with just about everything else in the culture, from politics and warfare to intellectual life, ideals, morality, science, schooling, race, immigration, ethnicity, family, sexuality, and so forth.

HESB 30243. Self and Society

(3-0-3)

A survey of leading ideas in political and social philosophy primarily from the 18th–20th centuries. Problems considered will be: the relation of individual to society, the relation of society to state, liberalism, the relation of economics to politics, versions of socialism, etc.

HESB 30244. World Religions and Catholicism in Dialogue

(3-0-3) Gorski

A theological exploration of Hinduism, Buddhism, Taoism, Judaism, Islam, and the relationship of Christianity to those religions. The goal of this exploration is specifically: (1) to set forth the essential characteristics of the world's great religions, (2) to disengage the essential differences between Christianity and the other world religions, (3) to identify the distinctiveness of Catholicism within the family of Christian traditions, and (4) to examine historically and systematically the Christian theological appraisal of other world religions. Thus, the course will enable the students to gain a deeper understanding of Christianity by "passing over" into and experiencing as well as appraising the different major religious traditions of the world. To enhance the learning experience, the course will use the BBC film series titled *The Long Search*. Each of these hour-long films focuses on perspectives of the world's major religions.

HESB 30245. Political Theory

(3-0-3) Keys

Corequisite: POLS 22600

This course is an introduction to political theory as a tradition of discourse and as a way of thinking about politics. The course surveys selected works of political theory and explores some of the recurring themes and questions that political theory addresses. This introductory course fulfills the political theory breadth requirement for the political science major.

HESB 30246. Science, Technology, and Society

(3-0-3) Hamlin

Corequisite: STV 22556

This course introduces the interdisciplinary field of science and technology studies. Our concern will be with science and technology (including medicine) as social and historical, i.e., as human, phenomena. We shall examine the divergent roots of contemporary science and technology, and the similarities and (sometimes surprising) differences in their methods and goals. The central theme of the course will be the ways in which science and technology interact with other aspects of society, including the effects of technical and theoretical innovation in bringing about social change, and the social shaping of science and technology themselves by cultural, economic and political forces. Because science/society interactions so frequently lead to public controversy and conflict, we shall also explore what resources are available to mediate such conflicts in an avowedly democratic society.

HESB 30247. War, Peace, and Conscience

(3-0-3) Baxter

This course examines ancient, medieval, and modern understandings of the ethics of war primarily, but not exclusively, within Christian tradition. It comes in three parts. First, it surveys the emergence and development of the morality of war from ancient times (Jewish, Christian, and classical), through the medieval period (church canonists, Aquinas, the scholastics), and into the modern period (Grotius and later sources of international law). Second, it examines the nature of modern warfare by means of historical illustrations, including the Civil War, the so-called Indian Wars, World War I, World War II, the Vietnam War, and the Gulf War. Third, it takes up several cases with the aim of exploring the tension between traditional conceptions of just war theory and the practice of modern warfare, focusing on issues involved in the use of weapons of mass destruction, the “fog of war,” wars of revolution, ethnic and religious conflict, and the continuing “war on terrorism.” Texts include: Roland Bainton, *Christian Attitudes Toward War and Peace*, Erich Maria Remarque, *All Quiet on the Western Front*, John Hersey, *Hiroshima*, Olson and Roberts, *My Lai: A Brief History with Documents*, plus writings on the attacks of September 11. Requirements include a take-home test, several short papers, and a final exam.

HESB 30248. Catholics in America

(3-0-3) Bain-Conkin

Since 1850 Roman Catholics have constituted the single largest religious denomination in the United States. This course explores what the presence of Catholics has meant for the American experience, focusing on themes of church/state separation, religion and politics, education, and social reform. We will also examine how the American context has transformed the practice of Catholicism, with attention to ethnicity, gender, region, race and class as variables that have shaped the American Catholic experience. Assigned readings range from excerpts of anti-Catholic publications to first-hand accounts written by American Catholics from the colonial period to the present. In addition we will study the representation of Catholics in American film, themes of Catholic fiction, material culture relating to Catholic devotional life and the sacraments, and the shifting position of American Catholics in the universal Roman Catholic Church.

HESB 30249. Feminist and Multicultural Theologies

(3-0-3)

An exploration of how the voices of women have helped to reshape theological discourse and to bring to light new dimensions of the Christian tradition. Using the writings of feminist, womanist, Latina, mujerista, Asian, and Third World theologians, the course will focus on the significance of gender and social location in understanding the nature and sources of theology, theological anthropology, Christology/soteriology, the mystery of God, and women’s spirituality.

HESB 30250. Utopias and Dystopias

(3-0-3)

“Utopia” is a term coined by Thomas More, probably as a pun suggesting that the “good place” is “no place.” Exploring utopian traditions in politics and political thought reveals a jarring contrast between the noblest human aspirations and the most devastating outcomes. Even so, some students may find grounds for hope in certain utopian traditions, since these include not only the dozens of well-intentioned schemes which quickly led to slaughter or starvation, but also some enduring and simple communities such as the Amish. Other students may come to the more sobering conclusion that dramatic social progress is impossible. But even for them, there may be much to learn from the portrayals of shocking corruption and degradation in “dystopias” for it may still be possible that, if certain social and cultural trends are left unchecked, society can get far worse. Both utopias and dystopias tend to focus especially on two aspects of society: sexuality and economics which according to some, are the most in need of radical reform, while according to others, are the most dangerous when altered from their traditional patterns. Utopias and dystopias help refine our idea of what excellence and depravity in society look like, how far progress and decline are possible, and what means tend toward these conditions. This course draws from political theory, history, literature, and film.

HESB 30251. Ecology, Ethics and Economics

(3-0-3)

An examination, through literature and reasoned argument, of social values behind the economic excesses that have led to our ecological crisis, and alternative values by which the crisis might be alleviated.

HESB 30252. Christianity and World Religions

(3-0-3)

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate Mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply in the spirituality of other traditions. By course end we ought to have a greater understanding of what is essential to Christian faith and practice as well as a greater appreciation of the spiritual paths of others.

HESB 30254. Moral Limits of a Free Market

(1-0-1)

This class is designed to investigate questions such as: Do markets need ethical standards? Do markets make us moral? Should a market for transplant organs be allowed? What should we think about sweatshops?

HESB 30255. Original Intent and Freedom of Religion

(3-0-3)

The focus of this course is the constitution as interpreted by the United States Supreme Court. It covers landmark constitutional cases.

HESB 30256. Human Rights and Human Wrongs

(3-0-3) Verdeja

This course will examine theories of human rights and their applications and implications for international politics.

HESB 30257. Contemporary Political Islam

(3-0-3)

This course is designed to provide students with an understanding of the phenomenon of political Islam in the Arab and Muslim worlds. It examines the reasons, implications, and consequences of the reassertion of Islam in today’s politics. The first part of the course provides a thorough analysis of the Islamic order and the model(s) that inspires modern Islamist activists. The second part critically examines the ideas of the main ideologues of contemporary Islamic movements. The third part discusses the approaches to the understanding of contemporary political Islam and the Islamic movements and presents cases studies of mainstream and radical Islamic movements in a number of Arab and Muslim countries. Finally, the course concludes with a critical analysis of the future of political Islam and its relations with the West.

HESB 30258. Christianity and the Modern State

(3-0-3)

In the Gospels Jesus instructs Christians to give to Caesar the things that are Caesar’s and to God, the things that are God’s. However, what exactly it is that believers owe to Caesar and to God has been a source of both political and religious division for more than two millennia. Most of the major political thinkers in the western tradition have commented on this issue, and in this course we will evaluate critically the diverse solutions that have been offered to questions such as: What does it mean to have a separation of church and state? Is achieving a separation of church and state possible or desirable? What should be done when one’s religious and civic duties come into conflict? The reading list for the course will include selections from thinkers such as: St. Augustine, Machiavelli, Luther, Calvin, Rousseau, Jefferson, Madison, Washington, Hume, Lincoln, Tocqueville, and Rawls as well as documents from Vatican Council II, papal encyclicals, and

U.S. Supreme Court cases. In addition to learning about this issue that is fundamental to the study of politics both past and present, students will be encouraged to develop their ability to think and write critically through paper assignments and class discussion.

HESB 30259. U.S. Intellectual History Since 1870

(3-0-3)

This lecture course will survey major developments in American thought from the later nineteenth century to the end of the twentieth century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our present ways of thinking.

HESB 30260. Basic Concepts in Political Philosophy

(3-0-3)

An introduction to important thinkers and problems of political philosophy. Basic concepts to be considered are equality, liberty, and authority.

HESB 30261. Catholicism and Politics

(3-0-3) Philpott

Catholicism and Politics poses the question, both simple and complex: How ought Catholics to think about the political order and political issues within it? The first part of the course will survey major responses to this question drawn from Church history: the early church, the medieval church, and the modern church. The second part applies these models to contemporary issues ranging among war, intervention, globalization, abortion, the death penalty, religious freedom, gender issues, and economic development. The course culminates in "Vatican III," where teams of students, representing church factions, gather to discover church teachings on selected controversial political issues.

HESB 30263. Ethics

(3-0-3) Holloway; Thames

An examination of the relationship between thought and action in light of contemporary and traditional accounts of the nature of ethics.

HESB 30264. Freedom and the American Novel

(3-0-3) Meissner

This course looks at how the concept of "freedom" functions as an aesthetic, cultural, political, and social component in a selection of American novels and other forms of literature which helped create the larger landscape of American fiction from the 19th century until the present. Selected works will address issues of economic freedom, political freedom, religious freedom, freedom and gender, sexuality, race, identity, and death among others. Short papers, presentations, long papers and exams.

HESB 30265. Constitutional Conventions

(3-0-3) Zuckert

This course will focus on the American constitutional convention of 1787 with an eye to understanding the constitution proposed by the convention and the political process that produced it. The main reading will be James Madison's notes on the convention debates. We will also experiment with a new simulation role playing game of the convention.

HESB 30266. Constitutional Leadership

(3-0-3) Barber

Means are normally subordinate to the ends they serve, and practical reasonableness calls for new means when the old means fall short of their goals. Yet American-style constitutions establish their institutional means as the "supreme Law of the Land," and this yields a tension between the Constitution's ends-oriented and legal aspects. The chief function of constitutional leadership is coping with this tension, and though the task has historically fallen mostly to executive leaders like Abraham Lincoln and Franklin D. Roosevelt, other leaders include collective actors like the Joint Committee on Reconstruction of the 39th Congress, the civil rights movement of the 1960s, and the framers of the American Constitution themselves. The course will ask how the phenomenon of

constitutional leadership both illuminates and is illuminated by different models of leadership from those of Plato and Aristotle to those of Machiavelli, Hobbes, Locke, *The Federalist Papers*, and modern scholars like Richard Neustadt, Carl Schmitt, Theodore Lowi, Jeffrey Tulis, James McGregor Burns, Clement Fatovic, and Nannerl Keohane. This course would impart to the student a framework for assessing the performance of political leaders in the tasks of maintaining, reforming, and if necessary changing constitutions. It will emphasize the intellectual and moral virtues and the political skills that these functions demand. Course requirements include two objective exams and, with the instructor's permission, an optional term paper. Previous courses in American Government and Constitutional Law are strongly recommended.

HESB 30267. God, Country and Community

(3-0-3) Sikkink

This course investigates how religion influences what Americans think about politics and how they are involved in public life, including political participation and volunteering and community service. We will examine, for example, how and why religion influences opinions on controversial social and political issues, such as abortion, expanding the welfare state, and school choice policy. At the organizational level, the course seeks to understand what religious congregations and schools are doing for their communities and how they are active in political life, such as mobilizing protest, inviting political speakers, talking about politics, or organizing voter registration drives. The analysis will pay close attention to religious tradition differences, including investigating whether and why conservative Protestants are more or less likely to give and volunteer in their communities than Catholics, mainline Protestants, or the nonreligious. By investigating what about religion leads to good works and active citizens, the course will shed light on the complex and changing relationship between religion and public life in the United States.

HESB 30400. American Congress

(3-0-3) Griffin

Prerequisite: POLS 10100 or POLS 20100 or GOVT 10100 or GOVT 20100

This course will approach the United States Congress from several perspectives. First Congress will be viewed from the perspective of the American founding. Then we will read several major studies Congress including Mayhew's *Congress: the Electoral Connection*, Cox and McCubbins' *Legislative Leviathan*, and Jacobson's *Congressional Elections*. Students will also learn how to do basic roll call analysis through short data assignments. In addition they will prepare a complete legislative history, using primary materials. In addition to these writing assignments, there will be a mid-term and a final.

HESB 30401. Presidential Leadership

(3-0-3) Arnold

Prerequisite: POLS 10100 or POLS 20100 or GOVT 10100 or GOVT 20100

This course examines the role of the presidency in the American regime and its change over time. Particular attention will be given to expectations about presidential leadership through the course of American political history. Beginning with questions about the original design and role of the presidency, the course turns to consideration of the role of leadership styles for change and continuity in American politics. Finally, cases of presidential leadership are studied to comprehend the way leadership and political context interact.

HESB 30403. Latinos and the U.S. Political System

(3-0-3)

This course provides a careful and critical analysis of the political status, conditions, and the political activities of the major Latino (or Hispanic) groups in the United States—particularly, Mexican Americans, Puerto Ricans, and Cuban Americans. To provide a context and grounding, various theoretical perspectives are first considered, followed by discussions of the historical experiences and contemporary socioeconomic situations of the several Latino groups. Attention then turns to a number of issues concerning political attitudes, behaviors, and activities. Assessments of Latino influence upon the major local, state and national institutions of the political system—and vice versa—are next are considered. Policy

areas particularly significant for Latinos are also examined. Finally, the major issues, questions, and themes considered throughout the semester are revisited and reconsidered.

HESB 30406. United States Labor History

(3-0-3)

Corequisite: HIST 32618

The labor questions “Who does the work? Who reaps the rewards? And who makes the decisions?” are central to any society, and this course explores how those questions have been answered throughout the history of the United States of America. This course will introduce you to the major themes, events, organizations, individuals, and scholarly controversies in American labor history, from 1776 to the present. We will study the diversity of the working-class experience in the U.S. by exploring the past from multiple perspectives, and we will analyze competing interpretations put forth by labor historians over the past half-century. The workers, workplaces, communities, institutions, and issues will range widely over the semester, but we will investigate some core themes for the duration: issues of power, structure, and agency, from the workplace to Washington, DC; workers’ wide-ranging efforts to forge organizations, namely labor unions, to represent their collective interests; intersections between class, race, and gender at work, at home, at play, and in politics; and tensions between capitalism, industrialization, and democracy in U.S. history.

HESB 30410. The United States Since 1945

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social and cultural development of the United States from 1900 to 1945. The principle topics to be investigated will be the Progressive Period legislation of Presidents Theodore Roosevelt, William Taft, and Woodrow Wilson, the causes and effects of World War I, the cultural developments of the 1920s, the causes of the Wall Street crash and Great Depression, the New Deal legislation of President Franklin Roosevelt, the diplomacy of the interwar period, and the home front during World War II.

HESB 30411. Race, Ethnicity, and Power

(3-0-3)

Presents a review and discussion of social scientific research concerning the nature of race and ethnicity and their expression as social and cultural forces in the organization of multiethnic societies. The focus is multidisciplinary.

HESB 30421. Race/Ethnicity and American Politics

(3-0-3) Ramirez

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions the Congress, presidency, judiciary, state and local governments, etc. play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

HESB 30422. Introduction to Social Problems

(3-0-3) Munday

Today’s society is beset by many serious social problems, for example, crime and deviance, drug abuse and addiction, domestic violence, hunger and poverty, and racial/ethnic discrimination. How do we think about these problems in ways that lead to helpful solutions? In what ways does one’s own social background and role in society affect his/her views of these problems? In this course, students will learn to take a sociological perspective not only in examining the causes, consequences, and solutions to some of society’s most troubling social problems, but also in taking a critical look at their own perceptions of the problems.

HESB 30425. Economics of Poverty

(3-0-3)

This course examines the problem of poverty in the United States from an economic perspective. By the course’s end you will be able to answer six central questions: (1) What is poverty and how is it measured? (2) Who are the poor? (3) What are the causes of poverty? (4) What policies are used to fight poverty? (5) How effective are these anti-poverty policies? (6) What more needs to be done? Equally important, you to be familiar with the resources that will enable you to pursue these questions independently in greater depth and into the future. Because the study of poverty is an interdisciplinary pursuit, we examine literature from other social sciences where appropriate.

HESB 30426. Today’s Gender Roles

(3-0-3) Aldous

Current changes in male and female roles and the reasons for these changes are examined. Existing gender differences, various explanations for them and proposals for change are discussed and evaluated.

HESB 30427. American Political Parties

(3-0-3) Wolbrecht

Prerequisite: POLS 10100 or POLS 20100 or GOVT 10100 or GOVT 20100
Political parties play many vital roles in American politics: They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices—candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, how they have changed over time—have consequences for the working of the American political system.

HESB 30437. Constitutional Law

(3-0-3) Munoz

This course examines the main principles of American constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given over to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court’s opinions. A background in American national government is desirable.

HESB 30438. Social Movements

(3-0-3)

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course we will consider the ways in which different sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

HESB 30439. The State of the American States

(3-0-3)

This course provides a critical and comprehensive examination of politics in the states of the U.S., and does so by analyzing topics from several theoretical perspectives. States are major policymakers concerning such central public policies as education, welfare, and criminal justice, among a host of others. There is tremendous variation, yet, at the same time, there are similarities between and among the 50 states in their political processes and governmental institutions as well as in their public policy concerns and outcomes. The focus of the course is on understanding why the states vary as they do and the consequences of that variation for such core American values as democracy and equality, and how states have different conceptualizations, or different visions or versions, of those core values.

HESB 30441. Race and Ethnicity

(3-0-3)

This course has three objectives. First, the course will help you to think critically about issues related to race and ethnicity in American society. The second objective is to foster a dialogue between you and other students about racist and ethnocentric attitudes and actions. The third objective is to encourage you to explore your own racial and ethnic identity and to understand how this identity reflects and shapes your life experiences.

HESB 30442. Homefronts During War

(3-0-3)

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, and antinuclear movements; cold war politics and fears of American communism; and debates over the draft, just-war, racism at home, and U.S. policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

HESB 30443. Religion in American Politics

(3-0-3)

This course begins by examining the unique religious “economy” within the United States, and the extent to which it is a function of the First Amendment and/or other factors. We will then explore the imprint religion has made on the American political landscape, drawing on both historical and contemporary examples. From abolitionism to school vouchers, from William Jennings Bryan to George W. Bush, the course will address how religion and politics have converged to affect public policy in the courts, Congress, and the executive branch.

HESB 30449. Constitutional Interpretation

(3-0-3)

Prerequisite: POLS 10100 or POLS 20100 or GOVT 10100 or GOVT 20100
Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

HESB 30451. Leadership, Ethics and Social Responsibility

(3-0-3) Brandenberger

This course examines leadership and empowerment issues from multidisciplinary perspectives, focusing on the role of the leader within organizations that promote service, social action, or other forms of social responsibility. Alternative models of leadership are explored, with attention to value and moral implications.

HESB 30452. Contentious Politics and Resistance Movements

(3--3) Hui

This course analyzes prominent resistance movements in the twentieth and twenty-first centuries. We first examine the conceptual tools of contentious politics, domination and resistance, state-society relations, and violent vs. nonviolent strategies of resistance. We then examine various nationalist independence movements, revolutionary movements, communist insurgencies, civil wars, and peaceful democracy movements. To better understand resistance movements from the perspectives of leaders and participants, we will watch a series of documentaries and read the (auto-) biographies of Mahatma Gandhi, Nelson Mandela, Aung San Suu Kyi, the Dalai Lama, Wei Jingshen, and others. In analyzing democracy movements, we will further examine what the third wave of democracy entails, why some movements succeed while others fail, how new democracies should reconcile with past dictators, to what extent constitutional engineering can solve past problems and facilitate successful transitions, and why some new democracies remain fragile.

HESB 30456. Jacksonian U.S.: Political/Social/Cultural

(3-0-3)

This course explores the early nineteenth-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–1848). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and antislavery, changing gender roles and the rise of feminism, evangelical religion and reform, and Native American resistance and removal.

HESB 30457. U.S. Environmental History

(3-0-3) Coleman

This course is an introduction to the new field of environmental history. While many people think the environment suddenly became important with the first Earth Day in 1970 (or a few years earlier), environmental issues have in fact long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward their surroundings and fellow creatures. They have also increasingly paid attention to the ways environmental factors have affected history. This course will range widely, from world history to the story of a single river, from arguments about climate change to the significance of pink flamingos, and will survey a number of types of history including cultural, demographic, religious, and animal.

HESB 30461. Schools and Democracy

(3-0-3)

Education sits high on the public policy agenda. We are living in an era of innovations in education policy, with heated discussion surrounding issues such as vouchers, charter schools, and the No Child Left Behind Act. This course introduces students to the arguments for and against these and other educational innovations, and does so through the lens of how schools affect the civic health of the nation. Often forgotten amidst debates over school choice and standardized testing is the fact that America's schools have a civic mandate to teach young people how to be engaged citizens. Students in this course will grapple with the civic implications of America's educational landscape, and have an opportunity to propose ways to improve the civic education provided to young people.

HESB 30467. Information Security

(3-0-3) Chapple

This course provides students with a working knowledge of information security topics through a focus on best practices, applications and implementation strategies. Students will learn the fundamental principles of information security and explore contemporary topics in the field, including access control methodologies, business continuity/disaster recovery planning, firewalls, network security, operating system security, intrusion detection, cryptography and incident handling.

HESB 30469. Public Policy/Narrative Non-Fiction

(3-0-3)

The first half of this course use narrative non-fiction—investigative journalism—as a stepping stone into public policy issues. We supplement these texts in the second half of the course with an introduction to basic phases of the policymaking process, such as implementation and evaluation.

HESB 30472. Mexican-American History

(3-0-3)

This course is an introductory survey of Mexican-American history in the United States. Primarily focused on events after the Texas Revolution and annexation of the American Southwest, we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican-American U.S. citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a U.S.-based Mexican-American politics and culture. Although primarily focused on the

American Southwest and California, this course also highlights the long history of Mexican American life and work in the Great Lakes and Midwestern United States. We will conclude with the recent history of Mexican and Latin-American migration to the United States after 1965, and the changing nature of Mexican-American identity and citizenship within this context.

HESB 30473. U.S. Foreign Policy to 1945

(3-0-3) Miscamble

This course covers the main developments in American foreign policy from World War II through the end of the Cold War. The principal topics of investigation will be wartime diplomacy and the origins of the Cold War; the Cold War and containment in Europe and Asia; Eisenhower/Dulles diplomacy; Kennedy-Johnson and Vietnam; Nixon-Kissinger and détente; Carter and the diplomacy of Human Rights; Reagan and the revival of containment; Bush and the end of the Cold War.

HESB 30474. Crime, Heredity, and Insanity in American History

(3-0-3) Przybyszewski

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

HESB 30480. Labor and America since 1945

(3-0-3) Graff

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8% of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is “globalization” and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies or mass culture are particularly welcome.

HESB 30481. American Voting and Elections

(3-0-3)

This course will examine voting and opinions, and the linkage between political leaders and the mass public. Possible topics include an introduction to electoral analysis; the history of recent electoral politics; the nature of political participation, especially the rationality of voting turnout and non-electoral specialization; party identification and opinions, attitudes, and ideology; social groups and cultural identities; mass media and image campaigns; and differences between presidential and congressional elections.

HESB 30482. On War

(3-0-3) Rosato

This course is about the causes and conduct of war. As regards causes, the focus is on evaluating the strengths and weaknesses of the most prominent explanations for the outbreak of major war, including balance of power, regime type (democracy/autocracy), civil/military relations, and the personality traits of individual leaders. As regards conduct, the emphasis is on considering the effect of broad political, social, and economic factors (nationalism, democratization, industrialization, military professionalization) on how wars are and have been fought. Particular historical emphasis is placed on the causes and conduct of great power wars (especially the two World Wars), although other wars will be discussed.

HESB 30484. Intermediate Economic Theory—Macroeconomics

(3-0-3)

An extensive examination of macroeconomics, with particular reference to the determination of economic growth, national income, employment, and general price level.

HESB 30486. Introduction to Political Economy

(3-0-3) Ruccio

The course is an introduction to the “other” side of economics: heterodox economics or political economy. Political economy perspectives include Marxian, post-Keynesian, radical, institutionalist, feminist, and other approaches. The course will also investigate the theoretical and social consequences of different approaches, and how policies and institutional changes that promote social justice and human dignity can be formulated in our current economic environment.

HESB 30487. Population Dynamics

(3-0-3) Williams

Demography, the science of population, is concerned with virtually everything that influences, or can be influenced by, population size, distribution, processes, structure, or characteristics. This course pays particular attention to the causes and consequences of population change. Changes in fertility, mortality, migration, technology, lifestyle, and culture have dramatically affected the United States and the other nations of the world. These changes have implications for a number of areas: hunger, the spread of illness and disease, environmental degradation, health services, household formation, the labor force, marriage and divorce, care for the elderly, birth control, poverty, urbanization, business marketing strategies, and political power. An understanding of these is important as business, government, and individuals attempt to deal with the demands of the changing population.

HESB 30488. The Internet and Society

(3-0-3) Rose

This course will spend the semester studying the impact the World Wide Web has had on several key areas of our society, including communications, commerce, marketing, productivity, education, collaboration, and our sense of community. Through a combination of discussion, group presentation, guest lectures, and out-of-class research, students will be exposed to some of the profound effects this medium has had on our culture. In spite of the bursting of the dot-com bubble, the Web has left all of the above mentioned areas substantially changed, many for the long term. The positive and negative forces brought on by this technology must be recognized, studied, and dealt with if we are to truly embrace the momentous opportunities brought about by the World Wide Web.

HESB 30489. Gender Roles and Violence

(3-0-3) Gunty

Much of the violence in contemporary society—whether it is domestic abuse, school shootings, gang warfare, video games, or inter-ethnic conflict—has something to do with gender. This course explores the connection between gender role socialization and the expression of conflict or aggression. Through readings, discussions, films, and projects, students will be encouraged to examine sex differences in violent behavior as the outcome of complex processes. We will try to understand those processes better and develop the ability to describe the causes and their effects.

HESB 30490. International Migration: Mexico and the United States II

(2-0-2) Bustamante

Designed to be either complementary to or independent of International Migration: Mexico and the U.S. I. Both correspond to relations between theory and methods for the scientific research on the subject. Each course stands by itself inasmuch as the distinction between theory and methods can be made. The common objective of the courses is to prepare students to design research projects on international migration with emphasis on immigration to the U.S. for theses and dissertations. Course II refers to a review of basic questions on this subject and the methods through which these questions have been adequately or inadequately answered. The numbers, the impact, the nature, the structure, the process, the human experience, will be discussed in terms of the research methods commonly used to approach them.

HESB 30492. Consumerism in Modern America, 1880s to Present
(3-0-3)

This course will explore the creation of contemporary consumer culture in the United States. Beginning in the late 1880s, the nature of buying, selling and consuming was fundamentally transformed in the United States. After a brief examination of the broader history of consumption, this course will explore the changes in production, marketing, retailing, and consumption from the Gilded Age to the present. Next it will trace the ways in which those changes have influenced broader cultural, institutional, and political developments throughout the twentieth century. A particular emphasis will be placed on the ways in which patterns of consumption helped define and redefine categories of race, class and gender.

HESB 30494. Religion and American Politics

(3-0-3)

Corequisite: HIST 32630

Since the early 1950s, religion has been an obviously major factor in American political life driven first by the African-American leaders of the Civil Rights Movement and then, in more recent decades, by the concerns of the Religious Right. Especially after the election of John F. Kennedy in 1960, Catholics have also been fully recognized participants in the nation's political uses of religion as well as in debates over whether and how religion should be used politically. This class tries to show that modern political-religious connections are but new instances of what has always gone on in the American past. The shape of contests over religion and politics may have changed considerably over time, but not the fact of dense connections between the two spheres. Readings for the course include primary and secondary accounts that treat notable incidents, problems, debates, and controversies from the colonial period to the present. Lectures spotlight major issues of historical interpretation, like religion and the Constitution, religion and antebellum debates over slavery, religion and Reconstruction, Catholic versus Protestant understandings of liberty, civil rights and the New Christian Right. Opportunities for student writing will feature responses to primary documents and historical interpretations.

HESB 30496. American Men, American Women

(3-0-3)

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, '50s television families, and '60s youth culture; and into recent shifts with women's rights, extreme sports, and talk shows.

HESB 30497. Culture and Society in the Great Depression

(3-0-3)

This course explores the culture and society of one of the most turbulent periods in American history. The economic collapse and ensuing national crisis altered the political, social, and symbolic landscape of the country. We will examine the historical context and social activism of this period (1929–1941), including the conditions and responses of those affected by various hardships. Also, we will be concerned with the cultural expression and representation of Depression America. How was the crisis confronted? What ways of seeing and understanding the events, and the people who lived through them, provided value, merit, and worth? In what ways did social positions and cultural values clash? In order to answer these and related questions, we will study the role and importance of documentary expression (letters, photographs, reportage), the art of urban social realism, literature, and film.

HESB 30498. The Politics of Educational Policy

(3-0-3)

This course will provide an overview of the major political processes, structures and issues in education. We will analyze the nature of policymaking in education and discuss the roles of the various participants in the decision-making process. In addition, we will critically analyze the language of educational policies and the impact that these policies have on various stakeholders. Finally, we will examine the roles that legislation and courts have in shaping education policy.

HESB 30499. Public Opinion and Political Behavior

(3-0-3) Davis

A principal tenet underlying democratic governance is the belief that public opinion or the "will of the people" should dictate governmental behavior. To the extent this belief is a realistic consideration, difficult questions remain concerning the capacity for citizens to develop reasoned opinions and how to conceptualize and measure opinion. This course explores the foundations of political and social attitudes and the methodology used to observe what people think about politics.

HESB 30500. War and the Nation-State

(3-0-3)

This course will examine the phenomenon of war in its broader political, social, and economic context since the emergence of the modern nation-state. The general themes of the course include the impact of nationalism, democratization, industrialization, military professionalization, the nuclear revolution, and the information and communication revolution on the development of warfare and the state. Particular historical emphasis will be placed on exploring the causes and conduct of World War I and World War II.

HESB 30501. Witnessing the Sixties

(3-0-3) Giamo

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the sixties, on the one hand, and on the other to explore the various journalistic and aesthetic representations of events, movements, and transformations. We will focus on the manner in which each writer or artist witnessed the sixties and explore fresh styles of writing and cultural expression, such as the new journalism popularized by Tom Wolfe and the music/lyrics performed by Bob Dylan. Major topics for consideration include the counterculture and the movement—a combination of civil rights and anti-war protest.

HESB 30502. Critical Issues in U.S. History

(3-0-3)

The purpose of this course is two-fold: to provide the students with a college-level survey of American history from the founding of the colonies through the 1980s, and to examine in some detail fourteen critical issues in our history: cultural diversity in the American colonies, the American Revolution, the Constitution, the Federalist contributions of George Washington and John Marshall, Jeffersonian and Jacksonian democracy, slavery and ante-bellum reform, the Civil War and Reconstruction, the industrial revolution, agricultural discontent, Progressivism, the Wall Street Crash and Great depression, Franklin Roosevelt's New Deal, World War II and the Cold War, and Civil Rights, Vietnam, and reform.

HESB 30503. Global Sociology

(3-0-3)

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline as one that seeks to understand human society as a nested collection of interdependent societies. In particular, the course draws from world systems theory and institutional approaches—as well as from related disciplines such as anthropology—to consider how the “development project” of the 20th century evolved over time. The impacts of global economic integration on cultural and institutional change, inequality, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how the World Bank, IMF, and United Nations are impacting the experiences of people around the world as well as for those who expect to do further research in the field.

HESB 30505. Multicultural Education in the New Millennium: The Sociopolitical Context

(3-0-3)

The success or failure of students in school has been the subject of much research and debate, particularly for students whose racial, ethnic, linguistic, or social class backgrounds differ from that of the dominant group. This course will focus on both the individual experiences (psychological responses), and how societal and educational structures, policies, and practices affect student learning. Students will explore ways that teachers, individually and collectively, can provide high quality education in spite of obstacles that may get in the way. Multicultural education will be placed within a broad sociopolitical context considering education, politics, society, and economics.

HESB 30506. Sociology of Terrorism

(3-0-3)

The purpose of this course is to provide a broad review of terrorism with a focus on sociological approaches such as social movements theory, network analysis, and ideology. The course will examine profiles of terrorists within a historical and social psychological perspective. Specifically, we will focus on the purpose and difference of terrorists and terrorist groups and frame our discussion around historical factors that continue to influence modern terrorism. Finally, we will discuss the consequences of terrorism in terms of social responses to terrorism, the economic and political costs of these responses, and the possibility of preventing terrorism in the future.

HESB 30508. Black Chicago Politics

(3-0-3) Pinderhughes

This course introduces students to the vast, complex and exciting dimensions of black Chicago politics. First, institutional structures, geographic distribution and population characteristics will inform students about the sociodemographic background of the African-American population in the city. Second, the course explores varying types of political expression that have developed over more than a century, including electoral politics, mass movements, partisan politics; it will also examine the impact of the Chicago machine, and of the Washington era on the political and economic status of African Americans in the city. Third, public policy developments in housing, education and criminal justice will be discussed. Fourth, the course also compares black political standing with other racial and ethnic groups in the city. Finally, the course will introduce students to the long tradition of social science research centered on the city of Chicago.

HESB 30509. Men, Women and Work

(3-0-3) White

From the current fixation on TV “housewives” to political battles over workers’ rights, ideas about gender and work surround us. This course focuses on work as a framework for understanding American culture. The gender division of labor has never been static, and we will examine the process whereby the same jobs get characterized at different times as masculine or feminine, just as work categories were alternately identified as appropriate to whites versus non-white, free versus enslaved, and paid versus “stay-at-home.” This course has a strong “learning

beyond the classroom” component. There will be opportunities throughout the semester for experiential and community-based learning experiences, for example through activities at the Center for the Homeless and interactions with pioneer sportswomen.

HESB 30510. Mixed Race America

(3-0-3)

Despite popular images of American as a “melting” both of races and ethnicities, our institutions, values, and practices have often tried to create or maintain spatial and social distance between groups defined as racially different. This course will explore that ways in which Americans have transgressed those boundaries or found other ways of interacting across cultural lines, primarily in the 19th and 20th centuries. We will examine popular cultural perceptions of people of mixed ancestry, their social experiences, the development of various mixed-ancestry communities, and historical attempts to limit interracial socializing, relationships, and marriage. These issues were and are deeply imbedded in debates over the meaning of race, gender expectations and ideas about sex and sexuality. We will also pay close attention to how minority communities have understood people of mixed ancestry in the United States, and how mixed-race identities intersect with African-American, Native-American, Asian, White, and Latino identities.

HESB 30511. The City in American Culture

(3-0-3)

Jane Jacobs wrote in *The Death and Life of Great American Cities* that all cities are governed by a marvelous and complex order. This order, she said, is composed of movement and change, and though it is life, not art, we may call it the form of the city, and liken it to the dance. This course looks closely at the origins and continuation of that dance as it analyzes some of the forces which have shaped and continue to shape America’s cities and their surrounding metropolitan areas. The course will center on a number of literary and nonliterary texts and be guided by a series of questions such as: Does urbanization thrive on a culture of poverty? Are twentieth-century gated communities a continuation of the brownstone mansion? Does the American Dream require vivid urban poverty? Is there such a thing as enough? Who lives in cities today? How are societal changes and the goals of urban development rewriting the role of cities? How has gentrification and evolving patterns of metropolitanism/cosmopolitanism effected the modern city and its composite neighborhoods. Why and how do cities compete for target communities such as arts, gay/lesbian, minority, young, urban and professional? The course will have a written, research, and a practical/experiential component.

HESB 30512. Foundations of Sociological Theory

(3-0-3) Lizardo

Sociological theory is the foundation of sociology. Students in this course will learn two things: first, what theorists do and why and, second, how to use fundamental theoretic concepts—such as exploitation and alienation, social structure and solidarity, bureaucracy and charisma—to analyze and explain contemporary society.

HESB 30513. The United States in the 1960s

(3-0-3)

Five periods in American history have been as controversial as the 1960s. Sometimes called the “Long Sixties,” it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the U.S., the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a combination of readings, videos, mini-lectures, and class discussions. Toward the second, they will be exposed to four different approaches: (1) discussing primary documents and writing a paper on some of them; (2) studying three small-scale

case studies; (3) examining the large-scale phenomenon of protest; and (4) reading the memoirs of a Cabinet member, hence gaining an insider's view of the life and activities in the White House.

HESB 30514. Anthropology of Race

(3-0-3)

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle what race is and what it is not from an anthropological perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

HESB 30515. Immigration in Comparative Perspective

(3-0-3)

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How is immigration related to urban "immigrant riots"? And what can anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the U.S., Europe, Australia, and Japan will enable us to appreciate both global and U.S. distinctive trends. Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class, the mass-media, border enforcement, racism, the economy, territory and identity formation, and religion.

HESB 30516. European Cultures and Societies

(3-0-3) Albahari

This course offers an ethnographically grounded understanding of contemporary European cultures and societies. We start by presenting a brief history of the idea of Europe. Then, we define its geographical focus: Where are the boundaries of Europe? Are Israel and Turkey part of Europe? Who gets to decide? Are there European Muslims? We will then read recent works focusing on selected regions and on diverse urban populations. We will explore and discuss socio-cultural facets of European everyday life; trends and challenges in technology, the environment, popular culture, demography, and politics; and the diversity of urban/rural, north/south, and more generally intra-European ways of life. The course will be of interest to students of contemporary global issues, and in particular to students who intend to spend a semester in Europe, are back from the field, or intend to write a related senior thesis.

HESB 30517. Education Innovations in Diverse Contexts of Poverty

(3-0-3)

This course will look at innovative educational interventions for socio-economically disadvantaged children in diverse contexts—both here in the United States, and internationally. Whether it is the Comer model in New Haven CT, or Diversity Project in Berkeley CA, or EDUCO schools in Nicaragua, or Pratham's community-based supplementary education programs for slum children in India; the course will explore in-depth promising education interventions for children and adolescents growing up in poverty in a globalized world. The course will aim to make students aware of the ways in which educators in diverse contexts of poverty and inequality have conceptualized and implemented empowering alternatives. In doing so, the course will help students better understand what is possible in contexts of poverty, and indeed the limits of the possible devoid any structural change in society.

HESB 30518. Environmental Politics

(3-0-3) Doppke

The first half of the course provides an overview of major American environmental policies such as regulating land use and preservation, water, air, and endangered species. The second half of the course deals more directly with issues of policy formulation, implementation and enforcement.

HESB 30519. Church and State in American Constitutional Law and Politics

(3-0-3)

This course analyzes different approaches to understanding the separation of church and state, and examines how these approaches have played out in political practice and Supreme Court decisions.

HESB 30520. Judicial Politics

(3-0-3)

This course examines the effect of the legal system on American politics, government and society. We begin by reviewing the institutions, actors and processes of the legal system, focusing on the institutional and individual influences on judicial decision-making. In the second part of the semester, we will closely analyze the political consequences of legal decisions in areas such as criminal law, race and education—including desegregation, school finance and school choice—abortion, the death penalty and homosexual rights. We conclude by evaluating the extent to which courts can or should be expected to bring about social and political change.

HESB 30521. The Political Economy of Authoritarian Rule

(3-0-3)

This course examines the economic conditions that give rise to authoritarian rule, as well as the economic politics that result from it and support it.

HESB 30522. Environmental Sociology

(3-0-3)

This course will explore the relationship between human societies and the larger natural environment of which they are a part. The main focus of the course will be modern society, but we will also review the history of resource use, pollution, wilderness preservation, environmental movements, and other environmental developments. This course is mainly oriented towards a theoretical perspective and will cover different schools of thought to help students understand the ecological world that surrounds them. The course will be divided into four parts (the moral, the material, the ideal, and the practical).

HESB 30523. Time and Society

(3-0-3)

Ever felt rushed to finish an assignment? A hit song of 1966 urged people to "slow down, you move too fast", but since then the pace of life in America, where "time is money", has accelerated and vacations are shorter. However, in many societies efficiency is disdained, life moves to the rhythms of nature, not the "DayTimer", and people seem to have all the time in the world. In short, attitudes towards and ways of dealing with time deeply shape people's lives, and societies' attitudes towards and ways of dealing with time vary greatly. "Social time" is the subject of this course, whose major topics include: how societies track time and use it to regulate and coordinate their members' collective lives at work and play, at home and in public, in everyday life and on special occasions; how "ecological time" based on the sun and moon, stars and seasons, differs from contemporary America's technologically-based "clock time"; how and why the pace of life varies between societies; how the timing of life-cycles varies between societies, for example, in the age at which individuals become adults, old enough to marry and have children—or drink alcohol.

HESB 30524. Sociology of Law

(3-0-3)

This course examines the central issues and debates in the sociology of law. Lectures and discussions will cover a diverse range of topics drawing from a wide range of legal settings. The goal of the course is to survey the distinct ways in which sociologists view and study the law and legal institutions.

HESB 30525. Gender and Society

(3-0-3)

This course is an introduction to the study of gender and society. We will study how gender is constructed through social interaction and how it is patterned in a wide gamut of structural locations, such as the following: education, media, family, the field of medicine, and business and the economy. Major themes in this course include the social construction of gender, how people “do” gender, and patriarchy and the perpetuation of gender inequality in our society. After exploring the core characteristics of patriarchy and its power as a social system, the final project in this course will work toward solutions to gender inequality.

HESB 30526. Business, Economics and Culture

(3-0-3)

Economic, political and cultural interactions between geographically distant groups have been intensifying over the past century and the 21st century is being seen as the Global century. In this rapidly changing world, it is becoming increasingly important to understand the role of cultural (religious, ethnic and political/socio-economic) factors in determining and shaping interactions. In this course, we will use an ethnographic focused approach to explore the impact of cultural variations on many issues that have arisen or will potentially arise in the course of contemporary global economic interactions. These include the relationships between reciprocity, redistribution and market behaviors, cultural differences in business strategies, relationship building and formation of partnerships, marketing techniques, consumer behavior, and political and environmental situations. We will also look at the impact of business interaction on regional and local economies in Asia (India), Africa (Kenya and the Sudan) and Latin America (Mexico and Guatemala). Course work will include discussions based on readings, documentaries, an individual ethnographic project and report, and a final paper on the application of cultural factors for global interactions.

HESB 30527. Foundations of Political Anthropology

(3-0-3)

This course is a survey of the anthropological study of politics. This advanced course will be of interest to students with some background in anthropology or in political science or political theory. We draw on theoretical, ethnographic, and archaeological readings to examine the kinds of political systems that have existed in human history, the transnational politics of the present, and the possible politics of the human future.

HESB 30528. Law and Religion in U.S. History

(3-0-3)

This course explores the interconnections between religion and the law as they evolved over the course of the past three centuries of American history.

HESB 30529. The Politics of Poverty and Social Welfare

(3-0-3)

The United States is the wealthiest nation in the world, yet poverty remains a persistent concern. In this course, we will study the sources of poverty and economic inequality and what has and can be done to address the problem. We begin by discussing different theories on to what extent citizens' income and wealth should be equal in a society and the government's prescribed role, if any, in the process. We then trace the history of poverty in the United States and various government efforts to address the problem through social welfare programs. Finally, we will closely study the different forms poverty takes on today and enter the ongoing debate over what public policies should be implemented in response. Throughout the course, we will pay particular attention to the decidedly political dimension of poverty in America.

HESB 30530. Economics of the Law

(3-0-3)

This course will introduce students to the economic analysis of our legal framework pertaining to property, contract and tort law. Additional topics will include an examination of the legal process and the relationship between crime and punishment.

HESB 30531. African American Politics: The End or a New Beginning?

(3-0-3)

This course explores the core elements associated with black politics in the U.S.: the role of black institutions such as the black church, the importance of the civil rights movement in challenging barriers to black political participation, the mid-20th-century legal framework created to open access to the political system, and the development of black political participation in northern cities. Competition for leadership roles and public resources from the increasing numbers of Latinos, Asians and other immigrants will also be addressed. Since the course will be taught in spring 2010 at the beginning of the second year of the Obama administration, we will also have the chance to explore the impact of the first black president on national politics, and to consider the impact of the president and his administration on African-American politics itself. The course incorporates political science concepts, but the readings and other materials are accessible to students from a variety of disciplines and levels of knowledge.

HESB 30532. Patriotism and Cosmopolitanism

(3-0-3)

This course will explore the perennial conflict between the cosmopolis and the patria; between adherence to a universal morality and loyalty to one's native country. Because of our common humanity we are called to be “citizens of the world” and what does such citizenship entail? Is it possible to be both a citizen of the world and a citizen of a particular country? What are the sources of these various loyalties? What are the potential areas of conflict between the two? Are there limits to the loyalty of the patriot, and, if so, what form do these limits take? We will examine various manifestations of this conflict from the history of political thought. Readings will include selections from Plato, Aristotle, Cicero, the Stoics, Kant, Lincoln, and Chesterton as well as some contemporary approaches to both patriotism and cosmopolitanism.

HESB 30533. Education and Social Entrepreneurship

(3-0-3)

Constituted in three parts, this course will explore the interplay of education and social entrepreneurship. Part 1 of the course will focus on social entrepreneurs active in the field of education and youth development. Part 2 will study entrepreneurial school leaders, particularly those in public, charter and Catholic schools serving high needs students. This part will introduce course participants to the contemporary debates in the education leadership literature. Finally, Part 3 will focus on teaching and learning of entrepreneurship for school age adolescents and youth, and will be informed by research in youth entrepreneurship and entrepreneurship education programs at school levels. Offered as an ESS Elective, this course will feature guest lecturers from Mendoza College of Business.

HESB 30534. Abraham Lincoln's America, 1809–1865

(3-0-3)

This course will use the life of the republic's most celebrated president as a window to explore the transformations and continuities in American politics, cultures, economics, ideologies, and social life during the half-century ending in the cataclysmic Civil War. Using Lincoln's own experiences as a starting point—his poor upbringing, his family's frequent moves across the sectional borderlands, his self-motivation and professional ambition, his embrace of mass politics, and his rapid ascent to national leadership during the republic's greatest crisis—students will explore much more than the sectional struggle and the fight to save the Union from secession. Important topics will include the evolving struggles over the meanings of race, freedom, and slavery; the increasing commercialization of the economy and the forging of new class relationships and identities; migration, property-holding, and relations with Native Americans in the rural and small-town west; changing realities and conceptions of gender, family, childhood, and parental authority; the changing role of local and national governments and the rise of political parties and mass political participation; and the heated contests over nativity, religion, and citizenship. In short, Lincoln's personal experiences will be the entry into understanding American society as a whole during his life

(1809–1865), and students will ponder the usefulness of biography to the larger historical project as well as the importance of memory and myth in the ways we repeatedly reconstruct the past.

HESB 30535. Religion and Schooling in American Society

(3-0-3)

Does religion help children do well in school? Focused on primary and secondary schooling in the United States, this course investigates several academic and policy questions on the relationship between religion and schooling: How does religion affect academic outcomes for children? How do contemporary religious Americans view public schools, and how does religion shape Americans' views on curricular and other school policy issues? What is the role of religion in the schooling choices of families in the U.S.? Do Catholic or other religious schools improve academic outcomes for children? Why or why not? Through lectures, discussion of key works, and a research paper, the course advances theory and evidence regarding the relationship of religion and academic achievement, the role of religion in politics of education, and the relationship of religion and democratic education.

HESB 30536. Domestic Sources of U.S. Foreign Policy

(3-0-3)

This course covers the main developments in American foreign affairs from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the U.S. became involved in two world wars. This is a lecture and discussion course. Attendance at both is required. Six paperback books will be assigned. There will be short papers on assigned reading, an eight-page paper, and mid-semester and final examinations. Each student must make an oral presentation in one of the discussion sections.

HESB 30537. International Law

(3-0-3)

This is an undergraduate survey course in international law designed for social (political) sciences majors. Hence it differs significantly from typical graduate international law courses that tend to focus on norms, procedures, and institutions, with little regard to wider international and domestic politico-legal contexts. This course, by contrast, offers an introduction to IL from an interdisciplinary perspective. Specifically, it seeks to build on some of the fundamental courses offered in the first two years of undergraduate studies: international relations, political theory, U.S. foreign policy, American politics, and U.S. constitutional law. The case studies concern primarily the United States. The goal is to make the study of IL relevant for undergraduate students and to integrate it into their curriculum. The detailed study of international law as such (norms and procedures) deliberately is left to law school.

HESB 30538. International Political Economy

(3-0-3) Dutt

This course examines the interaction of politics and economics in the international arena. We begin with a brief historical exploration of the international political economy, and introduce four analytical perspectives on state behavior and international outcomes. Topics include trade policy, foreign direct investment and multinational corporations, international capital flows, exchange rate regimes and currency unions (including European Monetary Union), financial crises, and the fight against money laundering and terrorist financing.

HESB 30539. Civil Rights and Protest Movements

(3-0-3)

This course will look at protest movements for civil rights and other related issues, focusing on the 20th century, especially the second half. One central theme will be the African American civil rights movement of the 1950s and 1960s. How did race, gender, class, religion, and region impact the strategies, goals, and reception of various threads of black struggles for full citizenship? In addition, we will explore previous and later generations of African-American activism, as well as other protest movements in the post WWII period. How did the civil rights movement that emerged in the 1950s draw on early 20th century activism and leadership? What directions did African-American protest movements take after

the late 1960s? How did other civil rights, racial and ethnic consciousness, and social reform movements in the 1960s, '70s, and '80s develop from their own historical experiences and in relationship to other protest movements?

HESB 30540. Reforming America in the Long 19th Century (1776–1919)

(3-0-3)

With the recent 2008 presidential election there is a lot of excitement about the possibility of change and reform in our country. This class will provide perspective on our present historical moment by examining American reform movements of the past. It will focus on “the long nineteenth century” from the American Revolution to World War I. During this time optimistic Americans of various stripes set out to reform all sorts of things: religion, sex, eating and drinking, race and gender relations, education, and working and living conditions, to name just a few. As we look at these reform movements, we will ask the questions: What drove certain people to buck convention and seek reform? Why did they choose to focus on these particular reforms at these times? What did they believe would be the ultimate significance of the changes they were seeking? Why were some movements more successful than others?

HESB 30541. Courts and Politics Around the World

(3-3-3)

This course carries out a comparative study of the nature of courts and law, their position in political systems, and their potential impact on society. The course is very theoretical, and organized around key themes rather than countries. The main themes of the course include the following: why politicians create powerful courts, how do judges and courts make decisions, what is judicial independence, how do we get it, and which systems have it, and how effective are courts as tools for political and social change. The court has a heavy emphasis on judicial design, and the class will design a court structure for an imaginary country.

HESB 30542. Globalization

(3-3-3)

This course will examine the movement of money, goods, information, and cultural norms that are collectively known today as “globalization.” We will consider the pros and cons of the roles played by the institutions that enforce growing financial and trade integration and the international promotion by governments and transnational activists of democracy and human rights. It will also highlight the cultural reactions to globalization, including the resurgence of nationalism, ethnic identities and religious fundamentalism. Special emphasis will be placed on contrasting the approach of the U.S. and other advanced industrial and developing countries.

HESB 30543. American Political Life

(3-0-3) Schmuhl

An introductory and interdisciplinary examination of American political culture, particularly contemporary political thought and behavior. Although we will trace the development of our political culture from the nation's beginning to the present, a principal concern of the class will be the involvement of the mass media in recent political history. In short, we will attempt to come to terms with questions about the role and influence of mass communications in modern politics.

HESB 30544. People, Environment, Justice

(3-0-3)

What is our environment? What is our role within our surroundings? How do our actions affect ecological landscapes, and people's livelihoods, across the globe? How does our reliance of fossil fuels lead to catastrophes such as Hurricane Katrina? What—if anything—does it mean to be “green”? This course will address these and other questions through the use of critically applied anthropology. We will explore the interaction of local peoples and cultures with natural and man-made ecosystems. We will focus equally on traditional environmental knowledge held by small-scale communities as on the usage of the environment by the industrial world. This course will focus on theory and major environmental questions, problems, and possible solutions illustrated by various case studies from different parts of the world. Topics to be discussed include: intellectual property rights,

poverty and environmental health and justice, economic development, health and emerging disease, and ethno- and eco-tourism. Through readings, films, discussions, and independent research students will be able to critically understand the complexity surrounding humans' place within the environment.

HESB 30545. Capital Crimes

(3-0-3) Meissner

At a meeting in 2003 R. Allen Stanford, accused multibillion-dollar Ponzi embezzler and president of Stanford International Bank, is said to have taken a "blood-oath" with the chief regulator of his Antiguan bank. When news of this oath broke in the fall of 2009 Stanford joined Bernard Madoff in the league of the most undignified "gentleman" in American culture. Like Madoff, Stanford had committed a capital crime—which robbed many and riveted the nation's attention. Like Stanford and many another capital criminals (Al Capone comes to mind), until his arrest Madoff enjoyed the welcome of society's elite and was generally regarded as a celebrity. This course is thus about American culture's love affair with money. The course begins with Mark Twain's blistering satire *The Gilded Age* and moves through the current economic crises, which some critics like Paul Krugman and Kevin Phillips have referred to as coming at the tail end of America's second Gilded Age. Twain's satire was aptly called "A Tale of Today." In looking over the time between the two Gilded Ages, this course will try to construct a coherent account of the uneasy relationship between the period's major literary figures and its political and mercantile elite. We'll see if and how writers and artists who set themselves up as the voices of culture often share much in common with political and business leaders—both a Ponzi scheme and a political campaign are after all "fictions in progress" which require an audience and a fairly complete willing suspension of disbelief. In looking over material drawn from literature, film, television, news media, politics, and academia we'll try to measure the personal and cultural benefits and consequences associated with American culture's embrace of money, its hagiographic celebration of the CEO, its adoration of celebrity culture, and its elevation of the market as an idol.

HESB 30546. Representations of Urban Life

(3-0-3)

This course will begin with a children's tale from the 1880s, *Five Little Peppers and How They Grew*, and examine how urban life has been depicted in American literature and culture. The course will trace the experiences of Mrs. Pepper and her five children as they move from life in a rural New England clap-board house to an urban Brownstone mansion in New York City through to Charles Bukowski's modern San Francisco rooming house madrigals and the down-and-out wanderings of his poet/barfly Henry Chinaski. Along the way we will ask a series of questions such as the following: Does urbanization thrive on a culture of poverty? Are today's gated communities a continuation of the brownstone mansion? Why do neighbors gentrify? Does the American Dream require vivid urban poverty? How has the global and American economic collapse, credit crisis, and mortgage meltdown changed our perception of slums, little brown houses, and brownstone mansions. Is there such a thing as "enough"?

HESB 30547. Latinos in Chicagoland

(3-0-3)

Latinos have long contributed to the social fabric of the region popularly known as "Chicagoland," which includes Northwestern and North Central Indiana. From food to sports to politics to the arts, Latinos have shaped and reshaped the local culture and formed vibrant communities. However, Midwestern Latinos have been marginalized by both local/regional approaches to history and by the field of Latino studies, which tends to focus on the east and west coasts and the U.S. Southwest. This interdisciplinary course will explore Latino communities from Chicago to South Bend to better understand how these communities fit into the broader Latino experience but remain uniquely Midwestern. Some of the questions that we will ask include: Why did Latinos settle in Chicagoland and Northern Indiana? Why do new migrants keep coming? How has gentrification affected urban Latino communities? How are individuals and organizations working to improve the lives of migrant workers in rural areas? How do Latinos contribute to the Chicago arts scene? The course will include several site visits to

community organizations and cultural institutions throughout the region and will require students to collect an oral history from a member of one of the communities encountered in class.

HESB 30548. Race Relations and Ethnic Conflict in the U.S.

(3-0-3)

The course examines the causes and consequences of racial and ethnic conflict. We will address questions such as the following: How do race and ethnicity become meaningful to social actors? What factors contribute to inter-group conflict? What are the origins and consequences of inter-group inequalities? How are racial and ethnic identities related to social class? How are racial and ethnic identities related to politics? How can a racial or ethnic group overcome a subordinate status? In addition to engaging relevant literature, students will devote significant time to developing original research questions which could, with further development, result in published articles. (May not be taken if a student has already taken SOC 43838 because of course content overlap.)

HESB 30549. U.S. Civil Rights History: Chicanos

(3-0-3) Rodriguez

Corequisite: HIST 32753

The Chicano Movement for Mexican-American civil rights grew in tandem with the main contours of the civil rights culture that developed in the United States during the 1960s. As such, this course seeks to place the movement alongside other national movements for social change including the African-American civil rights movement, labor movement, counter-culture, and the anti-war movement. It will also be attentive to related efforts to build bridges between Latino populations (mainly Puerto Ricans) in American cities. As it emerged in the 1960s, the Chicano Movement challenged and maintained the ideological orientation of past efforts for Mexican-American inclusion as it borrowed from the rich mix of social and cultural movements that defined the 1960s and early 1970s. This course will explore movement centers in California and Texas as well as a growing body of research on the civil and labor rights efforts in the Great Lakes, Pacific Northwest, and other Mexican ancestry communities across the United States as well as connections to Mexico and Cuba. This course will detail the key events and leadership of the movement as well as the art, music, and cultural production of one of the most important American civil rights movements of the post World War II era.

HESB 30550. History of Science and Race

(3-0-3)

The relationship between science and race has been going on a long time and is only getting more confusing. Science has been used in support of racial categorization; science has been used to tear down notions of race-based categories. Biology and anthropology specifically have been used to both support and refute racism. In this class, we will examine the diverse interactions between science and race from the 18th century to the present era of human genomics. We will look both at the scientific study of race and the impact of racial concepts on science, interactions that have given us Nazi medicine, eugenics, the Tuskegee airmen experiments, and modern day pharmaceutical trials in Africa. Throughout, we'll be looking at the personal stories of scientists from minority ethnic groups and questioning the racial demographics of science in the 20th and 21st centuries.

HESB 30551. Racialization in the U.S. and Brazilian History

(3-0-3)

This course will consider the processes that have caused aspects of society to be racialized, or labeled with racial meanings, symbolisms, and/or identities. The class will focus on, but will not be limited to, black racialization. We will examine how racialization has shaped the human experience in the largest ex-slaveholding nations of the Americas—the United States and Brazil. Our goal is to understand the ways in which not only people are racialized, but also communities, geographical regions, nations, cultural production (such as music), behavior, labor, and gender, to name a few. With these two nations as our case studies, the class will explore the dynamic nature of racialization, focusing on the impact that space and time has had on the way we identify and live race.

HESB 30552. Food and Agriculture Policy

(3-0-3)

This course examines political and economic origins of, and consumer consequences of, four main areas: the farm bill and commodity programs, the regulation of ag biotechnology, food safety, and global trade in foodstuffs. This is a discussion-centered course with a significant portion of the grade coming from a group project presentation.

HESB 30553. Reinventing Government

(3-0-3)

Since World War II, many presidential candidates have campaigned on promises to make government more efficient, delivering services to individuals more cheaply, faster, and with fewer errors. We will explore the attempts made to reinvent the federal bureaucracy since the advent of the spoils system with Andrew Jackson's presidential victory in 1828. We will examine the regulatory challenges presented to the federal government by the Industrial Revolution and how the federal government responded. Finally, we will examine critically the presidential initiatives of the last quarter century to improve the national bureaucracy. This class will provide the student with the tools to understand the challenges of public administration, measure the effectiveness of various improvement initiatives, and diagnose potential maladies within the current system.

HESB 30554. Party Polarization in American Politics

(3-0-3)

This course examines questions concerning party polarization in American politics. Is party polarization increasing? Does the concept of "culture wars" explain party polarization? What are the causes of party polarization in government and the electorate?

HESB 30555. Public Policy and Administration in the United States

(3-0-3) Arnold

This course examines recent developments in public policy and administration in American politics.

HESB 30556. American Labor Force

(3-0-3)

This course uses the tools of economics to understand the major forces shaping the American labor force, in both the past and the present. Examples of course topics include: the major waves of European migration to the U.S., including waves of Irish immigration; the development and rise of the high school in America; important trends in educational attainment particularly of women and minorities; the economic effects of Civil Rights legislation; and the English-language-only debate. This course is closely related to Econ 33480 (Migration, Education and Assimilation) but does not require a research paper. Prerequisites: Principles of Microeconomics. Concurrent enrollment in or completion of a statistics course, Econometrics, or Intermediate Microeconomics is helpful but not required.

HESB 30557. American Religious History

(3-0-3)

This course will examine religion in American life from the encounter between Europeans and Native Americans in the sixteenth century to the present. We will explore the ways in which religion has shaped American society, culture, and politics, and in turn how the U.S. setting has shaped religious expression. Themes will include the rise of religious diversity and ideas of religious freedom; the interactions between the American religious "mainstream" and minority religious traditions; the relationship between religion in the U.S. and its international setting; and the diversity and persistence of religion in American culture.

HESB 30558. American Public Opinion and Voting Behavior

(3-0-3) Layman

A central tenet of democracy is that citizens exert some degree of control over the actions of government, a requirement that places responsibilities on both government office holders and citizens. In this course, we will focus on whether American citizens live up to their end of the democratic bargain both in the depth

and breadth of their political opinions and in the quantity and quality of their participation in American elections. We will assess the degree to which citizens hold real opinions on political issues and how those opinions are formed, the extent to which they turn out to vote in elections and the factors determining voter turnout, the nature of voting behavior in various types of elections, the characteristics of the parties' electoral coalitions, and long-term changes in those coalitions.

HESB 30559. Constitutional Rights

(3-0-3)

This course will consist of an examination of how our rights are defined, protected, and limited by the judiciary under the Bill of Rights and Fourteenth Amendment of the Constitution. Our primary method of study will be to read, analyze, and debate landmark Supreme Court opinions.

HESB 30560. Confronting Homelessness in American Culture and Society

(3-0-3)

The course will examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw upon insights from history, literature, documentary film and photography, and the social sciences. We will focus on the degree of permanence and change in our approach to both traditional and modern forms of the social problem.

HESB 30561. Political Economy of Globalization

(3-0-3)

This course examines the intersection of politics and economics in an increasingly global world. Economic interdependence has increased dramatically over the past fifty years. While this has raised living standards in many countries, it has also given rise to new social, economic, and political tensions. This course offers an analytical framework for evaluating the consequences of globalization and provides an overview of several theoretical approaches to and empirical issues in today's global economy. The course is divided into three main sections. The first part of the course focuses on understanding what is meant by globalization as well as an introduction to several contending theories of globalization. The second part of the course will focus on managing globalization, and will evaluate different options available to states, institutions, and other actors. The final section of the class will be devoted to empirical issues associated with globalization. Topics discussed include: the environment, corruption, human rights, non-governmental organizations, democratization, and regional trading blocs.

HESB 30562. Sociology of War and Terror

(3-0-3) Faeges

This course offers a broad introduction to the sociology of wars, terror, and communal violence, including their causes, conduct, and consequences. We will consider the basic social forces which impel people to kill and to risk death in the name of their societies, including the relationship of violence to "human nature." We will survey the manifold characteristics of societies that contribute to and are affected by war and terror: politics; economics; religion; culture; demographics; the environment; gender; race, ethnicity, and nationalism; social movements; and social psychology. We will survey the scope of war and terror throughout social history and pre-history, but will give special attention to the security dilemmas confronting American society. And we will consider alternatives to war and terror and the prospects for transcending the communal violence that has been so much a part of social life for millennia. The format of the course combines lectures, presentations, and discussions. We will draw on both written and visual materials of several kinds. Grades will be based on examinations, brief written work, and participation. (This course requires no background in sociology. It is open to students in any major who are concerned about the occurrence of armed conflict in social life. This course can be counted as a sociology elective.)

HESB 30563. Latinos in the Midterm Elections

(3-0-3)

Participation among Latino voters surged in the 2008 presidential election. In 2010, the Latino electorate is poised to play an important role in several key states

with hotly contested statewide elections. This increased awareness of the role of Latinos is evident by increased efforts of both major parties since the 2000 presidential election. Despite their augmented presence, many misconceptions plague national understanding of this diverse population. This course will cover a broad range of issues to draw connections between the Latino community and American political systems and institutions. Questions that arise are: What difference does it make to be Latino, and are there Latino-specific issues and concerns? How does the political system view and treat Latinos? To what extent do Latinos participate in politics and mobilize to advance their political interests? These questions will help us highlight the role of Latinos nationally and locally in the 2010 midterm elections.

HESB 30564. Global Sociology

(3-0-3) Smith

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline as one that seeks to understand human society as a nested collection of interdependent societies. In particular, the course draws from world systems theory and institutional approaches as well as from related disciplines such as anthropology—to consider how the “development project” of the 20th century evolved over time. The impacts of global economic integration on cultural and institutional change, inequality, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how the World Bank, IMF, and United Nations are impacting the experiences of people around the world as well as for those who expect to do further research in the field.

HESB 30565. Education and Development in a Global Era

(3-0-3) Chattopadhyay

Forces of globalization are profoundly changing the experiences and opportunity structures of young people in an increasingly interconnected world. While there is a growing recognition that the knowledge-based global economy requires a new paradigm for education in the 21st century, a significant segment of the world’s largest generation of adolescents remains vulnerable, disengaged and disenfranchised from education. Against this backdrop, this course will explore the critical issues confronting education in developing countries in different regions of the world. The course has a strong applied focus and the readings will be drawn primarily from policy documents on current topics in international educational development. At the same time, the underlying theoretical and conceptual issues will be accessible to students through supplementary research articles and critical commentaries. Learning objectives: Students taking this course will: 1) gain a critical understanding of the broader global development context in which educational policy takes shape in low-income countries, 2) develop operational fluency in key contemporary policy issues and institutional actors in international educational development; and 3) enhance their awareness of an educational development framework that is informed by the dynamic interdependencies of the global and the local.

HESB 30566. The American South: Race and Representations

(3-0-3) Carico

This course will trace a long historical arc in considering depictions of the United States South and of the peoples who have lived there. Though we’ll dip into the eighteenth century, the course will be roughly divided between the nineteenth and twentieth centuries. And while we’ll spend most of our time analyzing the relations of blacks and whites, during slavery and after, we’ll also consider the experiences of Native Americans, Asians, and Latinos. What role has the South, as a place both real and imagined, played in the cultural history of the United States? And—as a region almost entirely set apart—how has the South figured in the creation of national identity? To what extent has it been used to contain, and even quarantine, the nation’s racial problems? We’ll dwell on these questions, and others, as we engage with novels, slave narratives, paintings, and films.

HESB 30568. Education Law and Policy

(3-0-3) Schoenig

This course focuses on selected legal and policy issues related to K–12 education in the United States. A central theme is the intersection of K–12 schooling and the state, with a particular focus on constitutional issues of religious freedom and establishment, student speech and privacy, parental choice, educational opportunity, and education reform trends such as charter schools and accountability measures. Questions examined over the course of the semester include: What are the most basic obligations of the state with regard to its regulation of K–12 education? What are the most basic rights of parents in this regard? In what ways does the 1st Amendment protect—and limit—the speech and privacy rights of K–12 schoolchildren? In what ways may the state accommodate K–12 schools with an explicitly religious character? What are the constitutional requirements with regard to religious speech or expression within K–12 public schools? To what degree is the principle of equality manifest in the form of educational opportunity? How has this changed over time? In what ways have education reform trends such as charter schooling and increased accountability changed the policy landscape of K–12 education?

HESB 30569. The Global Environment

(3-0-3) Thomas

The global climate crisis is upon us, leading historians to ask: How did we get to this point and what tools historical knowledge might provide for finding our way in the future? This course considers, first, the nature of climate collapse (as some term it) on a global scale. We then turn to the issue of what values and what modes of production and consumption have caused this dramatic transformation of our planet. Looking particularly to political and economic analyses of global history, we trace the effects of modern industrial development and colonialism. Food, water, and other basics of life are all at stake. Finally, we discuss possible responses to this crisis looking to a number of intellectual genealogies from left to right.

HESB 30570. Social Inequality and American Education

(3-0-3) Carbonaro

Many have claimed that the American educational system is the “great equalizer among men.” In other words, the educational system gives everyone a chance to prosper in American society regardless of their social origins. In this course, we will explore the validity of this claim. Do schools help make American society more equal by reducing the importance of class, race, and gender as sources of inequality, or do schools simply reinforce existing inequalities and reproduce pre-existing social relations? Topics covered in the course include: unequal resources among schools, sorting practices of students within schools, parents’ role in determining student outcomes, the role of schooling in determining labor market outcomes for individuals, and the use of educational programs as a remedy for poverty.

HESB 30571. Health and the Latino Paradox

(3-0-3) Duarte

The objective of this course is to enhance your awareness of major theories, concepts, issues and research studies related to the physical and mental health of Latinos in the United States. Particular attention will be drawn to the diversity of the Latino experience in the U.S. and the health care system in terms of country of origin, race, class, gender, and generation. This course attempts to be an introduction to the historical, political, economic and social structures that determine how a subpopulation in the United States is defined within and navigates thru a primary institution, like health care, and the ramifications of this for the society at large.

HESB 30572. Medicine and Public Health in U.S. History

(3-0-3) Hamlin

This course examines health as a unifying concept in American history. It follows several themes: how class, race, and gender, as well as age, lifestyle, and place have manifested themselves in differential health experience; the ongoing conflict between personal liberty and the interests of the state, the remarkable diversity of American medical systems and their close relation to religious and social diversity;

the place of medicine in Americanization campaigns; the changing political economy of American medicine; and finally, the emergence of health as the core concern of the American dream. In short, by the end of the course you should have a good understanding of the uniqueness of American medicine and its central place in America's history. You should have acquired an historical and critical context that will be of use in your own encounters with matters of health and medicine—as intelligent citizens and about issues of public health and questions of medical ethics, and as creative thinkers about more satisfactory modes of medical practice and health improvement and protection. The course will use three to five texts, and require exams, project, and presentation.

HESB 30573. U.S. Foreign Policy to 1945

(3-0-3) Brady

This course covers the main developments in American foreign relations from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in the two world wars. A recurring theme will be the major traditions in America foreign policy and the ways in which these traditions influenced policy makers in the early years of the “American Century.”

HESB 30574. U.S. Civil Rights Movement

(3-0-3) Pierce

Corequisite: HIST 42851

There may not be a term in American society as recognized, and yet as misunderstood, as “civil rights.” Often civil rights are conflated with human rights, even though each are distinct of the other. During the semester, we will trace the African-American civil rights movement in the United States during the 20th century, as well as its lasting impact on American society. We will do so using as many media as possible. Fortunately, we will have the opportunity to study an important part of American history in significant detail. The time span we cover will not be that great, but the issues we investigate challenge the founding principles of American society to its core.

HESB 30575. Law and Society

(3-0-3) Mastrangelo

This course examines the role of law as both constituent of and agent of society and politics. Through theoretical engagement, applied jurisprudential reasoning, and institutional application we will seek to understand the phenomenon that is law and what the consequences of the use of law are in political society. In this way, we will seek to understand what law has meant to people, socially speaking, now and in the past, and how we came to use law as a tool to organize life in the modern world.

HESB 30576. The United States Since WWII

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of George H.W. Bush. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this post-war era, and the presidencies of Gerald Ford through George H.W. Bush. There will be a required reading list of approximately six books, two smaller writing assignments, and three examinations.

HESB 30577. American Legal History

(3-0-3) Rodriguez

This seminar format course provides an overview of American legal history from colonial times to the modern civil rights era. Readings cover the American Revolution and constitutionalism, slavery and early civil rights, labor unions, and the rights of women, African-Americans, Asian-Americans, and Latinos. We will also consider the law's response to social upheaval in times of crisis and rapid change in American society.

HESB 30578. Working to Eat: A Labor History of American Food

(3-0-3) Graff

This social and cultural history course explores the unpaid and paid work related to the production, processing, distribution, sale, serving, and clean-up of what Americans have eaten, from the colonial era to the present. Sites of investigation will include the farm and the factory, the kitchen table and the drive-through window, and everywhere Americans have worked to feed themselves or others. Close attention will be paid to gender and race as organizing features of the American food economy over the past four centuries.

HESB 30579. The United States' Gilded Age and Progressive Era

(3-0-3) McKenna

This course offers an introduction to the history of the United States from Reconstruction through the First World War with particular emphasis on the social, cultural, and intellectual formations of the period. The United States made a dramatic transition in these years: from a predominantly agrarian and rural society to an urban, industrial society and imperial, world power. It is also said that in this period, a new, national, and distinctly modern culture emerged. We will test the merits of this claim and attempt to understand how Americans grappled with these broad transformations by examining the history of social formations, including class, race, and gender, together with the history of cultural formations—American popular culture, the adaptations of bourgeois culture, and the creation of mass culture. In reading sources such as short stories, poetry, political speeches, and novels, and analyzing photography, film, advertising, and architecture, we will explore the making of a modern America.

HESB 30580. Undocumented Immigrants in the American Imagery

(3-0-3) Martinez

This course examines the social realities of undocumented immigration to the United States. Special attention will be given to the historical presence and current dynamics of migration in the contemporary era drawing on the visual record of migration from the western hemisphere. A film series will accompany this course and attendance is required.

HESB 30581. Latinos in Education

(3-0-3) Guzman

This course examines the educational experiences and struggles of Latinos in U.S. public and private schools. Students will study these experiences through legal, political, historical, social, and economic perspectives, regarding educational policies and practices. Additionally, this course focuses on the potential of education as an agent for social justice and change for linguistically and culturally diverse groups, and thus its important role in the Latino experience. The goal of this course is to develop a reflective individual who is able to understand the educational context of Latinos in the United States.

HESB 30582. Immigration, Political Rights, Citizenship: New Perspectives

(3-0-3) Esguevillas Ruiz

Citizenship is a pressing question for nation-states in the era of globalization. Whereas previous research on citizenship focused narrowly on the process of legal status, new studies are illuminating the actual practice of citizenship. As individuals' lives increasingly span national boundaries, states are debating the rights of people who claim to belong in more than one country. What are and what should be the extent of immigrants' economic rights? What about their legal rights, political rights and cultural rights? The European Union and the United States confront similar challenges of integrating immigrants. The immigration debate that peaked in the United States with the end of the national Quota Act in 1965 surged again at the turn of the millennium while the Parliament and the Council of the European Union in 2008 adopted the directive of “Return of Illegal Immigrants”, marking a new milestone in Europe's internal immigration debate.

HESB 30583. Constitutionalism, Law and Politics

(3-0-3) Munoz

In the Gettysburg Address Abraham Lincoln famously spoke of “government of the people, by the people, for the people.” Why should government be of the people, by the people, and for the people? And if it should be so constituted, how is such a political order to be founded, designed, and maintained? In this course we shall address these fundamental questions of political science by examining the idea of constitutionalism and the role constitutions play in political life. By reading classic texts in ancient and modern political philosophy, studying fundamental texts of the American political tradition, and examining contemporary legal and political issues, we shall study questions such as: How do different constitutional orders or regimes nurture different forms of political life and different types of citizens? How do different regimes rise and fall? What is the proper relationship between political authority and individual liberty? What, if any, are the limits on a just constitutional order? Readings may include selections from Aristotle, Aquinas, Machiavelli, Locke, Montesquieu, Jefferson, Madison, Lincoln, Roosevelt, and great cases of American and foreign constitutional law.

HESB 30584. History of American Education: Race, Class, Gender and Politics

(3-0-3) Collier

American education mirrors American society with myriad challenges, successes, and ideologies. This course will look at how political struggles over race, language, gender, and class have all played out in the battle over American schools, schools that ultimately hold the literal future of America. This course will explore the history of education in American from 1865 to the present and will have special emphasis on segregated schools in the 19th century and today. The course will also look closely at the very best programs re-shaping American education such as The Alliance for Catholic Education and KIPP. The course will look at education from kindergarten all the way through graduate programs as we study how our institutions have formed and how they form and transform our society.

HESB 30585. Social Inequality

(3-0-3) Collett

Many of us are aware of our own experiences of disadvantage (or perhaps privilege), but people are generally not aware of how structural arrangements in society result in systems of difference and inequality. Only occasionally do we question whether or not things are really black and white, right and wrong, true or false, and even less often do we contemplate the repercussions of such binary assumptions. This class will challenge taken-for-granted beliefs about race and ethnicity, social class, sex and gender, and sexuality. We will discuss how these socially constructed categories of difference are given significant meaning and how this process subsequently results in “real” differences in experiences, expectations, and achievements between groups of individuals.

HESB 40416. U.S. Presidents: FDR to Clinton

(3-0-3)

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

HESB 40417. Comparing European Societies

(3-0-3)

This course offers students a review of major patterns of difference, along with some similarities, among the fifteen member states of the European Union. Despite the larger contrasts with the United States, and the pressures toward convergence generated by the process of European integration, European societies remain remarkably different from one another on a number of dimensions including: the overall level and form taken by employment and unemployment, systems of social protection and welfare state organization, demographic trends ranging from extremely low birth rates in most of southern Europe to significantly higher birth rates further north, the connections between urban and rural life, and the impact of education in inequalities. The role of institutions, cultures, national histories and policies in accounting for this pattern of difference will be reviewed.

The course will also examine the combinations of identities—national, regional and European—found among citizens of Europe. Students will be encouraged to develop their expertise on at least one country while also doing comparative reading.

HESB 40420. Current Trends in Computer Applications

(3-0-3) Berzai

The Current Trends course allows the students to think about and discuss issues openly that pertain to computer ethics, business ethics, and some social ethical issues. We start out by having an understanding of the distinction between the terms moral and ethical. The class works through the generally accepted theories for resolving moral and ethical conflicts. These are egoism, natural law, utilitarianism, and respect for persons. We also discuss the reasons businesses exist and what they think their responsibility toward society is now and how it might change in the future. The students also debate several business ethical issues. In the area of information technology, there is discussion about what the student sees as right or wrong, ethical or not ethical in the many issues of discussion that are presented.

HESB 43020. Research Seminar in Public Policy

(3-0-3) De Ridder

All Lyman Interns are required to enroll in this post-internship seminar. Based on their internship experience, students will be asked to select a research topic, formulate a proposal, and write a research paper. Initial class meetings will focus on the nature of policy research. Students will then formulate a research proposal to be discussed and presented in class. After fall break, research will be pursued by each participant on an individual basis. Research findings will be presented in class at the end of the semester.

HESB 43040. Spending, Taxes, Deficits

(3-0-3) Betson

In 2001, Alan Greenspan expressed his concern to Congress with the speed by which the country was reducing the federal debt. A decade later, the black ink of the federal budget has been replaced with red and the once shrinking debt is now growing to the public's consternation. This course will examine two main questions: What factors are responsible for this about face in the direction of federal debt, and what decisions will the nation confront to restore long run fiscal balance?

HESB 43041. U.S. Health Care Policy

(3-0-3) Betson

The rising cost of medical care is placing high quality health care out of reach for a large and ever increasing number of Americans. State and federal governments also feel the financial burden American households endure as the cost of Medicaid and Medicare spiral out of control. This course will analyze the causes of rising health care costs; it will examine how employers and governments have attempted to control the cost of medical care while increasing access to such care. A central focus of the course will be an examination of the Patient Protection and Affordable Care Act of 2010.

HESB 43042. Common Law and the Common Good

(3-0-3) Betson

This course begins by exploring alternative concepts of the common good and asks the following question: Is the law capable of promoting justice or fairness within a society or is and should its role be limited to facilitating and promoting business and commercial transactions to ensure efficiency in a market economy? Court decisions from the areas of property, contract and tort law will be used to explore how the American common law tradition has evolved over time to promote efficiency in market transactions with limited attention paid to broader societal concerns for equality and justice. While some readings will be from law journals, most of the readings for this course will consist of court decisions, which will serve as the basis for class discussions.

HESB 43502. Self, Society, and Environment

(3-0-3) Weigert

This course introduces students to social-psychological aspects of the natural environment. Issues considered include interacting with different environments, symbolic transformations of environments, competing accounts and claims concerning environments. With an overview of basic information, these issues are discussed from the perspectives of individual self and sociocultural institutions. The course touches on alternative ways of envisioning, interacting, and valuing human-environment relations with an eye toward individual and collective change.

HESB 43503. Race, Gender, and Women of Color

(3-0-3)

This seminar analyzes a dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the U.S. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

HESB 43509. Cultural Aspects of Clinical Medicine

(3-1-4) Wolosin

This course focuses on social science approaches to sickness and healing. The medical encounter is examined from anthropological perspectives. The course emphasizes the difficulties traditional biomedicine has in addressing patients' expectations for care. Students serve an internship as patient ombudsman in a local hospital emergency room 4 hours per week. Students **must** have access to transportation to participate in the ER internships. *Students are required to sign a waiver, to present evidence of immunizations, and to receive a TB skin test.*

HESB 43515. Families, Employment, and Their Interrelation with Gender

(3-0-3)

A consideration of the part gender plays in family processes like the couple formation through cohabitation and/or marriage, having and rearing children, division of labor, and the post-children era.

HESB 43516. Confronting Homelessness

(3-0-3)

The purpose of this seminar is to examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw upon insights from history, literature, documentary film and photography, and the social sciences. We will focus on the degree of permanence and change in our approach to both traditional and modern forms of the social problem. There will be an experiential component to the seminar as well.

HESB 43524. Unequal America

(3-0-3) Carbonaro

Although America is the world's richest nation, it has the most unequal distribution of wealth and income in the industrialized world. In this course, we will examine why this is so. In particular, we will examine the following questions: What social forces create inequality in society? Is inequality inevitable? Is there such a thing as social class? Who gets ahead and why? Why is race/ethnicity and gender still related to social status, wealth, and income? Does America have a ruling elite? Who are the poor and what explains their poverty? Are there social policies that can create more equality in American society—is that what Americans really want?

HESB 43527. Global Sociology

(3-0-3)

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline as one that seeks to understand human society as a nested collection of interdependent societies. In particular, the course draws from world systems theory and institutional approaches as well as from related disciplines such

as anthropology—to consider how the “development project” of the 20th century evolved over time. The impacts of global economic integration on cultural and institutional change, inequality, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how the World Bank, IMF, and United Nations are impacting the experiences of people around the world as well as for those who expect to do further research in the field.

HESB 43528. Migration, Education, and Assimilation: Three Forces that Built America

(3-0-3)

This course uses the tools of economics to understand driving trends and episodes of migration, education, and assimilation throughout America's history. Readings will apply economic concepts in various historical contexts, from the settling of the country by Europeans to the present day. Examples of course topics include: the major waves of European migration to the U.S., including waves of Irish immigration; the development and rise of the high school in America; important trends in educational attainment particularly of women and minorities; the economic effects of civil rights legislation; and the English-language-only debate. Economics knowledge at the level of Principles of Microeconomics would be helpful but is not required. A research paper is required.

HESB 43534. Sociology of Economic Life

(3-0-3) Spillman

Economic actions like working, buying, selling, saving, and giving are a fundamental part of everyday life, and all spheres of society, from family to religion to politics, are interrelated with economy. Sociologists examine how social relationships from small networks to transnational linkages affect economic actions and their outcomes, and the ways cultural meanings and political strategies shape those social relationships. The goal of this class is to provide students with new perspectives on economic actions by reading recent sociological studies of topics like money, markets, work, businesses, industries, and consumer society.

HESB 43535. Crime and Deviance in Ideological Perspective

(3-0-3) Welch

This seminar course will examine selected issues (e.g., white collar crime, gang violence, pornography, etc.) in the study of crime and deviance (issues will change each time the course is offered) and compare responses made by those representing the left and right in American society. We will critique the adequacy of these responses from a sociological viewpoint.

HESB 43537. Environmental Justice

(3-0-3)

This course will survey environmental impact assessment (EIA), ecological risk assessment (ERA), and human-health risk assessment (HHRA); ethical and methodological issues related to these techniques; then apply these techniques to contemporary assessments for which state and federal governments are seeking comments by scientists and citizens.

HESB 43538. Bio-Medical Ethics, Scientific Evidence and Public Health Risk

(3-0-3) Shrader-Frechette

Designed for pre-med, science, and engineering students, the course will survey ethical issues associated with current public health problems, such as pollution induced cancers, universal health care, occupational injury and death, and inadequate medical attention to prevention, nutrition and environmental health.

HESB 43540. International Migration and Human Rights

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public

perceptions and research findings. Differences between Mexico and the United States' migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

HESB 43541. Religion and American Society

(3-0-3) Sikkink

The sociology of religion investigates the influence of the social environment on religion, and the role that religion continues to play in shaping contemporary society. This course will focus on the interaction of religion and contemporary American society through reading and discussion of major sociological works on American evangelicalism, mainline Protestantism, and Catholicism. The course will draw on classic sociological works on the relationship of religion and society to illuminate processes of religious identity formation and the influence of American religion on social behavior.

HESB 43543. Health, Healing, and Culture

(3-0-3)

This course provides an introduction to the field of medical anthropology. Medical anthropology examines beliefs, practices, and experiences of illness, health, and healing from a cross-cultural perspective to show that illness, health, medicine, and the body are shaped by social relationships and cultural values from the local level of the family and community to the global level of international development and transnational capitalism. This course will consider the ways in which medical anthropology has historically been influenced by debates within the discipline of anthropology as well as by broader social and political movements. Particular emphasis will be placed on the importance of viewing biomedicine as one among many culturally constructed systems of medicine. Some of the key issues which we will explore are: medical pluralism and therapeutic choice; biocultural studies; medicalization; the political economy of health and disease; the anthropology of the body; the role of medicine and disease in colonialism and postcolonial movements; and applied medical anthropology.

HESB 43544. Sociology, Self, and Catholic Social Tradition

(3-0-3) Weigert

What's Catholic about sociology? What's sociological about Catholic Social Tradition? What does all this mean for sociology majors, what they study, and how this may affect their careers and lives after graduation? This course is a critical examination of the links between Catholic social thought and sociology as a discipline. We will engage these ideas through an experimental, team-taught seminar format. Readings will include core statements of Catholic social tradition, critiques thereof, and autobiographical essays written by sociologists and others who are dedicated to social justice.

HESB 43545. Social Stratification in the United States: Media Portrayals, Theory and Research

(3-0-3)

This course will investigate a variety of ways of gaining knowledge about social stratification. It will examine representations of stratification in various forms of media (novels, magazines, television shows, news outlets, movies, etc.) and examine the ideologies that are presented regarding people's social positions. These representations will then be compared to theory and research findings in the stratification literature. Through this process, students will gain knowledge of sociology and stratification issues and develop and utilize several sociological skills. These include media literacy, critical analysis of research, content analysis, and techniques for effective communication and argumentation.

HESB 43546. Black Politics in Multiracial America

(3-0-3)

This course undertakes a broad examination of black politics in multiracial America. Racial issues have provoked crises in American politics; changes in racial status have prompted American political institutions to operate in distinctive ways. The course examines the interface of black politics with and within the American political system. How successful have blacks been as they attempted to penetrate

the electoral system in the post civil rights era. What conflicts and controversies have arisen as African Americans have sought to integrate the American system of power. Now that the laws have been changed to permit limited integration, should African Americans integrate politically, that is should they attempt to deracialize their political appeals and strategy, with an effort to crossover politically; are some approaches such as those of Illinois Senator Barack Obama not "black" enough? What internal political challenges do African Americans face; some such as the increasing importance of class and socioeconomic factors, as well as gender and sexuality may reshape the definition of the black community. Finally how stable will the past patterns and political organizations and institutions of African-American politics be, as America and American politics becomes increasingly multiracial.

HESB 43547. Controversies and Crises in Modern Criminology

(3-0-3)

This upper-level seminar course is intended for junior and senior sociology majors only. It will focus on important current issues and controversies (e.g., racial profiling, victimless crimes, cyber-crimes, etc.) that are central to the study of crime and deviance in modern society. Students will be required to discuss and analyze these issues from a variety of sociological perspectives. The issues that are studied may change each time the course is offered. You cannot take this course (even if you are a sociology major), if you have already taken SOC 43730, Crime and Deviance in Ideological Perspective, because of overlap.

HESB 43548. Marxian Economic Theory

(3-0-3) Ruccio

This course is an introduction to Marxian economic analysis. Topics include the differences between mainstream and Marxian economics, general philosophy and methodology, Marxian value theory, and critical appraisals and current relevance of Marx's "critique of political economy."

HESB 43549. Race and Ethnicity in Public Education

(3-0-3)

This course explores the multiplicity and complexity of race, ethnicity and culture in U.S. public education. Through its focus on the histories and contemporary realities of racial and ethnic groups in the United States, we will develop critical knowledge about the contingent, layered, and contested development of educational policies, institutions, and curricula. We will achieve this, in part, by examining the interplay of various racial and ethnic groups, numerous and sometimes competing interests, and the impact of power, history and place upon public education. Through an exploration of these complex relationships, students will not only develop a stronger foundation in the politics and history of race and ethnicity in public education, but will also engage in more nuanced and critical analyses of contemporary issues. The goal of this course is to provide students with the tools necessary to critically and thoughtfully engage in and contribute to discussions and behavior that will support successful, affirming and healthy public education for all children.

HESB 43550. Research on School Effects

(3-0-3)

It might seem a truism that schools have powerful effects on student achievement. Yet beginning with the landmark Equality of Educational Opportunity study in 1966, social scientists have debated the role that schools play in the production of student achievement. Does it matter much, which school a student attends? Why are some schools chronically low performing, and what are the characteristics of more effective schools? Students should have completed coursework in methods and statistics for social research or equivalent coursework before enrolling in this course.

HESB 43551. Materializations of America

(3-0-3)

Industrialization in the twentieth-century resulted in a megatechnic America problematically related to materialism and to earlier visions of the New World. The course will consider a variety of materializations of America.

HESB 43552. History of Economic Thought

(3-0-3) Mirowski

This course intends to ask how it is that we have arrived at this curious configuration of doctrines now called “economics”, and importantly, how differing modes of historical discourse tend to ratify us in our prejudices about our own possible involvement in this project. The course will begin in the 18th century with the rise of a self-conscious discipline, and take us through the stabilization of the modern orthodoxy in WWII. Effort will be made to discuss the shifting relationship of economics to the other sciences, natural and social. A basic knowledge of economics (including introductory economics and preferably intermediate economics) will be presumed.

HESB 43553. Leadership in Catholic Education

(3-0-3)

Changes in the church, society, public policy and family life are impacting Catholic schools. This seminar explores the main challenges and opportunities facing K–12 Catholic schools in the U.S. and offers a theological view of leadership, informed by scripture, church documents and recent history. Field work with Catholic educational leaders is required.

HESB 43554. Education and Development in a Global Era

(3-0-3)

Forces of globalization are profoundly changing the experiences and opportunity structures of young people in an increasingly interconnected world. While there is a growing recognition that the knowledge-based global economy requires a new paradigm for education in the 21st century, a significant segment of the world’s largest generation of adolescents remain vulnerable, disengaged and disenfranchised from education. Against this backdrop, the proposed course will explore the policy responses towards social disadvantage and educational inequities at home and abroad through a framework that is informed by the dynamic interdependencies of the global and the local. Students taking this course will: 1) gain a critical understanding of the broader global context in which national educational policy takes shape, 2) develop operational fluency in key contemporary policy initiatives in international educational development, and 3) enhance analytical skills for comparative analysis of educational policy and practice towards underprivileged children and adolescents at home and abroad.

HESB 43555. Building Democratic Institutions

(3-0-3)

Elements of democratic regimes emerged long before the regimes as such can be identified as being minimally in place. Beginning with a brief discussion of the essential features of democracies, the course examines how and why such institutions emerged, and the critical moments in which the actual transitions to the new democratic regimes occurred. The course focuses on democratizations that took place before the Second World War, and will examine key European and Latin American cases.

HESB 43556. Religion and Classical Social Theory

(3-0-3)

The purpose of this course is, in the setting of a small seminar, to engage students in close reading and broad discussion of sociological writings about religion by classical theorists of the discipline. Works that may be nominated for treatment include such mainstays as *The Elementary Forms of the Religious Life* and other studies of religion by Emile Durkheim; *The Protestant Ethic and the Spirit of Capitalism* and *The Sociology of Religion* by Max Weber; portions of *The German Ideology* by Karl Marx and Friedrich Engels, as well as excerpts from Marx’s *Capital*; *The Future of an Illusion* and *Civilization and Its Discontents* by Sigmund Freud; and various essays on religion by Georg Simmel. The course also will cover more recent works, both in the sociology of religion and in related fields, incorporating assumptions about and approaches to religion that can be traced to these pioneering authors.

HESB 43557. Anthropology of Globalization

(3-0-3)

This course analyzes contemporary patterns of globalization drawing on recent ethnographies. We will briefly overview the historical antecedents of globalization,

and then proceed to analyze globalization’s cultural, socio-political, and economic complexity, often resulting in urbanization. In particular, we will tackle the global circulation of food, entertainment, fashion, capital, ideologies, violence, religious practice, migrant/trafficked labor, and even of so-called “anti-globalization” movements. Examples of specific topics include youth and free trade in Latin America; cyber-politics among transnational Chinese, Eritreans, and others; McDonald’s and consumerism in Moscow; Indian cinema and global media. By locating global processes in everyday practice, we will come to understand the interconnectivity sustaining globalization, and the resulting practices of resistance. More broadly, we will appreciate on the one hand how various cultures and societies become increasingly interconnected, and on the other how people around the world appropriate large-scale processes in culturally specific ways. The course emphasizes anthropology’s role as a discipline that is globally relevant and publicly “engaged.” Accordingly, we will focus on the discipline’s methodological and theoretical contributions in the study of globalization and its inequalities, and toward a more socially-just world. The course will also equip you to design and implement an original research project, and to write an ethnographic account based on such project.

HESB 43558. Civil Life and Democracy in the Contemporary World

(3-0-3)

This course addresses the issue of the characteristics, sources and implications of civic life. What are the conditions for the formation and development of voluntary associations and of sustained civic engagement of citizens? And what are their relations to the process of democratization and the quality of democracy? First, the course will discuss what are the components of civic life (types of voluntary associations and social movements). Second, it will debate existing theories of the origins of civic life (socioeconomic modernization, social capital, political culture, historical-institutionalism). Third it will reflect on the impact of civic life on the quality of democracy, namely to understand its implications for political equality between citizens. The empirical focus of the course will be an analysis of the varying types and trends of civic life between the 1970s and the early 2000s in the advanced industrial democracies of Western Europe and North America and in the new democracies of Southern and Eastern Europe, Latin America and East Asia.

HESB 43559. Anthropology of Poverty

(3-0-3)

What is poverty? What does it mean to be poor, destitute and powerless? Does poverty in the developed world refer to the same conditions and factors that determine poverty in developing and undeveloped countries? What does genteel poverty mean? Does the ability to possess material goods and to consume indicate lack of poverty? What is the cycle of poverty? Can one break out of it? This course will address these and other questions on poverty through anthropological analysis. The course is divided into two parts: a) poverty in the pre-industrial era, and b) poverty in contemporary societies. Topics covered in Part A include the beginnings of poverty and social inequality in the earliest complex urban societies of the Middle East, Africa and South Asia, urbanism, production, distribution and poverty in various time periods including classical Greece and Rome, the Middle Ages and the Early Modern Era, and slavery, colonialism and poverty. Part B will address issues such as the relationship between industrialism, colonialism and poverty in the 19th and 20th centuries, instituted poverty in post-colonial and post-industrial societies, and global manifestations of poverty in the 21st century. The course materials include readings from anthropology (archaeology, cultural anthropology, and biological anthropology), history, economics, theology, political science, as well as documentaries and films.

HESB 43560. Employment in a Changing Economy

(3-0-3)

How is employment changing? What distinguishes the new economy from the old economy? How do people find better jobs? What are employers looking for when they attempt to meet their labor needs? This course will attempt to answer these and other questions by contrasting the new and the old economy. In the old economy some people worked for the same employer their entire lives. Why

did workers stay with the same firm? Why did employers want to retain their employees? In the new economy employers seem to want flexibility. Why do they want flexibility and how do they attempt to achieve it? What consequences does the quest for flexibility have for how people become employed? For more information on the course download the Spring 2005 syllabus at <http://www.nd.edu/~dhachen/Courses/Courses.html>.

HESB 43861. The Political Economy of the Financial Crises

(3-0-3) Wolfson

A discussion seminar. This course will examine the recent experience of the U.S. and global economies with financial crises, especially the most recent crisis involving housing speculation, financial derivatives, and banking. The course will use the tools of political economy to address this question, in particular theories and perspectives drawn from the writings of Karl Marx, John Maynard Keynes, Karl Polanyi, and Thorstein Veblen, among others. It will examine historical and structural changes in the financial system over the past 30 years, and how these changes have affected the behavior of financial crises. In addressing prospects for change, the course will examine policies, institutions, and the basic structures of power and influence in the economy.

HESB 43862. Economics of War and Peace

(3-0-3)

The course examines the consequences of wars, including international wars, civil wars and terrorism. It also examines approaches to peace building and post-war reconstruction. While it focuses mainly on economic factors at work and makes use of the tools of economic analysis, it adopts a broader political economy framework.

HESB 43863. World Poverty and Inequality Across Nations

(3-0-3)

Analysis of the trends, causes and consequences of the inequality between rich and poor nations, or what are called the North and South. The course uses theoretical, empirical and broader political-economy analyses to examine the implications of international trade, capital and labor movements, technological transfers and environmental interactions between rich and poor countries. Particular emphasis is given to globalization and its effects on poor countries.

HESB 43864. U.S. Catholic Social Ethics

(3-0-3)

This course will study the emergence and development of the Americanist tradition in Catholic social theory from the late-nineteenth century to the present. The leading emphases will be on the theoretical paradigms that have shaped the discourse of what has since become the field of "Catholic Social Ethics," with a focus on Catholic political theory. Texts will be read genealogically in an effort to discover how the central terms and categories in Catholic social theory in the United States have shifted over time and how they have remained the same. Authors to be studied include John A. Ryan, Maritain, Yves Simon, John Courtney Murray, Bryan Hehir, George Weigel, Michael and Kenneth Himes, Robert George, David Hollenbach, and others. By virtue of the topic, special attention will be paid to the writings of John Courtney Murray and the strengths and weaknesses of the so-called "Murray Project." Themes to be examined include nature and grace, faith and reason, church-state relations, the nature of law, the character of the modern state, the problem of religious pluralism and freedom. Requirements include the weekly readings, preparing weekly seminar papers during the first half of the course, and presenting a well-researched paper(s) to the seminar during the second half of the course. In addition, students will be asked to produce a final essay that analyzes the strengths and weaknesses of the Americanist tradition in Catholic social ethics.

HESB 43865. Religion and Social Activism

(3-0-3)

This course mainly focuses on how religion acts as a double-edged sword for social change, promoting both radicalization and quiescence. Students will be exposed to the major topics, theories, and debates in the scholarly work on religion and social change as well as important empirical cases of collective action in which

religion has been a force, such as the U.S. civil rights movement, U.S. Central peace movement, East German Revolution, and anti-abortion activism. In studying religion's impact on social change, we will pay particular attention to how different dimensions of religion shape social activism, the mechanisms through which religion mobilizes or demobilizes social activism, and whether—and if so, how—religious-based activism is distinct from its secular counterpart. Though most of the course examines the effect of religion on social activism, we will also reverse the causal arrow and consider how social activism affects religion and the processes involved in this influence. (Please note: During the semester, students will have the opportunity to engage in service-related projects, both locally and at least one non-local location, though doing so is not required.)

HESB 43867. Race, Ethnicity, and Inequality in Public Education

(3-0-3) Jones Gast

This course explores the link between racial and ethnic relations in the U.S. and the American education system. We will discuss sociological understandings of racial and ethnic inequality in education over the past several decades. Moving beyond black-white inequality, this course will examine the political, cultural, and historical perspectives of racial and ethnic inequality among and between racialized groups in the U.S. Students will be introduced to central sociological debates within the fields of race/ethnicity and education. We will also pay some attention to the changing nature of racial and ethnic inequality in education over the latter part of the twentieth century and the future of racial and ethnic inequality in education during the 21st century.

HESB 43868. Deviance, Crime, and Social Control

(3-0-3) Welch

This course will focus on selected issues in the study of deviance and criminal behavior and how they are treated in modern society. Students will be required to discuss and analyze these issues from a variety of sociological perspectives. This course is intended primarily for students who have interests in the social sciences, law, and public policy. The issues under focus in this course may change each time the course is offered. (Cannot have taken SOC 43730 or 43732 due to content overlap.)

HESB 43869. Environmental Economics

(3-0-3) Lipscomb

An analysis of the welfare economics of environmental problems, emphasizing market failures due to negative environmental externalities. Air, water, and land pollution are classic examples of these externalities, which occur when third parties bear costs resulting from the transactions of the two primary market participants. The theory and practice of environmental policy to promote efficiency at the U.S. local, state, and federal levels and in other countries is explored. International problems such as transboundary pollution and global warming are also studied. Writing intensive.

HESB 43870. Telling About Society

(3-0-3) McDonnell

How do we see the world? How do these modes of representation determine our social reality? How can we use media to create social change? This rigorous seminar interrogates the lenses through which we see, and more importantly make, our world. We open with an interrogation of theories of media, representation, and the sociology of knowledge so as to develop a critical eye towards how these lenses shape our everyday reality. From there we discuss particular modes of representation: photography, ethnography, statistics, journalism, maps, and more. We consider the inherent biases within these ways of seeing, and debate the appropriate uses of these technologies. From this starting point, the course turns its eye to particular historical periods and phenomena: the Great Depression, Vietnam War, the era of HIV/AIDS, and the growing surveillance society. We compare across different media representations of each event to evaluate how different media tell very different kinds of stories about that moment. Ultimately, this class presses students to consider the capacities of these media for encouraging mobilization and change—to redesign the world. To work through these issues, students will engage in fieldwork on a local topic of their choosing. Their final project will

consider how different media have shaped our knowledge of a local issue, and in response students will create a final multimedia campaign designed to alter people's ways of seeing that topic. In this project, students will persuade their audience using a variety of lenses to make their case: from ethnography to documentary film to radio journalism to new media and more.

HESB 43871. Topics in Political Economy

(3-0-3) Ruccio

This course is the seminar version of ECON 40201. It focuses on labor and the U.S. economy. It will address the following questions: What has happened to workers' wages, working conditions, and union organization? What has happened to family income and the distribution of wealth? How have women and people of color fared? How have workers been affected by government policies, such as tax cuts, budget deficits, deregulation, welfare reform, trade agreements, and Social Security policy? What are the possibilities for change, of policies as well as the basic structures of power and influence in our economy? The course will compare and contrast orthodox views with perspectives drawn from the writings of Marx, Keynes, Veblen, Polanyi, and other economists in the political economy tradition.

