Bulletin of Information

University of Notre Dame

Undergraduate Programs

Vol. 102, No. 2, August 2006

The course offerings and requirements of the University of Notre Dame are continually under examination, and revisions are expected. This *Bulletin of Information* is not a contract; it merely presents the offerings and requirements in effect at the time of publication and in no way guarantees that the offerings and requirements will remain the same. Every effort is made to provide advance information of any changes.

 584 Institute for Latino Studies
 592 Department of Military Science (ROTC-Army)
 593 Department of Naval Science (ROTC-Navy)
 594 Department of Physical Education

Safety Information from Notre Dame Security/Police

The security of all members of the campus community is of paramount concern to the University of Notre Dame. Each year the University publishes an annual report outlining security and safety information and crime statistics for campus. This brochure provides suggestions regarding crime prevention strategies and important policy information about emergency procedures, reporting of crimes, law enforcement services on campus, and information about support services for victims of sexual assault. The brochure also contains information about the University's policy on alcohol and other drugs, the SafeWalk program, and campus shuttle service.

This brochure is available by writing to:

Office of the Director
 University Security/Police
 Room 204, Hammes Mowbray Hall
 Notre Dame, IN 46556-5675

or calling the department at 574-631-8338.

Notice. The University of Notre Dame does not discriminate on the basis of race, color, national or ethnic origin, sex, disability, veteran status, or age in the administration of any of its educational programs, admissions policies, scholarship and loan programs, athletic and other school-administered programs, or in employment.

The University has designated the director of its Office of Institutional Equity to handle all inquiries regarding its efforts to comply with and carry out its responsibilities under Title IX and under Section 504 of the Rehabilitation Act of 1973. The Title IX and Section 504 coordinator may be contacted as follows:

Director
 Office of Institutional Equity
 414 Grace Hall
 University of Notre Dame
 Notre Dame, IN 46556
 574-631-0444

Officers of Administration

President

THOMAS G. BURISH, PhD
Provost

JOHN AFFLECK-GRAVES, PhD
Executive Vice President

DENNIS C. JACOBS
Vice President and Associate Provost

JEAN ANN LINNEY
Vice President and Associate Provost

CHRISTINE M. MAZIAR
Vice President and Associate Provost

REV. MARK L. POORMAN, CSC, PhD
Vice President for Student Affairs

LOUIS M. NANNI, MA
Vice President for University Relations

CAROL COLBY KAESBIER, JD
Vice President and General Counsel

JAMES J. LYPHOUT, MBA
Vice President for Business Operations

JOHN A. SEJDINAJ, MBA
Vice President for Finance

SCOTT C. MALPASS, MBA
Vice President and Chief Investment Officer

HILARY CRNKOVICH, BA
Vice President for Public Affairs and Communication

Board of Trustees

Dr. John F. Affleck-Graves
Notre Dame, Indiana

Rev. José E. Ahumada, CSC
Santiago, Chile

Mrs. Kathleen W. Andrews
Kansas City, Missouri

Mr. Eugene J. Bastedo
Ex Officio
Memphis, Tennessee

Rev. E. William Beauchamp, CSC
Portland, Oregon

Mr. Robert F. Biolchini
Tulsa, Oklahoma

Ms. Cathleen P. Black
New York, New York

Dr. Thomas G. Burish
South Bend, Indiana

Mr. Raymond G. Chambers
Morristown, New Jersey

Mr. Robert M. Conway
London, England

Mr. Fritz L. Duda
Dallas, Texas

Mr. José Enrique Fernández
San Juan, Puerto Rico

Mr. W. Douglas Ford
Downers Grove, Illinois

Dr. Marye Anne Fox
San Diego, California

Ms. Stephanie A. Gallo
Modesto, California

Mr. F. Michael Geddes
Phoenix, Arizona

Mr. William M. Goodyear
Chicago, Illinois

Dr. Nancy M. Haegel
Monterey, California

Mr. Enrique Hernandez Jr.
Pasadena, California

Mrs. Carol Hank Hoffmann
Minnetonka, Minnesota

Mr. Douglas Tong Hsu
Taipei, Taiwan

Rev. Peter A. Jarret, CSC
Notre Dame, Indiana

Rev. John I. Jenkins, CSC
Notre Dame, Indiana

Most Rev. Daniel R. Jenky, CSC, DD
Peoria, Illinois

Mr. John W. Jordan II
Chicago, Illinois

Mr. Thomas E. Larkin Jr.
Los Angeles, California

Hon. Diana Lewis
West Palm Beach, Florida

Mr. Patrick F. McCartan
(Chairman)
Cleveland, Ohio

Mr. Ted H. McCourtney
Katonah, New York

Mr. Terrence J. McGlinn
Wyomissing, Pennsylvania

Mr. Andrew J. McKenna
(Chairman Emeritus)
Morton Grove, Illinois

Mr. Martin Naughton
Dunleer, Co. Louth, Ireland

Mr. Richard C. Notebaert
Denver, Colorado

Mr. Richard A. Nussbaum II
Ex Officio
South Bend, Indiana

Mr. Joseph I. O'Neill III
Midland, Texas

Mr. Antonio Ortiz
Chicago, Illinois

Ms. Keri O. Oxley
Fremont, Ohio

Dr. Anita M. Pampusch
St. Paul, Minnesota

Dr. Percy A. Pierre
East Lansing, Michigan

Mr. Philip J. Purcell III
Riverwoods, Illinois

Mr. William F. Reilly
New York, New York

Mr. J. Christopher Reyes
Rosemont, Illinois

Mr. Phillip B. Rooney
Downers Grove, Illinois

Mrs. Shayla Keough Rumely
Atlanta, Georgia

Mrs. Shirley W. Ryan
Chicago, Illinois

Mr. John F. Sandner
Chicago, Illinois

Rev. Timothy R. Scully, CSC
Notre Dame, Indiana

Mr. William J. Shaw
Washington, D.C.

Mr. Kenneth E. Stinson
Omaha, Nebraska

Mrs. Phyllis W. Stone
Whitehouse Station, New Jersey

Rev. David T. Tyson, CSC
Notre Dame, Indiana

Mr. Arthur R. Velasquez
Chicago, Illinois

The Honorable Ann Claire Williams
Chicago, Illinois

TRUSTEES EMERITI

Rev. Ernest Bartell, CSC
Notre Dame, Indiana

Mr. Roger E. Birk
Carbondale, Colorado

Rev. Thomas E. Blantz, CSC
Notre Dame, Indiana

Dr. John Brademas
New York, New York

Mr. John H. Burgee
Monticeto, California

Dr. Thomas P. Carney
(Chairman Emeritus)
Lake Forest, Illinois

Mr. John B. Caron
Greenwich, Connecticut

Mr. Arthur J. Decio
Elkhart, Indiana

Mr. Alfred C. DeCrane Jr.
Bronxville, New York

Mr. Anthony F. Earley
Garden City, New York

Rev. Carl F. Ebey, CSC
Notre Dame, Indiana

Dr. Phillip J. Faccenda
South Bend, Indiana

Mr. Charles K. Fischer Sr.
Fort Worth, Texas

Sr. Alice Gallin, OSU
New Rochelle, New York

Mr. Roland D. Grimm
Key West, Florida

Mr. J.M. Haggart Jr.
Dallas, Texas

Mr. Bernard J. Hank Jr.
Moline, Illinois

Mr. Philip M. Hawley
Los Angeles, California

Rev. Theodore M. Hesburgh, CSC
Notre Dame, Indiana

(Chairman Emeritus)
Atlanta, Georgia

Hon. George N. Leighton
Chicago, Illinois

Mr. Ignacio E. Lozano Jr.
Los Angeles, California

Rev. Edward A. Malloy, CSC
Notre Dame, Indiana

Mr. Donald J. Matthews
Cos Cob, Connecticut

Mr. Newton N. Minow
Chicago, Illinois

Prof. Timothy O'Meara
Notre Dame, Indiana

Mrs. Martha A. Peterson
Madison, Wisconsin

Mrs. Jane C. Pfeiffer
Vero Beach, Florida

Mrs. Ernestine M. Raclin
South Bend, Indiana

Mr. John M. Regan Jr.
Watch Hill, Rhode Island

Mr. John A. Schneider
Greenwich, Connecticut

Rev. Richard V. Warner, CSC
Notre Dame, Indiana

Mr. William K. Warren Jr.
Tulsa, Oklahoma

Mr. Robert J. Welsh
Merrillville, Indiana

Mr. Robert K. Wilmouth
Chicago, Illinois

ACADEMIC CALENDAR

**OFFICIAL UNIVERSITY OF NOTRE DAME AND SAINT MARY'S COLLEGE
JOINT ACADEMIC YEAR CALENDAR FOR 2006-2007**

FALL 2006 SEMESTER

Aug. 17-19	Thur-Sat	Orientation and counseling for new students at Saint Mary's College
Aug. 17	Thursday	Orientation and advising for readmitted and new transfer students at Notre Dame
Aug. 17	Thursday	Orientation for International Students at Notre Dame
Aug. 18	Friday	Undergraduate Halls open for First Year student move-in beginning at 9:00 a.m. for Notre Dame
Aug. 18	Friday	Orientation and advising for new graduate students at Notre Dame
Aug. 19	Saturday	Residence Halls open at 9:00 a.m. for Saint Mary's College
Aug. 19-20	Sat - Sun	Orientation and advising for freshmen at Notre Dame
Aug. 20	Sunday	Undergraduate Halls open for upperclassman move-in beginning at 9:00 a.m. for Notre Dame
Aug. 21	Monday	Classes begin at 8:00 a.m. for Saint Mary's College
Aug. 22	Tuesday	Classes begin at 8:00 a.m. for Notre Dame
Aug. 22	Tuesday	Mass - formal opening of school year at Notre Dame
Aug. 30	Wednesday	Last date for all class changes
Sept. 4	Monday	Labor Day - classes are in session
Sept. 22	Friday	Last date to drop a class at Saint Mary's College
Oct. 13	Friday	Mid-Semester Deficiency reports submitted through insideND by 3:45 p.m. at Notre Dame
Oct. 14-22	Sat - Sun	Mid-Semester break
Oct. 16	Monday	Mid-Semester Deficiency reports due in PRISM by 8:00 a.m. at Saint Mary's College
Oct. 27	Friday	Last day for course discontinuance at Notre Dame
Nov. 13-29	Mon - Wed	Registration for the Spring 2007 Semester at Notre Dame and Saint Mary's College
Nov. 23-26	Thur - Sun	Thanksgiving Holiday (Wednesday, Nov. 22 is a student holiday at Saint Mary's College)
Nov.27-Dec.6	Mon - Wed	Teacher Course Evaluations administered at Notre Dame
Dec. 6	Wednesday	Last class day for Notre Dame
Dec. 7	Thursday	Last class day for Saint Mary's College
Dec. 7-10	Thur - Sun	Reading days for Notre Dame (no examinations)
Dec. 8-10	Fri - Sun	Reading days for Saint Mary's College (no examinations)
Dec. 11-15	Mon - Fri	Final examinations
Dec. 16	Saturday	Undergraduate Halls close at 2:00 p.m.
Dec. 18	Monday	All grades submitted through insideND by 3:45 p.m. at Notre Dame
Dec. 19	Tuesday	All grades due in PRISM by Noon at Saint Mary's College
Jan. 7	Sunday	January Graduation Date (no ceremony)

SPRING 2007 SEMESTER

Jan. 14	Sunday	Undergraduate Halls open for move-in beginning at 9:00 a.m. for Notre Dame
Jan. 15	Monday	Orientation and advising for new students
Jan. 15	Monday	Classes begin at 8:00 a.m. for Saint Mary's College
Jan. 16	Tuesday	Classes begin at 8:00 a.m. for Notre Dame
Jan. 24	Wednesday	Last date for all class changes
Feb. 16	Friday	Last date to drop a class at Saint Mary's College
Feb. 16-18	Fri - Sun	Junior Parents Weekend at Notre Dame
Feb. 28	Wednesday	Deadline for 2007/2008 Financial Aid Applications at Notre Dame (for returning students)
Mar. 1	Thursday	Deadline for 2007/2008 Financial Aid Applications at Saint Mary's College (for returning students)
Mar. 9	Friday	Mid-Semester Deficiency reports submitted through insideND by 3:45 p.m. at Notre Dame
Mar. 10-18	Sat - Sun	Mid-Semester break
Mar. 12	Monday	Mid-Semester Deficiency reports due in PRISM by 8:00 a.m. at Saint Mary's College
Mar. 21	Wednesday	Registration begins for the 2007 Summer Session at Notre Dame
Mar. 23	Friday	Last day for course discontinuance at Notre Dame
Apr. 6-9	Fri - Mon	Easter Holiday
Apr. 16-25	Mon - Wed	Registration for the Fall 2007 Semester at Notre Dame and Saint Mary's College
Apr. 23-May 2	Mon - Wed	Teacher Course Evaluations administered at Notre Dame
May 2	Wednesday	Last class day for Notre Dame
May 3	Thursday	Last class day for Saint Mary's College
May 3-4	Thur - Fri	Residence Hall room inspections at Notre Dame
May 3-6	Thur - Sun	Reading days for Notre Dame (no examinations)
May 4-6	Fri - Sun	Reading days for Saint Mary's College (no examinations)
May 7-11	Mon - Fri	Final examinations
May 12	Saturday	Undergraduate Halls close at 2:00 p.m.
May 14	Monday	All grades submitted through insideND by 3:45 p.m. at Notre Dame
May 15	Tuesday	All grades are due in PRISM by Noon at Saint Mary's College
May 18-20	Fri - Sun	Commencement Weekend

2007 SUMMER SESSION

First Class Day - June 19; Last Class Day - August 2; Final Exams - August 3; Graduation Date (No Ceremony) - August 8

May 1	Thursday	Last class day for Saint Mary's College
May 1-2	Thur - Fri	Residence Hall room inspections at Notre Dame
May 1-4	Thur - Sun	Reading days for Notre Dame (no examinations)
May 2-4	Fri - Sun	Reading days for Saint Mary's College (no examinations)
May 5-9	Mon - Fri	Final examinations
May 10	Saturday	Undergraduate Halls close at 2:00 p.m.
May 12	Monday	All grades submitted through insideND by 3:45 p.m. at Notre Dame
May 13	Tuesday	All grades are due in PRISM by Noon at Saint Mary's College
May 16-18	Fri - Sun	Commencement Weekend

2008 SUMMER SESSION

First Class Day - June 17; Last Class Day - July 31; Final Exams - August 1; Graduation Date (No Ceremony) - August 6

Mission Statement of the University of Notre Dame

CONTEXT

This statement speaks of the University of Notre Dame as a place of teaching and research, of scholarship and publication, of service and community. These components flow from three characteristics of Roman Catholicism which image Jesus Christ, his Gospel, and his Spirit. A sacramental vision encounters God in the whole of creation. In and through the visible world in which we live, we come to know and experience the invisible God. In mediation the Catholic vision perceives God not only present in but also working through persons, events, and material things. There is an intelligibility and a coherence to all reality, discoverable through spirit, mind and imagination. God's grace prompts human activity to assist the world in creating justice grounded in love. God's way to us comes as communion, through the communities in which men and women live. This community includes the many theological traditions, liturgies, and spiritualities that fashion the life of the church. The emphasis on community in Catholicism explains why Notre Dame historically has fostered familial bonds in its institutional life.

A Catholic university draws its basic inspiration from Jesus Christ as the source of wisdom and from the conviction that in him all things can be brought to their completion. As a Catholic university, Notre Dame wishes to contribute to this educational mission.

THE MISSION

The University of Notre Dame is a Catholic academic community of higher learning, animated from its origins by the Congregation of Holy Cross. The University is dedicated to the pursuit and sharing of truth for its own sake. As a Catholic university, one of its distinctive goals is to provide a forum where through free inquiry and open discussion the various lines of Catholic thought may intersect with all the forms of knowledge found in the arts, sciences, professions, and every other area of human scholarship and creativity.

The intellectual interchange essential to a university requires, and is enriched by, the presence and voices of diverse scholars and students. The Catholic identity of the University depends upon, and is nurtured by, the continuing presence of a predominant number of Catholic intellectuals. This ideal has been consistently maintained by the University leadership throughout its history. What the University asks of all its scholars and students, however, is not a particular creedal affiliation but a respect for the objectives of Notre Dame and a willingness to enter into the conversation that gives it life and character. Therefore, the University insists upon academic freedom, which makes open discussion and inquiry possible.

The University prides itself on being an environment of teaching and learning that fosters the development in its students of those disciplined habits of mind, body, and spirit that characterize educated, skilled, and free human beings. In addition, the University seeks to cultivate in its students not only an appreciation for the great achievements of human beings but also a disciplined sensibility to the poverty, injustice, and oppression that burden the lives of so many. The aim is to create a sense of human solidarity and concern for the common good that will bear fruit as learning becomes service to justice.

Notre Dame also has a responsibility to advance knowledge in a search for truth through original inquiry and publication. This responsibility engages the faculty and students in all areas of the University, but particularly in graduate and professional education and research. The University is committed to constructive and critical engagement with the whole of human culture.

The University encourages a way of living consonant with a Christian community and manifest in prayer, liturgy, and service. Residential life endeavors to develop that sense of community and of responsibility that prepares students for subsequent leadership in building a society that is at once more human and more divine.

Notre Dame's character as a Catholic academic community presupposes that no genuine search for the truth in the human or the cosmic order is alien to the life of faith. The University welcomes all areas of scholarly activity as consonant with its mission, subject to appropriate critical refinement. There is, however, a special obligation and opportunity, specifically as a *Catholic* university, to pursue the religious dimensions of all human learning. Only thus can Catholic intellectual life in all disciplines be animated and fostered and a proper community of scholarly religious discourse be established.

In all dimensions of the University, Notre Dame pursues its objectives through the formation of an authentic human community graced by the Spirit of Christ.

The University of Notre Dame

Notre Dame is at once a Catholic university, a national symbol, and an international community of religious faith, intellectual inquiry, and devotion to the powerless. Among its conspicuous features are its academic reputation, an elaborately designed and golden-domed administration building, a famous collegiate football team, a popular shrine to the Mother of God, two fascinating lakes, a pleasantly landscaped campus, and a spirited student body surrounded by an intensely loyal community of alumni and friends who unabashedly refer to themselves as the Notre Dame "family."

The institution was founded on the site of an old Catholic missionary outpost in 1842. The founders were a small and impoverished band of French and Irish religious brothers whose leader was Rev. Edward F. Sorin, CSC, an impetuous, strong-willed, and apparently tireless priest. In a memoir titled *My Notre Dame*, Thomas Stritch, professor emeritus of American Studies and Notre Dame historian, wrote that Father Sorin "carved Notre Dame out of the Northern Indiana wilderness and by sheer strength of character made it go. He built and rebuilt, recruited students where he could, and gradually began the unique image Notre Dame still enjoys. In a college or university, reputation is everything. Somehow Sorin developed a favorable one for Notre Dame, one that reverberated throughout the American Catholic world, the Eastern Seaboard as well as the Midwest. Long before football was invented, Notre Dame caught the imagination of American Catholics."

Father Sorin was a member of the Congregation of Holy Cross, a then recently formed Catholic religious community that would own and administer the University from its foundation until 1967, when the University's governance was legally transferred to a predominantly lay board of trustees. The University's bylaws ensure that the Congregation will continue to exert a prominent influence on its administration. They stipulate, for example, that Notre Dame's presidents must always be chosen from among the priests of the Congregation's Indiana Province. The Congregation also ministers to the University it founded through the many Holy Cross priests serving on the University's faculty, the counselors and chaplains who live with the undergraduate students in the residence halls, and the staff of the campus ministry office.

In 1972, five years after the change in governance, a new chapter of University history began to be written as the first undergraduate women were admitted to Notre Dame. A quarter of a century later, the majority of living Notre Dame alumni have been graduated from a fully coeducational institution.

Obviously, many other aspects of the University have been changed by more than a century and a half of turbulent and unpredictable happenings in

the Catholic Church and in American life and culture. Fires, outbreaks of infectious diseases, the Civil War, waves of European immigrants and refugees, Church controversies, the Great Depression, two world wars and several smaller bloodlettings, the civil rights movement, and other social convulsions in America, all have involved members of the Notre Dame family and have left deep and indelible imprints on the character and rich tradition of the institution. Rev. William Corby, CSC, a successor to Father Sorin, played a memorable national role as a Union chaplain at the Battle of Gettysburg; Rev. Julius Nieuwland, CSC, a scientist and faculty member, invented synthetic rubber; Notre Dame students were participants in a nationally publicized scuffle with a resurgent Ku Klux Klan; the University's colorful football team and something of its campus atmosphere were enshrined in American history and myth by a film featuring a memorable performance by an actor who later became a president. More recently, a second film dramatized the University's spirit and gave a new name to unheralded athletes—*Rudy*.

Most notably, Notre Dame's reputation, so zealously nurtured, sustained, and celebrated by Father Sorin and his successors, has become increasingly international in recent years because of the establishment of numerous academic and community service programs in the Holy Land, Mexico, Chile, Ireland, England, Austria, France, Italy, Spain, Australia, Japan, and other countries.

Despite these remarkable and generally welcome alterations in institutional shape and scope, Notre Dame's proud and self-conscious claim to be a Catholic university and its intent to be a great Catholic university remain unchanged from Father Sorin's day. The University boasts a core curriculum that includes required courses in theology and philosophy. In administrative and disciplinary affairs, Notre Dame holds itself responsible to the teaching of the Catholic Church, and it holds its students, faculty, and staff responsible for their own conduct, particularly in matters affecting the common good. Precisely because it is a Catholic university, it is a place where men and women from all faiths and backgrounds are to be made welcome. The staffs of the residence halls, campus ministry, the Center for Social Concerns, and the Alumni Association all continue to invite and encourage Notre Dame students, graduates, faculty, and administrators to pray together, to discuss and share their hopes, joys and sorrows, to bear with and sustain one another, and always to serve those most in need.

Student Life

First and foremost, Notre Dame offers its students a quality education, made possible by an excellent faculty, advanced research facilities, experienced administration, and a well-developed educational philosophy. But cognizant that values, character, and leadership skill are developed as often in the context of caring relationships as in selected reading from various textbooks, the University offers more to its students—a student life rich in depth and variety, one that is nationally recognized and characteristically deep in its impact on those who share in it. To make our “definition” of the University more complete, we shall briefly describe some of the main aspects of student life. Our first consideration will be the students themselves.

Students. Notre Dame is one of a handful of truly national universities, with students drawn from all 50 states and some 70 countries. One factor all the students have in common, though, is strong academic ability. In addition, an annual survey of freshmen taken by the American Council on Education indicates that Notre Dame students, to a greater degree than their peers nationally, are confident of academic success and see themselves as having originality and leadership potential.

The Campus. One especially appealing aspect of life at Notre Dame is the campus itself. The University's 1,250 acres, with two lakes, extensive wooded areas, and tree-lined quadrangles, contribute to a serene park-like atmosphere that does wonders to alleviate the pressures of academic life.

The collegiate Gothic style of many of the structures, the ornate Main Building (with a golden dome), and the Basilica of the Sacred Heart and the statuary and masonry carvings that abound on campus have always been a source of delight to students and tourists alike.

Residentiality. Over the years no single nonacademic characteristic of Notre Dame has made a greater impression on students than the University's residential tradition. It is a tradition as old as the University itself. Father Sorin established at Notre Dame the sort of residential ambience he had known at French universities. Nineteenth-century students slept, ate, studied, and attended classes en masse in wings of the Main Building. The regimen was strict: a prefect roused students at 6 a.m., supervised their prayer, meals, study, and recreation and returned them to bed 16 hours later.

Times have changed, as well as the discipline, but not the importance of residentiality in student life. According to a committee focusing on University priorities, “Next to its academic mission and Catholic character, residentiality is the least dispensable of Notre Dame's hallmarks.”

Each of Notre Dame's 27 undergraduate residence halls has an atmosphere and character of its own. Each has its traditions and generates a feeling of loyalty and camaraderie among its inhabitants. The

halls are staffed by rectors, assistant rectors, and resident assistants who endeavor to challenge, facilitate, and support students in integrating the meaning and practice of Christianity today through the development of a community that is humanizing, worshiping, and service-oriented. Consequently, the residence halls form the base of many spiritual, athletic, social, and volunteer service activities. Spirited rivalries between residence halls in various sporting and social events are common. Life in the residence halls provides the context for many relationships among students; social fraternities and sororities are thus considered unnecessary.

First-year students are required to live on campus, and the vast majority of upper-class students find it worthwhile to do the same when space is available. Approximately 80 percent of undergraduates live on campus. At the same time, a variety of off-campus housing is available in the South Bend area.

Spiritual Life. Notre Dame stands for the belief that all who teach, work, and study at the University should discover, reinforce, and strengthen their convictions, values, and traditions. A mature religious or spiritual life is integral to full human development. This can be hidden, stifled, or allowed to stagnate; but it can also be challenged and encouraged to grow. In residence hall life and classroom, in liturgy and celebration, in volunteer work and athletic competition, Notre Dame people strive for a wholeness in their lives, even a holiness, as they discover who they are in these multiple arenas.

Notre Dame is a professedly Catholic place, which means—at its core—that all are welcome. Beliefs are strengthened by commitment to God, to one another, and to the human family in love and service, while at Notre Dame and throughout life.

The Office of Campus Ministry provides a series of retreats, catechetical instruction for those who wish to join the Catholic Church or find deeper understanding of religious matters, a program of preparation for marriage, and counseling in matters of personal conscience formation. Mass is celebrated daily in the Basilica of the Sacred Heart and in many of the residence hall chapels. There are frequent prayer services of many forms throughout the year, including ecumenical prayer services sponsored by Campus Ministry. Students who are not Catholic are always welcome at any of the various activities sponsored by Campus Ministry. Congregations of many faiths in South Bend also welcome students in their worship.

Clubs and Organizations. Notre Dame has a wealth of clubs and organizations for interested students. Interests and commitments vary widely and are reflected in the number and scope of groups.

Some clubs have an academic orientation, ranging from campus branches of national organizations, such as the American Institute of Architects, to strictly local clubs, such as the Chemistry and Finance clubs.

Other groups relate to ethnic and special-interest groups. These clubs include the Asian American Association, the Black Cultural Arts Council, the Chinese Students Association, and the Native American Students Association, to name a few.

Students who enjoy music may choose from a wide selection of choirs, bands, and ensembles. Students may audition for the renowned Notre Dame Glee Club, the Notre Dame Liturgical Choir, the Notre Dame Chorale, the Notre Dame Folk Choir, Voices of Faith Gospel Ensemble, or the Notre Dame Women's Choir. The famous Notre Dame Marching Band, the nation's oldest university marching band, is one of many choices available for musicians. Another is the concert band, which travels to a different part of the United States each spring, representing Notre Dame in concert. Other specialty groups include a jazz band and orchestra.

Center for Social Concerns (CSC). The Center for Social Concerns provides a wide variety of service and social action opportunities, programs, seminars, and courses. For more information, see "Center for Social Concerns," later in this section of the *Bulletin*.

Media. Students with interests in journalism usually are attracted to an outlet in the various media on campus.

The Observer, a student newspaper serving the Notre Dame-Saint Mary's College community, is published five times a week, offering a vital line of communication within the University, as well as the chance to keep up with the "outside world."

The *Scholastic* is a news/general information magazine. The *Juggler*, Notre Dame's journal of the arts, is published once a semester and features prose, poetry, photography, and illustrations. The award-winning *Dome*, the University yearbook, appears every April.

There are a number of other student publications with more specialized audiences—for example, *Notre Dame Student Business Review* and *Technical Review*, which appear periodically throughout the year and are student-produced.

WSND/FM and WVFI are the University's student-run broadcast media. WVFI, which broadcasts over the Internet, airs mostly progressive rock and special programs, while WSND has a more classical selection (until late evening, when rock and jazz are featured).

Annual Events. Notre Dame students look forward to participating in several events that occur annually on campus.

Notre Dame's theatre department presents several major productions each year, and tryouts are open to all students. The Notre Dame Student Players present less traditional theatre, providing one drama or musical each semester.

The Sophomore Literary Festival is a celebration of the literary arts. Visiting authors read from their works, expound on personal philosophy and offer

student workshops. Guests in recent years have included Ken Kesey, W.P. Kinsella, Jean and Robert Hollander, and Candace Bushnell.

Students also take advantage of the nearby Lake Michigan beaches and the Michigan ski areas. Trips to Chicago are frequently organized to attend the theatre, museums, shops, or sporting events or just to spend the day sightseeing. The South Bend community offers shopping, parks, sports, movies, and cultural events via the Symphony and Theatre League. The East Race Waterway is an attraction providing kayaking, tubing, and rafting.

Athletics. The name "Notre Dame" no longer brings thoughts of just a football powerhouse, and with good reason. Notre Dame has developed into an outstanding academic institution but at the same time has expanded its athletic excellence beyond the football field.

Intercollegiate

The University is committed to a well-rounded program for both men and women. The Fighting Irish athletic tradition, renowned throughout the United States, encompasses much more than football and basketball. Notre Dame boasts national contenders in many Olympic sports, including women's soccer, baseball, and men's and women's fencing, all of which ranked number one in the country at some point during the past three seasons, and women's basketball, winner of the 2001 national championship.

The women's intercollegiate athletic program, which has grown tremendously over the last 15 years, now includes 13 varsity sports (there are also 13 men's sports). Notre Dame women student-athletes compete in basketball, tennis, fencing, lacrosse, swimming and diving, volleyball, softball, golf, indoor and outdoor track, cross country, soccer, and rowing.

The Notre Dame student body plays an important role in the success of the teams that represent the University. Anyone who has attended a football pep rally or seen a top-ranked basketball team upset in the Joyce Center knows why. The pride and loyalty displayed by "the greatest student body in the world" are a moving force that embodies the spirit of the Notre Dame community. Athletic contests at Notre Dame are an integral part of the social life as well as an opportunity for the athletically gifted to test their skills with the nation's best.

Intramurals, Club Sports, Instruction, Special Events, and Fitness

Housed in Rolfs Sports Recreation Center, the Office of Recreational Sports provides extensive opportunities in these five program areas. Nearly 300 activities are offered throughout the year.

The Intramural programs allow members of the student body to grab a share of the limelight while also promoting rivalries among the residence halls. For others, intramurals are a chance to stay in shape, get away from the books, or enjoy a purely recreational sport.

Club sports are recreational or competitive and are conducted by student officers with the guidance of the RecSports office. These clubs determine for themselves the extent of activity and competition. Currently, 29 club sports are offered.

RecSports' instructional program offers over 20 classes, including a wide array of dance, martial art, sport, and outdoor recreation classes. Campus fun runs, a biathlon, and Late Night Olympics are among the special event offerings. And, drop-in events include ice skating, badminton, volleyball, and indoor soccer.

The Challenge U Fitness Program offers exercise classes; conducts assessments, testing, and consulting; and provides information through demonstrations and lectures. More than 90 classes are offered in a variety of aerobic, toning, and water exercise programs, as well as yoga and tai chi. Students are encouraged to make informed choices about their health and fitness and to utilize the numerous facilities available to them.

Facilities

Notre Dame is home to some of the finest athletic facilities at any university. The 78,000-square-foot Rolfs Sports Recreation Center has a large state-of-the-art fitness room with more than 30 cardiovascular machines and a full complement of strength machines and free weights. The Rolfs also has a three-lane, 1/8 mile track; three courts for basketball, volleyball, and badminton; a rink-style court for soccer and inline hockey; and two activity rooms for dance, aerobics, and martial arts. The Rockne Memorial is legendary for its highly competitive pickup basketball games. The "Rock" contains not only two basketball courts but also has 10 handball/racquetball courts, one combination squash/handball court, a swimming pool with a spectator gallery, a smaller pool for family use, a climbing wall, a weight room, a fitness room, and two rooms for dance and group exercise.

In addition to the nine-hole Notre Dame Golf Course, the 18-hole William K. and Natalie O. Warren Golf Course opened in the spring of 2000 on the northeast edge of campus. Other outside facilities include basketball courts in several locations, 24 outdoor tennis courts, and several multi-purpose playing fields.

Notre Dame's Joyce Center has been called one of the most complete sports complexes in the country. Not only is there an 11,418-seat basketball/volleyball arena but also a field house containing a two-lane track, a 2,667-seat hockey arena, boxing and weight rooms, and five volleyball courts. Elsewhere in the building are an auxiliary gym, two intramural gyms and a gym for fencing, six handball/racquetball courts, and two squash courts. The Rolfs Aquatic Center, with its Olympic-sized swimming pool, completes this complex.

The newest athletic facility, opened in the fall of 2005, is the Guglielmino Athletic Complex, affectionately referred to as "The Gug" (pronounced Goog). The 95,840-square-foot facility houses locker

rooms for both the football student-athletes and coaches' offices, team meeting rooms, a 500-seat auditorium, athletic training, and the new 25,000-square-foot Haggar Fitness Center, used by all of Notre Dame's 26 varsity athletic teams, with the latest in state-of-the-art strength training equipment, a 50-yard track for speed workouts, and a 45-by-18 yard Prestige Turf field for team stretching exercises and workouts.

The Loftus Sports Center houses Meyo Field and the renovated Haggar Fitness Complex. The center, which measures 614 by 210 feet, also contains practice areas for lacrosse and soccer, and rooms for sports classes and conferences. A six-lane indoor track circles Meyo Field, a 120-yard synthetic-turf practice field (new in 2003). Haggar Fitness Complex features 40,000 pounds of weights, used primarily for training of the varsity teams.

The University's Eck Pavilion, a 35,000-square-foot structure, is the place on campus for indoor tennis. Inside are six courts, coaches' offices, showers and lockers, a repair shop, a vending lounge, and an observation deck. The pavilion is used by the varsity men's and women's tennis teams.

Other facilities used by Irish athletic teams include:

- Notre Dame Stadium, with its 80,795 seats, home to Irish football since 1930.
- Alumni Field, with its 2,500 seats, home since 1990 to men's and women's soccer.
- Moose Krause Stadium, with its 5,000 seats, home to men's and women's outdoor track and men's and women's lacrosse.
- Frank Eck Stadium, with its 2,500 seats, home to Irish baseball since 1994.
- Ivy Field, with many recent improvements, home to Notre Dame softball.

Student Government. The unique blend of elements that gives the Notre Dame community its identity has, over a period of years, shaped the character of the student government.

The greatest influence on the student government is the system of residence halls, which not only provides students with a place to live but also serves as the principal center for social interaction on campus. Each hall has its own government, consisting of a hall president, vice president, cabinet, and judicial board, which works in cooperation with the hall staff to develop the best possible environment for its residents. As the basic unit of student government, the halls, and their needs significantly shape the campus-wide student government.

The relatively simple structure of the student government has evolved gradually in response to changing attitudes and needs of the student body. At the head of the student government is its chief executive officer, the student body president. Although the duties of the job have tended to vary with the priorities of each officeholder, in general the student body president represents the interests of the student body in all areas of life at Notre Dame.

The most representative student government groups are the Hall Presidents' Council and the Student Union Senate, both of which meet weekly to discuss the various aspects of residence and University life, and to coordinate activities among the halls and across campus.

The Campus Life Council was created by the University's Board of Trustees to allow for discussion among students, faculty, and administrators concerning life on campus. The council is empowered to pass resolutions recommending student life policy changes to the administration.

The programming arm of the student senate at Notre Dame is the student government board. This board coordinates such events as lectures, plays, concerts, movies, and more. In addition, it coordinates *The Show*, a major back-to-school campus concert, and the Sophomore Literary Festival (which were previously mentioned under "Annual Events"), as well as the Collegiate Jazz Fest, Acoustic Cafe, student bands, and other student performances, professional entertainment, and special events. The Student Union Board also coordinates services such as plant and furniture sales, as well as refrigerator rentals.

Student Conduct. A Catholic university is a society composed of faculty and students whose primary purpose is the pursuit of Christian wisdom. The society can exist only in an atmosphere of responsibility and good order. The University seeks, therefore, to provide those conditions and opportunities best suited for educating the student.

Students registering at the University of Notre Dame agree to abide by the regulations concerning student conduct set forth in *du Lac, A Guide to Student Life*, which is distributed to each student, *du Lac* is also available on the University's website, www.nd.edu.

The University reserves the right to deny the privilege of enrollment to any student whose conduct or attitude is believed to be detrimental to the welfare of the institution.

Saint Mary's College. Because of the proximity and rich tradition common to Notre Dame and Saint Mary's, the two institutions share many activities in the area of academics as well as social events, student organizations, and community service projects. The two institutions maintain a cooperative program permitting a limited number of courses to be taken at the neighboring institution. Because of the extensive cooperation between the two, the campuses are aptly referred to as the "Notre Dame-Saint Mary's community."

The Spirit of Inclusion at Notre Dame

"Strangers and sojourners no longer..." (Ephesians 2:19)

The University of Notre Dame strives for a spirit of inclusion among the members of this community for distinct reasons articulated in our Christian tradition. We prize the uniqueness of all persons as God's creatures. We welcome all people, regardless of color, gender, religion, ethnicity, sexual orientation, social or economic class, and nationality, for example, precisely because of Christ's calling to treat others as we desire to be treated. We value gay and lesbian members of this community as we value all members of this community. We condemn harassment of any kind, and University policies proscribe it. We consciously create an environment of mutual respect, hospitality and warmth in which none are strangers and all may flourish.

One of the essential tests of social justice within any Christian community is its abiding spirit of inclusion. Scriptural accounts of Jesus provide a constant witness of this inclusiveness. Jesus sought out and welcomed all people into the Kingdom of God—the gentle as well as the Jew, women as well as men, the poor as well as the wealthy, the slave as well as the free, the infirm as well as the healthy. The social teachings of the Catholic Church promote a society founded on justice and love, in which all persons possess inherent dignity as children of God. The individual and collective experiences of Christians have also provided strong warrants for the inclusion of all persons of good will in their communal living. Christians have found their life together enriched by the different qualities of their many members, and they have sought to increase this richness by welcoming others who bring additional gifts, talents and backgrounds to the community.

The spirit of inclusion at Notre Dame flows from our character as a community of scholarship, teaching, learning and service founded upon Jesus Christ. As the Word through whom all things were made, Christ is the source of the order of all creation and of the moral law which is written in our hearts. As the incarnate Word, Christ taught the law of love of God and sent the Holy Spirit that we might live lives of love and receive the gift of eternal life. For Notre Dame, Christ is the law by which all other laws are to be judged. As a Catholic institution of higher learning, in the governance of our common life we look to the teaching of Christ, which is proclaimed in Sacred Scripture and tradition, authoritatively interpreted by Church teaching, articulated in normative understandings of the human person, and continually deepened by the wisdom born of inquiry and experience. The rich heritage of the Catholic faith informs and transforms our search for truth and our understanding of contemporary challenges in higher education.

This statement was adopted by the officers of the University on August 27, 1997, in conjunction with an Open Letter to the Notre Dame community.

Academic Profile

DEGREES AND ACADEMIC PROGRAMS

The University is organized into a First Year of Studies, four undergraduate colleges, an architecture school, a graduate school of four divisions, a graduate business school, a law school, and several graduate research study centers.

All incoming freshmen spend their first year in the First Year of Studies and then move into the college or school of their choice as sophomores—College of Arts and Letters, Mendoza College of Business, College of Engineering, College of Science, or School of Architecture.

In the 2005–2006 academic year, students enrolled in the College of Arts and Letters topped the undergraduate enrollment figures with 2,768. There were 1,543 business students, 1,002 science students, 769 in engineering, and 201 in architecture.

The College of Arts and Letters offers curricula leading to the degree of bachelor of fine arts in art studio or design and bachelor of arts majoring in:

- American Studies
- Anthropology
- Art, Art History, and Design
 - Art Studio
 - Art History
 - Design
- Classics
 - Arabic
 - Classics
 - Greek and Roman Civilization
- East Asian Languages and Literatures
 - Chinese
 - Japanese
- Economics
- English
- Film, Television, and Theatre
- German and Russian Languages and Literatures
 - German
 - Russian
- History
- Mathematics (honors only)
- Medieval Studies
- Music
- Philosophy
- Philosophy/Theology (joint major)
- Political Science
- Program of Liberal Studies
- Psychology
- Romance Languages and Literatures
 - French
 - Italian
 - Spanish
- Sociology
- Theology

The Mendoza College of Business offers the degree of bachelor of business administration with majors in:

- Accountancy
- Finance
- Management Consulting
- Management Entrepreneurship
- Management Information Systems
- Marketing

The College of Engineering offers curricula leading to degrees of:

- BS in Aerospace Engineering
- BS in Chemical Engineering
- BS in Civil Engineering
- BS in Computer Engineering
- BS in Computer Science
- BS in Electrical Engineering
- BS in Environmental Geosciences
- BS in Mechanical Engineering

The College of Science offers the degree of bachelor of science majoring in:

- Applied Physics
- Biochemistry
- Biological Sciences
- Chemistry
- Chemistry/Business
- Chemistry/Computing
- Environmental Sciences
- Mathematics
- Physics
- Physics/Computing
- Physics/Education
- Physics in Medicine
- Preprofessional Studies
- Science–Business
- Science–Computing
- Science–Education

The School of Architecture offers the degree of bachelor of architecture (five-year program). Supplementary majors may be taken only in conjunction with a full major. The Arts and Letters supplementary preprofessional studies major provides students with an opportunity to complete a supplementary major in health-related science. Students may take supplementary majors/minors in departments of other colleges, but their dean may specify certain modifications in their curriculum. Undergraduates may obtain bachelor degrees in combination programs with other colleges in integrated five-year programs.

The course and program requirements for degrees are determined by the various colleges and schools.

These colleges are independent of one another and provide academic instruction within the various programs and departments. The dean of each college has authority, along with the college council, to determine minimum admission standards, requirements for a major and a degree from the program, and dismissal from the college and University.

The student who wishes to transfer from one college to another college within the University must have the approval of the deans of both colleges. The accepting dean has discretion about which credits are acceptable toward the degree in the new college.

Dual Degree. Programs leading to dual degrees (two undergraduate degrees, such as a bachelor of arts and a bachelor of business administration, or a bachelor of arts and a bachelor of science in an engineering major) are distinct from programs in which a student receives one degree with two majors (such as a bachelor of business administration with a major in finance and a major in government). Dual degree programs require the permission of the deans of both colleges.

The requirements for a dual degree generally are as follows: The student completes all of the University requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a dual degree in the two colleges. (In the College of Arts and Letters, the requirement includes the College Seminar.) While the total number of hours required does depend on the two major programs, the minimum required total number of degree credits is set to be 30 degree credits beyond the college total for the college with the greater required number of degree credits.

Academic Governance. The major source of academic governance within the University is the Academic Council, made up of administrators, faculty, and students from each of the four colleges and chaired by University President Rev. John I. Jenkins, CSC. All major decisions concerning academic policy and scheduling throughout the University are made by this board.

Along with the Academic Council, each college is served by a college council representing its faculty and students. The purpose of the council is to suggest and plan academic programs and to make decisions regarding academic policy within the college. Each college also has a student advisory council whose function is to elicit student ideas and concerns regarding college policy, to formulate those ideas, and to make suggestions to the college council.

Advising. All first-year students enter the First Year of Studies and are assigned an advisor from its faculty. The First Year of Studies offices are located at 207 Coleman-Morse Center. Once students have chosen an upper-level college, they should contact the Office for Undergraduate Studies of the appropriate college and speak with one of the advisors: **Architecture**—110 Bond Hall; **Arts and Letters**—104 O’Shaughnessy Hall; **Business**—101 Mendoza College of Business; **Engineering**—257 Fitzpatrick Hall; **Science**—174 Hurley Hall. After a major has been declared, students are assigned a departmental advisor as well.

Pre-Law Advising. Students planning to attend law school may consult with the University pre-law advisor, Assistant Dean Ava Preacher, in 104 O’Shaughnessy Hall.

UNIVERSITY REQUIREMENTS

The Summer Session. Summer courses are offered by the regular University faculty to students at all levels—undergraduate, graduate, professional, and special.

In addition to meeting the needs of the academic-year students who are continuing work on their degrees, the summer session also serves teachers, industry personnel, and professional and career groups. These graduate students are provided an opportunity to work on advanced degrees, fulfill certification requirements, improve their professional position, or take enrichment courses. The summer session embraces not only the traditional seven-week period of course work but also a series of one- to two-week minicourses and workshops.

University Requirements

Application must be made to the University registrar for a degree.

The receipt of a baccalaureate degree from the University requires the satisfactory completion of the curriculum. This includes:

University Requirements	Courses
Composition	1
*Mathematics	2
*Science	2
*History	1
*Social Science	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature	1
‡Physical Education	2
	—
	14

* One of these requirements must be University Seminars 13180–13189.

‡ This requirement can also be fulfilled through first-year enrollment in ROTC.

- (a) Only courses marked as “Univ. Req.” in the online Schedule of Classes can be used to fulfill a University requirement. These courses can be viewed for a particular academic term by selecting the “Schedule of Classes” link within insideND or by visiting the home page of the Office of the Registrar and clicking on the “Class Search” link.
- (b) In addition to these university requirements, each college has its own requirements that must be completed. Without prior permission from the appropriate college dean, special studies and directed readings do not satisfy college requirements.
- (c) First-year students are required to complete a University seminar; composition; two semester courses in mathematics; two semester courses in science; one semester course chosen from: history, social science, philosophy, theology, fine arts; and two semester courses in physical education or in ROTC. The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy, theology, mathematics, or science. Foreign language is not a University requirement, but it is required in the programs of the College of Arts and Letters, the College of

Science, and the School of Architecture.

(d) Satisfactory work in a major or a concentration program of study.

(e) A minimum cumulative average of 2.000.

(f) A minimum of 60 credits at the University.

(g) The last year in residence.

Central to undergraduate education at Notre Dame is the core curriculum, a set of University required courses intended to provide every undergraduate with a common foundation in learning. Detailed rationales for each requirement can be found at <http://www.nd.edu/~coreclm>.

Composition. First-Year Composition aims to better prepare students to read and write effectively. Students learn to identify an issue amid different and conflicting points of view in what they read; frame and sustain an argument that not only includes both the analysis and exposition of information, but establishes what is at stake in accepting their views; provide relevant evidence to support a given point of view; identify and analyze potential counterarguments; develop basic skills for writing a research proposal, for conducting original research (i.e., through archival research, surveys, or interviews), and for using the library’s print and electronic information resources; and learn to use and recognize conventions of language in writing academic papers.

University Seminars. The University Seminar is a distinctive opportunity for every first-year student to experience a small, writing-intensive seminar taught by a member of the University’s teaching and research faculty. With a class size of no more than 18, students have the opportunity to regularly engage in class discussions around a particular issue, problem, or topic in a given field of study. Students study the paradigms, content, methodology, or problems of a particular discipline while learning the conventions for academic writing within the parameters or discourse of that field. Each seminar also fulfills one of the University requirements in fine arts, literature, history, social science, philosophy, theology, mathematics, or science.

Mathematics. Students develop quantitative reasoning skills through the disciplined study of mathematics. Solving problems fosters deductive reasoning, while drawing conclusions from mathematical analyses promotes inductive reasoning. Students learn to convey mathematical concepts and relationships through symbols, formulas, and analytical manipulations. By modeling quantitative behavior in business, science, engineering, and the social sciences, students gain a deeper understanding of the vital role that mathematics plays in modern society.

Science. Through the study of science, students learn how knowledge of the natural world is built on observation, experiment, and evidence. They develop a basic understanding of the scientific method, including an appreciation for the interplay between theory and experiment, and how an advance in one drives the other. In addition to acquiring a working knowledge of fundamental concepts and laws in

a particular field of scientific study, students learn to analyze and interpret simple sets of quantitative data and to use mathematical structures to solve problems and create models. Finally, students gain an appreciation of the important interdependence between science, technology, and society.

History. In the study of history, students explore human beings as individuals, groups, nations, or even civilizations in an attempt to comprehend the human experience. Students come to appreciate and understand the processes of continuity and change over time, and they discover how people shaped, altered, or succumbed to their environment or how, in turn, environment channeled historical experience. Thinking critically about the connections between specific events or processes and an array of contingent phenomena, students look for causes and effects, relationships, and relevance.

Social Science. Students discover the diversity of societies and world cultures, the complexity of the choices facing human beings, and the potential social and political consequences of the paths people take. Through lectures, classroom experiences, or local fieldwork, students gain an understanding of the research methods, processes and procedures used to examine human behavior. From the perspective of different social science disciplines, students uncover the competing organizations and institutional opportunities for realizing one’s conceptions of justice and the good life.

Theology. Theology, the “science of God,” represents “faith seeking understanding.” Through the first required course, students arrive at an understanding of a distinctive nature of the discipline of theology; encounter the authoritative texts that serve to constitute the self-understanding of Christian tradition as a response to God’s self-revelation; become aware of the constitution, transmission, and interpretation of these texts within the tradition; and, develop their own skills of textual interpretation in conversation with the tradition. Through the second required course, students are introduced to the riches of the Christian theological tradition; develop their theological skills, facilitating the critical retrieval of the Christian heritage; and, come to appreciate better their rootedness in the ongoing tradition of the believing community.

Philosophy. Students engage in logical reflection on the fundamental problems of human existence and prepare to take their place as citizens capable of critically evaluating arguments which bear on public affairs. In the first course in philosophy, students read philosophical texts and identify the main lines of argument and counter-argument, reason about philosophical questions, and defend their own philosophical positions. In the second course in philosophy, students explore a subset of philosophical questions or authors of special interest to them. By studying seminal philosophical texts like those that have contributed to the Catholic tradition and those that have presented challenges to it, students learn to think in depth about the problems posed by a life of faith.

UNIVERSITY REQUIREMENTS

Fine Arts. Students approach works of art from critical perspectives—as viewers or listeners they apply the analytical tools needed to realize the insights and pleasures that artistic texts and works offer. Students may also create their own works of art, and in so doing gain insights as to how artists interact with their media and how creativity meshes with understanding. Through study of the fine arts, students gain an appreciation of the arts as a component of lifelong learning, and they learn how the arts speak of their societies and how societies speak through their arts.

Literature. Students gain an appreciation of the literariness of the texts they read by recognizing the formal, stylistic, and rhetorical practices, as well as the inter-relations among these. By identifying connotations and denotations, figures of speech and thought, and conventions of genre, students comprehend the way in which a given literary text is embedded in a particular social, cultural, literary, or intellectual context. They analyze the claims of competing interpretations of a literary text, especially with reference to the historical position or theoretical allegiances of the interpreter. Students think more critically about themselves and about their own place in culture or society.

Physical Education. Students will develop an appreciation of a physically active lifestyle and acquire the skills associated with particular physical activities that can be used throughout one's lifetime. Students will also learn about healthy responses to many of the major issues facing college-aged students; e.g., nutrition, exercise, stress, rest, healthy relationships, diversity, alcohol, drugs, test preparation, time management, and conflict management.

Graduation Rate

Of the students entering a full-time, first-year, bachelor degree-seeking program in the fall of 1999, 95 percent graduated within six years.

The complete IPEDS Graduation Rate Survey may be found in the Office of Institutional Research.

Grading System

Letter Grade	Point Value	Legend
A	4.000	
A-	3.667	
B+	3.333	
B	3.000	
B-	2.667	
C+	2.333	
C	2.000	Lowest passing grade for graduate students.
C-	1.667	Zero point value for graduate students.
D	1.000	Lowest passing grade for undergraduate students; zero point value for graduate students.
F	0	Failure.

X	0	Given with the approval of the student's dean in extenuating circumstances beyond the control of the student. It reverts to "F" if not changed within 30 days after the beginning of the next semester in which the student is enrolled.
P		Pass in a course taken on a Pass-Fail basis. Each junior or senior undergraduate may file with the registrar during the first seven class days of the semester the decision to take one elective course, outside the student's major department and not required by the student's program, per semester on a Pass-Fail basis. Such a filing is irrevocable and will result in conversion by the registrar of the instructor's final grade report into an entry of P ("pass") or F ("fail") on the student's record. The instructor will not be informed that the student has elected the pass-fail grading option. The registrar will interpret the final grades of "A" through "D" as "pass," which is not computed into the grade point average. If a final grade of "F" is issued, it will be computed into the student's grade point average.

Grades assigned by the registrar, i.e., not to be given by the faculty:

Letter Grade

W	Discontinued with permission. To secure a "W" the student must have the authorization of the dean.
NR	Not reported. Final grade(s) not reported by the instructor because of extenuating circumstances.
F*	No final grade reported for an individual student.

Grades that may be given but are not included in the computation of the average are as follows:

Letter Grade

S	Satisfactory work (courses without semester credit hours, as well as research courses, departmental seminars or colloquia or directed studies, workshops; field education and skill courses).
---	---

U	Unsatisfactory work (courses without semester credit hours, as well as research courses, departmental seminars or colloquia or directed studies; workshops; field education and skill courses).
V	Auditor (graduate students only).

If, with the approval of the student's dean, an "X" grade is given in the student's graduating semester, it will revert to "F" if not changed within 30 days from the date of graduation.

If a student receives a grade of "I" in the graduating semester, it will revert to "F" if not changed within 30 days from the date of graduation.

Honors at Graduation. In the undergraduate colleges, a degree will be granted with highest honors (*summa cum laude*) the student's grade point average ranks among the top 5.000 percent of those students graduating from the student's college or school; for a student whose grade-point-average ranks among the top 15.000 percent of the student's college or school, a degree will be granted with high honors (*magna cum laude*); for a student whose grade-point average ranks among the top 30.000 percent of the student's college or school, a degree will be granted with honors (*cum laude*). A student who meets the requirements of more than one category of honors will be awarded only the highest honor for which that student qualifies.

For undergraduate students who began before fall 2001, the following Latin honors apply: In the undergraduate colleges, degrees will be granted with honors (*cum laude*) if the student has a 3.400 cumulative average; a 3.600 cumulative average is required for graduation with high honors (*magna cum laude*); and a 3.800 cumulative average is required for graduation with highest honors (*summa cum laude*).

Accreditation and Academic Association. The University of Notre Dame is a member of the North Central Association of Colleges and Secondary Schools, the National Catholic Education Association, the Association of American Colleges, the American Council on Education, the National Commission on Accrediting (not an accrediting agency), the Council of Graduate Schools in the United States, and the Midwest Conference on Graduate Study and Research, and it is fully accredited by the Indiana State Board of Education. The University is also a member of the Indiana Conference of Higher Education, the International Association of Universities, the *Catholicarum Universitatum Foederatio* (Federation of Catholic Universities) and the Institute of International Education.

Academic Code of Honor

The University of Notre Dame is a scholarly community in which faculty and students share knowledge, ideas, and creative works. Notre Dame's Academic Code of Honor expresses our common commitment and moral responsibility to represent accurately and to credit the contributions of every individual.

The *Student Guide to the Academic Code of Honor* (<http://www.nd.edu/~hnr/code>) describes the standards of personal academic conduct that all Notre Dame undergraduates pledge to follow and also outlines the set of procedures by which violations of the Honor Code are reported and adjudicated.

Before matriculation, each entering student must pledge:

As a Member of the Notre Dame community, I will not participate in or tolerate academic dishonesty.

Notre Dame NetID Student Policy

The University of Notre Dame NetID accounts and related services are intended for faculty, staff, and currently enrolled students. "A student must register and enroll at the dates and times announced by the registrar." (Academic Code 4.1) A student who fails to enroll by the announced date will forfeit his or her right to access his or her NetID account and related services. University computing resources supplied by way of the NetID are normally available to a student for up to 60 days after his or her graduation date. A student granted a leave of absence would normally retain access to University computing services for up to two semesters. A student who is separated from the University due to an academic suspension, academic dismissal, or withdrawal will no longer have access to University computing services, unless an extension has been approved by the dean of his or her college. A student attending Notre Dame for the summer only, with a non-degree seeking status will normally retain access to University computing service for up to 60 days after the August graduation date. A student who is separated from the University for other reasons will no longer have access to University computing services.

Academic Regulations

Embodied within the Academic Code are policies and regulations governing the student attainment of academic credit and degrees from the University of Notre Dame. Such regulations have been enacted by the Academic Council of the University, which retains the authority and responsibility for the review and amendment of the Academic Code. The administration and interpretation of academic regulations rest with the academic officers of the University, namely, the provost, the deans, and the University registrar. The responsibility to abide by the Academic

	<i>NetID Deactivation</i>
January Graduates	60 days after January Graduation Date
May Graduates	60 days after May Graduation Date
Saint Mary's Students	60 days after Graduation Date (Consult Saint Mary's Registrar)
Holy Cross Students	60 days after Graduation Date (Consult Holy Cross Registrar)
August Graduates	60 days after August Graduation Date
Summer Non Degree	60 days after August Graduation Date
Authorized leaves	Extension of NetID for up to 2 semesters
Academic Suspension/ Dismissal	Upon Suspension (Unless an extension has been approved by the University)
Withdrawals	Upon Withdrawal (Unless an extension has been approved by the University)
Disciplinary Suspension	Upon Suspension
Disciplinary Dismissal	Upon Dismissal

Code resides with the students, faculty, and administration. The complete Academic Code is published in *du Lac*, the University's guide to student life, as well as the *Faculty Handbook*.

Academic Resources

Faculty. In 2005–06, Notre Dame's regular teaching and research faculty numbered 877 full-time and 396 part-time. Other faculty, such as administrators, professional specialists, librarians, and research fellows numbered 286 full-time and 85 part-time. Ninety-two percent of the full-time instructional faculty have terminal degrees, 85 percent of them have doctorates. Ninety-six percent of the full-time instructional faculty are lay persons.

University Libraries. The University library system consists of 11 libraries, which house most of the books, journals, manuscripts, and other non-book library materials available on the campus. Currently, the collections contain nearly 3 million volumes, more than 3 million microform units, more than 5,700 electronic titles, and more than 24,400 audiovisual items to support the teaching and research programs. In the past year, the libraries added more than 48,140 volumes and received about 10,087 serial titles.

The Theodore M. Hesburgh Library, a 14-story structure, serves as the main library, and its collections are of primary interest to the students and faculty of the College of Arts and Letters and the College of Business Administration. The tower also contains the University Archives; the Medieval Institute Library, with the Frank M. Folsom Ambrosiana Microfilm and Photographic Collection, and the Anastos Byzantine Collection; the Mark K. Davis Drawings Collection; and the Jacques Maritain Center.

The University, along with more than 162 academic and research libraries, maintains a membership in the Center for Research Libraries, which has access to more than 4 million volumes of materials and more than 1.5 million microfilms important for research. The University Library was elected to the Association of Research Libraries in 1962.

The Business Information Center, located in the Mendoza College of Business, is an innovative, all-electronic facility supporting existing and emerging programs and research. There are currently 50 electronic databases and about 335 books and audiovisual items. This state-of-the-art facility is equipped with 32 individual workstations and two group-learning areas providing handicapped access fully equipped for instructional support, and it provides access to and instruction and assistance in the use of a broad range of bibliographic, numerical, full-text, and graphic databases in business and related disciplines.

The Kellogg/Kroc Information Center, located in Room 318 of the Hesburgh Center for International Studies, supports work in international studies.

The Art Slide Library, located in 110 O'Shaughnessy Hall, became a branch library in July 2002. Created to support the Art, Art History, and Design Department, the Art Slide Library provides photographic images for teaching, research, student slide presentations, and historical documentation. The slide collection consists of approximately 230,000 slides available to all University faculty, students, and visiting patrons. Websites have been created to support the art history courses. An in-house database facilitates access to the collection for teaching and research purposes.

The remaining seven libraries were established to meet the teaching and research needs of the College of Engineering, the College of Architecture, the

College of Science, and the Law School. These libraries generally contain the more recent literature, and the Hesburgh Library retains the older materials.

The Engineering Library, located on the first floor of Fitzpatrick Hall of Engineering, has a collection of 53,346 volumes and receives more than 153 paper journals and about 1,231 e-journals related to engineering. The facility provides database searches as well as bibliographic instruction.

The Architecture Library has a collection of more than 29,809 volumes and more than 99 currently received paper journals and 17 e-journals pertaining to various aspects of architecture.

The Chemistry/Physics Library, located in Room 231 of the Nieuwland Science Hall, maintains a collection of some 28,767 volumes and currently receives about 122 paper journals and 540 e-journals in all fields of chemistry and physics. It can provide database searches and bibliographic instruction.

The Life Sciences Library, located on the first floor of the Paul V. Galvin Life Sciences Center, houses an estimated 24,324 volumes and receives approximately 252 print journals and 873 e-journals in the fields of biology, life sciences, and medicine. It offers database searching and bibliographic instruction.

The Mathematics Library, located in the lower level of the Hayes-Healy Center, has a collection estimated at 50,853 volumes and subscribes to about 140 paper and 296 e-journals dealing with all areas of pure and applied mathematics.

The Radiation Chemistry Data Center, located in Room 105 of the Radiation Research Building, has a collection of 4,820 volumes and receives nine journals and 24 e-journals in radiation chemistry. It serves many of the information service needs of the radiation chemical community throughout the United States and abroad.

The Kresge Law Library, although located in and administered by the Law School, is available for use by all students, faculty, and staff. It has a collection of more than 634,000 books and microform equivalents of law and law-related material and subscribes to more than 6,835 serial publications.

Institutes, Centers, and Laboratories. The many and diverse institutes, centers, and laboratories maintained by the University are an indication of the spectrum of scholarly interest that students are able to join in and profit from.

Institutes, centers, and specialized research laboratories at Notre Dame include the Helen Kellogg Institute for International Studies, the Joan B. Kroc Institute for International Peace Studies, the Keough Institute of Irish Studies, the Erasmus Institute, the Nanovic Institute for European Studies, the Institute for Latino Studies, the Medieval Institute, and the Radiation Laboratory. Other institutes, centers, and similar entities are the Center for Environmental Science and Technology (CEST); the Center for Advanced Scientific Computing; the

Center for Astrophysics at Notre Dame University (CANDU); the Center for Applied Mathematics; the Center for Molecularly Engineered Materials; the Center for Civil and Human Rights; the Center for Continuing Education; the Center for Philosophy of Religion; the Center for Research in Business, embracing the Center for Business Communication, the Center for Ethics and Religious Values in Business, and the Center for Research in Banking; the Center for Social Concerns; the Center for the Study of Contemporary Society, which embraces the Gerontological Research Center, the Laboratory for Social Research, the Multinational Management Program, and the Philosophic Institute; the Charles and Margaret Hall Cushwa Center for the Study of American Catholicism; the Ecumenical Institute (Jerusalem); the Energy Analysis and Diagnostics Center; the Center for Nano Science and Technology; the Environmental Research Center (UNDERC); the W.M. Keck Center for Transgene Research; the Walther Cancer Research Center; the Institute for Church Life, which embraces the Center for Pastoral Liturgy and Retreats International; the Institute for Scholarship in the Liberal Arts; the Jacques Maritain Center; the Reilly Center for Science, Technology and Values; the Urban Institute for Community and Educational Initiatives; the Thomas J. White Center for Law and Government; and the William and Katherine Devers Program in Dante Studies.

Other laboratories include the Hessert Center for Aerospace Research, the Air and Water Quality Analysis Laboratory, the Aquatic Biology Laboratory, the Biofluid Mechanics Laboratory, the Catalysis Laboratory, the Fluid Dynamics Laboratory, the Bernard J. Hank Family Environmental Research Laboratory, the LOBUND Laboratory, the Parasitology Laboratory, the Solid State Material and Devices Laboratory, the Vector Biology Laboratory, and the Zebrafish Research Facility. These research centers contain specialized facilities and equipment.

Research. The University receives approximately \$80.8 million in sponsored research and sponsored program funds annually. Active programs of scholarly work occur in discipline-oriented departments in the humanities, fine arts, science, social science, engineering, law, and business areas of the University. In addition, University institutes and centers facilitate research across departmental lines.

The Graduate School's Office of Research is responsible for assisting faculty in various aspects of sponsored program activity and technology transfer. It reviews and transmits all formal proposals, monitors the status of proposals, negotiates contracts and grants, accepts awards for the University on behalf of faculty members, and is responsible for the administrative management of all grants, contracts, and cooperative agreements supporting research, training, service, and equipment. The Office of Research also provides guidance in seeking external sponsored program support, assistance in proposal and budget preparation, and support in all areas of electronic research administration and technology transfer.

The Office of Research Home Page is designed to assist faculty from all academic units in the identification of funding sources. Current issues related to sponsored program activity as well as proposal preparation are also highlighted.

Inquiries regarding this information should be addressed to the Graduate School, Office of Research, 511 Main Building; www.nd.edu/~research.

Snite Museum of Art. The museum features collections that place it among the finest university art museums in the nation.

The Mesoamerican collection highlight is the comprehensive, exceptional holdings of Olmec works, the earliest Mexican collection.

The Kress Study Collection has been the foundation for developing Italian Renaissance art, which includes a rare Ghirlandaio altarpiece panel. The Baroque collection highlights works by Bloemaert, Coypel, and van Ruisdael. Selections from the Feddersen Collection of 70 notable Rembrandt van Rijn etchings are exhibited frequently; and the 18th-century collection includes such masters as Boucher, Vigee-Lebrun, Reynolds, Conca, and de Mura.

The critically acclaimed John D. Reilly Collection of Old Master to 19th-Century Drawings includes examples by Tintoretto, Tiepolo, Oudry, Fragonard, Ingres, Gericault, Millet, and Degas. The Noah and Muriel Butkin Collection of 19th-Century French Art is the foundation of one of the museum's major strengths, featuring paintings and drawings by Corot, Boudin, Couture, Courbet, and Gerome.

The Decorative and Design Arts Gallery spans the 18th through 20th centuries and exhibits early porcelains from Sevres and Meissen. Exceptional ceramics, furniture, glass, and silver pieces represent both the Arts and Crafts and Art Nouveau styles of the 19th century in addition to the Art Deco and Bauhaus modern movements. Twentieth-century-designed pieces by Wright, Stickley, and Hoffman are also on view.

The Janos Scholz Collection of 19th-Century European Photography contains some 5,500 images of persons and places taken during the first 40 years of camera use.

Native American art focuses on early 19th-century, Plains Indian-painted war records and costumes; it also features Mimbres- and Anasazi-painted ceramics from the prehistoric Southwest.

The developing American collection has 19th-century landscapes by Durand and Inness and portraits by Eakins, Sargent, and Chase. Among highlights of the West and the Southwest regions are paintings by Higgings, Ufer, Russell, and Remington.

Traditional works of African art such as textiles, masks, and sculptures are in the collection as well.

ADMISSION

Twentieth-century styles and movements are seen in paintings by Miro, O’Keeffe, Avery, Glackens, Pearlstein, and Scully. Modern sculptures by Barlach, Zorach, Cornell, Calder, and Rickey complement the paintings and drawings.

Croatian-American sculptor Ivan Mestrovic, who taught at Notre Dame from 1955 until his death in 1962, created many works that remain on campus. Major pieces can be seen in the museum, at the Eck Visitors’ Center, and at the Basilica of the Sacred Heart.

Loan exhibitions from major museums and private collections mounted by the Snite are offered periodically in the O’Shaughnessy Galleries, as is the annual exhibition of student art by candidates for MFA and BFA degrees. Special events and programs include lectures, recitals, films, and symposia held in the 304-seat Annenberg Auditorium and in the galleries.

Admission

This year we expect more than 12,000 students will apply for admission to Notre Dame’s entering class. Most of the applicants will have the academic aptitude and preparation necessary to complete a degree program at the University. The Committee on Admissions will decide which applicants will be among the 1,985 included in the class. To understand how this is done, it is first necessary to know the procedure for applying to Notre Dame.

ACADEMIC PREPARATION

Most applicants will have taken and successfully completed the most challenging program of studies available in their high schools. We strongly recommend a curriculum including four years each of English, mathematics, science, history, and foreign language.

All successful applicants are admitted to the First Year of Studies. However, entrance requirements differ slightly for students planning to pursue studies in science and engineering. Sixteen units are required of all students as described below.

For students intending to choose a major in the College of Arts and Letters or the Mendoza College of Business, *excluding* the arts and letters premedical/pre dental program and the combined arts-engineering program, the 16 units must be distributed as follows:

English	4
Algebra, advanced algebra, trigonometry, and geometry	3
Foreign language	2
History	2
Science	2
Additional English, mathematics, science, history, social studies, and language courses	3

For students intending to major in the College of Science, the College of Engineering, the School of

Architecture, the arts and letters premedical/pre dental program or the combined arts-engineering program, the distribution must be:

English	4
Algebra, advanced algebra, trigonometry, and geometry	3
Advanced mathematics (calculus or precalculus)	1
Foreign language	2
History	2
Chemistry	1
Physics	1
Additional English, mathematics, science, history, social studies, and language courses	2

The unit is the credit for a year of satisfactory work in an accredited secondary school. The two language units required must be in the same language. In some cases, the Committee on Admissions waives the foreign-language requirement.

APPLICATION PROCESS

First-year students are admitted to the University of Notre Dame for *only the fall semester* of each academic year. A student who wishes to be considered must have the following items on file: (1) a completed application, (2) an official high school transcript, (3) a letter of evaluation from a secondary school teacher and (4) an official report of scores on the Scholastic Assessment Test (SAT I) by the College Board or the Assessment by American College Testing (ACT).

Application. New application forms are available in August of each year. After receiving your application, you should follow the instructions carefully because the application is your opportunity to tell us about yourself. Include any information about your personal and academic circumstances that will help us evaluate your application.

Students may apply online via our website: admissions.nd.edu.

High School Transcript. Your high school must submit an official copy of your transcript, including a listing of your senior-year courses.

Teacher’s Evaluation. Only one evaluation will be required in your application file. The form for this evaluation is included in the application packet. The teacher who knows you best, both as a student and as a person, should complete the evaluation. Please do not request letters from people who have not been involved in your educational development.

Testing. All applicants are required to take the SAT I or ACT. The test results are part of the evaluation process for admission. You must take one of these tests no later than January of your senior year.

The College Board code for the University of Notre Dame is 1841, and the ACT code for Notre Dame is 1252.

If you have taken other standardized tests (SAT II, AP, IB, TOEFL), please include the results with your application. We will use these scores as supplementary information, although they cannot be used in place of the SAT I or ACT.

Anyone who wishes to continue the study of French, German, or Spanish at Notre Dame should take the SAT II subject test in that language. The results will be used for placement purposes.

Students enrolled in home-school programs or in high school programs that substitute certification of competencies for grades must take three SAT II tests: science, history, and foreign language.

DECISION AND NOTIFICATION PLANS

Students seeking admission to Notre Dame’s entering class must choose to have their applications reviewed under one of two procedures.

1. **Early Action**—If you are an outstanding student with strong junior-year SAT I or ACT scores, you should consider applying for Early Action admission. You must apply by November 1 and have all supporting documents in the Office of Admissions by that date. Early Action applicants will receive a decision letter before Christmas. If admitted under Notre Dame’s Early Action procedures, you are not required to withdraw your other college applications and have until May 1 to confirm your enrollment at Notre Dame. You will receive financial aid consideration under the same procedures as Regular Action applicants. The Committee on Admissions will defer decisions on some Early Action applicants until we can compare their credentials with those of the Regular Action applicants. We will mail a decision to the deferred applicants by early April. If you are denied admission under Early Action, that decision is final, and you *may not reapply* in Regular Action.

2. **Regular Action**—Most applicants choose this plan, which requires that you apply by December 31 and have all supporting documents in the Office of Admissions by that date. We will mail decision letters by early April.

Early Action:

Apply by November 1
Decision before Christmas
Confirm enrollment at Notre Dame by May 1

Regular Action:

Apply by December 31
Decision by early April
Confirm enrollment at Notre Dame by May 1

Deposits. If admitted, you must confirm your intention to enroll by submitting a \$500 advance payment by May 1. This enrollment deposit is not refundable.

Waiting List. Some applicants will be notified that they have been placed on a waiting list and will receive a final decision during the period of mid-May to mid-June. If placed on the waiting list, you should make plans to attend another institution because we

cannot predict how many applicants will gain admission from the waiting list in a given year. Students admitted from the waiting list have two weeks to submit a \$500 advance payment, confirming their intention to enroll in the first-year class.

The Campus Visit. We welcome visits from prospective applicants. Our staff members meet with groups of students and parents to discuss admissions policies and procedures, the First Year of Studies program, degree programs, student life, financial aid, and other topics of interest.

Appointments for weekday sessions are available from March through mid-December. Appointments for Saturday morning sessions are available from early September to early May. You should call our office for an appointment at least two weeks in advance of your visit. Campus tours are available when classes are in session and on most weekdays of the summer. If you would like a guided tour, please request tour information when you call for an appointment.

The Office of Admissions is closed on certain holidays and holiday weekends. Be sure to call us for an appointment before you confirm any travel plans. Our telephone number is 574-631-7505.

THE SELECTION PROCESS

Notre Dame seeks to enroll intelligent, inquisitive, energetic, and compassionate students who will bring a diversity of talents and backgrounds to our campus. In selecting the class, the Committee on Admissions evaluates thoroughly each applicant's personal and academic credentials.

Academic Achievement. In evaluating a student's academic achievement, the Committee on Admissions considers a student's curriculum, class rank, concentration of talent in the high school, test scores, teacher evaluation, and personal statement. Most students admitted to Notre Dame have taken the most demanding courses available, rank among the top students in their schools, and have done quite well on standardized tests. We could cite the average rank and median test results of our admitted students, but a listing of such numbers is often misinterpreted. Each year, some applicants with high test scores and class rank are not admitted while some students with less impressive numbers are selected for admission based on their other outstanding academic and personal accomplishments.

Personal Qualities. The lifeblood of Notre Dame resides in its people: faculty, staff, and students. Each potential student's application is studied to determine what talents, skills, and interests that person might offer Notre Dame's community. We have a strong interest in people who can make unique contributions and will share their talents with us—talents as musicians, writers, technicians, tutors, athletes, artists, volunteer workers, actors, organizers, thinkers, conversationalists, poets, jugglers, or dancers. There is need in each freshman class for a variety of talents and personalities. The listing of activities, written statements, and evaluations gives us a view

of the person represented by the application. It is important to present talents and intellectual interests on the application form.

The Notre Dame Scholar. Each year the Committee on Admissions designates a select number of the admitted students as Notre Dame Scholars. This recognition is based upon their outstanding academic and extracurricular accomplishments throughout their high school careers. These students appear to exhibit the greatest potential for academic and social contributions within the Notre Dame community and are generally the strongest prospects from an applicant pool of more than 12,000 individuals.

All admitted applicants are considered for the Notre Dame Scholar distinction. Notre Dame Scholars will be notified of the designation in their letter of admission.

A monetary award accompanies this distinction if the student has demonstrated substantial financial need as determined by a careful review of the Financial Aid Profile of the College Scholarship Service and the FAFSA.

During the academic year the Office of Admissions enlists many of the scholars to serve as hospitality hosts to prospective students. Through this program, applicants may tour the campus and spend a night in a residence hall.

STUDENTS WITH DISABILITIES

Each year Notre Dame admits a number of academically talented students with various disabilities. Once enrolled here, students with disabilities may use a variety of services intended to reduce the effects that a disability may have on their educational experience. Services do not lower course standards or alter essential degree requirements but instead give students an equal opportunity to demonstrate their academic abilities. Students can initiate a request for services by registering with the Office for Students with Disabilities (OSD) and providing information that documents his or her disability. Individual assistance is provided in selecting the services that will provide access to academic programs and facilities of the University.

OSD provides services to students with mobility, hearing, or visual impairments, as well as students with learning disabilities. The services that are typically used include alternative formats of textbooks, modifications in the way students take exams, and readers, note takers, and academic aides. The University maintains accessible rooms in nine residence halls for students with physical disabilities.

All Notre Dame students must supply the necessary initiative and determination to discover and utilize the available campus resources. Students with disabilities will find that a truly creative ability to solve daily problems may be as important to success as developing alternative skills through academic experience. We invite admitted applicants to visit Notre

Dame and become familiar with the facilities here before making a final college choice.

For more information, contact the Office for Students with Disabilities at 574-631-7157 or 574-631-7173 (TTY).

INTERNATIONAL STUDENTS

Notre Dame welcomes students from around the world. International students enhance the cultural and intellectual atmosphere of our community.

The admissions process for international students who are not Permanent Residents of the United States differs slightly from the process for US citizens. To complete an application, an international student must submit a *Certification of Finances*. This document is provided with the application and is on our website: admissions.nd.edu/international/index.cfm. Additionally, as English proficiency is critical to a student's academic success at the University, students who do not speak fluent English must take the Test of English as a Foreign Language (TOEFL). The Scholastic Aptitude Test (SAT I) or the American College Test (ACT) is also required for admission. Students who have difficulty locating a test center that administers the SAT or ACT should contact the American Embassy or an American school in their area.

International students wishing to apply for our limited need-based financial assistance must complete both the *Certification of Finances* and a *CSS Foreign Student Aid Application*. Based upon a review of academic credentials, financial need, and availability of scholarship resources, a student may be considered for financial assistance. Financial aid packages may include student loans, student employment, and University scholarship assistance.

To avoid potential problems with international mail, we urge students living outside the United States to apply online via our website, admissions.nd.edu, and to submit all other application materials by courier service.

TRANSFER ADMISSION

Some students are admitted to Notre Dame with advanced standing. If you wish to apply for admission as a transfer student, you must have obtained the equivalent of at least 27 semester hours of transferable credit, and maintained a cumulative "B" average in all courses. (The competition is such that the average GPA for admitted students is significantly higher.) The committee gives strong preference to applicants who have completed Notre Dame's first-year course requirements. Correspondence courses, USAFI courses, and credits earned through the College Level Examination Program (CLEP) are not acceptable.

To be eligible for an undergraduate degree, you must complete at least 60 credits at Notre Dame, including the senior year. Thus, if you are beyond sophomore level at another college and not in a special

program, it is unlikely that you will gain admission as a transfer student.

As a transfer applicant you must provide the Office of Admissions with (1) a completed application form, (2) an official transcript from each college attended along with course descriptions, (3) a final high school transcript, and (4) an official SAT I or ACT score.

If you are interested in transferring to Notre Dame, please note that we cannot guarantee on-campus housing to transfer students. Off-campus housing close to the University is available; students are offered campus accommodations from a waiting list if rooms become available.

You must submit your transfer application for the fall semester by April 15. The Transfer Admissions Committee will notify you of its decision between June 1 and July 1.

The deadline for the spring semester is November 1. The committee will notify you of its decision between December 1 and January 5.

Please contact us to request the appropriate application form if you are interested in applying for transfer admission. Write to:

Office of Undergraduate Admissions
Attention: Transfer Admissions Committee
University of Notre Dame
Notre Dame, IN 46556-5602

Students may apply online via our website: admissions.nd.edu.

Fees and Expenses

In the undergraduate colleges, the University is essentially a residence school for full-time students. As many students as accommodations will allow are housed in the campus residence halls. First-year students are obliged to live on campus. Permission to live off campus must be obtained from the dean of students. The fees listed below are for the academic year 2006–07 and are subject to change according to factors operating within the economy that affect universities as well as the country as a whole.

Campus Resident Student. The basic fee for the academic year 2006–2007 ranges from \$20,815 to \$20,915 per semester. This fee entitles the student to instruction and tuition for the semester; meals in the University dining halls; a room in a residence hall*; the use of the general library and the departmental libraries; admission to many lectures, concerts, and entertainments in Washington Hall; the use of the Rockne Memorial, the Joyce Center, the Rolfs Sports Recreation Center, the athletic fields, and the University golf course (there is a nominal fee for the use of the golf course and for the ice rink in the Joyce Center); a copy of each issue of the *Scholastic* (the news magazine of the University) and a copy of the *Dome* (the yearbook of the University) in the second semester (for seniors who have left at the end

of the first semester, there will be a charge of \$5 to cover the cost of mailing the *Dome*).

**Rooms are available in 27 residence halls. A security deposit of \$50 is required as a room reservation guarantee and for any damages that may be caused by the campus resident student. This deposit is refundable upon graduation or departure from the University after review and approval by the Office of Student Accounts.*

Off-Campus Student. The tuition fee for the full-time off-campus student is \$16,450 per semester for the academic year 2006–2007, which entitles the student to instruction for the semester and those things listed above under the total fee for the campus resident student. For the off-campus student requiring board and lodging at the University Health Services in time of illness, there is a daily charge .

Part-Time Undergraduate Student. An undergraduate degree-seeking student **must be in full-time status each semester.** Any undergraduate student who is enrolled in at least 12 credit hours is considered **full-time.** A student who believes that special circumstances may require him or her to carry fewer than 12 semester hours in any semester (including a senior in his or her last semester) must seek approval to be part-time from his or her respective college. This request and conversion, if approved, must be made before the seventh class day of a fall or spring semester. If permission is granted, the dean will notify the Office of Student Accounts of the change of status and an adjustment to tuition will be made if necessary. There will be no adjustment of tuition unless permission is given by the dean and the class schedule is changed before the seventh class day of the fall or spring semester.

Undergraduate Fees.

- Technology Fee: \$125 per semester.
- Health Center Access Fee: \$75 per semester.
- Student Activity Fee: \$47.50 per semester.
- Observer Fee (daily student newspaper): \$6 per semester.

The above fees do not cover the cost of textbooks, stationery, etc., which is estimated at \$850 per year for the average undergraduate student.

The technology fee provides partial funding for the University's enterprise-wide technology infrastructure, which provides all students access to the Internet, e-mail, courseware, campus clusters, ResNet, and a wide array of the latest software. This fee provides for the growth in student services, such as course and degree requirements, Web Registration, and value-added Internet related capabilities.

The health center access fee provides students access to all services at the University Health Center and University Counseling Center, including 24-hour medical care and counseling/mental health assistance, alcohol and drug education programs, and health-education and wellness programs. This fee provides partial funding to address increasing student health and wellness needs, along with funding to maintain health facilities.

Group Sickness or Accident Insurance. To assist in financing any medical or hospital bills, a group insurance plan is available to students. Notre Dame requires all international students to have health insurance coverage.

At the beginning of the academic year, the opportunity is provided to show proof of personal health insurance coverage. In the event such proof is not presented, the student will be automatically enrolled in the University-sponsored plan and the charge for the premium will be placed on the student's account. The last date an international student may be waived from the University Student Insurance Plan is September 15, 2006.

Information regarding the University-sponsored plan is mailed to the student's home address in July. Additional information is available in University Health Services by calling the Office of Insurance and Accounts at 574-631-6114.

The cost of the premium for the 2006–2007 academic year is \$1,310.

Payment Regulations. All fees and required deposits are to be paid in advance of each semester. Billing will be made one month before each semester. The University does not accept credit card payments. Remittance should be made payable to the University of Notre Dame. Notre Dame students taking certain courses at Saint Mary's College that carry special fees will be billed for such charges according to Saint Mary's rates.

Withdrawal Regulation. Any graduate, law, MBA*, or undergraduate student who at any time within the school year wishes to withdraw from the University should contact the Office of the Registrar. To avoid failure in all classes for the semester and to receive any financial adjustment, the withdrawing student must obtain the appropriate clearance from the dean of his or her college and from the assistant vice president for Residence Life.

On the first day of classes, a full-tuition credit will be made. Following the first day of classes, the tuition fee is subject to a prorated adjustment/credit if the student (1) withdraws voluntarily for any reason on or before the last day for course discontinuance at the University, or (2) is suspended, dismissed or involuntarily withdrawn by the University, for any reason, on or before the last day for course discontinuance at the University, or (3) is later obliged to withdraw because of protracted illness, or (4) withdraws involuntarily at any time because of military service, provided no credit is received for the classes from which the student is forced to withdraw.

Upon return of the student forced to withdraw for military service, the University will allow him or her credit for that portion of tuition charged for the semester in which he or she withdrew and did not receive academic credit.

Room and board charges will be adjusted/credited on a prorated basis throughout the entire semester.

Students receiving University and/or Federal Title IV financial assistance who withdraw from the University within the first sixty percent (60%) of the semester are not entitled to the use or benefit of University and/or Federal Title IV funds beyond their withdraw date. Such funds shall be returned promptly to the entity that issued them, on a pro rata basis, and will be reflected on the student's University account.

This Withdrawal Regulation may change subject to federal regulations. Examples of the application of the tuition credit calculation are available from the Office of Student Accounts upon request.

**Executive MBA students are subject to a different Withdrawal Regulation and Tuition Credit Calculation, both of which may be obtained from the Executive MBA Program.*

Payment Plan for Budgeting Educational Expenses. The University makes available an interest-free monthly payment plan through the TuitionPay Plan, administered by Sallie Mae, PO Box 7448, Wilkes-Barre, PA 18773-7448. This plan allows families to spread out education payments over a 10- or nine-month period rather than make two larger payments, one at the beginning of each semester.

The annual fee to enroll in the program is \$55. That cost includes a life insurance provision called Tuition Protection Coverage, which would pay the University the remaining balance of the plan in the event that the designated bill payer should die. For more information on the TuitionPay Plan, call Sallie Mae toll-free at 877-282-5933.

Student Financial Aid

The Office of Student Financial Services, which includes the Offices of Financial Aid, Student Accounts, and Student Employment, administers all student financial aid programs, a broad array of financial products and services, and payment plans, to assist in helping to make a Notre Dame education affordable for all families.

Principles. Notre Dame subscribes to the principles of student financial aid administration as endorsed by the College Scholarship Service of the College Board and the National Association of Student Financial Aid Administrators. Notre Dame, along with the hundreds of other institutions, states, and organizations that follow these principles, includes demonstrated financial need as a criterion in awarding financial aid. In addition to a student's academic and personal credentials, financial need is an essential factor in the awarding of the University's scholarship/grant programs.

Among the many myths that exist about the financial aid process, perhaps the most common is that which claims that only the low-income family is eligible for financial aid. Unfortunately, as a result, many students do not even apply for aid because it is assumed that the family income is too high. Although income is an important factor in determining a family's ability to pay for college, it is only

one of the many factors considered. The size of the family, age of parents, number of family members in college, assets and liabilities, and private school costs are also considered.

Equally significant in determining need is the cost of attending an institution. The same student may have adequate family resources for attendance at a public institution but may show substantial need at a higher-cost institution, such as Notre Dame. Those families feeling the need for financial assistance are encouraged to investigate the possibilities outlined herein.

Inherent in the concept of need is the premise that the primary responsibility for financing a college education lies with the family. Notre Dame assumes that families will contribute to the student's education to the extent they are capable.

The difference between the family contribution and the student's total collegiate expenses for a given year is *financial need*. Another way of expressing this concept is outlined below:

$$\begin{array}{r} \text{Cost of Attendance} \\ - \text{Family Contribution} \\ \hline = \text{Financial Need} \end{array}$$

Cost of Attendance. Expenses for college will vary from one institution to another and are subject to change from one year to the next. Estimated average expenses for first-year undergraduates at Notre Dame for the 2006–2007 academic year include:

Tuition and Fees.....	\$33,410
Room and Board.....	8,730
Books.....	850
Personal/Transportation	1,400
Total	\$44,390

There will be variations in the above costs based on residence hall accommodations, travel costs, and personal expenses. It should be noted that, because of rising costs, annual increases in the above budget can be anticipated.

Family Contribution. The University assumes parents will contribute to their children's education to the extent they are capable as long as the student is enrolled as an undergraduate. Notre Dame cannot accept financial responsibility for students whose parents discontinue this support for reasons other than ability to pay. It is important to note that the *family* includes both the parents *and* the student. Students seeking financial aid will be expected to contribute toward their educational expenses. This self-help may include resources from a portion of their own assets, as well as earnings resulting from work prior to and during their enrollment at Notre Dame. In a very real sense, students who borrow also contribute to their costs from their future earnings.

Given the premise that families have the primary responsibility for paying for the cost of a student's

education, Notre Dame is committed to making the University affordable by annually meeting the full demonstrated financial need of its students.

Verification. The federal government requires the University to verify and document certain information provided by students and their families in relation to an application for assistance. Such documents may include copies of federal income tax returns and W-2 forms. For purposes of verification, the University currently participates in the Federal Quality Assurance Program.

Financial Aid Application Process. To be consistent in estimating a family's ability to pay, Notre Dame has subscribed to a nationally approved uniform method of *needs analysis*. Many institutions and other organizations involved in the administration of student financial aid programs also subscribe to this *institutional methodology*.

Because the federal government is a major provider of student aid, it has created a set of criteria to determine a student's eligibility for its programs. This information is gathered annually on the Free Application for Federal Student Aid (FAFSA). All students seeking financial aid consideration for either federal and/or non-federal student aid programs must file the FAFSA. The FAFSA is available at fafsa.ed.gov and should be filed between January 1 and February 15 for prospective first-year students, January 1 and February 28 for continuing students, and January 1 and March 31 for prospective transfer students.

The College Scholarship Service (CSS) also provides a supplemental application known as the CSS/Financial Aid PROFILE. This application often allows the student and family to provide additional, more comprehensive information with which the institution can make a better evaluation of the family's financial circumstances. The PROFILE (along with the appropriate fee) must be submitted to CSS by February 15 for prospective first-year students, February 28 for continuing students, and March 31 for prospective transfer students to be considered for all the financial aid programs administered by Notre Dame, including scholarship/grant programs. Students seeking *only* federal aid need to file *only* the FAFSA. Students applying for both federal *and* institutional aid consideration must file the FAFSA and the PROFILE, listing the University of Notre Dame as a recipient. The federal school code for identifying Notre Dame on the FAFSA is 001840. Notre Dame's CSS code for the PROFILE is 1841.

Students may complete the PROFILE at collegeboard.com.

The PROFILE is made available in the fall semester of the student's high school senior year and may be filed as soon as the student and family have reasonable estimates of what family income figures for the current calendar year will be. In some cases, it may be necessary to wait until the calendar year is completed to obtain more accurate information. In either case, the PROFILE must be submitted as directed. If tax information for the previous calendar year

is not yet completed, reasonable estimates may be used. Applicants for financial aid should also be prepared to submit directly to the Office of Financial Aid copies of parents' and student's Federal tax returns and parents' W-2 forms for the calendar year prior to the academic year for which financial assistance is being requested. These documents should be signed and sent directly to the Financial Aid Office, which reserves the right to request additional documentation and/or clarification of a family's financial situation.

It should also be noted that *a prospective first-year or transfer student should not wait for an admissions decision prior to filing for financial aid.* Priority consideration will be given to students who meet the FAFSA and PROFILE filing deadlines. Additional consideration may be given to late applicants if funding permits.

Upon proper and timely submission of the FAFSA and the PROFILE, the applicant will automatically be considered for *all* forms of assistance, including University scholarships, which the Financial Aid Office administers.

Financial Need. Upon receipt of the FAFSA and PROFILE, the Financial Aid Office will carefully review the information in light of the applicant's individual circumstances and the funding levels of the various programs it administers. It will consider any special circumstances mentioned in the narrative section of the PROFILE or brought to its attention by the student or parents. The result of this analysis is an estimated *family contribution* figure, which is subtracted from the student expense budget to determine financial *need*.

If financial need is demonstrated, the Financial Aid Office is committed to providing financial aid resources to meet the financial need. In many cases where assistance is made available, it is done in *package* form; that is, two or more forms of assistance are combined with each other to meet the demonstrated *need*. In most cases this may include opportunities for scholarships, loans, and/or work.

Because the amount of financial aid awarded to an individual reflects the family financial situation, the University, as a matter of policy, does not publicly announce the amount of aid awarded. All information received by the Financial Aid Office is treated as confidential.

All forms of aid awarded by the University are subject to adjustment based upon additional awards received by the student in excess of the established need. Students receiving aid from the University of Notre Dame must notify the Office of Financial Aid of all other forms of educational assistance from financial aid sources other than those directly administered by the Office.

The total financial aid received by a student may not exceed the total cost of attendance.

Renewal of Financial Aid. It is important to note that the vast majority of financial aid programs are

not automatically renewed from year to year. Because of changes in family circumstances, financial aid policies, funding levels, and college costs, the PROFILE and the FAFSA must be filed *annually*. The deadline for renewal application for all forms of assistance administered by the University's Office of Financial Aid, *including scholarships*, is February 28.

International Students. Financial aid opportunities for international students are limited. International students should be prepared to finance, either privately or through a sponsor, the full cost of their Notre Dame education. The International Student Certification of Finances (available at <http://financialaid.nd.edu>) must be submitted at the time of application for admission, illustrating, and documenting sufficient financial support to meet the projected cost of a Notre Dame undergraduate education.

Prospective first-year students wishing to be considered for limited need-based financial assistance must first complete an International Certification of Finances along with an International Student Financial Aid Application (available at <http://financialaid.nd.edu>). Based upon a review of academic qualifications, financial need, and availability of student aid resources, an applicant may be considered for financial assistance, including a self-help component of a student loan and student employment along with University scholarship assistance. The Certification of Finances and the CSS International Student Financial Aid Application will be reviewed along with the student's admission application.

The Certification of Finances is kept on file for continuing international students, outlining the family's annual responsibility to meet educational expenses as a condition of continued enrollment at the University of Notre Dame and for satisfying the US Immigration and Naturalization Service's regulations required for maintaining an officially authorized US Student Visa status.

FINANCIAL AID PROGRAMS

There are numerous types of financial aid opportunities for students. The process outlined above is that which the student follows for *all* aid programs administered by the Financial Aid Office of Notre Dame. Through this one process, applicants are considered automatically for *all* aid programs at the University for which they are eligible, including scholarships/grants. Students are also strongly encouraged to pursue opportunities outside the University. Information regarding some of these *outside* programs is outlined below. However, because students come to Notre Dame from all 50 states and many foreign countries, further details about state and local programs must be obtained through the student's and family's individual efforts.

Most aid programs will fall into one of three categories of assistance: scholarships/grants, student employment, or loans.

SCHOLARSHIPS/GRANTS

Scholarship/grant assistance is a type of aid that is free of repayment obligation.

Notre Dame Scholarships. All students accepted for admission, who have completed the financial aid process as outlined above, are automatically considered for University scholarships. The level of University assistance is based on demonstrated financial need and academic performance and will thus vary from student to student.

Renewal of University scholarship assistance is based upon a review of students' academic performance at the University and their annually demonstrated financial need. University scholarship consideration is given for a maximum of eight semesters (10 semesters for a University-approved five-year program).

A self-help component, including student loan and campus employment programs, serves as the foundation of a financial aid package prior to scholarship/grant consideration. The amount of self-help will grow annually, based on several factors, including increases in cost, annually determined financial need, and self-help limits of loan and work programs.

Students not receiving scholarship/grant assistance may be considered in subsequent years based on financial need, academic performance, and the availability of University scholarship resources.

Students accepting University scholarships authorize Notre Dame to release confidential information to scholarship donors and Notre Dame alumni clubs by signing a Scholarship Information Release Form. In addition, students agree to write their donor(s) a letter of appreciation, upon request.

Notre Dame Alumni Club Scholarships. Many Notre Dame Alumni Clubs offer scholarships to students in their geographic area. Since these awards are based upon information supplied by the University's Admissions and Financial Aid offices, applicants who follow the standard admissions and financial aid procedures of the University will be considered by alumni clubs offering such awards. Some alumni clubs will require additional steps, such as the completion of a local application and/or a personal interview.

Federal Pell Grant. The Pell Grant is a nonrepayable grant made available by the federal government to eligible undergraduate students enrolled in a degree-granting program.

Notre Dame cooperates with the US Department of Education in administering this program. Applicants must be US citizens or permanent residents of the United States.

The FAFSA serves as the application for the Pell program. Eligibility is determined by the federal methodology formula uniformly applied to all applicants. After applying, the student will receive a Student Aid Report (SAR) from the federal government. Eligible students will be notified by the Financial Aid Office of Notre Dame. In 2006/2007, the grants range from \$400 to \$4,050.

SEO Grant. Notre Dame participates in the Federal Supplemental Educational Opportunity Grant Program (SEO Grant). These federal grants currently range up to \$3,000 for students with exceptional financial need. The Financial Aid Office selects recipients from among the most needy applicants, in accordance with guidelines established by the US Department of Education. The number and amount of these grants will depend upon the availability of funds from the federal government each year. Federal SEO Grant funds are available only to US citizens or permanent residents of the United States.

State Scholarships and Grants. Although programs vary from state to state, all applicants are encouraged to seek information about the possibility of obtaining a state scholarship/grant as a student at Notre Dame. Details regarding application processes, eligibility requirements, amounts, etc., vary from state to state. Among the states that currently award scholarship/grant assistance to Notre Dame students are Indiana, Pennsylvania, Rhode Island, and Vermont.

Military Scholarships. The University of Notre Dame, in cooperation with the military services, offers Army, Navy, Marine Corps, and Air Force Reserve Officers' Training Corps (ROTC) programs for interested and qualified students. Satisfactory course completion leads to an Officer's Commission upon graduation from the University.

ROTC scholarships are available on a competitive basis for both men and women. Scholarships may be awarded to offset up to the full cost of tuition, books, and fees, plus an in-school subsistence.

Scholarships are awarded on merit and personal qualifications. Applications must be filed during the fall semester of the student's high school senior year.

Application forms and further program descriptions are available from high school counselors, military recruiting officers and ROTC departments at any participating college or university.

First-year students and upperclassmen are eligible to voluntarily enroll in the three-year ROTC college programs at Notre Dame and compete for a limited number of scholarships within the units.

For more information, see financial/aid.nd.edu/rotc or contact: ROTC (Army, Navy, and Marine Corps or Air Force), University of Notre Dame, Notre Dame, IN 46556.

Other Federal Assistance Benefits. Certain students may be eligible for special forms of federal agency benefits. Among these agencies are Americorps, the Veterans Administration, the Office of Vocational Rehabilitation, and the Bureau of Indian Affairs. Further details may be obtained through the appropriate local office of the particular agency.

Private Scholarships. Many private organizations provide financial assistance to Notre Dame students. Scholarship information may be obtained by contacting civic, professional, religious, and other community organizations.

The Financial Aid Information Page at finaid.org and the College Board Online at collegeboard.com provide scholarship search information.

Caution is advised when using fee-based scholarship search enterprises. Students also should be careful in providing confidential/personal information (e.g., credit card numbers) to such organizations.

STUDENT EMPLOYMENT

Part-time employment opportunities, including those offered through the need-based Federal Work-Study and Paid Community Service Programs as well as other programs, are made available in an effort to assist students in meeting some of the costs related to college attendance.

Approximately 40 percent of Notre Dame undergraduates are employed on campus annually.

Many student employees average 10–12 hours of work per week. Students are paid on a biweekly basis via a direct deposit to their personal bank account. Hourly rates vary depending on the job requirements. The basic hourly wage for the 2006/2007 academic year is \$6.65.

The Job Board, at <http://studentemployment.nd.edu>, provides a comprehensive listing of jobs available to students, including community service positions (e.g., tutoring, support services, program assistants) along with on-campus jobs in areas such as the dining facilities, the many campus libraries, the computer labs, and office/clerical positions.

LOANS

Borrowing a student loan is a matter that should be undertaken with the greatest of deliberation and with full knowledge of the significant responsibilities involved. Notre Dame borrowers have a proven record of responsible borrowing and repayment of loan obligations. To assist borrowers, the University provides them with an outline of their rights and responsibilities. In addition, all borrowers are advised of their loan repayment options and obligation upon leaving the University. In an effort to provide additional information regarding a borrower's rights and responsibilities, the Office of Financial Aid offers general counseling to all borrowers.

Federal Perkins Loan. The Federal Perkins Loan is a need-based loan made by the University. The Perkins Loan program requires that the student borrower repay, with interest, this source of financial assistance. Additional terms, subject to revision by federal law, include: zero interest while the student is enrolled in school on at least a half-time basis and during the nine-month grace period following enrollment; no origination fee or insurance fee; five percent interest rate during repayment; repayment on both principal and interest beginning nine months after the student ceases to be enrolled in school on at least a half-time basis, generally extending over a 10-year period; \$4,000 annual loan limit;

and \$20,000 maximum aggregate undergraduate borrowing limit.

Applicants are automatically considered for this program as a part of the financial aid process outlined above. As with any federally sponsored aid program, the student must be a US citizen or have permanent residence in the United States.

All or part of a Federal Perkins Loan may be cancelled for borrowers who enter certain teaching areas or specified military duty.

Federal Stafford Loan Program. Undergraduate students are currently eligible to borrow through the Federal Stafford Loan Program. General eligibility requirements include US citizenship or permanent residency in the United States, as well as enrollment on at least a half-time basis, good standing at the University, and satisfactory academic progress.

Federal Stafford Loans are generally made available to eligible Notre Dame students through one of several lenders recommended by the University.

The program offers a long-term, repayable loan opportunity to assist students in meeting their educational expenses.

All first-time borrowers complete an online Stafford Master Promissory Note and Stafford Loan Entrance Counseling. The Office of Financial Aid will certify the student's enrollment, cost of education, academic standing, and the amount of other financial aid awarded.

To determine a student's eligibility for a federally *subsidized* Stafford loan, the following formula is used:

$$\frac{\text{Cost of Attendance} - (\text{Family Contribution} + \text{Financial Aid})}{\text{Federal Stafford Eligibility}}$$

It is possible for students from various income levels to qualify for Federal Stafford Loans. Students following the financial aid application procedures previously outlined are automatically considered for these loans.

After the Office of Financial Aid certifies the Master Promissory Note, the lender reviews the application and then forwards it to the guarantor for final review. The guarantor or the lender then notifies the student of approval of the loan. Up to 4 percent of the amount borrowed will be deducted prior to the loan being disbursed to pay for the origination and guarantee of the loan. The applicant should complete the Master Promissory Note before June 1.

Loan proceeds are typically disbursed electronically at the beginning of each semester to the student's account at the University. One-half of the annual amount, after subtracting loan origination fees, is credited at that time.

For those students qualifying under terms outlined above, **the government will pay the interest to the lender for the borrower during periods of school**

attendance as well as during other authorized periods of deferment. For this reason, this program is known as the **Subsidized Federal Stafford Loan**.

Current regulations permit undergraduate students to borrow up to \$2,625 per year for freshmen, up to \$3,500 for sophomores, and up to \$5,500 per year for three more undergraduate years, with a cumulative total of \$23,000 for undergraduate study.

Federal Stafford Loans must be repaid in full with interest, except when the borrower is deceased or totally and permanently disabled. Repayment begins six months after termination of at least half-time enrollment. Repayment may generally be extended over a period of up to 10 years but could vary, depending upon the amount borrowed. Certain borrowers may also be eligible for loan consolidation options that allow for extending payment periods beyond 10 years. The interest rate will vary annually. Specific repayment plans are arranged between the lending institution and student. Under very limited conditions, a student may have part of the Stafford Loan obligation repaid for certain kinds of military service.

Unsubsidized Federal Stafford Loans generally involve the same provisions as those available through the subsidized program, except as noted below. Students following the financial aid application procedures outlined above, who do not demonstrate *financial need* as defined by federal regulations, can receive consideration for these *unsubsidized* loans.

To determine a student's eligibility for an unsubsidized Stafford loan, the following formula is used:

$$\begin{array}{r} \text{Cost of Attendance} \\ - \text{Financial Aid} \\ \hline \end{array}$$

Federal Unsubsidized Stafford Loan Eligibility

One provision of unsubsidized loans that differs significantly from the subsidized program relates to borrowing limits for independent students and for dependent students whose parents have been denied PLUS loan (see below) eligibility. Based upon the student's program length, the combination of subsidized and unsubsidized Stafford annual borrowing cannot exceed the following loan limits:

Year	Amount
1st	\$ 6,625
2nd	7,500
3rd–5th	10,500

The total combined subsidized and unsubsidized aggregate borrowing for these students cannot exceed \$46,000 for undergraduates.

Another major difference between the provisions of the subsidized and unsubsidized Stafford Loan is that the federal government is not paying in-school interest to the lender while the student is enrolled in school. Interest may be paid monthly or quarterly by the borrower or may be added to the principal balance of the loan (capitalized).

The Notre Dame Undergraduate Loan Program.

The University, in cooperation with Citibank and its Student Loan Corporation (SLC), offers a very competitively priced non-need-based student loan program to assist undergraduate students with the financing of their education. Terms of the Notre Dame Undergraduate Loan include:

- Variable interest rate based upon the 91-day T-Bill plus 2 percent, rounded to the nearest quarter.
- Interest begins to accrue upon disbursement of the loan.
- No origination fee or insurance fee.
- Repayment of accrued interest and principal beginning six months after the student ceases to be enrolled in school, not to exceed seven years from the first disbursement of the first loan, and generally extending up to 15 years.
- Opportunity for eligible students to apply for up to \$15,000 annually, with an undergraduate aggregate of \$75,000.
- Requirement of a creditworthy US resident co-signer.

Additional information and an electronic application for the Notre Dame Undergraduate Loan may be obtained online at financialaid.nd.edu or from Citibank Student Loan Corporation at 888-812-3479.

OTHER

Monthly Payment Plan. The University makes available a monthly payment plan through TuitionPay Plan. This interest-free payment plan offers a family the opportunity to spread tuition payments over a 10- or nine-month period. The annual fee to enroll in the TuitionPay Plan is \$55. That cost includes a life insurance provision called Tuition Protection Coverage, which would pay the University the remaining balance of the plan in the event that the designated bill payer should die. Additional information may be obtained by contacting AMS toll-free at 877-282-5933.

Federal Parent Loans (PLUS). The Federal PLUS loan provides a borrowing option for parents of dependent undergraduate students. Based upon a parent's creditworthiness, a parent may borrow through this federally guaranteed, non-need-based loan program. Additional terms, subject to revision by federal law, include:

- Fixed interest rate of 8.5 percent for loans disbursed after July 1, 2006. Provisions for PLUS loans disbursed before July 1, 2006 will remain in effect for the life of the loan.
- Up to three percent origination fee and up to 1 percent insurance fee.
- Repayment on both principal and interest usually beginning within 60 days of disbursement of the funds, generally extending up to 10 years.
- Opportunity for parents to borrow up to the full cost of education minus student aid.
- Deferment of principle and interest, offered by some lenders during the student's enrollment period. (Contact lender for details.)

The University provides borrowers with a list of preferred PLUS loan lenders. The preferred lenders have established themselves as quality institutions based upon efficiency in loan origination, responsiveness to questions, quality of servicing, and long-term participation and commitment in the federal loan program. The basic provisions for loans offered by these preferred lenders are consistent with all federally insured educational loans. In addition, these preferred lenders participate in Notre Dame's electronic application and fund transfer process. This participation provides a superior service in terms of processing and delivery of funds.

Further information and an application may be obtained from the Office of Financial Aid.

Standards of Progress for Recipients of Financial Aid

The University of Notre Dame requires all recipients of institutional financial aid to maintain academic good standing as outlined in *du Lac*. In addition, the Higher Education Act, as amended, and subsequent federal regulations require institutions to define, publish, and implement Standards of Progress for students receiving federal financial aid. Recipients of aid through the following programs are subject to these standards: Pell Grant, Supplemental Educational Opportunity Grant (SEO Grant), State Student Incentive Grant (SSIG), Stafford Loan, Perkins Loan, PLUS loan, Federal Work-Study (FWS), and University scholarships. The outlined Standards of Progress are established for this purpose.

A. Academic Good Standing: In general, students must meet the University's minimum requirements for academic good standing, as outlined in *du Lac*, to receive financial aid. Failure to maintain academic good standing will result in academic probation and probation for purposes of financial aid. Students may receive aid while in this probationary status. However, once students are declared "subject to dismissal," if they are "continued on probation," they are *not* automatically eligible for financial aid.

B. Academic Satisfactory Progress: Students must earn credits at the rates prescribed to maintain eligibility for federal financial aid. The following letter grades do not result in credits earned: F, X, I, U, V, W, NR.

UNDERGRADUATE STANDARDS OF PROGRESS FOR RECIPIENTS OF FINANCIAL AID

<i>Semesters</i>	<i>Minimum Semester GPA</i>	<i>Minimum Cumulative Credits Earned Required of Full-time Students</i>	<i>Minimum Cumulative Credits Earned Required of Part-time Students</i>
1	1.7		
2	1.85	20	10
3	2.0		
4	2.0	48	24
5	2.0		
6	2.0	84	42
7	2.0		
8	2.0	120	60
9	2.0		
10	2.0	156	78
11	2.0		
12	2.0		96
13	2.0		
14	2.0		114
15	2.0		
16	2.0		132
17	2.0		
18	2.0		150
19	2.0		
20	2.0		168

Full-time is defined as 12 hours or more; part-time is defined as 11 hours or less.

Full-time undergraduate students are expected to complete degree requirements in either eight or 10 semesters, depending on their academic program. The chart below outlines the *minimum* requirements for Academic Good Standing (minimum semester GPA) and for Academic Satisfactory Progress (minimum cumulative credits earned) for undergraduate recipients of financial aid. Standards for both full-time and part-time students, as well as for four-year and five-year academic programs, are shown.

Undergraduate transfer students will be evaluated based on the advanced status determined at the point of admission (number of transfer credits accepted).

The Standards of Progress are reviewed at the end of each even-numbered semester for the quantitative aspect of the policy; the Standards are reviewed each semester for the qualitative aspect of the policy. Students terminated from financial aid for failure to maintain these standards must achieve all stated grade point average and cumulative credits earned requirements for their academic year level before aid can be reinstated. Students who are terminated and wish to return with aid for the following semester

may use the time between semesters to accomplish readmittance, achieve the minimum cumulative credits earned requirement or complete courses for which the grade of X or I has been assigned.

The Financial Aid Office will notify students in writing when failure to maintain progress results in the loss of financial aid. Appeals of such a decision, based on mitigating circumstances, must be made in writing by the student to the Office of Financial Aid. Appeals will be evaluated, and a written decision will be forwarded to the student within three weeks of the receipt of the appeal.

Center for Social Concerns

The Center for Social Concerns provides students with a wide variety of academic opportunities for civic participation and addressing issues of injustice.

I. Social, moral, and ethical issues can be studied from a variety of perspectives through center-initiated courses. Special attention is given to Catholic social tradition. The experiential and community-based learning courses are coordinated primarily by center staff and faculty in collaboration with various departments.

II. With the assistance of the Center for Social Concerns, students engage in multiple opportunities for direct service and other forms of extracurricular civic participation. They work to educate and mobilize themselves and others toward the creation of a more just world.

A. The Center for Social Concerns helps to facilitate more than 30 direct service groups that work in collaboration with many local community organizations, such as the Robinson Community Learning Center and the Center for the Homeless.

B. Through the Center for Social Concerns, students participate as part of faculty and community coalitions, such as the Lead Alliance; do research for neighborhood organizations, for instance, the Near Northwest Neighborhood Association; and engage in community organizing.

C. The center's Senior Transition Program offers students discernment and information sessions regarding postgraduate service opportunities such as Holy Cross Associates, in the US and other countries.

D. The center likewise provides space and consultation for many social action groups, such as the Children's Defense Fund, Amnesty International, and the Progressive Student Alliance. These organizations sponsor talks, conduct workshops, and coordinate other projects through which students learn about and address issues of injustice.

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Center for Social Concerns](#) heading.

Reserve Officers Training Corps Programs

The University of Notre Dame offers the opportunity to combine the pursuit of an academic degree with earning an officer's commission in either the United States Army, Navy, Marine Corps, or Air Force. Students enrolled in any of the colleges of the University may participate in the Reserve Officers Training Corps (ROTC). Selection of courses in the student's academic major is independent of those selected for ROTC. First-year students enrolled in any of the three ROTC programs are exempted from the University's requirement for physical education.

The three ROTC programs are under the campus jurisdiction of the associate provost who serves as the director of military affairs. Non-ROTC students may

not enroll in ROTC courses without permission of their college deans.

The College of Arts and Letters and the College of Business Administration accept a maximum of 12 free elective credits from the 30000- and 40000-level military sciences only. Credit from the 10000- and 20000-level courses does not count toward the degree requirements and must be subtracted from the total number of degree credits listed on the transcript.

In the College of Engineering, ROTC students are permitted a maximum of six credits of upper-level air, military or naval science as substitutes for specified degree requirements determined by the department. Not more than three credits may be substituted for history or social science. All air, military or naval science credits not so substituted are not credited toward degree requirements in programs.

In the School of Architecture, ROTC students are permitted a maximum of six credits of 40000-level air, military or naval science courses as substitutes for electives within the 163 credit hours required for the bachelor of architecture degree.

The College of Science will count a maximum of six credit hours of upper-level (30000- or 40000-level) ROTC courses toward the 124-credit-hour requirements. These courses will be counted as free electives.

MILITARY SCIENCE

Chair and Professor:

Lt. Col. Kelly C. Jordan, USA

Assistant Professors:

Cpt. Timothy L. Dukeman, USAR

Maj. Gary Masapollo, USAR

Cpt. Angela L. Hennessey, USA

The Army ROTC Program develops leadership ability and prepares students for the challenges and responsibilities they will face as Army officers and civilian leaders. Through a series of classroom courses and practical exercises, cadets learn self-confidence, time management, and decision-making skills. The role of the professional officer in the preservation of peace and national security is emphasized, with particular attention placed on ethical conduct and the officer's responsibilities to society. The program culminates in an officer's commission as a Second Lieutenant in the Active Army, Army Reserve, or Army National Guard. Opportunities for follow-on postgraduate study also exist.

Student Organizations and Activities. All AROTC students have the opportunity to participate in a variety of activities, to include Drill Team, Ranger Challenge Team, Color Guard, Rifle Team, and the *Shamrock*, the Fightin' Irish Battalion's newsletter and Web page. AROTC students also have the opportunity to attend Airborne School, Air Assault School, Northern Warfare School, and Mountain Warfare School during the summer break.

Student Awards and Prizes.

The Dixon Award. A \$200 cash award presented to an outstanding senior who has displayed exceptional performance during the annual Dixon Challenge.

American Legion Post 357 US Officer's Sword. An Army officer's sword presented annually to the battalion's cadet commander.

Patrick Haley Award. A wristwatch presented annually to the cadet who attains the highest academic grade point average.

Col. William T. Brooks Award. A pair of jump boots and a plaque given to the most outstanding student who graduated from Airborne School during the past academic year.

Dr. Michael McKee Award. A \$100 cash award presented each year to the outstanding member of the battalion's Drill Team and/or Honor Guard.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University section under the Department of Military Science \(ROTC—Army\) heading.](#)

NAVAL SCIENCE

Chair and Professor:

Capt. M.E. Neller, USN

Assistant Professors:

Cdr. J.W. Herman, USN

Maj. T.P. Theriot, USMC

Lt. M.R. Lipke, USN

Lt. T.J. Karnowski, USN

Lt. T.F. Remppe, USN

Lt. G.J. Keigher, USN

The mission of NROTC is to educate, train, and screen officer candidates to ensure they possess the moral, intellectual, and physical qualities for commissioning and the leadership potential to serve successfully as company grade officers in the US Navy and Marine Corps. As the largest single source of Navy and Marine Corps officers, the NROTC Scholarship Program fills a vital need in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps.

Non-NROTC students should consult with their college dean or advisor to determine if a Naval science course will count toward graduation.

Additional NROTC Curriculum Requirements. In addition to the Naval Science requirements outlined above, NROTC scholarship students are required to complete other specified University courses. These additional requirements are taken as a part of the student's field of study or as degree electives, depending upon the college in which enrolled. Students will

be notified of such requirements prior to joining the NROTC Program.

Student Organizations and Activities. All NROTC students are integrated into the Midshipman Battalion organization. In addition to participation in all other University organizations and activities for which eligible, NROTC students may participate in specific NROTC organizations and activities such as the Color Guard, intramural athletic teams, the NROTC Unit newspaper and yearbook, and the NROTC Drill Team

Student Awards and Prizes.

The Secretary of the Navy Distinguished Graduate Award. The annual recognition of the top graduating midshipman.

The George W. Strake Jr. Award. An officer's sword presented annually to the senior midshipman with the highest aptitude ranking.

The Col. Brian C. Regan Award. A Marine Corps Officer's sword presented annually to the Marine option senior midshipman with the highest aptitude ranking.

The Vincent J. Naimoli Award. A service sword given annually to a graduating senior midshipman who has become distinguished as an individual who "routinely gives 110 percent."

The Edward Easby-Smith Award. Recognition given annually to the graduating Navy officer who most exemplifies the characteristics of a Marine officer.

Numerous other awards are presented annually by various professional and patriotic organizations to recognize excellence in academic achievement and military aptitude.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University section under the Department of Naval Science \(ROTC-Navy\) heading.](#)

AEROSPACE STUDIES

Chair and Professor:

Col. Steven Hatter, USAF

Assistant Professors:

Maj. Vincent Powell, USAF

Capt. Guy Hayes, USAF

Capt. Amy Bellenbaum, USAF

The Air Force Reserve Officer Training Corps (ROTC) is an educational program designed to give men and women the opportunity to become an Air Force officer while completing a degree. The Air Force ROTC Programs develop leadership and management skills students need to become leaders in the 21st century. In return for challenging and rewarding work, we offer the opportunity for advancement, education and training, and the sense of pride that comes from serving our country. Upon completion

of the Air Force ROTC program students are commissioned as second lieutenants in the Air Force. Following commissioning there are excellent opportunities for additional education in a wide variety of academic fields.

The complete descriptions for all the courses associated with this academic program can be found on the enclosed compact disc within the [University Section under the Department of Aerospace Studies \(ROTC—Air Force\)](#) heading.

* *Leadership Laboratory* is open to students who are members of ROTC or who are eligible to pursue a commission as determined by the professor of *Aerospace Studies*.

Student Organizations and Activities. All Air Force ROTC cadets are given opportunities to participate in a variety of extracurricular activities to develop their leadership skills. Activities associated with Air Force ROTC include the Arnold Air Society, oriented toward service to the local community, and the Drill Team, Honor Guard, and Rifle Squad, who perform at campus and community functions while developing individual drill proficiency.

Student Awards and Prizes.

The *Notre Dame Air Force Award*, and Air Force officer's sword, are presented to the top graduating senior in Air Force ROTC.

The *Noël Dubé Award* is presented to the senior class Arnold Air Society member who has contributed the most to furthering the ideals and goals of the society within the University and local community.

The *Paul Robérge Award*, named in memory of an alumnus of the Notre Dame ROTC program, annually recognizes the top pilot candidate in the Professional Officer's course.

Other awards are sponsored by various local and national organizations to recognize excellence within the cadet corps.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University section under the Department of Aerospace Studies \(ROTC—Air Force\)](#) heading.

Office of International Studies

The Office of International Studies, under the direction of Prof. Julia Douthwaite, assistant provost, and Claudia Kselman, director, administers 30 programs in 17 countries in a variety of academic year and summer programs:

Since 1964, Notre Dame has made it possible for students to earn credits toward graduation in

international study programs. Study in another tradition, direct personal experience of another language and culture and travel all broaden and deepen the liberal education of the whole person to which the University has always been committed.

Without additional cost or delay in graduation, international study programs make a unique contribution to the excellence of liberal education in the undergraduate colleges and frequently have proved an asset in career development.

Qualified students from all undergraduate colleges can apply to spend a semester or a year abroad in one of our programs. Participation is normally during the junior year, but some programs are designed to accommodate sophomores as well.

Admission into several of the programs is quite competitive. Participation is a privilege, not a right. Offers of admission are made in accordance with program requirements, at the discretion of the OIS staff in consultation with faculty and staff of the University. As our goal is to maximize the number of students studying off campus, participation in more than one program is unlikely. Students considering more than a single semester or academic year program should carefully review their majors and minors to ensure that such study does not delay the completion of graduation requirements. Students who have participated in or been selected for an off-campus program may receive a lower priority in the selection process of a second program.

Participation in a summer off-campus program does not affect a student's application to a semester or yearlong program.

Notre Dame programs are located in Angers, France; Dublin, Ireland; Fremantle, Australia; Perth, Australia; London and Oxford, United Kingdom; Monterrey, Mexico; Puebla, Mexico; Nagoya, Japan; Salzburg and Innsbruck, Austria; Rome, Italy; Toledo, Spain; Jerusalem; and Washington, D.C. Notre Dame also has a small exchange program with L'Institut d'études politiques (Sciences-Po) in Paris. Notre Dame students may apply to Saint Mary's College programs. The Office of International Studies also facilitates applications to approved programs in Athens, Greece; Berlin, Germany; Bologna, Italy; Cairo, Egypt; Santiago, Chile; Beijing, China; Shanghai, China; Tokyo, Japan; and Moscow, St. Petersburg, and Vladimír, Russia. Programs are also sponsored by the School of Architecture in Rome and by the Law School and the MBA Program in London. The College of Engineering offers a summer program in London. Summer programs are available for students from all colleges in London, Dublin, Toledo, and Puebla. Additional summer programs may be offered in the summer of 2007.

Candidates for Angers, Paris, Rio de Janeiro, Bahia, São Paulo; Innsbruck, Berlin, Rome, Bologna, Beijing, Nagoya, Toledo, Monterrey, Puebla, Santiago, and Russia must demonstrate skills in the language of the country sufficient to make their

period of residence and study fully profitable. These skills may be developed through intensive or other language courses in the freshman or sophomore year. Previous study of the language in high school is mandatory for some programs.

Instruction is in English in Athens, Cairo, Dublin, Jerusalem, Perth, and Fremantle; Italian and English in Rome; Japanese and English in Nagoya and Tokyo; Chinese and English in Beijing and Shanghai; French in Angers and Paris; Spanish in Toledo, Monterrey, Puebla, and Santiago; Portuguese in Brazil; Italian in Bologna; Russian in Russia; German in Berlin; and German and English in Innsbruck.

Many courses taught abroad will fulfill core University requirements such as theology, philosophy, history, fine arts, etc. Students are required to take 15 credit hours per semester in the study abroad programs.

A social science course in the field of anthropology, psychology, or sociology will complete a behavioral science requirement in the Mendoza College of Business.

For major credit in any department, the student must consult with the departmental advisor.

Students with compelling academic reasons for participating in non-Notre Dame programs are eligible to apply for a Leave of Absence for study in a program offered by another college or university. They may not, however, take a leave of absence to attend international programs in cities where Notre Dame offers its own programs.

Course descriptions for hundreds of courses taught in the following programs are available on the Web at <http://www.nd.edu/~intlstud/courses/coursemainpage.htm>.

ANGERS PROGRAM

Academic Year or Semester Program
Université Catholique de l'Ouest (UCO)

Director: Maureen Boulton
Associate Director: D'Arcy J.D. Boulton

The Angers program is open to sophomores and juniors in all colleges. Many Angers students decide to pursue a first or second major in French. Declared and prospective French majors must go to the Department of Romance Languages and Literatures for an advising sheet before they participate in the program.

An academic year of two semesters begins after a monthlong language-intensive summer session, the *Préstage*. Most Angers students take the bulk of courses within the *Centre International d'Etudes Françaises* (CIDEF), UCO's language institute. CIDIF students with advanced French language skills may also register for a *cours universitaire* through one of the institutes at UCO. Studio art majors may pursue course work at the *Ecole Supérieure des Beaux-Arts d'Angers*, and a small number of business courses

may be available at the *Ecole Supérieure des Sciences Commerciales d'Angers* (ESSCA), an affiliate of UCO.

Students who choose to study in Angers for the entire year will have two required courses each semester: the six-hour-per-week CIDEF language course that is appropriate to their skill level, and one of the Notre Dame-sponsored cultural options. Semester students will take their required courses during the relevant semester.

An alternate academic year track is open to a limited number of students with high levels of proficiency in French. After the monthlong *préstage*, these students matriculate directly in the UCO and take courses alongside their French student counterparts.

All instruction is in French. Students earn Notre Dame credit through UCO and its affiliates, and grades are included in the Notre Dame GPA.

ATHENS PROGRAM

Semester or Academic Year Program
College Year in Athens

Sophomores and juniors study with other international students at the College Year in Athens. Classes are taught in English and the program is organized in two curricula: Ancient Greek Civilization and East Mediterranean Area Studies. Through the Ancient Greek Civilization track, students amplify their knowledge of ancient Greece and deepen their understanding of Greece's fundamental contribution to the development of Western civilization. The East Mediterranean Area Studies curriculum focuses attention on Southeast Europe, West Asia, and the Middle East in the time period between the founding of Constantinople (330 AD) to the present. It is an area of unusual importance in geopolitics, where Europe intersects with Asia and Africa and one whose problems and complexities, rooted in the past, pique the interest of students of history, politics, and international affairs.

BEIJING PROGRAM

Semester or Academic Year Program
Peking University

Students may enroll in this intensive Chinese language program at Peking University through the Council for International Educational Exchange (CIEE). Courses are eligible for Notre Dame credit through special arrangement with CIEE. All classes are taught in Mandarin Chinese with one elective area studies course offered in English each semester. The Beijing program is strongly recommended for Chinese majors. Detailed program information is available at the Office of International Studies, 152 Hurley, or by visiting the CIEE website at ciee.org.

BOLOGNA, ITALY PROGRAM

Academic Year Program

Students matriculate in the University of Bologna (UniBo) through Notre Dame's association with the Bologna Consortium Studies Program (BCSP),

administered by Indiana University. Two qualified Notre Dame students are guaranteed admission to the program. Other qualified students are encouraged to apply. Students must commit to an academic year in Bologna. They must be juniors at the time of participation and have completed the equivalent of four, preferably five, college-level Italian courses.

Students attend a four-week preparatory pre-session in September before beginning classes at UniBo. They earn Notre Dame credit for courses taken in Bologna, and grades are included in the Notre Dame GPA. Organized group activities complement the classroom experience.

Direct matriculation in the University of Bologna, among Italy's premier universities, coupled with living in apartments with Italian students, provides a genuine experience of Italian university life and contributes to the attainment of oral and written fluency in Italian.

BRAZIL PROGRAMS

Rio de Janeiro

Fall Semester or Academic Year Program
Pontifícia Universidade Católica do Rio de Janeiro (PUC-Rio)

The Office of International Study Programs (ISP) offers this option in conjunction with Brown University. The program begins with a monthlong, intensive orientation in July. The orientation course includes instruction in the Portuguese language and Brazilian culture, with three hours of scheduled classes every day and additional lectures by various noted specialists twice a week.

During the academic semester/year, students enroll in "Portuguese for Foreigners" and three additional courses at PUC (16 semester credit hours). All courses are taught in Portuguese. Subjects available to participants include history, political science, literature, anthropology, economics, sociology, art history, and studio art.

Salvador da Bahia

Semester or Academic Year Program
Universidade Católica do Salvador (UCSal),
Universidade Federal da Bahia

The Office of international Study Programs (ISP) offers this option in conjunction with CIEE. The program begins with a five-week, intensive language and culture program (ILCP) held in Salvador da Bahia for the fall semester and São Paulo for the spring semester. During the ILCP, students are required to take an intensive Portuguese language class and the interdisciplinary core course titled "Contemporary Brazil." Students who are near-native speakers of Spanish may be placed in a "Portuguese for Spanish Speakers" course (offered based on enrollment).

For the remainder of the semester, students must enroll in two required courses: "Portuguese Language" and "Culture and Society: Bahia and

Brazil." The remainder of the course load (two or three courses) is drawn from a combination of CIEE courses and/or the wide range of courses offered at the host universities.

São Paulo

Semester or Academic Year Program
Pontifícia Universidade Católica de São Paulo

The Office of international Study Programs (ISP) offers this option in conjunction with CIEE. The program begins with a five-week, intensive language and culture program (ILCP) held in Salvador da Bahia for the fall semester and São Paulo for the spring semester. During the ILCP, students are required to take an intensive Portuguese language class and the interdisciplinary core course titled "Contemporary Brazil." Students who are near-native speakers of Spanish may be placed in a "Portuguese for Spanish Speakers" course (offered based on enrollment).

For the remainder of the semester, students must enroll in two required courses: "Portuguese Language" and the CIEE core course "Brazilian Issues and Realities." In addition to the two required CIEE courses, students choose two or three electives drawn from the wide range of courses offered at PUC for which they meet the prerequisites.

CAIRO PROGRAM

Academic Year or Spring Only Program
American University in Cairo

Students may enroll during their sophomore or junior year of college. Students select courses from the general course offerings of AUC and are integrated into classes with AUC degree-seeking students. Cairo is an ideal base from which to explore the rich heritage of Arab and Islamic culture. AUC also offers students opportunities and options of learning the Arabic language.

DUBLIN PROGRAM

Semester or Academic Year Program
University College Dublin, Trinity College Dublin
Director: Kevin Whelan

The Dublin program is open to juniors in arts and letters, business, engineering, and science for a semester or a year. Students will enroll in courses in their majors at University College Dublin or Trinity College Dublin and will also take courses at Notre Dame's Keough Center. For course listings at the Irish universities, contact the Office of International Studies, 152 Hurley Building, 631-5882.

Professor Whelan will offer a course in Irish History and Society. This course is mandatory for all program participants. The Notre Dame Center will also offer theology, philosophy, and fine arts courses.

FREMANTLE PROGRAM

Semester Program

University of Notre Dame Australia

Students in the Colleges of Business and Arts and Letters will enroll in courses at the University of Notre Dame Australia (NDA) through this program. Students enroll in five courses (15 credits) either semester in any combination depending on their major/college requirement and individual need. A list of course offerings for the fall normally is available in 152 Hurley around the end of March, and for the spring term around the end of September.

A listing of approved courses offered in previous semesters is available on the Web at http://www.nd.edu/~intlstud/locations/australia/fremantle_courses.htm or in the Office of International Studies, 152 Hurley. Students in the Fremantle program are required to take ANTH 34392 Australian History and Society (3 credits). In the fall term, students must also take BAUD 34120 Business in Asia, also crosslisted as ECON 34781 (3 credits).

INNSBRUCK/CENTRAL EUROPEAN STUDIES PROGRAM

Academic Year Program

University of Innsbruck

Director and Academic Coordinator: Gernot Guertler

Students participate in a monthlong German language intensive course in Salzburg to prepare them for study at the University of Innsbruck. Students typically enroll in courses at the university taught by instructors for the Notre Dame program. Additionally, as German language proficiency improves, students are able to enroll in regular courses at the University of Innsbruck. The program offers courses and field trips with a focus on Central European studies.

JERUSALEM PROGRAM

Due to political unrest, the Jerusalem program is temporarily canceled. When the program is active, students will enroll in a Middle Eastern History course at Bethlehem University, a contemporary Middle East international relations course at Hebrew University, and several courses at Tantur, Notre Dame's Ecumenical Institute.

KAMPALA PROGRAM

Semester Program

School for International Training

The program is designed to expose students to as many aspects of development in Uganda as possible. Students are required to enroll in all course offerings to get a better grasp of the socio-economic issues that affect development. The program combines course work with field research during which students identify topics of interest that they pursue for their final development practicum.

MONTERREY PROGRAM

Semester or Academic Year Program

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM)

Students enroll in Spanish language and in Mexican and Latin American culture, art, history, sociology, and business courses for international students. Those with a high level of proficiency in Spanish are encouraged to enroll in courses in the other departments of the university, which include business administration and engineering. Students may apply for internships in schools, banks, and other businesses in the area. Service opportunities are also available in Monterrey.

For a listing of all courses offered at the Tec, visit the Web at www.studyinmexico.com.mx or 152 Hurley.

MOSCOW, ST. PETERSBURG, AND VLADIMIR, RUSSIA PROGRAMS

Semester or Academic Year Programs

Students may enroll in a Russian Language and Area Studies program through the American Council of Teachers of Russian. They may choose to study in Moscow, St. Petersburg, or Vladimir for one semester or an academic year. Students should have completed two years of Russian or the equivalent at the University level before participation. They take courses in grammar and contemporary Russian language, vocabulary, and conversation, as well as in literature, Russian and Soviet culture, history, politics, and the mass media. Course descriptions are available in the Office of International Studies, 152 Hurley, or on our website.

NAGOYA PROGRAM

Semester or Academic Year Program

Center for Japanese Studies, Nanzan University

The Nagoya Program is designed for Japanese language majors. Students are required to take an eight-credit Japanese course at the appropriate level each semester. Students choose their other courses in the areas of Japanese society, literature, religion, business, economics, history. Except for Japanese language classes, all courses are taught in English, and the subject matter is often placed in a larger Asian context. Students can take a practical arts course in Chinese black ink painting, woodblock printing, or calligraphy to satisfy the University's fine arts requirement.

PARIS PROGRAM

Spring Semester or Academic Year Program

Institut d'Etudes Politiques de Paris

In 1999 the University of Notre Dame began an exchange program with the Institut d'Etudes Politiques de Paris (Sciences-Po). Offered as a year-long or a second-semester program, the Paris program is limited to two students. Students must have

a very high level of French, an excellent grade-point average, and a major in history or a social science. Students will take courses in European economics, politics, sociology, and history, and in French language. Successful completion of a year of study results in a diploma from Sciences-Po, which is widely recognized in Europe and the United States.

PERTH PROGRAM

Fall Semester Program

University of Western Australia

A special program has been developed for juniors in the colleges of Engineering and Science to enroll at the University of Western Australia (UWA) during the fall semester only. The program combines course work with an intensive field research program established in conjunction with several Australian mining and engineering companies. All students should carry a minimum of 30 UWA points, which translates to about 12 to 15 Notre Dame credits. Course offerings are available on UWA's website, <http://handbooks.uwa.edu.au/>. Hard copies also are available in 152 Hurley as well as on the Web at http://www.nd.edu/~intlstud/locations/australia/perth_courses.htm.

PUEBLA PROGRAM

Semester or Academic Year Program

Universidad de la Americas (UIDLA)

On-site Coordinator: Lisette Monterroso

Students from all colleges can take courses in their major at UDLA. Notre Dame offers a premedical program in the fall semester, which includes the first semester of general physics and internships with Mexican doctors. Other students may also go mainly in the spring semester.

Courses in Spanish language and Spanish and Latin American literature have the same numbers as their equivalents at Notre Dame, and will count towards the Spanish major.

There are many courses taught in English at UDLA, but a major goal of going to Mexico is to become fluent in Spanish. If students have taken advanced Spanish at Notre Dame they may not take more than one course in English during their semester in Mexico. Students must enroll in 15 credit hours per semester.

Sample courses taken by previous participants in the Notre Dame Puebla program are listed at www/md/edi-intlstudcourses.

ROME PROGRAM

Semester or Academic Year Program

John Cabot University

Students from all colleges can enroll in classes at John Cabot University, an American university in Rome, which offers courses in art, business, classics, government, history, literature, philosophy, and psychology. All courses are taught in English (with

the exception of Italian language classes). A variety of JCU courses have been approved by Notre Dame departments for major credit; however, students must consult with their department to confirm courses for their major. All students are required to take one Italian-language course during their semester or year in Rome.

For a listing of all courses offered at John Cabot, visit the Office of International Studies at 152 Hurley Building or visit John Cabot's course descriptions at www.johncabot.edu/academics/curriculum/courseDescriptions.htm.

SANTIAGO PROGRAM

Semester Program

Pontificia Universidad Católica (PUC)

Students take courses at the Pontificia Universidad Católica (PUC) through a consortium of the University of Notre Dame and the University of Wisconsin Milwaukee. All students enroll in "Spanish for Foreigners," "Chilean Politics and Society" (or a similar course), and three other courses.

Students interested in enrolling in the **spring** semester seminar "Perspectives on Poverty and Development" must submit an application to the Center for Social Concerns (CSC). This service-learning course is offered by the Universidad Alberto Hurtado, a Jesuit University in Santiago. Because this is a facilitated program, students may be charged additional fees for courses taken outside the PUC.

The fall semester runs from late July through mid-December. The spring program runs from February-mid July. An *optional* intensive language program is offered in February in Linares, a rural community outside Santiago; the regular spring semester begins at PUC in early March.

SHANGHAI PROGRAM

Semester or Academic Year Program

East China Normal University

The Shanghai Program at East China Normal University is intended for students who wish to accelerate their acquisition of Chinese and is strongly recommended for all Chinese majors and minors. All students must take a Chinese-language course and other courses on Chinese history, culture, and politics offered in English. All courses are eligible for Notre Dame credit through special arrangement with the Council on International Educational Exchange (CIEE). Detailed program information is available at 152 Hurley, or at CIEE's website: www.ciee.org/study_abroad.

TOKYO PROGRAM

Spring Semester or Academic Year Program

Sophia University

The Tokyo Program is open to sophomores and juniors. All students must take a Japanese-language course and can choose from a wide

variety of other courses offered in English including business, economics, history, literature, philosophy, and sociology. All courses are eligible for Notre Dame credit through special arrangement with the Council on International Educational Exchange (CIEE). Detailed program information is available at 152 Hurley, or at CIEE's website: www.ciee.org/study_abroad.

TOLEDO PROGRAM

Semester or Academic Year Program

Fundacion Ortega y Gasset

The Toledo Program is open to sophomores and juniors in all majors. Students may study for a semester or academic year in Toledo and all courses are taught in Spanish. Students must take five courses through the Centro de Estudios Internacionales, Fundacion Ortega y Gasset. A philosophy course is offered in the fall only; a theology course is offered in the spring. Credit-bearing internships are available in Toledo. Students may apply for internships in several areas, including government, the arts, social service, and communications. Credit toward a major must be approved by an advisor in the major department.

UNDERGRADUATE LONDON PROGRAM

Notre Dame London Centre

Director

Rev. Paul Bradshaw

Deputy Director

Laura Holt

Associate Director

Cornelius O'Boyle

Notre Dame Main Campus

Associate Directors for Recruiting

Geraldine Meehan

Joe Stanfil

2006–2007 Visiting US Faculty

Hafiz Atassi, The Viola D. Hank Professor of Aerospace and Mechanical Engineering
Joseph P. Gultinan, Professor, Marketing
AnnMarie R. Power, Assistant Professional Specialist, Theology
Clark Power, Professor, Program of Liberal Studies; Fellow, Institute for Educational Initiatives; Concurrent Professor, Psychology
Randall Zachman, Associate Professor, Theology

Notre Dame undergraduates from the colleges of arts and letters, business, engineering, and science may elect to spend one semester of their junior year in the Undergraduate London Program. While in London, students take classes offered by Notre Dame and British professors at Notre Dame London Centre near Trafalgar Square. Students participating in the program live as a group in residential facilities with supervision provided by the program. The semester

enables students to combine serious academic study with the opportunity to live and travel in Europe.

The Undergraduate London Program, a division of the University Provost's Office, operates separately from the International Studies Programs. We encourage students interested in London studies for the regular academic year to direct further inquiries regarding location, staff, facilities, curriculum, and requirements to the London Program at 153 Hurley Hall, Notre Dame, IN 46556; Telephone: 574-631-7414; fax: 574-631-3978. Students should also visit our website at www.nd.edu/~londonpr.

Program of Studies. In 1981, the College of Arts and Letters initiated a program for a junior semester in London, believing that the educational and cultural benefits of study with British scholars in London are particularly valuable. In 1997—its tremendous success having attracted attention from other colleges within the University—the London Program was expanded to accommodate both the demand and the curricular needs of students from all of Notre Dame's colleges. Notre Dame's British faculty is selected to be at least on par with that of the home campus, including experts whose work is internationally recognized in their fields.

All London Program courses are Notre Dame courses. Credit hours are recorded on the student's transcript, and quality points are applied to the cumulative average in the usual manner. During the semester in London, each student must carry a course load of between 15 and 17 credits, including a mandatory three credits of fine or performing arts. Most students are able to earn three to six hours of credit toward their majors and to satisfy some University-wide course requirements.

Course descriptions are available on the Undergraduate London Program website at: <http://www.nd.edu/~ndlondon>.

UNDERGRADUATE OXFORD PROGRAM

Director

Joe Stanfil

Associate Director

Geraldine Meehan

The Oxford Program provides juniors in the Colleges of Science and Arts and Letters the opportunity to study at New College, Oxford for a full academic year. Application is by invitation only. New College dictates the fields in which they will accept students each year. The college also requires that candidates have an overall GPA of 3.7 at the time of application.

While there, students participate in Oxford's celebrated tutorial system: rather than taking classes, students work individually with a tutor to pursue their major courses of study in depth. Tutors are full-time faculty at Oxford. They include some of the most accomplished scholars in the world in their fields. Participating students live in New College accommodation and take their meals in the college dining hall. Detailed program information is available at the

Undergraduate London and Oxford Programs office,
153 Hurley Building, 631-7414.

WASHINGTON PROGRAM

Executive Director :

Thomas Kellenberg

Academic Director:

George Lopez

Campus Coordinator:

Elizabeth LaFortune

Sophomores and juniors of any major and college are encouraged to apply to the University's only domestic off-campus program. Participants in the Notre Dame Washington Program live, study, and work in the nation's capital in either the fall or spring semester. The program seeks students who are interested in studying in a vibrant urban setting amid the high energy and excitement of national politics, policy, and the arts.

The curriculum combines course work with internships in government organizations, Congress, the not-for-profit sector, the media, and cultural organizations. Participants live and study in a historic neighborhood in northwest Washington, and close proximity to the metro provides easy access to internship sites, research facilities, and cultural opportunities. Students share well-fitted apartments in a secure building that includes classroom and study space, computers, and laundry facilities. There is no additional charge for the program beyond Notre Dame tuition and room-and-board fees.

All students earn 15 credit a semester by fulfilling a mandatory six-credit policy course, a mandatory three-credit internship, and two three-credit electives from five categories: art history, political science, American studies, history, and philosophy. The campus program coordinator assists each participant with the research and application process for all internships that are suitable to the student's interest and experience.

For more information, see our website at www.nd.edu/~wp.

Physical Education

Chair of Physical Education:

Thomas Kelly

Assistant Professor and Director of Golf Instruction:

Noel B. O'Sullivan

Associate Professional Specialist:

Br. Louis Hurcik, CSC

Associate Professional Specialists:

Michele Gelfman

Denise Goralski

Kristin Kohrt

Jill Grant Lindenfeld

Fran McCann

Dianne Patnaude

Diane Scherzer

Marisha Schmidt

Assistant Professional Specialists:

Nathan Piwowar

Joshua Skube

Darin Thomas

Assistant Professional Specialist and Assistant Athletic Trainer:

William F. Meyer Jr.

The objective of the physical education department is to develop skills, knowledge, greater interest and awareness of the need and benefits offered through wellness and lifetime leisure activities. It is intended that through participation in various physical activities, students contribute to and enhance their physical, mental, and social growth.

To complement and enhance physical education activities, the department offers a required course in Contemporary Topics for College Students. This course is designed to enhance understanding of various components of fitness and selected lifestyle issues that have an impact on the individual. Students will learn to formulate and implement their own fitness and wellness programs through self-testing, evaluations, exercises, and self-assessments.

The department believes that basic swimming skills are important for the student. A swim test will be administered at the beginning of the year to determine each student's ability.

Most students will be able to elect four of the following activities to complete their requirement. It is strongly recommended that activities from both the wellness and lifetime sports tracks be taken.

American Ballroom Dance

Contemporary Topics for College Students

Fencing

First Aid

Fitness for Life

Fundamentals of Physical Activities

Golf

Handball

Hiking/Orienteering

Ice Skating

Introduction to Coaching

Latin Ballroom Dance

Racquet Sports

Self-Defense

Skiing:

Cross Country

Downhill

Soccer

Swimming:

Lifeguard Training

Water Safety Instructor

Team Handball

Tennis

Volleyball

Walking/Jogging

Water Aerobics

Weight Training

Yoga

All activities are offered at the beginning level; however, some activities are offered at an intermediate level. If the student has a physical disability and is unable to participate in activity classes, a specially designed program will be arranged.

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Department of Physical Education](#) heading

Information Technologies

The Office of Information Technologies (OIT) supports eight public-access computer clusters campus-wide, giving students, faculty, and staff access to approximately 425 computers running Macintosh, Windows, and UNIX/LINUX operating systems. Campus computer users are linked to a fiber-optic network backbone that provides access to the Internet. The University is a member of Internet2, which provides high bandwidth access to about 200 leading research universities and supercomputing centers. ResNet, the residence hall Ethernet network, connects undergraduate residence halls and graduate student residences. ResNet provides a dedicated 100 Mb Ethernet connection for every student living on the Notre Dame campus, enabling students to connect their own computers directly to the campus computer network and to the Internet. Students with wireless-capable computers also can connect via Nomad, the University's wireless network that serves all University residence halls and most of the buildings on campus. By August 2006, all residence halls also will have cable television.

The OIT provides all Notre Dame students with an e-mail account, file space, and printing. Students can purchase computers, printers, software, and other peripheral devices at educational discounts at the Notre Dame Computer Store. Microsoft and Corel software offerings, for example, are currently available to the Notre Dame community for considerably less than the retail price. Shop online (<http://oit.nd.edu/store>) or visit the campus store in the IT Center building for substantial savings. Students planning to purchase a computer should consult the

OIT's recommended computer configurations at <http://oit.nd.edu/store/>.

Information technology support services are available to students from the OIT Help Desk and from student Residential Computer Assistants (RCAs). Located on the first floor of the IT Center building, the Help Desk's trained support technicians provide answers to user questions and guide Notre Dame computing users in diagnosing and resolving problems by phone, e-mail, and in person. Help Desk hours are 8:00 a.m. to 5:00 p.m. Monday through Friday (closed Wednesday, 12:00–1:30 p.m.). For more information about the Help Desk, see <http://oit.nd.edu/helpdesk>. In the residence halls, RCAs help students with computers and printing in the evenings and on weekends, and are on call by phone at 631-7610 when the Help Desk is closed (during the day, calls forward to the Help Desk).

Computer-related, non-credit daytime courses are also available to Notre Dame, St. Mary's, and Holy Cross students. These free classes cover a wide range of applications in both Windows and Macintosh. For more information on these and other training programs, see <http://oit.nd.edu/training>.

The Office of Information Technologies provides multiple technology-based services that support teaching and learning at the University. All classrooms in DeBartolo Hall, the University's largest classroom building, are equipped with state-of-the-art audio-visual systems, enabling faculty and students to include multimedia materials in their teaching and learning. Many other classrooms on campus are similarly equipped with technology. Students and faculty can check out microphones, boomboxes, and other devices for classroom use from a service counter in DeBartolo Hall. The OIT also facilitates videoconferencing, video streaming services, and video and audio production and post-production services, including media duplication.

In addition to mainstream computing services, the OIT, in partnership with the Office of Research, maintains the Center for Research Computing to provide an environment and services for computationally intensive work and research. The University provides access to national supercomputing and data resource facilities via Internet2. For more information, visit <http://crc.nd.edu>.

An easy-to-use overview of OIT services and how to obtain them is at <http://oit.nd.edu>. Some Notre Dame colleges have their own computing resources, in addition to the shared facilities and services of the OIT, and provide similar technical assistance.

Anyone using Notre Dame computers and network resources must abide by the policies set forth in the document *Responsible Use of Information Technologies at Notre Dame*. The full text of this policy is available online at <http://oit.nd.edu/policies/rup.shtml> or from the OIT Help Desk.

The Career Center

The Career Center is dedicated to the development and implementation of innovative programs and services that promote lifelong career management skills for students and alumni. By cultivating multi-faceted partnerships/networks, our staff is committed to providing the resources for students to explore diverse career opportunities. Staff members assist undergraduate and graduate students as well as alumni with career counseling, career assessment, group workshops, presentations for academic departments, career fairs, and mock interviews, in addition to other services.

We encourage students to take ownership of their career direction, and be willing to devote the time and energy necessary to conduct a successful search for jobs, internships, fellowships, and/or the identification of graduate school programs. Students have the opportunity to utilize our online databases to pursue postgraduate opportunities, sign up for interviews, and conduct career-related research 24/7.

Workshops, Programs, and Special Seminars.

The Career Center collaborates with the College of Arts and Letters, Mendoza College of Business, College of Engineering, College of Science, and the School of Architecture to coordinate a wide variety of career programs, services, seminars, and workshops for students throughout the year. A sample list includes:

- On-campus career fairs including: *the Fall Career Expo, Engineering Industry Day, the Winter Career and Internship Fair and Diversity Reception, the Nonprofit Career Fair, and the School of Architecture Career Fair*
- Off-campus career fairs and consortia events in New York City, Washington DC, Boston, and Chicago
- Senior "Kick-Off" Orientations
- A variety of workshops dedicated to resumé and cover-letter writing techniques, job and internship search strategies, interviewing skill development, as well as a number of informative programs geared toward students interested in careers in specific industries such as investment banking, the federal government, and media.
- Mock Interview Program
- Indiana Careers Program
- Hot Internships
- What You Can Do with a Major in _____? Series
- City Search Resources
- Get Connected Alumni Shadowing Program
- Dossier/CV Services
- Career and Professional Development Seminar Series for academic course credit
- Access to the Strong Interest Inventory and the Myers Briggs Type Indicator online self-assessment instruments (meeting with a career counselor is a prerequisite).

Internships and Summer Jobs. The Career Center spends a great deal of time with first year, sophomore, and junior students identifying and applying for internships and summer jobs. Students have access to numerous internship databases containing more than 10,000 employment opportunities.

Holy Cross Seminary Formation

The Old College undergraduate seminary program is housed in the original campus structure built in 1843 by Notre Dame's founder, Rev. Edward Sorin, CSC. It welcomes high school graduates with a serious interest in exploring a vocation as a priest or brother in the Congregation of Holy Cross. With nearly 30 men in formation at Notre Dame, Holy Cross is a growing, international religious community with 2,000 priests, brothers, and seminarians in 15 countries throughout the world.

Old College provides an introduction to religious life and ministry in Holy Cross through participation in daily Eucharist and prayer, service placements, spiritual direction, weekly community nights, retreats, and academic preparation, including courses in philosophy and theology. Students can select their own major and tailor the rest of their academic program according to their interests. Old Collegians take all classes with other Notre Dame students and are expected to actively participate in clubs, organizations, and other aspects of campus life. They are also encouraged to spend a semester or year abroad in one of Europe's premiere college seminaries at the Catholic University of Louvain, Belgium. Old College combines a challenging religious formation structure with a complete Notre Dame undergraduate experience.

Moreau Seminary, also located on the Notre Dame campus, is the primary formation house for the Congregation of Holy Cross in the United States. The one-year Candidate Program is a pre-novitiate year designed for those with a bachelor's degree in any field who are prepared to discern a vocation to priesthood or brotherhood within vowed religious life. Candidates typically take nine to 12 hours of philosophy and/or theology credits at the University each semester and have ministry placements supervised by seminary staff. Candidates reside at Moreau Seminary with other priests, brothers, and seminarians. They discern their vocation through spiritual direction and active participation in the community life of Moreau Seminary, which is centered around the daily celebration of the Eucharist and the Liturgy of the Hours. After returning from the novitiate, newly professed seminarians begin their formal academic training in the Master of Divinity program.

Applicants to Old College and Moreau Seminary must be practicing Roman Catholics in good standing with the Church and of solid personal character, with a demonstrated commitment to apostolic ministry. Admission is selective, and personal interviews are required for acceptance into both programs. Tuition scholarship assistance is provided.

Lucero; Raymond Sepeta, Melvin Tardy

Special Support Services:

Nahid Erfan; Sandra Harmatiuk; Barbara

Whalen

The First Year of Studies is the college to which all entering first-year students at the University of Notre Dame are admitted. Its curriculum stresses broad engagement with the arts, sciences, and humanities. It has three major goals. The first is to lay the intellectual foundations necessary for the pursuit of advanced academic work in any of the University's undergraduate colleges. The second is to cultivate both a sense of curiosity about the universe and a passion for the learning. The third is to infuse students with an appreciation for the intrinsic value of higher education and as sense of their responsibilities as stewards of knowledge created, learned, and applied. The First Year of Studies advisors assist the students as they plan their first year at Notre Dame and assist in the transition into the sophomore year. The First Year of Studies faculty are charged with the responsibility of assisting students through group advising sessions, individual meetings, and informal mentoring in the acquisition of these skills and in the development of those disciplines of the mind and heart that will enable them to become rigorous and compassionate intellectuals. A first-year student may request a meeting with a member of his or her advising team, which includes a peer advisor along with a faculty advisor, at any time and for any reason. All first-year students are encouraged to take advantage of this opportunity for personal guidance and assistance.

The academic program for first-year students is determined by the University Academic Council and is constructed around a framework called the First-Year Curriculum. The First-Year Curriculum includes five courses plus physical education or ROTC each semester. These courses are arranged to provide two of the most important features of an academic program for first year students: (1) a foundation in liberal education and (2) an opportunity to sample areas before declaring a major. Because of the specific requirements within the First-Year Curriculum, students gain a broad overview of academic areas. The options and electives found within the curriculum provide the students the opportunity

to explore areas of academic interest open to them. Upon successful completion of the First-Year Curriculum, Notre Dame students advance from the First Year of Studies to one of the other undergraduate colleges: Arts and Letters, Business, Engineering, or Science, or the School of Architecture.

First-Year Curriculum

The First-Year Curriculum consists of five courses plus physical education or ROTC each semester. Many of these courses satisfy University requirements as well as requirements in the student's intended major.

Descriptions and general recommendations concerning each of the courses in the First-Year Curriculum are given in the following pages. In addition, complete instructions for making course selections and detailed course descriptions are included in the *First Year Academic Guide*, which is available on both the First Year of Studies website and is mailed to all incoming students in June.

The courses and course areas in the First-Year Curriculum are a University Seminar; Composition; two semester courses in mathematics; two semester courses in a science, philosophy, theology, fine arts; and two semester courses in physical education and ROTC. Foreign language is not a University requirement, but it is required in the programs of the College of Arts and Letters and College of Science.

In addition to these courses and course areas, the First-Year Curriculum includes three semester elective courses that may be used to sample particular areas of focused education or to further general education. To aid in the sampling, some specific courses are recommended as the best preparation for certain majors and programs.

Entering students are expected to take the entire First-Year Curriculum of five courses per semester, along with the laboratories and tutorials that accompany those courses, plus physical education or ROTC. The applicability of advanced placement credit earned before entering the University is determined by the University department involved. First-year advisors are available to discuss possibly waiving advanced credit in order to take the equivalent University course instead. In addition to the five courses plus physical education or ROTC, it is possible to take a one-credit course or activity such as "Introduction to the Fine Arts at Notre Dame," "Current European Affairs," chapel choir, chorale, chorus, glee club, marching band, orchestra, and other music ensembles. The various colleges have restrictions on how many one-credit voluntary courses may be applied to the total number of credits required for graduation from the colleges.

Course 1—A University Seminar/Composition

A University Seminar and Composition are University requirements. Both courses, a University Seminar and First-Year Composition (FYC), must be taken, one in each semester.

University Seminars are designed to foster intense interaction between first-year students and faculty in small settings. These courses are offered by departments within the College of Arts and Letters and will satisfy the relevant University requirement in history, literature, fine arts, and social science, and the first course of the philosophy or theology requirement. These seminars include a significant writing component and require a minimum of 24 pages with at least one rewrite of an instructor-evaluated paper. Each first-year student will be required to complete one University Seminar.

University Seminar Categories:

Fine Arts	13182:	Seminars offered by the departments of Art History; Film, Television, and Theatre; and Music
History	13184:	Seminars offered by the History Department
	13186:	Seminars offered by the departments of American Studies, Arabic, Classics, East Asian Languages, English, German and Russian Languages, Irish Language and Literature, Romance Languages, and the Program of Liberal Studies
	13185:	Seminars offered by the department of Philosophy
Social Sciences	13181:	Seminars offered by the departments of Anthropology, Economics, Political Science, Psychology, and Sociology
Theology	13183:	Seminars offered by the Theology Department

First-Year Composition courses are designed to help students learn how to identify an issue amid conflicting points of view and craft an argument based on various sources of information. The courses stress the identification and analysis of potential counter arguments and aim to develop skills for writing a research proposal, for conducting original research, and for using print and electronic resources from the library. In addition to traditional First-Year Composition

Courses, community-based, multimedia, and advanced composition courses are offered.

First-Year Composition Courses:

FYC 13100: First-Year Composition

FYC 13200: Community Based First-Year Composition

FYC 13300: Multimedia First-Year Composition

FYC 13400: Advanced First-Year Composition

FYC 13500: Advanced First-Year Multimedia Composition

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD. First-year composition courses can be found under the [College of Arts and Letters](#) section under the [University Writing Program](#).

Course 2—Mathematics

All Notre Dame first year students must take two semesters of mathematics as a University requirement. Students who have credit for the first level of calculus (MATH 10250, 10350, 10550, or 10850) will not fulfill the University requirement unless they take a second level of calculus (MATH 10260, 10360, 10560, or 10860 or 10270) or a non-calculus mathematics course.

Students in the College of Arts and Letters may fulfill their mathematics by taking any two courses in mathematics. They may be calculus courses, non-calculus based courses, or one of each. However, students may not take two beginning level calculus courses to fulfill this requirement.

For students in the Mendoza College of Business, the required calculus sequence is MATH 10250–10260. Also acceptable are the calculus sequences required of students in the College of Engineering or the College of Science.

Students in the School of Architecture take MATH 10250–10270. Also acceptable are the calculus sequences required of students in the College of Engineering or the College of Science.

Students majoring in the College of Science will fulfill their University mathematics requirement through one of the following calculus sequences: MATH 10350–10360, MATH 10550–10560, MATH 10850–10860, or MATH 10450–10460. The MATH 10350–10360 and MATH 10450–10460 sequences are designed for students in programs emphasizing the life sciences, such as biological sciences and the preprofessional (pre-medical) programs in either the College of Science or the College of Arts and Letters. Students planning to enter other science programs that require only two semesters of calculus also may use MATH 10350–10360 to satisfy the requirement, but they should be aware that it is not a suitable prerequisite for the upper-level courses MATH 20550 or 20580. Students planning to major in biochemistry must take MATH 10550–10560.

For students in the College of Engineering, the mathematics requirement is fulfilled through the calculus sequence MATH 10550–10560 or MATH 10850–10860.

The MATH 10850–10860 sequence stresses concepts and proofs. It is a theoretical and even more rigorous course than Math 10550–10560 and is designed especially for students who plan to study mathematics through either the College of Science mathematics major or the College of Arts and Letters honors mathematics major. It is also open to other students with very strong high school mathematics backgrounds.

A student who completes the MATH 10250, 10260 or 10250, 10270 sequences and then decides to enter a science or an engineering program will have to take additional courses in mathematics, as prescribed by the administrator of the program.

Mathematics Courses:

MATH 10110: Principles of Finite Mathematics

MATH 10120: Finite Mathematics

MATH 10130: Beginning Logic

MATH 10140: Elements of Statistics

MATH 10240: Principles of Calculus

MATH 10250: Elements of Calculus

MATH 10260: Elements of Calculus II for Business

MATH 10270: Elementary Calculus in Action

MATH 10350: Calculus A

MATH 10360: Calculus B

MATH 10550: Calculus I

MATH 10560: Calculus II

MATH 10850: Honors Calculus I

MATH 10860: Honors Calculus II

MATH 20550: Calculus III

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Mathematics](#) heading.

Course 3—Science

First-year students usually take two semesters of a science as part of the First-Year Curriculum. The courses offered by the College of Science for first-year students are broadly grouped into two main categories, laboratory sciences and topical sciences. The laboratory sciences are intended for students who are planning to major in one of the sciences or in engineering or perhaps would prefer an in-depth discussion of a particular field of study. The second category, topical sciences, is designed for those first-year students who are planning to enter the College of Arts and Letters, the Mendoza College of Business, or the School of Architecture. These courses are rigorous and intellectually demanding and differ from the laboratory sciences chiefly in that they are often somewhat interdisciplinary in nature

and/or that they focus on themes that may have an ethical or value-related dimension, and they do not include an associated laboratory requirement.

In determining which course to take as Course 3, students should consider the following:

1. All Notre Dame students must, as a University requirement, take two semesters of a science before completion of their sophomore year. However, it is recommended that the science requirement be met in the first year. Students contemplating any of the College of Engineering or College of Science programs or preprofessional studies (premedical and other health-related fields) in the College of Arts and Letters take the science requirement in their first year.

2. Students planning to participate in an international study program during their sophomore year must complete the science requirement in the first year, along with the required language for international study in France or Austria (see Course 5).

3. The science is often a prerequisite for other courses in these programs. Students planning to enter the College of Arts and Letters Preprofessional Program will also take CHEM 10113–10114 or CHEM 10117–10118 in their first year. Students thinking of entering any of the following programs in the College of Science are advised to take CHEM 10113–10114 or CHEM 10117–10118 as their science requirement in the first year: environmental sciences, science preprofessional, science collegiate sequences, biological sciences, mathematics, or physics. Chemistry and biochemistry majors take CHEM 10181 or CHEM 10113. A second science course is required and discussed under Course 5 for students interested in chemistry, biochemistry, biological sciences, environmental sciences, mathematics, or physics.

4. Students planning on an engineering program are required to take CHEM 10113–10114 or CHEM 10121–10122 as the sequence to satisfy the requirement. The correct option is determined by criteria described in the *First Year of Studies Academic Guide*.

5. Prospective arts and letters or business students interested in the environmental sciences second major offered by the College of Science should take CHEM 10113–10114 or CHEM 10117–10118 as their science requirement.

6. Students planning on entering the Mendoza College of Business programs or the College of Arts and Letters programs other than mathematics or pre-professional studies may select freely from among any of the science courses offered and for which they are prepared. However, the following courses are designed for the students planning to enter these programs: BIOS 10104 through 10117; CHEM 10101 through 10104; PHYS 10052, 10062, 10111, 10122, 10140, 10240, 20051, and 20061.

7. First-year students may substitute two semesters of a foreign language in place of two semesters of

science to complete their first-year course requirements. They may also substitute one semester of each, but should keep in mind that the science requirement needs to be completed by the end of the sophomore year.

Laboratory Science Courses:

BIOS 10098: Introductory Biology I
 BIOS 10099: Introductory Biology II
 BIOS 10161: Biological Sciences I
 BIOS 10162: Biological Sciences II
 CHEM 10113: General Chemistry I-T
 CHEM 10114: General Chemistry II-T
 CHEM 10117: General Chemistry I
 CHEM 10118: General Chemistry II
 CHEM 10121: General Chemistry: Fundamental Principles
 CHEM 10122: General Chemistry: Biological Processes
 CHEM 10181: Introduction to Chemical Principles
 CHEM 10182: Organic Structure and Mechanism
 ENVG 10110: Physical Geology
 PHYS 10310: General Physics I
 PHYS 10320: General Physics II
 PHYS 10411: General Physics A-M Mechanics
 PHYS 10424: General Physics B-M Waves/Thermo

Topical Sciences Courses:

BIOS 10101: Human Genetics, Evolution, and Society
 BIOS 10106: Common Human Diseases
 BIOS 10107: Ecology and Evolution
 BIOS 10115: Microbes and Man
 BIOS 10117: Biodiversity: Its Challenge and Future
 BIOS 10118: Ecology and Wildlife Biology
 CHEM 10101: Foundations of Chemistry
 CHEM 10102: Chemistry, Environment, and Energy
 PHYS 10052: Concepts of Energy and Environment
 PHYS 10062: Science Literacy
 PHYS 10111: Principles of Physics I
 PHYS 10122: Principles of Physics II
 PHYS 10140: Descriptive Astronomy
 PHYS 10240: Elementary Cosmology
 PHYS 20051: Energy and Society
 PHYS 20061: Nuclear Warfare

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Course 4—University Requirement or Elective: History, Social Sciences, Philosophy, Theology, Literature, Fine Arts, and Languages

The First-Year Curriculum provides an opportunity for each first-year student to take three elective courses. Typically these courses are selected in order to explore academic interests or to satisfy University or intended college program requirements.

Every Notre Dame first-year student must take at least one semester of fine art, history, literature, philosophy, social science, or theology during their first year.

Specific recommendations for electives are made for only three of the intended college programs. The College of Engineering recommends that first-year students planning on majoring in engineering take PHYS 10310 in the spring semester as their Course 4 elective, as should students intending on pursuing the combined Arts and Letters/Engineering Program. Students intending to study architecture are advised to take ARCH 11021 as their Course 4 elective in the spring semester.

University Requirement and Elective Courses

History:

HIST 10210: Ancient Greece and Rome
 HIST 10200: Western Civilization I
 HIST 10400: Western Civilization II
 HIST 10600: US History I: From Colonial America to 1877
 HIST 10605: US History II: From Reconstruction to the Present
 HIST 10750: National Security Policy in US History

Social Sciences:

ANTH 10109: Introduction to Anthropology
 ANTH 20360: Societies and Cultures of Latin America
 ANTH 20520: Archeology of Egypt
 ECON 10010: Principles of Microeconomics
 ECON 10020: Principles of Macroeconomics
 POLS 10100: American Politics
 POLS 10200: International Relations
 POLS 10400: Comparative Politics
 POLS 10600: Political Theory
 PSY 10000: Introductory Psychology
 SOC 10002: Understanding Societies
 SOC 10033: Introduction to Social Problems
 SOC 10722: Introduction to Social Psychology

Philosophy:

PHIL 10100: Introduction to Philosophy

Theology:

THEO 10001: Foundations of Theology: Biblical/Historical

Literature:

CLAS 10200: Greek and Roman Mythology
 MELC 10101: Introduction to Arabic Culture and Civilization

Fine Arts:

ARHI 20441: Introduction to 20th-Century Art
 ARST 11201: Drawing I
 ARST 11301: Painting I
 ARST 11601: 3-D Foundations
 ARST 21101: Ceramics I
 ARST 21401: Photography I
 DESN 11100: 2-D Foundations
 FTT 10101: Basics of Film and Television
 FTT 10701: Introduction to Theater
 FTT 20705: Performance Analysis
 MUS 10131: Introduction to Jazz
 MUS 10133: Gender, Sexuality, and Pop Media
 MUS 10111: Introduction to Music of the 18th Century
 MUS 10150: Music of the Catholic Rite
 MUS 20001: Theory I
 MUS 20002: Theory II
 MUS 20011: Musicianship I
 MUS 20012: Musicianship II
 MUS 20101: Medieval and Renaissance Music: History I
 MUS 20112: Music History II

Elective for Supplementary Major or Minor:

GSC 10001: Introduction to Gender Studies

Languages:

CLGR 10001: Beginning Greek I
 CLGR 10002: Beginning Greek II
 CLGR 20003: Intermediate Greek
 CLLA 10001: Beginning Latin I
 CLLA 10002: Beginning Latin II
 CLLA 20003: Intermediate Latin
 EALC 10101: Beginning Chinese I
 EALC 10102: Beginning Chinese II
 EALC 10103: Intermediate Chinese
 EALC 10111: Intensive First-Year Chinese I
 EALC 10112: Intensive First-Year Chinese II
 EALC 20211: Second-Year Chinese I
 EALJ 10101: Beginning Japanese I
 EALJ 10102: Beginning Japanese II
 EALJ 10103: Intermediate Japanese
 EALJ 10211: Intensive First-Year Japanese I
 EALJ 10212: Intensive First-Year Japanese II
 EALJ 20211: Second-Year Japanese I
 EALJ 20212: Second-Year Japanese II
 GE 10101: Beginning German I
 GE 10102: Beginning German II
 GE 10111: Intensive Beginning German I
 GE 10112: Intensive Beginning German II
 GE 20201: Intermediate German I
 GE 20202: Intermediate German II
 GE 20211: Intensive Intermediate German I
 GE 20212: Intensive Intermediate German II
 IRLI 10101: Beginning Irish I
 IRLI 10102: Beginning Irish II
 LLRO 10101: Beginning Quechua I
 MEAR 10001: First-Year Arabic I
 MEAR 10002: First-Year Arabic II
 MEHE 10001: Elementary Hebrew
 ROFR 10101: Beginning French I
 ROFR 10102: Beginning French II
 ROFR 10115: Intensive Beginning French
 ROFR 20201: Intermediate French I
 ROFR 20202: Intermediate French II

ROFR 20215: Intensive Intermediate French
 ROFR 20300: Conversational French
 ROFR 27500: Approaches to French and Francophone Cultures
 ROFR 30310: Textual Analysis
 ROFR 30320: Advanced Grammar and Composition
 ROIT 10101: Beginning Italian I
 ROIT 10102: Beginning Italian II
 ROIT 10115: Intensive Beginning Italian
 ROIT 20201: Intermediate Italian I
 ROIT 27500: Intermediate Italian II
 ROIT 20215: Intensive Intermediate Italian
 ROIT 30310: Textual Analysis and Advanced Grammar
 ROPO: 10103: Brazilian Portuguese Language and Culture I
 ROPO: 10104: Brazilian Portuguese Language and Culture II
 ROPO: 10105: Portuguese for Spanish Speakers I
 ROPO: 10106: Portuguese for Spanish Speakers II
 ROPO: 20201: Intermediate Portuguese I
 ROPO: 20202: Intermediate Portuguese II

 RU 10102: Beginning Russian II
 RU 20101: Intermediate Russian I
 RU 20102: Intermediate Russian II

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Course 5—Program Requirement or Elective

Any of the courses listed under Course 4 may be taken as a Course 5 elective, unless the student's intended major requires him or her to take a particular course instead. These required courses will be discussed below. Most students should use this elective to explore areas of academic interest, and many students may want to consider continuing in or beginning foreign language study.

Language is required by the College of Arts and Letters and the College of Science. The languages available include Arabic, Chinese, French, German, Greek, Irish, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Students with previous background in a language who want to continue their language study must take a placement exam to determine proper placement. However, students with no

previous background in a language can elect a beginning-level course. See the Credit and/or Placement by Examination section below for more information on placement in a language course. Regardless of their scores on the credit or placement examinations, students in the college of Arts and Letters must take at least one language course in residence at Notre Dame. In the College of Science, students who place higher than the intermediate level (third semester) are considered to have fulfilled the language requirement and need not take any additional courses in the language. Students contemplating an international study program that requires language study should consult with the language department regarding the appropriate language preparation. All students are encouraged to start their study of language during their first year or the beginning of their second year at the latest.

First-year students who plan to participate in an international study program during their sophomore year must complete both their science and foreign language requirements during their first year. There is no opportunity to take a science course abroad, and the requirement must be satisfied by the end of the sophomore year.

Students intending to major in biology, biochemistry, chemistry, environmental science, mathematics, or physics will take more than one science each semester and need to use Course 5 to take the second science. The second science course sequence for the chemistry and mathematics programs is PHYS 10131–10320; for the environmental science, biochemistry, and biology programs, it is BIOS 10161–10162; and for the physics program, it is PHYS 10411–10424.

Students intending to major in studio art should take DESN 11100 and ARST 11201 as their fifth course, and students intending to major in Music should take MUS 20001 and 2002 and a one-credit course each semester.

Students intending to major in architecture are expected to take ARCH 11021 and 10311.

College of Engineering intents should enroll in EG 10111–10112 as their fifth course.

See the various college's and departments' summaries in this *Bulletin* for details on the requirements for all of these program.

Program Requirement Courses Not Previously Listed:

ARCH 10311: Analysis of Architectural Writing
 ARCH 11011: Graphics I-Drawing
 ARCH 11021: Graphics II-Drafting
 EG 10111: Introduction to Engineering Systems I
 EG 10112: Introduction to Engineering Systems II

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Physical Education or Reserve Officers Training Corps Program

All Notre Dame first-year students must take two semesters of physical education as a University requirement. However, first-year students who enroll and remain in an ROTC program are exempted from physical education.

Specific physical education rotations are chosen after arriving on campus. The complete descriptions for all of the courses associated with this program can be found on the enclosed compact disc within the [University section](#) under the [Department of Physical Education](#) heading.

Reserve Officers Training Corps Program (ROTC) Courses:

AS 10101: Foundations of the US Air Force
 AS 10102: Foundations of the US Air Force
 MSL 10101: Foundations of Officership
 MSL 10102: Basic Military Leadership
 NSCI 10101: Introduction to Naval Science
 NSCI 10102: Maritime Affairs

Voluntary Courses

In addition to five academic courses and PE or ROTC, voluntary one- and two-credit courses are offered in the areas of the fine arts, history, music, dance, and business. These courses may not be substituted for any of the six required courses. The colleges have restrictions on the number of one- or two-credit courses that will be applied to the total number of credits required for graduation from the colleges.

Voluntary Courses:

BAUG 10000: Introduction to Business
 BAUG 30210: Ten Years Hence Lecture Series
 FTT 10401: Introduction to the Fine Arts at Notre Dame
 HIST 10040: Current Affairs in Historical Context
 MUS 10201: Brass Ensemble
 MUS 10203: Chamber Ensemble
 MUS 10210: Chorale
 MUS 10221: Glee Club
 MUS 10222: Collegium Musicum
 MUS 10230: Jazz Band
 MUS 10241: Wind Ensemble
 MUS 10244: Concert Band
 MUS 10245: University Band
 MUS 10247: Concert Winds
 MUS 10249: Marching Band
 MUS 10250: Symphony Orchestra
 MUS 10251: Chamber Orchestra
 MUS 10300: MUS 11340: Voice and Instrumental Lessons
 THEO 33950: Social Concerns Seminar: Appalachia
 THEO 33963: Social Concerns Seminar: The

Church and Social Action
THEO 33936: Summer Service Learning:
Confronting Social Issues

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Credit and/or Placement by Examination

The First Year of Studies processes advanced credit. However, it is the other University departments and colleges in coordination with First Year of Studies, that determine exactly what advanced credit will be awarded. Students are sometimes wise to waive advanced credit and to take the class at Notre Dame instead. This is especially true for students who may wish to pursue a degree in one of the preprofessional (premedical) majors. It is often a good idea for them to take chemistry and biology at the University even if they have advanced credit for those courses. First-year advisors are available to discuss these issues with students both in the summer and during the academic year.

Entering first-year students may become eligible for credit by examination in four ways: (1) through the Advanced Placement Program administered by the College Entrance Examination Board, (2) through the SAT II-Subject Tests in French, German, Italian, and Spanish, (3) through the International Baccalaureate Program administered by International Baccalaureate North America, (4) through the Notre Dame Mathematics Credit Examination Program. Students' placement may be determined through the online Notre Dame French, German, and Spanish placement examinations, but no credit is awarded.

1. *Advanced Placement Program (AP)*—Students who submit results of Advanced Placement examinations are eligible to receive placement and credit in accordance with the accompanying table.

2. *SAT-II Subject Tests (SAT II)*—Results of CEEB Advanced Placement Examinations or the SAT-II Subject Tests in French, German, Italian, or Spanish are used for course placement and credit by examination purposes in accordance with the accompanying table.

3. *International Baccalaureate Program (IB)*—Students who submit results of International Baccalaureate Higher Level examinations are eligible to receive placement and credit in accordance with the accompanying table. The University does not give credit for Subsidiary Level examinations.

4. *Notre Dame Mathematics Credit Examination Program*—First-year students may take examinations for possible course placement and credit in mathematics after they arrive on campus. The examinations will be based on college-level courses.

The Advanced Placement Examinations

AP Examination	AP Grade	Number of Credits Awarded	Notre Dame Course Typically Waived
American History	4	6	History 10600 and 10605
Biology	5	8	Biological Sciences 20201 and 20202
Biology	4	3	Biological Sciences 10101
Calculus AB	3	3	Mathematics 10250
Calculus AB	4	4	Mathematics 10550
Calculus BC	3	3	Mathematics 10250
Calculus BC	4	8	Mathematics 10550 and 10560
Calculus BC (AB Subscore)	3	3	Mathematics 10250
Calculus BC (AB Subscore)	4	4	Mathematics 10550
Chemistry	5	8	Chemistry 10117 and 10118
Chemistry	4	3	Chemistry 10101
Economics (Macroeconomics)	5	3	Economics 10020
Economics (Microeconomics)	5	3	Economics 10010
English (either exam)	4	3	First-Year Composition 13100
European History	4	6	History 10200 and 10400
Political Science (American Politics)	4	3	Political Science 10100
Political Science (Comparative)	4	3	Political Science 10400
Latin (either exam)	4	6	Latin 110002 and 20003
Physics B	5	8	Physics 30210 and 30220
Physics B	4	6	Physics 10111 and 10122
Physics C (Mechanics)	5	4	Physics 10310
Physics C (Mechanics)	4	3	Physics 10111
Physics C (Electricity and Magnetism)	5	4	Physics 10320
Physics C (Electricity and Magnetism)	4	3	Physics 10122
Psychology	4	3	Psychology 10000
Statistics	4	3	Mathematics 10140

Notre Dame Online French, German and Spanish Placement Examination Programs—First-year students may take online examinations for placement only. These examinations are available during the summer as well as during the academic year.

When credit is awarded, the dean of the First Year of Studies has it entered on the student's transcript, which is maintained by the registrar's office. This credit can be applied toward required or elective courses if the student's particular college program

permits. If Advanced Placement, International Baccalaureate, or Notre Dame Mathematics Examination credit is not applicable in a specific college program, that credit is recorded on the student's transcript, but it represents credit in excess of graduation requirements. Placement, but not credit, for the Notre Dame online placement examinations is recorded in the student's official records, but not on his or her transcript.

The general guideline is that credit by examination is counted as required or elective credit if the course is required or permitted in a particular college

SAT II Subject Tests for French, Spanish, and German

SAT II Subject	Advanced Placement	Credits (Courses)	Placement Level
French and French with Listening			
790–800	5 (lang)/4 (lit)	6 (20201–20202)	30310 or 30320
690–780	4 (lang)/3 (lit)	6 (20201–20202)	20300 or higher
590–780	3 (lang)/2 (lit)	6 (10102–20201)	20202
490–580	2 (lang)/1 (lit)	6 (10101–10102)	20201 or 20215
480	1 (lang)	3 (10101)	10101 or 10115
Spanish and Spanish with Listening			
790–800	5 (lang)/4 (lit)	6 (20201–20202)	30310 or 30320
690–780	4 (lang)/3 (lit)	6 (20201–20202)	20300 or higher
590–780	3 (lang)/2 (lit)	6 (101012–20202)	20202
490–580	2 (lang)/1 (lit)	6 (10101–10102)	20201 or 20215
480	1 (lang)	3 (10101)	10101 or 10115
German and German with Listening			
790–800	5 (lang)/4 (lit)	6 (10201–20201)	20202 or 30000+
690–780	4 (lang)/3 (lit)	6 (10101–10102)	20201
590–780	3 (lang)/2 (lit)	3 (10101)	10102
Italian and Italian with Listening			
790–800	5 (lang)/4 (lit)	6 (20201–20202)	30310
690–780	4 (lang)/3 (lit)	6 (20201–20202)	20202
590–780	3 (lang)/2 (lit)	6 (101012–20202)	10201 or 10215
490–580	2 (lang)/1 (lit)	3 (10101)	10102

program. Credit by examination is not counted as required or elective credit if the number of the course for which credit is awarded is lower than the initial course required in a particular college program. For example, if a student earns a 4 on the Advanced Placement Physics B test, the six credits awarded for PHYS 10111–10122 would count toward graduation in a College of Arts and Letters, Mendoza College of Business, or School of Architecture program. The credits would not count toward graduation in the engineering college program since the initial physics course in this college program is PHYS 10310. On the other hand, if the number of the course for which credit is awarded is higher than the initial course required in a particular college program, the credit awarded satisfies that requirement. For example, credit awarded for MATH 10550–10560 also satisfies the mathematics requirement for programs requiring MATH 10350–10360 or MATH 10250–10260.

Language placement—Students with no previous background in a language can elect a beginning-level course. Students with previous background in a language who want to continue their language study must take a placement exam to determine proper placement.

Students may use the results from a foreign language credit by examination (AP, SAT II, IB) for placement, as described under the Credit by Examination table. A maximum of six credits can be granted for performance on a foreign language credit by examination.

Students who have not taken a language credit by examination before entering Notre Dame, may take one at Notre Dame. All foreign language departments at Notre Dame offer placement exams. The French, German and Spanish placement exams are available on-line. Placement exams for other languages are given during the First-Year Orientation Weekend in August and at least twice during the school year in time for fall and spring advance registration. Information on language placement is sent to incoming first-year students during the summer. The appropriate department and the First Year of Studies will guide students with previous instruction in their languages after reviewing their high school background and placement tests.

Regardless of their scores on credit or placement exams, students in the College of Arts and Letters must take at least one language course in residence at Notre Dame. Arts and Letters students must also complete at least one course at the intermediate or higher level that deals with texts in the original language. If placement allows one course at Notre Dame at the intermediate or higher level may satisfy both parts of this requirement. In the College of Science, students who place higher than the intermediate level (third semester) are considered to have fulfilled the language requirement and need not to take any additional courses in the language. Students contemplating an international study program that requires language study should consult with the language department regarding appropriate language preparation. All students are encouraged to start their study of language during their first year or the beginning of their second year at the latest.

International Baccalaureate—Notre Dame Credit

International Baccalaureate Subject (Higher Level)	IB Grade Required	No. of Credits Awarded	Notre Dame Course Typically Credited
Biology	6	6	BIOS 101101 and 10107
Biology	7	8	BIOS 20201 and 20202

College Credit from Other Institutions

The University's other colleges and departments, in consultation with the First Year of Studies, determine whether or not college courses completed prior to first-year enrollment and taken at other institutions will be accepted for credit. In order to be considered for credit, these courses must have been completed on college campuses and must not have been used to satisfy high school graduation requirements or Notre Dame requirements for first-year admission. An official transcript, a course syllabus, and a copy of the published description of the course are also necessary for consideration of the course for credit. Normally, courses specified in the First-Year Curriculum may not be satisfied through transfer credit. First-year students need to resolve all college credit situations before or during their first semester at Notre Dame.

Learning Resource Center

In addition to individual and group advising, peer advising, the First Year of Studies offers first-year students a large support system to assist them in making a successful transition from high school learning strategies to college-level skills. The Learning Resource Center houses the Learning Strategies Program, the Tutoring Program, and the Collaborative Learning Program. There is no additional charge or fee for any of these programs.

Learning Strategies Program

All first-year students interested in improving their skills for success in college may schedule small group workshops or individual meetings with the First Year of Studies learning strategies specialist. The Learning Strategies Program covers a variety of topics of practical value to students (e.g., time management, note taking, test preparation) and includes individual assistance with writing and reading for various academic genres.

Tutoring Program

The First Year of Studies Tutoring Program is available to all first-year students who would like to improve on their understanding of course material. The tutoring offered through this program is not meant to replace classroom instruction, tutorials, recitation-quizzes, private meetings or any other aids offered by a teacher or through a course. Students enrolled in the Tutoring Program meet in small groups of up to 15. Some individual tutoring occurs, but small group tutoring often proves more effective. The small size and more flexible pace of the tutoring session encourages peer interaction, which may not occur naturally in a large lecture format, in addition to the more traditional tutor-student interaction, and provide a conducive setting for students to ask individual questions.

Collaborative Learning Program

The Collaborative Learning Program is open to all first-year students. In collaborative learning sessions, students solve homework problems together while focusing on the problem-solving methods. Collaborative learning resource leaders monitor the sessions, encourage problem-solving and collaboration among group members, and answer questions when necessary.

First-Year Goals

The First Year of Studies, its curriculum, and its support systems are all designed to encourage first-year students to work toward gaining an understanding of how the arts, sciences, and humanities enable one to engage in a serious exploration of the important and complicated questions, the questions that deal with matters pertaining to God, nature, and human institutions. They are designed to help students become acquainted with the disciplines that make up these areas of intellectual inquiry and to begin to engage these questions by selecting challenging classes, attending public lectures, building collaborative relationships with peers, and by seeking opportunities to forge mentoring relationships with faculty.

School of Architecture

Dean:

Michael N. Lykoudis

Associate Dean:

John Stamper

Assistant Dean:

Rev. Richard S. Bullene, CSC

Professors:

Robert L. Amico; Philip H. Bess; Norman A. Crowe; Dennis P. Doordan; Michael N. Lykoudis; Thomas Gordon Smith; Carroll William Westfall

Associate Professors:

Richard Economakis; Sally Hood; David Mayernik; Steven Semes; John W. Stamper; Duncan G. Stroik; Samir Younés

Assistant Professors:

Imdat As; Barbara Kenda; Krupali Uplekar

Visiting Professors:

Barbara Littenberg; Ingrid Rowland; Steven Peterson

Visiting Associate Professor:

Ronald Sakal

Visiting Assistant Professors:

Steve Bass; Diana Creech; Frank Huderwitz; Thomas Lowing; Ettore Mazzola; Richard Piccolo

Concurrent Assistant Professor:

Giovanna Lenzi-Sandusky

Professional Specialists:

Robert J. Brandt; Rev. R.S. Bullene, CSC; Al DeFrees

Program of Studies. The study of architecture has a long and distinguished history at the University of Notre Dame. Courses in architecture were taught at the University as early as 1869. Formal instruction in architecture began in 1898. The Department of Architecture, previously part of the College of Engineering, became the free-standing School of Architecture in 1994. The school offers a five-year program leading to the degree of bachelor of architecture and a two-year program leading to the degree of master of architecture. The program is accredited by the National Architectural Accrediting Board, and the curriculum conforms to NAAB requirements for the professional degree in architecture.

Since the early 1990s, the school's curriculum has been based on education in traditional and classical architecture and urbanism. Instruction teaches the skills, cultivates the talents, and imparts the knowledge necessary to produce buildings that represent innovation within long-standing traditions, use nature's materials responsibly, and contribute to building livable communities. The school believes this is best done by learning how recurring problems in designing and constructing buildings and fitting them into existing urban and rural settings

have been addressed in the past and adapting those lessons to the ever-changing circumstances of the modern world.

The goals of the curriculum include developing competence in the design of individual buildings, understanding the relationship between individual buildings and their physical and cultural contexts, and recognizing the ethical dimensions of the professional practice of architecture. Architects play a primary role in shaping the built environment and have a professional responsibility to do so in a manner that contributes to the civil life of society. Their work must also help to renew and sustain the integrity of the natural world and promote social welfare.

While the primary objective of the curriculum is professional education, students have opportunities to explore fields such as business, engineering, environmental sciences, and the liberal arts through electives and building on University requirements.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit US professional degree programs in architecture, recognizes three types of degrees: the bachelor of architecture, the master of architecture, and the doctor of architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

In addition to the first professional degree of bachelor of architecture (BArch), the School of Architecture offers three paths of graduate studies leading to one of two degrees. The Path A graduate course of study leads to the two-year post-professional master of architectural design and urbanism degree (MADU), which is intended for people already holding a professional degree in architecture (BArch or MArch). The Path B graduate course of study leads to a two-year master of architecture (MArch) professional degree, and is intended for people holding a four-year undergraduate pre-professional degree with a major in architecture. The Path C graduate course of study leads to a three-year master of architecture (MArch) professional degree, and is intended for people holding undergraduate degrees in a field other than architecture. All three

graduate paths of study entail a one-year concentration in either classical architecture or urban design, and conclude with a semester-long independent design project.

A concentration in furniture design is also an option within the first professional degree program. Required courses for the concentration are ARCH 41811, Beginning Furniture; ARCH 41821, Advanced Furniture Design; ARCH 57811, Special Studies in Furniture Design; ARCH 57821, Special Studies in Furniture Design 2; and either AMST 20107, American Art: History and Culture, or AMST 43109, Material America. (Either of the last two courses will satisfy a portion of the University history requirement.)

Both the undergraduate and graduate programs at Notre Dame take advantage of the school's proximity to Chicago. In addition, all third-year students spend the academic year in the school's Rome Studies Center in Italy. All graduate students spend a spring semester there. Some limited scholarship aid is available for the additional expenses incurred in Rome.

The initial phase of undergraduate architectural study is devoted to acquiring basic design and technical skills and developing an understanding of architectural concepts by learning canonical forms of classical architecture and manipulating them in design problems. The sophomore year begins with paradigmatic projects and ends by solving complex and challenging building programs. The sophomore foundation is reinforced in the third year, which is spent in Rome. There, 2,500 years of building tradition provides the context for contemporary design problems. Fourth-year students return to Notre Dame, where they are reintroduced to the American context. At this stage, students are encouraged to synthesize their interpretations of the historical legacy in the context of American urban centers and small cities. They are also challenged by projects that require them to engage architectural problems outside their normal Western focus. The undergraduate program culminates with a thesis design project completed in the fifth year of study. In 2000, the school opened the South Bend Downtown Design Center, which it operates in collaboration with the Downtown Partnership. This center provides fourth- and fifth-year students with opportunities to do community planning projects and architectural design exercises in conjunction with local architects, planning officials, and community groups. In addition to studio instruction, students complete course work in structural, mechanical, and environmental systems and architectural history. History and theory courses in the School of Architecture include a two-semester survey of the history of architecture from the earliest times to the present and specialized

SCHOOL OF ARCHITECTURE

upper-level course work in selected topics involving the history and theory of architecture.

Students are in contact with practicing professionals through collaboration between the School of Architecture and the South Bend Downtown Design Center, as well as the Northern Indiana Chapter of the American Institute of Architects. The School of Architecture has an active chapter of the American Institute of Architecture Students.

Facilities. The School of Architecture is located in Bond Hall of Architecture. This building, the former University Library, was thoroughly rebuilt from 1995 through 1996. The 60,000-square-foot building contains classrooms, an auditorium, library, computer lab, and studios that are both functional and designed in accord with the historical limestone structure. The Rome Studies Center is in the heart of Rome's historic center.

Richard H. Driehaus Prize in Classical Architecture
Richard H. Driehaus, the founder and chairman of Driehaus Capital Management in Chicago, initiated the Richard H. Driehaus Prize in Classical Architecture to honor a major contributor in the field of traditional and classical architecture or historic preservation. In 2004, he initiated the Henry Hope Reed prize to recognize outstanding contributions to the welfare of the traditional city and its architecture. He established the prizes through the University of Notre Dame's School of Architecture because of its reputation as a national leader in incorporating the ideals of traditional and classical architecture into the task of modern urban development.

First Year

First-year students intending to major in architecture take the following courses:

<i>Course</i>	<i>First Semester Credits</i>	<i>Second Semester Credits</i>
Composition/ University Seminar	3	3
MATH 10250 and 10270	3	3
PHYS 10111 and 10122 or PHYS 10111 and Science Elective	3	3
History or Social Science	3	—
ARCH 11011. Graphics I: Drawing	3	—
ARCH 11021. Graphics II: Drafting—	—	3
ARCH 10311. Architectural Writings	—	4
Physical Education	—	—
	15	16

The courses listed below indicate the normal sequence for sophomore, junior, senior, and fifth years majoring in architecture.

Sophomore Year

<i>First Semester</i>	
ARCH 21111. Design I	6
ARCH 20411. Building Technology I	3
ARCH 20211. Architectural History I	3
ROIT 10105. Beginning Italian I	3
Theology or Philosophy	3
	18

Second Semester

ARCH 21121. Design II	6
ARCH 20221. Architectural History II	3
ARCH 20511. Structural Mechanics for Architects	3
ROIT 10106. Beginning Italian II	3
Theology or Philosophy	3
	18

Junior Year (Rome Studies Program)

<i>First Semester</i>	
ARCH 31112. Design III	6
ARCH 30312. Architectural History III	3
ARCH 30212. Roman Urbanism and Architecture I	3
ARCH 31012. Graphics III: Freehand Drawing	3
	15

Second Semester

ARCH 31122. Design IV	6
ARCH 30322. Architectural History IV	3
ARCH 30222. Roman Urbanism and Architecture II	3
ARCH 31022. Graphics IV: Watercolor	3
	15

Senior Year

<i>First Semester</i>	
ARCH 40411. Environmental Systems I	3
ARCH 41411. Design V	6
ARCH 41011. Graphics V: Computers	3
ARCH 40511. Structural Design for Architects	3
Theology or Philosophy	3
	18

Second Semester

ARCH 41121. Design VI	6
ARCH 40421. Building Technology II	3
ARCH 40521. Applied Structural Systems	3
Theology or Philosophy	3
Social Science or History	3
	18

Fifth Year

<i>First Semester</i>	
ARCH 51111. Design VII	6
ARCH 504191. Environmental Systems II	3
Elective	3
Elective	3
	15

Second Semester

ARCH 51121. Design VIII (Thesis)	6
ARCH 50711. Professional Practice	3
Elective	3
Elective	3
	15

Total for five years: 163 semester hours.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [School of Architecture](#) section.