HESB 43872. Contemporary Education Reform in America

(3-0-3) Warlick

This course examines the need for educational reform in the United States and the strategies being implemented to achieve reform. Emphasis will be given to the situation of low-income students in high poverty schools. In particular, recent studies of the impact of poverty on child development and its implications for learning will be reviewed to establish an understanding of the optimal school environment and pedagogies for teaching children from disadvantaged backgrounds. After a brief history of education reform in America, the course will scrutinize the current reform movement considering the appropriateness of its goals, identifying its major political players, and reviewing social science research about the effectiveness of reform strategies including curriculum reform, charter schools, and teacher accountability in reducing the achievement gap and raising student learning.

HESB 46000. Directed Readings

(0-0-V)

Juniors and seniors have an opportunity to further their knowledge about a public policy topic through a semester of "à la carte" readings. Permission and proposal must be presented to the director of the program in the beginning of the semester. Number of credits varies.

HESB 47000. Special Studies

(3-0-3)

Special studies to be determined by the professor and the student.

History

HIST 10010. American History (AP credit)

(3-0-3)

A student at Notre Dame qualifies for academic credit for this course with a score of 5 on the American History AP exam.

HIST 10020. European History (AP credit)

(3-0-3)

A student at Notre Dame qualifies for academic credit for this course with a score of 5 on the European History AP exam.

HIST 10030. World History (AP credit)

(3-0-3)

A student at Notre Dame qualifies for academic credit for this course with a score of 5 on the World History AP exam.

HIST 10050. African History to 1800

(3-0-3)

Corequisite: HIST 12050

This course introduces students to major themes in African history to 1800.

It investigates agricultural and iron revolutions, states and empires, religious movements, and patterns of migration and labor exploitation. The latter part of the course focuses on Africa in the era of trans-Atlantic slave trade, from 1550 to 1800. We will study the various methods that historians use to investigate the past; we will also delve into some of the intellectual debates surrounding pre-colonial Africa and the slave trade. By the end of the course, students will have a firm understanding of states and societies in Africa in the pre-colonial period.

HIST 10085. An Introduction to the History of the Modern Middle East

(3-0-3)

This course surveys Middle Eastern history from 1500 to the present. The primary themes to be covered include: the emergence and demise of the last Muslim unitary states; European colonial and imperial penetration of the Middle East in the 19th century; the social and cultural impact of imperialism; state-building in the 20th century; new ideologies/nationalisms; and contemporary problems of political and economic development. We will also consider the most important movements of Islamic reform and revival over the past two centuries.

HIST 10106. Modern South Asia

(3-0-3)

More than one-fifth of the world's population lives in South Asia, a region comprised of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan and the Maldives. This introductory course will provide a survey of issues and events in South Asian history from the establishment of British East India Company rule in 1757 to the decolonization of South Asia in 1947. The course will explore the following themes: the rise of a trading company, the East India Company, and its transition into a colonial power; the emergence of a colonial economy; colonial production of knowledge; nineteenth and twentieth-century cultural, religious and political movements and formations of new identities; the emergence of elite and popular nationalisms; independence; and the partition of the subcontinent.

HIST 10200. Western Civilization I

(3-0-3)

Corequisite: HIST 12200

This course is a survey of the central themes in Western civilization from ancient Mesopotamia to the Renaissance. Emphasis will be on problems of social organization, especially the mutual obligations and responsibilities of individuals and states; evolving concepts of justice; aesthetic standards; religious ideas and institutions; basic philosophical concepts; different kinds of states; and the ideologies that defined and sustained them.

HIST 10210. Ancient Greece and Rome

(3-0-3) Mazurek

An introduction to the major historical and cultural periods of ancient Greek and Roman civilization through close reading of texts central to the Classical Greek and Latin literary traditions. Topics to be considered include: concepts of the divine; heroism and virtue; concepts of gender; democracy, empire, and civic identity. The course aims to deepen students' appreciation for the classical roots of their own social, intellectual, and religious lives.

HIST 10390. Christianity, Commerce, and Consumerism: The Last 1000 Years

(3-0-3) Gregory

Corequisite: HIST 12390

The capitalism and consumerism that now influences the entire world arose within a religious culture—that of Western Christianity—whose central figure extolled poverty and self-denial, and whose most important early missionary wrote that “the love of money is the root of all evils.” How did this happen? This course takes a long-term view of the emergence of modern economic life in relationship to Christianity beginning with the upturn in commerce and the monetization of the European economy in the eleventh century and continuing through the relationship between markets and Christian morality in the Middle Ages and Renaissance. It pays particular attention to the ways in which the religio-political disruptions of the Reformation era laid the foundations for the disembedding of economics from Christian ethics and thus made possible modern Western capitalism and consumerism.

HIST 10400. Western Civilization since 1500

(3-0-3)

Corequisite: HIST 12400

This course will provide a comprehensive overview of European history over the last four centuries. During this period European states emerged as powerful institutions, extending their control over the peoples of Europe, and battling with each other for territory, subjects, and status, both in Europe and throughout the world. The enormous growth of state power provoked opposition from both elites and ordinary people. This course will explore resistance to the state as well as tracing its growth, with special attention paid to the English revolution in the 17th century, the French and Russian revolutions in 1789 and 1917, and the collapse of the Soviet empire in the late 20th century. Particular attention will be paid to the development of the ideologies of liberalism, socialism, and nationalism, which defined new relationships between people and their states in the 19th and 20th centuries. The changing status of women, and the emergence of feminism as another ideological alternative, will be dealt with as well. The conflicted relationship between Europe and its colonial territories will constitute another major theme.

HIST 10405. Europe from the French Revolution to World War I

(3-0-3) Kselman

Corequisite: HIST 12405

During this time Europe changed dramatically in ways that shaped the 20th century: political reform movements advocating nationalism, democracy, and socialism challenged established regimes; the industrial revolution led to massive changes in society and the economy, including the emergence of a large and affluent middle class and an industrial proletariat; European states consolidated power and mobilized popular support and an advanced technology for wars in Europe and throughout the world, into which they expanded as colonial powers; writers, artists and composers reacted to the changes and conflicts with novels, paintings, songs, and symphonies that, in their variety of styles, suggest the vitality and anxiety of this period.

HIST 10600. U.S. History I: to 1877

(3-0-3) Griffin

Corequisite: HIST 12600

A survey of the social, cultural, and political history of the British North American colonies and the United States to the close of the Civil War. Organized around the

question of American “nationhood,” topics include Native American, European, and African encounters; regional development and divergence; imperial conflict and revolution; constitutional development and argument; democratization and its implications; religious impulses and reformism; immigration and nativism; the importance of land and westward expansion; slavery and emancipation; sectional division and Civil War.

HIST 10605. U.S. History since 1877

(3-0-3) McGreevy

Corequisite: HIST 12605

This course will be a survey of the political, diplomatic, economic, social, and cultural development of the United States from 1865, the end of the Civil War, to 1988, the end of the Ronald Reagan presidency. Major topics to be covered include post-war reconstruction, the Industrial Revolution of the late 19th century, the progressive legislation of Presidents Theodore Roosevelt and Woodrow Wilson, the causes of the Wall Street Crash and Great Depression, the New Deal programs of Franklin Roosevelt, World Wars I and II, the Fair Deal and containment policies of Harry Truman, Dwight Eisenhower's Modern Republicanism, the New Frontier of John Kennedy, Lyndon Johnson's Great Society, the civil rights and feminist movements, Vietnam, Richard Nixon and Watergate, and the presidencies of Gerald Ford, Jimmy Carter, and Ronald Reagan.

HIST 10610. Irish-American History

(3-0-3)

Corequisite: HIST 12610

This course will explore the Irish-American experience from Atlantic, global, and comparative perspectives. We will, of course, cover traditional topics, such as labor, politics, and religion. And we will encounter many colorful characters and fascinating stories. But we will do so by viewing the Irish who came to America as part of a broader, dynamic diaspora that would span the globe. Viewing migration to the American colonies (including the Caribbean) and the United States from this vantage point means that we must consider the changing relationship between Ireland and America, as well as the ways in which both regions were parts of broader economic and cultural systems. As such, we will examine dynamics that occurred within the Atlantic basin, such as movement and adaptation to a New World, within a global context. Needless to say, we will cover the history of both sending and receiving societies in rigorous fashion. Only by doing this sort of work can we understand what defined the Irish-American experience.

HIST 10612. American Catholic Experience

(3-0-3)

Corequisite: HIST 12612

This course will examine the history of the Irish in the United States. In many respects the Irish are the great success story in American history. They have moved from the shantytowns of urban America to the boardrooms of Wall Street. Along the way they have left their mark on American politics, literature, religion, and the labor movement. These are the areas that the course will study. The course begins in the 18th century when large numbers of Irish immigrated to North America. Then we will examine the Great Famine of the 1840s and the subsequent immigration of over one million Irish people to the U.S. The great themes of Irish American history—politics, literature, religion, and labor—will be the focus of our study as we examine the Irish during the century of immigration, 1820–1920. We will conclude our study with an overview of 20th century Irish America and the new Irish immigrants of the 1980s and 1990s.

HIST 10750. History of U.S. National Security Policy since the 1890s

(3-0-3)

In the aftermath of 9/11, with American troops deployed in Afghanistan and Iraq, and concern about the nuclear ambitions of such nations as North Korea and Iran, “national security” is the phrase that is often discussed and is of crucial importance to informed citizens. This course will examine national security policy: what it is, how it is formulated and executed, and how U.S. national security policies have evolved since the 1890s. Using a variety of readings and films such as *Casablanca* and *Dr. Strangelove*, this course will examine U.S. national security policies from

the late 1890s through two world wars, the interwar period, the Cold War, the post-Cold War years, and up to the current post-9/11 world. We will identify continuities and departures in historic U.S. national security policies, and consider the roles of policymakers and their critics in a self-governing society.

HIST 10900. Latin American History through Film

(3-0-3)

Corequisite: HIST 12900, HIST 31900

This course offers an introduction to the history of Latin America through the study of film (in combination with more traditional print sources).

HIST 10901. Colonial Latin America

(3-0-3) Graubart

Corequisite: HIST 12901

When Columbus stepped ashore in the Caribbean in 1492, he set in motion a process that led to the creation of wealthy Spanish and Portuguese empires in the Americas, the genocide of countless numbers of indigenous men and women, the enslavement of millions of African men and women, and the eventual formation of a variety of independent states competing in the world economy. In this semester-long survey, we will examine topics in this history that will allow us to consider how history is produced as well as what happened in the past, from various perspectives, from elite colonial administrators and merchants to indigenous peasants and formerly enslaved men and women.

HIST 10929. Andean History and Ethnohistory

(3-0-3)

Corequisite: HIST 12929

This course looks at the history of the peoples who live in the Andean region of South America (modern-day Ecuador, Peru and Bolivia) from some of the earliest recorded settlements through the end of Spanish colonization. Using ethnohistoric—archaeological and anthropological—as well as historic—written texts—materials, we will look at how Andean peoples adapted to and contributed to the formation of their societies, under arduous geographic and climatic conditions. Topics will include the formation of early imperial civilizations such as the Moche and Wari; the development of an Inca empire out of the remnants of these earlier cultures; Spanish conquest and colonization; the adaptation of Andean religiosity to Catholicism; the rebellions of the 18th century. The course will include a visit to the Snite Museum in order to work first-hand with objects from ancient Andean cultures.

HIST 10990. Environment and Civilization

(3-0-3) Fernandez-Armesto

Corequisite: HIST 12990

This course is about how some societies transform the environment by radically interventionist strategies: highly selective breeding and winnowing of species, intensive agriculture, and city building. We investigate how and why this “civilizing ambition” has functioned and failed in a variety of settings, and compare its effects with those of other strategies adopted by less ambitious societies. We approach the history of the world not by the usual strategy of classifying events according to the periods or cultures in which they occurred but by using different environments as our units of enquiry, looking at tundras and taigas, arid deserts, forests of different kinds, alluvial soils, grasslands, highlands, and coastal and marine environments, and seeing how people have exploited the peculiar opportunities and responded to the challenges of each.

HIST 11184. History University Seminar Language Across the Curriculum Lab

(0-1-1)

Corequisite: HIST 13184

Students undertaking the Notre Dame language requirement in Spanish are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in Spanish language materials and meet once a week with the instructor or a teaching assistant for a discussion in Spanish. The LAC discussion section in

Spanish associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Spanish. Please contact the instructor if you are interested in adding this supplemental credit.

HIST 12390. Christianity, Commerce, and Consumerism: The Last 1000 Years Tutorial

(0-0-0)

Corequisite: HIST 10390

A weekly required tutorial for students registered for HIST 10390.

HIST 12405. Europe from the French Revolution to World War 1 Tutorial

(0-0-0)

Corequisite: HIST 10405

A weekly tutorial required for students registered for HIST 10405.

HIST 12610. Irish-American History Tutorial

(0-0-0)

Corequisite: HIST 10610

A weekly discussion section required for students registered for HIST 10610.

HIST 12900. Latin American History through Film Tutorial

(0-0-0)

Corequisite: HIST 10900

This is a weekly discussion group required for students registered for HIST 10900.

HIST 12929. Andean History and Ethnohistory Tutorial

(0-0-0)

A weekly discussion section required for students registered for HIST 10929 or its crosslists.

HIST 12990. Environment and Civilization Tutorial

(0-0-0)

Corequisite: HIST 10990

A weekly tutorial required for students taking HIST 10990 or its crosslists.

HIST 13184. History University Seminar

(3-0-3)

An introduction to the seminar method of instruction that explores the major methodologies of the historical discipline and which accents the organization and expression of arguments suggested by readings in historical topics.

HIST 13195. American Political Traditions since 1865

(3-0-3)

Prerequisite: ALHN 13950 (may be taken concurrently)

Students will investigate the political debates—and simultaneous examinations of democracy's character—that have animated American reformers and intellectuals since the mid-nineteenth century. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of work and labor after the civil war, and move through the “social question” of the late nineteenth century, Progressive reform in the early twentieth century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements, from civil rights in the South and North to the battle over *Roe v. Wade* (1973), concluding with discussion of Red and Blue America. Readings will include at least one novel, court cases, speeches and a sampling of the philosophical and historical literature.

HIST 13196. Honors History Seminar

(3-0-3)

Prerequisite: ALHN 13950

A general introduction to history, taught in a seminar format for students in the science and arts and letters honors program.

HIST 20075. Introduction to Islamic Civilization

(3-0-3)

This course provides an introduction to Islamic civilization and Muslim culture and societies through scholarly works, literature, media clips, films, and audio-video material (some made by the instructor during recent trips to the Middle East). The background readings will provide a context for the audio-visual material, giving a general overview of the history of the Islamic world from the advent of Islam to the present day. The ultimate goal of this course is for students to gain a better understanding of the Muslim peoples and their culture and societies within the broader context of Islamic civilization. Focal point: brief overview of the canons and basic tenets of Islam as a world religion, recognition and transcendence of stereotypes, awareness of Western culture and political influence on today's Arab-Islamic world and vice versa, and exposure to Middle Eastern culture.

HIST 20076. Revelation and Revolution

(3-0-3)

Between the years A.D. 100 and 1000, Christianity and Islam were born and struggled for supremacy as world empires. The rivalry that resulted was religious and theological, but it expressed itself in story, art, and imagination. This course follows the early progress of a rivalry that continues to our own day. Topics include history of religious interaction, politics of empire, Arabic literature, mytho-poetics, art, and architecture.

HIST 20079. Historical Survey of the Arab Middle East

(3-0-3)

This course will chart the history of the Arab Middle East from the formative period of the emergence of Islam in the seventh century through the fall of Constantinople in 1453 and the creation of the Ottoman Turkish Empire. Intended to be broad in its coverage and comprehensive in its scope, the course will introduce students to the social, cultural, and religious crosscurrents that came to define the Arab life and culture in the region.

HIST 20081. The Good Life in Medieval Islam

(3-0-3) Tor

One learns a great deal about a society from its definition of what constitutes the good life. This textually-based course will therefore examine the lifestyles of the rich, the famous, and the not-so-famous in the medieval Islamic world, in order to learn about that civilization's mores, material culture, technological sophistication, material wealth, and social customs. Issues that will be covered include the conspicuous consumption of the elite—in feasting; court ceremonial; slaves, eunuchs, and concubines; harems; hunting; extravagant parties; sartorial magnificence; retinues and private armies; jewels and objets d'art; praise poetry; and much more. In the process of exploring these issues, students will discover much about trade and agriculture in the Islamic Middle Ages; the role of women, slaves, eunuchs, and poets; the internal divisions within Muslim society; courtly life and culture; and, finally, the alternative definitions of the good life offered by religious ascetics, mystics, and chivalric brotherhoods.

HIST 20106. Introduction to Modern South Asian History

(3-0-3)

More than one-fifth of the world's population lives in South Asia, a region comprised of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan and the Maldives. This introductory course will provide a survey of issues and events in South Asian history from the establishment of British East India Company rule in 1757 to the decolonization of South Asia in 1947. The course will explore the following themes: the rise of a trading company, the East India Company, and its transition into a colonial power; the emergence of a colonial economy; colonial production of knowledge; nineteenth and twentieth-century cultural, religious and political movements and formations of new identities; the emergence of elite and popular nationalisms; independence; and the partition of the subcontinent.

HIST 20110. Ancient Japan

(3-0-3)

This course provides training in understanding and engaging history as a series of wide-ranging debates. The class will examine three issues: first, the politically charged question of Japan's origins in myth and archeology; second, the question of whether the forces of Chinese culture or nature as disease and environmental degradation defined the Yamato state from the sixth to the ninth century; and, third, whether Heian court power until about 1200 rested on economic, political, military, judicial, or aesthetic grounds. The second purpose of the course, the development of the disciplined imagination necessary to enter another culture and another time, relies on the reading of primary texts in translation. There will be three tests and several classroom assignments.

HIST 20200. Western Civilization I

(3-0-3)

Corequisite: HIST 22200

A survey of the central themes in Western civilization from ancient Mesopotamia to the Renaissance. Emphasis will be on problems of social organization, especially the mutual obligations and responsibilities of individuals and states; evolving concepts of justice; aesthetic standards; religious ideas and institutions; basic philosophical concepts; different kinds of states; and the ideologies that defined and sustained them.

HIST 20204. King Arthur in History and Literature

(3-0-3) Boulton

This course—intended to introduce undergraduates to one of the major themes as well as to the interdisciplinary approaches characteristic of medieval studies—is a team-taught examination of the development and influence of the legend of Arthur, King of Britain, both in history and in literature. The historical Arthur is very obscure, but he was probably a Romanized Celtic war-leader who fought the invading Anglos and Saxons at the beginning of the history of what was to become England. His memory was preserved in the oral literature of his own people, now called the Welsh, but he was soon converted into a mythic hero surrounded by magical companions. In the 12th century, this legendary Arthur was not only incorporated into the new historiography of England (since 1066 under the rule of French-speaking Normans), but into the new genre of literature created in France around 1150—the chivalric romance—which itself embodied a new ideal for the relationship between men and women derived from the songs of the troubadours of the south. The great majority of these tales of love and marvelous adventures written over the next four centuries were to be set in the court of the legendary Arthur, and the Round Table was invented in this period as the central focus of the ideals it was made to represent. History soon began to imitate literature, as kings and princes attempted to emulate the idealized Arthurian court in their tournaments and other court festivities, and from 1330 to 1469 actually founded orders of knights based on the Round Table. The class will read the relevant parts of some of the chronicles, histories, and epics in which Arthur was mentioned, as well as a representative sample of the Arthurian romances of the later period, and of related documents like the statutes of the chivalric orders.

HIST 20400. Western Civilization since 1500

(3-0-3)

This course will provide a comprehensive overview of European history over the last four centuries. During this period European states emerged as powerful institutions, extending their control over the peoples of Europe, and battling with each other for territory, subjects, and status, both in Europe and throughout the world. The enormous growth of state power provoked opposition, from both elites and ordinary people. This course will explore resistance to the state as well as tracing its growth, with special attention paid to the English revolution in the 17th century, the French and Russian revolutions in 1789 and 1917, and the collapse of the Soviet empire in the late 20th century. Particular attention will be paid to the development of the ideologies of liberalism, socialism, and nationalism, which defined new relationships between people and their states in the 19th and 20th centuries. The changing status of women, and the emergence of feminism as another ideological alternative, will be dealt with as well. The

conflicted relationship between Europe and its colonial territories will constitute another major theme. In addition to political and social developments, this course will treat in broad terms the major cultural and intellectual trends in Europe, examining the growth of the critical spirit in the Enlightenment and the emphasis on feeling and subjectivity in the age of Romanticism. The course will conclude with a section on recent developments, focusing on efforts to create an integrated Europe, and on the emergence of the current tensions that divide Europe and the United States.

HIST 20430. The Irish in Us: Comparative Perspectives on Being Irish and Irish-American

(3-0-3) Griffin

This class provides an educational and entertaining reflection on the deep historical and cultural intertwining of America and Ireland, and the extent to which our world is shaped by Irish people, culture and heritage. Drawing upon the skills of three Notre Dame professors, each of which has different interests, in this class we explore comparative perspectives of the cultural, economic, and political context of being Irish and Irish-American. In this class we seek to provide new perspectives on the interconnections between Ireland and America, in the past, present and future. Based on lectures and presentations, we explore some fundamental historical questions, such as how were the Irish Famine, emigration, and economic developments of the 18th–20th centuries interconnected, and how did the Irish diaspora shape the historical and cultural trajectory of America. Similarly, we explore what it is to be Irish and Irish-American, be it through family history, or growing up watching Notre Dame football. What are the interconnections between regional Irish identities, language, and history? Finally we explore how American, let alone global, culture is being actively shaped by Irish culture (such as literature, theater, film, music), and the extent to which this is a dynamic process. Looking at it from a different perspective, how has the reintroduction of such an idealized form of Irishness to Ireland, impacted the country? Drawing upon literature, history, archaeology and folklore, this class will illustrate the different ways we can explore and conceive of the past and present world of Ireland and Irish-America. Seeking answers to these questions offers students a fascinating opportunity to learn more about Ireland, America, and the connections between these cultures and peoples.

HIST 20600. U.S. History to 1877

(3-0-3) Griffin

Corequisite: HIST 22600

A survey of the social, cultural, and political history of the British North American colonies and the United States to the close of the Civil War. Organized around the question of American “nationhood,” topics include Native American, European, and African encounters; regional development and divergence; imperial conflict and revolution; constitutional development and argument; democratization and its implications; religious impulses and reformism; immigration and nativism; the importance of land and westward expansion; slavery and emancipation; sectional division and Civil War.

HIST 20605. U.S. History since 1877

(3-0-3) Plopper

Corequisite: HIST 22605

This course focuses on major events (depressions, wars, migrations, social movements) and processes (suburbanization, technologies, etc.) which can arguably be said to have had widespread and enduring influence in the United States since 1877. We will approach U.S. history through lectures, primary sources, and discussions that add memorable insight and depth. Some of these historical moments provide opportunities to reflect on the place of the United States in the world and to ask what makes for historical significance. By the end of the semester, students should be able to offer a reasonably coherent discussion of this period. This includes a basic interpretive understanding of many major events in U.S. history that also grasps some ways these major events have shaped our own place in time and space. Note: This course is open to all students and satisfies the university history requirement; history majors may count up to two lower-level courses toward the major.

HIST 20612. American Catholic Experience

(3-0-3)

Corequisite: HIST 22612

This course is a survey of the history of Roman Catholicism in the United States from colonial times to the present. We will consider, among others, the following topics: immigrant and ethnic Catholicism, women in the Church, Catholic social reform, devotional and parish life, and the relationship between Catholicism and American democracy. Texts for the course include a general history, two interpretive works, and a course packet of primary sources. Requirements include a midterm and final examination and three short (three- to five-page) essays. Students enrolled in this class must also take HIST 22612, a tutorial.

HIST 20614. Critical Issues in American History

(3-0-3)

The purpose of this course is two-fold: to provide the students with a college-level survey of American history from the founding of the colonies through the 1980s, and to examine in some detail fourteen “critical issues” in our history: cultural diversity in the American colonies, the American Revolution and the Constitution, the Federalist contributions of George Washington and John Marshall, Jeffersonian and Jacksonian democracy, slavery and antebellum reform, the Civil War and Reconstruction, the industrial revolution, Progressivism, the Wall Street Crash and Great depression, Franklin Roosevelt’s New Deal, World War II and the cold War, Civil Rights and reform, the Great Society and Vietnam, and the Reagan Revolution.

HIST 20631. History of American Sport since 1876

(3-0-3)

Since professional baseball was institutionalized with the establishment of the National League in 1876, sport in the United States has played a large and complex role in American life, intertwined with such developments as the rise of the mass media, democratization of higher education, race and gender issues, and the growing popularity of sport as a form of entertainment exemplified by the rise of the ESPN family of networks. This course will explore the social, cultural, political and economic implications of sport in American society since 1876. It will include such topics as the rise of professional sport, the long history and rapid fall of the reserve clause that gave so much power to pro sport owners, the origins and development of college sports (and Notre Dame’s place in that history), the rise of sports heroes in the 1920s, the role of sport in the Cold War, sport and the social turmoil of the 1960s, and sports’ impact on changing race relations and gender roles in recent decades.

HIST 20750. History of U.S. National Security Policy since 1890

(3-0-3) Soares

In the aftermath of 9/11, with American troops deployed in Afghanistan and Iraq, and concern about the nuclear ambitions of such nations as North Korea and Iran, “national security” is the phrase that is often discussed and is of crucial importance to informed citizens. This course will examine national security policy: what it is, how it is formulated and executed, and how U.S. national security policies have evolved since the 1890s. Using a variety of readings and films such as *Casablanca* and *Dr. Strangelove*, this course will examine U.S. national security policies from the late 1890s through two world wars, the interwar period, the Cold War, the post-Cold War years, and up to the current post-9/11 world. We will identify continuities and departures in historic U.S. national security policies, and consider the roles of policymakers and their critics in a self-governing society.

HIST 20900. Introduction to Latin American History

(3-0-3)

This course will introduce students to the history of Latin America from the encounter of European and indigenous civilizations in 1492, up to the present. It will cover three major historical periods (colonial, nineteenth-century, and contemporary), utilizing a variety of sources, including history, literature, and film. The course will pay special attention to such issues as the dynamics of

centralization and fragmentation, regionalism and caudillismo, political instability, and international relations. However, it will also serve as an introduction to Latin American culture, popular as well as elite, as reflected in literature and art.

HIST 20910. History of Mexico

(3-0-3)

Mexican history is often portrayed as a recurring conflict between foreign conquests and an authentic Mexican culture. We will examine this theme over 500 years of Mexican history, from indigenous cultures and the Spanish conquest to the 20th-century revolution and its social consequences. Through readings, lectures, discussions, art, and film we will explore the roots of modern Mexico and its development from the 15th century to the present. No background in Mexican or Latin American history is required.

HIST 20975. Making Australia

(3-0-3) Miscamble

The struggle to “make” Australia, as opposed to replicating Britain, got underway early on after European settlement, and it has been in process ever since. This course will seek to understand this nation-building process. Most of the course will be devoted to examining the major issues in Australia’s history, beginning with an appropriate treatment of Aboriginal history through to the present debates over Australian identity and the nation’s future. The final part of the course will explore important issues in contemporary society and culture. This course will have special interest for students who either have studied or plan to study in the Notre Dame Australia program. (It is of special benefit to the latter group.) In addition to reading 5–6 books, students must view a number of important Australian documentary and feature films. A willingness to participate in extracurricular activities is a prerequisite for the course. (Please don’t sign up for the course if you can’t attend out-of-class events.)

HIST 20990. Environment and Civilization

(3-0-3) Fernandez-Armesto

Corequisite: HIST 22990

This course is about how some societies transform the environment by radically interventionist strategies: highly selective breeding and winnowing of species, intensive agriculture, and city building. We investigate how and why this “civilizing ambition” has functioned and failed in a variety of settings, and compare its effects with those of other strategies adopted by less ambitious societies. We approach the history of the world not by the usual strategy of classifying events according to the periods or cultures in which they occurred but by using different environments as our units of enquiry, looking at tundras and taigas, arid deserts, forests of different kinds, alluvial soils, grasslands, highlands, and coastal and marine environments, and seeing how people have exploited the peculiar opportunities and responded to the challenges of each.

HIST 22990. Environment and Civilization Tutorial

(0-0-0)

Corequisite: HIST 20990

A weekly tutorial required for students taking HIST 10990 or its crosslists.

HIST 30030. 20th-Century World History

(3-0-3) Westrate

This course examines the political, cultural, social, and economic development of the world from the outbreak of the First World War to the present. Through lectures, readings, discussions, movies, and research we will investigate such themes as the effects of World War I, the Russian Revolution, the rise of totalitarianism, the Great Depression, World War II, de-colonization, the Cold War, national liberation wars, the demise of communism, and the realignment of the post-Cold-War world into global networks. Our goal will be to assess the importance of these and other subjects in today’s world.

HIST 30050. African History to 1800

(3-0-3) Ocobock

This introductory course covers the history of Africa from earliest times until and the slow death of the slave trade in the 19th Century. We will explore

the formation of African societies and their interaction with harsh ecological surroundings as well as the expansion of African trading networks and emergence of strong African states and empires. We will also discuss Africa’s role in the production and sale of slaves around the globe and the implications of the global slave trade for African societies.

HIST 30060. African History Since 1800

(3-0-3)

This course will focus on African history from 1800 to the independence movements of the 1960s. In the 19th century, new states, economies, and societies emerged in Africa as African peoples developed new relations among themselves and with the rest of the world. With the “scramble for Africa” of the 1880s, European powers colonized Africa and suppressed many of these processes. In the 1960s, however, self-rule resurged as Africans helped throw off the yoke of colonial rule and form independent nation-states. This course will consider the social, economic, and political history of Africa by using case studies from the Democratic Republic of Congo (Congo-Zaire), Nigeria, Sierra Leone, and South Africa.

HIST 30061. History of Modern Africa

(3-0-3) Ocobock

This course is an introduction to the history of the peoples of Africa from the late nineteenth century to the present day. During the term, we will consider the ways in which Africans shaped and were shaped by the transformative events of the period. In the second half of the nineteenth century, European powers conquered and colonized much of the continent. Over the next sixty years, Africans lived and died under the yoke of European rule; some resisted, others collaborated, but all influenced the nature of colonialism and its eventual collapse. By the 1960s, most Africans were free of foreign rule. Since then the peoples of Africa have endeavored to achieve political stability, navigate Cold War politics, harness development aid, and adapt to a globalizing economy. In recent years, they have succumbed to brutal wars and endured devastating famines, but they have also inspired the world with their triumph over apartheid, emerging vibrant democracies, rich cultures, and deep history. In this class, we will identify, problematize, and debate these major themes in Modern African history. We also will make use of a variety of texts, from historical documents to classic academic works to works of African art, film, and fiction.

HIST 30065. Social History of Modern South Africa

(3-0-3)

This course offers an overview of modern South Africa from the perspective of radical social history, a major intellectual tradition in South African studies. It will begin by identifying processes of dispossession, urbanization and proletarianization set in train by South Africa’s mineral revolution. It will then look at the clash between imperial and Boer interests, and the South African war. The Union of South Africa in 1910 represented a re-organization of white power, and the course will turn to the experiences of Union for both black and white, including the emergence of African nationalism and other culturally-located forms of resistance. The apartheid state was inaugurated in 1948, and the course will examine the consolidation of the state, how it sought to control black and white citizens and subjects, and the accelerating politics of defiance. There will be particular emphasis on Black Consciousness and its role in the 1976 Soweto revolt. By way of conclusion the course will turn to the culture and politics of resistance in the 1980s, up to the initial dismantling of apartheid in 1990.

HIST 30075. Muhammad and the Qur’an

(3-0-3) Mirza

Islamic law, theology, and spirituality are all derived primarily from the Qur’an and the practice (sunnah) of the messenger and exemplar Muhammad. This course provides students with an in-depth introduction to these twin foundations of the Islamic religious tradition. Students will read a comprehensive biography (sira) of Muhammad based on the earliest sources. Students will also read selections from the Qur’an, contextualized within the narrative of Muhammad’s prophetic career. In addition to familiarizing students with the traditional narrative of Muhammad’s

life and the style, content and structure of the Qur'an, this course also explores contemporary questions and debates in the historical-critical study of Islamic origins.

HIST 30076. Islamic Religious Thought: Formation and Development

(3-0-3) Mirza

This course traces developments in the first few centuries of Islam in theology (kalam), law (shari-a and fiqh), and mysticism (tasawwuf or sufism). Students will gain a solid understanding of diversity within Islam including and beyond the typical distinction between Sunnism and Shi'ism. Beginning with a brief overview of Muhammad and the Qur'an, the course explores the issue of succession, codification of hadith, formation of major schools of thought, and development of consensus. Students will receive both a historical survey and read primary texts in translation. Given that most modern Islamic movements view the first few centuries of Islam as a "golden age"—this course provides essential background for students to engage debates that are taking place within contemporary Islam.

HIST 30078. Hieroglyphs and History

(3-0-3) Ladouceur

This course will focus on Egyptian hieroglyphs both as a means to reconstruct Egyptian history and culture as well as a reflection of that culture. The student will be taught to translate and interpret primary sources especially on monuments and archaeological finds. Material from the tomb of Tatakhamun will be read and analyzed in detail. In addition there will be lectures and discussions on specific historical topics and also on developing chronologies, understanding color symbolism, recognizing the numerous Egyptian deities, and interpreting Pharaonic names.

HIST 30079. Death and the Afterlife in Ancient Egypt

(3-0-3)

Prerequisite: HIST 30078 or CLAS 30799

After an initial survey of historical sources, this course will focus on a wide range of texts, archaeological artifacts, and architectural remains associated with Egyptian funerary practice and conceptions of the Otherworld.

HIST 30080. Medieval Middle East

(3-0-3) Tor

Corequisite: HIST 32080

This course offers a survey of Middle Eastern history from the rise of Islam in the seventh century C.E. until the rise of Mongol successor polities in the 15th century. The course is structured to cover political, religious, and cultural developments and their relationship with broader changes in society during the formative centuries of Islamic civilization. Specific topics include the career of the Prophet Muhammad and the origins of the earliest Muslim polity; the creation and breakup of the Islamic unitary state (the Caliphate); ethnic, racial, and religious tensions and movements in the medieval Islamic world; the impact of Turkic migrations on the Middle East; the diversity of approaches to Muslim piety and their social and political expression; popular culture; non-Muslims in Islamic society; and the creation of the medieval Islamic "international" cultural order. Among the more important themes will be long-term cultural and social continuities with the Islamic and ancient Near East, and concepts of religious and political authority.

HIST 30082. Christianity in the Middle East

(3-0-3)

The spread of Christianity from Palestine to the West is well documented. Less well known is the development of Christianity in the lands of its origin, the Middle East. This course introduces students to the largely untold story of Christianity that expresses itself in the native Aramaic language and culture of the Semitic East. Topics include the origins of the indigenous Christian churches of Syria, Lebanon, Palestine, Armenia, Iraq, and Iran. The development of these traditions will be viewed in relation to western/European forms of Christianity that have come to dominate and that are viewed as mainstream and normative. The

course concludes with an assessment of the impact of religious fundamentalisms, the diaspora of Middle Eastern Christians throughout Europe and the United States, and the contemporary state of Christianity in the Middle East.

HIST 30083. The Medieval Iranian World: Iran, Afghanistan, and Central Asia

(3-0-3) Tor

The Iranian cultural world, from late antiquity until the 13th century, stretched from what is today Iraq all the way to India, and from the Persian Gulf deep into Central Asia. Although in the seventh century the early Islamic conquests put an end to the Persian Empire and occupied the Iranian world, a new era of Iranian hegemony began in Islamic history with the 'Abbasid Revolution in 750 and the establishment of the new Islamic capital, Baghdad, in the old Persian heartland. This event inaugurated a growing dominance by Iranians, and Persian traditions, in all areas of Islamic civilization—cultural, religious, military, and political—culminating in the establishment of the autonomous Persianate dynasties that ruled the Islamic heartland from the ninth century until invading Turco-Mongol tribes seized political control of the Islamic world in the twelfth century. This course will explore the many ways in which the Persianate world—today's Iran, Afghanistan, and Central Asia—helped form the Islamic world, focusing on its contributions to political order and ideology; its leading role in the formation and elaboration of Sunnism; its rich cultural productions; and its expansion of the borders of Islam.

HIST 30085. Modern Middle East

(3-0-3)

This course surveys Middle Eastern history from 1500 to the present. The primary themes to be covered include: the emergence and demise of the last Muslim unitary states; European colonial and imperial penetration of the Middle East in the 19th century; the social and cultural impact of imperialism; state-building in the 20th century; new ideologies/nationalisms; and contemporary problems of political and economic development. We will also consider the most important movements of Islamic reform and revival over the past two centuries.

HIST 30086. Twentieth-Century Jerusalem

(3-0-3)

This course examines the relationship between what could roughly be defined as "the West" (Europe and the United States) and Middle Eastern societies from the Napoleonic invasion of Egypt in 1798 until the American invasion of Iraq in 2003. We shall start by trying to make sense of the terms the "West" and the "Middle East." We shall then explore different and eclectic themes such as European colonial penetration into the Middle East, reciprocal stereotypes of the Middle East and the West, cultural exchanges between these regions, and the relationship between contemporary Europe and its growing Muslim population. We shall also examine American involvement in the region by focusing on themes such as oil interests, the Arab-Israeli conflict and the Iraqi imbroglio. Finally, we shall discuss contemporary Middle Eastern perceptions of the West in light of American hegemonic power around the globe in general and in the Middle East in particular.

HIST 30087. The Israel-Palestine Conflict

(3-0-3) Kaufman

This class discusses the roots, evolution, current situation and prospects of resolution of the Israeli-Palestinian conflict. In order to better understand this theme the class will also locate this conflict in larger regional and global perspectives. Thus, issues such as nationalism in the Middle East, colonial impact in the region, the Arab states and their involvement in the conflict, cold war and post-cold war dynamics, will all be an integral part of the class discussions. We will also juxtapose the competing narratives of Israelis and Palestinians towards this conflict. Finally, we will engage in an un-historical practice by looking at the future and thinking about possible avenues for concluding this protracted conflict.

HIST 30088. Middle East and the West

(3-0-3)

This course examines the relationship between what could roughly be defined as "the West" (Europe and the United States) and Middle Eastern societies from

the Napoleonic invasion of Egypt in 1798 until the American invasion of Iraq in 2003. We shall start by trying to make sense of the terms the “West” and the “Middle East.” We shall then explore different and eclectic themes such as European colonial penetration into the Middle East, reciprocal stereotypes of the “Middle East” and the “West,” modern perceptions of the Crusades, cultural exchanges between these regions, and the relationship between Europe and its growing Muslim population. We shall also examine American involvement in the region by focusing on themes such as oil interests, the Arab-Israeli conflict and the Iraqi imbroglio. Finally, we shall discuss contemporary Middle Eastern perceptions of the West in light of American hegemonic power around the globe in general and in the Middle East in particular.

HIST 30099. Borders, Boundaries, Frontiers

(3-0-3) Kaufman

This course explores political borders, boundaries and frontiers and their changing meaning and dynamics from the beginning of the colonial era (circa 1500) until the present. We will explore the formation of political borders, life along borders and border conflicts and their resolutions (or lack thereof). Themes, including colonialism and globalization, will also be discussed through the prism of political boundaries. Geographically we will look at areas including the Middle East, Africa, Europe, South Asia and the U.S.-Mexican border in order to analyze boundaries through both global and regional perspectives.

HIST 30106. Modern South Asia

(3-0-3) Sengupta

Home to over a billion people, just over 23% of humanity, the South Asian subcontinent is a fascinating laboratory in which to analyze the unfolding of such themes in modern history as colonialism, nationalism, partition, decolonization, post-colonial democracies, the modern state, economic development, center-region problems and relations between Asia and the West. The course will consider critical themes in social, political, economic, and cultural history, which will include imperialism, capitalism, nationalism, religious politics, regionalism, ethnicity, globalization, diaspora, ecology, social inequality, and gender, development, and democracy. It will not only provide a lively historical narrative told through lectures based on scholarly research and primary texts, but will also seek to embellish this narrative with the perception and articulation of vision and sound, as well as with readings from representative genres of South Asian literature.

HIST 30110. Ancient Japan

(3-0-3) Thomas

History is not a single “true story,” but many competing narratives, each defined by values, interests, and political commitments. This course on ancient Japanese history provides an overview of three sets of competing narratives: first, the politically charged question of Japan’s origins, when we explore archeological evidence and chronicles of the Sun Goddess; second, the question of whether culture (through continental imports of writing, religious forms, and statecraft) or nature (as disease and environmental degradation) defined the Yamato state from the sixth to the ninth century; and, third, whether Heian court power rested on economic, political, military, judicial, or aesthetic grounds and if its foundations were undermined internally or by the invasion of the Mongols. In examining these competing narratives, we aim to develop the disciplined imagination necessary to enter another culture and another time.

HIST 30115. Japan’s Imperial House

(3-0-3)

Japan boasts the longest, unbroken imperial line extant today, but what does this continuity really mean? This course looks at Japan’s emperors and empresses from antiquity to the present, raising questions about the nature of power, the idea of good government, gender, divinity, war responsibility, and the liberty of the family now called upon to symbolize a purportedly democratic nation. Although most of the course will focus on modern emperors, it begins with Japan’s earliest political structures in order to ask such questions as: Was the Imperial House an indigenous idea or was it an imitation of Chinese ideas of power? Why were there so many powerful women leaders in ancient Japan and why did Japan stop having

empresses on the throne? What is the relationship between the imperial house and the various religions of Japan? The course will then consider the medieval and Tokugawa periods asking why powerful samurai failed to overthrow the militarily impotent emperors. Finally, the course will turn to the modern period, beginning in the middle of the 19th century with the elevation of the Meiji Emperor to unprecedented prominence. Why was the ancient imperial house used to modernize Japan? Even though sex of emperors has been male for centuries, why were ancient emperors female and why is the imperial gender (and Japan as a whole) in the modern period often regarded as female? Was Hirohito guilty of fomenting war? What is the function of the Imperial House today? This course sweeps through myth and 1500 years of Japanese history, tracing the permutations, continuities, and discontinuities of the imperial line.

HIST 30120. History of Modern Japan: From Samurai to Salarymen, From Feudalism to Fascism

(3-0-3) Thomas

This introduction to modern Japanese history focuses on political, social, economic, and military affairs in Japan from around 1600 to the early post-WWII period. It considers such paradoxes as samurai bureaucrats, entrepreneurial peasants, upper-class revolutionaries, and Asian fascists. The course has two purposes: (1) to provide a chronological and structural framework for understanding the debates over modern Japanese history; and (2) to develop the skill of reading texts analytically to discover the argument being made. The assumption operating both in the selection of readings and in the lectures is that Japanese history, as with all histories, is the site of controversy. Our efforts at this introductory level will be dedicated to understanding the contours of some of the most important of these controversies and judging, as far as possible, the evidence brought to bear in them.

HIST 30125. Japan Through the Camera Lens

(3-0-3)

Japanese culture embraced the camera almost as soon as it was invented in Europe. Even while the Japanese government rigorously controlled contact with outside nations, this new device for recording and exploring the world entered a Japanese port and was put to use by Japanese and, eventually, by foreigners to document Japan’s opening to the West, its military adventures, its transformation into an industrial and consumer society, and its erotic longing. This course uses photography and film and writing about art and politics as a way of exploring key issues in Japanese society.

HIST 30140. Pre-Modern China

(3-0-3)

The course will provide a general survey of Chinese history from the Shang Dynasty (1766–1027 B.C.) to A.D. 1600. Besides highlighting the major developments of each dynasty, the course will devote special attention to the Confucian and legalist underpinnings of the Chinese empire, the influence of Buddhism on Chinese society, the emergence of gentry culture and the civil service examination system, and the phenomenon of “barbarian” conquest and cultural interaction.

HIST 30141. History of Chinese Medicine

(3-0-3)

In light of the contemporary currency of certain Chinese practices in the field of alternative medicine, this course will explore the phenomenon of Chinese traditional medicine in both its historical and contemporary settings. The first unit, Medicine in Ancient China, will explore the earliest medical ideas of the Chinese and will demonstrate how the state’s political unification gave rise to a correlative cosmology that not only included Heaven and Earth, but also human beings as integral elements of an organic cosmos. The second unit will explore the influences and contributions of Taoism (Daoism) and Buddhism to Chinese medicine and will explore what it meant to be both physicians and patients in late imperial China. The third unit will focus on medicine in contemporary China and will feature the experiences of Elisabeth Hsu, a student of Chinese medical anthropology who, as a part of her doctoral research, enrolled as a student in Yunnan Traditional Chinese Medical College between September 1988 and December 1989. We will conclude the course with a brief examination of the influence of Chinese medicine on the contemporary world.

HIST 30142. Chinese Mosaic: Philosophy, Politics, Religion

(3-0-3)

This course is a special-topics class that provides an introduction to the diverse life ways constituting the puzzle of the Chinese people. The course will chart the terrain of current Chinese imagination as it has been shaped from the contending, and often contentious, influences of religion, philosophy, and politics, introducing students to the heralded works of the Chinese intellectual tradition while at the same time requiring critical engagement with the philosophic and religious traditions animating this culture. Thus, as they learn about China, students will also reflect on how it has been interpreted by Chinese and by Westerners. From readings in both primary texts and secondary interpretations, the class will reconstruct the ethos of the Chinese, attending particularly to the ways in which inherited traditions have been affected by the rise of the modern, authoritarian state. Our concerns will include questions of philosophy as a response to moral crisis, the abridgement of tradition in ideology, the creative reinvention and persistence of popular religion, and the politics of representation. From our attempts to address these concerns, we will reconstitute the philosophic discourse of ancient China and the religious practice of the present in an unconventional, but more evocative, manner that engenders understanding of contemporary political resistance to single-party rule.

HIST 30143. Chinese Ways of Thought

(3-0-3)

This is a special-topics class on religion, philosophy, and the intellectual history of China. Conventionally it is assumed that the religion and philosophy of the Chinese can be easily divided into three teachings: Daoism, Buddhism, and Confucianism. This class questions this easy doctrinal divisibility by introducing the student to the world-view and life experience of the Chinese as they have been drawn, and local cultic traditions, worship and sacrifice to heroes, city gods, earth gods, water sprites, nature deities, and above all, the dead. China's grand philosophical legacy of Daoism, Buddhism, Confucianism, and later Neo-Confucianism with which we have become familiar in the West, derived from the particular historical contexts of local practice and it was also in such indigenous contexts that Islam and later Christianity were appropriated as native faiths.

HIST 30144. Introduction to Chinese Civilization and Culture

(3-0-3) Yang

This course surveys Chinese culture and civilization from the beginnings to the present time. Readings include traditional historical, philosophical, political, religious and literary texts as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to form comparative and reflective perspectives.

HIST 30145. Confucian China and its Modern Fate: A Broad Survey of Chinese History

(3-0-3) Murray

This course explores Chinese history from the Shang dynasty to today in terms of the development of Confucianism and its repeated reformulations in response to Buddhism, Western Imperialism, Marxism, and the global capitalism of today.

HIST 30150. Modern China

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of the Qing dynasty) to the present. It will highlight China's evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–49, back to a period of strength under the Communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

HIST 30169. Sex, Freedom, and Economy in Contemporary China

(3-0-3) Jensen

Today China is undergoing a revolution (a word used so frequently as to be meaningless, but very meaningful in this case as we will learn) in society, politics, economy, and thought perhaps as significant as that which brought the Chinese Communist Party to national power in 1949. The objective of this course, constructed through film and new media investigation, along with readings on social status, identity, sexuality, work, home, youth culture, gender, business, education, sports, ecology, is to come to an understanding of the multiple domestic forces that have made China a global power. Furthermore, the course will familiarize the student with the very complex ramifications of the passionate national quest for international recognition as it affects every aspect of present-day life while exploring the mercurial manner in which the economic transformation of China has been represented in the media. In this last respect, it represents an experiment in cultural studies in that its avowed subject, contemporary China, is studied in dialogue with the United States—the two nations most exemplifying the promise and terror of modernization. No knowledge of Chinese or previous knowledge of China is required.

HIST 30170. Ancient and Medieval South Asia (before Europe)

(3-0-3)

This course covers the history of the South Asian subcontinent from the beginning of the historical period to about 1700. During this period, the region witnessed the formation of regional states, the rise and fall of strong empires, the evolution of increasingly complex forms of caste and kinship ties, multiple religious traditions including Hinduism, Buddhism and Islam, and the coexistence of different economic organizations ranging from hunting and food-gathering to sophisticated urban communities. Discussion will focus on the transformation of local kinship ties into regional kingdoms and empires, the evolution of religion and the legacy of the expansion of Islam and the consequent rise of Turkish, Afghan and Mughal empires in the area. The main purpose of the course is to introduce students to South Asian civilization in a global context, with special emphasis on the wider linkages of transnational and world history. Finally, there will be a discussion of how interpretations of the South Asian past resonate in the region's modern politics. Besides learning about India this course will provide transferable skills about analyzing primary resources, seminar presentation and effective ways of using Internet resources.

HIST 30189. South Asia: Colonialism and Nationalism

(3-0-3)

This course will examine the colonial encounter in the Indian subcontinent, i.e. the period of the advent, establishment, and collapse of British colonial power during the period roughly between 1750 and 1950. It will explore the nature of this encounter and its impact on the subcontinent, particularly the emergence of modern nationalisms and the making of the modern South Asian nation-states of India and Pakistan. Recent scholarship on British colonialism and Indian nationalism has been rich and diverse, examining areas ranging from the nature of “anti-colonial” nationalism to the impact on the economy, on state practices, social structures such as caste, peasant resistance, gender relations and modern history-writing itself. One of the objectives of the course is to introduce students to some of the major historical debates in South Asian history through the concepts of nationalism, colonialism and modernity. Another is to think about the ways in which this encounter has been represented in different kinds of texts ranging from scholarly texts to fiction and films.

HIST 30201. History of Christianity to 1500

(3-0-3)

A survey of the development of Christianity from late antiquity to the eve of the 16th-century Reformation. Emphases include processes of Christianization, definitions of prescribed and proscribed beliefs and practices, institutional elaboration, relations with imperial and royal authority, impact of and on culture, and varieties of religious behaviors. Although the history of the Latin (Catholic) church is highlighted, the dynamics and consequences of its separation first from

the Oriental and then from the Orthodox churches will be examined. The course aspires to achieve a routine of interactive lectures. There will, in addition, be three small-group reading seminars and at least one individual conference. Requirements include three short (five to six pages) papers that engage the texts discussed in the seminars, midterm and final examinations, class attendance and participation. The written examinations seek to assess knowledge applied as analysis.

HIST 30202. History of Catholicism, 300 to 1500

(3-0-3)

Course explores the evolution of Catholicism from 300 to 1500.

HIST 30209. Blessed are the Poor? Poverty and Charity, 100 B.C.–A.D. 1600

(3-0-3)

Debates rage back and forth today in politics and religion about social justice, poverty and charity. And, indeed, poverty is a serious problem, but we are not the first generation to grapple with it. From the slaves of the ancient world to homeless beggars and cripples at the beginning of modernity, from voluntarily poor monks to exploited women to revolting peasants, the many faces of the poor have haunted history. Society's responses have spanned the spectrum from heroic altruism to disdain and violence. In the one and a half millennia from the rise of a Christianity preaching charity to the birth of early modern reforms, the poor have always been with us. Did anything fundamentally change? What effect did all the efforts of society and religion have? Why have men and women approached poverty in so many ways, and what lessons about structures, causes and solutions does history offer? We answer these questions by looking at Christian Europe alongside glances at neighboring Jewish, Muslim and pagan traditions of charity. Students interested in social justice, poverty issues and religion's impact on the world are especially welcome.

HIST 30211. Sex and Gender in Greco-Roman Antiquity

(3-0-3)

This course examines the differing roles and stereotypes, forms of behavior, and values associated with women and men in Greco-Roman antiquity. Special attention is given to the preoccupations of the Greeks and Romans with the categories of "female" and "male" and to the dynamics of relations and relationships between women and men. The course both deepens knowledge of Greco-Roman society and provides an informed background for contemporary gender debates.

HIST 30212. History of Ancient Medicine

(3-0-3)

This course traces the development of medicine in the ancient Mediterranean world, concentrating on the medical beliefs, theories, and practices of the Egyptians, Greeks, and Romans. The course emphasizes the value of studying written sources such as the Hippocratic treatises and the works of Galen with artistic evidence and human remains. A connection between ancient and modern medicine is made by considering two contrasting models of disease, the biomedical and the biopsychosocial, that figure as the focus of a contemporary debate on health care.

HIST 30215. Sport and Spectacle in the Ancient World

(3-0-3)

This course introduces students to the centrality of athletics and spectacle in Ancient Greece and Rome. Beginning with a survey of sport practices in Mesopotamia and Egypt, the course moves on to discuss the role of athletics in Greek culture, including studies of the ancient Pan-Hellenic games like the Olympia, Homeric sport, Athenian citizen-athletes, and Spartan soldier-athletes. The latter part of the class concentrates on contests in the Roman Empire, to include an examination of the origin and development of the ultimate spectacle: the gladiatorial combats. We will also examine chariot racing in the Roman Empire, both the racers and the fans who became the first sport fanatics in the world. The course will also discuss the role of sport in society, sport and gender in the ancient world and modern (mis)conceptions of ancient athletics. The course materials will be multimedia, with readings in English.

HIST 30220. The History of Ancient Greece

(3-0-3)

An outline introduction to the history of ancient Greece from the Bronze Age to the Roman conquest. The topics covered include the rise of the distinctive Greek city-state (the "polis"), Greek relations with Persia, Greek experiments with democracy, oligarchy, and empire, the great war between Athens and Sparta, the rise to power of Philip and Alexander of Macedon, and the Greeks' eventual submission to Rome. Readings include narrative, documentary, and archaeological sources. The course prepares students for advanced study in ancient history. Offered biennially.

HIST 30221. Democracy and the Greeks

(3-0-3)

This course builds on CLAS 30105, The History of Ancient Greece, and examines the theory, practice, and development of ancient Greek, especially Athenian, democracy. Particular attention is devoted to comparing ancient with modern forms of democracy. Among the special topics studied are the origins of democracy, its advantages and disadvantages as a form of government, Greek ideas of alternatives to democracy, and democracy as an abiding legacy of Greek civilization to the modern world.

HIST 30222. The Greeks and Their Gods

(3-0-3)

Contrary to popular belief, the ancient Greeks were a strange bunch. Their statues were not really pristine white marble; their beliefs were hardly consistently rational. With this mindset as our starting point, in this course we will examine some literary (epic, hymns, tragedy, comedy), archaeological (temples, sanctuaries), and material (vase paintings, coins, votives, curse tablets) remains of the ancient Greek world to develop a picture of its varied and unique religious beliefs and practices. In addition to this historical perspective, this course will also take an anthropological and cultural approach to the study of Greek religion. We will consider anthropological definitions of religion and read comparative material from other cultures. Finally, in articulating Greek religious beliefs and practices, we will further consider how these institutions intersected with politics, gender, and class within and among Greek city—states, focusing on ancient Athens for which we have the most thorough documentation.

HIST 30223. The Age of Alexander

(3-0-3) Baron

This course examines the military achievements of Alexander of Macedon (356–323 B.C.) and their far-reaching political, social, cultural, and religious consequences. Topics covered include the Greek, Macedonian, Persian, and other cultural contexts of the time, Alexander's attitude toward divinity (including his own), his concept of empire, his generalship, and his legacy for Greco-Roman antiquity. Particular attention is devoted to representations of Alexander through the ages, beginning during his own lifetime with the accounts of ancient writers "historians and others" down to novels and films of the present day. Ancient authors and documents are read in translation.

HIST 30230. The History of Ancient Rome

(3-0-3) Hernandez

Corequisite: CLAS 32205

An outline introduction to the history of ancient Rome from Romulus to Constantine. The topics covered include the meteoric spread of Roman rule in the ancient Mediterranean, the brilliance of a republican form of government tragically swept away by destructive civil war, the rise of repressive autocracy under the Caesars, and the threats to empire in late antiquity posed inside by the rise of Christianity and outside by hostile invaders. Readings include narrative, documentary, and archaeological sources. The course prepares students for advanced study in ancient history. Offered biennially.

HIST 30231. Roman Law and Governance

(3-0-3)

The course will provide a historical overview of Roman Republican and Imperial law from the XII Tables to Justinian's Digest. We will investigate not only the

Roman judiciary and juristic writings, but also the other branches of government, in order to create a thorough understanding of the bureaucratic operation of the ancient Roman state. Specific topics covered include civil law, criminal law, constitutions, juries, jurists, magistracies, assemblies, and provincial administration. In addition to taking a midterm and final, students will write and rewrite one three- to five-page paper. Prior study of Roman history is recommended, but not required.

HIST 30232. Roman Literature and Culture

(3-0-3)

This course surveys the leading works of ancient Roman literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from six hundred years of literary versatility that combined enormous originality with a literary tradition inherited from the Greeks. Among the authors introduced are Plautus, Lucretius, Catullus, Cicero, Horace, Livy, Lucan, Tacitus, Apuleius, Ammianus, and Augustine. Special attention is paid to the formal structures of Roman literary works, the cultural issue they raise, and the lasting value of Latin literature to the modern age. The course prepares students for more advanced study in classical literature and culture. Offered annually.

HIST 30233. The Roman Revolution

(3-0-3)

This course builds on the work of CLAS 30012 and CLAS 30022 and examines the climactic events in Roman history of the late first century B.C. and early first century A.D. that changed Rome from an open republic to a repressive military monarchy. Chronologically the course begins with the appearance on the Roman political stage of the unabashedly ambitious Julius Caesar, and ends with the accession of a hereditary autocrat in the person of the morose ruler Tiberius. Exploring a variety of sources, the course focuses on the political tensions and civil commotions of the revolutionary era associated with warlords like Pompey, Crassus, Caesar, and Antony, and concentrates especially on the rise to power of Augustus, the most ruthless warlord of all, and his creation of a personal political regime that was to last in style for centuries.

HIST 30234. Archaeology of Pompeii and Herculaneum: Daily Life in the Ancient Roman World

(3-0-3)

The eruption of Mount Vesuvius in A.D. 79 buried two thriving Roman cities, Pompeii and Herculaneum, in a prison of volcanic stone. The rediscovery of the cities in modern times has revealed graphic scenes of the final days and an unparalleled glimpse of life in the ancient Roman world. The course examines the history of excavations and the material record. Topics to be discussed include public life (forum, temples, baths, inns, taverns), domestic life (homes, villas), entertainment (amphitheater), art (wall paintings, mosaics, sculpture), writings (ancient literary sources, epigraphy, graffiti), the afterlife (tombs), urban design, civil engineering, the economy, and themes related to Roman society (family, slavery, religion, government, traditions, diet).

HIST 30235. Roman Society and Culture

(3-0-3)

This upper-level course in ancient history is designed to introduce students to the principal features of Roman society and culture in the central era of Rome's history (c.150 B.C.–A.D. 200). After a general introduction to Rome's historical development, the course focuses on topics such as Roman social structure, marriage and family life; child-rearing and education; demography and disease; labor and leisure; life in the Roman army, religious festivals and rituals, the lives of women, and the practice of slavery. The course concentrates at large on Roman social relations in the transitional age from rule by Republican government to rule by autocratic emperors, and is intended to display what has been called the "fabulous diversity and richness" of Roman socio-cultural life. Original sources are read in translation. Previous exposure to Roman history is recommended but not required.

HIST 30236. History and Religion in Ancient Rome, ca. 100 B.C. – A.D. 500

(3-0-3)

Religious practice entails an understanding of the past. The city of Rome in the time of Christ contained over one hundred temples and shrines each with its foundation story. Rome's earliest law code, the Twelve Tables, which Roman boys learned by heart, contained sacred laws regulating religious conduct. The stories of temple foundations were part and parcel of Roman history, and Roman historians and poets recorded numerous divine interventions in the affairs of their city. Imperial expansion brought the gods and cults of foreign nations to Rome. This was the context of the advent first of Judaism and then of Christianity in the city of Rome and its empire. The course studies the very different understandings of history and of the presence of deity in human affairs that are expressed in the religion of the Roman state and in the foreign religions, chief of them Christianity that spread in the Roman empire. The Christian god also was thought to act in history, but not in ways that made sense in a Roman framework. Why then did Christianity prevail? The course closes with a brief outlook on the impact of Christian mission in the empires of ancient America that were conquered by the Spanish in the sixteenth century.

HIST 30237. Marcus Tullius Cicero (106–43 B.C.E.): Lawyer, politician, philosopher

(3-0-3) MacCormack

We know more about Cicero than about any other Roman individual. He was born in Arpinum, a small Italian town near Rome, and was sent for his education to Rome, where he made his name, first as a lawyer, and then also as a statesman. Law and politics were intimately related throughout Cicero's career, because even as a young and relatively inexperienced advocate, he pleaded political cases that required not just skill but also courage. As consul in 63 B.C. he confronted a conspiracy led by the Roman nobleman Catilina to overthrow the government. His subsequent exile was in part the work of the enemies he made in the course of these events. Thanks to his opposition to Julius Caesar, Cicero was forced to withdraw into private life, but he used these years to write dialogues about politics and law, philosophy and rhetoric. After Caesar's assassination, Cicero returned to politics in the hope of restoring some form of the traditional government of the Roman republic. This cost him his life. Cicero's influence was enormous. In his own time he was recognized—even by his enemies—as a brilliant orator whose views had to be reckoned with. Some of his ideas on natural law entered Justinian's *Digest*, and late Roman pagans and Christians thought long and hard about his philosophical works—but in very different ways. In the renaissance, it was Cicero's speeches that invited imitation and emulation. Then and subsequently, the hundreds of letters he wrote to his friend Atticus and to other contemporaries have revealed his personal life, and his reflections and uncertainties about the turbulent times in which he lived. This course aims to portray Cicero in his time, seeing him through his own eyes, and the eyes of contemporaries. There will also be opportunities to read and think about Cicero's impact on subsequent generations.

HIST 30250. The World of the Middle Ages

(3-0-3) Noble

Corequisite: MI 22001

The Middle Ages have been praised and reviled, romanticized and fantasized. The spectacular popularity of *Harry Potter*, *The Lord of the Rings*, and *Narnia* have brought a revival of interest in and curiosity about the Middle Ages. But what were they like, these ten centuries between Rome and the Renaissance? In this course, we will explore major themes and issues in medieval civilization in an attempt to offer some basic answers to that question. We will have in view three kinds of people: rulers, lovers, and believers. But we will also study carefully those who wrote about those kinds of people. We will constantly ask how can we know about the Middle Ages, and what kinds of things can we know? We will consider major literary texts as both works of art and historical documents. We will explore various kinds of religious literature. We will try to understand the limits, boundaries, and achievements of philosophy and theology. Some lectures will incorporate

medieval art so as to add a visual dimension to our explorations. This course will constitute an extended introduction to the dynamic and fascinating world of the Middle Ages.

HIST 30255. Medieval Cities

(3-0-3)

Corequisite: HIST 32255

This course will cover the structure and development of urban centers in Europe and the Mediterranean World from the Late Antique period until the 14th century. The course will begin with a general discussion of modern urban theory together with ancient and medieval conceptions of what makes a “city.” From this point, we will track the history of urban life in medieval Europe, Byzantium, and the Islamic World, with lectures devoted to urban geography, architecture, society, economy, and demography. We will also look in depth at medieval life in individual cities, including London, Paris, Cairo, and Constantinople, in order to consider variations in urban society and institutions in different regions.

HIST 30258. Heresy, Dissent, and Inquisition in Medieval Europe

(3-0-3) Perett

Burning at the stake was the ultimate punishment for heretics and witches in the European Middle Ages. This course examines the phenomenon of heresy and its repression concentrating on the fascinating but controversial primary sources that are our chief source of knowledge about it. We will explore religious heresy and dissent, both intellectual and popular, reappearing in Western Europe around A.D. 1000 for the first time since late antiquity. Several key questions will be addressed: how are heresy and orthodoxy defined, and by whom? How was heresy dealt with and what impact, social and ecclesiastical, did it have? Of particular interest is the fragile definition of heresy in the medieval West and the ways in which inquisitors understood and explained their work.

HIST 30259. The Church in the Middle Ages

(3-0-3)

This course offers an introduction to the story of the medieval church in the thousand years of the Middle Ages. It will begin in Late Antique Rome with Christians becoming the privileged majority religion, and will conclude in the late Middle Ages with attempts to reform the church on the eve of the Reformation. The course will draw upon primary sources as much as possible, and students will write papers on those sources. The lectures will balance matters of ordinary practice (such as the cult of saints) with organized religious life (such as monasticism) and the high politics of the papal church.

HIST 30260. Late Antiquity

(3-0-3)

This course will explore the transformation of the Roman World from about A.D. 300 to 600. We will ask: was the “fall” of the Roman Empire a civilizational catastrophe? Or was it a slow, messy process blending continuity and change? Or was late Antiquity itself a dynamic and creative period? Our emphasis will fall on the changing shape of Roman public life; the barbarians and their relations with Rome; the emergence of the Catholic Church; the triumph of Christian culture; and literature, art, and architecture in the late imperial world. There will be a midterm and a final. Students will write either one term paper or a series of shorter papers. Readings will emphasize primary sources.

HIST 30261. After Rome: Birth of the Medieval World

(3-0-3) Matis

This course will examine the history of the Roman world from the time of the first incursions of barbarians into the Roman Empire in the 3rd century to the time of the final invasions in the 10th. It will concentrate first on the crises of the 3rd century, and on the consequent transformation of the relatively unified, urbanized, tolerant, polytheistic Roman Empire of late Antiquity into the two distinct, deurbanized, intolerant, monotheistic, and politically divided civilizations of Latin or Catholic Christendom and Greek or Orthodox Christendom. Next it will briefly examine the emergence in the 7th century of the new monotheistic religion of Islam and of the new civilization and empire centered on it, which

quickly conquered not only the old Persian empire but most of the Asian and all of the African provinces of the continuing Roman empire, and in 711–18 conquered most of Spain as well. The remainder of the course will concentrate on the history of Latin Christendom and its pagan barbarian neighbors to the north and east between the beginning of the Germanic conquests of the western provinces ca. 400 and the final conversion of the peoples of central and northern Europe to Christianity and the simultaneous emergence of a new socio-political order in the older kingdoms around 1000.

HIST 30263. Age of Charlemagne

(3-0-3)

The Carolingian (from *Carolus*, Latin for Charles: Charles the Great—Charlemagne—was the most famous Carolingian) period, roughly the 8th and 9th centuries, was foundational for Western Europe. But this was also the time when the mid-Byzantine Empire consolidated its position and when the Abbasid family of caliphs introduced important and durable changes in the Islamic world. This course will focus on the West in the age of Charlemagne, but will draw frequent comparisons with and make continuous reference to Europe’s Byzantine and Islamic neighbors. The course will explore such themes as: Europe’s Roman and Christian inheritances from antiquity; the peoples of the Carolingian world; kingship and empire; political and social institutions and ideologies; religious and secular law; war and diplomacy; agriculture and trade; the church—popes, bishops, monks, and nuns; theology; art and architecture; Latin and vernacular literature. Reading assignments will combine modern scholarship and primary sources (in translation). Students will write midterm and final examinations and will choose between several short papers or one long paper.

HIST 30270. Castles, Kingdoms, Cathedrals

(3-0-3) Perett

This course is a thematic survey of the high (1000–1300) and late (1300–1500) Middle Ages. The course begins with an introduction to three emblematic developments of the high Middle Ages: cathedral-building, the crusading movement, and the beginnings of the universities. Themes addressed include the nature of high medieval religion, the agricultural and commercial revolutions, and high medieval politics and patronage. Treating the later Middle Ages, the course focuses upon a catastrophic event and an epic poem. The Black Death (and related late-medieval catastrophes) has traditionally been seen as marking a turning point in European history. To what extent is this so? Finally, Dante’s *Inferno* will offer a window into key issues of late-medieval religious culture, including papal politics, the role of the laity in religion, late-medieval philosophical thought, heresy, and the Italian city-state as the site of a new Renaissance of learning.

HIST 30272. 12th-Century Renaissance and Reform

(3-0-3) Van Engen

The thousand years of history we call “the Middle Ages” witnessed repeated efforts to reform and enlighten society through learning and religion. Such aspirations did not wait for the periods we call Renaissance and Reformation. This course will examine reform movements in the years 1050–1215, a time of great cultural expansion often called the “twelfth-century renaissance.” Here we find the invention of the university and also of chivalry, mystics as well as satirical mockers. We will read original sources dealing with ethics, politics, love, and religion in that society. We will ask what it means, historically, to speak of a society as undergoing renewal or reform: Can a whole society be reformed? By whom? By what means? Three short papers, and a midterm, will be required.

HIST 30273. World of the Late Middle Ages, 1300–1500

(3-0-3)

The course studies Europe in the time of the late Middle Ages, roughly 1300–1500, often called a time of crisis: plague, war, rebellion, economic upheaval. But it was also a time of enormous achievement, of Dante and Chaucer, of new techniques in warfare and government, of conciliar representation in church and state, of extravagant display in fashion and building. This course will proceed by way of both secondary and primary readings, with at least three short papers and student discussion required.

HIST 30274. Violence in Late Medieval and Renaissance Europe (3-0-3)

Violence was a dominant feature of life in late medieval and Renaissance Europe, and students in this course will explore that violence in all its manifestations—political, economic, military, cultural, and social.

HIST 30281. Taking Heaven by Storm: Holy Knights, Militant Monks, and Violence in the Middle Ages (3-0-3)

This course explores the development of monastic and chivalric impulses in Medieval Europe from A.D. 400–1500. Two of the most persistent images, even to this day, which represent the Middle Ages are that of the monk and of the knight. Monasteries and knighthood were social institutions that significantly shaped societal sensibilities and culture in the West. From the beginning of the Middle Ages, monastic groups and knightly orders took pages from one another's book. Their influence upon one another is seen in monks who came to think of themselves as spiritual warriors and in some knights who came to consider themselves military monks. Rhetorical and physical violence was employed by both knights and monks throughout the period, and instances of this will be examined. In addition to considering the historical realities of monastic and knightly mentalities during the medieval era, this course will also look at representations of monks and knights from the Middle Ages until the 20th century in art, literature, and film. Such images are instructive in consideration of not only the periods that produced them, but of the Middle Ages themselves. Students interested in religious or military history, films, Umberto Eco's *The Name of the Rose*, or other representations of the Middle Ages in popular culture, are especially welcome.

HIST 30282. The Medieval Mind (3-0-3)

This course offers an introduction to thought and culture in the European Middle Ages, the era of Romance, scholastic theologians, and female mystics. After a relatively brief look at the early Middle Ages, the course will focus on the origins of the literature of love and chivalry, of schoolmen in universities, and of women religious writers. There is a general textbook to guide the course, but much of the reading will be in primary sources, that is, in the thinkers and poets and mystics of the medieval period.

HIST 30290. Castles and Courts in Medieval Europe (3-0-3)

The expanded title of this course is Castles, Castellannies, and Courts in Latin Europe, 900–1650. This course will examine the high period in the history of the castle—a combination of fort and residence—of the castellany or district subjected to the domination of a castle, and of the household and court of the kings, princes, and barons who built such residences and organized their lives and their activities within their various structures. It will first consider the castle as a form of fortification, review briefly the history of fortifications before 900, and examine the ways in which lords and their builders steadily improved their defensive capabilities in response to new knowledge and to new methods and tools of siegecraft. It will then examine the relationship of the castle to the contemporary forms of non-fortified or semi-fortified house, and finally its relationship to the lordly household (the body of servants organized into numerous departments associated with particular rooms or wings of the castle) and with the court (or body of soldiers, officers, allies, students, and temporary guests) who filled the castle when the lord was present. The course will conclude with an examination of the history of the castellany as a form of jurisdiction. The course will concentrate on the castles of the British Isles and France, but will examine the great variety of types found throughout Latin Europe.

HIST 30291. Politics and Religion in the High Middle Ages (3-0-3)

This course considers the intersection between political action and religious claims in medieval Europe. Virtually all the powers—kings and popes, princes and bishops—claimed to act on religious principle and in accord with transcendent notions of virtue or world order. And yet they fought bitterly with each other, with

words and with swords, and mutually condemned one another. The course will begin with the showdown between emperors and popes known as the investiture contest, then take up pivotal figures like Pope Innocent III, King Frederick II, and Pope Boniface IX, and conclude with sections on the spiritual Franciscans and on conciliarism. Two papers based on primary sources, one midterm, and a final.

HIST 30293. Crusade and Jihad: Medieval Holy Wars (3-0-3)

This course will provide a history of the crusading movement of Western Europe (ca. A.D. 1095–1291) and its impact on the civilizations of the medieval West and Near East. Course material will address the history not only of the events of the Crusades, but of the peoples and ideas involved in them as well as their long-term legacies. What were the motivations of the Christian crusaders? How did the Muslims and Jews of the Near East view the Crusades, and how did they respond to them? In what ways did the prolonged contact between these two major civilizations affect the societies, religions, and economies of each?

HIST 30295. War in the Middle Ages (3-0-3)

This course explores war and its impact on religion, society, and politics in Western Europe during the Middle Ages. The years from about 500 to 1500 witnessed a distinctive period in the history of Western warfare, with repercussions still felt today. The period began with an increased emphasis on the importance of cavalry, which ultimately had profound social and economic consequences for Western Europe. As the dominant religion in the Latin West, Christianity permeated the mentality of medieval warriors, providing them with an ideology of war that justified their actions and defined their war aims. Over this period, the technology of war became progressively more lethal, and culminated in the Late Middle Ages with the development of gunpowder weapons that ended the era of chivalric warfare. At the end of the Middle Ages, the demands of war furthered and consolidated the development of effective monarchical states, recognizable as the beginnings of modern France, England, and Spain.

HIST 30296. War and Diplomacy in the Middle Ages (3-0-3)

What kinds of governments and “non-state actors” engaged in warfare and diplomacy during the European Middle Ages? Were battles and military campaigns commonplace between approximately A.D. 500 and 1500? Did the rulers of Europe in this period develop effective strategies for settling their disputes in more peaceful ways? This course will give students the opportunity to answer these and other questions about the nature of war and diplomacy in the Middle Ages. Topics will include the Roman Empire's efforts to control the waves of Germanic invaders; the dynastic disputes that regularly threatened to destroy the Merovingian and Carolingian Empires; the Viking incursions; the Papacy's conflicts with the rulers of Germany; the crusaders' strategies for conquering and maintaining control of the Holy Land; the emergence of the Italian city-states as military powers; and the Hundred Years War. Through lectures, discussions, and the reading of a broad range of primary sources, students will be challenged to think about how various types of medieval rulers used war and diplomacy to achieve their political goals.

HIST 30300. The Black Death (3-0-3)

In the winter of 1347, a deadly epidemic infiltrated Europe's Mediterranean ports and quickly spread inland. Three years later, the disease, known to later generations as the Black Death, killed an estimated 30–50 percent of the continent's entire population. Such a drastic reduction of Europe's population had immediate as well as long term effects, both quantitatively (extreme demographic shifts and a radically contracted economy) and qualitatively (a re-ordering of religious priorities and a re-thinking of the individual's relationship with the church). Malnutrition, poverty, disease and hunger were rampant, and war, growing inflation and fear continued to cripple medieval Europe. This was a society in crisis, and it is perhaps not surprising that renewed religious fervor, mass hysteria and persecutions

followed in the plague's wake. This course aims to understand the causes, immediate impact, and long-term consequences of the Black Death as students learn to appreciate how a highly developed society deals with extreme crisis.

HIST 30315. Marriage, Women, Family, and Sexuality in Medieval Europe

(3-0-3)

In this course we will explore the medieval roots of our modern ideas about marriage, gender roles, and sexuality. The period to be studied ranges from the early Christian period up until the fifteenth century. We will first examine the spread of Christian influence on the practices of marriage, divorce, and childbearing through legal and theological records. Once armed with the basic concepts of how marriage functioned, we will move on to more varied topics, including parenthood, contraception, rape/abduction, prostitution, as well as a look at how women's daily lives changed over the course of the medieval period.

HIST 30319. Ireland in the Dark Ages

(3-0-3)

Ancient and early medieval Ireland was a place of tumultuous change, full of charismatic kings, warrior women, and aggressive saints. But does it deserve to be called the Dark Ages? We will endeavor to answer that question by examining Ireland from prehistoric times through the Norman Conquest and colonization of Ireland in the twelfth century, focusing on daily life, marriage and family, religious beliefs and practices (both pagan and Christian), kingship and social life, monasteries and settlements, and other topics. Sources include epics, sagas, and myths such as the *Táin Bó Cuailnge*, various annals recording historical events, law codes, letters, saints' lives, penitentials, and commentary from outside observers.

HIST 30320. The Viking Age and the World of the Norse

(3-0-3) Handy

From their violent emergence onto the European scene at the close of the eighth century up to the present day, images of bloody raids, pillaging, and horned helmets have dominated our shared vision of the Vikings. But how accurate is that picture? Some Scandinavians were indeed remarkable, if violent, seafarers whose reach extended from Ireland to Russia, Byzantium, and even the shores of North America. Others were farmers, skilled craftsmen, and savvy politicians and merchants who helped to shape the medieval world with their innovative technology and artistry. In this class we will examine the historical, archaeological, and literary record to generate a more complete picture of these medieval Scandinavians between roughly 750–1100. We will start in their homeland by learning about their society, family life, art, literature, technology, mythology, and conversion to Christianity. We will then follow the Vikings as they explore, trade, and raid their way across wide swaths of the known world, giving special attention to their impact on Ireland and Britain. Throughout the course we will pay close attention to how the Vikings have been understood and represented by their contemporaries and by modern observers and see how closely that matches the historical record.

HIST 30321. Early Medieval Ireland

(3-0-3)

Consideration of the period between 950 and 1400 is of crucial importance in understanding Irish history. This course not only covers the range of continuities and radical discontinuities that marked Ireland's development during this time, but charts the attempted conquest of the entire country by the English Crown. The lecture series also seeks to answer a number of questions. Why did the Papacy give the English Crown sovereignty over Ireland? Why did a country like Ireland, on the verge of attaining political and economic centralization, not organize better resistance to English attempts to subdue it? Why did the English colony fail to prove more successful in exerting its will over indigenous Irish potentates? Culturally the period also witnessed the growing assimilation of English invaders to the norms of Gaelic Irish politics and society. Lastly, events in Ireland had a serious influence on developments in England, Wales and Scotland, provoking, amongst other things, the fall of the Plantagenet dynasty and an attempted invasion by King Robert I of Scotland.

HIST 30330. Muslims and Christians in Medieval Europe

(3-0-3)

Corequisite: HIST 32330

The encounter between Christianity and Islam began in the 7th century A.D., the time of the Prophet Muhammad. Within a few centuries, Islamic rule had spread across the southern Mediterranean world from Syria to Spain. This shift initiated a long-term relationship—sometimes hostile and sometimes peaceful—between Christians and Muslims in these regions. The neighboring presence of Islam had an enduring influence on medieval Christian theology, philosophy, medical knowledge, literature, culture, imagination, art, and material life. Likewise, developments in Christian Europe and Byzantium, especially the Crusades, affected the Islamic world. This course will trace the history of the Christian-Muslim relationship, from its beginnings in the early medieval period until the Renaissance (15th century). The heritage of this medieval encounter still has profound resonance in the modern world of today.

HIST 30331. Medieval Spain: Land of Three Religions

(3-0-3)

This lecture course will cover the history of medieval Spain from the Visigothic period (6th to the 7th centuries) until the time of Ferdinand and Isabella (15th century). The main focus of the course will be the interaction (both congenial and confrontational) of the three religious groups resident in the Iberian Peninsula: Christians, Jews, and Muslims. The course will proceed roughly chronologically, with pauses to consider particular topics in social, intellectual, and economic history. Interspersed with lectures, discussion sessions will concentrate on close readings of primary texts and consideration of some of the historiographical problems peculiar to Spanish history. There will be several short papers, a midterm, and a final exam.

HIST 30352. Storming Heaven: Christianity in the Reformation Era

(3-0-3)

Corequisite: HIST 32352

This course is a narrative history of Christianity in Western Europe from ca. 1500–1650, which takes an international and comparative perspective, including Catholicism, Protestantism, and radical Protestantism. Topics covered include Christianity on the eve of the Reformation, Christian humanism, Luther and the German Reformation, the Peasants' War and Anabaptism, the English Reformation, Calvin and Calvinism, Catholic Reform and the Council of Trent, the French Wars of Religion, confessionalization, the Thirty Years War, and the English Revolution. Major themes include matters of religious content (doctrinal positions and devotional sensibilities), the relationship between different Christian groups and political regimes, the impact of religious changes across the population, and the definitive emergence of Christian pluralism. Lectures plus discussion.

HIST 30353. The Catholic Reformation

(3-0-3)

Corequisite: HIST 32353

This course will examine some of the main historical realities, theological developments, and traditions of spirituality within Roman Catholicism ca. 1450–1700, the period of Catholic reform both before and after the emergence of the Protestant Reformation. The class format will be two lectures plus one discussion-based tutorial section per week, the latter based on the reading of primary sources in translation. Major topics to be discussed include the character of the late medieval church and reforming efforts within it (e.g., the Observantine movement, Christian humanism); Roman Catholic response to the Protestant Reformation, including the Roman Inquisition; the revival of existing and emergence of new religious orders (especially the Society of Jesus); the Council of Trent and its implementation among the clergy and laity; Catholic missionary activity in Asia and the Americas; post-Tridentine Catholic art and scholarship; the relationship between the Church and European states in the 16th and 17th centuries; Jansenism; and the flowering of Catholic spirituality in the 17th century.

HIST 30390. Christianity, Commerce, and Consumerism: The Last 1000 Years

(3-0-3) Gregory

Corequisite: HIST 32390

The capitalism and consumerism that now influences the entire world arose within a religious culture—that of Western Christianity—whose central figure extolled poverty and self-denial, and whose most important early missionary wrote that “the love of money is the root of all evils.” How did this happen? This course takes a long-term view of the emergence of modern economic life in relationship to Christianity beginning with the upturn in commerce and the monetization of the European economy in the eleventh century and continuing through the relationship between markets and Christian morality in the Middle Ages and Renaissance. It pays particular attention to the ways in which the religio-political disruptions of the Reformation era laid the foundations for the disembedding of economics from Christian ethics and thus made possible modern Western capitalism and consumerism.

HIST 30398. Madness And Us: A History of Psychiatry From the End of the Eighteenth Century Through the Present

(3-0-3)

The course is a thematic overview of the history of psychiatry from its inception at the end of the eighteenth century to the present day. It raises issues concerning: the nature of the Self and its relationship with social compulsion and state power; the connection between body and mind; the nature of disease and illness; the relations between the individual and the expert; the position of marginal groups (women, colonial subjects, homosexuals, etc.) vis-à-vis social norms and authority.

HIST 30401. History of Christianity II, 1500 to the Present

(3-0-3)

This course surveys the development of modern Christianity, with emphasis on the West. Subjects include ideas and movements of reform, church government and structures, missionary enterprises, forms of spirituality and worship, and the political role and cultural impact of Christianity. Requirements: two examinations and class participation, including three reading seminars with papers.

HIST 30402. History of Catholicism since 1500

(3-0-3)

This course surveys the development of modern Catholicism, with an emphasis on Europe. Subjects include ideas and movements of reform, church government and structures, missionary enterprises, forms of spirituality and worship, and the political role and cultural impact of the Church.

HIST 30405. Europe from the French Revolution to World War I

(3-0-3) Kselman

Corequisite: HIST 32405

During this time Europe changed dramatically in ways that shaped the 20th century: political reform movements advocating nationalism, democracy, and socialism challenged established regimes; the industrial revolution led to massive changes in society and the economy, including the emergence of a large and affluent middle class and an industrial proletariat; European states consolidated power and mobilized popular support and an advanced technology for wars in Europe and throughout the world, into which they expanded as colonial powers; writers, artists and composers reacted to the changes and conflicts with novels, paintings, songs, and symphonies that, in their variety of styles, suggest the vitality and anxiety of this period.

HIST 30406. Europe in the Twentieth Century

(3-0-3)

This course presents a general history of the world from a European perspective, 1917 to 1989. The goal of this course is to convey a broad understanding of various policies—what they have and have not been, the major problems they faced, and the directions they might be taking. The approach of the course is neither revisionist nor traditionalist. In such controversial areas, it is impossible to give really broad answers that everyone will find acceptable.

HIST 30407. Europe Between The Wars

(3-0-3)

Between the end of the First World War and the beginning of the Second, there were only 20 years. But during this short period were Hitler, Stalin, the Great Crisis, the League of Nations, and much more. Understanding the present requires knowledge of these pivotal years.

HIST 30408. The Holocaust

(3-0-3)

In this lecture/discussion class, we will study the Nazi German program of mass killings that has come to be known as the Holocaust. We will explore the ideas, decisions, and actions that culminated in the murder of an estimated hundred thousand people deemed handicapped, half a million Roma (Gypsies), and six million European Jews. The role of historical prejudices, the impact of National Socialist ideology and leadership, and the crucial factor of the war itself will all be considered. We will address the experiences of those targeted for annihilation as well as the actions of perpetrators and the role of others: bystanders, witnesses, and rescuers. At the same time we will examine how attacks on other groups—for example, homosexuals, Polish intellectuals, Soviet prisoners of war, Jehovah’s Witnesses, and Afro-Germans—fit into the overall Nazi scheme for a “new world order.” The legacy of the Holocaust after 1945 will be discussed as well. Course requirements include short papers in response to weekly readings, a comparative book review, and a cumulative final exam.

HIST 30409. History of Europe Since 1945

(3-0-3)

This course will include discussion of the history, politics, and culture of the post-World War II period. Beginning with the destruction wrought by the war, it will examine closely the tie between the economic-political resurgence of Europe, and the development of the “Cold War.” Important subjects covered include the development of the European Union, the development of consumer societies, the 1968 turmoil in both the West and East, the establishment and eventual collapse of the dictatorships in Russia and eastern Europe, the growing internationalization of European economies after the 1960s, the “normalization” of politics and societies after 1970, the end of the Cold War, and the major role of European countries throughout the world in the contemporary period. Naturally, the role of individuals in these broad transformations will not be neglected.

HIST 30410. Tudor England: Politics and Honor

(3-0-3)

The period from 1485 to 1603, often feted as something of a “Golden Age” for England, saw that country undergo serious changes that challenged the traditional ways in which the nation conceived of itself. These included the break from Rome, the loss of England’s foothold in France, and the unprecedented experience of monarchical rule by women. Each of these challenges demanded creative political responses and apologetic strategies harnessing intellectual resources from classical, Biblical, legal, chivalric and ecclesiastical sources. This course will examine these developments. It will also look at how the English, emerging from under the shadow of the internecine dynastic warfare of the fifteenth century, sought to preserve political stability and ensure a balance between continuity and change, and, furthermore, how individuals could use these unique circumstances to their own advantage.

HIST 30411. British History: 1660–1800

(3-0-3) Smyth

This course of lectures and readings concentrates on British (that is, Scottish as well as English) history from the restoration of monarchy in 1660 to the great crisis detonated by the French Revolution and war in the 1790s. Themes include the politics of Protestant dissent, political ideologies, the role of parliament, Jacobitism, and the rise of the radical parliamentary reform movement.

HIST 30415. England since 1789

(3-0-3) Sullivan

The course involves, besides lectures, reading and thinking about and discussing both the history and the interpretation of major elements in the development of

modern English politics, society, and culture. Requirements include regular class attendance and participation, midterm and final examinations, and 20 to 25 pages of writing associated with the small seminars into which the class will divide a few times during the semester.

HIST 30416. 19th-Century Britain: The Great Victorian Experiment

(3-0-3)

A thematic survey of Great Britain during the long 19th century, from the impact of the French revolution in 1789 to the first World War I in 1914. The period saw the emergence of many of the most characteristic and most controversial features of the modern world, such as industrialism, capitalism, the welfare state, the expansion of civil and political rights, and the colonial development of the non-western world. The course uses the three themes of introspection, innovation, and inquiry to understand these changes. Nineteenth-century Britain is known for its earnestness, the intensity with which its elites scrutinized their souls on everything from the foundations of faith to social responsibility to their own sexuality. It is known also for an enormous amount of social-technical innovation, planned and unplanned, of steam engines, sewers, and slums, of new ways of organizing work and handling money, of new aspirations, of new classes and class relations, and of new modes of social organization and social control. Finally it is known as a time of passionate spirit of inquiry, a time of a massive increase in literacy and of hunger for knowledge, a time of immense confidence when it was felt that new knowledge from economics, sociology, biology, geography, and would provide true, rational, and fair answers to all political problems and conflicts.

HIST 30431. Modern Irish History: 1600–1800

(3-0-3) Smyth

This course explores the main themes in Irish histories from the plantation of Ulster, after 1603, to the rebellion of 1798 and the Act of Union with Great Britain in 1800. Attention focuses on plantation, colonization, and religious conflict; the Cromwellian reconquest and the Williamite wars in the 17th century, and the anti-Catholic penal laws and rise of Protestant Ascendancy in the 19th century. This dramatic and formative period witnessed the emergence of many of the forces and rivalries that shaped modern Irish politics and society and continues to generate lively disagreement among historians today.

HIST 30432. Modern Ireland II: Irish History since 1800

(3-0-3)

This course will consist of lectures and readings examining Irish political history and Anglo-Irish relations from 1801 up to and including the current conflict in Northern Ireland. Attention will be given to religious conflict, the development of romantic and revolutionary nationalism, the changing nature of Anglo-Irish relations, and the special problems of the North. A mid-semester examination, a paper/essay, and a final will be required.

HIST 30434. Early Modern Ireland

(3-0-3) Rapple

This course offers new perspectives on the struggle for mastery in Ireland from 1470 to 1660. Though keeping in mind the traditional view of the “English reconquest” (decades of rebellion, dispossession, and plantation until, in the aftermath of Cromwell, all Ireland was finally subjected to English rule) this course will take a different approach. By investigating a range of primary sources from the period, students will explore the interactions between the three different models of conquest: (1) descendants of the old Norman colonists (e.g., Fitzgeralds and Butlers) seeking to finish the job; (2) Tudor reform (inspired by Renaissance optimism), by which the English attempted to establish rule by means of legal, social, and cultural assimilation; and (3) unabashed exploitation by English private entrepreneurs on the make. The most important effect of these “contending conquests” was the way they shaped the diverse responses of the native Irish, ranging from accommodation and assimilation to outright rebellion and national war.

HIST 30435. Nineteenth-Century Ireland

(3-0-3)

Drawing on monographs and general studies, this course invites students to consider how different social groups experienced the profound changes that transformed 19th-century Ireland. Although the course traces political developments, it pays equal attention to socioeconomic and cultural issues, including the shift from high fertility to sexual restraint; patterns of emigration, consumption, and social unrest; improvements in education and literacy; linguistic change; changing devotional practices and cultural revival in the late 1800s.

HIST 30437. Ireland: From Famine to Independence

(3-0-3)

This course explores Irish politics and society from the Great Famine (1845–1849) to the establishment of the independent Irish Free State amidst civil war (1922–23). It examines the causes of the Famine and its legacies of mass emigration, nationalism, and rapid linguistic, devotional, and demographic change; the political and social origins of the “Land War”; the politics of Parnell and Home Rule; New Nationalism and Ulster Unionism; and the WWI-era revolution that undermined British authority in Ireland and led to the establishment of two new states. Particular attention is given to the Irish Revolution (1913–23): its longer-term origins; how and why the British Government lost legitimacy in Ireland; the nature of revolutionary violence; who joined the IRA and other nationalist organizations; what changed and what remained the same with the achievement of independence.

HIST 30438. Science and Medicine in Ireland, 1600–1900

(3-0-3)

This course surveys the history of science and medicine in Ireland from the seventeenth to the nineteenth centuries. The course will consider the role of science and medicine in Irish social and political life and will offer a fresh dimension to the cultural and intellectual history of Ireland. Lectures will situate scientists and doctors within their historical contexts, showing how intellectual history intersects with political history. Topics will include science as an instrument of colonialism in Cromwellian Ireland, the scientific satires of Jonathan Swift, the role of the medical community during the Great Famine, women in Irish science, and the role of science in the Cultural Revival. Note that no scientific knowledge is assumed or required.

HIST 30439. Debating Irish History: Conflicting Definitions of Ireland's Past

(3-0-3)

There has long been disagreement between academic historians about how best to conceptualize Ireland's troubled past. This course analyzes the approaches attempted in the nineteenth, twentieth and twenty-first centuries to explain Ireland's history and addresses a host of questions relevant to the history of any country. To what degree do influences like religious adherence, state loyalty and political commitment affect history writing? How can an historian best deal with the fact of human suffering? What is the difference between a terrorist and a freedom fighter? What effect do the constraints involved in the very process of writing history have on intelligent expression? Can a good history book ever be entirely satisfying to an ethnicity, a nation or a religious grouping?

HIST 30440. The Northern Ireland “Troubles,” 1920 to the Present

(3-0-3) Smyth

This course explores the history of the six northeastern counties of Ireland which became “Northern Ireland” in 1920/1. Northern Ireland remained part of the United Kingdom and had a built-in Protestant unionist majority, while the Catholic minority, alienated from the state from the outset, looked across the new border and to Dublin, capital of the Irish Free State, as the site of their allegiance. Northern Ireland was thus, from the beginning, dysfunctional, scarred by sectarian violence and systematic discrimination in housing and employment. After examining the origins of the state and the early decades of its existence, the class will turn

to its main concern, “the Troubles,” which broke out in the late 1960s. The major episodes under scrutiny include the civil rights movement, Bloody Sunday, the hunger strikes, and the Good Friday Peace Agreement.

HIST 30441. Famine, Poverty, and Violence in 19th-Century Ireland

(3-0-3)

This course explores Ireland in the 19th century. Central to this exploration is the mid-century Famine, which by starvation, disease, and emigration reduced the Irish population by half and resulted in extraordinary political and social changes, some of which have only recently begun to be obliterated from contemporary Irish memory. The course will focus on the persistent problem of governance of a disordered and often violent society from both British and Irish perspectives. Special attention will be paid to attempts at democratization in a quasi-colonial political environment, as well as the creation and adaptation of institutions such as jails, workhouses, and lunatic asylums to handle the unrelenting and interrelated scourges of poverty and social disorder.

HIST 30442. Medicine and Disease in Modern Ireland

(3-0-3)

Ireland is among a handful of modern nations whose histories have been thoroughly transformed by disease events. These events, and the Great Famine in particular, are never simple “visitations of providence” that afflict an undifferentiated populace. They are, rather, inextricably linked with existing social structures and the exercise of power. Changes in government and society from the 1801 Act of Union with Great Britain through the relief of the penal laws against Catholics, emigration, electoral and land reform, and independence in the twentieth century are reflected in the health (or lack thereof) of the Irish people. This course, therefore, is intended to introduce students to the social and political history of modern Ireland as seen through the lens of health and disease. While focusing on Irish conditions, we will discuss issues that remain especially relevant in our own time, including: Who is responsible for health? Is health a universal right? Who is the “public” in public health? Where are the boundaries of medical expertise, and how are they determined?

HIST 30443. Revolutionary Ireland: 1916–1998

(3-0-3)

This course will chart the emergence of Ireland from the British Empire as an independent country. The origins of the physical force revival, Republican and Unionist, will be explored, along with the reasons for the failure of constitutionalism. The impact of the 1916 Rising and War of Independence will be assessed in both national and international terms. The Great War, Partition and Irish Civil War will also be contextualized. The development of two states in one country will form an important theme in which concepts of nationality and issues of self-determination can be addressed. The history of the modern “Irish Troubles” will be analyzed in depth up to the Good Friday Agreement of 1998.

HIST 30448. Issues in Modern Irish History

(3-0-3)

What is special about Irish Catholicism? Was pre-Famine Irish poverty a myth perpetuated by tourists from other countries? Why was celibacy so common in Ireland? Why was schizophrenia called “The Irish Disease”? If you’re in Belfast in July, why should you do all your shopping well before and after the 12th? We will explore these and other questions in modern Irish history, as well as themes such as nationalism, education and the Irish language, women and the family, sexuality, health and disease, and emigration. Students will have the opportunity to develop a solid understanding of both long-term trends and specific issues in modern Ireland, as well as the ability to evaluate primary documents and secondary works.

HIST 30450. France: From the Old Regime to the Revolution

(3-0-3) Kselman

Corequisite: HIST 32450

France in 1700, ruled by the Sun King, Louis XIV, was the most powerful state in Europe, as well as a cultural center that drew the attention of the world. At Versailles, just outside of Paris, Louis created a palace that symbolized his authority

and still stands as a masterpiece of art and architecture. Less than a hundred years later, in 1789, the French Revolution challenged and eventually destroyed the monarchy, with Louis XVI dying on the guillotine in 1793. The course will be organized around major political developments, and seeks to understand how the monarchy could grow so powerful during the seventeenth century, and then collapse at the end of the eighteenth. It will open with the establishment of the Bourbon family on the throne in 1589 and conclude with the rise of Napoleon in 1790s, with about one-third of the class concentrating on the revolutionary events that began in 1789. Understanding the political fortunes of France will involve exploring the ways in which the nation was being transformed by a combination of social pressures and cultural conflict, in particular the Enlightenment. In addition to reading a selection of works by historians students will read, view, and listen to some of the great cultural achievements of the time—the plays of Molière, the music of Lully, the novels of Voltaire, the paintings of David, to give just some examples.

HIST 30451. Modern France

(3-0-3)

Corequisite: HIST 32451

This course will survey the history of France in the 19th and 20th centuries and will balance attention to political and social developments with an interest in French culture. Themes will include: the revolutions of the 19th century that culminated in a democratic republic; industrialization and the persistence of the peasant ideal; changes in women’s roles, gender relations, and sexuality; colonialism and imperialism; victory in World War I; defeat and collaboration in World War II; the role of intellectuals in French social life; decolonization and postcolonialism; cultural and ethnic differences in contemporary France; and Franco-American relations. Students will develop an appreciation for the vitality of the French past and an understanding of the current role of France in Europe and the world. The format will be lectures supplemented by discussions, readings, and some films.

HIST 30464. German History, 1740–1870

(3-0-3) Deak

This course begins with Prussia’s initial challenge to Austria’s dominance in central Europe; it ends with the unification of Germany under Bismarck’s Prussia—and Austria’s exclusion from it. In addition to covering the on-going Austro-Prussian rivalry in Germany, the course will consider German History in a broad central European perspective that covers the variety of what was German-speaking Europe. We will cover the cultural, social, and political transformations of the period. Specific topics may include Enlightened Absolutism and the emergence of the “enlightened” police state, the influence of the French Revolution in the German-speaking lands, as well as the revolutions of 1848 and the struggle for German Unification. Additionally, we will cover larger long-term processes such as the emergence of civil society, political transformations such as the growth of German Liberalism and Nationalism and the emergence of Socialism, and German contributions to larger cultural and intellectual fields such as the Enlightenment and Romanticism.

HIST 30465. Modern Germany since 1871

(3-0-3) Faulkner

This course examines modern Germany from national unification in 1871 to the recent unification of the two Germanys and beyond. We will investigate cultural, political, and social dimensions of Germany’s dynamic role in Europe and in the world. Topics include Bismarck and the founding of the Second Reich, World War I and the legacy of defeat, challenge and authority in the Weimar Republic, the National Socialist revolution, war and Holocaust, collapse of the Third Reich, conflict and accommodation in East and West Germany, and unification and its aftermath. Class format will combine lectures with discussion of readings from political, social, literary, and diplomatic sources.

HIST 30466. Adolf Hitler and Nazi Germany

(3-0-3)

This course explores the rise of Adolf Hitler and National Socialism from the foundation of the Weimar Republic to the end of World War II. Topics include an examination of the origins of Nazi ideology, daily life under Hitler, adaptation and resistance of the Christian churches, the Holocaust, World War II, and the German home front.

HIST 30470. Medieval and Early Modern Russia

(3-0-3) Martin

This course will examine the history of Russia from its medieval origins until the age of Catherine the Great in the 18th century. We will begin with the genesis of Orthodox Slavic civilization in medieval Kievan Rus and that state's destruction in the Mongol invasion. Then we will study the rise of the tsardom of Muscovy and the fateful developments that nearly doomed it in the 16th–17th century: the reign of Ivan the Terrible, the Time of Troubles, the imposition of serfdom, the schism of the Orthodox Church, and widespread popular revolts. Lastly, we will see how Peter the Great and his 18th century successors attempted to stabilize the social order, Westernize the upper classes, and make Russia a great European power.

HIST 30471. Imperial Russia, 1700–1861

(3-0-3) Martin

The course begins in the early 1700s with the reforms of Peter the Great, which made Russia into a highly centralized, powerful, oppressive society whose nobles grew wealthy and Europeanized while its peasants were reduced to poverty and serfdom. Successive tsars made Russia the greatest power of continental Europe while failing to reform its increasingly archaic sociopolitical order. As a result, the regime ultimately faced a restive peasantry, a radicalized intelligentsia, and deepening economic and military backwardness. The course concludes with the final, vain attempt by the monarchy in the 1860s–70s to stave off revolution by dismantling the system that Peter had created.

HIST 30472. Late Imperial Russia

(3-0-3)

This course examines Russian history from the end of serfdom in 1861 to the revolutions of 1917. The instructor will acquaint students not only with the political history of Russia in this turbulent period, but also with topics that are sometimes neglected in broad surveys: the resemblances between Russian serfdom and American slavery; the history of family life, gender relations and sexuality in Russia; the role of religion in defining Russian identities; the psychological underpinnings of political radicalism and terrorism; the difficult relationships between various ethnic groups in the “prison of peoples.” Course requirements will include a short essay, a midterm examination, and a final examination. No prior knowledge of Russian history required.

HIST 30473. Early Twentieth-Century Russian History, 1894–1945

(3-0-3) Rogacheva

This course explores the political, social, intellectual and cultural development of Russia from 1894, the coronation of the last Tsar Nicholas II, until 1945, the emergence of the Soviet Empire at the end of World War II. We will examine key events in Russian history, such as the Russo-Japanese War, the Revolutions of 1905 and 1917, the Russian Civil War, the imposition of Leninism and Stalinism, the Great Terror, and the Great Patriotic War. This course will pay particular attention to the reasons for the collapse of the Tsarist regime, the Bolshevik seizure of power, Soviet efforts to create the world's first socialist state in Russia, and Stalinism. Not only will we look at politics and ideology from the top down, we also will study the experiences of ordinary people who lived in Soviet Russia.