Student Awards and Prizes

Henry Adams Medal and Certificate. This American Institute of Architecture (AIA) award honors the graduating architecture student who has the highest grade-point average for the complete course of study.

Henry Adams Certificate. This AIA award is given to the graduating architecture student with the second-highest grade-point average for the complete course of study.

Tau Sigma Delta Bronze Medal Winner. The Tau Sigma Delta medal is awarded to a graduating student selected by his or her peers in recognition of design excellence.

Andrew F. Kervick Award for Design and Drawing. Founded by Prof. Francis W. Kervick, former head of the School of Architecture in memory of his father, this award, selected by the fourth and fifth-year faculty, honors the student whose work in freehand drawing in the fourth or fifth year has been of the highest merit.

Alpha Rho Chi. Selected by faculty, the Alpha Rho Chi Medal goes to the graduating student who has shown ability for leadership and has performed willing service for the School.

Rambush Prize in Religious Architecture. Selected by the fifth-year thesis jury and faculty, the Rambush Prize is given for the best solution to a problem related to a religious architecture project.

Ralph Thomas Sollitt Award. Founded in 1931 by Ralph Sollitt and Sons Construction Co., this award, selected by the fifth-year thesis jury, is given to the student who submits the best design as a solution to the thesis architecture problem.

Ferguson and Shamamian Undergraduate Prize. Selected by the fifth-year thesis jury, the Ferguson & Shamamian Architects Undergraduate Prize is awarded to a fifth-year student for excellence in classical design exhibited in thesis.

The Association of Licensed Architects Student Merit Award. Selected by the fifth-year faculty, the ALA Student Merit Award goes to a graduating student recognized for exemplary achievements throughout the scholastic year.

Dean's Award for Design Excellence in Architecture. Selected by the fifth-year thesis jurors and the dean, this award goes to overall excellence in a fifth-year thesis project.

The Noel Blank Design Awards. Founded by Leon W. Blank in memory of his brother, Noel, this high honor goes to the top four thesis projects as selected by the fifth-year thesis jurors.

Gertrude S. Sollitt Prize for Architectural Structure. Founded in 1931 by Ralph Sollitt and Sons Construction Co., this award, selected by the School's faculty, goes to the student who submits the best work as a solution to a special problem in structure assigned in the scholastic year.

The St. Joseph Award in Furniture. Selected by the furniture design professor for excellence in furniture design and construction.

Nellie Wynn Kervick Award for Design and Drawing. Founded by Prof. Francis W. Kervick, former head of the School of Architecture in memory of his mother, this award, selected by the Rome Studies faculty, honors the student whose work in freehand drawing in the third year of study has been of the highest merit.

Alice Wesoloski Scholarship. For her decades of service to the School of Architecture, this award was established in honor of Ms. Wesoloski. Selected by the faculty and the office of financial aid to provide tuition assistance to a student of particular ability, character and need.

James E. Childs and Associates Scholarship. Selected by the faculty and the office of financial aid to provide tuition assistance to minority students of particular ability and need.

David M. Schwarz/Architectural Services, Inc. Internship and Traveling Fellowship Award. A two-month paid internship for a fourth-year student with David M. Schwarz/ Architectural Services, Inc. and a one-month travel fellowship involving independent research and study.

Ray Stuermer Memorial Award for Excellence in Design. Given in memory of former Professor Ray Stuermer, this award, selected by faculty, is given on the basis of design work through the fourth year for overall improvement and design excellence.

Frank Montana Rome Scholarship Award Winners. Selected by the dean, second-year design faculty and the office of financial aid, the Montana Rome Scholarships are for tuition assistance in connection with the Notre Dame Rome Studies Program.

Student Organizations

AIAS, Student Chapter of the American Institute of Architects. Students begin to engage in the professional activities of the national AIAS by attending meetings and conventions and structuring activities within the School of Architecture. The AIAS sponsors educational, professional and social events in the school.

Tau Sigma Delta. In 1961 the Sigma Chapter of Tau Sigma Delta, the national architectural honor society, was established at Notre Dame. The constitution of Tau Sigma Delta stresses as its sole function the encouragement of high scholastic standing. Election to membership is limited to the top 20 percent of the students in the School of Architecture who have completed 60 percent of their requirements for the professional degree.

College of Arts and Letters

The College of Arts and Letters is the oldest, and traditionally the largest, of the four undergraduate colleges of the University of Notre Dame. It houses 17 departments and several programs through which students at both undergraduate and graduate levels pursue the study of the fine arts, the humanities and the social sciences.

Liberal Education. The College of Arts and Letters provides a contemporary version of a traditional liberal arts educational program. In the college, students have the opportunity to understand themselves as heirs of a rich intellectual and spiritual tradition and as members of a complex national and international society. The faculty of the college are committed to the life of the mind, to the critical and constructive engagement with the whole of human experience. On the basis of a firm yet broad foundation, graduates of the college are equipped for a lifetime of learning in an ever-changing world. The overall curriculum and the specific major programs encourage students to approach issues reflectively, to analyze them carefully and to express their reasoned conclusions with clarity.

The intellectual quest conducted in the College of Arts and Letters takes place in an explicitly Catholic environment. Here ultimate questions of the meaning and value of human life before God are welcome, and efforts to deal with such questions utilize the immense resources of the Catholic tradition. Inquiry and faith are seen not as opposing forces but as complementary elements of the fully human pursuit of truth.

Organization. The college's administrative center, the Office for Undergraduate Studies, is located in 104 O'Shaughnessy Hall. Sophomores who have not yet declared a major and students of all levels in the college with questions about college or University requirements should seek advising there. Staff members are also available to discuss academic progress, problems or career goals with all students. Pre-law and preprofessional advisors are also available in this office.

Because education is not limited to the classroom, the college also sponsors or helps to subsidize events which are intended to enrich the undergraduate experience and facilitate faculty-student interaction both on and off campus.

Curricula and Degrees. The College of Arts and Letters offers curricula leading to the degree of bachelor of fine arts in Art (Studio and Design) and of bachelor of arts in:

American Studies
Anthropology
Arabic Studies

Art:

Art History
Design
Studio

Classics:

Arabic
Classical Civilization
Greek
Latin

East Asian Languages and Literatures:

Chinese
Japanese

Economics

English
Film, Television, and Theatre

German and Russian Languages and Literatures:

German
Russian

History

Mathematics (honors only)

Medieval Studies

Music

Philosophy

Philosophy/Theology (joint major)

Political Science

Program of Liberal Studies

Psychology

Romance Languages and Literatures:

French and Francophone Studies
Italian
Romance Languages and Literatures
Spanish

Sociology

Theology

The college also offers supplementary majors, but not stand-alone first or degree-yielding majors, in:

Arts and Letters Preprofessional Studies (ALPP)

African and African American Studies, Africana Studies

Art History (24 hours)

Asian Studies (24 hours)

Chinese (24 hours)

Classics (24 hours)

Computer Applications (CAPP)

French (24 hours)

FTT—Theatre (24 hours)

Gender Studies (24 hours)

German (24 hours)

Greek and Roman Civilization (24 hours)

History (24 hours)

Italian (24 hours)

Japanese (24 hours)

Latino Studies (24 hours)

Mathematics (42 hours)

Medieval Studies (24 hours)

Peace Studies (24 hours)

Philosophy (24 hours)

Russian (24 hours)

Spanish (24 hours)

Theology (25 hours)

Admission Policies. Admission to the College of Arts and Letters takes place at the end of the first year. The student body of the College of Arts and Letters thus comprises sophomores, juniors and seniors.

The prerequisite for admission of sophomores into the College of Arts and Letters is good standing at the end of the student's first year.

The student must have completed at least 24 credit hours and must have satisfied all of the specified course requirements of the First Year of Studies Program: University Seminar; Composition; two semester courses in mathematics; two semester courses in natural science; one semester course chosen from history, social science, philosophy, theology, literature or fine arts; and two semester courses in physical education or in ROTC. (The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy or theology.) Two semesters of physical education are also required. A student who does not meet all of these conditions is retained in the First Year of Studies until all of the conditions are met. The deficiencies must be removed at the Notre Dame Summer Session or in the student's third semester at Notre Dame.

Description of General College Requirements.

Every student graduating from the College of Arts and Letters must have a minimum of 120 credit hours and must have fulfilled all University, college and major requirements. Unless special permission has been obtained in advance from the Office for Undergraduate Studies, special studies and directed readings courses do not satisfy university or college requirements.

University Requirements	Courses
Composition	1
Mathematics	2
Science	2
*History	1
*Social Science	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature (Physical Education)	1 2

14

* One of these requirements must be a University Seminar.

Arts and Letters Requirements

College Seminar	1
Language	1–3
+History/Social Science	1
*Literature or Fine Arts (whichever is not taken above)	1
Major	8–12

+ In addition to the University requirement of one history and one social science course, the college requires a third course, which can be either history or social science.

*The arts and letters student is required to complete one fine arts and one literature course.

University requirements are described under “Degree Requirements,” in the front section of this *Bulletin*.

Course Load. The normal course load in the College of Arts and Letters is five courses. The maximum number of credit hours per semester is 17. Overloads for juniors and seniors are allowed only with the permission of the deans in the Office for Undergraduate Studies and only during the designated days of the enrollment period.

Writing Requirement. Students in arts and letters are required to complete one course in their major at the 30000- or 40000-level designated as a writing-intensive course. This course may satisfy other distributional requirements within the major. Writing intensive courses require the student to work closely with a professor throughout the semester on a significant written project.

Activity and Experiential Learning Courses. Three elective credits of the required 120 hours can be derived/obtained from the following activity courses:

- Band (Marching and Concert)
- Orchestra
- Chorale
- Glee Club
- Liturgical Choir
- Folk Choir
- Music Lessons and Ensembles
- Ballet
- Debate
- Social Concerns Seminars

Exceptions will be made for music majors. Registering for these courses will not affect a student’s overload status. These credits do not count toward a student’s 17 semester hours. If students complete more than three of these courses, these will appear on a student’s transcript, but the extra credits will be subtracted from the student’s total number of hours at the time the graduation check is made; hence, these will not count toward the 120 hours needed to graduate.

Pass-Fail. Juniors and seniors may take one non-major, non-required elective course each semester on a pass-fail grading basis. These declarations must be made during the enrollment period of each semester, and once made, these declarations are irreversible.

Arts and Letters Degree Credit. Students should not have both examination and degree credit for the same course. For example, students should take either Theology 10001 or 20001 and Philosophy 10101 or 20101, but not both. Economics 10015 and 20015 are considered to be equivalent courses, as are Economics 20020 and 20010. Students should take only one of each pair but not both. In cases where students have double credit for the same course, the credits for only one course will be counted toward a student’s degree credit despite the fact that credits for both will appear on the student’s transcript. A list of equivalent math and science courses can be found under “Mathematics,” later in this section of the *Bulletin*. The same rules about double credit apply to them.

No courses in logic will satisfy the University philosophy requirement for students in arts and letters. After matriculation into the college, it is the expectation that arts and letters students will complete any outstanding math or science requirements at Notre Dame.

ROTC. First-year students enrolled in any of the three ROTC programs are exempted from the University’s physical education requirement. Credits received for 10000- and 20000-level ROTC courses do not count toward a student’s 120 credit hours, despite the fact that they appear on the transcript. They will be manually subtracted from the student’s total number of hours appearing thereon. The College of Arts and Letters accepts a maximum of 12 free elective credits only for ROTC students from the 30000- and 40000-level military sciences only. Non-ROTC students may not take ROTC courses for credit toward graduation except by special permission obtained in advance of registering for the course from the deans in the Office for Undergraduate Studies. If a non-ROTC student registers in ROTC classes without first acquiring permission, these credits will appear on the student’s transcript, but the credits will be subtracted manually from the student’s total hours at the time the graduation check is made.

Dual Degree. Programs leading to dual degrees (two undergraduate degrees, such as a bachelor of arts and a bachelor of business administration) are distinct from programs in which a student receives one degree with two majors (such as a bachelor of business administration with a major in finance and a major in political science). Dual degree programs require the permission of the deans of both colleges. There are additional requirements which usually result in the need for a fifth year. Dual degree students in the college are required to take the Arts and Letters College Seminar.

The requirements for a dual degree generally are as follows: The student completes all of the University requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a

dual degree in two colleges. While the total number of hours required does depend on the two major programs, the minimum required total number of degree credits is set to be 30 degree credits beyond the college total for the college with the greater number of degree credits.

International Studies. In light of the expansion of Notre Dame’s international study programs, the provost’s office has asked that students be encouraged to participate in University programs whenever possible. Limited exceptions, however, will be made for students whose academic or programmatic needs cannot be met through existing Notre Dame programs, i.e., Chinese or Russian majors who wish to pursue language instruction in Beijing or St. Petersburg, or art history majors who may require a semester in Florence. These exceptions will be made on an individual basis after extensive consultation with both the students and their faculty advisors.

Student Awards and Prizes

COLLEGIATE AWARD IN MODERN AND CLASSICAL LANGUAGES

The Robert D. Nuner Modern and Classical Language Award—presented to the graduating senior in the College of Arts and Letters with a first or second major, in any classical or modern foreign language, who has earned the highest cumulative grade point average.

AMERICAN STUDIES

James E. Murphy Award for Excellence in Journalism—open to graduating American studies majors or non-majors with an interdisciplinary minor in Journalism, Ethics and Democracy.

Paul Neville Award for Journalism—awarded to a senior in American studies for excellence in journalism.

Hugh A. O’Donnell Award in American Studies—awarded to a senior in American studies for superior academic achievement.

Prof. James Withey Award—awarded to a senior in American studies for notable achievement in writing.

ANTHROPOLOGY

The David Huffman Scholar/Athlete Award in Anthropology—awarded to the student with outstanding performance in the major and in athletics.

The Irwin Press Prize in Medical Anthropology—awarded for the best paper in medical anthropology.

The Julian Samora Award—awarded to an outstanding senior majoring in anthropology.

The Paul Farmer Service Award—awarded to the student who has used his/her anthropological training for public service.

The Peter Brown Professional Achievement Award—awarded to the anthropology student with outstanding performance in the tasks of a professional academic in one or more of the following areas: publication, presentation at professional meetings, grants, and fellowships.

The Reverend Raymond W. Murray, CSC, Award in Anthropology—awarded to an outstanding senior majoring in anthropology.

The Robert DaMatta Excellence in Anthropology Award—awarded to all students who achieve a 4.0 grade-point-average in the anthropology major.

ART, ART HISTORY, AND DESIGN

Grief Art Awards—awarded to outstanding senior BFA students to defray the cost of their thesis exhibitions.

Emil Jacques Medals for Work in the Fine Arts—The department awards a gold medal and a silver medal for excellence in studio art to undergraduates pursuing a BFA.

Mabel L. Mountain Memorial Art Award—awarded for excellence in studio art.

The Radwan and Allan Riley Prize in Design—awarded to a senior design major for excellence in his or her respective field.

The Radwan and Allan Riley Prize in Studio Art—awarded to a senior studio art major for excellence in his or her respective field.

The Radwan and Allan Riley Prize in Art History and Criticism—awarded for the best essay in art history or criticism submitted by an undergraduate or graduate student.

Eugene M. Riley Prize in Photography—awarded to an undergraduate or graduate photography major for excellence in photography.

Judith A. Whappe Memorial Award—awarded to an outstanding junior studio/design major. It is presented at the beginning of the student's senior year of study.

ARTS AND LETTERS PREPROFESSIONAL

The Dr. Robert Joseph Barnet Award—presented to an outstanding Arts and Letters preprofessional senior who has demonstrated, in addition to excellent character, superior academic achievement across the arts and sciences.

The Dr. John E. Burke Award—presented to an outstanding Arts and Letter preprofessional senior who has demonstrated, in addition to excellent academic achievement, outstanding leadership qualities through service within and/or beyond the Notre Dame community.

CLASSICS

Departmental Award in Greek, Latin, or Arabic—awarded when merited to a graduating senior for excellence in study of: Greek, Latin or Arabic.

EAST ASIAN LANGUAGES AND LITERATURES

Departmental Awards in Chinese and Japanese—awards given when merited to graduating seniors for excellence in Chinese and Japanese language studies.

ECONOMICS

The Weber Award—awarded to the senior economics major who has achieved the highest academic average.

John Harold Sheehan Prize Essay Award—given to the senior economics major who has written the best senior honors essay in economics.

The John Joyce Award on the American Worker—The award is given as merited to the best undergraduate short story or poem on the "American Worker," by the Higgins Labor Research Center and the Economics Department. (There is also a graduate award for the best graduate essay).

ENGLISH

The Academy of American Poets Award—awarded to the undergraduate or graduate student submitting the best collection of original poetry.

The Ernest Sandeen Poetry Award—awarded to the best original poetry submitted by an undergraduate.

Eleanor Meehan Medal for Literary Merit—presented to the English major who submits the best original critical essay written for an English course.

The Richard T. Sullivan Award for Fiction Writing—awarded to the undergraduate who submits the best original fiction manuscript.

FILM, TELEVISION, AND THEATRE

Joseph P. O'Toole Jr. Award—The award was established by Joseph P. O'Toole Jr. (BA, 1948) of San Jose, California, and goes to the outstanding graduating senior in film and television.

Catherine Hicks Award—This award was established by Catherine Hicks (BA '74, Saint Mary's) of Los Angeles and goes to the outstanding graduating senior in theatre.

GENDER STUDIES

The David and Shari Boehnen Internship Awards—awarded for outstanding summer internships won by Gender Studies students.

Gender Studies Outstanding Essay Award—awarded to the best undergraduate essay.

GERMAN AND RUSSIAN LANGUAGES AND LITERATURES

The Rev. Lawrence G. Broestl, CSC, Award—presented to the graduating senior with the best academic achievement in German.

Jeffrey Engelmeier Award—presented to the outstanding student of German whose leadership and contribution to the life of the department are especially conspicuous.

Delta Phi Alpha German Honor Society Award—awarded to a graduating senior for outstanding achievement in the study of German language and literature.

The Russian Language and Literature Award—presented to the graduating senior with the best academic achievement in Russian.

The Lauren B. Thomas Scholarship—Awarded by the Russian faculty to an outstanding Russian major who exhibits financial need.

HISTORY

The Monsignor Francis A. O'Brien Prize—presented to the senior who has achieved distinction in the best essay in history.

The O'Hagan Award—awarded to the undergraduate who has submitted the best original essay on a phase of Irish history.

The O'Connell Award—an annual award for the best sophomore or junior essay in history.

LATIN AMERICAN STUDIES

John J. Kennedy Prize for Latin American Studies—awarded to the senior who has written an outstanding essay on Latin America. (Occasionally there is a runner-up award).

MEDIEVAL STUDIES

Michel Prize in Medieval Studies—given to graduating senior who has written the best essay on a medieval subject.

MUSIC

Department of Music Senior Award—awarded to the outstanding senior in the Music Department.

PHILOSOPHY

The Dockweiler Medal for Philosophy—presented to the senior submitting the best essay on a philosophical subject.

The John A. Oesterle Award in Philosophy—awards given when merited to graduating philosophy majors for excellence in philosophy.

POLITICAL SCIENCE

Paul Bartholomew Essay Prize—awarded to the senior major submitting the best senior honors essay in the fields of American politics or political theory.

The Stephen Kertesz Prize—awarded to a senior major submitting the best senior honors essay in the fields of international relations or comparative politics.

PROGRAM OF LIBERAL STUDIES

The Edward J. Cronin Award—awarded annually to a student in the Program of Liberal Studies for excellence in writing in regular course work.

The Willis D. Nutting Award—given to the senior major who has contributed most to the education of fellow students.

The Otto A. Bird Award—awarded to the senior in the Program of Liberal Studies who has written the best senior essay.

PSYCHOLOGY

Senior Recognition Award in Psychology—given in recognition of outstanding achievement in research, academic performance, and student-life activities, while pursuing a major course of study in psychology.

The John F. Santos Award for Distinctive Achievement in Psychology—to a senior psychology major in recognition of outstanding achievement in research, academic performance, and student-life activities.

ROMANCE LANGUAGES AND LITERATURES

Walter Langford Awards for Excellence in Spanish Literature and Excellence in French Literature—two awards—to the graduating senior majors in French and Spanish literature whose work was deemed most outstanding by the Romance languages and literatures faculty.

The Joseph Italo Bosco Senior Award—awarded to a graduating senior for excellence in Italian studies.

SOCIOLOGY

The Margaret Eisch Memorial Prize in Sociology—awarded to the outstanding graduating senior majoring in sociology.

The Sociology Major Essay Award—presented to the senior sociology major who has written the best essay.

THEOLOGY

The Gertrude Austin Marti Award in Theology—presented to a graduating senior who has evidenced qualities of personal character and academic achievement in theological studies.

The Rev. Joseph H. Cavanaugh, CSC, Award—awarded to the senior who has evidenced high qualities of personal character and academic achievement, particularly in theological studies.

Service Awards

AMERICAN STUDIES

J. Sinnott Meyers Award—awarded to a senior in American studies for outstanding service to the academic community.

ANTHROPOLOGY

The Department of Anthropology Service Award—awarded to the student who has contributed the most to the department's sense of community.

ECONOMICS

Lawrence J. Lewis Award—awarded to the senior in the Department of Economics who has best distinguished himself or herself in community service.

MUSIC

The Daniel H. Pektke Memorial Award—presented to two underclassmen in the Notre Dame Glee Club in recognition of musical leadership, exemplary personal character and overall contribution to the success of the group.

Outstanding Band Member—for loyalty, dedication, and leadership.

Gerald J. Smith Memorial Award—awarded for citizenship and loyalty to band.

Outstanding Marching Band Award—awarded for dedication, ability, and leadership during marching band season.

The Kobak Memorial Scholarship—for outstanding instrument achievement for band.

Robert F. O'Brien Award—for outstanding service and dedication to the band.

Thomas J. Kirschner Band Treasurer Prize—annual award to the elected band treasurer.

Band Vice President Prize—annual award to the elected vice president of the band.

Terry Baum Secretary Prize—awarded to the secretary of the band and presented by the University of Notre Dame.

Halland President's Prize—annual award for the outgoing president of the band.

Social Chairperson Award—plaque given annually to the social chairperson in appreciation for dedication and service to the Notre Dame bands.

POLITICAL SCIENCE

George Brinkley Service Award—awarded to the student who best exemplifies the Political Science Department's ideal of public service through service to the department, the University, or the wider community.

ROMANCE LANGUAGES AND LITERATURES

William Richardson Award in Hispanic Culture for an African American Student—given to a graduating African American student who has shown an unusually strong interest in Hispanic culture through his or her active participation in campus and/or community projects or activities.

José Tito Sigüenza Award for Service to Hispanic Youth—awarded to the senior who has studied Spanish at Notre Dame and contributed outstanding service to Hispanic youth.

Carlos Aballi Award in Hispanic Cultural Awareness—given to a graduating Hispanic student who has taken Spanish at Notre Dame and has been active in promoting Hispanic cultural awareness at Notre Dame.

The Mara Fox Award for Service to the Hispanic Community—awarded to a graduating senior who has performed outstanding service benefiting the Hispanic community.

Special Arts and Letters Requirements

Language Requirement. Students in arts and letters are required to reach intermediate proficiency in a foreign language, but “intermediate proficiency” is defined differently in each of the languages, depending on the complexity of the language itself and the intensity of the course. Students without Advanced Placement or SAT II credit, but who come with some background in the language they elect will be placed by examinations given during first-year orientation and prior to spring preregistration. Departmental placement exams will not be credit-bearing. Students may receive up to six hours of credit based on their scores on the AP and SAT II tests. If, for some reason, a student receives more than six hours of credit that appear on the transcript, the credits beyond six will be non-counted and will be manually subtracted from the total number of degree credits counting for graduation. Regardless of the scores on these exams, it is impossible for a student to test out of the language requirement in the College of Arts and Letters. Every student in arts and letters must take at least one course at the appropriate level that deals with texts in the original language. For the specific details of a given language offering or program, check with the relevant department.

College Seminar. The College Seminar is a unique one-semester course experience shared by all sophomores majoring in the College of Arts and Letters. The course offers students an introduction to the diversity and distinctive focus of arts and letters at the University of Notre Dame. Specific sections of the College Seminar vary in their topics and texts, but all feature an interdisciplinary approach, commitment to engaging important questions,

employment of major works, and emphasis on the development of oral skills. Every College Seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the college: the arts, humanities, and social sciences.

For descriptions of the University and other colleges' requirements, see "Degree Requirements" in the front section of this *Bulletin*.

Arts and Letters Programs

The programs offered by the College of Arts and Letters include majors, supplementary majors, and minors, which may be either departmental or interdisciplinary. Every student in the college must complete one major sequence. Supplementary majors and minors are optional and may be taken to supplement or enhance a student's major but do not lead to graduation in and of themselves.

Double-Counting

One course may be double-counted one time to fulfill a second major, supplemental major, or minor requirement and a University or college requirement. No course may be double-counted between majors and minors or between a first major and University or college requirements. University Seminar, by definition, fulfills a University or college requirement and is not considered a double count under this rule.

Majors

A major sequence is a carefully chosen combination of courses from an individual department or program that stand alone in qualifying students for an undergraduate degree. They usually consist of between eight and 12 courses. In contrast to the University and college requirements that provide students with broad exposure to a variety of the liberal arts and sciences, the major affords the student an opportunity to gain more specialized knowledge of a particular field or discipline.

The major in liberal arts programs is normally chosen during the sophomore year and is completed during the junior and senior years. Each spring before preregistration, the college holds a series of programs and meetings to inform the students about the various majors so that they may make intelligent choices. Students pursue their majors under the direction of the departmental or program chair and its advising staff.

Supplementary majors are those that cannot stand alone in qualifying a student for an undergraduate degree but must be taken in conjunction with a primary major. They include both interdisciplinary and departmental offerings.

Arts and Letters Preprofessional Studies (ALPP)
African and African American Studies
Art History (24 hours)
Chinese (24 hours)

Classical Civilization
Classics
Computer Applications (CAPP)
FTT–Theatre
French (24 hours)
Gender Studies
German (24 hours)
Greek and Roman Civilization (24 hours)
History (24 hours)
Italian (24 hours)
Japanese (24 hours)
Latino Studies (24 hours)
Medieval Studies (24 hours)
Philosophy (24 hours)
Russian (24 hours)
Spanish (24 hours)
Theology (25 hours)

Self-Designed Majors. A program for a special self-designed major was approved by the college council during the 1994–95 year. The self-designed major involves substantive integration of the subject matter in ways that cannot be undertaken within any existing major, minor, area studies, or concentration program.

The Process:

- Interested students, in consultation with three faculty sponsors from at least two departments, should present a detailed written proposal of their major (which has been signed by their faculty sponsors) to the Undergraduate Studies Advisory Committee no later than Friday before the midsemester break of each semester up to the second semester of the sophomore year. One of the faculty sponsors should be identified as the chair of the supervising committee.
- Approval of the special major will be granted by the dean, on the recommendation of the Undergraduate Studies Advisory Committee. The committee will review the proposals and communicate their recommendations to the students before the preregistration period begins. As it deliberates, the committee may ask for additional information from the student, faculty sponsors and other colleagues in related areas to assist in further refining and rewriting the original proposal. It is the expectation that the on-campus portions of the major will rely heavily on existing courses.
- Special majors must culminate in a capstone essay or where appropriate, other work, which will be evaluated by more than one faculty member. (In most cases, it is assumed that the faculty evaluators will be the faculty sponsors). A detailed proposal of the capstone project must be submitted to the faculty sponsors by November 1 of the senior year. It is expected that a capstone essay will consist of between 30 and 50 pages (7,500–15,000 words).
- Changes in an individual program need the approval of the chair of the supervising committee and the dean. If students discover midstream that they are unable to complete the special major, it may

be "dropped," but they must then complete one of the traditional departmental majors. Retroactive proposals will not be considered. Thus, these programs should be well under way by the middle of the junior year.

5. Administration of special majors will take place through the Office of Undergraduate Studies in a manner similar to that of the ALPP program; i.e., students will pick up their PINs in 105 O'Shaughnessy.

6. The college council will periodically review the special major program.

Minors

Minors are five-course sequences that can either be departmental or interdisciplinary. The college has three categories of minors: Departmental, Interdisciplinary, and Area Studies.

Departmental:

African American Studies
Anthropology
Art History
Chinese
Classical Literature
East Asian Languages and Literature:
 Chinese
 Japanese
French and Francophone Studies
German
Greek
Greek and Roman Civilization
Irish Languages and Literatures
Italian
Japanese
Latin
Music
Russian
Theology

For details, see the departmental descriptions in the section "Programs of Study."

Interdisciplinary:

Catholic Social Tradition
Education, Schooling, and Society
Gender Studies
Hesburgh Program in Public Service
Journalism, Ethics, and Democracy
Liturgical Music Ministry
Medieval Studies
Peace Studies
Philosophy and Literature
Philosophy, Politics, and Economics (PPE)
Philosophy Within the Catholic Tradition
Religion and Literature
Science, Technology, and Values

Area Studies:

African
Asian
European
Irish
Latin American

Latino
Mediterranean/Middle East
Russian and Eastern European

Electives

In addition to the University and college requirements and the major, the balance of a student's usual five-course-per-semester program consists of elective courses, which can be drawn from the offerings of any department or college that are open to non-majors who have met the necessary prerequisites.

American Studies

Chair:

Benedict F. Giamo

Professors:

F. Richard Ciccone (adjunct); Eugene Halton (concurrent); Thomas J. Schlereth; Robert P. Schmuhl; H. Ronald Weber (emeritus)

Associate Professors:

Elizabeth Christman (emerita); Walton Collins (adjunct); Jack Colwell (adjunct); Benedict F. Giamo; Matthew Storin (adjunct); Don Wycliff (adjunct)

Assistant Professors:

Heidi Ardizzone; Collin Meissner

Visiting Welch Chair Professors:

Alex Kotlowitz (fall semester only)
Gudrun Grabher (spring 2007)

The Department of American Studies provides students with a unique opportunity to study American culture and society in challenging and innovative ways. Students majoring in American Studies explore the American experience from both integrative and disciplinary perspectives by selecting interdisciplinary courses taught by the Department's faculty as well as cross-listed classes offered by Anthropology, English, Political Science, History, and Sociology. With help from a faculty advisor, a student plans a curriculum of 12 courses, six from within American Studies and six in American subjects offered in cognate departments. The interdisciplinary courses housed in the Department of American Studies span a broad range of academic interests: Arts and Material Culture; Journalism and Media Studies; Literature and Society; and Social History/Movements. Courses in these academic areas typically include an historical dimension, insights gathered from a variety of sources, perspectives drawn from traditional disciplines, and an integrative approach that complements specialism. Because of its breadth, the major enables students to experience much of the richness of the College of Arts and Letters. Internships are available which offer practical experience in the potential career areas of historical research, journalism, publishing, and social service. Special features include an affiliated interdisciplinary minor in Journalism, Ethics, and Democracy.

The American Studies curriculum concentrates on the writing process at all levels of instruction. For 20000-level courses, a minimum of 8–10 pages of written work is required in addition to reader

response, midterm, and final exam assignments. For 30000-level courses, a minimum of 10–12 pages is required. For 40000-level senior academic seminars taught by our teaching and research faculty, a minimum of 20 pages of written work (one research paper due at the end of the semester) is required; these senior seminars will be guided by a writing-intensive process (i.e., drafts, revisions, peer review when appropriate, and individual consultations between professors and students). Every American studies major must take at least one 40000-level senior academic seminar.

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of American Studies](#) heading.

INTERNSHIPS

All American Studies Internships provide opportunities for practical work experiences under the supervision of a professional. Students will spend nine to twelve unpaid, supervised hours per week on the job, the hours to be arranged between the student and the "employer." Intern candidates should so arrange their academic schedule as to allow large chunks of time for internship work, such as entire days or entire mornings.

Anthropology

Chair:

Mark R. Schurr

Edmund P. Joyce Professors of Anthropology:

Roberto A. DaMatta (emeritus); James J. McKenna (on leave 2006–07)

Nancy O'Neill Associate Professor of Anthropology:

Agustín Fuentes (on leave 2006–07)

Professors:

Leo A. Despres (emeritus); Carolyn Nordstrom (on leave 2006–07); Carl W. O'Neill (emeritus); Irwin Press (emeritus); Lawrence Sullivan (concurrent)

Associate Professors:

James O. Bellis (on leave 2006–07); Susan D. Blum (on leave spring 2007); Douglas E. Bradley (concurrent); Meredith S. Chesson (on leave 2006–07); Rev. Patrick D. Gaffney, CSC; Ian Kuijt); Joanne M. Mack (concurrent); Cynthia Mahmood; Kenneth E. Moore (emeritus); Mark R. Schurr; Susan G. Sheridan

Assistant Professors:

Daniel H. Lende; Vania Smith-Oka

Director of Undergraduate Studies

Deborah L. Rotman

Visiting Assistant Professors:

Summer Arrigo-Nelson; Greg Blomquist; Mark Hauser; Eric Lindland

Adjunct Associate Professor:

Robert Wolosin

Adjunct Instructor:

Devorah Snively

Program of Studies. The undergraduate program in anthropology is designed to provide each student with a broad, holistic, integrated and species-wide perspective on contemporary human behavior. Anthropology may be the only major that provides significant intellectual and professional links with the humanities and other social science fields, while also providing separate bridges into both the natural sciences and the field of business. In so doing the anthropology major prepares students for successful entry into any number of fields and disciplines and their appropriate professional graduate schools including medical schools, public health, and law. Human evolutionary models, critical comparative analysis, ethnographic methods, and a variety of developmental approaches are taught and applied in our classes to such diverse topics and research areas as: health; illness; addiction; human communication (verbal and non-verbal); human origins; the nature of social groups; the family; worldwide political and socio-economic systems; religion; warfare; infancy and childhood; non-human primate ecology and behavior; the archaeology, prehistory, and ethnology especially of North America and the Middle East; sexuality; museum studies; China; Latin America; evolutionary medicine; transnationalism; sex and gender; and medical anthropology.

In moving toward our goal to achieve national prominence as one of the top undergraduate research and teaching departments in the nation, our faculty stress the importance of innovative and significant undergraduate research. We aim to provide as many majors as is possible with hands-on research experiences both in the field and laboratory. Two Smithsonian and two Chicago Field Museum summer research internships created by the department are available to majors. It is common that throughout the school year and summer that the faculty pair up with students to conceptualize and work together on research projects both here and abroad. Often this collaborative research leads to joint publications. Our undergraduate students receive many undergraduate research awards from the University and regularly attend national professional meetings and stand alongside graduate students and professors from around the nation to present the results of their research. Our anthropology minors also participate to a high degree.

Aside from its applicability and relevance across different disciplines, professions, and careers, one of the truly unique aspects of anthropology is that it changes in a most profound and insightful way the manner in which our students experience and come to interpret their own lives. The subject of anthropology is, of course, humankind as viewed not through a local lens limited by the biases or world view of one's own culture, but by a view that attempts to reconcile and understand the intersecting and sometimes conflicting, yet, often logical alternative ways by which our fellow human beings live and think.

Perhaps it is the result of this very personal encounter, experienced alongside exposure to the very best scholarship, that permits our anthropology students to connect so easily and successfully with the diverse professional communities. This relative fluidity by which our graduates make the transition into so many diverse fields, the knowledge and skills gained by studying anthropology, in addition to providing keen insights into others, enriches one's understanding of one's self. In this way anthropology maximizes the chances of personal achievement and self-fulfillment, and proves a surprisingly powerful beginning point for just about any career.

Writing-Intensive Requirements: All courses taught in the department include writing components, which are both informal and formal and vary by course level. These assignments may include reading response papers, journals, in-class writing, analyses, field research, or research papers. Courses offered in anthropology develop both critical thinking skills and global awareness through written and other assignments. Every major is required to take an advanced theory seminar (ANTH 40400, Perspectives in Anthropological Analysis) where they develop analytical and synthetic skills through intensive writing assignments combined with class discussion.

PROGRAMS

1. **The Major.** There are no prerequisites to the major. **The major requires 27 credits, nine of which must be in the sequence of fundamentals, including ANTH 30101 (Fundamentals of Human Evolution), ANTH 30102 (Fundamentals of Archaeology), ANTH 30103 (Fundamentals of Social and Cultural Anthropology), and ANTH 30104 (Fundamentals of Linguistic Anthropology).** In addition, majors must take ANTH 40400 (Perspectives in Anthropological Analysis), one methods course (three credits), and 12 credits of electives. **At least six credits of the electives must be at the 40000 level.** It is recommended that students take the fundamentals by the end of their junior year, whereas ANTH 40400 is usually taken as a junior or senior.

2. **The Honors Major.** The honors major requires 33 credits. In addition to the above program, the honors student will take one additional methods course (three credits) and one additional 40000-level course (three credits) taken in the senior year, which satisfies the honors experience.

3. **The Minor.** The minor requires 15 credit hours. There are no prerequisites. Students must take three of the four fundamentals, ANTH 30101, 30102, 30103, and 30104. In addition, students must take six credits of electives.

Courses taken for pass-fail credit will not satisfy requirements for the major, the honors major, or the minor.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Anthropology](#) heading.

Courses in which graduate students may enroll and for which graduate credit may be obtained are indicated with an asterisk (*) before the course number. Special requirements are made of graduate students who enroll in these courses.

Art, Art History, and Design

Chair:

Dennis P. Doordan

Professors:

Austin I. Collins, CSC; Dennis P. Doordan; William J. Kremer; Kathleen A. Pyne; Charles M. Rosenberg

Associate Professors:

Charles E. Barber; Robert R. Coleman; Rev. Jean A. Dibble; Paul A. Down; Rev. James F. Flanagan, CSC; Richard L. Gray; Martina A. Lopez; Rev. Martin Lam Nguyen; Robin F. Rhodes; Maria C. Tomasula

Assistant Professors:

Nyame O. Brown; John K. Caruso; Robert P. Sedlack; Terri Weissman

Associate Professional Specialist:

John F. Sherman

Concurrent Assistant Professors:

Douglas E. Bradley; Stephen R. Moriarty
The department. The Department of Art, Art History, and Design at the University of Notre Dame, as part of the College of Arts and Letters, is dedicated to the liberal education of the whole person. The art and design student, guided by an active faculty, can expect to become critically aware of the rich artistic past and challenged to become a thoughtful maker of contemporary visual expression. The art history student, under the tutelage of an expert faculty, will achieve a broad and evaluative knowledge of the art of the Western world. An active lecture and visiting artist series and the extensive collections of the Snite Museum of Art strengthen and broaden the work in the classroom and studio. The South Bend and Chicago area provide additional cultural activities and experiences.

The department has 14 visual art and design and seven art history faculty. The student may pursue one of three degrees at the undergraduate level: the bachelor of arts (BA) in studio art and design or a BA in art history, or the bachelor of fine arts (BFA) in studio art and design. Studio concentrations are offered in ceramics, design, painting, photography, printmaking and sculpture. The size of the department enables the serious student to receive a solid foundation and, through personal contact with the faculty, to develop a creative individual direction in

a discipline. The department is further enriched by an active graduate program offering the MFA degree in studio art and design and the MA degree in art history.

The art history classrooms and the art image library are housed on the first floor of O'Shaughnessy Hall. Offices for the art history faculty are in Decio Faculty Hall. The departmental office is in Riley Hall, as are the art and design faculty studios. Riley Hall also houses all the visual arts activities in well-equipped studios that are always available for student use. Skilled technical staff and support facilities are available as appropriate for each medium that is offered.

Writing-Intensive Requirement: The Department of Art, Art History, and Design fulfills the College of Arts and Letters writing-intensive requirement by requiring all majors in each of the three departmental areas (ARST, DESN, and ARHI) to enroll in at least one upper-level (3xxxx or 4xxxx) art history course. All upper-level ARHI courses include a writing component that satisfies the College of Arts and Letters writing-intensive requirement.

THE STUDIO ART AND DESIGN MAJOR

Bachelor of Arts Degree in Studio Art and Design

The Bachelor of Arts degree program in art and design is defined as a general liberal arts degree. The BA degree is ideal for the student who desires a liberal education with a strong emphasis in art. Students enrolling in the BA degree program are required to complete a five-course core curriculum during their first three semesters. These courses are Drawing I, 2-D Foundations, 3-D Foundations, one course treating material from before 1600 taught by a regular full-time art historian in the department, and one course that treats material from after 1600 taught by a regular full-time art historian in the department. Students are not required to select a major concentration for the BA degree, but some focus of study is encouraged. The BA degree consists of 36 hours in art and design, of which 27 are in studio and nine in art history.

Bachelor of Fine Arts Degree in Studio Art and Design

The bachelor of fine arts degree program in art and design is intended for the student who wishes to pursue a professional career in the visual arts. The program is organized into a four-year sequence of study that provides a solid understanding of art and art history. The student has an opportunity to explore a variety of curricular options and then chooses an intensive and professional major concentration. In addition to a primary concentration, BFA students are encouraged to select a secondary area of interest to broaden their thinking and to enrich their creative study. BFA candidates share a close working relationship with the department's faculty who are active professional artists and designers. Intensive studio work is complemented by an academic education with strong art history and liberal

arts component. The BFA degree consists of 66 credit hours in art, of which 54 are in studio and 12 in art history.

BFA Freshman and Sophomore Years

Students beginning in the program are required to complete a seven-course studio core curriculum during their first two years. Five of these courses are mandated: Drawing I, Figure Drawing, 2-D Foundations, 3-D Foundations and Photography I. The remaining two studio courses are optional, based on the student's interest. This intensive curriculum establishes a base for the studio practices and principles for all visual art expression. At the end of the fourth semester, students who have earned a minimum 3.25 grade point average in their studio courses will be accepted as candidates for the BFA degree. Students who do not qualify are eligible for the BA degree. BFA candidates are waived from the second history/social science requirement and the University fine arts requirement.

BFA Junior and Senior Years

Students accepted into the BFA program begin a two-year primary concentration in one of the following studio areas: ceramics, graphic design, industrial design, painting, photography, printmaking, or sculpture. The concentration requires 15 hours of study in a major concentration area during the last four semesters. Teaching in the major is highly individualized and stresses the creative development and preparation of the student for the professional world. In addition to pursuing a concentration, all BFA majors must enroll in the BFA Seminar and the Senior Thesis Course. The culmination of the BFA degree is the completion of a senior thesis. This two-semester senior project, directed by a faculty member, will be exhibited and approved by the faculty as a requirement for graduation.

STUDIO ART AND DESIGN CONCENTRATIONS

Ceramics Concentration

Ceramics is a concentration emphasizing clay and glaze as the primary vehicles for expression. Traditional pottery, vessel making, and sculpture may be addressed through a variety of processes that include hand-building, throwing, and casting. Students are encouraged to develop technical skills and a direction of their own choosing. In addition to traditional ceramic materials and processes, students will be encouraged to study and utilize other sculptural media, as well as become familiar with contemporary and historical source material that will inform their own directions in ceramics.

Design Concentration

Design is the order of form and the control of function. It is what designers do. Humans are conditioned to assess and select commodities on the basis of appearance and textural input, accepting or rejecting information and material goods according to subtle visual cues. The power of seduction resulting from skillfully manipulated design can do more

than attract interest or manipulate perception. It can enable people. Good design and careful planning can promote understanding, simplify use, improve safety, instill confidence, add value, and salvage faltering economies. Undergraduate design education begins at Notre Dame with the utilization of campus facilities through a liberal arts curriculum. This social, philosophical, critical, ethical, and historical experience helps build a foundation of cultural understanding that naturally informs the creative and problem-solving methods required by designers.

Responsible designers aspire to conceive objects with a sensitivity for human need, human aspiration, and the functional requirements for both implementing and producing made objects. At its best, design serves a community that includes industry, marketing, consumer, and the environment.

Design has been part of the curriculum at the University of Notre Dame since the early 1950s. Here design students share the advantages of a campus that is rich in contemporary technology and still retains a deep appreciation for a heritage of traditional human values and wisdom. Technically advanced lecture rooms and digital labs support all student design activities. An on site 18-station Mac Lab, a 10-station Surface Modeling PC Lab, a high performance Digital Imaging Studio, and wireless access are all supported by the vast network of software access and services from Notre Dame's Offices of Information Technologies. Two model fabrication shops allow pattern making activities leading to "on site" processing that ranges from plastic molding to foundry casting. Intermediate- and advanced-level undergraduate students share an energized design community with defined studio space located in close proximity to all studio fine arts, art history, and exhibition galleries.

Graphic Design

At its most basic level, graphic design is a creative process that combines the visual arts and technology to communicate ideas. It begins with a message that, in the hands of a talented graphic designer, is transformed into visual communication that transcends mere words and pictures. By controlling color, type, movement, symbols, and images, the graphic designer creates and manages the production of visuals designed to inform and persuade a specific audience. By combining aesthetic judgment with project management skills, graphic designers develop visual solutions and communications strategies. The professional designer works with writers, editors, illustrators, photographers, code writers, and printers to complete compelling designs that effectively communicate a message.

At Notre Dame, the undergraduate graphic design curriculum begins with a foundation in the liberal arts. Such a basis is a design student's best path to meet and solve the varied communication challenges inherent in today's complex world. Because a design solution may emerge from the humanities,

an algorithm, or a scientific discovery, the curriculum provides a student with the opportunity to be firmly grounded in the fundamentals of design and the visual arts, while also taking courses in science, math, history, philosophy, and theology. As students progress through the tiered design program, they develop as a designer, as an intellectual, and as a moral person, prepared to address the social, ethical, and political circumstances influenced by the design profession.

At its core, the Notre Dame graphic design program asserts that the designer can make a difference not only in the strategic plan of a business but also in the world. During their time on campus, students develop projects that aspire to positively influence the lives of culturally diverse people, critique the ethical dimensions of contemporary culture, and give visual form to complex social issues. As design professionals, Notre Dame graduates will be responsible for the future of our visual culture.

Industrial Design

Industrial designers give form to virtually all mass-manufactured products in our culture. They seek opportunity and advantage through identifying and solving problems. Their creative contributions impact the utility, appearance, and value of our tools and environment. Their most innovative solutions lie at an intersection of what is knowable and what is possible.

The industrial design profession demands excellent organizational skills, an awareness of visual and tactile aesthetics, human behavior, human proportion, material, process, and the responsible appropriation of resource, during and after use. Designers express conceptual proposals through a combination of well-developed drawing, physical modeling, computer modeling, writing, and verbal skills. Designers best serve the consumer through sensitive and innovative collaboration with art, science, engineering, anthropology, marketing, manufacturing, and ecology. Properly implemented, industrial design affords greater benefit, safety, and economy to all participants and recipients impacted by the product development cycle.

All students access local Mac and PC computer support from a campus server, a local wireless network, projection-equipped classrooms, and input/output facilities that include on-site multiple (high-quality) large and intermediate size format printing. Basic shop facilities are complemented by access to rapid prototyping, available in the College of Engineering. Notre Dame's Industrial Design Program (NDID) is accredited by the National Association of Schools of Art and Design (NASAD) and maintains student chapter affiliation with the Industrial Designers Society of America (IDSA). NDID interacts with regional, national, and international corporate design and consulting offices in the form of annual conferences, sponsored projects, field trips, and internships.

Painting Concentration

Painting, with its many traditions, is a medium put to an extraordinary diversity of contemporary uses.

Capable of representing everything from the material to the intangible, painting continues to be a means for artists of vastly different interests to address their subjects in highly individual ways. The painting concentration at Notre Dame fosters the aesthetic, critical, and technical development of each student through a program of course work, independent study, and regular critiques. Emphasis is placed on being well-versed in contemporary critical issues, on articulating individual themes, and on developing the technical means to give visual form to thematic concerns.

Photography Concentration

Photographs mediate our involvement with the physical world, taking place at the intersection between art, culture, and our own individual perceptions. The concentration in photography is committed to educating artists in a world where photographic imagery and new media representations pervade our everyday experience. From foundation work through graduate studies, courses are designed to inform students about photographic traditions while engaging them in issues and methodologies of contemporary art. The photography program seeks to facilitate growth and development of the art student through a range of courses dealing with aesthetic, historical, and critical concerns. Students have the opportunity to develop the necessary technical skills needed for professional work. The curriculum incorporates digital imaging technologies that have expanded and redefined our understanding of photographic practice.

Printmaking Concentration

The printmaking concentration emphasizes a manner of thinking and the making of images that the print media will allow and will encourage. As the student becomes familiar with the various matrices, techniques, and technologies of photolithography, intaglio, relief, screenprint, papermaking, and the making of books, the methods of developing images and ideas are taught concurrently. Exploration and experimentation in all of the print media are encouraged, including digital art and all other forms of reproducing an image. The courses are designed to progressively develop skill, creativity, personal imagery, and knowledge of relevant current issues. Advanced students work on a professional level by creating a cohesive body of work.

Sculpture Concentration

Sculpture today encompasses diverse materials and contexts for the expression of ideas in space. Within this broad description, students are encouraged to develop the technical skills that will help them expand their ideas into thoughtful individual expression. We embrace a breadth of vision and experience which will challenge the student to investigate and respond to contemporary issues through problem-solving. A full range of traditional and non-traditional media are available in specific courses and through individual mentoring. By blending required and elective courses and independent study, students can experience a curriculum that responds to their particular needs and direction.

THE ART HISTORY MAJOR

Notre Dame's art history major is designed to equip our students with a broad overview of the development of Western art and to provide them with an in-depth knowledge of particular periods, problems, and research methods. The diversity and scholarly strength of our faculty and the research facilities of the Hesburgh Library are supplemented by the rich resource of the Snite Museum of Art. With a permanent collection of over 21,000 works, the Snite Museum not only gives our students an invaluable firsthand acquaintance with important examples from all periods and many cultures—including distinguished collections of old master drawings, 19th- and early-20th-century photographs, and Pre-Columbian art—but also provides a wide range of opportunities for our students to gain practical museum experience in both volunteer and paid positions.

The University of Notre Dame offers both a 30-hour first major and a 24-credit-hour supplementary major in art history. These degrees are intended not only for students who are already intent upon pursuing a career in an art museum or gallery or as a college or university professor, but also for those individuals who simply wish to learn more about Western civilization through the examination of some of its most beautiful, provocative, and informative objects.

Art history first majors are required to take the Theories of Art seminar and complete a final thesis in the fall of their senior year. The thesis, normally between 20 and 30 pages in length, is prepared under the direction of one of the regular art history faculty. It is expected to demonstrate the student's ability to treat an important art historical topic, in a manner that shows writing skills and methodological training. It is expected that the thesis will be suitable for submission as a writing sample for students intending to apply to art history graduate programs. In addition, the department offers courses in four areas of Western art: ancient, medieval, Renaissance and baroque, and modern (19th and 20th centuries). An art history major must take at least one course in each of these areas. It is strongly recommended that the four-course distribution requirement be fulfilled with 20000- or 30000-level introductory courses taught by regular art history faculty on campus. Students must also have taken a minimum of two seminars in addition to theories of art. The Theories of Art seminar should be taken in either the junior or senior year.

Students wishing to complete a second major in art history should take one course in each of the four departmental areas, an art history seminar, and three electives in art history. It is strongly recommended that the four-course distribution requirement be fulfilled with 20000- or 30000-level introductory courses taught by regular art history faculty on campus.

Students wishing to minor in art history can do so by taking five art history courses (15 credit hours total). At least one of these courses must treat material prior to 1600, and at least one must treat material from 1600 to the present.

Courses taken for the second major or the minor cannot be counted in more than one university program.

Over the last 10 years, our undergraduate majors have presented scholarly papers at conferences throughout the Midwest; held prestigious summer internships in museums in New York, Washington, Chicago, and Baltimore; found employment in galleries and museums; and pursued graduate work at Columbia, Berkeley, Cornell University, Yale University, the University of North Carolina-Chapel Hill, the University of Virginia, the University of Texas, and the University of Michigan, among other institutions.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Art, Art History, and Design](#) heading.

Classics

Chair:

Keith R. Bradley
Eli J. Shaheen Professor of Classics:

Keith R. Bradley
Rev. Theodore M. Hesburgh, CSC, Professor of Arts and Letters:

Sabine G. MacCormack

Professors:

Joseph P. Amar (Arabic); Daniel J. Sheerin
Associate Professors:

Asma Afsaruddin (Arabic); W. Martin Bloomer; Elizabeth Forbis Mazurek; Li Guo (Arabic); Brian A. Krostenko; David J. Ladouceur; Catherine M. Schlegel

Concurrent Associate Professors:

Blake Leyerle; David O'Connor; Robin Rhodes

Visiting Assistant Professors:

Christopher Baron; Daniel Turkeltaub; Anna Taylor

Assistant Professional Specialists:

Tadeusz Mazurek; Abdul-Masih Saadi (Arabic)

The department. The Department of Classics offers programs of courses in the languages, literatures, archaeology, history, religions, and civilization of the ancient world. Cooperation with other departments of the college makes available to Classics students additional courses in the art, philosophy, and political theory of antiquity.

The department also provides the administrative home for the programs in the languages and cultures of the Middle East.

MAJORS IN CLASSICS

Classics majors encounter at their sources the perennial cultures of Greece and Rome, cultures that continue to exercise a profound influence on Euro-American civilization. Classical training imparts enhanced skills in close reading and analysis of literary and rhetorical forms, as well as repeated experience of the integration of literature, history and ancillary studies. Thus, a major in Classics provides the archetypal humanistic education and an ideal preparation for entry into any of the professions that require mastery of language, close analysis of documents and integration of multiple details.

The lower-level courses equip the student with rudimentary knowledge of languages and with a conspectus of ancient history and culture. Advanced courses in Latin and Greek literature and Ancient Civilization provide opportunities for more focused and detailed study and are conducted in a seminar format with emphasis on research and writing.

In addition to the other University requirements, students majoring in Classics will, under normal circumstances, complete at least 10 courses in one of two areas of concentration: Classics or Greek and Roman Civilization.

Classics Major

5 courses in Greek or Latin language/literature: 20003 and above*	15
2 courses in Latin or Greek language/literature*	6
Greek or Roman History	3
2 Classics courses in English	6

30

*Students will typically choose one of the two classical languages, ancient Greek or Latin, in which to fulfill the language requirement at the advanced level. They will be required to take at least two semesters in the other language at the appropriate level. If students have sufficient background in both languages, it should be possible for them to complete the requirements of the major through a combination of intermediate and advanced courses in both languages, as long as the total number of language courses equals seven (21 credit hours) for the first major and five (15 credit hours) for the supplementary major.

Supplementary majors in Classics will be exempt from the two courses in the second classical language.

Greek and Roman Civilization Major

The History of Ancient Greece	3
The History of Ancient Rome	3
Greek Literature and Culture	3
Roman Literature and Culture	3
Six Classics courses in English or Greek and Latin language offerings*	18

30

*Students will be strongly encouraged, but not required, to include some language study in their six elective courses.

Supplementary majors in Greek and Roman Civilization will be required to take four elective CLAS courses in translation or Greek and Latin offerings.

MINORS IN CLASSICS

Minors provide students majoring in other areas with structure and certification for a variety of approaches to the study of Greek and Latin language, literature, and civilization.

Latin Minor

The Latin Minor provides a solid grounding in the philological and literary study of Latin texts of the classical period, or, for those who prefer, of Christian Latin literature. It consists ordinarily of five courses (15 hours) in Latin: (1) Intermediate Latin or its equivalent. This can be fulfilled by successful completion of Intermediate Latin or by advanced placement; (2) Reading and Writing Latin Prose; (3–5) three courses to be chosen from Latin courses at the 30000-/40000-level. Students interested in later Latin texts are directed to the joint offerings of the department and the Medieval Institute.

Greek Minor

The Greek Minor provides a solid grounding in the philological and literary study of Greek texts of the classical and Hellenistic periods. It consists ordinarily of five courses (15 hours) in Greek: (1) Intermediate Greek, or equivalent; (2) Reading and Writing Greek Prose; (3–5) three courses to be chosen from Greek courses at the 30000-/40000-level.

Classical Civilization Minor

The Classical Civilization Minor provides a broadly based orientation to the history and civilization of the classical world. It consists of five courses, three of which are required: The History of Ancient Greece, The History of Ancient Rome, and an approved course in classical literature. The remaining two courses may be chosen, with departmental approval, either from CLAS courses, whether offered by the department or cross-listed by other programs, or from Greek and Latin language courses above the introductory level.

Classical Literature (in Translation) Minor

The Classical Literature in Translation Minor provides a broad experience of Greek and Latin literature studied in English translation. It consists of five courses, three of which are required: Greek Literature and Culture, Latin Literature and Culture, and either Greek and Roman Mythology or Classical Epic or Greek Tragedy. The remaining two courses may be chosen, with departmental approval, either from CLAS courses, whether offered by the department or cross-listed by other programs, or from Greek and Latin courses above the introductory level.

PROGRAM IN SEMITIC LANGUAGES

The program in Arabic offers a full range of courses in Modern Standard Arabic, and is geared toward proficiency in speaking, reading, and writing. Courses in Middle East history, culture, and religion compliment the language component and give students the opportunity for a broad-based and comprehensive understanding of the Arab world.

MAJOR IN ARABIC

A total of 33 credit hours distributed in the following areas:

6 semesters of Arabic	18
2 Arabic literature courses taught by the Arabic faculty	6
2 courses in Middle East history	6
1 course in Islam	3

MEDITERRANEAN/MIDDLE EAST STUDIES

Joseph P. Amar, director

An interdisciplinary focus defines this broad-based program that encourages a multidimensional approach to the Mediterranean world. This is achieved through a wide variety of courses and activities offered by departments that deal with southern Europe, North Africa, or the Middle East.

While language courses may serve as a component of the minor, students are offered opportunities to view the region in its full historical, cultural, and political context. In this way, students are given the opportunity to assemble a course of studies that best reflects their own interests.

Typical areas of focus might include the rich culture that developed in southern Spain as a result of the Christian, Muslim, and Jewish interactions there; the impact of the French language and culture on North Africa and the Middle East; or the contemporary Israeli-Palestinian conflict.

Requirements: (1) four courses of the student's choice that relate to the region of southern Europe, North Africa, or the Middle East; (2) a final research thesis that integrates course work and other activities related to the student's particular area of focus. For information regarding applicable courses in a given semester, contact Prof. Joseph P. Amar, the Department of Classics, 631-6276.

SYRIAC STUDIES

Syriac is a form of Aramaic that was the literary language of Jews and pagans in western Asia before expanding to become the common dialect of Aramaic-speaking Christians throughout the region. Early literature in Syriac preserves sustained evidence of the distinctive character of Aramaic-speaking Christianity that is largely unhellenized and that reflects the linguistic and cultural milieu of first-century Palestine.

Syriac literary culture reveals mutual and parallel dynamics in the development of Syriac Christianity and the emergence of Rabbinic Judaism. The study of Syriac is likewise of pivotal importance to an understanding of the thought-world of the pre-Islamic Middle East, the established Christian and Arab populations of the region, and the emergence of Islam in the seventh century.

Syriac language courses are offered in the summer. Consult the *Bulletin of Information, Summer Session*.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Classics](#) heading.

East Asian Languages and Literatures

Chair:

Lionel M. Jensen

Research Professor:

Howard Goldblatt

Visiting Professor:

Bei Dao

Associate Professors:

Michael C. Brownstein; Liangyan Ge; Lionel M. Jensen; Xiaoshan Yang

Assistant Professors:

Sylvia Li-chun Lin; Deborah Shamoon

Visiting Assistant Professor:

Jonathan Noble

Associate Professional Specialists:

Noriko Hanabusa; Setsuko Shiga

Assistant Professional Specialist:

Chengxu Yin

The peoples of East Asia comprise one quarter of the world's population and account for a similar proportion of the world's production and consumption. This, along with the contemporary fusion of Asia and the West politically and economically, makes knowledge of the diverse languages and cultures of East Asia vital to an understanding of our global community and indispensable for the preparation of careers in the Pacific Rim focusing on business, public policy, literatures, and the arts. The Department of East Asian Languages and Literatures provides the resources and instruction necessary for success in all of these fields. The department is dedicated to providing rigorous language training in Chinese and Japanese, as well as courses taught in English on Chinese and Japanese philosophy, religion, literature, and culture. Complementary courses in other disciplines are listed in this *Bulletin* under departments such as history, philosophy, theology, political science, economics, and anthropology.

Completion of First-Year Chinese or Japanese (10 credits) or Beginning Chinese or Japanese (nine credits) will satisfy the language requirement for

both the College of Arts and Letters and the College of Science. Although the College of Business does not have a language requirement, it strongly supports integration of language courses into its curriculum and encourages students to participate in the International Study Programs (See "International Study Programs" under Mendoza College of Business).

Placement and Language Requirement. Students who wish to enroll in a Chinese or Japanese language course beyond the 10101 or 10102 level must take a placement examination administered by the Department. Students testing out of 10000-level language courses must complete at least one course at the 20000 level or higher to satisfy the language requirement.

PROGRAM IN CHINESE

The program in Chinese offers language classes in Mandarin Chinese at the beginning, first-, second-, third-, and fourth-year levels, as well as courses in English on classical and modern Chinese literature and culture. Qualified students also have the opportunity to attend East China Normal University in Shanghai, People's Republic of China.

The Chinese program offers first and supplementary majors and a minor.

Basic requirements: For the major, students must complete 30 credit hours, including Third-Year Chinese. For the supplementary major, students must complete 24 credit hours, including Third-Year Chinese. For the minor, students must complete 15 credit hours, including two semesters of language classes beyond the first year 10000-level language courses and University Seminars on China related topics do not count toward the major, supplementary major, or minor.

Other requirements: In addition to the language course requirements described above, First and Supplementary majors as well as the Minor also requires one course in Chinese literature. Remaining credit hours may be satisfied by taking additional Chinese language and literature courses, or East Asia-related courses approved by the academic advisor.

PROGRAM IN JAPANESE

The program in Japanese offers language classes in modern Japanese at the beginning, intermediate and advanced levels, as well as courses in English on classical and modern Japanese literature and culture. Qualified students also have the opportunity to attend Nanzan University in Nagoya, Japan.

The Japanese program offers first and supplementary majors and a minor.

Basic requirements: For the major, students must complete 30 credit hours, including 22 credits in language classes beyond the first year. For the supplementary major, students must complete 24 credit hours, including 16 credits in language classes

beyond the first year. For the minor, students must complete 15 credit hours including two semesters of language classes beyond the first year. 10000-level language courses and University Seminars on Japan related topics do not count toward the major, supplementary major, or minor.

Other requirements: In addition to the language course requirements described above, first and supplementary majors as well as the minor also require one course in Japanese literature. Remaining credit hours may be satisfied by taking additional Japanese language and literature courses, or East Asia-related courses approved by the academic advisor.

ASIAN STUDIES MINOR

See "Area Studies Minors," later in this section of the *Bulletin*. This minor provides opportunities for students to develop an interdisciplinary understanding of Asia.

SHANGHAI AND NAGOYA PROGRAMS

The Shanghai and Nagoya programs provide students with the opportunity to spend an academic year at Nanzan University in Nagoya, Japan, or a semester or academic year at East China Normal University in Shanghai, People's Republic of China. To qualify for the Shanghai Program, students must complete at least one semester of Chinese language study at Notre Dame with at least a 3.0 grade point average in the language courses. For the Nagoya Program, at least one year of Japanese language studies at Notre Dame with a 3.0 grade point average or better in the language courses is required. Students may attend Nanzan or East China Normal during their sophomore or junior year. Students who intend to combine a First or Supplementary major in Chinese or Japanese with a major in another discipline and who intend to apply for the Shanghai or Nagoya programs are urged to plan their course of studies carefully in consultation with their advisors prior to applying for either program. For more information and course listings, see "Nagoya Program" or "Shanghai Program" under "International Study Programs" in this *Bulletin*.

COURSE DESCRIPTIONS

Christopher J. Waller

Professors:

Thomas Gresik; Richard A. Jensen; Nelson C. Mark; Christopher J. Waller

Associate Professors:

Byung-Joo Lee; Kali P. Rath;

Assistant Professor:

Kasey Buckles; Daniel Hungerman; James X. Sullivan; Abigail Wozniak

DEPARTMENT OF ECONOMICS AND POLICY STUDIES

Chair:

Jennifer L. Warlick

Carl E. Koch Professor of Economics:

Philip Mirowski

Professors:

Rev. Ernest J. Bartell, CSC (emeritus); Charles Craypo (emeritus); John T. Croteau (emeritus); Amitava K. Dutt; Teresa Ghilarducci; Denis Goulet (emeritus); Kwan S. Kim; William H. Leahy; Jaime Ros; David F. Ruccio; Roger S. Skurski (emeritus); Thomas R. Swartz (emeritus); Charles K. Wilber (emeritus)

Associate Professors:

David M. Betson; Frank J. Bonello; Gregory Curme (emeritus); James J. Rakowski; Jennifer L. Warlick; Martin H. Wolfson

Concurrent Associate Professor:

Mary Beckman

Program of Studies. The undergraduate major in economics within the College of Arts and Letters is jointly administered by the Department of Economics and Econometrics and the Department of Economics and Policy Studies. The major is designed to make a unique contribution to the student's liberal education. The program provides students with the insights of scientific analysis and social perspective to deepen their understanding of the complex economic forces at work in society. Such an understanding is an essential ingredient in the intellectual development of an educated person. The program is also designed to prepare the student for a variety of options after graduation, including graduate programs in economics and public policy, law school, and managerial positions in business and finance.

Requirements for the Economics Major

(i) *Total Course Requirement*

Students must complete the two-semester Principles of Economics sequence (10010/10011/20010/20011 and 10020/20020 or equivalent). Beyond the Principles courses, the major requires a minimum of eight additional courses (24 credits) in economics at the junior/senior level (numbered 3xxxx or 4xxxx).

(ii) *Math Requirement*

A course in Calculus II (Math 10260 or equivalent) is a prerequisite for both of the intermediate theory courses. (See core requirement below). Simultaneous enrollment in Calculus II is permitted but not recommended.

Recommendation: It is strongly recommended that students, especially prospective economics majors, who have not had a course in Calculus I (Math 10250 or equivalent) enroll in the Calculus course during their first year of study.

(iii) *Core Requirement*

Students must include the following four courses among their minimum of eight courses in economics beyond the Principles courses:

30010. Intermediate Economic Theory-Micro
30020. Intermediate Economic Theory-Macro
30330. Statistics for Economists
30331. Econometrics

(iv) *Advanced Course Requirement*

Students must include a minimum of two courses (six credits) at the senior level (numbered 4xxxx) that have either of the intermediate theory courses (30010, 30020) and/or Econometrics (30331) as a prerequisite.

(v) *Writing-Intensive Requirement*

In completing the minimum of 24 credits at the junior/senior 3xxxx/4xxxx level, the student must fulfill a writing-intensive requirement. This requirement can be satisfied in one of the following three ways: by taking a junior or senior 3xxxx/4xxxx-level economics seminar course; by taking a three-credit special studies course consistent with the college's writing-intensive guidelines under the direction of an economics faculty member; or by writing a senior honors essay under the direction of an economics faculty member.

Departmental advisors will assist students in designing a program of study that meets their educational and career goals. Students are also encouraged to pursue related courses in other departments of the College of Arts and Letters, the Mendoza College of Business, and the College of Science. Materials relating to professional work or graduate study in economics, law, business, public policy, and foreign service are available from the director of undergraduate studies.

Undergraduate Economics Honors Program

Entry Gate.

To be eligible for admission to the Undergraduate Economics Honors Program, the student must:

(i) Complete Intermediate Economic Theory-Micro (ECON 30010), Intermediate Economic Theory-Macro (ECON 30020), and Econometrics (ECON 30331) with minimum grade point average in these courses of A- (3.667),

or

(ii) Have a minimum cumulative GPA of 3.4 and minimum GPA of A- (3.667) in Principles of Microeconomics (ECON 10010/10011/20010/20011), Principles of Macroeconomics (ECON 10020/20020), Intermediate Economic Theory-Micro (ECON 30010), Intermediate Economic Theory-Macro (ECON 30020), Statistics for Economists (ECON 30330), and Econometrics (ECON 30331).

To apply for admission, the student must complete an application form, available from the director of undergraduate studies in Economics, between the end of the sophomore year and the end of the junior year. The application will include: (1) a paragraph explaining why the student wishes to enroll in the honors program, and (2) a signature by a member of the economics faculty who endorses this student's application. The application will be returned to the director of undergraduate studies in Economics who will make recommendations for admissions to the Economics Working Committee, which is responsible for final decisions.

Enriching Experience.

The Undergraduate Economics Honors Program requires that the student complete an enriching experience. The following qualify as an enriching experience:

(i) Completion with a grade B+ or higher of an "advanced methods" course, defined as a 4xxxx-level course in which students are required to apply the methods of modern economic research. A list of these courses is available from the director of undergraduate studies.

(ii) Completion with a grade of B or higher of a course in the core of the graduate program in economics.

(iii) Completion of some substantive out-of-classroom activity directly related to the study of economics, such as presentation of the student's own original research at an external conference, an undergraduate research assistantship, an internship, or community service.

All of these activities need to be pre-approved. Students who want pre-approval for a specific activity should submit a written request with other supporting materials to the director of undergraduate studies in Economics who will make recommendations to the Economics Working Committee, which is responsible for final decisions. The director of undergraduate studies will notify applicants of the committee's decision.

Capstone experience.

The capstone experience represents the final requirements for the Undergraduate Economics Honors Program. This experience involves three elements:

(i) Completion of a one-credit honors seminar (ECON 47961) in each semester of the senior year. The seminar would not only provide instructional support for these students, but also require each student to present progress reports to their peers at regular intervals. These seminar credits would not count as hours toward the major (i.e., would not substitute for 3xxx- or 4xxx-elective economics courses) and would be graded on a Satisfactory/Unsatisfactory basis. These seminars would be open to juniors in the honors program who want advanced insight to what the honors essay entails.

(ii) Completion of a six-credit senior honors essay (with a grade of B+ or higher). The essay is directed by an economics faculty member and represents a significant research effort. The writing of the essay is accomplished over the two semesters of the student's senior year with three credits awarded each semester (ECON 47960). These credits can be counted as economics electives toward the major and can be used to satisfy the major's writing-intensive requirement. The results of the essay must be presented at an economics seminar open to the public during the end of the second semester of each academic year.

(iii) Participation in all College of Arts and Letters events for departmental honors students.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section after the [Economics](#) headings.

English

Chair:

Teaching Scholars (Post-Doctoral Fellows):

Heidi Oberholtzer Lee; James Wilson

Program of Studies. English majors spend their time in small classes, reading, analyzing, and discussing canonical and lesser-known literary works, studying issues of literacy and rhetoric, investigating the symbolic systems that shape cultural meaning, and crafting their own original poetry and prose. Nearly every majors-level English course is writing-intensive. Individual students determine the course of their own study in close consultation with a faculty advisor.

The major requirements include a minimum of 10 courses (30 credit hours) in addition to the literature courses required of all students in the College of Arts and Letters. The major begins with a one-semester introduction to literary studies course, ENGL 30101, which is also the major's officially designated writing-intensive course. The intro course is buttressed by three broad literary history courses that provide an overview of literary traditions from the medieval period to the present. The capstone experience of the major is a research seminar in which the student completes an original and substantial research project. These required courses make up half of the 10-course major; the other five elective courses (15 credit hours at the 40xxx- or 50xxx-level) are chosen by the individual student. Electives include courses in the several periods of British, Irish, and US literature from their origins to the present, in literatures of the Americas, in certain aspects of classical and European literature, and in other literatures written in English; in the genres of literature; in major authors; in literacy and rhetoric; in literary theory and the history of criticism; and in expository and creative writing.

English majors enjoy an atmosphere of small classes and immediate contact with the department's regular teaching and research faculty. All courses taught in the department, not just those designated as writing courses, contain significant writing components. A new honors concentration within the major has been established for highly achieving students; it includes requirements not listed above, including a thesis project in the senior year. Beyond the classroom, the English Department offers all its majors a wide array of events throughout the year, including readings of poetry and prose, scholarly lectures on literary and cultural topics, and more social activities.

English majors choose careers in any field valuing the ability to read, write, and analyze with intelligence and subtlety. Some go on to graduate study in literature leading to careers in academia; others choose professions such as law, education, medicine, publishing, business, social work, professional writing, library science, journalism, and public relations.

Graduate Courses. Honors concentrators take ENGL 52999 (Honors Thesis) in the senior year. They also take one 90xxx graduate course in place of the research seminar. With permission from the department and the instructor, other undergraduate majors may take one 90xxx graduate course in place of the research seminar.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of English](#) heading.

Film, Television, and Theatre

Chair:

Richard E. Donnelly; William Donaruma

Associate Professional Specialists:

C. Ken Cole; Theodore E. Mandell; Siiri Scott

Assistant Professional Specialist:

Karen Heisler (visiting)

Instructor:

Gary Sieber (adjunct)

The Department. The Department of Film, Television, and Theatre curriculum includes study of the arts of theatre and performance, film and video, and television. Our goal is to provide students with intellectual and intuitive resources for analysis and

production of these performing and media arts. We seek both to encourage and inspire intellectual discipline and curiosity as well as to discover and nurture student creativity. We offer, therefore, both a scholarly and creative context for education of the general liberal arts student at Notre Dame as well as for the individual seeking an intensive preparation for advanced study in these fields. In an interdisciplinary spirit of collaboration, students in this department investigate film, television, and theatre (and occasionally other media) as complex cultural phenomena to develop skills in analysis, evaluation, and theory formation as well as to engage in creative production.

Students graduating from this department have numerous postgraduate choices. Many of our graduates seek careers in law, medicine, business, education, public service, or other professions. Others will pursue careers in theatre, film, or television. However, we are not a professional training program. Rather, we seek to provide the creative and technological tools for student scholar/artists to build a basis for advanced study and professional careers in the arts should they so desire. It is our hope that those whose work and determination lead them to seek careers in these fields will be challenged and assisted by their liberal arts curriculum. Our courses provide tools to understand the analytical, technical and imaginative processes of the field, whether pursued as future work, study, or as an enhancement of intellectual life.

All 40xxx-level critical studies electives in film and television, and selected theatre electives, will fulfill the writing-intensive requirement.

Most FTT courses fulfill the University fine arts requirement.

For more information and up-to-date listings of courses and FTT events, visit the Web at www.nd.edu/~ftt.

Program of Studies. Students interested in the major are encouraged to visit the departmental office (230 Marie P. DeBartolo Performing Arts Center) for information about the programs and department faculty. You also may visit our website at www.nd.edu/~ftt.

Step-by-step instructions for becoming a major are available on our website. All students declaring a major first must obtain the signature of the department chair or associate chair and a departmental faculty advisor will be assigned, with whom the student will consult to prepare a plan of study reflecting their educational interests and goals. Students may elect to major in the department as either a first or second major in accordance with college guidelines.

Normally, students concentrate in either film, television or in theatre. At least 30 credit hours are needed to complete the major. The film concentration requires at least one elective on an

international subject and at least three upper-level courses. The theatre concentration offers a supplementary major requiring 24 credit hours. The television concentration requires seven electives, three at the 40xxx-level.

(A major combining courses from different concentrations is possible with approval of the department chair.)

The Department of Film, Television, and Theatre participates in two international programs by cross-listing courses and sponsoring internships. For more information, see the *Bulletin* descriptions for the Dublin program and the London program.

Several courses are offered in the summer session, including FTT 20102 and FTT 20706. See the *Summer Session Bulletin* for availability and further information.

Film Concentration

30 credit hours

4 required core courses:

Basics of Film and Television
History of Film I
History of Film II
Film and Television Theory

6 electives (3 at the 40000 level and 1 international elective)

General Electives

Introduction to Film and Video Production
Writing for Screen and Stage I and II
The Art and Science of Film Production
Film and Digital Culture
History of Documentary Film
Topics in Media Theory, History, and Research:
Film and Popular Music

International Electives (30000 and 40000 Level)

Italian National Cinema
Comedy Italian Style
French Cinema
New Iranian Cinema
Irish Cinema and Culture
Australian Cinema
Hong Kong: Action Cinema in a Global Context

Upper-Level Electives

Shakespeare and Film
Intermediate Film Production
Advanced Film Production
Advanced Digital Video Production
Sex and Gender in Cinema
Topics: Film Noir
Topics: Sound Design
Contemporary Hollywood
Postmodern Narrative

Television Studies Concentration

30 credit hours

3 required core courses:

Basics of Film and Television
History of Television
Film and Television Theory

7 electives (3 at the 40000 level)

Introduction to New Media
 Principles of Mass Communication
 Broadcast Journalism
 History of Film II
 Writing for Screen and Stage I and II
 Introduction to Film and Video Production
 Film and Digital Culture
 Topics in Media Theory, History, and Research
 Broadcasting and Cable
 Sports Journalism
 Entertainment and Arts Law
 Media Ethics
 Media and the Presidency
 Advanced Digital Video Production
 Contemporary Hollywood
 Media Culture
 Media Internships
 Special Studies
 Issues in Film and Media

Theatre Concentration

30 credit hours

4 required core courses:

Theatrical Production (formerly Stagecraft)
 Theatre, History, and Society
 Script Analysis and Dramaturgy
 Performance Analysis

Group A

Performance Studies
 Performance Art: History, Theory, and Practice
 Shakespeare in Performance
 Theatre of Bertolt Brecht
 Early English Theatre
 Feminist Theatre and Performance
 Shakespeare and Film
 History of Theatre before 1700
 Dramatic Literature before 1900
 Dramatic Literature after 1900

Group B

Stage and Production Management
 Costume History
 Scene Design and Methodology
 Lighting Design and Methodology
 Costume Design and Methodology
 CAD for the Stage

Group C

Acting Process
 Writing for Stage and Screen I
 Make-Up for the Stage
 Voice and Movement
 Directing Process
 Writing for Stage and Screen II
 Audition Seminar
 Acting Shakespeare

Other electives include:

Introduction to Theatre
 Theatre Production Workshop
 Entertainment and Arts Law
 Theatre Internship
 Practicum
 Special Studies

Complementary Nature of Departmental Concentrations.

There is a strong creative and scholarly relationship in the mix of courses and activities of the department of which students should be aware. The concentrations offered by this department can provide many complementary areas of creative and technical study for students involved in film and television production, as well as overlapping historical, theoretical and critical concerns. Similarly, those concentrating in theatre are urged to avail themselves of the many opportunities for production experience and critical, cultural and theoretical studies offered by the theatre faculty.

Cocurricular Activities. The department encourages non-majors to elect courses, participate as audience in our extensive film and theatre series, and involve themselves in film, television, and theatre production as a means of informing and complementing their liberal arts education at Notre Dame. Occasional guest artists and lecturers are also sponsored by the department. Information on all department-sponsored activities is available in the department office and on the department's website.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Film, Television, and Theatre](#) heading.

German and Russian Languages and Literatures

Chair:

David W. Gasperetti

Rev. Edmund P. Joyce, CSC, Professor of German Language and Literature:

Mark W. Roche

Paul G. Kimball Professor of Arts and Letters:

Vittorio Hösle

Professors:

Vittorio Hösle; Randolph J. Klawiter (emeritus); Klaus Lanzinger (emeritus); Thomas G. Marullo (on leave spring 2007); Robert E. Norton; Vera B. Profit (on leave fall 2006); Mark W. Roche; Konrad Schaum (emeritus)

Associate Professors:

David W. Gasperetti; Alyssa W. Gillespie; Albert K. Wimmer

Assistant Professors:

Anita R. McChesney

Associate Professional Specialists:

Denise M. Della Rossa; Jan Lüder Hagens; Hannelore Weber

Program of Studies. The study of German and Russian languages and literatures provides educational opportunities relevant to an increasingly interdependent world. The acquisition of foreign language skills in general is an important component of liberal education because it enhances students' powers of communication and serves to introduce them to enduring cultural achievements of other peoples. In this sense, the study of German and Russian widens students' intellectual horizons, stimulates the understanding of several significant cultural traditions and allows the examination of these traditions in a more sophisticated and cosmopolitan manner.

The goal of all levels of language courses are oral and reading competence and linguistic and stylistic mastery. Courses in advanced German or Russian language, literature, culture and civilization expose the student to a wealth of literary, cultural and humanistic traditions as well as facilitate a better understanding of the rich national cultures of the German- and Russian-speaking countries.

The Department. The Department of German and Russian Languages and Literatures offers instruction in German and Russian at all levels of competence, from beginning language courses at the 10000 level to literature and civilization courses on the 30000 and 40000 levels.

THE GERMAN PROGRAM

Requirements: First Major, Supplementary Major, and Minor

Majors must select at least one course each from clusters A and B (in that order; see Schematic Organization of the German Program below) before taking courses from Cluster C and should take at least one course from Cluster C before proceeding to courses from Cluster D. Courses from Cluster D are intended to serve as culminating (senior-year) courses. For first majors, at least four of these courses must be taken at the home campus; for supplementary majors, three courses must be taken at the home campus.

First Major

1. Successful completion of 10 courses (30 credit hours) above the three-semester language requirement (i.e., beyond 20201).

2. Of these 10 courses, seven (7) must be taught in German. Four (4) of the upper-division courses must be taken at the home institution, and at least two (2) of these courses must be at the 40000 level from departmental offerings.

Supplementary Major

1. Successful completion of eight courses (24 credit hours) above the three-semester language requirement (i.e., beyond 20201).

2. Of these eight courses, six (6) must be taught in German; three (3) of the latter must be upper division courses taken at the home institution from departmental offerings, two (2) at the 30000 level, and one (1) at the 40000 level.

Minor (only for non-Innsbruck students)

Minors may take any combination of courses in Clusters A, B, and C (see Schematic Organization of the German Program below). The culminating course for the minor may be (but does not have to be) from Cluster D.

Minors are expected to successfully complete five courses (15 credit hours) at the 20201 level or above, only one (1) of which may be taught in English.

A year of study abroad in Innsbruck, Austria, is an incomparable opportunity to improve language skills and strengthen cultural understanding. Majors and supplementary majors are therefore strongly encouraged to participate in this program during their sophomore or junior year. For further information, see "International Study Programs" in the front section of this *Bulletin*.

Senior Thesis

German majors who wish to graduate with honors may write a Senior Thesis. For those German majors who elect to write a thesis, several requirements must be met: (1) The student must have a GPA of 3.5 or higher in the major, (2) the thesis must be at least 40 pages long, and (3) the thesis must be written in German.

The student writing a thesis enrolls in GE 48499 and receives one course credit (three credit hours) for the course. Although the thesis is graded by the advisor (to receive honors, the thesis must receive a grade of B+), the entire department reads the thesis, acting as an advisory body to the advisor. The thesis is due the week after spring break, and the student is strongly advised to begin thinking about it and start conferring with the advisor before the October break of the fall term.

SCHEMATIC ORGANIZATION OF THE GERMAN PROGRAM**•CLUSTER A****(Conversation/Composition/Reading)**

Prerequisite for this cluster is 20202 or the equivalent.

30102. ABCs of Speaking, Reading, and Writing about Literature

Offered in the fall semester in odd-numbered years.

30103. Advanced Conversation

Offered every spring semester.

30105. Stylistics and Composition

Offered in the fall semester in even-numbered years.

•CLUSTER B (Introduction to Culture and Literature)

Prerequisite for this cluster is at least one course from Cluster A.

30107. German Cultural History (Kulturgeschichte)

Offered every spring semester.

30108. Survey of German-language Literature (Literature von gestern und heute)

Offered every fall semester.

•CLUSTER C (30000-Level Literature, Culture, Linguistics, and Professional German)

A variety of courses offered as dictated by student needs and faculty specialization.

•CLUSTER D (40000-Level Literature, Culture, Linguistics, and Professional German)

A variety of courses offered as dictated by student needs and faculty specialization.

THE RUSSIAN PROGRAM**Requirements for Russian Majors**

Majors in Russian must complete 10 courses (30 credit hours) beyond the three-semester language requirement, of which four must be taken at the 30000 or 40000 level from departmental offerings. At least two of these courses must be literature in the original Russian (40000 level). In addition, one course may be on a Russian subject in another discipline, e.g., art, political science, or history.

Supplementary majors in Russian must complete eight courses (24 credit hours) beyond the three-semester language requirement, of which three must be taken at the 30000 or 40000 level from departmental offerings. As with the major, two of these courses must be in Russian literature in the original. In addition, one course may be on a Russian subject in another discipline, e.g., art, political science, or history.

Minor in Russian

The minor consists of 15 credits, or five courses, of which at least four must be in Russian language and/or literature at the 20000 level or above and conducted in Russian; of these four, at least one must be at the 40000 level. The fifth course may be a course on Russian literature taught in English, or a course on a Russian subject in another discipline (e.g., art, philosophy, political science, history, theology, etc.).

Minor in Russian and East European Studies

For a minor in Russian and East European studies, students must have (1) at least four college semesters or the equivalent of Russian or a language spoken in Central or Eastern Europe (German will be accepted in certain cases); (2) four area studies courses beyond the major, chosen from at least three departments (students with double majors can normally count two courses in the second major toward fulfilling this requirement); and (3) a thesis normally written in the senior year and directed by a faculty member in the Russian and East European Studies program. Students can typically attain six credits for this project, i.e., three credits for directed readings in the first semester and three credits for writing the thesis in the second.

Study Abroad

Our students are encouraged to experience firsthand the excitement of being immersed in Russian culture through participation in a study program in Russia. Programs are available during the summer (five to eight weeks) or for an entire semester or academic year. Credits earned for course work taken in approved programs may be applied toward the Russian major or minor at Notre Dame. Grants are available on a competitive basis for summer language study through the Office of International Studies.

Senior Thesis/Honors Track

Russian majors are admitted into the honors track by invitation. To receive honors, a student must (1) complete all requirements for the major; (2) maintain a GPA of at least 3.5 in the major; and (3) receive a grade of A- or higher for a substantial honors thesis written in English. Closely supervised by one of the Russian faculty in the Department of German and Russian Languages and Literatures, the Russian honors thesis is to be the product of a three-credit honors track directed readings course taken in the senior year. The student will receive 1.5 credits in the fall semester for preparation of the thesis and 1.5 credits in the spring semester for writing the thesis. For more information, see <http://www.nd.edu/~grl/russfram.htm>.

Writing-Intensive Courses

All 30000- and 40000-level literature courses in German or Russian are writing-intensive. Majors in German or Russian who take upper-level literature courses fulfill the writing-intensive requirement of the College of Arts and Letters.

Placement and Language Requirement

At the beginning of each semester, placement tests in German and Russian will be administered that will allow students either to test out of one or two semesters of the language requirement or enroll in a course commensurate with their language proficiency. The placement test is mandatory for students who had German or Russian in high school.

Students testing out of three semesters must complete an additional course at the 20000 level or higher before testing out of the language requirement. This includes students who have taken an AP or SATII exam.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of German and Russian Languages and Literatures](#) heading.

Bradley (Classics); Steven Brady (First Year of Studies); Kathleen Sprows Cummings (Cushwa Center); Robert Goulding (Program of Liberal Studies); Lionel Jensen (East Asian Languages and Literatures); Kelly Jordan (ROTC); Thomas Schlereth (American Studies); Phillip Sloan (Program of Liberal Studies); Thomas A. Stapleford (History and Philosophy of Science); Kevin Whelan (Keough Institute for Irish Studies)

Visting Professor:

Scarlett O'Phelan Godoy (fall 2006)

Visiting Assistant Professors:

Enda Leaney; John Soares

Postdoctoral Teaching Fellows:

Mioara Deac; Matthew Grow

Graduate Teaching Fellows:

Angel Cortes (spring 2007); Suzanne Orr (spring 2007)

Instructors:

Sarah Davis-Secord (summer 2006); Michael DeGruccio (fall 2006); James Donahue (fall 2006); Michael Lee (fall 2006)

Program of Studies. The Department of History offers courses for undergraduates designed to expose them to life in the past as it was experienced and understood in the Americas, Europe, Asia, Africa, and Australia. Courses offered consist of lectures and seminars that require students to develop both a critical appreciation of primary and secondary texts and skills in historical thinking and writing.

Students interested in majoring in history at the University of Notre Dame have two options. **The standard major option consists of 10 three-credit upper-level history courses (beginning with a 3 or higher)**, beginning with an exciting introductory seminar (HIST 33000—History Workshop), which plunges students into the work of writing history from the moment they join the major through intensive interpretation of primary source documents. To encourage breadth of historical knowledge, standard majors also take a variety of courses emphasizing different chronological periods and geographical areas. More specifically, they must take one course from four of the five following fields: African/Asian/Middle Eastern history; Ancient/Medieval European history (to 1500); Modern European history (from 1500); United States history; Latin American history. One of the four courses must contain substantial material on the period before 1500. In addition, to encourage depth in a particular field of interest, standard majors also declare a concentration consisting of three courses. (These concentrations must be approved by the major's advisor by the beginning of the senior year.) Standard majors also take an elective in any field they choose. To complete their course work, standard majors take a departmental seminar (HIST 43xxx), which offers the opportunity to conduct primary research and produce a substantial paper.

The second option is a supplementary major, consisting of eight three-credit upper-level history courses (beginning with a 3 or higher). The supplementary major is designed for those majoring in other departments but also interested in pursuing a program of study in history. To encourage breadth of historical knowledge, supplementary majors take a variety of courses emphasizing different chronological periods and geographical areas. More specifically, they must take one course from four of the five following fields: African/Asian/Middle Eastern history; Ancient/Medieval European history (to 1500); Modern European history (from 1500); United States history; Latin American history. One of the four courses must contain substantial material on the period before 1500. In addition, supplementary majors take three electives. To complete their course work, supplementary majors will take a departmental seminar (HIST 43xxx), which offers the opportunity to conduct primary research and produce a substantial paper.

All standard and supplementary majors must take at least one *writing-intensive course* in the form of the departmental seminar (HIST 43XXX). In addition to prioritizing research in primary sources, these courses also emphasize writing as a process, with students encouraged to perform continual revisions and share their writing with their peers.

History Honors Program. The History Department offers a special program of study, the History Honors Program, for the most talented and motivated standard majors. Each fall semester, the junior class of history majors are invited to join; those selected begin the program in the spring semester of their junior year. A student in the History Honors Program will take 11 three-credit upper-division History courses to satisfy both the Honors Program and History Major requirements. In addition to taking the introductory gateway course (HIST 33000—History Workshop) and a variety of courses emphasizing geographical and chronological breadth (see the standard major option above), the student also takes two special Honors seminars. Instead of completing a departmental seminar, the student researches and writes a senior thesis, receiving three credits in each semester of the senior year. Each History Honors student will select a field of concentration and takes two additional courses in this field to complete the program. In the spring of the junior year, the student enrolls in an Honors Program Methodology Seminar (HIST 53001), designed to introduce the student to the various methods historians utilize to analyze and write about the past. (Students admitted to the Honors Program, but studying abroad during the spring semester junior year, are exempt from HIST 53001. They must, however, register a thesis topic and advisor with the director of undergraduate studies by the end of that semester.) In the fall of the senior year, the student will enroll in an Honors Program Reading and Discussion Colloquium (HIST 53002), intended to introduce the student to basic issues of critical interpretation and historiography through a specific field. In the fall and spring of the senior year, the student

MATHEMATICS

will work on a thesis (up to 50 pages) under the supervision of a specific faculty member. The student will register for HIST 58001 (three senior thesis credits) each semester of the senior year.

Phi Alpha Theta. Students who have completed at least four major-level courses in history, earning a grade point average of 3.5 or above, and whose cumulative grade point average is at least 3.2, are eligible for the Notre Dame chapter of Phi Alpha Theta, a national history honor society. The History Department initiates new members once per year.

COURSE DESCRIPTIONS

Assistant Professors:

Katrina D. Barron; Nero Budar; Zhiliang Xu; Yongtao Zhang

Program of Studies. Students in the College of Arts and Letters may pursue a major in mathematics with a concentration in honors. (Note that this program should not be confused with the Arts and Letters/ Science Honors program and that several concentrations, including Honors, are available with a major in mathematics in the College of Science.) The mathematics major in arts and letters aims to give the student a thorough liberal intellectual discipline and to furnish an adequate background for other fields of study. At the same time it prepares the student for graduate work in mathematics, and many of those who have taken the program have entered graduate schools in that field. Others have entered philosophy, medicine, law, economics and industrial management.

Students intending to follow this major in the College of Arts and Letters must declare their intention to the advisor indicated by the mathematics department and the dean of arts and letters at advance registration in the spring of their freshman year. Students must have completed or be completing satisfactory work in MATH 10850 and 10860. The program of their studies is subject in its entirety to approval by the advisor.

Students whose first major is in the College of Arts and Letters may also pursue a second major in mathematics. See "Mathematics As a Second Major" in the College of Science section of this *Bulletin*.

Fellows and Associated Faculty of the Medieval
Institute:

Asma Afsaruddin (Classics: Arabic); Joseph P. Amar (Classics: Arabic); Charles E. Barber (art history); Terri Bays (English); Alexander Blachly (music); W. Martin Bloomer (Classics: Latin); Joseph Bobik (philosophy); D'Arcy Jonathan Dacre Boulton (history); Maureen McCann Boulton (Romance languages: French); Keith R. Bradley (Classics: Roman history); Rev. David B. Burrell, CSC (philosophy); Theodore J. Cachey (Romance languages: Italian); John C. Cavadini (theology); Paul M. Cobb (history); Robert R. Coleman (art history); Olivia Remie Constable (history); Lawrence S. Cunningham (theology); Rev. Brian E. Daley, SJ (theology); JoAnn DellaNeva (Romance languages: French); Rev. Michael S. Driscoll (theology); Stephen D. Dumont (philosophy); Kent Emery Jr. (liberal studies; philosophy); Alfred Freddoso (philosophy); Dolores Warwick Frese (English); Stephen E. Gersh (philosophy); Robert Goulding (history); Brad S. Gregory (history); Li Guo (Classics: Arabic); Thomas Hall (English); Peter Holland (theater); David Jenkins (librarian); Rev. John I. Jenkins, CSC (philosophy); Louis Jordan (librarian); Encarnación Juárez (Romance languages: Spanish); Kathryn Kerby-Fulton (English); Mary M. Keys (political science); Brian Krostenko (Classics: Latin); Blake Leyerle (theology); Sabine MacCormack (English); Julia Marvin (liberal studies); Ralph M. McInerney (philosophy); Margaret Meserve (history); Christian R. Moevs (Romance languages: Italian); David O'Connor (philosophy); Katherine O'Brien O'Keefe (English); Mark C. Pilkinton (theater); Jean Porter (theology); Thomas J. Prügl (theology); Gretchen Reydam-Schils (liberal studies; philosophy); Gabriel Said Reynolds (theology); Robert E. Rodes (law); John Roos (political science); Charles M. Rosenberg (art history); Dayle Seidenspinner-Núñez (Romance languages: Spanish); Daniel J. Sheerin (Classics: Latin); Susan Guise Sheridan (anthropology; archaeology); Rabbi Michael A. Signer (theology); Marina Smyth (librarian); Anna Taylor (Classics: Latin); John Van Engen (history); Joseph P. Wawrykow (theology); Albert K. Wimmer (German); Robin Darling Young (theology); Katherine Ziemann (English)

Program of Studies. The Medieval Institute is one of Notre Dame's oldest and most renowned centers of learning. Begun in 1946, it was envisaged from its inception to be a premier locus for the study of the European Middle Ages. Over the decades its

scope has broadened to where it now covers Islamic, Jewish, Eastern, and Western Christian studies in an interdisciplinary scheme. The academic strength and stature of the institute are due not only to its faculty, students, and library, but also to its fidelity to the original liberal arts ideal.