HIST 30474. Russian History since World War II

(3-0-3)

This course surveys the history of Russia and its peoples in the second half of the 20th century, with a particular focus on the role of ideology, politics, and culture in Soviet and contemporary Russian society. We will explore the emergence of

the Soviet Empire at the end of WWII, the experience of late Stalinism and post-Stalinist socialism, the collapse of the communist regime, and the disintegration of the Soviet Union in 1991, as well as Russia's uneasy transition out of totalitarianism during the last decade of the 20th century. Students will be asked to take two exams and to write a 10-page term paper.

HIST 30475. 20th-Century Russia: War and Revolution

(3-0-3)

This course explores Russian history from the coronation of the last Tsar of Russia, Nicholas II in 1894, to the fall of communism in 1991. The key events of Russian history in the twentieth century, such as the revolutions of 1905 and 1917, the Russian Civil War, the imposition of Leninism and Stalinism, the Second World War, the Soviet Empire in Eastern Europe and the Cold War, the Khrushchev “thaw,” the experience of Neo-Stalinism from 1964 to 1985, glasnost and perestroika under Gorbachev, and finally the end of the Soviet Union will be examined in detail. Particular attention will be paid to a number of key issues, such as the reasons for the collapse of the Tsarist regime, the Bolshevik seizure of power, the origins of Stalinism, the role of political ideology in the Soviet state, the attempts at reform of the communist system under Khrushchev and Gorbachev, and the reasons for the failure of the Soviet “experiment.” While political ideology and the role of the Communist party will remain frequent topics, the course will also examine the experience for ordinary Russians of living under totalitarianism.

HIST 30476. From Dostoevsky to Solzhenitsyn: Russian Intellectual History

(3-0-3) Beisswenger

During the last two centuries Russian thinkers and writers have been preoccupied with utopian visions about human life in modernity and about their country's place in the modern world. At the center of their searchings were questions such as: What is the human person? How can an ideal and just society be organized? What path of development should Russia follow? Should it follow the example of Western Europe and the United States or is it a civilization of its own? Should the country be shaped according to the ideologies of liberalism, nationalism, socialism, or the teachings of the Russian Orthodox Church? This course examines how famous Russian intellectuals tried to answer these questions. It focuses on key works by such Russian writers and thinkers as Nikolai Chernyshevskii, Fedor Dostoevsky, Aleksandr Bogdanov, Mikhail Bulgakov and Aleksandr Solzhenitsyn. The course will also explore how Russian intellectual discourses of the past shape and influence controversies about contemporary Russian politics and identity today.

HIST 30481. East-Central European History II

(3-0-3)

Corequisite: HIST 32481

A survey of the history of East-Central Europe from the partitions of Poland to the outbreak of World War II. The lecture will place special emphasis on the political, social, and cultural histories of Poles, Czechs, Slovaks, Croats, and Hungarians.

HIST 30482. Eastern Europe since 1945

(3-0-3)

The course surveys the emergence of communist Eastern Europe in the wake of World War II, and then explores the seminal developments that contributed to the collapse of communism. Emphasis will be placed on the Hungarian, Czech, Polish, and Yugoslav experiences. Students in the course will examine the evolution of East European society by reading traditional historical and political writings as well as drawing on literary and film accounts of the period. Although a lecture class, the instructor has reserved Fridays for in-class discussion. Students will read approximately seven books. They will also be expected to sit for a midterm examination and a final examination, and to complete a 10- to 15-page research paper.

HIST 30483. Eastern Europe in the Twentieth Century

(3-0-3)

This course surveys the history of twentieth century Eastern Europe, the conglomeration of states and nations between Germany and Russia, stretching from the Baltic sea in the north to the Black and Adriatic seas in the south. The class

aims to provide students with a basic understanding of the chronology of events and developmental processes in this part of Europe. It also attempts to answer the question whether “Eastern Europe” is or is not a meaningful historical, political, and cultural construct. Themes include nationalism, the creation of nation-states and the influence of Great Powers, indigenous fascism, the role of the intelligentsia, Nazi occupation, Stalinism, the evolution of Communism and response from society. Finally, by employing participant accounts, novels, and films the course will introduce students to the cultures, traditions, and leading voices of the lands and peoples under discussion.

HIST 30490. Nineteenth- and Twentieth-Century Polish History (3-0-3)

This lecture course explores Polish history from the partitions to the present. Special emphasis will be placed on understanding Poland’s changing political, cultural, social, and physical geography. Politically effaced from the map of Europe twice in the two centuries under study, Poland ceased to exist as a political nation between 1797 and 1918 and 1939 to 1945. In the wake of World War II, moreover, Poland’s geographies shifted once more as the country changed physical shape and simultaneously came under Soviet rule. Each time independence melted away, the Polish nation grew stronger and experienced social, cultural, and political transformation, ultimately spearheading the drive of all of Eastern Europe to overthrow communist rule. Although basically a lecture course, the instructor will provide ample opportunity for discussion and questions in class. About seven books will be assigned. There will be a mid-semester and final examination, as well as a paper.

HIST 30491. Modern European Jewish History (3-0-3)

A survey of modern European Jewish history, with a special emphasis on Eastern Europe, particularly Poland.

HIST 30495. 20th-Century Poland (3-0-3)

This course surveys Polish history from 1900 to the present. It aims to provide a basic knowledge of the major events and processes that shaped the political, social, and cultural history of Poland in the twentieth century. Key themes include: nationalism and the rise of independent Poland in 1918; democracy and its failure during the interwar period; Nazi and Soviet occupations, and the impact of World War 2 on Polish society; the imposition and evolution of Communism and response from society; the Polish Solidarity movement and the collapse of the communist system; and contemporary Poland.

HIST 30496. History and Cinema of Communist Poland (3-0-3) Kunicki

This course examines the legacy of the cinema of People’s Poland. It provides a guide to the dialogue of cinema and national identity under Communism. By comparing historical sources with feature and documentary films, we will aim at analyzing the impact of World War II, Stalinism and de-Stalinization, and the evolving nature of the party regime on arts, culture, and society. We will also address the following questions: What was the status of film vis-à-vis the Polish communist regime? What were the downsides and the benefits of having state-run cinematography? How did the cinematic depictions of past evolved due to sociopolitical, cultural, and esthetic paradigm shifts? How did the portrayal of past events become a medium through which the filmmaker spoke to the contemporary audience about realities that concerned them?

HIST 30498. Polish History since 1945 (3-0-3)

The aim of the course is to trace major post-World War II historical processes in Europe by examining Polish history. Therefore, it will survey the emergence of Cold War divisions, anti-communist uprisings, and the offspring of new democracies, which now aspire for membership of the European Union. Students will explore such questions as: How was the installation of communism in Poland ever possible? How did Poles resist the system and what role did the Catholic Church play in opposition movements? What were the perils of the Polish road

toward democracy, and how does democracy work in present-day Poland? We will investigate the role of the U.S. in supporting Poland’s way to freedom and get to know the main actors of the Polish political scene. The course is designed to foster a broader understanding of contemporary Poland, a country returning to play a lively role in the world.

HIST 30500. Italian Renaissance (3-0-3) Meserve

Corequisite: HIST 32500

This course examines the political, cultural, social, and religious history of Italy from about 1350 to 1550. Starting with an extended study of Florence, its economic foundations, social and political structures, artistic monuments, and key personalities, the course then examines how the culture of the Florentine Renaissance spread to the rest of Italy, especially to the papal court of Rome and the princely courts of northern Italy, and, finally, to the new nation-states of northern Europe. Key topics will include: the growth of the Italian city-state; the appearance of new, Renaissance “characters” (the merchant, the prince, the courtier, the mercenary, the learned lady, the self-made man); Renaissance humanism and the classical revival; the relationship between art and politics; and Renaissance ideas of liberty, virtue, historical change, and the individual’s relationship to God. The course will not tell a story of steady progress from medieval to modern institutions, societies, and modes of thinking; rather, we will consider the Renaissance as a period in flux, in which established traditions thrived alongside creative innovations and vigorous challenges to authority. Students will write one long paper and take a midterm and a final exam.

HIST 30501. Early Modern Rome (3-0-3)

This course traces the interlocking histories of the papacy and the city of Rome from the Renaissance to the birth of the modern Italian state. Topics will include the rise and fall of the papal monarchy; cultural and intellectual life at the Vatican court; the urban fabric of Rome from the Renaissance to the Baroque; the peculiar strains of Roman society; and the tumultuous relationship, both political and cultural, between Rome and the rest of Europe from the Reformation to the age of revolution. The course will proceed chronologically, but will pause frequently to examine special topics including: the Renaissance cardinal and his household; Michelangelo’s Rome; the building of St. Peter’s; Jesuit science; the trial of Galileo; archaeology and antiquarianism; the Roman Carnival; the Inquisition; Bernini’s Rome; the Grand Tour; Rome in the Romantic imagination; and Napoleon’s Rome. Students will write several short papers in response to readings and visual materials, and take a midterm and a final exam.

HIST 30550. Technology of War and Peace (3-0-3)

This course surveys the impact of military technologies on world history from the 16th century onward. Topics include the rise of gunpowder weaponry and the fortification revolution in the early modern period, navalism, particularly in the 19th century, the role of military technologies in European colonial expansion, and the science-based military of the 20th-century, chemical and biological (and so-called “soft-kill”) weapons, leading up to the age of nuclear weapons. The course considers also military technologies as deterrents, military technologies as expressions of culture, and the issue of warfare as a stimulus to technological development.

HIST 30551. Technology in History (3-0-3) Hamlin

A thematic survey of the history of technology, from the Neolithic discovery of agriculture to the information age. Topics include the chemistry and metallurgy of antiquity (high-tech ca. 1000 B.C.), technology in Christian theology; the power revolution of 1200; arms races from the 15th century onward; the marriage of art and science; the industrial, agricultural, transport and communications revolutions; the American system of manufactures; the evolution of the engineering profession; and modern efforts to plan the technological future. These topics form the basis for exploring the following themes: How does technology change? How did we get where we are—do we have the technology now that we must

have, should have, or need to have? What guides technical creativity? How have social effects of technologies been assessed and dealt with? How have technologies fundamentally changed ordinary life and societal organization?

HIST 30552. History of Western Medicine

(3-0-3)

This course introduces students to the history of western medicine from the pre-Socratics to penicillin; it concludes by applying that history to modern medical questions, including professional identities, emerging diseases, and genetic manipulations. Major themes/topics include changing disease concepts, medical education, medical practitioners, “scientific” medicine, therapeutics, hospitals, and the body; sub-themes include women and medicine, race and medicine, and the patient.

HIST 30553. History and Cinema in East-Central Europe

(3-0-3)

Corequisite: HIST 31553

This course examines the legacy of World War II, Stalinism, and politics of memory in communist and contemporary East Central Europe through the comparison of historical sources with feature and documentary films. We will address the following questions: What was the status of film vis-à-vis communist regimes? How did the making of historical films constitute the making of history?

HIST 30554. European Military History Since 1600

(3-0-3)

This course is a survey of European military history and the relationship between European society and its military institutions, technology, and techniques over the last four centuries. Beginning during what some historians have dubbed the “Military Revolution” this course will trace Europe’s military history and its links to political, social, and cultural changes until the contemporary period, and include units on decolonization and European experiences with counter-insurgent warfare in the Middle East and North Africa. This class will focus on exploring how changing styles of warfare, the composition of the military establishment, and the transformations in military technology have impacted upon state and society. Conversely, it will also investigate how political and societal changes have influenced the nature of warfare.

HIST 30555. Revolutionary Europe: 1848

(3-0-3) Deak

This course will introduce students to the major revolutions that occurred throughout continental Europe in 1848. In addition to covering the details of rapidly evolving events, we will look at long-term social and political roots of the revolution as well as the role of ideologies (socialism, nationalism, liberalism) in shaping actions taken (and subsequent interpretations of those actions). Finally, we will ask not only why these revolutions failed, but what makes them “European”—other than the accident of geography. This course will combine lecture and discussion in roughly equal measure. Readings for this course will include a textbook as well as primary source material including parliamentary speeches and constitutional documents, eyewitness reports, poetry, music, as well as literature.

HIST 30560. Church vs. State: The Impact of Religion on Politics in Modern Europe

(3-0-3)

The Reformation was undoubtedly one of the greatest turning points in the modern history of the western world, forever dividing a church and introducing new structures of political power independent of the pope, as well as new kinds of conflict. Enlightenment thinkers a century later actively advocated reason as an alternative to, if not a substitute for, religion. The Church as an influential political player in Europe began a gradual but inexorable decline, and religion became increasingly separated from political structures. How did religion and politics intersect in the wake of the Reformation and the Enlightenment? How did political figures and governments make use of religion to achieve their goals, and how did societies react? How did religious authorities respond to the increasing separation of church and state in the modern era? This course proposes to follow these intersections of politics and religion in the modern era by focusing on case

studies from around Europe at different times. The purpose of each case study is to underscore the conflict between church and state and to analyze how different groups of people responded to these conflicts in terms of their vested interests. The point is not to prove that the Church and its leadership lost political influence as secular nations and governments gained in stability, but rather to explore the ways in which Church leadership compensated for this loss and attempted to preserve its sphere of influence in other ways. Possible case studies may include: the Jesuit expulsion from Spain, 1767; secularization in Russia under Catherine the Great; the Gordon Riots in Britain, 1780; the French Revolution, 1789–98; Napoleon’s concordat, 1801; the Kulturkampf, Germany, 1871–78; visions of the virgin of Marpingen (mid-1870s); Vatican City from Italian unification to the Lateran Accord, 1867–1929; the Dreyfus Affair, France, 1894–1907; the Armenian genocide, 1914–17; the Greco-Turkish population exchange, 1919–22; Communism/Bolshevism and war with Poland, 1919–22; the German bishops and the Nazi “euthanasia” program, 1939–41; the controversy over Turkey’s application to the European Union.

HIST 30579. The Individual and Society in Modern European Intellectual History

(3-0-3)

This course provides an introduction to the main ideas that shaped modern Europe since the mid-eighteenth century. Using selected key texts (including not only classics of political and social thought but also significant pieces of literature), we will explore the main intellectual currents of European thought. We will discuss the historical context within which these ideas emerged, learn about the biographies of their authors, and examine the impact they had on subsequent events and generations. Additionally, we will confront and compare approaches and ideas of different thinkers, tracing continuities and identifying contrasts. The main thematic focus is on the problem of the individual’s relationship vis-à-vis his/her environment, in particular society and the state. We will look at the different ways modern European thinkers conceptualized the human being as an individual endowed with certain qualities, rights and responsibilities. We will also analyze how different thinkers tried to determine the place and status of the individual within a larger collective, as well as how they dealt with the questions of gender, political and economic participation, religion, and violence in modern European history.

HIST 30580. Modern European Imperialism

(3-0-3)

Whatever prompted a few French priests to leave Europe in the 1840s and journey across the fields and forests of northern Indiana to the site of what would become the University of Notre Dame du Lac? Could their motivations have included elements similar to those prompting and justifying European imperial expansion across the globe? Continuing from an exploration of the above questions, this course will examine the consolidation, progression, disintegration, and consequences of the modern European empires. We will focus on how Europeans forged a cultural identity through their encounters with American, African, Middle Eastern, and Asian cultures. Using readings and film, you will explore how Europeans civilized themselves by constructing, denigrating, and adopting aspects of non-European culture, as well as post-colonial constructions of identity. Finally, we will debate the issue of what current global conflicts owe to the colonial legacy. The class will be organized as a geographical tour of imperialism with thematic detours that will include religion; gender; ecology/biology, medicine, and technology; ethnicity, resistance and class; and terrorism.

HIST 30581. Modern European Diplomacy

(3-0-3)

This course will investigate some of the main problems in the history of European relations from the middle of the 19th century to the present. The emphasis will be on the patterns of political interaction between and among the European powers (Britain, France, Germany, Austria-Hungary, Russia, and Italy). We shall also examine their respective military strategies, both in peacetime and in war, and whether those strategies changed over time. Our other concern will be to place European relations with the context of the great-power system as a whole.

HIST 30582. 20th-Century European Women's History

(3-0-3)

This course explores European history of the twentieth century as it has been shaped, experienced, and interpreted by women. Using a variety of sources—memoirs, government documents, novels, films, and newspaper accounts—we will examine women's lives from the turn of the century to the present day. Themes to be addressed include suffrage, women and war, the women's movement, wealth and poverty, paid and unpaid work, women's bodies and reproductive issues, ethnicity, religion, and popular representations of femininity. Rather than providing a generalized survey, the course will focus on different societies and regions as case studies for specific issues. Course format will combine discussions, lectures, and weekly reading and writing assignments. Reading will include works by people such as Sigmund Freud, Marie Stopes, Sylvia Pankhurst, Alexandra Kollontai, Rosa Luxemburg, Natalia Ginzburg, Dolores Ibaruri, Simone de Beauvoir, Adina Blady Swajger, Helene Cixous, Mother Teresa, Slavenka Drakulic, and many more.

HIST 30583. War, Violence, and Politics in Europe since World War I

(3-0-3)

This class will examine the management and effects of armed conflicts on European society and politics since the First World War. Although centered on Europe, this course will be geographically expansive. In recognition of the powerful tie between events in Europe and events in the Middle East or Southeast Asia, the course will study Europe within a global context to probe the interrelation of war and society—and especially democracy—in 20th-century Europe. The overriding question of the course will be, "How has politically motivated violence shaped and been shaped by European societies?" Course themes include the effects of domestic political structures on war, the effects of war on racial and gender norms, the effects of race and gender on war and political violence, and the attempts to come to terms with terror as a political weapon.

HIST 30585. History of Fascism, 1919–1945

(3-0-3)

This course focuses on the rise and fall of fascism from D'Annunzio's seizure of Trieste in 1919 to the fall of the Axis Powers in 1945. We will begin with an understanding of the historical events and key ideas of Italian and French fascism after the Great War. Then we will examine the expansion of fascism into Germany, Spain, Britain, and Japan in the late 1920s and 1930s. We will conclude with a discussion of the fruits of fascism during the Second World War. Throughout the semester students will be asked to compare these different fascist movements with one another. To aid in this comparative task, different themes will be highlighted: themes such as the role of anti-Semitism, the modern aestheticization of politics, fascist relationships with the Christian churches, and the importance of ideology in totalitarian movements.

HIST 30586. Youth in Europe Since 1945

(3-0-3)

Amidst the social and material devastation of Europe in 1945, youth became a symbol of both the continent's deterioration and its aspirations. This course will examine how the concept of "youth" was continually redefined in response to rapid social and cultural changes. Students will also study how young men and women became an important cultural, political, and economic force—transforming a culture for youth to a culture by youth. Topics will include the Cold War, Americanization and youth consumer culture, the sexual revolution, the protests of 1968, the origins of the environmental movement, punk music in the context of the economic crises of the 1970s, and extremist politics and terrorism in the 1970s and 1980s. In addition to secondary readings, students will analyze primary source texts, films, and music clips. This course is open to all students; no previous knowledge of the topic is necessary.

HIST 30587. Modern Genocide in Historical Context

(3-0-3) Faulkner

In 1948, the United Nations adopted a convention that defined genocide; the ratifying nations promised to prevent genocides, to intervene in those that broke

out, and to hold the perpetrators responsible. However, genocides have continued to occur, and the signers of the convention have spent more time arguing over the definition and its limitations than acting against the perpetrators. In what context was the UN genocide convention drawn up and signed? How did the definition fall short in the eyes of so many of the signatories and scholars? What are its limitations? This course will explore modern genocide in its historical context in order to approach a definition of genocide that will complement the existing UN definition, underscoring the usefulness of the genocide convention as well as exploring alternate definitions and introducing students to the complexities of politics when it comes to enforcing such legislation. We will be looking at several different case studies throughout the semester, including genocides that preceded the invention of the word, most notably the Holocaust. Topics may include the German army in South West Africa; the Armenian genocide during World War I; the figure of Raphael Lemkin and the meaning of the 1948 convention; the impact of the Soviet Union on the official definition; the Cambodian and Rwandan genocides; ethnic cleansing and genocide in the Balkans after 1990; distinctions between ethnic cleansing, crimes against humanity, and genocide; and contemporary events in Darfur. Assignments may include short review papers, a longer research paper, and one oral presentation over the course of the semester.

HIST 30588. Catholics and Politics in 20th-Century Europe

(3-0-3)

This course explores the role of Catholics and the Catholic Church in the politics of Europe in the 20th century.

HIST 30601. Colonial America

(3-0-3) Cangany

This course considers the history of New World exploration and settlement by Europeans from the 15th century to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and Africans with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of colonial North America.

HIST 30602. The American Revolution

(3-0-3) Griffin

Corequisite: HIST 32602

When speaking of the American Revolution, many writers reach for a comment made by John Adams in 1818 that, "[T]he Revolution was effected before the war commenced. The Revolution was in the minds and hearts of the people." Whether this assertion is true historically or not, it still does not adequately describe what that revolution was. The American Revolution obviously had its political elements, primarily the formation of the United States. To reach its political goals, military means were necessary. Without a successful War for Independence, there would have been no revolution. To leave matters there, however, would be insufficient. A fuller understanding of the revolution would need to address how it affected the whole spectrum of American life. It would consider the revolution as a social movement that challenged the political and social hierarchies of the day. It would also ask how the revolution affected those who were not white males, especially women, slaves, and Native Americans. Without considering the possible negative implications of the revolution, any telling would be incomplete. This class will take up these challenges and attempt to make a full-orbed presentation of the events surrounding the American Revolution. It will introduce students both to elites and to those whom the popular narrative glosses over. It will attempt to count the losses, as well as the gains, which flowed from the move to independence from Britain. Finally, it will attempt to describe the many changes through this period, which resulted, not only in a new political nation, but in a new society and culture—changes that in varying degrees are still with us today and of which contemporary Americans are the inheritors.

HIST 30603. The New American Nation, 1787–1848

(3-0-3)

This course examines the social, political, and cultural history of the United States from the ratification of the Constitution to the beginnings of the political crisis over expansion and slavery. It covers the democratization of politics and the problems of national independence in the wake of the Revolution; territorial expansion; economic change; the development of regional, class, religious, racial, ethnic, and gendered subcultures; slavery and resistance to slavery; and the new political and reform movements that responded to the era's deep and lasting changes.

HIST 30604. U.S. Civil War and Reconstruction, 1848–77

(3-0-3) Przybyszewski

Through intensive reading and writing students will explore the social and cultural history of America's most costly war. We will focus on various topics as they relate to the war: antebellum origins, religion, gender, Lincoln's reasons for waging war, dead bodies, freedmen's families, black soldiers, and the uses of war memory. This will not be a guns-and-generals-smell-the-smoke course, though knowledge of military matters can be helpful. We will ask and try to answer who really "won" and "lost" the war.

HIST 30606. The United States' Gilded Age and Progressive Era

(3-0-3) McKenna

This course offers an introduction to the history of the United States from Reconstruction through the First World War with particular emphasis on the social, cultural, and intellectual formations of the period. The United States made a dramatic transition in these years: from a predominantly agrarian and rural society to an urban, industrial society and imperial, world power. It is also said that in this period, a new, national, and distinctly modern culture emerged. We will test the merits of this claim and attempt to understand how Americans grappled with these broad transformations by examining the history of social formations, including class, race, and gender, together with the history of cultural formations—American popular culture, the adaptations of bourgeois culture, and the creation of mass culture. In reading sources such as short stories, poetry, political speeches, and novels, and analyzing photography, film, advertising, and architecture, we will explore the making of a modern America.

HIST 30608. The United States, 1900–45

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. Major topics will include the background for Progressive reform, the New Nationalism and New Freedom administrations of Theodore Roosevelt and Woodrow Wilson, the diplomacy of the early 20th century, the causes and results of World War I, the Republican administrations of the 1920s, the New Deal administration of Franklin D. Roosevelt, isolationism and neutrality in the inter-war period, and the American home front during World War II. There will be a required reading list of approximately seven books, two shorter writing assignments, and three major examinations, including the final.

HIST 30609. United States since World War II

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of George H.W. Bush. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this post-war era, and the presidencies of Gerald Ford through George H.W. Bush. There will be a required reading list of approximately six books, two smaller writing assignments, and three examinations.

HIST 30610. Irish-American History

(3-0-3)

Corequisite: HIST 32610

This course will explore the Irish-American experience from Atlantic, global, and comparative perspectives. We will, of course, cover traditional topics, such as labor, politics, and religion. And we will encounter many colorful characters and fascinating stories. But we will do so by viewing the Irish who came to America as part of a broader, dynamic diaspora that would span the globe. Viewing migration to the American colonies (including the Caribbean) and the United States from this vantage point means that we must consider the changing relationship between Ireland and America, as well as the ways in which both regions were parts of broader economic and cultural systems. As such, we will examine dynamics that occurred within the Atlantic basin, such as movement and adaptation to a New World, within a global context. Needless to say, we will cover the history of both sending and receiving societies in rigorous fashion. Only by doing this sort of work can we understand what defined the Irish-American experience.

HIST 30611. Latinos in the United States

(3-0-3)

This course will examine the history of Latinos/as in the U.S. Readings and discussions will trace the founding and development of early Mexican-American communities in the present-day Southwest. We will then topically and chronologically cover the post-1900 urban and regional experiences of Latin American-origin immigrants, migrants, and exiles throughout the U.S. The focus will be on those people coming from Mexico and the Hispanic Caribbean, but immigrants from Central and South America are also included. Some of the areas of emphasis are the Chicano Movement and civil rights; Latino music and culture; race, ethnicity, and the family; education; and contemporary trends in transnational migration. The instructor will necessarily adopt a comparative approach, and students will study and critique a variety of interpretations and ideologies. Lectures and discussions will be supplemented with visual material. Grading will be based primarily on two midterm essay exams and a final research paper (10 pages).

HIST 30612. War, Memory, and American History

(3-0-3)

Wars have always cast long shadows over American history. The 2004 presidential election—with its heated rhetoric about swiftboats, discarded medals, National Guard string-pulling, and even forged documents—has been a timely reminder that the memory of the Vietnam War continues to pervade American life. These events have coincided with a surge of recent historical scholarship that has argued that memory matters in American history. In particular, battles over the meaning and memory of wars have shaped American culture and politics long after the actual bullets have stopped flying. The memory of wars—how the participants and subsequent generations perceive them, what we collectively remember and what we forget—may be as important as the wars themselves in influencing American culture. This class will examine the memory of wars in American history from the colonial period to the present. We will consider the memory of wars between colonists and Native Americans, the American Revolution, the Civil War, World War I, World War II, and Vietnam.

HIST 30613. Violence in U.S. History

(3-0-3)

In the late 1960s, black militant H. Rap Brown exclaimed, "Violence is as American as apple pie." It might be said that the purpose of this entire course will be to evaluate the truth of Brown's statement. This will be accomplished in two ways: first, by surveying of some of the major episodes and themes of violence in American history, from its colonial origins through contemporary foreign policy and domestic debates; and second, by assessing the meaning of that violence as it simultaneously reflects and shapes American society, culture, and values. This course will include significant reading and writing components, as well as a group project.

HIST 30614. History of Education

(3-0-3)

This course will explore the development of education in the United States from the 19th century to the present. The evolution of schooling through American history and the influence of social, cultural, and political changes upon America's educational system will provide the main framework for discussion. Topics such as school segregation and desegregation, parochial schools, gender and education, and unionization will be examined and placed within a historical context. The format of the class will rely primarily on student discussion and will require a significant amount of reading and writing.

HIST 30615. Catholics in America

(3-0-3) Bain-Conkin

Since 1850 Roman Catholics have constituted the single largest religious denomination in the United States. This course explores what the presence of Catholics has meant for the American experience, focusing on themes of church/state separation, religion and politics, education, and social reform. We will also examine how the American context has transformed the practice of Catholicism, with attention to ethnicity, gender, region, race and class as variables that have shaped the American Catholic experience. Assigned readings range from excerpts of anti-Catholic publications to first-hand accounts written by American Catholics from the colonial period to the present. In addition we will study the representation of Catholics in American film, themes of Catholic fiction, material culture relating to Catholic devotional life and the sacraments, and the shifting position of American Catholics in the universal Roman Catholic Church.

HIST 30616. Survey of Historical Developments in American Education: 1650–2010

(3-0-3)

This course is an opportunity for students from a variety of disciplines to familiarize themselves with a lynchpin of U.S. democracy—American schooling. The course will begin with a focus on the political, social, and economic factors impacting the emergence and evolution of American schooling over the history of the nation. A special emphasis within the evolution of American schooling will be placed on how a variety of constituent groups—immigrants, Native Americans, and African-Americans were, and often still are, educated separately and differently than their “white” counterparts. Private and parochial education will also be touched upon. This course is in no way meant to be an exhaustive history of American schooling but an introduction into the significant events in the history of American schooling and their social, political, and economic influences. Students will garner additional historical contexts to use when analyzing modern day educational trends and issues in American education.

HIST 30617. Gender and American Catholicism

(3-0-3)

This course is a survey of the history of American Catholic women from the colonial period to the present. Through a combination of lectures, reading and discussion, we will explore the following themes and topics: the role of religious belief and practice in shaping Catholics' understanding of gender differences; the experience of women in religious communities and in family life; women's involvement in education and social reform; ethnic and racial diversity among Catholic women; devotional life; the development of feminist theology, and the emergence of the “new feminism” as articulated by Pope John Paul II. We will seek to understand how Catholic women, both lay and religious, contributed to the development of Church and nation, and examine how encounters with the broader American society have shaped Catholic women's relationship to the institutional church over the last three centuries.

HIST 30618. American Labor History: Working for a Living in the USA, 1776–present

(3-0-3)

Corequisite: HIST 32618

The labor questions “Who does the work? Who reaps the rewards? And who makes the decisions?” are central to any society, and this course explores how those questions have been answered throughout the history of the United States

of America. This course will introduce you to the major themes, events, organizations, individuals, and scholarly controversies in American Labor History, from 1776 to the present. We will study the diversity of the working-class experience in the U.S. by exploring the past from multiple perspectives, and we will analyze competing interpretations put forth by labor historians over the past half-century. The workers, workplaces, communities, institutions, and issues will range widely over the semester, but we will investigate some core themes for the duration: issues of power, structure, and agency, from the workplace to Washington, DC; workers' wide-ranging efforts to forge organizations, namely labor unions, to represent their collective interests; intersections between class, race, and gender at work, at home, at play, and in politics; and tensions between capitalism, industrialization, and democracy in U.S. history.

HIST 30619. American Thought, Belief, and Values since 1865

(3-0-3)

A study of Americans' most characteristic intellectual, moral, and religious beliefs and why these have flourished in the American cultural setting. The course will survey American history with emphasis on topics such as Old World influences on American ideals, the relation of American materialism to American beliefs, the relation of individuals to communities, the outlooks of diverse subcultures, competing religious and secular faiths, religion in education, the search for truth in a pluralistic society, moral authority in democratic culture, the competing authorities of faith and science, social science and civil law, popular philosophies such as Enlightenment ideals, romanticism, pragmatism, and postmodernism, and the impact of mass media on American beliefs and values. Substantial readings, discussions, short reports and papers on readings, and exams will be required.

HIST 30621. Mexican-American History

(3-0-3)

This course is an introductory survey of Mexican American history in the United States. Primarily focused on events after the Texas Revolution, and annexation of the American Southwest we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican American U.S. citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a U.S.-based Mexican American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican American life and work in the Great Lakes and midwestern United States. We will conclude with the recent history of Mexican and Latin-American migration to the United States after 1965, and the changing nature of Mexican American identity and citizenship within this context.

HIST 30622. Consumerism in Modern America, 1880s to present

(3-0-3)

This course will explore the creation of contemporary consumer culture in the United States. Beginning in the late 1880s, the nature of buying, selling and consuming was fundamentally transformed in the United States. After a brief examination of the broader history of consumption, this course will explore the changes in production, marketing, retailing, and consumption from the Gilded Age to the present. Next it will trace the ways in which those changes have influenced broader cultural, institutional, and political developments throughout the twentieth century. A particular emphasis will be placed on the ways in which patterns of consumption helped define and redefine categories of race, class and gender.

HIST 30623. Native American Histories

(3-0-3) Collier

This course will explore Native American literature, history, arts, perspectives, government, and law. However, it is important to remember that there is no

singular “Native American” point of view. Rather, there are diverse perspectives, ideas, thoughts, movements, and priorities among more than 500 distinct cultural and linguistic groups who are the indigenous people of the modern United States.

HIST 30626. Medicine and Public Health in U.S. History

(3-0-3) Hamlin

This course examines health as a unifying concept in American history. It follows several themes: how class, race, and gender; as well as age; lifestyle; and place have manifested themselves in differential health experience; the ongoing conflict between personal liberty and the interests of the state, the remarkable diversity of American medical systems and their close relation to religious and social diversity; the place of medicine in Americanization campaigns; the changing political economy of American medicine; and finally, the emergence of health as the core concern of the American dream. In short, by the end of the course you should have a good understanding of the uniqueness of American medicine and its central place in America’s history. You should have acquired an historical and critical context that will be of use in your own encounters with matters of health and medicine—as intelligent citizens and about issues of public health and questions of medical ethics, and as creative thinkers about more satisfactory modes of medical practice and health improvement and protection. The course will use three to five texts, and require exams, project, and presentation.

HIST 30627. History of the American West

(3-0-3) Coleman

Few American regions have generated as many cultural narratives, myths, and icons as the trans-Mississippi West. This course takes both the reality and the romance of the West seriously, asking students to examine how the American conquest of the West inspired storytelling traditions that distorted and shaped the region’s history. To get at this interaction, we will read novels, histories, and first-hand accounts as well as view several Hollywood westerns. The class is reading- and discussion-intensive. Students will write several short papers as well as a longer final essay.

HIST 30628. American Legal History

(3-0-3) Rodriguez

This seminar format course provides an overview of American legal history from colonial times to the modern civil rights era. Readings cover the American Revolution and constitutionalism, slavery and early civil rights, labor unions, and the rights of women, African-Americans, Asian-Americans, and Latinos. We will also consider the law’s response to social upheaval in times of crisis and rapid change in American society.

HIST 30629. Morality and Social Change in U.S. History

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

HIST 30630. Religion and American Politics

(3-0-3)

Corequisite: HIST 32630

Since the early 1950s, religion has been an obviously major factor in American political life—driven first by the African-American leaders of the Civil Rights Movement and then, in more recent decades, by the concerns of the Religious Right. Especially after the election of John F. Kennedy in 1960, Catholics have also been fully recognized participants in the nation’s political uses of religion—as well as in debates over whether and how religion should be used politically. This class tries to show that modern political-religious connections are but new instances of what has always gone on in the American past. The shape of contests

over religion and politics may have changed considerably over time, but not the fact of dense connections between the two spheres. Readings for the course include primary and secondary accounts that treat notable incidents, problems, debates, and controversies from the colonial period to the present. Lectures spotlight major issues of historical interpretation, like religion and the Constitution, religion and antebellum debates over slavery, religion and Reconstruction, Catholic versus Protestant understandings of liberty, civil rights and the New Christian Right.

HIST 30631. History of American Sport

(3-0-3) Soares

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse-racing and games of chance in the colonial period through to the rise of contemporary sport as a highly-commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender and class. Given Notre Dame’s tradition in athletics, we will explore the university’s involvement in this historical process.

HIST 30632. U.S. Environmental History

(3-0-3) Coleman

This course is an introduction to the new field of environmental history. While many people think “The Environment” suddenly became important with the first Earth Day in 1970 (or a few years earlier), environmental issues have in fact long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward their surroundings and fellow creatures. They have also increasingly paid attention to the ways environmental factors have affected history. This course will range widely, from world history to the story of a single river, from arguments about climate change to the significance of pink flamingos, and will survey a number of types of history including cultural, demographic, religious, and animal.

HIST 30633. American Religious History

(3-0-3)

This course will examine religion in American life from the encounter between Europeans and Native Americans in the sixteenth century to the present. We will explore the ways in which religion has shaped American society, culture, and politics, and in turn how the U.S. setting has shaped religious expression. Themes will include the rise of religious diversity and ideas of religious freedom; the interactions between the American religious mainstream and minority religious traditions; the relationship between religion in the U.S. and its international setting; and the diversity and persistence of religion in American culture.

HIST 30634. Men, Women and Work in American History

(3-0-3) White

From the current fixation on TV “housewives” to political battles over workers’ rights, ideas about gender and work surround us. This course focuses on work as a framework for understanding American culture. The gender division of labor has never been static, and we will examine the process whereby the same jobs get characterized at different times as masculine or feminine, just as work categories were alternately identified as appropriate to whites versus non-white, free versus enslaved, and paid versus “stay-at-home.” This course has a strong “learning beyond the classroom” component. There will be opportunities throughout the semester for experiential and community-based learning experiences, for example through activities at the Center for the Homeless and interactions with pioneer sportswomen.

HIST 30635. African-American Women’s History

(3-0-3)

This course will trace the cultural, economic and political history of African-American women in the United States from slavery to the present. Through a combination of books, primary sources, and film we will explore how African-American women have addressed what is often referred to as the “double burden”

of sexism and racism while seeking to define their own identities as individuals, wives, mothers, workers, and citizens. Major themes will include labor, family social movements, and civil rights.

HIST 30636. What's Love Got to Do with It? Marriage and the Family in American History

(3-0-3)

From the heated trenches of America's "culture wars" few things are as polarizing as marriage and the family. At the extremes, some harken back to less troubled days when one man and one woman made enduring commitments to each other; others imagine a narrative of progress with women throwing off the shackles of patriarchy, as both men and women forged new kinds of relationships informed by individual needs. Through intensive reading and writing students will grapple with these conflicting narratives of decline and triumph. We will explore Native-American families, polygamy, free-love communities, Cold War homemakers, the black family, and gay marriage. In all of these we will flesh out the ways in which defining "the family" has always been entangled with citizenship, national politics, and religious intolerance.

HIST 30637. The Religious Factor in American Culture

(3-0-3)

This course is about understanding American culture and its history, taking religion into account as one important factor among many—but one often neglected. Subjects include how religion has interacted with just about everything else in the culture, from politics and warfare to intellectual life, ideals, morality, science, schooling, race, immigration, ethnicity, family, sexuality, and so forth.

HIST 30638. Women and American Religion

(3-0-3)

This course surveys the impact of women on American religious thought, tradition and practice in all its variety, and the simultaneous impact of religion on American women, throughout American history.

HIST 30639. Mixed Race America

(3-0-3)

Despite popular images of America as a "melting" both of races and ethnicities, our institutions, values, and practices have often tried to create or maintain spatial and social distance between groups defined as racially different. This course will explore that ways in which Americans have transgressed those boundaries or found other ways of interacting across cultural lines, primarily in the 19th and 20th centuries. We will examine popular cultural perceptions of people of mixed ancestry, their social experiences, the development of various mixed-ancestry communities, and historical attempts to limit interracial socializing, relationships, and marriage. These issues were and are deeply imbedded in debates over the meaning of race, gender expectations and ideas about sex and sexuality. We will also pay close attention to how minority communities have understood people of mixed ancestry in the United States, and how mixed-race identities intersect with African-American, Native-American, Asian, White, and Latino identities.

HIST 30640. Law and Religion in U.S. History

(3-0-3)

This course explores the interconnections between religion and the law as they evolved over the course of the past three centuries of American history.

HIST 30641. Working to Eat: A Labor History of American Food

(3-0-3) Graff

This social and cultural history course explores the unpaid and paid work related to the production, processing, distribution, sale, serving, and clean-up of what Americans have eaten, from the colonial era to the present. Sites of investigation will include the farm and the factory, the kitchen table and the drive-through window, and everywhere Americans have worked to feed themselves or others. Close attention will be paid to gender and race as organizing features of the American food economy over the past four centuries.

HIST 30642. Recreation and Leisure in America

(3-0-3) Coleman

What do Cedar Point, Comicon, and Bookstore Basketball have in common? How about the Aspen Music Festival, Smoky Mountain National Park, and Netflix? Recreation and leisure are a huge part of American life. What we do for fun reflects who we are and what we aspire to be. It can also tell us a lot about America's cultural ideals, social relations, economic institutions, and public policies. Recreation and leisure practices, for instance, are part of our educational system, the basis for major businesses, built into our everyday landscapes, and fused into consumer culture. How can understanding what we do for fun help us understand American culture and society in new ways? This class will examine a range of American recreation and leisure practices in the 19th and 20th centuries via themes of work, landscape, and identity. In addition to course readings and smaller written assignments, students will produce an interdisciplinary final project that speaks to their specific interests and research questions.

HIST 30649. Faith and the AFAM Experience

(1-0-1)

This course will introduce students to the African-American faith experience, with particular attention being given to the historical development of spiritualities of liberation in the American Diaspora. Guest lecturers and seminar leaders will offer perspectives on this rich and heterogeneous tradition from several vantage points within the humanities, social sciences, and theological disciplines. In addition to a course pack of selected readings, the PBS series, *This Far by Faith: African American Spiritual Journeys*, and its companion volume will constitute the required texts for the course. There will be seven class meetings of two hours each. The course will begin on 18 January 2006 and conclude on 1 March 2006. Attendance at all class sessions, active participation in seminar discussions, completion of six short (i.e., 2–3 pages in length) weekly reflection papers, and a final examination are required.

HIST 30650. Prehistory of Western North America

(3-0-3)

This course deals with archaeological data and cultural life of prehistoric western North Americans over the last 20,000 years, until contact with European cultures. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated, and diverse cultures of the Native Americans. The course will focus on material culture, environmental relationships, and technology to explore cultural change, land-use patterns, economics, and political complexity. In addition, some understanding of the methods by which archaeology is done by scientists in North America and an introduction to historical archaeology are included.

HIST 30651. Prehistory of the American Southwest

(3-0-3)

This course uses archaeological data and theory to explore the cultural life of prehistoric Southwest Americans over the last 12,000 years. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated and diverse cultures of the American Southwest. The descendants of these cultures include the Pueblo peoples, the Dene, and the O'odham peoples. In the course students will explore cultural change, land-use patterns, economics, and political complexity, using information on environmental relationships, technology, and other aspects of material culture.

HIST 30652. Women and Work in Early America

(3-0-3)

This course will introduce students to a broad view of early American social history that foregrounds the gendered aspects of work in Early America—defined loosely as the period from colonial settlement to 1820. On one level, this approach allows for the recovery of women's and girls' contributions to the formal and informal economies of pre-industrial early America, including their work activities within the household. This perspective is especially crucial to the examination of the gendered ideologies of white, Native American, and African servitude and/or slavery. These ideologies dictated the work experiences of large race- and class-defined segments of the population. Yet cultural retention also played a part and this course

will invite students to investigate the impact of derivative work practices (for example examining African women's dominance of market activities in the New World through the lens of West African work practices). Further, while the course title emphasizes women's experiences, the class and race implications of male work practices in early America will be similarly illuminated by a gender studies approach. Thus, an overarching purpose of the course will be to highlight the fluid and instable conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to European versus non-European, free versus enslaved, and public versus private spheres.

HIST 30654. Fashioning Identities in Colonial America

(3-0-3)

This course will focus on dress and material/visual culture in Colonial North America. It will introduce methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies. In our focus on the colonial period (especially the 18th century), we will analyze the economics of dress (the production, marketing, and acquisition of cloth and clothing) and will assess the importance of fashion to commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class, and ethnic encounters.

HIST 30658. Early American Empires

(3-0-3)

Between 1400 and 1750, a fierce battle for Empire was waged between and among the Spanish, French, and British nations and the peoples they sought to control, particularly Africans and Amerindians. The result of this fateful encounter would determine the political, economic, cultural, racial, and ecological character of what became the United States of America. Students will engage with this momentous event in several ways: through select readings in the theoretical and historiographical literature; by using primary sources written by the colonizers and the colonized; and by reading important secondary works. The themes we will explore include: the symbols used by the various Empires to establish rights to the land; the different patterns of settlement; the various European interactions with Africans and Amerindians; the effect that contestants for Empire had upon the land; and the response of Africans and Amerindians to European attempts at subjugation.

HIST 30659. Imagining America: Encounters, Expectations, and Perceptions in Early America

(3-0-3)

The European encounter with America brought the peoples of Africa, America, and Europe into close contact and intertwined their fates. What happened to Europeans' conceptions of the world and their place in it as they became aware of the existence of America? How did they view the land and the peoples of Africa and America? Conversely, how did the Africans and the Indians perceive the Europeans? This course surveys the responses of Africans, Indians, and Europeans to the social, economic, and intellectual changes wrought by their mutual encounter from their first contact to the eighteenth century. Europeans projected their best hopes and worst nightmares on to the New World. Some imagined it to be a paradise populated by noble savages. Others believed Indians and Africans were barbaric pagans, devoid of humanity. The close contact between Europeans, Africans, and Indians prompted new discussions of the differences between what we now call "races." Many Europeans came to the Americas for economic profit. Yet others saw the new world as a mission field or a land in which they could build a new, pristine, Christian civilization, free from the corruptions of Europe. The course will be divided into three broad categories: empire, anthropology, and religion.

HIST 30660. Natives and Newcomers to 1815

(3-0-3)

Stretching from 1491 (and earlier) to the aftermath of the war of 1812, this course charts the history of early America through the exchanges, misunderstandings, conflicts, and unions between Native Americans and a variety of European newcomers. The course combines methodologies, themes, and questions of both

Indian and colonial histories. Through lectures, class discussions, and essay assignments, students will explore early America through the multitudes of nations, peoples, and cultures that staked their claim to the continent.

HIST 30680. Jacksonian America: Politics, Culture, and Society, 1815–1848

(3-0-3)

This course explores the early 19th-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–48). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and antislavery, changing gender roles and the rise of feminism, evangelical religion and reform, and Native American resistance and removal.

HIST 30681. Reforming America in the Long Nineteenth Century (1776–1919)

(3-0-3)

With the recent 2008 presidential election there is a lot of excitement about the possibility of "change" and "reform" in our country. This class will provide perspective on our present historical moment by examining American reform movements of the past. It will focus on "the long nineteenth century" from the American Revolution to World War I. During this time optimistic Americans of various stripes set out to reform all sorts of things: religion, sex, eating and drinking, race and gender relations, education, and working and living conditions, to name just a few. As we look at these reform movements, we will ask the questions: What drove certain people to buck convention and seek reform? Why did they choose to focus on these particular reforms at these times? What did they believe would be the ultimate significance of the changes they were seeking? Why were some movements more successful than others?

HIST 30682. The Louisville Bloody Monday Riot of 1855: Politics, Religion, Ethnicity and Violence in 1850s U.S.

(3-0-3)

The ultimate goal of this course is to move through the historical process with students: curiosity, researching, organizing, argument, writing. This course incorporates both meanings of the phrase "history-making." First, students will investigate the events surrounding a specific riot in 1855 Louisville, Kentucky. Called "Bloody Monday" by those few who know of it at all, the riot took place on an election day when xenophobic nativists targeted businesses, dwellings, and churches of immigrant Catholics. Students will learn the details of the event as well as those groups that converged so violently. Important corollaries such as immigration, urban space, religious conflict, ethnicity, politics, violence, and others, are also a part of the students' readings and discussions. The course will seek answers to the usual questions of history, such as: "What happened?," "Who was involved?," and "Why did it happen in this particular way?" The other way in which this course involves "making history" is by integrating the process by which historians investigate and understand the past. In addition to a heavy emphasis on primary documents and secondary materials relating to the riot, students will read a variety of materials on topics that relate to an anti-Catholic riot in an antebellum city. The goals of the investigation will also include crafting arguments, imagining historical events, innovative techniques to present data, and novel approaches to material. Students in this course will also participate in several activities designed to stimulate thinking about the past. The questions to which this aspect of the course may offer answers include: "How did this event compare to other violence in the nineteenth century U.S.?" and "How have past scholars treated (or ignored) this event?"

HIST 30683. The American South from Thomas Jefferson to Woodrow Wilson

(3-0-3)

As an introductory survey of the American South during the long nineteenth century (from the Revolution to WWI), this course will explore the oft-neglected southern variation on national themes of freedom, nationhood, progress and

modernity. While exploring the question of what made the South distinctly “southern,” students will analyze slavery and the social order in the contexts of the economics and everyday life; the causes of secession and Civil War; southern nationalism and competing “Souths”; the political and social legacies of Reconstruction; and the evolving constructs of race and gender as part and parcel of the southern way of life.

HIST 30685. Abraham Lincoln’s America, 1809–1865

(3-0-3)

This course will use the life of the republic’s most celebrated president as a window to explore the transformations and continuities in American politics, cultures, economics, ideologies, and social life during the half-century ending in the cataclysmic Civil War. Using Lincoln’s own experiences as a starting point—his poor upbringing, his family’s frequent moves across the sectional borderlands, his self-motivation and professional ambition, his embrace of mass politics, and his rapid ascent to national leadership during the republic’s greatest crisis—students will explore much more than the sectional struggle and the fight to save the Union from secession. Important topics will include the evolving struggles over the meanings of race, freedom, and slavery; the increasing commercialization of the economy and the forging of new class relationships and identities; migration, property-holding, and relations with Native Americans in the rural and small-town west; changing realities and conceptions of gender, family, childhood, and parental authority; the changing role of local and national governments and the rise of political parties and mass political participation; and the heated contests over nativity, religion, and citizenship. In short, Lincoln’s personal experiences will be the entry into understanding American society as a whole during his life (1809–1865), and students will ponder the usefulness of biography to the larger historical project as well as the importance of memory and myth in the ways we repeatedly reconstruct the past.

HIST 30700. African-American History to 1877

(3-0-3)

This course is a survey of the history of African Americans, beginning with an examination of their West African origins and ending with the Civil War era. We will discuss the 14th and 15th centuries, West African kingdoms and cultures, the Trans-Atlantic slave trade, early slave societies in the Caribbean, slavery in colonial America, the beginnings of African-American cultures in the North and South, slave resistance and rebellions, the political economy of slavery and resulting sectional disputes, and the Civil War.

HIST 30701. British-American Intellectual History, 1650–1900

(3-0-3)

A survey of the intellectual history of Britain and English-speaking America from around 1600 to the mid-19th century, including European backgrounds and contexts, with an emphasis on writings about religion, government, natural science, education, and human nature. Besides exploring the early-modern Anglophone world on its own terms, the course aims to help us understand better the origins and implications of our own ways of thinking. There will be a midterm examination, a final examination, and a term paper based on primary sources.

HIST 30703. History of U.S. South to 1877

(3-0-3)

This course will provide a survey of the American South through Reconstruction. We will briefly describe Native American societies and early Spanish settlements in Florida and the Southwest before addressing in greater detail the political, cultural, and social history of the region as it was settled beginning in the southeast. We will examine how ideas like honor, freedom, patriarchy, and religious beliefs were forged and evolved in the context of a slave economy, and how they shaped the day’s political questions. We will also consider the Confederate experience and Reconstruction.

HIST 30704. History of American Women I

(3-0-3)

This course surveys the social, cultural, and political developments that shaped American women’s lives from the colonial period to 1890. It will analyze both the

ways American culture defined women’s place during different historical periods and the ways women themselves worked to comply with or to resist those definitions. Topics include pre-industrial society, transformations in work and family life, industrialism and class formation, slavery, women’s culture, and the emergence of a women’s movement. Throughout, stress will be laid on the importance of class, race, and ethnicity in shaping women’s historical experience.

HIST 30705. U.S. Foreign Policy before 1945

(3-0-3) Brady

This course covers the main developments in American foreign relations from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in the two world wars. A recurring theme will be the major traditions in American foreign policy and the ways in which these traditions influenced policy makers in the early years of the “American Century.”

HIST 30706. Sex, Sexuality and Gender in the United States to 1880

(3-0-3)

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions’ attitudes towards sexuality (the Puritans were not anti-sex!); how different cultures’ views of sex shaped relations between colonists and Indians; why sex was an important factor in establishing laws about slavery in Virginia; birth control and abortion practices; changing patterns of courtship; men who loved men and women who loved women; and why the average number of children in American families fell by 50 percent between 1790 and 1890. Over the course of the semester, students will also design a small research proposal on some aspect of the history of American sexuality prior to 1890. Written assignments will include a weekly journal, midterm and final examinations; a book review; and a small research project.

HIST 30707. American Intellectual History to 1870

(3-0-3)

This lecture course will survey major developments in American thought from the first English contacts with North America to the mid nineteenth century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye towards understanding the roots of our own ways of thinking. Especially in the first weeks of the course, European backgrounds will also receive attention.

HIST 30708. Race and Culture in the American South to 1865

(3-0-3)

This course traces the roots of southern, antebellum culture by exploring the centrality of the relationships between sex, manliness, and slavery in the development of south from 1619 to 1865. By examining how European men viewed their own sexuality and that of European women in contrast to that of African men and women, this course seeks to examine the complex racial and gendered identities at the center of southern culture. The underlying current of the class is to understand the complexity with which racial and gendered identities defined relationships and culture in the south. Using primary and secondary sources, we will critically engage the debates about slavery, racism, gender, and class in southern culture. We will reevaluate the historiographic arguments on American racism. We will take the notion of “southern gentlemen” to task, juxtaposing their responsibility as patriarchs to the ugly underbelly of slavery, race, and sexual exploitation. Our efforts in this class will be to understand the contours of the relationships between sexual control, manliness, and racism. We will explore the daily lives of men and women who lived during the time. A variety of perspectives will constitute our sources about slavery, including those of blacks, free and enslaved, as well as planters, abolitionists, women, and yeomen.

HIST 30750. Race, Ethnicity, and Racism in Modern America

(3-0-3)

This course will survey American attitudes, beliefs, and practices regarding race and ethnicity from the late 19th century to the present, including a consideration of the development and changing meaning of the concept of racism. A major emphasis will be to trace the shifting constructions of ethnicity over time and the constantly evolving understandings of what race entails, how racial boundaries are demarcated and crossed, and how all these definitions are historically and culturally flexible. Another central theme will be to trace how various European groups transformed themselves from racial-ethnic outsiders to being “white,” a process that simultaneously expanded the bounds of inclusion for some and solidified the terms of exclusion for others.

HIST 30751. The Great Depression in the United States

(3-0-3)

This course explores the political, economic, cultural, and social history of the Great Depression and New Deal years in the United States, from the stock market crash of 1929 to the beginning of World War II in 1941.

HIST 30752. Black Chicago Politics

(3-0-3) Pinderhughes

This course introduces students to the vast, complex and exciting dimensions of black Chicago politics. First, institutional structures, geographic distribution and population characteristics will inform students about the sociodemographic background of the African-American population in the city. Second, the course explores varying types of political expression that have developed over more than a century, including electoral politics, mass movements, partisan politics; it will also examine the impact of the Chicago machine, and of the Washington era on the political and economic status of African Americans in the city. Third, public policy developments in housing, education and criminal justice will be discussed. Fourth, the course also compares black political standing with other racial and ethnic groups in the city. Finally, the course will introduce students to the long tradition of social science research centered on the city of Chicago.

HIST 30753. U.S. Civil Rights History: The Chicano Movement

(3-0-3) Rodriguez

Corequisite: HIST 32753

The “Chicano Movement” for Mexican American civil rights grew in tandem with the main contours of the civil rights culture that developed in the United States during the 1960s. As such, this course seeks to place the movement alongside other national movements for social change including the African-American civil rights movement, labor movement, counter-culture, and the anti-war movement. It will also be attentive to related efforts to build bridges between Latino populations (mainly Puerto Ricans) in American cities. As it emerged in the 1960s, the Chicano Movement challenged and maintained the ideological orientation of past efforts for Mexican-American inclusion as it borrowed from the rich mix of social and cultural movements that defined the 1960s and early 1970s. This course will explore movement centers in California and Texas as well as a growing body of research on the civil and labor rights efforts in the Great Lakes, Pacific Northwest, and other Mexican ancestry communities across the United States as well as connections to Mexico and Cuba. This course will detail the key events and leadership of the movement as well as the art, music, and cultural production of one of the most important American civil rights movements of the post World War II era.

HIST 30800. African-American History II: Since 1865

(3-0-3) Pierce

This course examines the broad range of problems and experiences of African Americans from the close of the American Civil War to the 1980s. We will explore both the relationship of blacks to the larger society and the inner dynamics of the black community. We will devote particular attention to Reconstruction, the migration of African Americans from the rural south to the urban north, and the political machinations of the African-American community. The course will utilize historical documents in the form of articles and other secondary sources. Classes will be conducted as lecture-discussions.

HIST 30802. U.S. Political Traditions since 1865

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy’s character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of the debate over slavery and Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

HIST 30803. Southern United States History since 1865

(3-0-3)

Popular notions of the South tend to portray it as a region lost in time, trapped within backwards traditions and a hostile view of the modern world. Yet, no region of the country has experienced such sweeping social, cultural and economic changes as the American South between the Civil War and the 1980s. Over the course of that period, southerners witnessed rapid economic transformation from plantation economy to Sunbelt industrialism; the rise and fall of Jim Crow and the tremendous racial strife that accompanied these changes; a literary flourishing brought on by what writers called the region’s unique sense of tragedy and loss; the movement of southern folk life away from the farms and mill towns into urban areas; and the rising appeal of southern politics and culture to a larger national community in the modern day. This course will examine these and other developments in the context of American history, casting a comparative eye toward how other societies have sought to embrace modernization while clinging to a variety of traditions, real and imagined.

HIST 30804. History of American Women II

(3-0-3)

This course surveys women’s relationships to the social, cultural, and political developments shaping U.S. society from 1890 to the present, concentrating on developments in women’s activism, work, and popular culture. Topics include the New Woman and Progressivism; the transformation of feminism in the 1920s; women’s role in the development of the welfare state; women’s paid and unpaid labor; women’s changing roles in the Depression, World War II, and Cold War periods; the Women’s Liberation Movement of the 1960s; and the polarized politics of gender in recent decades. Written assignments will include a 10- to 12-page research paper and short weekly journals on the readings and lectures. Readings will include a mix of recent articles and primary sources. Particular attention will be paid to the impact of class, race, ethnicity, and sexuality on issues of gender.

HIST 30805. U.S. Foreign Policy in the Cold War Era

(3-0-3) Miscamble

This course covers the main developments in American foreign policy from World War II through the end of the Cold War. The principal topics of investigation will be wartime diplomacy and the origins of the Cold War; the Cold War and containment in Europe and Asia; Eisenhower/Dulles diplomacy; Kennedy-Johnson and Vietnam; Nixon-Kissinger and détente; Carter and the diplomacy of Human Rights; Reagan and the revival of containment; Bush and the end of the Cold War.

HIST 30806. Sex, Sexuality, and Gender in U.S. History since 1880

(3-0-3) Bederman

Topics may include representations of sexuality in movies and advertising; new courtship practices among unmarried heterosexuals (from courting to dating to hooking up); changing concepts of same-sex love (from inversion to homosexuality to gay liberation to LGBTQ); the demographic shift to smaller families; the twentieth-century movements for and against birth control and legal abortion; and the late-twentieth-century politicization of sexual issues.

HIST 30807. American Intellectual History since 1870

(3-0-3)

This lecture course will survey major developments in American thought from the later nineteenth century to the end of the twentieth century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our present ways of thinking.

HIST 30808. History of American Education: Race, Class, Gender and Politics

(3-0-3) Collier

American education mirrors American society with myriad challenges, successes, and ideologies. This course will look at how political struggles over race, language, gender, and class have all played out in the battle over American schools, schools that ultimately hold the literal future of America. This course will explore the history of education in American from the late 1865 to the present and will have special emphasis on segregated schools in the 19th century and today. The course will also look closely at the very best programs re-shaping American education such as The Alliance for Catholic Education and KIPP. The course will look at education from kindergarten all the way through graduate programs as we study how our institutions have formed and how they form and transform our society.

HIST 30850. Twentieth-Century American Military Experience

(3-0-3)

Is America, as historian Geoffrey Perret contends, a “country made by war”? Regardless of one’s opinion, a systematic study of America’s wars is essential to either confirm or refute the above statement and obtain a more complete understanding of the nation. There have certainly been ample historical occurrences to support Perret’s assertion over the last century, and this course will investigate the validity of the question by examining the modern American military experience from after the Franco-Prussian War of 1871 to the present. We will explore the causes, conduct, and consequences of the major military conflicts of the 20th century in which the U.S. was involved or that had a significant impact on the U.S., using traditional historical materials. We will also read several battlefield memoirs to further examine the conflicts at the tactical level and also explore the human dimension of war. Using a fundamental thesis to address war at the political, strategic, operational, and tactical levels, the goal of the course will be to gain a better understanding of the relationship among the different levels as well as the importance of each. As a part of their discovery process, students will take three essay exams and write a research paper assessing the combat effectiveness of a particular unit that existed during this period to assist them in determining, developing, and delivering a response to Perret’s statement.

HIST 30851. Rebel Youth in Latino/a America

(3-0-3) Pensado

This course will explore the history of youth and youth movements of Latino descent in the United States during the 20th century with particular emphasis on the historical evolution of two representative communities: Mexican Americans in the South West and Puerto Ricans in New York. How was youth discovered and defined as an age group in these two communities? More specifically, what did it mean to be a “pelona” or a “flapper” of Mexican descent during the roaring 1920s, a “pachuco” in East Los Angeles during WWII, a “rebel without a cause” of Puerto Rican descent in postwar New York, a young Chicano/a or a young Mexican American during the 1960s and 1970s, a young Nuyorican or a member of the Young Lords Movement in Spanish Harlem in the same turbulent period, a “cholo” in the streets of San Antonio and Los Angeles during the 1980s, or a Latino/a hip-hop artist in the Bronx and Miami during the 1990s? Did young people construct these identities and/or labels different in any way or fashion, as the media, the state, the conservative right, the left, or the cultural industry? Moreover, what were some of the social and political consequences that negative as well as positive perceptions of Latino/a youth had on mainstream America? Finally, how did young people of Latin American descent organize politically to challenge labels imposed on them from above, shape their respective identities from below, and improve their local communities? Were they successful in achieving their

goals; if so, how? To answer these broad historical questions, students will be asked to critically evaluate theoretical approaches to the study of youth, learn the history of Latino/as in the United States, explore the political thought of various youth movements, and examine different aesthetic expressions of Latino/a youth. In addition, students will be required to analyze relevant primary sources, including political manifestoes, memoirs, newspapers accounts, photographs, television images, documentaries, and films. The course will conclude with a brief exploration of youth culture in the United States today with particular emphasis on media representations of Latino/a youth produced in commercial Hollywood films, MTV videos, and television shows.

HIST 30854. U.S. Presidents: FDR to Clinton

(3-0-3)

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

HIST 30855. We Hold These Truths: Catholics in 20th Century America

(3-0-3) Appleby

A survey of the Catholic presence in the United States during “the American century,” the focus of the class will be on the ways Catholics integrated their national and religious identities. Defining American culture broadly, we will discuss Catholic politicians and laborers, monks and nuns, pacifists and cold warriors. What was the relationship between Catholic spirituality, cultural criticism and social reform? What consequences did conflict over sex and gender have in the realm of church authority and lay practice? Why did Catholics stop going to confession in the mid-sixties? We will examine the challenges of being American and Catholic by exploring Catholic themes in American popular music, film, and fiction; Catholic social teaching on the economy and nuclear war; and the changes in Catholic religious practice and self-understanding inspired by the events of the 1960s, including the Second Vatican Council and the civil rights movement. Profiles of “everyday Catholics” drawn from primary historical sources will be complemented by brief excerpts from the writings of influential thinkers and activists such as John Ryan, Dorothy Day, John Courtney Murray, Thomas Merton, Richard Rodriguez, Cardinal Joseph Bernardin and Cathleen Kaveny. Two class sessions will be devoted to Notre Dame’s role in this story, including the vocation and career of Father Ted Hesburgh, while three class sessions will be devoted to contemporary challenges facing Catholics and the Church.

HIST 30856. Labor and America since 1945

(3-0-3) Graff

This course explores the relationships among and between workers, unions, employers, and government policymakers since the end of World War II, as well as the ways in which those relationships have shaped and been shaped by American politics and culture more broadly. The United States emerged from the Second World War as the globe’s unequalled economic and political power, and its citizens parlayed that preeminence into a long postwar economic boom that created, however imperfectly, the first truly mass middle-class society in world history. At the heart of that new society was the American labor movement, unions like the United Auto Workers, the United Steel Workers, and the International Brotherhood of Teamsters who together represented 35% of eligible workers at their peak in 1955, and whose leaders ensured that at least some of the heady postwar profits made it into the wallets of workers and their families—and not just the wallets of union members, as working Americans generally experienced great improvement in wages, benefits, and economic opportunity during the quarter-century ending in 1970. Fast-forward to today, however, and the labor movement appears marginal to the American political economy, as unions represent only 8% of workers in the private sector. Meanwhile, income inequality and wealth disparities have grown every year over the past three decades. What accounts for the decline of organized labor since 1970, and why have the people of the mythic “land of milk and honey” experienced declining upward mobility and widening gaps between the rich and everyone else? Are these phenomena linked? What has the decline of the labor movement meant for workers specifically, and

the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, modern conservatism, and the fortunes of individual freedom more broadly? What is “globalization,” and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and films, this course will try to answer these questions and others. It will also address the prospects for working people and labor unions in the twenty-first century.

HIST 30857. The United States during the 1960s

(3-0-3)

Few periods in American history have been as controversial as the 1960s. Sometimes called the “Long Sixties,” it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the U.S., the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a combination of readings, videos, mini-lectures, and class discussions. Toward the second, they will be exposed to four different approaches: (1) discussing primary documents and writing a paper on some of them; (2) studying three small-scale case studies; (3) examining the large-scale phenomenon of protest; and (4) reading the memoirs of a Cabinet member, hence gaining an insider’s view of the life and activities in the White House.

HIST 30859. Reagan’s America: The United States in the 1980s

(3-0-3)

In his campaign for re-election to the presidency in 1984, Ronald Reagan released a television commercial that began with the line, “It’s morning in America again.” The ad suggested the many ways in which President Reagan and the Republican Party were improving the economy and bringing optimism back to America. “Under the leadership of President Reagan,” the commercial concluded, “our country is prouder and stronger and better.” Reagan’s campaigns for the nation’s highest office stressed the themes of patriotism and individual responsibility, while his presidential administrations oversaw an economic agenda that privileged corporate America and wealth production and a foreign policy that justified extreme measures by citing the dangers posed by the Soviet Union and communism. The United States in the 1980s was dominated by the presidency and personality of Ronald Reagan. His aggressive economic and foreign policies influenced the major events of the decade, while his politics helped to shape the wider culture, a period often characterized as “the me decade” (and one Madonna called “a material world” in a hit song). In this course students will explore the 1980s and assess the conventional wisdom about Reagan and the decade he dominated. Were Americans too blinded by greed to confront the nation’s social problems, or was there a serious debate going on about individual conscience and social responsibility? Students will debate these and other questions as they explore several of the major themes of 1980s America: the Cold War, the Christian Right, progressivism, conservatism, popular culture, and the media. In addition to probing political speeches, congressional testimony, the Reagan diaries, pop music, and sitcoms, students will also examine some of the new books by historians, who are just now beginning to come to grips with this pivotal recent time in American history. No previous knowledge of the topic is necessary.

HIST 30860. Images of Science and Technology in American Film

(3-0-3)

Corequisite: HIST 31860, HIST 32860

From *Star Trek* and *Star Wars* to *Metropolis* and *Wall-E*, Americans have been fascinated with images of science at the movies for a century. This is not that surprising: through the last hundred years, film has been one of the most popular forms of entertainment in America. When a movie is well done, it transports us

to another time or place, often with our full consent. And, at least if we listen to our politicians, the progress of America itself hinges on the performance of American scientists. For many Americans, movies and science go together like popcorn and Coke. Despite their escapist packaging, however, movies are rarely message-neutral. Through subtle and not-so-subtle plots, dialog, music, and images, movies both reflect back ideas we already hold and show images to us that might be uncomfortable if simply “told” to us. They play on the hopes and fears that the audience brings in with them, and sometimes can subvert these beliefs and expectations. In this course, we will study the entanglement of American history and science as portrayed in film through the twentieth century. Though we can’t pretend that films influence the doing of science in any meaningful way, we will assert that the cultural product of film both illustrates and exploits the concerns of a given period. On the one hand, movies are just entertainment; on the other, they offer us a window into our greatest hopes and fears—and how science was and is thought to deliver both.

HIST 30885. Popular Culture

(3-0-3)

This is the first of a two-semester senior seminar in oral history theory and methods. By surveying the current field, students will learn how oral history is uniquely suited to both contribute to historical knowledge and challenge dominant narratives. The final project will prepare students to engage in collecting oral histories during the Spring Semester if they register in Oral History 2: Practicum.

HIST 30886. American Men, American Women

(3-0-3)

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, ’50s television families, and ’60s youth culture; and into recent shifts with women’s rights, extreme sports, and talk shows.

HIST 30890. Civil Rights and Protest Movements

(3-0-3)

This course will look at protest movements for civil rights and other related issues, focusing on the 20th century, especially the second half. One central theme will be the African-American civil rights movement of the 1950s and 1960s. How did race, gender, class, religion, and region impact the strategies, goals, and reception of various threads of black struggles for full citizenship? In addition, we will explore previous and later generations of African-American activism, as well as other protest movements in the post WWII period. How did the civil rights movement that emerged in the 1950s draw on early 20th century activism and leadership? What directions did African-American protest movements take after the late 1960s? How did other civil rights, racial and ethnic consciousness, and social reform movements in the 1960s, ’70s, and ’80s develop from their own historical experiences and in relationship to other protest movements?

HIST 30891. American Wilderness

(3-0-3) Coleman

How is a national park different from a national wilderness area, a city park, the lakes at Notre Dame, or your back yard? Why are some considered more wild than others, and why is wilderness such an attractive idea? Writers, historians, painters, photographers, and politicians have described American landscapes as wild to great effect, in concert with identities of gender, class, race, and nation. This class will explore how the idea of wilderness—and the places associated with that idea—has developed during the 19th and 20th centuries. We will examine how wilderness has supported the growth of a national identity but largely failed to recognize the diversity of the American people. Course themes include: 1) developing the wilderness idea; 2) national parks and the problem of wilderness; 3) wilderness experience and politics; and 4) wilderness narratives. Readings will range from

Henry David Thoreau and John Muir to Edward Abbey and Jon Krakauer, and there will be a strong visual culture component. For their final project students will choose a wild place of their own to interpret.

HIST 30892. American Utopias

(3-0-3)

From our colonial roots to the present day, from the Puritans “City Upon a Hill” to the Branch Davidians and the Waco compound, Americans have been trying to create ideal communities based on their particular version of the truth. In this course, we will survey a wide variety of utopian communities, some based on protection from the world, others based on free love and/or perfection of human relations, some now considered cults, and others mainstream religions. We will examine how they were supposed to work versus how they worked in reality, and the dreams and beliefs upon which they were based. We will explore the ways these experiments in living were created by American culture and have, in turn, transformed it.

HIST 30893. The U.S.-Mexico Border in the American Imagination

(3-0-3)

The U.S.-Mexico border has been a hotly contested social and political space since it took its current shape in the mid-nineteenth century. Today, the border remains the source of contentious debates in the United States—from proposed amnesty for undocumented workers and unprecedented activism for migrants’ rights to those who argue for a 700-mile fence to physically divide the two nations—even as Latinos have become America’s largest minority group. This course will unpack these varied (and often contradictory) meanings of the border, paying particular attention to the history of representations of Mexico and “Mexicanness” in the United States and their impact upon foreign policy, political organizing, and cultural relations. Our approach will be interdisciplinary, drawing on methods and texts from history, sociology, film studies, critical race theory, cultural studies, and ethnic studies. Together we will read texts as varied as Gloria Anzaldúa’s *Borderlands/La Frontera* and Steven Soderberg’s *Traffic*.

HIST 30894. Visual America II

(3-0-3)

Offered as a sequel to American Art (AMST 20107), this course has two objectives: first, to introduce students to the various methods scholars have developed to use visual evidence in cultural history research; and second, to provide students with a content course in United States history, one where they receive an overview of the various roles that the art forms noted above have played in 19th- and 20th-century American life. Iconographic analysis—the uncovering of past and present, conflicting and paradoxical layers of cultural meanings within an image or assemblage of images—will be an important part of the course.

HIST 30895. Race and American Popular Culture

(3-0-3)

While “race” is a notoriously difficult concept to define, it is undoubtedly a powerful force in American life. But how do we know what we know about race? Where do these ideas come from? How will matters of race and representation change in the era of Barack Obama? Focusing on the late nineteenth century to the present, this course explores the ways in which ideas about race are formed, negotiated, and resisted in the arena of American popular culture. From blackface minstrelsy on the Vaudeville stage to contemporary comedy, television, and music, this course will ask how popular culture actively shapes—rather than merely reflects—American ideas about race and ethnicity. Rather than emphasizing on a particular racial or ethnic group, we will more broadly examine the politics and practices of representing difference in the United States. By engaging with a diverse set of theoretical, historical, and primary texts, students will learn to approach and analyze popular culture with a critical eye.

HIST 30896. Latinos in Chicagoland and Northern Indiana: A Cultural History

(3-0-3)

Latinos have long contributed to the social fabric of the region popularly known as “Chicagoland,” which includes Northwestern and North Central Indiana. From food to sports to politics to the arts, Latinos have shaped and reshaped the local culture and formed vibrant communities. However, Midwestern Latinos have been marginalized by both local/regional approaches to history and by the field of Latino studies, which tends to focus on the east and west coasts and the U.S. Southwest. This interdisciplinary course will explore Latino communities from Chicago to South Bend to better understand how these communities fit into the broader Latino experience but remain uniquely midwestern. Some of the questions that we will ask include: Why did Latinos settle in Chicagoland and Northern Indiana? Why do new migrants keep coming? How has gentrification affected urban Latino communities? How are individuals and organizations working to improve the lives of migrant workers in rural areas? How do Latinos contribute to the Chicago arts scene? The course will include several site visits to community organizations and cultural institutions throughout the region and will require students to collect an oral history from a member of one of the communities encountered in class.

HIST 30897. Homefronts During War

(3-0-3)

In the wake of the events of September 11 and the current uncertainty of their effects on our military actions and international relations, this course turns to look within the United States. How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? In other words, we will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, anti-nuclear movements; Cold War politics and fears of American communism; debates over the draft, just-war, racism at home, and U.S. policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

HIST 30898. Latinos in American Film

(3-0-3)

This course will survey the history of representations of Latinos in American cinema from the silent era to the present. We will examine how stereotypes associated with Latinos have been produced, reinforced, and challenged in American films—from “greasers” and “Latin lovers” to gangsters, kingpins, and border crossers. We will explore the fascinating contradiction that, despite a long history of misrepresentation and underrepresentation, Latinos have made significant contributions to Hollywood and independent cinema. We will also examine the rise of Latino directors in recent years and their drive to reframe the Latino image for American audiences. Screenings will range from the silent epic *Martyrs of the Alamo* (1915) to more recent films such as *Maria Full of Grace* (2004). Our interdisciplinary approach to the subject will draw upon readings from history, film theory and criticism, and ethnic/American studies.

HIST 30899. American Social Movements

(3-0-3)

Where does social protest fit in the history of American politics? What counts as activism? This interdisciplinary survey of civil rights and social protest movements in the United States examines 19th- and 20th-century movements, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace several traditions of protest that both depend on and offer challenges to a democratic society.

HIST 30900. Latin American History through Film

(3-0-3)

Corequisite: HIST 12900
HIST 31900

This course offers an introduction to the history of Latin America through the study of film (in combination with more traditional print sources).

HIST 30901. Colonial Latin America

(3-0-3) Graubart

Corequisite: HIST 32901

When Columbus stepped ashore in the Caribbean in 1492, he set in motion a process that led to the creation of wealthy Spanish and Portuguese empires in the Americas, the genocide of countless numbers of indigenous men and women, the enslavement of millions of African men and women, and the eventual formation of a variety of independent states competing in the world economy. In this semester-long survey, we will examine topics in this history that will allow us to consider how history is produced as well as what happened in the past, from various perspectives, from elite colonial administrators and merchants to indigenous peasants and formerly enslaved men and women.

HIST 30902. The Emergence of Nationalism in Latin America

(3-0-3)

This course provides an introduction to the major themes of 19th-century Latin American history. It provides an overview of the colonial background to the independence struggle that engulfed the region in the early part of the century, describes the motivations, and in many cases reluctance, of the colonies to disengage from the Spanish empire, and the legacies and opportunities for the construction of a new social, political, and economic order in the region. The course examines the influence of regionalism in the emergence of the new nations, and pays particular attention to the impact of liberalism on social, political, and economic structures in the region. Course requirements include reading assigned chapters and essays for each class, a midterm exam, a book review essay, and a final exam.

HIST 30903. Modern Latin America

(3-0-3)

From Patagonia at the extreme southern tip of South America to Ciudad Juárez on the U.S. border, the Latin American region encompasses a great diversity of nations, peoples, and cultures. This course examines central trends and problems in the study of Latin American history from the mid-nineteenth century to the present, including Revolutions in Mexico, Guatemala, Cuba, Nicaragua, Chile and Peru; the Catholic Church in both its progressive and conservative faces; the pervasive influence of the United States; and the changing welfare of most Latin Americans through a century of economic development from the export boom to neoliberalism. We will use readings, film, news accounts, and lectures to examine this history. No previous exposure to Latin American history is necessary.

HIST 30904. Slavery in Latin American History

(3-0-3) Graubart

Corequisite: HIST 32904

This course examines the experiences of Atlantic slavery in the Latin American world. We begin by thinking about the various ways that enslavement was justified in Western Europe, from the Greek and Roman worlds, through the kidnapping for ransom slavery that characterized the Mediterranean basin. We follow Portugal's unsuccessful attempts to conquer parts of western Africa, and the ensuing introduction of larger numbers of (unransomable) men and women into Iberian domestic slavery, which then coincided with Castile's conquest of the Americas, and the replacement of scarce indigenous labor with Africans. The main part of the course will look at the various experiences of African men and women in the Spanish and Portuguese empires, from the kinds of labor they provided to the cultural worlds they built for themselves, often with the interactions of European and indigenous peoples. We will pay special attention to forms of resistance, from attempts to create autonomy in the church to moments of outright rebellion, culminating in the Haitian Revolution, the first truly successful

slave revolt at led to the second free nation in the Americas. The course will end by considering various calls for abolition over time, and the slow end of slavery after the movements for independence.

HIST 30905. Race, Ethnicity, and Indigeneity in Latin America

(3-0-3) Graubart

This seminar examines the historical production of “race,” ethnicity, and indigeneity in the Latin American context. We will begin with the creation of “Indians” by European colonists, who attempted to erase social differentiation in the peoples they conquered but then had to deal with the consequences of early forms of resistance and solidarity. We will then investigate the degree to which “race” and “ethnicity” were important concepts to non-Europeans in the colonial context, and the beginnings of scientific racism in the Americas. Slavery, especially in Brazil and the Caribbean, obviously added another dimension to social differentiation and the development of racial thinking, which we will investigate. The second half of the course will address contemporary issues that stem from these colonial concerns: nationalism, the romantic invocation of the indigenous past, cultural practices, land rights, political representation, and racism.

HIST 30909. Race and the Nation in Latin American History

(3-0-3)

This course offers a critical analysis of the particular representations of race and nation as presented in film, art, and essays from the colonial to the current era in Latin America. Utilizing these materials we will examine issues of independence, statehood, slavery, revolution, wealth, poverty, education and gender in public culture.

HIST 30910. Experience of Conquest: Native Perceptions of Relations with Spaniards in 16th-Century Mesoamerica

(3-0-3) Fernandez-Armesto

The aim of this class is to try to understand what conquest, as we have traditionally called it, meant to the people who experienced it in some parts of the Americas that joined the Spanish monarchy in the sixteenth century. We'll concentrate on indigenous sources—documentary, pictorial, and material—and try to adopt the indigenous point of view, without neglecting sources mediated by Europeans. Although the class will concentrate on selected cases from Mesoamerica, the lecturer will try to set the materials in the context of other encounters, both within the Americas and further afield; and students will be free, if they wish, to explore case-studies from anywhere they choose in the Americas (in consultation with the lecturer and subject to his approval) in their individual projects.

HIST 30911. Indigenous and Colonial Mexico

(3-0-3)

This course investigates the history of Mesoamerica from the Olmec, Mayan, and Aztec societies to Mexico's independence from Spain after 1800. We will examine the nature of several indigenous societies; their conquest and domination by Europeans; post-conquest debates concerning Indians' nature and colonial Indian policy; the structure of colonial society, including relations between Indians, Africans, and Europeans; Catholic conversions and the role of the Church; and finally the causes of independence. We will use readings, lectures, discussions, archeological evidence, film, and literature throughout the course. Students need not have any background in Latin American history.

HIST 30912. History of Modern Mexico

(3-0-3)

This course examines Mexico from the late 19th century to the present. Through readings, lecture, discussion, film, and research we will visit the major themes of modern Mexico. Our studies range from the country's economic growth at the turn of the century to NAFTA; from the violent years of revolution after 1910 to the gradual emergence of democracy in the 1990s; and from the many who have struggled with poverty to those few who have wielded economic and political power. One of the paradoxes of 20th-century Mexico is the juxtaposition of one of Latin America's most politically stable nations in a society filled with divisions and

frequently with conflict. The ways in which the Mexican Revolution, the nation's unique agrarian reform project, and late-century neo-liberalism have shaped Mexico over the last century will receive particular attention.

HIST 30915. The Mexican Revolution: One Hundred Years of Images and Interpretations

(3-0-3)

This year marks the 100th anniversary of the Mexican Revolution. Conflicting interpretations and a massive amount of secondary literature, films, and artistic expressions have been generated over the last century to highlight the significance of this “first world revolution of the 20th century.” This course examines the multiple and diverse images and interpretations that have been produced over the last century of the Mexican Revolution on the part of historians, the Mexican state, its cultural industry, political activists, international actors, and Mexican Americans living in the United States. The goal of the course is to provide students with a clear understanding of the origins, outcome, impact, and multiple legacies of the Mexican Revolution as interpreted in both Mexico and the United States with particular emphasis on the armed, post-revolutionary, and institutional phases, from 1910 to the 1970s.

HIST 30920. History of Brazil

(3-0-3) Graham

In this course, we will study the history of the country now characterized as a country of the future. With the world's fifth largest population, seventh largest economy, vast resources, growing middle class, complicated race relations, shocking disparity between rich and poor, and world-famous Carnival and soccer, Brazil has garnered attention globally and will only continue to do so as it prepares to host the Olympic Games and the World Cup. The course will cover many other themes, including: the indigenous populations of the Amazon and other regions; slavery; the Portuguese empire; massive immigration from countries like Japan, Germany, Italy; abolition; race relations; two periods of dictatorship; involvement in World War II; redemocratization; and emergence as influential economic powerhouse.

HIST 30921. Racialization in U.S. and Brazilian History

(3-0-3)

This course will consider the processes that have caused aspects of society to be racialized, or labeled with racial meanings, symbolisms, and/or identities. The class will focus on, but will not be limited to, “black” racialization. We will examine how racialization has shaped the human experience in the largest ex-slaveholding nations of the Americas—the United States and Brazil. Our goal is to understand the ways in which not only people are racialized, but also communities, geographical regions, nations, cultural production (such as music), behavior, labor, and gender, to name a few. With these two nations as our case studies, the class will explore the dynamic nature of racialization, focusing on the impact that space and time has had on the way we identify and live race.

HIST 30923. Afro-Brazilian History

(3-0-3) Graham

Brazil has more people of African descent than any other country in the world, other than Nigeria. This fact makes it impossible to understand the history of this South American nation, the fifth largest in the world, or the history of race broadly, without centralizing the experience of black Brazilians. This course will begin with the Transatlantic Slave Trade (during which more slaves landed in Brazil than any other nation) and will end with the modern day Afro-Brazilian movement for equality and the difficulties they face. Along the way, we will cover powerful runaway slave societies, the role of Afro-Brazilians in abolition, the challenges confronted in freedom, black political organization in the 20th century, Afro-Brazilian music traditions, Afro-Brazilian religious practices, and the relationship between such manifestations of black culture and the Brazilian state. We will attempt to understand what has been unique about black history in Brazil, and what has been reflected in the broader experience of blacks in the New World.

HIST 30925. History, Politics and Society of Chile

(3-0-3)

Chile is generally considered as an exceptionally stable and even prosperous country when compared with many of its neighbors in the region. This course will explore the politics, culture, and economy of Chile since independence in order to assess whether the country is unique, or has shared many of the difficulties and challenges of other Latin American nations. The readings, lectures, and discussions will cover such topics as Chilean independence, wars, and revolutions in the 19th century, as well as labor unrest, political mobilization, and state-led economic development. The course will also cover the Pinochet dictatorship and human rights, and the return to democracy in the 1990s. In addition to textbooks, students will use other sources, such as novels and films to explore different facets of Chilean history.

HIST 30929. Andean History and Ethnohistory

(3-0-3)

Corequisite: HIST 32929

This course looks at the history of the peoples who live in the Andean region of South America (modern-day Ecuador, Peru and Bolivia) from some of the earliest recorded settlements through the end of Spanish colonization. Using ethnohistoric—archaeological and anthropological—as well as historic—written texts—materials, we will look at how Andean peoples adapted to and contributed to the formation of their societies, under arduous geographic and climatic conditions. Topics will include the formation of early imperial civilizations such as the Moche and Wari; the development of an Inca empire out of the remnants of these earlier cultures; Spanish conquest and colonization; the adaptation of Andean religiosity to Catholicism; the rebellions of the 18th century. The course will include a visit to the Snite Museum in order to work first-hand with objects from ancient Andean cultures.

HIST 30930. Chronicles of the Conquest of Latin America

(3-0-3)

This seminar examines key aspects of the conquest of Latin America through readings of chronicles and other texts written by Spaniards and Amerindians in the 15th–17th centuries. We will focus upon the ways in which Spaniards and Amerindians theorized and explained their experiences, and their representations of themselves and their “others.” In particular, we will pay attention to the beginnings of modern notions of race and ethnicity through discussions of barbarians, wildmen and cannibals, among other types important to the colonial encounter.

HIST 30935. Latin American Independence

(3-0-3)

This course explores the independence of Spanish America (1808–1826), a transformative period in the history of Latin American politics, culture, and society that turned the people of Spanish America from royal subjects into republican citizens. Students will probe both the changes and continuities in politics between colonial rule and emerging nation-states in Latin America. Topics will include the period of Bourbon Reform, a project of the Spanish Crown that attempted to modernize the Spanish colonies; the emergence of modern political culture seen in public opinion, electoral processes, and the impact of the liberal Constitution of Cadiz; wars of Independence that made citizens-soldiers; the contrasting roles played in these dramas by elites and indigenous and enslaved people; the liberal construction of a myth of racial equality; and the formation of centralized governments. Central to the class will be the scrutiny of a significant set of primary sources regarding these issues and engagement of historiographical debates about the analyzed topics.

HIST 30940. U.S. Operations in Central America

(3-0-3)

As European countries furthered their economic penetration of Africa and Asia during the 19th century, the United States continued its westward expansion by extending its borders to the Pacific and securing its economic and political dominance throughout the Latin American Hemisphere. This course examines the social, cultural and political repercussions a broad range of U.S. operations had in

Central America since the writing of the Monroe Doctrine in 1823 until the fall of communism in the late 1980s, including “Dollar Diplomacy,” CIA-sponsored coups, paramilitary training of “death squads,” and overt military occupations.

HIST 30945. Military Regimes and “Dirty Wars” in Latin America

(3-0-3) Hurtado

Between 1964 and 1990 most South American countries lived under dictatorial military regimes. In this period of extreme political radicalization, these societies were divided alongside contending visions of their national states. Under the premise that they were assuming office in order to save their nations, the South American military established regimes characterized by widespread repression, human rights violations and impunity. Violence, however, was resisted by different sections of society and a particular type of motherhood—embodied by the women who looked for their missing children—acquired subversive connotations in countries like Argentina and Peru. In this course we will seek to understand why military institutions played such a prominent role in the region in the twentieth century, how their doctrines of national security and U.S. assistance enabled them to assume power, and the mechanisms that the military used in order to establish cultures of fear and death in their countries. We will also focus on the responses by individuals and organized civil society to state repression and violence.

Although the course keeps a regional approach, it pays particular attention to three countries: Chile, Argentina, and Peru. What were the similarities and differences among the “dirty wars” occurred in these countries? How did the categories of class, gender and race interplay in the implementation of military and insurgent violence? What memories about repression were crafted in these countries? How did successor regimes make a break with the past, establish a new set of social norms, and work toward the administration of justice, redress and reconciliation? We will approach to this subject by using a variety of primary and secondary sources, fiction and documentary films, as well as elements of pop culture. We aim to see how these lengthy military and authoritarian interventions have shaped present-day societies in South America, and what mechanisms Chile, Argentina and Peru have established to deal with the legacies from their troubled pasts.

HIST 30950. Global Development in Historical Perspective

(3-0-3)

The difference between rich and poor nations is not, as Ernest Hemingway once said, that the rich have more money than the poor, but is in part because the rich produce more goods and services. Industrialization, in other words, has often brought wealth (as well as social dislocation and protest) to those who have succeeded. This course examines the process of industrialization from a comparative perspective and integrates the history of industrialization and its social consequences for Western Europe (Britain and Germany), the United States, Latin America (Mexico), and East Asia (Japan and South Korea). We will concentrate on these countries’ transition from agriculture-based societies to industrial societies. We will analyze the process of industrialization on two levels from above the role of political authority and from below a view of factory life, industrial relations, and protest from the perspective of workers and the working classes. No specific prerequisites in history or economics are necessary.

HIST 30952. Inequality and Development in Latin America

(3-0-3)

Any quick survey of contemporary Latin America quickly uncovers a glaring range of social inequalities. Sharp divides and diverging conditions separate individuals and groups along economic, political, ethnic, educational, and gender lines, to name a few. Although nearly all the earth’s societies exhibit social inequalities, Latin America’s have proved particularly endemic, enduring, and intractable; they have fundamentally shaped the region’s potential for democratic governance and economic development; they are also deeply rooted in the region’s past. This course will begin by examining manifestations of social inequalities in the region today. We will then spend most of the semester tracing the roots of today’s conditions through the region’s history. Students need not have any background in Latin American history.

HIST 30960. Caribbean History: Colonization to Emancipation

(3-0-3)

SUN, SEX & FUN is how the global tourism industry often packages the Caribbean to its potential travelers. In this course we will unpack such simplistic representations of the region. Students will be introduced to the diverse experiences and cultures of the peoples that made up the Caribbean from colonization in the 15th century to slave emancipation in the 19th century. The four major themes that we will examine are Indigenous peoples and European encounters; the laboring lives and the cultural worlds of enslaved Afro-Caribbean peoples; resistance and rebellion; abolition and emancipation. In this course we will watch films, use pictorial sources, slave narratives and diaries to capture the commonality of the experiences of the peoples of the Spanish, French, British and Dutch Caribbean.

HIST 30961. Caribbean History after Slavery, 1804–1959

(3-0-3)

This course explores the history of the Caribbean from the destruction of slavery in 1804 to the Cuban Revolution of 1959.

HIST 30975. Making Australia

(3-0-3) Miscamble

The struggle to “make” Australia, as opposed to replicating Britain, got underway early on after European settlement, and it has been in process ever since. This course will seek to understand this nation-building process. Most of the course will be devoted to examining the major issues in Australia’s history, beginning with an appropriate treatment of Aboriginal history through to the present debates over Australian identity and the nation’s future. The final part of the course will explore important issues in contemporary society and culture. This course will have special interest for students who either have studied or plan to study in the Notre Dame Australia program. (It is of special benefit to the latter group.) In addition to reading 5–6 books, students must view a number of important Australian documentary and feature films. A willingness to participate in extracurricular activities is a prerequisite for the course. (Please don’t sign up for the course if you can’t attend out-of-class events.)

HIST 30985. World History of 20th Century Christianity

(3-0-3)

Corequisite: HIST 32985

A survey of the dramatic changes that have recently altered the face of Christianity in the world. For Catholics, Protestants, Eastern Orthodox, and the rapidly growing number of “independent” churches, the last century witnessed changes on a scale not seen since the first centuries of Christian history. The long-time Christian heartlands of Europe and North America have undergone unprecedented secularization. The once-missionary regions of Africa, Asia, and Latin America have developed larger communities of active believers than now exist in “the Christian West.” All over the world, Christian interactions with war (and peace), poverty (and affluence), disease (and health) have multiplied with increasing complexity. The course concentrates on Asia, Africa, and Latin America, with developments in Europe and North America in the background. Throughout, a primary aim is to link Christian events with major international developments like the world wars, the Cold War, economic globalization, and colonization-decolonization.

HIST 30986. History and Photography

(3-0-3)

Both history and photography were practices invented and developed in the nineteenth century, and they share a capacity to illuminate events in the past. Both history and photography can depict human suffering and point to political practices that might alleviate that suffering. Both must grapple with the nature of time. Both, in odd ways, transcend, but also cement, the finality of death. Both promise a form of truthfulness which they to not always achieve. Given these similarities, it is no wonder that so many writers have considered them together. Often however, when compared, the distinctive qualities of each come to the fore. By reading about photography and history and by looking at images, students in this course will explore the limits and possibilities of each modern pursuit.

HIST 30987. Canada: North American Alternative

(3-0-3) Noll

Corequisite: HIST 32987

This course offers an introduction to Canadian history that is designed especially for American students. While serious attention is devoted to the important phases, problems, personalities, and prospects of Canadian history considered as subjects in their own right, the question of comparison with the United States is always in view. Why, as examples of differences with the United States, has Canada possessed a national system of universal health care for at least two generations? What difference did it make for Canada to have two founding peoples (French, English) and two founding religions (Catholic, Protestant)? How did Canada's evolution into modern nationhood make it different from the United States with its revolutionary origins? Why does every Canadian province provide some kind of financial support for private schools, including religious schools? What are the advantages and disadvantages of Canada's parliamentary democracy compared with the United States' democratic republic? These and similar questions will be explored.

HIST 30988. Slavery in the Atlantic World

(3-0-3)

This survey course explores the role of coerced African labor in the birth of the Atlantic World. What do we mean by Atlantic World? What do we mean by slavery? What varied and nuanced claims to humanity did Africans make against a dehumanizing labor system? How did sexuality and gender norms shape the experiences of slavery for men and women? Together we will examine slave autobiographies, travel diaries, and pictorial sources to address these questions. We will focus on the peoples of West Africa, Brazil, the United States and the Caribbean who were enslaved from the fifteenth to the nineteenth century.

HIST 30989. History of Science and Race: From Colonialism to deCODE

(3-0-3)

The relationship between science and race has been going on a long time and is only getting more confusing. Science has been used in support of racial categorization; science has been used to tear down notions of race-based categories. Biology and anthropology specifically have been used to both support and refute racism. In this class, we will examine the diverse interactions between science and race from the 18th century to the present era of human genomics. We will look both at the scientific study of race and the impact of racial concepts on science, interactions that have given us Nazi medicine, eugenics, the Tuskegee airmen experiments, and modern day pharmaceutical trials in Africa. Throughout, we'll be looking at the personal stories of scientists from minority ethnic groups and questioning the racial demographics of science in the 20th and 21st centuries.

HIST 30990. World War II and Global Cinema

(3-0-3)

Corequisite: HIST 31990

This course explores global cinema's representations of World War II, including films made during the war as well as those made since.

HIST 30991. Environment and Civilization

(3-0-3)

Corequisite: HIST 32991

This course is about how some societies transform the environment by radically interventionist strategies: highly selective breeding and winnowing of species, intensive agriculture, and city building. We investigate how and why this "civilizing ambition" has functioned and failed in a variety of settings, and compare its effects with those of other strategies adopted by less ambitious societies. We approach the history of the world not by the usual strategy of classifying events according to the periods or cultures in which they occurred but by using different environments as our units of enquiry, looking at tundras and taigas, arid deserts, forests of different kinds, alluvial soils, grasslands, highlands, and coastal and marine environments, and seeing how people have exploited the peculiar opportunities and responded to the challenges of each.

HIST 30992. The Changing Face of War: An Introduction to Military History

(3-0-3) Vardi

This course's aim is dual: it is meant to introduce students to the rich history of military affairs, and at the same time to examine the ways in which we think of change and continuity in military history. How did war evolve from ancient times, both in styles of warfare and perceptions of war? What is the nature of the relationship between war and society? Is there such a thing as a Western way of war? What is the role technology plays in transformation in military affairs? What is a military revolution and can it be "manufactured" or induced? Chronologically following the evolution of warfare from Ancient Greece to present-day so-called "new wars," we will continuously investigate how the interdependencies between technological advances, social change, philosophical debates, and economic pressures both shaped and were influenced by war.

HIST 30993. Global Environment: Capitalism, Colonialism, Culture

(3-0-3) Thomas

The global climate crisis is upon us, leading historians to ask how did we get to this point and what tools historical knowledge might provide for finding our way in the future. This course considers, first, the nature of "climate collapse" (as some term it) on a global scale. We then turn to the issue of what values and what modes of production and consumption have caused this dramatic transformation of our planet. Looking particularly to political and economic analyses of global history, we trace the effects of modern industrial development and colonialism. Food, water, and other basics of life are all at stake. Finally, we discuss possible responses to this crisis looking to a number of intellectual genealogies from left to right.

HIST 30994. Inequalities: Poverty and Wealth in World History

(3-0-3) Beatty

The difference between rich and poor nations (and rich and poor individuals) is not, as Ernest Hemingway once said, merely that the rich have more money than the poor. It is a question of opportunity, itself structured by the political, economic, institutional, and social contexts for both nations and individuals. This course examines inequalities in the context of economic and social development in historical contexts. We focus especially on the long nineteenth century, roughly 1750 to 1930, but touch on deeper roots and enduring legacies for today's world. We will examine factors that historically fostered inequality as well as the implications of inequality for social development, drawing cases from U.S., Latin America, Africa, Asia, as well as from Europe.

HIST 30999. Rise and Fall of World Communism

(3-0-3) McAdams

Corequisite: POLS 32487

For most of the twentieth century, communist states, like the Soviet Union and China, represented the greatest political, ideological, and military challenges to the western world. But now, most of these states are gone; of those that still exist, only one (which one?) can credibly live up to the bloody examples set by Josef Stalin and Mao Zedong. In this course, we will draw upon an eclectic mix of approaches from political science, history, sociology, and political philosophy to make sense of both the rise and the demise of the communist phenomenon. Rather than focusing on only one country or region, we will consider an array of different cases. These will include not only the Soviet Union and China but also such fascinating examples as Cuba, Vietnam, East Germany, Poland, Romania, Yugoslavia, and—my favorite—North Korea. There are no prerequisites for this course, although I do hope you will be inclined to view world communism as one of the most intriguing political movements of all time.

HIST 31450. France: From the Old Regime to the Revolution Language Across the Curriculum Lab

(1-0-1)

Corequisite: HIST 30450

Students undertaking the Notre Dame language requirement in French are eligible to sign up for an additional single credit discussion section as part of the

Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in French language materials and meet once a week with the instructor (or a designate) for a discussion in French. The LAC discussion section in French associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in French. Please contact the instructor if you are interested in adding this supplemental credit.

HIST 31465. Modern Germany Language Across the Curriculum Lab

(0-1-1)

Students undertaking the Notre Dame language requirement in German are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in German language materials and meet regularly with the instructor (or a designate) for a discussion in German. The LAC discussion section in German associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in German. Please contact the instructor if you are interested in adding this supplemental credit.

HIST 31473. Early 20th-Century Russian History Language Across the Curriculum Lab

(1-0-1)

Corequisite: HIST 30473

Students undertaking the Notre Dame language requirement in Russian are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in German language materials and meet regularly with the instructor (or a designate) for a discussion in Russian. The LAC discussion section in Russian associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Russian. Please contact the instructor if you are interested in adding this supplemental credit.

HIST 31553. Film Lab for History and Cinema in East-Central Europe

(0-2-0)

Corequisite: HIST 30553

This is the co-requisite lab component of HIST 30553 History and Cinema in East-Central Europe.

HIST 31860. Images of Science and Technology in American Film Lab

(0-0-0)

This weekly lab (film screening) is required for students registered for HIST 30860 or its crosslists.

HIST 31900. Latin American History through Film Lab

(0-0-0)

A weekly film lab required for students registered for HIST 30900 or its crosslists.

HIST 31990. World War II and Global Cinema Lab (Screenings)

(0-0-0)

Corequisite: HIST 30990

This weekly film lab is a requirement for students registered for HIST 30990.

HIST 32080. Medieval Middle East Tutorial

(0-0-0)

Students registered for Medieval Middle East must also take this weekly discussion section.

HIST 32255. Medieval Cities Tutorial

(0-0-0)

A weekly tutorial required for students registered for HIST 30255 or its crosslists.

HIST 32390. Christianity, Commerce, and Consumerism: The Last 1000 Years Tutorial

(0-0-0)

Corequisite: HIST 30390

A weekly required tutorial for students registered for HIST 30390 or its crosslists.

HIST 32432. Irish History since 1800 Tutorial

(0-0-0)

A weekly discussion section required for those registered for HIST 30432 or its crosslists.

HIST 32450. France: From the Old Regime to the Revolution Tutorial

(0-0-0)

Corequisite: HIST 30450

A weekly tutorial required for students registered for HIST 30450 or its crosslists.

HIST 32451. Modern France Tutorial

(0-0-0)

Corequisite: HIST 30451

A weekly tutorial required for students registered for HIST 30451 Modern France (or its crosslists).

HIST 32466. Adolf Hitler and Nazi Germany Tutorial

(0-0-0)

A required weekly discussion section for students registered for HIST 30466 or its crosslists.

HIST 32601. Colonial America Tutorial

(0-0-0)

A weekly tutorial for students registered for HIST 30601 or its crosslists.

HIST 32602. American Revolution Tutorial

(0-0-0)

A required weekly tutorial for students registered for The American Revolution (HIST 30602 or its crosslists).

HIST 32610. Irish American History Tutorial

(0-0-0)

A weekly discussion section required for students registered for HIST 30610 or its crosslists.

HIST 32615. American Catholic Experience Tutorial

(0-0-0)

A required weekly discussion section for those registered for HIST 30615 or its crosslists.

HIST 32618. U.S. Labor History Tutorial

(0-0-0)

A weekly discussion section required for students registered for HIST 30618 or its crosslists.

HIST 32621. Mexican-American History Tutorial

(0-0-0)

A weekly discussion section for students registered for Mexican-American History.

HIST 32630. Religion and American Politics Tutorial

(0-0-0)

A weekly discussion section required for students registered for HIST 30630 or its crosslists.

HIST 32753. U.S. Civil Rights History: Chicanos Tutorial

(0-0-0)

A weekly required discussion section for students registered for HIST 30753 or its crosslists.

HIST 32860. Images of Science and Technology in American Film Tutorial

(0-0-0)

This weekly tutorial is required for students registered for HIST 30860 or its crosslists.