Medieval Studies prepares students to enter graduate school, law school, medical school, or various careers including business, government, education, publishing, ministry, curatorship, and research. With an emphasis on close reading, precise textual analysis, careful writing, and vigorous discussion, the program fosters critical thinking, communication skills, historical awareness, cultural appreciation, and human understanding.

Far from being the "dark ages," medieval civilization witnessed the dawn of many of today's institutions including universities, hospitals, legal and economic systems, religious communities and doctrine, architecture, engineering, science, art, and literature. Modern society is indebted to the Middle Ages not only for its inheritance, but also for its relevance.

The Medieval Studies program offers four tracks, draws from 10 disciplines, and is tailored to each student's personal and professional goals. Anthropology; Art, Art History, and Design; Classics; English; German and Russian Languages and Literatures; History; Music; Philosophy; Romance Languages and Literatures; and Theology are the contributing departments. From these, students are encouraged to build a unique program of study, in consultation with a faculty advisor, around an area of concentration that captures an interest, prepares for a field, or contributes to an academic pursuit.

Students interested in Medieval Studies may elect one of the following four options:

1. Major in Medieval Studies
2. Honors Major in Medieval Studies
3. Supplementary Major in Medieval Studies
4. Minor in Medieval Studies

All three major tracks include two common components. Each student's curriculum is built around a concentration chosen by the individual (from the 10 participating departments), in conjunction with a faculty advisor. The concentration requires a minimum of four interrelated courses reflecting an intellectual and curricular coherence. The Medieval Studies Advanced Seminar (MI 43001) (3 credits) is the second common element in each of the major tracks. Students in the seminar are expected to read widely and discuss vigorously a set of sources that present a particular issue from several points of view. In addition, they are also expected to write a substantial research paper. The goal of the seminar is to engage students in thinking critically and knowledgeably across the boundaries of traditional disciplines while maintaining a focus on a particular time, place, or issue.

The three major tracks and the minor track also have an introductory required course (3 credits), MI 20001, *The World of the Middle Ages*.

Following are brief outlines of the basic requirements for the three major tracks and the minor track. Further details can be obtained from the director of undergraduate studies in the Medieval Institute.

Medieval Studies Major (30 credits)

- The World of the Middle Ages course
- Four courses drawn from two or more departments representing a concentration
- Four electives in medieval studies drawn from at least two departments
- MI 43001, *The Medieval Studies Advanced Seminar*

Medieval Studies Honors Major (36 credits)

- Same requirements as major in Medieval Studies (see above)
- EXCEPT one intermediate Latin course and one advanced Latin course are required in lieu of two medieval electives
- PLUS an honors thesis for 6 credits

Medieval Studies Supp. Major (24 credits)

- The World of the Middle Ages course
- Four courses drawn from two or more departments representing a concentration
- Two electives in medieval studies
- One additional elective in medieval studies
OR
MI 43001, *The Medieval Studies Advanced Seminar* (if available)

Medieval Studies Interdiscip. Minor (15 credits)

- The World of the Middle Ages course
- Three electives in medieval studies drawn from at least two departments
- One additional elective in medieval studies
OR
MI 43001, *The Medieval Studies Advanced Seminar* (if available)

COURSE DESCRIPTIONS

The complete descriptions for some courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Medieval Institute](#) heading.

Music

Chair:

Donald Crafton

J.W. Van Gorkom Professor of Music:

Susan L. Youens

Professors:

Alexander Blachly; Calvin M. Bower (emeritus); William Cerny (emeritus); Craig J. Cramer; Kenneth W. Dye; Ethan T. Haimo; Eugene J. Leahy (emeritus); Georgine Resick

Associate Professors:

Karen L. Buranskas; Mary E. Frandsen; Paul G. Johnson; Rev. Patrick Maloney, CSC (emeritus); Carolyn R. Plummer; Peter H. Smith

Assistant Professors:

John Blacklow; James S. Phillips (emeritus)

Artist in Residence in Piano:

Daniel Schlosberg

Visiting Assistant Professor:

Mark Beudert

Associate Professional Specialists:

Lawrence H. Dwyer; Daniel C. Stowe

Adjunct Faculty:

John Apeitos; Darlene Catello; Walter Ginter

Band Staff:

Kelly May; Matthew Merten; Emmett O'Leary; Sam Sanchez

Program of Studies. The Department of Music offers students a variety of musical experiences in accordance with its two objectives: (1) to provide all students, regardless of their major, knowledge and training in music through introductory, historical and theoretical courses, through participation in large and small ensembles and through applied instrumental or vocal study; and (2) to provide intensive curriculum and training for the student who chooses music as a major. Students who declared their major in music prior to fall 2005 will continue under the program of study that was in effect when they declared. Effective fall semester 2005 and thereafter, students majoring in music will choose a concentration in Theory and History, or in Performance. (A third concentration, Music and Culture, is anticipated in fall 2006.) Each concentration offers an honors option for students intending to pursue professional study in the field after graduation. These students should also continue to study at least one non-native language beyond the College's language requirement. All the concentrations have requirements beyond the course work. These may include recitals, ensembles, juries, and so forth. Attendance and assistance at music events each semester are required.

Students considering these programs should contact the department as early as possible, preferably in the first year of study. This is especially important if studying abroad is anticipated.

Advising. Each major will be assigned a faculty advisor who must be consulted in person to discuss the

program of study before a student may register for classes.

Lessons. Music majors in the performance concentrate qualify for a 100 percent discount on weekly one-hour applied music lessons on their primary instrument, and a 50 percent discount on additional lessons. Students in the history/theory and music and culture concentrations qualify for a 50 percent discount on lessons on a primary instrument and no discount for lessons on a secondary instrument. Applied music lessons are also available for nonmajors for a fee. Lessons may count as "activity" elective credits. (The College of Arts and Letters accepts up to three activity credits toward graduation.) The fee is charged to the students' accounts, and no refunds are made after the first lesson.

Interdisciplinary Minor in Liturgical Music. This 18-credit minor consists of three 3-credit courses in music and three 3-credit courses in theology, to be selected in consultation with the student's music advisor. Contact the director of undergraduate studies in the Department of Theology.

Master of Sacred Music degree. The MSM degree is a graduate program administered jointly by Music and Theology. For information, contact the director of Graduate Studies in the Department of Theology.

HISTORY/THEORY

The requirements for a 33-credit major with a concentration in theory and history are:

Class	Credits
Harmony and Voice Leading (Theory I) (Prerequisite course; 3 credits count as University elective)	0
Advanced Harmony and Voice Leading (Theory II)	3
Chromatic Harmony (Theory III)	3
Twentieth-Century Music: Structure and Style (Theory/History IV)	3
Musicianship I, II III	3
History I-III	9
Four 3-credit courses in history and theory, 20000-level and above	12
Music Total	33
Collegiate/University Requirements and Electives	87
Total	120
Honors in Music (optional) (One additional upper-level 3-credit course in music and a senior project, to be determined with advisor)	6

Students who have had previous music education may place out of the prerequisites, Harmony and Voice Leading (Theory I) and Musicianship Labs, by examination.

Students with a music GPA of 3.5 or higher will be invited to participate in the honors program at the end of their sophomore year.

Applied lessons and ensembles are encouraged, but not required. Students intending to continue the study of music after graduation should maintain a rigorous program of lessons and applied music.

PERFORMANCE

Students who wish to major in performance must have had a minimum of four years of instruction on their instrument prior to their enrollment at Notre Dame.

The requirements for a 36-credit major with a concentration in performance are:

Class	Credits
Studio Lessons (1 credit each for 2 semesters) (Prerequisite course; 2 credits count as an "activity" elective)	0
Harmony and Voice Leading (Theory I) (Prerequisite course; 3 credits count as University elective)	0
Advanced Harmony and Voice Leading (Theory II)	3
Chromatic Harmony (Theory III)	3
Twentieth-Century Music: Structure and Style (Theory/History IV)	3
History I-III	9
One 3-credit upper-level music course	3
Three additional elective credits in music	3
Advanced Performance Studio (2 credits per semester)	12
Total Music	36
Collegiate/University Requirements and Electives	84
Total	120
Honors in Music (optional)	6

(One additional upper-level 3-credit course in music and/or additional credits of Advanced Performance Studio, and an additional recital.)

Students with a music GPA of 3.4 or higher will be invited to participate in the honors program at the end of their sophomore year.

In order to continue to go forward in the performance program, students must be approved by faculty. In the spring semester of the freshman and sophomore years, all performance majors must participate in juries. Afterwards, the faculty will assess the level of their performance to determine if they are qualified to continue in the program. Students who demonstrate a high level of achievement in the sophomore juries will be candidates for the honors program.

Students in the performance concentrate may take proficiency exams to pass out of one or more of the musicianship courses; however, if they do not pass the proficiencies, they are expected to take Musicianship I–III. (These can be taken as electives or count toward the overload.)

Performance concentrators must present a senior recital. (Honors majors must present an additional recital.)

Voice majors who are enrolled in colleges other than Arts and Letters must fulfill the Arts and Letters language requirement—three semesters in one language or the equivalent.

Participation in Applied Music (e.g., chamber music class, large ensembles, chorale, opera, etc.) is required each semester. (No credit toward the major, but may be applied toward graduation as “activity” credits.)

Students who have had previous music education may place out of the prerequisite studio lessons, and out of Harmony and Voice Leading (Theory I), by examination.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Music](#) heading.

Philosophy

Chair:

Paul J. Weithman

Michael P. Grace Professor of Medieval Studies:

Ralph McNerny

F.J. and H.M. O'Neill Professor of Science, Technology and Values:

Kristin Shrader-Frechette

Rev. Theodore M. Hesburgh Professor Emeritus of Arts and Letters:

Rev. David Burrell, CSC (emeritus)

McMahon/Hank Professor of Philosophy:

Karl Ameriks

Notre Dame Professor of Philosophy:

Gary Gutting

Rev. John A. O'Brien Professor of Philosophy:

Alvin Plantinga

John Cardinal O'Hara Professor Emeritus of Philosophy:

Rev. Ernan McMullin (emeritus)

John Cardinal O'Hara Professor of Philosophy:

Peter Van Inwagen

George N. Shuster Professor of Philosophy:

Michael J. Loux

Rev. John A. O'Brien Senior Research Professor:

Alasdair C. MacIntyre

Professors:

Robert Audi; Joseph Bobik; Fred Dallmayr; Marian A. David; Cornelius F. Delaney; Michael R. DePaul; Michael Detlefsen; Stephen Dumont; John Finnis (concurrent); Thomas P. Flint; Alfred Freddoso; Stephen Gersh (concurrent); Kevin Hart (concurrent); Vittorio Hösle (concurrent); Don A. Howard; Lynn Joy; Edward Manier; Mark Roche (concurrent); Kenneth Sayre; James P. Sterba; Stephen H. Watson; Paul J. Weithman

Associate Professors:

Patricia Blanchette; Sheilah Brennan (emerita); Rev. John Jenkins, CSC; Janet A. Kourany; Vaughn R. McKim; G. Felicitus Munzel (concurrent); John O'Callaghan; David K. O'Connor; William Ramsey; Michael Rea; Rev. Herman Reith, CSC (emeritus); Gretchen Reydam-Schils (concurrent); Fred Rush (emeritus); W. David Solomon; Leopold Stubenberg; Ted A. Warfield

Assistant Professors:

Timothy Bays; Katherine Brading; Curtis Franks; Anja Jauernig; Samuel Newlands; Jeffrey Speaks

Professional Specialists:

Anastasia Gutting; Montey G. Holloway; Alven Neiman

Program of Studies. There are two ways to major in philosophy: Regular philosophy majors are required to take eight courses in philosophy beyond the general two-course University requirement. Three specific courses must be included among the eight: a two-semester sequence of courses in the history of philosophy, Ancient and Medieval Philosophy (PHIL 30301) and Modern Philosophy (PHIL 30302), and a course in formal logic (PHIL 30313 or, for qualified students, PHIL 83901. The logic requirement can also be fulfilled by MATH 10130, though this course does not count toward the eight courses required for the major). In addition, regular majors must take at least two courses at the 40000 level and three electives at either the 30000 level or 40000 level. (In special cases, one of the electives may be taken at the 20000 level.) Students in the Arts and Letters Preprofessional Program or the Arts and Letters Engineering Program who take the regular major in philosophy are required to take seven rather than eight philosophy courses beyond the two-course University requirement but otherwise must fulfill all other requirements for the major.

Honors philosophy majors are required to take 10 courses in philosophy beyond the general two-course University requirement. In addition to the courses taken to satisfy the regular major requirements, honors majors must take one additional 40000-level seminar and write a senior thesis (PHIL 48499) in the fall semester of the senior year. The senior thesis will count as a regular three-hour course and should be planned with the director of undergraduate studies during the semester prior to

its writing. The honors major is intended primarily for students planning postgraduate study, and a minimum grade point average of 3.5 is expected, though exceptions are possible. Students in the Arts and Letters Preprofessional Program or the Arts and Letters Engineering Program who take the honors major in philosophy are required to take nine rather than 10 philosophy courses beyond the two-course University requirement but otherwise must fulfill all other requirements for the major.

Students majoring in other departments may complete a supplementary major in philosophy by taking six courses beyond the two-course University requirement. These six courses must include the history of philosophy sequence (PHIL 30301 and 30302) and two additional courses at the 30000 level or higher, selected in consultation with one of the philosophy department's faculty advisors. Students in the Program of Liberal Studies may complete the supplementary major with five rather than six courses beyond the University two-course requirement but otherwise must fulfill all other requirements for the second major. Philosophy also contributes to a number of interdepartmental concentrations in the College of Arts and Letters. Details can be found in the Arts and Letters section of the *Bulletin* on Interdisciplinary Minors within the college.

All 40000-level philosophy courses are writing-intensive requiring at least 20 pages of written work that may take various forms: reflections on readings, class presentations, or shorter or longer research papers. Students planning to go on to graduate studies in philosophy or related disciplines typically write a senior thesis as well.

PHILOSOPHY AND THEOLOGY JOINT MAJOR

Director:

David Fagerberg, Theology

Faculty:

Additional faculty for the joint major are drawn from the departments of philosophy and theology.

Program of Studies. The joint major is intended for undergraduates who are intrigued by philosophical and theological ideas and who have an equal commitment to both disciplines. It seeks to equip such students to handle theology and philosophy adeptly. The major is structured, providing undergraduates with a suitable introduction to the study of both disciplines, but also flexible, granting students considerable scope for the pursuit of their own interests.

The joint major offers the opportunity for an informed investigation of religious and philosophical ideas and should appeal especially to those who intend to pursue graduate work in philosophy or theology.

The joint major incorporates the University requirements in the two departments and most of the formal requirements of the first majors in theology

POLITICAL SCIENCE

and philosophy. Students in the joint major will take the two-semester sequence in Christian Traditions and an upper-level course in Scripture. The joint major, however, does not require the one-credit proseminar in theology.

Other formal requirements are peculiar to the joint major. Students will study a classical language for two semesters. (For practical as well as pedagogical reasons, this will normally be Greek.) Majors will also be expected to take the joint seminar offered each spring. Each seminar, led by a theologian and a philosopher, will examine an issue in which the differing approaches of philosophy and theology may prove fruitful. The topic and instructors will change from year to year. Finally, each major will submit a senior thesis prepared under the direction of two advisors, drawn from each department. At the option of the directors, this thesis may be presented and discussed in an informal colloquium consisting of the other students in the joint major.

The remaining courses in the joint major will be at the discretion of the student. Normally taken at the 40000 level, there should be an equal distribution in the electives between theology and philosophy. However, students who wish may devote up to six hours within the joint major to additional language work. These hours may add to the classical language previously studied, or used to begin another language of significance for philosophical and theological work.

The joint major differs from a first major in one discipline and a supplementary major in the other in that the latter requires 55 credit hours, whereas the joint major requires 60. Furthermore, the joint major calls for language instruction beyond what the University requires for all undergraduates. Finally, the joint seminars should prove especially challenging, inviting students to explore important topics in an interdisciplinary way. These features should make the joint major particularly attractive to students preparing for advanced study.

Requirements in Philosophy:

PHIL 10101 or 20201, and 20000-level course (University-required courses; a higher-level course may be substituted for the latter).

PHIL 30301 and 30302. History of Philosophy I and II.

PHIL 30313. Formal Logic.

Requirements in Theology:

THEO 10001 or 20001 and 20000-level course (University-required courses).

THEO 40201 and 40202. Christian Traditions I and II.

THEO 40101 or 43101. Upper-division scripture course.

Plus:

Classical language (normally Greek)—two semesters.

Joint seminar(s).

Senior thesis.

18 credit hours of electives (up to six of these may be additional hours in language study).

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Philosophy](#) heading.

Carolina Arroyo; Joshua B. Kaplan; Rev. William Lies, CSC (concurrent)

Assistant Professional Specialists:

Luc Reydam; Matthew Doppke (concurrent)

Program of Studies. The political science major combines breadth and depth, helping students develop a general foundation for the study of politics and offering opportunities to explore particular areas of interest. Courses give students both a strong knowledge base and facility with the tools of political analysis. The department offers a substantial number of courses in all four fields of the discipline—American politics, international relations, comparative politics, and political theory—covering a range of topics and analytical perspectives. The major can prepare students for a wide variety of vocations. After graduation, many students go to law school or graduate school, or work for service organizations, government, or business.

Requirements. The major requires a minimum of ten courses:

- four breadth requirements, consisting of a course in each of the four fields of political science: American politics, international relations, comparative politics, and political theory. Two of these must be introductory courses. The other two can be introductory courses or intermediate-level courses.

- four intermediate-level courses: students may specialize in one field or take courses in a combination of fields that suits their interests.

- two writing seminars: one junior seminar and one senior seminar

Honors Track. Students may graduate with departmental honors if they:

- graduate with a cumulative and major grade point average of 3.55 or above.

- complete a senior thesis with a grade of B+ or higher.

- replace one of the four intermediate-level course with an advanced course, such as an additional writing seminar, a graduate course, or the research design course.

Writing-Intensive Requirement. The requirements for the political science major include the satisfactory completion of two writing seminars, one to be taken by the end of the junior year and the second by the end of the senior year. Writing seminars

in political science combine instruction in specialized subjects with exercises specifically designed to improve the ability of students to do cogent analytic writing. They offer students the opportunity to learn the discipline of political science in a manner than can only be gained through writing within a small group setting. The required writing assignments in these seminars thus call on students to describe and summarize and also to organize logically, think rigorously, and explain coherently. Assignments may involve a review of the secondary scholarly literature, but they emphasize original research. Moreover, they strive to foster intellectual independence. The writing requirements for all seminars include 25 pages, either in one paper or broken into several shorter assignments. Instructors in writing seminars offer students constructive criticism and opportunities to improve their writing. Some instructors permit multiple drafts of papers; others look for improvement in writing from one assignment to the next.

In lieu of one writing seminar, students who achieve a GPA of 3.5 or higher are encouraged to write a thesis during their senior year. This two-semester commitment involves working closely with a faculty reader on an original research project and offers students the opportunity to explore more deeply and independently a subject of their choice. The average length of a senior thesis is 50 to 60 pages.

Senior Thesis. Students with a grade point average of 3.5 or above are encouraged to write a senior thesis. This two-semester project involves working closely with a faculty supervisor, and offers the opportunity to explore more deeply and independently a research project of the student's choice.

Pi Sigma Alpha. Students who have taken a minimum of four political science courses, with a grade no lower than a B in their political science courses, and who have a cumulative grade point average of 3.55 or above are eligible to join Notre Dame's chapter of Pi Sigma Alpha, the national honor society for political science majors.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Political Science](#) heading.

GRADUATE COURSES

Many graduate courses are open to qualified undergraduates by permission.

Program of Liberal Studies

Chair:

Henry M. Weinfeld

Rev. John J. Cavanaugh, CSC, Professors of Humanities:

Professors:

Kent Emery Jr.; Walter J. Nicgorski; F. Clark Power; Phillip R. Sloan; Henry M. Weinfeld

Associate Professors:

Stephen M. Fallon; Julia Marvin; G. Felicitas Munzel; Gretchen Reydam-Schils

Assistant Professors:

Steven G. Affeldt; Robert Goulding; Jessica Murdoch; Pierpaolo Polzetti; Thomas Stapleford

Instructors:

Bernd Goehring; Jessica Murdoch

Program of Studies. The Program of Liberal Studies, Notre Dame's Great Books program, offers an integrated three-year sequence of studies leading to the bachelor of arts degree. Students enter the program at the end of the First Year of Studies.

Fundamental to the program is a conception of a liberal arts education that aims to avoid the separation of the humanities into isolated disciplines. The program seeks to provide a unified undergraduate education in all of the liberal arts, including music and the natural sciences. For this reason the program is not to be equated with a "general humanities" educational program. The study of literature, philosophy, natural and social science, theology, history, and the fine arts will take place within a larger unifying conception of the liberal arts that cuts across many of the disciplinary boundaries suggested by these terms. Because the goal of the program is to provide more than an introduction to various subject matters, none of the tutorials or seminars stands alone in the program. The curriculum grows organically over the three years, with each course presuming all of its predecessors.

Although the program provides education in the liberal arts, it also considers the liberal arts in themselves as insufficient for a complete education. The liberal arts are the critical tools of learning, but they are also to be related to the larger search for genuine understanding and philosophic wisdom. Philosophy, which explores the basic questions of epistemology, ethics, and politics, is also related to the claims of the Christian tradition. The program maintains specific tutorials in the various disciplines to enable the relationships among them to develop systematically and also to foster a concern with what unifies or transcends them.

The normal method of instruction in the program is through the reading and discussion of primary texts. The student is asked to take an active role in the learning process. Particularly in the seminar, the

authors of the great books are considered to be the primary teachers.

The program requires writing throughout the curriculum, especially in the tutorial classes. In the spring semester of their senior year, all students are required to write a major essay, usually involving extensive research, under the direction of a faculty advisor. The senior essay offers students a particularly intensive writing experience and an opportunity to investigate a specialized topic of interest in depth.

To accomplish the goals of the program, the student must take the entire sequence of courses, with each course building upon the earlier ones in a cumulative and organic fashion. For this reason, the program must constitute the student's primary major. Sufficient electives are available in each of the three years, however, to allow concentrations to be completed. Supplementary majors are difficult but not impossible to complete and usually can be accommodated.

Students must formally apply for entrance into the program by a stated date in the spring of the first year, and application forms will be available by March. Students interested in entering the program are urged to complete the University science, mathematics, and first theology requirement in the first year. In some special cases, typically involving international study, a student may begin the program at a later date, but in no case after the beginning of the junior year. Students admitted to the program at later stages must be prepared to make up courses they have missed.

Associate Professional Specialist:

Anré Venter

Assistant Professional Specialist:

Kathleen C. Gibney

Program of Studies. Psychology is the scientific study of the behavior of organisms with a primary focus on human behavior. It is concerned with the biological and environmental determinants of behavior as reflected in the study of physiological, sensory, perceptual, cognitive, motivational, learning, developmental, aging, and social processes. The undergraduate program seeks a balance between exposure to basic psychological principles and theories and their extension to the applied areas such as child education, counseling, mental retardation, and behavioral deviancy.

The undergraduate courses are intended to meet the needs of students who plan to (1) major in psychology and later attend graduate school in psychology or affiliated fields, (2) major in psychology as part of a general cultural program, (3) obtain training in psychology as a special supplement to their major interest or (4) use psychology to satisfy social science requirements or electives.

One of the department's main features is an emphasis on opportunities for close faculty-student involvement in research projects at the undergraduate level. The research specialties in which majors may become involved range from basic research in such areas as psychophysics, human and animal learning, child development, aging, and psycholinguistics, to applied research in a community setting. Students planning to do graduate work in psychology will plan their program in close coordination with their faculty advisors.

Undergraduate major. The psychology major requires a minimum of seven three-credit courses, two four-credit courses (30100 and 30160) and one one-credit course (20010), and, therefore, a minimum of 30 credit hours.

The specific requirements comprising the minimum 30 credit hours are as follows. All majors are required to take three credits of PSY 10000, Introductory Psychology (for freshmen), or PSY 20000 or 20001, Introductory Psychology (for upper-class students) as a prerequisite for the content psychology courses. In addition, all psychology majors are required to take PSY 30100, Experimental Psychology I: Statistics (four credits), and PSY 30160, Experimental

Psychology II: Research Methods (four credits).

Majors then have a choice in that they are required to complete two of the following five courses in the Social and Developmental Processes (CLASS A): PSY 30200, Developmental Psychology; PSY 30600, Social Psychology; PSY 30300, Personality; and PSY 30310, Abnormal Psychology; and PSY 30340, Cross-Cultural Psychology. Similarly, majors are required to complete two of the following five courses in the Biological and Learning Processes (CLASS B): PSY 30500, Physiological Psychology; PSY 30430, Learning and Memory; PSY 30440, Sensation and Perception; PSY 30400, Cognitive Psychology; and PSY 30510, Behavioral Genetics. In their senior year each major must take two content courses at the 40000 level, which are small, in-depth discussion-oriented seminars generally in the instructor's specific area of expertise. All 40000-level seminars are designated writing-intensive courses, satisfying the College of Arts and Letters writing requirement. (See the introductory portion of the Arts and Letters section.) PSY 47900, Special Studies, cannot be used to satisfy the 40000-level major requirement. Finally, in the semester following their declaration of a major in psychology, new majors are expected to participate in a one-credit-hour seminar called PSY 37900, Psychology: Science, Practice, Policy, which provides an introduction to the department and the faculty.

Note: PSY 37900 or PSY 47900, Special Studies cannot be used to satisfy any of the 30000-level or 40000-level courses. However, these credits are strongly recommended for any students intent on pursuing a graduate career in psychology. In addition, even though Introductory Psychology (PSY 10000, PSY 20000, or PSY 20001) is a prerequisite for the content area courses, it does not fulfill any of the 30-credit-hour requirements for the major.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Psychology](#) heading.

Romance Languages and Literatures

Chair:

Theodore Cachey

Vice Chair and Director of Graduate Studies:

Ben Heller

Assistant Chair and Director of Undergraduate Studies:

Shauna Williams

Professors:

José Anadón; Maureen Boulton; Theodore J. Cachey; Bernard Doering (emeritus); Julia V. Douthwaite (Assistant Provost, Campus International Development); Kristine Ibsen; Carlos Jerez Farrán; Dayle Seidenspinner-Núñez (Associate Dean, Arts and Letters); John P. Welle

Associate Professors:

Thomas Anderson; Paul F. Bosco (emeritus); JoAnn DellaNeva; Ben Heller; Encarnación Juárez-Almendros; Louis MacKenzie; Christian R. Moevs; María Rosa Olivera Williams; Catherine Perry; Colleen Ryan-Scheutz; Alain Toumayan

Assistant Professors:

Samuel Amago; Vittoria Bosco (emerita); Patricio Boyer; Isabel Ferreira Gould; Alison Rice

Research Professor:

Hugo Verani

Associate Professional Specialists and Concurrent

Lecturers:

Geraldine Americs, Marie-Christine Escoda-Risto; Janet Fisher-McPeak; Patrick I. Martin; Paul McDowell

Assistant Professional Specialists and Concurrent

Lecturers:

María Coloma; Giovanna Lenzi-Sandusky; Elena Mangione-Lora; Ivis Menes; Odette Menyard; Andrea Topash Ríos; Patrick Vivirito; Shauna Williams

Visiting Assistant Professional Specialists and

Concurrent Lecturers:

Alessia Blad; Johara Sonza; Sandra Teixeira

Program of Studies. The Romance languages derive from Vulgar Latin spoken throughout the Roman Empire. A major course of study is offered in French, Italian, and Spanish. The study of foreign languages, literatures, and cultures provides educational opportunities relevant to an increasingly interdependent world. A crucial component of a liberal education, the acquisition of foreign-language skills enhances our powers of communication and serves to introduce us to the enduring cultural achievements of other peoples. Moreover, the study of a foreign language broadens our mental horizons, encourages us to think and act more globally, and stimulates our understanding of the traditions of other nations. Elementary and intermediate courses develop the students' ability to understand, speak, read, and write a foreign language with facility and confidence. Students can take advantage of the latest in foreign language technology in the Language

Resource Center to increase their fluency in the target language.

Upper-division courses present a wealth of literary, historical, and cultural traditions and emphasize the nature and development of national cultures. Many courses focus on the literature and culture of certain historical periods. Others trace the development of literary genres or examine a theme across periods and genres. And still others inculcate the critical and analytical skills necessary for an informed interpretation of foreign language texts. Participation in Notre Dame's international study programs in Brazil, Chile, France, Italy, Mexico, and Spain (see the International Study Programs section of this *Bulletin*) is highly recommended although not required to pursue a major in Romance languages and literatures. Majors and supplementary majors in French, Italian, and Spanish must complete 50 percent of their credit hours in the major in residency at Notre Dame and meet the following program requirements.

PROGRAM IN FRENCH AND FRANCOPHONE STUDIES

The Major in French and Francophone Studies

The requirements for a major in French and Francophone studies consists of successful completion of 30 credit hours or 10 courses above ROFR 20215. Of these 10 courses, no more than three may be at the 20000 level (20300 and above), six must be in literature/culture studies, and at least half must be taken in residence at Notre Dame. Required among these 10 courses are ROFR 30310 (Textual Analysis), ROFR 30710 and ROFR 30720 (French Literary Surveys I and II), at least two courses at the 40000 level, and the Senior Seminar (ROFR 53000). ROFR 30310 (Textual Analysis) is the recommended prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this *Bulletin* for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credits satisfy the language requirement only and may not be applied to the major.

The Supplementary Major in French and Francophone Studies

The requirements for a supplementary major in French and Francophone studies consists of successful completion of 24 credit hours or eight courses above ROFR 20215. Of these eight courses, no more than three may be at the 20000 level (20300

and above), six must be in literature/culture studies, and at least half must be taken in residence at Notre Dame. Required among these eight courses are ROFR 30310 (Textual Analysis), ROFR 30710 and ROFR 30720 (French Literary Surveys I and II), and at least two courses at the 40000 level or above, one of which may be the Senior Seminar (ROFR 53000). ROFR 30310 (Textual Analysis) is the recommended prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this *Bulletin* for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credits satisfy the language requirement only and may not be applied to the major.

The Minor in French and Francophone Studies

The requirements for a minor in French and Francophone studies consists of successful completion of 15 credit hours or five courses, taught in French, above ROFR 20215. Of these five courses, no more than two may be at the 20000 level (20300 and above). Required among these five courses are: ROFR 30710 or ROFR 30720 (Survey of French Literature I or II) and one 40000-level course in literature or culture from a period not covered by the survey taken (i.e., ROFR 30710 and one 40000-level course covering a period after the 17th century, or ROFR 30720 and one 40000-level course covering a period before the 18th century). This 40000-level course and at least one other course must be taken in residence at Notre Dame. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the requirement of ROFR 30710 or ROFR 30720 (see the Angers pages in this *Bulletin* for a description of those courses and their equivalencies at Notre Dame). ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credits satisfy the language requirement only and may not be applied to the minor.

The Honors Track in French

French majors with a GPA of at least 3.7 in the major may be admitted into the honors track by invitation. In addition to completing the major, students will either take a graduate course as an 11th course (for first majors) or as a ninth course (for supplementary majors), or, by invitation, write an

honors thesis, which will count as an 11th or a ninth course.

Combined BA/MA Program in French

The Department of Romance Languages and Literatures offers its majors in French the opportunity to participate in its graduate program through a combination BA/MA degree in French. This program requires students to take 30 credit hours during the normal four-year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, take the qualifying exam given to all first-year graduate students, and apply to the Graduate School for admission during the Spring semester. BA/MA students are eligible for a teaching fellowship during their fifth year that includes a tuition waiver and a generous teaching stipend. Well qualified students who are interested in this program should contact the director of Graduate Studies and/or the graduate coordinator in French at the beginning of their junior year.

PROGRAM IN ITALIAN LITERATURE AND CULTURE

The Major in Italian

The major requires 30 credits or 10 courses at the 20000 level or above, including no more than two 20000-level courses (ROIT 20215 counts as two courses for the major), ROIT 30711 (Medieval-Renaissance Italian Literature and Culture), ROIT 30721 (Modern Italian Literature and Culture), ROIT 43000 (Italian Seminar), and a minimum of four elective ROIT courses in Italian literature or culture at the 30000 or 40000 level. ROIT 30310 (Textual Analysis/Advanced Grammar Review) is recommended for all majors. The ninth and tenth courses may be on an Italian subject in another discipline (for example, architecture, art history, or history). A maximum of two of the elective courses may be conducted in English or with texts in translation. Equivalent Italian language, literature, or culture courses from foreign study programs or other universities may be substituted by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Supplementary Major in Italian

Supplementary majors are expected to demonstrate competency in the language and to complete 24 credits or eight courses at the 20000 level or above, including no more than two 20000-level courses (ROIT 20215 counts as two courses for the supplementary major), ROIT 30711 (Medieval-Renaissance Italian Literature and Culture), ROIT 30721 (Modern Italian Literature and Culture), ROIT 43000 (Italian Seminar), and a minimum of three elective ROIT courses in Italian literature or culture at the 30000 or 40000 level. ROIT 30310 (Textual Analysis/Advanced Grammar Review) is recommended for all majors. A maximum of two of these elective courses may be conducted in English

or with texts in translation, or may be on an Italian subject in another discipline. Equivalent Italian language, literature, or culture courses from foreign study programs or other universities may be substituted by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Minor in Italian

The minor in Italian comprises 15 credits or five courses at the 20000 level or above, including at least three courses at the 30000 or 40000 level. Three of the five courses must be in Italian language and/or literature; the fourth and fifth courses may be on Italian literature taught in English or on an Italian subject in another discipline (for example, art history, architecture, or history). Courses from foreign study programs or other universities may be substituted by permission, but at least two courses for the Italian minor must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Honors Track in Italian

Italian majors are admitted into the honors track by invitation. The honors track major consists of 33 credits or 11 courses, including all the requirements for the major, a GPA in the major of at least 3.5, plus a substantial final essay, to be written in Italian for a graduate course or an honors directed reading tutorial, which will constitute the eleventh course.

The Combined BA/MA Program in Italian

The Department of Romance Languages and Literatures offers its majors in Italian the opportunity to participate in its graduate program through a combination BA/MA degree in Italian. This accelerated program requires students to take 30 credit hours at the 20000 level or above during the normal four year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, the qualifying oral exam given to all first-year graduate students, and apply to the Graduate School for admission during the spring semester. BA/MA students are eligible for a teaching fellowship during their fifth year that includes a tuition waiver and a generous teaching stipend. Students should have a strong academic record and substantial progress toward their Italian major completed by the second semester of their junior year. It is imperative that students interested in this program contact the director of Graduate Studies and/or the graduate coordinator in Italian at the beginning of their junior year.

PROGRAM IN IBERIAN AND LATIN AMERICAN STUDIES

All majors in Spanish are required to take a core sequence consisting of ROSP 30310 (Textual Analysis) and one course in each of the following areas of Spanish and Spanish American Literature:

ROSP 30710 (Early Peninsular), ROSP 30720 (Modern Peninsular), ROSP 30810 (Early Spanish American) and ROSP 30820 (Modern Spanish American). These courses may be substituted with equivalent senior-level courses with departmental approval. AP credit may not be applied toward the major.

The Major in Spanish

The major in Spanish requires 30 credits or 10 courses 20202 and above, including the required core sequence described above or equivalents, two senior-level courses, and the Senior Seminar. Equivalent courses from international study programs or other universities may be substituted with departmental approval. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Supplementary Major in Spanish

Supplementary majors in Spanish are required to complete 24 hours or eight courses 20202 and above, including the required core sequence described above or equivalents and one senior-level course. Equivalent courses from international study programs or other universities may be substituted with departmental approval. Fifty percent of the credits for the supplementary major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

Minor in Portuguese

The minor in Portuguese and Brazilian Studies consists of 15 credits, five courses, 3 credits each. Prerequisites are ROPO 10101 and 10102, or 110103 and 10104, or 10105 and 10106. Requirements include five courses in Portuguese language and Luso-Brazilian literature beyond the prerequisites, ROPO 20201 and 20202, and three additional courses at the 30000/40000 level. Three of the five courses must be in Portuguese language and/or Luso-Brazilian literature, film, and culture taught in Portuguese; the fourth and fifth courses may be on Luso-Brazilian literature, film, and culture taught in English; and the fourth and fifth courses may be on a Portuguese or Brazilian subject in another discipline (for example, anthropology, history, Latin American studies, FTT, political science, Romance languages and literatures, theology, etc.). Courses from foreign study programs or other universities may be substituted by permission, but at least three courses for the Portuguese minor must be taken in residence at Notre Dame. AP credit may not be applied toward the minor.

Interdisciplinary Minors

Spanish majors are encouraged to pursue allied courses offered through area studies and other interdisciplinary minors. Spanish courses offer a particularly appropriate complement to the Latin American studies, Latino studies, and European studies programs. See the section on Interdisciplinary Minors in this *Bulletin* for more details. Majors may also apply one senior-level ROPO course in Luso-Brazilian culture and literature toward their elective credits.

The Honors Track in Spanish

Spanish majors are admitted into the honors track by invitation. The honors track major consists of 33 credits or 11 courses including all the requirements for the major, a GPA in the major of at least 3.7, and enrollment in one graduate seminar in the spring semester of the student's senior year.

The Combined BA/MA Program in Spanish

The Department of Romance Languages and Literatures offers its majors in Spanish the opportunity to participate in its graduate program through a combination BA/MA degree in Spanish. This accelerated program requires students to take 30 credit hours 2020 and above during the normal four-year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, the qualifying oral exam given to all first-year graduate students, and apply to the Graduate School for admission during the spring semester. During their fifth year, BA/MA students are eligible for a teaching fellowship, which includes a tuition waiver and a generous teaching stipend. Students should have a strong academic record and should have made substantial progress toward their Spanish major by the second semester of their junior year. It is imperative that students interested in this program contact the director of Graduate Studies and/or the graduate coordinator in Spanish at the beginning of their junior year.

MAJOR IN ROMANCE LANGUAGES AND LITERATURES

The undergraduate major in Romance Languages and Literatures is designed for qualified students who wish to major in two programs (French, Italian, or Spanish). Cross-cultural in focus, the major recognizes the importance of studying the correspondences and differences among various Romance literatures and cultures and of reexamining traditional disciplinary boundaries. The requirements for a major in Romance languages and literatures include competency in two languages and successful completion of 36 credit hours or 12 courses, which must be distributed equally between the two respective language programs as follows:

- (1) Two survey courses in each language and literature program (French or Italian); Spanish requires either four survey courses (two in peninsular and two in Latin American) or a combination of two survey courses in one area and two 40000-level courses in the other area;
- (2) Textual Analysis in one program;
- (3) Two 40000-level courses in each program (if the survey requirement in Spanish is fulfilled with two 40000-level courses, these courses may count for the 40000-level requirement in Spanish);
- (4) One senior seminar in one program;
- (5) Two elective courses in the department (any exception requires permission).

Placement in Language Courses

For French and Spanish, there is an online placement exam for students who have not already demonstrated language proficiency through national standardized testing, such as the AP or Achievement tests. Students with previous experience are required to take one of these tests before enrolling in their first course in those languages. For Italian or Portuguese placement, please contact the department. The normal prerequisite for a 30000-level course is at least one 20000-level course or permission of the instructor. The normal prerequisite for a 40000-level course is at least one 30000-level course or permission of the instructor.

Policy Regarding Romance Language Placement Examination

The placement examination is designed to place each student at an appropriate level within a language sequence. Obtain placement examination information from the Department of Romance Languages and Literatures.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Romance Languages and Literatures](#) heading.

Sociology

Chair:

Ann R. Power

Assistant Professional Specialists:

Russell S. Faeges; Ann R. Power

Program of Studies. The Department of Sociology has a national reputation and its scope of interest is worldwide. Yet it also is intensely concerned with the US cultural and social experience and its problems.

The requirements for a sociology major reflect a program that offers both structure and flexibility. The program is designed to acquaint the student with the core of the discipline and with areas of specialization which can be studied in some depth.

Sociology deals with human interaction on the group level wherever it may occur: in family and business, law and politics, medicine and religion, and a host of other settings. What can you do with a sociology degree? Notre Dame's survey of alumni who majored in sociology revealed that they are employed as university professors, corporation executives, real estate agents, insurance agents, consultants, politicians, medical administrators, teachers, social workers, business managers, religious ministers, and many other occupations.

The requirements for the sociology major are as follows.

(a) Every student is encouraged to take SOC 10002, Understanding Societies; SOC 20001, The Sociological Enterprise; or SOC 30004, Principles of Sociology. Neither course is required but recommended as a good foundation for the sociology major.

(b) Students must take a minimum of 25 credit hours (usually eight courses and the proseminar—one credit) offered by the department. Students are urged to start their major as early as possible but can declare a major or change majors at any time as long as they are able to fulfill the requirements.

(c) Central to the requirements for the major are the following four courses:

SOC 30900. Foundations of Sociological Theory
SOC 30902. Research Methods
SOC 30903. Statistics for Social Research
SOC 33090. Proseminar (one credit)

Required courses should be taken as soon as possible, especially before taking any 40000-level courses.

(d) Each major must take a minimum of two 40000-level lecture or seminar courses. Internships (SOC 45096) and Directed Readings in Sociology (SOC 46097) do not fulfill this requirement.

SOCIOLOGY

(e) A maximum of six credit hours of internship can be used as electives to meet the 25-hour requirement for the major. Normally a student should take an appropriate lecture course in preparation for the internship.

The department prides itself on its program of close personal advising, in which each major can build a program of courses with the help of a faculty advisor and undergraduate director. Advisors willingly give much time to aid students in planning their course schedules and careers. Each major is assigned to a faculty advisor whose own academic interests dovetail with those of the student. Each student, working closely with a faculty advisor, can map out a personalized program of study that will satisfy the department's requirements for the major and simultaneously accommodate the student's academic interests and career aspirations.

The sociology major can be pursued along with another major. Many of our students combine sociology with a major in business, economics, political science, preprofessional, psychology, theology, etc. It is important to note that students in the Mendoza College of Business who wish to major in sociology in addition to their business major do not have to meet all the other requirements of the College of Arts and Letters.

Of particular interest to students in recent years have been the Gender Studies Interdisciplinary Concentration; the program of the International Institute for Peace Studies; the Computer Applications Program; the Hesburgh Program in Public Service; and Education, Schooling, and Society. All of the above are readily combined with a sociology major.

Students pursuing a major in sociology must meet all requirements for the major or equivalent courses. Additional courses from other departments and programs may be accepted as fulfilling the major, provided they meet with the approval of the sociology department. The department tries to be flexible when working out an individual student's program, and with the advisor's recommendation, other modifications also are possible.

The department has an active Epsilon Chapter of Alpha Kappa Delta, the international sociology honor society. Especially through the AKD, as well as through informal meetings in faculty homes and field trips, majors make strong friendships with other majors having common interests. Students interested in the various phases of the program are encouraged to contact the director of undergraduate studies (Room 823 Flanner Hall) at any time.

The department also encourages students to join the University of Notre Dame Sociology Club. The purpose of this club is to enrich the sociology major. This student organization sponsors activities oriented to careers in sociology and sociology-oriented careers, to becoming professionally active while in college, and to student interests in society, as well as to purely social activities.

Sociology Undergraduate Honors Program. Starting in fall 2006, the Sociology Department will offer an honors program to students who excel in their sociological studies. Students must have taken at least one introductory course in sociology and be recommended by a faculty member. Identified students will receive a letter of invitation from the director of undergraduate studies to participate in the program. In addition to the usual requirements of the sociology major, students in the honors programs are required to take at least two additional 3-credit courses at the 4000-level or higher and one advanced 3-credit course in statistics or research methods, thus completing an additional nine credits over the 25 minimum, or 34 credits total. When appropriate, a student may be given permission to take the graduate-level statistics sequence rather than beginning with the undergraduate statistics course (SOC 30903). Students may also be given permission to take a graduate-level theory course once they have completed SOC 30900. In their senior year, students in the sociology honors program are required to enroll in the Sociology Capstone Project (SOC 48007 and 48008) and, under faculty mentors, carry out independent research projects. Students will complete a senior honors thesis based on this research and submit their manuscripts to *Sociological Voices* or another journal for publication. Participants are also expected to attend at least one regional sociology conference during their junior or senior year. Continuation in the program is subject to periodic review.

Writing in Sociology. The College of Arts and Letters is proud of the level of writing its undergraduates achieve. One way in which the college supports students' writing development is by requiring each department to offer at least one writing-intensive course. SOC 30900, Foundations of Sociological Theory, is the Sociology Department's writing-intensive course. There, students reflect on the quality of their own and others' writing and learn to articulate a sociological perspective in writing. Instructors in this course may spend more time doing textual analyses, going over students' writing, holding in-class writing workshops, and giving opportunities to do re-writes than in other courses. The department's 4000-level courses also demand high-level writing within a sociological perspective. In addition, students may opt to develop their research and writing skills by enrolling in the department's Capstone Project, where they carry out independent research and write an honors thesis. Also, any sociology major may submit a paper to *Sociological Voices*, a journal of research by undergraduates at Notre Dame founded and run by the Sociology Department, to be considered for publication.

Course Listings by Area of Research Focus. The following is a list of courses offered by the Sociology Department, organized by research focus. Students are encouraged (but not required) to choose at least one area of concentration in the major in order to deepen their knowledge of that area. Students are

also encouraged to pursue research opportunities within their area of concentration.

CULTURE/MEDIA

30109. Sociology of Culture
30151. Popular Culture
43151. Theorizing Popular Culture
43162. The Aesthet of Lat Cult Express
43170. Materialism and Mean in Mod Life

DEVIANCE/CRIMINOLOGY

20732. Introduction to Criminology
20740. Sociology of Terrorism
30732. Criminology
30734. Critical Issues in Criminology
30743. Sociology of Deviance
40743. Deviant Behavior
43730. Crime and Deviance in Ideolo Persp
43752. Theoretical Criminology

EDUCATION

20228. Social Inequality and Amer Ed
30327. Sociology of Teaching
43209. Great Books in Sociology of Ed
43234. The Schooled Society
43240. Research on School Effects

FAMILY

20342. Marriage and Family
30320. Family and Aging
43332. Changes and Challenge in Fam Life
43333. Sociology of Div and Remarriage
43341. Family Policy Seminar
43342. Family Development
43345. World Families and Gender
43355. Family Seminar
43377. Families and Their Interrelations

MIGRATION/DEMOGRAPHY

20479. Intro to Latinos in Amer Soc
30464. Human Rights and Migrants
30466. Problems in Latin Amer Society
43402. Population Dynamics
43404. Internat Mig: Mex and the US II
43473. Latinos in American Society
43479. Internat Mig and Human Rights
43483. Social Demog of Minorities

POLITICAL/DEVELOPMENT/ECONOMIC

20502. Today's Organizations
20533. Responding to World Crisis
20552. Social Problems Through Film
20563. Environ and Dev in Global Persp
30514. Social Movements
30547. Global Society
30567. Chile in Comparative Persp
43500. Ideolo and Politics in Lat Amer
43524. Employment in a Chang Econ
43528. Soc Ties, Soc Nets, Soc Cap
43553. Building Democratic Insts.
43558. Comparing European Societies
43561. History, Pol and Society of Chile
43564. Global Sociology
43576. Soc Breakdown in Amer Society
43590. Sociology of Economic Life

RELIGION

30672. Religion and Social Life
43662. Religion and American Society
43669. Religion and Power in Lat Amer
43685. Sociology of Religion I

SOCIAL PSYCHOLOGY

10722. Intro to Social Psychology
20720. Social Psychology
20722. Intro to Social Psychology
30731. The Sociology of Time
43719. Self, Society, and the Environment
43760. Body, Brain and Interaction
43774. Society and Identity

STRATIFICATION/RACE and ETHNICITY/
GENDER

20810. Gend Roles and Violence in Societ
20838. Social Inequality
23827. Topics on Race in the Americas
30806. Race and Ethnicity
30838. Poverty, Inequality, and Soc Strat
30846. Today's Gender Roles
30875. Polish Americans
43825. Ethnicity in America
43838. Race Relations in the US
43839. Unequal America
43849. Sociology of Masculinity

THEORY

30900. Foundations of Soc Theory
43948. Sociology of the Body
43959. Sociology of the Life Course

METHODOLOGY

30902. Methods of Soc Research
30903. Stats for Social Research
43980. Qualita Methodology
48901. Comm-Based Research Practicum

MISCELLANEOUS

10002. Understanding Societies
12002. Understanding Soc Tutorial
20001. The Sociological Enterprise
20032. Social Problems
30004. Principles of Sociology
30005. Applied Demog. of US Latinos
30006. Latinos and other Minorities in the US
30019. Sociology of Sport
30050. Latin American Relations
33090. Proseminar
35091. Int Analysis of Coll Contention
40037. Leadership, Ethics, and Social Responsibility
45092. Adv Analysis of Coll Contention
45097. Sociology Internships—Spring
48007. Sociology Capstone Project
48008. Sociology Capstone Project
37098. Special Studies—Fall
37099. Special Studies—Spring
46097. Directed Readings in Soc—Fall
46098. Directed Readings in Soc—Spring
46099. Directed Readings in Soc—Summer

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Sociology](#) heading.

Graduate Courses. Senior majors may take any 60000-level graduate course with the permission of the instructor.

Theology

Chair:

John C. Cavadini

Abrams Professor of Jewish Thought and Culture:

Rabbi Michael A. Signer

Crowley-O'Brien Professor of Theology:

Rev. Richard P. McBrien (on leave 2006–07)

Catherine F. Huisking Professor of Theology:

Rev. Brian E. Daley, SJ

Catherine F. Huisking Professor of Theology:

Cyril J. O'Regan

John A. O'Brien Professor of Theology:

Lawrence S. Cunningham (on leave fall 2006)

John A. O'Brien Professor of Theology:

Rev. John S. Dunne, CSC

John A. O'Brien Professor of Theology:

Jean Porter

John A. O'Brien Professor of Theology:

Eugene C. Ulrich

John A. O'Brien Professor of Theology:

James C. VanderKam

John Cardinal O'Hara Professor of Theology:

Gustavo Gutierrez, OP

Notre Dame Professor of Pastoral and Hispanic Theology

Rev. Virgilio P. Elizondo (on leave 2006–07)

Theodore M. Hesburgh, CSC, Professor of Philosophy and Theology:

Rev. David B. Burrell, CSC (emeritus)

William K. Warren Professor of Catholic Theology:

Rev. John P. Meier (on leave 2006–07)

William K. Warren Professor of Catholic Theology:

Rev. Thomas F. O'Meara, OP (emeritus)

Professors:

Gary Anderson (on leave 2006–07); David Aune; Gerard F. Baumbach (concurrent); Joseph Blenkinsopp (emeritus); Rev. Paul F. Bradshaw (London Program); Keith J. Egan (adjunct); Josephine M. Ford (emerita); Mary Catherine Hilkert, OP (on leave 2006–07); Rev. Maxwell E. Johnson; Charles Kannengiesser (emeritus); M. Cathleen Kaveny; Robert A. Krieg; Rev. Edward A. Malloy, CSC; Rev. Jerome Neyrey, SJ; Rev. Robert S. Pelton, CSC (concurrent); Rev. Gregory Sterling; William Storey (emeritus); Lawrence Sullivan

Associate Professors:

J. Matthew Ashley; John C. Cavadini; Mary Rose D'Angelo; Rev. Michael S. Driscoll (on leave 2006–07); David Fagerberg; Jennifer Herdt; Blake Leyerle; Gerald P. McKenny (on leave spring 2007); Bradley J. Malkovsky; Timothy Matovina; Rev. Don McNeill, CSC (concurrent); Rev. Leon Mertensotto, CSC (emeritus); Rev. Matthew Miceli, CSC (emeritus); Rev. Edward O'Connor, CSC (emeritus); Rev. Paulinus Odozor, CSSp; Rev. Hugh R. Page; Rev. Mark Poorman, CSC; Thomas Prügl; Maura Ryan; Joseph Wawrykow; Todd Whitmore; Robin Darling Young (on leave spring 2007); Randall Zachman

Assistant Professors:

Rev. Michael J. Baxter, CSC; David A. Clairmont; Mary Doak; Rev. Daniel Groody, CSC; Rev. Paul V. Kollman, CSC; Margaret Pfeil (on leave 2006–07); Gabriel Reynolds (on leave 2006–07); Thomas W. Ryba (adjunct)

Professional Specialists:

Regina Coll, CSJ (emerita); Sr. Ann S. Goggin, RC; Rev. Eugene F. Gorski, CSC; Rev. John A. Melloh, SM; Nathan Mitchell; Janice M. Poorman; F. Ellen Weaver (emerita)

Associate Professional Specialists:

Rev. Michael E. Connors, CSC; Matthew C. Zyniewicz

THE THEOLOGY PROGRAM
UNIVERSITY OF NOTRE DAME

At the University of Notre Dame, the study of theology is carried out in the spirit of the classic formulation of theology as "Faith seeking understanding." The Theology Department dedicates itself to critical reflection on the historic faith of Catholic Christianity in service to our students, to the larger church, to the world of the academy, and for the general public.

Why major in theology?

Some students study theology to prepare for a career in high school teaching or religious ministry. Others plan to proceed to graduate work in theology or religious studies in anticipation of a university career. Most students, however, major in theology simply because they find the study fascinating and rewarding. As an inherently interdisciplinary field, theology is an ideal liberal arts major. Through close study of influential theological and religious texts, rituals, and artifacts, students learn about their own faith and our common culture.

Many other students elect theology as a secondary major whose focus on the central questions of human existence complements and extends their commitment to their first major in science, engineering, business, architecture, or in another discipline within the College of Arts and Letters. Professional schools increasingly appreciate how such diverse and balanced preparation enhances a candidate's profile.

The Department of Theology welcomes students pursuing these varied interests and goals. Students work with faculty mentors who are renowned leaders both in teaching and research, and have the opportunity to explore a wide range of subjects, including the history of Christian thought and practice, scripture, spirituality, systematic theology, liturgy, ethics, Judaism and the eastern religions. The smaller class size of most upper-division courses creates a conducive environment for the creative exploration of ideas.

What are the requirements for the theology major?

Beyond the six theology credits required of every Notre Dame student, primary majors take 25 hours; supplementary majors take 19 hours. Each of these

THEOLOGY

majors combines formally required courses and electives.

The formally required courses for the primary and supplementary major are identical, and total 10 credit hours: the two-semester sequence in the history of Christian thought; an upper-division scripture course; and the one-credit hour proseminar offered each spring, which introduces students to the variety of topics and approaches covered in the study of theology. All courses in the theology major, primary or supplementary, must be 3-credit courses and graded (with the exception of the proseminar).

Summary of the primary major:

First University requirement: THEO 10001 (freshman) or 20001 (sophomore, junior, senior) or 13183 (University seminar) or 20002 (honors).

Second University requirement: a THEO course listed between 20101 and 29999.

THEO 40201 and 40202—Christian Traditions I and II

THEO 40101 or 43101—Hebrew Scriptures or New Testament

Electives (15 hours at the upper level)
THEO 43001—Proseminar (1 credit)
Including the University requirements, the primary major thus consists of 31 credit hours.

Summary of the supplementary major:

First University requirement: THEO 10001 (freshman) or 20001 (sophomore, junior, senior) or 13183 (University seminar) or 20002 (honors).

Second University requirement: a THEO course listed between 20101 and 29999.

THEO 40201 and 40202—Christian Traditions I and II

THEO 40101 or 43101—Hebrew Scriptures or New Testament

Electives (9 hours at the 40000-level)
THEO 43001—Proseminar (1 credit)
Including the University requirements, the supplementary major thus consists of 25 credit hours.

What other programs are offered?

The Theology Honors Program

The Theology Department offers a special program for particularly gifted undergraduate majors who seek a deeper, more sustained experience in the major through the completion of a thesis project. Each spring semester, the junior class of theology majors will be invited to apply; those selected will be assigned a thesis director from among the faculty of the department. A minimum grade point average of 3.7 within the major is normally expected. Seniors in the Honors Program will enroll in a one-credit Honors Colloquium as well as a one-credit honors research course in the fall semester, and a three-credit Honors Thesis Writing course in the spring semester, culminating in the submission of a 50-page thesis. The Honors Program will normally

consist of 36 hours, as compared to 31 hours in the regular primary major. To receive the honors designation on their transcript, students must earn an A- or higher grade on their thesis. A full description of the Theology Honors Program is available on the departmental website (see below for address).

The Minor in Theology

The minor is recognized by the University on the student's transcript. To fulfill requirements for a minor, a student must take 12 credit hours beyond the required 6 hours (for a total of 18 hours). The additional 12 hours must be composed of 3-credit graded courses, which can be taken at the 20000, 30000, or 40000 level. The minor in theology is accepted by many parochial schools as adequate preparation for secondary school teaching.

WRITING-INTENSIVE REQUIREMENT

THEO 40101 (Hebrew Scriptures) and 43101 (New Testament), have been designated writing-intensive courses by the Department of Theology. All majors are required to take one of these courses in fulfillment both of their upper-level scripture requirement within the major and of the College of Arts and Letters' writing-intensive requirement. Students will be expected to work closely with the professor throughout the semester on a significant written project, although specific writing assignments will be designed by the faculty member teaching the course.

PHILOSOPHY AND THEOLOGY JOINT MAJOR

Director:

David Fagerberg, Theology

Faculty:

Additional faculty for the joint major are drawn from the Departments of Philosophy and Theology.

Program of Studies. The joint major is intended for undergraduates who are intrigued by philosophical and theological ideas and who have an equal commitment to both disciplines. It seeks to equip such students to handle theology and philosophy adeptly. The major is structured, providing undergraduates with a suitable introduction to the study of both disciplines, but also flexible, granting students considerable scope for the pursuit of their own interests.

The joint major offers the opportunity for an informed investigation of religious and philosophical ideas and should appeal especially to those who intend to pursue graduate work in philosophy or theology.

The joint major incorporates the University requirements in the two departments and most of the formal requirements of the first majors in theology and philosophy. Students in the joint major will take the two-semester sequence in Christian Traditions and an upper-level course in Scripture. The joint major, however, does not require the one-credit proseminar in theology.

Other formal requirements are peculiar to the joint major. Students will study a classical language for two semesters. (For practical as well as pedagogical reasons, this will normally be Greek.) Majors will also be expected to take the joint seminar offered each spring. Each seminar, led by a theologian and a philosopher, will examine an issue in which the differing approaches of philosophy and theology may prove fruitful. The topic and instructors will change from year to year. Finally, each major will submit a senior thesis prepared under the direction of two advisors, drawn from each department. At the option of the directors, this thesis may be presented and discussed in an informal colloquium consisting of the other students in the joint major.

The remaining courses in the joint major will be at the discretion of the student. Normally taken at the 40000 level, there should be an equal distribution in the electives between theology and philosophy. However, students who wish may devote up to six hours within the joint major to additional language work. These hours may add to the classical language previously studied, or used to begin another language of significance for philosophical and theological work.

The joint major differs from a first major in one discipline and a supplementary major in the other in that the latter requires 55 credit hours, whereas the joint major requires 60. Furthermore, the joint major calls for language instruction beyond what the University requires for all undergraduates. Finally, the joint seminars should prove especially challenging, inviting students to explore important topics in an interdisciplinary way. These features should make the joint major particularly attractive to students preparing for advanced study.

Requirements in Philosophy:

PHIL 10101 or 20201, and 20000-level course (University-required courses; a higher-level course may be substituted for the latter).

PHIL 30301 and 30302. History of Philosophy I and II.

PHIL 30313. Formal Logic.

Requirements in Theology:

THEO 10001 or 20001 and 20000-level course (University-required courses).

THEOLOGY

THEO 40201 and 40202. Christian Traditions I and II.

THEO 40101 or 43101. Upper-division scripture course.

Plus:

Classical language (normally Greek)—two semesters.

Joint seminar(s).

Senior thesis.

18 credit hours of electives (up to six of these may be additional hours in language study).

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Theology](#) heading.

Supplementary Majors, Minors, and Special Programs

A supplementary major is one that cannot stand alone in qualifying a student for an undergraduate degree but must be taken in conjunction with a primary major. Several departments offer both majors and supplementary majors. They have been described above. Included below are interdisciplinary nondepartmental supplementary majors and minors.

DEPARTMENT OF AFRICANA STUDIES SUPPLEMENTARY MAJOR AND MINOR

Chair:

Richard B. Pierce
Associate Professor,
Department of History

Assistant Director:

Keith D. Lee
Assistant Director for Program Development
and Operations

Administrative Assistant:

Beverly Love-Holt
Senior Administrative Assistant

Joint Faculty:

Hugh R. Page Jr.
Dean, First Year of Studies; Walter Associate

Assistant Professional Specialist, Mendoza
College of Business
Alvin Tillery
Assistant Professor, Department of Political
Science
Fabian E. Udoh
Assistant Professor, Program of Liberal
Studies
Ivy Wilson
Assistant Professor, Department of English

The Department of Africana Studies at the University of Notre Dame is dedicated to the holistic and integrative study of people of African descent in the Americas and the global diaspora. Building on the legacy of the former African and African-American Studies Program (1967–2005), the department emphasizes a cross-regional, cross-cultural perspective, a comparative analysis of and between different diasporan groups and the national and global contexts they inhabit. This multidisciplinary department seeks to explore the history, society, politics, economic development, philosophical, theological and theoretical perspectives, literature, arts, religions, and cultures of the peoples of Africa and the African diaspora. Its comparative and relational *foci* highlight the connections between culture, race, gender, class, nationality, and other categories of identity and experience.

The Department of Africana Studies aspires to become a center for academic and community activity, an innovative centerpiece for the University of Notre Dame, and an inventive leader in the national fields of African-American, African diasporan, and African studies. Undergraduates draw on a range of academic and community activities designed to stimulate intellectual inquiry, excellence in scholarship, and creative engagement. At the same time, the department serves as an important resource for graduate students, faculty, and staff across the University. Moreover, the department provides a paradigm for integrating the intellectual and spiritual missions of the University of Notre Dame through such programs as the *Erskine Peters Fellowship Program*, the *Institute for the Study of Religion and Culture in Africa and the African Diaspora*, the *Urban Research and Development Initiative*, and the *Communitas Initiative*.

Program of Studies. Its pedagogical commitment is twofold: (1) to create a disciplined and rigorous intellectual environment within the study of the histories, literatures, languages, and cultures of African and Afrodiasporan peoples; and (2) to foster an appreciation of the richness, diversity, and complexity of the African-American experience—particularly when it is viewed within national and global contexts.

The department seeks to create opportunities for dialogue, reflection, and social engagement within and beyond the classroom. Upon completion of all requirements, students will have received both a solid introduction to the discipline of Africana studies and an appreciation of how it interfaces with other areas in the humanities, arts, social sciences, and theological disciplines. Critical inquiry and service learning are essential components of this studies program.

African Studies degree options for Notre Dame undergraduates consist of a supplementary major (24 credit hours of required course work, including a “capstone” experience consisting of a senior project or thesis) and an interdisciplinary minor (15 credit hours of required course work, with a subspecialty in literature, history, or social science).

Supplementary Major

The supplementary major requires completion of one designated literature course (3 credit hours), the two-course sequence in African-American history (6 credit hours), one stipulated social science course (3 credit hours), and either the senior project or senior thesis (3 credit hours). Three additional elective courses in literature, history, or social science can be selected (9 credit hours) to complete the 24-credit-hour requirement.

Interdisciplinary Minor

The interdisciplinary minor consists of one literature course, one history course, and three electives (9 credit hours) in one of three areas of specializations: literature, history, or social science to complete the 15-credit-hour requirement.

Senior Project

The capstone of the supplementary major is the senior project, which may be either a senior internship or senior thesis. Either option provides seniors with an opportunity to reflect upon the larger implications of their course work and, should they desire, to incorporate a service-learning component. A written proposal describing the intended internship or thesis must be submitted to the department for formal approval. If accepted, the student will be assigned a supervisor/advisor and required to write a 10-15 page project summation for the internship or a 30- to 40-page paper for the senior thesis. The final version of the senior project is due at the end of the term. An oral presentation on the senior project, during the week of final examinations, completes the degree requirements for majors.

Literature Requirements and Electives

Majors and minors must complete one literature course (3 credits). Additionally, minors with a sub-specialty in literature must complete three supplementary literature courses (9 credits). The following are examples of courses that fulfill the literature requirement and electives.

- AFAM 20100. Introduction to African-American Literature
- AFAM 20101. Harlem Renaissance
- AFAM 20107. Tropical Heat Waves. Contemporary Latino/a and Caribbean Literature
- AFAM 20108. Beats, Rhymes and Life. An Introduction to Cultural Studies
- AFAM 40105. African-American Poetry and Poetics
- AFAM 40106. African-American Literature
- AFAM 40150. Literature of Southern Africa

History Requirements and Electives

Majors are required to complete the two-course sequence (6 credits) in African-American history. Minors are required to complete one of the two-course sequence (3 credits). Additionally, minors with a sub-specialty in history must take three additional history electives (9 credits).

History Requirements

- AFAM 30201. Survey of African-American History I
- AFAM 30202. Survey of African-American History II

History Electives

The following are examples of courses that fulfill the history electives.

- AFAM 30252. African Resistance/Colonial Rule
- AFAM 30204. Era of U.S. Civil War 1846–77
- AFAM 30205. US Labor History
- AFAM 30251. African History since 1800
- AFAM 40202. Jacksonian America
- AFAM 40700. African American Resistance
- AFAM 40701. Multiculturalism

Social Science Requirements and Electives

Majors must take one social science course (3 credits) and minors with a sub-specialty in social science must take three electives (9 credits). The following are examples of courses that fulfill the social science requirement and electives.

Social Science Electives

- AFAM 10401. Introduction to Jazz
- AFAM 20472. Black Music, World Market
- AFAM 20550. African Philosophy
- AFAM 30213. American Social Movements
- AFAM 30601. Race/Ethnicity and American Politics
- AFAM 30701. Fundamentals of Human Evolution
- AFAM 30704. Home Fronts during War
- AFAM 30650. Politics of Southern Africa
- AFAM 30750. Peoples of Africa

- AFAM 34702. Human Diversity
- AFAM 40351. Christianity in Africa
- AFAM 43202. Race, Gender, and Women of Color in American Culture
- AFAM 43204. Immigration, Ethnicity, and Race in the US
- AFAM 43704. Ethnicity in America

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Africana Studies](#) heading.

GENDER STUDIES SUPPLEMENTARY MAJOR AND MINOR

Director:

Eileen Botting

Administrative Assistant:

Tori Davies

Objectives. The Gender Studies Program was inaugurated in 1988 to foster intellectual inquiry and discussion of gender issues at the University.

The minor offers students the opportunity to explore in-depth the rapidly developing scholarship in the areas of gender, women's studies, men's studies, feminist theory, queer theory, and sexuality. It aspires to two intertwining pedagogical objectives: first, to allow students to become proficient in the cross-disciplinary mode of inquiry that is central to the exploration of issues of gender; second, to prepare undergraduates to engage issues of gender after they graduate, whether they undertake advanced study in graduate and professional programs devoted to the study of gender or enter the workforce.

The supplementary major seeks not only to offer students additional knowledge about gender but also to shape their overall orientation toward learning. Through advanced course work on gender, students gain the ability to negotiate traditional disciplinary boundaries and to attain a deeper understanding of the issues of central concern to all who study and work in the field of gender studies. Further, this habit of mind has a transformative impact on the entirety of academic life, making students more creative as they undertake work in their primary major and in other areas of the University.

Students who undertake the additional course work of the supplementary major in gender studies gain a firm grounding in this rapidly developing field, which serves to make them attractive candidates to graduate programs and helps ensure their success should they choose to engage gender issues at an advanced academic level. Students who plan to enter the work force immediately after graduation will also benefit from the supplementary major in gender studies. As the demographics of the workforce have changed, a host of gender issues have emerged that are of pressing concern. The increased ability to think critically about gender will prepare students to

engage these issues responsibly, making them valuable and productive in their future careers.

Course Requirements. Students in the supplementary major are required to complete 24 credit hours distributed as follows: GSC 10000/20000. Introduction to Gender Studies (three credits)—a course that maintains a cross-disciplinary approach; one three-credit critical methods course—a 30000- or 40000-level course whose chief focus is on theory and critical methods in the study of gender; one course that links questions of gender to issues of cultural diversity, such as race or class differences; GSC 48001, Gender Studies Senior Thesis (three credits)—a course that allows seniors to pursue independent research projects as well as experiential work on gender issues; four elective courses in gender studies (12 credits). At least one elective course must be in the humanities and at least one must be in the social sciences. Students in the minor are required to complete 15 credit hours, including GSC 10000/20000, Introduction to Gender Studies; two core courses; and two electives.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Gender Studies](#) heading.

ARTS AND LETTERS/SCIENCE HONORS PROGRAM

In the fall semester of 1983, the University inaugurated an honors program for a small number of outstanding students in the College of Arts and Letters and the College of Science. A limited number of students with academic intents for each college are identified for this program at the time of admission. Although selection criteria include the promise of outstanding academic performance as demonstrated by standardized test scores and high school performance, the program is looking for more than mere academic ability. It hopes to identify students with a deep intellectual curiosity.

The program offers honors sections to fulfill most of the University and college requirements in the students' freshman and sophomore years. At present, there is the yearlong Honors Seminar (satisfying the writing and literature requirements), Honors Calculus, Honors Philosophy, Honors Theology, Honors Biology, Honors Physics, and an array of Honors Social Science courses. Since these courses are restricted to honors students, they are smaller than non-honors sections and are usually taught in a seminar format. The teachers for honors sections are chosen from the most outstanding teachers in each college. After the first year, students' academic work will be mainly centered in their major field (or fields) of study, but two or more honors electives are also taken during these years. In the fall of the senior year, there is an "Honors Thesis/Research Seminar," which is followed by the "senior seminar" in the

SUPPLEMENTAL MAJORS, MINORS, AND SPECIAL PROGRAMS

spring. The fall seminar is intended to be a spur to the students' capstone project, whereas the spring seminar brings the honors students from diverse majors back together for some concluding topical discussions. All honors students will also be expected to complete a special six-hour senior research honors project in their major field of study. In science, this is the culmination of a research project that is begun earlier, and in arts and letters, it is a two-semester project culminating in a thesis. Those writing senior theses work individually under the direction of a faculty advisor of their choosing in their major field. Funds are available for research projects during summers either at Notre Dame or other universities.

In addition to the more narrowly academic features of the honors program, students will be offered various opportunities for broadening personal, cultural and spiritual growth. Regular colloquia, informal discussions and cultural excursions are available.

Further information on the structure and content of the honors program or on the criteria for admission may be obtained by contacting Prof. Alex Hahn or Prof. Cornelius Delaney, 323 O'Shaughnessy Hall, Notre Dame, IN 46556, 574-631-5398.

ARTS AND LETTERS PREPROFESSIONAL STUDIES

Advisor:

Jennifer Ely Nemecek
Assistant Dean
College of Arts and Letters

Program of ALPP. Arts and Letters Preprofessional Program students are required to complete an arts and letters primary major in addition to the preprofessional supplementary major. The ALPP program provides students who intend to pursue a career in health science with an opportunity to complete a major in the College of Arts and Letters while building a firm foundation in the basics of science. Most students elect the ALPP program because they wish to go on to medical or dental school; however, there are students who intend to pursue other health-related careers or simply prefer the integration of science classes into the arts and letters curriculum. Medical schools encourage prospective applicants to seek a broad, liberal arts education, which enables them to develop skills that will be useful throughout life. The ALPP program provides students with all of the necessary prerequisites to prepare for the Medical or Dental College Admissions Test.

The use of Advanced Placement (AP) to fulfill science course work is strongly discouraged. As a rule, a student may use no more than eight credits' worth of AP toward the ALPP major.

Since the Medical/Dental College Admissions Tests are ordinarily taken in the spring semester of the junior year, students should have completed the following courses by that time: MATH 10350–10360, BIOS 20201–21201, CHEM 10117/11117–10118/11118, CHEM 20223/21223–20224/21224 and PHYS 30210/31210–30220/31220. Students

must also take three upper-level science electives (nine credits) to complete the ALPP program. The following electives are recommended to provide the student with the background necessary for admission to most medical and dental schools: Genetics (BIOS 20303), Biochemistry (CHEM 40420), Physiology (BIOS 30344 or BIOS 40421), Cell Biology (BIOS 30341), or Microbiology (BIOS 40401). Biochemistry (CHEM 40420) and Physiology (BIOS 33044 or BIOS 40421) are strongly recommended. CHEM 20204, MATH 20340, and PHYS 20140 do not count toward the first three upper-level science electives.

All curricular advising in reference to the ALPP major is conducted by the ALPP advisor in 104 O'Shaughnessy. The sequencing of courses taken throughout the sophomore, junior and senior years is worked out by the student in consultation with the ALPP advisor and the student's departmental advisor so that the best schedule for each individual is arranged. One possible sequence is the following.

The Program of Courses

First Year

<i>First Semester</i>	
FYC 13100. Composition	3
MATH 10350. Calculus	4
CHEM 10117. General Chemistry I	4
Foreign Language	3
First Philosophy/First Theology	3
Physical Education	-

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Preprofessional Studies](#) heading.

COMPUTER APPLICATIONS PROGRAM

Director:

Charles R. Crowell

Assistant Director and Director of Advising:

Louis J. Berzai

Faculty:

Amy Amoni; Robert N. Barger; Kevin Barry; Louis J. Berzai; Mike Chapple; Christopher G. Clark; Charles R. Crowell; Kenneth Dye; Donald K. Irmiger III; A.E. Manier; Patrick Miller; Tom Monaghan; Raymond G. Sepeta; John F. Sherman; Jeff Sucec; John C. Treacy

The Computer Applications Program (CAPP) was established as a supplementary major in the College of Arts and Letters as a way to provide liberal arts students with formalized training in computing. An important mission of CAPP is to provide majors with proficiency in various facets of computing and information technology as a supplement to their primary majors and as a springboard for further

SUPPLEMENTAL MAJORS, MINORS, AND SPECIAL PROGRAMS

professional education or a career in a technology-related field. Technology, Business, and Society (TBS) is a complementary skills program, which is very similar to a minor. Both programs serve as a window in the College of Arts and Letters to the worlds of technology and business.

CAPP, established in the '70s, been a highly successful programs for arts and letters students. In terms of post-graduate job placements, the CAPP experience has been very attractive to employers, which has enabled students to be competitive in the job market. Even more important, however, has been the impact of CAPP on the lives of our majors as they move on to further education or directly into their careers. CAPP graduates commonly report that the experiences and skills they gained from the program have been extremely beneficial in the years since their graduation. TBS is a relatively new program, but student feedback so far has been very positive.

Both CAPP and TBS have three important educational goals for students. One is to provide students with sufficient knowledge of and exposure to technology that they understand the important role it plays in both personal and professional domains. As part of this understanding, students acquire a certain minimum proficiency with computing and information technology systems in two ways: By becoming acquainted the “languages” of technology used to develop technology-based systems; and by getting practice in the application of such systems to solve important problems or create functional tools.

A second goal of CAPP and TBS is to sensitize students to the ethical issues raised by contemporary uses of computing and information technology. In this goal we follow the recommendations of a recent national steering committee of computing and technology professionals who saw such learning as integral to the undergraduate educational experience. Students, therefore, take one required course from among several options in this curriculum area.

Finally, CAPP and TBS aim to increase awareness of the important and pervasive ways in which technology affects both personal and professional domains within today's society. A new relatively new curriculum category, Technology and Society, offers courses through which students become more aware of the broader influence and impact of technology on their lives.

Also relatively new to the CAPP and TBS curricula is a foundational course in business knowledge. This course, taught by an experienced business professional, gives students an overview of the concepts and terminology critical to success in the business world. For CAPP, this course is an elective; for TBS, it is required.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Computer Applications](#) heading.

DUAL DEGREE PROGRAM WITH THE COLLEGE OF ENGINEERING

Advisors:

John J. Uhran Jr.
Sr. Associate Dean, College of Engineering
Ava Preacher
Assistant Dean, College of Arts and Letters

Program of Studies. The dual degree five-year program between the College of Arts and Letters and the College of Engineering enables the student to acquire degrees from both colleges—the bachelor of arts from the College of Arts and Letters and the bachelor of science degree in a chosen program from the College of Engineering.

This combination program, instituted in 1952, offers students the advantages of both a liberal and a technical education. The student completing one of these combination programs has a background in the humanities and social sciences as well as a degree from one of the programs offered by the College of Engineering. Because it is a demanding program, only students who have both the aptitude and motivation necessary for the five-year program should apply. Advisors for the program are available for consultation about the advisability of entering the program and about meeting the particular needs of each student already pursuing this program. Qualified students are eligible to receive modest

scholarship support from the John J. Reilly Endowed Scholarship Program during their fifth year of study.

The decision to enter the program ordinarily should be made prior to beginning the sophomore year, although students can also enter the program at a later stage. There are three sets of requirements that must be met by the program: University requirements, College of Arts and Letters requirements, and requirements of the College of Engineering, as the following table indicates.

University Requirements	Credit Hours
Philosophy	6
Theology	6

*The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy.

*The University degree requirement is one course in literature or fine arts. The College of Arts and Letters requires a minimum of one course in each subject area, plus one additional course in history or social science.

**Two courses in the intermediate or advanced series complete the requirement. Beginning or elementary series require three semesters' work to fulfill the language requirement.

†Courses specified by the student's major engineering department. Minimum total for the five-year program to fulfill degree requirements in both colleges is 168 to 177 credit hours.

‡Courses necessary to fulfill the requirements for a major in the student's major arts and letters department.

EDUCATION**Elementary Education**

The Notre Dame student taking elementary education at Saint Mary's College must also complete a Notre Dame major along with the University and appropriate college requirements. Those interested in the elementary education program are encouraged to take the prerequisite course, EDU 201, at Saint Mary's in the second semester of their first year of studies. With appropriate planning, and possibly summer-school course work, both the Notre Dame major and elementary teaching certification can be completed in four years.

Secondary Education

(including middle school)

The following Notre Dame majors have been approved for secondary education licensing through the Education Department at Saint Mary's College:

In the College of Science: biology, chemistry, mathematics, physics.

In the College of Arts and Letters: English, languages (French, Spanish, Latin), art, music, social studies (history and political science). Students interested in a secondary license in social studies must also complete additional course work in political science or history (depending on the major) and in one other area: either economics, sociology, or psychology.

In the College of Business: business education.

Notre Dame undergraduates interested in one of the professional teacher education programs should apply to the department the first semester of the sophomore year, but in some cases may start as late as the first semester of the junior year.

Students in the College of Arts and Letters, contact education advisor Dr. Vicki Toumayan at 574-631-8636 for more information and help with planning. Students in the College of Science, contact Dr. Kathleen Cannon at 574-631-5812.

Interdisciplinary Minors within the College

During the junior and senior years, students may elect to complete one or more interdepartmental minors in addition to the departmental major sequence. Composed of 15 hours of class work chosen from at least two departments, these minors encourage students to think from an interdisciplinary perspective about a given issue or topic. Requirements for completion are determined by the faculty director in consultation with the relevant college committee. Current offerings include Catholic Social Tradition; Education, Schooling, and Society; Gender Studies; Hesburgh Program in Public Service; Journalism, Ethics, and Democracy; Latino Studies; Medieval Studies; Peace Studies; Philosophy and Literature; Philosophy, Politics, and Economics; Philosophy Within the Catholic Tradition; Religion and Literature; and Science, Technology, and Values. These were formerly called concentrations and are described in detail below.

CATHOLIC SOCIAL TRADITION*Director:*

Todd David Whitmore

Executive Committee:

R. Scott Appleby (history); Michael Baxter, CSC (theology); Jay Dolan (history); Rev. Patrick Gaffney, CSC (anthropology); Maura A. Ryan (theology); Robert Sullivan (history); Paul Weithman (philosophy); Charles Wilbur (economics)

The Minor in Catholic Social Tradition is an interdisciplinary program that serves as a resource for Notre Dame undergraduates to learn Catholicism's social tradition.

Catholicism offers a long-standing and profound tradition of thought and teaching that addresses, from a normative standpoint, the full range of social spheres. It does so through a constellation of concepts that, taken as a whole, give articulation to a coherent yet variegated vision of the good society. Such concepts include those of solidarity, the common good, the just wage, human rights, the free economy, subsidiarity, and the option for the poor.

Sources for the tradition go back as far as the Bible and develop even in the early church fathers. Medieval writings on topics such as usury and the origins and proper exercise of kingship bring an unprecedented level of detail to Christian analysis of the just society. Pope Leo XIII inaugurates Catholicism's effort to bring its social tradition to bear on industrial society in his 1891 encyclical, *Rerum Novarum* (The Condition of Labor). Since then, popes have drawn upon *Rerum Novarum* and the social tradition to broaden and develop Leo's set of concerns in encyclicals often titled—as with Pius XII's *Quadragesimo Anno*, Paul VI's *Octogesima Adveniens*, and John Paul II's 1991 *Centesimus Annus*—in accordance with their relationship to the earlier document. In doing so, the popes and the Second Vatican Council have addressed issues ranging across all spheres of social life from the family to the state to the church. The US bishops have made sophisticated application of these teachings to the specific circumstances of the United States.

Unfortunately, many Catholics are unaware of this tradition. Pope John Paul II writes, "It must be asked how many Christians really know and put into practice the principles of the church's social doctrine." The US bishops concur. While "Catholic social teaching is a central and essential element of our faith," it is still the case that "our social heritage is unknown by many Catholics." At the same time, graduates of Notre Dame move on to assume leadership positions, often quite advanced ones, in a broad spectrum of social spheres, including in politics, law, business, education, the media, and the military. (For example: national security advisor, president of Panama, attorney general of California, CEO of Mobil Corporation, president of the Chicago Mercantile Exchange, presidents of nine universities other than Notre Dame, executive producer of *Nightline*, and secretary of the Air Force.) The Program in Catholic Social Tradition serves as a resource for Notre Dame undergraduates to learn the tradition so that it can inform life both before and after graduation.

The Minor in Catholic Social Tradition involves 15 credit hours of course work, including a core course (three credits), three electives (each three credits), and three one-credit colloquia/social concerns seminars. The core course will have three components:

1. The close reading of classic texts of the Catholic Social Tradition, particularly but not exclusively the papal and conciliar documents from Pope Leo XIII's *Rerum Novarum* to John Paul II's *Centesimus Annus*. Other texts will include source documents (e.g., writings by Thomas Aquinas and Augustine) and contemporary appropriations (e.g., writings by liberation theologians and neo-conservatives).
2. Immersion in professional context. Each student will find a placement in a location similar to that student's anticipated profession. The student is to observe, interview and, to the extent possible, participate in the life of the setting. For instance, the students can observe a law or architectural firm or a medical practice. Here, the student will keep an ongoing journal as a "pastoral ethnography" of the setting (an interpretation of the practice in the setting in light of the Catholic social tradition).
3. Final project: Students are to articulate or construct a setting in their anticipated profession in light of the Catholic social tradition (e.g., imagine and construct what a law firm/health clinic/ad agency would look like if it practiced in light of the Catholic social tradition).

The electives will be chosen by the student in consultation with the director from among courses offered in the University. The one-credit courses will be devoted to the critical reading and discussion of one or two major works each semester. Social concerns seminars are one-credit courses lodged first within the Department of Theology and often cross-listed with other departments.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Theology-Catholic Social Tradition](#) heading.

EDUCATION, SCHOOLING, AND SOCIETY

The primary goal of this interdisciplinary minor is to serve students who want to understand learning and education as complex and challenging aspects of human and societal experience. Education is one of the central and shared experiences of people in contemporary societies in the United States and around the world. It is both an end in itself and a means to many personal, professional, and spiritual goals. Thus, understanding its history and traditions, analyzing its processes, and critiquing its goals are of great importance to all of us.

Most societies rely on education to work fundamental changes in students and in society. We will use the tools and resources of a liberal arts perspective to help students reflect on, understand, and influence the role of education in society. In addition, the program will

provide a rich body of resources for students who may want to pursue careers in education after graduation, including certification to teach, or research and teaching careers at the university level.

Normally, students apply for admission to the minor late in their freshman year or early in their sophomore year, and this is ideal. Students can be admitted through the first semester of their junior year, assuming that they can meet requirements in the remaining semesters. Students should be in good academic standing and demonstrate a strong interest in issues related to the causes and consequences of learning, schooling, and educational policy.

The minor in Education, Schooling and Society involves 15 hours of course work. The introductory course in the program is ESS 33600. This course must be completed by the second semester of the junior year. At the middle level of the program (nine hours), students will select one course from a set of approved courses that are focused exclusively on educational issues and two courses from a set of approved courses that include education as one of several course foci. Students participate in the capstone course, ESS 43640, the Senior Research Seminar, in the fall semester of their senior year. As a capstone, this class provides students with an opportunity to build upon and extend the work they have completed in fulfilling the requirements for the minor. Students will design and execute an original research project and write a paper of at least a 25 pages. This research will be guided by a writing-intensive process (i.e., drafts, revisions, peer review when appropriate, and individual consultations between the professor and students).

The faculty work closely with students on post-graduate planning, including employment, graduate or professional school, or service opportunities.

GENDER STUDIES MINOR

Director:
Eileen Botting
Administrative Assistant:
Tori Davies

Objectives of the Minor. The Gender Studies Program was inaugurated in 1988 to foster intellectual inquiry and discussion of gender issues at the University.

The minor offers students the opportunity to explore in depth the rapidly developing scholarship in the areas of gender, women's studies, men's studies, feminist theory,

queer theory, and sexuality. It aspires to two intertwining pedagogical objectives: first, to allow students to become proficient in the cross-disciplinary mode of inquiry that is central to the exploration of issues of gender; second, to prepare undergraduates to engage issues of gender after they graduate, whether they undertake advanced study in graduate and professional programs devoted to the study of gender or enter the workforce.

Requirements. 15 credits (five courses) including GSC 10001/20001, Introduction to Gender Studies, which maintains a cross-disciplinary focus (three credits); and four three-credit courses from a list of approved selections, including at least two core courses.

Courses include GSC 10001/20001, Introduction to Gender Studies; GSC 48001, Gender Studies Senior Seminar; and GSC 45001, Gender Studies Internship. Cross-listed courses include Marriage and the Family; Women in the Christian Tradition; The Anthropology of Gender; Today's Gender Roles; Christianity and Feminist Ethics; Japanese Women Writers; Afro-American Literature 1940 to present; Gender and Science; Sex Inequality in the Work Place; Feminist Theory; Gender, Race, Class, Sexuality; American Men, American Women; The Feminine in Modern Art; History of American Women; Women: Alternative Philosophical Perspectives; Women in Antiquity; Sociology of Masculinity; Gender Issues in the Law; Feminist and Multicultural Theology; Gender and Violence.

HESBURGH PROGRAM IN PUBLIC SERVICE

Director:

Martine De Ridder

The health of American society is closely related to good public policy and competent, ethical public service. Thus, awareness of public policy and public service is not only the foundation for public-sector careers, but it is also a necessity for those who will work in the nonprofit sector or in the private sector and seek to be knowledgeable citizens.

The Hesburgh Program in Public Service prepares Notre Dame students for a life of active and effective citizenship as well as for the possibility of careers in public service. The program honors the principled, dedicated public service of Notre Dame's president emeritus, Rev. Theodore Hesburgh, CSC. The Hesburgh Program offers an interdisciplinary curriculum designed to inform students about the dimensions of policy making, public administration and policy evaluation, and to develop skills in research, sensitivity to ethical issues, and appreciation for the character and limits of constitutional democracy.

First-year students and sophomores of all colleges are invited to apply to the interdisciplinary minor, as well as first semester junior transfers. To be admitted, students will need to be in good academic standing and demonstrate a strong interest in public policy and public service. An introduction to American

politics (POLS 10100, 20100, or equivalent) and an introduction to economics (ECON 10101, 20010, or equivalent) are prerequisites to the Hesburgh Program course of study. At the time of admission, students should have completed or be in the process of completing these requirements.

The minor in the Hesburgh Program involves 15 hours of course work. The "gateway" course to the program is HESB 20010, Introduction to Public Policy, normally taken in the second semester of the sophomore year. As sophomores and juniors, Hesburgh minors choose three electives drawn from each of three categories of courses approved by the program. These are research skills, values, and institutions and processes. During the senior year, students who have been on a summer internship will register for the research seminar, HESB 43020, that builds on their field experience. Other students will take one of several senior-level policy seminars identified by the program each semester.

The Hesburgh Program offers students the opportunity for summer internships in public policy contexts through the Gary Lyman Internships in Public Service. In the fall of their junior year, Hesburgh students may apply for the Lyman Internship. Up to 20 students are selected in a competitive process. Students selected as Lyman interns are aided by the program's director in securing appropriate internships, usually in Washington, D.C. Lyman interns receive a grant to defray their cost of living while in their internship.

During the course of the academic year, the Hesburgh Program sponsors student public-policy-related forums and activities and campus visits to Notre Dame by public figures. They give public addresses, teach in the classroom and are available for conversations with students and faculty. The staff works closely with students on postgraduate planning, including employment, professional schools such as law and public policy and academic graduate programs.

Many of our courses are offered through cross-listings with various arts and letters departments such as American Studies, Anthropology, Computer Applications, Economics and Policy Studies, History, Philosophy, Psychology, Political Science, Sociology, and Theology.

For more information, visit our website at www.nd.edu/~hesprg/.

JOHN W. GALLIVAN PROGRAM IN JOURNALISM, ETHICS, AND DEMOCRACY*Director:*

Robert Schmuhl

The John W. Gallivan Program in Journalism, Ethics, and Democracy offers several courses for students interested in careers in print and broadcast journalism. Begun in 1997 with a grant from the John S. and James L. Knight Foundation and now endowed by the family of John W. Gallivan, this minor combines professional training in journalistic skills along with examination of philosophical concerns related to the practice of journalism. For example, what ethical issues arise in preparing a particular story? Or what role does—and should—journalism play in a self-governing society?

The journalism minor requires completion of 15 hours in addition to a student's major requirements and a news-related internship during either the summer or the academic year. Fundamentals of Journalism is the first, or gateway, class for students participating in the program. Other courses that count for the concentration include The Craft of Journalism; Advanced Reporting; Multimedia Journalism; Writing for Publication; Persuasion, Commentary, and Criticism; Broadcast Journalism; Media Ethics; Media Criticism; and news in American Life. In addition, new courses are currently being developed. No more than two courses beyond Fundamentals of Journalism concentrating on journalistic techniques will count for the required 15 hours.

The director of the program is Robert Schmuhl of the Department of American Studies. An advisory

committee of Notre Dame graduates in journalism helps guide the program. Members include Tom Bettag, former senior executive producer, *ABC News Nightline*; Sarah Childress, reporter, *Newsweek*; Bill Dwyre, executive sports editor, *Los Angeles Times*; John W. Gallivan, former chairman of the board of the Kearns-Tribune Corporation and publisher emeritus of the *Salt Lake Tribune*; Monica Yant Kinney, metro columnist, *The Philadelphia Inquirer*; John McMeel, chairman and president, Andrews McMeel Universal; Bill Mitchell, director of publishing/online editor, Poynter Institute for Media Studies; Anne Thompson, chief financial correspondent, *NBC News*; and Kelley Tuthill, reporter, WCVB-TV, Boston.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Gallivan Program in Journalism, Ethics, and Democracy](#) heading.

LATINO STUDIES*Director and Assistant Provost:*

Gilberto Cárdenas

Julian Samora Chair in Latino Studies

Director, Undergraduate Studies and Academic Affairs:

Yolanda Lizardi Marino

Program of Studies. The College of Arts and Letters offers a minor and a supplementary major in Latino studies in conjunction with any undergraduate major from any college at the University.

Latino studies centers around the study, analysis, and understanding of the varied experiences of the Latino population in the United States. Its scope is broad and it strives to incorporate various disciplines in its approach.

The Latino presence is deeply rooted in American history. In the latter half of the 19th century the numbers of Latinos in the United States grew exponentially—in the aftermath of the Mexican American War (1848), with the expansion of the American Southwest and the inclusion within US borders of what had previously been Mexican territory, and the Cuban Spanish American War (1898), with the annexation of Puerto Rico. During the next century Mexicans crossed the border and Puerto Ricans traveled to the mainland to find work and, in many cases, to make their homes. The 20th century also saw waves of immigration from Cuba, the Dominican Republic, and Central and South America, a trend that continues today as the US Latino population becomes increasingly diverse.

Students who pursue the minor in Latino studies will have the opportunity to be at the forefront of the study of one of the 21st century's most significant demographic changes in the United States.

The Institute for Latino Studies is committed to scholarship that will promote critical thinking about such issues as spirituality, social action, language, race, ethnicity, class, assimilation/acculturation paradigms, and indigenous traditions, to name a few. Literary and visual arts, which often function as vehicles for social change and creative empowerment, constitute another focus of our curriculum. Overall, Latino studies aims to strike a balance among the social sciences, humanities, and arts in its teaching, research, and service.

As the Latino diaspora evolves, so does the field of Latino studies. Latino studies recognizes the value of a comparative, cross-border perspective for arriving at an in-depth understanding of Latinos' historical roots and multi-ethnic heritages. It promotes research and analyses of new issues such as emerging transnational communities, changing immigration patterns, remittances, and cultural flows between Latinos in the United States and the Caribbean and South and Central America. While the emphasis is on domestic Latino communities, the discipline's focus inevitably becomes internationalized when we consider globalization, immigration, and border issues.

In addition to the teaching program, Latino minor students are exposed to the Institute's research and community outreach components. In summary, students will be able to take advantage of the resources of ILS, which also include two specialized units that conduct pioneering programs in Latino theology and spirituality.

As an interdisciplinary program, the minor in Latino studies will complement and provide a broader cultural and social background to students in the various departments and colleges at the University. The minor is open to all undergraduate majors. Participants in the program will be prepared to work in a myriad of professional settings and to serve an increasingly diverse society.

Minor in Latino Studies Curriculum. The minor in Latino studies consists of 15 credit hours, including a required gateway course (three credits), practicum course (three credits), and nine credit hours of elective course work. Although there is no language requirement for the minor, students are encouraged to study and acquire fluency in the Spanish language. **All Latino studies courses are open to all students.**

Practicum Course

(3 credit hours, required for Latino studies minor)

In this yearlong course usually taken during their senior year, students will complete a practicum that will include directed research/reading on an Institute project, class discussion, and experiential work in the Latino community. Students will have the option of choosing and designing a project, regardless of their major, in keeping with their interests. They will carry out the project under the direction of a faculty mentor starting in the fall semester. A written report and a class presentation will complete this academic experience. Methods and analytical frameworks will vary depending on the student and faculty advisors.

Elective Courses

(9 elective credit hours)

Students must take two out of three courses at the 30000–40000 level unless they receive special permission from their faculty advisor. In addition, students must choose their electives from within at least two major subjects in Latino studies, e.g., health, business, social science, theology, political science, literature, and visual arts, except for the following two cases.

Students who are pursuing Spanish language proficiency (not minor or major) may replace one elective (three credit hours) with a 20000-level Spanish course. Students may also replace one elective (three credit hours) from a field comparable to Latino studies (e.g., gender studies, Latin American studies, or African American studies) as long as at least one-fourth of the course content includes Latino studies. A list of appropriate courses will always be available for students.

Supplementary Major in Latino Studies. The supplementary major in Latino studies consists of 24 credit hours, including the completion of the gateway course ILS 20701 (3 credits), senior seminar (3 credits), 12 credit hours of six Latino studies course work, and six 6 credit hours of open electives.

Three of six open elective credit hours must be chosen from Latino studies courses. The three remaining credit hours may be a Spanish language course. This open elective will give students the opportunity to further develop their Spanish language skills (non-Spanish majors only) or, with the approval of the faculty advisor in Latino studies, they may elect a course from a field comparable to Latino studies (e.g., gender studies, Latin American studies, or Africana Studies).

Although there is no Spanish language requirement, all Latino studies majors will be strongly encouraged to learn to speak, read, and write Spanish or strengthen their Spanish language skills as well as to participate in study abroad programs in Spanish-speaking countries.

Introductory 'Gateway' Course

ILS 20701—3 credit hours, required for Latino studies minor and major; open to all Notre Dame students

Senior Seminar in Latino Studies

(3 credit hours; required for Latino studies supplementary major)

The senior seminar is a capstone course for the supplementary major in Latino studies. The centerpiece of the course is a seminar paper that students research and write on a subject and discipline of their choice or possibly a topic among the Institute's research projects. The course will include directed, independent study and research with a Latino studies faculty member resulting in a substantial and original research paper of 15 to 20 pages. The students will participate in an annual symposium where they will present their work.

Required Courses

(12 credit hours of 30000–40000 level Latino studies courses)

These required courses must be distributed in four major components: history, literature, social science, and theology courses.

Open Elective Courses

(6 credit hours)

The remaining six credit hours are considered open electives. Three credit hours must be taken from Latino studies courses. The three remaining credit hours may be in Spanish (non-Spanish majors only) or, with the approval of the faculty advisor in Latino studies, students may elect a course from a field comparable to Latino studies (e.g., gender studies, Latin American studies, or Africana studies).

The following represents a sample list of courses offered in previous terms and in spring 2006:

- ILS 20000. Chicano Art Survey
- ILS 20701. Introduction to Latinos in American Society
- ILS 20702. Topics on Race in the Americas
- ILS 20800. US Latino Spirituality
- ILS 20900. Spanish for Heritage Speakers
- ILS 30000. Chicanas in the Visual Arts
- ILS 30101. Caribbean Diaspora
- ILS 30201. Latinos: Wealth, Inequality, and Asset-Building Policies
- ILS 30300. Latino History
- ILS 30302. Latino/Latina American Literature
- ILS 30304. Border Crossings: Mexican and Canadian Literature
- ILS 30306. Women in the Americas
- ILS 30307. Icons and Action Figures in Latino/Latina Literature
- ILS 30308. Latino Poetry
- ILS 30309. The American Intersections of Latino/a Writing
- ILS 30310. Contemporary Latino/a Caribbean Literature
- ILS 30401. Mexican-American History
- ILS 30703. Migration, Race, and Ethnicity in Twenty-First-Century America
- ILS 30706. Toward Equity and Excellence in Education: A Review of Pedagogical and Policy Approaches from 1950 to Present
- ILS 30900. Nations in Motion: Latino/Latina Literature in the United States
- ILS 35801. Hispanic Leadership Intern Program
- ILS 40101. Mexican Migration and Transnationalism in South Bend
- ILS 40101. Race, Ethnicity, and Power
- ILS 40232. Latin Film: Culture, God, and Redemption
- ILS 40301. The Politics of Memory in Contemporary Latino/Latina Literature
- ILS 40304. Latino Literature and Visual Culture
- ILS 40406. Latinos and Christianity
- ILS 40600. Latino Psychology
- ILS 40700. International Migration: Mexican and US II
- ILS 40706. Latinos in American Society
- ILS 40707. International Migration and Human Rights

- ILS 40710. Aesthetics of Latino Cultural Expression
- ILS 40712. Legacy of Exile: Cubans in the United States
- ILS 40713. Latino Economic Development: Research and Policy
- ILS 40714. Social Demography of the US Latino Population
- ILS 40716. Latino Religion and Public Life: Exploring the Social Impact of the Latino Church
- ILS 40801. Theology and Popular Piety in US Catholicism
- ILS 40802. Culture, Religion, and Evangelization
- ILS 40804. Latino Film: Culture, God, and Redemption
- ILS 40900. New Readings in Modern Caribbean Literature
- ILS 40901. Cuban Literature

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Institute for Latino Studies](#) heading.

MEDIEVAL STUDIES

The Minor in Medieval Studies allows students who are committed to other programs of study to pursue interests in the culture of the Middle Ages and to cross the limits of individual disciplines as a means of understanding the changing social, economic, legal, intellectual, and artistic systems of medieval society.

Students may declare their intention to undertake a minor in Medieval Studies to the director of undergraduate studies at any time before the end of their third year. The undergraduate director will then act as their minor advisor and help them select a set of courses that form a coherent program of study, often in conjunction with their major if possible. Students are required to take five courses, including the introductory course, *The World of the Middle Ages*, and three or four electives in medieval studies drawn from at least two of the 10 affiliated departments: (Anthropology; Art, Art History, and Design; Classics; English; German and Russian Languages and Literatures; History; Music; Philosophy; Romance Languages and Literatures; and Theology). The Medieval Studies Advanced Seminar (3 credits) is recommended as one of the five courses, in lieu of a medieval elective, on a space-available basis. Courses counted toward a student's major may not be used for the minor.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Medieval Institute](#) heading.

MEDITERRANEAN/MIDDLE EAST STUDIES

Director

Joseph P. Amar

An interdisciplinary focus defines this broad-based program that encourages a multidimensional approach to the Mediterranean world. This is achieved through a wide variety of courses and activities offered by departments that deal with southern Europe, North Africa, or the Middle East.

While language courses may serve as a component of the minor, students are offered opportunities to view the region in its full historical, cultural, and political context. In this way, students are given the opportunity to assemble a course of studies that best reflects their own interests.

Typical areas of focus might include the rich culture that developed in southern Spain as a result of the Christian, Muslim, and Jewish interactions there; the impact of the French language and culture on North Africa and the Middle East; or the contemporary Israeli-Palestinian conflict.

Requirements: (1) four courses of the student's choice that relate to the region of southern Europe, North Africa, or the middle East; and (2) a final research thesis that integrates course work and other activities related to the student's particular area of focus.

For information regarding applicable courses in a given semester, contact Prof. Joseph P. Amar, Department of Classics, 574-631-6276.

PEACE STUDIES

Director of Academic Programs:

Jaleh Dashti-Gibson

Program of Studies. Peace Studies is defined as the interdisciplinary examination of the conditions that make for peace. It also investigates the obstacles to the realization of these conditions, drawing on theories and methods from diverse disciplines to focus on what makes for the development of a just and peaceful world order. Peace Studies relates scholarship to praxis and challenges those who engage in it to develop new ways of thinking and acting in the world.

Notre Dame's Peace Studies program divides its curriculum of more than 50 courses into three overlapping but distinct areas:

Area A: The role of international norms, institutions, and states in a peaceful world order. An exploration of ways of making governmental and intergovernmental institutions more effective and representative, and of strengthening governmental compliance with fundamental norms of peace and human rights.

Area B: The impact of religious, philosophical, and cultural influences on peace. The study of the ethics of the use of force, theological and philosophical

visions of global justice, the ways in which the world religious traditions foment violence or encourage peace, the practice of nonviolence, and the linguistic, literary, and historical dimensions of cultures of peace.

Area C: The promotion of social, economic, and environmental justice. The study of social change, with specific attention to the role of nongovernmental organizations, commercial enterprises, and states in fostering sustainable economic development, respect for human rights, conflict resolution and nonviolent conflict transformation, support of gender and family issues, and protection of the environment.

In both the Supplementary Major (24 credit hours of required course work) and in the Minor (15 credit hours of required course work), students will complete an introduction course, explore the three key areas of Peace Studies, and participate in a writing-intensive integrative senior seminar.

The Supplementary Major

The Supplementary Major in Peace Studies requires completion of the introductory course in Peace Studies (three credit hours), one course in each of the three areas of study (nine credit hours), three elective courses in Peace Studies (nine credit hours), and the writing-intensive senior seminar (three credit hours). The program for a Supplementary Major in Peace Studies follows.

An alphabetical list of courses by area is available on the Kroc Institute website: <http://kroc.nd.edu/programs/undergraduate/index.shtml>.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Institute for International Peace Studies](#) heading.

Information on Peace Studies. Peace Studies at Notre Dame is centered in the Joan B. Kroc Institute for International Peace Studies (in the Hesburgh Center for International Studies). Information on courses available, faculty fellows in Peace Studies, and ongoing activities in Peace Studies can be found on the Institute's website, <http://kroc.nd.edu>.

PHILOSOPHY AND LITERATURE

The Minor in Philosophy and Literature is designed for students who want to pursue an interdisciplinary course of studies that focuses on the intersections between literature and philosophy. Majors from any literature department or from philosophy are eligible for the concentration.

Literature and philosophy have always shared many of their concerns, and the minor is designed to explore this common ground and to establish an interdepartmental forum for both formal study and informal contacts. The minor should also be excellent preparation for students interested in graduate studies.

The curriculum of the minor in philosophy and Literature consists of 15 credit hours, distributed as follows:

- A core course: "Studies in Literature and Philosophy," taken with the permission of the director of the P/L Minor and cross-listed in English and philosophy, and/or the department in which it originates. This course is to be taken in the first semester of the minor (spring of the sophomore or junior years). This gateway course is an intensive seminar and will help students and faculty from the various disciplines to speak a common language. Four credit hours.

- At least two one-credit colloquia in the semesters following the core seminar. The colloquia will be devoted to the critical reading and discussion of one or two major works each semester. The colloquia will build on the esprit de corps and intellectual common ground established in the core course.

- Three three-credit courses approved by the minor committee, at least two in the disciplines in which the student is not a major. This part of the curriculum will require written approval of the director of P/L.

Students are encouraged, though not required, to write a senior essay (in the department in which they are majoring) that in some way reflects the interdisciplinary concerns developed in P/L.

For further information, students should contact Prof. Alain Toumayan, Department of Romance Languages, Alain.P.Toumayan.2@nd.edu.

PHILOSOPHY, POLITICS, AND ECONOMICS

The Minor in Philosophy, Politics, and Economics (PPE) is designed for students and faculty with serious interests at the intersection of political theory, political philosophy and economic theory. The minor integrates these three fields, and through seminars and colloquia strives to create an intellectual community among students and faculty that goes beyond formal course work. To be eligible for PPE, students normally must major in either philosophy, political science, economics, or the Program of Liberal Studies (who for PPE requirements are treated as philosophy students). The Justice Seminar, the gateway course into the minor, is always offered in the fall semester; applications for the Justice Seminar are taken in the middle of the preceding spring term.

The PPE faculty committee consists of Paul Weithman (philosophy), Mary Keys (political science), John Roos (political science), Philip Mirowski (economics), Jennifer Warlick (economics), and Alexandra Guisinger (political science). Committee members also serve as advisors for PPE students.

The PPE curriculum consists of 15 credit hours, usually distributed over four semesters, as follows:

A. The Justice Seminar (cross-listed as POLS 43640, ECON 33250, and PHIL 43404), an intensive three-credit seminar that is the gateway course into the minor, taken in the fall semester of sophomore or junior year. Three credit hours.

B. Three one-credit PPE Colloquia, each usually devoted to the critical reading and discussion of one or two major works, normally taken in the three semesters following the Justice Seminar. Three credit hours.

C. Three approved three-credit courses from the two fields outside the student's first major, with at least one course in both non-major fields. Nine credit hours.

Total credit hours: 15.

PPE students are also encouraged (but not required) to write a senior thesis in their major field that reflects the interdisciplinary focus of the minor.

Persons to contact: PPE director John Roos, Department of Political Science.

PHILOSOPHY WITHIN THE CATHOLIC TRADITION

Director:

Alasdair MacIntyre

This minor is only open to undergraduates who are majors in either philosophy or theology and who wish to add to their knowledge of philosophy and theology an understanding of what the distinctively Catholic tradition in philosophy is. It is unlike most interdisciplinary minors in being restricted in this way; work in this minor presupposes a back-

ground of some significant work in either philosophy or theology. A central task assigned to philosophy within the Catholic tradition has been that of understanding the relationship of theology to the secular disciplines, so that the relevance both of theology to these disciplines and of those disciplines to theology becomes clear. In this minor, political science will be the secular discipline whose relationship with theology provides a subject for philosophical enquiry.

The Catholic philosophical tradition is one of debate and constructive disagreement and the philosophers whom it will be possible to study in satisfying the requirements for this minor will include thinkers of very different standpoints: Augustine, Anselm, Aquinas, Pascal, Arnauld, Newman, Edith Stein and others. Because these thinkers have in common an allegiance to the Catholic faith, they agree in rejecting philosophical positions incompatible with that faith. But they also disagree with each other and in both cases what matters is the quality of their philosophical arguments.

The requirements of the minor are satisfied by taking 15 credit hours, beginning with Philosophy 30326, cross-listed as THEO 30802, God, Philosophy and Universities. Students have to take two appropriate courses in political science and one course on a major Catholic philosopher or set of Catholic philosophers, either in the Theology Department or in the Philosophy Department. No course can count both as satisfying one of the requirements for the student's major and as satisfying one of the requirements of this minor. All students are required to take a capstone seminar in which the question of what part philosophy can play in the integration of the secular disciplines with theology will be addressed through discussion of texts and arguments encountered in earlier courses. Lists of philosophy, theology, and political science courses that will satisfy the requirements of the minor will be available each semester from the director. For further information, please contact the director, Prof. Alasdair MacIntyre, Flanner 1042.

RELIGION AND LITERATURE

Director:

Kevin Hart

The interdisciplinary minor in Religion and Literature offers an intellectually rigorous and scholarly approach to formalized study of the interrelations between "religion" and "literature" broadly construed. The minor will draw on the rich resources Notre Dame offers, including the faculty and intellectual traditions of Theology and the various literature departments that exist at Notre Dame. The minor's focus is both broad and refined. Its breadth offers students the opportunity to investigate the interanimating and cross-disciplinary influences of "religion" and "literature." As broad coverage inevitably leads to sharpened questions, students will enjoy the freedom to pursue a specific interest through a refined senior thesis.

The minor enjoys a special consultative and working relationship with many of the university's already identified centers of excellence, capitalizing on both their long-term faculty and other resource expertise as well as making full use of their visiting fellows, special seminars, and general lecture programs. To this end, students who choose the Religion and Literature concentration have extensive and first-rate scholarly resources available to support their own intellectual development.

Curricular Requirements

Normally, students apply for admission to the minor late in their freshman year or early in their sophomore year. The minor requires students to complete 15 credit hours of approved course work; of these no more than three, and in special cases six credit hours at the 20000 or sophomore level will be accepted toward fulfillment of the concentration's requirements. The balance of the course work must be completed through course work at the senior (30000–40000) level. Of the overall 15-hour requirement, three credit hours will be awarded for completion of the senior thesis. It is intended that students will, in effect, do a thesis inspired by issues which have arisen in their course work for the minor.

One entry-level "gateway" course will be required of each student desiring a minor concentration in Religion and Literature. Several courses will serve this function, and students must take one of them to complete the minor. Ideally, the student will complete the required class early in his or her course of study.

In addition to the gateway course and senior thesis, students will be required to complete three three-credit courses approved by the Religion and Literature committee, at least two in a discipline other than the student's major.

To promote intellectual cohesiveness within the minor, participating students will be required to take part in a series of seminars and talks organized by the Religion and Literature committee. These events will be structured to take advantage of offerings by Notre Dame faculty members or lectures by visiting scholars whose topics relate to the program's focus. The seminar or lecture presentations will serve to function as either a point of departure or a concluding event in a short, focused study which will include some preparatory reading of material salient to the presentation.

Person to see: Prof. Kevin Hart. Malloy 427.

SCIENCE, TECHNOLOGY, AND VALUES

Director:

Sheri Alpert, associate professional specialist

Affiliated faculty:

Chairholders:

Michael J. Crowe, Program of Liberal Studies and history (concurrent); Rev. John J. Cavanaugh I Chair (emeritus)
Kristin Shrader-Frechette, philosophy and biology; O'Neill Family Chair

Professors:

Michael DePaul, philosophy
Christopher Fox, English
Don Howard, philosophy
David Ladouceur, classics
Edward Manier, philosophy
Dian Murray, history
Thomas Schlereth, American studies
Phillip Sloan, Program of Liberal Studies and history (concurrent)
James Sterba, philosophy
Andrew Weigert, sociology

Associate Professors:

Matthew Ashley, theology
Dennis Doordan, architecture
Janet Kourany, philosophy
Gerald McKenny, theology
Vaughn McKim, philosophy
William Ramsey, philosophy
Maura Ryan, theology
David Solomon, philosophy
Leopold Stubenberg, philosophy
Robert Wolosin, anthropology (adjunct)

Assistant Professor:

Katherine Brading, philosophy

Science and technology are pivotal forces in modern society and play key roles in shaping cultural sensibilities in the modern world. Indeed, our technologies are reflected in our institutions, our work, our expectations, even in our moral problems. Science, Technology, and Values (STV) is an interdisciplinary minor within which faculty and students from a variety of disciplines and different colleges can reflectively explore the nature of science and technology as human enterprises, interacting in complex ways with our values and social institutions.

The program helps sponsor a wide range of cross-listed courses taught by faculty representing the humanities, the social sciences and the natural sciences. Students electing an STV minor can focus their work on areas of particular interest, such as science, technology and public policy; ethics, ecology and environment; medical ethics; ethical issues in science and technology; humanistic and social aspects of medicine; science and technology as cultural phenomena; history and philosophy of technology.

Students electing a minor in STV must take at least five courses (15 hours) from among those offered under the sponsorship of the STV program. These

must include the core course (STV 20556). Students are urged to satisfy this requirement early in the program. At least one course also must be taken from each of clusters one, two, and three below, and either one additional course from these clusters, or from the elective list in Cluster Four. All STV courses are cross-listed.

Core Course

- 20555. Science and Technology in Phil Perspective
- 20556. Perspectives in Science and Technology
- 20556. Science, Technology and Society

Cluster One: Human Dimensions of Science and Technology

- 20103. Death and Dying
- 20115. Gender, Politics, and Evolution
- 20120. Alcohol and Drugs
- 20124. Memoirs of Madness
- 20134. The Technological American
- 20139. Minds, Brains, and Persons
- 20142. Architectural History II
- 20146. History of Communications Technologies
- 20149. Environmental Philosophy
- 20152. Visual America II
- 20154. Modern Physics and Moral Responsibility
- 20163. Science and Religion
- 20179. Science and Theology
- 30106. History of Economic Modern Thought
- 30110. Health, Healing, and Culture
- 30113. Classical Origins of Medical Terminology
- 30132. Environmental History
- 30142. History of Ancient Medicine
- 30146. History of Communication Technologies
- 30152. History of Western Medicine
- 30153. History of Psychiatry
- 30154. Gender and Science
- 30157. Introduction to the Philosophy of Biology
- 34162. History of Science and Technology in Britain (taught in London only)
- 30175. Environmental History
- 30181. Science and Medicine in the Islamic World
- 30189. Philosophical Issues in Physics
- 33195. Technology and Social Change
- 40113. Computer as Social Phenomenon
- 40118. Witchcraft and Occult 1400–1700.
- 40119. Monsters, Cyborgs, and Other Created Bodies
- 40126. Philosophy of Cognitive Science
- 40130. Crime, heredity, Insanity in the US
- 43134. Addiction, Science, and Values
- 40135. Philosophy of Science
- 43136. Nature in America
- 40140. Science and Social Values
- 40144. Religion and Science
- 40147. History/Design: Form, Values, and Technology
- 40151. Psychology and Medicine
- 40152. History of Medicine to 1700.
- 40153. Visits to Bedlam
- 40154. Cultural Aspects of Clinical Medicine

- 40155. Christ and Prometheus: Evaluation/Technology
- 40166. History of Modern Astronomy
- 40167. Global Food Systems
- 43169. Darwinian Revolution
- 40172. History of Chinese Medicine
- 40174. Philosophy and Psychiatry
- 40181. Philosophy of Human Biology
- 40186. Medicine in Modern History
- 40187. Technology in History
- 40194. Building America

Cluster Two: Science, Technology, and Ethics

- 20216. Biomedical Ethics and Public Health Risk
- 20221. Biomedical Ethics
- 20245. Medical Ethics
- 20247. Environmental Ethics
- 20248. Modern Science and Human Values
- 20258. Philosophy of Technology
- 20260. Theology, Ethics, and the Environment
- 20282. Health Care Ethics in the 21st Century
- 40216. Biomedical Ethics and Public Health Risk
- 43243. Ethics and Science
- 43283. Ethics and Risk

Because individuals attracted to the STV minor have diverse interests and differing academic backgrounds, the program advisor works closely with each student to help select courses that will complement the student's major program or be most relevant to particular career aspirations.

Contact Dr. Sheri Alpert, STV Program office, 309 O'Shaughnessy Hall. Web address: www.nd.edu/~stv.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Science, Technology, and Values](#) heading.

Area Studies Minors

Program of Studies. The College of Arts and Letters offers its students the opportunity to pursue an interdisciplinary sequence of area studies minor that may supplement the major. Currently, there are minors in African studies, Asian studies, Irish studies, Latin American studies, Mediterranean/Middle East studies, Russian and East European studies and West European studies.

The purpose of these minors is to assemble the courses dealing with the language, literature, history, politics, anthropology, philosophy, sociology and economics of each area. In this way a meaningful course structure is available to students who wish to concentrate their scholarly interest upon a cultural or geographical area as well as upon an interdisciplinary approach. Such programs can be especially useful to students who plan a career in international business, international organizations or government service or who intend to do graduate work in one of these areas.

The student who wishes to complete one of the area studies minors is required to take at least four area studies courses (12 hours) distributed over three different departments. These courses must be taken in addition to those required for the major. The student must also take courses in a language of the area being studied (Russian or an East European language for the Russian studies program; Spanish or Portuguese for the Latin American studies program; French, German or Italian for the West European studies program; a Mediterranean language for the Mediterranean/Middle East studies program; Irish for the Irish studies program; and Japanese or Chinese for the Asian studies program). In most cases the required number of courses will be equivalent to those required to satisfy the arts and letters language requirement, but students should check with program directors for the specific requirements of a given area. While not required to take additional language instruction for the African studies program, students who plan to continue their African interest at the graduate level are encouraged to develop

a competency in Swahili, French, Portuguese, or Arabic. In the senior year, each student must submit a satisfactory essay based upon research that combines the major discipline with the area studies curriculum.

Students interested in an area studies minor should consult the director (listed below).

AFRICAN STUDIES

Chair:

Richard B. Pierce
Department of Africana Studies

Students wishing to develop their understanding of Africa may pursue the undergraduate African Studies minor. This involves taking four courses in three departments. In addition, a research essay must be completed (AL 48001 Area Studies Essay: Africa). While no additional language instruction beyond the college requirement is expected, students wishing to continue their interests in Africa at the graduate level are encouraged to study additional languages. Students desiring to minor in African Studies minor should contact Africana Studies, 327 O'Shaughnessy Hall.

ASIAN STUDIES

Director:

Susan Blum

Sixty percent of the world's people live in Asia, in countries as different from each other as India, China, Japan, Korea, Vietnam, and Indonesia. Students who are contemplating graduate study in a particular area of the world or a career in international business or government—or those who are merely curious—are well served by the minor in Asian studies. It provides a well-rounded introduction to a particular area in the world's most populous continent. The minor in Asian studies is a very appropriate accompaniment to majors in anthropology, East Asian languages and literatures, history, political science, or other Arts and Letters departments, or majors in other colleges.

This interdisciplinary minor requires four courses in Asian Studies (12 units) from at least three different departments and at least one full year of a relevant Asian language. In the senior year, students write a capstone project under the direction of a faculty member affiliated with the Center and overseen by the director of the Center for Asian Studies.

Students should meet with the Director of the Center for Asian Studies as early as possible in their academic career to plan their courses wisely. They should also meet with her each semester to select approved courses.

Requirements:

- 12 units, Asian Studies courses, from at least 3 different departments
- 1 year relevant Asian language
- 3 units, capstone project

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Center for Asian Studies](#) heading.

EUROPEAN STUDIES

Director:

A. James McAdams

Stretching from the Atlantic Ocean to the Ural Mountains, Europe plays a critical role in global affairs. The ongoing enlargement of the European Union is helping to unite many countries and peoples in an otherwise diverse region. As future leaders, Notre Dame students need to know about European history, politics, and culture to make sense of the contemporary world.

Goals

The Nanovic Institute for European Studies is dedicated to broadening the students' learning experience by bringing Europe to Notre Dame, by supporting teaching and scholarship, and by cultivating global perspectives. Through grants and programs, symposia, films, and cultural events the Institute provides an interdisciplinary home for undergraduate students, graduate students, and faculty to explore the evolving ideas, identities, institutions, and beliefs that shape Europe today.

Minor

Administered by the Nanovic Institute, the European Studies minor encourages students to study the politics, history, and culture of Europe. Language study above and beyond University requirements is also encouraged. Students wishing to study in Europe or pursue careers there will find the minor in European Studies both rewarding and relevant. Special events are organized to benefit students enrolled in the program. Students who complete the requirements for the European Studies minor receive a certificate upon graduation. For further information, please visit the Nanovic Institute website: http://www.nd.edu/~nanovic/programs/european_studies_minor.html. or call Kathee Kiessel-Bach at 631-3548.

Student Support

Each year the Nanovic Institute offers research and travel grants for undergraduates. The Institute also offers support for students wishing to go to Europe to pursue internships, language study, and other educational endeavors. Students hoping to pursue careers in international affairs, business, the Foreign Service, or who simply are curious about Europe should consider becoming a European Studies minor and/or applying to the Nanovic Institute for support.

For more information, interested students should consult the Institute's website: www.nd.edu/~nanovic or call the institute at 631-5253.

IRISH STUDIES

Director:

Christopher Fox

The Keough Institute for Irish Studies provides students with a unique opportunity to explore Ireland's extraordinary tradition in literature (in both the English and Irish languages) and distinctive historical development, including its influence on the history of the United States. The Irish Studies faculty includes leaders in several fields, including English, history, film, and Irish language and literature. The Irish Studies Program also organizes a calendar of intellectual and cultural activities in which undergraduates are encouraged to participate; recent visitors to campus have included Seamus Heaney and John Hume, both Nobel Prize winners, and other leading Irish writers and public figures.

Minor

The core of the program is a minor in Irish Studies. The minor helps students develop their understanding of Irish society, culture, and politics through both course work and firsthand experience of Ireland. To qualify for the minor, students must (a) demonstrate proficiency in Irish language (by taking IRST 10101, 10102, and 20103); (b) complete four three-credit Irish Studies courses (mainly in the fields of history; English; Irish language and literature; film, television, and theater; or anthropology), and (c) write a capstone essay in their senior year that links the minor with their major. Qualifying courses are listed in the *Schedule of Classes* under IRST; the list is available each semester from 422 Flanner Hall.

Dublin Program

The home of the Dublin program is the Keough-Notre Dame Centre in O'Connell House in the historic heart of Ireland's capital. Each semester, some 35 Notre Dame students enroll for courses in the Centre and at Trinity College Dublin, University College Dublin, and the National College of Art and Design. The program includes several field trips and a variety of social and cultural activities. Students taking the Minor in Irish Studies have a distinct advantage when applying for this highly competitive program.

Irish Internships

The Keough Institute for Irish Studies annually awards Keough Irish Internships, which place undergraduates in internship positions in Dublin relating to Irish politics and commerce, culture, and society. In the past, students have been placed in the Irish parliament, government departments, the Irish Film Centre, and various social service organizations. The Internships last for a period of seven weeks. Two Internships are reserved for students taking the Minor in Irish Studies.

For further information, students should consult Prof. Christopher Fox, director; telephone 631-3555.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Keough Institute for Irish Studies](#) heading.

LATIN AMERICAN STUDIES PROGRAM

Director:

Edward Beatty

This program promotes opportunities for students to deepen their understanding of the region through a variety of courses, campus activities, internships, and firsthand overseas learning experiences. Through the Kellogg Institute, the program offers a calendar of cultural events, summer research and internship grants, current affairs panels and regular talks on Latin America by Notre Dame faculty and visiting lecturers. In addition, the institute brings several visiting fellows each semester who are from Latin America or who specialize in the region; these Fellows visit classes and meet with students.

The core of the program is a minor in Latin American Studies. The minor aims to give students well-rounded training that complements their major area of study and to make this training easily recognized on a graduating student's transcript. To qualify for the minor, students must demonstrate proficiency in Spanish or Portuguese (through two courses at the University or advanced placement), and complete five courses on Latin America that are distributed across at least three departments, with the option of writing a senior essay.

Qualifying courses are listed each semester in the *Schedule of Classes* under LAST. They include Contemporary Latin American History, Economic Development of Latin America, Latin American Politics, Liberation Theology, Sociology of Development, and Spanish-American and Brazilian Literature. The program offers the John J. Kennedy Prize annually for an outstanding senior essay dealing with a Latin American topic. The summer research grants are offered through Kellogg to students after their junior year to encourage undergraduates to undertake original research on international subjects. The summer internships aim to provide undergraduates real-world experience in dealing with Latin American issues. The summer fellowships offer freshmen and sophomores the opportunity to engage in initial exploratory projects in Latin America. For more complete information about courses that qualify each semester for the minor degree, the calendar of events or the summer research and internship competitions, please consult the LASP Web page at www.nd.edu/~kellogg/LASP, or call Holly Rivers, assistant director, at 631-6023.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Latin American Studies](#) heading.

MEDITERRANEAN/MIDDLE EAST STUDIES

Director:

Joseph Amar

This is a broad-based program that includes all aspects of the ancient and modern cultures that surround the Mediterranean. Courses from three regions apply. In Europe, this includes the study of Classical Greece and Rome as well as modern Italy, France, Spain and Portugal. Courses on the Middle East are related to the study of Semitic peoples and their cultures, languages, religions, and politics. In North Africa, Arab, and Francophone, history and civilization are the focus.

COURSES IN MEDITERRANEAN/MIDDLE EAST STUDIES

MEAR 10001–30006. Arabic Language
 MELC 20010. Arabic Literature in English Translation
 MELC 20050. Middle East History
 MELC 20080. Women's Memories, Women's Narrative
 MELC 20090. The Golden Age of Islamic Civilization
 MELC 30040. Christianity in the Middle East
 MELC 30050. Canon and Literature of Islam
 MELC 20060. Islam: Religion and Culture
 CLAS 30105/HIST 30220. Greek History
 CLAS 30210/HIST 30231. Roman Law and Governance
 CLAS 40350. Greek and Roman Mythology
 HIST 20201. Martyrs, Monks, and Crusaders
 HIST 43075. Jerusalem
 MI 30235/HIST 30080. Medieval Middle East
 ROFR 20600. French Civilization and Culture
 ROSP 20600. Civilization and Culture: Spain
 ROIT 30710. Introduction to Italian Literature

Other courses may apply with the permission of the director.

RUSSIAN AND EAST EUROPEAN STUDIES

Director:

Thomas Gaiton Marullo

The program in Russian and East European Studies enables students to enrich their understanding of the region through a variety of courses in language, literature, history, politics, and economics while also encouraging and supporting the acquisition of firsthand experience in the culture of the area. Its largest initiative provides grants for summer courses taken from accredited programs, either in the United States or abroad. Traditionally, this has meant language study in Moscow, St. Petersburg, Warsaw, and

Kraków, but language study elsewhere in Eastern Europe as well as cultural programs and internships may also qualify for support. The program's lecture series allows students to expand their knowledge of Russia and Eastern Europe beyond the scope of their course work by supplying a continuous source of fresh ideas about the region. Each year, the program invites nationally and internationally renowned scholars to campus to share their latest research in fields pertinent to the minor. By virtue of their competence in Russian or an East European language, participants in the program also are eligible to study language abroad for a semester during the school year and to work in the region as business interns and teachers during the summer.

ARHI 30213. Art into History: Reading the Art of Medieval Byzantium

Economics

Mendoza College of Business

The Mendoza College of Business, an accredited member of AACSB—The International Association for Management Education—was established in 1921.

As a constituent unit of Notre Dame, the Mendoza College of Business constantly strives to realize the general objectives of a Catholic university. In a special sense Notre Dame seeks to inspire a search for learning in the professional sphere of business and cultural areas so business graduates are prepared to assume the obligations of Christians in business.

The undergraduate student body of the college is made up of sophomores, juniors, and seniors. Students who successfully complete the First Year of Studies are eligible for admission to the college at the beginning of the sophomore year.

The dean of the college has responsibility for admission following the First Year of Studies, as well as the registration, rating, probation, academic dismissal, and graduation of students with a Bachelor of Business Administration (BBA) degree.

Programs of Study

Notre Dame has always recognized that education, to be effective, must be dynamic. It should be modified continually to meet the changing needs of the students and society. The primary purpose of revisions in the educational program is to continue the regular improvements the Mendoza College of Business has been making since its establishment in 1921.

An examination of the requirements of business led to the conclusions that the business world has a growing need for competent business administrators and that Notre Dame has a responsibility to help develop young people capable of assuming important administrative positions.

The business world has always required people with initiative, a willingness to take risks and the stamina to live in a competitive world. The competitive demands for new and better products in larger quantities at lower costs produce business operations which are extensive and involve a large number of highly specialized people. The administrator, whose job it is to put the work of many specialized people together into a smooth-working whole, has traditionally developed administrative skills by rather accidental means: by knowing instinctively, by learning from experience or by building upon some specialized body of knowledge and skill. Colleges have participated principally by furnishing the specialized bodies of knowledge supplemented with liberal arts courses.

The professional purpose of the business program is to focus attention directly on the skills and knowledge required by the business administrator and to help students acquire knowledge and develop those skills in a systematic way.

This work is especially appropriate at Notre Dame. The responsibility of business to its employees, customers, suppliers, owners, and the public is being recognized and studied with growing intensity in many quarters. This responsibility raises ethical issues to which Notre Dame and its graduates should respond in a sound and practical way. The continuing attempt to improve the practical application of ethical principles to competent performance in administrative jobs is a prime concern of the Mendoza College of Business.

Objectives. In light of the responsibility of the Mendoza College of Business for guiding students toward a liberal education in the Christian tradition and toward future responsibilities as business administrators, the following general framework has been formulated:

As a division of the University of Notre Dame, the Mendoza College of Business has the obligation to teach its students so that upon graduation they may have the knowledge of those ultimate principles whereby all things are capable of being organized into an intelligible whole.

Educational Objectives. The educational objective of the undergraduate program in the Mendoza College of Business is to assist and guide students in preparation for lifelong learning, for effective citizenship and for professional careers as competent and ethical participants in business, government, and other complex organizations. This is accomplished by educating students in the professional area of business while remaining true to the scholarly, liberalizing, and Catholic mission of the college and the University.

Within this general framework, the specific objectives of the undergraduate program of the Mendoza College of Business include the following:

1. *Providing* students with the foundation for a sound liberal education, including an appreciation for scholarship, creativity and innovation, and ethical behavior.
2. *Fostering* in students a recognition of the importance of administration, management, and entrepreneurship as professions and a recognition of the responsibility to manage organizational affairs and resources in a manner that will contribute to both organizational and societal goals.
3. *Inspiring* students to be leaders in their profession and developing the capabilities necessary for this responsibility, namely:

(a) broad knowledge of the structure, interrelationships, and problems of a rapidly changing global society;

(b) competence in analyzing and evaluating business problems, and in communication and other interpersonal skills;

(c) comprehensive understanding of the administrative function, the complexity of business and other enterprises, and the tools of management; and

(d) skill in using knowledge to develop creative responses to opportunities and threats faced by organizations and by society.

4. *Facilitating* the integration of the students' professional expertise with Notre Dame's sense of values.

The Program. The educational activities of a university and a college are broader than the mere teaching of courses. Nevertheless, one of the main expressions of an educational plan is its program of instruction. Several features of the program itself and certain fundamental concepts on which it is based deserve special comment.

The college recognizes four distinguishable but interrelated types of education to which future business leaders should be exposed: (1) study in the fields traditionally called liberal; (2) a basic understanding of the operation of a business enterprise; (3) an understanding of the economic and legal climate or atmosphere in which business functions and of which business is a part; (4) a professional concentration in a major for the student's in-depth educational pursuit, which will also provide some preparation for future employment.

The curriculum of the three-year business program combined with that of the First Year of Studies requires approximately one-half of the instruction to be in traditional liberal arts areas. The faculties of the College of Arts and Letters and the College of Science provide the instruction for the liberal arts courses.

Upon entering the Mendoza College of Business at the beginning of the sophomore year, the student registers for a program which introduces the basic tools of business and the functions of accounting, information systems, financial management, and marketing.

In the junior and senior years the student continues his or her studies using the analytical tools developed in the sophomore year. The student enters into a consideration of the operation of the business firm and the economic and legal climate of business. The examination of the economic climate in which business must operate is concerned with the fundamentals of money and banking, the role of the federal government in terms of its fiscal and monetary policies, and the concepts of national income accounting that afford a basis for measuring

and forecasting economic change. A student gives emphasis to his or her major and may either add to minimum major requirements or elect other course areas for study.

Curriculum for the Degree of Bachelor of Business Administration

The college stands ready to accept all applicants who have successfully completed the course requirements of the First Year of Studies at Notre Dame. Ordinarily, this will represent a minimum of 30 credits of work (exclusive of laboratories and ROTC) consisting of the following credits:

<i>University Requirements</i>	<i>Courses</i>
Composition	1
*Mathematics	2
*Science	2
*History	1
*Social Science (Principles of Microeconomics)	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature	1
**Physical Education	2

14

* *One of these requirements must be University Seminar 13180–13189.*

** *This requirement can also be fulfilled through first-year enrollment in ROTC.*

Only courses marked as "Univ. Req." in the online Schedule of Classes can be used to fulfill a University requirement. These courses can be viewed for a particular academic term by selecting the "Schedule of Classes" link within *insideND* or by visiting the home page of the Office of the Registrar and clicking on the "Class Search" link.

First-year students are required to complete a University seminar; composition; two semester courses in mathematics; two semester courses in science; one semester course chosen from: history, social science, philosophy, theology, or fine arts; and two semester courses in physical education or in ROTC. The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy, theology, mathematics, or science.

During the sophomore year, a student ordinarily will complete the following credits:

6 in Principles of Accountancy I and II
3 in Business Finance
3 in Introduction to Marketing
3 in Principles of Management
3 in Business Law
3 in Statistics in Business
3 in Computer Business Applications
3 in Theology or Philosophy
3 in a nonbusiness elective
1 in Ethics

The sequence and order of completion of courses will vary according to the availability of courses.

The BBA degree requires a total of 126 credits. Of these credits, a student has up to 14 free elective credits and 18 credits in non-business elective courses. Consequently, a student has considerable flexibility in selecting courses that meet his or her particular academic and career plans. Majors are available in accountancy, finance, marketing, management, and management information systems. Second majors or concentrations in subject areas outside the college are encouraged. Students should refer to specific departments for opportunities and requirements. Dual-degree programs have much more extensive requirements, which usually result in the need for a fifth year. (156 credit hour minimum, total number depending on program.) Entry into these programs requires the permission of the deans of both colleges. Interested students should contact the assistant dean's office for specific information.

A graduate from the college will have accumulated credits in the following areas, which include freshman- and sophomore-year credits:

3 in Composition
6 in Mathematics
6 in Science
*3 in History**
*6 in Behavioral Science**
3 in Literature or Fine Arts**
*6 in Philosophy**
*6 in Theology**
3 in Principles of Microeconomics (Social Science)
6 in Accounting I and II
3 in Finance
3 in Marketing
3 in Management
3 in Statistics in Business
3 in Computer Business Applications
3 in Business Law
1 in Ethics
3 in Macroeconomic Analysis
3 in Managerial Economics
1.5 in Strategic Management
1.5 in Operations and Competitive Enterprises
*1.5 in Integrative Course***
18–21 in major
18 in nonbusiness electives
10.5–14 in free electives
2 semesters of physical education or ROTC
** One of these three-credit requirements must be a University Seminar course.*
*** The integrative course may be fulfilled by an approved course in the student's major, releasing 1.5 credits to elective status.*

General administration of the undergraduate program is accomplished in the Office of the Assistant Dean for Administration, Room 101 Mendoza College of Business, which is also the repository for BBA student records. Advisors are available in this office to counsel students and answer questions concerning university and college requirements/policies. Faculty mentoring for juniors and seniors is available

from their respective major departments; however, Room 101 advisors will continue to provide general advice on college and University issues. The department offices of the college, i.e. accountancy, finance, management, and marketing, are located in Room 102 of the Mendoza College of Business.

Normal semester course load for sophomores is 15–16 hours; for juniors, 18–19 hours; and for seniors, 15–19 hours. The minimum semester course load for all students is 12 hours. Normally, a grade point average of 3.4 or higher for the previous semester is required to obtain permission to carry an overload. Interested students should contact the assistant dean's office for specific information.

Juniors and seniors who register for and maintain a minimum of 12 credit hours may elect one course per semester under the pass-fail option. Only free elective and non-business elective courses may be taken pass-fail. No business or required courses may be taken pass-fail even though taken as a free elective. The selection of a course as pass-fail must be made during the first week of the semester and is irrevocable. Note: to be eligible for Dean's List status, a student must have a minimum of 12 graded credits for the semester.

Students may elect to fill free elective or non-BA elective requirements with 1-, 1.5-, or 2-credit-hour courses, AP credit, or Credit by Exam. However, a minimum of 18 of the free or non-BA elective credits must be filled with standard 3-credit courses or graded 1.5-credit courses.

The college accepts a maximum of six credits through AP and/or credit by exam in any one language toward degree-seeking credits.

To be eligible for the BBA degree, students must complete a minimum of 63 credits at Notre Dame, including their senior year.

International Study Programs

Students from any of the majors in the Mendoza College of Business may participate in international study programs.

For more than a decade, Notre Dame has made it possible for students to earn credits toward graduation in international study programs. Travel, direct personal experience of another language and culture, and study in another tradition all broaden and deepen the liberal education of the whole person, to which the University has always been committed.

Qualified undergraduates can spend all or part of their sophomore or junior year in such places as Angers, France; Innsbruck, Austria; Dublin, Ireland; London, England; Fremantle, Australia; Monterrey and Puebla, Mexico; Nagoya, Japan; Santiago, Chile; Shanghai, China; Toledo, Spain; and Athens, Greece.

International study programs make a unique contribution to the excellence of liberal education in the

undergraduate colleges and frequently have proven a real asset in career development.

For further information and advice on international study, students of the Mendoza College of Business may contact the assistant dean, Room 101 Mendoza College of Business, and/or the director of the International Study Programs, 152 Hurley.

Student Awards and Prizes

The Hamilton Awards. Founded by Robert L. Hamilton '34, Racine, Wis., these awards are given to the outstanding senior in each of the four departments of the college.

The Dean's Award. This award is given to the graduate whose leadership has contributed most significantly to the progress of the college.

The Herman Crown Award for Outstanding Achievement in Finance. An annual award made by the Department of Finance in memory of the late Herman Crown and given to the senior finance major with the highest overall grade point average.

Raymond P. Kent Award. An annual award given to a senior finance major for outstanding performance in finance classes.

Paul F. Conway Award. An annual award given to a senior in the Department of Finance who embodies the characteristics that define our tradition of excellence: a person of keen intellect who enriches the ideals of Notre Dame.

LeClair Eells Award. An annual award given to a senior finance major for outstanding leadership.

Wall Street Journal Award. Given to a senior in the Department of Finance for rendering outstanding service to the department.

Paul D. Gilbert Award for Leadership. An annual award given to a marketing senior for overall leadership in extracurricular departmental activities. The recipient is selected by the faculty of the Department of Marketing. The award is named for the late Paul D. Gilbert, a local business executive, civic leader, and longtime friend of the department.

Wesley C. Bender Award for Outstanding Performance in Marketing. An annual award given to the senior marketing major with the highest grade point average in marketing courses. The award is named for the first chairman of the Department of Marketing, Wesley C. Bender.

John R. Malone Award. An annual award given to the junior marketing major with the highest overall grade point average.

Robert M. Satterfield Award. Given to a marketing student for bringing enthusiasm, integrity, and a spirit of teamwork to the classroom.

David A. Appel Award. Given to a marketing student for exemplary service contributions.

Tara K. Deutsch Award. An annual award given to an accounting senior who has shown exemplary social consciousness and devotion to efforts to give hope to the less fortunate.

Accountancy Chairman Award. An annual award provided to an accounting senior who demonstrates outstanding service to the Department of Accountancy.

Accountancy Excellence Awards. Given annually to 20 sophomores who declare accountancy as their major and have demonstrated outstanding economic achievement. The awards are funded by annual gifts from Deloitte & Touche, Ernst & Young, KPMG, and PricewaterhouseCoopers.

Peter Brady Award. Established to honor past faculty member Peter Brady, this award is given in recognition of outstanding economic performance to a senior who is entering Notre Dame's Master of Science in Accountancy program.

Elmer Layden Awards. Given annually to graduating accounting seniors in recognition of academic achievement. The awards are funded by the Elmer Layden Jr. Endowed Fund.

Brother Cyprian Awards. Given annually to graduating accounting seniors in recognition of academic achievement. The awards are granted in honor of Holy Cross Brother Cyprian O'Hare ("Brother Zip"), who helped to launch Notre Dame's accountancy education program in 1895 and later served as department chair.

James Dincolo Awards. Given annually to graduating accounting seniors in recognition of academic achievement. The awards honor former accountancy professor James Dincolo and are funded by an endowment in his name.

The Indiana Certified Public Accountants Society Award. Founded in 1950 by the board of directors of the Indiana Association of Certified Public Accountants, this annual award provides a plaque to an outstanding senior in accountancy.

The Management Award. Given to the outstanding MIS senior in the Department of Management.

The Justin Harris Brumbaugh Memorial Award. Given annually to the graduating MIS major who has excelled academically and has been selected by the graduating seniors as best representing the unique and enduring spirit of Notre Dame.

Student Organizations and Activities

Students' academic organizations are supported and encouraged by the administration and the faculty. These associations are actively managed by student officers. Members of the faculty serve in advisory capacities.

The League of Black Business Students. The League of Black Business Students was organized in 1976. The general purposes of the league are to establish and maintain a rapport with the administration, faculty, and various business administration clubs of the Notre Dame community, establish an orientation program, plan business forums, provide study sessions, and create business administration internships.

Honorary Societies.

Beta Gamma Sigma. Notre Dame shares, with selected colleges of business nationwide, this honorary society's stated purposes of encouraging scholarship and achievement among business administration majors. It promotes education in business administration and fosters integrity in the conduct of business. Undergraduate membership in this organization is restricted to the upper 10 percent or less of the senior class and the upper 5 percent or less of the junior class for all full-time students. Faculty membership is limited to those with tenure in the Mendoza College of Business at Notre Dame.

Beta Alpha Psi. Accountancy majors who have demonstrated outstanding scholastic ability and the personal characteristics requisite to professional status are eligible for membership in the Beta Sigma chapter of Beta Alpha Psi, the national professional and honorary accounting fraternity. The purposes of this fraternity are to encourage and foster the ideal of service as the basis of the accounting profession; to promote the study of accountancy and its highest ethical standards; to act as a medium between professional persons, instructors, students and others who are interested in the development of the study or profession of accountancy; to develop high moral, scholastic, and professional attainments in its members; and to encourage cordial interaction among its members and the profession generally.

Advisory Council Investment Fund. Through the generosity of William R. Daley, a former member to the college's Advisory Council, undergraduate students are able to learn the principles of investment and portfolio management firsthand. The investment policy of this fund is determined by the students under the guidance of a faculty advisor. Annual reports are submitted to the dean and to the University's investment officer.

Finance Club. The goal of the Notre Dame Finance Club is to enhance its members' knowledge of the financial world. The club achieves this goal through providing professional speakers, company information sessions, and the annual Fall Break trip to Chicago and New York. These events provide the members with exposure to the diverse careers within the financial industry. In addition, the exposure allows club members a unique networking opportunity, which may lead to career opportunities for internships or full-time employment after graduation.

Notre Dame Accounting Association (NDAA). The Notre Dame Accounting Association exists to provide junior and senior accountancy majors

and sophomore business majors who are considering accountancy as a major, an organization which provides support, employment contacts, social gatherings and events, and a unifying bond in the form of membership. Sophomores, juniors, and seniors majoring in, or intending to major in, accountancy are eligible for membership. For more information, please visit www.nd.edu/~acctclub.

Marketing Club. The Marketing Club provides an opportunity for junior and senior marketing majors to learn about the field of marketing. Business executives who are active in the marketing profession are invited to speak to members several times during the year. These businesspeople address the club on a variety of marketing, selling, and advertising topics. The Marketing Club is also very active in promoting the students for permanent positions or internships via a career night held each fall.

Notre Dame MIS Club (NDMIS). The purpose of this club is to provide a forum for all students interested in the field of Management Information Systems, particularly MIS majors, to exchange ideas and to more fully develop their skills and cover potentials in this dynamic field of study. The NDMIS club goals are accomplished through activities that foster greater interaction among students, faculty, and corporate recruiters. These activities include inviting guest lectures, computer skill seminars, tutoring sophomores and juniors, social gatherings, and sports events.

Student International Business Council (SIBC). As one of the largest student organizations on campus, the SIBC is committed to its vision of establishing peace through commerce while educating its members and providing them an avenue to develop vital business and interpersonal skills with an international focus. The council is organized into various divisions representing all majors and concentrations within the Mendoza College of Business. Members are actively a part of projects which strive to offer unmatched, hands-on experience in everything from simulating the structure and debates of the European Central Bank and forming an in-depth fundamental and technical financial analysis of an international company, to managing the council's marketing needs and developing and maintaining our own website.

The council is also dedicated to bettering international relations by means of socially-conscious activities. One of note is the Haiti Bednet project that receives funding from both the SIBC and the W.K. Kellogg Foundation.

Within a given year, members travel to all corners of the globe. Each year, the SIBC grants around 40 students the chance to work as interns and teachers in a rapidly growing number of foreign countries—giving members the real-world experience that is highly desired in the current job market.

Management Club. The purpose of the Management Club is to involve students in activities that will take them beyond the classroom into the

world of industry, labor, and government. Students obtain experience in managerial decision-making by exposure to real-life situations in which they can examine theory and principles in practice.

The Management Club schedules business professionals, labor leaders, and government officials to address its members; sponsors field trips to large industrial centers; and conducts an annual management workshop on important current issues facing management led by professional men and women. Members also develop organizational and administrative skills by participating in such endeavors as the operation of a Mardi Gras booth to raise funds for charity. As a social function, the club has smokers that allow students and faculty to meet and exchange views on an informal level.

Entrepreneurs Club. The Entrepreneurs Club provides assistance and opportunities for creative students of all majors interested in launching their own companies. One such opportunity is the Student Business Incubator—a competition in which student teams run their own on-campus businesses for 10 weeks and can choose to keep or donate the profits. The club also brings to campus a number of prestigious entrepreneurial speakers and hosts Entrepreneur Networking Dinners to bring together students, faculty members, and entrepreneurs in an intimate setting. Beyond its campus activities, the Entrepreneurs Club publishes a resume book to help members obtain summer internships and travels to national conferences to learn, network, and compete.

Undergraduate Women in Business Association. The Undergraduate Women in Business Association of Notre Dame is committed to the development of women's roles as students of business and as leaders in business-related fields. UWIB works to provide undergraduate women with the support and resources that will better prepare them for careers in business and achieving a work-life balance.

Accountancy

KPMG Professor of Accountancy and Chair:

Thomas F. Schaefer

Notre Dame Alumni Professor of Accountancy:

Peter D. Easton

Vincent and Rose Lizzadro Professor of Accountancy:

Thomas J. Frecka

Deloitte and Touche Professor of Accountancy

David N. Ricchiute

Professors:

Kenneth W. Milani; H. Fred Mittelstaedt;

Michael H. Morris; William D. Nichols;

Ramachandran Ramanan; James L.

Wittenbach

Associate Professors:

Chao-Shin Liu; Jeffrey S. Miller; Kevin M.

Misiewicz; Juan M. Rivera; Jim A. Seida;

Thomas L. Stober; Sandra Vera-Muñoz

Assistant Professors:

Lisa Sedor; Margaret Shackell; Oliver Z. Li

Professional Specialists/Lecturers:

Edward F. Hums; Tonia Murphy; James

O'Brien; Margot O'Brien; Janet O'Tousa

Program Objectives. The Department of Accountancy provides outstanding accounting educational experiences for its students by (a) complementing and supporting the tradition of liberal arts/general education at Notre Dame, (b) adhering to the objectives of the undergraduate program of the Mendoza College of Business, and (c) developing and continuously improving an innovative accounting curriculum for successful careers as accounting professionals. The curriculum focuses on critical thinking, research, technology, ethics, global issues, leadership, teamwork, communication, and lifelong learning.

The department provides students with information about career options in accounting as well as career options that utilize accounting knowledge as an integral part, so that those with the background, interest, and motivation will choose to major in or take significant course work in accounting. The department also supports the activities of the Notre Dame Career Center while providing recruiting guidelines and assisting with the placement of students for the twofold purposes of (a) maintaining an outstanding record for placing a high percentage of graduates with national and regional accounting firms, industrial, service, and not-for-profit organizations; and (b) supporting student desires to pursue other post-graduate options, including volunteer work, military service, and graduate education.

Program of Studies. The accounting sequence begins with Accountancy I and II (ACCT 20100 and 20200). These courses, normally taken in the sophomore year and required of all business students, are designed to provide a broad introduction to the accounting function, the profession of accountancy and the role of accounting in society.

Students choosing an accountancy major must complete the following Department of Accountancy requirements.

ACCT 30110. Accounting Measurement and Disclosure I

ACCT 30120. Accounting Measurement and Disclosure II

ACCT 30210. Accounting for Decision Making and Control

ACCT 30280. Decision Processes in Accounting

ACCT 40510. Audit and Assurance Services

ACCT 40610. Federal Taxation

Students in the Class of 2005 and later will select a seventh required course in information technology from one of the following: MGTA 30619. Business Analysis in VBA, MGT 30269. Systems Analysis and Database Management, MGTA 40660. Internet Computing.

The 150-Hour Rule for CPA Certification. A popular choice for many accountancy majors is to become Certified Public Accountants. In addition to offering traditional services, CPAs are increasingly sought as business and systems advisors to solve diverse and unstructured problems. The 150-hour rule aims to provide students with the necessary background to meet these challenges.

The 150-hour rule is an educational requirement governed by state-specific rules. Typically, 150 hours of college credits with an accounting concentration will be necessary to sit for the CPA examination. For most states, the rule went into effect in 2000–2002. However, the rules vary widely across states, and students are encouraged to visit the department's office (102 Mendoza College of Business) for information about their home state's requirements for credit hours, specific courses, professional experience, etc.

The Department of Accountancy offers a one-year master of science degree program that helps students meet the 150-hour rule.

Master of Science in Accountancy. The MS-Accountancy program provides an excellent course of study to prepare for a variety of business-related career choices. Specialized tracks are available in:

- Financial Reporting and Assurance Services
- Tax Services

Students can enter the MS-Accountancy program in either the fall or spring semesters. Additional information and applications are available in the department office (102 Mendoza College of Business).

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Accountancy](#) heading.

Assistant Professors:

Zhi Da; Ann Sherman; Sophie Shive; Lei Yu; Hayong Yun; Eduardo A. Zambrano

Professional Specialists:

Carl Ackermann; Margaret Forster; Jerry Langley; Kevin Scanlon; John Stiver

Program of Studies. The department offers courses with the dual objective of (1) providing a broad foundation so that students can pursue further study at the graduate level and (2) equipping students with the broad base of knowledge and skills necessary for entry into the financial world. The major in finance consists of six courses offered by the department (in addition to the courses required of all candidates for the degree of bachelor of business administration) and affords students flexibility in their career choice. The six courses are FIN 30600 Investment Theory, FIN 30400 Advanced Corporate Finance, and four finance electives chosen from among the other courses offered by the department. Either ACCT 30210 or ACCT 30110 may substitute for one of these electives.

All students enrolled in the Mendoza College of Business are required to take a business-finance course during their sophomore year. Finance majors must complete FIN 20150 Corporate Financial Management with a grade of C or higher. This course is concerned with internal financial management of business firms. In addition, all business administration students are required to complete two courses in business economics: Managerial Economics and Macroeconomic Analysis. The aim of these courses is to provide students with an understanding of the economic environment within which business enterprises operate.

The advanced courses the department offers are designed to equip students with the knowledge which will enable them to make a good start and to progress in whatever area of business they choose upon graduation. The subject matter of these courses—investments, financial management, financial institutions, business economics, and international finance—is of fundamental importance. Graduates of the department are currently pursuing successful careers in many areas of business.

Students who intend to take the examinations leading to the Chartered Financial Analyst (CFA) designation should structure their programs with that objective in mind. BALW 20150 and ACCT 40710 should be included in their program along with appropriate courses in accounting and investments.

COURSE DESCRIPTIONS

Programs of Study. The Department of Management offers two programs of study: (a) a major in Management with a concentration in Management Consulting; and (b) a major in Management Information Systems (MIS).

The Management Major. The Management major prepares students to manage people and processes within both large and small organizations or to consult organizations on those management issues. A particular emphasis is placed on managing within organizations facing the challenges of rapid change

and increased competition. The major is designed to provide sufficient flexibility for students to prepare for several career paths. While all management majors are required to complete general course work on the management of people in organizations, they must then select a concentration that prepares them for careers in either Management Consulting or Entrepreneurship and Family Business.

Management Consulting. Management majors following the consulting track must complete the following:

MGTC 40420. Managing Innovation
MGTC 40490. Organizational Consulting

CHOOSE ONE:

MGTC 30300. Management Competencies
MGTC 30450. HR Practices in High Performing Organizations

CHOOSE ONE:

MGTI 30620. Database Management
MGTI 30630. System Analysis and Design

CHOOSE TWO:

MGTC 40410. Leadership and Motivation
MGTC 40430. Negotiations
MGTC 40480. Management Senior Seminar

The Management Information Systems Major.

The MIS program is designed to prepare students to become leaders in the use of information systems for the benefit of organizations and society. This program of study focuses on educating students about the development and use of information systems as decision-making and problem-solving tools. The program is also intended to develop an understanding of the managerial issues encountered in the operation or introduction of information systems in organizations, particularly how these tools can be used to gain a competitive edge and to re-engineer an organization.

MIS majors must complete the following:

MGTI 30610. Programming Fundamentals
MGTI 30620. Database Management
MGTI 30630. Systems Analysis and Design
MGTI 30640. Networking

Choose two of the following courses:

MGTI 30660. IT Applications in the 21st Century
MGTI 40612. Programming in JAVA
MGTI 40660. Internet Computing
MGTI 40670. Security and Technology Risk Management
MGTI 40690. MIS Capstone Project

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Management](#) heading.

Marketing

Chair:

John F. Sherry Jr.

Aloysius and Eleanor Nathe Professor of Marketing

Strategy:

William L. Wilkie

Arthur and Mary O'Neil Professor of International

Business Ethics:

Georges Enderle

Ray W. and Kenneth G. Herrick Professor of Marketing:

John F. Sherry Jr.

Professors:

Michael J. Etzel; Joseph P. Gultinan; John J. Kennedy; Patrick E. Murphy; Joel E. Urbany

Associate Professors:

John F. Gaski; Elizabeth S. Moore; John A. Weber

Assistant Professors:

Kevin D. Bradford; Debra M. Desrochers; Timothy J. Gilbride; Joan M. Phillips; Constance E. Porter

Program of Studies. Students completing a degree in marketing at Notre Dame should: (1) understand the decision-making processes of buyers and sellers in a market; (2) know how to apply behavioral models and quantitative tools to the analysis of marketing issues; (3) be able to develop informed marketing and organizational strategies; (4) be effective in working in a team environment; and (5) recognize the ethical and social responsibilities of marketing practitioners.

In accordance with these objectives, all students in the Mendoza College of Business take Introduction to Marketing in their sophomore year. Students choosing marketing for their professional major are required to take Quantitative Analysis for Marketing Decision Making, Consumer and Industrial Buyer Behavior, Marketing Research, Strategic Marketing, and two marketing electives.

The Marketing Research and Consumer and Industrial Buyer Behavior courses, taken in the junior year, develop a foundation in the tools and concepts germane to marketing decision making. Quantitative Analysis for Marketing Decision Making, also taken in the junior year, provides an opportunity to learn quantitative methods used in industry and apply them to real-world marketing problems. During the senior year, students take Strategic Marketing, an advanced marketing strategy course that integrates marketing concepts and the other business functions through projects and simulations.

These courses are supplemented by the extracurricular activities of the Marketing Club.

All courses in the department focus on the performance of the marketing process but do not restrict it to a particular situation. Thus, the student majoring in marketing is prepared for a wide range of opportunities in business and nonbusiness organizations, including professional sales, customer service, product or brand management, advertising, public relations, market research, retail merchandising, and electronic commerce. Marketing majors are being employed by an increasing number of firms specializing in areas such as consulting, retailing, and other service businesses that have traditionally underestimated the importance of this function. Additionally, nonbusiness and nonprofit organizations (hospitals, educational institutions, charitable organizations) are discovering the critical importance of marketing in their operations and are seeking well-trained graduates.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Marketing](#) heading.

Nondepartmental Courses

Director:

Samuel S. Gaglio

Assistant Dean, Mendoza College of Business

Many courses in the college are designed to cross departmental lines and provide basic tools during the sophomore and junior years or to foster the integration of various disciplines during the junior and senior years. These courses are open to all business students with appropriate prerequisites.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Business \(Nondepartmental\)](#) heading.

Collegiate Sequence in International Business

The Collegiate Sequence in International Business is a series of courses designed to give the undergraduate business student a broad exposure to the global nature of the world of business. It is open to all students in the Mendoza College of Business. The program is not an official major, second major, or minor, but participation in the program will be acknowledged with a certificate upon completion at graduation. Students in the program are responsible for the search and selection of appropriate courses. Students in the program do not have priority over other students in registration for international courses.

COLLEGIATE SEQUENCE IN INTERNATIONAL BUSINESS

The program is designed to be a cross-disciplinary sequence of courses in the Mendoza College of Business and the College of Arts and Letters. Students in the program are required to complete five courses. **At least two courses must be selected from contemporary international business courses, and up to three courses must be selected from contemporary international liberal arts courses.** An international economics course may be submitted for one of the two international business courses. One advanced course in a foreign language may be counted as an international liberal arts course for the international collegiate sequence.

With the consent of the Program Coordinator, courses taught at Saint Mary's College, courses taught in the ND International Programs, and selected courses transferred from other institutions may qualify for the certificate.

Students may not take courses in the International Sequence on a Pass/Fail basis. Courses may "double count"—e.g., a course in international finance would count as a business course in the international sequence and would also serve as one of the finance major course requirements for graduation.

Students must announce their intention to complete the program and meet with the program coordinator no later than the end of their junior year and again during their senior year.

For more information, contact the program coordinator:

College of Engineering

The College of Engineering was established as a distinct unit of the University in 1897, although a program in civil engineering was offered in 1873. It is now organized into five departments, including aerospace and mechanical engineering, chemical and biomolecular engineering, civil engineering and geological sciences, computer science and engineering, and electrical engineering.

Since its inception, the College of Engineering has regarded the primary purpose of all higher education as the development of the intellect, discriminatory power, and judgment in all students to enable them to arrive at sound decisions in their personal lives and in the professional lives they will pursue after graduation. The programs of studies offered in the various departments of the college are, therefore, constructed to give the student a good knowledge of the basic sciences and of engineering principles, and to prepare him or her for the manifold duties of an educated professional and for the cultural life of an educated person. Classroom instruction is amplified by laboratory work and design experiences that give the student some insight into the application of principles to practical problems. Detailed excursions about the College of Engineering and its many programs can be found on the World Wide Web at www.nd.edu/~engineer.

Mission Statement. To nurture the intellectual growth of our students and to serve humanity through the creation, application, and dissemination of knowledge relevant to technology.

The College Vision Statement.

- To provide *preeminent education experiences* that are stimulating, responsive to the needs of the 21st century, and prepare our students for leadership in their profession and society.
- To conduct *world-class research* that addresses *critical needs* of society.
- To gain *national recognition* as a first-tier college of engineering.
- To contribute to the *Catholic character* of the University.

Accreditation and Academic Association. The College of Engineering is a member of the American Society for Engineering Education, and all engineering curricula are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

Registration of Engineers. Registration of engineers is required for many fields of practice. While young engineers need not acquire registration immediately upon graduation, they benefit by applying early for the required state examination. Graduating from accredited programs such as those offered by Notre

Dame facilitates registration as a professional engineer.

Registration of Geoscientists. Registration is required for geoscientists to practice in many states. The degree in environmental geosciences (available through the Department of Civil Engineering and Geological Sciences) provides the necessary academic background for graduates to successfully complete registration as a professional geoscientist.

Programs and Degrees

The College of Engineering offers curricula leading to the degrees listed below:

BS in aerospace engineering
BS in chemical engineering
BS in civil engineering
BS in computer engineering
BS in computer science
BS in electrical engineering
BS in environmental geosciences
BS in mechanical engineering

To complete all the degree requirements, the student must take and pass all of the courses specified in the *Bulletin* for the given degree and must earn the total minimum number of course credit hours specified for the degree.

To obtain two undergraduate degrees from the College of Engineering, a student must successfully carry out an approved program of courses totaling no more than 162 credit hours, depending on the program. These must include all of the courses specified in the *Bulletin* for each degree.

The master of science and doctor of philosophy degrees are offered in the fields of engineering listed above. The Department of Civil Engineering and Geological Sciences has programs leading to the degrees of master of science in environmental engineering, master of science in bioengineering, and master of science in geological sciences.

The Department of Computer Science and Engineering offers one master's degree, the master of science in computer science and engineering, and the doctor of philosophy.

The details of the programs and the engineering courses offered at the graduate level are in the Graduate School *Bulletin of Information*.

Engineering Common Core. All engineering curricula consist of each of the following:

Arts and Letters Core: 24 credit hours. Composition (one course), University Seminar* (one course),

history (one course), social science (one course), fine arts or literature (one course), philosophy (two courses) and theology (two courses).

**The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course or the first course in theology or philosophy, and will satisfy the respective requirement.*

Basic Science Core: 36 credit hours. MATH 10550. Calculus I, MATH 10560. Calculus II, MATH 20550. Calculus III, MATH 20580. Introduction to Linear Algebra and Differential Equations, CHEM 10121. General Chemistry: Fundamental Principles, CHEM 10122. General Chemistry: Biological Processes, PHYS 10310. General Physics I, PHYS 10320. General Physics II, EG 10111, 10112: Introduction to Engineering Systems I and II

Program of Studies. The course of study for first-year students intending to major in any program of the College of Engineering is completely uniform so that the student who is undecided as to a specialty may postpone the final choice until the spring semester of the first year. Included in the college are six engineering programs (aerospace, chemical, civil, computer, electrical, and mechanical) and two non-engineering programs (computer science and environmental geosciences). First-year students intending to pursue any of these programs should consult this *Bulletin* for the **Program of Studies**.

An entering student simply makes a "declaration of intent" of the undergraduate college which he or she proposes to enter as a sophomore and is not enrolled in a particular college as a first-year student.

First Year of Studies. The beginning college student who has been accepted as a first-year student enters the Notre Dame First Year of Studies. Here the student will have one academic year of basic collegiate studies before entering a given department and college. Before entrance as a first-year student, the student will have made a tentative declaration of intention to major in a given college. This declared intention serves as a guideline for the student and the advisors and counselors. In the spring of the first year of studies, with three-fourths of an academic year of actual experience at Notre Dame and with the benefit of counsel and advice received from the appropriate officials and University faculty, the first-year student will make a decision as to the department and college in which the student chooses to major. If the student is scholastically sound for the given choice, approval will be given.

A first-year student intending to major in any of the College of Engineering programs should take the following courses in the first year:

COLLEGE OF ENGINEERING

First Semester

Composition or University Seminar+	3
MATH 10550. Calculus I	4
CHEM 10121. General Chemistry: Fundamental Principles	4
Arts and Letters course*	3
EG 10111. Introduction to Engineering Systems I#	3
Physical Education	—
	<hr/>
	17

Second Semester

University Seminar+ or Composition	3
MATH 10560. Calculus II	4
CHEM 10122. General Chemistry: Biological Processes	3
PHYS 10310. General Physics I	4
EG 10112. Introduction to Engineering Systems II#	3
Physical Education	—
	<hr/>
	17

+ *The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy, and will satisfy the respective requirement.*

*See *Arts and Letters Core* above.

#While EG 10111–10112 is acceptable for the environmental geosciences degree, it is not required and the sequence ENVG 10110–10100 may be substituted.

General Requirements. The University of Notre Dame reserves the right to change at any time regulations included in its *Bulletins* with respect to admission to the University, continuance therein and graduation therefrom. Every effort is made to give advance information of such changes.

All first-year students are required to take physical education three periods a week the first year. Relaxation of this rule for ROTC students is noted below.

The number of credit hours, exclusive of ROTC, usually carried by the undergraduate student in the College of Engineering varies from 14 to 18 in accordance with the program of courses listed elsewhere and may not exceed 19 hours. The permissible maximum may be lowered or increased at the discretion of the dean.

An upper-class student who desires to transfer from engineering to another college of the University or from one department of the college to another department must obtain the specified approvals.

Engineering Honors Program. The College of Engineering has developed an honors program for those students whose achievements have identified them as among the best of entering high school students. This program will provide special opportunities for engineering and scientific research, cultural enrichment, and social leadership over and above what is already available to all. Admission to the program is by invitation and commences in the First Year of Studies with a special yearlong seminar

that satisfies two University core requirements. Each student in this program will be guided by a faculty member who functions as his or her research advisor and mentor. Thus, students and faculty meet regularly in both formal and informal settings. To graduate with recognition as an honor student, each student must participate all four years and complete a research thesis in the student's major field in the senior year.

International Study Opportunities. The University strongly supports study abroad and has encouraged the programs in the College of Engineering to participate. At present, there are opportunities in six locations: Dublin, Ireland; London, England; Perth, Australia; Monterrey, Mexico; Karlsruhe, Germany; and Cairo, Egypt. The programs in Mexico and Germany require the student to be fluent in Spanish and German, respectively. In each location, students are required to take at least two technical courses so as to be able to graduate in four years with their classmates. Students may go to the London Engineering Program either during the summer after their sophomore or junior year or during the first semester of the junior year. The program in Karlsruhe must be taken in the second semester of the junior year, while those in Monterrey and Cairo are best taken in the second semester of the junior year. Not all locations are appropriate for every program in the college. Students should contact an advisor in their department to work out any details.

ROTC Programs. In the first year of studies, all ROTC students omit physical education, in accordance with the academic regulations.

ROTC students are permitted a maximum of six credits of upper-level air, military or naval science as substitutes for specified degree requirements determined by the department. Three of these credits may be substituted for either a history or social science requirement. All air, military or naval science credits not so substituted are not credited toward degree requirements in programs in the College of Engineering.

Humanities in the Curriculum. The student enrolled in the College of Engineering is required to satisfy all University degree requirements, which include composition (three credits), University Seminar* (three credits), history (three credits), social science (three credits), fine arts or literature (three credits), philosophy (six credits) and theology (six credits).

For specific information on course offerings to satisfy these requirements, the student is expected to confer with a departmental advisor. A list of such courses scheduled each semester will be made available by the student's advisor. ROTC students may be permitted to substitute three credits of upper-level air, military or naval science for either the history or social science requirement.

**The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy, and will satisfy the respective requirement.*

Engineering Business Practice. The college recognizes the importance of providing its graduates with opportunities to learn how engineers function in the world of business, and several departments do provide courses that are specifically tailored to provide skills, insight, and experience related to business practice by engineers.

A new multi-course sequence has been developed in the college that will provide additional opportunities in this area. The sequence can be taken by students in all departments of the college and is designed to increase the effectiveness of engineering graduates by developing an understanding of the dynamics of business operations. These courses include issues related to ethics, leadership, and business practices such as marketing, management, finance, and human resources, and to examine the professional and leadership characteristics of modern industrial leaders. In the second course, students are expected to develop a business plan and execute it using a well-known computer simulation program.

Combination Five-Year Programs with the College of Arts and Letters. The engineering executive in modern industry should have a broad background in cultural, social, and technical subjects. Some allowance is made for this in the prescribed four-year curricula, but in view of the extent of the technical field that must be presented, coverage of the cultural field is necessarily limited.

To realize the desired objective more fully, the College of Engineering, in cooperation with the College of Arts and Letters of the University, instituted in 1952, a five-year program that combines the basic stem of the liberal arts program with the technical requirements of the various engineering programs. The student completing this combination program will be awarded two degrees: the degree of bachelor of arts and the degree of bachelor of science in the professional course pursued.

Students pursuing this program must have strong scholastic ability and be acceptable to both the dean of the College of Arts and Letters and the dean of the College of Engineering. Choice of the program should be indicated by the end of the first year, but choice of a particular field of Arts and Letters may be deferred until the end of the second year.

The general sequence of courses in the five-year engineering-liberal arts program is found under "Dual Degree Programs," later in this section of the *Bulletin*.

Combination Five-Year Program with the Mendoza College of Business. To address the needs of engineering students who wish to integrate management and engineering, the College of Engineering and the Mendoza College of Business have established a competitive cooperative program in which a student may earn the bachelor of science degree from the College of Engineering and the master of business administration in five years plus some summer sessions.

The program is structured so that a student who has completed the first three years of the bachelor's degree program, if accepted, completes the master of business administration and the bachelor of science in a summer session and two subsequent academic years.

Students who wish to pursue this program should have a superior scholastic record in their undergraduate program and must make application to and be accepted by the MBA program.

The general sequence of courses in the five-year engineering-MBA program may be found under "Dual Degree Programs," later in this section of the *Bulletin*.

Combination Five-Year Programs with Other

Schools. The highly desirable objective to infuse more liberal arts work into the education of engineering students has been met in another way.

The University of Notre Dame has entered into agreements with Bethel College, Mishawaka, Ind.; Saint Mary's College, Notre Dame, Ind.; St. Anselm College, Manchester, N.H.; College of St. Thomas, St. Paul, Minn.; Carroll College, Helena, Mont.; Stonehill College, North Easton, Mass.; and the University of St. Thomas, Houston, Tex., whereby the liberal arts part of combination five-year programs is given by these respective colleges and the engineering part by Notre Dame. In these cooperative programs, the student spends three years at a college of first choice and two years at Notre Dame. After completion of the program, the student receives a bachelor of arts degree from the first college and a bachelor of science degree in a College of Engineering program from Notre Dame.

The sequence of courses is essentially the same as in the Notre Dame engineering-liberal arts program; however, no attempt has been made to set up a rigid pattern, and each participating institution has complete freedom concerning the choice and arrangement of courses, provided that the coverage in the areas of mathematics, physics, chemistry, computing, introductory engineering, theology, philosophy, history, social science, and literature or fine arts is appropriate. It is expected that the equivalent of the first two years of the College of Engineering program being applied for has been completed before transfer.

Details of these programs may be obtained by writing to the institutions concerned or to the dean of the College of Engineering.

Graduate Programs in Engineering.* The Graduate School of the University of Notre Dame is composed of four divisions: humanities, social science, science, and engineering. The division of engineering of the Graduate School was organized in 1946 with power to grant advanced degrees in the departments of aerospace and mechanical engineering, chemical and biomolecular engineering, civil engineering and geological sciences, computer science and engineering, and electrical engineering. The general conduct of graduate work is under the jurisdiction of the

Graduate Council of the University, the members of which serve as specified in the Academic Articles. Director of the program in the engineering division is the dean of the College of Engineering.

* Reference should be made to the *Graduate School Bulletin of Information* for details of these programs and to the World Wide Web at www.nd.edu/~engineer/prospects/prospects.htm.

The Scope of the Graduate Program. Extensive graduate work in engineering takes place in the College of Engineering and encompasses all of its programs. The greater emphasis of today on research in industry and in governmental institutions has increased the demand for engineers with graduate degrees and made it desirable to include graduate work in the engineering curriculum. Both undergraduate and graduate students benefit from the advanced technological ideas being studied and developed.

Facilities for Graduate Work. All departments of the college have special laboratories, equipment and study rooms for graduate students. General facilities available include a high-performance computing facility, the University library and its special collections, the research libraries in science and engineering, and the various research laboratories. The nearness of Chicago makes possible a certain amount of cooperation with the scientific institutions and special libraries of that city, and the concentration of industrial plants in nearby South Bend and the surrounding area provides excellent opportunity for study in the field and for cooperative research with industry.

College Awards and Prizes

COLLEGE OF ENGINEERING AWARDS

The Rev. Thomas A. Steiner Prize. From a fund established in 1948 by former students of Rev. Thomas A. Steiner, CSC, former dean of the College of Engineering, a cash award is made to seniors in any department of the college who have been selected for their all-around excellence as students.

The Reilly Scholar Designation. The designation Reilly Scholar is given annually to those fifth-year seniors enrolled in the dual Engineering/Arts and Letters program who have excelled academically and otherwise during their first four years as students. A cash award is also made from a fund set up by Jack Reilly to encourage such interdisciplinary studies.

The Americo Darin Prize. From a fund set up by the Darin family, in their father's name, a cash award is made to several engineering juniors who have demonstrated exceptional and steady improvement over their first four semesters at Notre Dame.

Departmental Awards

AEROSPACE AND MECHANICAL ENGINEERING

Patrick J. Deviny Award. Presented each year to a junior aerospace student who has displayed the most diligence and persistence in the pursuit of undergraduate studies in aerospace engineering.

Vincent P. Goddard Design Award. Presented each year to a senior in aerospace engineering major for outstanding performance in the aerospace design course.

Sigma Gamma Tau Honor Award. Presented each year to a member of the Notre Dame chapter in recognition of outstanding academic performance and demonstrated professional potential.

The Aero Propulsion Award. Presented each year to a senior in aerospace engineering for outstanding performance in the Gas Turbine and Propulsion class.

The Zahm Prize for Aeronautical Engineering was founded in 1946 by Dr. Albert J. Zahm, distinguished pioneer in aeronautics and at one time professor of physics at the University of Notre Dame. The award is made by the program in Aerospace Engineering to the senior student of the program who, in the estimation of the faculty of the program, has achieved the most distinguished record in professional subjects.

Jerome L. Novotny Design Award. Presented each year to a junior in mechanical engineering for the best design in the junior heat transfer course.

The Rockwell Automation Power Systems Design Award. Presented each year to seniors in mechanical engineering for the best design in the senior mechanical engineering design course.

CHEMICAL AND BIOMOLECULAR ENGINEERING

AIChE Scholarship Award. Presented to the junior chemical engineering student who has the highest scholastic average during the first two years of study.

American Institute of Chemists Award. Presented to an outstanding senior in the Department of Chemical and Biomolecular Engineering.

Chemical Engineering Alumni Award. Presented to one or more seniors having an outstanding combination of scholarship and extracurricular activities.

Chemical Engineering Faculty Award. Presented to the senior having the highest scholastic average after seven semesters of study.

Chemical Engineering Research Award. Presented to one or more undergraduate students considered to have performed outstanding undergraduate research.

CIVIL ENGINEERING AND GEOLOGICAL SCIENCES

The American Society of Civil Engineers. The Indiana section each year presents an award to the two senior students most active in the student chapter of ASCE.

Leroy D. Graves Academic Improvement Award. Presented to a senior civil engineering student for significant development in academic performance.

The Sydney Kelsey Outstanding Scholar Award. Presented to a senior civil engineering student for excellence and creativity in academics.

The Kenneth R. Lauer Award. Presented to a senior civil engineering student for leadership, integrity, and service to fellow students and community as determined by that student's classmates.

James A. McCarthy Scholarship in Civil Engineering. Presented to a junior civil engineering student for outstanding academic and professional excellence.

The Walter L. Shilts Award for Undergraduate Achievement. Presented to a senior civil engineering student who has best fulfilled his or her potential as a student through hard work and dedication to obtaining the best possible education.

The Rev. Alexander Kirsch, CSC, Award. To the senior receiving a degree in geological sciences who has evidenced high qualities of personal character, scholarship, and leadership.

Dr. Raymond C. Gutschick Award. To the graduating senior who has demonstrated the most promise in geological research as evidenced by a successful research project.

COMPUTER SCIENCE AND ENGINEERING

Outstanding Computer Engineering Award. To the graduating senior in computer engineering who has evidenced high qualities of personal character, scholarship, and leadership.

Outstanding Computer Science Award. To the graduating senior in computer science who has evidenced high qualities of personal character, scholarship, and leadership.

ELECTRICAL ENGINEERING

The Basil R. Myers Award. For achievement in electrical engineering, recalling circuit theory, the English language, and St. George Day at Notre Dame.

The James L. Massey Award. For achievement in electrical engineering, recalling communication theory, undergraduate teaching, and the Binary Examination.

The Arthur J. Quigley Award. For achievement in electrical engineering, recalling electronics, service to our neighbor, and the little man in the circuit.

The Lawrence F. Stauder Award. For achievement in electrical engineering, recalling electrical power, the IEEE Student Branch, and the Notre Dame alumni.

The IEC William L. Everitt Award. For achievement in electrical engineering, computer engineering, or computer science, with an interest in the area of communications.

Student Organizations and Activities

THE NOTRE DAME TECHNICAL REVIEW

Since 1949, the students of the College of Engineering have been publishing the *Notre Dame Technical Review* at least three times each school year. It provides the opportunity for creative writing and for the management of a technical periodical. All the students support this activity and encourage wide participation by purchasing an annual subscription at a nominal rate.

HONOR SOCIETIES

TAU BETA PI

The Indiana Gamma Chapter of Tau Beta Pi was installed at Notre Dame in 1960 to foster a spirit of liberal culture in the engineering college and to recognize those who have conferred honor upon Notre Dame by distinguished scholarship and exemplary character as undergraduates in engineering or by their attainment as alumni in the field of engineering. Seniors and juniors in the top fifth and top eighth of their respective classes are eligible for election under rigid standards of scholarship, character, leadership, and service.

ETA KAPPA NU

In 1962, the Delta Sigma Chapter of Eta Kappa Nu, the national honor society for electrical engineers, was installed at Notre Dame. Juniors, seniors, and alumni eligible for membership because of scholastic attainment, leadership, and quality of character may be identified with this association and may avail themselves of the privileges it affords.

PI TAU SIGMA

In 1963, the Sigma Beta Chapter of Pi Tau Sigma, the national honor society for mechanical engineers, was installed at Notre Dame. Juniors, seniors, and alumni qualify for membership by scholastic attainment, leadership, quality of character, and a demonstration of probable future success in engineering.

CHI EPSILON

The Notre Dame Chapter of Chi Epsilon, the national honor society for civil engineers, was installed at Notre Dame in 1966. The purpose of Chi Epsilon is to give recognition to those civil engineering students, faculty, and alumni who have displayed superior qualities in scholarship, character, practicality, and sociability during their professional careers.

SIGMA GAMMA TAU

The Notre Dame Chapter of the national honor society for Aerospace Engineering was installed in 1981. This organization recognizes and honors those individuals in the field of aeronautics and astronautics who have distinguished themselves through scholarship, integrity, service, and outstanding achievement. Senior students who rank in the top third of their aerospace engineering class are eligible for admission.

UPSILON PI EPSILON

In 2004, the Notre Dame chapter of Upsilon Pi Epsilon was installed. This society was founded to recognize the academic excellence of students in the computing and information disciplines. At Notre Dame, outstanding juniors, seniors, and graduate students from the Computer Engineering and Science Department are honored each year with induction.

PROFESSIONAL SOCIETIES

The several departments of the college actively support student chapters of their respective professional societies; these are:

- The American Institute of Chemical Engineers (AIChE)
- The American Society of Civil Engineers (ASCE)
- The American Society of Mechanical Engineers (ASME)
- The American Institute of Aeronautics and Astronautics (AIAA)
- The Institute of Electrical and Electronic Engineers (IEEE)
- The National Society of Black Engineers (NSBE)
- The Society of Professional Hispanic Engineers (SPHE)
- The Society of Women Engineers (SWE)
- The Association of Computer Machinery (ACM)

The Joint Engineering Council (JEC), a student organization with representation from the student chapters of the professional and honor societies, serves to coordinate the activities of those chapters and encourages the pursuit of a professional attitude in the student body of the College of Engineering. The JEC serves to sponsor all those activities which are of general interest to the engineering student body.

Aerospace and Mechanical Engineering

Chair:

Stephen M. Batill

H. Clifford and Evelyn A. Brosey Professor of Mechanical Engineering:

Frank P. Incropera

Viola D. Hank Professor of Mechanical Engineering:

Hafiz M. Atassi

Clark Professor:

Thomas C. Corke

Professors:

Stephen M. Batill; Raymond M. Brach (emeritus); Roy D. Crowninshield (adjunct), Patrick F. Dunn; Nai-Chien Huang (emeritus); Edward W. Jerger (emeritus); Eric J. Jumper; Francis M. Kobayashi (emeritus); Lawrence H. N. Lee (emeritus); James J. Mason (adjunct); Stuart T. McComas (emeritus); Thomas J. Mueller (emeritus); Victor W. Nee (emeritus); Robert C. Nelson; Timothy C. Ovaert; Samuel Paolucci; Francis H. Raven (emeritus); John E. Renaud; Mihir Sen; Steven B. Skaar; Albin A. Szewczyk (emeritus); Flint O. Thomas; Kwang-tzu Yang (emeritus)

Associate Professors:

Edmundo Corona; J. William Goodwine Jr.; Robert A. Howland; John W. Lucey (emeritus); Glen L. Niebur; Joseph M. Powers; Steven R. Schmid; Michael M. Stanisic; Meng Wang

Assistant Professors:

Alan P. Bowling; James E. Houghton (emeritus); Katherine Wenjun Liu; Scott C. Morris; Ryan K. Roeder; Vikas Tomar; Diane Wagner

Associate Professional Specialist:

Rodney L. McClain; John Ott; Richard B. Strebinger

Program of Studies. The Department of Aerospace and Mechanical Engineering offers programs of study which lead to degrees of bachelor of science and master of science in aerospace engineering and mechanical engineering, respectively; master of engineering for mechanical engineers; and doctor of philosophy.

Program in Aerospace Engineering. This program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology. The aerospace program is designed to prepare those students interested in the design and operation of aircraft and space vehicles for entrance into a professional career. The curriculum, based on a solid foundation in mathematics, physics, chemistry and the engineering sciences, places emphasis on such basic aerospace disciplines as aerodynamics and fluid mechanics, orbital mechanics, and solid and structural mechanics, as well as such integrating disciplines as design, experimental methods and systems analysis. Technical specializations in the junior and senior year enable students to emphasize specific technical areas, including design

and manufacturing, thermal and fluid sciences, bio-engineering, solid mechanics, materials, control and mechanical systems and computational engineering.

The aerospace engineering program uses laboratories in Fitzpatrick Hall of Engineering and in the Hessert Laboratory for Aerospace Research. The Hessert laboratories contain superior facilities for instruction and research.

Students are encouraged to participate in the activities of the student chapter of the American Institute of Aeronautics and Astronautics and to enter the national student paper competition conducted by the parent institute. Outstanding achievement in the aerospace program is recognized by membership in Sigma Gamma Tau, the national aerospace honor society.

Further details about the standard aerospace program, the aerospace London Program and electives can be found on the World Wide Web at ame.nd.edu. These details include the program of study requirements for graduating classes prior to the Class of 2009; the program below pertains only to the Class of 2009 and beyond.

Aerospace Engineering Program Objectives. The program objectives are to prepare students for entrance into professional careers in the aerospace industry, government, research laboratories, the engineering discipline in general, and graduate school. This preparation builds on the personal interaction and communication skills that are already part of the overall Notre Dame liberal arts experience, and is further based on a solid foundation in mathematics, physics, chemistry and the engineering sciences. The curriculum places emphasis on basic topics in aerospace engineering sciences, design and experimental methods. Some specialization in specific areas may be obtained from technical specializations taken in the junior and senior years. The design content of the curriculum and the senior design experience emphasize overall system performance.

More specifically, the academic preparation has, as its objective, graduates who:

- Are familiar with multiple fields and types of professional engineering practice—the kinds of things aerospace engineers do, the kinds of problems they solve, especially a breadth of familiarity with aerospace systems and designs such as those that are enabled by embedded computing.
- Understand key scientific first principles of aerospace engineering, and are competent deriving, and using, algebraic relationships, as well as ordinary or partial differential equations for modeling or simulation of discrete and continuous aerospace systems, including aircraft and spacecraft systems by way of analytical and numerical treatment.
- Are aware of the essential function of common sensor types, and are experienced in acquiring digital data from a range of transducers; are able to compare, and gain insight from, a mix of analytical, numerical and experimental results.

- Have a pragmatic outlook toward design and are able to factor into design a range of knowledge involving aerodynamics, structures, stability and control, materials, manufacturing processes, and tabulated data, as well as analytical, numerical, and experimental results; and experienced with the integration of digital processing in design.

- Are capable of programming computers, including microprocessors, using C, C++, Matlab, and/or other similar programming languages; and are able to use CAD and other prepared software.

- Are able to communicate well, both orally and in writing, and function effectively in design groups, both in leadership and support roles.

- Have an understanding of the impact of technology on the welfare of individuals and groups; and consistent with the perspective of Catholic character, broadly defined, are able to apply high ethical and professional standards.

First Year of Studies

First-year students intending to major in aerospace engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Sophomore Year

First Semester

MATH 20550. Calculus III	3.5
PHYS 10320. General Physics II	4
AME 20221. Mechanics I	3
AME 20211. Introduction to Aeronautics	3
AME 20214. Introduction to Engineering Computing	1
Arts and Letters course*	3
	17.5

Second Semester

MATH 20580. Introduction to Linear Algebra and Differential Equations	3.5
AME 20222. Mechanics II	3
AME 20241. Solid Mechanics	4
AME 20231. Thermodynamics	3
AME 20213. Measurements and Data Analysis or AME 30361. Computer Aided Design and Manufacturing	3
	16.5

Junior Year

First Semester

AME 30314. Differential Equations, Vibrations and Controls I	3
AME 20213. Measurements and Data Analysis or AME 30361. Computer Aided Design and Manufacturing	3
AME 30341. Aerospace Structures	3
AME 30331. Fluid Mechanics	3
Arts and Letters course+	3
	15

AEROSPACE AND MECHANICAL ENGINEERING

Second Semester

AME 30315. Differential Equations, Vibrations and Controls II	3
AME 30333. Aerodynamics Laboratory	4
AME 30332. Compressible Aerodynamics	3
AME 30334. Heat Transfer	3
Arts and Letters course+	3
	<hr/>
	16

Senior Year*First Semester*

AME 40461. Flight Mechanics and Introduction to Design	3
AME 40451. Aerospace Dynamics	3
AME 40431. Gas Turbines and Propulsion	3
Technical Specialization*	3
Arts and Letters course+	3
	<hr/>
	15

Second Semester

AME 30381. Orbital and Space Dynamics	3
AME 40462. Aerospace Design	4
Technical Specialization/Prof. Development	3
Technical Specialization	3
Arts and Letters course+	3
	<hr/>
	16

Total for the four years: 130 semester hours.

*A list of approved AME and technical specialization courses is available on the department website.

+ See "Arts and Letters Core" on the first page of the College of Engineering section. A list of approved AME and technical specialization courses is available on the department website.

The most current information for the degree program course requirements is available on the department website: (ame.nd.edu).

The Program in Mechanical Engineering. This program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology. The department offers a well-rounded program at the bachelor's level. The curriculum is built on a sound foundation in mathematics, physics, chemistry and the engineering sciences. In the undergraduate curriculum the student may obtain, by suitable selection of elective courses, a program suited to enable him or her to specialize in a given sequence or to prepare as a generalist. Elective course sequences are available in aerospace, design and manufacturing, thermal and fluid sciences, bioengineering, solid mechanics, materials, control and mechanical systems, and computational engineering.

To prepare for today's changing technological world, the program requires use of a computer in many of its courses.

Finally, for professional growth during formative years as engineers in training, students are encouraged to participate in the activities of the student chapter of the American Society of Mechanical Engineers. Outstanding achievement in the

mechanical engineering program is recognized by membership in Pi Tau Sigma, the national mechanical engineering honor society.

Further details about the mechanical engineering program, the London Program and electives can be found on the World Wide Web at ame.nd.edu. These details include the program of study requirements for graduating classes prior to the Class of 2009; the program below pertains only to the Class of 2009 and beyond.

Mechanical Engineering Program Objectives. The general program objectives are to prepare students for entrance into professional careers in industry, government, research laboratories, the engineering discipline in general, and graduate school. This preparation builds on the interaction and communication skills that are already part of the overall Notre Dame liberal arts experience, and is further based on a solid foundation in mathematics, physics, chemistry, and the engineering sciences. The curriculum places emphasis on basic topics in mechanical-engineering sciences, design, and experimental methods. Some specialization in specific areas may be obtained from technical electives taken in the junior and senior years.

More specifically, the academic preparation has as its objective graduates who:

- Are familiar with multiple fields and types of professional practice, the kinds of things mechanical engineers do, and the kinds of problems they solve, especially a breadth of familiarity with newer systems and designs such as those that are enabled by embedded computing.
- Understand key scientific first principles of mechanical engineering, and are competent deriving, and using algebraic relationships, as well as ordinary or partial differential equations for modeling or simulation of discrete and continuous mechanical systems by way of analytical and numerical treatment.
- Are aware of essential function of common sensor types and are experienced in acquiring digital data from a range of transducers; are able to compare, and gain insight from, a mix of analytical, numerical, and experimental results.
- Have a pragmatic outlook toward design and are able to factor into design a range of knowledge involving materials, manufacturing processes, and tabulated data, as well as analytical, numerical, and experimental results; are experienced with the integration of digital processing in design.
- Are capable of programming computers, including microprocessors, using C, C++, Matlab, and/or other similar programming languages; able also to use CAD and other prepared software.
- Are able to communicate well, both orally and in writing, and function effectively in design groups in both leadership and support roles.
- Have an understanding of the impact of technology on the welfare of individuals and groups; and

consistent with the perspective of Catholic character, broadly defined, are able to apply high ethical and professional standards.

First Year of Studies

First-year students intending to major in mechanical engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Sophomore Year*First Semester*

MATH 20550. Calculus III	3.5
PHYS 10320. General Physics II	4

*A list of approved AME and technical specialization courses is available on the department website.

* See "Arts and Letters Core" on the first page of the College of Engineering section. A list of approved AME and general technical electives is available on the department website.

The most current information for the degree program course requirements is available on the department website: (ame.nd.edu).

Total for the four years: 130 semester hours.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Aerospace and Mechanical Engineering](#) heading.

A number of introductory graduate-level courses, described in the *Graduate School Bulletin of Information* and on the department website, are open to advanced undergraduates, with the permission of the department chair, to satisfy upper-level electives.