HIST 32900. Latin American History through Film Tutorial

(0-0-0)

This is a weekly required discussion group for students registered for HIST 30900 or its crosslists.

HIST 32904. Slaveries in Latin America Tutorial

(0-0-0)

A weekly required discussion section for students registered for HIST 30904 or its crosslists.

HIST 32929. Andean History and Ethnohistory Tutorial

(0-0-0)

A weekly discussion section required for students registered for HIST 30929 or its crosslists.

HIST 32985. World History of 20th-Century Christianity Tutorial

(0-0-0)

A weekly discussion section required for students registered for HIST 30985 or its crosslists.

HIST 32987. The Canadian Alternative Tutorial

(0-0-0)

Corequisite: HIST 30987

A weekly tutorial required for students registered for HIST 30987 or its crosslists.

HIST 32991. Environment and Civilization

(0-0-0)

Corequisite: HIST 30991

This course is about how some societies transform the environment by radically interventionist strategies: highly selective breeding and winnowing of species, intensive agriculture, and city building. We investigate how and why this “civilizing ambition” has functioned and failed in a variety of settings, and compare its effects with those of other strategies adopted by less ambitious societies. We approach the history of the world not by the usual strategy of classifying events according to the periods or cultures in which they occurred but by using different environments as our units of enquiry, looking at tundras and taigas, arid deserts, forests of different kinds, alluvial soils, grasslands, highlands, and coastal and marine environments, and seeing how people have exploited the peculiar opportunities and responded to the challenges of each.

HIST 33000. History Workshop

(3-0-3) Coleman; Faulkner; Martin

This course introduces students to how historians study the past. Students will gain insight into the nature of historical inquiry through discussion of exemplary works of history, analysis of primary source documents from various time periods and places, and, most important, their own efforts to write history. Readings will include important secondary historical works as well as discussions of how historians actually do history. Writing assignments will include at least two 10-page histories written by each student from primary source documents. This course is a requirement for—and open only to—history majors pursuing the standard major in history (not the supplementary major).

HIST 33005. Exploring History Beyond the Classroom

(1-0-1) Graff

In this special course designed for inquisitive history majors, students will attend a number of lectures, panels, and seminars on campus during the semester—and then have a follow-up discussion for each led by a historian (either a visitor or a member of the history faculty). Before each session, students will be expected to complete a short reading assignment. At each follow-up session, the students will submit a 1–2 page summary and analysis of the talk, with a critical question for discussion. The goal is to encourage students to enrich their major experience by participating in the intellectual discussions that occur amongst ND and visiting scholars across the campus.

HIST 35000. History Internship

(V-V-V)

History Internship credit is designed for students who undertake unpaid internships with organizations dedicated to the discipline of history, whether through preservation, exhibition, public education, or scholarship. Please see the Director of Undergraduate Studies for more information about this opportunity.

HIST 37050. Directed Readings

(V-0-V)

Independent study of special topics under the direction of a faculty member. Requires permission of the faculty member as well as the Director of Undergraduate Studies.

HIST 40075. Early Christian Jerusalem

(3-0-3) Young

How did Christians appropriate and create traditions about the holy land and city of Jerusalem? Early Christianity, emphasizing its otherworldly and international mission, contained differing opinions about the importance of these places. This course explores various early Christian traditions about Jerusalem and the land of Israel—their holiness for Christians as the land of promise, the site of the ministry and passion of Jesus, and, from the third to the seventh centuries, a center for pilgrims and monastic establishments. It also considers the role of the bishops of Jerusalem in theological controversy, imperial largesse and building programs and the ongoing importance of Jerusalem for ancient Judaism. The course also explores the adjustments among religious communities invested in the city and the land during the first centuries after the arrival of Islam.

HIST 40081. From Baghdad to Cordova: A History of Islamic Science

(3-0-3) Mirza

Scientists in the era of classical Islam are credited with numerous advances in fields such as mathematics, astronomy, optics, medicine, and philosophy. This course investigates the extent and significance of such contributions to world intellectual history. Our point of departure will be the translation movement from Greek into Arabic with a survey of the Hellenistic heritage in Islam. Along with examining methods and landmark achievements, we will also look at elements of classical Islamic culture, ideas and institutions that inspired and propelled scientific activity. Attention will be paid to competing theories for the rise and decline of science in the Islamic world, as well as its influence on Europe.

HIST 40083. Marriage, Divorce, and Family in Muslim Societies

(3-0-3)

High rates of divorce, often taken to be a modern and western phenomenon, were also typical of pre-modern Muslim societies. How was that possible, insofar as “Marriage is half [fulfillment of one’s] religious duties,” as the Prophet Muhammad once famously dictated? What, then, is the Islamic ideal of marriage? What were the patriarchal models advocated by medieval Muslim jurists and moralists? Did the historical reality of marriage and family life in the Islamic Near East have anything in common with these models? Do the assumptions about the legal inferiority of Muslim women and their economic dependence on men hold truth? These are the questions this course will try to address. To that end, we will read and discuss a wide range of primary sources (all in English translation)—the Koran and Hadith (Muhammad’s saying and deeds), legal writings, narrative (chronicles,

belles-lettres) sources, and documentary (archives, contracts) materials as well as recent scholarship on the subject. While our theoretical framework is that of social history, we will also pay close attention to intimate accounts of, and reflections on, individual medieval lives. We will conduct case studies as for group projects. While the focus is on the Islamic Near East (700–1500), we will extend our inquiry to include the modern Middle East as well. Prerequisites: Two years of college Arabic or by instructor's permission.

HIST 40123. American Occupation of Japan

(3-0-3)

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The “Basic Initial Post-Surrender Directive” charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort, namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The Big Question—one that we will return to again and again in our discussions—is what is democracy and how is it created and sustained?

HIST 40180. Gandhi's India

(3-0-3) Sengupta

The dominant figure in India's nationalist movement for nearly thirty years, M. K. “Mahatma” Gandhi has also been the twentieth century's most famous pacifist, and a figure of inspiration for peace and civil rights movements throughout the world. This course offers an examination of Gandhi and the nature of his unconventional and often controversial politics. It charts Gandhi's career against the background of events in London, South Africa, and India. Examines the evolution and practical application of his ideas and techniques of non-violent resistance, and his attitudes toward the economy, society and state. Gandhi's influence on Indian politics and society is critically assessed and his reputation as the “apostle of non-violent revolution” examined in the light of developments since his death in 1948. Some of the questions that will be discussed are: how far did the distinctive character of Gandhian politics derive from his absolute commitment to India's nationalist struggle? Was his success due to the force and originality of his political ideas and his advocacy of nonviolent action? Can his achievements be explained by political willness and pragmatism, or by willingness to embark on new experiments with the truth? Though helpful, a prior knowledge of Indian history is not required for this course.

HIST 40210. Writing History in Ancient Greece and Rome

(3-0-3) Baron

Herodotus has been called both the “Father of History” and the “Father of Lies.” Thucydides is revered by some as the first “scientific” historian; others deny him the title of historian altogether. The most famous tales in Roman history come from the early books of Livy, and yet it is unlikely that he had any way of obtaining reliable information for that period. The historians of the classical Greek and Roman world stand among the greatest writers of the Western tradition. But to what extent were they performing the task that we call “history”? In this course we will survey the works of the major historians of ancient Greece and Rome, including Herodotus, Thucydides, Livy, Tacitus and others. We will examine the origins of Greek historiography, the methods espoused and practiced by Greek and Roman historians, the effect political and social changes had on ancient historiography, and the relationship of ancient historical writing to that of the modern scholars. The class will be primarily discussion-based. All readings in the ancient authors will be in English.

HIST 40230. Topography of Ancient Rome

(3-0-3)

The course examines in detail the buildings and monuments of ancient Rome from the Archaic Period to the beginning of Late Antiquity (8th century B.C. to 4th century A.D.). The primary aim of the course is to consider the problems related to the identification, reconstruction, chronology, and scholarly interpretation(s) of Rome's ancient structures. Students will investigate the history of excavations in

Rome, analyze ancient literary sources, evaluate ancient art and architecture, and examine epigraphic, numismatic, and other material evidence related to Rome's ancient physical makeup. This close examination of the city of ancient Rome in its historical context also explores how urban organization, civic infrastructure, public monuments, and domestic buildings reflect the social, political, and religious outlook of Roman society.

HIST 40231. Cicero and Political Tradition

(3-0-3)

The life and writings of Marcus Tullius Cicero (106–43 B.C.) have been studied in light of the different aspects of his eventful career as a lawyer and advocate, orator, politician, statesman, and philosopher. His surviving writings—political and judicial speeches, treatises on religion, law, ethics, political philosophy and rhetoric, and also many personal letters—shed light on the diverse successes and reversals of his public and private life. Those who study Cicero tend to focus on one or two aspects of his achievement to the exclusion of the others. In this course, we will try to understand how the different branches of Cicero's life and work fit together, why he thought that philosophy, law, and religion were relevant to politics, and why and how ethical considerations should condition one's private and public life. In pursuing these issues, we will think about Cicero's intellectual and political predecessors, both Greek and Roman, before reading a selection of his own writings. By way of understanding some aspect of Cicero's enormous influence we will conclude with reading part of *The Federalist Papers*.

HIST 40232. Romans and Christians

(3-0-3)

This course will examine the early development of the Christian religion in its historical Roman context. It will begin with a survey of the political, social, and administrative structures of the Roman Empire in the period from Augustus to Constantine, move to a study of the complexity and diversity of Roman religious life and culture (with special attention to Mystery Cults, e.g. that of Isis), and then examine the development of the Jesus movement and Rome's reaction to it. Particular topics to be studied will include miracle-working and the practice of magic, the problem of the historical Jesus, the sectarian and subversive character of early Christianity, the issue of how persecution and martyrdom are to be historically understood, and the meaning of religious conversion in the polytheistic Roman world. Above all the course will concentrate on the questions of how and why in historical terms a new religious system came to have such appeal that Constantine chose to make himself the first Christian emperor of Rome.

HIST 40233. The Romans and Their Gods

(3-0-3)

An introduction to the way in which the Romans conceived of, worshipped, and communicated with the myriad gods of their pantheon. The course will focus first on conventional religious rituals and their cultural value, and secondly on the success of Roman polytheism in adapting to changing historical and social conditions. Particular attention will be paid to the so-called “Mystery Religions,” including Christianity, and their relationship to conventional forms of religious behavior.

HIST 40234. Family/Household in Roman World

(3-0-3)

A survey of the life-course in Roman antiquity. Topics studied will include: marriage, divorce, child-rearing, old age, the way in which family and household were conceptualized by the Romans, and the demography of the Roman world.

HIST 40235. Christianity in the Roman World

(3-0-3)

The course studies continuity and discontinuity in the Mediterranean world during a formative period, the transition from Roman Empire to early medieval European kingdoms. Christianity played a vital role during this transformation, but not the only one. Beginning with a review of Roman institutions, law, culture and religion, we will observe the changes they underwent between ca. 150 and 750 C.E. At this latter point in time, some people were still thinking of themselves as living within the Roman empire, even though the local potentate was a non-Roman king. Also, Roman law had become Christian law, and Latin

was beginning to generate the languages now collectively described as “Romance.” On the fringes of Europe, in England and Ireland, meanwhile, missionaries shared with their converts not just Christianity but also the Latin language and Latin literature along with certain Roman concepts of culture and political organization.

HIST 40236. The Roman Empire

(3-0-3)

This advanced course in ancient history examines the Roman Empire from Augustus to Constantine. It deals with the establishment of the Augustan Principate and the progression of autocracy at Rome in the first two centuries of the imperial age, leading to discussion of what is generally called the third-century crisis and the new monarchy of Diocletian and Constantine. It investigates how the Roman Empire as a geo-political unit was governed and administered (paying particular attention to the all-powerful figure of the Roman emperor), and how the diverse regional cultures of the greater Mediterranean world were affected by Roman rule. Among topics studied are contemporary debates on Roman society, economy, demography, and culture.

HIST 40237. The Roman World of Apuleius

(3-0-3)

An advanced course in Roman history and literature that investigates the Latin author Apuleius in his socio-cultural context. The course begins with the Romano-African setting into which Apuleius was born, recreates the educational travels to Carthage, Athens and Rome that occupied his early life, and focuses especially on his trial for magic in Sabratha in Tripolitania before following him back to Carthage where he spent the remainder of his life. Notice will be taken of all Apuleius' writings, but special attention will be paid to the *Apology*, a version of the speech of defense made at his trial, and to the socio-cultural significance of his work of imaginative fiction, the *Metamorphoses*. The course is open to students with or without Latin.

HIST 40238. Creation, Time and City of God in Augustine of Hippo

(3-0-3)

In his youth, Augustine (A.D. 354–430) received an excellent education in the Latin classics, the benefits of which remained with him throughout his life. Later, he also read philosophical writings, and, after his conversion, works by Christian authors. The book he quoted most frequently was the Bible. From his childhood, Augustine was endowed with a most unusual ability to ask awkward questions. Initially targeting his teachers, he later addressed his questions to the authors whose books he read, and to God. His writings therefore tend to take a dialogic form where the interlocutors include not only the reader but God, and—among human beings—Cicero, Vergil and other Romans, and also Augustine's Christian contemporaries, including Jerome, Paulinus of Nola and Count Marcellinus to whom he addressed the *City of God*. In following these dialogues, we will read not just Augustine's best known writings (*Confessions* and *City of God*) but also his commentaries on Genesis, and some of his letters and sermons. The purpose is to arrive at an understanding of Augustine's ideas about creation and time, and about the nature of human society and its goals. We will also ask what can be learnt from Augustine's dialogic and sometimes disputatious way of thinking, explaining and debating. Almost all of Augustine's writings have been translated into English, but obviously, an ability to read Latin will be most useful.

HIST 40239. Augustine and the City of God

(3-0-3)

The aim of the course is to gain a detailed understanding of one of the world's important works of historical and political theology. Writing in response to the destruction of the City of Rome by Visigothic invaders in A.D. 410, Augustine devoted the first half of this “long and difficult work” to a refutation of Roman religion and ancient philosophy (Books I–X). In the second half (Books XI–XXII) he explained what he meant by *City of God* and *Terrestrial City* and traced the evolution through time of the two cities in relation to each other. We will study the *City of God* in light of the sources Augustine engaged with. For the first part, these include the philosophers Plato, Apuleius, Plotinus and Porphyry, the historians Sallust and Livy, and also the statesman Cicero and the poet Vergil. In the second

part, Augustine builds on biblical theology, history and chronology. To conclude, we will devote some time to the influence of this very long book. It will be studied in English, but those with viable Latin will be encouraged to use it.

HIST 40240. Constantine and Julian

(3-0-3)

This advanced seminar in ancient history and literature examines the lives and reigns of the fourth-century Roman emperors Constantine and Julian. Constantine was a pivotal figure in world history, the founder of a new dynasty of rulers in a centuries-old empire facing many challenges, and the first Roman emperor to embrace and promote Christianity. His rule changed the complexion of the ancient world. His descendant Julian reigned only for a short time, but he is remembered above all for the concerted effort he made to return Rome to its traditional religious orientation. He failed in his attempt, in part because of his premature death, but as the last pagan emperor of Rome he remains a figure of almost mythological status. The course investigates the principal features of the history of these two rulers, political, military, socio-economic and religious. A principal theme is the question of how historical experience can be recovered. Readings from original sources (in English translation) are studied in conjunction with documentary and iconographic evidence. The course also considers how modern historians, biographers and novelists have recreated these compelling figures.

HIST 40241. Augustine and Cicero

(3-0-3) MacCormack

Augustine of Hippo is best known and is most intensively studied as the theologian whose *Confessions*, commentaries on Genesis, Trinity, On Christian teaching, and *City of God* have shaped Christian thinking for centuries, and do so even now. His engagement with classical Greek and Roman authors has also been studied, but much less so. The purpose of this course is to follow Augustine's lifelong interest in the writings of the Roman orator, statesman and philosopher Cicero. It was Cicero who inspired Augustine's early interest in philosophy, and references to Cicero's ethical enquiries in the *Tusculan Disputations* and elsewhere appear frequently in Augustine's writings. He also thought about Cicero the orator when considering the tasks of Christian writers and preachers. Above all, in the *City of God*, Augustine responded to Cicero's dialogue *On the nature of the gods*, which in turn conditioned his understanding of Roman history and of the content of human history at large.

HIST 40242. Roman History Seminar

(3-0-3) Bradley

This advanced course in ancient history introduces students to major documents of the Roman imperial age and investigates how they are to be assessed as historical sources. Particular attention is paid to the Achievements of the Deified Augustus (*Res Gestae*), a dossier of senatorial decrees recently discovered in Roman Spain (especially the *Senatus Consultum de Cn. Pisone patre*), and various letters, edicts and rescripts from emperors to provincial communities. The object is to learn how the history of the Roman Empire is advanced through non-literary documents known from inscriptional, papyrological, and legal sources. Special attention is given to documents involving Christian subjects of empire, accounts for instance of the trials of figures Christians subsequently claimed as martyrs, such as Perpetua and Felicity. Study of the Acts of the Apostles is also included as a subliterary text opening up perspectives on the Roman imperial age. All documents are read in translation.

HIST 40252. Medieval Nobilities

(3-0-3)

This course will introduce students to one of the major areas of historical investigation in Europe since 1945: the evolution and function of the hereditary élites now generally called “nobilities”. Although alien to the culture and legal system of the United States, an élite social category of this general type dominated the economic, political, social, and cultural life of every major European people and state throughout and often somewhat beyond the agricultural or pre-industrial era of its history—most commonly to about 1918—and may be seen as a

characteristic feature of politics on the levels of chiefdom and agricultural state throughout the world. Thus some understanding of the phenomenon of nobility and its many variant forms is essential to an understanding of the history not only of Europe, but of the civilized world in general before the twentieth century. The course will begin with an examination of both medieval and modern ideas of “nobility” (which designated at once an inherent condition, a legal status, and a social category), the words employed to express those ideas, the ways in which noble status could be acquired and lost, the attributes that might be used to express it (including heraldic emblems), and the approaches taken to the whole phenomenon by social, political, constitutional, and cultural historians of various schools. It will then examine the history of a few of the numerous different nobilities that developed in the countries of Catholic Europe between 400 and 1500, and finally examine what is currently known about such themes as noble privilege, power, wealth, and influence.

HIST 40294. Thought and Culture in the High Middle Ages
(3-0-3)

This is a course about the thought and culture of Medieval Europe in the years 1100 to 1350. The course takes seriously the notion of “mind,” that all people, whatever their gender or social class, were gifted with powers of understanding and decision-making amidst life’s dilemmas. It asks what we know about how these people thought about, perceived, and experienced their world, what ideals they set for themselves, what they hoped to achieve, how they set about the task of living. The course will proceed with lectures on specific topics and introductions to texts or authors, but in good part by way of a careful reading and discussion of assigned primary sources. Those sources will range from medieval romances to mystical poems, from political philosophy to devotional meditations.

HIST 40297. Knighthood and Chivalry in Medieval Europe, 750–1625
(3-0-3)

This course introduces students to the history of knighthood (the status of noble heavy cavalryman) and chivalry (the distinctive ethos and code of the knightly class) from their emergence in Western Europe between 950 and 1180 through their apogee between 1180 and 1380 to their slow decline between 1380 and 1625 (and their revival in the 19th century). It will deal first with the knight as warrior, vassal, and monk (in the religious orders of knighthood), then with the knight as nobleman and landowner, and finally with the knight as courtier and civil servant in the emerging state. It will next proceed to an examination of knightly games, festivals, and iconography, and conclude with a look at the survival and revival of chivalry in the post-Gothic period.

HIST 40435. Irish Memoir and Autobiography
(3-0-3) Smyth

This seminar has four basic objectives: to explore different ways in which to read texts, to explore the different ways in which memoir and autobiography can be read, to introduce modern Irish social and political history to students through the lives of the authors, and to introduce students to different human experiences. Key texts may include Frank McCourt’s *Angela’s Ashes*, Brendan Behan’s *Borstal Boy*, and Maurice O’Sullivan’s *Twenty Years Agrowing*. In addition, we may study extracts from other books, by writers such as William Carlton, Elizabeth Bowen and Robert Harbinson.

HIST 40448. Ideology, Poetry and Politics in Jacobite Ireland
(3-0-3)

The political poetry of the period 1541–1688 will be discussed and analyzed against the historical background. The primary focus will be the mentality of the native intelligentsia as it is reflected in the poetry and as it responded to the momentous changes of the period. The origins and rise of the cult of the Stuarts will be examined and the historiography of the period will be assessed.

HIST 40470. Dostoyevsky’s Russia
(3-0-3)

This course will focus: (1) on Dostoyevsky’s life, his religious and ideological beliefs as articulated in major fictional and nonfictional works, his contributions

to 19th-century debates about Russia’s place in the world and its historical “mission”; and (2) on the Russian social, religious and ideological context(s) in which Dostoyevsky operated. The reading will likely include Dostoyevsky’s *Notes From the House of the Dead*, *Notes From the Underground*, *Crime and Punishment*, *The Idiot*, and *Brothers Karamazov*.

HIST 40475. Modern Russian Society and Politics I
(3-0-3)

This course examines selected critical issues in the foundations of modern Russian society and culture from the late 19th through the first half of the 20th century. Lectures and discussions include such topics as late Imperial politics and society, cultural innovation of the “Silver Age,” World War I, Revolutions of 1917, creation of socialist society and culture, and the experience of the Stalinist terror. There will be a term paper, a midterm, and a final exam.

HIST 40476. Modern Russian Society and Politics II
(3-0-3)

This course surveys the history of Russia and its peoples in the second half of the 20th century, with a particular focus on the role of politics and ideology in Soviet (1941–91) and contemporary Russian society (1991–2000). We will explore the experience of the Great Patriotic War, late Stalinism and post-Stalinist socialism, the emergence of the Soviet Empire at the end of the Second World War, the collapse of the communist regime and the disintegration of the Soviet Union in 1991, as well as Russia’s uneasy transition out of totalitarianism during the last decade of the 20th century. Students will be asked to take midterm and final examinations, and to write a term paper.

HIST 40502. Family and Society in Early Modern Italy
(3-0-3)

A dialogue intensive class focusing on the family and society in early modern Italy.

HIST 40551. History of Modern Astronomy
(3-0-3)

Traces the development of astronomy and cosmology from the late 17th century to the 1930s. Attention is given to the interactions of astronomy with other areas of science and with philosophical, religious, and social factors.

HIST 40580. Enlightenment in Europe
(3-0-3) Sullivan

By intensively studying diverse works we shall first try to map the sheer variety of the cultural achievements of Europeans, from Dublin to Naples and Koenigsberg to Madrid, during the long 18th century (ca. 1687–1807). Then we shall critically analyze some of the major scholarly efforts to reduce and organize it all into some unitary movement, usually called “The Enlightenment.” Requirements include actively participating in class meetings, which will center on our discussions of particular works, two examinations, and writing a 15- to 20-page integrative essay on one of the major themes (freedom, power, knowledge, faith, emotions, history, and progress) of the works we study together.

HIST 40604. Special Topics in the U.S. Civil War Era, 1848–1877
(3-0-3)

This advanced undergraduate seminar explores in detail selected topics and readings in the American Civil War era.

HIST 40605. Africana Studies Seminar: Race and the Civil War
(3-0-3) Stelluto

This seminar will focus on 19th century American history. Specifically, the course will examine the relationship of race to the Civil War.

HIST 40628. African-American Resistance
(3-0-3) Pierce

Through a close examination of twelve historical events, we will study African-American resistance in the United States from the 17th century through the 20th century. We will employ a case study method and seek to categorize and characterize the wide variety of African-American resistance. Our study will

include the politics of confrontation and civil disobedience, polarization of arts, transformation of race relations, the tragedies and triumphs of Reconstruction, interracial violence, black political and institutional responses to racism and violence, the Harlem Renaissance, Jazz, Blues, and the Civil Rights and Black Power movements. Students will be confronted with conflicting bodies of evidence and challenged to analyze these issues and arrive at conclusions. Music and film will supplement classroom discussions.

HIST 40630. Crime, Heredity, and Insanity in American History
(3-0-3) Przybyszewski

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

HIST 40648. Science and Environmental Policy in the United States
(3-0-3)

This class will meet in a seminar format. We'll examine the history of U.S. scientific and environmental policy from 1850 to the present day. Particular attention will be paid to what kinds of research are funded by the federal government in each period and how this reflects the changing concerns of the populace. We also examine the role of both the executive and legislative branches of government in supporting science and identify interest groups that have been influential in shaping science policy. Attending a conference on The Commerce and Politics of Science, being held at Notre Dame this fall, will be required of students in this course. This will introduce students to two central concerns: first, how do commercial and political interests shape scientific inquiry, knowledge, and practice, both now and in the past? Second, is it possible to say that one or another economic or political context is favorable or unfavorable to science or more likely or less likely to produce "good science"? The final portion of the course will be devoted to case studies in current scientific and environmental policy. Students will be required to research the development of a particular policy—stem cell research, the clean air act, the space station—and present to the class and analysis of both the history of the policy and an evaluation of its impact on public life.

HIST 40851. African-American Civil Rights Movement
(3-0-3) Pierce

Corequisite: HIST 42851

There may not be a term in American society as recognized, and yet as misunderstood, as "civil rights." Often civil rights are conflated with human rights, even through each are distinct of the other. During the semester, we will trace the African-American Civil Rights Movement in the United States during the 20th century, as well as its lasting impact on American society. We will do so using as many media as possible. Fortunately, we will have the opportunity to study an important part of American history in significant detail. The time span we cover will not be that great, but the issues we investigate challenge the founding principles of American society to its core.

HIST 40853. U.S. and the Vietnam War
(3-0-3) Brady

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an "American" as opposed to a "Vietnamese" perspective. Broad topics to be covered include: Vietnamese background (land, people, history, culture); American political and

diplomatic decision making; 1950–75: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture AND a discussion course.

HIST 40855. Labor Movements in Twentieth-Century U.S.
(3-0-3)

This course explores American workers' collective efforts as workers in their search for economic security, political power, and social and cultural autonomy from the 1890s to the near present. For the most part, this course will focus on the unions and related organizations forged by workers throughout the past century—from major umbrella groups like the American Federation of Labor, the Industrial Workers of the World, and the Congress of Industrial Organizations, to important sectoral actors like the Brotherhood of Sleeping Car Porters, the United Automobile Workers, the American Federation of Teachers, and the United Farm Workers. The central questions of the course will be: When, where, and why have U.S. workers organized collectively in the 20th century—and how successful have they been? What has been the response of employers, the government, and the public at large to these collective efforts of workers, and how and why have those responses changed over time? What has been the relationship between organized labor and racial and gender discrimination, as well as the causes of racial and gender equality? And how have Americans generally, and workers in particular, understood the labor movement in relation to capitalism, freedom, and democracy?

HIST 40856. Culture of Great Depression
(3-0-3)

This course will explore various American cultural expressions during the Depression years of 1929–1940. Specifically, we will study the many ways literature, art, drama, photography and music responded to and were influenced by economic and cultural crisis.

HIST 40857. History of Sport and the Cold War
(3-0-3)

This course will explore the ways that sport reflected the political, ideological, social, economic and military struggle known as the Cold War. Sport permitted opportunities to defeat hated rivals or to develop competition more peacefully. It reflected the internal politics and societies in nations, and also illuminated relations among allies. Using a variety of readings, media accounts and film clips, this course will look at a number of crucial teams, athletes and events from the Cold War, including the 1980 U.S. Olympic hockey team, the controversial 1972 Olympic basketball final, "ping pong diplomacy", Olympic boycotts, Martina Navratilova and other Eastern European tennis stars, East German figure skater Katarina Witt, Romanian gymnast Nadia Comaneci, the ferocious Soviet-Czechoslovakian hockey rivalry following the Soviet invasion of 1968, and more.

HIST 40858. Nebraska v. Fields: Death by Abortion, 1920
(3-0-3)

Students who have not taken the pre-requisite courses but have a background and/or particular interest in the study of gender in history are welcome to appeal to the department for permission to register for this course. In 1921, Dr. Leslie S. Fields of Omaha Nebraska was sentenced to one-to-ten years in prison for performing an illegal abortion resulting in the death of twenty-year-old Miss Ruth Ayer. Although the case has long been forgotten, a complete, word-for-word transcript of Fields's five-day trial recently surfaced on eBay. This hitherto-unknown, and never-before-analyzed document opens a window into the histories of gender, law, medicine, society and culture in the American heartland at the end of the Progressive era. Students in this class will begin the work of unpacking and analyzing the history and context of the story told by that trial transcript. The first half of the class will be devoted to understanding the broader historical context of the law, medicine, politics, women, and abortion during the early twentieth century; to that end, a number of secondary source books and articles will be read and students may be asked to locate and read a variety of relevant primary and secondary sources to

help us understand the larger historical context. During the last half of the class, each student will research and write an in-depth report on one person, aspect or issue raised by the case of the *State of Nebraska vs. Leslie S. Fields*.

HIST 40859. Jim Crow America

(3-0-3)

Prerequisite: HIST 30800 or AFAM 30202 or AMST 30341 or HESB 30458
“Jim Crow” laws barred African Americans from access to employment and to public places such as restaurants, hotels, and other facilities. In the South especially, blacks lived in fear of racially motivated violence. The history of Jim Crow encompassed every part of American life, from politics to education to sports. The emergence of segregation in the South began immediately after the Civil War when the formerly enslaved people acted to establish their own churches and schools separate from whites. Many southern states tried to limit the economic and physical freedom of the formerly enslaved by adopting laws known as Black Codes. In Jim Crow America, we will study the vast literature that encompasses the origination, sustenance, resistance, and eventual defeat of Jim Crow along with the lingering effects of the organized infrastructure of inequality in America.

HIST 40884. Oral History I: Memory and Truth

(3-0-3)

This is the first of a two-semester senior seminar in oral history theory and methods. By surveying the current field, students will learn how oral history is uniquely suited to both contribute to historical knowledge and challenge dominant narratives. The final project will prepare students to engage in collecting oral histories during the spring semester if they register in Oral History 2: Practicum.

HIST 40885. The Meaning of Things

(3-0-3) White

This course asks how objects as diverse as a ND class ring, a pair of jeans, a Lava Lamp or a rosary acquire meaning and value. This course will introduce students to a range of practices relating to consumption in American history. We will investigate the gendered aspects of production, marketing, buying and using goods as these impact not only on gender, but also on the construction of a range of identities. As part of the process of working with material things, much emphasis will be placed on methods and theories for analyzing objects, in class and in experiential learning beyond the classroom (to include a component on material culture and Catholicism). This will lay the foundation for students to write substantive individual research papers on a “thing” of their choice.

HIST 40886. Jesus in America

(3-0-3)

While many modern Americans share a faith in Jesus as Messiah, Son of God, and Redeemer, they have also portrayed him as everything from a socialist to a Ku Klux Klansman, a polygamist to a black woman, an advertising executive to a Buddha-to-be. In the kaleidoscope of opinions about Jesus we can find the very essence, character, and vitality not only of American Christianity, but of American values and beliefs more broadly speaking. In this course we will study depictions and representations of Jesus in American culture, primarily in the twentieth century, using a variety of texts, including canonical sources, films, novels, visual art, music, scholarly criticism, and popular culture. In addition to readings, film viewings, and a group project, this senior seminar will culminate in a major research paper that will be developed throughout the semester, with extensive comments from other students and the professor.

HIST 40887. Material America: Creating, Collecting, Consuming

(3-0-3)

A seminar exploring how historians, archaeologists, art historians, folklorists, geographers, and cultural anthropologists use material culture as important evidence in interpreting the American historical and contemporary experience. Research fieldwork in area museums and historical agencies such as the Snite Museum, the Northern Indiana Center For History, National Studebaker Museum, and Copshaholm/Oliver Mansion will be part of the seminar.

HIST 40888. Building America

(3-0-3)

A seminar designed to examine the social and economic factors, energy and land use policies, demographic urban/suburban trends, technological innovations and artistic impulses that have produced the American built environment, 1740 to 1940. Comparing several building types the private residence, the workplace, and the public building the seminar will explore structures and spaces as material culture evidence of American domestic, real estate, political, and cultural history. Attention will be paid to high-style and vernacular architecture, new building forms (skyscrapers, highway buildings, department stores) as well as work sites such as mills, factories, and commercial buildings, plus four American world fairs.

HIST 40890. Nature in America

(3-0-3)

This is a seminar designed to explore the concept of nature in the American historical and contemporary experience within an interdisciplinary context of art, history, literature, and ecology. In addition to weekly reading discussions, the seminar will meet, on a number of occasions, at several nature sights: Morris Conservatory and Muessel-Ellison Tropical Gardens; Potawatomi Zoo; Elkhart Environmental Center; Shiojiri Niwa Japanese Garden; Fernwood Botanical Garden and Nature Preserve; University of Notre Dame Grene-Nieuwland Herbarium. Purpose: to study nature in American art (painting, photography, sculpture), seminar meetings will be held at the Snite Museum of Art, South Bend Regional Museum of Art, and the Midwest Museum of American Art.

HIST 40891. Race, Gender, and Women of Color

(3-0-3)

This seminar analyses dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the U.S. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other American? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

HIST 40893. Media and the Presidency

(3-0-3)

Corequisite: FTT 41501

As the brouhaha over Howard Dean’s “yell” illustrates, media have come to play a key role in the coverage of presidential elections. This course examines how print and broadcast media have functioned in U.S. elections since the way we choose a president was first established. After a brief overview of changing relationships between journalists and presidential candidates in the 19th century, we will focus on elections since the 1920s, when radio first broadcast election updates. We will analyze how candidates have used radio, television, and the Internet to construct images of themselves and their platforms, and how journalists have become an active force in representing the political process. Rather than see electronic media as neutral or objective, we will assess the narrative strategies and visual and verbal codes by which media present politics to us, the voters.

HIST 40896. Presidency in American Culture

(3-0-3)

This course examines the interactions among journalists, media companies, and presidents in the United States since the Great Depression. Throughout the term, we will emphasize several general principles or trends. We will explore how new forms of technology have triggered changes in political practice, a trend that becomes clear when we analyze the role the Internet has taken in this year’s campaign. During the semester we will look at representations of presidents and the presidency that are embodied in films and television programs.

HIST 40909. Gender, Sexuality, and Colonization in Latin America

(3-0-3)

In this course we will examine the historical construction of gendered roles in the Spanish colonial world. This will entail thinking about gender in the societies that “encountered” each other in the New World, and also thinking about how that

encounter produced new forms of gendered relations. Among the questions we will consider: how was the conquest gendered? How did colonial society produce masculinity as well as femininity? What gendered forms of power were available to women? How did ethnicity and caste, as well as gender, determine people's sense of themselves and their "others"? The course will look at a mixture of primary and secondary materials, including letters and chronicles written by men and women, testimony before the Spanish Inquisition, poetry, and novels. While there are no prerequisites for this seminar, some familiarity with colonial Latin American history will be helpful.

HIST 40910. Experience of Conquest: Native Perceptions of Relations with Spaniards in 16th-Century Mesoamerica

(3-0-3)

The aim of this class is to try to understand what conquest, as we have traditionally called it, meant to the people who experienced it in some parts of the Americas that joined the Spanish monarchy in the sixteenth century. We'll concentrate on indigenous sources—documentary, pictorial, and material—and try to adopt the indigenous point of view, without neglecting sources mediated by Europeans. Although the class will concentrate on selected cases from Mesoamerica, the lecturer will try to set the materials in the context of other encounters, both within the Americas and further afield; and students will be free, if they wish, to explore case-studies from anywhere they choose in the Americas (in consultation with the lecturer and subject to his approval) in their individual projects.

HIST 40950. Global Development in Historical Perspective

(3-0-3)

The difference between rich and poor nations is not, as Ernest Hemingway once said, that the rich have more money than the poor, but is in part because the rich produce more goods and services. Industrialization, in other words, has often brought wealth (as well as social dislocation and protest) to those who have succeeded. This course examines the process of industrialization from a comparative perspective and integrates the history of industrialization and its social consequences for Western Europe (Britain and Germany), the United States, Latin America (Mexico), and East Asia (Japan and South Korea). We will concentrate on these countries' transition from agriculture-based societies to industrial societies. We will analyze the process of industrialization on two levels from above the role of political authority and from below a view of factory life, industrial relations, and protest from the perspective of workers and the working classes. No specific prerequisites in history or economics are necessary.

HIST 40951. Technology and Development in History

(3-0-3)

Technologies are often seen as either the product of human genius and achievement, or as an alienating, inhuman, and sometimes destructive force. Both perspectives argue that technological change has been one of the most important forces shaping world history over recent centuries. This course examines technological developments and theories of technological change in world history. It focuses on the relationship between new technologies, social change, and economic development since 1750, surveying cases from Britain, the United States, China, Japan, and Latin America. We will pay special attention to technology transfers: the movement of new machines and processes and knowledge from one society to another, and the ways that social, cultural, and political forces have shaped technological change in different parts of the world.

HIST 40952. Slavery and Human Bondage

(3-0-3)

For many Americans, the history of slavery is synonymous with plantations in the Atlantic world. This course seeks to expand our view of Atlantic slavery by looking to the Ancient World, Africa, Asia and Europe in historic and contemporary contexts. This course examines slavery as a labor system and a social form intimately connected with the political economies and cultural groups within which it arose. It will also examine debates about contemporary forms of bonded labor and slavery emerging from global encounters today. By examining different types of bonded and unfree labor, such as chattel, domestic, and wage slavery, we will form an inquiry about slavery's relationship to the following: person-hood and

social death; the emergence of market economies; systems of differentiation used to maintain the social condition of the enslaved; and power and violence. This course will take an interdisciplinary approach relying on archaeology, anthropology and history for our case studies in understanding this particular social form.

HIST 40973. Archives and Empires: Inca/Spaniards

(3-0-3)

Traditionally, scholars have highlighted the differences between the Inca Empire and that of its Spanish conquerors. These differences are indeed striking, and will be explored in this course. But there are also similarities between the two imperial polities, which we will likewise study. Attention will focus on the production, collection, ordering, and storage of information by both imperial and local authorities, and on how this information was used. The Incas recorded administrative and narrative information on quipus (knotted cords) and with reference to indigenous Andean languages. The Spanish in the Andes briefly used this system before switching to alphabetic writing and the Spanish language. Questions we will address include: did this change affect the kind of information that was preserved, and if so how? And also, what role did culture and religion (as documented in imperial records) play in the creation and maintenance of imperial power?

HIST 40974. de las Casas: Context/Resonance

(3-0-3)

The Spanish conquest of Central and South America generated a crisis of conscience in Spanish universities and in Spain at large. People wanted to know: was the conquest justified, and if not, seeing that it could not be undone, what were the invaders to do? In this prolonged and often bitter debate, Bartolome de las Casas (1484–1566), Dominican friar and bishop of Chiapa in Mexico, formulated what still are among the most moving and intellectually incisive arguments for the equality of all human beings. He also wrote one of the earliest comparative histories of civilization (the *Apologetica Historia*). The task of the course is to understand the thought of Las Casas and his followers in its 16th-century context, and then to enquire into the connections between the ideas of Las Casas and contemporary theologians of liberation, in particular Gustavo Gutierrez.

HIST 40985. Historical Archaeology

(3-0-3)

This course examines the methodological and theoretical foundations for the archaeology of European colonization and the post-colonial material world. Course materials focus on material life and the diversity of sociocultural experiences in North America since 1492. The class examines how historical archaeologists have interpreted life in the world of global capitalism and colonization over the last half millennium and how archaeological insights can be used to understand and critique our own world. The distinctive analytical techniques of historical archaeology will be studied, including documentary research, artifact analysis methods, and field excavation techniques. The course will probe the interdisciplinary nature of historical archaeology, assess the social significance of archaeological knowledge, and scrutinize cultural, class, and gendered influences on archaeological interpretation.

HIST 40986. Space, Place and Landscape

(3-0-3)

In this course, we will explore human relationships to the built environment and the complex ways in which people consciously and unconsciously shape the world around them. Cultural landscapes are not empty spaces, but rather places we imbue with meaning and significance. We are particularly interested in the ways in which the built environment has worked as an agent of cultural power as well as how social relations (notably class, gender, and ethnicity) have been codified and reproduced through landscapes. We will examine how people perceive, experience, and contextualize social spaces at the intersection of symbolic processes, senses of place, memory, and identity formation as well as how these change through time and across space. As an interdisciplinary endeavor, we will draw from history, geography, art, environmental science, architecture, landscape studies, anthropology,

and urban planning, among other disciplines. Students will undertake a significant original research project that investigates the human experience through space, place, and landscape.

HIST 40990. Seeing for Historians: Photography as Evidence and Interpretation

(3-0-3)

History, proverbially, is about story telling. Historians have concerned themselves primarily with language, narrative, evidence, and argument. In other words, historical practice is rooted in words not images, sound not sight. The advent of photography in the middle of the nineteenth century should have changed all that, at least according to some theorists, providing new sources of evidence, new means of interpretation, and most importantly a new relationship between past and present. However, the general consensus is that historians have failed to avail themselves of this new resource. This course explores how historians might learn to see better, what the pitfalls are as we approach still photographs, and how technical images change our relationship with the past. By engaging various theoretical works and witnessing these theories in action in various ways, the class will explore the nature of historical evidence and whether still images tell stories. During the first weeks of the class, we'll read debates over the nature of sight and the kind of evidence provided by photographic images; during the following weeks, we'll contemplate photography as a social and discursive practice; finally, we'll deal with it from psychological, anthropological, and quotidian perspectives.

HIST 41000. History Lab Research

(0-V-V)

History Lab Research allows undergraduate students to assist a faculty member's research project(s) for credit.

HIST 42851. African-American Civil Rights Movement Tutorial

(0-0-0)

A required weekly discussion section for students registered in HIST 40851 or its crosslists.

HIST 43075. Seminar: Jerusalem

(3-0-3)

This research seminar provides an in-depth examination of the city of Jerusalem and its diverse historical experiences from the rise of Islam to the present (ca. 600–2000). Although the instructor will provide background information and feedback, this course is primarily student-driven: you will lead portions of discussions, present your research, and constructively critique the work of your peers. In addition to certain common readings, discussions will center on certain "hot topics" in the historical image of Jerusalem. Students will be assigned specific, usually "classic" studies of the topic at hand. Specific topics include the meaning of the Dome of the Rock; pilgrimage; the origin(s) of the Crusades; cross-cultural notions of sanctity; the Ottoman context, and the divided city. Rather than a simple chronological biography of a city, this course will provide a nuanced introduction to one of the most enduring symbols in Western, Jewish, and Islamic civilization.

HIST 43130. Seminar: Occupation of Japan

(3-0-3)

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The "Basic Initial Post-Surrender Directive" charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort, namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The Big Question—one that we will return to again and again in our discussions—is what is democracy and how is it created and sustained?

HIST 43230. The Age of Hadrian

(3-0-3)

This advanced seminar in ancient history and literature examines the life and reign of the Roman emperor Hadrian, who is remembered as one of the most complex and enigmatic of Roman rulers: the builder of the Wall in Britain and the Pantheon and Castel Sant'Angelo in Rome, an inveterate traveller across the ancient Mediterranean world, a devotee of Greek culture, a reformer of Roman law, a poet who mused about his soul on his death-bed, a creator of new gods, the first Roman emperor to wear a beard. A principal theme of the course is the question of how historical experience can be recovered, and readings from original sources (in English translation) are studied in conjunction with documentary and iconographic evidence. The course also considers how modern historians, biographers and novelists have recreated this mysterious figure, Ronald Syme and Marguerite Yourcenar included.

HIST 43250. Seminar: Travel in the Middle Ages and Beyond

(3-0-3)

Many familiar events (from Exodus, to the voyages of Columbus, the Crusades, or the American Gold Rush) can be seen as examples of travel in history. This seminar will examine the phenomenon of travel, and will look at different types of travelers, including soldiers, pilgrims, explorers, missionaries, adventurers, and merchants. We will concentrate on the medieval period (500–1500 C.E.), but will also consider travel in other periods. The chronological scope of the course will be broad in order to trace changing perceptions of the world from the early Middle Ages up through the voyages of Marco Polo and Christopher Columbus. We will read the writings of Christian, Jewish, and Muslim travelers, and will discuss the differing motives, interests, and concerns of these itinerant men and women. We will also discuss the evolution of cartography, and shifting views of the world as revealed in early maps. The course will cover the technical aspects of medieval travel, with a discussion of roads, bridges, inns, overland transport, and shipping. We will also consider less physical aspects of travel and the ways in which medieval writers employed the metaphor of travel in different genres of literature such as the epic quest and accounts of spiritual journeys. Students will write a research paper based on primary sources broadly concerned with issues of travel in a historical period of their choice.

HIST 43252. Heretics and Friars, Mystics and Nuns

(3-0-3)

From about 1100 until about 1400, European society witnessed wave after wave of new religious movements. These energies yielded groups and teachers of all stripes, men and women regarded as heretics and as saints. This course will treat the most important of these, from the Cistercian monks who rejected the established ways of their fellow Benedictines around 1100, to Francis of Assisi's lay penitents and preachers, to suspect beguines in the Lowlands and the Rhineland mystics. The emphasis will fall upon studying texts from these religious teachers and actors that will help us get at the aspirations of these new religious, while setting them in their social and cultural environments.

HIST 43408. Major Research Seminar—Telling Stories: The Holocaust as Historical Narrative

(3-0-3) Faulkner

The Holocaust was one of the seminal events of the twentieth century, responsible for introducing such words as "genocide" and "crime against humanity" into our modern vocabulary. Its impact on the interpretation of history, the ways in which we remember an event individually and collectively, and how we construct histories about it, are some of its most important legacies. This course investigates the attempts of European and American historians, survivors, and writers to come to terms with the historical significance of the Holocaust, and the roles that cinema and literature (prose, poetry, and memoirs) play in how we approach the Holocaust as a historical event. The themes of the course and the readings are designed to give students the necessary historical foundation for an understanding of what happened during the Holocaust, and familiarize them with the process of the shaping of memory through the writing and reading of history and memoirs. It will also serve as an introduction to more theoretical frameworks about narrative,

employment, trauma writing, and the relationship between fiction and history. Students will be expected to complete a 20–25 page research paper making use of primary sources as the final project for the course.

HIST 43410. Seminar: Victorian Revolution in Government (3-0-3)

Prior to the 19th century, government—particularly in the British Isles—was expected to be minimal, occasional, amateur, (and cheap), concerned only with maintaining property and religion, and, when unavoidable, with the defense of the realm. Modern governments (including the British) are large, permanent, professional (and costly) complex bureaucracies, concerned with how much you can load on a ship, what colors you can put in margarine, what you must learn in school, and with the regulation of the economy; the welfare of all citizens; and the quality of the environment, social and natural. We know that this revolutionary change in government happened during the 19th century, primarily in response to the great social changes of urbanization and industrialization, but historians disagree as to how it came about. Early in the semester, our meetings will be devoted to a critical reading of the state of the historical literature on this question; in the middle we will be learning to use the archives; and toward the end we will be meeting together to discuss our interpretations of the evidence. This seminar will meet the research seminar requirement for history majors, who have priority in enrollment. The seminar is also recommended to any student with an interest in public service or public policy.

HIST 43435. Irish Memoir and Autobiography (3-0-3)

This seminar has four basic objectives: to explore different ways in which to read texts, to explore the different ways in which memoir and autobiography can be read, to introduce modern Irish social and political history to students through the lives of the authors, and to introduce students to different human experiences. Key texts may include Frank McCourt's *Angela's Ashes*, Brendan Behan's *Borstal Boy*, and Maurice O'Sullivan's *Twenty Years Agrowing*. In addition, we may study extracts from other books, by writers such as William Carlton, Elizabeth Bowen and Robert Harbinson.

HIST 43436. Ireland and the British Problem (3-0-3)

Over the past 30 years or so a new subject has lodged firmly on the historical agenda: "The New British History." Before this development British in practice meant English, with the Scots and Irish getting a mention when they caused trouble, and the Welsh, since they generally didn't cause trouble, hardly being mentioned at all. Yet such a traditional anglocentric approach distorted even English history. The New British History proposes studies of the interactions of the Three Kingdoms or the Four Nations. For example, what used to be called the English Civil war is now—more accurately—called the wars of the three kingdoms. Ultimately Scottish, English, Welsh and Irish history don't make complete sense unless they are related to each other. This seminar is broadly conceived. The emphasis is on Ireland's troubled relationship with the larger neighboring island, but it is not hibernocentric. Beginning in 1603, when a Scottish king succeeded to the throne of England, and Ireland for the first time came under the complete control of (the now British) crown, we will explore how the "British Problem"—how to integrate or pacify often mutually hostile peoples, cultures and religions—unfolded, asserted and reformulated itself over the centuries. As a seminar the format will be discussion-based. After familiarizing ourselves with the subject, the questions and the issues, each student will select a topic (which may be primarily, but not exclusively, on Irish, Welsh, English or Scottish history) and spend the remainder of the semester working towards the writing of a research paper.

HIST 43440. Northern Ireland Troubles (3-0-3) Smyth

This discussion-based seminar explores the history of the six northeastern counties of Ireland which became Northern Ireland in 1920/1. Northern Ireland remained part of the United Kingdom and had a built-in protestant unionist majority. The

Catholic minority, alienated from the state from the outset, looked across the new border and to Dublin, capital of the Irish Free State, as the true site of their allegiance. Northern Ireland was thus, from the beginning, dysfunctional, scarred by sectarian violence and systematic discrimination in housing and employment. After examining the origins of the state and the early decades of its existence the seminar will turn to its main concern "The Troubles" which broke out in the late 1960s. The major episodes under scrutiny include the civil rights movement, Bloody Sunday, the hunger strikes, and the Good Friday Peace Agreement. Students are obliged to produce a twenty-five page essay based on original research, and many are expected to draw on the rich microfilm archive of "The Troubles," the Linenhall Collection, held in the Hesburgh Library.

HIST 43455. Irish Memoir and Autobiography (3-0-3)

This research seminar, open only to history majors, explores Irish memoir and autobiography as a window into the broader history of Ireland and the Irish diaspora.

HIST 43470. Seminar: The Russian Revolution (3-0-3)

This research seminar is designed to familiarize history majors with main categories of primary sources (e.g., official documents, diaries, memoirs, correspondence), major historical interpretations, and historical method through study of selected events of the Russian Revolution. Students are expected to write a major research paper.

HIST 43550. Research Seminar: The Cold War (3-0-3)

This course will explore the Cold War as a cultural phenomenon. We will consider the Cold War's impact on American art and popular culture, and culture as a venue of Cold War confrontation. We also will treat international sport as a form of Cold War cultural competition and sometimes cooperation. The course will be structured around American society and U.S.-Russian cultural rivalry, but the Cold War was not limited to the United States and students' interests in other nations will be encouraged. The main work in the course will be a research paper on a topic each student will devise in consultation with the instructor.

HIST 43552. Seminar: Nationalism in Europe (3-0-3)

This course will begin with several joint sessions devoted to an examination of the role nationalism has played in shaping modern European history. Given the broad nature of the course, emphasis will be placed on the theoretical underpinnings of nationalism, and on how national mythology influences historiography. The second portion of the course offers students an opportunity to conduct research on topics approved by the instructor. Research can focus on any European national experience in either the 19th or the 20th century. The instructor will consider topics touching on any aspect of diplomatic, social, religious, intellectual, or political history as long as the inquiry helps to enlarge our understanding of European nationalism. Students will be expected to present the results of their research at the end of the semester. Course requirements include submission of a bibliography, a thesis statement, a first draft, and a 25-page research paper at the end of the term. No prior knowledge of European history is required, though some basic knowledge of historical events will provide a firmer foundation to select a research topic. Students with even a rudimentary knowledge of a European foreign language will be expected to test their linguistic abilities in the final research project.

HIST 43553. Seminar: Republicanism (3-0-3)

"Republicanism" refers principally, but not exclusively, to republican ideas in the English-speaking Atlantic world in the period 1600 to 1800. After looking briefly at republican ideology in the ancient world and in renaissance Europe, the seminar will move to the substance of the course: the English "classical" republicans of the 17th century, such as Marchamont Nedham, John Milton, and James Harrington; the transmission of their ideas to 18th-century America; and, finally, the particular version of republicanism as it developed in Ireland in the

same period. This seminar course is discussion-based. Members of the seminar are expected to research topics, which will at first be stipulated by the instructor, and will subsequently be of the student's own choice. Students will present the findings of their research as the basis for leading a class discussion. The semester's work will conclude with a 20-page essay on a subject negotiated between the student and the instructor.

HIST 43554. Major Research Seminar: Europe in the Two World Wars

(3-0-3)

Students in this seminar will devote much of their time to producing a major research paper on some aspect of European history in the age of the world wars. Substantial work with primary sources is required. As a group we will also read and discuss some important studies by scholars of World Wars I and II.

HIST 43555. Nazi Germany's "New Order" in Europe

(3-0-3) Vardi

What were the Nazi aims, plans and policies during the twelve years of the "Nazi Era" in Germany and Europe? This seminar will introduce students to both factual grounding and competing concepts interpreting Nazism—nature, actions, and place in European history. Using primary and secondary sources we will examine Nazi Germany's decisions and practices in order to determine Nazi ideology and its relations with domestic, foreign, economic, demographic and other policies; the dynamics of Nazi Germany's extermination project; terror and welfare, German resistance, Nazi rule, collaboration and resistance in occupied Europe, the end of the Nazi regime, and its implication on post-war Germany and Europe.

HIST 43557. Seminar: Modern European Revolutions

(3-0-3)

This research seminar is designed to familiarize history majors with main categories of primary and secondary sources, major historical interpretations, and historical method through study of selected events and personalities of modern European revolutions, including the Russian Revolutions of 1905, 1917, and 1991; eastern European revolutions of 1989; the Orange Revolution in Kiev in November and December 2004 (as well as the Velvet Revolution in Tbilisi in the fall of 2003). Students are required to write a major research paper based largely on primary sources.

HIST 43558. Major Seminar: European Enlightenment

(3-0-3)

The course will establish that Enlightenment (not THE Enlightenment) brought into being the modern Atlantic world. Because European Enlightenment was various and contradictory, our own world is various, tense, and contradictory. It is impossible to understand the formative long eighteenth century (ca. 1687–1807) as a game of either capture the flag or follow the leader. Sampling some of the variety of the cultural achievement of Europeans, from Ireland to Italy and from Prussia to Spain, will locate everyone on a level playing field. (No prior knowledge of European history is expected.) You will devote the rest of the semester to researching and writing of seminar papers on one major theme of or contributor to Enlightenment in Europe. You will present your seminar papers for class discussion over the last four meetings of the semester. Students who possess even an elementary reading knowledge of a non-English European language will apply their knowledge in their seminar papers.

HIST 43559. The Age of Democratic Revolutions, 1770–1850

(3-0-3)

Between 1770 and 1850 North America, South America, and Europe were swept by waves of revolutionary unrest, a period that marks the beginnings of the modern world across several dimensions—political, social, and cultural. This seminar will begin with some common readings, looking at this period in comparative perspective through works by R.R. Palmer, Eric Hobsbawm, and others, in order to define both the common and distinctive features of the revolutions as they affected the different nations. Students will write research papers of about twenty-five pages based on their interests in particular topics and regions.

HIST 43560. Communist Europe: The Soviet Bloc, 1945–1991

(3-0-3)

This research seminar examines the rise, progression, and fall of communist regimes in East Central Europe, the conglomeration of states that by 1948 had fallen under the Soviet political and military domination. The Left and the Right are elusive concepts in Eastern Europe. Therefore we will begin by analyzing Communism against the backdrop of the political and historical traditions in the region. We will examine how the communists conformed to domestic realities, in order to identify commonalities and differences between members of the Soviet bloc. Primary issues include: communist takeovers and the founding of people's democracies; the Cold War rivalry and its impact on the communist regimes; Stalinism and de-Stalinization; the pattern of relationship between the Moscow center and its Eastern European peripheries; the entanglement of nationalism and Communism; pluralism within Communism; détente and the democratic opposition; the dynamics of the revolutionary and reforming processes that led to the collapse of the communist system. Students will research and write a 25-page paper based upon primary and secondary sources.

HIST 43561. Seminar: Religion, Politics, and Society in Modern Europe

(3-0-3)

This seminar will deal with some of the key problems in the history of religion in modern Europe. Students are expected to write a major research paper for the course, based on a topic and a set of primary sources chosen in consultation with the instructor. For the purposes of this course modern Europe begins with the French Revolution and concludes with the present, a period of just over two hundred years that witnessed enormous and significant changes in the relationship between church and state, in the cultural status of religion, and the ways in which individuals defined and enacted religious identities. The course will deal with key events and institutions, starting with the religious conflicts sparked by the French Revolution. We will then consider religious responses to the industrial revolution, and the ways in which churches and religious practice have been shaped by urbanization, the growth of the working class, and changes in family life and gender relations. The relationship between religion and modern political ideologies constitutes another major topic of the course, which will deal with the responses of Christians and Christian churches to liberalism, nationalism, and socialism, and to the totalitarian regimes of the twentieth century. We will conclude with some readings and discussion of the contemporary religious scene in Europe, looking particularly at the issues of secularization and the status of Islam. Students will spend the first half of the course reading works that will introduce them to the historical literature on the history of religion in modern Europe, defining a topic that they will pursue for their essays, and identifying relevant primary and secondary sources. In the second half of the course students will concentrate on research and writing. They will meet individually with the instructor several times, and periodically with the class to discuss progress and findings.

HIST 43562. Seminar: Comparative European Revolutions: 1789, 1917, 1989

(3-0-3)

This research seminar invites students to explore a revolution within modern Europe. The readings will focus on 1789, 1917, and 1989.

HIST 43583. Research Seminar: War, Violence, and Politics in Europe Since World War I

(3-0-3)

In this seminar students will examine the management of armed conflicts in Europe, as well as their effects on European society and politics, since the First World War. Although centered on Europe, this course will be geographically expansive. In recognition of the powerful tie between events in Europe and events in the Middle East or Southeast Asia, student will explore Europe within a global context to probe the interrelation of war and society—and especially democracy—in 20th-century Europe. The overriding question of the course will be, "How has politically motivated violence shaped and been shaped by European societies?" Course themes include the effects of domestic political structures on war, the

effects of war on racial and gender norms, the effects of race and gender on war and political violence, and the attempts to come to terms with terror as a political weapon. Students will pursue a particular facet of or case study exemplifying the problem of political violence in modern European history and research and write a 25-page paper rooted in primary sources.

HIST 43600. The City in Early America

(3-0-3) Cangany

“The City in Early America” is a contradiction in terms: by the time of the American Revolution, perhaps only 30% of American colonists lived in urban spaces. Philadelphia, America’s largest city, boasted just 40,000 people. (London, by contrast, had a population of nearly one million.) And yet, America’s cities in this period were vital to the economic, social, cultural, political, and intellectual development of what we now call the United States. In this seminar, we will unravel the contradiction, studying how and why five American cities (Philadelphia, Boston, Charleston, New Orleans, and Kingston, Jamaica) developed during the long eighteenth century, and determining what extraordinary effects—despite their limited sizes and populations—they had on the emergent nation. By applying urban history methodologies used for nineteenth- and twentieth-century cities to earlier source material, we will not only consider the circulations and developments of the eighteenth-century Atlantic world (and the American colonies’ participation in and contributions to them), but also understand how and why America would become a decidedly urban landscape. This course culminates in a major research paper based on primary sources.

HIST 43602. The American Revolution

(3-0-3)

This course will serve as a research seminar, focusing on the American Revolution. Students can write a research paper on any aspect of the Revolution. The class will read and discuss some seminal books from a number of different perspectives, as well as a smattering of primary sources on the origins, process, and outcomes of the Revolution. Discussion, as well as a number of short interpretive essays, will count substantially toward the final grade. The class will culminate with a research paper. Students can write on any aspect of the Revolution they choose.

HIST 43604. Seminar: American Civil War Era, 1848–1877

(3-0-3)

The primary goal of this course is for students to write a substantial research paper on a topic involving some aspect of American history in the era of the Civil War. Roughly the first half of the course will be devoted to intensive readings in major secondary sources, introduction to period newspapers available through the library, and some viewing of Civil War films—but all aimed at student selection of a topic for research. During the second half, students will be coached on bibliography, research strategies, writing, and re-writing, and they will take part in ongoing discussion of the individual projects that class members are researching. Student projects are by no means limited to military subjects, but may deal with social, economic, religious, gender, biographical, literary, or other aspects of U.S. history during the Civil War era.

HIST 43610. Notre Dame History

(3-0-3)

This seminar will offer the student the opportunity to research an aspect of Notre Dame history of his or her particular interest—academic program, student life, administrative decision, etc. Research topics might include Father Sorin’s rebuilding of the Main Building after the fire of 1879, priest-chaplains serving in the Civil War, Notre Dame during World War I or World War II, Rev. Julius Nieuwland, CSC, and the discovery of synthetic rubber, Notre Dame’s Minims Department (grade school), Notre Dame’s Preparatory School (high school), Notre Dame’s Manual Labor School, Immigrant Scholars on the Notre Dame faculty in the 1930s, Holy Cross Religious as Japanese Prisoners of War in World War II, the inauguration of the Great Books Program, Rev. John J. Cavanaugh, CSC, and the Kennedy Family, Rev. Theodore Hesburgh, CSC and the Civil Rights Commission, etc. After some introductory readings on the history of the

University, the principal work of the course will be the research, in primary and secondary sources, and the writing of a paper of approximately 30 pages, and a presentation of the paper for class discussion.

HIST 43612. Seminar: U.S. Catholic History

(3-0-3)

This seminar is designed with two goals in mind: to introduce students to the major events and themes in the history of American Catholicism, and to help students organize, research, and write an original work of historical scholarship. During the first half of the semester, we will read and discuss a variety of primary and secondary sources concerning the following topics: immigrant and ethnic Catholicism; the experience of Catholic women, especially women religious; Catholic devotional life; Catholic social movements; and the relationship between Catholics and the broader American society. We will explore some of the major historical interpretations of the Catholic experience, and become familiar with methods of historical research. During the second half of the semester, students will work independently (in consultation with the instructor) to prepare their research papers. At the end of the semester, they will share their findings with other participants in the seminar through an oral presentation.

HIST 43613. Research Seminar: U.S. Legal History

(3-0-3) Rodriguez

This course examines the role of law in the history of the United States from its origins as a British colony to the late 20th century. It looks at law not only as a functional response to social transformation, but also as both a powerful force shaping daily life and as a key component of American political mythology. The course will examine constitutional, common, and statute laws, as well as legal culture and institutions. Key subjects include the market revolution, slavery, the Civil War amendments, laissez-faire constitutionalism, legal realism, the New Deal, and civil rights. This course combines lecture and discussion. To that end, the instructor will pick three to five students each week to be responsible for the reading, and will call on those students during class. Each student will be on-call at least twice during the semester; it is advisable for you to read for every session, as it will be difficult to follow the lecture without adequate preparation.

HIST 43614. Seminar: The Religious Factor in American History

(3-0-3)

A research seminar surveying how religion has interacted with American culture, including thought, moral values, social views, education, and politics. Students will write a research paper on a topic of their choice.

HIST 43615. The Right to Vote in American History, 1607–Present

(3-0-3)

This research seminar focuses on the right to vote in American history. Students will explore the right to vote as it evolved over the course of American history, beginning with the colonial experiments in Virginia in the seventeenth century and ending with the contested presidential elections of 2000 and 2004. Alex Keyssar’s *The Right to Vote: The Contested History of Democracy in the United States* will provide the central text, and we will investigate case studies centering on age, property, religion, race, gender, naturalization, and other issues throughout four centuries of American history. Each student will explore one particular case study from any period in American history and produce a twenty-five-page paper based on primary source research.

HIST 43616. SEM: Reforming America

(3-0-3)

This research seminar examines the role of political and social reform in American history from the late eighteenth century to the present. Throughout U. S. history, reformers have targeted a variety of social ills—including slavery, poverty, industrialization, racism, lack of women’s rights, and political and moral corruption; in their efforts to transform American culture, politics, and society. We will study the broad dynamics of reform as well as investigate specific movements as case studies. Themes will include the struggles between competing visions of reform to define America; the religious roots (both Protestant and Catholic) of various

reform movements; and the international influences on reform. Students will write a 25-page paper, based on primary source research, which explores a case study of a reform movement or individual reformer from any period in American history.

HIST 43617. Seminar: Race and Religion in North America

(3-0-3)

This course aims at preparing students to write a substantial paper on a topic involving the interconnection of race and religion. While a few assignments will touch on Latin America and the Caribbean, the main focus is on North America. The first half of the course will be devoted to intensive readings in major works and anthologies of primary sources, and in selection of a topic for research. Readings will come from books like Colin Kidd, *The Forging of Race: Race and Scripture in the Protestant Atlantic World, 1600–2000*; David Brion Davis, *Inhuman Bondage: The Rise and Fall of Slavery in the New World*; Jon Sensbach, *Rebecca's Revival: Creating Black Christianity in the Atlantic World*; Mason Lowance, ed., *A House Divided: The Antebellum Slavery Debates in America, 1776–1865*; David Chappell, *A Stone of Hope: Prophetic Religion and the Death of Jim Crow*; and D. D. Collum, *Black and Catholic in the Jim Crow South*. During the second half of the course students will be coached on bibliography, research strategies, writing, and re-writing, and they will take part in ongoing discussion of the individual projects that class members are researching.

HIST 43618. Research Seminar: American Environmental History

(3-0-3)

This seminar will give students the chance to research and write a substantial historical essay. The topic is environmental history, and students are free to mold the topic to the time periods and subjects they are interested in. From depictions of nature in popular culture to the role of global warming in international relations, environmental history can serve as a doorway into almost any historical field. We will also spend a good portion of the course learning to write clear and compelling prose.

HIST 43651. Seminar: Women and Gender in 20th-Century United States

(3-0-3)

This research seminar will cover changing gender relations in the U.S. between the Great Depression and the end of the Reagan era. Students will read and discuss recent books and articles covering a variety of topics which may include: gender relations during the Great Depression; whether WWII was a turning point for women's work; the feminine mystique; women in the Civil Rights movement; the women's liberation movement of the 1960s and 1970s; changes in masculinities and their relation (or lack of relation) to the women's movement; the gay rights movement; and changes in women's work force participation and family life. During the latter half of the semester, students will concentrate on producing a substantial paper, based on original primary source research, on a topic of their choice selected in consultation with the instructor.

HIST 43652. Seminar: U.S. Thought, Belief, Value

(3-0-3)

A research seminar surveying early America's most characteristic intellectual, moral, and religious outlooks, this course will provide a broad introduction to topics such as the religious foundations of influential Americans groups such as Puritans in New England and Quakers in Pennsylvania, the European origins of American beliefs, the Enlightenment of the 18th century, the origins of American political thought, the impact of evangelicalism on the new republic, romanticism and Transcendentalism, the role of science, anti-slavery and other reform thought before the Civil War, the South, and the ideological and moral issues of the Civil War. The course will include consideration of the outlooks of some of early America's greatest thinkers and writers. Students will write a research paper on a specific person or topic in one of these areas.

HIST 43750. Seminar: United States in the Twentieth Century

(3-0-3)

The purpose of this course is twofold. First, it should permit the student to gain a greater familiarity with several of the major topics in 20th-century American history—the Progressive Period of Theodore Roosevelt and Woodrow Wilson; the Wall Street Crash of 1929 and the Great Depression; the New Deal legislation of Franklin Roosevelt; World Wars I and II; the Cold War; the Fair Deal Program of Harry Truman; Dwight Eisenhower's Modern Republicanism; John Kennedy's New Frontier; the Great Society of Lyndon Johnson; the Civil Rights Movement and the Feminist Movement; Richard Nixon and Watergate; aspects of 20th-century American culture; and the presidency of Ronald Reagan. Second, and more importantly, the course will offer each student the opportunity to research and produce a major paper on a topic of his or her own choosing in 20th-century American history. Approximately one-fourth of the semester will be devoted to reading and discussion of several of the above topics, and the rest of the semester to research and writing the seminar paper. The papers will be summarized for class discussion in the last four meetings of the semester.

HIST 43751. Seminar: Religion and Politics in Twentieth-Century U.S.

(3-0-3)

This course will examine the relationship between religion and political violence in the 20th century, focusing on the United States in comparative perspective. The course will be divided into three parts; students may write their seminar paper on a topic in any one of these three thematic areas. Part one will examine the writings and cultural influence of major thinkers in the U.S. Protestant, Catholic, and Jewish communities who addressed the questions of war, peace, and America's role in the world (e.g., Reinhold Niebuhr, Thomas Merton, Abraham Joshua Heschel, John Courtney Murray, SJ). The second part will examine cases of religiously inspired violence in the United States (e.g., the Ku Klux Klan, the militias, and Oklahoma City), Egypt, Iran, Palestine/Israel, Lebanon, and India in the 20th century. The third part will examine the concept of "American exceptionalism" and whether, to what extent, and why it applies to the question of religious violence. Each student will be required to write brief reviews of weekly assignments during the first part of the semester and to prepare a seminar paper, to be presented at later meetings.

HIST 43753. Seminar: Urban Oral Histories

(3-0-3)

For years, historians rejected oral sources, claiming that they were unverifiable utterances from respondents who were often equally unreliable. In the recent past, however, oral history has become an accepted form of research and a staple of certain historical fields. In the seminar, participants will devise, construct, and implement an urban history research project that draws extensively on oral sources. We will examine the methodology, practices, and pitfalls of oral history in classroom discussion and secondary sources.

HIST 43754. Seminar: African-American Civil Rights in the U.S.

(3-0-3)

The primary goals of the class are to introduce the participants to the major scholarly works and developments related to African-American civil rights and to facilitate the development of a research strategy for the production of an article-length scholarly treatment of a selected aspect of civil rights history. Projects should reflect the evolving interpretive synthesis of the history of the Civil Rights Movement and its relationship to the major social, political, economic, and cultural trends of the 20th century. Students may also examine the ways in which the history and achievements of the Civil Rights Movement have been represented and interpreted.

HIST 43755. Major Seminar: U.S. Presidents and Presidencies, FDR to Clinton

(3-0-3)

The purpose of this course is essentially twofold. First, it should permit the student to gain a greater familiarity with American history from the New Deal through to the end of the century using the prism of the American presidency. Second, and

more importantly, the course will offer each student the opportunity to research and produce a major paper on a topic of his or her own choosing in this broad area. Approximately one-third of the semester will be devoted to reading and discussion of the various presidential administrations, and the rest of the semester to research and writing of the seminar paper. The papers will be presented for class discussion in the last four meetings of the semester.

HIST 43756. Era of Franklin D. Roosevelt

(3-0-3) Blantz

The purpose of this course is threefold: first, through readings and discussions to give the student a good understanding of United States history during the presidency of Franklin D. Roosevelt, 1933–1945, the critical years of the Great Depression and World War II; second, to enable the student to research and produce a scholarly research paper of approximately twenty-five or thirty pages on a topic of his or her choice during this period; and third, to improve one's writing skills by producing a paper unified and coherent in structure and persuasive in argumentation. Possible areas of discussion and research are President Roosevelt's New Deal efforts of raise the country from the Depression; various public works programs; the growth of labor and rise of the CIO; conservative opposition to the Roosevelt program; the status of Black Americans; the role of women; the coming of World War II; the Roosevelt-Churchill collaboration; the home-front during World War II; the Atlantic Charter and the Yalta Conference; and the place of Roosevelt in the ranking of presidents.

HIST 43900. Latin American Independence Movements

(3-0-3)

This seminar focuses on the breakdown of the Spanish empire in Latin America, and the emergence of new nation-states in the region in the first quarter of the 19th century. Contrary to common expectations, the former colonies did not form a united nation but rather split into 10 different republics that developed their own unique histories, only to split further apart during the course of the century. This seminar examines the origins and actors of the independence movements, the development of an ideology of emancipation, and the variegated causes of fragmentation. The first third of the seminar is devoted to a common set of readings on Latin American independence. Students choose, in consultation with the professor, a specific topic of research. Students will work on primary source material, develop a thesis, and present their results in class for comment and discussion. At the end of the semester, students will submit a 25-page seminar paper.

HIST 43901. Seminar: Coffee/Sugar/Other Goods

(3-0-3)

Between their origin in the earth and their ultimate destination in our bodies, coffee, sugar, and other addictive commodities (such as tobacco, cacao, tea, opium, cocaine, and perhaps oil) have had profound effects on world history. In all cases, their production, processing, distribution, and consumption have been intertwined with the historical development of individuals, peoples, nations, and international relations. Growing consumption has profoundly altered the social, economic, and environmental history of producing countries, with especially profound impact on those individuals whose labor brings them from the earth. And in all cases, most of the world's supply of such commodities comes from relatively poor regions while consumption is centered in the relatively wealthy, industrialized nations. The course introduces students to the broad outlines of the history of comparative commodities through class readings and discussions. Students will then conduct research on an approved topic related to a specific commodity or theme that examines one aspect of the role of a commodity in world history. Course requirements include the submission of a bibliography, a thesis statement, a first draft, and a 25-page research paper.

HIST 43902. Latin American Research Seminar

(3-0-3)

After briefly examining different models of research and writing, students will undertake a major, semester-long primary source research project on a topic within Latin American history (which could include foreign relations with the United States or European nations, immigration to or from the region, etc.). I anticipate

that most students will use research materials available at Notre Dame. Interested students are encouraged to see the instructor prior to the beginning of the semester in order to begin exploring possible topics and available research materials.

HIST 43975. Student Politics and Movements

(3-0-3)

This is a history seminar for undergraduate majors on student protests and activism during the 20th century. While assignments will attempt to cover most of the century, the seminar will concentrate the discussion on the "long sixties" (1956–1977) in Europe, the United States, and Latin America. In particular, students will be asked to explore a "student movement" of their choice during this (or another) period in history and write a 25-page research paper based on primary sources.

HIST 46000. Directed Readings in History

(V-0-V)

This course facilitates a student's reading and analysis of a specialized set of texts under the guidance of an individual faculty member.

HIST 47050. Special Studies

(V-0-V)

Independent study, writing, and research under the direction of a faculty member.

HIST 48000. Directed Research in History

(V-0-V)

This course facilitates a student's particularized research project on a historical topic under the guidance of an individual faculty member.

HIST 53001. Honors Methodology

(3-0-3) Kselman

This course is open only to students in the Department of History honors program. It has two agendas: (1) to introduce students to theoretical and practical foundations of historical method; and (2) to help get you started on your honors research. During the first half of the semester, we will discuss and practice key aspects of historical method, providing a structure for you to start your own research. You will work on multiple drafts of a research proposal, develop a bibliography, and begin your research in primary sources. By the end of the semester, you should be close to completing your research and beginning to write the first draft of your honors essay. This course will try to assist you in planning and budgeting your time toward the goal of minimizing the stress and maximizing the intellectual rewards of participating in the honors program.

HIST 53002. Honors Colloquium

(3-0-3) Thomas

This course, open only to students in the History Honors Program, introduces students to the ways in which history is conceptualized, written, and argued about. Students approach these issues by reading and discussing the historiography of the instructor's chosen field or fields. The emphasis of the class will be on understanding how historians have framed their questions for research, in conversation with one another and with their own interests, and how their work, collectively and individually, has shaped the development and the research agendas of the larger discipline of history.

HIST 53657. Catholics and Protestants in American History

(3-0-3)

This seminar will concentrate on books featuring American Protestants who engaged with Catholics and books on Catholics who were responding to their situation in America, especially the Protestant influences in American life. The reading list will include older classics like Ray Allen Billington, *The Protestant Crusade, 1800–1860* (1938) and Jenny Franchot, *Roads to Rome: The Antebellum Protestant Encounter with Catholicism* (1994) as well as more recent classics like John McGreevy, *Catholicism and American Freedom* (2003) and Michael Hochgeschwender, *Wahrheit, Einheit, Ordnung: Die Sklavenfrage und der*

amerikanische Katholizismus, 1835–1870 (2006). Student writing will include brief responses week-by-week to assigned texts and a more extensive historiographical or research paper.

HIST 56050. Directed Readings

(0-0-V)

Independent study of special topics under the direction of a faculty member. Agreement by the faculty member and approval by the director of graduate studies required. (Annual)

HIST 58003. Honors Thesis

(3-0-3)

History Honors Program students only. In the fall and spring of the senior year, the history honors student will work on a thesis (40 to 80 pages) under the supervision of a specific faculty member.

Irish Language and Literature

IRLL 10101. Beginning Irish I

(4-0-4)

No prior knowledge of the Irish language required. This course provides an enjoyable introduction to modern Irish. Energetic teachers in small classes teach basic language skills and prepare students to conduct conversations and read authentic texts. Extensive use is made of role-play and interactive teaching methods. Irish 10101 is a superb opportunity to learn a new language, explore Irish/Celtic culture, and investigate the linguistic politics of the only minority language offered at Notre Dame. In addition to satisfying the language requirement of the College of Arts and Letters and the College of Science, Irish satisfies the popular Irish Language and Literature and Irish Studies minors' requirements, and selected students will have an opportunity to study in Dublin, Ireland. This class meets 3 days a week. In lieu of a scheduled 4th class, students work independently on technology-based language/culture projects in the CSLC.

IRLL 10102. Beginning Irish II

(4-0-4)

Prerequisite: IRLL 10101 or IRST 10101 or CLIR 10101

Second semester of instruction in the Irish language. More emphasis will be placed on reading simple texts in Irish. This class meets 3 days a week. In lieu of a scheduled 4th class, students work independently on technology-based language/culture projects in the CSLC.

IRLL 13181. Social Science University Seminar

(3-0-3)

A short history of the study of folklore will set Irish folklore in its wider context, and refer to the significant collectors from Ireland, and elsewhere, including North America, from the 19th century until the present. Extended forms of folklore, including folktales, hero tales, and legends, and their recurring motifs, and shorter forms like songs, rhymes, tongue twisters, blason populaire, prayers, charms, blessings, curses, riddles and proverbs will be described and their functions discussed.

IRLL 13186. Literature University Seminar

(3-0-3)

This course introduces students to various aspects of Irish language, literature and culture. As offered spring 2011: Section (01) Irish Jokes from Medieval Satirists to Bart Simpson; Section (02) An Introduction to Irish Culture.

IRLL 20103. Intermediate Irish

(3-0-3)

Prerequisite: IRLL 10102 or IRST 10102 or CLIR 10102

Continuation of the study of the Irish language with increased emphasis on the ability to read 20th-century literary work in the original Irish.

IRLL 20105. Old Irish

(3-0-3)

The aim of this course is to enable students with no previous knowledge of Irish, medieval or modern, to take the first steps towards acquiring a reading knowledge of Old Irish, conventionally the language of the seventh and eighth centuries A.D. The emphasis will be on reading texts in the original language by means of a detailed examination of the grammatical structure of the language. We will also, however, give some consideration to aspects of the literary and cultural contexts in which our texts were composed. The texts we will use have yet to be decided.

IRLL 20107. The Hidden Ireland

(3-0-3) McQuillan

The *Hidden Ireland* denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from "below" and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our

understanding of Irish identity, Irish history, and Irish literature. This course will examine the book in depth and utilize it to open a window on the hidden Ireland of the 18th century. The cultural, historical, and literary issues which are raised by the book will be studied in the context of the poetry of the period. Poetry will be read in translation.

IRLL 20108. Verbal Arts and Oral Traditions

(3-0-3) Gillan

This course will examine the practice, practitioners and different genres of the verbal arts: the folktale, legends, epic, proverb, riddle, etc., and will look at the different functions of these genres. It will also look at the research traditions devoted to the study of what has been variously termed folk narrative, oral literature, orature, as well as the verbal arts.

IRLL 20109. Celtic Heroic Literature

(3-0-3)

An exciting introduction to Celtic literature and culture, this course introduces the thrilling sagas, breathtaking legends and prose tales of Ireland and Wales. Readings include battles, heroic deeds, feats of strength and daring and dilemma faced by the warrior heroes of the Celts. This course, which requires no previous knowledge of Irish or Welsh, studies the ideology, belief system and concerns of the ancient Celtic peoples as revealed in their saga literature. By examining the hero's function in society, students investigate the ideological concerns of a society undergoing profound social transformation and religious conversion to Christianity and the hero's role as a conduit for emotional and social distress. Among the heroes to be studied in depth are: Cu Chulainn, Lug, St. Patrick and the king-heroes. Wisdom literature, archaeological and historical evidence will also be considered in this course. No prior knowledge of Irish required. All texts provided in English.

IRLL 20110. The Irish Novel and Memoir

(3-0-3)

Prerequisite: IRLL 20103 or IRST 20103

This course focuses on novels, memoirs and autobiographies that deal with Ireland, the Irish-language, folklore, history and cultural politics. Starting with the causes for the relatively late emergence of print culture in the Irish-language, we discuss the cultural, political and ideological forces that shaped these literary genres during the Irish Revival, the Free State and the post WWII period. We examine the impact of various literary movements on the Irish-language novel and use the memoirs and autobiographies to examine key moments in Irish cultural life as framed in the controversies surrounding Michelle Smith, Cathal Ó Searcaigh, Máire Mhac an tSaoi and Hugo Hamilton. All texts will be read in English and no prior knowledge of Irish is required, but extra credit/classes are available for students willing to read the texts in their original format (See Language Across the Curriculum). Among the authors and texts to be studied are the following: *Séadna, My Own Story, Exile, The Islandman, Twenty Years A'Growing, Peig, When I Was Young, The Poor Mouth, Schnitzer O'Shea, Cré na Cille, Lead Us Into Temptation, Lovers, A Woman's Love, Speckled People, Light on Distant Hills, Same Age as the State, Triple Gold, Remembering Abanagran.*

IRLL 20111. Ireland of the Proverbs

(3-0-3)

This course provides an introduction to the fields of paremiology (study of proverbs) and paremiography (collection of proverbs) in the Irish language. The focus of the course will be on issues such as definition and classification, style and meaning, origin and dissemination, stereotype and worldview, types of proverb collections, and the use of proverbial expression in contemporary Irish literature. The course will provide a comprehensive overview of proverbs and related fixed-phrases in the Irish language.

IRLL 20112. All Roads Lead to Ireland

(3-0-3)

This course provides an introduction to the academic study and collection of Irish proverbs and proverbial phrases. We will examine the major proverbial collections contained in manuscripts, books, dictionaries, periodicals and newspapers in the period 1732–2010. Our aim is to identify and analyze the origin, structure, style

and content of Irish proverbial expressions. We will also compare Irish expressions with those found in other major languages in Europe and beyond, to see what we can discover about Irish national character and worldview. The course will provide a comprehensive overview of proverbs and related fixed-phrases in the Irish language.

IRLL 20113. The Hidden Islands

(3-0-3) Mckinney

The aim of this course is to introduce students to the islands and islanders of Ireland, with particular focus on those communities in the traditional Gaeltacht (Irish speaking) regions of Munster, Connacht and Ulster. The seminar will examine the concept of "identity" through an analysis of the regional literature, language, folklore, and song tradition of these island people, together with their representation in television and film. We will adopt an interdisciplinary approach to placing these communities in their historical, socio-economic, and cultural context. Students will be expected to participate actively in discussion and to complete essays focusing on the various topics covered in class. No prior knowledge of the Irish language is required.

IRLL 20120. The Irish Short Story

(3-0-3)

This course introduces students to the themes, motifs, approaches and various forms common to the Irish short story as well as the critical debates associated with the genre. We begin with a survey of the literary history and cultural politics of Ireland in the nineteenth and the emergence of the Irish short story and compare it to the American and French story, before considering the relationship between folklore and literature and the origins of the modern short story form. Having discussed various theories of the short story, we proceed to examine the interactive relationship between orality and print culture, tradition and modernity, native and foreign, natural/authentic and artificial/other. Among the authors we read in detail are: George Moore, P.H. Pearse, James Joyce, Pádraic Ó Conaire, Máirtín Ó Cadhain, Frank O'Connor, Sean O'Faolain, Liam Ó Flaithearta/Liam O'Flaherty, Seamus Ó Grianna, Seosamh Mac Grianna, Angela Bourke, Samuel Beckett, Máire Mhac an tSaoi, Pádraic Breathnach, Seán Mac Mathúna, Micheál Ó Conghaile, Alan Titley, Dara Ó Conaola and Eilís Ní Dhuibhne. Stories are read primarily as literary texts that shed light on evolving cultural, political and social conditions and provide incisive insights into the Irish literary and cultural tradition. This course is an ideal introduction to literary criticism and cultural studies. No prior knowledge of Irish or Ireland is required. All texts will be available in English.

IRLL 20203. Advanced Readings in Irish Culture

(3-0-3)

Prerequisite: IRLL 20103 or IRST 20103 or IRL 60103

An advanced course focusing on reading and translating a variety of texts in the Irish language. We concentrate on further development of reading, interpretive, and technical skills mastered in previous language courses (IRLL 10101, IRL 10102, IRL 20103). Texts from various authors and historical periods allow students to taste different writing styles: contemporary fiction, journalism, literary criticism, historical and cultural texts. Emphasis will be on sentence structure, stylistics and syntax. Students are required to have earned a high grade in IRL 20103 in order to take this class. At the conclusion of this course, students will be able to conduct independent research with Irish texts.

IRLL 20316. Irish in U.S.: Comparative Perspectives on Being Irish and Irish American

(3-0-3) Ó Conchubhair

This class provides an educational and entertaining reflection on the deep historical and cultural intertwining of America and Ireland, and the extent to which our world is shaped by Irish people, culture and heritage. Drawing upon the skills of three Notre Dame professors, each of which has different interests, in this class we explore comparative perspectives of the cultural, economic, and political context of being Irish and Irish-American. In this class we seek to provide new perspectives on the interconnections between Ireland and America, in the past, present and future. Based on lectures and presentations, we explore some fundamental

historical questions, such as how were the Irish Famine, emigration, and economic developments of the 18th–20th centuries interconnected, and how did the Irish diaspora shape the historical and cultural trajectory of America. Similarly, we explore what it is to be Irish and Irish-American, be it through family history, or growing up watching Notre Dame football. What are the interconnections between regional Irish identities, language, and history? Finally we explore how American, let alone global, culture is being actively shaped by Irish culture (such as literature, theater, film, music), and the extent to which this is a dynamic process. Looking at it from a different perspective, how has the reintroduction of such an idealized form of Irishness to Ireland, impacted the country? Drawing upon literature, history, archaeology and folklore, this class will illustrate the different ways we can explore and conceive of the past and present world of Ireland and Irish-America. Seeking answers to these questions offers students a fascinating opportunity to learn more about Ireland, America, and the connections between these cultures and peoples.

IRLL 22110. LAC Discussion Group: The Irish Novel and Memoir

(3-0-1)

This course offers an additional 1-credit component for students with advanced Irish language ability. Students who have completed the Notre Dame language requirement in Irish are eligible to sign up for an additional single credit discussion section as part of the Languages across the Curriculum (LAC) initiative in the College of Arts and Letters. To earn this extra credit students will do some additional reading in Irish language material (approximately 10 to 15 pages per week) and meet once a week with the professor to read/discuss this material. Up to three LAC discussion credits can be applied toward the minor in a given language. This LAC discussion section will be graded on a pass/fail basis and credited to the student's transcript. Grades will be based on the weekly presentations and the student's ability to demonstrate comprehension of material read in Irish and to link that material to the related literature course.

IRLL 23511. Irish Heroic Literature In Modern Adaptation

(3-0-3)

Beginning with a study of the ethos of Irish/Celtic heroic literature in its historic and cultural context, this course examines the ideological, aesthetic, and personal uses to which that material has been put by Irish writers of the past two centuries (19th and 20th centuries) writing in English and Irish. Among the authors to be studied are: Seamus Heaney, Flann O'Brien/Myles na Gopaleen, Nuala Ní Dhomhnaill, and Eugene Watters/Eoghan ÓTuairisc. Particular attention will be paid to shifting concepts of "authenticity" and the degree to which various creative artists have retained, reinterpreted, or reinvented what they perceived to be the essence of their originals. This course will interest English majors, modernists and medievalists.

IRLL 26311. Directed Readings

(3-0-3)

Undergraduate directed readings in Irish literature.

IRLL 30107. The Hidden Ireland

(3-0-3)

The *Hidden Ireland* denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from "below" and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our understanding of Irish identity, Irish history, and Irish literature. This course will examine the book in depth and utilize it to open a window on the hidden Ireland of the 18th century. The cultural, historical, and literary issues which are raised by the book will be studied in the context of the poetry of the period. Poetry will be read in translation.

IRLL 30108. Twentieth-Century Literature in Irish (in Translation)

(3-0-3)

This course will introduce you to the vibrant contemporary literature in Irish (Gaelic) from the Gaelic Revival, which sought to rescue the language from extinction, right up to the present. This course will focus on developing your ability to read, analyze and write about literature with care and precision. You will do a *lot* of writing, both graded and ungraded, to become a stronger reader and writer. In the process, we will consider the particular excitement and difficulty of writing in (and about!) a minority language that also happens to be the first official language of Ireland, as well as debates about identity, belonging, symbolization, history, anglicization, assimilation and hybridity, the new prominence of women writers, and ongoing challenges to stereotypes about Irish as tradition-bound (rather than, say, tradition-enabled), puritanical or premodern.

IRLL 30109. Introduction to Irish Writers

(3-0-3)

Corequisite: IRLL 32109

This course introduces undergraduate students to Irish literature, explores its dominant themes and motifs and surveys canonical texts and major authors from the 18th century to the present day. A broad range of texts and genres—poetry, novels, short stories, folklore and drama—are studied from a historical and cultural perspective and in relation to transnational literary trends and movements. Attention is also paid to modernization and tradition as well as post-colonialism, feminism and censorship. No prior knowledge of Ireland or the Irish language is required. Irish-language texts will be available in translation.

IRLL 30110. The Hidden Ulster

(3-0-3)

This course introduces students to the literature, language, culture and history of Ulster in Ireland and confronts the stereotypes of binary opposition that commonly mark the region. Through close textual readings of literary texts from the seventeenth century onwards, we discuss and interrogate the literary, religious, cultural and linguistic forces that shaped identity in Ulster from the colonial period onwards and explore the shared heritage of both communities—Irish/English, Catholic/Protestant, Native/Planter. This course will suit English majors and those interested in the study of identity formation and competing cultural ideologies. No prior knowledge of Irish is required for this course. All texts will be in translation.

IRLL 30111. The Celtic Otherworld in Early Irish Sources:

(3-0-3)

In early Irish tradition, the everyday world (of men, women, kings, warriors and cattle) and the Otherworld stand in unstable and uneasy relation to one another. The Otherworld has several aspects: it can be positive and beneficial—indeed it is viewed as the legitimating source of rule in this world—but also baleful and destructive. In this course, we will study a range of Otherworld encounters, seeking to understand the vast range of contacts between the human world and the other world (or worlds) of early Irish tradition.

IRLL 30112. Irish Folk Custom and Belief: Popular Religion and Rural Ireland

(3-0-3) Gillan

Irish Folk Custom and Belief is both the title of a popular work from 1967 by Seán Ó Súilleabháin (1903–1996), archivist of the Irish Folklore Commission, and an approach to the study of rural Irish popular religion. That approach was long dominant among Irish folklorists. It tended to frame rural popular religion ahistorically and to fudge the issue of its relationship to specific social groups. At the same time it led to the recording of extraordinarily rich data, mostly from the Irish-speaking population of the West. Concentrating on the work of 19th-century antiquarians and 20th-century folklorists and anthropologists, the course will examine the study of rural popular religion in Ireland. It will contextualize it both in terms of historical, sociological and anthropological knowledge of Irish rural society and specifically of Irish peasant society, and in terms of the scientific study of religion. Specific topics often identified under the headings of "folk custom and

belief” will be discussed, in particular ritual, festival, magic, supernatural beings, sacred places and the oral narratives that deal with them. Specific scholarly texts, including texts by leading contemporary scholars of Irish rural popular religion, will be discussed as well as ethnographic texts recorded by the Irish Folklore Commission.

IRLL 30113. Poetry in Irish since the Revival

(3-0-3)

This course will examine the compelling poetry produced in Irish since the Gaelic Revival of the turn of the twentieth century, running right up to very recent publications of the first decade of the twenty-first century. We will consider major authors whose influence on the tradition has been profound, more recent international stars, as well as emergent figures whose work is only very recently in print. Our method will be that sine qua non of literary study, close reading, the dogged and unsparring analysis of the inner workings of the text at hand, an enduring and essential skill for both scholars of liberal arts and the educated, thinking individual more generally. To this will we join attention to the sociocultural, linguistic and political context of the works, relating to the aftermath of Irish independence, economic hardship and emigration, the crisis of the Catholic Church, transformations in gender and familial expectations, the Troubles in the North, and the new composition of Irish society with immigration and globalization. Poetry as well as selected criticism will be read in English.

IRLL 30120. The Irish Short Story

(3-0-3)

This course studies the Irish short story as a literary genre that reflects the changing political and cultural forces at play in Ireland. We begin the course by surveying various critical theories that can be applied to the genre before reading and discussing a wide selection of short stories. The course considers Irish writing in the broader sense literature written in either Irish or English. Among the authors included are: Patrick Pearse, Pádraic Ó Conaire, Séamus Mac Grianna, James Joyce, Liam O’Flaherty, Elizabeth Bowen, Frank O’Connor, Sean O’Faolain, Éilís Ní Dhuibhne, Angeal Bourke, Seán Mac Mathúna, Micheál Ó Conghaile, Eithne Strong, Pádraic Breathnach, Alan Titley, Mary Lavin, William Trevor, Gerry Adams and Bernard MacLaverty.

IRLL 30123. Advanced Irish Conversation

(3-0-3)

This is an advanced Irish language course, designed for students who have successfully completed Intermediate Irish and who plan to attend a language immersion program this summer or to take courses through Irish during junior year abroad (UCD/Trinity). This course expands on the language’s grammatical structures, with emphasis on communication and acquisition of advanced language skills: reading and listening comprehension, and oral and written expression. A study of contemporary Irish-language culture and literature supports the language study. The conversational component of the course requires student-teacher and student-student interaction to exchange information, clarify meanings, express opinions, argue points of view, and engage in any other communicative function for which native speakers use language.

IRLL 30210. Transculturation in Irish Literature

(3-0-3)

This course considers the vexed topic of cultural change in the context of colonialism by examining key texts originally written in Irish (or a mixture of Irish and English) from a range of time periods, including works of comedy, satire, lament and protest. We will consider the critical literature on transculturation and examine primary texts and consider how they change over time and what they seem to suggest about how people negotiate competing sociocultural and economic imperatives. Knowledge of Irish is helpful but not necessary; translations will be provided along with original texts. Requirements: enthusiastic participation, several short and one long term paper.

IRLL 30223. Introduction to Irish Folklore

(3-0-3)

This course will discuss the 19th-century concept of folklore and its application in Ireland. Irish folklore is usually understood in terms of three main and related domains: folk narrative (or oral literature), folk belief (or popular religion) and material folk culture. These will be examined with special emphasis placed on narrative. Representative oral narrative texts from the Gaelic tradition will be studied in translation.

IRLL 30301. Women in Irish Oral Tradition

(3-0-3)

Oral tradition offers individuals and communities ways of constructing and maintaining identity, often against considerable external pressure. This course will explore oral verbal art in Irish and English through transcribed texts, sound recordings, and film, paying particular attention to depiction of and performances by women, and offering gendered readings of the material studied.

IRLL 30306. Saints and Kings in Celtic Ireland

(3-0-3)

This course focuses on a series of encounters (in early Irish and Hiberno-Latin) between saints and kings or other royal characters. Through these stories and characters, tensions between the domains of spiritual and secular, the local and the national, the native and the external, are raised, explored and (sometimes, though by no means always) resolved. Saints such as Patrick, Colmcille, Brigit, Ciarán, and Cainnech, together with kings such as Lóegaire Mac Néill, Diarmuid Mac Cerbaill, and Muirchertach Mac Erca will be studied.

IRLL 30307. The Irish Tradition I

(3-0-3)

Ireland possesses the oldest vernacular literary tradition in Europe, spanning over 1500 years to the present day. This course will provide a survey of the origins and development of that literary tradition through more than a millennium from its beginnings until the seventeenth century, when political circumstances led to the collapse of the highly-developed native system of learning, poetry and patronage. The development of the Irish literary tradition will be traced against this background of political and cultural upheavals from approximately 500 to 1650.

IRLL 30308. Great Irish Writers

(3-0-3)

This course will look at masterworks originally written in Ireland’s first language, the oldest vernacular literature of northern Europe. We’ll look at the stories from the Ulster Cycle, including the most famous love story in Irish (a.k.a. *Deirdre of the Sorrows*), tales of kings acting badly, heroes astounding others before the age of 10, and the great Irish epic the *Táin Bó Cúailnge* (*The Cattle Raid of Cooley*), which tells a rollicking good story (body-morphing battle frenzy! treachery! jokes! boasting! tricolored hair!) while tackling confounding social and political concerns (such as the dangers of chaos, jealousy, arrogance, and what you do with a bunch of overheated, underemployed young men). We’ll next look at the poetic tradition in Irish between approximately 1540 and 1800, an era when England, later Britain, consolidates its conquest and colonization of the country. In this context, writers craftily defend Irish culture, manhood and authority while recalibrating Irish identity, sometimes in deadly earnest, sometimes by making fun of what they cannot necessarily change. All materials will be read in English translation.

IRLL 30309. Great Irish Writers

(3-0-3)

The early modern period (sixteenth to late-eighteenth centuries) is a time of English conquest in Ireland. It is therefore a period of cumulative crisis for the Irish and is important in the formation of their identity. We will read closely a selection of texts, both prose and poetry, representative of various facets of this crisis and of Irish responses to them. All texts, originally written in Irish, will be read in English translation. The material provides interesting contrasts and comparisons for those who have already studied some Anglo-Irish literature (we will in fact read some English writing on Ireland in this period) and it will also be of interest to students of Irish history. We will supplement the material with readings from the

work of historians on early modern European nationalism in order to place it in its wider context. In addition, we will examine some recent work on the interface between language, literature and anthropology in order to deepen our cultural understanding of the texts we are studying.

IRLL 30310. The Irish Comic Tradition

(3-0-3)

Fantasy. Humor. Ribaldry. The Macabre. The Grotesque. Wit. Word play. Satire. Parody. This course will read diverse examples of the long and fertile comic tradition in Irish literature (in Irish and in English), from medieval to modern, in order to enjoy a good laugh, get an alternative take on the Irish literary tradition, and think about the politics of humor. Authors will include unknown acerbic medieval scribes, satiric bardic poets, Swift, Merriman, Sheridan, Wilde, and Flann O'Brien. No knowledge of Irish is assumed or necessary.

IRLL 30311. The West of Ireland—An Imagined Space

(3-0-3)

This course interrogates and examines representations of the West of Ireland in various twentieth-century literary texts focusing, in particular on the role of the West of Ireland in state formation and legitimization during the early decades of independent Ireland and its role in the construction of an Irish identity. We will look at how images of the West of Ireland were constructed in various utopian or romanticized formulations as well as examining more dystopian versions. This course will take an interdisciplinary approach, drawing on the visual arts and film as well as on literary texts written in both Irish and English. (Irish language texts will be read in translation).

IRLL 30312. The Blasket Islands and Their Literature

(3-0-3) Nic Dhiarmada

“The island of the Great Blasket lies three miles off the Kerry coast of Ireland, at the westernmost tip of Europe. Virtually unknown before this century, it was to produce a rich and extraordinary flowering of literature that has made it famous throughout the world.” Oxford University Press. This course will examine the phenomenon that is Blasket Island literature. Before its eventual desertion in 1953, the previous thirty years had seen the production of literary works by inhabitants of the Blaskets such as *An tOileánach! The Islandman* by Tomás Ó Criomhthainn; *Fiche Bliain ag Fás/ Twenty Years A Growing* by Muiris Ó Súilleabháin; *Machnamh Seanmháil/ An Old Woman's Reflections* by Peig Sayers. This course will trace this remarkable flowering both to the immensely rich oral traditions of the island and the dynamic interplay of such literary and scholarly visitors as George Thompson and Robin Flower with the island authors. All texts will be read in translation.

IRLL 30320. Contemporary Irish Literature

(3-0-3)

This course is an introduction to contemporary literature written in Irish. No prior knowledge of Irish is required and all texts are in translation. We read a selection of texts from a variety of genres including novels, short stories, poetry, short films, plays and autobiographies. In the course we examine the politics of writing in a less frequently spoken language and discuss the issue of translation. We interrogate text from a variety of perspectives: literary, cultural, political and ideological and consider the relevance of biographical detail as well.

IRLL 30321. Screening “The Irish Troubles”

(3-0-3)

This course will look at how political conflict in Ireland from the 1916 Rebellion and the War of Independence up to and including what became known as “The Troubles” in the North of Ireland has been represented on the screen. Students will analyze a wide variety of cinematic texts, mainstream commercial Hollywood features as well as independent Irish and British films. Documentary film will also be analyzed. Certain seminal events such as Bloody Sunday and the 1981 Hunger Strikes, which have a diverse representational history on screen will be given particular attention. Among the films discussed will be *Mise Eire, Saoirse, Michael Collins, The Wind that Shakes the Barley, Some Mother's Son, In the Name of the Father*, and *Bloody Sunday*.

IRLL 30362. The Irish Language Lyric Song Tradition

(3-0-3)

The music, the meters, the magic of the Irish language lyric song tradition will be explored in this course spanning the known history of the most enduring songs; their transmission and migration in oral, written and sound-recorded form; the sources from which draw inspiration and their influence in translation on writers and performers as diverse as W.B. Yeats and Sinéad O'Connor. Using recordings, live performance and close textual analysis the course will aim to chart the journeys of these songs through the centuries and offer insights into their lasting appeal.

IRLL 31321. Screening “Irish Troubles” Lab

(0-2-0)

Lab section corequisite for “Screening the Irish Troubles.” Students will analyze a wide variety of cinematic texts, mainstream commercial Hollywood features as well as independent Irish and British films. Documentary film will also be analyzed. Certain seminal events such as Bloody Sunday and the 1981 Hunger Strikes, which have a diverse representational history on screen will be given particular attention. Among the films discussed will be *Mise Eire, Saoirse, Michael Collins, The Wind that Shakes the Barley, Some Mother's Son, In the Name of the Father*, and *Bloody Sunday*.

IRLL 32109. Introduction to Irish Writers Discussion

(0-1-0)

Prerequisite: IRL 30109 (may be taken concurrently) or IRST 30372 (may be taken concurrently) or ENGL 20513 (may be taken concurrently)

This course is the discussion section associated with the course IRL 30109 Introduction to Irish Writers and its cross-lists.