Chemical and Biomolecular Engineering

Chair:

Mark J. McCready

Schmitt Professor of Chemical Engineering

Paul W. Bohn

Bayer Professor of Chemical Engineering:

Hsueh-Chia Chang

Keating-Crawford Professor of Chemical Engineering:

Joan F. Brennecke

Professors:

Jeffrey C. Kantor; David T. Leighton Jr.; Edward J. Maginn; Mark J. McCready; Paul J. McGinn; Albert E. Miller; Roger A. Schmitz (emeritus); Mark A. Stadtherr; William C. Strieder; Eduardo E. Wolf

Associate Professors:

Davide A. Hill; William F. Schneider

Assistant Professors:

Andre F. Palmer; Y. Elaine Zhu

Research Professors:

Alexander S. Mukasyan; Eugene S. Smotkin

Assistant Research Professor:

Zilin Chen

Professional Specialist:

Salma R. Saddawi

Program of Studies. The Department of Chemical and Biomolecular Engineering offers programs of study leading to the degrees of bachelor of science in chemical engineering, master of science in chemical engineering, and doctor of philosophy. The program leading to the bachelor of science degree is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

The traditional role of chemical engineers of providing the principal technical guidance for the chemical and petroleum industries has been greatly augmented in recent years. Chemical engineers now direct the advancement and utilization of technology for the food processing and consumer products industries and are playing increasing roles in the manufacture of the highest density computer chips and in the invention of advanced drug delivery systems. In addition to creating remediation strategies, chemical engineers contribute to the prevention of deleterious impact of society on the environment by the development of new "green" process technologies that eliminate the use of dangerous solvents. They are the leaders in the field of "sustainability" which is the implementation of energy sources and raw material supplies that can sustain humankind indefinitely. In all of these areas, complex processes involving chemical changes of matter occur and, as such, sound training in chemistry, physics, mathematics, and allied applied sciences are prerequisites to resolving the challenges posed by these complex systems.

The undergraduate program at Notre Dame is notable for its combination of a strong fundamental focus in chemical engineering courses with a broad humanities and science education provided in courses other than chemical engineering. The science and humanities courses prepare students both for study of chemical engineering and to understand the complex scientific, social, and moral issues of the world today. Our intention in emphasizing fundamentals is to develop students' intellect and to equip them with enduring knowledge in chemical engineering and related fields. Thus, our undergraduate chemical engineering curriculum provides students with not only a preparation for a career as chemical engineer, but for a lifetime of learning and a lifelong career in areas that may include law, medicine, or business.

University of Notre Dame Undergraduate Program

Goals: Students who have graduated in Chemical Engineering at Notre Dame have pursued, successfully, a wide range of career paths. The faculty believes that this has resulted from the interests of students who enter our program and is facilitated by our emphasis on fundamental aspects of chemical engineering. Thus consistent with the mission of the University, the Department of Chemical and Biomolecular Engineering program seeks to develop students who:

1. Pursue knowledge and commensurate understanding and critically evaluate the consequences of these.

2. Communicate clearly and effectively.
3. Demonstrate proficiency in the art and science of chemical engineering with a strong understanding of the fundamental principles of pure and engineering sciences on which chemical engineering practice is based.
4. Appreciate their social and moral responsibilities both within their careers in engineering and through service in their communities.
5. Understand how chemical engineering connects with other major disciplines to produce the goods and services needed by society.

Within the chemical engineering degree program, students can use their electives to construct course sequences in materials, environmental chemical engineering and biomolecular engineering. A suggested course sequence for students interested in going to medical school is also available.

More than one-third of the chemical engineering undergraduates participate in research activities with faculty and graduate students at some time in their careers in such areas as advanced materials, ionic liquids as environmentally benign solvents, biomaterials, microfluidic devices, catalysis, fuel cells, and drug delivery techniques.

Further details about the chemical engineering program may be found on the World Wide Web at nd.edu/~chegdept. These details include the program of study requirements for graduating classes prior to the Class of 2007. The program below pertains only to the Class of 2007 and beyond.

FIRST YEAR OF STUDIES

First-year students intending to major in chemical engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Sophomore Year

Total for the four years: 132 semester hours.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Chemical and Biomolecular Engineering](#) heading.

The following graduate courses, described in the *Graduate School Bulletin of Information*, are also open to advanced undergraduates.

60542. Mathematical Methods Engineering I
50510. Advanced Chemical Engineering Thermodynamics
30355. Transport Phenomena I
40445. Advanced Chemical Reaction Engineering

Civil Engineering and Geological Sciences

Massman Chair:

Peter C. Burns

Robert M. Moran Professor of Civil Engineering:

Ahsan Kareem

Professors:

Peter C. Burns; Jeremy B. Fein; Robert L. Irvine (emeritus); Sydney Kelsey (emeritus); Kenneth R. Lauer (emeritus); Patricia A. Maurice; Stephen E. Silliman; James I. Taylor (emeritus)

Associate Professors:

Lloyd H. Ketchum Jr. (emeritus); David J. Kirchner; Yahya C. Kurama; Jerry J. Marley (emeritus); Clive R. Neal; J. Keith Rigby Jr.; Rev. James A. Rigert, CSC (emeritus); Joannes J.A. Westerink

Assistant Professors:

Tracy L. Kijewski-Correa; Robert Nerenberg; Susan E.H. Sakimoto; Lynn A. Salvati; Jeffrey W. Talley; Jennifer R. Woertz

Vision and Mission. The Department of Civil Engineering and Geological Sciences (CE/GEOS) aspires to be preeminent nationwide in our selected research and educational focus areas, to be ranked in the top quartile of civil engineering and environmental geoscience programs in the United States, to have global reach and impact in education and research, and to promote positive contributions to society in the Catholic tradition. CE/GEOS strives to provide a stimulating and unique interdisciplinary environment for learning and research by blending traditional disciplines of engineering and science. CE/GEOS offers outstanding educational programs for those aspiring to contribute as leaders in the fields of Civil Engineering, Environmental Engineering, and Environmental Geosciences. CE/GEOS's educational objective is to provide students with the knowledge, skills, vision and ethical basis to contribute as leaders in design, construction and protection of our civil infrastructure, and understanding, management and remediation of the environment.

Program of Studies. The Department of Civil Engineering and Geological Sciences offers programs of study leading to the degrees bachelor of science in civil engineering, bachelor of science in environmental geosciences, master of science in civil engineering, master of science in geological sciences, master of science in environmental engineering, master of science in bioengineering, and doctor of philosophy.

Program in Civil Engineering. This program is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology. The department presents a well-rounded program for the bachelor's degree with the first two years devoted primarily to the basic principles of science and engineering. The third and fourth years are devoted to courses in the

basic areas of civil engineering—structural analysis and design, hydraulics and hydrology, water supply and wastewater disposal, materials of construction, geotechnical engineering, and transportation engineering. A student may emphasize a particular area of interest by selecting either the water resource/environmental sequence or the structures sequence and by the careful use of elective courses. Civil engineering electives in the senior year may be regular courses or individualized directed study or research courses.

Most courses in the program are prescribed for all civil engineering students so that each student receives a firm foundation in the many basic disciplines comprising the broad field of civil engineering. This is especially desirable, for often in the course of professional development the civil engineer is asked to coordinate the planning, design, and construction of highly complex systems and must utilize many or all of these disciplines.

The department has excellent facilities for research available to both graduate and undergraduate students. These facilities include a structural dynamics/structural control laboratory; a materials testing and structural research laboratory; a groundwater hydrology field laboratory; and a number of analytical laboratories for water, wastewater and hazardous waste treatment.

The professional aspects of civil engineering are emphasized and promoted by the activities of a student chapter of the American Society of Civil Engineers, in which all students of the department are eligible to participate.

Further details about the civil engineering and environmental geosciences programs may be found on the World Wide Web at nd.edu/~cegeos.

First Year of Studies. First-year students intending to major in civil engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Total degree required credits 129

*See "Arts and Letters Core" on the first page of the College of Engineering section.

**Note: Beginning in the spring semester of the junior year the student chooses to follow option A, the structural engineering track or option B, the environmental engineering track. Each track is defined by the three specialization courses shown. Note, that by choice of electives a student may complete both tracks.

The following graduate courses*, described in the Graduate School Bulletin of Information, are also open to advanced undergraduates with permission of the department chair.

60130. Finite Elements in Engineering
60210. Advanced Geostatistics
60250. Advanced Structural Dynamics
60330. Environmental Biotechnology
60346. Design of Biological Waste Treatment Systems
60450. Advanced Hydraulics
70290. Behavior and Design of Earthquake-Resistant Structures

* Courses having a 40000/60000 option will require additional work at the 60000 level, i.e., semester project or paper.

ENVIRONMENTAL GEOSCIENCES

This degree is administered by the College of Engineering.

Program in Environmental Geosciences. The Environmental Geosciences program at Notre Dame was founded by the Department of Civil Engineering and Geological Sciences to provide students with a quantitative preparation for professional careers or continued higher education in the disciplines of earth and environmental science. The program provides a foundation in the physical sciences, with emphasis on processes that occur near or at the surface of the Earth, and the impact of human activity on such processes. Students explore the geochemical, mineralogical, and hydrological properties of Earth's crust, and develop an understanding of the interplay of natural processes such as mineral-water-rock-bacteria interactions, with anthropogenic issues such as transport of toxic heavy metals and safe disposal of nuclear waste.

The environmental geosciences program combines classroom, laboratory, and field studies. Students are encouraged to participate in a semester study abroad, such as the Australia program (during the fall semester, junior year), which provides additional opportunity for field-based studies. All students are encouraged to conduct independent research under faculty supervision during their senior year.

An undergraduate major in environmental geosciences prepares a student for graduate study (MS, PhD) in many aspects of geology and environmental sciences, as well as for admission to a variety of professional schools. In addition, this program meets the criteria for graduates to become state-registered geologists in those states requiring such certification. Graduates with a BS degree may enter careers in diverse areas such as the National Park Service, industry, environmental consulting, and government research laboratories. An environmental geosciences degree is also ideal background for those planning to teach in secondary schools at all levels. Further details can be found at www.nd.edu/~envgeo.

The flexibility of our undergraduate program allows engineering and science students to major in the environmental geosciences. Below you will find an example of the curriculum that can be followed by a student who commits to the College of Engineering. This is followed by an example of how a student committed to the College of Science may also take advantage of this major.

First Year

EG 10111. Intro. to Engineering Systems I ¹	3

15

For students in the College of Science wishing to major in the environmental geosciences, the curriculum is very similar with the following differences (underlined).

First Year	First Semester	
ENVG 101106. Physical Geology + lab	4	
CHEM 10113. General Chemistry I ⁷	4	
MATH 10550. Calculus I ³	4	
Arts and Letters course ⁴	3	
FYC 13100 ⁴	3	
Physical Education/ROTC	0	
	—	18
Second Semester		
ENVG 10100. Environmental Geosciences	3	
CHEM 10114. General Chemistry II ⁷	3	
MATH 10560. Calculus II ³	4	
PHYS 10310. Physics I	4	
Arts and Letters course ⁴	3	
Physical Education/ROTC	0	
	—	17
Sophomore Year	First Semester	
Arts and Letters course ⁴	3	
ENVG 20200. Mineralogy and Optical Min.	4	
PHYS 10320. Physics II	4	
MATH 22550. Calculus III	3.5	
	—	14.5

From the spring semester, sophomore year, the curriculum is the same as that listed above for engineering students, except a technical elective is taken in place of an arts and letters course during the fall semester, senior year. The total number of semester credit hours is the same.

Minor in Environmental Geosciences⁴

A minor in environmental geosciences requires the completion of 23 credit hours in geological sciences as follows.

ENVG 20110. Physical Geology + lab	4
ENVG 20120. Historical Geology	4
ENVG 20200. Mineralogy	4
ENVG 45200. Field Trip	1
<i>Total.</i>	13

One of:

ENVG 20210. Ig. and Met. Petrology	4
ENVG 30400. Str. Geology and Rock Mech.	4
ENVG 30230. Sediment. and Stratigraphy	4
<i>Total.</i>	4

Two of:

ENVG 30300. Surficial Proc. Surf. Hydrol.	3
ENVG 40300. Geochemistry	3
ENVG 40310. Env. Imp. Res. Utilization	3
ENVG /SC 40380. Paleontology	3
ENVG 40340. Water-Rock Interaction	3
ENVG 40360. Geomicrobiology	3
<i>Total:</i>	6

Total for the Minor: 23 semester hours.

Notes:

- EG 10111 and EG 10112 are acceptable credits for the environmental geosciences degree but are not required courses.
- CHEM 10113, or 10117 may be substituted for CHEM 10121; CHEM 10114 or 10118 may be substituted for CHEM 10122. Other substitutions will be considered on a case-by-case basis.
- Under special circumstances, MATH 10240 maybe an acceptable substitute for MATH 10550, and the sequence MATH 10350-10360 may be considered as an acceptable substitute for MATH 10550-10560.
- University requirements include:

FYC	3 hours
*Theology	6 hours
*Philosophy	6 hours
*History	3 hours
*Social Science	3 hours
*Fine Arts or Literature	3 hours

* one of these must be a University Seminar.

- Technical electives are typically junior and senior level courses in science or engineering that have been approved by the chair of Civil Engineering and Geological Sciences. Students must ensure they have met prerequisite requirements for technical elective courses. Courses that may be used as technical electives include:

ENVG 40380. Paleontology
 ENVG 48600. Undergraduate Research
 CHEM 20223. Elem. Organic Chem. I
 CHEM 20224. Elem. Organic Chem. II
 CHEM 20247. Organic Chemistry + Lab
 CHEM 20248. Organic Chemistry + Lab
 CHEM 20243. Inorganic Chemistry
 CHEM 30321. Physical Chemistry
 CHEM 30322. Physical Chemistry II
 CHEM 30333. Analytical Chemistry + Lab
 CHEM 30341. Fundamentals of Biochemistry
 CHEM 40420. Principles of Biochemistry
 BIOS 10107. Biological Sciences I
 BIOS 10108. Biological Sciences II
 BIOS 20201. General Biology I
 BIOS 20202. General Biology II
 BIOS 30401. Principles of Microbiology
 AME 20221. Mechanics I
 AME 20222. Mechanics II
 AME 30331. Fluid Mechanics
 CE 40450. Hydraulics
 CE 40340. Waste Treatment
 MATH 30650. Differential Equations

- If ENVG /SC 20110 is a required course for a science major, it may also be counted for the minor in environmental geosciences.

- CHEM 10117, or 10121 may be substituted for CHEM 10113; CHEM 10118 or 10122 may be substituted for CHEM 10114. Other substitutions will be considered on a case-by-case basis.

SUMMARY OF REQUIREMENTS FOR GRADUATION FOR ENVIRONMENTAL GEOSCIENCES MAJOR	
	Credits*
Environmental Geosciences	44 (47)
Chemistry	7
Mathematics	18
Physics	8
Civil Engineering	10 (4)

Program of Studies. The Department of Computer Science and Engineering offers programs of study that lead to the degrees of bachelor of science in computer science and bachelor of science in computer engineering. The program in computer engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology. The department also offers programs that lead to a master of science in computer science and engineering, and a PhD.

Educational Goals. The goals of the programs in computer science and computer engineering are (1) to prepare all students for careers in the public or private sector; (2) to prepare outstanding students for graduate study; (3) to develop lifelong learning skills in all students; (4) to provide comprehensive education in computer science, including theoretical foundations, software and hardware systems, and applications; and (5) to ensure significant design experience including working in teams.

Program Outcomes. At the time of completion of the undergraduate program, all graduates should possess (1) the ability to specify, design, test, and document software; (2) an understanding of current computer software and hardware technology; (3) an understanding of science, engineering, and mathematics; (4) a comprehensive general education; (5) the ability to continue learning in response to professional needs as well as personal desire for self-improvement; and (6) an understanding of personal and professional responsibility to society.

Programs. Programs in the Department of Computer Science and Engineering follow the four-year curricula listed below. These include required and elective courses in the basic, pure, and applied sciences, as well as the humanities, electrical engineering, computer science, and computer engineering. Emphasis is on developing a mastery of the key principles underlying the organization, operation, and application of modern computers to real problems, with a solid grounding in math and science to permit a quantitative analysis of such solutions. In addition, central to both programs is the development of the ability to function, both independently and in multidisciplinary teams, and to be prepared for continued change in future computing technology and what effects it will have on all aspects of society. Opportunities for specialization in several professional computer disciplines are available. Students are individually assisted and advised in their choices of elective courses.

Department facilities include a laboratory to support instruction in System Administration and Network Management courses, and research facilities in distributive computing and computational techniques that are used by undergraduates as well. Moreover, the department uses UNIX workstations, which support modern computer-aided design tools for the design of computer systems and integrated circuits (VLSI) in many courses. Also available is a laboratory for the fabrication of integrated circuits designed by students in the "bits-to-chips" program.

Further information about computer science and computer engineering programs may be found on the World Wide Web at cse.nd.edu.

PROGRAM IN COMPUTER SCIENCE

The Program in Computer Science focuses on the application of computers to real problems, especially in the design, development, and use of software. The program is designed to foster an understanding

ELECTRICAL ENGINEERING

of the key properties of algorithms (the mathematical statements of how problems are to be solved), and how to recognize and design good algorithms to solve real problems in efficient fashions. The program also includes developing the ability to engineer large, efficient, portable, and scalable pieces of software that implement good algorithms in ways that are useful to the end users, and to do so in ways that use modern software development tools and techniques.

PROGRAM IN COMPUTER ENGINEERING

The Program in Computer Engineering focuses on understanding the basic nature of the electronic devices that go into the creation of modern computers and on the detailed architecture and organization of such systems, both within the central processing unit and in how larger systems are assembled. Modern design tools and techniques are introduced very early in the program and used throughout to design, analyze, and prototype real digital computing systems. All computer engineering students are required to enroll in at least one of a prescribed set of design courses before graduation.

FIRST YEAR OF STUDIES

First-year students intending to major in computer engineering or in computer science when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

COMPUTER ENGINEERING PROGRAM

Sophomore Year

<i>First Semester</i>	
CSE 20211. Fundamentals of Computing I	4
CSE 20210. Discrete Mathematics	3

* See "Arts and Letters Core" on the first page of the College of Engineering section.

* These courses must be selected from a list approved by the department. For computer engineering, at least one must be a designated design course.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Computer Science and Engineering](#) heading.

Electrical Engineering

Chair:

Thomas E. Fuja
H.C. and E.A. Brosey Professor of Electrical Engineering;

Panagiotis J. Antsaklis
Leonard Bettex Chair of Electrical Engineering in Communications:

Daniel J. Costello Jr.
Frank M. Freimann Professor of Electrical Engineering:
Craig Lent

Frank M. Freimann Professor of Electrical Engineering (emeritus):

Ruey-wen Liu
Frank M. Freimann Professor of Electrical Engineering:
James L. Merz

Frank M. Freimann Professor of Engineering (emeritus):

Anthony N. Michel
Frank M. Freimann Professor of Electrical Engineering:
Wolfgang Porod

Frank M. Freimann Professor of Electrical Engineering:
Michael K. Sain

Professors:

Peter H. Bauer; Gary H. Bernstein; William B. Berry (emeritus); Oliver M. Collins; Thomas E. Fuja; Eugene W. Henry (emeritus); Yih-Fang Huang; Joseph C. Hogan (emeritus); Michael D. Lemmon; Christine M. Mazier; Alan C. Seabaugh; Gregory L. Snider; Robert L. Stevenson; John J. Uhran Jr.

ELECTRICAL ENGINEERING

Associate Professors:

Patrick J. Fay; Martin Haenggi; Douglas C. Hall; Thomas H. Kosel; Ken D. Sauer

Assistant Professors:

Debdeep Jena; John B. Kenney (adjunct); J. Nicholas Laneman; Paulo Tabuada; Haili (Grace) Xing

Research Associate Professor:

Alexander Mintairov; Alexei Orlov

Professional Specialist:

R. Michael Schafer

Concurrent Faculty:

Kevin Bowyer; Jay Brockman; Patrick Flynn; Sharon Hu

Statement of Goals and Objectives. The goals of the Department of Electrical Engineering's academic programs are to provide quality education and to foster leading-edge research as a means of training highly qualified engineers and leaders of tomorrow, in keeping with the mission of the University of Notre Dame. The educational objectives through which these goals are met are:

- A thorough foundation for each graduate in basic scientific and mathematical knowledge, and in skills appropriate for practice in the field of electrical engineering immediately after graduation and well into the future.
- Preparation of electrical engineering students for graduate and professional degree programs.
- Breadth in education preparing graduates for adaptation to varied career paths and changing professional landscapes.

Program of Studies. The Department of Electrical Engineering offers programs of study that lead to the degrees of bachelor of science and master of science in electrical engineering and doctor of philosophy. The program leading to the bachelor of science degree is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

Program in Electrical Engineering. The four-year curriculum, listed below, includes required and elective courses in the pure and applied sciences, the humanities, and electrical engineering. Emphasis is on the mastery of fundamental principles, with added depth and provision for specialization in the following major professional areas of communications, control systems, electronic circuits, design and analysis, microelectronics and integrated circuits, fabrication, photonics, and signal image processing. Students are individually assisted and advised in their choices of elective courses. Departmental facilities include laboratories for electronics, circuits, electrophysics, control systems, communications, integrated circuit fabrication, photonics, microwave circuit/device characterization, and digital signal/image processing. State-of-the-art computers are available for use in all classes.

Further details about the electrical engineering program may be found on the World Wide Web at www.nd.edu/~ee.

FIRST YEAR OF STUDIES

First-year students intending to major in electrical engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Total for four years: 129.5 semester hours.

* At least one electrical engineering elective must be chosen from EE 30342, 40446, 40455, 40458, and 40468.

* See "Arts and Letters Core" on the first page of the College of Engineering section or the Electrical Engineering website, or the Electrical Engineering website.

† The engineering science and technical elective course lists may be found on the Electrical Engineering website.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Electrical Engineering](#) heading.

The following graduate courses, described in the *Graduate School Bulletin of Information*, are also open to advanced undergraduates with permission of the department chair.

60550. Linear Systems
 60551. Mathematical Programming
 60553. Advanced Digital Communications
 60554. Computer Communication Networks
 60555. Multivariable Control Systems
 60556. Fundamentals of Semiconductor Physics
 60558. Microwave Circuit Design and Meas.
 60561. Multi-Dimensional Signal Processing
 60563. Random Vectors, Detection and Estimation
 60566. Solid State Devices
 60568. Photonics
 60573. Random Processes, Detection and Estimation
 60576. Microelectronic Materials
 60580. Nonlinear Control Systems
 60581. Digital Image Processing

Interdepartmental Engineering**COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Engineering \(Nondepartmental\)](#) heading.

COLLEGE OF ENGINEERING

Dual Degree Programs

**DUAL DEGREE PROGRAM
WITH THE COLLEGE OF ARTS AND
LETTERS***Coordinators:*

John J. Uhran Jr.
Sr. Associate Dean
College of Engineering

Ava Preacher
Assistant Dean
College of Arts and Letters

Program of Studies. The dual degree five-year program between the College of Arts and Letters and the College of Engineering enables the student to acquire degrees from both colleges—the bachelor of arts from the College of Arts and Letters and the bachelor of science degree in a chosen program of the College of Engineering.

This combination program, instituted in 1952, offers students the advantages of both a liberal and a technical education. The student completing one of these combination programs has a background in the humanities and social sciences as well as a degree from one of the programs offered by the College of Engineering. Because it is a demanding program, only those students who have both the aptitude and motivation necessary for the five-year program, should apply. Advisors for the program are available for consultation about the advisability of entering the program and about meeting the particular needs of each student pursuing this program. Qualified students are eligible to receive modest scholarship support from the John J. Reilly Endowed Scholarship program during their fifth year of study.

The decision to enter the program ordinarily should be made prior to beginning the sophomore year, although students can also enter the program at a later stage. There are three sets of requirements which must be met by the program: University requirements, Arts and Letters requirements and those of the College of Engineering, as the following table indicates.

University Requirements

Philosophy	6
Theology	6
Composition	3
University Seminar*	(3)

* The University Seminar may be selected from an appropriate history, social science, fine arts or literature course, or the first course in theology or philosophy.

* The University degree requirement is one course in literature or fine arts. The College of Arts and Letters requires a minimum of one course in each subject area, plus one additional course in history or social science.

COLLEGE OF ENGINEERING

** Two courses in the intermediate or advanced series complete the requirement. Beginning or elementary series require three semesters' work to fulfill the language requirement.

† Courses specified by the student's major engineering department. Minimum total for the five-year program to fulfill degree requirements in both colleges is 168 to 177 credit hours.

‡ Courses necessary to fulfill the requirements for a major in the student's major arts and letters department.

DUAL DEGREE PROGRAM WITH THE MENDOZA COLLEGE OF BUSINESS

Coordinators:

Mary Goss
Director of Admissions
Master of Business Administration Program

John J. Uhran Jr.
Senior Associate Dean
College of Engineering

Program of Studies. The dual degree five-year program between the Mendoza College of Business and the College of Engineering enables the student to earn the bachelor of science in a chosen field of the College of Engineering and the master of business administration.

This program, instituted in 1991, offers students the opportunity to better integrate study in engineering and in management. The student completing this program has a background in the management sciences, as well as the first professional degree in one of the fields of engineering. Because it is a demanding program, only those students of superior scholastic ability, who have both the aptitude and motivation necessary for the combined graduate and undergraduate program, should apply. Advisors for the program are available for consultation about the advisability of applying for the program and about meeting the particular needs of each student pursuing this program.

This program is open only to those currently enrolled Notre Dame students who have completed three years of a degree program in the College of Engineering. Students interested in making application for the MBA/engineering program should apply to the MBA program during their junior year. To facilitate the application process, students should take the Graduate Management Admission Test (GMAT) by December of their junior year.

An applicant who is not admitted to the dual degree engineering/MBA program continues in the undergraduate engineering program and completes his or her undergraduate engineering program in the usual four-year time frame.

As a general guide, it is expected that a student accepted to this program will take two courses required for the undergraduate degree during the summer session following the junior year. The following schedule of classes is an example of how a program might be accomplished.

Students in the five-year engineering/MBA program are also required to:

- (1) Complete a minimum of 48 MBA credit hours and maintain a GPA of at least 3.0 to successfully complete the program.
- (2) Take all MBA courses in their fourth year.
- (3) Maintain full-time student status (minimum course load of 12 credit hours per semester).

The MBA curriculum, divides each semester into two modules. In addition to the MBA courses noted below, students are expected to take three credits in engineering undergraduate courses in the fall semester of their senior year and six credits in engineering undergraduate courses in each of the subsequent three semesters.

First Year, Sophomore Year, Junior Year:

As outlined for individual engineering degree programs in this *Bulletin*. 98–104 credit hours.

Summer Session Following Junior Year:

Arts and Letters course*	3
Arts and Letters course*	3
Math Review Workshop*	0
Acc't Review Workshop*	0

Senior Year

First Semester, Module 1:

ACCT 60100. Financial Accounting	2
MBET 60340. Conceptual Foundation of Business Ethics	2
MGT 60210. Statistics	2
MGT 60300. Organizational Behavior	2

First Semester, Interterm Week:

Professional Development Seminar	1
Communications Seminar**	1

First Semester, Module 2:

ACCT 60200. Cost Accounting	2
FIN 60400. Finance I	2
FIN 60210. Microeconomic Analysis	2
MARK 60100. Marketing Management	2

Second Semester, Module 3:

FIN 70600. Finance II	2
FIN 60220. Macroeconomic Analysis	2
MGT 60900. Strategic Decision Making	2
Free Elective	2

Second Semester, Interterm Week:

Values in Decision Making	1
Required Course (TBD)	1

Second Semester, Module 4:

MGT 60400. Leadership and Teams	2
MGT 60700. Operations Management	2
Free Elective	2

Fifth Year

First Semester, Module 1:

MGT 60200. Problem Solving	2
Management Communication Elective I (Floating Optional Elective*)	2)

*Students have the option to take one additional two-credit-hour elective now or in any remaining module.

First Semester, Module 2:

Ethics Elective	2
Management Communication Elective (Floating Optional Elective)	2)

Second Semester, Module 3:

Free Elective	2
Free Elective (Floating Optional Elective)	2)

Second Semester, Interterm Week:

(OPTIONAL: Two one-credit-hour electives OR
Corporate Case Studies OR
Offshore Program: China or Brussels 2)

Second Semester, Module 4:

Free Elective	2
Free Elective (Floating Optional Elective)	2)

*See "Arts and Letters Core" on the first page of the *College of Engineering* section.

**Special one/two-week courses. All other MBA courses are seven weeks in length.

*Occurs during August Orientation

Total for both degrees: 126–132 undergraduate, 48 MBA

One MBA course will be accepted as an elective or technical elective in the College of Engineering Programs. No more than two MBA courses may be accepted toward an undergraduate degree from the College of Engineering. Students are advised to check specific program requirements.

College of Science

The University of Notre Dame awarded its first bachelor of science degree in 1865. Before that time, courses had been taught in mathematics (from 1842), in biology (from 1844), and in chemistry (from 1850). In 1867, a program in general science was formulated. Subsequently, specialized programs were added, leading to the degree of bachelor of science in botany and in zoology (both now covered by one degree in biological sciences), in environmental sciences, in biochemistry, in chemistry, in physics, in mathematics, and in preprofessional studies.

Departments of the College of Science

The Department of Biological Sciences, located in the Galvin Life Science Center, has well-equipped laboratories for undergraduate and graduate instruction and research. The facilities include controlled-environment rooms; an optics facility containing confocal microscopes, scanning and transmission electron microscopes; molecular analysis facilities for DNA sequencing, microarrays, cell sorting; and extensive data storage and retrieval equipment.

The Hank Center for Environmental Science provides more than 20,000 square feet of state-of-the-art research space for aquatic, terrestrial, and environmental studies that includes greenhouses, wet laboratories, and a field sample processing room,

The Freimann Life Science Center provides additional laboratories, vertebrate animal care, and associated specialized modern research facilities to serve the expanding needs of life science research at Notre Dame.

The Jordan Hall of Science contains 16 state-of-the-art laboratories for teaching undergraduate and graduate life science laboratory courses. In addition, the collections of museum specimens, including the Greene-Nieuwland Herbarium, are available for research and teaching, housed in superb museum facilities in Jordan Hall.

The Department of Chemistry and Biochemistry, located in Nieuwland Science Hall and Stepan Hall of Chemistry and Biochemistry, has laboratories devoted to research in several areas of chemistry: physical, inorganic, organic, and biochemistry. The laboratories are equipped with all necessary facilities for undergraduate students, graduate students, postdoctoral investigators, and faculty. Undergraduate researchers have access to seven high-field NMR spectrometers and three state-of-the-art single crystal X-ray diffractometers, plus many pieces of equipment such as infrared, ultraviolet, Raman, mass, photoelectron, and potentiostats; both analytical and preparative HPLC and GC equipment; and

special apparatus for studying mechanisms and rates of reactions, and synthesis and structural studies on biomolecules; and cell culture facilities. For theoretical work, two large parallel cluster supercomputers are available. The facilities of the Radiation Research Laboratory are used by some faculty of the chemistry department for research in physical chemistry.

Starting in the fall of 2006, the new Jordan Hall of Science will house all of the undergraduate teaching laboratories for chemistry and biochemistry. Included are spacious facilities for introductory and organic chemistry; analytical, physical, and inorganic chemistry; and biochemistry. The building will also contain a new NMR spectrometer for use in several of these areas. Also within Jordan Hall are two large lecture rooms specially designed for teaching introductory science courses, along with a 150-seat multimedia visualization center.

The Department of Mathematics is housed in Hayes-Healy Center/Hurley Hall, conveniently located in the central campus. The facilities for undergraduate and graduate instruction and research in mathematics include a first-rate research library; a faculty room; offices for the faculty, postdoctoral investigators, and other visitors, graduate students, and staff; several research seminar and conference rooms; and several large classrooms with state-of-the-art media capability.

The Department of Physics, located in Nieuwland Science Hall, has classrooms and laboratories for both undergraduate and graduate research. There are facilities for experimental work in astrophysics, biophysics, condensed-matter physics, elementary particle physics, and nuclear physics. There are three atomic spectroscopy laboratories, and some additional use is made of facilities at Argonne National Laboratory. Elementary particle experiments are done at the Stanford and Fermi national laboratories, and at CERN in Geneva, Switzerland. Detector development for the major accelerators is also being done in the department. The Nuclear Structure Laboratory has a tandem accelerator with a heavy ion capacity and all necessary detection equipment. A variety of solid state facilities are available for the study of metals, high T_c superconductors, and semiconductors. Off-site facilities at Argonne, the National High Magnetic Field Laboratory, and the National Institutes of Standards and Technology are also heavily used. Notre Dame is a partner in the Large Binocular Telescope project, now in construction. This will be one of the most capable facilities in the world for cutting-edge cosmology and astrophysics research. Research is conducted in many major areas of theoretical physics, including all of the above areas as well as statistical mechanics, field theory, general relativity, and astrophysics. The

department has a substantial machine shop and research library and a variety of staff technicians. Many faculty members and research groups have computing facilities, and all have access to the Office of Information Technologies' very large computers.

Starting in the fall of 2006, the new Jordan Hall of Science will house all of the undergraduate teaching laboratories for physics. Included are spacious facilities for introductory mechanics, electricity and magnetism, and modern physics. Within Jordan Hall are also a laser and optics lab and an advanced laboratory for physics majors. The building will also contain a rooftop observatory equipped with a dozen small telescopes for introductory astronomy courses, along with a separate dome housing a large, research-quality telescope for physics and astronomy students. Jordan Hall is also home to a 150-seat multimedia visualization center that serves as a planetarium for a variety of astronomy and astrophysics courses.

The Department of Preprofessional Studies is located in the Center for Health Advising in the Jordan Hall of Science. The new center will centralize the advising process for all University students interested in the health professions. It will also house the new Office for Undergraduate Research for the College of Science. All courses for students enrolled in the preprofessional program and collegiate sequence programs are provided by the other departments of the College of Science and the other colleges of the University.

Undergraduate Education

The aim of the program of undergraduate education in the College of Science is to produce intellectually able graduates who are grounded in the broad fundamental principles of the basic sciences, versed in the advanced concepts of their chosen scientific discipline and educated in the humanistic and social studies, including theology. Each graduate should be a good scientist in his or her own field, a fully developed person, aware of his or her responsibilities to society and prepared to participate fruitfully in the affairs of society.

Education in science at Notre Dame is a coordinated program involving the basic sciences, the chosen advanced science, and the humanistic and social studies, including theology and philosophy. In this education, the student should acquire a thorough, integrated, and broad understanding of the fundamental knowledge in his or her field, a competence in orderly analytical thinking, and the capacity to communicate ideas to others, orally and in writing. This system of education is so arranged to develop in each student the desire and habit of continuing to learn after graduation, advancing over the years to higher levels of professional and personal stature

and keeping abreast of the changing knowledge and problems of his or her profession.

Emphasis is placed on fundamental principles so that the students can develop abilities to apply these principles to the solution of new problems never before encountered by society, to the discovery of new things and to the invention of devices not learned about in books. Notre Dame stresses basic concepts useful in later learning rather than masses of particular facts and data that can better be found in books at the time of need.

Curricula and Degrees

The College of Science offers curricula leading to the degree of bachelor of science in each of five undergraduate departments:

Biological Sciences
Chemistry and Biochemistry
Mathematics
Physics
Preprofessional Studies

The following are degree programs offered by these departments:

Biochemistry
Biological Sciences
Chemistry
Chemistry combined with Business
Chemistry combined with Computing
Environmental Sciences
Mathematics
Mathematics (combined with other programs)
Physics
Physics (combined with other programs)
Preprofessional Studies
Science-Business
Science-Computing
Science-Education

These degree programs are described in detail in later sections of this *Bulletin*.

See also the bachelor of science degree programs offered by the College of Engineering:

Computer Science
Environmental Geosciences

Each College of Science student must enroll in the department of his or her major beginning with the sophomore year. However, students may change freely from one program to another within their departmental major and may also change departments at any time up through the seventh class day of their senior year.

The College of Science maintains a website at www.science.nd.edu. Further information related to programs offered by the college may be found at that location.

Listed below are the allowed options for students interested in double science majors, double majors between colleges, second majors in the College of

Science, and supplementary majors and minors in the College of Arts and Letters.

Students pursuing one of these combination programs must have superior scholastic ability and be formally accepted by the dean of both colleges involved. Approval will not be granted if there is substantial overlap between the two programs.

Note: Courses taken toward the completion of another major or supplementary major or minor or concentration requirement may not also be counted toward the student's other majors or minors or concentrations or University requirements.

Double Science Majors. In certain instances, students will have the option of pursuing majors in two departments of the College of Science. Details on the double science major option and lists of combinations that are normally approved are found under "Special Programs," later in this section of the *Bulletin*.

Dual Degree. Notre Dame students pursuing majors in two of the undergraduate colleges may qualify for a five-year dual-degree program.

The requirements for a dual degree generally are as follows: The student completes all of the university requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a dual degree in the two colleges. While the total number of hours required does depend on the two major programs, the minimum required total number of degree credits is set to be 30 degree credits beyond the college total for the college with the greatest required number of degree credits. For students completing a dual degree in the College of Science and the College of Arts and Letters, the minimum number is thus 154 hours.

Double Majors in Two Colleges. Qualified Notre Dame students pursuing majors in one of the other undergraduate colleges or schools may add another major in the College of Science. Additionally, qualified Notre Dame students pursuing a major in the College of Science may also add another major in one of the other undergraduate colleges or schools.

The requirements for a double major between colleges generally are as follows: The student completes all the University requirements, the requirements of his or her college or school, and the requirements of both majors. In general, a single course may not satisfy requirements for both majors.

Supplementary Majors and Minors. Qualified Notre Dame students pursuing majors in the College of Science may add a supplementary major or minor. Options include programs offered through the College of Arts and Letters and the Environmental Geosciences minor offered through the College of Engineering.

Not all supplementary major programs are open to science students; e.g., science students may not add the Arts and Letters Preprofessional Studies supplementary major nor the Computer Applications supplementary major.

Supplementary Majors, Minors, and Concentrations in the College of Science. In the College of Science, the term "second major" is used for a supplementary major. Three departments offer a second major program specifically for students in the other colleges: Mathematics as a second major, physics as a second major, and environmental sciences as a second major. For details, see the departmental sections of this *Bulletin*.

There are no minor programs in the College of Science.

Two departments in the College of Science offer concentration programs: Mathematics and Physics. For details, see the departmental sections of this *Bulletin*.

Combination Five-Year Program with the Mendoza College of Business. The College of Science and the Mendoza College of Business have established a competitive cooperative program in which a student may simultaneously earn a bachelor of science and a master of business administration degree. The program is structured so that the student who has completed the three years of a science bachelor's degree program, if accepted, completes the master of business administration and the bachelor of science in a major in the College of Science in a summer session and two subsequent academic years.

Students who wish to pursue this program should have a superior scholastic record in their major program and must make application to, and be accepted by, the MBA program.

The general sequence of courses in the five-year Science-MBA program may be found under "Dual Degree Program with the Mendoza College of Business," later in this section of the *Bulletin*.

University and College Requirements

A minimum of 124 credit hours is required for graduation from the College of Science. A minimum of 60 credit hours must be in science; however, each department may specify more than 60 credit hours for any of its programs.

All College of Science majors must fulfill University requirements, which include:

FYC 13100	3 hours
*Theology	6 hours
*Philosophy	6 hours
*History	3 hours
*Social Science	3 hours
*Fine Arts or Literature	3 hours
* <i>One of these courses must be a University seminar.</i>	

In addition, all College of Science majors must take courses in:

Chemistry (10113, 10114 or 10117, 10118 or 10181, 10182)

Mathematics (10350, 10360 or 10550, 10560 or 10850, 10860)

Physics (10310, 10320 or 10411, 10424 or 30210, 30220).

The appropriate sequence for a student depends on the student's major.

The College of Science requires language proficiency through intermediate level in one of the following languages: Arabic, Chinese, French, German, Greek, Irish, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Students may complete the language requirement by either completing a course taught at intermediate level or by demonstrating proficiency through placement examination. The college office maintains a list of language courses at intermediate level. (See the college website, www.science.nd.edu.)

Students with no previous background in a language should start with a beginning-level course. They take typically either nine credits over a three-semester period or two semesters of an intensive language sequence (8–10 credits total). Placement for students with some background in French, Spanish, Latin or German will be made only by examination (1) through the Advanced Placement test, (2) through the SAT II Subject test (French and Spanish), (3) through the International Baccalaureate Program or (4) through the Notre Dame departmental placement examinations. A maximum of six credits of placement can be granted for previous study in a given language. Thus, typically, College of Science students who have completed the language requirement will count from six to 10 credits in language toward the 124 credits required for graduation.

The College of Science will count a maximum of three credit hours from the following types of activity courses:

Band (Marching and Concert)

Orchestra

Chorale

Glee Club

Liturgical Choir

Folk Choir

Music Lessons and Ensembles

Dance

Debate

Social Concerns Seminar (including THEO 33936)

Science in the Classroom

No more than one credit hour total from any of these courses may be counted toward the degree per semester. Additionally, a maximum of six credit hours of upper-level (30000- or 40000-level) ROTC courses can be counted toward the 124-credit-hour requirement. These courses will be counted as free electives.

Not all science courses will count toward degree credit or science elective credit for science majors. The survey science courses offered as options for

non-science majors for their University science requirement will not count as a science elective or toward the minimum science credit hour requirement. Because of overlap in content with required courses for science majors, many of these courses will also not count toward the degree credit requirement (see "Science Degree Credit," later in this section of the *Bulletin*).

Some major programs have a science elective requirement. Recommended science electives for particular science majors are found on the college's website, www.science.nd.edu. For a course to be a science elective, it must meet the following rules:

- (1) It is offered through one of the departments of the College of Science or through the college itself.
- (2) It is major's level; that is, other science majors are required to take this course to meet a major requirement or it has a prerequisite course that is offered for science majors, or the *Bulletin* description for the course states that it is a science elective in the College of Science. Finally, note the departments may place additional restrictions on allowed science electives, e.g., in the Department of Biological Sciences, a science elective must be a non-biology course.

All College of Science courses offered by a major program must be taken at the University of Notre Dame. If a student wants to take a course outside Notre Dame for credit toward the Notre Dame degree, prior approval of the dean's office must be obtained. This does not apply to the courses taken by a transfer student prior to attending Notre Dame.

Advising. All Notre Dame science majors have been assigned an advisor in the department of their major. All advisors are members of the faculty of the College of Science. In some departments, the director of undergraduate studies for the department advises all students. In others, the director of undergraduate studies or the department office may be contacted to find out the name of the student's advisor. A complete list of names of advisors is kept on the science website.

Notre Dame students who have questions concerning the choice of a major or considering a change of major are urged to make appointments with the advisors of the departments involved. Students needing help choosing from similar majors may request an advising appointment with the associate dean of the College of Science, 174 Hurley Hall.

Student Organizations and Activities

In addition to participation in University-wide student activities, the undergraduate students of the College of Science may participate in activities directly related to science, including the undergraduate departmental science organizations: the Biology Club, the Notre Dame Chapter of Student

Affiliates of the American Chemical Society, the Mathematics Club, the Society of Physics Students, the Premed Club (preprofessional), the Prevet Club, the Science-Business Club, and the Notre Dame Chapter of Alpha Epsilon Delta (premedical honorary fraternity).

Student Council. The Student Council of the College of Science is composed of representatives of the majors of the College of Science. The student council serves as the official body representing the undergraduate students before the administration of the College of Science.

Student Awards and Prizes

The Dean's Award. Presented to the outstanding graduating senior in the College of Science in recognition of exemplary personal character, leadership, service, and outstanding achievement. Selected by the dean and associate dean.

Outstanding Senior Biological Scientist(s). To the senior(s) who has/have demonstrated the most promise in the biological sciences as evidenced by both academic performance and research participation.

American Institute of Chemists Award. For scholastic achievements, ability, and potential advancement in the chemical profession.

Merck Index Award. For outstanding achievements in chemistry or biochemistry.

Norbert L. Wiech PhD Award. Given to a chemistry or biochemistry major in the junior year for outstanding achievement in academics and research.

Outstanding Biochemist Award. For leadership, academic achievements, research and scholarship in biochemistry.

Outstanding Chemist Award. For academic and research achievements in chemistry as an undergraduate.

William R. Wischerath Outstanding Chemistry Major Award. For academic achievements of a graduating senior chemistry major.

Chemistry-Education Award. For academic achievements in preparation for teaching of chemistry in a secondary education system.

The General Electric Prizes for Honors Majors in Mathematics. Awarded to senior honors majors in the Department of Mathematics who, in the opinion of the members of the faculty, excelled in mathematics during their undergraduate career.

The General Electric Prizes for Majors in Mathematics. A similar award to senior majors.

The George Kolettis Award in Mathematics. An award established by friends of the late Prof. George Kolettis, for a graduating senior who excelled in mathematics and contributed notably to the esprit de corps of the mathematics student body.

The Aumann Prize for First Year Students in Mathematics. A prize given by Ms. Monika Caradonna in honor of her father, Prof. Georg Aumann, awarded on the basis of a competition among First Year honors mathematics students.

The Norman and Beatrice Haaser Mathematics Scholarships. These scholarships, made possible by the generosity of Professor and Mrs. Haaser, are awarded to worthy, needy students majoring in mathematics.

R. Catesby Taliaferro Competition for Sophomore Mathematics Honors Students. Friends and students of the late Professor Taliaferro established this prize, which is awarded to a sophomore mathematics major on the basis of an essay submitted by the student.

J & C Sophomore Award in Mathematics. Exemplary performance in mathematics classes by a non-honors math major sophomore female or minority (African-American, Asian, Hispanic, Native American) student.

Outstanding Senior Physics Major. This award is given to the outstanding senior physics major who, in the judgment of the departmental faculty, shows the most promise for a distinguished career in physics. Course grades, the opinion of those who have taught the candidates, and any research performance are considered in making the award.

Physics Outstanding Undergraduate Research Award. A monetary award given for excellence in research to an undergraduate physics major.

DiNardo Award. To the outstanding junior preprofessional student.

Emil T. Hofman Scholarships. To six outstanding students pursuing premedical studies.

J.C. Lungren, M.D., Scholarships. Awarded to three outstanding science preprofessional students.

The Lawrence H. Baldinger Award. To seniors in the preprofessional program who excelled in scholarship, leadership, and character.

The Patrick J. Niland, M.D., Award. A monetary award given to a preprofessional studies senior to purchase books for the first year of medical school.

The Samuel Chmell, M.D., Award. To an outstanding senior in preprofessional studies who exemplifies high academic achievement and uncompromising integrity within the program.

The Rev. Joseph L. Walter, CSC, Award. To a senior with a keen social awareness who shows great promise as a concerned physician.

Special Opportunities

Arts and Letters/Science Honors Program. In the fall of 1983, the University inaugurated an honors program for a small number of outstanding students in the College of Arts and Letters and the College of Science. A limited number of students with academic intents for each college are identified at the time of admission. Although selection criteria include the promise of outstanding academic performance as demonstrated by standardized test scores and high school performance, the program is looking for more than mere academic ability. It hopes to identify students with a deep intellectual curiosity.

The program offers honors sections to fulfill most of the University and college requirements in the students' freshman and sophomore years. At present, there is the yearlong Honors Seminar (satisfying the writing and literature requirements). Honors Calculus, Honors Philosophy, Honors Theology, Honors Biology, Honors Physics, and an array of Honors Social Science courses. Since these courses are restricted to honors students, they are smaller than non-honors sections and are usually taught in a seminar format. The teachers for honors sections are chosen from the most outstanding teachers in each college. After the first year, each student's academic work will be mainly centered in his or her major field (or fields) of study, but two or more honors electives are also taken during these years. In the fall of the senior year, there is an "Honors Thesis/Research Seminar," which is followed by the "Senior Seminar" in the spring. The fall seminar is intended to be a spur to the students' capstone project, whereas the spring seminar brings the honors students from diverse majors back together for some concluding topical discussions. All honors students will also be expected to complete a special six-hour senior research honors project in their major field of study. In science, this is the culmination of a research project that is begun earlier, and in arts and letters, it is a two-semester project culminating in a thesis. Those writing senior theses work individually under the direction of a faculty advisor of their choosing in their major field. Funds are available for research projects during summers either at Notre Dame or other universities.

In addition to the more narrowly academic features of the honors program, students will be offered various opportunities for broadening personal, cultural, and spiritual growth. Regular colloquia, informal discussions, and cultural excursions are available.

Further information on the structure and content of the Honors Program may be obtained by contacting Prof. Alex Hahn or Prof. Cornelius Delaney, 323 O'Shaughnessy Hall, Notre Dame, IN 46556, 574-631-5398.

The Environmental Research Center (UNDERC), a University facility, is composed of approximately 7,500 acres located primarily in the Upper Peninsula

of Michigan. Research is conducted at UNDERC by undergraduate as well as graduate students on a variety of environmental problems, including the manipulation of ecosystems. Internships are available to support student participation in BIOS 30569 at UNDERC each semester.

International Studies Program. Students from any of the majors in the College of Science may participate in one of the University of Notre Dame's international study programs. Science students who go abroad generally do so in one of the two semesters of their junior year. Science students interested in international studies should discuss their plans with their advisor and with the associate dean, 248 Nieuwland Science Hall. Further information can be obtained through the Office of International Studies, 109 Hurley Hall.

Assistant Professors:

Giles Duffield; Michael T. Ferdig; Kristin M. Hager; Jessica Hellmann; Edward H. Hinchcliffe; Mary Ann McDowell; Jason McLachlan

Program of Studies. The Department of Biological Sciences offers programs of study leading to the degrees of bachelor of science with a major in biological sciences or bachelor of science with a major in environmental sciences, master of science in biological sciences and doctor of philosophy. Also offered is a second major in environmental sciences for students in the College of Arts and Letters or in the College of Business Administration.

Program in Biological Sciences. The biological sciences encompass all aspects of life sciences, including microbial, plant, and animal life. This includes the biochemistry, genetics, development, physiology, evolution, and ecology of all living things. Every educated person must have sound knowledge of the fundamental principles and facts of the

biological sciences to understand himself or herself and the world in which he or she lives. In addition biologists, through their research, contribute to the development of theories and methods required for the solution of humanity's problems in the fields of health, agriculture, industry, and the preservation of the environment.

An undergraduate major in biological sciences prepares a student for graduate study (MS, PhD, MD/PhD) leading to a research career, and also for admission to medical, veterinary, and other professional schools. Graduates with a bachelor's degree may enter careers in industry, government, or health-related research laboratories. Those who wish to teach at the elementary or secondary level should be sure to include required education courses such as those offered through Saint Mary's College. College and university teaching requires the PhD degree.

The goal of the Department of Biological Sciences is to educate its majors first as scientists prepared for the challenges of modern biology and second for any specialty area(s) in which they develop an interest, especially if that interest is directed toward graduate school and research. Also, for the approximately 70 percent of biology majors who initially express an interest in going to medical school or other health-related graduate programs, the key topic areas of modern biology emphasized in the core curriculum are also very relevant to their training as "medical biologists."

Students majoring in biological sciences are required to follow a core curriculum. This core not only provides exposure to most areas of modern biology but also includes courses representative of all the levels of biological organization, i.e., from atoms and molecules through ecosystems. Students unsure of which area of biology most appeals to their interests will more easily arrive at that decision through the completion of the core.

Policy Statement on the Use of Organisms in Biological Sciences Teaching Laboratories. Some laboratory courses offered by the Department of Biological Sciences may involve the use of *living or preserved organisms*. Instructors use these *animal specimens* in cases where this is deemed necessary for teaching important biological concepts and principles. *Students who have concerns about the use of organisms in classes must, prior to registering, submit a request for alternate materials to the course instructor.* It is up to the discretion of the instructor(s) as to whether and how non-organism alternatives may be substituted for biological materials in classes. *Students permitted to use alternate materials are responsible for the same knowledge and application as their classmates and may be required to complete examinations that involve the inspection or handling of biological specimens.*

Biology Courses. The biology courses included in this *Bulletin* are those reasonably expected to be offered several times to every semester during the next four years. However, changes may occur as

faculty add new courses or drop those with little demand. Courses without laboratories are indicated as lecture only. With the move into the new Jordan Hall of Science in fall 2006, biology faculty will begin the creation of new laboratory courses that will count toward the major laboratory requirements.

Biology Survey Courses (10101–10118) have a prerequisite of one year of high school chemistry and biology and are designed for first-year students needing to satisfy the University natural science requirements. These courses will address fundamental aspects of modern biology ranging from genetics to wildlife biology. There will generally be as many as six sections of biology courses available each year; any course may have multiple sections. The listed courses and new courses are offered when demand warrants, allowing subject matter to change depending on students' interests and needs and emerging or changing areas of life sciences. These survey courses are generally recommended University electives and are *not* open to science majors.

These 10000-level survey courses satisfy the science requirement for non-science majors at Notre Dame. They do not satisfy the science requirements for science majors at Notre Dame or elsewhere. Students may not take courses with overlapping or similar lecture material such as BIOS 10101 and 10110 or BIOS 10107 and 10118, for example. A table listing these overlapping courses is on the final pages of the College of Science section of this *Bulletin*.

BACHELOR OF SCIENCE WITH A MAJOR IN BIOLOGICAL SCIENCES

The biological sciences majors take the following basic sequence of courses in the College of Science:

General Chemistry (CHEM 10113 or 10117 or 10121) and (CHEM 10114 or 10118 or 10122)
Organic Chemistry (CHEM 20223/21223 and 20224/21224)¹
Physics (PHYS 30210–30220)²
Calculus (MATH 10350–10360 or 10550–10560)

The requirements in biological sciences include courses from a basic six core sequence and sufficient numbers of BIOS electives to complete the 41-credit-hour requirement. All majors are strongly encouraged to complete the sequence Biological Sciences I and II (BIOS 10161–10162) in their first year to ensure the completion of all requirements in four years. Students may begin the core with General Biology A and B (BIOS 20201–20202); however, they will be at a considerable *disadvantage* in scheduling requirements in the two remaining years; they also will have one year less to explore their interests in biology.

There are seven components to the biology core requirement, consisting of courses in the following areas:

BIOLOGICAL SCIENCES

Core I: Introductory Biology

- a. Metabolism and Genetics
b. Ecology, Diversity, and Physiology

Students choose from either:

- Biological Sciences I and II (BIOS 10161–10162) (includes two labs)³ or
- General Biology A and B (BIOS 20201-20202) (includes two labs)³

These labs are designated Lab #1 and Lab #2 of the six required for the major.

Core II: Genetics

Students choose from either:

- a. Classical and Molecular Genetics (BIOS 20250 and 21250; lab #3)⁴ or
b. Fundamentals of Genetics (BIOS 20303 and 21303; alternate lab #3)

Core III: Cellular Biology

Students choose from either:

- a. Molecular Cell Biology (BIOS 20241)⁴ or
b. Cellular Biology (BIOS 30341)⁵

Optional labs available are BIOS 21241, a research-orientated 2 credit laboratory, or BIOS 31341, a basic 1 credit cell biology laboratory primarily for pre-professional students. Students *may not* take both cell labs.

Core IV: Physiology

Students choose from either:

- a. Vertebrate (Human) Physiology (BIOS 30344)⁵ or
b. Integrative Comparative Physiology (BIOS 30421).

Optional labs available are BIOS 41344 and BIOS 31421. Students may take both labs if they choose.

Core V: Evolutionary Biology

Students choose from either:

- a. Evolution (BIOS 30305) or The History of Life (BIOS 30310) or Vertebrate Biology (BIOS 30404)
b. Other courses as designated in the future, prior to the Class of 2010 graduation.

Core VI: Ecology

Students choose from either:

- a. General Ecology (BIOS 30312; optional lab BIOS 31312 is offered fall semesters only)
b. Aquatic Ecology (BIOS 30420 and required lab BIOS 31420).

BIOS Electives

The minimum required credits in the core including labs is 27. An additional 14 credits of electives in biological sciences are chosen to complete the required total of 41 credits.⁶⁻⁹ All biological sciences majors are encouraged to include non-science among their “free electives.”

Notes:

1. With the restructuring of the chemistry introductory sequences, CHEM 20223/21223 and

20224/21224 is the required sequence for all BIOS majors, effective fall 2006.

2. Alternatively, students may select the physics sequences PHYS 10310–10320 or PHYS 10411, 20435.

3. Students are required to take a total of six laboratories; three of the six labs will be part of the Core (Core I(a,b), II, and the remaining three of the six laboratories are chosen among the core III through Core VI and/or BIOS electives, including 50000- and 60000-level courses. Thus, there are three *required* “named” BIOS labs and three additional elective BIOS labs.

4. Career-oriented majors in biological sciences, as well as those considering a professional school (medicine, veterinary science, others), are urged to select the courses Molecular Cell Biology (BIOS 20241) and Classical and Molecular Genetics (BIOS 20250). These should be taken in the sophomore year but no later than the junior year. The two-credit cell research lab (BIOS 27241) is especially ideal for those interested in obtaining summer research internships, doing undergraduate research at Notre Dame or elsewhere, and is *especially* critical to any graduate research career.

5. Physiology should be completed by the end of the junior year for students planning to take the MCAT exam or the seventh semester for students planning to take the GRE biology subjects exam.

SUMMARY OF REQUIREMENTS FOR GRADUATION FOR ANY BIOLOGICAL SCIENCES MAJOR

	Credits	Year Usually Taken
Biological Sciences*	41	all
Chemistry (10113–10114 or 10117–10118) and 20223–20224 or 10182–20283 with labs)	8	First year
Physics (30210–30220)	8	Sophomore
Mathematics (10350–10360 or 10550–10560)	8	Junior
Total Science:	73	
History**	3	First year
Social Science**	3	First year
Philosophy**	6	Sophomore/Junior
Theology**	6	Sophomore/Junior
FYC 13100	3	First year
Language	Intermediate Level Competency	Sophomore/Junior
Literature/Fine Arts**	3	Junior/Senior
Free Electives	16*	Sophomore/Senior
Physical Education or ROTC (2 semesters)	0	First year
	122 credits	

* It is essential for prospective biology majors to begin their general biology courses in the first year to schedule all required core curriculum courses within a four-year period.

** One of these courses must be a University Seminar.

+ Minimum number of free electives based on the assumption that intermediate-level competency in language was achieved by taking three-credit courses.

Majors with AP course credits and/or language Credit by Exam (CE) often have time to incorporate 20 or more free elective credits (i.e., a second major or minor) into their four-year course selection.

6. Most graduate (60000-level) courses (through 60579) are open to eligible juniors and seniors; often the majority of students in these advanced courses are undergraduates.

7. Students may choose additional courses in the Core areas III through VI or among courses not assigned to the core (e.g., BIOS 40411, Biostatistics, or BIOS 48498, Undergraduate Research), or 60000-level courses as BIOS electives, to meet the required total of 41 credit hours in biological science courses.

8. Select non-BIOS major-level College of Science courses (i.e., those taken to meet science-major requirements and not among those designated as "Recommended University electives") that are not being used to fulfill other specific graduation requirements can be chosen with the consent of the director of undergraduate studies for the Department of Biological Sciences and counted toward the BIOS elective credits. Only one non-BIOS science course (3 or 4 credits) may be thus used. The course most commonly chosen is CHEM 40420 (Biochemistry).

9. Undergraduate Research (BIOS 48498) and Directed Readings (BIOS 46497) count toward the 41-credit biological sciences requirement; however, only a maximum of two credits per semester per course and a combined total of six credits from these two courses may be counted in fulfilling the 41-credit requirement. A maximum of only nine credits in these courses may be used toward graduation; however, additional credits do remain on a student's permanent transcript record.

RECOMMENDED COURSE GROUPINGS

After consultation with the director of undergraduate studies or other faculty advisors including research mentors, each student is encouraged to select the curriculum which best fits his or her career goals. A great deal of flexibility is permitted in designing each individual's projected course schedule, within the context of the core curriculum. For students wishing to emphasize specific areas of biology in their curricula, the following four course groupings are *provided as guides* that have proved to be appropriate for most of our previous graduates. Students may wish to consider these and others that are available as the equivalent of a "concentration in a specific area of biology or simply view these as examples of how a particular interest or career goal can be supported by a structure set of courses.

General Biosciences: This grouping gives the student a broad foundation in biological sciences by requiring electives from each of its major areas. This grouping may be designed as preparation for the Graduate Record Examination (GRE) in biology, or the Medical College Admission Test (MCAT). Students considering graduate school or secondary science education, or those without a clear career goal, should consider these courses.

Here, students follow the core curriculum, making choices in Cores III through VI. In the area of Core V, the course Evolution (BIOS 30305) and the course The History of Life (BIOS 30310) are recommended. Also recommended for electives in biological sciences is a course in either vertebrate or invertebrate biology (e.g., BIOS 30404, Vertebrate Biology, or BIOS 30406, General Entomology). Dependent on the credits associated with the choice of courses made in the core, students will be required to pick three to five more electives in biological sciences to complete the requirement of 41 credits.

Premedicine/Pre-Health: In addition to the core requirements in genetics, cell biology, and physiology, biology premed/pre-health majors are advised to include developmental biology, one or more courses in infectious diseases or disease mechanisms, biostatistics, and additional relevant electives (neurobiology, tumor cell biology, etc.), and biochemistry (CHEM 40420) as BIOS electives to reach the required 41 credits in biology.

Majors intending to go on for an MD/PhD should include multiple semesters of undergraduate research and/or summer research internships in their overall program.

Cellular and Subcellular: This grouping was designed for students considering graduate study in any of the many areas of cellular biology and biochemistry. It is also appropriate for premedical students who do not choose the general biosciences grouping.

For this grouping, students follow the core curriculum, making choices in Cores III through VI. In the area of Core IV, Physiology, students should consider taking both courses listed. The courses Introduction to Microbiology (BIOS 30401) and Virology (BIOS 40416) are recommended. For electives in biological sciences, a course in Immunology (BIOS 40419), Genomics (BIOS 30423), or Advanced Cell Biology (BIOS 50539) is recommended. Molecular Genetics (BIOS 30418) is also recommended as an elective. Dependent on the credits associated with the choice of courses made in the core, students will generally be required to pick two more electives in biological sciences to complete the requirement of 41 credits.

Organismal and Community: This grouping is primarily intended for students planning careers in ecology, environmental biology and related areas and allows students to develop considerable expertise during their undergraduate years. It requires electives in biological sciences beyond the 41 credits required of the major. Individual interests may be accommodated by judicious choice of biological science courses and of the science elective.

Students interested in this area of biological sciences may wish to take advantage of the University of Notre Dame Environmental Research Center (UNDERC), a University facility which comprises about 7,000 acres, including more than 20 lakes, in

the Upper Peninsula of Michigan. Biological research (including whole-ecosystem experiments), graduate studies and undergraduate course work take place at the center. Paid internships are available to support student participation in BIOS 30569 at UNDERC each summer.

In this grouping, students follow the core curriculum, making choices in Cores III through VI. In the area of Core VI, Ecology, students should consider taking both courses listed. Students are encouraged to take General Botany (BIOS 30304) or Plant Science (BIOS 30325). Also recommended are Vertebrate Biology (BIOS 30404) and/or General Entomology (BIOS 30406) and Animal Behavior (BIOS 30407).

Microbiology and Infectious Disease: This grouping is intended for students interested in microorganisms and molecular biology and who are considering graduate study in these areas. It is also appropriate for premedical students. It requires electives in biological sciences beyond the 41 credits required of the major.

Here, students follow the core curriculum, making choices in Cores III through VI. Students should take Principles of Microbiology (BIOS 30401 and the lab BIOS 31401); Virology (BIOS 40416); or Medical and Veterinary Parasitology (BIOS 40415); Immunology (BIOS 40419); Cellular and Molecular Basis of Human Disease (BIOS 40435); and/or AIDS (BIOS 40440).

Sample Curriculum: The sample curriculum for the four-year program listed below *is only one of a number of ways* a student can complete all the requirements for a biology major. Students should discuss their specific interests with their departmental advisor and plan their semesters accordingly. Alternative sample curricula can be developed with the assistance of the biology advisor.

Note that this *sample curriculum* assumes that no AP or language CE credits are included.

First Year

Fall Semester

BIOS 10161 (Core Ia: Principles) (Lab #1)	4
MATH 10350 or 10550	4
CHEM 10113, 11113 or 10117, 11117	4

TOTAL: 124 minimum

¹ One of these courses must be a University seminar.² Students may receive permission to satisfy the organic chemistry requirement by taking CHEM 20223/21223 and/or CHEM 20224/21224 during Notre Dame's summer session.³ For premedical students, it is strongly recommended that the student take a 20000-level English literature course. This ensures that the student will be able to meet the standard medical-school admission requirement of two English courses. Medical ethics and biochemistry are also generally required.⁴ While not required, many students choose to take a supporting 3-credit non-BIOS science course that counts toward the required 41 credits in their major.

Also, *Biostatistics (BIOS 40411/42411)* is highly recommended for all students planning on a health-related professional program or a graduate program, especially in ecology, environmental biology, or other field of life science. A non-BIOS/Science elective can be any 30000- 50000-level course other than those required, and approved by the director of undergraduate studies for the Department of Biological Sciences. *Biochemistry (e.g., CHEM 40420)* is especially recommended.

In addition to the undergraduate curriculum, the Department of Biological Sciences offers programs of graduate study leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

The following undergraduate courses have been offered periodically as demand dictates:

10102. Plants, Food, and Society
 10105. Parasitism, Disease, and Public Health
 10111. Biological Basis of Human Behavior
 10112. The Marine Environment
 10113. Understanding Viruses
 10114. Avian Biology
 10115. Microbes and Man
 40402. Microbial Physiology
 30403. Invertebrate Biology
 30409. Plant Taxonomy
 40413. Cytology
 30422. Marine Biology
 40430. Advanced Animal Physiology
 40455. Infection and Immunity
 30460. Plant Ecology
 40462. Applied Environmental Microbiology
 40463. Aquatic Botany

UNDERC Field Biology Program.

Seven-credit programs for undergraduates that emphasize field biology are offered at the University's Environmental Research Centers (Michigan, Montana, and Puerto Rico). The programs entail course work, group research projects, and an independent research project. Application to the programs occurs in the fall of the sophomore and junior years and enrollment is limited by housing at each location. If selected, students enroll in BIOS 30568 during the spring semester and BIOS 30569 during the summer. To participate in the Montana or Puerto Rico programs, one must first participate in the Michigan program.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Biological Sciences](#) heading.

SELECT GRADUATE-LEVEL COURSES

Many 60000-level courses in biological sciences are open to qualified undergraduates, subject to the approval of the course instructors and the director of undergraduate studies. Graduate-level courses generally include a majority of upper-class students and are recommended to undergraduate majors. These include:

60508. Population Genetics
 60515. Vector Genetics
 60523. Practicum in Environmental Biology
 60527. Stream Ecology
 60529. Theoretical Population Ecology
 60530. Immunobiology of Infectious Diseases
 60531. Molecular Biology I
 60532. Molecular Biology II
 60558. Biological Electron Microscopy
 60562. Aquatic Insects
 60570–60579. Topics Courses

Additional undergraduate and graduate-level courses are expected to be added during the next four years.

The above 60000-level courses are described in the *Graduate School Bulletin of Information*.

Chemistry and Biochemistry*Chair:*

A. Graham Lappin

George and Winifred Clark Professor of Chemistry:

Marvin J. Miller

Charles L. Huisking Professor of Chemistry:

Xavier Creary

Kleiderer/Pezold Professor of Biochemistry

Francis J. Castellino

Navari Family Professor of Life Sciences:

Shahriar Mobashery

William K. Warren Professor of Chemistry:

W. Robert Scheidt

Professors:

CHEMISTRY AND BIOCHEMISTRY

Program of Studies. Chemistry is the science of substances that comprise the world about us and is concerned with their structure, their properties and the reactions that change them into other substances. Chemists and biochemists practice their profession in many ways—in educational institutions, government laboratories, private research institutions and foundations and in many commercial areas, including the chemical, drug, health, biotechnology, pharmaceutical and food industries.

The Department of Chemistry and Biochemistry has a strong undergraduate program together with a strong graduate education and research program. The graduate program greatly benefits undergraduate education by attracting highly qualified faculty and results in the availability of excellent research facilities and modern instrumentation necessary to train the scientists of tomorrow. This department is able to provide an excellent program of undergraduate research to complement regular course work. Student participation in research is highly encouraged as a key part of the education of chemistry and biochemistry majors.

The programs in chemistry and biochemistry described in the following pages prepare students for graduate studies and professional work in the chemical and biochemical sciences, as well as in interdisciplinary areas that rely heavily on chemistry. Bachelor of science degrees are offered with a major in chemistry or a major in biochemistry. At the graduate level, the Department of Chemistry and Biochemistry offers programs leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

BACHELOR OF SCIENCE WITH A MAJOR IN CHEMISTRY

The chemistry curriculum at Notre Dame includes two programs: the Chemistry Career Program, designed for students interested in a professional career in chemistry, and the Chemistry Combination Program, designed for those students who are interested in combining chemistry with business or with computing.

All chemistry majors take the following basic sequence of courses:

General Chemistry (CHEM 10181–11181 recommended; or optionally, CHEM 10113–10114 or 10117–10118)
Organic Chemistry (CHEM 10182, 11182, 20283, 21283)¹
Inorganic Chemistry (CHEM 20284, 21284, 40443, 41443)
Physical Chemistry (CHEM 30321, 31321, 30322, 31322)
Analytical Chemistry (CHEM 30333, 31333)
Physical Methods of Chemistry (CHEM 40434)
Principles of Biochemistry (CHEM 40420)
Chemistry Seminars (CHEM 23201, CHEM 23202), three semesters

Physics (PHYS 10310, 10320)¹
Calculus (MATH 10550, 10560, and CHEM 20262)

In addition to this basic sequence, the following courses are required for each program.

Chemistry Career Program

Science Electives (six credit hours)^{2,3}

Combination Program

Program Electives (15 credit hours)

Science Electives (three credit hours)^{2,3}

The program electives for the Chemistry Combination Program are from either the area of business or from the area of computing and are the same as those in the corresponding Collegiate Sequence programs:

Chemistry with Business

Accounting and Accountancy I (ACCT 20100)

Accounting and Accountancy II (ACCT 20200)

Business Finance (FIN 20100)

Introduction to Management (MGT 20200)

Introduction to Marketing (MARK 20100)

Introduction to Economics (ECON 10010 or 12101) is suggested, as a non-program elective, as a prerequisite to MARK 20100 and meets the University social science requirement.

Chemistry with Computing

Each student selects 15 credit hours of computer science and engineering and chemistry courses in consultation with a departmental advisor.

Notes:

1. Substitution with permission only.
2. Linear Algebra/Differential Equations (MATH 20580) is a recommended science elective.
3. Undergraduate research, CHEM 48498, is a recommended science elective in all programs beginning in the sophomore year with typically one or two credits per semester.
4. The student should take three general requirement courses during the first year, including one course that is designated a University Seminar.

Economics is required for the Chemistry with Business program.

5. One course in theology and philosophy should be completed by the end of the sophomore year. These courses may be taken in either semester of the first or second year.
6. In all the programs, one chemistry seminar is generally taken in each of the sophomore, junior and senior years.
7. Note: Program electives in computing require careful scheduling, and some sequences may require more than two years to complete.

BACHELOR OF SCIENCE WITH A MAJOR IN BIOCHEMISTRY

The biochemistry curriculum emphasizes the chemical basis of biological processes. All biochemistry majors are required to take the following courses: General Chemistry (CHEM 10181 AND 11181 recommended; or optionally CHEM 10113–10114 or 10117–10118) Organic Chemistry (CHEM 10182, 11182, 20283, 21283)¹ Inorganic Chemistry (CHEM 20284, 21284) Physical Chemistry (CHEM 30321–30322) Analytical Chemistry (CHEM 30333, 31333) Chemistry Seminars (CHEM 23201, 23202), three semesters

SUMMARY OF MINIMAL REQUIREMENTS FOR THE DEGREE OF BACHELOR OF SCIENCE IN CHEMISTRY AND BIOCHEMISTRY

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Chemistry and Biochemistry](#) heading.

Graduate courses in chemistry are open to qualified advanced undergraduate students, subject to the approval of the departmental advisor. These courses are listed in the *Graduate School Bulletin of Information*.

Environmental Sciences

Director, Associate Professor of Biological Sciences:

Paul R. Grimstad

Program in Environmental Sciences. The form and function of planet Earth have been changed as a result of the activities of humans. Current concerns, such as environmental pollution and global warming, are the results of complex processes. It is now important for people in all walks of life to be aware of how we interact with the Earth and how environmental changes will affect us in the future.

The environmental sciences major is an interdisciplinary program designed to build sensitivity and breadth in environmental areas. The curriculum is designed to expose students to a scientific view of our environment from biological, chemical and geological perspectives. Particular emphasis is placed on understanding how humans interact chemically and biologically with the environment. Material and energy resource limitations, chemical and thermal pollution, and effects of environmental pollution on public health are major considerations within the environmental sciences curriculum. Emphasis is also placed on understanding interactions between human societies and the environment from social, ethical, economic, anthropological, and governmental points of view. Students are also encouraged to strengthen their mathematical and computational skills and to participate voluntarily in environmentally oriented research projects or summer internships.

The First Major. College of Science students who major in Environmental Sciences will earn the degree of bachelor of science. Students following the Environmental Sciences first major program complete a total of 69 credits of science. A second major in Environmental Science is also offered to students in the College of Arts and Letters or in the Mendoza College of Business.

The Second Major for Arts and Letters and Business: Most students in the College of Arts and Letters or in the Mendoza College of Business may participate in the Environmental Sciences Program as a second major. Second majors are required to complete a minimum of 37 credits of science. Students considering this program should investigate options brought to a first major by adding course work in environmental sciences. For example, students majoring in government and in environmental sciences could consider postgraduate study or careers in *public policy*. Students majoring in economics and in environmental sciences would have a good background for the developing field of *environmental economics*. A second major in Environmental Sciences also complements majors in the other sociological fields of anthropology, psychology, or sociology. Similarly, business students will likely find environmental sciences to be useful background when working with local or federal governments

on issues of *environmental compliance* or when considering the impact of business decisions on the environment (*environmental assessment*). All students are urged to discuss their long-range career plans with advisors in both majors.

Relationship with Other Programs: The Environmental Sciences Major Program has a special collaborative relationship with the Science, Technology, and Values (STV) Concentration program housed in the Reilly Center in O'Shaughnessy Hall. Many of the courses required of environmental sciences first majors are also cross-listed as STV courses. Thus, students in the STV program from across the university are expected to benefit in the curricular endeavors of the Environmental Sciences Program. Environmental sciences first majors often enroll in the STV program. (Environmental science students with flexibility in their program often have room to complete an STV concentration by taking STV courses beyond those required by the first major or university requirements.) However, arts and letters students with second majors in environmental science will be encouraged to participate in further interdisciplinary course work through the STV concentration. Second majors are especially encouraged to take the capstone course, SC 491, Current Topics in Environmental Science, provided it completes that second program.

Related Options: A similar bachelor's degree program, Environmental Geosciences (ENVG), is offered by the College of Engineering.

Also available through the College of Engineering is the Environmental Geosciences minor. Note, for students in ES (or SCBU, SCCO, and SCED): the College of Science will allow the course SC/ENVG 20110 to count toward both the science major and this minor. Any courses taken for completion of this minor may not also be counted as science electives or science requirements for a science major.

BACHELOR OF SCIENCE WITH A MAJOR IN ENVIRONMENTAL SCIENCES

All environmental sciences first majors take the following courses in science:

General Biology (BIOS 10161–10162 and 11161–11162) or (20201–20202 and 21201–21202)¹
 General Chemistry (CHEM 10113–10114) or (CHEM 10117–10118) or (CHEM 10121–10122)¹
 Calculus (MATH 10350–10360) or (10550–10560)^{1, 2, 3}

Physical Geology (SC 20110/21110)

Physics (PHYS 10310–10320 or 30210–30220)

Biostatistics (BIOS 40411)

Ecology (BIOS 30312 and 31312)

Chemistry elective⁴

Current Topics in Environmental Science (SC 40491)

Students also will choose science electives chosen from an approved list,⁵ completing a required minimum total of 69 credits in science.

Also required for the major are the following non-science courses:

An ethics course with emphasis on environmental biology or life science issues, i.e., **Environmental Ethics or Science, Technology, and Society**, or other approved arts and letters courses.⁶

Introduction to Microeconomics (ECON 10010 or 20110)^{7,8}

Students are also urged to choose their electives from a recommended list of arts and letters courses.⁹

Requirements for the program are summarized in the table in this section.

Notes:

1. Equivalent or higher-level sequences in science may be substituted, e.g., MATH 10850–10860 for MATH 10350–10360.
2. Students interested in the area of *ecological modeling* are strongly urged to take MATH 10550–10560 for their mathematics requirement. Other mathematics courses should be taken as science electives.
3. Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350–10360 or MATH 10550–10560. Students having taken MATH 10250, 10110 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found later in this section of the *Bulletin*.)
4. The 4-credit chemistry elective requirement is satisfied by either one first course in organic chemistry (CHEM 20223, 21223 or CHEM 20235, 21235 or CHEM 20283, 21283) or Inorganic Chemistry (CHEM 30243) or by Analytical Chemistry (CHEM 30333, 31333).
5. The following are the examples of many approved science electives for this program: Botany (BIOS 30304) or at St. Mary's Evolution (BIOS 30305)
 The History of Life (BIOS 30310)
 Genetics (BIOS 20250 or 20303)
 Principles of Microbiology (BIOS 30401)
 Animal Behavior (BIOS 30407)
 Aquatic Ecology (BIOS 30420)
 Stream Ecology (BIOS 60527)
 Numerous other BIOS courses as designated by the ES director, including 60000-level graduate courses are accepted.
 Environmental Chemistry (CHEM 20204)
 Further Chemistry electives (from Note 4 above)
 Second course in organic chemistry (CHEM 20224, 21224 or 20248, 21248 or 20236, 21236)
 Principles of Biochemistry (CHEM 40420)

Computer Programming and Problem Solving (MATH 20210)
 Calculus III (MATH 20550)
 Introduction to Linear Algebra and Differential Equations (MATH 20580)
 Differential Equations (MATH 30650)
 Topics in Computing
 Historical Geology (SC 20120)
 Environmental Geosciences (SC 10100 or 20100)
 Mineralogy and Optical Mineralogy (SC 20220)
 Environmental Geology (SC 30111)
 Sedimentation and Stratigraphy (SC 30230)
 Geochemistry
 Paleontology (SC 40350)
 Other SC courses as approved by the ES director may be included as they become available. Select courses offered in International Studies Programs (UC-Dublin, UWA-Perth) also may be counted toward the ES science electives as well as select ENVG courses not cross-listed with SC, with permission of the ES director.

Students interested in attending graduate school in environmental sciences should consider taking science electives beyond requirements of this major. For example, for admission into some graduate programs, a year of organic chemistry would be a requirement. Deviations from the approved list of science electives must be approved by the advisor for the major.

6. For this major, the University requirement of a second philosophy or theology or other University-required course will be fulfilled by one of these courses.

7. The economics requirement for this major is fulfilled by taking Introduction to Economics (microeconomics) either in the first year (ECON 10100) or in the second through fourth years (ECON 20010). Note, the course ECON 13181 (Social Science University Seminar) will not fulfill the economics requirement for this major.

8. For this major, the University social science requirement will be fulfilled by the required microeconomics course.

9. Numerous STV courses are recommended as electives, including Environment and Environmentalism in History (STV 30175); Self, Society and the Environment (STV 40319) and others as approved by the ES director. The STV courses may be taken either under the STV label or from the primary departmental cross-list.

**Ideally, students who decide to major in environmental sciences before beginning their first year should take BIOS 10161–10162.* This will allow for an additional year of relevant science and other electives to be included in their total curriculum. See notes accompanying BIOS 10161–10162 and BIOS 20201–20202 for additional information.

** One of these must be a University Seminar (13180–13189).

ENVIRONMENTAL SCIENCES AS A SECOND MAJOR

Most students in the College of Arts and Letters or in the Mendoza College of Business may participate in the Environmental Sciences Program as second majors. Students who are considering the environmental sciences second major must have a first major in one of the departments of the College of Arts and Letters or the Mendoza College of Business. Because of the sizable overlap in requirements, students in the College of Arts and Letters who have a second major in preprofessional studies will not be allowed to add this second major program.

The requirements for second majors consist of the following science courses:

General Biology (BIOS 10161, 11161 and 10162, 11162 or BIOS 20201–20202 and 21201, 21201 and 21202, 21202)¹
 Ecology (BIOS 30312, 31312)
 General Chemistry (CHEM 10117–10118)^{1,10}
 Environmental Chemistry (CHEM 20204) or approved alternative
 Geology (SC 20100)
 Physics¹¹
 Biostatistics (BIOS 40411)¹²
 Biology or Geology elective (3 or 4 credits)¹³
 The total required course work requires a minimum total of 37 credits in science beyond the University math requirement.

ENVIRONMENTAL SCIENCES

Note, the same policy applies for Environmental Sciences first and second majors: All College of Science courses specified by the major program must be taken at the University of Notre Dame. (An exception is made for any science courses taken for this major through an approved Notre Dame International Studies Program.)

Notes (a continuation from above):

10. As is the case for science first majors, six credits of the science course work in this program will also be counted toward the student's university science requirement.

11. This requirement is satisfied by either one first course in physics (PHYS 10111 or 10310 or 10411 or 30210) or an approved survey course: Concepts of Energy and the Environment (PHYS 10052) or Energy and Society (PHYS 20051) and others as designated.

12. Although mathematics course work is not specifically required of this program, several required courses (BIOS 40411 or some of the first courses in physics) do have a prerequisite of one year of calculus (MATH 10350–10360 or equivalent). For all students in the College of Arts and Letters or the Mendoza College of Business, the mathematics sequence MATH 10350–10360 is acceptable for completion of the university mathematics requirement; thus, this sequence is recommended for students considering Environmental Sciences as a second major. Students lacking this mathematics background may have to take further course work in mathematics to meet the prerequisites in mathematics of courses in this program.

13. Chosen from approved biology or geology electives listed in note 6 above.

Sample Curriculum (Second Majors):

Students should remember that all science major programs require course work that builds upon prerequisites and thus require careful planning. A *sample curriculum* for second majors is given below. *Note: Only the courses for the second major are listed.*

First Year*

First Semester

CHEM 10117. General Chemistry I 4

Second Semester

CHEM 10118. General Chemistry II 4

Sophomore Year

First Semester

BIOS 20201. General Biology A 3

Program of Studies. Mathematics has had a profound effect upon civilization since ancient times, when the legend originally inscribed on the entrance to Plato's academy was "Let no one ignorant of geometry enter here." It was equally true during the medieval period, when arithmetic and geometry constituted two of the seven subjects considered essential for a liberal education. It has been said that the second most influential book in the span of Western civilization—after the Bible—is Euclid's *Elements*. Although mathematics is usually associated with science and technology in the modern mind, it seems apparent from the writings of the great mathematicians of the 17th and 18th centuries that religious belief played a great role in their pursuit of mathematics. They saw the "system of the world" obeying mathematical laws and as a consequence felt impelled to study mathematics so as to better appreciate the world's Creator.

Mathematics continues to have a profound influence in our century. From the theory of relativity, with its applications to the study of the large-scale structure of the universe, to the development of the modern computer, with its manifold applications in science, technology and business, mathematics has played a fundamental role. It is surely the most universal of all scientific tools, and the student equipped with a strong mathematical background will be in the enviable position of being able to employ his or her expertise in any area in which rigorous thought and precision of results are mandated.

The department is dedicated to the development of undergraduate studies, to the teaching of mathematics to scientists, engineers and teachers, to graduate education and research, and to the discovery of new mathematics. The entire faculty is involved with undergraduate affairs, and students have the opportunity of associating with scholars of international repute. Mathematics at Notre Dame provides students with a discipline of the mind and a stimulation of the imagination par excellence.

Programs in mathematics prepare students for graduate studies or for professional work in fields in which mathematics plays a dominant role. They provide an excellent preparation for law school, medical school, business school and secondary school teaching. Graduates may enter careers in research institutes or industrial or government positions.

In addition to its undergraduate programs, the department offers programs of graduate study leading to the degree of doctor of philosophy, as described in the Graduate School *Bulletin of Information*.

The department recognizes that, besides those students who wish to pursue a career devoted primarily to mathematical research and teaching, many will wish to take positions in business, industry or government where they will be using their mathematical skills in close collaboration with engineers as well as biological, physical and social scientists. These students will find among the listed programs one well suited to their needs. Besides these programs a student may, in consultation with the director of undergraduate studies and the department chair, create a program especially tailored to his or her career goals.

BACHELOR OF SCIENCE WITH A MAJOR IN MATHEMATICS

The mathematics curriculum at Notre Dame includes nine course sequences or areas of concentration within the College of Science. These programs are designed to accommodate the academic and professional interests of all mathematics majors. Brief descriptions are given below, and more detailed descriptions of these programs are available on request from the Department of Mathematics.

College Requirements. All must take the following College of Science courses: CHEM 10117, 10118; PHYS 10310, 10320; and an additional science elective.

A student who takes two semesters of organic chemistry or two semesters of general biology is only required to take PHYS 30210-30220.

Mathematics Honors Program

This program is suited to students who are interested in graduate work in one of the mathematical sciences and to those whose career plans require a strong background in modern mathematics.
 Honors Calculus I (MATH 10850)
 Honors Calculus II (MATH 10860)
 Honors Calculus III (MATH 20850)
 Honors Calculus IV (MATH 20860)
 Honors Algebra I (MATH 20810)
 Honors Algebra II (MATH 20820)
 Honors Algebra III (MATH 30810)
 Honors Algebra IV (MATH 30820)
 Honors Analysis I (MATH 30850)
 Honors Analysis II (MATH 30860)
 Electives (12 credit hours with six at the 40000 level)

Mathematics Courses for the Other Programs

All other mathematics programs (except the computing program) require the following mathematics core courses:

Calculus I (MATH 10550)
 Calculus II (MATH 10560)
 Calculus III (MATH 20550)
 Ordinary Differential Equations (MATH 20750)
 Linear Algebra (MATH 20610)
 Introduction to Abstract Math (MATH 20630)
 Algebra (MATH 30710)
 Real Analysis (MATH 30750)
 Computer Programming (MATH 20210)

In addition to this basic sequence, the following courses are required for each program:

Mathematics Career Program

This program is designed to give students a general background in mathematics. In addition to the basic sequence of courses listed above, 12 hours of mathematics electives are required, at least three of which are at the 40000 level.

Applied Mathematics Program

This program is designed for students interested in the broader area of applied mathematics. In addition to taking the core mathematics courses, the student is required to take 15 credits from the following list of courses, six credits of which must be at the 40000 level: MATH 30210, MATH 30390, MATH 30530, MATH 30540; MATH 40210, MATH 40390, MATH 40480, MATH 40730, MATH 40750, and MATH 40710.

Mathematics and Life Sciences Program

This program is designed for mathematics majors who are interested in life-science-oriented careers. The following mathematics courses are required in addition to the basic sequence of courses listed above:
 Introduction to Probability (MATH 30530)
 Mathematical Statistics (MATH 30540)
 Elective in Mathematics (three credit hours at the 40000 level)

The following College of Science courses are required:

Organic Chemistry (CHEM 20223, 21223; 20224, 21224)
 General Biology (BIOS 20201, 21201; 20202, 21202)
 Genetics (BIOS 20303, 21303)

Mathematics and Computing Program

This program is designed for students who plan to pursue graduate study or industrial careers in computing science. All of the mathematics core courses listed above except MATH 20210 are required, as well as 15 hours of mathematics electives, at least three hours of which are at the 40000 level.

In addition, the student must complete one of the following sequences of computing courses:

Software design option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 30246, fourth elective
 Theory option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 40411, CSE 40113
 Theory and compilers option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 40411, CSE 40443
 Computer architecture option: CSE 20211, CSE 20212, CSE 20221, CSE 20321, CSE 30322, fourth elective

Mathematics Education Program

This program is designed for students who plan a career in secondary education. The following mathematics courses are required in addition to the basic sequence listed above:

Introduction to Probability (MATH 30530)
 Mathematical Statistics (MATH 30540)
 Elective in Geometry (three credit hours)
 Elective in Mathematics (three credit hours)
 (One of these classes must be at the 40000 level)
 The following education courses are to be taken at Saint Mary's College: EDUC 201, 220, 340, 350, 356, 404, 451, and 475.

Mathematics and Business Administration Program

This program is designed to prepare students for a career in business or in the actuarial profession. The following mathematics courses are required in addition to the basic sequence:

Introduction to Probability (MATH 30530)
 Mathematical Statistics (MATH 30540)
 Introduction to Operations Research (MATH 30210)

Elective in Mathematics (three credits at the 40000 level)

Also required are ECON 20010 or its equivalent and the following courses from the College of Business: ACCT 20100, FIN 20100, MARK 20100, MGT 20200, and one course from the following list: ACCT 20200, FIN 30210, FIN 30220, FIN 30600, MGT 30610, MGT 40750, MARK 30110.

Mathematics and Engineering Science Program

This program is designed for students interested in applied or industrial mathematics. In addition to the mathematics core courses, the student is required to take one of MATH 40480, MATH 40390 or MATH 40750, and nine more credits of mathematics electives. The student must also complete one of the following two sequences of engineering classes:

Thermal option: AME 20221, AME 20222, AME 30031, AME 20231, AME 30334
 Structures and design option: AME 20221, CE 20170, AME 20231, CE 30200, CE 30356

MATHEMATICS

Mathematics and Social Science Program

This program is designed for students planning graduate school or a career in one of the social sciences with a strong mathematics and statistics background. In addition to the basic sequence, the following mathematics courses are required:

Introduction to Probability (MATH 30530)
 Mathematical Statistics (MATH 30540)
 Introduction to Operations Research (MATH 30210)
 Elective in Mathematics (three credits at the 40000 level)
 Moreover, the student must elect introductory courses in three of the social sciences, SOC 30902 and two courses at the 30000 or 40000 level in one of the social sciences.

Mathematics as a Second Major

Students in the Mendoza College of Business or the College of Arts and Letters may pursue a second major in mathematics by completing all mathematics courses required for the career mathematics concentration. See the list below. To list mathematics as a second major on the transcript, the student must satisfy all of the requirements for a major in some department of the Mendoza College of Business or the College of Arts and Letters.

MATH 10550–10560–20550. Calculus I-III	11.5
MATH 20750. Ordinary Differential Equations	3.5
MATH 20210. Computer Programming and Problem Solving	3
MATH 20610. Linear Algebra	3
MATH 20630. Introduction to Abstract Math	3
MATH 30710. Algebra	3
MATH 30750. Real Analysis	3
Mathematics electives	9*
Mathematics elective at the 40000 level	3*
	<hr/> 42 credits

* Students majoring in finance and business economics may reduce the number of mathematics electives to nine credits total by taking the following courses: MATH 30530, MATH 30540, and MATH 60850.

Sample Curriculum**(Mathematics Career Program):****First Year***First Semester*

¹ The student should take three general requirement courses during the first year, including one course that is designated a University Seminar. It is recommended that one course in history or social science be taken in the first year and one philosophy and one theology course be taken by the end of the sophomore year.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Mathematics](#) heading.

Certain graduate courses in mathematics are open to qualified advanced undergraduates, subject to the approval of the director of undergraduate studies. Other graduate courses are described in the *Graduate School Bulletin of Information*.

Physics*Chair:*

Program of Studies. Physics is the study and the description of the structure and the behavior of the physical universe. As such, it is fundamental to all physical sciences, pure and applied. A knowledge of physics is basic to an understanding of astronomy, chemistry, geology and even biology in that physics contributes to the interpretation and detailed description of many of the natural phenomena which constitute the proper subjects of investigation in these sciences.

In addition to the undergraduate curricula, the Department of Physics offers programs for graduate study leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

BACHELOR OF SCIENCE WITH A MAJOR IN PHYSICS

Science undergraduates may choose from three different majors within the Department of Physics: **physics**, **physics in medicine**, and **physics education**. The course sequences in these three programs are designed to accommodate the academic and professional interests of the majority of physics majors.

The basic physics major is a particularly flexible option for students, and is the one that will be chosen by the majority of undergraduates majoring in the department. Students following the physics major program will gain a basic broad understanding of physics. Depth is gained through the addition of one or more supplemental concentration programs offered through the department. Two of these concentration programs, **advanced physics** and **astrophysics**, help to prepare the student for graduate work in physics and astronomy or astrophysics. The **computing** concentration prepares the student for professions requiring working knowledge of various computer languages and experience using current computer technology. Students with interests in other areas have time to explore second-major, minor, or concentration options offered through departments in the College of Arts and Letters. The department expects to develop more concentration options in 2006–2007; students with alternative interests are encouraged to discuss these with the director of undergraduate studies.

No supplemental concentration is required of physics majors, but interested students are allowed and encouraged to follow as many concentrations as their schedules and interests allow. Students following either the **physics in medicine** or **physics education** major programs are not allowed to add concentrations; their major programs are designed to accommodate the special interests of students intending careers in medicine or high school teaching.

Physics as a second major is an option for students in the colleges of engineering, arts and letters, or business.

Requirements for the Physics Major

A total of 61.5 credits in science and mathematics is required for the **physics** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 10411,¹ 11411, 10424, 11424, 20435,² 21435)
 General Chemistry I, II (CHEM 10117,³ 11117, 10118,³ 11118)
 Calculus I, II, III (MATH 10550,⁴ 12550, 10560,⁴ 12560, 20550,⁴ 22550)
 Sophomore Seminar (PHYS 23411)
 Mathematical Methods in Physics I, II (PHYS 20451, 22451, 20452, 22452)
 Intermediate Mechanics (PHYS 20454)
 Electricity and Magnetism (PHYS 30471)
 Modern Physics I (PHYS 20464)
 Topics in Modern Physics II (PHYS 30465)
 Modern Physics I Laboratory (PHYS 40441, 41441)
 Thermal Physics (PHYS 30461)
 Quantum Mechanics I (PHYS 40454)

Physics majors may add as many of the following concentrations as their interests and schedules allow. Completion of these concentrations is indicated on the student's final transcript.

Concentration in Advanced Physics

The following outlines the course requirements (totaling 14 credits) for the **advanced physics** concentration:

Junior Seminar (PHYS 33411)
 Electromagnetic Waves (PHYS 30472)
 Quantum Mechanics II (PHYS 40544)
 Senior Seminar (PHYS 43411)
 Modern Physics II Laboratory (PHYS 40442, 41442) or 40000-level Math elective
 Physics Elective⁵

Concentration in Astrophysics

The following outlines the course requirements (totaling 14 credits) for the **astrophysics** concentration:

Junior Seminar (PHYS 33411)
 Intro Astronomy & Astrophysics M (PHYS 20481)
 Modern Observational Techniques (PHYS 30481)
 Senior Seminar (PHYS 43411)
 Astrophysics (PHYS 50445)
 Relativity: Special and General (PHYS 50472)

Concentration in Computing

The requirements are that the student completes 14-15 credits of computer science engineering courses, chosen with the aid of the Director of Undergraduate Studies.

Requirements for the Physics in Medicine Major

A total of 77.5 credits in science and mathematics is required for the **physics in medicine** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 10411,¹ 11411, 10424, 11424, 20435,² 21435)
 General Chemistry I, II (CHEM 10117,³ 11117, 10118,³ 11118)

Calculus I, II, III (MATH 10550,⁴ 12550, 10560,⁴ 12560, 20550,⁴ 22550)
 Sophomore Seminar (PHYS 23411)
 Mathematical Methods in Physics I, II (PHYS 20451, 22451, 20452, 22452)
 Intermediate Mechanics (PHYS 20454)
 Electricity and Magnetism (PHYS 30471)
 Modern Physics I (PHYS 20464)
 Topics in Modern Physics II (PHYS 30465)
 General Biology A, B (BIOS 20201,⁶ 21201, 20202,⁶ 21202)
 Elem. Organic Chemistry I, II (CHEM 20223, 21223, 20224, 21224)
 Three science electives (9 credits total)⁷

Requirements for the Physics Education Major

A total of 61.5 credits in science and mathematics and 27 credits in education are required for the **physics education** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 10411,¹ 11411, 10424, 11424, 20435,² 21435)
 General Chemistry I, II (CHEM 10117,³ 11117, 10118,³ 11118)
 Calculus I, II, III (MATH 10550,⁴ 12550, 10560,⁴ 12560, 20550,⁴ 22550)
 Mathematical Methods in Physics I, II (PHYS 20451, 22451, 20452, 22452)
 Intro Astronomy & Astrophysics M (PHYS 20481)
 Intermediate Mechanics (PHYS 20454)
 Electricity and Magnetism (PHYS 30471)
 Modern Physics I (PHYS 20464)
 Topics in Modern Physics II (PHYS 30465)
 Advanced physics laboratory⁸
 Science elective (4 credits)⁹

Teaching in a Multicultural Society (EDUC 201F)¹⁰
 Applied Media and Instructional Technology (EDUC 220)
 Curriculum and Assessment in the High School Setting (EDUC 345)
 Instructional Strategies and Classroom Management in the High School Setting (EDUC 346)

 Educational Psychology: Educating Exceptional Learners (EDUC 356)
 Teaching Science in the Middle School and High School (EDUC 475)

Requirements for Physics as a Second Major

The requirements for physics as a second major, for students in the colleges of engineering, arts and letters or business, consists of the physics and mathematics courses listed above for the **physics** major, except General Chemistry. To list physics as a second major on the transcript, the student must satisfy all of the requirements for a major in some department and college of the university.

Notes

- Alternative, PHYS 10310 and its laboratory and tutorial.
- Alternative, PHYS 10320 and its laboratory and tutorial.
- Alternatives for CHEM 10117-10118 include CHEM 10113-10114 or CHEM 10121 and 10122 or CHEM 10181-10182 plus the associated laboratories and tutorials.
- Honors Calculus I through IV (MATH 10850, 10860, 20850, and 20860) may substitute for Calculus I to III.
- Options include PHYS 20421 (Scientific Programming), PHYS 20481 (Introduction to Astronomy and Astrophysics), PHYS 30481 (Modern Observational Techniques), PHYS 30405 (Numerical Methods), PHYS 30432 (Lasers and Modern Optics), PHYS 48480 (Undergraduate Research: The student must take at least 3 credits in research with one advisor and the credits taken must be distributed over at least two semesters.), PHYS 50445 (Astrophysics), PHYS 50472 (Relativity: Special and General), MATH 40480 (Complex

- Variables). Physics electives cannot be double counted with requirements for the Astrophysics concentration.
- BIOS 10161, 11161, 10162, 11162 may substitute for BIOS 20201, 21201, 20202, 21202.
 - Students take three from the following: CHEM 40420 (Principles of Biochemistry), BIOS 20303 (Fundamentals of Genetics), BIOS 30344 (Vertebrate Physiology), BIOS 30341 (Cellular Biology), PHYS 40371 (Medical Physics), PHYS 40432 (Biological Physics).
 - Students choose one course from PHYS 30432, 31432 (Lasers and Modern Optics), PHYS 30481 (Modern Observational Techniques), and PHYS 40441, 41441 (Modern Physics I Laboratory).
 - The 4-credit science elective is a biology or geology course which includes a laboratory. Allowed choices include BIOS 20201, 21201 (General Biology A and its lab) or SC 20110, 21110 (Physical Geology and its lab). See the Director of Undergraduate Studies to discuss alternative choices.
 - All Education courses are taken through the co-exchange agreement with Saint Mary's College.
 - One of these courses must be a University Seminar.
 - PHYS 20481 (Introduction to Astronomy and Astrophysics) is offered in the fall of even years; PHYS 30481 (Modern Observational Techniques) is offered in the fall of odd years.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Physics](#) heading.

Preprofessional Studies

Interim Chair:

Rev. James K. Foster, CSC, MD

Associate Dean:

Sr. Kathleen Cannon, OP

Professional Specialists:

Kathleen J.S. Kolberg, PhD

Rudolph M. Navari, MD, PhD

Program of Studies. The Department of Preprofessional Studies offers several programs in the two major sequences, namely the program sequence in premedical science studies and the programs in the Collegiate Sequence.

All of the programs are quite flexible and allow the student to design a curriculum, in consultation with the chair or the associate dean in the College of Science, to enable the student to enter the profession best suited for his or her talents. The program in premedical science studies enables the student to obtain an excellent preparation to enter any of the professions of medicine, dentistry or the other

ancillary fields of the healing professions. The interdisciplinary programs of the collegiate sequence have been designed to offer significant flexibility to prepare students for the professions of Science-education, Science-business, and Science-computing. All of the programs allow for a strong science background while also allowing a diverse background in the arts and humanities for individuals with a desire to obtain a broad educational background.

The major goal of this department is to provide an education in the best of liberal traditions of scientific thought and analysis, which the student can utilize for career opportunities in a variety of fields.

The program sequence in premedical science studies is a special program within the Department of Preprofessional Studies for students preparing to enter the professions of medicine, dentistry, osteopathy, veterinary medicine, podiatry, optometry, or other allied-health professions.

Notre Dame has been recognized as an accredited institution for premedical studies for more than 100 years. A proper selection of courses leading to the degree of bachelor of science will qualify the student for admission to any medical or dental school. The year before his or her expected entrance to medical school, the student takes the Medical College Admission Test or Dental Admission Test. Students taking this test should have completed the basic courses in chemistry, biology and physics. The curricula leading to the degree of bachelor of science in other departments in the College of Science also satisfy the requirements for admission to medical or dental school.

Information concerning the requirements for admission to schools of medicine, dentistry, osteopathy, veterinary medicine, optometry and podiatry, as well as information on several ancillary health careers, is available from the new office in the Center for Health Science Advising, 219 Jordan Hall of Science.

* *One of these courses must be a University Seminar; the literature University Seminar in English 13186 is recommended (see note 6).*

** *See note 3.*

Notes:

1. Most of the course instruction in the curricula of the Department of Preprofessional Studies is provided by other departments in the College of Science and other colleges of the University.

2. The elective courses in the senior year may include a thesis based on laboratory work performed in a registered course in a given department with the approval of the head of that department, who will specify the number of credits assigned to the thesis.

** 3. The choice by the student of elective courses in science for the program in preprofessional studies will be based upon the requirements of the professional schools and upon the lists of courses suggested or recommended by those schools in which the student is interested; the choice will be based also upon the advice and counseling of the chair of the department. From the Medical and Dental School Requirements Books, the following courses would be the most highly recommended in addition to the five basic science courses, giving the student applicant the best science background to be a most attractive candidate to any school to which he or she wishes to apply: biochemistry, genetics, physiology, cell biology, developmental biology, and microbiology. Additional courses in higher mathematics, statistics and computer science are recommended for qualified students. Students not only must fulfill their requirements but, in the case of the natural sciences (mathematics, chemistry, biology and physics), also are strongly encouraged to follow the sequence of courses as listed. This sequence is designed in the light of health-related professional school requirements so that one course builds on knowledge gained from a prior course, even one from a different department; it is also structured to maintain a rigorous course load of at least two such courses per semester, with some adjustment possible in the senior year. Summer sessions, transfer credits and other modification in the regular curriculum should not be allowed to disturb this sequence of courses in the natural sciences without good reason.

4. For the selection of non-science electives for the programs, students should know that medicine and the other healing professions need individuals with a diversity of educational backgrounds and a wide variety of talents and interests. All of these schools recognize the desirability of a broad education—a good foundation in the natural sciences (mathematics, chemistry, biology and physics), highly developed communication skills and a solid background in the social sciences and humanities.

5. Recommendation 1 of the recent Report of the Association of American Medical Colleges titled “Physicians for the 21st Century” encourages a broadening of preparation. The department continues to encourage students to follow that recommendation by using the requirements of history and social science, English and the 27 general elective credits “to be an informed participant in

contemporary society by understanding its politics, history and economics. To appreciate the many dimensions of human experience requires informed reflection upon the literature, the philosophy and the arts . . . of all people in our society.”

6. To fulfill the medical school requirements of two semesters of English, students are required to take FYC 32000-level composition and one literature course taught in English. The literature course can be either a literature University Seminar in English 13186 or an upper-level literature course offered by the English Department and approved by the Department of Preprofessional Studies. Thus, if a student’s University Seminar requirement is met by one of the literature options (in English), then the student will not be required to take upper-level English literature. Note, for this major only, a course in fine arts is not acceptable for the University literature/fine arts requirement. (A fine arts course will count as a general elective.)

7. In the curriculum for the program, there are listed the several courses required for the degree, including one semester each of history and social science, a course in literature, two courses in philosophy and two courses in theology. Students should remember that none of the required courses can be taken as a pass/fail option.

8. Students who have completed only six hours of mathematics in the first year of studies may transfer into the program but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360, or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. Those students should see also the discussion on degree credit found later in this section of the Bulletin.

9. PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–31210.

10. Undergraduate Research (BIOS 48498 or SC 48100), Teaching Practicum (BIOS 37495), and Directed Readings (BIOS 48497) count toward the 64-hour preprofessional studies major science requirement; however, a maximum of two credits a semester and a combined total of six credit hours may be counted in fulfilling the 64-credit-hour science requirement as well as the maximum credit hours counted toward graduation. Directed Readings (SCPP 46397) counts as general elective credit.

11. All students are welcome to join the Preprofessional, Premedical or Predental Societies. In addition, premedical students are encouraged to join AMSA, the American Medical Student Association.

12. All students who have had previous exposure to language will be required to take a placement examination in that language for placement in the proper course if the student wishes to continue in that language for the college requirement. If a student wishes to take a new language, of course, he or she must start from the beginning.

13. Interested parties may obtain additional information including various statistics from the

department Web page. See <http://preprofessional.nd.edu>.

Summary of Requirements for the Degree of Bachelor of Science in Preprofessional Studies

	Credits
Biological Sciences	8
Chemistry	16
Mathematics	8
Physics	8
FYC 13000 level	3
Language, Intermediate-Level Competency	**11
Philosophy*	6
Theology*	6
History*	3
Social Science*	3
Literature (University Seminar 13186 or upper-level English literature; see note 6)	3
Science Electives	24
General Electives	**25

124

* One of these courses must be a University Seminar.

** Assumes Intermediate-Level Competency in Language was achieved by taking two four-credit and one three-credit courses.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Preprofessional Studies](#) heading.

COLLEGIATE SEQUENCE PROGRAMS

The three collegiate sequence programs, science-business, science-computing, and science-education, were instituted in 1987. These three programs allow students to obtain a strong science background while simultaneously preparing them for professions in business, computing or education.

SCIENCE-BUSINESS COLLEGIATE SEQUENCE

The Science-Business Collegiate Sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates courses from the basic areas of business along with the four basic areas of science. This approach enables students to attain a diversified background to enter an MBA program, leading to a position primarily in the scientific or health professions business areas. It is also a complete and sufficient program to enable the BS graduate of the sequence to enter the scientific business market immediately upon graduation.

Information on the areas of public health and hospital administration, as well as the business needs of the pharmaceutical, biological and chemical industries are available in the office of the Department of

Health Professions, 219 Jordan Hall of Science.

The other departments in the College of Science as well as the colleges of arts and letters and business administration provide all course instruction in the curricula of the Science-Business Collegiate Sequence.

BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-BUSINESS

All science-business majors take the following basic sequence of science courses:

General Biology (BIOS 20201–20202 and 21201 and 21202)¹

General Chemistry (CHEM 10117–10118)¹

Physical Geology (ENVG 20110) and Historical Geology (ENVG 20120)

or

Physical Geology (ENVG 20110) and Organic Chemistry I and Lab (CHEM 20223, 21223)

or

Organic Chemistry I and II and Labs (CHEM 20223–20224, 21223–21224)

Calculus (MATH 10350–10360 or 10550–10560)^{1,2}

Physics (PHYS 30210–30220)³

Statistics (MATH 20340 or BIOS 40411)

They also are required to take 20–21 credits of science electives,⁴ completing a minimum of 64 credits of science courses.

Also required for the major are the following business and economics courses:

Introduction to Economics (ECON 10010 or 20010)^{5,6}

Accounting and Accountancy I (ACCT 20100)
Business Finance (FIN 20100)

Introduction to Management (MGT 20200)

Introduction to Marketing (MARK 20100)

One business elective chosen from the following:

ACCT 20200

FIN 30210

FIN 30220

MGT 30610

MGT 40750

MARK 30110

Requirements for the program are summarized in the table above.

Notes:

- Equivalent or higher-level sequences in science may be substituted, e.g., CHEM 10113–10114 or CHEM 10181, 20284 for CHEM 10117–10118 or BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.
- Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250, (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus

should take both MATH 10350, 10360. (See also the discussion on science degree credit, found later in this section of the Bulletin.)

3. PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.

4. The choice by the student of the elective courses in science for the program will be discussed with the student and will be based on the future industrial or health professions business interests of the student. Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as “Recommended University electives”) and that are not being used to fulfill other specific graduation requirements can be used to satisfy the “Science Elective” requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits per semester (six total) for science credit and three credits per semester (nine total) for graduation credit of courses such as Undergraduate Research or Directed Readings.

5. The economics requirement for this major is fulfilled by taking Introduction to Economics either in the first year (ECON 10010) or in the sophomore year (ECON 20010). Students who have taken ECON 20220/20010 (Principles of Economics I) or ECON 20010 (Principles of Economics II) will fulfill this requirement. Note: The course ECON 13181 (Social Science University Seminar) will not fulfill the economics requirement for this major.

6. For this major, the University social science requirement will be fulfilled by the required economics course. Additional social science courses are recommended and will count toward the student’s general electives.

Suggested Curriculum for the Degree of Bachelor of Science in the Science-Business Collegiate Sequence (124 semester hour credits: 64 science hour credits, minimum)

SCIENCE-COMPUTING COLLEGIATE SEQUENCE

The science-computing collegiate sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates courses from the four basic areas of science along with a sequence of computing courses. The program will give the student working knowledge of various computer languages and experience using current computer technology. By choosing science electives appropriately, the student has the option of focusing

in an area in science of particular interest. Graduates of this program earn a BS degree and are able to enter the scientific computing job market immediately upon graduation.

The other departments in the College of Science as well as the colleges of arts and letters and engineering provide all course instruction in the curricula of the Science-Computing Collegiate Sequence.

BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-COMPUTING

All science-computing majors take the following basic sequence of science courses:

General Biology (BIOS 20201–20202 and 21201 and 21202)¹

General Chemistry (CHEM 10117–10118 and 11117–11118)¹

Physical Geology (ENVG 20110) and Historical Geology (ENVG 20120)

or

Physical Geology (ENVG 20110) and Organic Chemistry I and Lab (CHEM 20223, 21223)

or

Organic Chemistry I and II and Labs (CHEM 20223–20224, 21223–21224)

Calculus (MATH 10350–10360 or 10550–10560)^{1,2}

Physics (PHYS 30210–30220 and 31210–31220)³

Statistics (MATH 20340 or BIOS 40411)

They also are required to take 20–21 credits of science elective,⁴ completing a minimum of 64 credits of science courses.

Please see advisor for information on possible sequences in computing.

Requirements for the program are summarized in the table.

Notes:

- Equivalent or higher-level sequences in science may be substituted, e.g., CHEM 10113–10114 or CHEM 10125–11126 for CHEM 10117–10118 or BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.
- Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found later in this section of the Bulletin.)
- PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.
- The choice by the student of the elective courses in science for the Science-computing program will be based on the student's scientific interest as developed during his or her studies of the four basic areas of science. Any major-level College of

Science courses (i.e., those taken to meet science-major requirements and not those designated as “Recommended University electives”) and that are not being used to fulfill other specific graduation requirements can be used to satisfy the “Science Elective” requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits of courses such as Undergraduate Research or Directed Readings in the science elective total.

SCIENCE-EDUCATION COLLEGIATE SEQUENCE

The science-education collegiate sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates many courses from the four basic areas of science along with education courses that most states require to give the student the background necessary to receive a certificate to teach in a secondary education system. Information concerning the requirements for secondary education in the various states, as well as the general course requirements for a certificate necessary to teach science in a secondary education program, is available in the College of Science office, 174 Hurley Hall.

The other departments in the College of Science and the other colleges of the University, as well as the Education Department at Saint Mary's College, provide all course instruction in the curricula of the Science-Education Collegiate Sequence.

BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-EDUCATION

All science-education majors take the following basic sequence of science courses:

General Biology (BIOS 20201–20202 and 21201 and 21202)¹

General Chemistry (CHEM 10117–10118 and 11117–11118)¹

Physical Geology (ENVG 20110) and Historical Geology (ENVG 20120)

or

Physical Geology (ENVG 20110) and Organic Chemistry I and Lab (CHEM 20223, 21223)

or

Organic Chemistry I and II and Labs (CHEM 20223, 20224, 21223–21224)

Calculus (MATH 10350–10360 or 10550–10560)^{1,2}

Physics (PHYS 30210–30220)³

They also are required to take 20 credits of science electives,^{4,5} completing a minimum of 60 credits of science courses.

Also required for the major are the following education courses taught by Saint Mary's College:

EDUC 201. Teaching in a Multicultural Society
EDUC 220. Applied Media and Instructional Technology
EDUC 345. Curriculum and Assessment in the High School Setting
EDUC 346. Instructional Strategies and Classroom Management in the High School Setting

EDUC 350. Educational Psychology: Human Growth and Development of the Adolescent
EDUC 356. Educational Psychology: Educating Exceptional Learners
EDUC 449. Teaching Science in the Secondary School
EDUC 475. Student Teaching in the Secondary School (spring of senior year)

The education courses are those required in the State of Indiana but are also those that are required most often by the educational accrediting agencies of most states. The practical teaching experience which is required will also be arranged through the Education Department at Saint Mary's College.

SUMMARY OF MINIMAL REQUIREMENTS FOR THE DEGREE OF BACHELOR OF SCIENCE IN A COLLEGIATE SEQUENCE MAJOR			
	Science-Business Program	Science-Computing Program	Science-Education Program
Biological Sciences	8	8	8
Chemistry	8	8	8
Geology/Organic Chemistry	8	8	8

History*	3	3	3
Social Sciences	3	3	3
Literature/Fine Arts	3	3	3
Free Electives	10**	10**	0**
Total	124	124	128

* One of these courses must be a University Seminar.

** Assumes intermediate-level competency in language achieved by taking two 4.0 -credit- and one 3.0-credit courses.

Requirements for the program are summarized in the table found two pages back.

Notes:

1. Equivalent or higher-level sequences in science may be substituted, e.g., CHEM 10113–10114 or CHEM 10125, 20284 for CHEM 10117–10118 or BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.
2. Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found in this section.)
3. PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.
4. The choice by the student of the elective courses in science for the Science-education program will be based upon the requirements and list of courses suggested by the various state educational systems. Since the timing of the course work is particularly constrained for this major, the student should work closely with his or her advisors: an associate dean in the College of Science and an assigned advisor in the Education Department at Saint Mary's College.
5. Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as "Recommended University electives") and that are not being used to fulfill other specific graduation requirements can be used to satisfy the "Science Elective" requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits of courses such as Undergraduate Research or Directed Readings in the science elective total.

Suggested Curriculum for the Degree of Bachelor of Science in the Science-Education Collegiate Sequence (124 semester hour credits: 60 science hour credits, minimum)

Special Programs

DOUBLE MAJORS IN SCIENCE

In certain instances, students have the option of pursuing majors in two departments in the College of Science. Combinations that are normally approved include: Biological Sciences with Chemistry, Biological Sciences with Mathematics, Biological Sciences with Physics, Biochemistry with Mathematics, Biochemistry with Physics,

Chemistry with Mathematics, Chemistry with Physics, Environmental Sciences (first major) with Mathematics, and Mathematics with Physics. Examples of combinations that are normally forbidden include: Preprofessional Studies and any of the Collegiate Sequence majors with one another or with any other science major, parallel subprograms such as Mathematics and Life Sciences with Physics in Medicine and either of those with Biological Sciences or Biochemistry. All requirements of each major must be met, with no exceptions. Failing to complete a required course terminates that major for a student. Every student who wishes to major in two departments in the College of Science must prepare an agenda of specific courses to be taken, which both advisors and the dean must approve. This should be done as early as possible, but absolutely no later than the seventh day of the senior year. In certain instances, a student may possibly receive approval of a normally forbidden combination of majors, but only if a specific program has been set up by the seventh day of the sophomore year.

All double major programs in science are extremely challenging programs that require that the student take four or five science courses at a time. Thus, only students of superior scholastic ability should consider this as an option.

Students are warned that it is almost certain that completing a double major in two sciences will require total credits well over the college minimum of 124. Conflicts in scheduling of required courses may occur; neither the college nor the departments undertake to reschedule courses for the sake of double majors. For these reasons, it must be emphasized that completing a double major may well require more than four years. Only one degree is awarded (degrees in science do not specify a field).

Dual Degree Program with the Mendoza College of Business

Coordinators:

Mary Goss
Director of Admissions
Master of Business Administration Program
Mitchell R. Wayne
Associate Dean, College of Science

Program of Studies. The dual degree five-year program in the Mendoza College of Business and the College of Science enables the student to earn the master of business administration and bachelor of science degrees in a major in one of the five undergraduate departments in the College of Science.

This program, instituted in 1994, offers students the opportunity to better integrate studies in science and in management. The student completing this program will have a background in management as well as the first professional degree in one of the undergraduate majors of the College of Science. Because it is a demanding program, only those students of

COLLEGE OF SCIENCE

superior scholastic ability who have the aptitude, motivation and maturity necessary for the combined graduate and undergraduate program should apply. Those with outstanding internship experiences in business will be looked upon favorably. Advisors for the program are available for consultation about the advisability of applying for the program and about meeting the particular needs of students pursuing this program.

The program is open only to those currently enrolled Notre Dame students who have completed three years of an undergraduate science first major. Students interested in making application for the MBA/Science program should apply to the MBA program during their junior year. They should take the GMAT by December of their junior year. All candidates must schedule a personal interview as a part of the MBA admissions process. Students must also declare their intentions to the dean's office in the College of Science and request that a dean's eligibility letter be sent to the MBA Office for them.

An applicant who is not admitted to the dual degree MBA/Science program continues in the undergraduate program and completes his or her science major in the usual four-year period.

As a general guide, it is expected that a student accepted to this program will take two courses for the undergraduate degree during the summer session following his or her junior year. Every dual-degree student is also expected to participate in the orientation for the MBA program. This program will occupy the entire day for the two weeks prior to the first day of classes. Orientation is mandatory for all students beginning the MBA program.

Students in the five-year science/MBA program are also required to:

- (1) Complete a minimum of 48 MBA credit hours and maintain a GPA of at least 3.0 to successfully complete the program.
- (2) Take all MBA courses in their fourth year.
- (3) Maintain full-time student status (minimum course load of 12 credit hours per semester). Credit hours can come from science or MBA programs.

The MBA curriculum divides each semester into two modules. In addition to the courses required to complete undergraduate and University requirements, students must complete the following MBA course work:

Summer Session Following Junior Year:

Math Review Workshop*	0
Acc't Review Workshop*	0
(Science Undergraduate Requirements	6)

Senior Year (Science Undergraduate Requirements Each Semester 3–7)

<i>First Semester, Module 1:</i>

*Students have the option to take one additional two-credit-hour elective now or in any remaining module.

Second Semester, Interterm Week:

(OPTIONAL: Two one-credit-hour electives OR	
Corporate Case Studies OR	
Offshore Program: China or Brussels	2)

Second Semester, Module 4:

Free Electives	4
(Floating Optional Elective	2)

*See "Arts and Letters Core" on the first page of the College of Engineering section.

**Special one/two-week courses. All other MBA courses are seven weeks in length.

*Occurs during August Orientation

Total for both degrees: 126–132 undergraduate, 48 MBA

Students involved in the MBA/Science program will complete their undergraduate program while completing MBA requirements. MBA course work will not apply to the undergraduate degree. Sample schedules for particular majors are available from advisors or the dean's office. Students who are behind in the completion of their major requirements are strongly recommended to obtain permission and advising *before* applying to the joint program.

Nondepartmental Courses

Director:

TBA

Associate Dean, College of Science

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Science \(Nondepartmental\)](#) heading.

Science Degree Credit

Courses are generally taken in the College of Science for one of three reasons: (1) for students in either the College of Arts and Letters, or the Mendoza College of Business, or the School of Architecture, to fulfill a University requirement; (2) for students in either the College of Engineering or the College of Science to fulfill a college requirement; and (3) for students in the College of Science, to fulfill a major requirement. As a result, the College of Science offers different sequences of courses which overlap considerably in content but not level. Thus it is possible for a student who has changed his or her college or major to have taken two courses which overlap in content. Both courses will appear on the student's transcript, but only one will count for degree credit.

As a guideline for the student and the student's advisors, listed below are the groups of courses that overlap considerably in content. (Courses within the same group are shown in the same row and are also enclosed within parentheses; courses listed within the same column generally show a typical normal progression through course work.) In every case, only one course per group should be counted for degree credit. Generally, only the course taken last should be counted. Students and advisors are warned not

COLLEGE OF SCIENCE

Biological Sciences

(101/10101	110/10110	156/10156	161/10161	191/0191	201/20201)

(272/20452	MATH 20571	MATH 230/20750		MATH 325/30650)

Note also that no degree credit is given to any students for MATH 101; additionally, science majors will not receive degree credit for MATH 10120 or MATH 10110.

to use these groups when moving between course sequences but rather to seek advice from the offering department or the College of Science office.

For overlap with courses no longer taught in the year of publication of this *Bulletin*, please refer to previous editions of this *Bulletin*.

Officers of Administration

In the College of Science

JOSEPH P. MARINO, PhD
Dean of the College of Science

SR. KATHLEEN CANNON, OP, DMin.
Associate Dean of the College of Science

TBD
Associate Dean of the College of Science

JOSEPH E. O'TOUSA, PhD
Associate Dean of the College of Science

In the Departments and Programs

CHARLES F. KULPA, PhD
Chair of the Department of Biological Sciences

A. GRAHAM LAPPIN, PhD
*Chair of the Department of Chemistry and
Biochemistry*

WILLIAM G. DWYER, PhD
Chair of the Department of Mathematics

MITCHELL R. WAYNE, PhD
Chair of the Department of Physics

REV. JAMES K. FOSTER, CSC, MD
Chair, Preprofessional Studies

MORRIS POLLARD, PhD
Director of the Lobund Laboratory

IAN CARMICHAEL, PhD
Director of the Radiation Laboratory

ANDREW J. SOMMESE, PhD
Director of the Center for Applied Mathematics

MARK S. ALBER, PhD
Director of the Center for Study of Biocomplexity

FRANK H. COLLINS, PhD
*Director of the Center for Tropical Disease Research and
Training*

DAVID R. HYDE, PhD
Kenna Director of the Center for Zebrafish Research

MARK A. SUCKOW, D.V.M.
Director of the Freimann Life Sciences Center

RUDOLPH M. NAVARI, M.D., PhD
Director of the Walther Cancer Research Center

FRANCIS J. CASTELLINO, PhD
*Director of the W.M. Keck Center for Transgene
Research*

Faculty

The following is the official faculty roster for the 2005–2006 academic year. This roster includes faculty members who are on leave during the academic year. The date in parentheses at the close of each entry is the year the individual joined the Notre Dame faculty.

Ruth Maree Abbey, Associate Professor of Political Science. B.A., Monash Univ., 1984; MA, McGill Univ., 1989; Ph.D., *ibid.*, 1995 (2005)

Carl B. Ackermann, Associate Professional Specialist of Finance. AB, Amherst College, 1984; PhD, Univ. of North Carolina, 2000 (1998)

John H. Adams, Professor of Biological Sciences. BA, Hendrix College, 1978; MS, Univ. of Illinois, 1982; PhD, *ibid.*, 1986 (1991)

Steven Affeldt, Assistant Professor, Program of Liberal Studies, and Fellow of the Nanovic Institute for European Studies. AB, Univ. of California, Berkeley, 1984; PhD, Harvard Univ., 1996 (2000)

John F. Affleck–Graves, Executive Vice President and the Notre Dame Professor of Finance. BSc, Univ. of Cape Town, South Africa, 1972; MSc, *ibid.*, 1974; PhD, *ibid.*, 1977; BCom, *ibid.*, 1982 (1986)

Asma Afsaruddin, Associate Professor of Classics and Fellow in the Joan B. Kroc Institute for International Peace Studies. AB, Oberlin College, 1982; MA, Johns Hopkins Univ., 1985; PhD, *ibid.*, 1993 (1996)

Gonzalo Aguilar, Guest Research Professor in the Helen Kellogg Institute for International Studies. BS, Colegio de Bachilleres Plantel Cotija, 1992; MA, Instituto Tecnológico de Jiquilpan, 1997; PhD, Univ. de Guadalajara, 1999 (2004)

Terrence J. Akai, Associate Dean and Professional Specialist in the Graduate School and Concurrent Associate Professor of Mathematics. BA, Univ. of Washington, 1971; BS, *ibid.*, 1971; MS, Univ. of Illinois, 1973; PhD, *ibid.*, 1976 (1978)

Mark S. Alber, Notre Dame Professor of Applied Mathematics and Concurrent Professor of Physics. PhD, Univ. of Pennsylvania, 1990 (1990)

Carol L. Alberts, Visiting Fellow in the Mendelson Center for Sport, Character and Community. BS, Northeastern Univ., 1974; MS, Pennsylvania State Univ., 1976; EdD, St. John's Univ., 1985 (2002)

Bethany Albertson, Visiting Instructor of Political Science. MA, Loyola Marymount Univ., 1999 (2004)

Joan Aldous, the William R. Kenan Jr. Professor of Sociology. BS, Kansas State Univ., 1948; MA, Univ. of Texas, 1949; PhD, Univ. of Minnesota, 1963 (1976)

Charles W. Allen, Professor Emeritus of Materials Science and Engineering. BS, Univ. of Notre Dame, 1954; MS, *ibid.*, 1956; PhD, *ibid.*, 1958 (1959)

Sheri Ann Alpert, Associate Professional Specialist, Reilly Center for Science, Technology and Values. BA, Indiana Univ., 1979; MA, Univ. of Texas at Austin, 1982; MPA, Indiana Univ., 1985; PhD, George Mason Univ., 2001 (2000)

Samuel Amago, Assistant Professor of Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies. BA, Univ. of California, San Diego, 1996; MA, Univ. of Virginia, 1999; PhD, *ibid.*, 2003 (2003)

Joseph P. Amar, Associate Professor of Classics and Concurrent Associate Professor of Theology. BA, Catholic Univ. of America, 1970; STB, *ibid.*, 1973; STL, *ibid.*, 1974; MA, *ibid.*, 1983; PhD, *ibid.*, 1988 (1988)

Geraldine B. Ameriks, Associate Professional Specialist and Concurrent Lecturer in Romance Languages and Literatures. BA, Smith College, 1969; MA, Stanford Univ., 1971 (1980)

Karl P. Ameriks, the McMahon–Hank Professor of Philosophy and Fellow in the Nanovic Institute for European Studies. BA, Yale Univ., 1969; PhD, *ibid.*, 1973 (1973)

Charlotte A. Ames, Librarian Emerita. BA, Marquette Univ., 1960; MA, Catholic Univ., 1963; MLS, Indiana Univ., 1968 (1969)

Robert L. Amico, Professor of Architecture. BArch, Univ. of Illinois at Urbana; MArch, Harvard Univ., 1965 (1978)

JosŽ P. Anad—n, Professor of Romance Languages and Literatures. BA, Albion College, 1968; MA, Univ. of Michigan, 1970; PhD, *ibid.*, 1974 (1975)

D. Chris Anderson, Professor Emeritus of Psychology. BS, Univ. of Portland, 1955; MA, *ibid.*, 1957; PhD, *ibid.*, 1966 (1967)

Gary A. Anderson, Professor of Theology. BA, Albion College, 1977; MDiv, Duke Univ., 1981; PhD, Harvard Univ., 1985 (2003)

Thomas F. Anderson, Associate Professor of Romance Languages and Literatures and Fellow in the Helen Kellogg Institute for International Studies. BA, Bowdoin College, 1992; MA, Univ. of Pennsylvania, 1994; PhD, *ibid.*, 1998 (1998)

Panagiotis J. Antsaklis, the H.C. and E.A. Brosey Professor of Electrical Engineering and Concurrent Professor of Computer Science and Engineering. Dipl, National Tech. Univ. of Athens, 1972; ScM, Brown Univ., 1974; PhD, *ibid.*, 1977 (1980)

R. Scott Appleby, the John M. Regan Jr. Director of the Joan B. Kroc Institute for International Peace Studies and Fellow in the Helen Kellogg Institute for International Studies. BA, Univ. of Notre Dame, 1978; MA, Univ. of Chicago, 1979; PhD, *ibid.*, 1985 (1994)

Ani Arahamian, Professor of Physics. BA, Clark Univ., 1980; PhD, *ibid.*, 1986 (1989)

Francisco Aragon, Director of Letras Latinas at the Institute for Latino Studies and Adjunct Assistant Professor in English. BA, Univ. of California, Berkeley, 1989; MA, New York Univ., 1990; MA, Univ. of California, Davis, 2000; MFA, Univ. of Notre Dame, 2003 (2003)

Ltc. John Larner Arata, Assistant Professor of Military Science. BS, Ohio State Univ., 1979; MSA, Central Michigan Univ., 1994 (2000)

J. Douglas Archer, Librarian. BA, Duke Univ., 1968; MDiv, Colgate Rochester Crozer Divinity School, 1972; MSL, Western Michigan Univ., 1981 (1981)

Heidi Ardizzone, Assistant Professor of American Studies. MA, Univ. of Michigan, 1991; PhD, *ibid.*, 1997 (2002)

Gerald B. Arnold, Professor of Physics. BA, Northwestern Univ., 1969; MS, Univ. of California, Los Angeles, 1972; PhD, *ibid.*, 1977 (1978)

Peri E. Arnold, Director of the Hesburgh Program in Public Service and Professor of Political Science. BA, Roosevelt Univ., 1964; MA, Univ. of Chicago, 1967; PhD, *ibid.*, 1972 (1971)

Julie Arnott, Librarian. B.A., Univ. of Missouri–St. Louis, 1976; MA, Univ. of Illinois, Urbana, 1986 (2005)

Wendy Kaye Arons, Assistant Professor of Film, Television, and Theatre, and Fellow, Nanovic Institute for European Studies. BA, Yale Univ., 1986; MFA, Univ. of California, San Diego, 1990; MA, *ibid.*, 1995; PhD, *ibid.*, 1997 (1999)

Carolina Arroyo, Associate Professional Specialist in Political Science. BA, State Univ. of New York, Buffalo, 1983; MA, Stanford Univ., 1990 (1996)

Imdat As, Assistant Professor of Architecture. B.A., Middle East Technical Univ., 2000; M.S., Massachusetts Institute of Technology, 2002; Ph.D., Harvard Univ., 2005 (2005)

James Matthew Ashley, Director of Graduate Studies and Associate Professor of Theology and Fellow in the Reilly Center for Science, Technology and Values. BS, St. Louis Univ., 1982; MTS, Weston School of Theology, 1988; PhD, Univ. of Chicago, 1993 (1993)

Klaus–Dieter Asmus, Professor Emeritus of Chemistry and Biochemistry, Radiation Laboratory. Vordiplom, Technical Univ., Berlin, 1960; Dipl, *ibid.*, 1963; PhD, *ibid.*, 1965 (1995)

Hafiz M. Atassi, the Viola D. Hank Professor of Engineering. Dipl Eng, Univ. de Paris, 1963; Lic, Univ. of Paris, 1963; PhD, *ibid.*, 1966 (1969)

Robert Audi, the David E. Gallo Professor of Business Ethics. BA, Colgate Univ., 1963; MA, Univ. of Michigan, 1965; PhD, *ibid.*, 1967 (2003)

David E. Aune, Professor of Theology. BA, Wheaton College, 1961; MA, *ibid.*, 1963; MA, Univ. of Minnesota, 1965; PhD, Univ. of Chicago, 1970 (1999)

Rev. Robert J. Austgen, CSC, Professional Specialist Emeritus in Political Science. AB, Univ. of Notre Dame, 1955; STL, Gregorian Univ., 1959; STD, Univ. of Fribourg, 1963 (1983)

Louis J. Ayala, Assistant Professor of Political Science. AB, Princeton Univ., 1995; PhD, Stanford Univ., 2001 (2001)

Richard E. Azuma, Adjunct Professor of Physics. BA, Univ. of British Columbia, 1951; MA, *ibid.*, 1953; PhD, Univ. of Glasgow, Scotland, 1959 (2003)

Christine M. Babick Saqui, Director, Strategic Communications Planning. B.A., New York Univ., 1988; MA, Columbia Univ., 1997 (2001)

Susie Paulik Babka, Visiting Assistant Professor of Theology. BA, Univ. of Notre Dame, 1989; MTS, Duke Univ. Divinity School, 1993; MA, Univ. of Notre Dame, 1997; PhD, *ibid.*, 2004 (2004)

FACULTY

- Richard H. Bailey, Adjunct Instructor in Marketing. BA, Spring Arbor College, 1978 (1999)
- Reginald F. Bain, Associate Professor Emeritus of Film, Television, and Theatre. AB, Univ. of Notre Dame, 1957; MA, Univ. of Arizona, 1961; PhD, Univ. of Minnesota, 1972 (1966)
- Brian M. Baker, Assistant Professor of Chemistry and Biochemistry. BS, New Mexico State Univ., 1992; PhD, Univ. of Iowa, 1997 (2001)
- Harriet E. Baldwin, Assistant Professional Specialist, College of Arts and Letters. BS, Kansas State Univ., 1966 (1985)
- Kate Anderson Baldwin, Associate Professor of English. BA, Amherst College, 1988; PhD, Yale Univ., 1995 (1997)
- Aaron B. Bales, Assistant Librarian, University Libraries. BA, Harvard Univ., 1988; MLS, Indiana Univ., 2001 (2002)
- Larry G. Ballinger, Associate Professional Specialist Emeritus in the Mendoza College of Business. BS, Eastern Illinois Univ., 1959; MSIA, Univ. of Notre Dame, 1970 (1978)
- Deborah J. Ballou, Assistant Professor of Management. BA, Bryn Mawr College, 1978; MPA, Univ. of Texas, Austin, 1990; PhD, Carnegie Mellon Univ., 1995 (1996)
- Dinshaw S. Balsara, Assistant Professor of Physics. HSC, Jai Hind College, Bombay, 1977; MSc, Indian Institute of Technology, 1982; MS, Univ. of Chicago, 1986; PhD, Univ. of Illinois at Urbana, 1990 (2001)
- Rev. Leonard N. Banas, CSC, Assistant Professor Emeritus of Classics. BA, Univ. of Notre Dame, 1949; STL, Gregorian Univ., 1953; MA, Princeton Univ., 1961 (1960)
- David Paul Banga, Visiting Instructor in Music. BA, Redeemer Univ. College, 1997; MMus, Univ. of Ottawa, 2000 (2004)
- Albert-László Barabási, the Emil T. Hofman Professor of Physics. MA, Eotvos Univ. Budapest, 1991; PhD, Boston Univ., 1994 (1995)
- Charles E. Barber, the Michael P. Grace Professor of Art, Art History and Design. BA, Courtauld Institute of Art, London, 1986; PhD, *ibid.*, 1989 (1996)
- Sotirios A. Barber, Professor of Political Science. BA, Univ. of Illinois, 1964; MA, Univ. of Chicago, 1966; PhD, *ibid.*, 1973 (1986)
- Robert N. Barger, Adjunct Associate Professor in the Computer Applications Second Major Program. BA, St. Thomas Univ., 1961; MAT, *ibid.*, 1966; MA, *ibid.*, 1966; MDiv, *ibid.*, 1975; PhD, Univ. of Illinois, 1976 (1994)
- Amy Coney Barrett, Assistant Professor of Law. BA, Rhodes College, 1994; JD, Notre Dame, 1997 (2001)
- Matthew J. Barrett, Professor of Law. BBA, Univ. of Notre Dame, 1982; JD, *ibid.*, 1985 (1990)
- Katrina D. Barron, Assistant Professor of Mathematics. AB, Univ. of Chicago, 1987; PhD, Rutgers Univ., 1996 (2001)
- Kevin Barry, Acting Director of Center for Creative Computing and Associate Director and Associate Professional Specialist in the Kaneb Center for Teaching and Learning and Concurrent Instructor in Computer Applications. BS, Florida Institute of Technology, 1988; MS, *ibid.*, 1990; Ed.S., *ibid.*, 1997 (1997)
- Rev. Ernest J. Bartell, CSC, Professor Emeritus of Economics, Faculty Fellow in the Helen Kellogg Institute for International Studies and in the Institute for Educational Initiatives. PhB, Univ. of Notre Dame, 1953; AM, Univ. of Chicago, 1954; MA, Holy Cross College, 1961; PhD, Princeton Univ., 1966 (1961, 1966, 1980)
- David M. Bartels, Professional Specialist in the Radiation Laboratory and Concurrent Professor of Chemistry and Biochemistry. BS, Hope College, 1977; PhD, Northwestern Univ., Evanston, 1982 (2003)
- Viva Ona Bartkus, Associate Professor of Management. BA, Yale Univ., 1989; MA, *ibid.*, 1989; MPhil, Univ. of Oxford, 1991; PhD, *ibid.*, 1993 (2004)
- Elliot M. Bartky, Adjunct Associate Professor in the Program of Liberal Studies. BA, Rutgers Univ., 1974; MA, *ibid.*, 1978; PhD, *ibid.*, 1983 (1990)
- Willis E. Bartlett, Associate Professor Emeritus of Psychology. BS, Ohio State Univ., 1960; MA, *ibid.*, 1962; PhD, *ibid.*, 1967 (1968)
- Subhash C. Basu, Professor of Chemistry and Biochemistry. BS, Calcutta Univ., 1958; MS, *ibid.*, 1960; PhD, Univ. of Michigan, 1966; DSc, Univ. of Calcutta, 1976 (1970)
- Stephen M. Batill, Chair and Professor of Aerospace and Mechanical Engineering. BS, Univ. of Notre Dame, 1969; MS, *ibid.*, 1970; PhD, *ibid.*, 1972 (1978)
- Joseph P. Bauer, Professor of Law. BA, Univ. of Pennsylvania, 1965; JD, Harvard Univ., 1969 (1973)
- Peter H. Bauer, Professor of Electrical Engineering. DiplEng in Electrical Engineering, Technische Univ. Muenchen, 1984; PhD, Univ. of Miami, 1987 (1988)
- Gerard F. Baumbach, Professional Specialist and Director, Center for Catechetical Initiatives in the Institute for Church Life and Concurrent Professor of Theology. BA, Saint Michael's College, 1968; MEd, Univ. of Maryland, 1975; EdD, New York Univ., 1989 (2003)
- Barry W. Baumbaugh, Professional Specialist in Physics. BS, Indiana Institute of Technology, 1976 (1988)
- Rev. Michael J. Baxter, CSC, Assistant Professor of Theology. BA, Allegheny College, 1977; MDiv, Univ. of Notre Dame, 1983; PhD, Duke Univ., 1996 (1996)
- Laura Bayard, Librarian. BS, Shippensburg State College, 1969; MLS, Univ. of Pittsburgh, 1974 (1989)
- Timothy J. Bays, Assistant Professor of Philosophy. BA, Northwestern Univ., 1988; PhD, Univ. of California, Los Angeles, 1994; PhD, *ibid.*, 2000 (1999)
- Edward N. Beatty, Associate Professor of History and Fellow in the Helen Kellogg Institute for International Studies. BA, Princeton Univ., 1983; MA, Univ. of New Mexico, 1992; PhD, Stanford Univ., 1996 (2000)
- Christine Ann Becker, Assistant Professor of Film, Television, and Theatre, and Fellow, Nanovic Institute for European Studies. BA, Univ. of Illinois, Champaign, 1993; MA, Univ. of Wisconsin, Madison, 1995; PhD, Univ. of Wisconsin, 2001 (2000)
- Frederick S. Beckman, Professor Emeritus of Art, Art History and Design. BFA, Univ. of Notre Dame, 1942; MA, Columbia Univ., 1949 (1946)
- Mary Patricia Beckman, Professional Specialist and Associate Director of the Center for Social Concerns, and Concurrent Associate Professor in the Dept. of Economics. BA, Univ. of Notre Dame, 1975; MA, *ibid.*, 1985; PhD, *ibid.*, 1986 (2001)
- Gail Bederman, Associate Professor of History. BFA, New York Univ., 1978; MA, Brown Univ., 1984; PhD, *ibid.*, 1992 (1992)
- Salvatore J. Bella, the Jesse Jones Professor Emeritus of Management. BS, Boston Univ., 1947; MA, *ibid.*, 1948; PhD, Cornell Univ., 1962 (1958)
- Jaime Bellalta, Professor Emeritus of Architecture. BSArch, Catholic Univ. of Chile, 1949; Cert., Univ. of London, 1961 (1976)
- Anthony Joseph Bellia Jr., Associate Professor of Law. BA, Canisius College, 1991; JD, Univ. of Notre Dame, 1994 (2000)
- Patricia Louise Bellia, Associate Professor of Law. AB, Harvard Univ., 1991; JD, Yale Univ., 1995 (2000)
- James O. Bellis, Associate Professor of Anthropology. AB, Indiana Univ., 1961; MA, *ibid.*, 1965; PhD, *ibid.*, 1972 (1970)
- Gary E. Belovsky, the Martin J. Gillen Director of UNDERC and Professor of Biological Sciences. BBA, Univ. of Notre Dame, 1972; MFS, Yale Univ., 1972; PhD, Harvard Univ., 1977 (2001)
- Harvey A. Bender, Professor of Biological Sciences. BA, Case Western Reserve Univ., 1954; MS, Northwestern Univ., 1957; PhD, *ibid.*, 1959 (1960)
- Matthew Francis Benedict, Associate Professional Specialist in English. BA, Univ. of Massachusetts, Amherst, 1985; MA, Univ. of Notre Dame, 1994 (1994)
- David P. Bennett, Research Associate Professor of Physics. BS, Case Western Reserve Univ., 1981; PhD, Stanford Univ., 1986 (1996, 2001)
- Geoffrey J. Bennett, Professor in the London Law Program. BA, Cambridge Univ., 1974; MA, *ibid.*, 1978 (1991)
- John J. Bentley, Associate Professional Specialist and Assistant Director of the Radiation Laboratory. BS, College of Holy Cross, 1967; MS, Carnegie Mellon Univ., 1970; PhD, *ibid.*, 1975 (1982, 1984)
- Kurt O. Berends, Assistant Professional Specialist and Coordinator, PEW Scholars Program, and Concurrent Assistant Professor of History. BA, Michigan State Univ., 1985; MA, Wheaton College, 1993; PhD, St. Catherine's College, Oxford Univ., 1998 (2000)
- Cindy S. Bergeman, Professor of Psychology; Chair, Department of Psychology. BS, Univ. of Idaho, 1979; MS, Pennsylvania State Univ., 1987; PhD, *ibid.*, 1989 (1990)
- Doris Bergen, Professor of History, Fellow in the Nanovic Institute for European Studies, and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Univ. of Saskatchewan, 1982; MA, Univ. of Alberta, 1984; PhD, Univ. of North Carolina, 1991 (1996)

FACULTY

- Jeffrey H. Bergstrand, Professor of Finance and Business Economics, Fellow in the Helen Kellogg Institute for International Studies, and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Northwestern Univ., 1974; MA, Univ. of Wisconsin, 1979; PhD, *ibid.*, 1981 (1986)
- Edgar D. Berners, Research Professor Emeritus of Physics. BS, College of the Holy Cross, 1949; MS, Univ. of Wisconsin, 1952; PhD, *ibid.*, 1957 (1967)
- Gary H. Bernstein, Professor of Electrical Engineering. BSEE, Univ. of Connecticut, 1979; MSEE, Purdue Univ., 1981; PhD, Arizona State Univ., 1987 (1988)
- H. Gordon Berry, Professor of Physics. BA, Oxford Univ., 1962; MA, *ibid.*, 1963; MS, Univ. of Wisconsin, Madison, 1963; PhD, *ibid.*, 1967 (1994)
- William B. Berry, Professor Emeritus of Electrical Engineering. BSEE, Univ. of Notre Dame, 1953; MSEE, *ibid.*, 1957; PhD, Purdue Univ., 1963 (1963)
- Louis J. Berzai, Associate Professional Specialist in the Computer Applications Program of the College of Arts and Letters. BGS, Indiana Univ., 1984; MA, Indiana Univ., South Bend, 1995 (1984)
- Nora J. Besansky, Professor of Biological Sciences. BS, Oberlin College, 1982; MS, Yale Univ., 1987; PhD, *ibid.*, 1990 (1997)
- Phillip H. Bess, Professor of Architecture. B.A., Whittier College, 1973; M.T.S., Harvard Univ. Divinity School, 1976; M.Arch., Univ. of Virginia School of Architecture, 1981 (2003)
- Joanne M. Bessler, Organizational Development Librarian. BA, Univ. of Cincinnati, 1971; MLS, Univ. of Kentucky, 1972 (1984)
- David M. Betson, Associate Professor of Economics. BA, Kalamazoo College, 1972; MA, Univ. of Wisconsin, 1975; PhD, *ibid.*, 1980 (1982)
- John G. Beverly, Associate Professor Emeritus of Accountancy. BSBA, Univ. of Florida, 1951; MS, Florida State Univ., 1961; PhD, Univ. of North Carolina, 1971 (1967)
- Ikaros S. Bigi, Grace-Rupley II Professor of Physics. MA, Max-Planck Institute, 1973; PhD, *ibid.*, 1976 (1988)
- Steven E. Billet, Adjunct Professor in the Washington, D.C. Program. BA, East Carolina Univ., Greenville, 1974; MA, *ibid.*, 1982; PhD, Univ. of Notre Dame, 1986 (2003)
- Otto Bird, Professor Emeritus in the Program of Liberal Studies. AB, Univ. of Michigan, 1935; AM, *ibid.*, 1936; PhD, Univ. of Toronto, 1939 (1950)
- Alexander Blachly, Professor of Music. BA, Haverford College, 1967; MA, Columbia Univ., 1972; PhD, *ibid.*, 1995 (1993)
- John A. Blacklow, Assistant Professor of Music. BA, Harvard Univ., 1987; MM, Juilliard School, 1989; DMA, Univ. of Southern California, 1996 (2002)
- Howard A. Blackstead, Professor of Physics. BS, North Dakota State Univ., 1962; MA, Dartmouth College, 1964; PhD, Rice Univ., 1967 (1969)
- Katharina J. Blackstead, Librarian. BA, Univ. of Illinois, 1969; MS, *ibid.*, 1970; MSA, Univ. of Notre Dame, 1979 (1973)
- G. Robert Blakey, the William J. and Dorothy O'Neill Professor of Law. AB, Univ. of Notre Dame, 1957; JD, *ibid.*, 1960 (1969, 1980)
- Patricia Blanchette, Associate Professor of Philosophy. BA, Univ. of California, San Diego, 1983; PhD, Stanford Univ., 1990 (1993)
- Katherine A. Bland, Assistant Professor of Philosophy. BS, King's College London, Univ. of London, 1992; BPhil, Univ. of Oxford, 1996; PhD, *ibid.*, 2001 (2004)
- Rev. Thomas E. Blantz, CSC, Professor of History. AB, Univ. of Notre Dame, 1957; STL, Gregorian Univ., Rome, 1961; MA, Univ. of Notre Dame, 1963; PhD, Columbia Univ., 1968 (1968)
- Joseph Blenkinsopp, the John A. O'Brien Professor Emeritus of Old Testament Studies. BA, Univ. of London, 1948; STL, International Theological Institute, Turin, 1956; DPhil, Univ. of Oxford, 1967 (1970)
- Matthew Bloom, Associate Professor of Management. BS, Baker Univ., 1983; MA, Univ. of Kansas, 1989; PhD, Cornell Univ., 1996 (1996)
- W. Martin Bloomer, Associate Professor of Classics. BA, Yale Univ., 1982; MA, *ibid.*, 1983; MPhil, *ibid.*, 1984; PhD, *ibid.*, 1987 (1998)
- Susan Debra Blum, Associate Professor of Anthropology. AB, Stanford Univ., 1980; MA, Univ. of Michigan, 1986; MA, *ibid.*, 1988; PhD, *ibid.*, 1994 (2000)
- Joseph Bobik, Professor of Philosophy. BA, St. Bernard's College and Seminary, 1947; MA, Univ. of Notre Dame, 1951; PhD, *ibid.*, 1953 (1955)
- Thomas E. Bogenschild, Professional Specialist and Director of International Programs. AB, Occidental College, 1977; AM, Univ. of Chicago, 1984; PhD, Univ. of California, Berkeley, 1992 (1995)
- William C. Boggess Jr., Professional Specialist in Chemistry and Biochemistry. BS, Davis and Elkins College, 1988; PhD, Univ. of Tennessee, 1994 (1994)
- Steven M. Boker, Associate Professor of Psychology. BA, Univ. of Denver, 1972; MA, Univ. of Virginia, 1994; PhD, *ibid.*, 1996 (1996)
- Ana V. Bolino, Adjunct Instructor in Management. BS, Academy of Economic Studies–Romania, 1994; MBA, Winthrop Univ., South Carolina, 1997 (2002)
- Frank J. Bonello, Associate Professor of Economics. BS, Univ. of Detroit, 1961; MA, *ibid.*, 1963; PhD, Michigan State Univ., 1968 (1968)
- Mario Borelli, Associate Professor Emeritus of Mathematics and Director of Special Instructional Projects and Activities. BS, Scuola Normale di Pisa, 1956; PhD, Indiana Univ., 1961 (1965)
- John G. Borkowski, the Andrew J. McKenna Family Professor of Psychology and Fellow in the Institute for Educational Initiatives. MA, Ohio Univ., 1962; PhD, Univ. of Iowa, 1965 (1967)
- Samir K. Bose, Professor Emeritus of Physics. BS, Delhi Univ., 1956; MS, *ibid.*, 1958; PhD, Univ. of Rochester, 1962 (1966)
- David J. Botkin, Adjunct Assistant Professor of Psychology. BS, Michigan State Univ., 1977; MA, Univ. of Kentucky, 1980; PhD, *ibid.*, 1984 (1999)
- Eileen M. Hunt Botting, Thomas J. and Robert T. Rolfs Assistant Professor of Political Science. BA, Bowdoin College, 1993; BA, Cambridge Univ., 1995; MA, Yale Univ., 1996; MPhil, *ibid.*, 1998; PhD, *ibid.*, 2001 (2001)
- D'Arcy J.D. Boulton, Professional Specialist in the Medieval Institute and Concurrent Associate Professor of History. BA, Trinity College, Univ. of Toronto, 1969; MA, Univ. of Pennsylvania, 1970; PhD, *ibid.*, 1978; DPhil, St. John's College, Univ. of Oxford, 1976 (1985)
- Maureen B.M. Boulton, Professor of Romance Languages and Fellow of the Medieval Institute. BA, College of New Rochelle, 1970; MA, Univ. of Pennsylvania, 1972; PhD, *ibid.*, 1976; MLitt, Univ. of Oxford, 1980 (1985)
- Calvin M. Bower, Professor of Music. BMus, Southwestern Louisiana Institute, 1960; MA, Peabody College at Vanderbilt Univ., 1963; PhD, *ibid.*, 1967 (1981)
- Alan P. Bowling, Assistant Professor of Aerospace and Mechanical Engineering. BS, Univ. of Texas at Austin, 1988; MS, Stanford Univ., 1992; PhD, *ibid.*, 1998 (2001)
- Kevin W. Bowyer, the Schubmehl–Prein Chair of Computer Science and Engineering and Concurrent Professor in Electrical Engineering. BS, George Mason Univ., 1976; PhD, Duke Univ., 1980 (2001)
- Sunny K. Boyd, Associate Professor of Biological Sciences. AB, Princeton Univ., 1981; MS, Oregon State Univ., 1984; PhD, *ibid.*, 1987 (1987)
- Patricio Boyer, Instructor of Romance Languages and Literatures. B.A., Yale Univ., 1998; MPhil, *ibid.*, 2001 (2005)
- Fernandre D. Boze, Associate Librarian. BA, Univ. of Illinois, 1977; MS, *ibid.*, 1989 (1991)
- Carol A. Szambelan Brach, Associate Librarian. BA, Duquesne Univ., 1973; MLS, Univ. of Pittsburgh, 1975 (1991)
- Raymond M. Brach, Professor Emeritus of Aerospace and Mechanical Engineering. BS, Illinois Institute of Technology, 1958; MS, *ibid.*, 1962; PhD, Univ. of Wisconsin, 1965 (1965)
- Kevin Duane Bradford, Assistant Professor of Marketing. BA, Univ. of Northern Iowa, 1984; MBA, Univ. of Notre Dame, 1991; PhD, Univ. of Florida (1999)
- Douglas E. Bradley, Professional Specialist, Snite Museum of Art, and Concurrent Associate Professor of Anthropology. BA, Univ. of Notre Dame, 1971; M.M.P., Univ. of Michigan, 1975 (1987)
- Gerard V. Bradley, Professor of Law. BA, Cornell Univ., 1976; JD, Cornell Univ., 1980 (1992)
- Keith R. Bradley, Chair and the Eli J. Shaheen Professor of Classics and Concurrent Professor in the Dept. of History. BA, Sheffield Univ., 1967; MA, *ibid.*, 1968; BLitt, Oxford Univ., 1970; LittD, Sheffield Univ., 1997 (2001)
- Rev. Paul F. Bradshaw, Professor of Theology and Director of London Undergraduate Program. BA,

FACULTY

- Cambridge Univ., 1966; MA, *ibid.*, 1970; PhD, King's College, 1971; DD, Univ. of Oxford, 1994 (1985)
- Steven J. Brady, Assistant Professional Specialist in First Year of Studies and Concurrent Assistant Professor of History. BA, Roosevelt Univ., 1989; MA, Univ. of Notre Dame, 1995; PhD, *ibid.*, 1998 (1998)
- Jay W. Brandenberger, Professional Specialist in the Center for Social Concerns, Concurrent Associate Professor of Psychology, and Fellow in the Institute for Educational Initiatives. BA, Univ. of Notre Dame, 1978; MA, Univ. of Pittsburgh, 1987; PhD, *ibid.*, 1990 (1992)
- Robert Brandt, Professional Specialist in Architecture and Concurrent Assistant Professor in Art, Art History, and Design. B.S., Univ. of Southern Indiana, 1986; M.F.A., Indiana State Univ., 1989 (1991)
- John Mead Brauer, Associate Professional Specialist in the College of Engineering. BS, Univ. of Buffalo, 1967; MS, *ibid.*, 1969 (2003)
- Wolfgang Braungart, Visiting Professor of German and Russian Languages and Literatures. BA, Univ. of Braunschweig, 1979; MA, *ibid.*, 1982; PhD, Univ. of Giessen, 1994 (2003)
- Julia M. Braungart-Rieker, Professor of Psychology, Associate Dean for Research, Graduate Studies, and Centers. BS, Syracuse Univ., 1987; MS, Pennsylvania State Univ., 1990; PhD, *ibid.*, 1992 (1992)
- James P. Breen, Adjunct Instructor in Accountancy. BA, Univ. of Notre Dame, 1974; MS, DePaul Univ., 1978 (2000)
- Joseph X. Brennan, Professor Emeritus of English. AB, Providence College, 1945; MA, Brown Univ., 1949; PhD, Univ. of Illinois, 1953 (1955)
- Sheilah Brennan, Associate Professor Emerita of Philosophy. BA, Laval Univ., 1950; MA, *ibid.*, 1951; LPh, *ibid.*, 1952; PhD, *ibid.*, 1954 (1971)
- Joan F. Brennecke, the Keating-Crawford Professor of Chemical Engineering. BS, Univ. of Texas, 1984; MS, Univ. of Illinois, 1987; PhD, *ibid.*, 1989 (1989)
- Sarah Ellen Brenner, Assistant Professional Specialist in First Year of Studies. MA, Ohio State Univ., 2003 (2003)
- Roger K. Bretthauer, Professor Emeritus of Chemistry and Biochemistry. AA, Blackburn College, 1954; BS, Univ. of Illinois, 1956; MS, *ibid.*, 1958; PhD, Michigan State Univ., 1961 (1964)
- Robert D. Bretz Jr., Chair and the Joe and Jane Giovannini Professor of Management. BA, Bethany College, 1980; MBA, Univ. of Kansas, 1984; PhD, *ibid.*, 1988 (1997)
- Scott D. Bridgham, Associate Professor of Biological Sciences. BA, Univ. of Maine, 1980; BA, *ibid.*, 1982; MS, Univ. of Minnesota, 1986; PhD, Duke Univ., 1991 (2002)
- George A. Brinkley Jr., Professor Emeritus of Political Science. AB, Davidson Univ., 1953; MA, Columbia Univ., 1955; PhD, *ibid.*, 1964 (1958)
- Jay B. Brockman, Associate Professor of Computer Science and Engineering and Concurrent Associate Professor of Electrical Engineering. ScB, Brown Univ., 1982; MS, Carnegie Mellon Univ., 1988; PhD, *ibid.*, 1992 (1992)
- Thomas F. Broden, Professor Emeritus of Law. LLB, Univ. of Notre Dame, 1949; JD, Univ. of Chicago, 1950 (1950)
- Jacqueline Vaught Brogan, Professor of English. BA, Southern Methodist Univ., 1974; MA, *ibid.*, 1975; PhD, Univ. of Texas, 1982 (1986)
- Barbara Z. Brook, Adjunct Assistant Professor of Law. BSEd, Indiana Univ., 1972; JD, Univ. of Notre Dame, 1987 (1998)
- Nyame O. Brown, Assistant Professor of Art, Art History and Design. BFA, School of the Art Institute of Chicago, 1993; MFA, Yale Univ., 1997 (2002)
- Seth N. Brown, Associate Professor of Chemistry and Biochemistry. BS, Massachusetts Institute of Technology, 1988; PhD, Univ. of Washington, 1994 (1996)
- Allert Brown-Gort, Associate Director and Assistant Professional Specialist in the Institute for Latino Studies, and Fellow of the Helen Kellogg Institute for International Studies. BA, Univ. of Texas at Austin, 1982; MPA, *ibid.*, 1998 (1999)
- Michael C. Brownstein, Associate Professor of East Asian Languages and Literatures and Fellow, Nanovic Institute for European Studies. BA, California State Univ., Northridge, 1972; BA, Monterey Institute of International Studies, 1973; MA, Columbia Univ., 1978; PhD, *ibid.*, 1981 (1982)
- Janice E. Brunner, Adjunct Instructor, Master of Education Program. AB, Chestnut Hill College, 1963; MAT, Univ. of Notre Dame, 1964 (2001)
- Gerald L. Bruns, the William P. and Hazel B. White Professor of English. BA, Marquette Univ., 1960; MA, *ibid.*, 1962; PhD, Univ. of Virginia, 1966 (1984)
- Ramzi Kamal Bualuan, Associate Professional Specialist and Director of Undergraduate Studies in Computer Science and Engineering. BS, American Univ. of Beirut, 1983; MS, Univ. of Notre Dame, 1985 (1990)
- Kasey Buckles, Assistant Professor in Economics and Econometrics. B.A., Univ. of Kentucky, 2000; MA, Boston Univ., 2003 (2005)
- Steven A. Buechler, Professor of Mathematics. BA, Eastern Illinois Univ., 1975; BS, *ibid.*, 1975; MA, Univ. of Maryland, 1977; PhD, *ibid.*, 1981 (1987)
- Andrea M. Bueno, Assistant Professional Specialist in First Year of Studies. BA, Saint Mary's College, 1999; ME, Univ. of Notre Dame, 2001 (2001)
- Rev. Richard S. Bullene, CSC, Associate Professional Specialist and Assistant Chair of Architecture. BArch, Univ. of Notre Dame, 1976; MDiv, *ibid.*, 1981; MS, Univ. of Pennsylvania, 1992; PhD, *ibid.*, 1994 (1993)
- Bruce A. Bunker, Professor of Physics. BSc, Univ. of Washington, 1974; PhD, *ibid.*, 1980 (1983)
- Karen L. Buranskas, Associate Professor of Music. BMus, Indiana Univ., 1973; MM, Yale Univ., 1977 (1979)
- Thomas G. Burish, Provost, Professor of Psychology, AB, Univ. of Notre Dame, 1972; MA, Univ. of Kansas, 1975; PhD, *ibid.*, 1976 (2005)
- Bartley A. Burk, Associate Librarian, University Libraries. BS, Brigham Young Univ., 1978; MLIS, *ibid.*, 1990 (1990)
- Leo Francis Burke, Professional Specialist and Associate Dean, Executive Programs, Mendoza College of Business, and Concurrent Professor in the MBA Executive Education Program. BA, Univ. of Notre Dame, 1970; MA, Indiana Univ., 1977; MS, Aurora Univ., 1989 (2000)
- Peter C. Burns, Chair and the Henry J. Massman Jr. Associate Professor of Civil Engineering and Geological Sciences. BSc, Univ. of New Brunswick, 1988; MSc, Univ. of Western Ontario, 1990; PhD, Univ. of Manitoba, 1994 (1997)
- Robert E. Burns, Professor Emeritus of History. BA, Northeastern Univ., 1951; AM, Harvard Univ., 1953; PhD, *ibid.*, 1961 (1957)
- Rev. David B. Burrell, CSC, the Rev. Theodore M. Hesburgh, CSC, Professor of Theology and Philosophy, and Fellow in the Joan B. Kroc Institute for International Peace Studies. AB, Univ. of Notre Dame, 1954; STL, Gregorian Univ., 1960; PhD, Yale Univ., 1965 (1964)
- Jorge A. Bustamante, the Eugene and Helen Conley Professor of Sociology and Fellow in the Helen Kellogg Institute for International Studies. B.Law, Centro Univ., Mexico, 1955; MA, Univ. of Notre Dame, 1970; PhD, *ibid.*, 1975 (1986)
- Nigel B. Butterwick, Librarian. BS, Univ. of Ulster, 1974; MLS, Queen's Univ., Belfast, 1978; MS, *ibid.*, 1986; MBA, *ibid.*, 2001 (2003)
- Joseph A. Buttigieg, the William R. Kenan Jr. Professor of English and Fellow in the Nanovic Institute for European Studies. BA, Univ. of Malta, 1968; BPhil, Heythrop College, 1970; MA, Univ. of Malta, 1972; PhD, State Univ. of New York, Binghamton, 1976 (1980)
- Sondra J. Byrnes, Adjunct Assistant Professor of Law. BA, Univ. of North Dakota, 1967; JD, Univ. of Detroit Law School, 1986 (2003)
- Theodore J. Cachey Jr., Chair and Professor of Romance Languages and Literatures and the Albert J. Ravarino Family Director of the Devers Program in Dante Studies. BA, Northwestern Univ., 1978; MA, Univ. of California, Los Angeles, 1982; PhD, *ibid.*, 1986 (1990)
- Pascal Vincent Calarco, Associate Librarian. BA, Univ. of Western Ontario, 1991; MLIS, McGill Univ., 1995 (2004)
- Alejandro Esteban Camacho, Associate Professor of Law. B.A., Univ. of California, Irvine, 1995; J.D., Harvard Law School, 1998; LL.M., Georgetown Univ., 2005 (2005)
- David E. Campbell, Assistant Professor of Political Science. BA, Brigham Young Univ., 1996; MA, Harvard Univ., 2001; PhD, *ibid.*, 2002 (2002)
- Sr. Kathleen Cannon, OP, Associate Dean and Professional specialist in the College of Science and Concurrent Associate Professor of Theology. BA, Ohio Dominican College, 1965; MA, Providence College, 1975; DMin, Catholic Univ. of America, 1982 (1990)
- Jianguo Cao, Professor of Mathematics. BS, Nanjing Univ., 1982; SM, *ibid.*, 1985; PhD, Univ. of Pennsylvania, 1989 (1996)
- William J. Carbonaro, Assistant Professor of Sociology and Fellow of the Institute for Educational Initiatives. BA, Washington Univ., St. Louis, 1990; MA, *ibid.*, 1991;

FACULTY

- MS, Univ. of Wisconsin, Madison, 1996; PhD, *ibid.*, 2000 (2000)
- Gilberto Cárdenas, Assistant Provost for Institutional Relations and Diversity, the Julian Samora Professor of Latino Studies, Director of the Center for Latino Studies, Professor of Sociology, and Fellow in the Helen Kellogg Institute for International Studies. BA, California State Univ., MA, Univ. of Notre Dame, 1972; PhD, *ibid.*, 1977 (1999)
- Laura A. Carlson, Associate Professor of Psychology. BA, Dartmouth College, 1987; MA, Michigan State Univ., 1991; PhD, Univ. of Illinois, Urbana–Champaign, 1994 (1994)
- Ian C. Carmichael, Professor of Chemistry and Biochemistry and Director of the Radiation Laboratory. BSc, Univ. of Glasgow, 1971; PhD, *ibid.*, 1975 (1980)
- Edward J. Caron, Assistant Professional Specialist and University Supervisor, Master of Education Program. BA, Univ. of Notre Dame, 1997; MT, Univ. of Portland, 1999; PhD, Univ. of Iowa, 2002 (2002)
- Paolo G. Carozza, Associate Professor of Law, Fellow in the Helen Kellogg Institute for International Studies, and Fellow in the Joan B. Kroc Institute for International Peace Studies. AB, Harvard Univ., 1985; JD, *ibid.*, 1989 (1996)
- John K. Caruso, Assistant Professor of Art, Art History and Design. BFA, Center for Creative Studies, 1987; MFA, Univ. of Illinois at Chicago, 1996 (1999)
- Lisa Casey, Associate Professor of Law. AB, Stanford Univ., 1984; JD, *ibid.*, 1987 (2001)
- Anne–Marie Cashmere, Assistant Professional Specialist, Master of Education Program. BA, Louisiana State Univ., 1992; MEd, *ibid.*, 1993; PhD, Univ. of Virginia, 2001 (2002)
- Neal M. Cason, Interim Chair and Professor of Physics. AB, Ripon College, 1959; MS, Univ. of Wisconsin, 1961; PhD, *ibid.*, 1964 (1965)
- Douglass Cassel, Professor of Law. B.A., Yale College, 1969; J.D., Harvard Law School, 1972 (2005)
- Francis J. Castellino, Kleiderer–Pezold Professor of Chemistry and Biochemistry, Director, W.M. Keck Center for Transgene Research, and Dean Emeritus of Science. BS, Univ. of Scranton, 1964; MS, Univ. of Iowa, 1966; PhD, *ibid.*, 1968 (1970)
- Darlene Catello, Adjunct Instructor in Music. BA, Denison Univ., 1959; MM, Univ. of Notre Dame, 1976; MM, Univ. of Michigan, 1987; MSW, Western Michigan Univ., 1991 (1988)
- John C. Cavadini, Chair and Associate Professor of Theology and Director, Institute for Church Life. BA, Wesleyan Univ., 1975; MA, Marquette Univ., 1979; MA, Yale Univ., 1980; MPhil, *ibid.*, 1983; PhD, *ibid.*, 1988 (1990)
- David Cavalieri, Research Specialist in Aerospace and Mechanical Engineering. BS, Illinois Institute of Technology; MS, *ibid.* (2003)
- William Cerny, Professor Emeritus of Music. BA, Yale Univ., 1951; BMus, *ibid.*, 1952; MM, *ibid.*, 1954 (1972)
- Paul R. Chagnon, Professor Emeritus of Physics. BS, College of Holy Cross, 1950; PhD, Johns Hopkins Univ., 1955 (1963)
- Jessica Chalmers, Assistant Professor of Film, Television, and Theatre. BA, Barnard College, 1984; MA, City College of New York, 1990; PhD, New York Univ., 1999 (1999)
- Angie Ricks Chamblee, Associate Dean and Associate Professional Specialist in the First Year of Studies. BA, Univ. of Notre Dame, 1973; MA, Michigan State Univ., 1974 (1976)
- Surendar Chandra, Assistant Professor of Computer Science and Engineering. BE, Anna Univ., Madras, India, 1988; MS, Worcester Polytech., 1993; PhD, Duke Univ., 2000 (2002)
- Hsueh–Chia Chang, the Bayer Corporation Professor of Chemical and Biomolecular Engineering. BS, California Institute of Technology, 1976; PhD, Princeton Univ., 1980 (1987)
- Mayland Chang, Professional Specialist in Chemistry and Biochemistry. BS, Univ. of Southern California, 1981; PhD, Univ. of Chicago, 1985 (2003)
- Yu–Chi Chang, Associate Professor of Management. BA, Taiwan Univ., 1955; MA, Univ. of California, Berkeley, 1963; PhD, Univ. of Wisconsin, 1972 (1971)
- Isabel Charles, Associate Provost Emerita. BA, Manhattan College, 1954; MA, Univ. of Notre Dame, 1960; PhD, *ibid.*, 1965 (1973)
- Amitabh Chaudhary, Assistant Professor of Computer Science and Engineering. B.Tech., Indian Institute of Technology, Kharagpur, India, 1992; M.Tech., Indian Institute of Technology, Mumbai, India, 1996; Ph.D., Johns Hopkins Univ., 2002 (2005)
- Nitesh Chawla, Research Assistant Professor of Computer Science and Engineering. BE, Maharashtra Institute of Technology, 1997; MS, Univ. of South Florida, 2000; PhD, *ibid.*, 2002 (2004)
- Danny Z. Chen, the Phillip B. Rooney Professor of Computer Science and Engineering. BS, Univ. of San Francisco, 1985; MS, Purdue Univ., 1988; PhD, *ibid.*, 1992 (1992)
- Zilin Chen, Research Assistant Professor of Chemical and Biomolecular Engineering. M.S., Wuhan Univ., 1991; Ph.D., Tokyo Metropolitan Univ., 2000 (2004)
- Meredith Slater Chesson, Assistant Professor of Anthropology. BA, Brown Univ., 1989; MA, Harvard Univ., 1993; PhD, *ibid.*, 1997 (2000)
- Bakshy A. Chibber, Research Associate Professor and Concurrent Assistant Professor of Chemistry and Biochemistry. BSc, India Institute of Technology, 1968; PhD, Univ. of Waterloo, Canada, 1972 (1986)
- Daniel M. Chipman, Professional Specialist in the Radiation Laboratory and Concurrent Professor of Chemistry and Biochemistry. BS, Iowa State Univ., 1967; PhD, Univ. of Wisconsin, 1972 (1976)
- Byung T. Cho, Associate Professor of Management. AB, Seoul National Univ., 1949; MA, Univ. of South Carolina, 1957; PhD, Univ. of Illinois, 1963 (1966)
- Peter Cholak, Professor of Mathematics. BA, Union College, 1984; MA, Univ. of Wisconsin, 1988; MS, *ibid.*, 1988; PhD, *ibid.*, 1991 (1994)
- Sy Min Chow, Assistant Professor of Psychology. BS, Drexel Univ., 1998; MA, Univ. of Virginia, 2001; PhD, *ibid.*, 2004 (2004)
- Kevin J. Christiano, Associate Professor of Sociology. BA, College of William and Mary, 1977; MA, Princeton Univ., 1980; PhD, *ibid.*, 1983 (1983)
- Elizabeth A. Christman, Associate Professor Emerita of American Studies. AB, Webster College, 1935; MA, New York Univ., 1966; PhD, *ibid.*, 1972 (1976)
- Leonard Chrobot, Adjunct Professor of Sociology, Concurrent Professor of History, and Coordinator of the American Polish Research Fellowship Program. BA, St. Mary's College–Orchard Lake, 1960; MDiv, Cyril and Methodius Seminary, 1964; MA, Purdue Univ., 1967; PhD, Wayne State Univ., 1975 (1989)
- Mathew A. Chrystal, Assistant Professional Specialist in Science Computing. BS, California Polytechnic State Univ., 1983; MS, Univ. Minnesota, 1997; PhD Univ. Minnesota, 2001 (2001)
- F. Richard Ciccone, Adjunct Professor of American Studies. BA, Univ. of Notre Dame, 1961 (1992)
- David A. Clairmont, Assistant Professor of Theology. B.B.A., Univ. of Notre Dame, 1996; MA, Univ. of Chicago Divinity School, 2000; Ph.D., Univ. of Chicago, 2005 (2005)
- G. Christopher Clark, Associate Professional Specialist and Assistant Director of the John A. Kaneb Center for Teaching and Learning and Concurrent Instructor in Computer Applications Program. BA, Cornell Univ., 1975; MA, Univ. of Rochester, 1980 (1999)
- Patricia L. Clark, the Clare Boothe Luce Assistant Professor of Biochemistry. BS, Georgia Institute of Technology, Atlanta, 1991; PhD, Univ. of Texas Southwestern Medical Center, Dallas, 1997 (2001)
- Aedin Clements, Associate Librarian. B.A., Univ. College, Dublin, 1980; Diploma, Univ. College, Dublin, 1982; Ph.D., Western Michigan Univ., 2005 (2005)
- Granville Cleveland, Assistant Law Librarian Emeritus. BS, Central State College, 1960 (1969)
- Paul M. Cobb, Associate Professor of History and Faculty Fellow in the Joan B. Kroc Institute for International Peace Studies and the Medieval Institute. BA, Univ. of Massachusetts, 1989; MA, Univ. of Chicago, 1991; PhD, *ibid.*, 1997 (1999)
- Laurel P. Cochrane, Associate Librarian, Kresge Law Library. BA, Indiana Univ., 1979; MLS, *ibid.*, 1988 (2002)
- Dorothy Coil, Associate Librarian Emerita. BA, Ohio Northern Univ., 1971; MLS, Indiana Univ., 1972 (1973)
- Amy E. Colbert, Assistant Professor of Management. BS, Culver–Stockton College, 1995; MS, Saint Louis Univ., 1999; PhD, Univ. of Iowa, 2004 (2004)
- Clayton Kenneth Cole, Associate Professional Specialist in Film, Television, and Theatre. BA, The College of William and Mary, 1986; MFA, Yale Univ., 1991 (2003)

FACULTY

- Jon T. Coleman, Assistant Professor of History. BA, Univ. of Colorado, 1992; MA, *ibid.*, 1997; PhD, Yale Univ., 2003 (2004)
- Robert R. Coleman, Associate Professor of Art, Art History and Design; Research Specialist in the Medieval Institute; and Fellow of the Nanovic Institute. BA, State Univ. of New York College, New Paltz, 1970; MA, Univ. of Chicago, 1973; PhD, *ibid.*, 1988 (1982, 1990)
- Sr. Regina A. Coll, CSJ, Professional Specialist Emerita in Theology. BS, St. John's Univ., 1958; MTS, Catholic Univ., 1965; MA, Fordham Univ., 1977; EdD, Columbia/ Union College, 1982 (1984)
- Rev. Austin I. Collins, CSC, Professor of Art, Art History and Design. BA, Univ. of Notre Dame, 1977; MDiv, Graduate Theological Union, 1981; MFA, Claremont Graduate School, 1985 (1985)
- Frank H. Collins, the George and Winifred Clark Professor of Biological Sciences, Director of the Center for Tropical Disease Research and Training, and Director of the Indiana Center for Insect Genomics. BA, Johns Hopkins Univ., 1966; MA, Univ. of East Anglia, 1973; PhD, Univ. of California, Davis, 1981 (1997)
- James M. Collins, Associate Professor of Film, Television, and Theatre and Concurrent Associate Professor of English. BA, Univ. of Iowa, 1975; Centres des Etudes Cinematographique, France, 1977; PhD, Univ. of Iowa, 1984 (1985)
- Kathleen Ann Collins, Assistant Professor of Political Science, Fellow in the Helen Kellogg Institute for International Studies, Fellow in the Joan B. Kroc Institute for International Peace Studies, and Fellow in the Nanovic Institute. BA, Univ. of Notre Dame, 1993; MA, Stanford Univ., 1995; PhD, *ibid.*, 2000 (2001)
- Oliver Collins, Professor of Electrical Engineering. BS, California Institute of Technology, 1986; MS, *ibid.*, 1987; PhD, *ibid.*, 1989 (1995)
- Sandra D. Collins, Assistant Professional Specialist in Management. BA, Indiana Univ. at South Bend, 1994; MA, Univ. of Notre Dame, 1997; PhD, Univ. of Notre Dame, 1999 (1999)
- Walton R. Collins, Adjunct Associate Professor of American Studies. AB, Univ. of Notre Dame, 1951; MPA, Indiana Univ., 1976 (1983)
- Philippe A. Collon, Assistant Professor of Physics. Lic, Catholic Univ. of Louvain, Belgium, 1993; PhD, Univ. Wien, Vienna, 1999 (2003)
- Maria S. Coloma, Assistant Professional Specialist in Romance Languages and Literatures. BA, Univ. of San Marcos, 1984; MA, Univ. of Pittsburgh, 1997 (2000)
- Jack J. Colwell, Adjunct Associate Professor of American Studies. BS, Univ. of Illinois, 1958 (2000)
- Eileen Conley, Librarian Emerita, Engineering Library. BS, College of St. Catherine, 1930 (1930)
- Edward J. Conlon, the Edward Frederick Sorin Society Professor of Management. BS, Pennsylvania State Univ., 1972; MS, Carnegie Mellon Univ., 1975; PhD, *ibid.*, 1978 (1992)
- Barbara M. Connolly, Assistant Professor of Political Science, Fellow of the Nanovic Institute for European Studies, and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Brown Univ., 1988; MA, Univ. of California–Berkeley, 1990; PhD, *ibid.*, 1997 (2001)
- Francis X. Connolly, Professor of Mathematics. BS, Fordham Univ., 1961; MS, Univ. of Rochester, 1963; PhD, *ibid.*, 1965 (1971)
- Rev. Michael E. Connors, CSC, Associate Professional Specialist in Theology and Director of the Master of Divinity Program. BA, Illinois College, 1977; MDiv, Univ. of Notre Dame, 1983; ThD, Regis College/Toronto School of Theology, Univ. of Toronto, 1997 (1997)
- Olivia Remie Constable, Professor of History. BA, Yale Univ., 1983; PhD, Princeton Univ., 1989 (1995)
- Paul F. Conway, Associate Professor of Finance and Business Economics. BBA, Siena College, 1950; MS, State Univ. of New York, Albany, 1951 (1956)
- Michael Coppedge, Associate Professor of Political Science and Fellow in the Helen Kellogg Institute for International Studies. BS, Randolph–Macon College, 1979; MA, Yale Univ., 1982; PhD, *ibid.*, 1988 (1995)
- Steven Corcelli, Assistant Professor of Chemistry and Biochemistry. Sc.B., Brown Univ., 1997; Ph.D., Yale Univ., 2002 (2005)
- Thomas C. Corke, the Clark Equipment Professor of Aerospace and Mechanical Engineering, Director of the Center for Flow Physics and Control, and Director of the Hessert Laboratory for Aerospace Research. BA, Illinois Institute of Technology, 1974; MS, *ibid.*, 1976; PhD, *ibid.*, 1981 (1999)
- Alexandra F. Corning, Assistant Professor of Psychology. BS, Univ. of Florida, 1988; MS, Loyola Univ., Chicago, 1990; PhD, Ohio State Univ., 1994 (2000)
- Edmundo Corona, Associate Professor of Aerospace and Mechanical Engineering. BS, Univ. of Texas, Austin, 1983; MS, *ibid.*, 1986; PhD, *ibid.*, 1990 (1991)
- David B. Cortright, Visiting Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Univ. of Notre Dame, 1968; MA, New York Univ., 1970; PhD, Union Graduate (1989)
- Shane A. Corwin, Associate Professor of Finance and Business Economics. BS, Mankato State Univ., 1990; MBA, *ibid.*, 1992; PhD, Ohio State Univ., 1996 (2000)
- Suzanne M. Coshow, Assistant Professional Specialist in Physics. BA, San Francisco State Univ., 1994; MA, Univ. of Notre Dame, 1997; PhD, *ibid.*, 2003 (2003)
- Thomas F. Cosimano, Professor of Finance and Concurrent Professor of Economics and Econometrics. BS, State Univ. of New York, Buffalo, 1974; MA, *ibid.*, 1977; PhD, *ibid.*, 1979 (1987)
- Daniel J. Costello, the Leonard Bettex Professor of Electrical Engineering. BSEE, Seattle Univ., 1964; MSEE, Univ. of Notre Dame, 1966; PhD, *ibid.*, 1969 (1985)
- Donald P. Costello, Professor Emeritus of English. AB, DePaul Univ., 1955; MA, Univ. of Chicago, 1956; PhD, *ibid.*, 1962 (1960)
- Rev. John A. Coughlin, OFM, Professor of Law. BA, Niagra Univ., 1976; MA, Columbia Univ. Teacher's College, 1982; ThM, Princeton Theological Seminary, 1984; JD, Harvard Univ., 1987; JCD, Gregorian Univ., 1993 (2003)
- Donald Crafton, Chair of the Department of Music and Professor of Film, Television, and Theatre and Fellow in the Nanovic Institute for European Studies. BA, Univ. of Michigan, 1969; MA, Univ. of Iowa, 1970; MA, Yale Univ., 1974; PhD, *ibid.*, 1977 (1997)
- Craig J. Cramer, Professor of Music. BMus, Westminster Choir College, 1976; MM, Eastman School of Music, 1977; DMA, *ibid.*, 1983 (1981)
- James Michael Crant, Professor of Management. BSBA, Univ. of Florida, 1983; MBA, *ibid.*, 1985; PhD, Univ. of North Carolina, 1990 (1990)
- Charles Craypo, Professor Emeritus of Economics. BA, Michigan State Univ., 1959; MA, *ibid.*, 1961; PhD, *ibid.*, 1966 (1978)
- Xavier Creary, the Charles L. Huisiking Sr. Professor of Chemistry and Biochemistry. BS, Seton Hall Univ., 1968; PhD, Ohio State Univ., 1973 (1974)
- Frederick J. Crosson, the Cavanaugh Professor of Humanities Emeritus. BA, Catholic Univ. of America, 1949; MA, *ibid.*, 1950; PhD, Univ. of Notre Dame, 1956 (1953)
- John T. Croteau, Professor Emeritus of Economics. AB, Holy Cross College, 1931; MA, Clark Univ., 1932; PhD, *ibid.*, 1935; LL.D., St. Joseph's Univ., Canada, 1956 (1953)
- Michael J. Crowe, the Rev. John J. Cavanaugh, CSC, Professor Emeritus of Humanities. BS, Univ. of Notre Dame, 1958; BA, *ibid.*, 1958; PhD, Univ. of Wisconsin, 1965 (1961)
- Norman A. Crowe, Professor of Architecture. BArch, Univ. of Oregon, 1964; MArch, Cornell Univ., 1970 (1974)
- Charles R. Crowell, Associate Professor of Psychology and Director of the Computer Applications Program. AB, Univ. of Notre Dame, 1969; MA, Univ. of Iowa, 1972; PhD, *ibid.*, 1973 (1974)
- Roy D. Crowninshield, Adjunct Professor of Aerospace and Mechanical Engineering. BS, Univ. of Vermont, 1971; MS, *ibid.*, 1973; PhD, *ibid.*, 1975 (2004)
- Hal Robert Culbertson, Professional Specialist, Joan B. Kroc Institute for International Peace Studies. BA, Wheaton College, 1986; MA, Univ. of Illinois Graduate College, 1990; JD Univ. of Illinois Law School, 1991; MA, Univ. of Notre Dame, 1996 (1997)
- C. Leigh Culver, Adjunct Assistant Professor of Art, Art History and Design. BA, Smith College, 1986; MA, Williams College, 1992; PhD, Univ. of Pennsylvania, 1999 (2001)
- E. Mark Cummings, the Notre Dame Professor of Psychology, Fellow in the Joan B. Kroc Institute for International Peace Studies, and Fellow in the Nanovic Institute. BA, Johns Hopkins Univ., 1972; MA, Univ. of California, Los Angeles, 1973; PhD, *ibid.*, 1977 (1996)
- Kathleen S. Cummings, Professional Specialist in the Cushwa Center for American Catholicism. B.A., Univ. of Scranton, 1993; MA, *ibid.*, 1993; MA, Univ. of Notre Dame, 1995; Ph.D., *ibid.*, 1999 (2001)
- Lawrence S. Cunningham, the John A. O'Brien Professor of Theology. AB, St. Bernard College, 1957; STL,

FACULTY

- Gregorian Univ., 1961; MA, Florida State Univ., 1963; PhD, *ibid.*, 1968 (1987)
- Gregory L. Curme, Associate Professor Emeritus of Economics. BS, Univ. of Illinois, 1951; AM, *ibid.*, 1954; PhD, *ibid.*, 1960 (1963)
- Mary R. D'Angelo, Associate Professor of Theology. BA, Fordham Univ., 1969; MPhil, Yale Univ., 1972; PhD, *ibid.*, 1976 (1993)
- Crislyn D'Souza-Schorey, the Walther Cancer Research Center Associate Professor of Biological Sciences. BS, Univ. of Bombay, India, 1986; MSc, *ibid.*, 1988; PhD, Univ. of Texas Health Science Center, San Antonio, 1992 (1998)
- Rev. Brian E. Daley, SJ, the Catherine F. Huisling Professor of Theology. BA, Fordham Univ., 1961; BA, Merton College, Oxford Univ., 1964; PhL, Loyola Seminary, 1966; LicTheol, Hochschule Skt. Georgen, 1972; DPhil, Campion Hall, Oxford Univ., 1979 (1996)
- Fred Dallmayr, Emeritus Professor of Political Science. Dr. of Law, Univ. of Munich, 1955; MA, Southern Illinois Univ., 1956; Ph.D., Duke Univ., 1960 (1978)

Dennis P. Doordan, Chair and Professor of Art, Art History, and Design and Professor of Architecture. BA, Stanford Univ., 1973; MA, Columbia Univ., 1976; MPhil, *ibid.*, 1978; PhD, *ibid.*, 1983 (1990)

Matthew J. Doppke, Assistant Professional Specialist, Arts and Letters Core Course. BA, Oakland Univ., 1988; PhD, Washington Univ., 1999 (1997)

Barbara J. Dougherty, Adjunct Associate Professor in the Master of Education Program. BSE, Northeast Missouri State Univ., 1982; MA, *ibid.*, 1985; PhD, Univ. of Missouri, 1989 (2003)

James P. Dougherty, Professor Emeritus of English. AB, St. Louis Univ., 1959; MA, Univ. of Pennsylvania, 1960; PhD, *ibid.*, 1962 (1966)

Julia V. Douthwaite, Professor of Romance Languages and Literatures, Fellow in the Nanovic Institute, and Assistant Provost for International Studies. BA, Univ. of Washington, 1981; Cert de Maitrise, Univ. de Nantes, France, 1984; MA, Univ. of Washington, 1984; MA, Princeton Univ., 1986; PhD, *ibid.*, 1990 (1991)

Gregory E. Dowd, Associate Professor of History and Associate Dean of Undergraduate Studies, College of Arts and Letters. BA, Univ. of Connecticut, 1978; MA, Princeton Univ., 1982; PhD, *ibid.*, 1986 (1987)

Rev. Robert A. Dowd, C.S.C., Assistant Professor of Political Science, Fellow in the Helen Kellogg Institute for

International Studies and the Joan B. Kroc Institute for International Peace Studies. B.A., Univ. of Notre Dame, 1987; M.Div., Jesuit School of Theology at Berkeley, 1993; Ph.D., Univ. of California, Los Angeles, 2003 (2004)

Glen William Dowell, Assistant Professor of Management. BA, Univ. of Alberta, 1989; MBA, McGill Univ., 1995; PhD, Univ. of Michigan, 2000 (2001)

Paul A. Down, Associate Professor of Art, Art History and Design. BS, Andrews Univ., 1969; MFA, Univ. of Notre Dame, 1982 (1983)

Alan Dowty, Professor Emeritus of Political Science. B.A., Shimer College, 1959; MA, Univ. of Chicago, 1960; Ph.D., *ibid.*, 1963 (1975)

Thomas L. Doyle, Professional Specialist and Director of the Master of Education Program, and Fellow in the Institute for Educational Initiatives. BS, Spring Hill College, 1962; PhD, Univ. of Notre Dame, 1973 (2001)

Kevin C. Dreyer, Associate Professor of Film, Television, and Theatre. BFA, Carnegie Mellon Univ., 1975; Master, Broadway Lighting Design, 1993 (1989)

Rev. Michael S. Driscoll, the Tisch Family Professor of Theology. BA, Carroll College, 1969; STB, Pontifica Univ. Gregoriana, 1977; STL, Athanaeum of San Anselmo, 1980; STD, L'Institut Catholique de Paris, 1986; PhD, L'Univ. de Paris, Sorbonne, 1986 (1994)

Elizabeth Dube, Associate Librarian in the University Libraries. BA, Univ. of Connecticut, 1993; MLIS, Univ. of Texas, 1998 (1998)

Jennifer L. DuBois, Assistant Professor of Chemistry and Biochemistry. BS, Cornell Univ., 1995; PhD, Stanford Univ., 2000 (2004)

Jean-Christophe Ducom, Associate Professional Specialist, Science Computing Facilities. BS, Bordeaux I. Univ., 1991; MS, Nice-Sofia Antipolis Univ., 1992; PhD, Aix-Marseille I. Univ., 1996 (2001)

John M. Duffy, Assistant Professor of English and Director of the University Writing Center. BA, Boston College, 1977; MA, Univ. College, Dublin, 1979; MA, Columbia Univ. Teachers College, 1982; PhD, Univ. of Wisconsin, 2000 (1998)

Capt. Timothy L. Dukeman, Assistant Professor of Military Science. B.S., United States Military Academy, 1990; M.S., Sam Houston State Univ., 2002 (2002)

John G. Duman, the Martin J. Gillen Professor of Biological Sciences. BS, Pennsylvania State Univ., 1968; PhD, Univ. of California, San Diego, Scripps Institute of Oceanography, 1974 (1974)

Stephen D. Dumont, Associate Professor of Philosophy. BA, Wabash College, 1974; MA, Univ. of Toronto, 1976; MSL, Pontifical Institute of Medieval Studies, 1979; PhD, Univ. of Toronto, 1982 (2001)

Ian B. Duncanson, Staff Professional Specialist in the Radiation Laboratory. AB, Dartmouth College, 1972; BSBA, Univ. of Nebraska, Omaha, 1979 (1989)

E. Joyce Dunfee, Adjunct Assistant Professor of Psychology. BA, Indiana Univ., 1973; MA, Univ. of Notre Dame, 1985; PhD, Univ. of Notre Dame, 1987 (1990, 2000)

Patrick F. Dunn, Professor of Aerospace and Mechanical Engineering. BS, Purdue Univ., 1970; MS, *ibid.*, 1971; PhD, *ibid.*, 1974 (1985)

Robert M. Dunn, Professional Specialist– Director of the Integrated Engineering and Business Practice Curriculum in the College of Engineering. BS, Univ. of Notre Dame, 1965; MS, Pennsylvania State Univ., 1967; PhD, Univ. of Illinois–Urbana, 1971 (2001)