IRLL 40102. Introduction to the Language and Culture of Medieval Ireland

(3-0-3)

The aim of this course is to introduce students to the language and culture of medieval Ireland. The course will have linguistic, literary and cultural components. Students will take the first steps towards acquiring a reading knowledge of Old Irish (conventionally the language of the period to ca. 900). We will consider a selection of different kinds of texts, literary, legal and devotional, prose and poetry and place them in their historical and cultural contexts.

IRLL 40103. Irish Heroic Literature in Modern Adaptation

(3-0-3)

Beginning with a study of the ethos of Irish/Celtic heroic literature in its historic and cultural context, this course examines the ideological, aesthetic, and personal uses to which that material has been put by Irish writers of the past two centuries (19th and 20th centuries) writing in English and Irish. Among the authors to be studied are: Seamus Heaney, Flann O'Brien/Myles na Gopaleen, Nuala Ní Dhomhnaill, and Eugene Watters/Eoghan Ó Tuairisc. Particular attention will be paid to shifting concepts of “authenticity” and the degree to which various creative artists have retained, reinterpreted, or reinvented what they perceived to be the essence of their originals. This course will interest English majors, modernists and medievalists.

IRLL 40107. The Irish Love Poem

(3-0-3)

This course traces the trajectory of the love poem in Ireland from the Middle Ages to the present day. We will begin with texts such as *Liadain and Cuirithir* (9th century) continuing through the late medieval genre of the Dánta Grádha as well as considering the corpus of love songs (Amhráin Ghrá) from the oral tradition before looking at the development of the modern love poem in the work of poets from W.B. Yeats to the contemporary Irish language poet Nuala Ní Dhomhnaill. All Irish language texts will be read in translation.

IRLL 40109. The West of Ireland: An Imagined Space

(3-0-3)

This course will interrogate and examine representations of the West of Ireland in various twentieth century texts focusing, in particular on the role of the West of Ireland in state formation and legitimization during the early decades of independent Ireland and its role in the construction of an Irish identity. We will look at how images of the West of Ireland were constructed in various utopian or romanticized formulations as well as examining more dystopian versions. This course will take an interdisciplinary approach, drawing on the visual arts and film as well as on literary texts in both Irish and English. (Irish language texts will be read in translation).

IRLL 40110. A Gendered Voice—The Poetry of Nuala Ní Dhomhnaill

(3-0-3)

This course will focus on the interstices of gender and cultural identity in the work of Nuala Ní Dhomhnaill, the foremost contemporary poet writing in Irish. Her poetry will be situated within a theoretical framework that draws, inter alia, on recent feminist scholarship. It will address theories of the feminine as well as the specificities of Irish-language literary and oral discourses and their impact on Ní Dhomhnaill's poetic practice. The course will also address the implications of translation. While texts will be read in English, there will be an opportunity for close textual comparisons with the original Irish-language poems.

IRLL 40111. The Irish Hunger Strikes

(3-0-3) Nic Dhiarmada

"We remember them with pride for on hunger strike they died these brave men were Ireland's sons they were the men of '81"—*Republican ballad* "We'll never forget you Jimmy Sands"—*Loyalist graffiti in East Belfast shortly after Bobby Sands' death on hunger strike*. Thirty years ago, in 1981, Bobby Sands and nine other Irish republican prisoners died on hunger strike in the Maze Prison outside Belfast. Their deaths and the British response were pivotal in the history of the recent "Troubles." It would hardly be an exaggeration to say that the fallout from the 1981 hunger strike had the same momentous impact on nationalists and on Irish politics as had the executions of the leaders of 1916. This course will examine the 1981 hunger strike in the context of previous political hunger strikes in Ireland and will examine both its genesis, the strike itself and its aftermath. It will pay particular attention to the ways in which the political hunger strike and the 1981 hunger strike in particular is remembered and commemorated, drawing on the work of Paul Ricoeur among others. We will engage with a variety of texts and sources including memoirs, news reports, documentaries, film and songs.

IRLL 40304. Poetry and Politics in Early Modern Ireland, 1541–1688

(3-0-3)

The political poetry of the period 1541–1688 will be discussed and analyzed against the historical background. The primary focus will be the mentality of the native intelligentsia as it is reflected in the poetry and as it responded to the momentous changes of the period. The origins and rise of the cult of the Stuarts will be examined and the historiography of the period will be assessed.

IRLL 40305. The Poetry of Nuala Ní Dhomhnaill

(3-0-3)

This course will focus on the interstices of gender and cultural identity in the work of Nuala Ní Dhomhnaill. Her poetry will be situated within a theoretical framework that draws, inter alia, on recent feminist scholarship. It will address theories of the feminine as well as the specificities of Irish-language literary and oral discourses and their impact on Ní Dhomhnaill's poetic practice. The course will also address the implications of translation. While texts will be read in English, there will be an opportunity for close textual comparisons with the original Irish-language poems.

IRLL 40306. The Irish In Their Own Words: Identities in Early Modern Ireland

(3-0-3)

The topic to be covered in this course is the formation of individual and collective identity through language, literature and history in this period. In addition to the works of the great early-modern poets (16th–18th centuries) like Tadhg Dall Ó hUiginn, Dáibhí Ó Bruadair and Aogán Ó Rathaille, we will focus on such important prose works as Foras Feasa ar Éirinn, the foundation history of the "new" Irish nation of the seventeenth century. Important secondary works here will include those of Anthony D. Smith and Adrian Hastings on pre-modern forms of nationalism as well as Stephen Greenblatt on identity formation in 16th-century England and Paul Friedrich on linguistic relativism and the poetic in language.

IRLL 40307. Gender, Politics and The Poetic Tradition in Irish

(3-0-3)

This course begins with the fundamental feminist assumption that gender matters and that gender is one of the central terms through which people both understand and critique their world. Our particular area of inquiry will be the role of gender in the Irish poetic tradition from the sixteenth century onwards, something that has only recently begun to receive attention from critics like Angela Bourke, Mairín Nic Eoin, and Briona Nic Dhiarmada. The class will focus on how gendered representations of masculinity and femininity underwrite political appeals, particularly regarding Ireland's colonial relationship to England. We'll also look at how gender is used to represent and to resist related social changes, like shifting class relations, unstable power relations between men and women, and contested notions of sexuality. We will read a variety of poetic texts, some serious and formal, some funny and popular; genres will include formal bardic poetry, the aising (or vision poem), oral lament, song poetry, and comic verse. The methodology will be historically informed close reading, meaning that we will read texts closely, rather than generalize abstractly, so that we have a sound basis for our analysis. No knowledge of Irish language is required or necessary, though original texts will be provided alongside translations. This class is discussion-based and will ask for your engaged participation at all times. Students will be responsible for presentations and will write several shorter papers and a longer term paper.

IRLL 40308. Modern Irish Poetry

(3-0-3) Ní Dhomhnaill

This course will use (often multiple) translations into English to chart the development of Irish language poetry in the 20th and early 21st century from rather meager beginnings as an instrument of the language revival movement to become a fully-fledged and highly sophisticated art form. The main poets of this period will be richly represented, and some lesser known talents will also be discussed in terms of sociological context. Though taught in English, the course will include detailed close analysis of key texts in the original Irish. This will be useful to students studying Irish, but knowledge of Irish is not mandatory for the course.

IRLL 40309. Gender and Identity in Contemporary Irish Language Texts

(3-0-3)

This course will interrogate issues of gender and identity in the work of contemporary Irish language writers. We will examine the ways in which contemporary writers in Irish, writing from a constellation of identities—sexual, cultural and linguistic—question and explore these issues as they articulate them in specific cultural forms. Drawing on recent theoretical work in gender studies and postcolonial studies the course will look at texts that question and analyze essentialist notions of cultural identity. It will explore in particular some of the tensions inherent in the articulation of a cross-cultural sexual identity and the specificity of linguistic and cultural inheritance in contemporary writing in Irish. We will read, among others, texts from writers such as Máire Mhac an tSaoi, Bidy Jenkinson, Nuala Ní Dhomhnaill, Pearse Hutchinson, Cathal Ó Searcaigh, Seán Mac Mathúna and Micheál Ó Conghaile.

IRLL 40310. Ideology, Poetry and Politics in Jacobite Ireland

(3-0-3)

Jacobitism, or allegiance to the course of the House of Stuart (from Latin *Jacobus* (James), the deposed James II), was the common voice of political dissent in 18th-century Ireland, Scotland and England. Irish Catholic advocacy of the Stuart cause had already become a political orthodoxy in the course of the 17th century and when the Stuarts were deposed by William of Orange (“King Billy”) later succeeded by the Hanoverians (1714) the culture of dispossession and displacement and the rhetoric of return and restoration became firmly entrenched in the political ideology of Catholic Ireland. This course will examine the development of Irish Jacobitism in its various literary, historical and ideological aspects in addition to placing it within its wider British and European context in the 18th century.

IRLL 40311. Irish Language Poetry: The Post War Generation

(3-0-3)

This course will look at the work of the post-war generation of Irish language poets focusing in particular on the work of Seán Ó Ríordáin, Máirtín Ó Direáin and Máire Mhac an tSaoi, the trio credited with successfully bringing Irish language poetry into the modern era. We will use close readings to trace both the formal and thematic innovations in their work and will also endeavor to situate them in relation to Modernist developments in poetry internationally as well as locating them within a specifically Irish poetic trajectory.

IRLL 40312. Identity and Gender in Modern Irish Women’s Poetry

(3-0-3)

This course interrogates issues of gender and identity in the work of contemporary Irish women poets. We examine the ways in which contemporary poets write from a constellation of identities—sexual, cultural and linguistic—and will focus in particular on the ways how question as they articulate versions of identity in specific cultural and literary forms. Drawing on recent theoretical work in gender studies, feminist theory and postcolonial studies, among others, this course examines texts that question and problematize essentialist notions of cultural and gender identity. We will also explore tensions inherent in the articulation of a cross-cultural sexual identity and the specificity of linguistic and cultural inheritance in contemporary Irish-language writing. We read, among others, poets such as Eavan Boland, Nuala Ní Dhomhnaill, Máire Mhac an tSaoi, Maedhbh McGuckian, Paula Meehan, Eiléan Ní Chuilleanáin.

IRLL 40313. The Celtic Otherworld in Early Irish Sources

(3-0-3)

In early Irish tradition, the everyday world (of men, women, kings, warriors and cattle) and the Otherworld stand in unstable and uneasy relation to one another. The Otherworld has several aspects: it can be positive and beneficial—indeed it is viewed as the legitimating source of rule in this world—but also baleful and destructive. In this course, we will study a range of Otherworld encounters, seeking to understand the vast range of contacts between the human world and the other world (or worlds) of early Irish tradition.

IRLL 40316. Folklore, Literature, and Irish National Culture

(3-0-3)

The ideological character of the 19th century concept of folklore allowed it to transcend the social category of peasants from whom it was largely recorded. This course will look at the role of folklore in the building of an Irish national culture from the time of the Gaelic Revival. Programmatic texts in Irish and in English by Douglas Hyde, first president of the Gaelic League, and by Séamus Delargy, director of the Irish Folklore Commission, will be discussed. It will also look at a later polemical text of the Gaelic writer Máirtín Ó Cadhain directed at what he perceived as the essentialism of Irish folklorists. No knowledge of the Irish language required.

IRLL 50102. Introduction to the Language and Culture of Medieval Ireland

(3-0-3)

The aim of this course is to introduce students to the language and culture of medieval Ireland. The course will have linguistic, literary and cultural components. Students will take the first steps towards acquiring a reading knowledge of Old Irish (conventionally the language of the period to ca. 900). We will consider a selection of different kinds of texts, literary, legal and devotional, prose and poetry and place them in their historical and cultural contexts.

IRLL 50110. A Gendered Voice—The Poetry of Nuala Ní Dhomhnaill

(3-0-3)

This course will focus on the interstices of gender and cultural identity in the work of Nuala Ní Dhomhnaill, the foremost contemporary poet writing in Irish. Her poetry will be situated within a theoretical framework that draws, *inter alia*, on recent feminist scholarship. It will address theories of the feminine as well as the specificities of Irish-language literary and oral discourses and their impact on Ní Dhomhnaill’s poetic practice. The course will also address the implications of translation. While texts will be read in English, there will be an opportunity for close textual comparisons with the original Irish-language poems.

IRLL 50318. The Feminine in Irish Literary and Oral-Vernacular Tradition

(3-0-3)

This course addresses issues concerning the representation of the feminine in Irish literary and oral-vernacular tradition. It treats the historical displacement and re-interpretation of the figure of the autonomous “otherworld” female in literature and oral narrative. In particular it examines a series of texts from pre-modern oral narrative tradition featuring the figures of “cailleach”/hag and “bean feasa”/wise woman with a view to understanding their significance for the native ear. The potential significance of such texts as therapeutic resources for the modern reader is also considered.

IRLL 57001. Special Studies

(3-0-3)

Special studies course with instructor.

Irish Studies Program

IRST 10101. Beginning Irish I

(4-0-4) O'Callaghan

No prior knowledge of the Irish language required. This course provides an enjoyable introduction to modern Irish. Energetic teachers in small classes teach basic language skills and prepare students to conduct conversations and read authentic texts. Extensive use is made of role-play and interactive teaching methods. Irish 10101 is a superb opportunity to learn a new language, explore Irish/Celtic culture, and investigate the linguistic politics of the only minority language offered at Notre Dame. In addition to satisfying the language requirement of the College of Arts and Letters and the College of Science, Irish satisfies the popular Irish Studies minor's requirements, and selected students will have an opportunity to study in Dublin, Ireland.

IRST 10102. Beginning Irish II

(4-0-4) MacLeod
O'Callaghan

Prerequisite: CLIR 10101 or IRST 10101 or IRL 10101

The second of three courses in Irish; see preceding for description of program.

IRST 13186. Literature University Seminar

(3-0-3)

As offered for Spring 2011—Irish Jokes from Medieval Satirists to Bart Simpson. This seminar will examine the long and very fertile comic tradition in Irish literature, considering texts originally written in Irish and in English, from medieval to modern, to think about the politics of humor, get an alternative take on the Irish literary tradition, and enjoy a good laugh. Authors will include cranky medieval monks, harshly satiric professional poets, great eighteenth-century parodists, twentieth-century witty dramatists and one of the funniest short novelistic spoofs ever written. Along the way, you will work hard on oral and written analysis of literature, defining the nature of different comic genre, and what makes them work. No knowledge of Irish is assumed or necessary, but a willingness to tolerate the texts' puns, flatulence and insult is essential.

IRST 20020. Ireland In Transition: Emigration to Immigration and Beyond

(3-0-3)

Throughout the twentieth century, Ireland was characterized by a relatively high rate of emigration. Over the century, however, the nature, type and destination of Irish emigrants changed. Whereas Irish emigrants were once drawn almost exclusively from the agricultural and laborer classes, in the closing decades of the twentieth century emigration came to permeate the entire social system. Thus, Irish migrants were to be found not just among the ranks of skilled and semi-skilled labor, but also among the trans-national professional elite that criss-crosses the globe. Current migration trends suggest a radical departure from the pattern that has characterized Irish demography for more than two centuries. Nowadays, more people are entering Ireland than leaving, bringing the country's migratory profile more into line with its European partners. Apart from a high rate of return migration, there has been an enormous increase in the numbers of immigrants coming to Ireland, particularly after several Eastern European countries entered the EU in 2004. Just over 10% of the population is now foreign born, and up to 200 different languages are spoken on the island. The study of migration and its meaning in the context of the unprecedented buoyancy of the Irish economy directs us to new concerns about multiculturalism, immigration policy and practices, Ireland's position in the global economy, and the relationship between the Irish diaspora and the homeland. This course will focus on four key themes in particular: 1) the socio-historical context of Irish emigration; 2) case studies of the lived experience of Irish emigrants in the late 20th century; 3) the phenomenon of return migration; and 4) immigration into Ireland and the multicultural challenge.

IRST 20103. Intermediate Irish

(3-0-3) MacLeod

Prerequisite: CLIR 10102 or IRST 10102 or IRL 10102

Continuation of the study of the Irish language with increased emphasis on the ability to read 20th-century literary work in the original Irish.

IRST 20105. Old Irish

(3-0-3)

The aim of this course is to enable students with no previous knowledge of Irish, medieval or modern, to take the first steps towards acquiring a reading knowledge of Old Irish. By "Old Irish" is meant conventionally the language of the seventh and eighth centuries A.D. The emphasis will be on reading texts in the original language by means of a detailed examination of the grammatical structure of the language. We will also, however, give some consideration to aspects of the literary and cultural contexts in which our texts were composed. The texts we will use have yet to be decided.

IRST 20107. The Hidden Ireland

(3-0-3) McQuillan

The *Hidden Ireland* denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from "below" and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our understanding of Irish identity, Irish history, and Irish literature. This course will examine the book in depth and utilize it to open a window on the hidden Ireland of the 18th century. The cultural, historical, and literary issues which are raised by the book will be studied in the context of the poetry of the period. Poetry will be read in translation.

IRST 20108. Verbal Arts and Oral Traditions

(3-0-3) Gillan

This course will examine the practice, practitioners and different genres of the verbal arts: the folktale, legends, epic, proverb, riddle, etc., and will look at the different functions of these genres. It will also look at the research traditions devoted to the study of what has been variously termed folk narrative, oral literature, orature, as well as the verbal arts.

IRST 20109. Celtic Heroic Literature

(3-0-3)

An exciting introduction to Celtic literature and culture, this course introduces the thrilling sagas, breathtaking legends and prose tales of Ireland and Wales. Readings include battles, heroic deeds, feats of strength and daring and dilemma faced by the warrior heroes of the Celts. This course, which requires no previous knowledge of Irish or Welsh, studies the ideology, belief system and concerns of the ancient Celtic peoples as revealed in their saga literature. By examining the hero's function in society, students investigate the ideological concerns of a society undergoing profound social transformation and religious conversion to Christianity and the hero's role as a conduit for emotional and social distress. Among the heroes to be studied in depth are: Cu Chulainn, Lug, St. Patrick and the king-heroes. Wisdom literature, archaeological and historical evidence will also be considered in this course. No prior knowledge of Irish required. All texts provided in English.

IRST 20111. The Irish Novel and Memoir

(3-0-3)

This course focuses on novels, memoirs and autobiographies that deal with Ireland, the Irish-language, folklore, history and cultural politics. Starting with the causes for the relatively late emergence of print culture in the Irish-language, we discuss the cultural, political and ideological forces that shaped these literary genres during the Irish Revival, the Free State and the post WWII period. We examine the impact of various literary movements on the Irish-language novel and use the memoirs and autobiographies to examine key-moments in Irish cultural life as framed in the controversies surrounding Michelle Smith, Cathal Ó Searcaigh, Máire Mhac an tSaoi and Hugo Hamilton. All texts will be read in English and

no prior knowledge of Irish is required, but extra credit/classes are available for students willing to read the texts in their original format (See Language Across the Curriculum). Among the authors and texts to be studied are the following: *Séadna, My Own Story, Exile, The Islandman, Twenty Years A'Growing, Peig, When I Was Young, The Poor Mouth, Schnitzer O'Shea, Cré na Cille, Lead Us Into Temptation, Lovers, A Woman's Love, Speckled People, Light on Distant Hills, Same Age as the State, Triple Gold, Remembering Ahanagran.*

IRST 20112. Ireland of the Proverbs

(3-0-3)

This course provides an introduction to the fields of paremiology (study of proverbs) and paremiography (collection of proverbs) in the Irish language. The focus of the course will be on issues such as definition and classification, style and meaning, origin and dissemination, stereotype and worldview, types of proverb collections, and the use of proverbial expression in contemporary Irish literature. The course will provide a comprehensive overview of proverbs and related fixed-phrases in the Irish language.

IRST 20113. All Roads Lead to Ireland

(3-0-3)

This course provides an introduction to the academic study and collection of Irish proverbs and proverbial phrases. We will examine the major proverbial collections contained in manuscripts, books, dictionaries, periodicals and newspapers in the period 1732–2010. Our aim is to identify and analyze the origin, structure, style and content of Irish proverbial expressions. We will also compare Irish expressions with those found in other major languages in Europe and beyond, to see what we can discover about Irish national character and worldview. The course will provide a comprehensive overview of proverbs and related fixed-phrases in the Irish language.

IRST 20114. The Hidden Islands

(3-0-3) Mckinney

The aim of this course is to introduce students to the islands and islanders of Ireland, with particular focus on those communities in the traditional Gaeltacht (Irish speaking) regions of Munster, Connacht and Ulster. The seminar will examine the concept of “identity” through an analysis of the regional literature, language, folklore, and song tradition of these island people, together with their representation in television and film. We will adopt an interdisciplinary approach to placing these communities in their historical, socio-economic, and cultural context. Students will be expected to participate actively in discussion and to complete essays focusing on the various topics covered in class. No prior knowledge of the Irish language is required.

IRST 20120. The Irish Short Story

(3-0-3)

This course introduces students to the themes, motifs, approaches and various forms common to the Irish short story as well as the critical debates associated with the genre. We begin with a survey of the literary history and cultural politics of Ireland in the nineteenth and the emergence of the Irish short story and compare it to the American and French story, before considering the relationship between folklore and literature and the origins of the modern short story form. Having discussed various theories of the short story, we proceed to examine the interactive relationship between orality and print culture, tradition and modernity, native and foreign, natural/authentic and artificial/other. Among the authors we read in detail are: George Moore, P.H. Pearse, James Joyce, Pádraic Ó Conaire, Máirtín Ó Cadhain, Frank O'Connor, Sean O'Faolain, Liam Ó Flaithearta/Liam O'Flaherty, Seamus Ó Grianna, Seosamh Mac Grianna, Angela Bourke, Samuel Beckett, Máire Mhac an tSaoi, Pádraic Breathnach, Seán Mac Mathúna, Micheál Ó Conghaile, Alan Titley, Dara Ó Conaola and Eilís Ní Dhuibhne. Stories are read primarily as literary texts that shed light on evolving cultural, political and social conditions and provide incisive insights into the Irish literary and cultural tradition. This course is an ideal introduction to literary criticism and cultural studies. No prior knowledge of Irish or Ireland is required. All texts will be available in English.

IRST 20133. Catholic Fiction and Film

(3-0-3)

An examination of Catholicism in modern fiction, cinematic adaptations of those works of fiction, and other free-standing stories and films. In this course, as you might expect from its title, we will consider representations of Catholicism in the work of a number of authors and filmmakers. Our central texts are as follows: Georges Bernanos, *The Diary of a Country Priest* (novel, French, 1937); Robert Bresson (director), *The Diary of a Country Priest* (1950); Louis Malle (director), *Au Revoir Les Enfants* (1987); Leo McCarey (director), *The Bells of St. Mary's* (1945); Pat McCabe, *The Butcher Boy* (novel, 1992); Neil Jordan (director), *The Butcher Boy* (1997); Peter Mullan (director), *The Magdalene Sisters*; Brian Moore, *Black Robe* (novel, 1985); Bruce Beresford (director), *Black Robe* (1991); James Joyce, *Dubliners* (short stories, 1914); John Huston (director), *The Dead* (1987); Betty Smith, *A Tree Grows in Brooklyn* (novel, 1943); Elia Kazan (director), *A Tree Grows in Brooklyn* (1945). Alfred Hitchcock, Martin Scorsese, Frank Capra, John Ford, Robert Altman, Francis Ford Coppola, Leo McCarey, Robert Bresson, Jean Renoir, Federico Fellini—the list of great (lapsed or otherwise) Catholic film directors is staggering. In the films and novels and stories that we will be reading—for we will be reading the films just as closely as we will read the written words—Catholicism emerges in multiple ways. Some of the issues that will be raised for our analysis and discussion will be: iconography; sacrifice; mortality; sin; original sin; violence and religion; religious corruption; the tensions between the individual and the institutions of the Church, and the clergy; the loss of innocence; grace; hypocrisy; censorship; silence. We will aim, too, to compare and contrast the different treatments of religion and humanity in these films and novels.

IRST 20201. Stage Irish: The Irish in Plays

(3-0-3)

A study of representations of the Irish drama in the 19th and 20th centuries.

IRST 20203. Advanced Readings in Irish Culture

(3-0-3) McQuillan

Prerequisite: IRL 20103 or IRST 20103 or IRL 60103

An advanced course focusing on reading and translating a variety of texts in the Irish language. We concentrate on further development of reading, interpretive, and technical skills mastered in previous language courses (IRLL 10101, IRL 10102, IRL 20103). Texts from various authors and historical periods allow students to taste different writing styles: contemporary fiction, journalism, literary criticism, historical and cultural texts. Emphasis will be on sentence structure, stylistics and syntax. Students are required to have earned a high grade in IRL 20103 in order to take this class. At the conclusion of this course, students will be able to conduct independent research with Irish texts.

IRST 20229. Twentieth-Century Irish and Native-American Literature: When We Were Noble Savages

(3-0-3)

From the outset of colonization in both Ireland and North America, literature was employed in similar fashion to romanticize, demonize and, more often than not, silence Irish and Native American cultures. Today, with the surge in post-colonial literatures, Irish and Native American literatures have found new voices that look to the past in order to explore the present. Instead of romanticizing cultural memories, these authors subvert and challenge heroic representations while dispelling stereotypes. Together these separate literary traditions intersect and diverge, challenging accepted perspectives of history and culture while blending stories with oral tradition, popular history and pop culture. With these intersections in mind, we will explore an array of literature from both Irish and Native American traditions, from novels to poetry to film. We will look at a variety of authors including Flann O'Brien, Nuala Ni Dhomhnaill, Eilís Ni Dhuibhne, Leslie Marmon Silko, Sherman Alexie, and Simon Ortiz. Requirements include a midterm exam, one short paper (3–5 pages), one longer paper (8–10 pages), and a presentation.

IRST 20230. City Streets, City Beats: Belfast, Dublin, London, and Paris from Baudelaire to Bono

(3-0-3)

As one of the most dominant themes of modernity, the city figures as a poster child of trendsetters, go-getters, floozies, and philanderers. It is the embodiment of shabby chic. Wherever there is couture there are cutthroats, and if there is a ballroom there is bound to be a bordello. Baudelaire's Paris sets the tone for the modern cities' fast-paced but staggering tempo, and 150 years later, it can still be heard in Bono's gravelly tones and nostalgic lyrics. This course focuses on four cities intimately connected through literature, art, music and film. It will study both their tense political and social relationships with one another as well as their idiosyncratic cultures and geographies (including their landmarks, streets, transportation and water systems, etc.), and will think about the resonance of these cities histories on global, contemporary culture. Readings include selections from Baudelaire and Apollinaire, works by Padraic O Conaire, Joseph Conrad, James Joyce, Liam O'Flaherty, Samuel Beckett, Virginia Woolf, Elizabeth Bowen, John Banville, and Michael McLaverty, and selected poems from Seamus Heaney, John Montague, Derek Mahon, and Ciaran Carson. Photos, paintings and song lyrics will supplement the readings, and there will also be a few movie showings. Course requirements include class participation, weekly quizzes, one 10–12 page paper, and a midterm.

IRST 20314. Bewildered Beginnings: Coming-of-Age Novels from Victorian England to Celtic Tiger Ireland

(3-0-3) Huang

This course will explore the ways in which the development of an individual from childhood to early adulthood is depicted in literature in different periods and cultural contexts ranging from Victorian England to late 20th-century, Celtic Tiger Ireland. The readings include canonical works by Charlotte Brontë, Charles Dickens, James Joyce, as well as more contemporary Irish novels. As we read, we will try to figure out how "coming of age" is understood and achieved in different times and also consider the social function of coming-of-age novels.

IRST 20316. The Irish in Us: Comparative Perspectives on Being Irish and Irish-American

(3-0-3) Griffin

This class provides an educational and entertaining reflection on the deep historical and cultural intertwining of America and Ireland, and the extent to which our world is shaped by Irish people, culture and heritage. Drawing upon the skills of three Notre Dame professors, each of which has different interests, in this class we explore comparative perspectives of the cultural, economic, and political context of being Irish and Irish-American. In this class we seek to provide new perspectives on the interconnections between Ireland and America, in the past, present and future. Based on lectures and presentations, we explore some fundamental historical questions, such as how were the Irish Famine, emigration, and economic developments of the 18th–20th centuries interconnected, and how did the Irish diaspora shape the historical and cultural trajectory of America. Similarly, we explore what it is to be Irish and Irish-American, be it through family history, or growing up watching Notre Dame football. What are the interconnections between regional Irish identities, language, and history? Finally we explore how American, let alone global, culture is being actively shaped by Irish culture (such as literature, theater, film, music), and the extent to which this is a dynamic process. Looking at it from a different perspective, how has the reintroduction of such an idealized form of Irishness to Ireland, impacted the country? Drawing upon literature, history, archaeology and folklore, this class will illustrate the different ways we can explore and conceive of the past and present world of Ireland and Irish-America. Seeking answers to these questions offers students a fascinating opportunity to learn more about Ireland, America, and the connections between these cultures and peoples.

IRST 20401. The Irish Military Tradition

(2-0-3)

Corequisite: IRST 22401

A study of the history and culture of "Fighting Irish" military tradition from medieval through modern times.

IRST 20403. The Irish American Experience

(3-0-3)

Corequisite: HIST 22610

For sophomores only. This course will examine the history of the Irish in the United States.

IRST 20435. Irish Poetry: Swift to Heaney

(3-0-3)

This class will provide a general introduction to Irish poetry from 1700 to the present. We will cover major English-language poets such as Jonathan Swift, William Butler Yeats and Seamus Heaney, as well as read selections in translation from some of the major Irish-language poets, including Brian Merriman and Nuala Ni Dhomhnaill. Students will be introduced to basic elements of meter and poetic form, as well as poetic genre. We will also focus on how the poems we read address important themes in Irish history and culture. Among these themes are the question of Irish identity, the relationship between Ireland's two languages (English and Irish), and how Irish poets have depicted Ireland's troubled history with neighboring England.

IRST 20512. Culture and Politics in Northern Ireland

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century. Using a multiplicity of genres—drama, fiction, poetry, film, painting and documentary material—we will unravel the history behind partition, the causes of the Troubles, and the nature of the conflict. Among the key moments or events upon which we will concentrate are: The Somme, the sinking of the Titanic, Bloody Sunday, the hunger strikes, Drumcree, the Anglo-Irish Agreement, and the Shankill Butchers. Certain key themes will stretch through our semester's work. Among these are: sectarianism; the relationship between violence and culture; the role of religion in the state; borders; hatred; identity; and issues of social and political justice. Some of the writers whose work we will read are: Seamus Heaney, Frank McGuinness, Sam Thompson, John Montague, Seamus Deane, Eoin MacNamee, Bernard MacLaverty, Bernadette Devlin, and Thomas Kinsella. This class is discussion-based, and will involve student presentations and engaged participation.

IRST 20515. Celtic Mythology

(3-0-3)

A review of the legends and myths of the Celtic world, along with some of their contemporary adaptations.

IRST 20518. Anglo-Irish Literature: The Cultured Misrule of Dissolute Lords and Rebel Countesses

(3-0-3)

An examination of Irish Identity through an introduction to the literature, both historical and contemporary, of Anglo Ireland.

IRST 20520. Modern British and Irish Literature

(3-0-3)

The twentieth century arrived to a world altered by industry and the metropolis, by scientific theory and psychoanalysis, by mechanical transportation and communication devices. Such a climate challenged traditional values, social mores, class distinctions, gender roles, and conceptions of nation, propriety and home. The literature from the first half of the century suggests that the increasingly alienating world forces interpersonal connection to take place under new circumstances, often outside of the traditional settings regulated by marital, social and religious convention. Through close reading, students in this course will examine how the literature presents colonialism, The Great War, the deterioration of aristocratic class values and privilege in both Britain and Ireland, the destruction of the metropolis and the home during the London air raids of World War II, and the shift in personal values vis-à-vis alcohol consumption and marital infidelity. The course will look at these modernist works in light not only of the alienating circumstances they represent, but also of the effect that alienation has on the interpersonal connections between individuals.

IRST 20522. Mapping Ireland

(3-0-3)

In this course we will read modern Irish history, film, poetry, drama, short fiction and the novel to explore the various ways Irish artists and writers have sought to give shape to national identity and the political geography of Irish life. Our primary intention will be to read and appreciate the individual works, but over the course of the semester we shall seek to compare the different visions of nation and culture those works present. Because of Ireland's exceptional history we may in fact discover that the central element of so much of its best art is precisely to imagine what it means to be Irish. In consequence, Irish works provide us a window through which to examine the relation between art and politics, imagination and the nation. Readings will range from John Ford's *The Quiet Man*, to poems by Seamus Heaney, W.B. Yeats and Eavan Boland, to fiction by Edna O'Brien, John McGahern and James Joyce. Assignments include four short essays, several in-class presentations, and a final exam.

IRST 20528. Folklore in Irish Literature

(3-0-3)

A close reading of traditional Irish myths, tales, songs, customs, rituals, and beliefs.

IRST 20530. Contemporary Irish and Native American Literature

(3-0-3)

From the outset of colonization in both Ireland and North America literature was employed in similar fashion to romanticize, demonize and, more often than not, silence Irish and Native American cultures. Today, with the surge in post-colonial literatures, Irish and Native American literatures have found new voices that look to the past in order to explore the present. Instead of romanticizing cultural memories, these authors subvert and challenge heroic representations while dispelling stereotypes. Together these separate literary traditions intersect and diverge, challenging accepted perspectives of history and culture while blending stories with oral tradition, popular history and pop culture. With these intersections in mind, we will explore an array of literature from both Irish and Native American traditions, from novels to poetry to film. We will look at a variety of authors including Flann O'Brien, Nuala Ni Dhomhnaill, Eilís Ni Dhuibhne, Leslie Marmon Silko, Sherman Alexie, and Simon Ortiz. Requirements include a midterm exam, one short paper (3–5 pages), one longer paper (8–10 pages), and a presentation.

IRST 20531. Irish America

(3-0-3) Darcy

This course is an opportunity to see the United States and its culture from a new, sidelong perspective and to sample the rich Irish literary tradition. Emigration to the United States has been a major theme for Irish literature since the 18th century, when famine forced masses of Irish people to board the "coffin ships" and cross the Atlantic in the hope of a better life, a phenomenon treated in novels and plays by writers like Brian Moore, Brian Friel, Joseph O'Connor and Frank McCourt. Today, in an era of cheap flights, Skype and immigration control, moving Stateside has a very different slant, as we shall see from the poetry of Paul Muldoon and Vona Groarke. Finally, through works like *The Butcher Boy* and *The Commitments*, we'll look also at the export of North American culture to Ireland, where that culture has variously been seen as a route to escapism, a means to rebel or a temptation to sin.

IRST 20538. Irish Prison Literature

(3-0-3)

Along with the church, the university and the army, the prison is one of the central institutions in Ireland, and literature has traditionally been the way prisoners protest, resist, and critique their harrowing experiences. In this course we will examine work written by men and women during and after their incarceration, including major literary figures (Brendan Behan and Oscar Wilde), key figures in Irish history (Jeremiah O'Donovan Rossa and Tom Clarke), and revolutionary women (Maude Gonne and Kathleen Clarke). Course requirements include response papers, presentations and a research paper.

IRST 20539. British and Irish Gothic

(3-0-3)

Although the Gothic is most often associated with the Romantic period, the Victorian period was marked by a revival in interest in Gothic themes and literary strategies. This course explores how Victorian writers refashioned the Gothic to reflect the anxieties of their own period, creating in particular distinct domestic and urban versions of the Gothic. Texts will include Emily Brontë's *Wuthering Heights*, Joseph Sheridan Le Fanu's *Carmilla*, Mary Elizabeth Braddon's *Lady Audley's Secret*, Bram Stoker's *Dracula*, Robert Louis Stevenson's *Dr. Jekyll and Mr. Hyde*, and Oscar Wilde's *The Portrait of Dorian Gray* among others. Students will become familiar with Gothic influences in the art and architecture of the period.

IRST 20541. Anglo-Irish Identities

(3-0-3) Fox

Observers of the political and cultural problems which continue to plague relations between the modern Irish State, six counties in the north of Ireland, and Great Britain cannot fail to note that the unresolved differences that have festered over the last two hundred years had their roots in the traumas of the preceding centuries of English colonialism in Ireland. Focusing on that crucial period in Irish culture, this course will explore the complex and contested cultural, political, and ideological identities of a group we have come to call the Anglo-Irish. How did they imagine themselves as a community, define themselves as a group? How did they differentiate themselves from others? We will examine these questions of identity and difference in several exemplary writers, beginning with Giraldus Cambrensis and with Edmund Spenser, author of a *View of the Present State of Ireland* (1596) composed during the initial phase of Tudor colonialism and published posthumously in 1633. We will move onto works by key figures who have dominated our understanding of eighteenth-century Ireland, including selections from Jonathan Swift, George Berkeley, Edmund Burke and Maria Edgeworth. We will conclude the course with some reading of Oscar Wilde. Students can expect a term paper, a midterm, and a final.

IRST 21601. Irish and American Tap Dance

(1-0-1)

This course will teach a range of fundamental steps.

IRST 22401. The Irish Military Tradition—Tutorial

(0-1-0)

Corequisite: IRST 20401

Co-requisite tutorial for The Irish Military Traditions.

IRST 30105. Irish Folk Custom and Belief: Popular Religion and Rural Ireland

(3-0-3) Gillan

Irish Folk Custom and Belief is both the title of a popular work from 1967 by Seán Ó Súilleabháin (1903–1996), archivist of the Irish Folklore Commission, and an approach to the study of rural Irish popular religion. That approach was long dominant among Irish folklorists. It tended to frame rural popular religion a historically and to fudge the issue of its relationship to specific social groups. At the same time it led to the recording of extraordinarily rich data, mostly from the Irish-speaking population of the West. Concentrating on the work of 19th-century antiquarians and 20th-century folklorists and anthropologists, the course will examine the study of rural popular religion in Ireland. It will contextualize it both in terms of historical, sociological and anthropological knowledge of Irish rural society and specifically of Irish peasant society, and in terms of the scientific study of religion. Specific topics often identified under the headings of "folk custom and belief" will be discussed, in particular ritual, festival, magic, supernatural beings, sacred places and the oral narratives that deal with them. Specific scholarly texts, including texts by leading contemporary scholars of Irish rural popular religion, will be discussed as well as ethnographic texts recorded by the Irish Folklore Commission.

IRST 30106. Irish Poetry in Translation: 1880–2000

(3-0-3)

This course will examine poetry written in Irish from the early days of the Gaelic Revival up to the very recent past. No previous knowledge of Irish is required.

IRST 30107. The Hidden Ireland: Themes and Issues in Eighteenth-Century Irish Poetry

(3-0-3)

The *Hidden Ireland* denotes both a book and a concept. The book was written by Daniel Corkery in 1924 and was an immediate success as it encapsulated a version of Irish history that had not hitherto been available to the general public; it is still considered to be a classic of its kind. The concept promoted the notion that history should emanate from “below” and should not be confined to the elites and governing classes. Both book and concept have had a profound impact on our understanding of Irish identity, Irish history and Irish literature. This course will examine the book in depth and utilize it to open a window on the *Hidden Ireland* of the 18th century. The cultural, historical, and literary issues raised by the book will be studied in the context of the poetry of the period. Poetry will be read in translation.

IRST 30108. Twentieth-Century Literature in Irish (in Translation)

(3-0-3)

This course will introduce you to the vibrant contemporary literature in Irish (Gaelic) from the Gaelic Revival, which sought to rescue the language from extinction, right up to the present. This course will focus on developing your ability to read, analyze and write about literature with care and precision. You will do a *lot* of writing, both graded and ungraded, to become a stronger reader and writer. In the process, we'll consider the particular excitement and difficulty of writing in (and about!) a minority language that also happens to be the first official language of Ireland, as well as debates about identity, belonging, symbolization, history, anglicization, assimilation and hybridity, the new prominence of women writers, and ongoing challenges to stereotypes about Irish as tradition-bound (rather than, say, tradition-enabled), puritanical or premodern.

IRST 30109. Migration and Identity in the New Ireland

(3-0-3) O'Brien

In less than two decades, the Republic of Ireland has shifted from a relatively poor country with a high level of national, racial, and ethnic homogeneity to a country experiencing an exponential expansion of cultural diversity. One of the expressions used to describe this shift is “New Ireland,” and this course will discuss the cultural dimensions of this term. We will examine selections from contemporary Irish literature and film which contribute to this analysis and contextualize our discussions with legal, political, and economic approaches to Irish social issues. Course work will include several short papers, a digital research project, and an exam.

IRST 30110. The Hidden Ulster

(3-0-3)

This course introduces students to the literature, language, culture and history of Ulster in Ireland and confronts the stereotypes of binary opposition that commonly mark the region. Through close textual readings of literary texts from the seventeenth century onwards, we discuss and interrogate the literary, religious, cultural and linguistic forces that shaped identity in Ulster from the colonial period onwards and explore the shared heritage of both communities—Irish/English, Catholic/Protestant, Native/Planter. This course will suit English majors and those interested in the study of identity formation and competing cultural ideologies. No prior knowledge of Irish is required for this course. All texts will be in translation.

IRST 30111. Archaeology of Ireland

(3-0-3) Kuijt

Prerequisite: ANTH 30102

This course examines the cultural and historical trajectory of the archaeology of Ireland through a series of richly illustrated lectures, organized chronologically, that trace cultural, social, and technological developments from the Neolithic

through the Viking period. Integrated with this lecture series, and running concurrently on alternate days, will be a series of seminar and discussion classes focused upon a number of anthropological and archaeological issues related to each of these periods of time. This includes the emergence of the unique systems of communities, and the development of systems of metallurgy in the Iron Age. Other classes will touch upon the topics of regionalism and identity and contact at different periods of time, mortuary practices and ritual, and discussion of village life in ring forts during the Bronze Age.

IRST 30112. Poetry in Irish Since the Revival

(3-0-3)

This course will examine the compelling poetry produced in Irish since the Gaelic Revival of the turn of the twentieth century running right up to very recent publications of the first decade of the twenty-first century. We will consider major authors whose influence on the tradition has been profound, more recent international stars, as well as emergent figures whose work is only very recently in print. Our method will be that *sine qua non* of literary study, close reading, the dogged and unsparing analysis of the inner workings of the text at hand, an enduring and essential skill for both scholars of liberal arts and the educated, thinking individual more generally. To this will we join attention to the sociocultural, linguistic and political context of the works, relating to the aftermath of Irish independence, economic hardship and emigration, the crisis of the Catholic church, transformations in gender and familial expectations, the Troubles in the North, and the new composition of Irish society with immigration and globalization. Poetry as well as selected criticism will be read in English.

IRST 30120. The Celtic Otherworld in Early Irish Sources

(3-0-3)

In early Irish tradition, the everyday world (of men, women, kings, warriors and cattle) and the Otherworld stand in unstable and uneasy relation to one another. The Otherworld has several aspects: it can be positive and beneficial—indeed it is viewed as the legitimating source of rule in this world—but also baleful and destructive. In this course, we will study a range of Otherworld encounters, seeking to understand the vast range of contacts between the human world and the other world (or worlds) of early Irish tradition.

IRST 30124. Swift to Heaney: Irish Poetry Since 1700

(3-0-3) Hamrick

This course introduces students to Irish poetry from the early eighteenth century to the present. We will cover major Anglo-Irish and English-language poets such as Jonathan Swift, William Butler Yeats and Seamus Heaney, as well as major Irish-language poets including Aogán Ó Rathaille, Brian Merriman, Seán Ó Ríordáin and Nuala Ní Dhomhnaill. The poets and their poetry will be discussed in terms of language and national identity, as well as their place in Irish history. With Swift, for example, we will discuss what it means to be Anglo-Irish, to be Protestant and to write in English in a time when the vast majority of the Irish people are Catholic and speak Irish. Students will be introduced to terms such as hybridity and colonialism and will consider the bases on which we can make claims for a poem's “Irishness.” Similarly, with Irish-language poets like Ó Rathaille we will discuss both the choice and the necessity to write in Irish, the implications of language in terms of national identity and how we come to grips with the complexities of Ireland's fundamentally bilingual literary history. Although we will be reading the poetry from Irish historical perspectives, our critical approach will take inspiration from a distinctly English poet. W.H. Auden once wrote that a critic should approach a poem by saying, “Here is a verbal contraption. How does it work?” We will indeed consider the technical question of how a poem “works,” but we will at the same time consider, for example, the linguistic importance of Merriman's use of the couplet, the political implications of Thomas Moore's feminine rhymes, or how Swift uses meter and line length in imitating Hiberno-English speech.

IRST 30125. The Irish Short Story

(3-0-3)

This course studies the Irish short story as a literary genre that reflects the changing political and cultural forces at play in Ireland. We begin the course by surveying various critical theories that can be applied to the genre before reading and discussing a wide selection of short stories. The course considers Irish writing in the broader sense literature written in either Irish or English. Among the authors included are: Patrick Pearse, Pádraic Ó Conaire, Séamus Mac Grianna, James Joyce, Liam O'Flaherty, Elizabeth Bowen, Frank O'Connor, Sean O'Faolain, Éilís Ní Dhuibhne, Angeal Bourke, Seán Mac Mathúna, Micheál Ó Conghaile, Eithne Strong, Pádraic Breathnach, Alan Titley, Mary Lavin, William Trevor, Gerry Adams and Bernard MacLaverty.

IRST 30202. Crime and Progress in the Nineteenth-Century British Novel

(3-0-3)

Violence and social change, sexuality, economics, and politics in novels written in Ireland and Britain during the last half of the 19th century.

IRST 30203. Victorian Empire Writing 1868–1901

(3-0-3)

An exploration of the empire as theme in selected Irish writers of the late 19th century.

IRST 30204. Northern Irish Writing and Politics

(3-0-3)

A study of Irish writers in the North since the Troubles began in the 1960s.

IRST 30205. Modern British and Irish Drama

(3-0-3)

Dramatic representations of the Irish “character” and the Irish nation from the end of the 19th century through the 20th. Includes Yeats, Lady Gregory, O'Casey, Shaw, and Synge.

IRST 30206. Writing in Northern Ireland

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

IRST 30207. Anglo-Irish Literature

(3-0-3)

An examination of Irish identity through an introduction to the literature, both historical and contemporary, of Anglo Ireland.

IRST 30208. Writing and Politics in Northern Ireland

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

IRST 30209. Irish Fiction, 1945–2001

(3-0-3)

A study of major Irish writers since World War II.

IRST 30210. Transculturation in Irish Literature

(3-0-3)

This course considers the vexed topic of cultural change in the context of colonialism by examining key texts originally written in Irish (or a mixture of Irish and English) from a range of time periods, including works of comedy, satire, lament and protest. We will consider the critical literature on transculturation and examine primary texts and consider how they change over time and what they seem to suggest about how people negotiate competing sociocultural and economic imperatives. Knowledge of Irish is helpful but not necessary; translations will be provided along with original texts. Requirements: enthusiastic participation, several short and one long term paper.

IRST 30211. Irish Gothic/Union to Troubles

(3-0-3)

An exploration of the ways in which Irish literature, both historical and contemporary, uses ghosts, vampires, demons, and rebels to grapple with threats facing Irish society.

IRST 30213. Imprisonment in Irish Literature

(3-0-3)

The theme of imprisonment in 19th-century Irish writing.

IRST 30214. Twentieth-Century Irish Literature

(3-0-3)

The cultural and political factors that have shaped Ireland's extraordinary literary achievement, paying particular attention to Irish Decolonization and the Northern Troubles. Readings from Shaw, Yeats, Joyce, Bowen, Friel, Heaney, and Deane.

IRST 30215. Exile in the Irish Literary Tradition

(3-0-3)

This course will explore the centrality of emigration and immigration in the literary production of Irish fiction and drama by both writers in Ireland and abroad. The course will range from the nationalist movements of the early 20th century and their demand for a stop to emigration from Ireland to the early 21st century, which has seen a tremendous influx of immigrants, refugees and asylum seekers into Ireland. Special attention will be paid to the homeless Irish woman and the immigrant Irish woman, domestic violence, the concept of emigration as libratory or as exile, the problems of the returnee, and fantasies of gender and ethnic essentialism and of a threatened “authentic” home and nation. The course will be reading-intensive, and will emphasize close reading skills, cultural analysis and historical contexts for each text. Students will write weekly short papers (3 pages) that perform literary analysis and incorporate historical readings and/or literary theory from library reserves. Course texts will include W.B. Yeats's and Lady Gregory's *Cathleen ni Houlihan*, Joyce's *Dubliners*, Brian Friel's *Philadelphia, Here I Come*, Maeve Brennan's *The Rose Garden*, Betty Smith's *A Tree Grows in Brooklyn*, Eugene O'Neill, *Long Day's Journey Into Night*, Edna O'Brien, *Down by the River*, Marina Carr's *By the Bog of Cats* and Roddy Doyle's *The Woman Who Walked into Doors*.

IRST 30216. Victorian Irish Literature

(3-0-3)

The nineteenth century was a dynamic period for Ireland and writers from many different backgrounds offer a range of perspectives on these changes. The central works of the class reflect diverse ideas on Irish and British history and literature and will provide a frame for debate and discussion of violence and social change, sexuality, economics, and politics during the Victorian period. Readings will include works from a variety of genres including: Somerville & Ross, Oscar Wilde, Robert Louis Stevenson, W.B. Yeats, Sir Arthur Conan Doyle, Matthew Arnold, and James Clarence Mangan. Course work will include several brief essays and a research paper.

IRST 30219. Reading the ‘Unwritten Story’: Mother-Daughter Relationships in 20th-century Irish Fiction

(3-0-3)

While the role of father-son relationships (and their attendant conflict) in contemporary Irish literature has been well established, the Irish mother-daughter relationship is, as Anne Fogarty notes, “an unwritten story in Ireland” not because it really is unwritten, but because it has not been well-charted in literary studies. The dilemmas that the family poses and that daughters face are fruitful topics for exploration; Declan Kiberd notes that “for some women writers the family was a trap, for others it remained a zone of resistance”. This course will engage in a chronological reading of twentieth-century Irish women writers, tracing the developing mode(s) of representation employed to depict Irish maternity and analyzing their place in the Irish literary canon; it will also explore the relationships between these images and other pertinent themes, such as political and social issues, expressions of sexuality, the role of religion in Ireland, and images of nationhood. Authors to be read include Elizabeth Bowen, Maeve Brennan,

Jennifer Johnston, Molly Keane, Mary Lavin, Dorothy Macardle, Edna O'Brien and Kate O'Brien. Course requirements include one-page response papers, 2 short papers and midterm/final exams.

IRST 30220. Reading the Irish Revival

(3-0-3)

This course will examine the Irish Revival (1891–1939) as a dynamic moment in modern Irish literature in which key literary figures like W.B. Yeats, Lady Gregory, John Millington Synge and James Joyce worked to make Ireland a center of cultural innovation once again. This significance of this period to Ireland's decolonization and to related debates over the appropriate forms and language for an Irish national literature will provide a central focus. Texts to be considered will include: the drama of J.M. Synge and Lady Gregory, the poetry of W.B. Yeats and Joyce's *Dubliners*.

IRST 30222. Culture and Politics in Northern Ireland

(3-0-3)

This course discusses the literature of Northern Ireland and how it reveals the culture and politics of Northern Ireland.

IRST 30223. Introduction to Irish Folklore

(3-0-3)

This course will discuss the 19th-century concept of folklore and its application in Ireland. Irish folklore is usually understood in terms of three main and related domains: "folk narrative" (or oral literature), "folk belief" (or popular religion) and "material folk culture." These will be examined with special emphasis placed on narrative. Representative oral narrative texts from the Gaelic tradition will be studied in translation.

IRST 30226. Writing Nations: Defining Englishness and Irishness in Victorian Era Literature

(3-0-3)

This course seeks to counter the view of English and Irish literature as unrelated during the Victorian period by exploring how both Irish and English writers of the period engage in the process of defining their respective countries and cultures. Certainly, in the Victorian Era defining Ireland's relationship to England was anything but simple. What becomes apparent by exploring Irish and English attempts to write about their respective "nations" is not only the divergence in ways Irish and English writers characterized the relationship between the two countries but also how the process of defining Irish and English realities ultimately took different forms. Therefore, this course will not only explore how individual writers go about writing "nations" but how the forms these writings take also reveal certain intersections and divergences between what characterizes Irishness and Englishness.

IRST 30274. Violence in Late Medieval and Renaissance Europe

(3-0-3)

During the late-medieval and early-modern period Western Europe was a particularly violent place, but Europeans did not conceive of themselves as living in a state of unmitigated and continuous chaos. This course will examine the ways in which violence manifested itself during the period, with particular attention to the theoretical justifications that underpinned it, the rituals that surrounded it and the calculation with which it was used. The centrality of violence in upholding personal honor as well as the persistent notions that its employment lay at the heart of government and the legal system will also be scrutinized. The benediction that the cult of the knight as Christian professional gave to much violence, and the opportunities for financial advancement that mercy could offer those capable of devastating action will be of special interest. Using contemporary accounts the course will bring the student from the streets of sixteenth-century Rome to the fields of war-torn France, from the western seaboard of Ireland to the contested waters of the Mediterranean in a world where life was often cheap and mercy was generally expensive.

IRST 30301. Women in Irish Oral Tradition

(3-0-3)

This course will explore oral verbal art in Irish and English, through transcribed texts, sound recordings and film, paying particular attention to depiction of and performances by women, and offering gendered readings of the material studied.

IRST 30306. Saints and Kings in Medieval Ireland

(3-0-3)

This course focuses on a series of encounters (in early Irish and Hiberno-Latin) between saints and kings or other royal characters. Through these stories and characters, tensions between the domains of spiritual and secular, the local and the national, the native and the external, are raised, explored and (sometimes, though by no means always) resolved. Saints such as Patrick, Colmcille, Brigit, Ciarán, and Cainnech, together with kings such as Lóegaire Mac Néill, Diarmuid Mac Cerbaill, and Muirchertach Mac Erca will be studied.

IRST 30307. The Irish Tradition I

(3-0-3)

Ireland possesses the oldest vernacular literary tradition in Europe, spanning over 1500 years to the present day. This course will provide a survey of the origins and development of that literary tradition through more than a millennium from its beginnings until the seventeenth century, when political circumstances led to the collapse of the highly-developed native system of learning, poetry and patronage. The development of the Irish literary tradition will be traced against this background of political and cultural upheavals from approximately 500 to 1650.

IRST 30308. Great Irish Writers

(3-0-3) McKibben

The objective of this course is to offer an introduction to a representative cross-section of literature in Irish from approximately 800 down to the present day. We will examine the great Irish medieval epic, the *Táin Bó Cúailnge* (*The Cattle Raid of Cooley*) which recollects a pre-medieval heroic society but which uses the lineaments of that society to tackle social and political issues current in the Middle Ages in Ireland. Then we will look at the poetic tradition in Irish between approximately 1600 and 1900, an era when England, later Britain, consolidates its conquest and colonization of the country. Much of the poetry is to be read against the background of disruption and dislocation caused by the political turmoil of these centuries. Finally, we will consider some more contemporary writing in Irish from 1900 to the present: the novel, the short story as well as poetry. All materials will be read in English translation.

IRST 30309. Great Irish Writers

(3-0-3) McKibben

This course will move from Celtic warriors to the (late lamented) Celtic tiger, from warrior queens and epic heroes to global jetsetters, looking at masterworks originally written in Ireland's first language. We'll look at the great Irish epic the *Táin Bó Cúailnge* (*The Cattle Raid of Cooley*), which tells a rollicking good story (body-morphing battle frenzy! treachery! boasting! tricolored hair!) while tackling confounding social and political concerns (such as chaos, or, what you do with a bunch of overheated, underemployed young men). Battle-warmed, we'll next look at the poetic tradition in Irish between approximately 1540 and 1900, an era when England, later Britain, consolidates its conquest and colonization of the country. In this context, writers craftily defend Irish culture, manhood and authority while recalibrating Irish identity, sometimes in deadly earnest, sometimes by making fun of what they cannot necessarily change. Finally, we will turn to more recent writing in Irish from 1900 to the present, including autobiography, the funniest short comic novel ever written, a short story or two, and some terrific modern poetry with plenty of love, desire, and weird supernatural encounters. All materials will be read in English translation.

IRST 30310. The Irish Comic Tradition

(3-0-3)

Fantasy. Humor. Ribaldry. The Macabre. The Grotesque. Wit. Word play. Satire. Parody. This course will read diverse examples of the long and fertile comic tradition in Irish literature (in Irish and in English), from medieval to modern, in order

to enjoy a good laugh, get an alternative take on the Irish literary tradition, and think about the politics of humor. Authors will include unknown acerbic medieval scribes, satiric bardic poets, Swift, Merriman, Sheridan, Wilde, and Flann O'Brien. No knowledge of Irish is assumed or necessary.

IRST 30311. The West of Ireland—An Imagined Space

(3-0-3)

This course interrogates and examines representations of the West of Ireland in various twentieth-century literary texts focusing, in particular on the role of “the West of Ireland” in state formation and legitimization during the early decades of independent Ireland and its role in the construction of an Irish identity. We will look at how images of the West of Ireland were constructed in various utopian or romanticized formulations as well as examining more dystopian versions. This course will take an interdisciplinary approach, drawing on the visual arts and film as well as on literary texts written in both Irish and English. (Irish language texts will be read in translation).

IRST 30312. The Blasket Islands and their Literature

(3-0-3) Nic Dhiarmada

“The island of the Great Blasket lies three miles off the Kerry coast of Ireland, at the westernmost tip of Europe. Virtually unknown before this century, it was to produce a rich and extraordinary flowering of literature that has made it famous throughout the world.” Oxford University Press. This course will examine the phenomenon that is Blasket Island literature. Before its eventual desertion in 1953, the previous thirty years had seen the production of literary works by inhabitants of the Blaskets such as *An tOileánach/ The Islandman* by Tomás Ó Criomhthainn; *Fiche Bliain ag Fás/ Twenty Years A'Growing* by Muiris Ó Súilleabháin; *Machmabh Seanmhnaíl/ An Old Woman's Reflections* by Peig Sayers. This course will trace this remarkable flowering both to the immensely rich oral traditions of the island and the dynamic interplay of such literary and scholarly visitors as George Thompson and Robin Flower with the island authors. All texts will be read in translation.

IRST 30319. Ireland in the Dark Ages

(3-0-3)

Ancient and early medieval Ireland was a place of tumultuous change, full of charismatic kings, warrior women, and aggressive saints. But does it deserve to be called the Dark Ages? We will endeavor to answer that question by examining Ireland from prehistoric times through the Norman Conquest and colonization of Ireland in the twelfth century, focusing on daily life, marriage and family, religious beliefs and practices (both pagan and Christian), kingship and social life, monasteries and settlements, and other topics. Sources include epics, sagas, and myths such as the *Táin Bó Cuailnge*, various annals recording historical events, law codes, letters, saints' lives, penitentials, and commentary from outside observers.

IRST 30320. Screening the Irish Troubles

(3-0-3) Nic Dhiarmada

This course will look at how political conflict in Ireland from the 1916 Rebellion and the War of Independence up to and including what became known as “The Troubles” in the North of Ireland has been represented on the screen. Students will analyze a wide variety of cinematic texts, mainstream commercial Hollywood features as well as independent Irish and British films. Documentary film will also be analyzed. Certain seminal events such as Bloody Sunday and the 1981 Hunger Strikes, which have a diverse representational history on screen will be given particular attention. Among the films discussed will be *Mise Eire*, *Saoirse*, *Michael Collins*, *The Wind that Shakes the Barley*, *Some Mother's Son*, *In the Name of the Father*, and *Bloody Sunday*.

IRST 30321. Medieval Ireland

(3-0-3)

Consideration of the period between 950 and 1400 is of crucial importance in understanding Irish history. This course not only covers the range of continuities and radical discontinuities that marked Ireland's development during this time, but charts the attempted conquest of the entire country by the English Crown. The lecture series also seeks to answer a number of questions. Why did the Papacy give the English Crown sovereignty over Ireland? Why did a country like Ireland,

on the verge of attaining political and economic centralization, not organize better resistance to English attempts to subdue it? Why did the English colony fail to prove more successful in exerting its will over indigenous Irish potentates? Culturally the period also witnessed the growing assimilation of English invaders to the norms of Gaelic Irish politics and society. Lastly, events in Ireland had a serious influence on developments in England, Wales and Scotland, provoking, amongst other things, the fall of the Plantagenet dynasty and an attempted invasion by King Robert I of Scotland.

IRST 30322. The Viking Age

(3-0-3) Handy

From their violent emergence onto the European scene at the close of the eighth century up to the present day, images of bloody raids, pillaging, and horned helmets have dominated our shared vision of the Vikings. But how accurate is that picture? Some Scandinavians were indeed remarkable, if violent, seafarers whose reach extended from Ireland to Russia, Byzantium, and even the shores of North America. Others were farmers, skilled craftsmen, and savvy politicians and merchants who helped to shape the medieval world with their innovative technology and artistry. In this class we will examine the historical, archaeological, and literary record to generate a more complete picture of these medieval Scandinavians between roughly 750–1100. We will start in their homeland by learning about their society, family life, art, literature, technology, mythology, and conversion to Christianity. We will then follow the Vikings as they explore, trade, and raid their way across wide swaths of the known world, giving special attention to their impact on Ireland and Britain. Throughout the course we will pay close attention to how the Vikings have been understood and represented by their contemporaries and by modern observers and see how closely that matches the historical record.

IRST 30325. Early Medieval Ireland

(3-0-3)

Consideration of the period between 950 and 1400 is of crucial importance in understanding Irish history. This course not only covers the range of continuities and radical discontinuities that marked Ireland's development during this time, but charts the attempted conquest of the entire country by the English Crown. The lecture series also seeks to answer a number of questions. Why did the Papacy give the English Crown sovereignty over Ireland? Why did a country like Ireland, on the verge of attaining political and economic centralization, not organize better resistance to English attempts to subdue it? Why did the English colony fail to prove more successful in exerting its will over indigenous Irish potentates? Culturally the period also witnessed the growing assimilation of English invaders to the norms of Gaelic Irish politics and society. Lastly, events in Ireland had a serious influence on developments in England, Wales and Scotland, provoking, amongst other things, the fall of the Plantagenet dynasty and an attempted invasion by King Robert I of Scotland.

IRST 30360. Irish Modernism

(3-0-3) Dinsman

Irish literature, in particular Modern Irish literature, reflects the tumult of its time. Ireland was not only dealing with the standard issues of the day (massive losses from World War I, increased mechanization, and social change), but found itself in a battle for its independence from England. This independence came in 1922 in the midst of the Modern era and left a land divided. This class will analyze texts written both while Ireland was a colony, and after independence. We will examine works that on the surface seem to ignore the author's Irishness, as found in Bram Stoker's *Dracula* and G.B. Shaw's *Pygmalion*, as well as texts written specifically for the nationalist cause, as seen in the work of W.B. Yeats and J.M. Synge. We will examine Irish Modernism from those writers who wrote in English and in Irish and in a mixture of the two, the result being that we will gain a breadth of knowledge about the various strands of Irish writing during the late nineteenth and early twentieth centuries. Along the way we will discuss themes that are common to the study of Irish Modernism, and question what makes Irish Modernism unique. We will ask ourselves questions such as: What are the common themes arising in Irish Modernism? Does the location of exile, or the choice to go into exile or not, change the writer's depiction of, or relationship with, Ireland? How

does Irish Modernism evolve from the late-1800s to the mid-1900s? By the end of this course you will have gained a broad understanding of Irish Modernism and Irish history and will be able to approach and interact with a variety of genres including: the novel, drama and poetry.

IRST 30362. The Irish Language Lyric Song Tradition

(3-0-3)

The music, the meters, the magic of the Irish language lyric song tradition will be explored in this course spanning the known history of the most enduring songs; their transmission and migration in oral, written and sound-recorded form; the sources from which draw inspiration and their influence in translation on writers and performers as diverse as W.B. Yeats and Sinéad O'Connor. Using recordings, live performance and close textual analysis the course will aim to chart the journeys of these songs through the centuries and offer insights into their lasting appeal.

IRST 30371. Introduction to Irish Writers

(3-0-3)

Corequisite: ENGL 22514

As the visit to campus of the most recent Irish winner of the Nobel Prize in Literature suggests, this small island has produced a disproportionate number of great writers. Designed as a general literature course, the class will introduce the student to a broad range of Irish writers in English from the eighteenth century to the present. Writers will include Jonathan Swift, Maria Edgeworth, Oscar Wilde, James Joyce, William Butler Yeats, Brian Friel, and John McGahern. We will also look at recent film versions of several of these writers' works, including Wilde's *Importance of Being Earnest*. Themes to be explored include representations of "national character" and the relationships between religion and national identity, gender and nationalism, Ireland and England, and "Irishness" and "Englishness." Students can expect a midterm, a paper (5–6 pages typed) and a final.

IRST 30372. Introduction to Irish Writers

(3-0-3)

Corequisite: IRL 32109

This course introduces undergraduate students to Irish literature, explores its dominant themes and motifs and surveys canonical texts and major authors from the 18th century to the present day. A broad range of texts and genres—poetry, novels, short stories, folklore and drama—are studied from a historical and cultural perspective and in relation to transnational literary trends and movements. Attention is also paid to modernization and tradition as well as post-colonialism, feminism and censorship. No prior knowledge of Ireland or the Irish language is required. Irish-language texts will be available in translation.

IRST 30375. Introduction to Irish Studies

(3-0-3)

Corequisite: IREST 32375

This course will provide an outline of the field of Irish studies. We will look at Ireland's internal and external relations through an interdisciplinary lens that connects literary, sociological, political, historical, and economic perspectives. We explore several key elements of the study of Ireland using critical scholarship, archival information, and a range of creative works including films (from *The Quiet Man* to *Once*), literature (from Bram Stoker and Oscar Wilde to Nuala Ni Dhomhnaill and Seamus Heaney), and music (from 18th-century harpist Turlough Carolan to U2 and Dropkick Murphys). This course is open to students at every level and there are no prerequisites for this class other than an interest in Ireland and the Irish. While this is an introductory class, the interdisciplinary focus will also benefit students who have studied Ireland in other courses. Requirements will include brief response papers, a midterm and final exam.

IRST 30404. Irish History I

(3-0-3)

Irish political history from the beginning of the Tudor Reconquest to the enactment of the legislative union in 1801. Attention is given to colonization, religious conflict, the Ulster Plantation, political and constitutional reactions to British government policies, and the rise of Protestant patriotism.

IRST 30405. Irish History II

(3-0-3)

Irish political history and Anglo-Irish relations from 1801 up to and including the current conflict in contemporary Northern Ireland. Attention will be given to religious conflict, the development of romantic and revolutionary nationalism, the changing nature of Anglo-Irish relations, the Irish-American dimension, and the special problems of the North.

IRST 30406. Northern Ireland since 1920

(3-0-3)

This course examines society and politics in Northern Ireland from the partition of Ireland to the current, increasingly unstable peace process.

IRST 30407. The Fighting Irish Since 1534

(3-0-3)

This course will focus on the cult of the "Fighting Irish" in history, literature, art, iconography, film, and media. Lectures and readings will deal primarily with the period between the Reformation (1534) and the Irish Civil War (1922–23).

IRST 30408. Ireland: From Famine to Independence

(3-0-3)

This course explores Irish politics and society from the Great Famine (1845–1849) to the establishment of the independent Irish Free State amidst civil war (1922–23). It examines the causes of the Famine and its legacies of mass emigration, nationalism, and rapid linguistic, devotional, and demographic change; the political and social origins of the "Land War"; the politics of Parnell and Home Rule; "New Nationalism" and Ulster Unionism; and the WW I-era "revolution" that undermined British authority in Ireland and led to the establishment of two new states. Particular attention is given to the Irish Revolution (1913–23): its longer-term origins; how and why the British Government lost legitimacy in Ireland; the nature of revolutionary violence; who joined the IRA and other nationalist organizations; what changed and what remained the same with the achievement of independence.

IRST 30409. Late Medieval and Early Modern Ireland

(3-0-3)

This course is intended as a broad survey of Irish political, cultural and social history in the medieval and early modern periods. Starting with an examination of Gaelic-Irish world prior to the twelfth-century Anglo-Norman invasion, we will emphasize a vibrant and viable society, and its interaction with its neighbors throughout the British Isles. The Anglo-Norman invasion and the Gaelic response will be the next major theme. Norman perceptions of the Irish as "Other" will be studied through the work of Giraldus Cambrensis. The development of a feudal society in the Norman controlled portions and its interaction with Gaelic Ireland and the subsequent development of two interacting societies, Gaelic, and the other, English, yet significantly Gaelicized will receive special attention. The sixteenth century Tudor conquest will be the next major topic with a focus on the development of colonizing schemes. Elizabethan representations of the Irish will follow, with an emphasis on the work of the poet and settler Edmund Spenser. Seventeenth-century developments including plantations, the rebellion of 1641 and the interaction of languages will be tracked to 1690.

IRST 30411. Tudor England: Politics and Honor

(3-0-3)

England underwent profound changes between the death of King Henry VIII and the death of Elizabeth I, including its establishment as an international economic force and an empire in the making. Social consequences included assertiveness mixed with anxiety, desires for change tinged by fears of disorder, and a new sense of freedom haunted by fears of isolation. Such anxieties found public expression through two contradictory issues: 1) England's role of principal defender of the Protestant Reformation in a Europe increasingly under the influence of an ascendant Counter-Reformation, and in a world now dominated by Hapsburg Spain; and 2) the accident of England's rule by a female monarch, Elizabeth, who dominated domestic and foreign politics, asserting her right as a true king and Supreme Governor of the English church while refusing either to produce an heir

through marriage or to name a successor. In this turmoil, great literary and artistic flowering took place. This course aims to set the work of the great figures of the “Elizabethan Renaissance”—Shakespeare, Spenser, and Sidney—in their larger cultural and intellectual context, such as political commentaries, social polemics, historical works, crime writing, religious exhortations, ballads, engravings, and maps, which made up the Elizabethans’ attempts to comprehend and control their perilously changing world.

IRST 30412. British History: 1660–1800

(3-0-3)

This course of lectures and readings concentrates on British (that is, Scottish as well as English) history from the restoration of monarchy in 1660 to the great crisis detonated by the French Revolution and war in the 1790s. Themes include the politics of Protestant dissent, political ideologies, the role of parliament, Jacobitism, and the rise of the radical parliamentary reform movement.

IRST 30413. British History, 1660–1800

(3-0-3) Smyth

This course of lectures and readings concentrates on British (that is, Scottish as well as English) history from the restoration of monarchy in 1660 to the great crisis detonated by the French Revolution and war in the 1790s. Themes include the politics of Protestant dissent, political ideologies, the role of parliament, Jacobitism, and the rise of the radical parliamentary reform movement.

IRST 30415. Modern Irish History 1: 1600–1800

(3-0-3) Smyth

This course explores the main themes in Irish histories from the plantation of Ulster, after 1603, to the rebellion of 1798 and the Act of Union with Great Britain in 1800. Attention focuses on plantation, colonization, and religious conflict; the Cromwellian reconquest and the Williamite wars in the 17th century, and the anti-Catholic penal laws and rise of Protestant Ascendancy in the 19th century. This dramatic and formative period witnessed the emergence of many of the forces and rivalries that shaped modern Irish politics and society and continues to generate lively disagreement among historians today.

IRST 30416. Tudor England: Politics and Honor

(3-0-3)

A thematic survey of Great Britain during the long 19th century, from the impact of the French revolution in 1789 to the first World War I in 1914. The period saw the emergence of many of the most characteristic and most controversial features of the modern world, such as industrialism, capitalism, the welfare state, the expansion of civil and political rights, and the colonial development of the non-western world. The course uses the three themes of introspection, innovation, and inquiry to understand these changes. Nineteenth-century Britain is known for its earnestness, the intensity with which its elites scrutinized their souls on everything from the foundations of faith to social responsibility to their own sexuality. It is known also for an enormous amount of social-technical innovation, planned and unplanned, of steam engines, sewers, and slums, of new ways of organizing work and handling money, of new aspirations, of new classes and class relations, and of new modes of social organization and social control. Finally it is known as a time of passionate spirit of inquiry, a time of a massive increase in literacy and of hunger for knowledge, a time of immense confidence when it was felt that new knowledge from economics, sociology, biology, geography, and would provide true, rational, and fair answers to all political problems and conflicts.

IRST 30420. The Logics and Politics of International Migration

(3-0-3)

This course investigates the primary economic, humanitarian, and political forces that are driving and sustaining the complex phenomenon of contemporary transnational migration. Within this context, three core questions are addressed. First, have the forces of globalization and the entanglements of international commitments and treaty obligations significantly diminished the policy making autonomy of the traditional nation state? Second, what are the significant benefits and costs of transnational migration for the immigration receiving countries? Finally, is a liberal immigration regime desirable and, if so, can it be politically sustained?

IRST 30423. Irish Politics—1916–2009: From Colonialism to the Celtic Tiger and Beyond

(3-0-3) McGraw

Ireland, a country rich in history, has undergone dramatic changes in the twentieth century beginning with its fight for independence and culminating in its meteoric rise during the Celtic Tiger years. What explains Ireland’s distinctive political trajectory and how does it compare to other European nations? How should we understand the Celtic Tiger, the rapid series of social, economic and political transformations that have occurred within Ireland since the 1990s? This course explores these questions by studying the political actors and institutional settings of Irish politics, the nature of political influence and the shaping of political priorities, and the forces that shape policy outcomes. It will address such critical issues as the legacies of colonialism and civil war, nationalism, democratization, the relationship between the Church and State, the Northern Ireland Troubles and the European Union. While the course focuses on the Republic of Ireland, it will adopt a broad comparative perspective, situating the country both within the wider global context and within the political science literature.

IRST 30432. Irish History 2: Irish History since 1800

(3-0-3)

This course examines political history and Anglo-Irish relations from the Act of Union (1801) up to and including the Northern Ireland “Troubles” and the peace process. It focuses on religious conflict, catholic emancipation, famine, the development of romantic and revolutionary nationalism, unionism, rebellion, the changing nature of Anglo-Irish relations, modernization, and the special problems of the North.

IRST 30433. Ireland Since 1800

(3-0-3)

Corequisite: HIST 32432

This course will consist of lectures and readings examining Irish political history and Anglo-Irish relations from 1801 up to and including the current conflict in Northern Ireland. Attention will be given to religious conflict, the development of romantic and revolutionary nationalism, the changing nature of Anglo-Irish relations, and the special problems of the North. A mid-semester examination, a paper/essay, and a final will be required.

IRST 30434. Early Modern Ireland

(3-0-3) Rapple

This course offers new perspectives on the struggle for mastery in Ireland from 1470 to 1660. Though keeping in mind the traditional view of the “English reconquest” (decades of rebellion, dispossession, and plantation until, in the aftermath of Cromwell, all Ireland was finally subjected to English rule) this course will take a different approach. By investigating a range of primary sources from the period, students will explore the interactions between the three different models of conquest: 1) descendants of the old Norman colonists (e.g., Fitzgeralds and Butlers) seeking to finish the job; 2) Tudor reform (inspired by Renaissance optimism), by which the English attempted to establish rule by means of legal, social, and cultural assimilation; and 3) unabashed exploitation by English private entrepreneurs on the make. The most important effect of these “contending conquests” was the way they shaped the diverse responses of the native Irish, ranging from accommodation and assimilation to outright rebellion and national war.

IRST 30435. Nineteenth-Century Ireland

(3-0-3)

Drawing on monographs and general studies, this course invites students to consider how different social groups experienced the profound changes that transformed 19th-century Ireland. Although the course traces political developments, it pays equal attention to socioeconomic and cultural issues, including the shift from high fertility to sexual restraint; patterns of emigration, consumption, and social unrest; improvements in education and literacy; linguistic change; changing devotional practices and cultural “revival” in the late 1800s.

IRST 30436. Irish History Since 1800

(3-0-3)

This course will consist of lectures and readings examining Irish political history and Anglo-Irish relations from 1801 up to and including the current conflict in Northern Ireland. Attention will be given to religious conflict, the development of romantic and revolutionary nationalism, the changing nature of Anglo-Irish relations, and the special problems of the North. A mid-semester examination, a paper/essay, and a final will be required.

IRST 30438. Science and Medicine in Ireland, 1600–1900

(3-0-3)

This course surveys the history of science and medicine in Ireland from the seventeenth to the nineteenth centuries. The course will consider the role of science and medicine in Irish social and political life and will offer a fresh dimension to the cultural and intellectual history of Ireland. Lectures will situate scientists and doctors within their historical contexts, showing how intellectual history intersects with political history. Topics will include science as an instrument of colonialism in Cromwellian Ireland, the scientific satires of Jonathan Swift, the role of the medical community during the Great Famine, women in Irish science, and the role of science in the Cultural Revival. Note that no scientific knowledge is assumed or required.

IRST 30439. Debating Irish History

(3-0-3)

There has long been disagreement between academic historians about how best to conceptualize Ireland's troubled past. This course analyzes the approaches attempted in the nineteenth, twentieth and twenty-first centuries to explain Ireland's history and addresses a host of questions relevant to the history of any country. To what degree do influences like religious adherence, state loyalty and political commitment affect history writing? How can an historian best deal with the fact of human suffering? What is the difference between a terrorist and a freedom fighter? What effect do the constraints involved in the very process of writing history have on intelligent expression? Can a good history book ever be entirely satisfying to an ethnicity, a nation or a religious grouping?

IRST 30440. The Northern Ireland Troubles, 1920–present

(3-0-3) Smyth

This course explores the history of the six north-eastern counties of Ireland which became Northern Ireland in 1920/1. Northern Ireland remained part of the United Kingdom and had a built-in Protestant unionist majority, while the Catholic minority, alienated from the state from the outset, looked across the new border and to Dublin, capital of the Irish Free State, as the site of their allegiance. Northern Ireland was thus, from the beginning, dysfunctional, scarred by sectarian violence and systematic discrimination in housing and employment. After examining the origins of the state and the early decades of its existence, the class will turn to its main concern, "the Troubles," which broke out in the late 1960s. The major episodes under scrutiny include the civil rights movement, Bloody Sunday, the hunger strikes, and the Good Friday Peace Agreement.

IRST 30442. Medicine and Disease in Modern Ireland

(3-0-3)

Ireland is among a handful of modern nations whose histories have been thoroughly transformed by disease events. These events, and the Great Famine in particular, are never simple "visitations of providence" that afflict an undifferentiated populace. They are, rather, inextricably linked with existing social structures and the exercise of power. Changes in government and society from the 1801 Act of Union with Great Britain through the relief of the penal laws against Catholics, emigration, electoral and land reform, and independence in the twentieth century are reflected in the health (or lack thereof) of the Irish people. This course, therefore, is intended to introduce students to the social and political history of modern Ireland as seen through the lens of health and disease. While focusing on Irish conditions, we will discuss issues that remain especially relevant in our own

time, including: Who is responsible for health? Is health a universal right? Who is the "public" in public health? Where are the boundaries of medical expertise, and how are they determined?

IRST 30443. Revolutionary Ireland: 1916–1998

(3-0-3)

This course will chart the emergence of Ireland from the British Empire as an independent country. The origins of the physical force revival, Republican and Unionist, will be explored, along with the reasons for the failure of constitutionalism. The impact of the 1916 Rising and War of Independence will be assessed in both national and international terms. The Great War, Partition and Irish Civil War will also be contextualized. The development of two states in one country will form an important theme in which concepts of nationality and issues of self-determination can be addressed. The history of the modern "Irish Troubles" will be analyzed in depth up to the Good Friday Agreement of 1998.

IRST 30448. Issues in Modern Irish History

(3-0-3)

What is special about Irish Catholicism? Was pre-Famine Irish poverty a myth perpetuated by tourists from other countries? Why was celibacy so common in Ireland? Why was schizophrenia called "The Irish Disease"? If you're in Belfast in July, why should you do all your shopping well before and after the 12th? We will explore these and other questions in modern Irish history, as well as themes such as nationalism, education and the Irish language, women and the family, sexuality, health and disease, and emigration. Students will have the opportunity to develop a solid understanding of both long-term trends and specific issues in modern Ireland, as well as the ability to evaluate primary documents and secondary works.

IRST 30501. Folklore, National Culture, Irish History

(3-0-3)

This course will explore the idea of folklore within the history of ideas and will examine the relationships between folklore and popular culture and between folklore and modernity in Ireland.

IRST 30502. Irish Traditional Culture

(3-0-3)

To examine Irish peasant culture, this course will focus on the materials accumulated by folklorists since the late 19th century.

IRST 30602. Irish Traditional Music

(0-0-3)

This course examines the historical background of the instrumental and song traditions; musical style and its relationship to specific musicians and regional traditions; performance practice; and the social and cultural context of "the music."

IRST 30603. National Cinema: Irish Cinema/Culture

(3-2-3)

Corequisite: FTT 31232

This course examines the films of Ireland and other countries to reveal their distinctive styles, stories, and visual and narrative techniques.

IRST 30610. Irish-American History

(3-0-3)

Corequisite: HIST 32610

This course explores the history, politics, and culture of Irish-Americans from the colonial era to the near present.

IRST 31603. National Cinema: Irish Cinema/Culture Lab

(0-1-0)

Corequisite: IRT 30603

Co-requisite for 30603.

IRST 32371. Intro to Irish Writers/Discuss

(0-1-0)

Co-requisite discussion section for IRT 30371.

IRST 32375. Introduction to Irish Studies Discussion

(0-0-0)

This course will provide an outline of the field of Irish studies. We will look Ireland its internal and external relations through an interdisciplinary lens that connects literary, sociological, political, historical, and economic perspectives. We explore several key elements of the study of Ireland using critical scholarship, archival information, and a range of creative works including films (from *The Quiet Man* to *Once*), literature (from Bram Stoker and Oscar Wilde to Nuala Ní Dhomhnaill and Seamus Heaney), and music (from 18th-century harpist Turlough Carolan to U2 and Dropkick Murphys). This course is open to students at every level and there are no prerequisites for this class other than an interest in Ireland and the Irish. While this is an introductory class, the interdisciplinary focus will also benefit students who have studied Ireland in other courses. Requirements will include brief response papers, a midterm and final exam.

IRST 35550. Historical Archaeology of Irish America

(0-28-3)

Four weeks of practical instruction in the methods and theory of archaeological survey, excavation and laboratory analysis. Students learn field techniques and apply them to investigations of both prehistoric and historic archaeological materials by working with artifacts collected during the field course. There are no prerequisites for this course, but prior exposure to an introductory course in anthropology or archaeology is helpful. In addition to tuition, this course requires payment of a laboratory/transportation fee. Includes a week-long cultural study in Ireland. For application please email Dr. Rotman at: mailto:drotman@nd.edu

IRST 40014. Anglo-Irish Theatre since 1700

(3-0-3)

Students of English theatre and drama often ignore both the overt and covert contributions made by Ireland, its people, and its culture. Many of the greatest English playwrights since the Restoration have in fact been Irish, Anglo-Irish, or heavily influenced by Ireland, and this discussion-oriented course will examine and explore this important symbiosis in terms of theatre, history, and society. Both in terms of internal aspects and external relations, the course will examine a dozen significant Anglo-Irish playwrights writing in English including Congreve, Goldsmith, Sheridan, O’Keeffe, Boucicault, Yeats, Lady Gregory, Synge, O’Casey, Shaw, Wilde, Beckett, Behan, and Friel. We will relate a play (the drama) to the production history of that play (the theatre) while exploring both the larger societal issues of the times, internally to Ireland and externally to England, France, and the United States while also looking at the important World Drama component (as seen with Yeats and Japanese Noh).

IRST 40102. Introduction to the Language and Culture of Medieval Ireland

(3-0-3)

The aim of this course is to introduce students to the language and culture of medieval Ireland. The course will have linguistic, literary and cultural components. Students will take the first steps towards acquiring a reading knowledge of Old Irish (conventionally the language of the period to ca. 900). We will consider a selection of different kinds of texts, literary, legal and devotional, prose and poetry and place them in their historical and cultural contexts.

IRST 40103. Heroic Literature in Modern Adaptation

(3-0-3)

Beginning with a study of the ethos of Irish/Celtic heroic literature in its historic and cultural context, this course examines the ideological, aesthetic, and personal uses to which that material has been put by Irish writers of the past two centuries (19th and 20th centuries) writing in English and Irish. Among the authors to be studied are: Seamus Heaney, Flann O’Brien/Myles na Gopaleen, Nuala Ní Dhomhnaill, and Eugene Watters/Eoghan Ó Tuairisc. Particular attention will be paid to shifting concepts of “authenticity” and the degree to which various creative artists have retained, reinterpreted, or reinvented what they perceived to be the essence of their originals. This course will interest English majors, modernists and medievalists.

IRST 40107. The Irish Love Poem

(3-0-3)

This course traces the trajectory of the love poem in Ireland from the Middle Ages to the present day. We will begin with texts such as *Liadain* and *Cuirithir* (9th century) continuing through the late medieval genre of the *Dánta Grádha* as well as considering the corpus of love songs (*Amhráin Ghrá*) from the oral tradition before looking at the development of the modern love poem in the work of poets from W.B. Yeats to the contemporary Irish language poet Nuala Ní Dhomhnaill. All Irish language texts will be read in translation.

IRST 40110. The West of Ireland: An Imagined Space

(3-0-3)

This course will interrogate and examine representations of the West of Ireland in various twentieth-century texts focusing, in particular on the role of “the West of Ireland” in state formation and legitimization during the early decades of independent Ireland and its role in the construction of an Irish identity. We will look at how images of the West of Ireland were constructed in various utopian or romanticized formulations as well as examining more dystopian versions. This course will take an interdisciplinary approach, drawing on the visual arts and film as well as on literary texts in both Irish and English. (Irish language texts will be read in translation).

IRST 40111. The Irish Hunger Strikes

(3-0-3) Nic Dhiarmada

“We remember them with pride for on hunger strike they died these brave men were Ireland’s sons they were the men of ’81”—*Republican ballad*. “We’ll never forget you Jimmy Sands”—*Loyalist graffiti in East Belfast shortly after Bobby Sands’ death on hunger strike*. Thirty years ago, in 1981, Bobby Sands and nine other Irish republican prisoners died on hunger strike in the Maze Prison outside Belfast. Their deaths and the British response were pivotal in the history of the recent “Troubles”. It would hardly be an exaggeration to say that the fallout from the 1981 hunger strike had the same momentous impact on nationalists and on Irish politics as had the executions of the leaders of 1916. This course will examine the 1981 hunger strike in the context of previous political hunger strikes in Ireland and will examine both its genesis, the strike itself and its aftermath. It will pay particular attention to the ways in which the political hunger strike and the 1981 hunger strike in particular is remembered and commemorated, drawing on the work of Paul Ricoeur among others. We will engage with a variety of texts and sources including memoirs, news reports, documentaries, film and songs.

IRST 40112. A Gendered Voice—The Poetry of Nuala Ní Dhomhnaill

(3-0-3)

This course will focus on the interstices of gender and cultural identity in the work of Nuala Ní Dhomhnaill, the foremost contemporary poet writing in Irish. Her poetry will be situated within a theoretical framework that draws, *inter alia*, on recent feminist scholarship. It will address theories of the feminine as well as the specificities of Irish-language literary and oral discourses and their impact on Ní Dhomhnaill’s poetic practice. The course will also address the implications of translation. While texts will be read in English, there will be an opportunity for close textual comparisons with the original Irish-language poems.

IRST 40143. Queer Plots: Narrative and Sexuality in 20th- and 21st-Century Fiction

(3-0-3)

How do you tell a story that is supposed to be unspeakable? In this course, we will investigate the ways in which gay, bisexual, and lesbian writers have transformed narrative conventions as they explore their experiences and their identities through fiction. Beginning with the short fiction of Oscar Wilde at the end of the 19th century and continuing through the modern and postwar eras into the contemporary period, we will look at gay, bisexual and lesbian British, Irish and American writers whose work engaged with or dramatically departed from the dominant conventions that typically shaped fictions of identity formation, of love and marriage, of sexual experience, of political protest, and of death and loss. We will also investigate the public responses to some of these fictions, and the

changing discourses about gender identity, homosexuality, and sexual orientation that have shaped both the realities and the fictions of gay, bisexual, and lesbian writers over the past century. Students will write three papers and be responsible for one in-class presentation.

IRST 40215. Visits to Bedlam

(3-0-3)

Literary, medical, and social views of madness in the 16th through the 19th century.

IRST 40216. Irish and British Literature 1790–1815

(3-0-3)

Burke, Paine, Godwin, Wordsworth, Edgeworth, and Scott in the context of the French Revolution and the Irish political situation at the end of the 18th century.

IRST 40217. Anglo-Irish Identities 1600–1800

(3-0-3)

Observers of the political and cultural problems that continue to plague relations between the modern Irish State, six counties in the north of Ireland, and Great Britain cannot fail to note that the unresolved differences that have festered over the last two hundred years had their roots in the traumas of the preceding centuries of English colonialism in Ireland. Focusing on that crucial period in Irish history, this course will explore the complex and contested cultural, political, and ideological identities of a group we have come to call the Anglo-Irish.

IRST 40218. Studies in Six Irish Writers

(3-0-3)

W.B. Yeats, Elizabeth Brown, Bram Stoker, J.M. Synge, Seamus Heaney, and Medbh McGuckian.

IRST 40219. Modern Irish Drama

(3-0-3)

In this course, we will study both the drama produced by the playwrights of the Irish literary renaissance—Yeats, Synge, Lady Gregory, and O’Casey—and the political struggle for Irish independence that was taking place at the same time.

IRST 40220. Passing and Fictions of Race

(3-0-3)

A close analysis of how notions of “race” are explored in Anglo and Anglo-Irish literature.

IRST 40221. Anglo-Irish “Gothic”

(3-0-3)

An interpretation of the uses of the uncanny and the supernatural in Anglo-Irish fiction of the 19th century. Readings will include ghost stories as well as Gothic and “Big House” fiction (some of it in English disguise).

IRST 40222. Culture and Politics in Northern Ireland

(3-0-3)

What the literature of Northern Ireland reveals about the culture and politics of Northern Ireland.

IRST 40223. Versions of the Gothic

(3-0-3)

A survey of Gothic fiction in England and Ireland from the mid-18th century to the Victorian Age.

IRST 40224. Contemporary Irish Drama

(3-0-3)

This course explores the drama produced by Irish playwrights during the latter half of the 20th century.

IRST 40302. Beckett, Theater and Visual Art

(3-0-3)

In this course we will read and watch Samuel Beckett’s plays, read some of his art criticism and view work by artists he admired—where possible, we will seek out

paintings by these artists in the L.A. area. As a dramatist, Beckett makes extensive use of painterly effects, both in stage design and in direction. We will be able to watch both TV productions of plays like *Krapp’s Last Tape*, *Not I* and *Eh Joe* that Beckett himself closely supervised, and the newly completed film versions of his plays (including *Waiting for Godot*, *Endgame*, and *Happy Days*) by directors that range from Neil Jordan and Atom Egoyan to Damien Hirst and David Mamet. Artists we will look at will include the Irish painter Jack B. Yeats (brother of W.B. Yeats), Bram Van Velde, the Dutch abstract painter, and Avigdor Arikha, the Israeli figurative painter and close friend of the writer from the late 1950s. We will, accordingly, read Beckett as dramatist in the context of the visual arts and their influence on his work, and learn to read visual material—painting, film, plays. We will try to understand Beckett both in the context of Irish drama and art (reading a little of the drama of Synge and W.B. Yeats) and in the context of the international avant-garde of which he was part. The dramas and visual material will be supplemented by a small number of critical works that will aid students in understanding Beckett’s works. Students will be expected to do response papers and one longer research paper.

IRST 40303. Identities in Early Modern Irish Literature

(3-0-3)

The topic to be covered in this course is the formation of individual and collective identity through language, literature and history in this period. In addition to the works of the great early-modern poets (16th–18th centuries) like Tadhg Dall Ó hUiginn, Dáibhí Ó Bruadair and Aogán Ó Rathaille, we will focus on such important prose works as *Foras Feasa ar Éirinn*, the foundation history of the “new” Irish nation of the seventeenth century. Important secondary works here will include those of Anthony D. Smith and Adrian Hastings on pre-modern forms of nationalism as well as Stephen Greenblatt on identity formation in 16th century England and Paul Friedrich on linguistic relativism and the poetic in language.

IRST 40304. Poetry and Politics in Early Modern Ireland 1541–1688

(3-0-3)

The political poetry of the period 1541–1688 will be discussed and analyzed against the historical background. The primary focus will be the mentality of the native intelligentsia as it is reflected in the poetry and as it responded to the momentous changes of the period. The origins and rise of the cult of the Stuarts will be examined and the historiography of the period will be assessed.

IRST 40305. The Poetry of Nuala Ni Dhomhnaill

(3-0-3)

This course will focus on the interstices of gender and cultural identity in the work of Nuala Ni Dhomhnaill. Her poetry will be situated within a theoretical framework that draws, inter alia, on recent feminist scholarship. It will address theories of the feminine as well as the specificities of Irish-language literary and oral discourses and their impact on Ni Dhomhnaill’s poetic practice. The course will also address the implications of translation. While texts will be read in English, there will be an opportunity for close textual comparisons with the original Irish-language poems.

IRST 40306. Irish In Their Own Words

(3-0-3)

The purpose of this course is to introduce students to the richness and variety of literature produced in the Irish language during the medieval and early modern periods (we will cover primarily the period between approximately 800 and 1700 A.D.). The emphasis in the first half of the semester will be on studying the mainly prose saga literature of the medieval period in its various literary, cultural and historical contexts. This will involve both a close reading of the texts themselves in English translation and an examination of the material in the light of recent scholarship in this area. The second half will investigate the literature of the early modern period, in this case largely the poetry. This period is one of cumulative crisis for the Irish and their linguistic and cultural well-being. Students read closely a selection of texts representative of various facets of this crisis and of Irish responses to them in their own language rather than in the English language of their colonizers. All the translations are accompanied by facing original text so

that students gain some working knowledge of the Irish language which will assist them in evaluating the translations which they are reading and in appreciating the sensuous beauty of much of this poetry. The material provides interesting contrasts and comparisons for those who have already studied some Anglo-Irish literature and it should also be of interest to students of modern Irish history.

IRST 40307. Gender, Politics and The Poetic Tradition in Irish
(3-0-3)

This course begins with the fundamental feminist assumption that gender matters and that gender is one of the central terms through which people both understand and critique their world. Our particular area of inquiry will be the role of gender in the Irish poetic tradition from the sixteenth century onwards, something that has only recently begun to receive attention from critics like Angela Bourke, Mairin Nic Eoin, and Briona Nic Dhiarmada. The class will focus on how gendered representations of masculinity and femininity underwrite political appeals, particularly regarding Ireland's colonial relationship to England. We'll also look at how gender is used to represent and to resist related social changes, like shifting class relations, unstable power relations between men and women, and contested notions of sexuality. We will read a variety of poetic texts, some serious and formal, some funny and popular; genres will include formal bardic poetry, the *aisling* (or vision poem), oral lament, song poetry, and comic verse. The methodology will be historically informed close reading, meaning that we will read texts closely, rather than generalize abstractly, so that we have a sound basis for our analysis. No knowledge of Irish language is required or necessary, though original texts will be provided alongside translations. This class is discussion-based and will ask for your engaged participation at all times. Students will be responsible for presentations and will write several shorter papers and a longer term paper.

IRST 40308. Modern Irish Poetry
(3-0-3) Ni Dhomhnaill

An introduction to Ireland and the Irish poetic tradition, this course is a magnificent chance to study with a world-renowned poet. It offers a unique opportunity to study modern Irish poetry with the greatest living Irish-language poet. Visiting Notre Dame for the 2006 fall semester only, Nuala Ni Dhomhnaill will teach a course on modern and contemporary Irish poetry. This class will spotlight key canonical texts by Irish-language poets as students conduct close readings, examine the verses' social and political context, and deconstruct the mechanics of each individual poem. We will read Cathal O Searcaigh, Gearoid Mac Lochlainn, Biddy Jenkinson, Michael Hartnett, Maire Mhac an tSaoi, Michael Davitt, Gabriel Rosenstock, Liam O Muirlithe, Pearse Hutchinson, Sean O Riordain, Mairtin O Direain and Aine Ni Ghlinn. This course also focuses on Nuala Ni Dhomhnaill's own work. All texts will be available in English. No prior knowledge of Irish required.

IRST 40309. Northern Ireland Troubles
(3-0-3)

This discussion-based seminar explores the history of the six north-eastern counties of Ireland which became "Northern Ireland" in 1920/1. Northern Ireland remained part of the United Kingdom and had a built-in protestant unionist majority. The Catholic minority, alienated from the state from the outset, looked across the new border and to Dublin, capital of the Irish Free State, as the true site of their allegiance. Northern Ireland was thus, from the beginning, dysfunctional, scarred by sectarian violence and systematic discrimination in housing and employment. After examining the origins of the state and the early decades of its existence the seminar will turn to its main concern "the Troubles" which broke out in the late 1960s. The major episodes under scrutiny include the civil rights movement, Bloody Sunday, the hunger strikes, and the Good Friday Peace Agreement. Students are obliged to produce a twenty-five page essay based on original research, and many are expected to draw on the rich microfilm archive of "the Troubles," the Linenhall Collection, held in the Hesburgh Library.

IRST 40310. Ideology, Poetry and Politics in Jacobite Ireland
(3-0-3)

Jacobitism, or allegiance to the course of the House of Stuart (from Latin *Jacobus*-James-the deposed James II), was the common voice of political dissent in 18th century Ireland, Scotland and England. Irish Catholic advocacy of the Stuart cause had already become a political orthodoxy in the course of the 17th century and when the Stuarts were deposed by William of Orange ("King Billy") later succeeded by the Hanoverians (1714) the culture of dispossession and displacement and the rhetoric of return and restoration became firmly entrenched in the political ideology of Catholic Ireland. This course will examine the development of Irish Jacobitism in its various literary, historical and ideological aspects in addition to placing it within its wider British and European context in the 18th century.

IRST 40311. Visits to Bedlam
(3-0-3)

Until visitation was restricted in 1770, London's Bethlem Hospital (popularly known as "Bedlam") attracted as many as 96,000 spectators per year who paid for the privilege of watching mental patients. Like the tigers in The Tower, these patients were not simply chained, but shown, put on exhibition. The cruelty of this practice and the fact that it was stopped both point to the eighteenth-century fascination with madness, with the irrational, with what Freud would call the "unheimlich," the "uncanny." Samuel Johnson's astronomer who comes to believe that he personally controls the weather, Laurence Sterne's mad Maria, piping for her lost lover, John Locke's man who believes himself made out of glass and who acts "reasonably" to avoid hard objects, or Jonathan Swift's modest proposer who concocts a cookbook to save the Irish nation all bear witness to this other side of the eighteenth century, the subject of this course. We will begin with selections from Cervantes' *Don Quixote* and some short readings in Locke and others who attempted to analyze madness. We will then move on to explorations of Samuel Johnson, Tobias Smollett, Laurence Sterne, and Jonathan Swift. Our major focus will be on Swift, with special attention to his poetry, *Gulliver's Travels*, and *A Tale of A Tub*. Swift, who was a Governor of Bethlem Hospital, left most of his money to fund the first mental hospital in Ireland, St. Patrick's, which is still there. As he later said, "He gave what little wealth he had, To build a house for fools and mad: And showed by one satiric touch, No nation wanted it so much." For the sake of comparison, we will conclude with several nineteenth-century selections.

IRST 40312. Identity and Gender in Modern Irish Women's Poetry
(3-0-3)

This course interrogates issues of gender and identity in the work of contemporary Irish women poets. We examine the ways in which contemporary poets write from a constellation of identities—sexual, cultural and linguistic and will focus in particular on the ways how question as they articulate versions of identity in specific cultural and literary forms. Drawing on recent theoretical work in gender studies, feminist theory and postcolonial studies, among others, this course examines texts that question and problematize essentialist notions of cultural and gender identity. We will also explore tensions inherent in the articulation of a cross-cultural sexual identity and the specificity of linguistic and cultural inheritance in contemporary Irish-language writing. We read, among others, poets such as Eavan Boland, Nuala Ni Dhomhnaill, Máire Mhac an tSaoi, Maedhbh McGuckian, Paula Meehan, Eiléan Ni Chuilleanáin.

IRST 40315. Re-imagining Ireland: Sociological Perspectives On A Changing Society
(3-0-3)

In recent years we have witnessed the passing of many of the old orthodoxies in Irish society. The Roman Catholic Church has lurched from one scandal or crisis to another, all the time losing its legitimacy among the body politic. Politics has been exposed as a less than honorable affair, as tribunal after tribunal lay bare the unsavory financial ties between politicians, developers and leading Irish businessmen. Irish sport, language, music and culture have gone global in the process transforming themselves into commodities, that ultimately stretch their capacities to remain true to their local qualities. A sustained, if uncertain, economic

prosperity engulfs the land. A new cult of individualism promotes the idea of more choice—whether that relates to supermarkets, schools, hospitals or healthcare packages. In this course we employ critical sociological analysis to explore present day Ireland in relation to: class and social mobility, the rise of consumer culture, gender and gender relations, transformations of place and space, and cultural/media innovation and its diffusion.

IRST 40316. Folklore, Literature, and Irish National Culture
(3-0-3)

The ideological character of the 19th-century concept of folklore allowed it to transcend the social category of peasants from whom it was largely recorded. This course will look at the role of folklore in the building of an Irish national culture from the time of the Gaelic Revival. Programmatic texts in Irish and in English by Douglas Hyde, first president of the Gaelic League, and by Séamus Delargy, director of the Irish Folklore Commission, will be discussed. It will also look at a later polemical text of the Gaelic writer Máirtín Ó Cadhain directed at what he perceived as the essentialism of Irish folklorists. No knowledge of the Irish language required.

IRST 40320. Gender and Identity in Irish Language Texts
(3-0-3)

This course will interrogate issues of gender and identity in the work of contemporary Irish language writers. We will examine the ways in which contemporary writers in Irish writing from a constellation of identities, sexual, cultural and linguistic question explore these issues as they articulate them in specific cultural forms. Drawing on recent theoretical work in gender studies and postcolonial studies the course will look at texts that question and problematize essentialist notions of cultural identity. It will explore in particular some of the tensions inherent in the articulation of a cross-cultural sexual identity and the specificity of linguistic and cultural inheritance in contemporary writing in Irish. We will read, among others, texts from writers such as Máire Mhac an tSaoi, Biddy Jenkinson, Nuala Ní Dhomhnaill, Pearse Hutchinson, Cathal Ó Searcaigh, Seán Mac Mathúna and Micheál Ó Conghaile.

IRST 40409. Elizabethans and Their World
(3-0-3)

This course aims to set the work of the great figures of the Elizabethan Renaissance—Shakespeare, Spenser, and Sidney—in their larger cultural and intellectual context, such as political commentaries, social polemics, historical works, crime writing, religious exhortations, ballads, engravings, and maps, which made up the Elizabethans attempts to comprehend and control their perilously changing world.

IRST 40410. Early Medieval Ireland
(3-0-3)

This course comprises a survey of the history and culture of the Irish and the other Celtic peoples from the Neolithic era to approximately A.D. 1500. We will explore the main documentary sources in translation—mythological and historical, ecclesiastical and secular—as well as discussing the importance of the archaeological evidence.

IRST 40411. Ideology, Poetry, and Politics in Ireland
(3-0-3)

This course is a broad-based exploration of Ireland and her neighbors from the 8th century to the 16th.

IRST 40412. Late Medieval/Early Modern Ireland
(3-0-3)

This course offers new perspectives on the struggle for mastery in Ireland from 1470 to 1660. The most important effect of these contending conquests was the way they shaped the diverse responses of the native Irish, ranging from accommodation and assimilation to outright rebellion and national war.

IRST 40413. Ethnic Conflict to Northern Ireland
(3-0-3)

A history of the Troubles.

IRST 40414. The Vikings
(3-0-3)

Discussion will be based on medieval primary sources from England, Ireland, France, and Russia. Scandinavian life at home and the possible reasons for migration will also be considered, as background to the more exciting events abroad. The importance of archaeological evidence (including art), and modern treatments of Vikings in film and literature, will also be included.

IRST 40415. Reading Ulysses
(3-0-3)

A close analysis of James Joyce's *Ulysses*.

IRST 40420. 19th- and 20th-Century Scottish Literature
(3-0-3)

This course will survey major authors, genres, and themes of the literature of Scotland from the era of Burns to the present.

IRST 40435. Irish Memoir and Autobiography
(3-0-3) Smyth

This class has four basic objectives, to explore different ways in which to read texts, to explore the different ways in which memoir and autobiography can be read, though the lives of the authors to introduce modern Irish social and political history, and more broadly, to introduce students to different human experience. Key texts may include Frank McCourt's *Angela's Ashes*, Brendan Behan's *Borstal Boy*, Maurice O'Sullivan's *Twenty Years A'Growing*. In addition we may study extracts from other books, by writers such as William Carlton, Elizabeth Bowen and Robert Harbinson.

IRST 40500. Religious Persecution in Early Modern England and Ireland
(3-0-3)

This course examines the dynamics of religious persecution in the Early Modern period in England and Ireland. We will look at the experiences and perspectives of both the victims and the perpetrators in these two rapidly evolving and interacting societies. The theories of persecution and resistance will be examined in particular for the period of the reformation. Intolerance and persecution are not new phenomena and what we find when we examine their manifestation in the past that some of the same motivations are exhibited in religious sectarianism and bigotry today. This is a course that calls on us to consider the experiences of mainstream Catholics and Protestants and the authorities involved and to make connections with our present day world.

IRST 40501. Contemporary Irish Drama
(3-0-3)

A close analysis of the dramatic literature produced by Irish playwrights during the latter half of the 20th century.

IRST 40503. Archaeology of Ireland
(3-0-3)

This course examines the cultural and historical trajectory of the archaeology of Ireland through a series of richly illustrated lectures, organized chronologically, that trace cultural, social, and technological developments from the Neolithic through the Viking period. Integrated with this lecture series, and running concurrently on alternate days, will be a series of seminar and discussion classes focused upon a number of anthropological and archaeological issues related to each of these periods of time. This includes the emergence of the unique systems of communities, and the development of systems of metallurgy in the Iron Age. Other classes will touch upon the topics of regionalism and identity and contact at different periods of time, mortuary practices and ritual, and discussion of village life in ring forts during the Bronze Age.

IRST 40506. Modern Irish Drama

(3-0-3)

A study of the romantic theme in Irish literature from Edgeworth and Moore to the young Yeats and Joyce. This course will include poetry, fiction, drama and aesthetics.

IRST 40509. Modern Irish Drama

(3-0-3)

In this course, we will study both the drama produced by the playwrights of the Irish literary renaissance—Yeats, Synge, Lady Gregory, and O’Casey—and the political struggle for Irish independence that was taking place at the same time.

IRST 40510. Romantic Ireland

(3-0-3)

A study of the romantic theme in Irish literature from Edgeworth and Moore to the young Yeats and Joyce. This course will include poetry, fiction, drama and aesthetics.

IRST 40513. Culture and Politics of Northern Ireland

(3-0-3) Smyth

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the twentieth century. Using a multiplicity of genres—drama, fiction, poetry, film, painting, and documentary material—we will unravel the history behind partition, the causes of the Troubles, and the nature of the conflict. Among the key moments or events upon which we will concentrate are the Somme, the sinking of the Titanic, Bloody Sunday, the hunger strikes, Drumcree, the Anglo-Irish Agreement, and the Shankill Butchers. Certain key themes will stretch through our semester’s work. Among these are sectarianism, the relationship between violence and culture, the role of religion in the state, borders, hatred, identity, and issues of social and political justice. Some of the writers whose work we will read are Seamus Heaney, Frank McGuinness, Sam Thompson, John Montague, Seamus Deane, Eoin MacNamee, Robert MacLiam Wilson, Colin McCann, and Thomas Kinsella.

IRST 40515. Contemporary British and Irish Fiction

(3-0-3)

This course will introduce students to the contemporary fiction of Ireland, England, Scotland and Wales, as well as some of the best recent black British fiction. Some of the authors whose work we will read are: Pat McCabe, Neil Jordan, John Banville, Zadie Smith, Monica Ali, Andrea Levi, Irvine Welsh, James Kelman and Pat Barker. These writers will be read in the context of “the Break-up of Britain” and a concomitant sense of the changes in British and Irish identity in the past twenty years or so. Expect a lot of reading, but also some superb novels. Two twelve-page papers and a presentation.

IRST 40517. The Politics of Civil Wars

(3-0-3)

This course will explore social scientific explanations for the phenomenon of modern civil wars. It will do so through detailed exploration of individual theories of civil war with a view to testing how they explain a variety of civil wars in the twentieth century. Students will be expected to acquaint themselves with these theories and also with the history of some individual cases. The course will therefore cover both political science and historical materials and students will be expected to write both a theoretical paper and an analysis of one individual case. The course will be assessed through two papers and a general exam.

IRST 40525. Gender, Genre, and The Short Story

(3-0-3)

This course discusses how representations of gender were explored in a survey of 19th- and 20th-century short stories from England, Ireland, France, Russia, and the Southern United States.

IRST 40529. Gender and Irish Drama

(3-0-3) Harris

This course will examine constructions of gender in the works of Irish playwrights.

IRST 40530. Wilde and Synge: Art as Subversion

(3-0-3) Kiberd

On the surface Oscar Wilde and John Millington Synge seemed very different kinds of artists. Wilde won fame for his witty portrayals of the English aristocracy, whereas Synge was celebrated for his lyrical depiction of an impoverished Irish peasantry. Wilde pursued a career on the London stage and in high society, whereas Synge embraced a life of austerity and wrote for the nascent Irish national theatre in Dublin. Wilde was often dismissed as a mere entertainer, who was so fixated on his audience that he risked the betrayal of his subject. Synge was understood to be a pure artist, so committed to his subjects that he risked the alienation of his audience. Yet these products of Protestant Dublin had much in common: a fascination with fairy tales and folklore; an anarchist ideal in politics; a belief in the artistic value of lying and in the truth of masks; and a distrust of a merely representational art. For both men art should be an improvement on rather than a reflection of nature; and they saw their writing as a utopian project, addressed not just to present realities but to future possibilities. This course will offer an in-depth reading of the work of Wilde and Synge, assessing the differing opportunities and constraints faced by playwrights in London and Dublin in the late nineteenth and early twentieth centuries. It will consider the ways in which both dramatists, by challenging their audiences and subverting traditional forms of art, helped to create a modern Irish literary movement. Oscar Wilde texts for discussion: *Fairy Tales*, *The Picture of Dorian Gray*, *A Woman of No Importance*, *Lady Windermere’s Fan*, *The Importance of Being Earnest*, “The Decay of Lying,” “The Truth of Masks,” “The Ballad of Reading Gaol,” and poems, Salomé, *De Profundis* available in *Collected Works*, one volume (Collins). J.M. Synge texts for discussion: *Riders to the Sea*, *The Shadow of the Glen*, *The Tinker’s Wedding*, *The Well of the Saints*, *The Playboy of the Western World*, *Deirdre of the Sorrows*, *The Aran Islands*, available in *Collected Works*, Vols. 2, 3, 4 (OUP).

IRST 40540. Conflict and Consensus in Twentieth-Century Ireland

(3-0-3)

Prerequisite: POLS 10200 or POLS 20200 or GOVT 10200 or GOVT 20200

This course examines the government and politics of the Republic of Ireland and Northern Ireland through the lenses of democratization, state-development, nationalism, and unionism. Among the themes covered in the course are: the British and Irish national questions; religion, ethnicity, and nationalism; the partition of Ireland and its consequences; the constitutional development and democratization of an independent Ireland; devolved government and control in Northern Ireland; the party systems in Northern Ireland and the Republic of Ireland; and the consequences of British direct rule.

IRST 40605. Film, Literature, and Irish Culture

(3-0-3)

Corequisite: IREST 41606

This course will examine some of the dominant images of Ireland in film and literature, and will place their development in a wider cultural and historical context. Comparisons between film, literature and other cultural forms will be featured throughout the course, and key stereotypes relating to gender, class and nation will be analyzed, particularly as they bear on images of romantic Ireland and modernity, landscape, the city, religion, violence, family and community. Particular attention will be paid to key figures such as Yeats, Synge, and Joyce, and contemporary writers such as John McGahern, William Trevor, Patrick McCabe and Roddy Doyle will be discussed in terms of the wider implications of their work for contemporary Irish culture. The resurgence of Irish cinema and new forms of Irish writing in the past two decades will provide the main focus of the second part of the semester, tracing the emergence of new distinctive voices and images in an increasingly globalized and multi-cultural Ireland.

IRST 40850. Advanced Fiction Writing

(3-0-3) McCabe

This course is intended for students who have already taken a fiction writing course (or the equivalent) and who are seriously interested in writing fiction, and graduate students who are not in the creative writing program. The expectation is

that the student is beyond the point of requiring assignments to generate stories. Over the semester, in a workshop setting, student stories will be taken through various stages: due attention will be paid to revision, rewriting, polishing, editing, with a goal that the stories be brought as close as possible to the point of submission as finished work. Practical as well as theoretical issues will be investigated; there will be assigned readings from a variety of fiction authors.

IRST 41606. Irish Film and Culture Lab

(0-1-0)

Corequisite: IRST 40605

Required for IRST 40605 Irish Film and Culture.

IRST 43436. Ireland and the British Problem

(3-0-3)

Over the past 30 years or so a new subject has lodged firmly on the historical agenda: “The New British History.” Before this development “British” in practice meant English, with the Scots and Irish getting a mention when they caused trouble, and the Welsh, since they generally didn’t cause trouble, hardly being mentioned at all. Yet such a traditional, Anglocentric, approach distorted even English history. The New British History proposes studies of the interactions of the Three Kingdoms or the Four Nations. For example, what used to be called the English Civil war is now—more accurately—called the wars of the three kingdoms. Ultimately Scottish, English, Welsh and Irish history don’t make complete sense unless they are related to each other. This seminar is broadly conceived. The emphasis is on Ireland’s troubled relationship with the larger neighboring island, but it is not Hibernocentric. Beginning in 1603, when a Scottish king succeeded to the throne of England, and Ireland for the first time came under the complete control of (the now British) crown, we will explore how the “British Problem”—how to integrate or pacify often mutually hostile peoples, cultures and religions—unfolded, asserted and reformulated itself over the centuries. As a seminar the format will be discussion-based. After familiarizing ourselves with the subject, the questions and the issues, each student will select a topic (which may be primarily, but not exclusively, on Irish, Welsh, English or Scottish history) and spend the remainder of the semester working towards the writing of a research paper.

IRST 43504. Seminar: Modern Irish Fiction

(3-0-3) Smyth

A close examination of the works of major Irish writers of fiction after the Second World War—Flann O’Brien, Frank O’Connor, Mary Lavin, Patrick Kavanagh, Edna O’Brien, Michael MacLaverty, Sam Hanna Bell, and Brian Moore.

IRST 43505. Seminar: Gender Troubles: Contemporary Irish Fiction

(3-0-3) Harris

In this course we will be looking at the relationship between gender politics and national politics as it plays out in the development of Irish fiction after the era of James Joyce. Focusing on Irish novels and short stories, which were groundbreaking and/or controversial in terms of their exploration of gender and sexuality, the course will also investigate the historical contexts in which they were produced and the controversies they produced. Our investigation will focus on the question of how the “trouble” generated around these controversial explorations of gender and sexuality relates to other kinds of trouble that have shaped the history of twentieth century Ireland. We will begin with the reaction against government censorship in the Irish Free State during the 1930s and 1940s, follow the emergence of Irish women writers and Irish feminism from the 1950s to the 1980s, and conclude with the rise of gay and lesbian Irish writers in the 1990s and early twenty-first century.

IRST 43511. Irish Connections

(3-0-3)

This seminar will examine connections between Ireland and the rest of the world with respect to economic development, social movements, and imprisonment. Coverage will be both historical and contemporary. The section on development will analyze and compare Ireland’s place in the 19th-century British-led Atlantic

economy with the 20th-century U.S.-led world economy, ending with an analysis of the “Celtic tiger” period and its influence on other developing countries/regions, including developmental states in Eastern Europe and Turkey. The section on social movements will begin with nineteenth-century Irish movements and their connections to British and U.S. movements, including the Molly Maguires and emergent labor movement in the northeastern U.S. It will move through the period of partition/independence to the civil rights and armed liberation movements that emerged in the 1960s and their connections to movements in North America and the so-called Third World. Finally, the course will look at connections between social movements and imprisonment, including political imprisonment, prison protests, and state strategies of isolating prisoners in Ireland, Turkey, and U.S. Supermax.

IRST 46000. Directed Readings

(3-0-3)

This course consists of research and writing on an approved subject under the direction of a faculty member.

IRST 50316. Folklore, Literature and Irish National Culture

(3-0-3)

The ideological character of the 19th-century concept of folklore allowed it to transcend the social category of peasants from whom it was largely recorded. This course will look at the role of folklore in the building of an Irish national culture from the time of the Gaelic Revival. Programmatic texts in Irish and in English by Douglas Hyde, first president of the Gaelic League, and by Séamus Delargy, director of the Irish Folklore Commission, will be discussed. It will also look at a later polemical text of the Gaelic writer Máirtín Ó Cadhain directed at what he perceived as the essentialism of Irish folklorists.

IRST 50318. The Feminine in Irish Literary and Oral-Vernacular Tradition

(3-0-3)

This course addresses issues concerning the representation of the feminine in Irish literary and oral-vernacular tradition. It treats of the historical displacement and re-interpretation of the figure of the autonomous “otherworld” female in literature and oral narrative. In particular it examines a series of texts from pre-modern oral narrative tradition featuring the figures of “cailleach”/hag and “bean feasa”/wise woman with a view to understanding their significance for the native ear. The potential significance of such texts as therapeutic resources for the modern reader is also considered.

International Development Studies

IDS 20000. Introduction to International Development Studies

(3-0-3) Oka

This course will serve as an introduction to the field of international development, with particular focus on the various disciplines that have contributed to and shaped the development discourse over the past eight decades. Readings and lectures will draw from economics, political science, sociology, anthropology, environmental and technological sciences, public health and epidemiology, area studies, ethnic studies, and gender studies. A large component of this course will focus on in-class discussions and presentations that engage the broader debates within development studies to critically evaluate the development discourse/process, as well as understand emerging critiques of international development. Required course work will include group or individual student projects that critically investigate ongoing development issues and propose engaged solutions that include restoration and social justice and human dignity.

IDS 20204. Principles of Development Policy

(3-0-3) Solis

The objective of the course will be to familiarize students with the concept of development, the incidence of underdevelopment, some major theoretical controversies, and specific policy issues with examples drawn especially from Latin America. The course will explore the complex connections between theory, policy, and practice. At the end of the course students will be able to identify the contribution of economic tools to development policies, examine these tools within the context of actual agenda-setting, and make inroads into the challenge of incorporating institutional and ethical considerations into the design and implementation of development policies.

IDS 20515. International Relations

(3-0-3) Guisinger; Rosato

The study of international relations (IR) is the study of human organization at its highest and most complex level. The goal of IR scholarship is thus to try to manage this complexity intellectually by devising theories which help us to understand and predict state behavior. The main purpose of this course, therefore, will be to introduce students to the most important IR theories. These theories will then, in turn, be applied to real-world IR events in order to test their utility in helping us to understand the world as it actually is. By the end of the course, therefore, the student will have a grounding in both theoretical and factual aspects of IR analysis.

IDS 20604. Development and Human Well Being

(3-0-3) McDonnell

Development. People around the world clamor for more of it and oust government leaders for failing to achieve it, but what exactly is “development?” If development were sitting in front of you on the sidewalk, how would you know it, and what would it look like? In this course we will unpack the deceptively simple word development into different specific aspects, each with concrete outcomes for human well-being: education, health, political freedoms, material wealth/consumption, and happiness. We will look at how our understanding of the distribution of “development” among countries, and historically over time, changes when we view it through each of these different lenses. We will consider whether these different aspects of development tend to reinforce each other, and try to understand cases when they do not. We will conclude the course by looking at how “doing” development differs depending on which aspect of development is targeted.

IDS 20652. Christianity and World Religions

(3-0-3) Malkovsky

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate Mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious

pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply in the spirituality of other traditions. By course's end we ought to have a greater understanding of what is essential to Christian faith and practice as well as a greater appreciation of the spiritual paths of others. Requirements: Short papers, midterm exam, and final exam.

IDS 20653. Rich, Poor, War

(3-0-3) Whitmore

This course examines the interrelationships between economic injustice and violence. It begins by investigating the gap between rich and poor both in the U.S. and worldwide. We also look at the history of Christian thought on wealth and poverty. We then address the ways in which economic disparity intersects with the problem of violence in both domestic (violence against women) and political realms (war and revolution). Next, we canvass Christian thought on the use of violence. This raises the question of whether Christianity itself contributes more to violence or to peace. Finally, we pose the question of whether forgiveness for violence is advisable or feasible.

IDS 30200. Economic Development of Latin America

(3-0-3)

This course is an introduction to the study of Latin America's economic development, its historical background and contemporary problems. Part I provides a historical overview from independence in the early 19th century to post-war industrialization in the 20th century. Part II examines structural problems that are common to most countries in the region and reviews the ideologies and debates that have emerged around them. Parts III and IV of the course discuss some major contemporary policy issues, focusing the attention on the market-oriented reforms since the mid-1980s and the impact of the new economic model on equity and growth performance.

IDS 30250. Chinese Civilization and Culture

(3-0-3) Yang

This is a survey course that introduces the students with little or no knowledge of the Chinese language or culture to the major aspects of Chinese cultural tradition from the dawn of its civilization to the present time. Readings (in English translation) include traditional Chinese historical, philosophical, political, religious and literary texts as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to approach the Chinese texts from a comparative perspective.

IDS 30400. History of Modern Africa

(3-0-3) Ocobock

This course is an introduction to the history of the peoples of Africa from the late nineteenth century to the present day. During the term, we will consider the ways in which Africans shaped and were shaped by the transformative events of the period. In the second half of the nineteenth century, European powers conquered and colonized much of the continent. Over the next sixty years, Africans lived and died under the yoke of European rule; some resisted, others collaborated, but all influenced the nature of colonialism and its eventual collapse. By the 1960s, most Africans were free of foreign rule. Since then the peoples of Africa have endeavored to achieve political stability, navigate Cold War politics, harness development aid, and adapt to a globalizing economy. In recent years, they have succumbed to brutal wars and endured devastating famines, but they have also inspired the world with their triumph over apartheid, emerging vibrant democracies, rich cultures, and deep history. In this class, we will identify, problematize, and debate these major themes in Modern African history. We also will make use of a variety of texts, from historical documents to classic academic works to works of African art, film, and fiction.

IDS 30401. The Medieval Iranian World: Iran, Afghanistan, and Central Asia

(3-0-3) Tor

The Iranian cultural world, from late antiquity until the 13th century, stretched from what is today Iraq all the way to India, and from the Persian Gulf deep into

Central Asia. Although in the seventh century the early Islamic conquests put an end to the Persian Empire and occupied the Iranian world, a new era of Iranian hegemony began in Islamic history with the Abbasid Revolution in 750 and the establishment of the new Islamic capital, Baghdad, in the old Persian heartland. This event inaugurated a growing dominance by Iranians, and Persian traditions, in all areas of Islamic civilization—cultural, religious, military, and political—culminating in the establishment of the autonomous Persianate dynasties which ruled the Islamic heartland from the ninth century until invading Turco-Mongol tribes seized political control of the Islamic world in the twelfth century. This course will explore the many ways in which the Persianate world—today’s Iran, Afghanistan, and Central Asia—helped form the Islamic world, focusing on its contributions to political order and ideology; its leading role in the formation and elaboration of Sunnism; its rich cultural productions; and its expansion of the borders of Islam.

IDS 30402. The Israel-Palestine Conflict

(3-0-3) Kaufman

This class discusses the roots, evolution, current situation and prospects of resolution of the Israeli-Palestinian conflict. In order to better understand this theme the class will also locate this conflict in larger regional and global perspectives. Thus, issues such as nationalism in the Middle East, colonial impact in the region, the Arab states and their involvement in the conflict, cold war and post-Cold War dynamics, will all be an integral part of the class discussions. We will also juxtapose the competing narratives of Israelis and Palestinians towards this conflict. Finally, we will engage in an un-historical practice by looking at the future and thinking about possible avenues for concluding this protracted conflict.

IDS 30403. Modern South Asia

(3-0-3) Sengupta

Home to over a billion people, just over 23% of humanity, the South Asian subcontinent is a fascinating laboratory in which to analyze the unfolding of such themes in modern history as colonialism, nationalism, partition, decolonization, post-colonial democracies, the modern state, economic development, center-region problems and relations between Asia and the West. The course will consider critical themes in social, political, economic, and cultural history, which will include imperialism, capitalism, nationalism, religious politics, regionalism, ethnicity, globalization, diaspora, ecology, social inequality, and gender, development, and democracy. It will not only provide a lively historical narrative told through lectures based on scholarly research and primary texts, but will also seek to embellish this narrative with the perception and articulation of vision and sound, as well as with readings from representative genres of South Asian literature.

IDS 30404. Colonial Latin America

(3-0-3) Graubart

Corequisite: HIST 32901

When Columbus stepped ashore in the Caribbean in 1492, he set in motion a process that led to the creation of wealthy Spanish and Portuguese empires in the Americas, the genocide of countless numbers of indigenous men and women, the enslavement of millions of African men and women, and the eventual formation of a variety of independent states competing in the world economy. In this semester-long survey, we will examine topics in this history that will allow us to consider how history is produced as well as what happened in the past, from various perspectives, from elite colonial administrators and merchants to indigenous peasants and formerly enslaved men and women.

IDS 30405. Afro-Brazilian History

(3-0-3) Graham

Brazil has more people of African descent than any other country in the world, other than Nigeria. This fact makes it impossible to understand the history of this South American nation, the fifth largest in the world, or the history of race broadly, without centralizing the experience of black Brazilians. This course will begin with the Transatlantic Slave Trade (during which more slaves landed in Brazil than any other nation) and will end with the modern day Afro-Brazilian movement for equality and the difficulties they face. Along the way, we will cover powerful runaway slave societies, the role of Afro-Brazilians in abolition, the

challenges confronted in freedom, black political organization in the 20th century, Afro-Brazilian music traditions, Afro-Brazilian religious practices, and the relationship between such manifestations of black culture and the Brazilian state. We will attempt to understand what has been unique about black history in Brazil, and what has been reflected in the broader experience of blacks in the New World.

IDS 30406. Military Regimes and “Dirty Wars” in Latin America (3-0-3) Hurtado

Between 1964 and 1990 most South American countries lived under dictatorial military regimes. In this period of extreme political radicalization, these societies were divided alongside contending visions of their national states. Under the premise that they were assuming office in order to save their nations, the South American military established regimes characterized by widespread repression, human rights violations and impunity. Violence, however, was resisted by different sections of society and a particular type of motherhood—embodied by the women who looked for their missing children—acquired subversive connotations in countries like Argentina and Peru. In this course we will seek to understand why military institutions played such a prominent role in the region in the twentieth century, how their doctrines of national security and U.S. assistance enabled them to assume power, and the mechanisms that the military used in order to establish cultures of fear and death in their countries. We will also focus on the responses by individuals and organized civil society to state repression and violence. Although the course keeps a regional approach, it pays particular attention to three countries: Chile, Argentina, and Peru. What were the similarities and differences among the “dirty wars” occurred in these countries? How did the categories of class, gender and race interplay in the implementation of military and insurgent violence? What memories about repression were crafted in these countries? How did successor regimes make a break with the past, establish a new set of social norms, and work toward the administration of justice, redress and reconciliation? We will approach to this subject by using a variety of primary and secondary sources, fiction and documentary films, as well as elements of pop culture. We aim to see how these lengthy military and authoritarian interventions have shaped present-day societies in South America, and what mechanisms Chile, Argentina and Peru have established to deal with the legacies from their troubled pasts.

IDS 30407. The Global Environment

(3-0-3) Thomas

The global climate crisis is upon us, leading historians to ask how did we get to this point and what tools historical knowledge might provide for finding our way in the future. This course considers, first, the nature of “climate collapse” (as some term it) on a global scale. We then turn to the issue of what values and what modes of production and consumption have caused this dramatic transformation of our planet. Looking particularly to political and economic analyses of global history, we trace the effects of modern industrial development and colonialism. Food, water, and other basics of life are all at stake. Finally, we discuss possible responses to this crisis looking to a number of intellectual genealogies from left to right.

IDS 30409. Inequalities: Poverty and Wealth in World History

(3-0-3) Beatty

The difference between rich and poor nations (and rich and poor individuals) is not, as Ernest Hemingway once said, merely that the rich have more money than the poor. It is a question of opportunity, itself structured by the political, economic, institutional, and social contexts for both nations and individuals. This course examines inequalities in the context of economic and social development in historical contexts. We focus especially on the long nineteenth century, roughly 1750 to 1930, but touch on deeper roots and enduring legacies for today’s world. We will examine factors that historically fostered inequality as well as the implications of inequality for social development, drawing cases from U.S., Latin America, Africa, Asia, as well as from Europe.

IDS 30410. Race, Ethnicity, and Indigeneity in Latin America

(3-0-3) Graubart

This seminar examines the historical production of race, ethnicity, and indigeneity in the Latin American context. We will begin with the creation of “Indians” by European colonists, who attempted to erase social differentiation in the peoples they conquered but then had to deal with the consequences of early forms of resistance and solidarity. We will then investigate the degree to which “race” and “ethnicity” were important concepts to non-Europeans in the colonial context, and the beginnings of scientific racism in the Americas. Slavery, especially in Brazil and the Caribbean, obviously added another dimension to social differentiation and the development of racial thinking, which we will investigate. The second half of the course will address contemporary issues that stem from these colonial concerns: nationalism, the romantic invocation of the indigenous past, cultural practices, land rights, political representation, and racism.

IDS 30411. African History to 1800

(3-0-3) Ocobock

This introductory course covers the history of Africa from earliest times until and the slow death of the slave trade in the 19th century. We will explore the formation of African societies and their interaction with harsh ecological surroundings as well as the expansion of African trading networks and emergence of strong African states and empires. We will also discuss Africa’s role in the production and sale of slaves around the globe and the implications of the global slave trade for African societies.

IDS 30500. Political Development: Lessons from Sub-Saharan Africa and Central America

(3-0-3)

This course will focus on the initiatives launched to foster development in Sub-Saharan Africa and Central America (Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua). What has been tried and what is the situation today? What are the constraints to social and economic development in those regions? What is being proposed now? We will focus on the current thinking on development and how the different countries in the regions have responded to it.

IDS 30501. Political Economy of Developing Countries

(3-0-3)

How do politics and economics interact to promote or deter the economic development of developing countries? Do least developed countries have any usable strategies to alleviate poverty and income inequality? This seminar aims at building on your existing knowledge of economics, political science, and global development to examine past, present, and future political strategies for developing nations to promote economic development. The course is divided in four parts. The first part will explore contending theories of economic development, and the common explanations for the failure of some states to achieve sustained economic growth. The second part will examine the politics of development policies, corruption, social development, and the role of foreign aid and international financial institutions. In the third part we will focus our attention on the political economy of democracy and on issues of poverty and inequality. The course concludes by examining selected case studies from Latin America, Africa, South East Asia, and Eastern Europe.

IDS 30502. Latin American Politics

(3-0-3)

This course is an introduction to Latin American politics. What are the major challenges facing Latin America in the new millennium? How are different countries facing these challenges? What are the origins of the current dilemmas and opportunities facing Latin America? This course is intended to give students an understanding of the major political and development challenges that Latin America has faced in the mid-20th to early 21st century. The course will survey the major theories and strategies of economic industrialization and neo-liberalism, and it will consider questions of reform, revolution, authoritarianism, and democracy. Throughout the course we will use case studies focusing on specific countries and specific problems.

IDS 30503. South Asian Politics

(3-0-3)

This course will present an overview of the politics of modern South Asia focusing on Afghanistan, Bangladesh, India and Pakistan. We will begin by studying the impact of the British colonial experience, the rise of nationalism and the emergence of independent nation states. To develop a broad understanding of the political and economic experience of the region we will spend time analyzing the four countries individually before moving on to explore four important themes in political science: first, regime choice and regime survival in the four countries; second, the role of women in the development experience; third, identity politics and the emergence of violent domestic and international movements; and fourth, international relations focusing on the role of three key actors—the U.S., China and the Middle East in regional politics.

IDS 30504. International Political Economy

(3-0-3) Dutt

This course examines the interaction of politics and economics in the international arena. We begin with a brief historical exploration of the international political economy, and introduce four analytical perspectives on state behavior and international outcomes. Topics include trade policy, foreign direct investment and multinational corporations, international capital flows, exchange rate regimes and currency unions (including European Monetary Union), financial crises, and the fight against money laundering and terrorist financing.

IDS 30505. Political Economy of Globalization

(3-0-3) Rosato

This course examines the intersection of politics and economics in an increasingly global world. Economic interdependence has increased dramatically over the past fifty years. While this has raised living standards in many countries, it has also given rise to new social, economic, and political tensions. This course offers an analytical framework for evaluating the consequences of globalization and provides an overview of several theoretical approaches to and empirical issues in today’s global economy. The course is divided into three main sections. The first part of the course focuses on understanding what is meant by ‘globalization’ as well as an introduction to several contending theories of globalization. The second part of the course will focus on managing globalization, and will evaluate different options available to states, institutions, and other actors. The final section of the class will be devoted to empirical issues associated with globalization. Topics discussed include: the environment, corruption, human rights, non-governmental organizations, democratization, and regional trading blocs.

IDS 30506. International Development

(3-0-3) Dutt

This course looks at why some countries are more economically developed than others, and why some are developing more than others, using a political economy perspective. It discusses alternative meanings and measures of development. It then examines alternative views on the constraints to development, at different levels of analysis, individual, sectoral, national and global. In so doing it analyzes economic factors, and their interaction with broader political, social and cultural factors, and explores both problems internal to countries and to those arising from international interactions and globalization. Finally, it critically examines different strategies and policies for development.

IDS 30507. Religion and Global Politics

(3-0-3) Driessen

The motivation behind this course is to introduce students to the role of religion in global politics, both in its theory and its practice. After framing the role of religion in world politics through the existing paradigm groups within International Relations theory, we will survey six current areas of scholarship which explore the intersection of religion and world politics. These will include the study of 1) religion as a non-state actor in the global arena, 2) religion as a generator of “civilization(s),” 3) religion as an inspiration for war and violence, 4) religion as an inspiration for peace and development, 5) religion as an element of foreign policy and 6) religion and state relations today. Students will have the opportunity

to use and critique the concepts introduced in the course by researching and writing a term paper on a case of religion intersecting with international relations today. Possibilities include, but are not limited to, the Iraq war debate; the EU vs. the crucifix debate; the Islam and Democracy debate; and the U.S. foreign policy debate over the engagement of the “global Muslim community.” Intro to International Relations is recommended but not absolutely essential as a course pre-requisite.

IDS 30508. Politics of Southern Africa

(3-0-3)

This course focuses on the key state of the region—the Republic of South Africa. After outlining the political history of apartheid, the phenomenon of Afrikaner nationalism, and the rise of African nationalism and the liberation movements, attention turns to the country’s escalating turmoil of the 1980s and resulting political transition in the 1990s. South Africa’s political and economic prospects are also examined. The semester concludes with a survey of the transitions that brought South Africa’s neighboring territories to independence, the destabilization strategies of the apartheid regime and United States policy in that region.

IDS 30509. Dictators, Democrats, Subjects and Citizens: African Politics Since Independence

(3-0-3)

This course will focus on the causes and consequences of political change in sub-Saharan Africa since the late 1950s and early 1960s. Special attention will be focused on the relationship between political change and economic/human development. The key questions this course will address include the following: 1) What explains the rise of post-colonial authoritarian regimes? 2) What explains the demise of post-colonial authoritarian regimes? 3) What might affect the variation in the extent to which Africans participate in politics, engage in protests, and join movements devoted to promoting democracy? 4) What explains the variation in the extent of democratization that has taken place across sub-Saharan Africa since the late 1980s and early 1990s? 5) Should it matter to the rest of the world that sub-Saharan African countries become more developed and democratic? 6) If it should matter, can/how can the United States and other countries promote development and democratization in the region?

IDS 30510. Contentious Politics and Resistance Movements

(3-0-3) Hui

This course analyzes prominent resistance movements in the twentieth and twenty-first centuries. We first examine the conceptual tools of contentious politics, domination and resistance, state-society relations, and violent vs. nonviolent strategies of resistance. We then examine various nationalist independence movements, revolutionary movements, communist insurgencies, civil wars, and peaceful democracy movements. To better understand resistance movements from the perspectives of leaders and participants, we will watch a series of documentaries and read the (auto-) biographies of Mahatma Gandhi, Nelson Mandela, Aung San Suu Kyi, the Dalai Lama, Wei Jingshen, and others. In analyzing democracy movements, we will further examine what the third wave of democracy entails, why some movements succeed while others fail, how new democracies should reconcile with past dictators, to what extent constitutional engineering can solve past problems and facilitate successful transitions, and why some new democracies remain fragile.

IDS 30511. Religion, Development and Democracy

(3-0-3)

The impact of religion on social and political change and the impact of social and political change on the influence of religion are immensely important topics. While many have claimed that religious faith communities essentially impede human progress, others have argued that human progress is impossible to explain without some reference to such faith communities. In this seminar, we will take a critical look at religion, particularly Christianity and Islam, and examine two major questions: (1) What effects, if any, do religious beliefs and institutions have on human development and the prospects for and the quality of democracy? (2) What effects, if any, do human development and democratization have on the relevance of religious beliefs and the influence of religious institutions?

IDS 30512. Politics and Development in Latin America

(3-0-3)

This course explores the interaction between politics and economics and their effect on economic development in different countries in Latin America.

IDS 30513. International Development in Theory and Practice: What Works in Development

(3-0-3) Reifenberg

This course on international development has three major purposes: 1) to examine diverse approaches to thinking about international development and processes that bring about individual and societal change; 2) to explore the role and constraints of development projects in areas such as poverty reduction, social development, health, education, the environment, and emergency relief; and 3) to develop practical skills related to project planning and management, negotiations, communications, and the evaluation of international development projects. This class aspires to develop relevant knowledge and practical skill for students interested in engaging in bringing about positive change in a complex world. The class is particularly relevant for students planning international summer service internships, studying abroad, or for those considering careers in areas related to social and economic development. The course will make use of specific case studies from Haiti, Peru, Uganda, Mexico, Bangladesh, Pakistan, and Chile, among others, drawing lessons from instructive stories of failure and inspirational stories of change.

IDS 30514. Human Rights and Human Wrongs

(3-0-3) Verdeja

This course will examine theories of human rights and their applications and implications for international politics.

IDS 30516. World Poverty and Inequality

(3-0-3) Dutt

This course is the seminar version of ECON 40850. Analysis of the trends, causes and consequences of the inequality between rich and poor nations, or what are called the North and South. The course uses theoretical, empirical and broader political-economy analyses to examine the implications of international trade, capital and labor movements, technological transfers and environmental interactions between rich and poor countries. Particular emphasis is given to globalization and its effects on poor countries.

IDS 30517. Dictators, Democracy and Development: African Politics Since Independence

(3-0-3)

This course will focus on the causes and consequences of political change in sub-Saharan Africa since the late 1950s and early 1960s. Special attention will be focused on the relationship between political change and economic/human development. The key questions this course will address include the following: 1) What explains the rise of post-colonial authoritarian regimes? 2) What explains the demise of post-colonial authoritarian regimes? 3) What might affect the variation in the extent to which Africans participate in politics, engage in protests, and join movements devoted to promoting democracy? 4) What explains the variation in the extent of democratization that has taken place across sub-Saharan Africa since the late 1980s and early 1990s? 5) Should it matter to the rest of the world that sub-Saharan African countries become more developed and democratic? 6) If it should matter, can/how can the United States and other countries promote development and democratization in the region?

IDS 30518. Politics of Southern Africa

(3-0-3)

This course focuses on the key state of the region—the Republic of South Africa. After outlining the political history of apartheid, the phenomenon of Afrikaner nationalism, and the rise of African nationalism and the liberation movements, attention turns to the country’s escalating turmoil of the 1980s and resulting political transition in the 1990s. South Africa’s political and economic prospects are also examined. The semester concludes with a survey of the transitions that brought South Africa’s neighboring territories to independence, the destabilization strategies of the apartheid regime and United States policy in that region.

IDS 30519. International Organizations

(3-0-3)

This course examines governance in international relations, including both formal and informal institutions, and the functioning of organizations such as the United Nations, International Monetary Fund, World Trade Organization, European Union, and multilateral development banks. Students will conduct research on topics including peacekeeping and humanitarian intervention, political conflicts surrounding trade liberalization, and assessment of economic development programs.

IDS 30520. Latin American Politics

(3-0-3) Gonzalez; Ocantos

This course is an introduction to Latin American politics. What are the major challenges facing Latin America in the new millennium? How are different countries facing these challenges? What are the origins of the current dilemmas and opportunities facing Latin America? This course is intended to give students an understanding of the major political and development challenges that Latin America has faced in the mid-20th to early 21st century. The course will survey the major theories and strategies of economic industrialization and neo-liberalism, and it will consider questions of reform, revolution, authoritarianism, and democracy. Throughout the course we will use case studies focusing on specific countries and specific problems.

IDS 30521. Globalization in Africa

(3-0-3)

This course explores globalization as a source of political change in different African countries.

IDS 30602. Chile in Comparative Perspective

(3-0-3) Valenzuela

This course provides a detailed analysis of the development of the Chilean economy, society, and policy since independence from Spain in 1818, drawing selected comparisons with other national experiences. It then discusses the validity of theoretical statements on central questions in the social science literature by examining them in light of the Chilean case. The main issues to be examined are the reasons for the successes or failures of Third World development, the origins and breakdowns of democracies, the characteristics of authoritarian regimes, and processes of restoring democracies.

IDS 30650. Chile—Church and State: 1960–2010

(3-0-3)

During the last fifty years the Republic of Chile has undergone rapid changes both in Church and State: From the politically conservative to a Socialist revolution to a military take over, and finally back to democracy. In view of these dramatic developments how might one predict the future of this exciting country?

IDS 30941. Doing Research in International Education

(V-0-V) Chattopadhyay

Corequisite: IDS 33940

This course is designed for students with a demonstrated interest and/or commitment in carrying out research, evaluation, teaching or service oriented engagements in education in international contexts. The course requires students' background knowledge in key issues of international educational development, as covered in course such as EDGE (ESS 33605) and EIP (ESS 30621). The course also requires students to come with a "live" research interest—which they will refine into a viable research inquiry and subsequently formulate into a viable research proposal. LEARNING OBJECTIVES: Having taken this course, students will: a) Acquire a broad foundation on research methods employed in international educational contexts; b) Become familiar with a critical body of scholarship through review of literature in their respective education research topic; and c) Fully develop a research proposal that would guide their education-related engagements overseas.

IDS 33201. Marxian Economic Theory

(3-0-3)

An introduction to Marxian economic analysis. Topics include the differences between mainstream and Marxian economics, general philosophy and methodology, Marxian value theory, and critical appraisals and current relevance of Marx's "critique of political economy."

IDS 33202. Economics of War and Peace

(3-0-3)

The course examines the consequences of wars, including international wars, civil wars and terrorism. It also examines approaches to peace building and post-war reconstruction. While it focuses mainly on economic factors at work and makes use of the tools of economic analysis, it adopts a broader political economy framework.

IDS 33203. Political Economy of Development

(3-0-3) Kim

This course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include; rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

IDS 33600. Can Latin American Social Inequality be Tamed?

(3-0-3) Martinez; Franzoni

Scholarly interest in Latin American welfare regimes has grown significantly in recent years. By addressing the most unequal region in the planet, experts grapple with the complex and dynamic relationship between social policies and structures as played out through families and labor markets. We will concern ourselves with novel research addressing gender relations as organizational pillars of welfare regimes and engage in South-South comparisons as we look beyond the largest and most studied Latin American countries (e.g., Argentina and Chile). Drawing from the work of leading scholars in the area, we will examine theories, methods, findings and policy implications of contemporary research as we struggle to understand one of the world's most daunting ethical and political questions: "can social inequality be tamed?"

IDS 33940. Education and Development in a Global Era

(3-0-3) Chattopadhyay

Forces of globalization are profoundly changing the experiences and opportunity structures of young people in an increasingly interconnected world. While there is a growing recognition that the knowledge-based global economy requires a new paradigm for education in the 21st century, a significant segment of the world's largest generation of adolescents remains vulnerable, disengaged and disenfranchised from education. Against this backdrop, this course will explore the critical issues confronting education in developing countries in different regions of the world. The course has a strong applied focus and the readings will be drawn primarily from policy documents on current topics in international educational development. At the same time, the underlying theoretical and conceptual issues will be accessible to students through supplementary research articles and critical commentaries. Learning objectives: students taking this course will: 1) gain a critical understanding of the broader global development context in which educational policy takes shape in low-income countries; 2) develop operational fluency in key contemporary policy issues and institutional actors in international educational

development; and 3) enhance their awareness of an educational development framework that is informed by the dynamic interdependencies of the global and the local.

IDS 40350. Conflict and Development

(3-0-3) Firchow

The aim of this course is to introduce students to the political and humanitarian dimensions of complex emergencies. Complex emergencies are situations of disrupted livelihoods and threats to life produced by warfare, civil disturbance and large-scale movements of people, in which any emergency response has to be conducted in a difficult political and security environment. The course will explore the challenges the development community faces when operating in complex emergencies and discuss the different stages of the conflict and development relationship. It will also look at the ways in which social and economic development can contribute to, or undermine, peace; the ways in which conflict complicates development; the various ways in which peace building strategies can impact development and, finally, explore the transition from relief to development.

IDS 40408. Ghandi's India

(3-0-3) Sengupta

The dominant figure in India's nationalist movement for nearly thirty years, M.K. "Mahatma" Gandhi has also been the twentieth century's most famous pacifist, and a figure of inspiration for peace and civil rights movements throughout the world. This course offers an examination of Gandhi and the nature of his unconventional and often controversial politics. It charts Gandhi's career against the background of events in London, South Africa, and India; examines the evolution and practical application of his ideas and techniques of non-violent resistance, and his attitudes toward the economy, society and state. Gandhi's influence on Indian politics and society is critically assessed and his reputation as the "apostle of non-violent revolution" examined in the light of developments since his death in 1948. Some of the questions that will be discussed are: how far did the distinctive character of Gandhian politics derive from his absolute commitment to India's nationalist struggle? Was his success due to the force and originality of his political ideas and his advocacy of nonviolent action? Can his achievements be explained by political wiliness and pragmatism, or by willingness to embark on new experiments with the truth? Though helpful, a prior knowledge of Indian history is not required for this course.

IDS 40651. Shiism and Catholicism

(3-0-3) Rasoulipour

Most Western discussions of Islamic matters or the Arab world tend to focus, often implicitly, on Sunnism. This is perhaps to be expected, since the overwhelming majority of the world's 1.5 billion Muslims are Sunnis. Shias number from 150 million to 200 million people, or 10 to 15 percent of the total. In the Islamic heartland, from Lebanon to Pakistan, however, there are roughly as many Shias as there are Sunnis, and around the economically and geostrategically sensitive rim of the Persian Gulf, Shias constitute 80 percent of the population. The divide between Shiism and Sunnism is the most important in Islam. The two sects parted ways early in Muslim history, and each views itself as the original orthodoxy. Their split somewhat parallels the Protestant-Catholic difference in Western Christianity. This new course offers a panoramic survey of the Shia Islam and its commonalities with Catholicism. The course will be divided into three sections. The first part of the course will deal with the history and origins of Shiism from its birth in the Arabian peninsula in the seventh century. We will look at the history of the early Islam and the most important events which split the two major Islamic traditions. In the second unit, the Shia doctrines, practices, political leadership and movements, gender, social relations and cultural norms will be explored. The last portion of the course will focus on the similarities and common grounds between Si-ism and Catholicism in which we will hopefully uncover the roots that remain deeply entangled and intertwined in the histories and philosophies of Christians and Muslims.

IDS 40800. Water, Disease, and Global Health

(3-0-3) Shrout

The main emphasis of the course will be to study the diseases important to both civilized societies and the third world. Basic principles of public health, epidemiology, infectious disease microbiology, and engineering application will be learned utilizing both local and global examples. Particular emphasis will be given to diseases transmitted by water. As a complement to environmental design classes, this class will focus upon the disease agents removed in properly designed municipal water and waste systems.

IDS 43601. Global Sociology

(3-0-3) Smith

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline as one that seeks to understand human society as a nested collection of interdependent societies. In particular, the course draws from world systems theory and institutional approaches—as well as from related disciplines such as anthropology—to consider how the "development project" of the 20th century evolved over time. The impacts of global economic integration on cultural and institutional change, inequality, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how the World Bank, IMF, and United Nations are impacting the experiences of people around the world, as well as for those who expect to do further research in the field.

IDS 43603. International Migration and Human Rights

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term, with a wider coverage of international migration experiences in the world and an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States' migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

IDS 43605. Governance and Africa

(3-0-3) McDonnell

In this course we will try to understand both the successes and failures of governance on the African continent. Why do some states provide reasonably peaceful political climates while others have been torn by decades of civil strife? What effect did the colonial past have on the governments we see today? Why have some states developed a reputation for reasonably effective governance while others are among the most corrupt governments on the planet? How have states dealt with varied health and educational challenges, like low literacy rates and high infant mortality? These are just a few of the questions we will address in this course. Each student will become an expert on one of the countries on the continent, and assignments are designed to help cultivate that expertise.

IDS 45100. Trade and Globalization: From 100,000 B.C. to the Present

(3-0-3)

The idea of globalization as a recent phenomenon is firmly grounded in the popular conscious. In the minds of most people, globalization and the accompanying processes of global commerce and trade are seen either as the solutions to the world's problems or the causes thereof. In this course, we will address the problems with these ideas as we explore the history of long-distance human interactions going back into the early history of Homo sapiens from the emergence from Africa ca. 100,000 B.C. to the present. Topics covered will include human migrations, trade, exchange, and other interactions from our Paleolithic ancestors to the rise of

settled cultures and complex societies in both the Old and New Worlds. Particular focus will be placed on the role of long-distance exchange, trade, and commerce on human activities as ideas, goods, and peoples moved across deserts, mountains, and oceans. In-class discussions will be based on readings from anthropology, archaeology, history, economics, business studies, and political science, as well as documentaries and film to address issues of similarity and difference between past and contemporary globalization processes. The objective of the course is to understand globalization and trade as universal yet varying forces in human social and cultural evolution.

IDS 45101. Global Crime and Corruption

(3-0-3)

As the world of the 21st century globalizes, so too does crime. Millions of people and trillions of dollars circulate in illicit economies worldwide. This represents power blocks larger and more powerful than many of the world's countries. This class will look at what constitutes the illegal today, who is engaged in crime and corruption, and what kinds of economic, political and social powers they wield. It will also look at the societies and cultures of "outlaws." For example, internationalization has influenced crime in much the same ways that it has multinationals and nongovernmental organizations: criminal networks now span continents, forge trade agreements and hone foreign policies with other criminal organizations, and set up sophisticated systems of information, exchange, and control. Anthropology—with its studies of cultures—provides a dynamic approach to the illegal: what customs inform law abiders and criminals, what values guide their actions, what behaviors shape their worlds? The course will explore the many kinds and levels of criminality and corruption: how do we consider the differences (or similarities) among, for example, drug and arms smugglers, white collar corruption, gem runners or modern day slavers, and governmental or multinational corporate crime? What impact does each have on our world and in our lives? What solutions exist? Class is interactive in nature, and in addition to the normal reading and writing, students will do an anthropological class project on a topic of their choice concerning global crime and corruption.

IDS 45102. Anthropology of Human Rights

(3-0-3)

This seminar will consider several key issues in global human rights particularly salient to anthropology: the individual versus the community, the local versus the regional or national, and classic relativism versus universalism. Human rights will be investigated as a practice and as a form of discourse, developed in the West and adapted to varying extents around the globe. We will engage in service-learning with immigrant communities in the Michiana area to delve in depth into the question of political asylum, a particularly central issue today when rights and security often weigh against each other—and anthropological knowledge can help in resolving complex questions. Upper undergraduate and graduate students in peace studies, law, sociology, political science and American studies may find this course of interest, as well as anthropologists. Our readings include strictly legal explanations of international human rights as well as personal narratives and various interpretive essays and advocacies.

Latin American Studies

LAST 10500. Beginning Quechua I

(4-0-4) Maldonado; Gomez

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Quechua culture is also encouraged through readings and class discussions.

LAST 20002. Societies and Cultures of Latin America

(3-0-3)

This course introduces students to the diverse cultures and societies of Latin America through historical, ethnographic and literary study. Contemporary issues of globalization, violence and migration will preoccupy the discussion of Central and South America and the Caribbean today.

LAST 20003. Witchcraft and Magic in the Contemporary World

(3-0-3)

Witchcraft and the ritualistic use of magic for shaping the future and controlling the present have been a part of human development from the earliest times. The advent of science and technology has only modified or altered the role and significance of witchcraft in contemporary societies, as witchcraft and magic services and their providers have gone online. Anthropological studies on witchcraft in contemporary societies have pointed out the relationship between the development of witchcraft and the prevailing economy, politics, public health, culture and the environment. This course will explore the role and evolution of witchcraft in modern societies of Africa, Asia, and Latin America. Through assigned readings, in-class discussions, movies, documentaries, and ethnographic projects, we will seek to understand why witchcraft and magic and associated beliefs are universal phenomena in human societies and how these practices themselves adapt to the changing world.

LAST 20100. Principles of Development Policy

(3-0-3) Solis

The objective of the course will be to familiarize students with the concept of development, the incidence of underdevelopment, some major theoretical controversies, and specific policy issues with examples drawn especially from Latin America. The course will explore the complex connections between theory, policy, and practice. At the end of the course students will be able to identify the contribution of economic tools to development policies, examine these tools within the context of actual agenda-setting, and make inroads into the challenge of incorporating institutional and ethical considerations into the design and implementation of development policies.

LAST 20151. Women in the Americas

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

LAST 20152. Latino Literature

(3-0-3)

A survey of Latino fiction, poetry, and other literary works.

LAST 20153. Caribbean Women Writers

(3-0-3)

A sampling of novels written by Caribbean writers, with a particular emphasis on such themes as colonization, madness, childhood, and memory.

LAST 20154. Literature of the Early Americas

(3-0-3)

Close examination of selected works written by Americans from the 17th century through the Civil War.

LAST 20400. Studies in Spanish-American Culture

(3-0-3)

An introduction to the scope and variety of Spanish-American culture. Readings at an intermediate level in history, art, culture, and society.

LAST 20402. La Telenovela

(3-0-3) Barry

In this course you will explore the genre of the telenovela (a major social, cultural, political, and economic force in Latin America and, more recently, in the United States) by reading about the genre (in Spanish) and watching two condensed telenovelas (also in Spanish). You will demonstrate your understanding of the telenovela and its importance in Hispanic culture through writing and discussion and through application of these ideas as you write, produce, direct, act in, record and edit a mini-telenovela as a class. During this process you will learn and apply basic production (videography) and post-production (computer-based video and audio editing) techniques.

LAST 20403. Studies in Andean Culture

(3-0-3)

An intermediate Spanish course focusing on Andean culture and the Inca empire.

LAST 20550. Globalization, Coffee and Fair Trade

(3-0-3)

This special spring '09 course will examine globalization and its effects on people at the global "margins," especially in economically-depressed Central America. The drop in world coffee prices, the rise of the maquila industry, the increase of emigration from Central America are just a few of the topics that will be considered during this course. The course will also examine how lifestyle choices and consumption habits in the U.S. affect farmers and artisans in the Third World. A key focus of the course will be the examination of the international fair trade movement, both a result of and a response to globalization. A required one-week cross-cultural experience in Guatemala during spring break will bring students face-to-face with some of the people who are most deeply impacted by economic globalization. During the trip, students will meet and hear from Guatemalan coffee farmers large and small as well as from economists and sociologists with differing views on the subjects of "fair trade" and "free trade." You must be willing and able to travel to Guatemala from March 7–15 in order to pass this class. Students will use conceptual tools from global sociology, economic sociology, and social movement theory. Students in other majors such as finance, marketing or economics, will learn how economic sociology sheds light on economic behavior and international economic forces. The course is a natural fit for sophomore or junior sociology majors and Latin American studies minors but seniors are also welcome. The course content and the cross-cultural component would also make it an ideal elective for majors in marketing; Spanish; and film, theater and television. This course is capped at nineteen students and all registering students must receive approval for enrollment by December 10, 2008.

LAST 20725. Pirates, Planters and Peasants: Caribbean Experiences in the Past

(3-0-3)

The Caribbean is often depicted as a sea inhabited by pirates, filled with exotic islands, picturesque beaches and bucolic landscapes. What is often overlooked is the culture and history of the people who actually lived there. Who were the pirates of the Caribbean, why were the islands so important to European powers, and what were the effects of slavery? Focusing on Jamaica, Belize, and Barbados, this course charts the emergence of a multi-ethnic anglophone Caribbean through an examination of plantation colonies and the aftermath of slavery. Specifically it will focus on cultural encounters between Native Americans, Africans, and Europeans through a combination of ethnography, history and archaeology.

LAST 20751. Latin American Theater

(3-0-3)

This course will serve as a basic introduction to plays from Latin America. Models from South America, Central America, North America and the Caribbean will be included in order to give students a general overview of significant contemporary

plays (in English) from a sampling of countries in the Spanish-speaking world. Students will read plays and articles, see and analyze footage of performances (when available), give creative and/or historical presentations, participate in discussions about the theatrical methods and materials, and further research areas that particularly interest them. Making connections between ideas and life experiences, while deepening appreciation for the arts and literature in Latin America are crucial goals of this class.

LAST 27501. Intermediate Quechua I

(3-0-3)

This course is by Department approval only for the student who wants to learn and study Quechua at an intermediate level.

LAST 30001. Caribbean Diasporas

(3-0-3)

This course explores the transnational orientations and the multidimensional consequences of movement from the Caribbean as it affects sites in Miami, London, Paris, or Brooklyn as well as Havana, Jamaica, Haiti, or Belize. Readings include works of ethnography, fiction, and history that pose questions about how the construction and reconstruction of family bonds, community identity, religion, political power, and economic relations will be treated in the domestic and the global context.

LAST 30002. Archaeology of the African Diaspora

(3-0-3)

This course is designed to serve as an in-depth undergraduate level introduction to archaeological perspectives on the African diaspora. In this course, we examine the formation and transformation of the black Atlantic world beginning with the transatlantic slave trade to the middle of the 19th century through the study of archaeological and historical sources. The emphasis in this course is on English-speaking African America, where the vast majority of archaeological investigations have been undertaken. A major objective of this course is to understand the material world of communities of the African diaspora within the context of the history and historiography of the black Atlantic. This course is organized around the following themes: 1) diaspora and the Atlantic world; 2) material life of the diaspora; 3) diverse communities of the diaspora; and 4) intersections of race, class, gender, and representation.

LAST 30003. Immigration in Comparative Perspective

(3-0-3)

How do people in immigrant-receiving countries form their attitudes toward immigrants? What are the unintended consequences of increased governmental investments in border and immigration control? What are the differences between refugees and other migrants? How is immigration related to the 2005 riots in France? In this course we will be able to examine such questions, and more generally to understand the causes, experiences, and consequences of transnational migration. We will acquire a sound interdisciplinary understanding of migration in its historical, social, political, and cultural facets. Diverse aspects of immigration history, policy implementation and migrants' lives will be examined, with fieldwork accounts from countries of origin and from the United States, Europe, and Japan. Issues to be addressed include ethnic neighborhood formation; gender and class differences in migration and settlement; religion; identity formation; border enforcement; racism; and mass-media representation.

LAST 30004. Immigration in Global Perspective

(3-0-3)

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How is immigration related to urban "immigrant riots"? And what can anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the U.S., Europe, Australia, and Japan will enable us to appreciate both global and U.S. distinctive trends.

Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class; the mass media; border enforcement; racism; the economy; territory and identity formation, and religion.

LAST 30100. Economic Development of Latin America

(3-0-3)

This course is an introduction to the study of Latin America's economic development, its historical background and contemporary problems. Part 1 provides a historical overview from independence in the early 19th century to post-war industrialization in the 20th century. Part 2 examines structural problems that are common to most countries in the region and reviews the ideologies and debates that have emerged around them. Parts 3 and 4 of the course discuss some major contemporary policy issues, focusing the attention on the market-oriented reforms since the mid-1980s and the impact of the new economic model on equity and growth performance.

LAST 30101. Global Economic History

(3-0-3)

The course presents a comparative economic history emphasizing the sources of long-term economic growth. The comparative analysis is used to explore different development strategies around the world over the past two centuries, from the British Industrial Revolution to the contemporary developing countries, focusing on examples from Europe, Latin America, and North America. Subjects include population change, migration, technological change, industrialization, market integration, education, inequality, and government expenditure. Each topic is discussed through a current economic policy concern. Special attention will be placed upon the role played by the natural resources endowments and institutional change. The last section of the course centers around the debates on globalization and inclusive development. Does going global foster growth? Who gains and who loses?

LAST 30102. Development Economics

(3-0-3)

The current problems of Third World countries are analyzed in a historical context, with attention given to competing theoretical explanations and policy prescriptions. The course will combine the study of the experiences of Latin American, African and Asian countries with the use of the analytical tools of economics.

LAST 30150. Women in the Americas

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

LAST 30200. History of Modern Mexico

(3-0-3)

This course examines the complex nation that is Mexico in the 20th century, its challenges and its prospects. Focusing primarily on the period since 1870, we will study the social, economic, political, and cultural forces that have shaped the history of the United States' southern neighbor.

LAST 30201. Indigenous and Colonial Mexico

(3-0-3)

This course investigates the history of Mesoamerica from the Olmec, Mayan, and Aztec societies to Mexico's independence from Spain after 1800. It will examine the nature of several indigenous societies, their conquest and domination by Europeans, post-conquest debates concerning Indians' nature and colonial Indian policy, the structure of colonial society, including relations between Indians, Africans, and Europeans, Catholic conversions and the role of the Church, and finally the causes of independence. We will use readings, lectures, discussions, archeological evidence, film, and literature throughout the course. Students need not have any background in Latin-American history.

LAST 30205. Modern Latin America

(3-0-3)

A survey of modern Latin-American history.

LAST 30206. Inequality and Development in Latin America

(3-0-3)

Any quick survey of contemporary Latin America quickly uncovers a glaring range of social inequalities. Sharp divides and diverging conditions separate individuals and groups along economic, political, ethnic, educational, and gender lines, to name a few. Although nearly all the earth's societies exhibit social inequalities, Latin America's have proved particularly endemic, enduring, and intractable; they have fundamentally shaped the region's potential for democratic governance and economic development; they are also deeply rooted in the region's past. This course will begin by examining manifestations of social inequalities in the region today. We will then spend most of the semester tracing the roots of today's conditions through the region's history. Students need not have any background in Latin-American history.

LAST 30207. Religion and Social Movements in Latin-American History

(3-0-3)

The purpose of this course is to give students an understanding of the role religion has played in Latin-American history from the colonial period to the present. We will focus specifically on how religion mediates relations between culturally distinct peoples during points of encounter and the role it plays in social movements. Religion in Latin America served paradoxically as a means of and justification for conquest but also at times as a foundation for subordinate people's resistance to domination. We will examine this dynamic as it evolved in successive efforts by outsiders to impose control over people of indigenous and African descent. The course will focus on Spanish proselytization and its results during the colonial period, millenarian movements by people of indigenous and African descent during the nineteenth century, and American Catholic and Protestant mission endeavors and their outcomes in the twentieth century.

LAST 30208. Race and Nation in Latin American History

(3-0-3)

This course offers a critical analysis of the particular representations of race and nation as presented in film, art, and essays from the colonial to the current era in Latin America. Utilizing these materials we will examine issues of independence, statehood, slavery, revolution, wealth, poverty, education and gender in public culture.

LAST 30209. Colonial Latin America

(3-0-3) Graubart

Corequisite: HIST 32901

When Columbus stepped ashore in the Caribbean in 1492, he set in motion a process that led to the creation of wealthy Spanish and Portuguese empires in the Americas, the genocide of countless numbers of indigenous men and women, the enslavement of millions of African men and women, and the eventual formation of a variety of independent states competing in the world economy. In this semester-long survey, we will examine topics in this history that will allow us to consider how history is produced as well as what happened in the past, from various perspectives, from elite colonial administrators and merchants to indigenous peasants and formerly enslaved men and women.

LAST 30210. Chronicles of the Conquest of LA

(3-0-3)

This seminar examines key aspects of the conquest of Latin America through readings of chronicles and other texts written by Spaniards and Amerindians in the 15th–17th centuries. We will focus upon the ways in which Spaniards and Amerindians theorized and explained their experiences, and their representations of themselves and their "others." In particular, we will pay attention to the beginnings of modern notions of race and ethnicity through discussions of barbarians, wildmen and cannibals, among other "types" important to the colonial encounter.

LAST 30211. Andean History and Ethnohistory

(3-0-3)

Corequisite: HIST 32929

The Andean countries—the area occupied by the Inca State at the height of its power—are modern-day Ecuador, Peru and Bolivia, as well as the northern half of Chile and the northwest of Argentina. This region is marked by geographic extremes (snow-capped mountain ranges, arid deserts, rainforests and lots of rocky terrain in between), as well as a complex and often violent political and social history. In this course we will survey the ways that Andean peoples have adapted and contributed to the formation of their societies, from pre-Columbian civilizations, most notably the Inca, to the invasion of Europeans in the 16th century, to the modern states struggling with questions of political integration, economic development and foreign intervention. Our readings will come when possible from primary sources, including archaeological artifacts and first person accounts, to allow for an ethnohistorical approach to these complex cultures.

LAST 30212. United States Operations in Central America

(3-0-3)

As European countries furthered their economic penetration of Africa and Asia during the 19th century, the United States continued its westward expansion by extending its borders to the Pacific and securing its economic and political dominance throughout the Latin American hemisphere. This course examines the social, cultural and political repercussions a broad range of U.S. operations had in Central America since the writing of the Monroe Doctrine in 1823 until the fall of communism in the late 1980s, including “dollar diplomacy,” CIA-sponsored coups, paramilitary training of “death squads,” and overt military occupations.

LAST 30213. Caribbean History: From Colonization to Emancipation

(3-0-3)

“Sun, Sex & Fun” is how the global tourism industry often packages the Caribbean to its potential travelers. In this course we will unpack such simplistic representations of the region. Students will be introduced to the diverse experiences and cultures of the peoples that made up the Caribbean from colonization in the 15th century to slave emancipation in the 19th century. The four major themes that we will examine are indigenous peoples and European encounters; the laboring lives and the cultural worlds of enslaved Afro-Caribbean peoples; resistance and rebellion; abolition and emancipation. In this course we will watch films, use pictorial sources, slave narratives and diaries to capture the commonality of the experiences of the peoples of the Spanish, French, British and Dutch Caribbean.

LAST 30214. Slavery in the Atlantic World

(3-0-3)

This survey course explores the role of coerced African labor in the birth of the Atlantic World. What do we mean by Atlantic World? What do we mean by slavery? What varied and nuanced claims to humanity did Africans make against a dehumanizing labor system? How did sexuality and gender norms shape the experiences of slavery for men and women? Together we will examine slave autobiographies, travel diaries, and pictorial sources to address these questions. We will focus on the peoples of West Africa, Brazil and the Caribbean who were enslaved from the fifteenth to the nineteenth century.

LAST 30215. Latin American History through Film

(3-0-3)

Corequisite: HIST 31900, HIST 32900

This course offers an introduction to the history of Latin America through the study of film (in combination with more traditional print sources).

LAST 30216. Latin American Independence

(3-0-3)

This course explores the independence of Spanish America (1808–1826), a transformative period in the history of Latin American politics, culture, and society that turned the people of Spanish America from royal subjects into republican citizens. Students will probe both the changes and continuities in politics between colonial rule and emerging nation-states in Latin America. Topics will include the period

of Bourbon reform, a project of the Spanish Crown that attempted to modernize the Spanish colonies; the emergence of modern political culture seen in public opinion, electoral processes, and the impact of the liberal Constitution of Cadiz; wars of independence that made citizens-soldiers; the contrasting roles played in these dramas by elites and indigenous and enslaved people; the liberal construction of a myth of racial equality; and the formation of centralized governments. Central to the class will be the scrutiny of a significant set of primary sources regarding these issues and engagement of historiographical debates about the analyzed topics.

LAST 30217. Caribbean History After Slavery, 1804–1959: Adjusting to Freedom and Fighting for Independence

(3-0-3)

This course explores the history of the Caribbean from the destruction of slavery in 1804 to the Cuban Revolution of 1959.

LAST 30218. The Mexican Revolution: One Hundred Years of Images and Interpretations

(3-0-3)

This year marks the 100th anniversary of the Mexican Revolution. Conflicting interpretations and a massive amount of secondary literature, films, and artistic expressions have been generated over the last century to highlight the significance of this “first world revolution of the 20th century.” This course examines the multiple and diverse images and interpretations that have been produced over the last century of the Mexican Revolution on the part of historians, the Mexican state, its cultural industry, political activists, international actors, and Mexican Americans living in the United States. The goal of the course is to provide students with a clear understanding of the origins, outcome, impact, and multiple legacies of the Mexican Revolution as interpreted in both Mexico and the United States with particular emphasis on the armed, post-revolutionary, and institutional phases, from 1910 to the 1970s.

LAST 30219. Afro-Brazilian History

(3-0-3) Graham

Brazil has more people of African descent than any other country in the world, other than Nigeria. This fact makes it impossible to understand the history of this South American nation, the fifth largest in the world, or the history of race broadly, without centralizing the experience of black Brazilians. This course will begin with the transatlantic slave trade (during which more slaves landed in Brazil than any other nation) and will end with the modern day Afro-Brazilian movement for equality and the difficulties they face. Along the way, we will cover powerful runaway slave societies, the role of Afro-Brazilians in abolition, the challenges confronted in freedom, black political organization in the 20th century, Afro-Brazilian music traditions, Afro-Brazilian religious practices, and the relationship between such manifestations of black culture and the Brazilian state. We will attempt to understand what has been unique about black history in Brazil, and what has been reflected in the broader experience of blacks in the New World.

LAST 30220. Military Regimes and “Dirty Wars” in Latin America

(3-0-3) Hurtado

Between 1964 and 1990 most South American countries lived under dictatorial military regimes. In this period of extreme political radicalization, these societies were divided alongside contending visions of their national states. Under the premise that they were assuming office in order to save their nations, the South American military established regimes characterized by widespread repression, human rights violations and impunity. Violence, however, was resisted by different sections of society and a particular type of motherhood—embodied by the women who looked for their missing children—acquired subversive connotations in countries like Argentina and Peru. In this course we will seek to understand why military institutions played such a prominent role in the region in the twentieth century, how their doctrines of national security and U.S. assistance enabled them to assume power, and the mechanisms that the military used in order to establish cultures of fear and death in their countries. We will also focus on the responses by individuals and organized civil society to state repression and violence. Although the course keeps a regional approach, it pays particular attention to three

countries: Chile, Argentina, and Peru. What were the similarities and differences among the “dirty wars” occurred in these countries? How did the categories of class, gender and race interplay in the implementation of military and insurgent violence? What memories about repression were crafted in these countries? How did successor regimes make a break with the past, establish a new set of social norms, and work toward the administration of justice, redress and reconciliation? We will approach to this subject by using a variety of primary and secondary sources, fiction and documentary films, as well as elements of pop culture. We aim to see how these lengthy military and authoritarian interventions have shaped present-day societies in South America, and what mechanisms Chile, Argentina and Peru have established to deal with the legacies from their troubled pasts.

LAST 30221. Slaveries in Latin America

(3-0-3) Graubart

Corequisite: HIST 32904

This course examines the experiences of Atlantic slavery in the Latin American world. We begin by thinking about the various ways that enslavement was justified in Western Europe, from the Greek and Roman worlds, through the kidnapping for ransom slavery that characterized the Mediterranean basin. We follow Portugal's unsuccessful attempts to conquer parts of western Africa, and the ensuing introduction of larger numbers of (unransomable) men and women into Iberian domestic slavery, which then coincided with Castile's conquest of the Americas, and the replacement of scarce indigenous labor with Africans. The main part of the course will look at the various experiences of African men and women in the Spanish and Portuguese empires, from the kinds of labor they provided to the cultural worlds they built for themselves, often with the interactions of European and indigenous peoples. We will pay special attention to forms of resistance, from attempts to create autonomy in the church to moments of outright rebellion, culminating in the Haitian Revolution, the first truly successful slave revolt at led to the second free nation in the Americas. The course will end by considering various calls for abolition over time, and the slow end of slavery after the movements for independence.

LAST 30222. Race, Ethnicity and Indigeneity in Latin America

(3-0-3) Graubart

This seminar examines the historical production of “race,” ethnicity, and indigeneity in the Latin American context. We will begin with the creation of “Indians” by European colonists, who attempted to erase social differentiation in the peoples they conquered but then had to deal with the consequences of early forms of resistance and solidarity. We will then investigate the degree to which race and ethnicity were important concepts to non-Europeans in the colonial context, and the beginnings of scientific racism in the Americas. Slavery, especially in Brazil and the Caribbean, obviously added another dimension to social differentiation and the development of racial thinking, which we will investigate. The second half of the course will address contemporary issues that stem from these colonial concerns: nationalism, the romantic invocation of the indigenous past, cultural practices, land rights, political representation, and racism.

LAST 30223. Experience of Conquest

(3-0-3) Fernandez-Armesto

The aim of this class is to try to understand what conquest, as we have traditionally called it, meant to the people who experienced it in some parts of the Americas that joined the Spanish monarchy in the sixteenth century. We'll concentrate on indigenous sources—documentary, pictorial, and material—and try to adopt the indigenous point of view, without neglecting sources mediated by Europeans. Although the class will concentrate on selected cases from Mesoamerica, the lecturer will try to set the materials in the context of other encounters, both within the Americas and further afield; and students will be free, if they wish, to explore case-studies from anywhere they choose in the Americas (in consultation with the lecturer and subject to his approval) in their individual projects.

LAST 30224. History of Brazil

(3-0-3) Graham

In this course, we will study the history of the country now characterized as a country of the future. With the world's fifth largest population, seventh largest economy, vast resources, growing middle class, complicated race relations, shocking disparity between rich and poor, and world-famous Carnival and soccer, Brazil has garnered attention globally and will only continue to do so as it prepares to host the Olympic Games and the World Cup. The course will cover many other themes, including: the indigenous populations of the Amazon and other regions; slavery; the Portuguese empire; massive immigration from countries like Japan, Germany, Italy; abolition; race relations; two periods of dictatorship; involvement in World War II; redemocratization; and emergence as influential economic powerhouse.

LAST 30225. Inequalities: Poverty and Wealth in World History

(3-0-3) Beatty

The difference between rich and poor nations (and rich and poor individuals) is not, as Ernest Hemingway once said, merely that the rich have more money than the poor. It is a question of opportunity, structured by the political, economic, institutional, and social contexts for both nations and individuals. This course examines inequalities in the context of economic and social development in historical contexts. We focus especially on the long nineteenth century, roughly 1750 to 1930, but touch on deeper roots and enduring legacies for today's world. We will examine factors that historically fostered inequality as well as the implications of inequality for social development, drawing cases from U.S., Latin America, Africa, Asia, as well as from Europe.

LAST 30307. U.S.-Latin American International Relations

(3-0-3)

This course examines the international relations of Latin America with an emphasis on what determines U.S. policy toward Latin America, and the policies of Latin-American states toward the United States, other regions of the world, and each other. It analyzes recurring themes in U.S.-Latin American relations, including the response of the United States to dictatorships, expropriations of U.S. owned property, and revolution. It also studies new directions and issues in Latin America's international relations, e.g., trade policy, the environment, migration, and drugs in a post-Cold War world.

LAST 30308. Latin-American Politics

(3-0-3) Gonzalez Ocantos

This course is an introduction to Latin-American politics. What are the major challenges facing Latin America in the new millennium? How are different countries facing these challenges? What are the origins of the current dilemmas and opportunities facing Latin America? This course is intended to give students an understanding of the major political and development challenges that Latin America has faced in the mid-20th to early 21st century. The course will survey the major theories and strategies of economic industrialization and neo-liberalism, and it will consider questions of reform, revolution, authoritarianism, and democracy. Throughout the course we will use case studies focusing on specific countries and specific problems.

LAST 30311. Law and Democracy in Latin America

(3-0-3)

This course explores many of the challenges to the rule of law across Latin America, and their connection to democracy. We will begin by examining the relationship between law and democracy, then look at a series of issues that illustrate the strength or weakness of the rule of law in the region. Rather than focusing on one country at a time or a few countries in depth, we will use events and systems in various countries as illustrations of important themes. We will then look at the possible consequences of these challenges for democracy in the region, and possible solutions. The course materials will at times cover difficult and controversial topics such as violence, human rights violations, and corruption. By the end of the course you will have acquired some basic information about Latin American legal systems, and some basic concepts about the different ways courts work in that part

of the world. More importantly, however, you will have a greater understanding of what a robust democracy should look like, and where different countries fall short. You should be able to engage in a discussion about the role courts and laws do play, should play and can play in the (democratic) political systems of Latin America, and its potential for improvement.

LAST 30312. Politics and Development in Central America

(3-0-3)

This course will explore the impact that politics and politicians have had on development in Central America. It will begin with a discussion of the concept of development and how we attempt to measure it. It will then proceed to review the different approaches used to spur development and what conventional wisdom holds today to be the determinants of growth. After this, it will review the socio-economic indicators of Central America and how they have evolved with time. It will subsequently study how politics and politicians, through current constitutions, laws, institutions, political culture and practice have affected the determinants of growth. It will close with a discussion of the changes needed to foster high, sustainable and equitable growth in the region.

LAST 30314. Politics and Institutions in Latin America

(3-0-3)

This course aims at enabling students to understand politics in the Latin American region by introducing important concepts of comparative politics and discussing, from a comparative perspective, institutional components and configurations of Latin American countries. We will focus on the question of how institutional frameworks influence policy decisions and actors' behavior, that is, how they affect governability and representation. The course will revolve around central issues such as electoral systems, party system, legislative decision-making and executive-legislative relations, and representation. One important aspect of the course is to get students acquainted with quantitative indicators of comparative politics that not only help to map representation, but also to understand some puzzles of policy-making we will encounter throughout Latin American countries. Thus, the course will help students to better understand democratic representation as well as quantitative approaches to the study of democratic institutions.

LAST 30315. Globalization

(3-0-3)

This course will examine the movement of money, goods, information, and cultural norms that are collectively known today as "globalization." We will consider the pros and cons of the roles played by the institutions that enforce growing financial and trade integration and the international promotion by governments and transnational activists of democracy and human rights. It will also highlight the cultural reactions to globalization, including the resurgence of nationalism, ethnic identities and religious fundamentalism. Special emphasis will be placed on contrasting the approach of the U.S. and other advanced industrial and developing countries.

LAST 30316. Law and Democracy in Latin America

(3-0-3)

Democracy and the rule of law seem to be the prescription for what ails the developing world. But they are harder to put into practice than they at first appear. This course explores many of the challenges to the rule of law across Latin America, and how they affect the quality of democracy in the region. We begin by examining the meaning of democracy and its relationship to the rule of law. Then we look at a series of issues that illustrate the strength or weakness of the rule of law in the region. We use academic writings primarily, but also movies, news reports and statistical reports to examine topics such as violence and crime, human rights violations, judicial independence and corruption. Rather than focusing on one country at a time or a few countries in depth, we will use events and systems in various countries as illustrations of important themes. We will then look at the possible consequences of these challenges for democracy in the region, and possible solutions.

LAST 30317. Campaigns and Elections Around the World

(3-0-3)

This course examines campaigns and elections in comparative perspective.

LAST 30318. Political Development: Lessons from Sub-Saharan Africa and Central America

(3-0-3)

This course will focus on the initiatives launched to foster development in sub-Saharan Africa and Central America (Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua). What has been tried and what is the situation today? What are the constraints to social and economic development in those regions? What is being proposed now? We will focus on the current thinking on development and how the different countries in the regions have responded to it.

LAST 30400. Survey of Spanish-American Literature I

(3-0-3) Anadon

A general introduction to and survey of major works of colonial and 19th-century literature up to modernism.

LAST 30401. Survey of Spanish-American Literature II

(3-0-3) Heller; Moreno

A survey of literary trends and major figures in modern Spanish-American literature from 1880 to the present. Readings of selected texts in prose, poetry, and theatre.

LAST 30500. Brazilian Short Story

(3-0-3)

In this course, we will study some of the finest short stories written by Brazilian authors from the 19th century to the present, with special emphasis on historical context, literary movements, and theoretical issues related to the genre. Authors studied include: Machado de Assis, Graciliano Ramos, João Guimarães Rosa, Samuel Rawet, Érico Veríssimo, Rubem Fonseca, Clarice Lispector, Lygia Fagundes Telles, Néida Piñon, Raduan Nassar, and Moacyr Scliar.

LAST 30501. When Empires Fall

(3-0-3)

Offered in Portuguese, this course examines contemporary Luso-Brazilian literature and historiography that explore major shifts in Portugal's status from world power to semi-peripheral, European nation. We focus on responses to three major traumas: the end of the Luso-Brazilian empire in the early 1800s, the confrontation with Britain and the Ultimatum of 1890, and the fall of the African empire with the subsequent decolonization of 1974–1975. The course seeks to evaluate the role that imperial decline plays as a theme in contemporary narrations of the nation, to investigate how literature contributes to interpretations of Portugal's imperial past, and to study the interconnections between history, memory, and national identity. This course is designed for students pursuing a minor in Portuguese and Brazilian studies and/or for students pursuing a minor in Latin American studies.

LAST 30550. Chile in Comparative Perspective

(3-0-3) Valenzuela

This course provides a detailed analysis of the development of the Chilean economy, society, and policy since independence from Spain in 1818, drawing selected comparisons with other national experiences. It then discusses the validity of theoretical statements on central questions in the social science literature by examining them in light of the Chilean case. The main issues to be examined are the reasons for the successes or failures of Third World development, the origins and breakdowns of democracies, the characteristics of authoritarian regimes, and processes of restoring democracies.

LAST 30551. Global Sociology

(3-0-3)

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline as one that seeks to understand human society as

a nested collection of interdependent societies. In particular, the course draws from world systems theory and institutional approaches—as well as from related disciplines such as anthropology—to consider how the development project of the 20th century evolved over time. The impacts of global economic integration on cultural and institutional change, inequality, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how the World Bank, IMF, and United Nations are impacting the experiences of people around the world as well as for those who expect to do further research in the field.

LAST 30600. From Power to Communion: Toward a New Way of Being Church Based on the Latin-American Experience

(3-0-3)

This seminar explores the present and the future of the Catholic Church, placing emphasis on how its future is foreshadowed in the growing ecclesial interdependence that exists between the churches of North and Latin America. Emphasis is placed on the growing involvement of the laity in Latin America and where this may lead the North American church. In a particular way, attention is given to the role of small Christian communities.

LAST 30601. Catholic Church for Medellin to Aparecida: An Evangelizing Option for the Poor

(3-0-3)

Medellin (1968) was the first General Conference of the Latin American Bishops after the Second Vatican Council. Medellin was a strong step forward in clarifying the role of the Latin Church. This course will explore the following question: Did Aparecida (the fifth General Conference) in Brazil 2007, rekindle the vision of Medellin?

LAST 30602. Chile—Church and State: 1960–2010

(3-0-3)

During the last fifty years the Republic of Chile has undergone rapid changes both in Church and State: From the politically conservative to a Socialist revolution to a military take over, and finally back to democracy. In view of these dramatic developments how might one predict the future of this exciting country?

LAST 30650. Mexican Photography

(3-0-3)

This course examines Mexican photography from the 19th century on to contemporary works. Theoretical issues pertaining to the histories of photography, with emphasis in documentary photography, photography as an art form, photojournalism and photo manipulation are part of this course. Key films, such as *Mala Hierba* from 1940 and *Canoa* (1970), will be discussed in the context of the relation they have with still images. Photography and film will be situated to particular photographic moments and specific socio-cultural and political developments in Mexico. Critical questions on the role of photography in the formation of national narratives and the role of photographers in the life of art and culture will be addressed. Works by Romuldo García, Agustin Casasola, Manuel Alvarez Bravo, Nacho Lopez, Lola Alvarez Bravo, Tina Modotti, Lourdes Grobet, Graciela Iturbide and other artists will be discussed.

LAST 30652. Creole Language and Culture

(1.5-0-1.5)

This course introduces students to the vivid, sonorous language of Kreyòl, or Creole, and to the fascinating culture of its speakers. This intensive, beginning-level course is intended for students with no knowledge of Creole. In small-group teaching sessions, students will be prepared for conversational fluency with basic reading and writing skills, emphasizing communicative competence as well as grammatical and phonetic techniques. Our study of Kreyòl is closely linked to our anthropological exploration of how the language is tied to Caribbean society and culture. The course takes a holistic, anthropological approach to the history, political economy, and religion of Haiti. In addition to class work, audio tapes, music and film enhance the study of the Haitian language and culture.

LAST 30653. Migration, Documented

(1-0-1)

Students will examine issues of educational equity and achievement in the United States from 1950 to the present. The course begins by framing these issues in terms of social and cultural processes, using an anthropological perspective. Students then will examine issues of educational equity in relation to long-established patterns of social stratification by race, ethnicity and class. The course will conclude with a discussion of equity in light of the nation's rapidly changing demographics.

LAST 30654. Caribbean Diasporas

(3-0-3)

This course examines the development of Creole societies in the French, Spanish, Dutch, and British Caribbean in response to colonialism, slavery, migration, nationalism and, most recently, transnationalism. The recent exodus of as much as 20 percent of Caribbean populations to North America and Europe has afforded the rise of new transnational modes of existence. This course will explore the consciousness and experience of Caribbean diasporas through ethnography and history, religion, literature, music, and culinary arts.

LAST 30725. Caribbean Historiography

(3-0-3)

This class will introduce students to major events in Caribbean History and the various ways in which these histories have been represented. This course will present a picture of the Caribbean very different from that held by many North Americans. For 500 years, this region has been the site of encounters and clashes among Native Americans, Europeans, Africans, and Asians. For three centuries Europe's leading states fought each other to control these islands, which were the most valuable real estate in the Atlantic world. At the same time Dutch, English, French and Spanish colonists imported millions of enslaved men, women, and children from Africa to work on the sugar and coffee plantations that made the region so profitable for its masters. Supported by racism and colonialism, plantation slavery left its mark on the Caribbean long after emancipation and independence. We will be emphasizing recent, representative texts, monographs and essays but placing them in the context of early research.

LAST 30726. Anthropology of Race

(3-0-3)

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle the anthropology of race from a critical perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

LAST 30727. Material Life of Africans in the Americas

(3-0-3)

This course will provide the student with a sampling of the diversity of experiences of people of African descent in the Americas as viewed from the archaeologist's and historical anthropologists' perspectives. Because the language of archaeology is material culture, we'll be exploring how people have used crafts, goods, and space to communicate and negotiate identities and relationships with one another in the contexts of colonization, the birth of new nations, industrialization, and modernization. The experiences of colonizers and colonized, enslaved people, and post-colonial immigrant peoples and their families will be discussed. Due to the breadth and diversity of the material to be covered, the course will have both a loosely chronological and topical structure, but will not adhere formally to either.

LAST 30728. Racialization in the U.S. and Brazilian History

(3-0-3)

This course will consider the processes that have caused aspects of society to be racialized, or labeled with racial meanings, symbolisms, and/or identities. The class will focus on, but will not be limited to, "black" racialization. We will examine

how racialization has shaped the human experience in the largest ex-slaveholding nations of the Americas—the United States and Brazil. Our goal is to understand the ways in which not only people are racialized, but also communities, geographical regions, nations, cultural production (such as music), behavior, labor, and gender, to name a few. With these two nations as our case studies, the class will explore the dynamic nature of racialization, focusing on the impact that space and time has had on the way we identify and live race.

LAST 30751. Latin American Art and Architecture 1492–1891
(3-0-3) Lara

This course introduces the student to the rich visual and religious culture of the peoples of Latin America at the arrival of the Europeans and thereafter. The course deals with Mexico and the Andean region from 1491–1821 and the encounter of Aztecs and Incas with Christian artistic culture, and vice versa. Attention will be paid to the indigenous art forms on the eve of the Spanish invasion, the cooperative work of natives and clergy in the construction and decoration of churches, and in the development of a hybrid multicultural, multiracial society. Late medieval, Renaissance and Baroque art forms, as reinterpreted in the Spanish-speaking Americas, are the focus. Questions of religious syncretism and conscious enculturation through the arts are raised. Issues of colonialism, race, gender and class will also be dealt with in the context of the visual religious cultures of the Latin American past and present. A reading knowledge of Spanish would be helpful but is not required.

LAST 33100. Political Economy of Development
(3-0-3)

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include: rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, failed state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

LAST 33550. Can Latin American Social Inequality be Tamed?
(3-0-3) Martinez; Franzoni

Scholarly interest in Latin American welfare regimes has grown significantly in recent years. By addressing the most unequal region in the planet, experts grapple with the complex and dynamic relationship between social policies and structures as played out through families and labor markets. We will concern ourselves with novel research addressing gender relations as organizational pillars of welfare regimes and engage in South-South comparisons as we look beyond the largest and most studied Latin American countries (e.g., Argentina and Chile). Drawing from the work of leading scholars in the area, we will examine theories, methods, findings and policy implications of contemporary research as we struggle to understand one of the world's most daunting ethical and political questions: "can social inequality be tamed?"

LAST 36500. Testimonials from Urban Brazil
(3-0-3)

This course, taught in Portuguese, explores contrasting images of social change in recent Brazilian literature and cinema. The focus is on attempts to give voice to the poor, the marginal, the rogue, and other agents of social change in urban Brazil. Course materials are drawn from fictional auto/biographies and diaries, street memoirs, documentary novels, crime stories, prisoners' accounts, films, and documentaries. Texts by Caio Fernando Abreu, Rubem Fonseca, Sebastião Uchoa Leite, Paulo Lins, João Gilberto Noll, Esmeralda do Carmo Ortiz, Moacyr

Scliar, and others. Films by Cláudio Assis, Ana Carolina, Fernando Meirelles and Kátia Lund, Murilo Salles, and Walter Salles and Daniela Thomas. (Prerequisite: a 20000-level course in Portuguese or equivalent).

LAST 40007. Cultural Difference and Social Change
(3-0-3)

Research or service in the developing world can generate questions about our own role as "the elite" and "privileged" in contexts where our very presence marks us as "outsiders." In such situations we frequently grapple with balancing our research objectivity with the oftentimes stark realities we have witnessed and experienced. This course is designed especially for students returning from service projects or study abroad programs in the developing world to help make sense of these experiences. This process will be achieved through additional scholarly research (frequently self-directed) to better understand the sites that the students visited during their overseas projects, orienting them in relation to broader global, regional, and national patterns; the eventual outcome will be the analysis of each student's data that is framed by the larger context. Course readings will cover such topics as world systems theory, globalization, development, NGOs, various understandings of "human rights," applied anthropology, activism, and the relation between cultural relativism and service. Through discussions, readings, presentations, and writing students will develop an analysis based on their overseas experience, and will focus on the site where they worked, a problem that they observed in cross-cultural perspective, and an examination of strategies for redressing this sort of problem. The overall goal of the course will be for students to gain an understanding of how social science analysis might help to understand and confront problems in cross-cultural contexts. Students can only enroll with the permission of the instructor; requires prior field research or study abroad.

LAST 40008. Archaeology of Catholic Missions
(3-0-3)

The Catholic Church has sponsored missions for centuries. As colonial forces seeking land, labor, and resources spread European influence across the globe, Catholic missions became a global phenomenon that continues to this very day. This course is designed to look at Catholic missions in the New World (North and South America) during the colonial period using historical and material evidence. The course will take a comparative approach by studying missions in different geographic and cultural areas, and in different colonial contexts. Historical sources are used to contextualize how Catholicism and missionary activities were a part of broader colonial endeavors. Material evidence is used to tell us about day-to-day activities and local living conditions, as well as how missions affected the lives of local native populations. In this course we will attempt to use historical and material sources in tandem to learn more about these institutions than either type of source could provide alone.

LAST 40009. Race, Ethnicity, and Power
(3-0-3)

This course explores race and ethnicity as biological, social, legal, and cultural constructs and lived experiences. Its underlying objective is to understand how relations of power affect racial and ethnic affiliations, categorizations, and experiences. Rather than merely learning a collection of facts on specific racial and ethnic groups, we will examine race and ethnicity as they intersect with dynamics of social class, gender, mass media representation, racism, immigration, and everyday life in urban settings. We will focus on the diversity of U.S. recent, real life experiences—from problems of inequality to the flourishing of ethnic food and music—but also look at postcolonial and European locales. This will enable us to compare racial and ethnic understandings, practices, and identities across geopolitical settings, and in global and transnational context.

LAST 40151. Latino/a Poetry
(3-0-3)

A study of prominent contemporary Latino/a poets whose work has enriched and diversified the canon of American poetry in the last 20 years.

LAST 40152. Literatures Across the Americas

(3-0-3)

A survey of literatures written by English- and Spanish-speaking peoples from the late-sixteenth century to the mid-nineteenth century.

LAST 40153. Literatures of the American Hemisphere

(3-0-3)

National borders mark our Americas today, but for the first European explorers the landscapes of their “new world” were uncharted and unbounded. The newly-encountered land invited utopian dreams even as it became the arena for genocidal violence. To reconsider these moments of violence and possibility, we will approach early American literature intra-hemispherically, reading not just from the British colonial record, but also Spanish documents in English translation. We will read comparatively in order to ask key questions about American identity both then and now. For example, what do we learn when we juxtapose Cortés’ invasion of the Mexican empire to King Philip’s War in the New England colonies? To what degree do these legacies of imperialism still shape our modern world? What comparisons arise between the poetry of Anne Bradstreet and Sor Juana Inés de La Cruz; between the captivity adventures of Cabeza de Vaca and Mary Rowlandson? How might these contact points continue to shape our views of “others”? How have native nations across the Americas written or spoken the loss of worlds? The authors and subjects noted above will serve as key markers, but we will also read primary works by William Bradford, Bernal Díaz, John Smith, William Apess, and others as we reconsider the literatures and histories of the Americas in a cross-national paradigm. Students will be expected to write three short papers, take a final exam, and participate actively in class.

LAST 40201. Global Development in Historical Perspective

(3-0-3)

The difference between rich and poor nations is not, as Ernest Hemingway once said, that the rich have more money than the poor, but is in part because the rich produce more goods and services. Industrialization, in other words, has often brought wealth (as well as social dislocation and protest) to those who have succeeded. This course examines the process of industrialization from a comparative perspective and integrates the history of industrialization and its social consequences for Western Europe (Britain and Germany), the United States, Latin America (Mexico), and East Asia (Japan and South Korea). We will concentrate on these countries’ transition from agriculture-based societies to industrial societies. We will analyze the process of industrialization on two levels: from above the role of political authority and from below a view of factory life, industrial relations, and protest from the perspective of workers and the working classes. No specific prerequisites in history or economics are necessary.

LAST 40204. Gender, Sexuality, and Colonization in Latin America

(3-0-3)

In this course we will examine the historical construction of gendered roles in the Spanish colonial world. This will entail thinking about gender in the societies that “encountered” each other in the New World, and also thinking about how that encounter produced new forms of gendered relations. Among the questions we will consider: how was the conquest gendered? How did colonial society produce masculinity as well as femininity? What gendered forms of power were available to women? How did ethnicity and caste, as well as gender, determine people’s sense of themselves and their “others”? The course will look at a mixture of primary and secondary materials, including letters and chronicles written by men and women, testimony before the Spanish Inquisition, poetry, and novels. While there are no prerequisites for this seminar, some familiarity with colonial Latin American history will be helpful.

LAST 40205. Experience of Conquest in Mesoamerica

(3-0-3)

Experience of Conquest explores Native American perceptions of and relations with Spaniards in 16th-century Mesoamerica.

LAST 40301. Senior Seminar: Clientelism and Machine Politics in Comparative Perspective

(3-0-3)

Writing seminars are devoted to a specialized topic. These seminars give students a chance to take an advanced course in a seminar setting, with an emphasis on research skills and discussion. Juniors are encouraged to take writing seminars if space is available, with permission from an advisor.

LAST 40400. Studies in Latin-American Colonial Literature

(3-0-3)

An in-depth study of a particular theme, author, or genre in colonial Latin-American literature.

LAST 40401. Mexican Literature

(3-0-3)

An overview of the historical development of prose, poetry, and theatre in Mexico, in its social and aesthetic contexts.

LAST 40402. Film/Latin-American Imagery

(3-0-3)

A survey of the development of the short-story genre in Spanish America. Close readings of works by representative authors.

LAST 40403. Spanish-American Poets of the Twentieth Century

(3-0-3)

This course will focus on the principal trends of Spanish America lyrical production through close readings of poetry from the avant-garde to the present.

LAST 40405. Spanish-American Short Story

(3-0-3)

This course considers the issue of Latin-American identity through a variety of media, including film, literature, and popular culture. Focus may be on a particular region or genre.

LAST 40406. Seminar: Selvas, llanos y otro

(3-0-3)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to treating primary texts, some critical material will be required reading. The course culminates in a substantial research paper. May be taken either fall or spring term.

LAST 40408. Film and the Latin-American Imagery

(3-0-3)

Corequisite: LAST 41408

This course considers the issue of Latin-American identity through films from various national traditions, including Cuba, Chile, Mexico, and Brazil. Class discussions consider how shared cultural elements are represented in Latin-American film and how these representations challenge assumptions about identity politics.

LAST 40409. Topics in Colonial Latin American Literature

(3-0-3)

An in-depth study of a particular theme, author, or genre in colonial Latin-American literature.

LAST 40411. Does This Nation Have a Woman’s Face?

(3-0-3)

A study of the national imaginary depicted in 19th-century Spanish American fictional prose and essays. Special attention will be given to gender issues and historical events.

LAST 40412. Topics in Spanish American Poetry

(3-0-3)

A survey of the development of the short-story genre in Spanish America. Close readings of works by representative authors.

LAST 40415. Studies in Latin American Colonial Literature

(3-0-3)

An in-depth study of a particular theme, author, or genre in colonial Latin American literature.

LAST 40419. Beyond the Islands: Latino/a Caribbean Literature and Culture

(3-0-3)

This course examines the literary and cultural production of Latinos/as from the Spanish-speaking Caribbean. Issues of migration, transnationalism, and transculturation will be explored through the analysis of texts by Puerto Rican, Cuban-American, and Dominican-American authors. From Loisaida to Washington Heights to Calle 8, Latinos/as from the Spanish-speaking Caribbean have become a strong cultural presence across the United States. Like other minorities in the U.S., the centuries-old history of Caribbean Latino settlement in this country has been recorded in the literature and cultural production of this group. In this course we will examine literary works and other artistic expressions (film, music, etc.) by Puerto Rican, Cuban-American, and Dominican-American authors and artists. We will also examine precursor texts from Puerto Rico, Cuba, and the Dominican Republic, which offer representations of the immigrant experience from an island-centered perspective. Readings from various disciplines such as history, sociology, and anthropology will help students understand the reasons behind the massive movements of peoples from the Hispanic Caribbean to the U.S., as well as their current conditions in their new homeland. Issues of migration, transnationalism, transculturation, gender, and racial and class discrimination will be central to our discussions. Some of the authors studied include: Jose Luis Gonzalez, Pedro Juan Soto, Pedro Pietri, Piri Thomas, Lino Novas Calvo, Gustavo Perez Firmat, Cristina Garcia, Junot Diaz, and Julia Alvarez. Texts discussed will be in Spanish and/or English. There will be several short essays, a final paper, a midterm and a final exam. Knowledge of Spanish is required. Class discussions and written work will be in Spanish.

LAST 40420. Women's Narrative in the Southern Cone

(3-0-3)

This course designed as a seminar for upper-level Spanish students aims to critically analyze some of the most important narrative texts by twentieth-century Argentine, Chilean and Uruguayan women authors. Some of the writers to be studied include Somers, Geel, Guido, Peri-Rossi, Mercado, Eltit, and Valenzuela among others. Our readings of the selected works will be informed by the social and political circumstances of their time, which will enable us to understand the emergence of feminine subjectivities and their fictional representations. Concepts of gender, sex, and sexuality will be central to our discussions. Thus, theoretical and critical texts on feminism will also be included.

LAST 40421. Self, Family, Nation: Insular and Hispanic Caribbean Women Writers

(3-0-3)

This course focuses on the literature of Hispanic Caribbean women authors in the islands and in the U.S. By contrasting the works of recent and more established authors from Puerto Rico, Cuba, the Dominican Republic, and their counterparts in the U.S., we'll explore the construction of gender and sexuality from a Caribbean feminist perspective. Some of the texts that this course will examine include: *In the Time of the Butterflies* by Julia Alvarez, *Papi* by Rita Indiana, *When I was Puerto Rican* by Esmeralda Santiago, *Maldito amor* by Rosario Ferré, and *Dreaming in Cuban* by Cristina García.

LAST 40422. Modernization in Latin America: Urban Changes, Technology and Desires at the Turn of the Last Century

(3-0-3)

This course designed as a seminar for upper-level Spanish students aims to critically analyze some of the major transformations of Latin America at the time of its entrance in the world market (1875–1910). Focusing on the dramatic transformations of space—urban changes—and of time—the popular knowledge and use of modern technology—we will study how literature responds to these major changes, at the same time that it proposes ways to articulate the new Latin

American sensitivity. Writers such as Cuban José Martí, Nicaraguan Rubén Darío, Argentine Leopoldo Lugones, Uruguayans José Enrique Rodó, Julio Herrera y Reissig and Delmira Agustini, among others, will enable us to reflect on the thoughts of Latin American intellectuals regarding the advantages and disadvantages of modernization as well as their ideas on the different development of the two Americas at a pivotal time in their history. Concepts of nationalism, subjectivities, and gender will be part of our discussions. Thus, theoretical and critical texts on these subjects will also be included.

LAST 40423. Literature and Popular Culture in Modern Cuba

(3-0-3)

In this class we will study a number of aspects of popular culture in the modern Cuban literature.

LAST 40424. Good Neighbors? Hispanic Caribbean and Central American Literary Representations

(3-0-3)

Examines the relationship between the Hispanic Caribbean and Central American nations and United States through readings of texts by authors from Colombia, Cuba, the Dominican Republic, Guatemala, Nicaragua, Puerto Rico, and Venezuela among others. Although principally focusing on literary texts, works from other fields of study such as politics, history, and economics are also studied.

LAST 40425. Gabriela Mistral and Her World

(3-0-3)

This course, designed as a seminar for upper-level Spanish students, will consider the poetry of Gabriela Mistral in its historical and cultural context, paying particular attention to the aesthetic evolution of her poetry and to its social and religious aims. Letters and other writings by the Chilean poet will also be discussed. The seminar will be conducted in Spanish.

LAST 40427. Working Memories: New Approaches to the 1970s and 1980s in the Southern Cone

(3-0-3) Olivera-Williams

This upper-level seminar aims to analyze the role of memory in the reconstruction of the history of the 1970s and 1980s in the countries of the Southern Cone of Latin America: Argentina, Chile and Uruguay. We will study the different ways in which revolution and dictatorship have been represented in fiction, poetry, testimonial, and films. We will pay special attention to the civilian and military complicities during dictatorship and post-dictatorship, the search for justice, and the ways in which a generation that did not live the events of the 1970s and 1980s re-visits the recent past in order to find answers for their own present. Topics such as nostalgia, trauma, ruins, subjectivities, and gender will be part of our discussions. Thus, theoretical and critical texts on these subjects will also be included. The seminar will be conducted in Spanish. Students who enroll in this seminar will be offered an intensive, academically specialized experience that will seek to improve critical thinking skills, as well as skills in oral expression and writing. Requirements: Students must participate actively. In addition, each student will lead at least one class discussion, write reaction papers and develop two substantial analytical essays.

LAST 40428. Race and Ethnicity in U.S. Latino/a Literature

(3-0-3) Moreno

In this course, students will examine the key issues of race and ethnicity in U.S. Latina/o literary production, particularly in the works of Afro-Latina/o, Andean-Latina/o (and other Latinos of indigenous descent), and Asian-Latina/o authors. The range of races, ethnicities, and nationalities of the established and emerging authors studied in the course will enhance the students' understanding of the complexity and heterogeneity of that group that we call "Latinos." The course will be divided into three major units: Caribbean, Central American, and South American Latinos. Students will read works by migrants from a range of countries, including Puerto Rico, Cuba, Dominican Republic, Guatemala, El Salvador, Costa Rica, Panamá, Perú, Ecuador, Uruguay and Colombia. This course will have a service-learning component. Students will be required to spend two hours per

week volunteering at the local Hispanic community center Casa de Amistad. The course will be conducted in Spanish. Participation, frequent short essays, a journal, midterm, final exam, and final paper will determine the final grade.

LAST 40429. Migrant Voices

(3-0-3) Moreno

This course examines the literary production of U.S. Latinos/as. We will read works by Mexican-American, Puerto Rican, Cuban-American and Dominican-American authors paying close attention to the intersection of race, class, and gender issues. The literature studied will serve as a window into the culture of the local Latino community as students engage in service-learning at Casa de Amistad throughout the semester.

LAST 40500. Luso-Brazilian Literature and Society

(3-0-3)

This course will focus on questions of national identity in the Luso-Brazilian world. We will examine how social and cultural issues are perceived, conceptualized, represented, and understood in and by literature. The course will pay particular attention to how literature depicts important human problems such as gender and race relations, the crafting of national identity and national heroes, class conflict, family structure, and some ideological values such as success, love, happiness, fairness, misfortune, destiny, honesty, equality, and faith. Authors to be studied will include Manuel Antonio de Almeida, Machado de Assis, Jorge Amado and Guimares Rosa, on the Brazilian side, and Miguel Torga, Jo de Melo, Jose Saramago, and Lydia Jorge, on the Portuguese side. Conducted in English with readings in Portuguese or English (discussion group available in Portuguese). Requirements will include active class participation, two oral presentations, and two papers.

LAST 40504. Colonialism Revisited

(3-0-3)

With readings from Angola, Mozambique, Brazil, and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. This course brings the Lusophone experience, with its important varieties yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and /or English.

LAST 40505. Brazilian Cinema and Popular Music

(3-0-3) Ferreira; Gould

This course offers social, cultural and historical perspective on Brazil through film and popular music.

LAST 40506. Carnival in Cinema and Literature

(3-0-3) Ferreira; Gould

Brazil, the largest South American country, has tantalized our imagination with the images of Samba and Carnival. As Brazilian anthropologist Roberto DaMatta asserts, Carnival creates a festival out of the everyday social world in which there is no emphasis on the harsh rules that govern membership and identity. This course will offer an exploration of Brazilian culture by investigating the ways in which the celebrations of Carnival have been viewed, articulated and unsettled by film and literature. Along with major films, documentaries and literary works, we will examine contemporary sociological and anthropological writing that contributes to our understanding of Carnivals within and beyond Brazil. We will learn how key issues in Brazilian society (race and gender relations, national identity, rituals and symbols, values and social roles) play out in Carnival. Course offered in English.

LAST 40507. Fictions of the South Atlantic

(3-0-3)

Taught in English, this seminar offers a comparative study of 19th-, 20th-, and 21st-century fiction writing in the Lusophone South Atlantic, particularly exploring the historical connections and the cultural links between Brazil and Angola.

LAST 40551. International Migration and Human Rights

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term offered by Prof. Bustamante, with a wider coverage of international migration experiences in the world with an emphasis on human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States' migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

LAST 40553. Ideology and Politics in Latin America

(3-0-3)

Ideological discourse shapes political action in Latin America. Thinkers such as Mart, Maritegui, Haya de la Torre, Lombardo Toledano, Mella, Recabarren, Prebish, Medina Echavarrá, Germani, Cardoso, and others and their discourses—nationalism, revolutionary nationalism, Latin-American Marxism, developmentalism, modernization theory, dependency theory, democratization—acted within specific historical contexts and contributed actively to the conformation of political action. It is our purpose to present the main ideological positions and their impact upon political action in the continent. Their constituent elements conform a unity which we will discuss on the basis of lectures, reading of the texts and debates presented by teams of students. The course is divided into 21 sessions (including the three reading exams and four debates). For each session, we indicate required readings. The final paper is to be presented on the last session of the course, together with the third reading exam.

LAST 40554. Building Democratic Institutions in First-Wave Democracies

(3-0-3)

Elements of democratic regimes emerged long before the regimes as such can be identified as being minimally in place. Beginning with a brief discussion of the essential features of democracies, the course examines how and why such institutions emerged, and the critical moments in which the actual transitions to the new democratic regimes occurred. The course focuses on democratizations that took place before the Second World War, and will examine key European and Latin-American cases.

LAST 40650. Mexican Immigration: A South Bend Case Study

(3-1-4) Richman

This course uses experiential learning in the Mexican community of South Bend in order to understand how Mexican migrants conduct their lives across the vast distances separating South Bend and their homeland. The course begins with readings in social science and fiction about transnationalism, Mexican-U.S. migration and the history and sociology of the local community. Next we learn ethical fieldwork methods in preparation for community research. Students working in two-person teams will gather data on local and transnational households and kin networks, gender relations, political involvement, employment, consumption practices, cultural activities and religious life, working through contacts with social service agencies, the Mexican consulate, and Mexican- or Latino-run media, businesses, food stores, and sports leagues. We will document the innovative adaptations of this migrant community, especially the growth of an ethnic enclave of small businesses that both unite Mexicans as an ethnic group and sustain their ties to their homeland. We intend to compile the research in a volume published by Latino Studies to be given to those who shared their lives with us and to entities that are committed to helping them.

LAST 40651. Migration, Markets and Entrepreneurship

(3-0-3)

This course combines methodological tools from business and anthropology for analyzing the impact of migration movements on local socio-economic conditions

and on the markets and the economy. This joint approach will focus on the study of the economic, social and cultural dimensions of Mexican migration, —the largest contemporary source of migration to the United States— with a particular emphasis on two economic aspects, namely 1) entrepreneurial traits and skills of the migrant population, and 2) the pattern and level of remittances by the migrant sector residing in the USA. The course also considers how transnational social, cultural, political and religious networks and institutions affect and are affected by Mexicans' activities as workers, consumers, entrepreneurs, and general economic agents. The course will examine the following topics: the role of remittances in the Mexican economy, local business partnerships between migrant organizations and the state, Mexican transnational households' financial structure, characteristics of the Mexican migrant labor force, consumption patterns and savings behavior, and the study of a Latino/Hispanic market segment in the USA which includes the production and/or sales of Mexican products, special advertising, and promotion techniques specifically targeted for that market. Comparative case studies of entrepreneurs based in central Mexico and those of Mexican immigrants in the U.S. Midwest complete the course and seek to understand how these economic agents and community leaders build economic, social and cultural capital in the context of the communities where they reside.

LAST 40652. Caribbean Migrations: An Interdisciplinary Excursion

(3-0-3)

What is the meaning of identity in a transnational space straddling the United States and the Caribbean? Migration, settlement and return are central to the historical experiences and the literary and aesthetic expressions of Caribbean societies. This course combines literary and anthropological perspectives to the study of novels and historical and anthropological texts in which themes of migration, immigration and transnationalism play central roles.

LAST 40997. Colonialism Revisited

(3-0-3)

With readings from Angola, Mozambique, Brazil, and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. This course brings the Lusophone experience, with its important varieties, yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and /or English.

LAST 41408. Film and the Latin-American Imagery

(3-0-3)

Corequisite: LAST 40408

This course considers the issue of Latin-American identity through films from various national traditions, including Cuba, Chile, Mexico, and Brazil. Class discussions consider how shared cultural elements are represented in Latin-American film and how these representations challenge assumptions about identity politics.

LAST 43150. Seminar: Latino/a Literature

(3-0-3)

Close readings of several seminal works of 20th-century Latino/a literature.

LAST 43555. International Migration: Mexico and the United States II

(2-0-2) Bustamante

This course addresses relations between theory and methods for scientific research on international migration with emphasis on immigration to the U.S.; the objective is to prepare students to design research projects on this subject for theses and dissertations. The course will review basic questions on this subject and the methods through which these questions have been adequately or inadequately answered; the numbers, the impact, the nature, the structure, the process, the human experience, will be discussed in terms of the research methods commonly used to approach them.

East Asian Languages and Cultures

EALC 10111. First Year Chinese I

(5-0-5)

Corequisite: EALC 12111

A course designed for students who have not studied Chinese before. Equal emphasis is placed on the basic languages skills in speaking, listening, reading, and writing. Students will learn both the Chinese Romanization system of the pinyin and written characters, and to perform conversational skills in daily-life situations.

EALC 10112. First Year Chinese II

(5-0-5)

Prerequisite: EALC 10111

Corequisite: EALC 12112

Continuation of First Year Chinese I.

EALC 12111. First Year Chinese I Lab

(0-2-0)

Corequisite: EALC 10111

This class is the lab co-requisite for EALC 10111 First Year Chinese I.

EALC 12112. First Year Chinese II lab

(0-2-0)

Corequisite: EALC 10112

Lab corequisite for EALC 10112 First Year Chinese II.

EALC 20211. Second Year Chinese I

(5-0-5)

Prerequisite: EALC 10112 or EALC 10103

Corequisite: EALC 22211

Grammar review and training in the four basic skills to higher levels of sophistication: oral-aural skills for fluency in communication, reading for critical understanding, and the ability to write simple compositions.

EALC 20212. Second Year Chinese II

(5-0-5)

Prerequisite: EALC 20211

Corequisite: EALC 22212

Continuation of Second-Year Chinese I.

EALC 20555. Chinese for Mandarin Speakers

(3-0-3)

This course is for heritage speakers, offered in a tutorial format for students who speak Mandarin but wish to learn to read and write Chinese. This course is writing-intensive, which requires a great deal of practice and memorization on the part of the students. A strong commitment to hard work and a willingness to accept challenges are keys to succeed in this class. The class will meet once a week to briefly go over the texts and homework. Students have to be prepared. After completing two semesters of this course, students will be expected to join Fourth-year Chinese, where the reading of essays and stories written for native Chinese readers (not language learners) will take place.

EALC 20556. Chinese for Mandarin Speakers II

(3-0-3)

Continuation of first course is for heritage speakers, offered in a tutorial format for students who speak Mandarin but wish to learn to read and write Chinese. This course is writing-intensive, which requires a great deal of practice and memorization on the part of the students. A strong commitment to hard work and a willingness to accept challenges are keys to succeed in this class. The class will meet once a week to briefly go over the texts and homework. Students have to be prepared. After completing two semesters of this course, students will be expected to join Fourth-year Chinese, where the reading of essays and stories written for native Chinese readers (not language learners) will take place.

EALC 22211. Second Year Chinese I Lab

(0-2-0)

Corequisite: EALC 20211

Lab corequisite for EALC 20211 Second Year Chinese I.

EALC 22212. Second Year Chinese II lab

(0-2-0)

Corequisite: EALC 20212

Lab corequisite for EALC 20212 Second Year Chinese II.

EALC 30311. Third Year Chinese I

(4-0-4)

Prerequisite: EALC 20212*Corequisite:* EALC 32311

The course focuses on the development of intermediate conversational, reading, and writing skills, using a wide range of authentic materials, including material from news media.

EALC 30312. Third Year Chinese II

(3-0-3)

Prerequisite: EALC 30311

Continuation of Third Year Chinese I.

EALC 31311. Third Year Chinese I Lab

(0-0-0)

Corequisite: EALC 30311

Lab corequisite for EALC 30311 Third Year Chinese I.

EALC 32311. Third Year Chinese II Lab

(0-0-0)

Corequisite: EALC 30311

Lab corequisite for EALC 30312 Third Year Chinese II.

EALC 40411. Fourth Year Chinese I

(3-0-3)

Prerequisite: EALC 30312

The course focuses on the practice in more advanced conversational, reading, and writing skills, using newspapers, short fiction, videotapes, and other types of authentic materials.

EALC 40412. Fourth Year Chinese II

(3-0-3)

Prerequisite: EALC 40411

Continuation of Fourth Year Chinese I.

EALC 46498. Directed Readings

(1-0-1)

Requires “contractual agreement” with the professor prior to scheduling. For advanced students who wish to pursue an independent research project reading Chinese language materials.

EALC 47498. Special Studies

(V-0-V)

This course is designed with the purpose of allowing students to engage in an individual or small group study under the direction of a departmental faculty member.

EALC 50511. Advanced Chinese I

(3-0-3)

Prerequisite: EALC 40412

This course is appropriate for majors and individuals with language experience overseas. The year-long sequence helps students become functional speakers, readers, and writers of modern Chinese through articles and essays from newspapers, magazines, scholarly journals, as well as engagement with popular media and online communications. *Prerequisite:* successful completion of four years of

Chinese language training, as determined by placement examination. The learning goals of the course are to introduce modern Chinese culture while developing competence in reading, speaking and writing standard modern Chinese.

EALC 50512. Advanced Chinese II

(3-0-3)

Prerequisite: EALC 50511

Continuation of Advanced Chinese I.

EALJ 10111. First Year Japanese I

(5-0-5)

Corequisite: EALJ 12111

This course is designed for students who have not studied Japanese language before. The goal of this class is to gain an acquisition of the four basic language skills in Japanese—reading, writing, speaking and listening. Students will learn to read and write Hiragana, Katakana and Kanji.

EALJ 10112. First Year Japanese II

(5-0-5)

Prerequisite: EALJ 10111*Corequisite:* EALJ 12112

Continuation of First Year Japanese I.

EALJ 12111. First Year Japanese I Lab

(0-2-0)

Corequisite: EALJ 10111

Lab corequisite for EALJ 10111 First Year Japanese I.

EALJ 12112. First Year Japanese II Lab

(0-2-0)

Corequisite: EALJ 10112

Lab corequisite for EALJ 10112 First Year Japanese II.

EALJ 20211. Second Year Japanese I

(5-0-5)

Prerequisite: EALJ 10112*Corequisite:* EALJ 22211

This course is designed for students who have completed First Year Japanese or its equivalent. Students will build on their acquisition of the four basic language skills—reading, writing, speaking and listening.

EALJ 20212. Second Year Japanese II

(5-0-5)

Prerequisite: EALJ 20211*Corequisite:* EALJ 22212

Continuation of Second Year Japanese I.

EALJ 22211. Second Year Japanese I Lab

(0-2-0)

Corequisite: EALJ 20211

Lab corequisite for EALJ 20211 Second Year Japanese I.

EALJ 22212. Second Year Japanese II Lab

(0-2-0)

Corequisite: EALJ 20212

Lab corequisite for EALJ 20212 Second Year Japanese II.

EALJ 30311. Third Year Japanese I

(4-0-4)

Prerequisite: EALJ 20212*Corequisite:* EALJ 32311

A course designed for students who have completed EALJ 20212 or its equivalent. Students will build on their acquisition of the four basic language skills—reading, writing, speaking and listening; expand their vocabulary; and advance their understanding of Japanese culture.

EALJ 30312. Third Year Japanese II

(3-0-3)

Prerequisite: EALJ 30311

Continuation of Third Year Japanese I.

EALJ 32311. Third Year Japanese I Lab

(0-0-0)

Corequisite: EALJ 30311

Lab corequisite for EALJ 30311 Third Year Japanese I.

EALJ 32312. Third Year Japanese II Lab

(0-0-0)

Corequisite: EALJ 30312

Lab corequisite for EALJ 30312 Third Year Japanese II.

EALJ 40411. Fourth-Year Japanese I

(3-0-3)

Prerequisite: EALJ 30312

This is a course for students who have completed third year Japanese or its equivalent. Students will build on their acquisition of the four basic language skills—reading, writing, speaking and listening. Approximately 100 new kanji compounds will be introduced.

EALJ 40412. Fourth Year Japanese II

(3-0-3)

Prerequisite: EALJ 40411

Continuation of Fourth Year Japanese.

EALJ 45498. EALJ Internship: Nanzan Student Internship

(0-V-V)

In this course exchange students from Nanzan University will serve as peer tutors in a variety of capacities for the Japanese language program.

EALJ 46498. Directed Readings

(1-0-1)

Requires “contractual agreement” with the professor prior to scheduling. For advanced students who wish to pursue an independent research project reading Chinese language materials.

EALJ 47498. Special Studies

(V-0-V)

This course takes students beyond textbook Japanese by introducing original materials created for Japanese audiences (literature, current events, and video materials, etc.). Emphasis is on grammar and syntax, vocabulary building, speaking, reading, and writing.

EALJ 50511. Advanced Japanese I

(3-0-3)

Prerequisite: EALJ 40412

Advanced Japanese is a three-credit course for students who have completed EALJ 40412. This course takes students beyond the grammar-centered approach of textbooks to the study and discussion of original materials produced in Japanese for everyday Japanese consumption. Course materials include excerpts from short stories, poetry, letters, social criticism, academic writing, newspaper articles, and video clips.

EALJ 50512. Advanced Japanese II

(3-0-3)

Prerequisite: EALJ 50511

Continuation of Advanced Japanese I.

EALK 10111. First Year Korean I

(5-0-5)

Corequisite: EALK 12111

This introductory course is designed to provide beginners with a solid foundation in modern Korean focusing on the balanced development of the four basic

language skills of speaking, listening comprehension, reading, and writing. Along with basic conversational and grammatical patterns, the course introduces students to Korean culture through various channels such as Korean movies, music, and a number of other cultural activities.

EALK 10112. First Year Korean II

(5-0-5)

Prerequisite: EALK 10111*Corequisite:* EALK 12112

Continuation of First Year Korean I.

EALK 12111. First Year Korean I Lab

(0-2-0)

Corequisite: EALK 10111

Lab corequisite for EALK 10111 First Year Korean I.

EALK 12112. First Year Korean II Lab

(0-0-0)

Corequisite: EALK 10112

Lab corequisite for EALK 10112, First Year Korean II.

EALK 20211. Second Year Korean I

(5-0-5) Lee

Prerequisite: EALK 10112*Corequisite:* EALK 22211

Korean 20211 is the first semester of an Intermediate course on spoken and written Korean, for learners who have taken First Year Korean or have prior knowledge of Korean language & culture. It is designed to continue building students’ language skills with emphasis on enhancing the speaking ability, writing skills, and usage of more complex constructions. Hence, classroom activity and assignments will be designed and conducted with the main purpose of facilitating students’ learning process. Furthermore, the medium of instruction will be in Korean and students are expected to use the target language as much as they can throughout the course. There will be 9 lessons covered during fall semester, with supplementary activities relevant to each lesson. Moreover, approximately 90 Chinese characters will be introduced for the achievement of basic literacy.

EALK 20212. Second Year Korean II

(5-0-5) Lee

Prerequisite: EALK 20211*Corequisite:* EALK 22212

Continuation of Second Year Korean I.

EALK 22211. Second Year Korean I Lab

(0-0-0)

Corequisite: EALK 20211

Lab corequisite for EALK 20211, Second Year Korean I.

EALK 22212. Second Year Korean II Lab

(0-0-0)

Corequisite: EALK 20212

Lab corequisite for EALK 20212 Second Year Korean II.

EALK 40422. Advanced Korean

(3-0-3)

This course is designed for students who have previous exposure to Korean. The target audience is students who can speak Korean fluently but are not able to read and write at the same level. During the first one third of the semester we will cover important Korean grammar points (e.g., verb conjugation, noun-modifying forms, honorific expressions, etc.). The rest of the semester, then, we will read advanced materials (e.g., newspapers, articles) on various topics in Korean culture, society and politics, and discussion will be followed. At the end of the semester students are asked to do a short presentation on Korea in a formal setting. Throughout the course reading, writing, and formal speech will be emphasized.

EALK 46498. Directed Readings

(1-0-1)

Requires “contractual agreement” with the professor prior to scheduling. For advanced students who wish to pursue an independent research project reading Korean language materials.

EALK 47498. Special Studies Korean

(1-0-1)

Requires “contractual agreement” with the professor prior to scheduling. For advanced students who wish to pursue an independent research project reading Korean language materials.

LLEA 13186. Literature University Seminar

(1-0-3)

An introduction to the study of East Asian literature. The course will focus on either Chinese or Japanese literature.

LLEA 20145. Appreciating World Music

(3-0-3)

This course introduces students to the methods for conducting field research, reviewing live musical events and evaluating World Music recordings. Through discussions about music from South Africa, Mexico, the Philippines, Indonesia and China, students learn about the musical practices of these other cultures and understand their motivations for musical production. Challenges faced by musicians from colonialism, racism, nationalism, cultural imperialism and commercialism are also engaged. In addition, students are encouraged to discover world music among the diasporic communities within their own societies, and get the opportunity to perform music of some of the cultures studied.

LLEA 23101. Chinese Literary Traditions

(3-0-3)

A survey course introducing students to the major themes and genres of Chinese literature through selected readings of representative texts.

LLEA 30101. Chinese Ways of Thought

(3-0-3)

This lecture and discussion course on the religion, philosophy, and intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China’s grand philosophical legacy of Daoism, Buddhism, Confucianism and Neo-Confucianism, and the later religious accommodation of Christianity and Islam.

LLEA 30102. Popular Religion and the Practice of Philosophy in China

(3-0-3)

This lecture/discussion course will introduce the student to the plural religious traditions of the Chinese as manifested in ancestor worship, sacrifice, exorcism, and spirit possession. From an understanding of these practices, the course will offer insight into the mantic foundations of Chinese philosophy, especially metaphysics, to reveal how these foundations undergird the ordinary. Readings will consist of texts in translations of the texts popular cults, including Falun gong, as well as scholarly interpretations of these phenomena. No prior knowledge of Chinese history, language, or literature is required.

LLEA 30103. A Chinese Mosaic: Philosophy, Politics, and Religion

(3-0-3)

A Chinese Mosaic is a special topics class that provides an introduction to the diverse life ways constituting the puzzle of the Chinese people. The course will chart this terrain of current Chinese practice as it has been shaped from the contending, and often contentious, influences of religion, philosophy, and politics, introducing students to the heralded works of the Chinese intellectual tradition

while requiring critical engagement with the philosophic and religious traditions animating this culture today. Thus, as they learn about China, students also will reflect on how Chinese and Westerners have interpreted it.

LLEA 30104. Sex, Freedom and Economy in Contemporary China

(3-0-3) Jensen

Today China is undergoing a revolution (a word used so frequently as to be meaningless, but very meaningful in this case as we will learn) in society, politics, economy, and thought perhaps as significant as that which brought the Chinese Communist Party to national power in 1949. The objective of this course, constructed through film and new media investigation, along with readings on social status, identity, sexuality, work, home, youth culture, gender, business, education, sports, ecology, is to come to an understanding of the multiple domestic forces that have made China a global power. Furthermore, the course will familiarize the student with the very complex ramifications of the passionate national quest for international recognition as it affects every aspect of present-day life while exploring the mercurial manner in which the economic transformation of China has been represented in the media. In this last respect, it represents an experiment in cultural studies in that its avowed subject, contemporary China, is studied in dialogue with the United States—the two nations most exemplifying the promise and terror of modernization. No knowledge of Chinese or previous knowledge of China is required.

LLEA 30106. Modern Korean Literature and Drama in Translation

(3-0-3)

This course aims to provide basic understanding of Modern Korean Literature and Drama. In this class, we will first briefly survey the history of Korean Literature from 2000 years ago, till now. Then we will select a few important literary texts to read. Through this lecture, students will be able to understand the various forms and contents, and important themes of Korean Literature, through which deeper understanding of the lives and thoughts of the Korean people will be possible. Also, students will watch Korean TV dramas, popular in Korea and abroad, and through it have a chance to see and understand various aspects of Korean life. Through this introductory course, students will be prepared for a more in depth study of Korean Literature and Culture.

LLEA 30107. Understanding Korean Culture: Yesterday and Today

(3-0-3)

This course aims to help students to understand Korean society and culture. Starting from its unique historical background, students will explore and discuss various aspects of Korea such as religion, thoughts, literature, politics, arts, life styles and pop culture (“Korean Wave”) throughout the course. The in-depth examination of traditional features will guide students to extensive understanding of contemporary phenomena in Korea. Lecture-based teaching format will be enriched by a variety of supplementary channels such as movies, documentaries, and invited speakers in the field.

LLEA 30108. The Riddle of Korean Mythology

(3-0-3)

Do you know Korean mythology? Korean mythology has not only the universality of East Asian myth and world myth, but also the particularity of it. The particularity of Korean myth is shown by Mooga, the shaman’s song. We will study such a universality and particularity of Korean myth. Specially, in the view of comparative mythology, we will approach to Korean myth. Through this course, students will be able to understand Korean mythology, but Korean literatures and cultures as well.

LLEA 30109. Chinese Literature and Religion

(3-0-3) Yang

This course examines interfaces of religion and literature in the Chinese tradition. Students are introduced to the essential teachings of Daoism, Buddhism, and Confucianism and ways in which such teachings are represented or reflected in literary works, including poetry, prose essays, and fiction.

LLEA 30145. Confucian China and Its Modern Fate: A Broad Survey of Chinese History

(3-0-3) Murray

This course explores Chinese history from the Shang dynasty to today in terms of the development of Confucianism and its repeated reformulations in response to Buddhism, Western Imperialism, Marxism, and the global capitalism of today.

LLEA 30146. Music/Globalization in Asia

(3-0-3)

This course explores musical production in India and China, the “new cultural cores” that are gradually replacing the USA and Western Europe in cultural influence in Asia and the Asian diaspora. Taking into account these countries’ colonial and semi-colonial histories, their political and economic development, and the increasing transnational movement of their citizens, this course charts the development of commercially successful music from these countries—bhangra; Bollywood; Chinese pop; and fusion music popularized by bands like Twelve Girl Band and composers like Tan Dun in films like *Crouching Tiger, Hidden Dragon*—that have not only captured Asia but the West as well, and shaped the imagination of what Indian-ness and Chinese-ness are, both to the Chinese/Indians and non-Chinese/Indians. In addition, this course examines Filipino entertainers, a group of musicians who provide live entertainment of a transnational capacity throughout Asia. They represent important channels for the dissemination of Indian and Chinese popular music in that region. Globalization and cosmopolitanism theories will be discussed in this course.

LLEA 30280. International Relations in East Asia

(3-0-3)

This course explores the interactions of the states and societies in the east Asian region, focusing mainly on the relationships of China and Japan, their interactions with each other and with the outside “Asian” powers, the United States and Russia (Soviet Union). Topics include: the China-centered system in east Asia prior to the intrusion of the new world system carried by western imperialism; The western impact, including colonialism, the Chinese revolution, and Japan’s “defensive modernization”; the clash between Japanese and Chinese nationalism; the diplomacy of the Second World War and postwar developments; the cold war; decolonization and the emergence of new states and nationalism; the Sino-Soviet rift; the failure of the American policy of deterrence in Vietnam; the diplomatic reconciliation of the United States and China; the liberal reforms in China and their partial disappointment; the end of the cold war; China’s growth as a potential world power; Japan’s perhaps increasing restiveness in serving as an American surrogate; Asian assertiveness against perceived American hegemonic aspirations; potential tensions and rivalries within the region itself; the collapse of the Asian economic boom and the onset of a period of chronic economic troubles. Specific readings have yet to be decided. Course requirements include assigned readings and class participation; a midterm and final examination; completion of two brief research papers dealing with the foreign policy of one of the “smaller” Asian countries (that is, one of the countries other than China and Japan).

LLEA 30403. Introduction to Chinese Civilization and Culture

(3-0-3) Yang

This is a survey course that introduces the students with little or no knowledge of the Chinese language or culture to the major aspects of Chinese cultural tradition from the dawn of its civilization to the present time. Readings (in English translation) include traditional Chinese historical, philosophical, political, religious and literary texts as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to approach the Chinese texts from a comparative perspective. Course Procedures

and Requirements: This course will use a combination of lectures, discussion and presentation by students. Movie documentaries will also be used from time to time. Reading assignments should be done before the lectures and in the sequence as they are given in the course schedule for each class so that the students may be ready for discussion in class. Whereas their amount and level of difficulty vary, the texts always demand careful and thoughtful reading.

LLEA 30405. Introduction to Korean History and Culture

(3-0-3) Lee

This introductory course is designed for students without extensive prior knowledge of Korea or Korean culture. Starting from its unique historical background, various aspects of Korea such as religion, thoughts, literature, politics, arts, life styles and pop culture (“Korean Wave”) will be explored and discussed throughout the course. The in-depth examination of traditional features will guide students to extensive understanding of contemporary phenomena in Korea. Lecture-based teaching format will be enriched by a variety of supplementary channels such as movies, documentaries, and so on. Students will have a presentation on their own topic related to Korean culture at the end of the semester.

LLEA 30412. Masterpieces of Classical Japanese Literature

(3-0-3) Brownstein

This course was designed as a survey of Japanese poetry, fiction, and drama from the earliest times through the mid-18th century. All texts are in English; no special knowledge of Japan or Japanese is required. The course is divided into three parts. In Part I we will begin with the development of court poetry (waka) as found in the *Man-yōshū* (*Collection of Ten Thousand Leaves*), the *Kokinshū* (*the first Imperial Anthology*), and the *Tales of Ise*. The centerpiece of this unit, however, is Murasaki Shikibu’s epic of courtly love, *The Tale of Genji* (ca. A.D. 1000); we will read an abridged version of the first 17 chapters. In addition to social and historical factors influencing the development of a courtly aesthetic, we will also consider the influential role played by Buddhism and Chinese literature. In Part II, we will look at how Japanese literature developed during the medieval period (13th–16th centuries) of the samurai warrior-aristocracy with readings of plays from the No theater, linked verse (renga) and philosophical essays such as *An Account of My Hut* and *Essays in Idleness*. Of special interest here is the influence of Zen Buddhism on a wide range of aesthetic practices, including the tea ceremony, landscaping and painting. In Part III, we will study the “popular” literature of the 17th and 18th centuries, the products of a new merchant-class culture that flourished in Edo (now Tokyo), Kyoto and Osaka. The main topics will be haiku poetry by Matsuo Basho.

LLEA 30413. Introduction to Japanese Civilization and Culture

(3-0-3) Brownstein

The purpose of this course is to provide an overview of the historical development of Japanese civilization and culture from the prehistoric era up through the 19th century. The course is intended for students with little no knowledge of Japan. Topics to be covered include Japanese geography, historical periods, changing class structure and political organization, and continental influences on Japanese civilization, especially Chinese literature, Buddhism and Confucianism. Students will also explore how values changed as seen through literature, drama and the arts. The format of the course is lecture/discussion, supplemented by a variety of visual materials. All readings are in English and there are no prerequisites for the course.

LLEA 30465. Chinese Politics

(3-0-3)

Study of the contemporary Chinese political system and process in the light of Chinese history and culture. Some of the topics treated include: the traditional political order; the revolutionary movements; the rise of communism; Maoism and the rejection of Maoism; the political structure; leadership, personalities, and power struggles; economic policy; social policy and movements; problems of corruption and instability; prospects for democratic development. There will be some attention to Taiwan and to Hong Kong as special Chinese societies.

LLEA 30608. The Worlds of Buddhism

(3-0-3)

A thematic introduction to the pan-Asian (i.e., South, Southeast, and Central Asian as well as East Asian) Buddhist tradition exploring the fundamentals of Buddhist doctrine and practice while also sampling major themes in the religion's social, cultural, and material history. Among the particular topics to be covered are: the life of the Buddha (history & hagiography), the "Four Noble Truths" (the essentials of the Buddhist "creed"), the Buddhist canon (the nature and scope of Buddhist scripture), Buddhist cosmology (Buddhist conceptions of the formation and structure of the universe, i.e., of time and space), Buddhist monasticism, meditation and the Buddhist contemplative life, Buddhist ethics, the ritual lives of Buddhists, Buddhism and politics, Buddhist "family values," Buddhism and the arts, etc.

LLEA 30609. Buddhism in China

(3-0-3)

Buddhism is the only one of the major religions traditionally regarded as Chinese that did not originate in China. China is arguably the Asian civilization in which Buddhism underwent its most extensive development and its most thoroughgoing transformations. This course is designed to be a thematic and historical overview of the development of Buddhist thought and practice in China with special emphasis on the process of mutual influence by which Buddhism, without ceasing to be Buddhist, became also a Chinese religion while China, without abandoning its indigenous religious heritage, became also a Buddhist culture. As such the course will serve a threefold purpose: it will introduce students to fundamental Buddhist beliefs and values as they took shape in China; it will acquaint them with essential elements of Chinese civilization attributable to Buddhism's presence; and it will provide an opportunity to study what may well be world history's most remarkable instance of successful cross-cultural religious communication.

LLEA 30611. Buddhist Meditation Traditions

(3-0-3)

Relying chiefly on English translations of primary, mostly east Asian canonical sources, this course will examine varieties of Buddhist meditation practice while posing theoretical questions about the nature of meditation as a form of religious life; its ethical implications; its relations with other elements of Buddhism like doctrine, ritual, art institutions; etc.—all considered against the background of theological and philosophical concern with the role of contemplative experience in the religious life.

LLEA 30612. Buddhism in Practice

(12-0-3)

An introduction to Buddhism in East Asia (principally China, but also Japan, Korea and Vietnam) with emphasis less on what Buddhists think or believe and more on what they actually do in their public as well as private lives—e.g., the rituals they perform; their disciplines of self-cultivation; the institutions they establish; the ethical, political and economic decisions they make.

LLEA 30888. Survey of Pan-Asian Cinema

(3-0-3)

Corequisite: LLEA 21888

Historically, Asia represented massiveness in terms of area, population, and resources. In our present century, Asia will come to represent massiveness in economic, technological, and military terms. Given the prominence of Asia as an integrated continent with renewed global significance, knowledge of this continent, its history, its people, its cultures, and its aspirations for the future become important to better understand the world we live in. This course is designed to provide insights into Asia by means of its cinema. The course is designed around weekly lectures, linked to a representative film, and augmented with discussions that integrate the critical readings with the films. We will cover a wide range of Asian nations and subjects ranging from popular commercial box office hits to critically-acclaimed artistic masterpieces created by Asian filmmakers to highlight Asian experiences. Some of the national genres that we will address include Bollywood masala films, Japanese anime, Hong Kong martial arts, and Korean

hallyu (culture wave). Prior knowledge of Asia and/or the cinema is not required. All films will be screened in their original languages with English subtitles. The course is designed to introduce students to Asia on a broad scale.

LLEA 31105. Masters of Contemporary Chinese Cinema - Lab

(0-2-0)

Corequisite: LLEA 33105

This introductory film course showcases master directors and major films from China, Hong Kong and Taiwan. Students will learn to appreciate Chinese cinema both for its content and techniques, while familiarizing themselves with social and political changes under which these films were produced in Greater China. We will examine cinematic accomplishments by master directors and analyze how they recreate for the audience different Chinese societies on the screen. This course is taught in English. No prior knowledge of Chinese is required.

LLEA 31314. Cruel Stories of Youth: Children and Teen in Japanese Cinema Lab

(0-0-0)

Corequisite: LLEA 33314

Corequisite discussion lab for Cruel Stories of Youth.

LLEA 31316. Introduction to Japanese Popular Culture Lab

(0-0-0)

Corequisite: LLEA 33316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity to the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? Knowledge of Japanese is not required.

LLEA 31888. Survey of Pan-Asian Cinema Lab

(0-0-0)

Corequisite: LLEA 20888

Certain films will be viewed for further discussion in class.

LLEA 32101. LAC Heroism and Eroticism

(1-0-1)

Students with advanced Chinese language proficiency are eligible to sign up for an additional single credit of work in the target language as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in the Chinese language materials, and meet once a week with faculty tutor from the Department of East Asian Languages & Cultures, who will guide the discussion and direct the written work. The LAC section in association with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Chinese. This course is for: Heroism and Eroticism in Traditional Chinese Fiction. In this course we will read works in Chinese fiction from the late imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which coincided with a general trend of "domestication" in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation.

LLEA 32155. LAC Multi-Cultural China

(1-0-1)

Students with advanced Chinese language proficiency may sign up for an additional single credit of work as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. This one unit course is an addendum to Prof. Lin's course on "Multi-Cultural China." Students choosing this option will meet once a week with Prof. Lin and discuss the authentic Chinese texts chosen to improve the students' reading and speaking skills. The LAC course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Chinese.

LLEA 33101. Heroism and Eroticism in Chinese Fiction

(3-0-3)

In this course we will read works in Chinese fiction from the late imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian, Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which coincided with a general trend of "domestication" in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation, and no prior knowledge of China or the Chinese language is required.

LLEA 33103. 20th-Century Chinese Literature

(3-0-3)

In this course we will read English translations of works in twentieth-century Chinese literature, especially short stories and plays written from the May 4th Movement in 1919 to the beginning of the Reform in the early eighties. We will discuss the literary expressions of China's weal and woe in modern times and of the Chinese people's frustrations and aspirations when their country was experiencing unprecedented social changes. No prior knowledge of the Chinese language or Chinese culture is required for taking the course.

LLEA 33105. Masters of Contemporary Chinese Cinema

(3-0-3)

Corequisite: LLEA 31105

This introductory film course showcases master directors and major films from China, Hong Kong and Taiwan. Students will learn to appreciate Chinese cinema both for its content and techniques, while familiarizing themselves with social and political changes under which these films were produced in Greater China. We will examine cinematic accomplishments by master directors and analyze how they recreate for the audience different Chinese societies on the screen. This course is taught in English. No prior knowledge of Chinese is required.

LLEA 33107. City in Chinese Film/Fiction

(3-0-3)

Since the first decade of the 20th century, China has undergone tremendous changes, which are most evident in the life of city dwellers. In this class, we will read short stories and analyze films about urbanites and their desires, anguish, and aspirations. We will examine, for instance, why Shanghai was portrayed as the nadir of vice in the 1930s. Or how the underprivileged youths struggle in present-day Beijing. We will read about how the men and women of Taipei and Hong Kong grapple with their changing social, political, economic, and spiritual realities. To complete our understanding of the city in the mind of the Chinese, we will also explore writings by overseas Chinese on foreign cities such as New York and Paris. We will try to answer questions such as how different cities are portrayed and what these diverse perceptions represent. How have these perceptions changed over time? Is the city always exciting, threatening, or benign, and how do people in these various places cope with modern life in the city? Is there no more distinction among cities, now that we are all living in a global village?

LLEA 33108. Anti-Social Behavior in Modern Chinese Fiction

(3-0-3) Lin

Chinese society is often characterized as highly conformative and lacking in individuality. Is this true? What kind of behaviors then would be considered antisocial, and what are their moral, social, and political consequences? In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as antisocial, anticonventional, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications. For instance, are these behaviors justified? Are different standards applied to women? What are the temporal and spatial factors in people's conception of an antisocial behavior? To what extent are these behaviors culturally determined? No prior knowledge of the Chinese languages or China is required.

LLEA 33111. Chinese Literary Dreams and Dream in the Red Chamber

(3-0-3)

Dreams have long been objects of fascination for people in all cultures, including the Chinese. Focusing on the eighteenth-century Chinese master work *Dream of the Red Chamber*, this course examines the literary functions of dreams in the Chinese context. Dreams will be discussed as a catalyst in the process of fiction making, serving as a master trope for the "complementary oppositions" between truth and falsehood, between history and literature, between reality and fictionality, and between the sublunary and the supernatural. The goal of the course is to familiarize students with a novel that is generally considered the pinnacle of Chinese fictional literature and with some of the cultural convictions that underscore Chinese literary dreams. The primary text of the course is the 5-volume English translation of *Dream of the Red Chamber*. Supplementary readings include scholarship on the novel and modern theories on dream and the unconscious. Prior knowledge in Chinese language and culture not required.

LLEA 33112. Readings in Chinese Drama

(3-0-3)

This course studies a number of works in Chinese dramatic traditions from the premodern times up to the twentieth century. While attention will be paid to Chinese theater as performing art, the plays selected for this course will be studied primarily as literary texts. The purpose of the course is to familiarize students with some of the most outstanding formulations in Chinese drama and their underpinning cultural meanings. All readings are in English translations, and no prior knowledge of Chinese culture or language is required.

LLEA 33114. LAC Chinese, Heroism and Eroticism in Traditional Chinese Fiction

(1-0-1)

Students who have completed advanced Chinese are eligible to sign up for an additional single credit of work in the target language as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in the Chinese language materials, and meet once a week with faculty tutor from the Department of East Asian Languages & Cultures, who will guide the discussion and direct the written work. The LAC section in association with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Chinese. This course is for: Heroism and Eroticism in Traditional Chinese Fiction. In this course we will read works in Chinese fiction from the late imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which coincided with a general trend of "domestication" in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation.

LLEA 33115. LAC Introduction to Japanese Popular Culture

(1-0-1)

Students who have completed the first semester of third year Japanese or higher, or who possess equivalent Japanese language skills, are eligible to sign up for an additional one credit section. The Languages Across the Curriculum (LAC) section will meet for one hour once a week for discussion of course material in Japanese. Students will also read selections of course material in the original, and submit three short (2-3 page) writing assignments. The LAC section will be graded on a pass/fail basis. This course is a component of LLEA 33316, Introduction to Japanese Popular Culture. This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)?

LLEA 33155. Multi-Cultural China

(3-0-3)

This course showcases the multifaceted aspects of China not only in the ethnic sense but also in the political sense. We will read literary works by writers of different ethnic backgrounds (e.g., Han, Tibetan, the Atayal tribe from Taiwan) and geographical origins (the PRC, Taiwan and Hong Kong). The objective of this course is to help students to gain a deeper understanding of the notion of Greater China and the concept of “Chineseness.” Through analyzing works by different ethnic writers, we will learn to appreciate the diversity of Chinese culture that is often overshadowed by a misconception about Chinese homogeneity. Likewise, fictional creation by writers from the three regions will give us a broader knowledge of Chinese culture that is constantly threatened by a political need for unity. This course is taught in English and no prior knowledge of the Chinese languages is required.

LLEA 33301. Love and Death in Traditional Japanese Drama

(3-0-3)

In this course we will explore the themes of love and death in the three main forms of traditional Japanese theater: Noh, Kabuki, and Bunraku (puppet theater). We will begin with the medieval Noh theater, which evolved out of a variety of performing arts and reached maturity in the fifteenth century under the patronage of the warrior aristocracy. In an effort to create an atmosphere of mystery and beauty, these plays transformed episodes from folk tales, courtly romances, and military epics into highly stylized dance-dramas imbued with the austere aesthetic of Zen Buddhism. For the remainder of the course, we will study Kabuki (a theater of live actors) and Bunraku. These two rival forms of popular entertainment first appeared in the 17th century as part of a new and lively urban culture. This was the “floating world” (*ukiyo*) of teahouses, brothels and theaters, where townsmen mingled with samurai in the pursuit of pleasure and spectacle, and where Kabuki actors became the first “superstar” celebrities. We will focus on plays by Chikamatsu Monzaemon (1653–1725), the “Japanese Shakespeare,” who wrote for both Kabuki and Bunraku. Plays such as *The Love Suicides at Sonezaki* (1703) *Gonza the Lancer* (1717), and *The Woman-killer and the Hell of Oil* (1721), bring to life tragic tales of star-crossed lovers, adulterous wives, and murdering ne'er-do-wells. In addition to reading and discussing selected plays, students will view scenes from modern performances and from modern film adaptations. All readings will be in English translation and no previous knowledge of Japan is required.

LLEA 33314. Cruel Stories of Youth: Children and Teens in Japanese Film

(3-0-3)

Corequisite: LLEA 31314

From the wide-eyed children of anime to the crazy street fashions of Harajuku, images of kids and teens in Japanese popular culture are now distributed and consumed around the world. How then are those young audiences depicted and addressed within Japanese popular culture? What aspects of childhood or teen identity are repeated across generations? In order to answer these questions, we will look at Japanese films, including animation, from across the 20th century, that represent children and teens from a variety of perspectives, from the celebration of innocence to the threat of juvenile delinquency. In addition to analyzing representations of children and teens, students will also gain familiarity with Japanese film history and genres, and develop the critical vocabulary of film analysis. Films will include *I Was Born But*, *Crazed Fruit*, *A Cruel Story of Youth*, *Battle Royale*, *All About Lily Chou Chou*, *Nobody Knows*, *Grave of the Fireflies*, and *Akina*. All films will be subtitled. There will also be secondary readings in cultural studies and film studies, relating to the films we watch in class. Assignments will include an oral presentation, several short writing assignments, a film viewing journal, and a longer paper.

LLEA 33315. Men and Women in Modern Japanese Literature

(3-0-3)

In 20th-century Japan, as old roles such as samurai and geisha waned, both men and women had to re-define the characteristics and meaning of masculinity and femininity. This course will look at constructions of gender in modern Japanese literature by both female and male authors. As we discuss both normative and deviant depictions of male and female roles, some topics we will address include: men and women at work and at war, marriage and family life, homosociality and homosexuality. Students will also gain familiarity with some of the major authors, genres, and literary movements of modern Japanese literature. Texts will include *Kokoro* by Natsume Soseki, *Confessions of a Mask* by Mishima Yukio, *Diary of a Vagabond* by Hayashi Fumiko, and short stories by Higuchi Ichiyo, Kono Taeko, and Oe Kenzaburo. This course is taught in English and no knowledge of the Japanese language is required.

LLEA 33316. Introduction to Japanese Popular Culture

(3-0-3)

Corequisite: LLEA 31316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? The goals of this course are to gain familiarity with some key texts in postwar Japan, and to learn various methods of analyzing those texts. As we approach each medium, we will be using film, television, and comics theories to analyze them. In order to gain proficiency in the academic analysis of popular culture, you will use those theories in writing and in a formal oral presentation. Students who have completed the first semester of third year Japanese or higher, or who possess equivalent Japanese language skills, are eligible to sign up for an additional one credit section. The Languages Across the Curriculum (LAC) section will meet for one hour once a week for discussion of course material in Japanese. Students will also read selections of course material in the original, and submit three short (2–3 page) writing assignments.

LLEA 33317. The Samurai in Classical Japanese Literature

(3-0-3)

The sword-wielding samurai warrior is perhaps the most familiar icon of pre-modern Japan, one that continues to influence how Japanese think of themselves and how others think of Japan even in modern times. Who were the samurai? How did they see themselves? How did other members of Japanese society see them in the past? How did the role and the image of the samurai change over time? To answer these questions, we will explore the depiction of Samurai in various kinds of texts: episodes from quasi-historical chronicles, 14th-century Noh plays, 17th-century short stories, and 18th-century Kabuki and puppet plays (many Kabuki plays, a theater of live actors, were first written for the puppet theater). While some of these texts emphasize themes of loyalty, honor, and military prowess, others focus on the problems faced by samurai in their domestic lives during times of peace. The last part of the course will be devoted to the most famous of all stories, *The Revenge of the 47 Samurai*. Students will read eyewitness accounts of this vendetta, which occurred in 1702, and then explore how the well-known Kabuki/puppet play *Chushingura* (“A Treasury of Loyal Retainers” 1748) dramatizes the conflicting opinions surrounding it. All readings will be in English translation and no previous knowledge of Japan is required.

LLEA 33609. LAC Buddhism in China

(1-0-1)

Students who have begun the study of Chinese or Japanese and are interested in an introduction to Classical Chinese may sign up for an additional single credit of work in Elementary Classical Chinese as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. This one unit course is an addendum to Prof. Gimello’s course on Buddhism in China. Students choosing this option will meet once a week with Prof. Gimello who will guide them in reading a few relatively brief passages from primary Chinese Buddhist texts chosen not only for their content but also for their suitability to the purpose of introducing the rudiments of Classical Chinese (Wenyan wen). The LAC course will be graded on a pass/fail basis and will be credited on the student’s transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Chinese. No prior study of Classical Chinese is required and even students who are still at the early stages of Chinese and Japanese, as well as more advanced students, are welcome to enroll. The Buddhism in China course, to which this one-unit LAC course is an addendum, is a thematic and historical overview of the development of Buddhist thought and practice in China with special emphasis on the process of mutual influence by which Buddhism, without ceasing to be Buddhist, became also a Chinese religion while China, without abandoning its indigenous religious heritage, became also a Buddhist culture.

LLEA 33847. Christianity and the Challenge of Buddhism

(3-0-3) Gimello

In 1997 Cardinal Ratzinger, now Pope Benedict XVI, made the controversial suggestion that in the future Buddhism, rather than Marxism, would be the principal challenge to the Church. He has also, of course, often and fully endorsed the declaration of the Second Vatican Council (*Nostra Aetate*) that the Church rejects nothing that is true and holy in other religions, including Buddhism. Against the background of these two judgments—which may seem, but really are not, mutually contradictory—this course will consider: The fundamental differences between Christianity and Buddhism, both in matters of doctrine and in matters of spiritual and moral practice. The reasons why—despite, or perhaps because of, those differences—Buddhism today attracts increasing interest in cultures once shaped chiefly by Christianity.

LLEA 40041. Introduction to Applied Linguistics

(3-0-3)

This course will introduce students to the properties of language and their systematic study via linguistic inquiry. Specifically, the origins and mechanisms of linguistic knowledge will be examined alongside the componential units of syntax, morphology, phonology and semantics. The course will further introduce students to applied linguistic study with an emphasis on second language acquisition and

the integration of sociocultural knowledge within this process. Students will complete this course with a greater understanding of the nature of language and the mechanisms whereby it is acquired, conceptually represented and produced.

LLEA 40412. Topics in Classical Japanese Literature

(3-0-3)

Survey of Japanese poetry, fiction, and drama from the earliest times through the mid-18th century. All texts are in English; no special knowledge of Japan or the Japanese language is required. The content of this course is the same as “Masterpieces of Classical Japanese Literature” (LLEA 30412) but students who enroll in this course will be assigned additional readings and be required to submit a 12–15 page paper at the end of the semester on a topic approved by the instructor. Possible topics include love, masculinity/femininity, death, and nature.

LLEA 40606. History of Modern China

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of the Qing dynasty) to the present. It will highlight China’s evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–49, back to a period of strength under the Communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

LLEA 40610. History of Chinese Medicine

(3-0-3)

In light of the contemporary currency of certain Chinese practices in the field of alternative medicine, this course will explore the phenomenon of Chinese traditional medicine in both its historical and contemporary settings. The first unit, Medicine in Ancient China, will explore the earliest medical ideas of the Chinese and will demonstrate how the state’s political unification gave rise to a correlative cosmology that not only included Heaven and Earth, but also human beings as integral elements of an organic cosmos. The second unit will explore the influences and contributions of Taoism (Daoism) and Buddhism to Chinese medicine and will explore what it meant to be both physicians and patients in late imperial China. The third unit will focus on medicine in contemporary China and will feature the experiences of Elisabeth Hsu, a student of Chinese medical anthropology who as a part of her doctoral research enrolled as a student in Yunnan Traditional Chinese Medical College between September 1988 and December 1989. We will conclude the course with a brief examination of the influence of Chinese medicine on the contemporary world.

LLEA 40615. Hong Kong Action Cinema

(3-0-3)

Corequisite: LLEA 41615

This course addresses the global significance of the gong fu vague [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supercedes Hollywood’s dominance in the genre? Is this purely a “Chinese” phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic & economic significance within a larger framework or must they be critically dismissed outright? What does it mean that “everybody was kung fu fighting” and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English.

LLEA 40831. Topics in Asian Anthropology: South Asia

(3-0-3) Mahmood

This course explores the latest developments in the anthropology of Asian societies and cultures. The course may include the study of nationalism and transnationalism; colonialism and post-colonialism; political-economy; gender; religion; ethnicity; language; and medicine and the body. Emphasis will be on social and cultural transformations of Asian societies in specific historical contexts.

LLEA 40851. Religion and the Visual Arts, Christian and Buddhist

(3-0-3) Gimello

An exploration of the role of the “icons” or sacred images in Buddhism and Christianity, and of the controversies in both traditions regarding their legitimacy and value. This course has a largely philosophical and/or theological agenda. It aims toward a theory of the holy image broad and supple enough to be usefully employed in the study of both traditions. It is designed also to provide the opportunity to assess both Buddhist and Christian conceptions of the religious sensorium (i.e., assessments offered by both traditions of the salvific value of “the eye” relative to that of “the ear,” of the “image” versus the “word,” of vision versus discourse, of the aesthetic dimension of spirituality, etc.) It would proceed by way of careful, comparative analysis of a few major examples of Buddhist and Christian art (e.g., Dunhuang murals of the Parinirvana or “Death of the Buddha” and Grunewald’s “Isenheim Altarpiece,” the Shingon “Womb Mandala” and van Eyck’s “Adoration of the Mystic Lamb,” Suger’s Abbey Church of St. Denis and Nara’s Todaiji or “Great Eastern Temple,” etc.). These examples would be considered against the background of both traditional and modern writings on the relations between religion and the arts (John of Damascus, Asanga, Erwin Panofsky, Jean-Luc Marion, et al.).

LLEA 41316. Introduction to Japanese Pop Culture Lab

(0-0-0)

Corequisite: LLEA 43316

Lab section for the Japanese Pop Culture course.

LLEA 42115. LAC Introduction to Japanese Popular Culture Discussion

(1-0-1)

Corequisite: LLEA 43316

Students who have completed third year Japanese or equivalent Japanese language skills, are eligible to sign up for an additional one credit section. The Languages Across the Curriculum (LAC) section will meet for one hour once a week for discussion of course material in Japanese. Students will also read selections of course material in the original, and submit three short (2–3 page) writing assignments.

LLEA 43108. Anti-Social Behaviors in Modern Chinese Fiction

(3-0-3) Lin

This advanced course is offered for students who would like to have a more in-depth analysis of literary works and the challenge of writing a longer research paper. In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as anti-social, anti-conventional, anti-government, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications as portrayed in fictional works. For instance, can we apply a universal standard or are anti-social behaviors culturally relative? How are anti-social behaviors used by writers and for what purposes? Are different standards applied to women? What are the temporal and spatial factors in people’s conception of an anti-social behavior? This course is taught in English and no prior knowledge of the Chinese languages or China is required.

LLEA 43316. Introduction to Japanese Pop Culture

(3-0-3) Shamoan

Corequisite: LLEA 41316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than

chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? The goals of this course are to gain familiarity with some key texts in postwar Japan, and to learn various methods of analyzing those texts. As we approach each medium, we will be using film, television, and comics theories to analyze them. In order to gain proficiency in the academic analysis of popular culture, you will use those theories in writing and in a formal oral presentation. Students who have completed the first semester of third year Japanese or higher, or who possess equivalent Japanese language skills, are eligible to sign up for an additional one credit section. The Languages Across the Curriculum (LAC) section will meet for one hour once a week for discussion of course material in Japanese. Students will also read selections of course material in the original, and submit three short (2–3 page) writing assignments.

LLEA 46498. Directed Readings

(1-0-1)

Requires “contractual agreement” with the professor prior to scheduling. For advanced students who wish to pursue an independent research project reading advanced materials.

LLEA 47498. Special Studies

(V-0-V)

Requires “contractual agreement”; with the professor prior to scheduling. For advanced students who wish to pursue an independent research project. Based upon the 2011 Asian Film Festival & Conference, students will examine the recent trends in Japanese animation. Students will participate in the film festival and conference by attending the screenings and guest presentations about the films. Requirements: Students are required to actively participate in all festival and conference events, including film screenings and academic panels. Students are asked to read a selection of academic articles that are related to the films and panels. Students will submit one of the following: 1) a reflection paper, approximately 3-pages in length, double-spaced; 2) a creative project that is approved by the instructors.

LLEA 58311. Honors Thesis, Chinese

(3-0-3)

Majors in Chinese are strongly encouraged to pursue the honors track. Those who are interested must meet the following criteria: 1) fulfillment of all the requirements for a first major of 30 credit hours in Chinese; and 2) a cumulative GPA of at least 3.6 or permission from the department chair. In addition to the 30 hours required for a major, the honors track requires the completion of a senior honors thesis of at least 30 pages that demonstrates the student’s originality and ability to do research in the target field. For this endeavor the student will receive 3 hours of graded credit. This means that to graduate with departmental honors, the student must earn 33 hours of credit in the major. Based on past experience, it is our expectation that honors projects will emerge from previous coursework where close interaction between faculty and students has planted the seeds for a larger project; from the student’s leadership role in the cultural and intellectual life of the department; or as a follow up to experiences begun during his/her study abroad program. A thesis director is chosen to guide the student and provide assistance.

LLEA 58411. Honors Thesis, Japanese

(3-0-3)

Majors in Japanese are strongly encouraged to pursue the honors track. Those who are interested must meet the following criteria: 1) fulfillment of all the requirements for a first major of 30 credit hours in Japanese; and 2) a cumulative GPA of at least 3.6 or permission from the department chair. In addition to the 30 hours required for a major, the honors track requires the completion of a senior honors thesis of at least 30 pages that demonstrates the student’s originality and ability to do research in the target field. For this endeavor the student will receive 3

hours of graded credit. This means that to graduate with departmental honors, the student must earn 33 hours of credit in the major. Based on past experience, it is our expectation that honors projects will emerge from previous coursework where close interaction between faculty and students has planted the seeds for a larger project; from the student's leadership role in the cultural and intellectual life of the department; or as a follow up to experiences begun during his/her study abroad program. A thesis director is chosen to guide the student and provide assistance.

German and Russian Languages and Literatures

GE 10101. Beginning German I

(4-0-4) DellaRossa

An introductory course of the spoken and written language. Aims at the acquisition of basic structures, vocabulary, and sound systems. For students with no previous study of the language.

GE 10102. Beginning German II

(4-0-4) Boes; DellaRossa; McChesney

Continuation of an introductory course of the spoken and written language. Aims at the acquisition of basic structures, vocabulary, and sound systems.

GE 10111. Intensive Beginning German I

(6-0-6) Weber

In this course, students will develop skills in understanding, speaking, reading, and writing German. They will also attain a grasp of the basic structures of the language. During class, emphasis will be placed on using the language to communicate and interact in a variety of situations and contexts. In addition, there will be a comprehensive introduction to the culture of German-speaking countries, with a particular emphasis on Austria, as this course is strongly recommended for students with no previous study of German who wish to participate in the International Studies Program in Innsbruck. The course is also open to any student who wishes to make more rapid progress in German language skills and cultural competence.

GE 10112. Intensive Beginning German II

(6-0-6) George

Continuation of GE 10101 (with permission) or 10111. In this course students will continue to develop and improve skills in understanding, speaking, reading, and writing German. They will also attain a grasp of the basic structures of the language. During class, emphasis will be placed on using the language to communicate and interact in a variety of situations and contexts. In addition, there will be a comprehensive introduction to the culture of German-speaking countries, as this course is strongly recommended for students who wish to study abroad in Germany. It is also open to any student who wishes to make rapid progress in German language skills and cultural competence.

GE 13186. Literature University Seminar

(3-0-3) Hosele; McChesney; Wimmer

This course introduces German literature and culture while also serving as an introduction to the seminar method of instruction. The course is writing-intensive, with emphasis given to improving students' writing skills through the careful analysis of specific texts.

GE 20201. Intermediate German I

(3-0-3) Boes; Profit

In this course, students will build on and develop their communicative abilities acquired in Beginning German I and II. The four-skills approach (speaking, listening, reading, and writing) is centered on authentic texts, recordings, videos, and other images. The course includes grammar review, concentrated vocabulary expansion, and intensive practice.

GE 20202. Intermediate German II

(3-0-3) Roche

In this bridge course, students will strengthen and refine the four linguistic skills (speaking, listening, reading, and writing). Students will work toward greater fluency, accuracy, and complexity of expression. They will debate, analyze, and express opinions. Materials and class discussions will center on a cultural topic that will carry through the entire semester.

GE 20211. Intensive Intermediate German I

(6-0-6) Weber

This course provides comprehensive training in all the communicative language skills, speaking, reading, writing, and listening, as well as cultural competence. Students will work with authentic texts, recordings, videos, and other images. During class, emphasis will be placed on using the language to communicate and interact in a variety of situations and contexts. The course includes grammar review, concentrated vocabulary expansion, and intensive practice. This course is strongly recommended for students who wish to study abroad in a German speaking country and for any student who wishes to progress rapidly in the ability to communicate in the German language.

GE 20212. Intensive Intermediate German II

(6-0-6)

This course provides comprehensive training in all language skills, speaking, reading, writing, and listening, with the goal of greater fluency, accuracy, and complexity of expression. Students will read and discuss selected cultural and literary texts with an emphasis on the period between 1945 and the present. They will review grammar in the context of situations and readings, become acquainted with Austrian and German culture and history, employ typical conversational strategies and gambits, sharpen listening skills, produce various types of written expression, and enlarge their active and passive vocabulary. This course is designed to prepare students with some previous study of German for study abroad in Innsbruck or Berlin. It is also recommended for any student who wishes to make more rapid progress in German language skills and cultural competence.

GE 20320. Pre-study Abroad—Austria and Germany

(1-0-1) Weber

This course is designed to prepare students who will be studying abroad.

GE 20610. The Crises of Modernity in German Culture, 1900–1933

(3-0-3)

German culture during the period from 1900 to 1933 can be read as the sustained response to a series of crises that overturned moral, religious and social conventions. Sexual and political emancipation, the mass suffering of the First World War, the turmoil of the “Golden Twenties” and the ultimate rise of the Nazi party presented writers, artists and philosophers with unprecedented experiences that demanded new forms of creative expression. In this course, we will study the varied responses to this challenge and discover how the foundations for our modern consciousness were laid in the first three decades of the twentieth century. After reading two influential theoretical accounts of modernity by Nietzsche and Freud, we will move on to the sumptuous aestheticism of Vienna during the age of Strauss, Kafka and Kokoschka. During the second half of the course, we will study the frantic urban culture of Berlin during the 1920s, paying special attention to works by Brecht, Mann, Weill and others. In addition to literature and philosophy, we will cover music, film and the fine arts, paying special attention to mixed genres and limit cases of literature, such as opera, song cycle and artist book. (In English)

GE 20810. Specters, Spectators, and the Spectacular in the German Novella

(3-0-3)

Innate human curiosity has long fueled our desire to gain a glimpse, if but for a moment, into others' lives and into other worlds. The German novella delights in fulfilling this wish, and it presents readers with vivid tales of fantastic dreams, scandalous realities and ghostly encounters. This course retraces the visual legacy of this short literary form from its roots in the spectacular novella cycles *1001 Arabian Nights* and Boccaccio's *Decameron* to its presentation of specters and spectacles in the German novellas from the 18th century to the present. Each work will be read and discussed with careful attention to its formal characteristics, its visual thematic, and their effects. We will also consider comparable novellas in the broader European tradition.

GE 27998. Special Studies: German

(3-0-V)

This course was created to allow students to add credit in special circumstances to an already existing course offered in the department. Approval of department chair and instructor of the course is required.

GE 30102. The ABCs of Reading and Writing about Literature (in German)

(3-0-3) Profit

At most, two works will be read: *Durrenmatt's Der Richter und sein Henker* and *Der Besuch der alten Dame*. We will read these carefully, with great attention to detail. Writing assignments will evolve from the readings; they may include a character portrayal, the description of an outdoor event, a short conversation, description of a crime scene, etc. They will increase in length from a single paragraph to two or three pages.

GE 30104. Advanced Composition and Conversation

(3-0-3)

This course is designed for students who have successfully completed four semesters of German language. This course expands on grammatical structures and offers students the opportunity to increase the sophistication of their written and oral German. A study of everyday German culture supports the language study. Writing assignments are varied widely to address the interests and strengths of all students and to allow many opportunities for creativity through the exploration of genres and writing styles. The conversational component requires student-teacher and student-student interaction in large and small group settings to exchange information, clarify meanings, express opinions, and argue points of view. Throughout the semester students will build their vocabulary, including idiomatic expression, and solidify their understanding of German grammar. (Note: Berlin Study Abroad returnees will be admitted to the course only with the permission of the instructor.)

GE 30107. Kulturgeschichte

(3-0-3) DellaRossa

Prerequisite: GE 20202 or GE 20212

This course offers a survey of major developments in the cultural history of Germany and Central Europe. The course will investigate different manifestations of German and Central European cultures, such as literature, painting, architecture, music, and philosophy, as well as their interrelationship and historical contextualization. The course will provide an overview of important cultural and historical developments that have shaped German-speaking Europe. The goal is to familiarize students with basic techniques of approaching and interpreting texts and artifacts while preparing them for a wider range of more specialized courses. Taught in German.

GE 30108. Literatur von gestern und heute

(3-0-3) Wimmer

This course acquaints students with the major periods and issues of German literature through the examination of a significant constellation of literary texts. Students read, discuss, and analyze selected texts from prose, poetry, and drama and become familiar with basic techniques of approaching and interpreting texts that will prepare them for a wider range of more specialized courses.

GE 30113. Business German

(3-0-3) Wimmer

Prerequisite: GE 30107 AND GE 30108

German business language and practices. Designed to introduce the internationally oriented business and German major to the language, customs, and practices of the German business world.

GE 30215. Medieval German Literature

(3-0-3)

This course constitutes a survey of German literature from its beginnings during Germanic times until the 16th century. Ideas, issues, and topics are discussed in such a way that their continuity can be seen throughout the centuries. Lectures

and discussions are in German, but individual students' language abilities are taken into consideration. Readings include modern German selections from major medieval authors and works such as *Hildebrandslied*, *Rolandlied*, *Nibelungenlied*, *Iwein*, *Parzival*, *Tristan*, courtly lyric poetry, the German mystics, secular and religious medieval drama, *Der Ackermann aus Bohmen*, and the beast epic *Reineke Fuchs*. Class discussions and brief presentations in German by students on the selections are intended as an opportunity for stimulating exchange and formal use of German.

GE 30464. German History, 1740–1870

(3-0-3) Deak

This course begins with Prussia's initial challenge to Austria's dominance in central Europe; it ends with the unification of Germany under Bismarck's Prussia—and Austria's exclusion from it. In addition to covering the on-going Austro-Prussian rivalry in Germany, the course will consider German history in a broad central European perspective that covers the variety of what was German-speaking Europe. We will cover the cultural, social, and political transformations of the period. Specific topics may include Enlightened Absolutism and the emergence of the "enlightened" police state, the influence of the French Revolution in the German-speaking lands, as well as the revolutions of 1848 and the struggle for German Unification. Additionally, we will cover larger long-term processes such as the emergence of civil society, political transformations such as the growth of German Liberalism and Nationalism and the emergence of Socialism, and German contributions to larger cultural and intellectual fields such as the Enlightenment and Romanticism.

GE 30465. Modern Germany Since 1871

(3-0-3) Faulkner

This course examines modern Germany from national unification in 1871 to the recent unification of the two Germanys and beyond. We will investigate cultural, political, and social dimensions of Germany's dynamic role in Europe and in the world. Topics include Bismarck and the founding of the Second Reich, World War I and the legacy of defeat, challenge and authority in the Weimar Republic, the National Socialist revolution, war and Holocaust, collapse of the Third Reich, conflict and accommodation in East and West Germany, and unification and its aftermath. Class format will combine lectures with discussion of readings from political, social, literary, and diplomatic sources.

GE 30555. Revolutionary Europe: 1848

(3-0-3) Deak

This course will introduce students to the major revolutions that occurred throughout continental Europe in 1848. In addition to covering the details of rapidly evolving events, we will look at long-term social and political roots of the revolution as well as the role of ideologies (socialism, nationalism, liberalism) in shaping actions taken (and subsequent interpretations of those actions). Finally, we will ask not only why these revolutions failed, but what makes them "European"—other than the accident of geography. This course will combine lecture and discussion in roughly equal measure. Readings for this course will include a textbook as well as primary source material including parliamentary speeches and constitutional documents, eyewitness reports, poetry, music, as well as literature.

GE 30565. The German Novella

(3-0-3) McChesney

This course will explore the German novella, one of the most popular genres of 19th-century German literature. Each work will be read and discussed with careful attention to its formal characteristics as well as its historical and cultural contexts. By proceeding chronologically through the literary periods of Romanticism, Biedermeier, Poetic Realism, and Naturalism, students will gain a sense of literary developments in the 19th century and how these reflect shifts within the broader culture. Among the writers to be read: Goethe, Tieck, Kleist, Hoffmann, Eichendorff, Stifter, Storm, Keller and Hauptmann. As a 30000-level course, writing will be emphasized. Students will be required to rewrite each of their essays.

GE 30620. Three Modern German Writers: Mann, Kafka, Seghers (3-0-3)

Detailed study of selected short fiction by three authors whose work exemplifies both different stylistic approaches to and different periods of German literary modernism. Primary sources will be complemented by background readings on German history from 1890 to 1945 and by a few theoretical texts on modernism and modernity in both English and German. Class conducted in German.

GE 30648. Masterpieces of German Cinema

(3-0-3)

Corequisite: GE 31648

German cinema has been from the start one of the most impressive, distinctive, and influential national traditions of cinema. This course, taught in English, will introduce students to some of the greatest works of German cinema, from the wake of World War I and the beginning of the Weimar Republic to the present day. The two-fold focus will be historical and aesthetic. Students will gain an appreciation of some of the fascinating complexities of German history, including the ways in which German films have tended to reflect contemporary issues, often indirectly, and some of the distinctive features of German film, also as an industry. In addition, we will interpret the films with appropriate attention not only to themes but also to the ways in which film as an art form expresses meaning indirectly, by integrating genre and narrative form as well as film-specific dimensions such as setting, lighting, sound, camera work, and editing.

GE 30650. The Romantic Tradition

(3-0-3)

Between 1790 and 1830, the movement known as Romanticism profoundly changed the artistic, musical, historical, religious, and political sensibilities on the Continent and in Britain. Romanticism marked a turn from the rational formalism of the classical period and reawakened an interest in myth, religious faith, the imagination, and emotional experience. In this course we will focus principally on the German contribution to Romanticism and trace its origins, development, and eventual decline in works of literature, philosophy, theology, music, painting, and architecture. Works to be studied will include those by the writers Ludwig Tieck, Friedrich von Hardenberg (Novalis), and Friedrich Schlegel; the philosophers Fichte and Schelling; the theologian Friedrich Schleiermacher; the painters Caspar David Friedrich and some members of the Nazarene school; the composers Franz Schubert, Felix Mendelssohn, and Robert Schumann; and the architect Karl Friedrich Schinkel.

GE 30685. Discourses of Unity or Disunity? Representing Germany after 1990

(3-0-3) McChesney

The fall of the Berlin Wall in 1989 brought the hope of unity to two diverse German traditions. Yet despite rapid political and geographical unification, even now, more than 15 years later, Germany seems in many respects more dis-united than ever. In this course we will examine the unity discourse in contemporary German film and text. Focusing in particular on current depictions of the former East and West, we will consider whether these representations contribute to a new sense to national unity by emphasizing the similarities in a common past and present, or whether in fact they accentuate a sense of disunity by bringing out areas of difference, divergence and even conflict. The course will facilitate explorations of the literary, cultural and historical impact of (dis)unity in present-day Germany through intensive discussion, written essays, and short student-led presentations.

GE 30686. Radicalism and Reaction: Austrian Performance and Visual Culture after 1945

(3-0-3)

Prerequisite: GE 30107 AND GE 30108

"Is Vienna the new Berlin?" This question, from the cover story of a recent German art magazine, hints that Austria has a lot more going for it than just the Alps, Lipizzaners, Mozart and Freud, coffeehouse culture and Viennese modernism. It has a thriving contemporary literary, theater, and arts scene, which this course will explore. We will investigate post-World War II Austrian culture, society, and politics through controversial works by prominent postwar writers and

artists. Who are the major players in the postwar Austrian cultural scene? How have Austrian politics and society been reflected on in texts, performances, and visual art? What aesthetic forms have authors employed to critique Austrian society after 1945? Do male and female artists and writers thematize different topics, or do they thematize similar topics differently? We will address these questions, and many more, in the works of Nobel Prize-winner Elfriede Jelinek, Peter Handke, Thomas Bernhard, Helmut Qualtinger, Gerhard Roth, Barbara Frischmuth, Ingeborg Bachmann, Wolfgang Bauer, Fritz Hochwalder, Marlene Streeruwitz, and others. Combining close readings of texts with the study of video footage and visual images will allow us discuss different approaches to hot topics in the Second Austrian Republic, including issues of national identity and nostalgia, cultural amnesia and the fascist past, feminism, and provincialism. The course will involve discussion and critical analysis, short written essays, and oral presentations and performances. The goal is to build your German speaking, reading, writing, and listening skills—all while exploring thought-provoking works and learning about Austrian history, society, and culture from 1945 to the present.

GE 30850. Law and Justice on the German Stage

(3-0-3)

Prerequisite: GE 20202

The relationship between spectacle and law, narrative resolution and ethical justice is a recurrent theme in the German theatrical tradition from the 18th century to the present. This course will focus on a number of plays that dramatize the contentious relationship between state power and the individual, between personal conscience and the normative demands of society. We will pay special attention to the disquieting similarity between the theater and the courtroom, between the dramas that divert us and those by which we decide between right and wrong. Readings will be drawn from Lessing, Goethe and Kleist, as well as from the Brechtian tradition, which includes, besides Brecht himself, also Peter Weiss and Heiner Muller. Taught in German.

GE 30891. Masterpieces of German Literature

(3-0-3) Stoff

A sampling of the most beautiful, moving, and humorous prose and poetry of the 20th century will be read and interpreted. Amongst other authors, we will focus our attention on selections from Heinrich Boll, Wolfgang Borchert, Max Frisch, Karl Krolow, and Rainer Maria Rilke. The written assignments will evolve from the texts studied. Taught in German.

GE 31465. Modern Germany LAC Lab

(0-1-1)

Students undertaking the Notre Dame language requirement in German are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in German language materials and meet regularly with the instructor (or a designate) for a discussion in German. The LAC discussion section in German associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in German. Please contact the instructor if you are interested in adding this supplemental credit.

GE 31648. Masterpieces of German Cinema Lab

(0-0-0)

Corequisite: GE 30648

Certain films will be viewed for further discussion in class.

GE 36100. Directed Readings—German

(3-0-3)

From Hildebrandslied to Reyneke Vos: Selected highlights in medieval German literature with an emphasis on works which specifically reflect genres and ideas prevalent in Germanic, mostly oral, literature and Middle High German works of literature. Students will closely read and discuss a number of texts during twice-weekly meetings. Among them: Heldenlied (*Hildebrandslied*) and Preislied (*Ludwigslied*), Gospel Harmony (*Heliand*), *Nibelungenlied*, *Iwein*, *Parzival*, *Tristan*

und *Isolde*, Walther von der Vogelweide's poetry, Neidhart's poetry, Werner's *Helmbrecht*, *Osterspiel von Muri*, Wolkenstein's poetry, *Ackermann aus Böhmen*, and *Reynke de Vos*.

GE 40041. Introduction to Applied Linguistics

(3-0-3)

This course will introduce students to the properties of language and their systematic study via linguistic inquiry. Specifically, the origins and mechanisms of linguistic knowledge will be examined alongside the componential units of syntax, morphology, phonology and semantics. The course will further introduce students to applied linguistic study with an emphasis on second language acquisition and the integration of sociocultural knowledge within this process. Students will complete this course with a greater understanding of the nature of language and the mechanisms whereby it is acquired, conceptually represented and produced.

GE 40430. The Classical Period of German Literature (1750 to 1830)

(3-0-3)

Modern German literature comes into being at the middle of the eighteenth century. This period of German culture, often referred to as its "Classical Age," is represented by such figures as Klopstock, Lessing, Herder, Schiller, Goethe, Hölderlin, and Kleist. In this class we will read and discuss some of the great works written by these authors and analyze them in relation to the intellectual and cultural currents of the time.

GE 40440. Goethe and His Time

(3-0-3) Norton; Hosle

An intensive study of Goethe's major works of poetry, prose, and drama within the cultural framework of his times.

GE 40471. Twentieth-Century Prose and Poetry

(3-0-3)

In order to acquaint the student with the rich diversity characteristic of 20th-century German literature, a wide variety of materials will be studied. They will not only encompass various genres—the short story, the drama, and the poem—but will also represent various time periods: from the beginnings of the 20th century to the '50s. Among others, readings will include: Franz Kafka, *Die Verwandlung*, Wolfgang Borchert, *Draussen vor der Tur*, and poems from Rilke to Celan. An oral report, two papers, and a two-hour final will supplement thorough and engaging class discussions based upon close readings of the selected texts. Taught in German.

GE 40472. Twentieth-Century German Poetry from Rilke to Krolow

(3-0-3)

To acquaint the student with the rich diversity characteristic of 20th-century German poetry, a wide variety of materials will be studied from Rilke to Krolow.

GE 40484. Overcoming Political Tragedy

(3-0-3) Hagens

An interdisciplinary course in drama and peace studies. Drama is a potentially fascinating topic for peace studies because, at the heart of traditional drama and theatre, there is conflict—and the question of whether it can be resolved. Moreover, just as politics is often dramatic, drama is often political; there is, for example, an extensive tradition of plays that make a theme of political revolution, usually in the form of tragedy or comedy. Students in this course read classic political dramas that are neither tragedies nor comedies, but rather bring potentially tragic public conflict to positive yet nontrivial resolution. Having discussed definitions of tragedy and comedy, and what might be the advantages of aesthetic renditions of conflict, the class then reads some of these dramas of political reconciliation: Aeschylus, *Oresteia/Leumenides*; Shakespeare, *Measure for Measure*; Calderon, *The Mayor of Zalamea*; Corneille, *Cinna*; Lessing, *Nathan the Wise*; Schiller, *William Tell*; Kleist, *The Prince of Homburg*; Brecht, *The Caucasian Chalk Circle*; Lan, *Desire*; and Fugard, *Valley Song*. (We also may include selected films, such as *Meet John Doe*, *On the Waterfront*, or *Twelve Angry Men*.) We will examine these plays

(and films) through both the categories of drama analysis and theories of conflict resolution, mediation, and transformation, with the expectation of achieving greater depth in our interpretations of the dramatic texts and in our understanding of the theories of conflict resolution. Students of peace studies and political science who are familiar with these pieces of world literature will have acquired a new kind of resource for their ability to think through and work in conflict resolution.

GE 40490. Schiller (in German)

(3-0-3) Norton

In this course, we will consider Friedrich Schiller as a dramatist, poet, aesthetic philosopher, and historian. We will read several of Friedrich Schiller's most important plays, including *Die Rauber*, *Kabale Und Liebe*, *Die Verschwörung Des Fiesko*, *Wallenstein*, *Maria Stuart*, and *Die Braut von Messina*. In addition, we will read from his letters on beauty (*Kallias*), and the essays *uber Anmut und Würde*, *Uber naive und sentimentalische Dichtung*, and *Die aesthetische Erziehung des Menschen*. Finally, we will also read selections from his historical works on the Thirty Years' War and on The Netherlands.

GE 40610. Crises of Modernity in German Culture

(3-0-3) Boes

To a European citizen living in the year 1900, the world would have seemed a promising place. The continent had enjoyed almost universal peace for the past eighty years, science and the arts were prospering, the economy was booming. Yet less than fifty years later, Europe lay in ruins, reeling from a half-century of war, economic depression and genocide. This course will set out to explore what happened. Instead of focusing on political, economic or military history, however, we will enter the minds of some of the thinkers and poets who shaped cultural life during the first third of the century, choosing Germany as our specimen case. It was here that modern thought attained its greatest heights and here, also, that it ultimately sank to its lowest depths. Through close analysis of selected texts, we will uncover how the heights and the depths were intimately related to one another, and how modernity was from the very beginning dogged by a series of profound crises. Readings and discussion in English. Students taking the course for German credit will study selected texts in the original and write their papers in German. Open to sophomores with permission of instructor only. Authors will include Nietzsche, Freud, Weber, Heidegger, Brecht, Hesse, Höch, Riefenstahl and others.

GE 40648. German Cinema in the Weimar Republic (1918–33) (in English)

(3-0-3) Hagens; Boes

The years between 1918 and 1933 are the Golden Age of German film. In its development from expressionism to Social realism, the German cinema produced works of great variety, many of them in the international avant-garde. This course gives an overview of the silent movies and sound films made during the Weimar Republic and situate them in their artistic, social, and political context. The oeuvre of Fritz Lang, the greatest German director, receives special attention. Should we interpret Lang's disquieting visual style as a highly individual phenomenon independent of its environment, or can we read his obsessive themes (world conspiracies and terrorized masses, compulsive violence and revenge, entrapment and guilt) as a mirror image of the historical period? Might his films, as some critics have suggested, even illustrate how a national psyche gets enmeshed in fascist ideology? Films subtitled, dubbed, or in English; readings, lectures, and discussions in English.

GE 40649. Comedy, Jokes, and Satire in the German-Speaking World

(3-0-3) Roche

Prerequisite: GE 30107 AND GE 30108

This course will explore the comic vision in the German-speaking world, by considering comedy, jokes, satire, and the related concept of humor, a distinctively German category. Comedy is an often-overlooked genre in Germany, but a number of fascinating works invite our reading and exploration. We will explore works, mainly dramatic, by authors such as Lessing, Kleist, Grillparzer, Schnitzler, Hofmannsthal, Brecht, and Thomas Mann, and look at the theory of comedy via

authors such as Hegel and Frye. As part of our exploration of the comic vision, we will consider jokes, including their thematic and structural diversity, as well as their relation to broader aspects of German culture, including its diversity. Students will read Freud's classic essay on jokes. Beyond considering Schiller's famous theoretical statements on satire, we will look at some of the best German satire by authors such as Heine, Heinrich Mann, and Tucholsky. We will also consider one or more comic or satiric films. As part of the course we will explore the conditions under which the comic tends to surface and flourish, including broader questions such as religious sensibility and political climate.

GE 40669. Modern Metropolis in German Literature

(3-0-3) Hagens

If Paris was known as the capital of the 19th century, turn-of-the-century Berlin was declared the capital of the 20th century. The largest then-German metropolis came to epitomize rapid and spectacular modernization in Germany that started before World War I and continued during the Weimar Republic. Berlin had it all: gigantic industrial factories, glamorous boulevards, street lights, dazzling shop windows, night life, movies and entertainment, armies of white-collar employees, housing barracks, modern architecture, shopping, traffic, crime, and social problems. This course offers an introduction to one of the most dynamic periods in German cultural history (1900–33) as it is represented in texts and films about the big city. The discussions will focus on the following questions: Why did the big city appear fascinating and inspiring to some authors, and to others it loomed as a dreadful epitome of alienation and decadence? How were modern phenomena reflected in language and images? What were the forms of aesthetic innovation and artistic experimentation associated with the representation of modern life? Did men and women experience metropolitan modernity differently?

GE 40672. The Modern German Short Story

(3-0-3) Wimmer

The German short story and other forms of prose from the "Stunde Null" in 1945 to the 1990s. Authors range from East and West German writers of the immediate postwar era to the most recent commentators on issues of politics, society, gender, and aesthetics.

GE 40675. Minority German Writers (in German)

(3-0-3) DellaRossa

This course explores German-language literature written by authors of non-German heritage. As a seminar it opens up the possibilities of reading a more diverse body of post-1945, and more specifically post-Wende, German literature. Secondary texts will help us to understand the social and historical context in which these authors write. The primary reading selections will include works by authors of African, Turkish, Sorbian, Roma, and Arab heritages.

GE 40685. Twentieth-Century German Literature

(3-0-3) Profit

This survey course introduces students to the major writers in 20th-century German-language literature. We will be reading, discussing, and writing about poems, short stories, and dramas by authors such as George, Hofmannsthal, Rilke, Trakl, Thomas Mann, Kafka, Musil, Brecht, Celan, Bachmann, Frisch, Durrenmatt, Enzensberger, Christa Wolf, Peter Schneider, Brinkmann, Hahn, and Konigsdorf. By also considering these writers, contexts—the trends and movements they were part of, the activities in the other arts that influenced them, the contemporary discourses that surrounded them—we may be able to add depth and nuance to our readings. Thus, depending on student interest and ability, we will familiarize ourselves with the larger environs of 20th-century German-language culture. Taught in German.

GE 40850. Verbrechen, Detektion, und Gerechtigkeit im deutschen Kriminalroman

(3-0-3)

(Crime, Detection and Justice in the German Crime Story.) Tales of crime and detection famously engage their readers in enthralling stories about perplexing criminal acts and the harrowing search to solve the crimes and to capture and judge the guilty. Through these depictions, German detective stories however also

fundamentally challenge ideas of justice. They present the reader with questions such as: What is the source of justice? Which type of justice drives the detective? Which idea of justice determines the judgment? And, what happens when these ideas are at odds? In this course we will look at the changing depictions of justice in German detective stories from 1786 to the present and how they cast a critical light on society. Each work will be read and discussed with careful attention to its formal characteristics as well as to the historical changes in the judicial system that are reflected in the works. Among the authors we will read are: Schiller, Kleist, Hoffmann, Dürrenmatt and Schlink.

GE 40855. German Drama 1750 to the Present (in German)

(3-0-3) Hagens

We will read and discuss some of the greatest plays in the German dramatic tradition, by authors such as Lessing, Goethe, Schiller, Kleist, Grillparzer, Nestroy, Freitag, Hauptmann, Hofmannsthal, Brecht, and Werfel. This semester we will focus on the so-called “drama of reconciliation,” a newly rediscovered genre, where the conflict is serious but ends harmoniously. By interpreting classic German-language plays in the original, you will 1) learn how to approach drama analysis, and 2) develop a sense for the history of drama throughout the past 250 years. In addition, we will study a few short, and often English-language, texts in the theory of drama (Aristotle, Schelling, Carriere, and Cavell, as well as the department’s own Hosle and Roche), which will 3) allow you to differentiate between the basic genres of drama (tragedy, comedy, and drama of reconciliation), and 4) better understand the nature of conflict and reconciliation. Students interested in other national literatures will have the opportunity to draw comparisons with plays by authors such as Aeschylus, Sophocles, Shakespeare, Calderon, Corneille, Racine, and Ibsen; and those interested in film may branch out into analyzing works by directors such as Hitchcock, Renoir, Ford, Capra, Curtiz, Hawks, Chaplin, and Kurosawa.

GE 40889. Literature and Religion

(3-0-3) Roche

Literature, according to Martin Wälsler, descends just as irrefutably from religion as human beings do from the apes. Indeed, there is no denying that even during aesthetic modernism, literature, art, and religion are closely intertwined. When art achieved autonomous status in the second half of the 18th century, it did, to be sure, shed its subservient function relative to religion, yet in terms of its topics, themes, and, most particularly, its claim to interpret and give meaning to human existence literature remained tied to religion, in fact became its great rival. This seminar will examine several stations of this development. Beginning with church hymns during the Renaissance and Baroque, we will see how the Bible was discovered as a literary text in the 18th century. At the end of the century, art is conceived as an autonomous, even holy artifact. Poetry, for some, even becomes the medium of human self-definition and the place in which new myths are created. In the Romantic period art and religion become fused into a single unity. A century later, art and religion again come into close contact in lyric poetry of the fin-de-siècle. The seminar concludes with a consideration of the psalm form in 20th-century poetry. Readings will include works by Luther, Paul Gerhardt, Klopstock, Holderlin, Wackenroder, Stefan George, Rilke, Trakl, Brecht, Celan, and Bachmann.

GE 40891. Evil and the Lie (English and German)

(3-0-3) Profit

In an attempt to define the nature of evil and its relation to such phenomena as lying and the preservation of a self-image, this seminar will carefully analyze works spanning the years 1890–1972. Among them will be Wilde, *The Picture of Dorian Gray*; Gide, *The Immoralist*; and Frisch, *Andorra*. Further courses acceptable for comparative literature majors will be found listed by the Department of English. Consultation of program director is required.

GE 40911. Self-Definition and Quest for Happiness in Continental and American Prose of the Twentieth Century

(3-0-3) Profit

Everyone from the ancients to the most technologically conscious CEOs tell us that those who succeed know the difference between the important and the

unimportant and they allocate their time accordingly. But how does one make these choices? If, in fact, success and happiness are synonymous, as some would claim, which way lies success, lies happiness? And what are the guideposts? What really matters? In an age such as ours, does anything have lasting value? Do I really matter? If I am most assuredly defined by my beliefs and my deeds, what then do I believe, what do I do? In the final analysis, who am I? If literature, as so many maintain, not only mirrors but also foretells world events, how have several 20th-century authors representing diverse national traditions formulated the answers to these seminal questions? Readings will include F. Scott Fitzgerald, *The Great Gatsby*; Albert Camus, *The Stranger*; and Max Frisch, *Homo Faber*.

GE 40920. Hermeneutics and Literary Theory

(3-0-3)

What makes an interpretation of a literary text valid? The reconstruction of what the author meant by his text, intentionalists say. But does one understand enough if one just goes back to what the author had in mind, some anti-intentionalists ask. Both intentionalists and anti-intentionalists claim to derive their respective hermeneutic norms from insights into the nature of textual meaning in general and literary semantics in particular. This seminar will focus on the relationship between the theory and methodology of interpretation and literary theory. We will analyze major contributions by, among others, Hans-Georg Gadamer, E.D. Hirsch, Paul Ricœur, Frank Kermode, Umberto Eco, and Richard Rorty. Note: Readings in English and German, discussions in English.

GE 40928. Literary Criticism from Aristotle to Jakobson

(3-0-3)

The course will render the students familiar with some basic texts from two millennia. We will begin with Aristotle’s *Poetics*, discuss Horace’s *Ars poetica* and Longinus’s *On the sublime*. The medieval period will be represented by a work by Dante. A special focus will lie on the creation of modern literary criticism in German idealism, but we will also discuss post-idealistic works (including Nietzsche) and end with Roman Jakobson’s groundbreaking structuralist approach to the nature of poetic language.

GE 40980. From Goethe to Nietzsche to Kafka: The Search for God in German Literature and Philosophy

(3-0-3) Hosle

One of the peculiarities of German culture is the strong connection between philosophy and literature; another the heroic attempt to develop a religion no longer based on authority, but on reason. We will discuss the main steps in this German quest for God, alternating philosophical and literary texts by authors such as Lessing, Goethe, Kant, Hegel, Schopenhauer, Nietzsche, and Kafka. Texts and discussions in English. Prerequisite: junior or senior standing

GE 40988. Plato Before The Republic

(3-0-3) Hosle

Plato is the philosopher most difficult to interpret. The range of his interests, the innovative nature and the complexity of his thought, finally the fact that he does not speak in first person adds to the difficulty. After a general introduction into the main problems and positions of Plato scholarship today, we will read some of his dialogues written before his most important work, *The Republic*, dealing with such various topics as virtues, the nature of art, the relation of ethics and religion, the politics of Athens, and the essence of knowledge. We will analyze both his arguments and the literary devices by which he communicates them and partly withholds and alludes to further ideas.

GE 40989. Philosophical Dialogues

(3-0-3) Hosle

Philosophy is communicated in different literary genres—as essays, treatises, didactic poems—the choice of which influences in a subtle manner the contents exposed. One of the most interesting literary genres used by philosophers is certainly the dialogue, since it allows to hide the author’s mind behind a variety of different positions which get the chance to articulate themselves and since it shows

the connection between philosophical ideas and discursive behavior. We shall read different texts ranging from Plato to Feyerabend to see how different philosophers have exploited the possibilities of this genre.

GE 43155. Faith, hope, and love: Thomas Aquinas and Kierkegaard on Christian Ethics

(3-0-3)

The course aims at clarifying both the differences between Christian and ancient ethics and the contrast between Catholic and Lutheran theological ethics. Faith, hope, and charity being regarded as the classical theological virtues, it deals with Aquinas's and Kierkegaard's treatment of these theological virtues. We will read the first treatise in the *Secunda secundae* of Aquinas's *Summa theologiae* as well as Kierkegaard's *Fear and Trembling* and *Deeds of Love*, analyse the arguments, the literary form of the texts, the connections with the overall view of the two philosopher-theologians and the historical position of the texts.

GE 43400. Max Kade Seminar

(3-0-3) Jaeger

Prerequisite: GE 30107 AND GE 30108

This is a seminar that is taught every spring by a distinguished professor of German from Germany.

GE 43439. Goethe's Lives

(3-0-3) Hosle

Goethe is doubtless the greatest German poet. He was the last Renaissance man—a philosophical mind, a scientist, and a statesman, who has written some of the most sublime German literature in all three genres. But one of his greatest artworks was his own life. We will read his autobiography *Dichtung und Wahrheit*, which gives us a splendid overview of Germany's intellectually most prolific time, and his *Italienische Reise*, one of the most intense experiences of the essence of Italian culture ever. One of the focuses of the seminar will be on the literary transformation of biographical facts peculiar to all autobiographies, and to Goethe's in particular.

GE 43483. Seminar on German Women Writers

(3-0-3) DellaRossa

This seminar offers a look into the rich and varied body of literature written by German-speaking women from the Enlightenment to today. The course examines a significant constellation of texts and addresses the major literary periods, authors, and issues of the time period under study. The texts we read will span centuries and historical moments as well as represent various genres, such as: drama, poetry, novella, short story, memoir, letters, and interviews. Vocabulary and concepts central to the analytical and critical discussion of the primary texts within their social, historical, cultural and intellectual contexts will be introduced in secondary source readings and clarified in short lectures. The classroom format will be centered upon student discussion of both primary and secondary texts. The ultimate goal of the course is to familiarize students with the basic techniques of approaching and interpreting texts from a feminist/gendered point of view. Some of the questions/issues we will address this semester include the following: What is feminist literary criticism? What are its advantages and disadvantages of it as a tool for examining literature by women? Can we identify specifically female literature and themes? Should we? Do women authors have a particular "female" language or narrative perspective? Is there a feminine aesthetic? In what ways is gender a social construct? Are the works by these women in the traditional German canon? Why or why not? What influence do ethnicity, class, sexual orientation, age, marital status, religion and other social categories have on the writings of these women? What influence have historical circumstances (work, women's rights, etc.) had on the creative work of women?

GE 43499. German Literature Senior Seminar

(3-0-3)

Taught in German. Seminar devoted to the intensive study of selected works, periods, and genres of German literature.

GE 47498. Special Studies

(V-0-V)

Under the supervision of the assigned instructor, this course permits a student to conduct research in a particular approved area of special studies.

GE 48499. Senior Thesis

(V-0-V) Staff

German majors who wish to graduate with honors may write a senior thesis. For those German majors who elect to write a thesis, several requirements must be met: 1) The student must have a GPA of 3.5 or higher in the major, 2) the thesis must be at least 30 pages long, and 3) the thesis must be written in German. The student writing a thesis enrolls in GE 48499 and receives one course credit (three credit hours) for the course. Although the thesis is graded by the advisor (to receive honors, the thesis must receive a grade of B+ or higher), a second faculty member reader acts in advisory role to the advisor. The thesis is due the week after spring break, and the student is strongly advised to begin thinking about it and start conferring with the advisor before the October break of the fall term.

GE 53100. Literary Theory: Philology and Weltliteratur

(3-0-3)

The Literature Programs course on literary theory deals with theories of different time and places with emphasis on the critical problems that arise when what we call "literature" is investigated in a multicultural context. Issues that may be expected to arise include the following: the problems of translation, the meaning of metaphor, hermeneutics complexity, the meaning of the word "style," and the relation between oral and written literatures. Eric Auerbach's essay "Philology and Weltliteratur", from which this course derives its title, serves as a point of departure for exploring the possibility of developing an approach to literary history and literary interpretation that: a) attends to the historical, cultural and aesthetic specificity of the individual literary work, and b) at the same time, brings into relief the complex ways in which cultures interact, overlap, and modify one another. The course will focus primarily on the pertinent works of Vico, Herder, and the German Romantics, Auerbach (and other historicists), Arnold, C.L.R. James, Raymond Williams, and Edward W. Said, as well as selections from the writings of Fanon, Ngugi, Lamming, Césaire, and others.

RU 10101. Beginning Russian I

(4-0-4) Peeney

No prerequisite. Develops students' skills in listening, speaking, reading, and writing while also fostering an appreciation for Russian culture. Emphasis is placed on the acquisition of basic structures, vocabulary, and sound systems. Students will be encouraged to use their language skills to communicate and interact in a variety of situations and contexts.

RU 10102. Beginning Russian II

(4-0-4) Peeney

Prerequisite: RU 10101

Continuation of Beginning Russian I. Develops students' skills in listening, speaking, reading, and writing while also fostering an appreciation for Russian culture. Emphasis is placed on the acquisition of basic structures, vocabulary, and sound systems. Students will be encouraged to use their language skills to communicate and interact in a variety of situations and contexts.

RU 13186. Literature University Seminar

(3-0-3) Marullo

This course introduces students to Russian literature and culture while also serving as an introduction to the seminar method of instruction. The course is writing-intensive, with emphasis given to improving students' writing skills through the careful analysis of specific texts.

RU 20101. Intermediate Russian I

(3-0-3) Gasperetti

Prerequisite: RU 10102

This is the first half of a two-semester review of Russian grammar designed to facilitate a near-native proficiency with the form and function of Russian nouns,

verbs, and adjectives. Exceptional forms are stressed, and reading selections on contemporary Russian life and excerpts from literature are employed to improve comprehension and build conversational and writing skills.

RU 20102. Intermediate Russian II

(3-0-3) Gasperetti

Prerequisite: RU 20101

This is the second half of a two-semester review of Russian grammar designed to facilitate a near-native proficiency with the form and function of Russian nouns, verbs, and adjectives. Exceptional forms are stressed, and reading selections on contemporary Russian life and excerpts from literature are employed to improve comprehension and build conversational and writing skills.

RU 23500. Chance or Choice: Fate and Free Will in Russian Literature (in English)

(3-0-3)

The opposition of fate vs. free will is central to matters of philosophy, religion, ethics, and science, and the same opposition figures in the sphere of our daily lives as well. Common phrases such as “It’s meant to be” and “I can make it happen” shape our parlance in terms of fate and free will. This course will explore the complex interaction of these seemingly contradictory concepts as they are particularly manifested in Russian literature and the arts. We will analyze these themes broadly, tracing them through nineteenth and twentieth-century Russian literary history and connecting them to major ideas such as Romantic will and Marxist determinism. We will also consider the interplay of destiny and chance in the context of the private realm, framing individual characters’ fates in terms of certain rituals of Russian culture, such as card games, fortune telling, and dueling. The reading list will include works by major Russian authors and thinkers such as Pushkin, Dostoevsky, Bulgakov, and Nabokov.

RU 30101. The Literature of Imperial Russia I (in English)

(3-0-3) Marullo

The first part of a two-semester survey of long and short fiction focusing on the rise of realism in Russia. Topics to be included are the content and method of realism (gentry, urban, classical, romantic, empirical, and psychological); the evolution of the “family” chronicle; the nature and development of the Russian hero and heroine, particularly the “superfluous man,” “the philosophical rebel,” the “man-god,” and the “moral monster”; the interplay of patriarchal, matriarchal, and messianic voices; the dynamics of the Russian soul and soil; the interaction of lord and peasant; the premonition of catastrophe and apocalypse; and finally, the conflict between city and country, old and new, Russia and the West. Daily readings and discussions. Several papers, projects, and exams.

RU 30102. The Literature of Imperial Russia II (in English)

(3-0-3) Marullo

The second part of a two-semester survey of long and short fiction and focusing on the rise of realism in Russia. Topics to be included are the content and method of realism (gentry, urban, classical, romantic, empirical, and psychological); the evolution of the “family” chronicle; the nature and development of the Russian hero and heroine, particularly the “superfluous man,” “the philosophical rebel,” the “man-god,” and the “moral monster”; the interplay of patriarchal, matriarchal, and messianic voices; the dynamics of the Russian soul and soil; the interaction of lord and peasant; the premonition of catastrophe and apocalypse; and finally, the conflict between city and country, old and new, Russia and the West. Daily readings and discussions. Several papers, projects, and exams.

RU 30103. Literature of the Russian Revolution, 1900–1925 (in English)

(3-0-3)

No prerequisite. This course focuses on the national written expression that attended the explosion in the arts in Russia in the first thirty years of the twentieth century, e.g., Stravinsky in music, Diaghilev in ballet, and Benois, Goncharova, Chagall, and Larionov in art. Readings include the “decadence” of Ivan Bunin, Leonid Andreev, and Feodor Sollogub; the “proletarian” writings of Maxim Gorky; the “symbolism” of Andrei Bely and Alexander Blok; and the “modernism”

of Mikhail Kuzmin, Evgeny Zamiatin, Vladimir Maiakovsky, Isaac Babel, and Boris Pilniak. (Bunin was the first Russian writer to be awarded the Nobel Prize in literature; Zamiatin’s novel, *WE*, was the model for the antiutopian fiction of Orwell and Huxley; Bely is the Russian James Joyce). Topics to be considered are the content and method of Russian decadence, symbolism, and modernism; the “lost” man and woman in the early twentieth century; the conflict between city and country, old and new, Russia and the West; the dynamics of revolution, catastrophe, and apocalypse; the nature of imprisonment, liberation, and exile (physical, social, spiritual, and aesthetic); the interplay of patriarchal, matriarchal, and messianic voices; the form and function of antiutopian themes, psychological investigation, and the grotesque; the yearning for ancient Russia and the dismay at the new Soviet state; links to modern Russian painting, music, and ballet; and the critique of modernity and its implications for humankind. Daily readings and discussions; several small papers, projects, and exams. The course is designed to sharpen students’ aesthetic and analytical capabilities, improve their reading comprehension, and strengthen their written and oral skills.

RU 30104. Literature of Russian Dissidence, 1927–1990 (in English)

(3-0-3) Marullo

This course is an intensive survey of long and short fiction, focusing on the attempts of Russian writers to protest almost seventy-five years of Soviet totalitarianism, and to assert the freedom and dignity of the individual both in their country and in modern life. Readings include: Yury Olesha’s *Envy* (1927), Fyodor Gladkov’s *Cement* (1927), Vladimir Mayakovsky’s *The Bedbug* (1928–1929) and *The Bathhouse* (1930), Mikhail Bulgakov’s *The Heart of a Dog* (1925) and *The Master and Margarita* (1928–1940), Boris Pasternak’s *Doctor Zhivago* (1957), Abram Sinyavsky-Tertz’s *The Trial Begins* (1960), Valery Tarsis’s *Ward 7* (1965), Alexander Solzhenitsyn’s *One Day in the Life of Ivan Denisovich* (1956) and *Cancer Ward* (1968), and Vladimir Voinovich’s *Moscow 2042* (1987). Topics to be considered are the content and method of dissidence; the struggle between artists and politicians over the role of art in life; the new Soviet hero and heroine; the “lost” man and woman of the twentieth century; the conflict between city and country; the nature of imprisonment, liberation, and exile (physical, social, and spiritual); the form and function of socialist realism, anti-utopian themes, psychological investigation, and the grotesque; the yearning for old Russia; and the critique of modernity and post-modernity and its implications for humankind. No prerequisite.

RU 30201. Dostoevsky (in English)

(3-0-3) Marullo

No prerequisite. This course is an intensive, in-depth survey of the major long and short fiction of one of the world’s greatest and most provocative writers. Readings include: *The House of the Dead* (1862); *The Notes From the Underground* (1864); *Crime and Punishment* (1866); and *The Brothers Karamazov* (1879–80). Topics to be discussed: the evolution of the Dostoevskian hero and heroine within the context of the writer’s fiction, as well as within the social and literary polemics of the age; the content and method of both urban and psychological realism; the interplay of patriarchal, matriarchal, and messianic voices; the dynamics of Russian soul and soil; the conflict between city and country, old and new, Russia and the West; the influence of the “saint’s tale,” the “family chronicle,” the “detective story,” and the genres of journalism and drama on Dostoevsky’s writing; and the writer’s political, theological, and epistemological visions, in particular, his distrust of behavior (i.e., co-dependency, sadomasochism, sexual perversion, and the like); and his endorsement of so-called “Pauline mysticism.” The first three weeks of the course will focus on Dostoevsky’s early fiction, the thesis being that many of the ideas, images, and themes of the writer’s major novels were rooted in the early experiments of both his Petersburg and Siberian periods. Daily readings and discussions. Several small papers, projects, and exams.

RU 30202. Tolstoy (in English)

(3-0-3)

This course is an intensive, in-depth survey of the major long and short fiction of one of the world’s greatest and most provocative writers. Readings include:

Childhood, Boyhood, Youth (1852–57), *The Sevastopol Tales* (1855–56), *The Cossacks* (1863), *War and Peace* (1865–69), *Anna Karenina* (1875–77), *The Death of Ivan Ilyich* (1886), *The Kreutzer Sonata* (1889), *Master and Man* (1895), *Father Sergius* (1898), and *Hadji Murad* (1904). Topics to be discussed: the evolution of the Tolstoyan hero and heroine within the context of the writer's fiction, as well as with the social and literary polemics of the age; the interplay of patriarchal, matriarchal, and messianic voices; the dynamics of Russian soul and soil; the conflict between city and country, old and new, Russia and the West; and the writer's political, theological, and epistemological visions, in particular, his theory of history, his defense of the family, his endorsement of rational egoism, and his distrust of socially inspired "great men" in life.

RU 30301. Confessions in Russian Literature

(3-0-3)

This course explores the confessional mode of narration in various manifestations, beginning with some of the earliest forms of Russian writing comprising the lives of saints, and ending with the famous American novel by a Russian émigré writer: Nabokov's masterpiece *Lolita*. The narrators of the selected works pick up their pens for various reasons: to ease one's conscience, to justify oneself, to instruct the wayward, to create art. We will challenge the aesthetic efficacy of these motivations to confess, and discuss the unique features of first-person narration. We will explore the repetitions and innovations in these themes over the course of centuries and trace their progress into a distinctly American novel.

RU 30441. Soviet and Post-Soviet Russia

(3-0-3)

This course will examine the political system of the Soviet Union, why it lasted and why it collapsed. It will then examine the transition from Soviet rule to the contemporary Russian political system and the various problems of transition.

RU 30510. 1000 Years of Russian Culture (in English)

(3-0-3)

In 1939 Winston Churchill famously called Russia "a riddle, wrapped in a mystery, inside an enigma." This course is an introduction to the mysteries of Russian culture from medieval times to the present that are often overlooked in surveys of Western European art, literature, and culture. Through our explorations into the Russian religious tradition, painting, music, architecture, dance, cinema, folk art and folk tales, proverbs and superstitions, intellectual debates, socio-political movements, and of course literature, we will explore the ways in which Russians define themselves and their place in the world, and how they experience and express their cultural uniqueness as well as their ties to both East and West. By the end of the course, students will be able to trace certain patterns of belief and sensibility in Russian culture that persist in spite of the country's long history of succumbing to sudden, revolutionary change. Literary readings for the course will range from the ancient historical chronicles and lives of early Russian saints, to short works by such classic Russian authors as Pushkin, Tolstoy, Dostoevsky, and Chekhov, to poems and stories by several contemporary authors. Course materials will also include a background textbook on Russian history and culture and frequent audio-visual, Internet, and musical presentations.

RU 30515. Russian Realms: Societies/Cultures of Eastern Europe and Beyond (in English)

(3-0-3)

This course explores the social structures, the historical contexts, and the symbolic universes of the peoples who either identify themselves as Russian or whose way of life has come to be deeply affected by the Russian tradition. It concentrates on those territories that were formerly incorporated into the Tsarist empire and subsequently formed parts of the Soviet Union. It will include an examination of the extensive efforts by Russian thinkers to characterize their own national spirit, reflecting, for example, on classic and contemporary attempts to define *dusha* or a distinctively Russian soul, as well as some of the consequences of these formulations, looking at this famous "civilization" question through art, literature, and film as well as social science works. However, the chief approach of the course will be through reading of anthropological studies that have addressed the larger questions from numerous specific local venues. A strong emphasis will also be placed

on the so-called current transition period, as a new Russia in the neighborhood of the Commonwealth of Independent States seeks to reshape its heritage amid complex problems arising from social, economic, political, and cultural factors, not to mention old ghosts of global rivalry, terrorism, and disputed legitimacy.

RU 30531. Art into History: Reading the Art of Medieval Byzantium (in English)

(3-0-3)

Byzantine art has often been opposed to the traditions of western naturalism, and as such has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material we will examine the art produced in Byzantium in the period from the 9th to the 12th century, a period which marks the high point of Byzantine artistic production and influence. Stress will be placed upon the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past and the realities of contemporary praxis will be brought to bear upon our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue of this course.

RU 33301. Brothers Karamazov (in English)

(3-0-3) Gasperetti

A multifaceted investigation into the philosophical, psychological, theological, and political determinants of Dostoevsky's most complex novel. Discussions highlight a variety of themes, from the author's visionary political predictions and rejection of materialism to his critique of rationalism and mockery of literary convention.

RU 33401. Russian Women Memoirists (in English)

(3-0-3) Gillespie

Throughout the history of Russian literature, the genres of autobiography, memoir, and diary have provided a venue for women to find their voices in a private arena safely distanced from the privileged genres of novels and lyric poetry. This course examines the history and development of the female memoir in Russian literature, from the 18th-century memoirs of a courtier of Catherine the Great to documents of the Stalinist terror and prison camp life of the 20th century. We also will address theoretical questions about women's autobiographical writing and consider the relationship of the works we read to the dominant "male" literary tradition.

RU 33450. Progress, Prosperity, (In)Justice: The Plight of the Individual in 19th-Century Literature (in English)

(3-0-3) Gasperetti

Analyzes a seminal transition in Western society as it moves from an agrarian world centered around the rural estate to an urban culture built on industry and commerce. Literary texts emphasize the physical, psychological, and moral consequences to the individual of the decline of the estate, the rise of capitalism, the nontraditional nature of life and work in the city, various challenges to the established order (socialism, anarchism), and changing notions of gender. Texts include Daniel Defoe, *Robinson Crusoe*; Nikolai Gogol, *The Overcoat*; Eugene Sue, *The Mysteries of Paris* (excerpts); Leo Tolstoy, *Childhood*; Charles Dickens, *Hard Times*; Horatio Alger, *Ragged Dick*; Emile Zola, *Germinal*; and Henrik Ibsen, *A Doll's House*. Nonliterary texts used to support the literary depiction of the era include John Locke, *Of Property*, Adam Smith, *The Wealth of Nations* (excerpts); Karl Marx and Friedrich Engels, *The Communist Manifesto*; and Henry Mayhew, *London Labour and the London Poor* (excerpts).

RU 33520. Post-Soviet Russian Cinema (in English)

(3-0-3) Gillespie

No prerequisite. Freed from the constraints of Soviet-era censorship, since 1990 Russian filmmakers have exploited the unique qualities of the film medium in order to create compelling portraits of a society in transition. The films we will watch cover a broad spectrum: reassessing Russia's rich pre-Revolutionary cultural heritage as well as traumatic periods in Soviet history (World War II, the Stalinist era); grappling with formerly taboo social issues (gender roles, anti-Semitism, alcoholism); taking an unflinching look at new social problems resulting from the breakdown of the Soviet system (the rise of neo-fascism, the war in Chechnya, organized crime); and meditating on Russia's current political and cultural

dilemmas (the place of non-Russian ethnicities within Russia, Russians' love-hate relationship with the West). From this complex cinematic patchwork emerges a picture of a new, raw Russia, as yet confused and turbulent, but full of vitality and promise for the future. Short readings supplement the film component of the course. Film screenings optional; films will also be available on reserve.

RU 40041. Introduction to Applied Linguistics

(3-0-3)

This course will introduce students to the properties of language and their systematic study via linguistic inquiry. Specifically, the origins and mechanisms of linguistic knowledge will be examined alongside the componential units of syntax, morphology, phonology and semantics. The course will further introduce students to applied linguistic study with an emphasis on second language acquisition and the integration of sociocultural knowledge within this process. Students will complete this course with a greater understanding of the nature of language and the mechanisms whereby it is acquired, conceptually represented and produced.

RU 40101. Advanced Russian I (in Russian)

(3-0-3) Peeney

Prerequisite: RU 20102

This year-long course is designed to significantly improve students' comprehension and self-expression skills in Russian, serving as a preparation for Russian literature courses in the original. The course will include an intensive review of Russian grammar; Russian stylistics, syntax, and grammar at the advanced level; reading and analysis of a wide range of 19th-century Russian literary texts; writing essays in Russian; and extensive work on vocabulary building and advanced conversation skills.

RU 40102. Advanced Russian II (in Russian)

(3-0-3) Peeney

Prerequisite: RU 40101

This year-long course is designed to significantly improve students' comprehension and self-expression skills in Russian, serving as a preparation for Russian literature courses in the original. The course will include an intensive review of Russian grammar; Russian stylistics, syntax, and grammar at the advanced level; reading and analysis of a wide range of 20th-century literary texts (including fiction, poetry, interviews, songs, and newspaper materials); writing essays in Russian; and extensive work on vocabulary building and advanced conversation skills.

RU 40301. Confessions in Russian Literature—Language Across the Curriculum Tutorial

(1-0-1)

Prerequisite: RU 20101

Corequisite: RU 30301

This 1-credit tutorial is open to students enrolled in RU 30301 (Confessions of Saints, Sinners, and Madmen in Russian Literature). Students in the LAC tutorial will gain the additional benefit of analyzing excerpts of the course readings in the original Russian. This experience will deepen their knowledge of Russian and strengthen their grasp of the texts as they learn the nuances that are lost in translation. Furthermore, one of the lines of inquiry in the course centers on whether Nabokov's American novel fits into the tradition of the Russian confessional. The LAC students will have a chance to read portions of Nabokov's own translation of his masterpiece into Russian to learn whether and how the author made adaptations for a Russian audience. The readings for the supplemental tutorial will be limited in scope, suited to the language level of students who enroll (4–6 pages assigned per class period). Writing assignments for the tutorial will be in English and will consist of short reflection papers that compare the original texts and their translations. LAC students will also have the opportunity to incorporate analysis of the original Russian texts into their already required analytical papers for RU 30301. Up to three LAC tutorial credits can be applied toward a major, supplemental major, or minor in Russian or a minor in Russian and east European studies. Graded pass/fail.

RU 43101. Nineteenth-Century Russian Literature Survey (in Russian)

(3-0-3) Gasperetti

Prerequisite: RU 40102

Introduces the major movements and authors of the 19th century. Special attention is given to the genesis of the modern tradition of Russian literature in the first half of the century and to the role literary culture played in the political and social ferment of the era. Readings, discussions, and written assignments are in Russian and English.

RU 43102. Twentieth-Century Russian Literature Survey (in Russian)

(3-0-3) Gasperetti

Prerequisite: RU 40102

This course surveys the generic richness, stylistic innovation, and political intrusion into literature that defined Russian literary culture in the first six decades of the 20th century. It introduces such movements/periods as Symbolism, Acmeism, Futurism, the "fellow travelers," socialist realism, and the "thaw." Readings, discussions, and written assignments are in Russian and English.

RU 43115. Russian Short Story in Russian

(3-0-3)

A representative sampling of Russian short stories in Russian from both the nineteenth and twentieth centuries. Writers include Pushkin, Dostoevsky, Tolstoy, Chekhov, Bunin, and Gorky; as well as Zoshchenko, Olesha, Inber, Aksyonov, Kazakov, and Paustovsky. Examination of texts; review of grammar and everyday vocabulary and structures; introduction of more advanced idioms and lexicon; daily oral and written assignments. The course is designed to strengthen confidence and skills in reading, speaking, and understanding through increasingly complex and sophisticated narratives.

RU 43204. Pushkin

(3-0-3) Gasperetti

Prerequisite: RU 40102

This course is an introduction to the life and works of the great Russian poet Alexander Pushkin, often called the Father of Russian Literature. Through a reading and discussion of selections from Pushkin's lyric verse, narrative poetry, drama, and prose, students will gain an appreciation for Pushkin's extraordinary literary imagination and innovativeness, as well as his significance for the history of Russian literature as a whole. Attention will be given to Pushkin's evolving understanding of his role as Russia's national poet, including such themes in his work as the beauty of the Russian countryside, the poet's sacred calling, political repression and the dream of civic freedom, Russia's relationship to East and West, the dialectic between chance and fate, St. Petersburg and the specter of Revolution, and the subversive power of art. *Prerequisite:* Russian 40102 or permission of the instructor.

RU 43206. Tolstoy (in Russian)

(3-0-3)

This course samples Tolstoy's novellas, short stories, and folktales with excerpts from the major novels. Themes include Tolstoy's Realism, his critique of the institutions of church and state, his philosophy of nonviolence, and the impact of his religious crisis on the latter half of his literary career. *Prerequisite:* RU 40102 or permission of the instructor.

RU 43208. Chekhov (in Russian)

(3-0-3) Gillespie

Prerequisite: RU 40102

This course is an introduction to the short stories and plays of Anton Chekhov, with attention to the development of his art of characterization, dialogue, plot construction, and innovative dramatic technique. Central themes of the course will be alienation and banality in Chekhov's works, Chekhov's attitude to science and progress, and his views on the future of Russia. A portion of the semester will be largely devoted to the reading and performance (in Russian) of one of Chekhov's plays.

RU 43405. Russian Romanticism (in Russian)

(3-0-3) Gillespie

Prerequisite: RU 40102

This course introduces students to the literature of Russian Romanticism, which came into being at the turn of the 19th century, dominated Russian literature in the 1820s and was still influential well into the latter part of the century. Inspired by Russian writers' encounters with English, German, and French Romantic literature, Russian Romanticism was, paradoxically, the first literary movement in Russia that sought to develop a definitively national, uniquely Russian literature and literary language. We will explore this quest for a national literature in light of Russian Romanticism's Western influences. In so doing, we will study works of poetry, fiction, drama, and literary criticism by a diverse group of Romantic writers including Vasily Zhukovsky, Alexander Pushkin, Nikolai Gogol, Mikhail Lermontov, Karolina Pavlova, Fedor Tiutchev, Afanasy Fet, and others. Themes of the course will include the national and the exotic, the natural and the supernatural, rebellion and social alienation, violence, and passion.

RU 43416. Modernity in Shorts: The Modern Short Story in Russian Literature (in Russian)

(3-0-3)

Prerequisite: RU 40102

The term modern is notoriously difficult to define for a number of reasons. It suggests both a period of time and an artistic movement that embodies certain principles of creation. Depending on the set of criteria, "modernity" might begin anywhere from the middle of the 19th century to the beginning of World War I, and "modern" may indicate simply a break with tradition or suggest a more complex set of characteristics. In a similar way, the short story as a genre is often reductively defined in terms of a number of pages, but certain qualities separate the short story from other short prose forms. This course will combine these two contentious concepts and consider a selection of Russian short prose pieces from the 19th-century up until 1932, when the Soviet Union adopted Socialist Realism as its official artistic method. We will consider the stories in terms of content and form in an effort to determine what constitutes the Russian modern short story.

RU 43450. Models of Exile in 19th- and 20th-Century Russian Literature (in Russian)

(3--3)

Prerequisite: RU 40102

The Russian writer's relationship to Russia is traditionally a source of artistic inspiration and contemplation for the author. When that relationship is complicated by reform, revolution, oppression and/or banishment, it becomes an even more fascinating thread of investigation. This course will explore exiled authors and models of exile in (or outside of) the Russian context, beginning with Pushkin, who was exiled twice in his lifetime, and whose artistic identity was tied to the tradition of Romanticism and Romantic exile. This 19th-century model of exile will be compared to 20th-century examples of exile beginning with the inception of what would become of the Soviet empire. The revolution of 1917 marked the beginning of waves of emigration that brought some of Russia's most talented artists outside its borders, others under the yoke of an oppressive regime within the cities, and some banished to Siberia. We will study the themes of exile, exilic imagination, and the artistic expression of one's relationship to mother Russia, as written most famously by authors such as Pushkin, Nabokov, Bunin and Brodsky.

RU 43501. St. Petersburg as Russian Cultural Icon (in Russian)

(3-0-3) Gasperetti

Prerequisite: RU 40102

Uses St. Petersburg's rich cultural heritage to investigate Russia's struggle for national identity. Areas to be covered include literature (Pushkin, Gogol, Dostoevsky, Blok, Akhmatova, Zamiatin), painting (Repin, Surikov, Malevich), music (Stravinsky, Shostakovich) and film (Eisenstein).

RU 46101. Directed Reading

(3-0-3)

Directed reading course.

RU 47100. Area Studies Enrichment

(1-0-1)

Students enrolled in this course will be required to attend at least five lectures and/or cultural enrichment events (films, concerts, art exhibits, etc.) relevant to Russian and East European Studies, and then write a one page report summarizing each event and what they learned from it.

RU 47101. Area Studies Thesis Research and Writing I

(3-0-3)

Fall semester research in Russian and East European area studies. By the end of the semester, the student will be expected to produce an annotated bibliography of sources, a thesis statement, and an outline/proposal for the research project as a whole.

RU 47102. Area Studies Thesis Research and Writing II

(3-0-3)

Spring semester research in Russian and East European area studies. Working closely with the faculty advisor, the student will produce a polished final draft of the area studies thesis.

RU 48410. Honors Thesis Research and Writing I

(3-0-3)

Thesis writers work closely with their advisor, who guides them through the bulk of their research and the initial stages of writing the thesis. Goals to be accomplished in the first semester include the submission of a thesis statement and one-paragraph introduction by October 1, a two-page prospectus and an annotated bibliography by November 15, and ten pages of the thesis by the end of the semester.

RU 48420. Honors Thesis Research and Writing II

(3-0-3)

Working closely with an advisor, the student completes the research and writing of the honors thesis. Goals to be accomplished in the second semester include the submission of the completed thesis to the advisor in mid-March (the first Monday after spring break), submission of the final draft of the thesis incorporating the revisions suggested by the advisor (Monday of the last full week of classes), and the candidate's oral defense of the thesis before the faculty of the Russian section (approximately one week after the submission of the final draft).

Romance Languages and Literatures

LLRO 10101. Beginning Quechua I

(4-0-4)

The principal aims of this beginning-level Quechua Language course are to encourage the development of competency and proficiency in listening, speaking, reading, writing, and to generate cultural understanding. LLRO 10101 taken in connection with LLRO 10102 and 20201 fulfill the language requirement.

LLRO 10601. Opera

(0-0-0)

An introduction to opera.

LLRO 10602. Opera II

(1-0-1)

Prerequisite: LLRO 10601

Continuation of an introduction to opera to be taken the term after LLRO 10601.

LLRO 13186. Literature University Seminar

(3-0-3)

An introduction to the seminar method of instruction, emphasizing the analysis of literary texts.

LLRO 20650. An Evolution of Comic Trends in French Cinema During the Twentieth and Twenty-First Centuries

(1-0-1) Fournier

This course is intended for students who have an interest in French cinema. It will introduce films representative of different comic veins: slapstick, black humor, parody, and wit. The main line is the evolution of French comedy during the twentieth and twenty-first centuries from a filmic point of view. Films will be reinserted in their social, historical, and intellectual contexts, the goal being for students to have a better understanding of what is laughable from a French point of view. The format of the course includes both lectures and discussions around films screened during the semester. Conversations will be lead in English. No previous knowledge about cinema is required.

LLRO 27201. Special Studies: Intermediate Quechua I

(3-0-3)

An intermediate-level, third-semester college language course with emphasis on and refinement of grammatical competence and oral and written language skills. Class time is dedicated to interactive discussion encouraging the development of language proficiency and generating cultural understanding.

LLRO 30123. King Arthur in History and Literature

(3-0-3) Boulton

This course, intended to introduce undergraduates to one of the major themes as well as to the interdisciplinary approaches characteristic of medieval studies, is a team-taught examination of the development and influence of the legend of Arthur, King of Britain, both in history and in literature.

LLRO 30125. Arthurian Literature in France and England

(3-0-3)

Survey of Arthurian literature.

LLRO 30592. Humor in European Film

(0-0-0)

To provide a forum for exploring this contemporary theme of humor in European film, the Nanovic Institute is hosting a series of films and lectures, followed by a one-credit course open to the Notre Dame students. This film series will allow the students to explore the cultural, historical and also ideological or political dimensions of humor.

LLRO 30650. Racialization in the U.S. and Brazilian History

(3-0-3)

This course will consider the processes that have caused aspects of society to be racialized, or labeled with racial meanings, symbolisms, and/or identities. The class will focus on, but will not be limited to, “black” racialization. We will examine how racialization has shaped the human experience in the largest ex-slaveholding nations of the Americas—the United States and Brazil. Our goal is to understand the ways in which not only people are racialized, but also communities, geographical regions, nations, cultural production (such as music), behavior, labor, and gender, to name a few. With these two nations as our case studies, the class will explore the dynamic nature of racialization, focusing on the impact that space and time has had on the way we identify and live race.

LLRO 30800. Rome: Journey in Art and History

(3-0-3)

This class is an exploration of the history and culture of Rome from late medieval times through the 20th century, with an emphasis on art and architecture. We will examine the urban panorama of the Eternal City through a series of layered investigations of its major sites and monuments, such as the Capitoline Hill, St. Peter's and the Vatican complex, the Lateran, and Santa Maria Maggiore. We will read travelers' descriptions and literary evocations of the city with a view to reliving the enchantment of Rome, and the “idea” of Rome, through the ages. In addition to our readings and lectures, members of the class will have an opportunity to develop projects on objects, structures, or works of art of their own choosing.

LLRO 37000. Special Studies: Quechua

(1-0-V)

This course is designed with the purpose of allowing students to engage in an individual or small group study under the direction of a departmental faculty member

LLRO 40040. Intro to Linguistics

(3-0-3)

This course requires no previous study of linguistics. It serves as an introduction to the most basic elements of human language. Students will have the opportunity to analyze the word order and sound systems of various languages of the world. Each student will have the option of focusing investigations on one language in particular. Through this course, they will discover universal rules that govern all languages of the world. Finally, the course will take a brief look at how both first and second languages are learned, both inside and outside of the classroom. Students of all languages are strongly encouraged to register for this course.

LLRO 40041. Introduction to Applied Linguistics

(3-0-3)

This course will introduce students to the properties of language and their systematic study via linguistic inquiry. Specifically, the origins and mechanisms of linguistic knowledge will be examined alongside the componential units of syntax, morphology, phonology and semantics. The course will further introduce students to applied linguistic study with an emphasis on second language acquisition and the integration of sociocultural knowledge within this process. Students will complete this course with a greater understanding of the nature of language and the mechanisms whereby it is acquired, conceptually represented and produced.

LLRO 40105. France and England in the Hundred Years War

(3-0-3)

The course will examine in depth some of the major works of English and French literature in the period of the Hundred Years War, when each country defined its sense of national identity, and will set these works in their cultural, social, and political context.

LLRO 40106. Latin and Vernacular Codicology

(3-0-3)

This course will explore the variety of medieval books including Bibles, liturgical books, classical texts, manuals of theology and philosophy, song books, romances and epics.

LLRO 40107. Meaning, Vulnerability and Human Identity: The Relationship Between Theological and Literary Reflections

(3-0-3) Montemaggi

This course explores the contribution that the coming together of theological and literary reflection can make to our understanding of the nature of meaning. Focusing on the work of Augustine, Aquinas, Dante, Primo Levi, Dostoevsky and Shakespeare, students will address questions such as: What is it we are doing when speaking, reading, using language? How do the intellect and the imagination work in relation to literary texts? How might all this relate to our ways of thinking about God, human nature, and the relationship between them? Such questions will be addressed, in particular, through reflection on how the texts studied invite us to think about the nature of love, forgiveness, vulnerability and creativity.

LLRO 40114. Dante's *Divine Comedy*: The Christian Universe as Poetry

(3-0-3) Baranski

This course explores the work of Dante's *Divine Comedy*, looking at the Christian universe as poetry. Taught in English

LLRO 40115. Dante I

(3-0-3)

Dante I and Dante II are an in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, *De vulgari eloquentia*). Dante I focuses on the *Inferno* and the minor works; Dante II focuses on the *Purgatorio* and *Paradiso*. Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

LLRO 40116. Dante II

(3-0-3) Moevs

Dante I and Dante II are an in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, *De vulgari eloquentia*). Dante I focuses on the *Inferno* and the minor works; Dante II focuses on the *Purgatorio* and *Paradiso*. Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

LLRO 40120. Words and Music: Lyric Poetry of the Middle Ages

(3-0-3)

This course will explore medieval poetry set to music in Latin and vernacular languages, including French, Provençal, Spanish, Italian and English

LLRO 40125. King Arthur in European Literature

(3-0-3)

We will read representative works chosen from the major medieval European literary traditions, including, for example Latin (Geoffrey of Monmouth), English (Lawman, Malory), French (Chrétien de Troyes, the Vulgate Cycle), Spanish (La *Tragedia* de Lançolot, Tristán), German (Hartmann von Aue, Gottfried von Strassburg), and Italian (La *Tavola Ritonda*, Tristán Panciatichiano).

LLRO 40212. Primo Levi: Language, Ethics and the Pursuit of Knowledge

(3-0-3)

This course explores the work of Primo Levi, focusing especially on his writings on the Shoah. It addresses, in particular, the questions that such writings raise concerning the nature of meaning, suffering, creativity and freedom. As such, the course invites students to consider the nature of the relationship between literature and the study of literature, on the one hand, and reflection concerning the nature of human community and identity, on the other.

LLRO 40230. Renaissance Woman

(3-0-3)

This course is designed as an introduction to the study of women and literature of the Renaissance period in Europe. It considers the image of women in the writings of male authors as well as the work of female authors.

LLRO 40233. Machiavelli NOW

(3-0-3)

In this seminar we will approach Machiavelli through the careful study of his major works, read against the background of the political crisis of the Italian Renaissance, and with particular attention to their resonance for subsequent political analyses of the condition of modernity. Reading will include: *On the method of dealing with the Rebellious Peoples of Valdichiana*; *A Description of the Methods Adopted by the Duke Valentino when Murdering Vitellozzo Vitelli, Oliverotto da Fermo, the Signor Pagolo, and the Duke di Gravina Orsini*, *The Prince*, *Mandragola*, *Belfagor*, the *Discourses on the First Decade of Livy*, and the *Dialogue on the Language*. The course will be offered in English.

LLRO 40542. Comedy, Italian Style!

(3-0-3) Welle

Corequisite: LLRO 41542

An exploration of comic traditions in Italy: the popular film genre known as "comedy Italian style" is analyzed in its historical development in the 1950s and '60s, together with Italian film comedies from the silent period through the present. Roberto Benigni's new film version of *Pinocchio*, for example, released in the United States in December of 2002, extends a long line of comic genius. The *commedia dell'arte*, Goldoni's comedy of manners, and the political farce of Nobel Prize winner Dario Fo provide further examples of a comic tradition that continues to be a vital force of aesthetic pleasure and political comment. Requirements include attendance at mandatory film screenings, participation in class discussions, a number of short papers, and midterm and final exams. The class will be conducted in English.

LLRO 40545. Italian National Cinema

(3-0-3) Welle

Corequisite: LLRO 41545

Conducted in English, this course examines the concept and reality of national cinema in the Italian case. A history of one of the world's most renowned national cinemas focusing on the construction of national identity in film.

LLRO 40548. Italian Cinema: Realities of History

(3-0-3)

This course explores the construction and development of the Italian cinematic realist tradition from the silent era to the early 1970s, although its primary focus is on the period 1934–1966, which stretches from the appearance of Blasetti's openly fascist "historical" reconstruction, *La vecchia guardia*, to Pasolini's eccentric exercise in left-wing commitment, *Uccellacci e uccellini*, with its mix of expressionist and hyper-realist techniques. At the centre of this period are found some of Italy's most highly regarded films made by directors, such as Vittorio DeSica, Roberto Rossellini, and Luchino Visconti, who belonged to the neo-realist movement (1945–53). These filmmakers rejected escapist cinema and tried to make films that examined the contemporary experiences of ordinary Italians. As well as analyzing the films in themselves, the course examines the formal and ideological continuities and differences between neo-realist films and their silent and fascist predecessors. In a similar way, it analyses neo-realism's impact on later film-makers, such as Federico Fellini, Pietro Germi, Pier Paolo Pasolini, Gillo Pontecorvo, Dino Risi, and Francesco Rosi, who attempted to develop new versions of cinematic realism. Finally, the course aims to locate the films in their historical and cultural contexts and to address theoretical issues arising from the concept of realism.

LLRO 40560. Brazilian Film and Popular Music

(3-0-3) Ferreira Gould

This course provides insights into 20th- and 21st-century Brazilian history, culture, and politics through film, photography, literature, and popular music. Topics discussed include samba, bossa nova, tropicalia, and the reception of Cinema Novo

and of the new Brazilian cinema. Special attention will be paid to tropicalia (a movement with key manifestations in the visual arts, cinema, popular music, and literature) and the circumstances surrounding its creation, including the repressive military regime that governed Brazil from 1964 to 1985. This course satisfies the fine arts requirement and is cross-listed in FTT. Offered in English.

LLRO 40655. Italy in Modern Europe

(3-0-3)

The course will treat the cultural, literary, artistic, and political relationships between Italy and the rest of Europe in the modern period (since the Renaissance). Central concerns will be the presence and influence of masterpieces of Italian literature both in translation and in the original Italian in other European countries, and the image of Italy (and in particular of Rome) in the religious polemics (Catholic/Protestant) of modern Europe.

LLRO 40906. French Literature Goes to the Opera

(3-0-3) MacKenzie

In this course, the full title of which is Taking Liberties: From Book to Libretto, or French Literature Goes to the Opera and which may be taught in either French or in English, we will be looking at a series of parent texts, written originally in French, and their operatic offspring. Works include *The Barber of Seville* (Beaumarchais/Rossini); *The Marriage of Figaro* (Beaumarchais/Mozart); *Don Juan* (Molière) and *Don Giovanni* (Mozart); *Manon Lescaut* (Prévost/Puccini), and *Carmen* (Mérimée/Bizet).

LLRO 40955. Dictatorships in Luso-Brazilian Fiction and Film

(3-0-3)

This course offers a literary and cinematic study of 20th-century dictatorships in Brazil and Portugal, with readings in Luso-Brazilian fiction, history, film, and cultural theory. Authors studied include Loyola Brandao, Antonio Callado, Ivan Angelo, Fernando Gabeira, Antonio Lobo Antunes, Lidia Jorge, Maria Isabel Barreno et al, and Arthur Portela. Viewing of films by Maria de Medeiros, Manoel de Oliveira, Joao Botelho, Glauber Rocha, Sergio Rezende and Bruno Barreto. Offered in English (discussion group in Portuguese).

LLRO 40956. Carnival in Cinema and Literature

(3-0-3) Ferreira Gould

Brazil, the largest South American country, has tantalized our imagination with the images of samba and Carnival. As Brazilian anthropologist Roberto DaMatta asserts, Carnival creates a festival out of the everyday social world in which there is no emphasis on the harsh rules that govern membership and identity. This course will offer an exploration of Brazilian culture by investigating the ways in which the celebrations of Carnival have been viewed, articulated and unsettled by film and literature. Along with major films, documentaries and literary works, we will examine contemporary sociological and anthropological writing that contributes to our understanding of Carnivals within and beyond Brazil. We will learn how key issues in Brazilian society (race and gender relations, national identity, rituals and symbols, values and social roles) play out in Carnival. Course offered in English.

LLRO 40957. Transnational Immigration in European Cinema

(3-0-3)

Corequisite: LLRO 41957

This seminar will examine fundamental aspects of immigration in the European Union and the way this is represented in contemporary film.

LLRO 40981. Short Fiction across the Atlantic: Brazil, Portugal, and Lusophone Africa

(3-0-3) Ferreira Gould

This is a comparative study of short prose fiction in the Portuguese-speaking world, with special emphasis on theoretical issues related to this literary genre. Authors studied include Machado de Assis, Joao Guimaraes Rosa, Clarice Lispector, Mario de Sa-Carneiro, Miguel Torga, and Luandino Vieira. Texts and discussions in English.

LLRO 40983. Immigrant Voices in Modern Brazilian Literature

(3-0-3)

This course examines literary perspectives on the European and non-European immigrant experience in Brazil and addresses fundamental questions that have occupied major contemporary Brazilian authors; How do we recreate a sense of home after having lost it? What makes us feel at home in a new place or country? How do we adapt to relocations of home? We will search for answers in the fiction of Milton Hatoum, Elisa Lispector, Salim Miguel, Ana Miranda, Raduan Nassar, Nelida Pinon, Samuel Rawet, and Moacyr Scliar. Conducted in English with readings in Portuguese or English (discussion groups available in Portuguese.)

LLRO 40995. Dictatorship/Luso. Fiction and Film

(3-0-3)

Prerequisite: ROPO 20202

This course offers a literary and cinematic study of 20th-century dictatorships in Brazil and Portugal, with readings in Luso-Brazilian fiction, history, film, and cultural theory. Authors studied include Loyola Brandao, Antonio Callado, Ivan Angelo, Fernando Gabeira, Antonio Lobo Antunes, Lidia Jorge, Maria Isabel Barreno et al, and Arthur Portela. Viewing of films by Maria de Medeiros, Manoel de Oliveira, Joao Botelho, Glauber Rocha, Sergio Rezende and Bruno Barreto. Offered in English (discussion group in Portuguese).

LLRO 40997. Portuguese Colonialism Revisited

(3-0-3)

With readings from Brazil, Angola, Mozambique and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. The course brings the Lusophone experience, with its important varieties yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and/or English.

LLRO 40998. Fictions of the South Atlantic

(3-0-3)

Taught in English, this seminar offers a comparative study of 19th-, 20th-, and 21st-century fiction writing in the Lusophone South Atlantic, particularly exploring the historical connections and the cultural links between Brazil and Angola.

LLRO 41542. Comedy, Italian Style! Lab

(0-0-0)

This is the lab component of the course LLRO 40542.

LLRO 41545. Italian National Cinema Lab

(0-0-0)

Corequisite: LLRO 40545

Conducted in English, this is the lab component of the course which examines the concept and reality of “national cinema” in the Italian case. A history of one of the world’s most renowned national cinemas focusing on the construction of national identity in film.

LLRO 41548. Italian Cinema: Realities Lab

(2-0-0)

Corequisite: LLRO 40548

This is the lab component of LLRO 40548; certain films will be viewed for further discussion in class.

LLRO 41957. Transnational Immigration in European Cinema

(0-0-0)

Corequisite: LLRO 40957

This seminar will examine fundamental aspects of immigration in the European Union and the way this is represented in contemporary film.

ROFR 10101. Beginning French I

(4-0-4)

For students who have had no previous exposure to French. An introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading and writing. An appreciation for French culture is also encouraged through readings and discussions. This course is to be followed by ROFR 10102.

ROFR 10102. Beginning French II

(4-0-4)

Prerequisite: ROFR 10101 or CEFR For MIN. SCoRE OF 231

The second-semester course of the beginning French sequence. Focus is on a balanced approach to acquisition and appreciation of French language and culture.

ROFR 10115. Intensive Beginning French

(6-0-6)

This course covers the material of ROFR 10101 and 10102 in one semester, with classes five days per week. Equal emphasis is placed on spoken and written French. ROFR 10115 counts as two courses and is designed more for highly motivated students. It is to be followed by ROFR 20201 or ROFR 20215.

ROFR 20201. Intermediate French I

(3-0-3)

Prerequisite: (ROFR 10102 or (ROFR 10115) or CEFR For MIN. SCoRE OF 301

ROFR 20201 course fulfills the language requirement. This is a third-semester second-year language sequence, with equal focus on oral and written production. It includes a review of basic grammar and then transitions into more difficult features of French. Students learn to discuss and write about French cultural topics, current events, and literary texts. This course is to be followed by ROFR 20202 or ROFR 20215.

ROFR 20202. Intermediate French II

(3-0-3)

Prerequisite: ROFR 20201 or CEFR For MIN. SCoRE OF 351

A fourth-semester college language course. Includes review and expansion of basic grammatical structures, extensive practice in speaking and writing, and readings and discussions of a variety of literary and nonliterary text of appropriate difficulty.

ROFR 20215. Intensive Intermediate French

(6-0-6)

Prerequisite: ROFR 10102 or ROFR 10115) or CEFR For MIN. SCoRE OF 301

A two-semester sequence of intensive, comprehensive training in the language skills necessary for residence and study in France. Includes review of grammar, readings, civilization, and specific orientation for international study. For students with two to three years of high school French (with satisfactory achievement) preparing for the Angers international study program.

ROFR 20220. Intermediate Grammar Review

(3-0-3)

Prerequisite: ROFR 20201 or ROFR 20215

This one-semester comprehensive review of French grammar is intended for students with intermediate proficiency in the four language skills. In addition to the formal grammar review, there will be a close reading of two novels.

ROFR 20300. Conversational French

(3-0-3) Escoda-Risto

Prerequisite: ROFR 20202 or ROFR 20215 or CEFR For MIN. SCoRE OF 401

This course is designed to further develop the student's conversational skills and grasp of a wide variety of styles and registers in French. Spoken French will be practiced through various types of classroom activities and assignments. Emphasis will be on topics of current interest.

ROFR 20305. French Through Acting

(3-0-3)

Prerequisite: ROFR 20202 or ROFR 20215

A nontraditional approach to conversational French that asks students to create scenes for a weekly soap opera centered on a large cast of student-created characters who live together in an apartment building in France. Scenes are performed in class for workshop on phonetics, gestures, and choice of idioms. Not intended for international study returnees.

ROFR 20450. French for Business

(3-0-3)

In this course, students investigate the particularities of the Francophone business world, in order to acquire cultural and linguistic tools enabling them to establish links within it. For business students, this would fulfill a requisite in the International Business Program.

ROFR 20680. Intermediate Creole Language and Culture

(1.5-0-1.5) Richman

This course introduces students to the vivid, sonorous language of Kreyòl, or Creole, and to the fascinating culture of its speakers. This intensive, beginning-level course is intended for students with no knowledge of Creole. In small-group teaching sessions, students will be prepared for conversational fluency with basic reading and writing skills, emphasizing communicative competence as well as grammatical and phonetic techniques. Our study of Kreyòl is closely linked to our anthropological exploration of how the language is tied to Caribbean society and culture. The course takes a holistic, anthropological approach to the history, political economy, and religion of Haiti. In addition to class work, audio tapes, music and film enhance the study of the Haitian language and culture.

ROFR 21205. Angers: Atelier

(1-0-1)

A mini-course that prepares students accepted for study abroad in Notre Dame's program in Angers, France. Students are prepared for various cultural and day-to-day challenges that await them in Angers. Course begins the week after spring break.

ROFR 21206. Post-Study Abroad

(1.5-0-0)

A mini-course for students returning from study abroad in Notre Dame's program in Angers, France.

ROFR 22300. LAC French Discussion Group

(0-1-1)

Students who have completed the Notre Dame language requirement in French are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in French language materials (approximately 20–25 pages a week), and meet once a week with a graduate student or faculty tutor from the Department of Romance Languages and Literatures who will guide a discussion in French and grade some brief writing assignments. The LAC discussion section in French associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in French. Please talk to the instructor if you are interested in adding this supplemental credit.

ROFR 26201. Directed Readings: Intermediate French I

(3-0-3)

This directed readings course is a third-semester, second-year language sequence, with equal focus on oral and written production. It includes a review of basic grammar and then transitions into more difficult features of French. Students learn to discuss and write about French cultural topics, current events, and literary texts.

ROFR 27500. Approaches to French and Francophone Cultures

(3-0-3)

Prerequisite: (ROFR 20202 or ROFR 20215 or ROFR 20215 or ROFR 20300 or ROFR 20305) or CEFR For MIN. SCoRE OF 401

This content-driven course is intended for students who want to broaden their knowledge of the French language and related cultures, as well as improve both their understanding of the French and Francophone world and their communication skills in the French language. Recent topics have dealt with French representations of the USA, regional French identities, contemporary women writers between France and Algeria, and exploring the concept of national identity.

ROFR 30310. Analyze This!

(3-0-3)

Prerequisite: ROFR 20202 or ROFR 20300 or ROFR 27500 or ROFR 30320

Students of "Analyze This!" will learn how products of French culture from a variety of epochs combine timeless traditions with the utmost modernity. Focus is on skills of close textual analysis for study of poetry, prose, theater, film, journalism, advertising, and allied works of popular culture.

ROFR 30320. Advanced Composition: The Art of Writing

(3-0-3)

Prerequisite: ROFR 20202 or ROFR 20300 or ROFR 27500 or ROFR 30310) or CEFR For MIN. SCoRE OF 501

This advanced-level course, taught in French, is designed for students including those returning from abroad who wish to improve their speaking and writing skills and for students already in the 30000–40000 sequence who seek additional assistance with writing skills and grammar.

ROFR 30510. On Stage and Screen: French Theater and Film from 1900–1967

(3-0-3)

This course will examine the parallel and related evolutions of theater and film from the beginning of the twentieth century to the eve of May 1968. We will study the principal playwrights and filmmakers, works, and movements as well as the manner in which these works both expressed and influenced the dominant ideological trends and aesthetic movements of the first two-thirds of the century. Texts by Anouilh, Artaud, Beckett, Camus, Claudel, Cocteau, Giraudoux, Ionesco, and Sartre. Films (or excerpts of films) by Carne, Cocteau, Godard, Marker, Resnais, and Renoir. Conducted in French. *Prerequisites:* by placement, 200-level French course or equivalent, or by permission. *Requirements:* one oral presentation, two papers, final examination.

ROFR 30710. Survey of French Literature and Culture I

(3-0-3)

Prerequisite: ROFR 30310

Reading of selections and complete works of outstanding French authors from major genres from the Middle Ages through the 17th century. All "Language and Literature" majors are required to take this sequence, or equivalent advanced courses. "Language and Culture" majors are required to take one literature survey. Students are expected to have already taken ROFR 30310 or ROFR 30320 or to take one of them concurrently with a survey class.

ROFR 30720. Survey of French Literature and Culture II

(3-0-3)

Prerequisite: ROFR 30310 or ROFR 30320

Reading of selections and complete works of outstanding French authors from major genres and periods. All majors are required to take this sequence, or equivalent advanced courses. Students are expected to have already taken 30310 or to take ROFR 30310 concurrently with the first survey taken.

ROFR 30900. Writings of Disaster

(3-0-3)

Prerequisite: ROFR 30310 or ROFR 30320 or ROFR 30710 or ROFR 30720

It has often been said that the twentieth century began in Sarajevo on June 28, 1914. In the years that followed, a number of disasters struck Europe, and

occasionally the larger world. This course will focus specifically on the reaction of French writers and philosophers to disasters ranging from the two world wars to decolonization. These traumatic incidents not only changed the way we narrate, but also the idea of narration itself: is it possible to represent and fictionalize historical events which are often referred to as "unimaginable" or "unrepresentable"? We will first ask the following question: How are the disasters of European and world history written? Then we will try to emphasize an apparent contradiction: on the one hand, literature confronts its limitations when it seeks to render disasters that defy words and representations; on the other hand, literature is in a sense always a narration of the unimaginable, whether it is deemed a success or a failure. In this seminar, we will analyze literary works including poems, novels, and short stories. We will also examine select cultural productions such as plastic art, music, and film, from 1914 to the present. The course will be conducted in French.

ROFR 30932. Politics of Fiction, Fictions of Politics

(3-0-3)

Prerequisite: ROFR 30310 or ROFR 30710 or ROFR 30720

This course will explore the influence of several fictional productions (including some cinematographic examples) on daily politics in France since 1848, from Victor Hugo to Yasmina Reza. Readings will focus on the interactions of politics and literature, with a special focus on the link between the history of democracy and the invention of literature.

ROFR 32300. LAC French Discussion Group

(0-1-1)

Students who have completed the Notre Dame language requirement in French are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in French language materials (approximately 20–25 pages a week), and meet once a week with a graduate student or faculty tutor from the Department of Romance Languages and Literatures who will guide a discussion in French and grade some brief writing assignments. The LAC discussion section in French associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in French. Please talk to the instructor if you are interested in adding this supplemental credit.

ROFR 37000. Special Studies

(V-0-V)

This course is designed with the purpose of allowing students to engage in an individual or small group study under the direction of a departmental faculty member. *Prerequisite:* junior standing, dean's list.

ROFR 37500. Contemporary Issues, Past and Present

(3-0-3)

Prerequisite: ROFR 30310 or ROFR 30320

This advanced content-driven course is intended for students who want to broaden their knowledge of the French language and related cultures, as well as improve both their understanding of the French and Francophone cultures at the advanced level. Recent courses have included topics such as film and literature, and warrior writers and other fighters.

ROFR 40100. Introduction to Old French and Anglo-Norman

(3-0-3) Boulton

This course is designed to be an introduction to the language and dialects of medieval France, including Anglo-Norman. Readings will include texts written between the 12th and the 14th centuries, such as the *Lais* of Marie de France, trouvère poetry, the prose *Lancelot*, Machaut, and Froissart.

ROFR 40108. Love and War in Late Medieval France

(3-0-3) Boulton

This course will examine the literature of fourteenth- and fifteenth-century France in its social and historical context.

ROFR 40110. From Roland to the Holy Grail

(3-0-3)

This is a survey of medieval French literature from 1100 to 1300, including the epic, the romance, drama, and poetry.

ROFR 40150. Topics in Medieval Literature

(3-0-3) Boulton

A concentrated study of a particular author, theme, or genre of medieval French literature.

ROFR 40222. Music and Lyrics of the French Renaissance

(3-0-3)

This course constitutes a survey of French Renaissance poetry on various topics: love, religion, politics, social satire, etc. Special attention is given to poetry that was set to music at that time.

ROFR 40230. La femme à la Renaissance

(3-0-3)

This course will consider the image of women in the works of Renaissance male writers as well as the literary production of women in Renaissance France. Authors to be discussed include Jeanne Flore, Hélienne de Crennes, Marguerite de Navarre, Louise Labé, and Pernelle Du Guillet. Taught in French.

ROFR 40250. Topics in French Renaissance Literature

(3-0-3) Della Neva

This is an in-depth study of a particular theme, author, or genre in Renaissance literature.

ROFR 40300. Reading Versailles

(3-0-3) MacKenzie

The political, social, and artistic phenomena resumed in the word Versailles, approached from a number of perspectives: historical, architectural, mythological, and in literature.

ROFR 40340. 17th-Century French Theater

(3-0-3) MacKenzie

A study of major works by Corneille, Racine, and Molière.

ROFR 40350. Qu'est-ce que le classicisme

(3-0-3) MacKenzie

An in depth study of the ideological, aesthetic, artistic, musical, and political pressures we now commonly call classical, not in the broad construal of the term, but rather as that which defines 17th-century France.

ROFR 40410. L'Utopie et la dystopie au 18e siècle

(3-0-3) Douthwaite

This course treats the topic of utopian literature and its dark alter ego, the dystopian world of *roman noir* and gothic fiction from the Enlightenment and Revolutionary era in France. With a base in stylistics and genre studies, this course embraces an interdisciplinary approach.

ROFR 40411. A Revolution in Fiction

(3-0-3) Douthwaite

This interdisciplinary seminar explores diverse facets of revolutionary culture, including politics, religion, art history, cuisine, fiction and films to better understand the events and their impact on French fiction from the 18th century to the present.

ROFR 40431. God, the gods, and Good and Evil in Classical French Literature

(3-0-3)

In this course our truck will be with works from the 17th and early 18th centuries in which human motivation and action are seen as extensions or consequences of divine intervention. We will be looking both at fictional and non-fictional works. Taught in French.

ROFR 40590. Global France: 50 Years of Film as Text

(3-0-3) Rice

This course will focus on cinematographic production in French and other Francophone areas (in Africa and the Caribbean) over the last 50 years. Students will acquire a vocabulary for film analysis by reading critical articles and analyses in French and will also examine the literary inspirations behind the films.

ROFR 40610. 19th-Century French Literature

(3-0-3) Toumayan

Lectures and extensive readings on and from French literature of the various schools and genres of the 19th century.

ROFR 40635. Phantasmes et fantastique: 19th-Century Short Story

(3-0-3)

This course will focus on the development of the genre of short narrative during the nineteenth century in France. Representative works of Balzac, Nerval, Barbey d'Aureville, Flaubert, Gautier, Mérimée, Maupassant, Nodier and Villiers de l'Isle Adam will be considered. We will examine distinctive features of the various aesthetics of Romanticism, Realism and Symbolism as well as generic considerations relating to the *conte fantastique*.

ROFR 40718. Humanism and Responsibility

(3-0-3) Toumayan

An interdisciplinary investigation of the idea of the responsibility of both individuals and sovereign states to respond to social injustice, political persecution or conflict, natural disasters, and humanitarian crises.

ROFR 40731. Difference and Dissidence in French Fiction from the 20th Century to the Present

(3-0-3) Perry

This course will study the evolution of French literature from the early 20th century to the present through the lens of unconventional fiction by André Gide (*L'Immoraliste*, 1902), Marcel Proust (*Un amour de Swann*, 1913), Colette (*Chéri*, 1920), Georges Bernanos (*Sous le soleil de Satan*, 1929), Albert Camus (short stories from *L'Exil et le royaume*, 1957), Marguerite Duras (*L'Amant*, 1984), Amélie Nothomb (*Acide sulfurique*, 2005), and Éric-Emmanuel Schmitt (*Ulysse from Bagdad*, 2008).

ROFR 40732. Politics of Fiction, Fictions of Politics

(3-0-3)

This course will examine a variety of French literary works from the 18th and 20th centuries that portray aspects of revolt, engagement, and resistance. From Voltaire and Victor Hugo to Simone de Beauvoir, from Jacques Derrida to Amélie Nothomb, readings will focus on the interactions of politics and literature.

ROFR 40805. French Travelers to North Africa

(3-0-3) Perry

This course explores works by French writers and artists who visited or resided in the North-African countries of Morocco and Algeria from the early 19th through the late 20th centuries. We examine a variety of works, including diaries, letters, paintings, travel narratives, short stories, novels, and studies on Orientalism and Islamic culture.

ROFR 40830. Francophone Picaresque

(3-0-3) Rice

This course will focus on Francophone novels that depict movement, particularly in the form of travel. We will read in chronological order works by writers from the Caribbean, Sub-Saharan Africa, and the Maghreb in an examination of the ways in which movement to and from (as well as within) the country of origin is addressed over time. A recurring theme will be the return to the country of origin after a stay in the French metropole.

ROFR 40831. World Literature in French

(3-0-3)

This course focuses on contemporary writing in French by writers from around the world. It examines a new trend of writing and reading world literature in French in a postcolonial, globalized French capital city.

ROFR 40835. Contemporary French and Francophone Fiction

(3-0-3)

What are some of the main areas of concern to us in our world today? This course will offer a means to explore and reflect upon contemporary issues such as exile, immigration, postcolonialism, East-West encounters, the war in Iraq, Islamic extremism and terrorism, psychopathic crime, and the critique of French cultural values, through the most recent fiction by French and Francophone writers such as Tahar Ben Jelloun (*Partir*, 2006), Chahdortt Djavann (*Comment peut-on être français?*, 2006), Yasmina Khadra (*Les Sirènes de Bagdad*, 2006), J.-M.G. Le Clézio (*Ouvania*, 2006), Andréï Makine (*L'Amour humain*, 2006), Alain Mabanckou (*Mémoires de porc-épic*, 2006), and Amélie Nothomb (*Journal d'Hirondelle*, 2006).

ROFR 40836. Women's Voices in French Prose from the Twentieth Century to the Present

(3-0-3) Perry

This course examines the gendered notions of "voice" and "silence" in the narrative prose of French and Francophone women authors of the 20th to 21st centuries. Works by Anna de Noailles, Gerard d'Houville (Marie de Régnier), Colette, Simone de Beauvoir, Anne Hébert, Marguerite Duras, Sylvie Germain, Amélie Nothomb, and essays in French feminist criticism.

ROFR 40850. Paris cosmopolite: Globalization, Immigration, and Translation in Francophone Literature and Film

(3-0-3) Rice

In this course we examine contemporary literary and cinematographic representations of Paris that take into account the ever-evolving "face" of the French capital city. We focus especially on the multicultural, multilingual nature of Paris today, thanks to globalization and the important waves of immigration that have contributed to a very cosmopolitan urban center. We look closely at the ways different cultures, customs, religions, and languages are translated into the text and onto the screen in recent works by such authors and filmmakers as Merzak Allouache, Bessora, Maryse Condé, Michael Haneke, Alain Mabanckou, and Leïla Sebbar.

ROFR 40905. Literature and Opera

(3-0-3)

This course will examine a certain number of important French literary texts and the operas they engendered.

ROFR 40906. French Literature Goes to the Opera

(3-0-3)

In this course, the full title of which is Taking Liberties: From Book to Libretto, or French Literature Goes to the Opera and which is taught in English, we will be looking a series of parent texts, written originally in French, and their operatic offspring. Works include *The Barber of Seville* (Beaumarchais/Rossini); *The Marriage of Figaro* (Beaumarchais/Mozart); *Don Juan* (Molière) and *Don Giovanni* (Mozart); *Manon Lescaut* (Prévost/Puccini), *Carmen* (Mérimée/Bizet).

ROFR 40950. Existentialism

(3-0-3) Toumayan

This course will examine the elaboration of the humanist doctrines of Camus, Malraux, and Sartre.

ROFR 41590. French Theatre Production

(1-0-1) McDowell

In this course we work on a French play throughout the fall semester, which is produced the second week of the spring semester. The first six weeks of the course is dedicated to a workshop on Molière's theater. Students register after auditions on the first class day.

ROFR 46000. Directed Readings

(V-0-V)

Specialized reading related to the student's area of study.

ROFR 47000. Special Studies

(3-0-3)

This course is designed with the purpose of allowing students to engage in an individual or small group study under the direction of a departmental faculty member. Prerequisite: senior standing, dean's list.

ROFR 47500. Timelessness and Modernity

(3-0-3)

This new course is specially designed for students with an interest in French language and cultures as they have evolved over the centuries. It will address broad topics such as Versailles: then and now, Francophone women, and revolutions.

ROFR 48000. Senior Thesis

(3-0-3)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to primary texts, some critical material will be required reading. This course culminates in a substantial research paper.

ROFR 53000. Senior Seminar

(3-0-3)

An in-depth study of a particular author, theme, genre, or century. Senior seminar courses may be offered anywhere in the course number range of ROFR 53000 to 53999.

ROIT 10101. Beginning Italian I

(4-0-4)

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Italian culture is also encouraged through readings and class discussion. The sequence 10101–10102 is to be followed by ROIT 20201 or ROIT 20215.

ROIT 10102. Beginning Italian II

(4-0-4) Schuirmann

Prerequisite: ROIT 10101 or ROIT 14101

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Italian culture is also encouraged through readings and class discussion. The sequence 10101–10102 is to be followed by ROIT 20201 or ROIT 20215.

ROIT 10105. Beginning Italian for Architects I

(3-0-3) Lenzi-Sandusky

An introduction to Italian similar to 10101–10102, but with a greater emphasis on practical information. Necessary for architects planning an international study experience.

ROIT 10106. Beginning Italian for Architects II

(3-0-3) Lenzi-Sandusky

Prerequisite: ROIT 10105

An introduction to Italian similar to 10101–10102, but with a greater emphasis on practical information. Necessary for architects planning an international study experience.

ROIT 10115. Intensive Beginning Italian for Study Abroad

(6-0-6) Sbordoni; Vivirito

This course covers the material of ROIT 10101 and 10102 in one semester with classes five days per week. Equal emphasis is placed on spoken and written Italian. ROIT 10115 counts as two courses and may be taken in conjunction with ROIT 20201 or ROIT 20215 to fulfill the language requirement. This course is designed for motivated students and is especially useful for those planning to study abroad.

ROIT 20201. Intermediate Italian I

(3-0-3)

Prerequisite: ROIT 10102 or ROIT 10106 or ROIT 10115

ROIT 20201 fulfills the language requirement. This is an intermediate second-year language course with equal focus on oral and written production. The course includes a review of basic grammar and then transitions into more difficult features of Italian. Students learn to discuss and write about Italian cultural topics, current events, and literary texts.

ROIT 20215. Intensive Intermediate Italian

(6-0-6)

Prerequisite: ROIT 10115 or ROIT 10102

This course is an accelerated language and culture course, combining the study of more complex language structures, communication tasks and cultural concepts in a stimulating daily classroom environment. If you have completed ROIT 10115 or ROIT 10102 successfully and are ready for a challenge, this course may be the perfect continuation for you. It completes the language requirement and is also recommended for students who wish to advance their linguistic preparation significantly before going to study in Italy. This course counts as two courses and covers material of ROIT 20201 and ROIT 20202 in one semester.

ROIT 20610. Fascism and Resistance

(3-0-3)

Why did European civilization in the twentieth century give rise to the worst killing fields the world had ever seen? Why did liberal democracy give way to malignant totalitarianism? Why did Italy, France, Germany, and Spain become “ground zero” in an ideological battle that would shape the world order for decades? This course will examine the cultural crises that brought about the Fascist epoch, as well as the philosophical rationale of those who fought back. We will ask the big questions: Was barbarism a necessary outgrowth of civilization? Can an individual resist the dominant tides of culture and country when they become destructive? Can imaginative literature and film really expect to change the world? We will consider the relationship between culture and power through the study of some of the most famous novels of the tumultuous era of Italian Fascism and resistance. These will include Alberto Moravia’s *Time of Indifference*, Giorgio Bassani’s *Garden of the Finzi-Contini*, Primo Levi’s *Survival in Auschwitz*, Elio Vittorini’s *Conversations in Sicily*, Cesare Pavese’s *The Moon and the Bonfires*, and Italo Calvino’s *The Path to the Spider’s Nest*. We will also examine these themes beyond Italy, looking at the feeling of crisis that spread throughout Europe, from Paul Valéry’s *The Crisis of the Spirit*, to Johan Huizinga’s *In the Shadow of Tomorrow*, Jorge Ortega y Gasset’s *The Revolution of the Masses*, to T.S. Eliot’s *Notes Towards the Definition of Culture*. In addition, we will examine reflections of Fascism and resistance in the cinema, with films including Alessandro Blasetti’s *Vecchia guardia*, Roberto Rossellini’s *Rome, Open City*, and Bernardo Bertolucci’s *Spider’s Stratagem*.

ROIT 20655. Italy through Cinema

(1-0-1)

This advanced, fourth semester content-driven discussion course is designed to further students’ written and oral communication skills. Students will strengthen their language proficiency by analyzing movies created by the new generation of Italian directors. The selection of the movies (from comedies to dramas) will reveal changes during the last decade in Italian society such as: unemployment, the mafia, immigration, religion, and youth culture. Students will have the chance to express their own opinions, to investigate and compare American and Italian cultures, to discuss in class and online new trends in Italian society, and to get closer to modern Italian reality.

ROIT 21205. Pre-Study Abroad

(1-0-1)

A mini-course that prepares students accepted for study abroad in Notre Dame’s programs in Italy. Students are prepared for various cultural and day-to-day challenges that await them in Italy. Course begins the week after spring break.

ROIT 22300. LAC Italian Discussion Group

(0-1-1)

Students who have completed the Notre Dame language requirement in Italian are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in Italian language materials (approximately 20–25 pages a week), and meet once a week with a graduate student or faculty tutor from the Department of Romance Languages and Literatures who will guide a discussion in Italian and grade some brief writing assignments. The LAC discussion section in Italian associated with this course will be graded on a pass/fail basis and will be credited on the student’s transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Italian. Please talk to the instructor if you are interested in adding this supplemental credit.

ROIT 27500. Intermediate Italian II: Media and Culture

(3-0-3)

Prerequisite: ROIT 20201 or ROIT 20215

An advanced, fourth-semester content-driven language course is designed to further the student’s conversational skills as well as grasp of a wide variety of styles and registers in Italian. Spoken and written Italian will be practiced through various classroom activities and assignments. Readings include a wide array of literary and nonliterary texts (newspapers and magazines, short fiction, and so on). Each course focuses on a different aspect of Italian culture. Recent topics include art & culture, Italian mass media, media & culture, attitude: Italian style, Italian society today.

ROIT 30205. Italian Renaissance

(3-0-3)

Corequisite: HIST 32500

This course examines the political, cultural, social, and religious history of Italy from about 1350 to 1550. Starting with an extended study of Florence, its economic foundations, social and political structures, artistic monuments, and key personalities, the course then examines how the culture of the Florentine Renaissance spread to the rest of Italy, especially to the papal court of Rome and the princely courts of northern Italy, and, finally, to the new nation-states of northern Europe. Key topics will include: the growth of the Italian city-state; the appearance of new, Renaissance “characters” (the merchant, the prince, the courtier, the mercenary, the learned lady, the self-made man); Renaissance humanism and the classical revival; the relationship between art and politics; and Renaissance ideas of liberty, virtue, historical change, and the individual’s relationship to God. The course will not tell a story of steady progress from medieval to modern institutions, societies, and modes of thinking; rather, we will consider the Renaissance as a period in flux, in which established traditions thrived alongside creative innovations and vigorous challenges to authority. Students will write one long paper and take a midterm and a final exam.

ROIT 30206. Early Modern Rome

(3-0-3)

This course traces the interlocking histories of the papacy and the city of Rome from the Renaissance to the birth of the modern Italian state. Topics will include the rise and fall of the papal monarchy; cultural and intellectual life at the Vatican court; the urban fabric of Rome from the Renaissance to the Baroque; the peculiar strains of Roman society; and the tumultuous relationship, both political and cultural, between Rome and the rest of Europe from the Reformation to the age of revolution. The course will proceed chronologically, but will pause frequently to examine special topics including: the Renaissance cardinal and his household; Michelangelo’s Rome; the building of St. Peter’s; Jesuit science; the trial of Galileo; archaeology and antiquarianism; the Roman Carnival; the Inquisition; Bernini’s Rome; the Grand Tour; Rome in the Romantic imagination; and Napoleon’s Rome.

ROIT 30310. Passage to Italy: Textual Analysis and Advanced Grammar

(3-0-3)

In this fifth-semester course you learn to analyze and understand works drawn from the major literary and artistic genres (lyric poetry, prose, theatre, epic, novel, film, opera, contemporary song). At the same time you will review and consolidate your grasp of the Italian language at an advanced level.

ROIT 30610. Rome: A Journey in Art and History

(3-0-3)

This class is an exploration of the history and culture of Rome from late medieval times through the 20th century, with an emphasis on art and architecture.

ROIT 30620. Italian Baroque Survey: Caravaggio to Guarini

(3-0-3)

This course surveys Italian painting, sculpture and architecture of the seventeenth century, a period which also witnessed the expansion of the Jesuit Order, the Counter-Reformation, and absolute monarchy. Thus, the course begins with the “new Rome” of Pope Sixtus V, which attracted pilgrims and artists from all over Europe. From Northern Italy came Caravaggio and the Carracci, artists who were responsible for creating a new style based on High Renaissance principles and a new kind of naturalism derived from the study of life. There was Bernini, whose architectural and sculptural monuments almost single-handedly gave Rome its Baroque character. Other artists and architects of this era under discussion include such diverse personalities as Borromini, Guarini, Algardi, Artemisia Gentileschi (Caravaggio’s only female follower), and the great ceiling painters Pietro da Cortona, Baciccio, Pozzo, and Maratti.

ROIT 30711. Medieval-Renaissance Italian Literature and Culture

(3-0-3) Moevs; Cachey

Prerequisite: ROIT 30310

An introduction to the close reading and textual analysis of representative texts from the Duecento through the Renaissance, including Lentini, Guinizzelli, Cavalcanti, Dante, Petrarch, Boccaccio, Poliziano, Machiavelli, and Ariosto. We will trace the profile of Italian literary history in this period, setting the texts in their cultural and historical context (including music, art, and architecture), with attention to the changing understanding of human nature and the physical world in these centuries. Taught in Italian. Required for majors and supplementary majors in the literature and culture concentration; either this course or ROIT 30721 is required for majors in the Italian studies concentration.

ROIT 30721. Modern Italian Literature and Culture

(3-0-3) Ferri, Welle

This course introduces students to major writers and literary movements in 18th-, 19th-, and 20th-century Italy, including Goldoni, Leopardi, Foscolo, Manzoni, Verga, Pirandello, and many others. Taught in Italian. Required for majors and supplementary majors in the literature and culture concentration; either this course or ROIT 30711 is required for majors in the Italian studies concentration.

ROIT 30830. High Renaissance and Mannerist Art

(3-0-3) Coleman

Leonardo, Michelangelo, Bramante, and Raphael provide the basis of study of one of the most impressive periods of artistic activity in Italy—the High Renaissance in Rome and Florence. The course also investigates the origins of Mannerism in the excessive achievements of Jacopo Pontormo, Rosso Fiorentino, and the succeeding generation of late-Renaissance maniera artists who helped to formulate a new courtly style. This course counts toward the major as an Italian studies course.

ROIT 32300. LAC Italian Discussion Group

(0-1-1)

Students who have completed the Notre Dame language requirement in Italian are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading

in Italian language materials (approximately 20–25 pages a week), and meet once a week with a graduate student or faculty tutor from the Department of Romance Languages and Literatures who will guide a discussion in Italian and grade some brief writing assignments. The LAC discussion section in Italian associated with this course will be graded on a pass/fail basis and will be credited on the student’s transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Italian. Please talk to the instructor if you are interested in adding this supplemental credit.

ROIT 37000. Special Studies

(3-0-3)

This course is designed with the purpose of allowing students to engage in an individual or small group study under the direction of a departmental faculty member. Permission of the department required. Prerequisite: junior standing, dean’s list.

ROIT 40114. Dante’s *Divine Comedy*: The Christian Universe as Poetry

(3-0-3) Baranski

This course explores the work of Dante’s *Divine Comedy*, looking at the Christian universe as poetry. Taught in English.

ROIT 40115. Dante I

(3-0-3)

Dante I and Dante II are an in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, *De vulgari eloquentia*). Dante I focuses on the *Inferno* and the minor works; Dante II focuses on the *Purgatorio* and *Paradiso*. Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

ROIT 40116. Dante II

(3-0-3) Moevs

Dante I and Dante II are an in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, *De vulgari eloquentia*). Dante I focuses on the *Inferno* and the minor works; Dante II focuses on the *Purgatorio* and *Paradiso*. Lectures and discussion in English; the text will be read in the original with facing-page translation. Students may take one semester or both, in either order.

ROIT 40117. Boccaccio

(3-0-3)

A textual analysis of the Decameron, with emphasis on structure and themes. Different critical approaches will be used in the analysis of individual tales, their relationships to the frames and their reflection on Boccaccio’s society.

ROIT 40215. Petrarch: The Soul’s Fragments

(3-0-3)

The course will explore fundamental themes in Petrarch’s writings in Latin, especially the *Secretum* and the epistles, and in the *Triumphs* and the *Canzoniere*. Contemporary critical approaches will be employed in the analysis of the *Canzoniere*.

ROIT 40230. La Letteratura di Viaggio: storia e critica

(3-0-3)

This course examines major Renaissance Italian narratives of the Age of Discovery. It concentrates on the theoretical and practical problems involved in attempting to read historical texts as “literary artifacts.”

ROIT 40231. Machiavelli and Guicciardini

(3-0-3)

This course will compare and contrast major works of these classical Italian Renaissance authors.

ROIT 40232. Renaissance Woman

(3-0-3)

This course is designed as an introduction to the study of women and literature of the Renaissance period in Europe. It considers the image of women in the writings of male authors as well as the work of female authors. This course counts towards the major as an Italian studies course.

ROIT 40233. Machiavelli NOW

(3-0-3)

In this seminar we will approach Machiavelli through the careful study of his major works, read against the background of the political crisis of the Italian Renaissance, and with particular attention to their resonance for subsequent political analyses of the condition of modernity. Reading will include: *On the method of dealing with the Rebellious Peoples of Valdichiana*; *A Description of the Methods Adopted by the Duke Valentino when Murdering Vitellozzo Vitelli, Oliverotto da Fermo, the Signor Pagolo, and the Duke di Gravina Orsini*; *The Prince*; *Mandragola*; *Belfagor*; *the Discourses on the First Decade of Livy*, and the *Dialogue on the Language*. The course will be offered in English.

ROIT 40505. Italian National Cinema

(3-0-3) Welle

Corequisite: ROIT 41505

Conducted in English, this course examines the concept and reality of national cinema in the Italian case. A history of one of the world's most renowned national cinemas focusing on the construction of national identity in film.

ROIT 40508. Cinema e letteratura

(3-0-3)

Corequisite: ROIT 41508

Conducted in Italian, this course analyzes Italian films and literary works in studying points of intersection and divergence between film and literature.

ROIT 40520. Cinema e autori: Pasolini

(3-0-3)

This course presents one of Italy's greatest 20th-century humanists. Pier Paolo Pasolini was a poet, novelist, critic, and filmmaker whose works are among the most well known and highly debated of the last century. We will read and discuss a selection of his texts and analyze his use of literary adaptation and autobiographical reference film. Students will gain an idea of Pasolini's place within the larger context of Italian filmmaking in the '60s and '70s, and we will consider his interactions with other auteur filmmakers such as Fellini and Bertolucci.

ROIT 40521. Pier Paolo Pasolini: Public Intellectual

(3-0-3)

This course introduces the student to the Italian writings and films of the Italian author and director Pier Paolo Pasolini as a public intellectual in a European context.

ROIT 40530. Commedia all'italiana

(3-0-3)

Taught in Italian, this course explores Italian comic traditions in drama, literature, and film in relation to history, politics, and society from the eighteenth century until today. Authors, directors and performers include Goldoni, Collodi, Marinetti, Pirandello, Fellini, Toto, Calvino, Wertmuller, Fo, and Benigni.

ROIT 40542. Comedy, Italian Style!

(3-0-3)

An exploration of comic traditions in Italy: the popular film genre known as "comedy Italian style" is analyzed in its historical development in the 1950s and '60s, together with Italian film comedies from the silent period through the present. Roberto Benigni's new film version of *Pinoocchio*, for example, released in the United States in December of 2002, extends a long line of comic genius. The *commedia dell'arte*, Goldoni's comedy of manners, and the political farce of Nobel Prize winner Dario Fo provide further examples of a comic tradition that continues to be a vital force of aesthetic pleasure and political comment.

Requirements include attendance at mandatory film screenings, participation in class discussions, a number of short papers, and midterm and final exams. The class will be conducted in English.

ROIT 40548. Italian Cinema: Realities of History

(3-0-3)

This course explores the construction and development of the Italian cinematic realist tradition from the silent era to the early 1970s, although its primary focus is on the period 1934–1966, which stretches from the appearance of Blasetti's openly fascist "historical" reconstruction, *La vecchia guardia*, to Pasolini's eccentric exercise in left-wing commitment, *Uccellacci e uccellini*, with its mix of expressionist and hyper-realist techniques. At the centre of this period are found some of Italy's most highly regarded films made by directors, such as Vittorio DeSica, Roberto Rossellini, and Luchino Visconti, who belonged to the neo-realist movement (1945–53). These filmmakers rejected escapist cinema and tried to make films that examined the contemporary experiences of ordinary Italians. As well as analyzing the films in themselves, the course examines the formal and ideological continuities and differences between neo-realist films and their silent and fascist predecessors. In a similar way, it analyzes neo-realism's impact on later filmmakers, such as Federico Fellini, Pietro Germi, Pier Paolo Pasolini, Gillo Pontecorvo, Dino Risi, and Francesco Rosi, who attempted to develop new versions of cinematic realism. Finally, the course aims to locate the films in their historical and cultural contexts and to address theoretical issues arising from the concept of realism.

ROIT 40610. Spotlight on Pirandello

(3-0-3)

The literary, theatrical, and cinematic works of Luigi Pirandello within the context of Italian culture and society between the 1880s and the 1930s, and as an integral force of Italian and European modernism.

ROIT 40630. The Fantastic in Italian Literature, 18th–20th Centuries

(12-0-3) Ferri

The literature of the fantastic blurs the boundaries between reality and the imagination. From vampires to doppelgängers, from automata to aliens, Italian literature has a rich and interesting tradition in the genre. This course will explore the development of fantastic fiction in Italy between the eighteenth and twentieth centuries. Through a selection of short stories, we will study the formal features and the main themes of the fantastic, both synchronically and diachronically. The close reading of the texts will be accompanied by historical contextualization and discussion of the key theories of the genre. The course is taught in Italian.

ROIT 40650. Modern Italian Fiction

(3-0-3)

Major works of Italian fiction from the 19th century until the present are analyzed in relation to Italian society and culture within the contexts of European history and literary movements.

ROIT 40655. Italy in Modern Europe

(3-0-3)

The course will treat the cultural, literary, artistic, and political relationships between Italy and the rest of Europe in the modern period (since the Renaissance). Central concerns will be the presence and influence of masterpieces of Italian literature both in translation and in the original Italian in other European countries, and the image of Italy (and in particular of Rome) in the religious polemics (Catholic/Protestant) of modern Europe. This course counts towards the major as an Italian studies course.

ROIT 40720. The Italian Lyric

(3-0-3)

An in-depth textual analysis of selected lyric masterpieces from the breadth of the Italian tradition, from Cavalcanti to Montale. Taught in Italian.

ROIT 40740. Teatro del Novecento

(3-0-3)

An exploration of the rich tradition of theatre, drama, and spectacle in modern Italian culture. Topics include: the verismo theatrical tradition of Giovanni Verga, Nino Martoglio, and Salvatore Di Giacomo; the Mediterranean tragedies of Gabriele d'Annunzio and the aesthetic and political implications of his poetics of spectacle; Futurist theatre and the European avant-garde; Pirandello's theatrical art and European modernism(s). In the second half of the 20th-century figures include Ugo Betti, Edoardo De Filippo, Pier Paolo Pasolini, Natalia Ginzburg, Dario Fo, and Dacia Maraini. The variety theatre, the dialect theatre and the relationship between theatre and cinema will also be examined. Class requirements include thorough preparation of dramatic texts and critical materials, attendance at a number of film screenings outside of class, a number of brief papers and oral presentations, a midterm, and a final exam. The class will be conducted in Italian.

ROIT 40750. Losers, Fools, and Borderliners in Italian Literature and Film

(3-0-3)

Between the 19th and 20th centuries, the *inetto*, or fool, emerges as an exemplary protagonist in Italian literature. The *inetto* embodies the ethical and existential crisis of modern man, who is no longer able to make sense of life in a new society dominated by mass culture, capitalism, and the forces of industrialization. We will examine the figure of the fool in the Italian literature, film, and graphic novel of the past two centuries in order to gain insight on the modern and post-modern Italian spirit.

ROIT 40802. Italian Dialect Literature

(3-0-3)

In this course, we will discuss aspects of Italy's literary tradition in dialect across time, space, and genres. Following a brief introduction to Italy's dialect varieties, we will consider some major poets who wrote in Milanese, Roman, and Neapolitan dialect. We will also address the plurilingual theatrical tradition in dialect, centered primarily around Naples and Venice. Against the backdrop of Italy's sociolinguistic panorama in the last two decades we will analyze the nature and function of dialects in the present revival of poetic dialects as well as in Italian narrative prose.

ROIT 40810. Topics in Medieval Art

(3-0-3)

The topic and format of this course will vary from year to year. Counts towards the major as an Italian studies course.

ROIT 40820. Seminar: Topics in Renaissance Art

(3-0-3)

This course will explore artistic trends in Italy after the High Renaissance (ca. 1520) and before the Baroque (ca. 1580) periods. We will begin with the emerging Tuscan painters Pontormo, Rosso Fiorentino, and Domenico Beccafumi, followed by Raphael's Roman heirs, Giulio Romano, Perino del Vaga, and Polidoro da Caravaggio. We will also investigate the dispersal of the Roman school: Giulio Romano to the Gonzaga court in Mantua, in 1524, and following the Sack of Rome by imperial troops in 1527; other artists to Genoa, Bologna, Parma, and to the French royal chateau at Fontainebleau. In Rome, the pontificate of Paul III witnessed a flourishing of the arts, politics, and theology. This period is marked by such diverse works as Michelangelo's *Last Judgment* (1536–41) and his frescoes (1542–45) in the Pauline Chapel, Vatican Palace, the decorations (1536–51) in San Giovanni Decollato, Perino's del Vaga's frescoes (1545–47) in the Castel Sant' Angelo, Vasari's murals (1546) in the Palazzo Cancelleria, and Francesco Salviati's frescoes in the Palazzo Ricci-Sacchetti (c. 1553–54). Attention will also be given to painting and sculpture by Bronzino, Salviati, Cellini, Bandinelli, Vasari, Giambologna, and others working at the Florentine courts of Dukes Cosimo I and Francesco I.

ROIT 40825. Fifteenth-Century Italian Renaissance Art

(3-0-3)

This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and audience, Medician patronage, and art for the Renaissance courts of northern Italy and Naples. This course counts toward the major as an Italian studies course.

ROIT 40828. Venetian and Northern Italian Renaissance Art

(3-0-3) Coleman

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan and Parma also provide insight into the traditions of the local schools and their patronage.

ROIT 40908. Italian Women Writers

(3-0-3)

This course is taught in English and explores the role of women writers in the Italian literary canon across the centuries. Particular emphasis will be given to twentieth-century women writers and the ways in which their works reflect specific social and cultural environments. Texts include poetry, prose, and drama, and films, and discussions will include topics such as motherhood, female subjectivity, fascism, and feminism.

ROIT 40910. The Hero's Journey: Adventure Narrative in Italian Literature and Cinema

(3-0-3)

Adventure stories are the oldest form of storytelling. Italy has a long-standing tradition in adventure fiction and yet this genre has not been analyzed in a comprehensive and systematic way. The course will explore the Italian adventure narrative through the analysis of a wide range of texts—from the Medieval short story to the Renaissance epic poem, from the picaresque novel of the eighteenth century to contemporary films and graphic novels. We will consider the texts and films against their social and cultural background and look at the development of the genre over time. What are the archetypes, conventions, and iconic symbols of the adventure narrative? What is its relationship to myth and history? Who is the hero/adventurer? What do adventure narratives and their heroes/heroines tell us about Italy and Italians?

ROIT 40920. Alfieri, Foscolo, and Leopardi

(3-0-3)

A study of selected works from the three greatest poets of the Neoclassical and Romantic period, with particular attention paid to the tension and fusion in their thoughts between Enlightenment and Romantic conceptions of self, humanity, and nature.

ROIT 40921. Ariosto e Calvino "un' idea di letteratura"

(3-0-3)

This course examines Lodovico Ariosto's *Orlando Furioso* in the light of Italo Calvino's reading of the poem and the recent "Calvinian" reading of the poem by one of Italy's leading philologist-critics, Corrado Bologna (*La macchina del Furioso*). This course will begin with a reading of Calvino's *Six Memos for the Next Millennium* and then move on to a reading of *Furioso*.

ROIT 40935. Italian Short Story

(3-0-3) Welle

Taught in Italian, this course treats the historical development of the short prose narrative in Italian literature. Beginning with the folktale, and moving into selected novelle by such Medieval and Renaissance writers as Boccaccio, Bandello, Firenzuola, and Machiavelli, the course also includes modern and contemporary contributors to the genre including Verga, D'Annunzio, Pirandello, Moravia,

Gozzano, Tozzi, Deledda, Serao, Maraini, Calvino, and Ginzburg. Students will be required to write a number of brief papers, to give brief oral presentations and to participate in class discussions.

ROIT 40950. Manzoni

(3-0-3)

A close reading of the *Promessi Sposi* in its historical and cultural context, with special attention given to its artistic and social aims as a novel at once historical, political, and self-consciously Catholic.

ROIT 41505. Italian National Cinema Lab

(0-0-0)

Corequisite: ROIT 40505

This is the lab component of the course ROIT 40505.

ROIT 41508. Italian Cinema: Realities Lab

(0-0-0)

This is the lab component of the course ROIT 40508.

ROIT 41542. Comedy, Italian Style Lab

(0-0-0)

This is the lab component of the course ROIT 40542; certain films will be viewed for further discussion in class.

ROIT 41548. Italian Cinema: Realities of History Lab

(0-0-0)

Corequisite: ROIT 40548

This is the lab component for the course ROIT 40548.

ROIT 41590. Italian Theatre Workshop

(3-0-3)

A full-immersion language experience for the study, practice, production, and performance of authentic Italian texts. Includes analytical and writing components.

ROIT 42115. Dante I LAC Discussion Group

(1-0-1)

Students of the Italian language are eligible to sign up for an additional single credit discussion section as part of the Languages across the Curriculum (LAC) initiative in the College of Arts and Letters. Choosing this option means that students will read a canto per week of the *Comedy* in Italian and meet once a week with a section leader who will guide a discussion in Italian and grade some brief writing assignments. The LAC discussion section in Italian associated with this course will be graded on a pass/fail basis and credited to the student's transcript. Up to three LAC discussion credits can be applied toward a major, secondary major, or minor in Italian.

ROIT 42116. Dante II LAC Discussion Group

(1-0-1)

Students of the Italian language are eligible to sign up for an additional single credit discussion section as part of the Languages across the Curriculum (LAC) initiative in the College of Arts and Letters. Choosing this option means that students will read a canto per week of the *Comedy* in Italian and meet once a week with a section leader who will guide a discussion in Italian and grade some brief writing assignments. The LAC discussion section in Italian associated with this course will be graded on a pass/fail basis and credited to the student's transcript. Up to three LAC discussion credits can be applied toward a major, secondary major, or minor in Italian.

ROIT 47000. Special Studies

(V-0-V)

This course is designed with the purpose of allowing students to engage in an individual or small group study under the direction of a departmental faculty member. Prerequisites: senior standing, dean's list.

ROIT 48000. Senior Thesis

(1.5-0-V)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to primary texts, some critical material will be required reading. This course culminates in a substantial research paper.

ROIT 53000. Italian Seminar

(3-0-3) Ferri

An in-depth study of a particular author, theme, genre, or century. In addition to treating the primary texts, some critical material will be required reading, this course culminates in a substantial research paper. The Italian Seminar courses are numbered in the range ROIT 53000 to 53999.

ROIT 58000. Honors Thesis

(V-0-V)

This course may cover an in-depth study of a particular author, theme, genre, or century. In addition to primary texts, some critical material will be required reading. This course culminates in a substantial research paper.

ROPO 10103. Brazilian Portuguese Language and Culture I

(4-0-4) Teixeira

This course sequence provides a solid foundation in the Portuguese language and introduces students to contemporary Brazilian culture through film, music, news media and internet resources. Designed for students with no previous knowledge of Portuguese, this sequence offers equal emphasis on speaking, listening, reading and writing. ROPO 10103—10104 uses a situational approach that privileges active communication in context. The sequence is followed by ROPO 20201 or ROPO 20202. ROPO 10103—10104 and either ROPO 20201 or ROPO 20202 together fulfill the language requirement.

ROPO 10104. Beginning Portuguese II

(4-0-4) Teixeira

Prerequisite: ROPO 10102

This is an introductory, first-year language sequence with equal focus on speaking, listening, reading, and writing. An appreciation for the diverse cultures of the Portuguese-speaking world is also encouraged through readings, music, videos, and class discussion.

ROPO 10105. Portuguese for Spanish Speakers I

(3-0-3) Teixeira

This course sequence is designed for students with at least intermediate-level proficiency in Spanish. Classroom activities emphasize the acquisition of basic language structures, vocabulary, and sound systems, as well as the active use of spoken language in context. Students are introduced to the diverse cultures of the Portuguese-speaking countries through current video, printed media, music, and short fiction. This sequence is followed by ROPO 20201 or ROPO 20202. ROPO 10105—10106 and either ROPO 20201 or ROPO 20202 together fulfill the language requirement.

ROPO 10106. Portuguese for Spanish Speakers II

(3-0-3) Teixeira

Prerequisite: ROPO 10105

This course sequence is designed for students with at least intermediate-level proficiency in Spanish. Classroom activities emphasize the acquisition of basic language structures, vocabulary, and sound systems, as well as the active use of spoken language in context. Students are introduced to the diverse cultures of the Portuguese-speaking countries through current video, printed media, music, and short fiction. This sequence is followed by ROPO 20201 or ROPO 20202. ROPO 10105—10106 and either ROPO 20201 or ROPO 20202 together fulfill the language requirement.

ROPO 10115. Intensive Beginning Portuguese for Study Abroad

(6-0-6) Teixeira

Designed for highly motivated students, this intensive language course meets five days a week, covers the material of ROPO 10101 and 10102, and counts as two

courses. Along with the acquisition of language skills, ROPO 10115 emphasizes the active use of spoken Portuguese in context. ROPO 10115 and ROPO 20201 together fulfill the language requirement and prepare students to study abroad in Brazil.

ROPO 20201. Intermediate Portuguese I

(3-0-3) Teixeira

Prerequisite: ROPO 10102 or ROPO 10106 or ROPO 10115 or ROPO 10104
Through selected readings in Portuguese, Brazilian, and Lusophone African literatures, films, newspaper and magazine articles, and popular music, students discuss a variety of cultural issues and expand their vocabulary. Particular attention is placed on reviewing major topics in Portuguese grammar and on developing students' writing abilities. ROPO 20201 fulfills the language requirement and prepares students to study abroad in Brazil.

ROPO 20202. Intermediate Portuguese II

(3-0-3) Teixeira

Prerequisite: ROPO 20201

This is a continuation of ROPO 20201 but it may be taken separately. ROPO 20202 is a fourth-semester language course designed to develop facility in speaking, reading, and writing at an advanced level. Discussions and writing assignments are based on films as well as on short stories, chronicles and newspaper articles.

ROPO 20300. Advanced Oral Expression in Portuguese

(2-0-2) Teixeira

Designed for students interested in developing their comprehension, fluency and pronunciation. This mini-course in Portuguese offers both informal and structured conversation based on current events. Topical conversation on Brazilian politics, society, and culture will be based on authentic materials. In addition to meeting one hour per week for group discussions, students organize and participate collectively in a round-table on a topic of their choice. Conducted in Portuguese. Recommended for returnee students from Brazil.

ROPO 22300. LAC Portuguese Discussion Group

(0-1-1)

Students who have completed the Notre Dame language requirement in Portuguese are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in Portuguese language materials (approximately 20–25 pages a week), and meet once a week with a graduate student or faculty tutor from the Department of Romance Languages and Literatures who will guide a discussion in Portuguese and grade some brief writing assignments. The LAC discussion section in Portuguese associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Portuguese. Please talk to the instructor if you are interested in adding this supplemental credit.

ROPO 30600. Testimonials from Urban Brazil

(3-0-3) Ferreira Gould

This course, taught in Portuguese, explores contrasting images of social change in recent Brazilian literature and cinema. The focus is on attempts to give voice to the poor, the marginal, the rogue, and other agents of social change in urban Brazil. Course materials are drawn from fictional auto/biographies and diaries, street memoirs, documentary novels, crime stories, prisoners' accounts, films, and documentaries. (*Prerequisite:* a 20000-level course in Portuguese or equivalent.)

ROPO 30990. When Empires Fall

(3-0-3) Ferreira Gould

Offered in Portuguese, this course examines contemporary Luso-Brazilian literature and historiography that explore major shifts in Portugal's status from world power to semi-peripheral European nation. We focus on responses to three

major traumas: the end of the Luso-Brazilian empire in the early 1800s, the confrontation with Britain and the Ultimatum of 1890, and the fall of the African empire with the subsequent decolonization of 1974–1975.

ROPO 32300. LAC Portuguese Discussion Group

(0-1-1)

Students who have completed the Notre Dame language requirement in Portuguese are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in Portuguese language materials (approximately 20–25 pages a week), and meet once a week with a graduate student or faculty tutor from the Department of Romance Languages and Literatures who will guide a discussion in Portuguese and grade some brief writing assignments. The LAC discussion section in Portuguese associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Portuguese. Please talk to the instructor if you are interested in adding this supplemental credit.

ROPO 40560. Brazilian Film and Popular Music

(3-0-3) Ferreira Gould

This course provides insights into 20th- and 21st-century Brazilian history, culture, and politics through film, photography, literature, and popular music. Topics discussed include samba, bossa nova, tropicalia, and the reception of cinema novo and of the new Brazilian cinema. Special attention will be paid to tropicalia (a movement with key manifestations in the visual arts, cinema, popular music, and literature) and the circumstances surrounding its creation, including the repressive military regime that governed Brazil from 1964 to 1985. Offered in English.

ROPO 40950. Luso-Brazilian Literature and Society

(3-0-3) Ferreira Gould

This course focuses on questions of national identity in the Luso-Brazilian world. We examine how social and cultural issues are perceived, conceptualized, represented, and understood in and by literature. Conducted in English with readings in Portuguese or English (discussion group available in Portuguese).

ROPO 40951. Immigrant Voices in Modern Brazilian Literature

(3-0-3) Ferreira Gould

This course examines literary perspectives on the European and non-European immigrant experience in Brazil and addresses fundamental questions that have occupied major contemporary Brazilian authors: how do we recreate a sense of home after having lost it? What makes us feel at home in a new place or country? How do we adapt to relocations of home? We will search for answers in the fiction of Milton Hatoum, Elisa Lispector, Salim Miguel, Ana Miranda, Raduan Nassar, Nelida Pinon, Samuel Rawet, and Moacyr Scliar. Conducted in English with readings in Portuguese or English (discussion group in Portuguese).

ROPO 40955. Dictatorships in Luso-Brazilian Fiction and Film

(3-0-3) Ferreira Gould

Prerequisite: ROPO 20202

This course offers a literary and cinematic study of 20th-century dictatorships in Brazil and Portugal, with readings in Luso-Brazilian fiction, history, film, and cultural theory. Authors studied include Loyola Brandao, Antonio Callado, Ivan Angelo, Fernando Gabeira, Antonio Lobo Antunes, Lidia Jorge, Maria Isabel Barreno et al, and Arthur Portela. Viewing of films by Maria de Medeiros, Manoel de Oliveira, Joao Botelho, Glauber Rocha, Sergio Rezende and Bruno Barreto. Offered in English (discussion group in Portuguese).

ROPO 40956. Carnival in Cinema and Literature

(3-0-3) Ferreira Gould

Brazil, the largest South American country, has tantalized our imagination with the images of Samba and Carnival. As Brazilian anthropologist Roberto DaMatta asserts, Carnival creates a festival out of the everyday social world in which there is no emphasis on the harsh rules that govern membership and identity. This course will offer an exploration of Brazilian culture by investigating the ways in which

the celebrations of Carnival have been viewed, articulated and unsettled by film and literature. Along with major films, documentaries and literary works, we will examine contemporary sociological and anthropological writing that contributes to our understanding of Carnivals within and beyond Brazil. We will learn how key issues in Brazilian society (race and gender relations, national identity, rituals and symbols, values and social roles) play out in Carnival. Course offered in English.

ROPO 40977. Portuguese Colonialism Revisited

(3-0-3)

With readings from Angola, Mozambique, Brazil and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. This course brings the Lusophone experience, with its important varieties yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and /or English.

ROPO 40995. Short Fiction across the Atlantic: Brazil, Portugal, and Lusophone Africa

(3-0-3) Ferreira Gould

This is a comparative study of short prose fiction in the Portuguese-speaking world, with special emphasis on theoretical issues related to this literary genre. Authors studied include Machado de Assis, Joao Guimaraes Rosa, Clarice Lispector, Mario de Sa-Carneiro, Miguel Torga, Mia Couto, and Luandino Vieira. Conducted in English.

ROPO 40997. Portuguese Colonialism Revisited

(3-0-3)

With readings from Brazil, Angola, Mozambique and Portugal, this course examines colonialism and its aftermath in Africa in light of postcolonial fiction and contemporary sociological and anthropological writing from the Lusophone world. The course brings the Lusophone experience, with its important varieties, yet overlooked implications, into broader debates in the field of postcolonial studies. Course conducted in English with readings in Portuguese and/or English.

ROPO 40998. Fictions of the South Atlantic

(3-0-3)

Taught in English, this seminar offers a comparative study of 19th-, 20th-, and 21st-century fiction writing in the Lusophone South Atlantic, particularly exploring the historical connections and the cultural links between Brazil and Angola.

ROPO 46000. Directed Readings

(3-0-V)

Specialized reading related to the student's area of study.

ROSP 10101. Beginning Spanish I

(4-0-4)

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Hispanic cultures is also encouraged through readings and class discussion. The sequence is to be followed by ROSP 20201 or ROSP 20215.

ROSP 10102. Beginning Spanish II

(4-0-4)

Prerequisite: ROSP 10101 or CESP For MIN. SCoRE OF 281

This is an introductory, first-year language sequence with equal focus on the four skills: speaking, listening, reading, and writing. An appreciation for Hispanic cultures is also encouraged through readings and class discussion. The sequence is to be followed by ROSP 20201 or ROSP 20215.

ROSP 10115. Intensive Beginning Spanish

(6-0-6) Topash-Rios

This course covers the material of ROSP 10101 and 10102 in one semester with classes five days per week. Equal emphasis is placed on spoken and written

Spanish. ROSP 10115 counts as two courses and may be taken in conjunction with ROSP 20201 or ROSP 20215 to fulfill the language requirement. This course is designed for highly motivated students.

ROSP 20201. Intermediate Spanish I

(3-0-3)

Prerequisite: ROSP 10102 or ROSP 10115) or CESP For MIN. SCoRE OF 341

This is an intermediate second-year language sequence with equal focus on oral and writing skills. It includes a review of basic grammar and then transitions into more difficult features of Spanish. Students learn to discuss and write about Hispanic cultural topics, current events, and literary texts.

ROSP 20202. Intermediate Spanish II

(3-0-3)

Prerequisite: (ROSP 20201 or ROSP 20211)) or CESP For MIN. SCoRE OF 395

This is an intermediate second-year language sequence with equal focus on oral and writing skills. It includes a review of basic grammar and then transitions into more difficult features of Spanish. Students learn to discuss and write about Hispanic cultural topics, current events, and literary texts.

ROSP 20211. Intermediate Spanish for Heritage Speakers

(3-0-3)

Prerequisite: ROSP 10102 or ROSP 10115

A course of intensive grammar study, reading and writing designed for those who may speak with some fluency but need additional work on their grammar and writing skills. It is most appropriate for students who speak some Spanish in the home but whose primary language is English.

ROSP 20215. Intensive Intermediate Spanish for Study Abroad

(6-0-6)

Prerequisite: (ROSP 10102 or ROSP 10115) or CESP For MIN. SCoRE OF 341

ROSP 20215 is an intensive intermediate course that covers the material from ROSP 20201 and ROSP 20202 in one semester with classes five days per week. Equal emphasis is placed on spoken and written Spanish. The course includes a review of major grammar points, literary and cultural readings. ROSP 20215 counts as two courses and fulfills the language requirement.

ROSP 20220. Intermediate Grammar and Writing

(3-0-3)

Prerequisite: ROSP 20202 or ROSP 20211 or ROSP 20215 or ROSP 20237

Emphasis on refinement of oral and written language competence. This course is especially appropriate for first-year students with advanced proficiency in Spanish who have tested out of the 20202 level with an interest in study abroad. It is also open to students coming through the regular language sequence who may need additional review of grammar points.

ROSP 20237. Conversation and Writing

(3-0-3)

Prerequisite: (ROSP 20202 or ROSP 20211 or ROSP 20215) or CESP For MIN. SCoRE OF 440

Intended to develop writing proficiency through literary and nonliterary texts from Spain and Spanish America while continuing to promote the development of oral skills in Spanish.

ROSP 20450. Spanish for Business

(3-0-3)

Prerequisite: ROSP 20202

This course is designed for the student who wants to learn and study Spanish terminology, phrases, and cultural conventions used in business situations in Spain and Latin America.

ROSP 20460. Spanish for Medical Profession

(3-0-3)

Prerequisite: ROSP 20202 or ROSP 20211 or ROSP 20215

This course introduces students who have mastered the rudiments of Spanish grammar to a vocabulary allowing them to discuss medicine and health care with the Spanish-speaking population in the United States.

ROSP 20502. La Telenovela: History, Culture, and Student Production

(3-0-3)

Prerequisite: ROSP 20202

The aim of this course is to explore the genre of the telenovela. Students sharpen oral and written language skills through exposure to authentic telenovelas from Spain and Latin America, and through the creation and production of their own telenovela.

ROSP 20660. Studies in Andean Culture

(3-0-3)

An intermediate Spanish course focusing on Andean culture and the Inca empire.

ROSP 21205. Pre-study Abroad

(1-0-1)

A mini-course that prepares students accepted for study abroad in Notre Dame's programs in Chile, Mexico, and Spain. Course begins the week after spring break.

ROSP 22300. LAC Spanish Discussion Group

(0-1-1)

Students who have completed the Notre Dame language requirement in Spanish are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in Spanish language materials (approximately 20–25 pages a week), and meet once a week with a graduate student or faculty tutor from the Department of Romance Languages and Literatures who will guide a discussion in Spanish and grade some brief writing assignments. The LAC discussion section in Spanish associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Spanish. Please talk to the instructor if you are interested in adding this supplemental credit.

ROSP 27500. Approaches to Hispanic Culture through Writing

(3-0-3)

Prerequisite: ROSP 20202 or ROSP 20215 or ROSP 20237 or ROSP 20211 or ROSP 20220

This content-driven course is intended for students who want to further broaden their knowledge of the Spanish language and related cultures, as well as improve both their understanding of the Hispanic world and their communication skills in the Spanish language. Development of advanced structures is achieved through intensive practice in speaking and writing. Each course focuses on a different aspect of Hispanic culture.

ROSP 30310. Textual Analysis

(3-0-3) Olivera-Williams

Prerequisite: ROSP 20202 or ROSP 20215 or ROSP 20211 or ROSP 20220 or ROSP 20237 or ROSP 27500 or CESP For MIN. SCorE OF 600

This is an upper-division course for students with advanced preparation. It serves as the introduction to the analysis and explication of Spanish-language literary texts. Short texts in prose, poetry, and theatre from a variety of periods and countries within the Hispanic world are read, presented, and discussed. The course is a prerequisite for the survey courses, and must be completed by the end of the junior year.

ROSP 30320. Advanced Grammar and Writing

(3-0-3)

A further refinement of Spanish speaking and writing skills, this course is designed for students returning from abroad who wish to improve their proficiency in Spanish, and for students already in upper division courses who seek additional assistance with writing skills and grammar.

ROSP 30710. Survey of Spanish Literature I

(3-0-3) Juarez; Vitulli

A survey of Spanish literature through 1700. Readings of selected texts in prose, poetry, and theater from the medieval, Renaissance, and baroque periods.

Recommended prerequisite: ROSP 30310.

ROSP 30720. Survey of Spanish Literature II

(3-0-3) Jerez-Farran

A survey of Spanish literature from the neoclassical period to the present. Readings include a selection of texts by the most representative poets, playwrights, and novelists of each of the literary periods under study. Recommended prerequisite:

ROSP 30310.

ROSP 30810. Survey of Spanish-American Literature I

(3-0-3) Anadon

A general introduction to and survey of major works of colonial and 19th-century literature up to Modernismo. Recommended prerequisite: ROSP 30310.

ROSP 30820. Survey of Spanish-American Literature II

(3-0-3) Heller; Anderson; Ibsen; Moreno

A survey of literary trends and major figures in modern Spanish-American literature from 1880 to the present. Readings of selected texts in prose, poetry, and theatre. Recommended prerequisite: ROSP 30310.

ROSP 30890. Nations in Motion: Latino/Latina Literature in the United States

(3-0-3) Moreno

This course focuses on the analysis of literary works by Mexican-American, Cuban-American, Puerto Rican, and Dominican-American authors. Some reading knowledge of Spanish recommended.

ROSP 32300. LAC Spanish Discussion Group

(0-1-1)

Students who have completed the Notre Dame language requirement in Spanish are eligible to sign up for an additional single credit discussion section as part of the Languages Across the Curriculum (LAC) initiative of the College of Arts and Letters. Choosing this option means that students will do some additional reading in Spanish language materials (approximately 20–25 pages a week), and meet once a week with a graduate student or faculty tutor from the Department of Romance Languages and Literatures who will guide a discussion in Spanish and grade some brief writing assignments. The LAC discussion section in Spanish associated with this course will be graded on a pass/fail basis and will be credited on the student's transcript. Up to three LAC discussion sections can be applied toward a major, secondary major or minor in Spanish. Please talk to the instructor if you are interested in adding this supplemental credit.

ROSP 37725. Studies in Modern Peninsular Spain

(3-0-3)

This advanced 300-level course is intended for students who want to further broaden their knowledge and understanding of the Hispanic world through literature, art, film, and other cultural manifestations. Each course focuses on a different aspect of the culture of modern Peninsular Spain.

ROSP 37825. Studies in Mod Spanish America

(3-0-3)

Prerequisite: ROSP 27500 or ROSP 30310 or ROSP 30320

This course will focus on literary texts, works of public art, and films from the Hispanic Caribbean (Puerto Rico, Cuba, Dominican Republic), which were

produced with the expressed goal of educating the public (and especially the rural majority) on a variety of topics such as health, education, human rights, community building, public safety, and the importance of traditional cultural manifestations. This course will include a mandatory community-based-learning component at Perley Fine Arts Academy in South Bend, where students will spend approximately one hour per week (from 2:30–3:30 on any one of the following days: Mon.–Thurs) in an exciting after-school arts program that will draw heavily on the themes treated in the course. Students in this course will also contribute to the organization of an exhibit of didactic art from Puerto Rico, which will be displayed at the Snite Museum of Art. Texts and course lectures/discussion will be in Spanish. This course fulfills the modern Spanish American requirement. It is open to both majors and non-majors.

ROSP 40110. Medieval Spanish Literature

(3-0-3) Seidenspinner-Nunez

This course is intended to introduce the student to the literature of medieval Spain. The texts are discussed and analyzed in the light of both medieval and modern critical concepts, and with a view to developing an understanding of the medieval culture of which they were a part.

ROSP 40220. Renaissance and Baroque Poetry of Spain

(3-0-3) Juarez-Almendros; Vitulli

A close reading of traditional and Italianate poetry that includes villancicos, romances, and the works of Garcilaso de la Vega, Fray Luis de Leon, San Juan de la Cruz, Gongora, Quevedo, and Sor Juana Ines de la Cruz.

ROSP 40221. Spanish Avant-Garde Literature

(3-0-3) Jerez-Farran

An analysis of avant-garde literary movements in Spain including works by authors such as Valle-Inclan and the members of the Generation of 1927.

ROSP 40231. Cervantes: Don Quijote

(3-0-3) Juarez-Almendros; Vitulli

A close textual analysis of Cervantes' novel in its literary, historical, and cultural contexts.

ROSP 40232. Golden Age Short Novel

(3-0-3) Juarez-Almendros

A close reading of traditional peninsular narratives.

ROSP 40235. The Picaresque Novel

(3-0-3) Juarez-Almendros

An introduction to a unique Spanish genre, the picaresque novel, or literature of the delinquent, with major focus on Spanish Golden Age masterpieces.

ROSP 40236. Picaresque and Golden Age Autobiography

(3-0-3)