Rev. John S. Dunne, CSC, the Rev. John A. O'Brien Professor of Catholic Theology. AB, Univ. of Notre Dame, 1951; STD, Gregorian Univ., 1957 (1957)

Fernand N. Dutilleul, Professor of Law. AB, Assumption College, 1962; JD, Univ. of Notre Dame, 1965 (1971)

Amitava K. Dutt, Professor of Economics, Fellow in the Helen Kellogg Institute for International Studies and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Presidency College, Calcutta, 1975; MA, Univ. of Calcutta, 1977; PhD, Massachusetts Institute of Technology, 1983 (1988)

Lawrence H. Dwyer, Associate Professional Specialist in Music. BA, Univ. of Notre Dame; MS, Univ. of Illinois, 1967 (2001)

William G. Dwyer, Chair and the William J. Hank Family Professor of Mathematics. AB, Boston College, 1969; PhD, Massachusetts Institute of Technology, 1973 (1980)

William T. Dwyer, Adjunct Assistant Professor of Political Science. BA, Univ. of Notre Dame, 1969; JD, Univ. of Illinois, 1972 (2001)

Kenneth W. Dye, Director of Bands, Professor of Music, and Concurrent Professor of Computer Applications. BMus, Univ. of Southern California, 1974; MA, California State Univ., Long Beach, 1980; MBA, Univ. of Houston; EDD, *ibid.*, 1983 (1998)

Matthew J. Dyer, Associate Professor of Mathematics. BA, Sydney Univ., 1983; MS, *ibid.*, 1985; PhD, *ibid.*, 1988 (1989)

Cornelius Eady, Associate Professor of English. MFA, Warren Wilson College, 1986 (2005)

Robert F. Easley, Associate Professor of Management. BA, Univ. of Illinois, 1976; MBA, Pennsylvania State Univ., 1989; PhD, Indiana Univ., 1996 (1994)

Peter Easton, the Notre Dame Alumni/ Andersen Alumni Professor of Accountancy. BAgSc, Univ. of Adelaide, 1973; BE., *ibid.*, 1978; DipTTEch, Univ. of South Australia, 1978; DipFinMgmt, Univ. of New England, 1980; PhD, Univ. of California, Berkeley, 1984 (2003)

Kathleen Eberhard, Assistant Professor of Psychology. BA, Univ. of Rochester, 1987; MA, Michigan State Univ., 1991; PhD, *ibid.*, 1993 (1996)

Richard M. Economakis, Associate Professor of Architecture. BArch, Cornell Univ., 1983; MA, *ibid.*, 1996 (1996)

Alexander L. Edgar, Adjunct Assistant Professor of Law. BA, Alma College, 1970; JD, Univ. of Notre Dame, 1973 (2003)

Michael T. Edwards, Associate Professional Specialist, Office of Research. BSBA, Xavier Univ., 1977; MPA, Golden Gate Univ., 1981; MSA, Univ. of Notre Dame, 1989 (1997)

FACULTY

- Keith J. Egan, Adjunct Professor of Theology and the Emeritus Aquinas Chair in Catholic Theology at Saint Mary's College. PhD, Mt. Carmel College, 1952; MA, Catholic Univ., 1959; PhD, Cambridge Univ., 1965 (1983)
- Katherine Elizabeth Egerton, General Manager, Actors From the London Stage and Concurrent Instructor in Film, Television, and Theatre. BA, Luther College, 1989; MA, Univ. of North Carolina at Chapel Hill, 1992 (2001)
- Rev. Virgilio P. Elizondo, Notre Dame Professor of Pastoral and Hispanic Theology, Concurrent Professor of Latino Studies, and Fellow in the Helen Kellogg Institute for International Studies. BS, St. Mary's Univ., 1957; MA, Ateneo Univ., Manila, 1969; STD/PhD, Institut Catholique, Paris, France, 1978 (2000)
- Maud Ellmann, Visiting Professor in the Keough-Naughton Institute for Irish Studies. BA, King's College, Cambridge, 1975; DPhil, St. Anne's College, Oxford, 1978 (2004)
- Caryn S. Ellison, Adjunct Instructor in the Alliance for Catholic Education in the Institute for Educational Initiatives. BS, Central Michigan Univ., 1973; MS, Indiana Univ. Purdue Univ., 1984 (2001)
- Maud Ellmann, Professor of English. BA, Cambridge Univ., 1975; PhD, Oxford Univ., 1978 (2005)
- Kent Emery Jr., Professor in the Program of Liberal Studies. BA, Univ. of Virginia, 1966; MA, Univ. of Toronto, 1968; PhD, *ibid.*, 1976 (1985)
- Georges Enderle, the Arthur F. and Mary J. O'Neil Professor of International Business Ethics, Dept. of Marketing, Fellow in the Helen Kellogg Institute for International Studies, and Fellow, Nanovic Institute for European Studies. Lic, Munich, 1967; Lic, Lyon, France, 1973; Univ. of Fribourg, 1976; Doct, *ibid.*, 1982; Privatdozent, Univ. of St. Gallen, 1986 (1992)
- Nahid A. Erfan, Associate Professional Specialist in the First Year of Studies. BS, Purdue Univ., 1979; MS, *ibid.*, 1981; MS, *ibid.*, 1985 (1994)
- Harald E. Esch, Professor Emeritus of Biological Sciences. Dipl, Univ. of Bonn, 1957; PhD, Univ. of Wurzburg, 1960 (1965)
- Hector Escobar Jr., Staff Librarian. BBA, Univ. of Texas–El Paso, 1998; ML, Univ. of Texas–Austin, 2000 (2000)
- Maria–Christine Escoda–Risto, Assistant Professional Specialist and Concurrent Lecturer in Romance Languages and Literatures. DUEL, LaSorbonne Nouvelle, Univ. of Paris III, 1972; BA, Central Michigan Univ., 1976; MA, Western Michigan Univ., 1985; MA, Notre Dame, 1992 (1991)
- Morten R. Eskildsen, Assistant Professor of Physics. BS, Univ. of Copenhagen, 1992; MS, *ibid.*, 1994; PhD, *ibid.*, 1998 (2003)
- Linda N. Espahbodi, Associate Professional Specialist, MS–Accountancy. BA, Florida International Univ., 1985; MA, *ibid.*, 1987 (2000)
- Robert Essig, Adjunct Instructor in Marketing. MA, Northeastern Illinois Univ., 1973 (2004)
- Michael J. Etzel, Professor of Marketing. BBA, Univ. of Portland, 1964; MBA, Kent State Univ., 1966; DBA, Univ. of Colorado, 1970 (1980)
- William E. Evans, Editor, *American Midland Naturalist*. BS, Bowling Green State Univ., 1953; MA, Ohio State Univ., 1954; PhD, Univ. of California, Los Angeles, 1975 (1999)
- Samuel R. Evens, Associate Professor of Mathematics. BA, Harverford College, 1984; PhD, Massachusetts Institute of Technology, 1988 (1999)
- Philip J. Faccenda, Vice President and General Counsel Emeritus. BME, Univ. of Notre Dame, 1952; JD, Loyola Univ., Chicago, 1957 (1977)
- Russell S. Faeges, Adjunct Instructor in Sociology. BA, Univ. of Chicago; MA, Georgetown Univ., 1986 (1999)
- David W. Fagerberg, Associate Professor of Theology. BA, Augsburg College, 1972; MDiv, Luther Northwestern Seminary, 1977; MA, St. John's Univ., 1982; STM, Yale Divinity School, 1983; MA and MPhil, Yale Univ., 1988; PhD, *ibid.*, 1991 (2003)
- William M. Fairley, Associate Professor Emeritus of Civil Engineering and Geological Sciences. BA, Colby College, 1949; MS, Univ. of Maine, 1951; PhD, Johns Hopkins Univ., 1962 (1958)
- Stephen M. Fallon, Associate Professor in the Program of Liberal Studies and Concurrent Associate Professor of English. AB, Princeton Univ., 1976; MA, McGill Univ., 1978; PhD, Univ. of Virginia, 1985 (1985)
- Stanley L. Farmann, Associate Law Librarian Emeritus. BA, Univ. of Washington, 1953; MLS, *ibid.*, 1957 (1966)
- Larissa Fast, Visiting Assistant Professor in the Joan B. Kroc Institute for International Peace Studies. PhD, George Mason Univ., 2002 (2004)
- Michael William Favorite, Senior Financial Analyst, Office of the Controller; Concurrent Instructor, Dept. of Accountancy. BBA, Univ. of Notre Dame, 1984; MBA, Univ. of Texas at Austin, 1989 (2001)
- Patrick J. Fay, Associate Professor of Electrical Engineering. BS, Univ. of Notre Dame, 1991; MS, Univ. of Illinois, 1993; PhD, *ibid.*, 1996 (1997)
- Leonid Faybusovich, Professor of Mathematics. MSc, Leningrad Univ., 1978; PhD, Harvard Univ., 1991 (1991)
- Kenneth Featherstone, Professor Emeritus of Architecture. Dipl Assoc., Regional College of Art, Manchester, 1955; MArch, Univ. of Illinois, 1958 (1961)
- Jeffrey L. Feder, Associate Professor of Biological Sciences. BA, Pomona College, 1980; PhD, Michigan State Univ., 1989; Postdoc, Princeton Univ., 1991 (1993)
- Thomas P. Fehlner, Associate Chair and the Grace–Rupley Professor of Chemistry. BS, St. Bernardine of Siena College, 1959; MA, Johns Hopkins Univ., 1961; PhD, *ibid.*, 1963 (1964)
- Jeremy B. Fein, Professor of Civil Engineering and Geological Sciences. BA, Univ. of Chicago, 1983; MSc, Northwestern Univ., 1986; PhD, *ibid.*, 1989 (1996)
- Michael T. Ferdig, Assistant Professor of Biological Sciences. BS, Univ. of Nebraska, Lincoln, 1987; MS, *ibid.*, 1990; PhD, Univ. of Wisconsin, Madison, 1997 (2001)
- Guillermo J. Ferraudi, Professional Specialist in the Radiation Laboratory. MS, Univ. of Buenos Aires, 1967; PhD, Univ. of Chile, 1972 (1976)
- Isabel A. Ferreira–Gould, Assistant Professor in Romance Languages and Literatures and Fellow in the Helen Kellogg Institute for International Studies. BA, Rhode Island College, 1994; MA, Brown Univ., 1997; PhD, *ibid.*, 2004 (2001)
- Richard W. Fessenden, Professor Emeritus of Chemistry and Biochemistry. BS, Univ. of Massachusetts, 1955; PhD, Massachusetts Institute of Technology, 1958 (1976)
- Barbara J. Fick, Associate Professor of Law and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Creighton Univ., 1972; JD, Univ. of Pennsylvania, 1976 (1983)
- Kenneth E. Filchak, Assistant Professional Specialist in Biological Sciences. BS, Michigan State Univ., 1994; PhD, Univ. of Notre Dame, 2001 (2003)
- John M. Finnis, the Biolchini Family Professor of Law. LLB, Adelaide Univ., 1961; DPhil, Oxford Univ., 1965 (1995)
- Jed Freeman Fisher, Professional Specialist in Chemistry and Biochemistry. BS, State Univ. of New York, 1972; PhD, Massachusetts Institute of Technology, 1976 (2004)
- Janet Fisher–McPeak, Associate Professional Specialist and Concurrent Lecturer in Romance Languages and Literatures. BA, Colorado Women's College, 1975; MA, Middlebury College, 1976; MA, *ibid.*, 1979; PhD, *ibid.*, 1997 (1989)
- Robert M. Fishman, Professor of Sociology, Fellow in the Nanovic Institute for European Studies, and Fellow in the Helen Kellogg Institute for International Studies. BA, Yale College, 1977; MA, Yale Univ., 1979; MPhil, *ibid.*, 1980; PhD, *ibid.*, 1985 (1992)
- Rev. James F. Flanigan, CSC, Associate Professor of Art, Art History and Design. AB, Univ. of Notre Dame, 1958; MA, *ibid.*, 1962; MFA, George Washington Univ., 1965 (1965)
- Daniel J. Flannery, Adjunct Professor, Master of Education Program. BA, Univ. of Notre Dame, 1984; MA, Ohio State Univ., 1987; PhD, *ibid.*, 1991 (2003)
- Thomas P. Flint, Professor of Philosophy, Director of the Center for Philosophy of Religion, and Faculty Honor Code Officer. BA, St. Ambrose College, 1976; PhD, Univ. of Notre Dame, 1980 (1982)
- Laura B. Flynn, Assistant Professional Specialist, First Year of Studies. BS, St. Mary's College, 1979; MBA, Indiana Univ., 1985 (2001)
- Patrick J. Flynn, Professor of Computer Science and Engineering and Concurrent Professor of Electrical Engineering. BSEE, Michigan State Univ., 1985; MS, *ibid.*, 1986; PhD, *ibid.*, 1990 (2001)
- Josephine Massyngbaerde Ford, Professor Emerita of Theology. BA, Univ. of Nottingham, 1957; BDiv, King's College, London, 1963; PhD, Nottingham Univ., 1965 (1965)
- Marisha D. Fortner, Assistant Professional Specialist in Physical Education. BA, Purdue Univ., 1993; MA, Western Michigan Univ., 1999 (1999)

FACULTY

- Rev. James K. Foster, CSC, Associate Professional Specialist in Preprofessional Studies. BS, Univ. of Notre Dame, 1977; MD, Univ. of Illinois, 1981; MDiv, Univ. of Notre Dame, 1994 (1997)
- Christopher B. Fox, Chair of Irish Language and Literature, Professor of English and Director of the Keough-Naughton Institute for Irish Studies. BA, Cleveland State Univ., 1971; MA, State Univ. of New York, Binghamton, 1974; PhD, *ibid.*, 1978 (1986)
- Judith L. Fox, Associate Professional Specialist in Law. BS, Wilkes Univ., 1985; JD, Univ. of Notre Dame, 1993 (1997)
- Karen E. Francl, Research Assistant Professor of Biological Sciences. BS, Univ. of Notre Dame, 1997; MS, Univ. of Oklahoma, 2000 (2003)
- Bridget V. Franco, Assistant Professional Specialist and Assistant Director, International Study Programs, and Concurrent Instructor in Romance Languages and Literatures. BA, Univ. of Notre Dame, 1998; MA, *ibid.*, 1999 (1999)
- Miguel Franco, Adjunct Assistant Professor of Psychology. BA, Southern Methodist Univ., 1984; MA, *ibid.*, 1986; PhD, Univ. of Florida, 1991 (1991)
- Mary E. Frandsen, Associate Professor of Music. BM, State Univ. of New York, Potsdam, 1980; MA, Eastman School of Music, 1985; PhD, Univ. of Rochester, 1997 (1997)
- Malcolm J. Fraser Jr., Professor of Biological Sciences. BSc, Wheeling College, 1975; MS, Ohio State Univ., 1979; PhD, *ibid.*, 1981 (1983)
- Stefan G. Frauendorf, Professor of Physics. MS, Technical Univ., 1968; PhD, *ibid.*, 1971 (1998)
- Thomas J. Frecka, the Vincent and Rose Lizzadro Professor of Accountancy and Director of the Masters in Accountancy Program. BS, Ohio Univ., 1963; MS, *ibid.*, 1966; PhD, Syracuse Univ., 1978 (1990)
- Alfred J. Freddoso, the John and Jean Oesterle Professor of Thomistic Studies. BA, St. John Vianney Seminary, 1968; PhD, Univ. of Notre Dame, 1976 (1976, 1979)

- Joseph C. Freeland, Associate Professional Specialist in Computer Science and Engineering. BSE, Purdue Univ., 1985 (1995)
- Jeremiah P. Freeman, Professor Emeritus of Chemistry and Biochemistry. BS, Univ. of Notre Dame, 1950; MS, Univ. of Illinois, 1951; PhD, *ibid.*, 1953 (1964)
- Dolores Warwick Frese, Professor of English. BA, College of Notre Dame of Maryland, 1958; MA, Univ. of Iowa, 1961; PhD, *ibid.*, 1972 (1973)
- Vincent E. Friedewald Jr., Visiting Professor of Film, Television, and Theatre. BS, Univ. of Notre Dame, 1963; MD, Southwestern Medical School, 1966 (1992)
- Gerald H. Frieling Jr., Adjunct Instructor in Management. BSME, Univ. of Kansas, 1951 (1990)
- Morton S. Fuchs, Professor Emeritus of Biological Sciences. BS, Michigan State Univ., 1958; MS, *ibid.*, 1960; PhD, *ibid.*, 1967 (1966)
- Laura Sue Fuderer, Associate Librarian. BA, College of Wooster, 1969; MLS, Kent State Univ., 1971; MA, Fairleigh Dickinson Univ., 1979 (1982)
- Agustin Fuentes, Associate Professor of Anthropology. BA, Univ. of California, Berkeley, 1989; MA, *ibid.*, 1991; PhD, *ibid.*, 1994 (2002)
- Thomas E. Fuja, Professor of Electrical Engineering. BSEE, Univ. of Michigan, 1981; BS Comp E, *ibid.*, 1981; MEng, Cornell Univ., 1983; PhD, *ibid.*, 1987 (1998)
- Emerson G. Funk Jr., Professor Emeritus of Physics. BA, Wayne Univ., 1953; MA, Univ. of Michigan, 1954; PhD, *ibid.*, 1958 (1958)
- Jacek K. Furdyna, the Aurora and Tom Marquez Professor of Physics and Fellow in the Nanovic Institute for European Studies. BS, Loyola Univ., Chicago, 1955; PhD, Northwestern Univ., 1960 (1986)
- Yusaku Furuhashi, the Ray W. and Kenneth G. Herrick Professor Emeritus of Business Administration. BSc, Seattle Univ., 1956; MBA, Univ. of Washington, 1958; PhD, Univ. of Illinois, 1961 (1961)
- Rev. Patrick D. Gaffney, CSC, Morahan Director of the College Seminar Program and Associate Professor of Anthropology, Fellow in the Helen Kellogg Institute for International Studies, and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Univ. of Notre Dame, 1969; MTh, *ibid.*, 1973; MA, Univ. of Chicago, 1977; PhD, *ibid.*, 1982 (1980)
- Samuel S. Gaglio, Assistant Dean in the Mendoza College of Business and Concurrent Instructor in Management. BA, Troy State Univ., 1979; MA, Univ. of Southern California, 1982 (1988)
- Kari A. Gallagher, Adjunct Assistant Professor of Law. BA, Univ. of Notre Dame, 1990; JD, *ibid.*, 1993 (2000)
- John N. Gallo, Adjunct Assistant Professor of Law. BA, Univ. of Notre Dame, 1983; JD, Harvard Univ., 1986 (2002)
- Kenneth Neil Garcia, Professional Specialist in the College of Arts and Letters and Associate Director of the Institute for Scholarship in the Liberal Arts. BA, Old College School of Humanities, 1983; MA, Catholic Univ. of America, 1986 (1996)
- Umesh Garg, Professor of Physics. BS, Birla Institute of Technology and Science, Pilani, India, 1972; MS, *ibid.*, 1974; MA, State Univ. of New York, Stony Brook, 1975; PhD, *ibid.*, 1978 (1982)
- Peter M. Garnavich, Associate Professor of Physics. BS, Univ. of Maryland, 1980; MS, Massachusetts Institute of Technology, 1983; PhD, Univ. of Washington, 1991 (1999)
- Nicole S. Garnett, Lilly Endowment Associate Professor of Law. BA, Stanford Univ., 1992; JD, Yale Univ., 1995 (1999)
- Richard W. Garnett, Lilly Endowment Associate Professor of Law. BA, Duke Univ., 1990; JD, Yale Univ., 1995 (1999)
- John F. Gaski, Associate Professor of Marketing. BBA, Univ. of Notre Dame, 1971; MBA, *ibid.*, 1973; MS, Univ. of Wisconsin, 1979; PhD, *ibid.*, 1982 (1980)
- David W. Gasperetti, Chair and Associate Professor of German and Russian Languages and Literatures. BA, Lawrence Univ., 1976; MA, Univ. of California, Los Angeles, 1978; PhD, *ibid.*, 1985 (1989)
- Joseph A. Gatto, Assistant Professor Emeritus of Modern and Classical Languages. AB, Western Michigan Univ., 1957; MA, Indiana Univ., 1961; PhD, *ibid.*, 1963 (1963)
- Liangyan Ge, Associate Professor of East Asian Languages and Literatures. BA, Hefei Polytechnic, China, 1982; MA, Najing Univ., China, 1984; PhD, Indiana Univ., 1995 (1995)
- Ashish Gehani, Research Assistant Professor of Computer Science and Engineering. B.S., Univ. of Chicago, 1994; M.S., Duke Univ., 1997; Ph.D., *ibid.*, 2003 (2005)
- Mark John David Gehri, Assistant Professor of Air Force Aerospace Studies. BS, USAF Academy, 1974; MBA, Southern Illinois Univ., Edwardsville, 1984 (2000)
- Michael Gekhtman, Associate Professor of Mathematics. BS, Kiev State Univ., 1985; MS, *ibid.*, 1985; PhD, Ukrainian Academy of Sciences, 1990 (1999)
- Michele Gelfman, Associate Professional Specialist in Physical Education. BSE, Northeast Missouri State Univ., 1976; MS, Indiana Univ., 1977 (1985)
- Sonia G. Gernes, Professor Emeritus of English. BA, College of St. Teresa, 1966; MA, Univ. of Washington, 1971; PhD, *ibid.*, 1975 (1975)
- Stephen E. Gersh, Professor of Medieval Studies and Concurrent Professor of Philosophy. BA, Cambridge Univ., 1969; MA, *ibid.*, 1973 (1977)
- Ashish Gehani, Research Assistant Professor of Computer Science and Engineering. B.S., Univ. of Chicago, 1994; M.S., Duke Univ., 1997; Ph.D., *ibid.*, 2003 ()
- J. Daniel Gezelter, Associate Professor of Chemistry. BS, Duke Univ., 1989; CPS, Univ. of Cambridge, 1990; PhD, Univ. of California, Berkeley, 1995 (1999)
- Nasir Ghiaseddin, Associate Professor of Management. BS, Arya-Mehr Univ., Iran, 1970; MS, Purdue Univ., 1975; PhD, *ibid.*, 1982 (1982)
- Roya Ghiaseddin, Associate Professional Specialist in Management and Concurrent Assistant Professor of Psychology. MSA., Univ. of Notre Dame, 1989; MA, *ibid.*, 1991; PhD, *ibid.*, 1995 (1995)
- Teresa Ghilarducci, Professor of Economics and Policy Studies, Director of the Higgins Labor Research Center, Fellow in the Nanovic Institute for European Studies, Fellow in the Joan B. Kroc Institute for International Studies, and Fellow in the Helen Kellogg Institute for International Studies. AB, Univ. of California, Berkeley, 1978; PhD, *ibid.*, 1984 (1983)
- Benedict F. Giamo, Chair and Associate Professor of American Studies. BA, Baldwin-Wallace College, 1976; MA, New School for Social Research, 1978; PhD, Emory Univ., 1987 (1990)
- Luke C. Gibbons, Graduate Director of Irish Studies, the Keough Family Professor of Irish Studies, Concurrent Professor of Film, Television, and Theatre, and Fellow of the Nanovic Institute for European Studies. BA, Univ.

FACULTY

College, Galway, 1972; MA, *ibid.*, 1976; HDipEd, Univ. of Ireland, Maynooth, 1976; PhD, Trinity College, Dublin, 1989 (2001)

Kathleen C. Gibney, Assistant Professional Specialist in Psychology. BA, Notre Dame College, 1982; MA, Rivier College, 1983; CAES, Boston College, 1990; PhD, Northeastern Univ., 1993 (2001)

Bradley S. Gibson, Associate Professor of Psychology. BS, Colorado State Univ., 1982; PhD, Univ. of Arizona, 1992 (1994)

Timothy J. Gilbride, Assistant Professor of Marketing. BSBA, Univ. of Dayton, 1988; MBA, Ohio State Univ., 1993; Ph.D., *ibid.*, 2004 (2004)

Alyssa W. Gillespie, Associate Professor of Russian Language and Literature and Fellow of the Nanovic Institute for European Studies. BA, Brandeis, 1990; MA, Univ. of Wisconsin, Madison, 1992; PhD, *ibid.*, 1998 (1999)

Lee Glazer, Adjunct Instructor in the Washington Program. BA, George Mason Univ., 1984; MA, Yale Univ., 1987; PhD, Univ. of Pennsylvania, 1996 (2004)

J. Philip Gleason, Professor Emeritus of History. BS, Univ. of Dayton, 1951; MA, Univ. of Notre Dame, 1955; PhD, *ibid.*, 1960 (1959)

Maureen L. Gleason, Librarian Emerita. BA, Mount Mercy College, 1954; MLS, Carnegie Library School, 1955 (1968)

Jill Godmilow, Professor of Film, Television, and Theatre. BA, Univ. of Wisconsin, Madison, 1965 (1992)

Edward A. Goerner, Professor Emeritus of Political Science. AB, Univ. of Notre Dame, 1952; MA, Univ. of Chicago, 1957; PhD, *ibid.*, 1959 (1960)

Abraham Goetz, Associate Professor Emeritus of Mathematics. MS, Univ. of Wrocław, 1949; PhD, *ibid.*, 1957 (1964)

Sr. Ann G. Goggin, RC, Professional Specialist and Director of Lay Ministry Formation in Theology. AB, Marquette Univ., 1964; MDiv, Weston School of Theology, 1981; DM., *ibid.*, 1983 (2002)

Howard Goldblatt, Visiting Research Professor of East Asian Languages and Literatures. BA, Long Beach State, 1961; MA, San Francisco State Univ., 1971; PhD, Indiana Univ., 1974 (2002)

Dawn M. Gondoli, Associate Professor of Psychology. BA, State Univ. of New York, Buffalo, 1986; MS, Univ. of Arizona, 1991; PhD, *ibid.*, 1994 (1994)

Marcia M. Good, Visiting Fellow, Institute for Latino Studies. BA, Eastern Mennonite Univ., 1980; MA, Univ. of Florida, Gainesville, 1995; PhD, *ibid.*, 2000 (2003)

Deanne M. Goodenough-Lashua, Assistant Professional Specialist in Chemistry and Biochemistry. BS, Valparaiso Univ., 1994; PhD, Univ. of Michigan-Ann Arbor, 2002 (2001)

Holly V. Goodson, Assistant Professor of Chemistry. AB, Princeton Univ., 1988; PhD, Stanford Univ., 1995 (2000)

John W. Goodwine Jr., Associate Professor of Aerospace and Mechanical Engineering. BS, Univ. of Notre Dame,

1988; JD, Harvard Univ., 1991; MS, California Institute of Technology, 1993; PhD, *ibid.*, 1997 (1998)

Denise Goralski, Assistant Professional Specialist in Physical Education. BS, St. Louis Univ., 1982; MS, Southern Illinois Univ., 1985 (1998)

Stanislav V. Gordeyev, Research Assistant Professor of Aerospace and Mechanical Engineering. MS, Moscow Institute of Physics and Technology, 1991; PhD, Univ. of Notre Dame, 1999 (2001)

Joachim Gřres, Research Professor of Physics. BS, Univ. of Munster, 1974; Dipl, *ibid.*, 1979; PhD, *ibid.*, 1983 (1986)

Rev. Eugene Gorski, CSC, Professional Specialist in Theology. MM, Univ. of Notre Dame, 1955; STL, Gregorian Univ., 1961; STD, Catholic Institute de Paris, 1971 (1999)

Andrew C. Gould, Associate Professor of Political Science and Fellow in the Helen Kellogg Institute for International Studies and in the Nanovic Institute for European Studies. AB, Harvard Univ., 1985; MA, Univ. of California, Berkeley, 1986; PhD, *ibid.*, 1992 (1993)

Robert D. Goulding, Assistant Professor in the Program of Liberal Studies. BS, Univ. of Canterbury, New Zealand, 1989; BA, *ibid.*, 1990; MA, Warburg Institute, Univ. of London, 1992; PhD, *ibid.*, 1999 (2003)

Denis A. Goulet, the William J. and Dorothy O'Neill Professor Emeritus in Education for Justice, Dept. of Economics, Fellow in the Helen Kellogg Institute for International Studies, and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, St. Paul's College, Washington, 1954; MA, *ibid.*, 1956; PhD, Univ. of So Paulo, Brazil, 1963 (1979)

Anna Goussiou, Assistant Professor of Physics. BS, Aristotle Univ. of Thessaloniki, Greece, 1989; MS, Univ. of Wisconsin, Madison, 1995; PhD, *ibid.*, 1995 (2003)

Daniel Andrew Graff, Assistant Professional Specialist in History. BA, Univ. of Illinois at Urbana-Champaign, 1990; MA, Univ. of Wisconsin at Madison, 1993 (2001)

Peter P. Grande, Associate Dean Emeritus of the Freshman Year of Studies. BS, Kutztown State Univ., 1951; MA, Univ. of Notre Dame, 1955; PhD, *ibid.*, 1965 (1955)

Richard L. Gray, Director of Center for Creative Computing and Associate Professor of Art, Art History, and Design. BS, Illinois State Univ., 1976; MFA, Rochester Institute of Technology, 1982 (1982)

Barbara J. Green, Associate Professor of English. BA, Univ. of Chicago, 1983; MA, Univ. of Virginia, 1985; PhD, *ibid.*, 1991 (1991)

Christy D. Greene, Assistant Professional Specialist in First Year of Studies. BA, Univ. of Notre Dame, 1996; MSW, Univ. of Pennsylvania, 2001 (2001)

Stuart Greene, Associate Dean of Undergraduate Studies and Associate Professor of English. BA, State Univ. of New York, Binghamton, 1978; MA, *ibid.*, 1980; PhD, Carnegie Mellon Univ., 1990 (1997)

Brad Stephan Gregory, Associate Professor of History. BA, Catholic Univ. of Louvain, Belgium, 1984; BS, Utah State Univ., 1985; MA, Catholic Univ. of Louvain, Belgium, 1987; MA, Univ. of Arizona, 1989; PhD, Princeton Univ., 1996 (2003)

Guillermo J. Grenier, Guest Fellow in the Institute for Latino Studies. AA, Oxford College of Emory Univ., 1972; MA, Georgia State Univ., 1974; MA, Univ. of New Mexico, 1979; PhD, *ibid.*, 1985 (2002)

Thomas Anthony Gresik, Professor of Economics and Econometrics and Fellow in the Helen Kellogg Institute for International Studies. BA, Northwestern Univ., 1981; MS, California Institute of Technology, 1982; PhD, Northwestern Univ., 1987 (2000)

John D. Griffin, Assistant Professor of Political Science. BA, Boston College, 1990; JD, Univ. of Colorado School of Law, 1995; PhD, Duke Univ., 2002 (2002)

Paul R. Grimstad, Assistant Chair and Associate Professor of Biological Sciences. BA, Concordia College, 1967; MS, Univ. of Wisconsin, 1972; PhD, *ibid.*, 1973 (1976)

Rev. Daniel G. Groody, CSC, Assistant Professor of Theology. BA, Univ. of Notre Dame, 1986; MDiv, Jesuit School of Theology at Berkeley, 1992; STL, *ibid.*, 2000; PhD, Graduate Theological Union, Berkeley, 2001 (2001)

Hermann Grunder, Visiting Professor of Physics. PhD, Argonne National Laboratory, 2000 (2004)

Sr. Mary Louise Gude, CSC, Assistant Vice President for Student Affairs and Concurrent Associate Professor, Romance Languages and Literatures. BA, Saint Mary's College, 1963; Lic, Univ. of Montreal, 1968; PhD, Univ. of Pennsylvania, 1976 (1991)

Joseph P. Gultinan, Professor of Marketing. BBA, Univ. of Notre Dame, 1966; MBA, Indiana Univ., 1967; DBA, *ibid.*, 1969 (1987)

Alexandra Guisinger, Associate Professor in Political Science. AB, Harvard Univ., 1994; Ph.D., Yale Univ., 2005 (2004)

Gregory T. Gundlach, the John W. Berry Sr. Professor of Business. BS, Univ. of Tennessee, 1979; MBA, *ibid.*, 1981; JD, *ibid.*, 1985; PhD, *ibid.*, 1987 (1987)

Li Guo, Associate Professor of Classics and Fellow in the Medieval Institute. BA, Shanghai International Studies Univ., 1979; MA, MPh, Yale Univ., 1991; PhD, *ibid.*, 1994 (1999)

Matthew J. Gursky, Professor of Mathematics. BS, Univ. of Michigan, 1986; PhD, California Institute of Technology, 1991 (2001)

Jimmy Gurulž, Professor of Law. BA, Univ. of Utah, 1974; JD, *ibid.*, 1980 (1989)

Sandra Gustafson, Associate Professor of English. AB, Cornell Univ., 1985; PhD, Univ. of California, Berkeley, 1993 (1993)

Rev. Gustavo Gutierrez, OP, the John Cardinal O'Hara Professor of Theology. BS, Nat'l Univ. of Peru, 1950; STL Univ. Catholique de Lyon, 1959; PhD, *ibid.*, 1985 (2001)

Anastasia F. Gutting, Professional Specialist, Director of London Undergraduate Program, and the Notre Dame Professor of Philosophy. BA, St. Louis Univ., 1965; PhD, *ibid.*, 1978 (1980)

Gary M. Gutting, Notre Dame Professor of Philosophy and Fellow in the Nanovic Institute of European Studies. AB, St. Louis Univ., 1964; PhD, *ibid.*, 1968 (1969)

FACULTY

- David S. Hachen Jr., Associate Professor of Sociology. BA, Lake Forest College, 1974; MA, Univ. of Wisconsin, 1978; PhD, *ibid.*, 1983 (1987)
- Martin Haenggi, Assistant Professor of Electrical Engineering. Dipl El-Ing ETH, ETH Zurich, 1995; Dipl NDS ETH, *ibid.*, 1998; PhD, *ibid.*, 1999 (2000)
- Jan-Lyder Hagens, Assistant Professor of German and Russian Languages and Literatures, Associate Director of College Seminar, and Fellow in the Nanovic Institute of European Studies. BA, UniversitSt, Tuebingen, 1980; MA, Univ. of Virginia, 1983; MA, UniversitSt Tuebingen, 1988; MA, Princeton Univ., 1990; PhD, *ibid.*, 1993 (1997)
- Kristin Margaret Hager, Assistant Professor of Biological Sciences. BSc, Univ. of Illinois, 1989; PhD, Univ. of Alabama, 1996 (2000)
- Frances Hagopian, the Michael Grace III Chair in Latin American Studies, and Fellow of the Helen Kellogg Institute for International Studies. BA, Brandeis, 1975; PhD, Massachusetts Institute of Technology, 1986 (1999)
- Alexander J. Hahn, Professor of Mathematics, Director of the Honors Program of the College of Science, and Director of the John A. Kaneb Center for Teaching and Learning. BS, Loyola Univ., Los Angeles, 1965; MS, Univ. of Notre Dame, 1968; PhD, *ibid.*, 1970 (1972)
- Ethan T. Haimo, Professor of Music. BA, Univ. of Chicago, 1972; MFA, Princeton Univ., 1974; PhD, *ibid.*, 1978 (1976)
- Brian C. Hall, Associate Professor of Mathematics. BS, Cornell Univ., 1988; BA, *ibid.*, 1988; PhD, *ibid.*, 1993 (1999)
- Douglas C. Hall, Associate Professor of Electrical Engineering. BS, Miami Univ., 1985; MS, Univ. of Illinois, Urbana-Champaign, 1988; PhD, *ibid.*, 1991 (1994)
- Maureen T. Hallinan, Director, Center for Research on Educational Opportunity, and the William P. and Hazel B. White Professor of Sociology. BA, Marymount College, 1961; MS, Univ. of Notre Dame, 1968; PhD, Univ. of Chicago, 1972 (1984)
- John A. Halloran, Associate Professor of Finance and Business Economics. BS, St. Louis Univ., 1968; MBA, Washington Univ., 1970; PhD, *ibid.*, 1976 (1976)
- Eugene W. Halton, Professor of Sociology and Concurrent Professor of American Studies. AB, Princeton Univ., 1972; PhD, Univ. of Chicago, 1979 (1982)
- Robert P. Hames, Adjunct Instructor in Accountancy. BBA, Univ. of Notre Dame, 1978; MS, DePaul Univ., 1985 (2005)
- William C. Hamlett, Adjunct Professor of Biological Sciences. BS, Univ. of South Carolina, 1970; MS, *ibid.*, 1973; PhD, Clemson Univ., 1983 (1991)
- Christopher S. Hamlin, Professor of History and Fellow in the Nanovic Institute for European Studies and in the John J. Reilly Center for Science, Technology, and Values. BA, Antioch College, 1974; MA, Univ. of Wisconsin, Madison, 1977; PhD, *ibid.*, 1982 (1985)
- J. Wolfgang Hammer, Visiting Professor of Physics. BS, Univ. of Munich, 1959; MS, *ibid.*, 1963; PhD, Univ. of Stuttgart, 1968 (2005)
- Graham L. Hammill, Associate Professor of English. BA, Louisiana State Univ., 1986; PhD, Duke Univ., 1992 (1995)
- Qing Han, Professor of Mathematics. BS, Beijing Univ., 1986; PhD, New York Univ., 1993 (1994)
- Noriko Hanabusa, Associate Professional Specialist in East Asian Languages and Literatures. BA, Keio Univ., 1988; MA, Univ. of Wisconsin, Madison, 1994 (1994)
- Barbara J. Hanrahan, Director of University Press and Associate Professional Specialist. BA, Wheaton College, Mass., 1969; MA, Univ. of Chicago, 1970 (1999)
- Sandra Harmatiuk, Professional Specialist in the First Year of Studies and Concurrent Assistant Professor in the University Writing Program. BA, College of St. Rose, 1963; MA, *ibid.*, 1970; PhD, Univ. of Notre Dame, 1975 (1976)
- Ira Harris, Assistant Professor of Management. BBA, Howard Univ., 1982; MBA, Univ. of Pennsylvania, 1990; PhD, Univ. of Texas, Austin, 1995 (1998)
- Susan Cannon Harris, Associate Professor of English, Concurrent Associate Professor in the Keough-Naughton Institute for Irish Studies and Fellow of the Nanovic Institute for European Studies. BA, Yale Univ., 1991; MA, Univ. of North Carolina, Chapel Hill, 1993; PhD, Univ. of Texas at Austin, 1998 (1998)
- Dale R. Harshman, Visiting Professor of Physics. BS, Pacific Lutheran Univ., 1978; MS, Western Washington Univ., 1980; PhD, Univ. of British Columbia, 1986 (1999)
- Kevin John Hart, FAHA, Notre Dame Professor of English, Concurrent Professor of Philosophy, and Fellow, Nanovic Institute for European Studies. BA, Australian National Univ., 1976; PhD, Univ. of Melbourne, 1986 (2002)
- Gregory V. Hartland, Associate Chair and Professor of Chemistry and Biochemistry. BS, Univ. of Melbourne, 1985; PhD, Univ. of California, Los Angeles, 1991 (1994)
- David B. Hartvigsen, Professor of Management. BA, Colgate Univ., 1979; MS, Carnegie Mellon Univ., 1980; PhD, *ibid.*, 1984 (1993)
- Robert J. Havlik, Librarian Emeritus. BSChE, Illinois Institute of Technology, 1950; MSLS Univ. of Illinois, 1951 (1973)
- Daniel E.E. Hayes, Visiting Research Professor of Chemical and Biomolecular Engineering. BSME, Oklahoma State Univ., 1968; MS, Air Force Institute of Technology, 1971; MS, Univ. of Dayton, 1981; PhD, Loughborough Univ., U.K., 2002 (2001)
- Capt. Guy Leslie Hayes, Assistant Professor of Aerospace Studies - ROTC. BS, Univ. of Idaho, 1998 (2004)
- Robert G. Hayes, Professor Emeritus of Chemistry and Biochemistry. BS, Univ. of Pittsburgh, 1958; PhD, Univ. of California, Berkeley, 1961 (1961)
- Stephen M. Hayes, Librarian. BS, Michigan State Univ., 1972; MSL, Western Michigan Univ., 1974; MSA, Univ. of Notre Dame, 1979 (1974)
- Anne E. Hayner, Assistant Professional Specialist in the Joan B. Kroc Institute for International Peace Studies. BA, Univ. of Michigan, 1981; MA, Earlham School of Religion, 1985 (1987)
- John A. Haynes, Judd and Mary Lou Leighton Director for the Performing Arts. B.A., Univ. of Texas - Austin, 1969 (2002)
- Timothy Heath, Adjunct Professor of Marketing. BA/BS, Northern Illinois Univ., 1979; PhD, Univ. of Iowa, 1988 (2001)
- Karen C. Heisler, Visiting Assistant Professional Specialist in Film, Television, and Theatre. BA, Purdue Univ., 1976; MA, *ibid.*, 1978 (2002)
- Barbara J. Henthall, Assistant Professional Specialist and Curator of the Greene-Nieuwland Herbarium. BS, Univ. of Minnesota, 1974 (1994)
- Ronald A. Henthall, Assistant Chair and Professor of Biological Sciences. AA, Los Angeles Valley College, 1965; BA, California State Univ., Northridge, 1967; PhD, Univ. of Minnesota, 1977 (1977)
- Ben A. Heller, Associate Professor of Romance Languages and Literatures and Fellow of the Helen Kellogg Institute for International Peace Studies. BA, Univ. of Pennsylvania, 1981; PhD, Washington Univ., 1990 (2000)
- Jessica J. Hellmann, Assistant Professor of Biological Sciences. BS, Univ. of Michigan, 1996; PhD, Stanford Univ., 2000 (2003)
- W. Phillip Helman, Emeritus Associate Professional Specialist in the Radiation Laboratory. BS, California Institute of Technology, 1958; MS, *ibid.*, 1960; PhD, Univ. of Minnesota, 1964 (1967)
- Paul M. Helquist, Professor of Chemistry and Biochemistry. BA, Univ. of Minnesota, 1969; MS, Cornell Univ., 1971; PhD, *ibid.*, 1972 (1984)
- Michael L. Hemler, Associate Professor of Finance. BS, Univ. of Dayton, 1974; PhD, Washington Univ., 1980; MBA, Univ. of Chicago, 1985; PhD, *ibid.*, 1988 (1992)
- Douglass R. Hemphill, Assistant Professional Specialist in the Mendoza College of Business and Concurrent Instructor in the Institute for Ethical Business Worldwide. Department of Management. BA, Bucknell Univ., 1966; MA, Univ. of Notre Dame, 1980 (1999)
- Kenneth W. Henderson, Associate Professor of Chemistry and Biochemistry. BS, Univ. of Strathclyde, U.K., 1990; PhD, *ibid.*, 1993 (2002)
- Glenn S. Hendlar, Associate Professor of English. BA, Brown Univ., 1984; PhD, Northwestern Univ., 1991 (1994)
- Capt. Angela Hennessey, Assistant Professor of Military Science. B.A., Univ. of Texas, CTC, 1997; M.S., Univ. of Missouri-Rolla, 2002 (2003)
- Eugene W. Henry, Professor Emeritus of Computer Science and Engineering and of Electrical Engineering. BSEE, Univ. of Notre Dame, 1954; MSEE, *ibid.*, 1955; PhD, Stanford Univ., 1960 (1960)
- Jennifer A. Herdt, Associate Professor of Theology and Fellow of the Nanovic Institute for European Studies. BA, Oberlin College, 1989; MA, Princeton Univ., 1991; PhD, *ibid.*, 1994 (1999)

FACULTY

- Edwin Ivan Hernandez, Associate Professional Specialist and Project Director of the Hispanic Church Research Initiative, Latino Studies. B.A., Loma Linda Univ., 1982; MDiv, Andrews Univ., 1986; MA, Univ. of Notre Dame, 1987; PhD, *ibid.*, 1989 (2002)
- Rodney E. Hero, the Packey Dee Professor of American Democracy and Chair of Political Science. AA, St. Petersburg Jr. College, 1973; BS, Florida State Univ., 1975; PhD, Purdue, 1980 (2000)
- Andrew Scott Hertzoff, Visiting Instructor in Political Science and Concurrent Instructor in the Program of Liberal Studies. BA, St. John's College, 1993 (2001)
- Rev. Theodore M. Hesburgh, CSC, President Emeritus and Professor Emeritus of Theology. PhB, Gregorian Univ., Rome, 1939; STL, Catholic Univ., 1944; STD, *ibid.*, 1945 (1945)
- Dusan Hesek, Assistant Professional Specialist in Chemistry and Biochemistry. PhD, Slovak Univ. of Technology, 1987 (2004)
- Leonard A. Hickman, Adjunct Assistant Professor of Psychology. BA, Merrimack College, 1975; MA, Univ. of Maryland, 1978; PhD, *ibid.*, 1990 (1990)
- Michael Douglas Hildreth, Assistant Professor of Physics. AB, Princeton Univ., 1988; PhD, Stanford Univ., 1995 (2000)
- Mary Catherine Hilkert, OP, Professor of Theology. BA, Univ. of Dayton, 1971; MA, Catholic Univ. of America, 1979; PhD, *ibid.*, 1984 (1995)
- Davide A. Hill, Associate Professor of Chemical and Biomolecular Engineering. PhD, Univ. of California, Berkeley, 1989 (1990)
- Richard Hilliard, Professional Specialist and Director of Research Compliance, Research Division of the Graduate School. BS, Sam Houston State Univ., 1974; MS, Texas A&M Univ., 1977; PhD, *ibid.*, 1983 (1987)
- A. Alexandrou Himonas, Associate Chair and Professor of Mathematics. BS, Patras Univ., 1976; MS, Purdue Univ., 1982; PhD, *ibid.*, 1985 (1989)
- Edward H. Hinchcliff, Assistant Professor of Biological Science. BA, Univ. of Dayton, 1989; PhD, Univ. of Minnesota, 1995 (2001)
- Richard Keith Hind, Assistant Professor of Mathematics. BA, Cambridge Univ., 1993; PhD, Stanford, 1997 (2000)
- Joel C. Hodson, Visiting Associate Professor of American Studies. BA, Indiana Univ., 1972; MA, Emory Univ., 1984; PhD, George Washington Univ., 1992 (2001)
- Emil T. Hofman, Dean Emeritus of the Freshman Year of Studies and Professor Emeritus of Chemistry and Biochemistry. AB, Univ. of Miami, 1949; MS, Univ. of Notre Dame, 1953; PhD, *ibid.*, 1963 (1953)
- Peter D. Holland, Chair of Film, Television, and Theatre, the McMeel Family Professor of Shakespeare Studies in Film, Television, and Theatre, Concurrent Professor of English, and Fellow of the Nanovic Institute for European Studies. BA, Trinity Hall, Cambridge, 1972; PhD, *ibid.*, 1977 (2002)
- Hope Hollocher, Associate Professor of Biological Sciences. BA, Univ. of Pennsylvania, 1982; PhD, Washington Univ., 1991 (2000)
- Montey G. Holloway, Professional Specialist in Philosophy. BA, Huntington College, 1972; PhD, Univ. of Notre Dame, 1981 (1981)
- Laura Garmany Holt, Associate Professional Specialist and Deputy Director of the London Undergraduate Program and Concurrent Associate Professional Specialist in Theology. BA, Vassar College, 1968; MA, Univ. of Notre Dame, 1992; PhD, *ibid.*, 1999 (1999)
- Joseph Holtermann, Assistant Librarian. B.A., Univ. of Notre Dame, 1984; MA, Middlebury College, 1988; MA, Univ. of IL-Champaign, 1992 (2005)
- Sallie A. Hood, Associate Professor of Architecture. BA, Carleton College, Northfield, Minnesota, 1966; MArch, Univ. of Illinois at Chicago, 1979 (2001)
- Vittorio G. Hösle, the Paul G. Kimball Professor of Arts and Letters, Professor of German, Concurrent Professor of Philosophy, Concurrent Professor of Political Science, and Fellow in the Nanovic Institute for European Studies. Abitur, Albertus-Magnus-Gymnasium, 1977; PhD, Univ. of Tübingen, 1982; Habilitation, *ibid.*, 1986 (1999)
- Alan Howard, Associate Chair and Professor of Mathematics. BA, Rutgers Univ., 1953; PhD, Brown Univ., 1965 (1968)
- Don A. Howard, Professor of Philosophy and Fellow of the Nanovic Institute for European Studies. BSc, Michigan State Univ., 1971; AM, Boston Univ., 1973; PhD, *ibid.*, 1979 (1997)
- George S. Howard, the Morahan Director of the Arts and Letters Core Course Program, Professor of Psychology, and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Marist College, 1970; MA, Southern Illinois Univ., 1972; PhD, *ibid.*, 1975 (1981)
- Jay C. Howk, Assistant Professor of Physics. BA, Hanover College, 1994; PhD, Univ. of Wisconsin, Madison, 1999 (2005)
- Robert A. Howland Jr., Associate Professor of Aerospace and Mechanical Engineering. BS, Yale Univ., 1965; MS, *ibid.*, 1967; PhD, North Carolina State Univ., 1974 (1981)
- William P. Hoye, Associate Vice President and Deputy General Counsel and Concurrent Associate Professor of Law. BA, St. John's Univ., 1983; JD, Drake, 1986; MA, Univ. of Notre Dame, 2001 (1998)
- Bei Hu, Professor of Mathematics. BS, East China Normal Univ., 1982; MS, *ibid.*, 1984; PhD, Univ. of Minnesota, 1990 (1990)
- Xiaobo Sharon Hu, Associate Professor of Computer Science and Engineering. BS, Tianjin Univ., 1982; MS, Polytechnic Institute of New York, 1984; PhD, Purdue Univ., 1989 (1996)
- Roger D. Huang, Chair and the Kenneth R. Meyer Professor of Global Investment Management. BSIM, Purdue, 1975; MA, Univ. of Pennsylvania, 1978; PhD, *ibid.*, 1980 (2000)
- Yih-Fang Huang, Chair and Professor of Electrical Engineering and Concurrent Professor of Computer Science and Engineering. BSEE, National Taiwan Univ., 1976; MSEE, Univ. of Notre Dame, 1979; PhD, Princeton Univ., 1982 (1982)
- Paul W. Huber, Professor of Chemistry and Biochemistry. BS, Boston College, 1973; PhD, Purdue Univ., 1978 (1985)
- Francis C. Huderwitz Jr., Adjunct Assistant Professor of Architecture. BArch, Univ. of Notre Dame, 1980; MBA, Monmouth Univ., 1985; MArch, Univ. of Notre Dame, 1992 (1998)
- Joseph H. Huebner, Librarian Emeritus. BA, Univ. of Notre Dame, 1954; MLS, Western Michigan Univ., 1964 (1965, 1967)
- Richard J. Huether, Lecturer in the Mendoza College of Business. BS, Univ. of Notre Dame, 1955 (1994)
- Gordon L. Hug, Associate Professional Specialist in the Radiation Laboratory. BA, Southern Illinois Univ., 1964; PhD, Univ. of Chicago, 1970 (1976)
- Tin-Bor Hui, Assistant Professor of Political Science. B.S.S., Chinese Univ. of Hong Kong, 1990; MA, Columbia Univ., 1995; MPhil, *ibid.*, 1997; PhD, *ibid.*, 2000 (2004)
- Romana Huk, Associate Professor of English and Fellow of the Nanovic Institute for European Studies. BA, College of William and Mary, 1981; MA, Univ. of Notre Dame, 1984; PhD, *ibid.*, 1987 (2002)
- Edward F. Hums, Assistant Professional Specialist in Accountancy. BBA, Univ. of Notre Dame, 1975; MS, Indiana Univ., South Bend, 1979; MBA, *ibid.*, 1989 (1991)
- Lakhwinder S. Hundal, Adjunct Research Assistant Professor of Civil Engineering and Geological Sciences. BS, Punjab Agricultural Univ., 1988; MS, *ibid.*, 1991; PhD, Univ. of Nebraska, Lincoln, 1997 (2003)
- Daniel M. Hungerman, Assistant Professor of Economics and Econometrics. B.A., Miami Univ., 2000; Ph.D., Duke Univ., 2005 (2005)
- J. William Hunt, Associate Professor Emeritus of Classics. BA, Fordham Univ., 1954; PhL, *ibid.*, 1955; MA, *ibid.*, 1957; PhD, Yale Univ., 1963 (1971)
- Bro. Louis Hurcik, CSC, Associate Professional Specialist in Physical Education. (1970)
- Shaun R. Huxford, Adjunct Instructor in Management. BA, Univ. of Washington, 1989; MBA, Univ. of Notre Dame, 1992 (1999)
- David R. Hyde, Professor of Biological Sciences and the Rev. Howard J. Kenna, CSC, Memorial Director of the Center for Zebrafish Research. BS, Michigan State Univ., 1980; PhD, Pennsylvania State Univ., 1985 (1988)
- Anthony K. Hyder, Associate Vice President for Graduate Studies and Research and Professor of Physics. BS, Univ. of Notre Dame, 1962; MS, Air Force Institute of Technology, 1964; PhD, *ibid.*, 1971 (1991)
- Kristine L. Ibsen, Professor of Romance Languages and Literatures and Fellow in the Helen Kellogg Institute for International Studies. BA, California State Univ., 1983; MA, Univ. of California, 1984; PhD, *ibid.*, 1991 (1992)
- Frank P. Incropera, the Matthew H. McCloskey Dean of the College of Engineering and the H. Clifford and Evelyn A. Brosey Professor of Mechanical Engineering. BS, Massachusetts Institute of Technology, 1961; MS, Stanford Univ., 1962; PhD, *ibid.*, 1966 (1998)

FACULTY

Donald K. Irmiger III, Adjunct Instructor in Computer Applications. BS, Indiana Univ., 1990 (1995)

Antonette Irving, Assistant Professor of English. BA, Univ. of Virginia, 1992; MA, Univ. of Kent, 1996; PhD, New York Univ., 2001 (2000)

Takayuki Iwaki, Research Assistant Professor of Chemistry and Biochemistry. MD, Hamamatsu Univ. School of Medicine, 1996; PhD, *ibid.*, 2001 (2003)

Jesus A. Izaguirre, Associate Professor of Computer Science and Engineering. BS, Tecnológico de Monterrey ITESM 1992; MS, Univ. of Illinois at Urbana–Champaign, 1996; PhD, *ibid.*, 1999 (1999)

Pamela Elisabeth Joan Jackson, Associate Professional Specialist in the Center for Pastoral Liturgy. BA, Yale College, 1972; MDiv, Yale Divinity School, 1980; MA, Yale Graduate School, 1981; MPhil, *ibid.*, 1984; PhD, *ibid.*, 1987 (2002)

Dennis C. Jacobs, Vice President and Associate Provost, and Professor of Chemistry and Biochemistry. BS, Univ. of California, Irvine, 1981; BS, *ibid.*, 1982; PhD, Stanford Univ., 1988 (1988)

Roger F. Jacobs, Associate Dean for Library and Information Services and Professor of Law. AB, Univ. of Detroit, 1962; MALS, Univ. of Michigan, 1964; JD, Univ. of Detroit, 1970 (1985)

L. Isabel Jakab, Associate Professional Specialist and Concurrent Lecturer in Romance Languages and Literatures. MA, Univ. of Notre Dame, 1983 (1985)

Boldizsár Jankó, Associate Professor of Physics. Univ. Eotvos, 1991; PhD, Cornell Univ., 1996 (2000)

Doris Jankovits, Adjunct Instructor in German and Russian Languages and Literatures. MA, Univ. of Vienna, 2003 (2004)

Erik G. Janowsky, Visiting Fellow in the Institute for Latino Studies. BA, Univ. of Notre Dame, 1987; MA, Tulane Univ., 1991 (2001)

Robert V.F. Janssens, Associate Director, Physics Division, Argonne National Laboratory. PhD, Univ. Catholique de Louvain, 1978 (2004)

Christian R. Jara, Adjunct Instructor in Computer Applications Second Major Program. BA, Fordham Univ., 1974 (2000)

Rev. Peter A. Jarret, C.S.C., Rector of Residence Halls and Concurrent Instructor of Theology. B.A., Univ. of Notre Dame, 1986; M.Div., *ibid.*, 1991 (1998)

Anja Jauernig, Assistant Professor of Philosophy. BA (Zwischen Prüfung), Rheinische Friedrich–Wilhelms–Univ. Bonn, 1994; BS (Vordiplom), *ibid.*, 1995; MA, *ibid.*, 1997; MA, Princeton Univ., 1999; PhD, *ibid.*, 2004 (2002)

Debra L. Javeline, Assistant Professor of Political Science. BA, Brown Univ., 1989; PhD, Harvard Univ., 1997 (2004)

Thomas J. Jemielity, Professor of English and Fellow in the Nanovic Institute for European Studies. MA, John Carroll Univ., 1958; PhD, Cornell Univ., 1965 (1963)

Debdeep Jena, Assistant Professor of Electrical Engineering. BS, Indian Institute of Technology, Kanpur,

1998; PhD, Univ. of California, Santa Barbara, 2002 (2003)

David T. Jenkins, Associate Librarian, University Libraries. BA, Univ. of Minnesota, 1983; MTS, Harvard Divinity School, 1990; MS LIS, Simmons College, 1997 (1999)

Rev. John I. Jenkins, CSC, President of the University and Associate Professor of Philosophy. BA, Univ. of Notre Dame, 1976; MA, *ibid.*, 1978; BPhil, Oxford Univ., 1987; MDiv, Jesuit School of Theology at Berkeley, 1988; STL, *ibid.*, 1988; DPhil, Oxford Univ., 1989 (1988)

Lionel Jensen, Chair and Associate Professor of East Asian Languages and Literatures and Fellow in the Helen Kellogg Institute for International Studies. BA, Williams College, 1976; MA, Washington Univ., 1980; CPhil, Univ. of California at Berkeley, 1984; PhD, *ibid.*, 1992 (2000)

Mark N. Jensen, Adjunct Instructor in the Institute for Ethical Business Worldwide. BA, Miami Univ., 1995; MA, Biola Univ., 2000; MA, Univ. of Notre Dame, 2002 (2003)

Richard A. Jensen, Chair of the Dept. of Economics and Econometrics, Professor of Economics, Concurrent Professor of Finance and Business Economics, and Fellow in the Helen Kellogg Institute for International Studies. BA, Univ. of Kansas, 1971; PhD, Northwestern Univ., 1980 (2000)

Richard Jorg Jensen, Guest Professor of Biological Sciences and Director of the Greene–Nieuwland Herbarium. BS, Austin Peay State Univ., 1970; MS, *ibid.*, 1972; PhD, Miami Univ., 1975 (1981)

Michael J. Jenuwine, Associate Professional Specialist in Law. B.S., Univ. of Michigan, 1988; MA, Univ. of Chicago, 1990; J.D., Loyola Univ. of Chicago, 2000; Ph.D., Univ. of Chicago, 2000 (2005)

Carlos Jerez–Farrán, Associate Professor of Romance Languages and Literatures and Fellow in the Nanovic Institute for European Studies. BA, Univ. of Sheffield, England, 1980; MA, Univ. of Massachusetts, Amherst, 1983; PhD, *ibid.*, 1987 (1986)

Colin P. Jessop, Associate Professor of Physics. BA, Univ. of Cambridge (Trinity College), 1986; MA, *ibid.*, 1986; PhD, Harvard Univ., 1993 (2004)

Robert C. Johansen, Professor of Political Science, Senior Fellow in the Joan B. Kroc Institute for International Peace Studies, and Fellow in the Helen Kellogg Institute for International Studies. BA, Manchester College, 1962; MA, Columbia Univ., 1963; PhD, *ibid.*, 1968 (1986)

Alan L. Johnson, Professor of Biological Sciences. BA, Univ. of Vermont, 1972; MS, *ibid.*, 1975; PhD, Cornell Univ., 1979 (1993)

James F. Johnson, Associate Professional Specialist in Chemistry and Biochemistry. BS, St. Francis College, 1970; MS, Univ. of Notre Dame, 1975 (1975)

Maxwell E. Johnson, Professor of Theology. BA, Augustana College, 1974; MDiv, Wartburg Seminary, 1978; MA, School of Theology, Collegeville, 1982; MA, Univ. of Notre Dame, 1989; PhD, *ibid.*, 1992 (1997)

Paul G. Johnson, Associate Professor of Music. BMus, Northwestern Univ., 1976; MFA, Princeton Univ., 1980; PhD, *ibid.*, 1981 (1981)

Stephen M. Johnson, Visiting Professor of Law. BS, Villanova Univ., 1985; JD, *ibid.*, 1988; LLM, George Washington Univ., 1991 (2003)

Vincent R. Johnson, Visiting Professor of Law. BA, St. Vincent College, 1975; JD, Univ. of Notre Dame, 1978; LLM, Yale Univ., 1979 (2005)

Walter R. Johnson, the Frank M. Freimann Professor of Physics. BSE, Univ. of Michigan, 1952; MS, *ibid.*, 1953; PhD, *ibid.*, 1957 (1958)

Cyraina E. Johnson–Roullier, Associate Professor of English. BJ, Ohio Univ., 1982; MA, Ohio State Univ., 1985; MA, State Univ. of New York, 1990; PhD, *ibid.*, 1992 (1991)

Joyce V. Johnstone, Professional Specialist in the Institute for Educational Initiatives and the Jim and Colleen Ryan Director of ACE Education Outreach. BA, The Catholic Univ. of America, 1965; MS, Butler Univ., 1973; PhD, Indiana Univ., 1994 (1998)

Gerald L. Jones, Professor Emeritus of Physics. BS, Univ. of Kansas, 1956; PhD, *ibid.*, 1960 (1963)

Patricia Collins Jones, Adjunct Professor of Music. BMus, the Juilliard School, 1966; MFA, Ohio Univ., 1968; PhD, Rutgers Univ., 1977 (2001)

Richard E. Jones, Librarian and Concurrent Instructor in Music. BMus, Westminster College, 1966; MFA, Ohio Univ., 1968; MSLS Univ. of North Carolina, 1971 (1993)

Robert L. Jones Jr., Professional Specialist and Director of the Legal Aid Clinic. BA, Univ. of Notre Dame, 1980; JD, Harvard Law School, 1984 (2002)

Sherri Lynn Jones, Librarian, Life Sciences Library. BA, Marshall Univ., 1975; MA, *ibid.*, 1979; MLS, Kent State Univ., 1988 (2000)

Maj. Kelly C. Jordan, Professor of Military Science. BA, Virginia Military Institute, 1986; MA, Ohio State Univ., 1996; PhD, *ibid.*, 1999 (2003)

Louis E. Jordan, Librarian, University Libraries. BA, Univ. of Massachusetts, 1973; MA, Univ. of Chicago, 1974; PhD, Univ. of Notre Dame, 1980; MLS, Indiana Univ., 1981 (1981)

Hon. Jeanne Jourdan, Adjunct Professor of Law. AB, Chestnut Hill College, 1961; JD, Univ. of Notre Dame, 1975 (1983)

Lynn Sumida Joy, Professor of Philosophy. AB, Harvard Univ., 1971; AM, *ibid.*, 1981; PhD, *ibid.*, 1982 (1988, 2000)

David Eugene Joyce, Research Assistant Professor of Chemistry and Biochemistry. BS, John Carroll Univ., 1987; MD, St. Louis Univ., 1992 (2004)

Michelle Vigiuetta Joyce, Assistant Professional Specialist in Chemistry and Biochemistry. BS, Univ. of Notre Dame, 1999; PhD, Duke Univ., 2003 (2004)

Anthony Manauis Juan, Professor of Film, Television, and Theatre. PhD, Univ. of Athens, 1990 (2004)

Encarnaci—n Juárez, Assistant Professor of Romance Languages and Literatures. Lic, Univ. of Barcelona, 1977; MA, Univ. of California, Berkeley, 1981; PhD, *ibid.*, 1987 (1995)

FACULTY

- Eric J. Jumper, Professor of Aerospace and Mechanical Engineering. BS, Univ. of New Mexico, 1968; MS, Univ. of Wyoming, 1969; PhD, Air Force Institute of Technology, 1975 (1989)
- James W. Kaiser, Professional Specialist in Physics. BS, Univ. of Dayton, 1965; MAT, Univ. of Notre Dame, 1967; MSEE, *ibid.*, 1967 (1969)
- Prashant V. Kamat, Professor of Chemistry and Biochemistry, Senior Scientist In the Radiation Laboratory, and Concurrent Professor of Chemical and Biomolecular Engineering. BS, Karnatak Univ., India, 1972; MS, Bombay Univ., 1974; PhD, *ibid.*, 1979 (1983)
- Curtis Warren Kamman, Adjunct Instructor of Political Science. BA, Yale Univ., 1959 (2001)
- S. Alex Kandel, Assistant Professor of Chemistry and Biochemistry. BS, Yale Univ., 1993; PhD, Stanford Univ., 1999 (2001)
- Charles Kannengiesser, the Catherine F. Huisling Professor Emeritus of Theology. LicPhil, Univ. Montpellier, 1953; Lic d'Etat Phil, Univ. of Strasbourg, 1954; Lic Theology, Theologat SJ, Chantilly, 1959; Doct, Univ. of Strasbourg, 1964; Doctorat Theology, Institut Catholique, Paris, 1966; Doctorat d'Etat es-Lettres, Univ. de Paris IV, Sorbonne, 1982 (1981)
- Jeffrey C. Kantor, Vice President for Graduate Studies and Research, Dean of the Graduate School, and Professor of Chemical and Biomolecular Engineering. BS, Univ. of Minnesota, 1976; MA, Princeton Univ., 1977; PhD, *ibid.*, 1981 (1981)
- Joni E. Kanzler, Assistant Librarian, University Libraries, BS, Western Kentucky Univ., 1994; MLS, Indiana Univ., 1995 (2000)
- Joshua B. Kaplan, Associate Professional Specialist in Political Science. AB, Univ. of California, Santa Cruz, 1974; MA, Univ. of Chicago, 1977 (1987)
- Ahsan Kareem, the Robert M. Moran Professor of Civil Engineering. BS, W. Pakistan Univ. of Engineering and Technology, 1968; MS, Univ. of Hawaii, 1975; PhD, Colorado State Univ., 1978 (1990)
- Daniel J. Karmgard, Research Assistant Professor of Physics. BS, Univ. of California, Los Angeles, 1993; MS, California State Univ., Long Beach, 1995; PhD, Florida State Univ., 1999 (2000)
- Asher Kaufman, Assistant Professor of History, BA, The Hebrew Univ. of Jerusalem, 1989; MA, *ibid.*, 1994; PhD, Brandeis Univ., 2000 (2005)
- M. Cathleen Kaveny, the John P. Murphy Foundation Professor of Law and Professor of Theology. AB, Princeton Univ., 1984; MA, Yale Univ., 1986; MPhil, *ibid.*, 1990; JD, *ibid.*, 1990; PhD, *ibid.*, 1991 (1995)
- Jessica Kayongo, Assistant Librarian, University Libraries. BA, South Dakota State Univ., 1996; JD, Univ. of Nebraska, Lincoln, 1998; MA, Univ. of Wisconsin, Madison, 2002 (2002)
- John G. Keane, the Howard J. and Geraldine F. Korth Professor of Strategic Management and Gillen Dean Emeritus. AB, Syracuse Univ., 1952; BSC, Univ. of Notre Dame, 1955; MBA, Indiana Univ., 1956; PhD, Univ. of Pittsburgh, 1965 (1989)
- Barry P. Keating, the Jesse H. Jones Professor of Finance and Business Economics. BBA, Univ. of Notre Dame, 1967; MA, Lehigh Univ., 1968; PhD, Univ. of Notre Dame, 1974 (1978)
- LT. Gregory Keigher, Assistant Professor of Naval Science. MA, Univ. of Central Florida, 1999; BS, Univ. of Wisconsin, 1996 (2005)
- Conrad L. Kellenberg, Professor Emeritus of Law. AB, St. John's Univ., 1949; JD, Columbia Univ., 1952 (1955)
- Thomas M. Kellenberg, Professional Specialist and Executive Director of the Washington, D.C. Center, Concurrent Associate Professor of Law and Public Policy, and Counsel to the Provost for Government Affairs. BA, Univ. of Notre Dame, 1980; JD, Harvard Univ., 1986 (1997)
- William K. Kelley, Associate Professor of Law. BA, Marquette Univ., 1984; JD, Harvard Univ., 1987 (1995)
- Anita E. Kelly, Professor of Psychology. BS, Northwestern Univ., 1986; MS, Univ. of Florida, 1988; PhD, *ibid.*, 1991 (1994)
- Edward Walter Kelly, Adjunct Instructor, Univ. Writing Program. BA, Univ. of Notre Dame, 1964; MA, Univ. of Notre Dame, 1968 (2000)
- Sean Patrick Kelly, Assistant Professor in Sociology. BA, Univ. of North Carolina-Chapel Hill, 1998; MS Univ. of Wisconsin-Madison, 2001 (2005)
- Thomas W. Kelly, Chair and Professional Specialist in Physical Education. BS, Western Michigan Univ., 1960; MS, Pennsylvania State Univ., 1962; MA, Univ. of Notre Dame, 1970; PhD, *ibid.*, 1975 (1968, 1990)
- Kenneth Kemner, Adjunct Associate Professor of Civil Engineering and Geological Sciences. BS, Xavier Univ. (Cincinnati, OH), 1986; PhD, Univ. of Notre Dame, 1993 (2003)
- Barbara Kenda, Assistant Professor of Architecture. BArch, Univ. of Ljubljana, 1989; March, Cornell Univ., 1992; MS, Univ. of Pennsylvania, 1995; PhD Arch., *ibid.*, 1998 (2000)
- John J. Kennedy, Professor of Marketing. BS, Newark College of Engineering, 1955; MBA, Ohio State Univ., 1959; PhD, *ibid.*, 1962 (1963)

Craig E. Lefanowicz, Visiting Associate Professor of Accountancy. BA, Michigan State Univ., 1982; PhD, Univ. of Texas, Austin, 1990 (2003)

Jennifer E. Lefever-Burke, Research Assistant Professor of Psychology. BA, Illinois State Univ., 1994; MA., Univ. of Notre Dame, 1998; PhD, *ibid.*, 2000 (2001)

Thomas E. Lehman, Associate Librarian. BA, Goshen College, 1969; MLS, Indiana Univ., 1974 (1985)

David T. Leighton Jr., Professor of Chemical and Biomolecular Engineering. BSE, Princeton Univ., 1980; MS, Stanford Univ., 1981; PhD, *ibid.*, 1985 (1985)

Michael D. Lemmon, Professor of Electrical Engineering. BSEE, Stanford Univ., 1979; MSEE, Carnegie Mellon Univ., 1987; PhD, *ibid.*, 1990 (1990)

Daniel H. Lende, Assistant Professor of Anthropology. AB, Harvard Univ., 1991; PhD, Emory Univ., 2003 (2004)

Craig S. Lent, the Frank M. Freimann Professor of Electrical Engineering. AB, Univ. of California, Berkeley, 1978; PhD, Univ. of Minnesota, 1984 (1986)

Sr. Jean Lenz, OSF, Vice President for Student Affairs. AB, Univ. of St. Francis, 1952; MA, Univ. of Notre Dame, 1967 (1973)

Giovanna Lenzi–Sandusky, Assistant Professional Specialist and Concurrent Lecturer in the Dept. of Romance Languages and Literatures. Laurea in Lettere, Univ. di Firenze, 1979 (1990)

Kristin M. Lewis, Associate Professional Specialist in Biological Sciences. BS, Univ. of Notre Dame, 1991; MS, *ibid.*, 1997 (1998)

Sarah Blake Leyerle, Associate Professor of Theology. BA, Yale Univ., 1982; MA, Duke Univ., 1988; PhD, *ibid.*, 1991 (1990)

Lei Li, Associate Professor of Biological Sciences. BS, Shandong Univ., China, 1985; PhD, Georgia State Univ., 1995 (2003)

Zhen Li, Assistant Professor of Accountancy. BA, Nankai Univ., China, 1993; MBA, Illinois State Univ., 1998; PhD, Univ. of Arizona, 2003 (2003)

Keir A. Lieber, Assistant Professor of Political Science, Fellow in the Joan B. Kroc Institute for International Peace Studies, and Fellow in the Nanovic Institute for European Studies. BA, Univ. of Wisconsin at Madison, 1992; MA, Univ. of Chicago, 1996; PhD, *ibid.*, 2000 (2001)

Marya Lieberman, Associate Professor of Chemistry and Biochemistry. BA, Massachusetts Institute of Technology, 1989; PhD, Univ. of Washington, 1994 (1996)

Rev. William M. Lies, CSC, Executive Director of the Center for Social Concerns and Fellow in the Helen Kellogg Institute for International Studies. BA, Saint John's Univ., 1984; MDiv, Univ. of Notre Dame, 1993; MA, Univ. of Pittsburgh, 1998; PhD, *ibid.*, 2003 (2002)

Sylvia Li–Chun Lin, Assistant Professor of East Asian Languages and Literatures. BA, Tamkang Univ., Taipei, 1984; MA, *ibid.*, 1987; MA, St. John's Univ., 1988; MA, Univ. of Oregon, 1991; PhD, Univ. of California, 1998 (2002)

Daniel A. Lindley III, Assistant Professor of Political Science and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Tufts, 1984; PhD, Massachusetts Institute of Technology, 1998 (1999)

David T. Link, the Joseph A. Matson Dean Emeritus of the Law School and Professor Emeritus of Law. BS, Univ. of Notre Dame, 1958; JD, *ibid.*, 1961 (1970)

Jean Ann Linney, Vice President and Associate Provost, and Professor of Psychology. BA, Hobart and William Smith College, 1972; MA, Univ. of Illinois at Urbana–Champaign, 1976; PhD, *ibid.*, 1978 (2004)

David Lippel, Research Assistant Professor of Mathematics. BA, Haverford College, 1994; PhD, Univ. of California, 2001 (2004)

Louise Litzinger, Assistant Dean Emeritus and Professional Specialist in the First Year of Studies. BA, Ohio Dominican College, 1966; MA, Valparaiso Univ., 1972; MTS, Catholic Theological Union, 1982; DMin, Graduate Theological Foundation, 1997 (1990)

Chao–Shin Liu, Associate Professor of Accountancy. BBA, National Taiwan Univ., 1979; MBA, National Cheng–chi Univ., 1983; PhD, Univ. of Illinois, Urbana–Champaign, 1992 (1992)

Katherine Wenjun Liu, Assistant Professor, Aerospace and Mechanical Engineering, B.E., Tsinghua Univ., Beijing, 1997; M.S., *ibid.*, 2000; PhD, Carnegie Mellon Univ., 2001 (2005)

Ruey–Wen Liu, the Frank M. Freimann Professor Emeritus of Electrical Engineering. BS, Univ. of Illinois, 1954; MS, *ibid.*, 1955; PhD, *ibid.*, 1960 (1960)

Xiaobo Liu, the Rev. Howard J. Kenna, CSC, Memorial Professor of Mathematics. BS, Tsinghua Univ., 1987; PhD, Univ. of Pennsylvania, 1994 (1999)

Xinyu Liu, Research Assistant Professor of Physics. MS, Univ. of Science and Technology, 1996; PhD, Univ. of Notre Dame, 2003 (2004)

A. Eugene Livingston, Professor of Physics. BSc, Univ. of Alberta, Canada, 1969; MSc, *ibid.*, 1970; PhD, *ibid.*, 1974 (1978)

Neil Francis Lobo, Research Assistant Professor of Biological Sciences. BSc, St. Joseph's Arts and Science College, 1995; PhD, Univ. of Notre Dame, 2000 (2004)

FACULTY

David M. Lodge, Professor of Biological Sciences and Fellow in the Joan B. Kroc Institute for International Studies. BS, Univ. of the South, 1979; PhD, Oxford Univ., 1982 (1985)

Gilburt D. Loescher, Professor Emeritus of Political Science and Fellow in the Helen Kellogg Institute for International Studies. BA, St. Mary's College, California, 1967; MA, Monterey Institute of Foreign Studies, 1969; PhD, London School of Economics and Political Science, 1975 (1975)

Patricia A. Loghry, Assistant Librarian, University Libraries. BA, Univ. of Wisconsin, Madison, 1986; MLS, *ibid.*, 1991 (2000)

George A. Lopez, Professor of Political Science, Senior Fellow and Director of Policy Studies in the Joan B. Kroc Institute for International Studies, and Fellow in the Helen Kellogg Institute for International Studies. BA, St. John Fisher College, Rochester, N.Y., 1972; PhD, Syracuse Univ., 1975 (1986)

Julia Lopez, Visiting Fellow in the the Nanovic Institute for European Studies. BA, Colegio del Loreto, 1971; Lic Univ. Complutense de Madrid, 1977; PhD, *ibid.*, 1985 (2000)

Martina Lopez, Associate Professor of Art, Art History and Design. BFA, Univ. of Washington, 1985; MFA, The School of the Art Institute of Chicago, 1990 (1993)

Robert J. Lordi, Professor Emeritus of English. AB, Holy Cross College, 1950; MA, Boston College, 1955; PhD, Univ. of Illinois, 1958 (1958)

John M. LoSecco, Professor of Physics. BS, Cooper Union, 1972; AM, Harvard Univ., 1973; PhD, *ibid.*, 1976 (1985)

Timothy J. Loughran, Professor of Finance. BA, Univ. of Illinois, 1984; BS, *ibid.*, 1985; MBA, Indiana Univ., 1989; PhD, Univ. of Illinois, 1993 (1999)

Michael J. Loux, the George N. Shuster Professor of Philosophy. BA, College of St. Thomas, 1964; MA, Univ. of Chicago, 1965; PhD, *ibid.*, 1968 (1968)

Gitta H. Lubke, Assistant Professor of Psychology. BS, Johann Wolfgang Goethe Univ., Germany, 1979; MA, Univ. of Amsterdam, 1997; PhD, Free Univ. of Amsterdam, 2002 (2004)

Cecilia Lucero, Assistant Professional Specialist in the First Year of Studies. BA, Univ. of Notre Dame, 1984; MA, Univ. of Colorado, 1990; PhD, Univ. of Michigan, 2002 (2004)

Phyllis H. Luckert, Associate Professional Specialist Emerita in the LOBUND Laboratory. BA, Ohio State Univ., 1952; MS, Univ. of Notre Dame, 1971 (1983)

Pavel Lushnikov, Visiting Kenna Assistant Professor of Mathematics. MA, Moscow Institute, 1994; PhD, Landau Institute, 1997 (2004)

Michael A. Lutes, Associate Librarian. BS, Univ. of Florida, 1976; Masters equiv., Michigan State Univ., 1979; MLS, Indiana Univ., 1988 (1989)

Natasha Lyandres, Associate Librarian. BA, Moscow State Univ., 1990; MLIS, San Jose State Univ., 1993 (2001)

Semion Lyandres, Associate Professor of History, Fellow in the Nanovic Institute for European Studies, and Fellow in the Helen Kellogg Institute for International Studies.

BA, St. Petersburg State Pedagogical Univ., 1980; MA, Boston, 1987; MA, Stanford, 1988; PhD, *ibid.*, 1992 (2001)

Michael N. Lykoudis, Dean and Professor of Architecture. BArch, Cornell Univ., 1979; MArch, Univ. of Illinois, 1983 (1991)

Monika Lynker, Guest Assistant Professor of Physics. BA, GH Siegen, 1984; PhD., Univ. of Texas, Austin, 1990 (2000)

Sabine G. MacCormack, the Rev. Theodore M. Hesburgh, CSC, Professor of Arts and Letters and Fellow in the Helen Kellogg Institute for International Studies. BA, Oxford Univ., 1964; Dip Archives, Univ. of Liverpool, 1965; PhD, Oxford Univ., 1974 (2003)

Cynthia S. Maciejczyk, Concurrent Instructor in Accountancy. BA., Duquesne Univ., 1984; MA, Carnegie Mellon Univ., 1987 (1996)

Alasdair C. Macintyre, O'Brien Senior Research Professor of Philosophy. BA, Queen Mary College, 1949; MA, Manchester Univ., 1951 (2000)

Joanne Mack, Associate Professional Specialist in the Snite Museum of Art and Concurrent Assistant Professor of Anthropology. AA, College of Marin, 1962; BA, San Francisco State College, 1964; MA, Univ. of Wyoming, 1971; PhD, Univ. of Oregon, 1979 (1997)

Louis A. MacKenzie Jr., Associate Professor of Romance Languages and Literatures. BA, Univ. of Notre Dame, 1969; MA, Middlebury College, 1972; PhD, Cornell Univ., 1977 (1983)

Breandán A. Mac Suibhne, Naughton Publication Coordinator, Assistant Professional Specialist, Fellow of Keough-Naughton Institute for Irish Studies. BA, Univ. College Dublin (NUI), Ireland, 1989; MA, *ibid.*, 1991; MA, Carnegie Mellon Univ., 1994; PhD, *ibid.*, 1999 (2000)

Taralie MacLeod, Assistant Professional Specialist, Irish Languages & Literature. BS, Univ. of Dublin, 1991; MSW, Univ. College Cork, 1997 (2005)

Keith P. Madden, Associate Professional Specialist in the Radiation Laboratory. AB, Cornell Univ., 1974; MS, Univ. of Rochester, 1977; PhD, *ibid.*, 1979 (1982)

Gregory Richard Madey, Professional Specialist and Concurrent Associate Professor of Computer Science and Engineering. BS, Cleveland State Univ., 1974; MS, *ibid.*, 1975; MS, Case Western Reserve Univ., 1979; PhD, *ibid.*, 1984 (2000)

Nancy K. McGill, Visiting Associate Professor in the Master of Education Program. BS, Northern Illinois Univ., 1973; MA, Concordia Univ., 1993; PhD, Loyola Univ., 2001 (2003)

Edward J. Maginn, Professor of Chemical and Biomolecular Engineering. BS, Iowa State Univ., 1987; PhD, Univ. of California, Berkeley, 1995 (1995)

Aaron Han Joon Magnan-Park, Assistant Professor of Film, Television, and Theatre, Fellow, Nanovic Institute. AB, Univ. of Michigan, 1990; MA, Univ. of Iowa, 1994; PhD, Univ. of Iowa, 2002 (2004)

Cynthia K. Mahmood, Associate Professor of Anthropology. BA, New College, 1977; MA, Tulane Univ., 1981; PhD, *ibid.*, 1986 (2001)

John A. Mahoney, Adjunct Professor of Chemical and Biomolecular Engineering. BS, Villanova Univ., 1963; MA, Princeton Univ., 1965; PhD, *ibid.*, 1968 (2001)

Scott P. Mainwaring, Fellow in the Helen Kellogg Institute for International Studies, Fellow in the Joan B. Kroc Institute for International Peace Studies, and the Eugene and Helen Conley Professor of Political Science. BA, Yale Univ., 1976; MA, *ibid.*, 1976; PhD, Stanford Univ., 1983 (1983)

Bradley J. Malkovsky, Associate Professor of Theology. MA, Univ. of Tübingen, 1983; PhD, *ibid.*, 1994 (1992)

Rev. Edward A. Malloy, CSC, President Emeritus of the Univ. and Professor of Theology. BA, Univ. of Notre Dame, 1963; MA, *ibid.*, 1967; MTh, *ibid.*, 1969; PhD, Vanderbilt Univ., 1975 (1974)

Rev. Patrick H. Maloney, CSC, Associate Professor Emeritus of Music. AB, Univ. of Notre Dame, 1950; MM, Catholic Univ. of America, 1956 (1956)

Scott C. Malpass, Vice President for Finance and Chief Investment Officer and Concurrent Assistant Professor of Finance and Business Economics. BS, Univ. of Notre Dame, 1984; MBA, *ibid.*, 1986 (1993)

Theodore E. Mandell, Associate Professional Specialist in Film, Television, and Theatre. BA, Univ. of Notre Dame, 1986; MA, Univ. of Iowa, 1989 (1988)

Barbara J. Mangione, Associate Professional Specialist Emeritus and Concurrent Lecturer in Romance Languages and Literatures. BA, Saint Mary's College, 1982; MA, Univ. of Notre Dame, 1989 (1989)

Elena Mangione-Lora, Assistant Professional Specialist in Romance Languages and Literatures and Concurrent Assistant Professional Specialist in Computer Applications. BA, St. Mary's College, 1990; MA, Univ. of Notre Dame, 1998 (1998)

A. Edward Manier Jr., Adjunct Instructor in Computer Applications Program, College of Arts and Letters. (2002)

Edward Manier, Professor of Philosophy. BS, Univ. of Notre Dame, 1953; AM, St. Louis Univ., 1956; PhD, *ibid.*, 1961 (1959)

Joseph P. Marino, the William K. Warren Foundation Dean, College of Science, and Professor of Chemistry. BS, Pennsylvania State Univ., 1963; AM, Harvard Univ., 1965; PhD, *ibid.*, 1967 (2002)

Nelson C. Mark, the Alfred C. DeCrane Jr. Professor of International Economics and Fellow in the Helen Kellogg Institute for International Studies. BA, Univ. of California at Santa Barbara, 1978; PhD, Univ. of Chicago, 1983 (2003)

Jerry J. Marley, Professor Emeritus of Civil Engineering and Geological Sciences. BS, Univ. of Notre Dame, 1957; MS, Iowa State Univ., 1962; PhD, *ibid.*, 1969 (1969)

Daniel Keith Marmion, Librarian and Associate Director for Information Systems and Digital Access, University Libraries. BA, Univ. of North Texas, 1978; MS, *ibid.*, 1985 (2000)

Hon. John M. Marnocha, Adjunct Assistant Professor of Law. BA, Indiana Univ., 1978; JD, Valparaiso Univ. School of Law, 1982 (2002)

FACULTY

- Nancy E. Marquez, Visiting Assistant Professional Specialist in Romance Languages and Literatures. BA, Stanford Univ., 2001 (2004)
- George M. Marsden, the Francis A. McAnaney Professor of History. BA, Haverford College, 1959; MA, Yale Univ., 1961; BD, Westminster Theological Seminary, 1963; PhD, Yale Univ., 1965 (1992)

- Robert C. Miller, Director Emeritus of Libraries. BS, Marquette Univ., 1958; MS, Univ. of Wisconsin, 1962; MA, Univ. of Chicago, 1966 (1978)
- Thurston D. Miller, Associate Librarian. BA, Univ. of Washington, 1987; MLS, *ibid.*, 1989 (1992)
- Paul A. Minfee, Visiting Instructor, Univ. Writing Program, Fellow, Erskine Peter. BA, Univ. of Texas, Austin, 1994; MA, *ibid.*, 1999 (2003)
- Robert J. Minniti, Professional Specialist in Electrical Engineering. BS, Purdue Univ., 1970; MS, *ibid.*, 1971 (1989)
- Alexander Mintairov, Research Associate Professor of Electrical Engineering. PhD, AF Ioffe Institute, 1987 (2000)
- Philip E. Mirowski, the Carl E. Koch Professor of Economics. BA, Michigan State Univ., 1973; MA, Univ. of Michigan, 1976; PhD, *ibid.*, 1979 (1990)
- Rev. Wilson D. Miscamble, CSC, Associate Professor of History and Rector, Moreau Seminary. BA, Univ. of Queensland, 1973; MA, *ibid.*, 1976; MA, Univ. of Notre Dame, 1978; PhD, *ibid.*, 1980 (1986)
- Kevin M. Misiewicz, Associate Professor of Accountancy. BBA, Western Michigan Univ., 1970; PhD, Michigan State Univ., 1974 (1978)
- Gerard K. Misiolek, Associate Professor of Mathematics. MSc, Warsaw Institute of Technology, 1987; MA, Warsaw Univ., 1988; PhD, State Univ. of New York, Stony Brook, 1992 (1993)
- Lisa Mitchell, Assistant Professor of Anthropology, BA, Oberlin College; MA, Univ. of Illinois at Urbana-Champaign, 1993; MPhil, Columbia Univ. in the city of New York, 1999; PhD, *ibid.*, 2004. (2005)
- Nathan D. Mitchell, Professional Specialist in Theology. BA, St. Meinrad College, 1966; MDiv, St. Meinrad School of Theology, 1970; MA, Indiana Univ., 1971; PhD, Univ. of Notre Dame, 1978 (1990)
- H. Fred Mittelstaedt, Professor of Accountancy. BS, Illinois State, 1979; MS, *ibid.*, 1982; PhD, Univ. of Illinois, 1987 (1992)
- Sharhriar Mobashery, the Navari Family Professor of Life Sciences. BS, Univ. of Southern California-Los Angeles, 1980; BS, *ibid.*, 1981; PhD, Univ. of Chicago, 1985 (2003)
- Christian R. Moevs, Associate Professor of Romance Languages and Literatures. AB, Harvard Univ., 1980;

FACULTY

MA, Columbia Univ., 1989; MPhil, *ibid.*, 1990; PhD, *ibid.*, 1994 (1994)

Amy B. Monahan, Adjunct Assistant Professor of Law. BA, The John Hopkins Univ., 1996; JD, Duke Univ. School of Law, 1999 (2003)

Kevin J. Mongrain, Assistant Professor in the Program of Liberal Studies. BA, St. John's Univ., 1989; MA, *ibid.*, 1992; PhD, Yale Univ., 1999 (2004)

Scott Monroe, The William K. Warren Professor of Psychology. BA, Cambridge Univ., 1972; MA, Southern Illinois Univ. at Carbondale, 1975; PhD, State Univ. of New York at Buffalo, 1979, (2006)

J. Anne Montgomery, Part-time Associate Professional Specialist in English. BA, Univ. of Texas, 1967; MA, *ibid.*, 1967; PhD, *ibid.*, 1976; MFA, Univ. of Notre Dame, 1980 (1999)

Peter R. Moody Jr., Professor of Political Science. AB, Vanderbilt Univ., 1965; MA, Yale Univ., 1967; PhD, *ibid.*, 1971 (1971)

Patrick John Mooney, Adjunct Research Assistant Professor of Physics. BS, Univ. of Notre Dame, 1978; PhD, *ibid.*, 1986 (1998)

Elizabeth S. Moore, Associate Professor of Marketing. BA, Mount Holyoke College, 1980; MEd, Univ. of Florida, 1989; PhD, *ibid.*, 1994 (1999)

Kenneth E. Moore, Associate Professor Emeritus of Anthropology and Director of the Mediterranean/Middle East Studies Program. BA, Michigan State Univ., 1953; MA, Univ. of Illinois, 1968; PhD, *ibid.*, 1973 (1970)

Dennis W. Moran, Professional Specialist, Review of Politics, College of Arts and Letters and Adjunct Assistant Professor of English and in the First Year Writing Program. BA, Youngstown State Univ., 1966; PhD, Univ. of Notre Dame, 1976 (1976)

Rachel S. Moreno, Associate Professional Specialist in the Master of Education Program. BS, Univ. of Arizona, 1969; MEd, *ibid.*, 1977; EdD, Northern Arizona Univ., 1994 (1999)

Marisel Mareno-Anderson, Adjunct Instructor in Romance Languages and Literatures, Fellow, Institute for Latino Studies. (1998)

Eric L. Morgan, Librarian, University Libraries. BA, Bethany College, 1982; MIS, Drexel Univ., 1987 (2001)

Akio Mori, Research Associate Professor of Biological Sciences. BA, Kagoshima Univ., 1970; MS, *ibid.*, 1972; PhD, Nagasaki Univ. School of Medicine, 1980 (1997)

Stephen R. Moriarty, the Fritz and Milly Kaeser Curator of Photography, Associate Professional Specialist in the Snite Museum of Art, and Adjunct Assistant Professor of Art, Art History and Design. BA, Univ. of Notre Dame, 1969; MFA, *ibid.*, 1980 (1988)

Cdr. Jeffrey A. Morris, Assistant Professor of Naval Science. BS, Jacksonville Univ., 1983; M.BA, Univ. of West Florida, 1990; M.S., U.S. Naval War College, 1997 (2003)

Karen M. Morris, Assistant Professional Specialist in Chemistry and Biochemistry. BS, Purdue Univ., 1986; MA, Andrews Univ., 1993 (1987)

Michael H. Morris, Professor of Accountancy. BS, Case Western Univ., 1972; MBA, Univ. of Cincinnati, 1974; PhD, *ibid.*, 1980 (1979)

Scott C. Morris, Assistant Professor of Aerospace and Mechanical Engineering. BS, Michigan State Univ., 1994; MS, *ibid.*, 1997; MS, *ibid.*, 2001 (2002)

Thanasak Mouktonglang, Adjunct Assistant Professor of Mathematics. BS, Dequesne Univ., 1999; MS, Univ. of Notre Dame, 2002; PhD, *ibid.*, 2004 (2004)

William E. Mountford II, Adjunct Instructor in Management. B.S, U.S. Naval Academy, 1983; M.BA, Univ. of Notre Dame, 1991 (2002)

Asokendu Mozumder, Research Professor Emeritus of Chemistry and Biochemistry and Professional Specialist in the Radiation Laboratory. BS, Hooghly Mohsin College, 1950; MSc, Univ. College Science Tech, Calcutta, 1953; PhD, Indian Institute Tech., 1961 (1965)

Thomas J. Mueller, the Roth-Gibson Emeritus Professor of Aerospace Engineering. BS, Illinois Institute of Technology, 1956; MS, Univ. of Illinois, 1958; PhD, *ibid.*, 1961 (1965)

Mercedes Muenz, Associate Professional Specialist Emerita in the Archives. BA, College of St. Catherine, 1924; BS, Univ. of Minnesota, 1929; Certificate, the American Univ. (1946)

Alexander S. Mukasyan, Research Professor of Chemical and Biomolecular Engineering. MS, Moscow Physical Engineering Institute, 1980; PhD, Institute of Chemical Physics, USSR Academy of Sciences, 1986; DSc, Institute of Structural Macrokineitics, Russian Academy of Sciences, 1994 (1997)

Rafael A. Muñoz, Assistant Professional Specialist in Accountancy. BBA, Univ. of Puerto Rico, 1981; MBA, Pennsylvania State Univ., 1985 (1994)

G. Felicitas Munzel, Associate Professor in the Program of Liberal Studies and Fellow of the Nanovic Institute for European Studies. BA, Mercer Univ., 1983; MA, Emory Univ., 1988; PhD, *ibid.*, 1990 (1992)

Jessica Murdoch, Instructor in the Program of Liberal Studies and Concurrent Instructor in Theology. BS, Chestnut Hill College, 1997; BA, *ibid.*, 1997; MA, Washington Theological Union, 1999; MA, Fordham University, 2002 (2005)

Mark C. Murphy, Adjunct Instructor in Philosophy and Notre Dame Semester in Washington, D.C. BA, Univ. of Texas at Austin, 1988; MA, Univ. of Notre Dame, 1992; PhD, *ibid.*, 1993 (2002)

Rev. Michael J. Murphy, CSC, Associate Professor Emeritus of Earth Sciences. AB, Univ. of Notre Dame, 1945; BS, *ibid.*, 1951; MS, Univ. of California, 1953 (1953)

Patrick E. Murphy, the C.R. Smith II Professor of Marketing and Fellow of the Nanovic Institute for European Studies. BBA, Univ. of Notre Dame, 1970; MBA, Bradley Univ., 1971; PhD, Univ. of Houston, 1975 (1984)

Tonia Hap Murphy, Assistant Professional Specialist in Accountancy. BA, Univ. of Notre Dame, 1984; JD, Univ. of Michigan, 1987 (1992)

Dian Hechtner Murray, Professor of History. BA, Cornell College, 1971; MA, Cornell Univ., 1974; PhD, *ibid.*, 1979 (1984)

Michelle K. Murray, Adjunct Instructor in Political Science. BA, Univ. of Chicago, 2000; MA, *ibid.*, 2001 (2004)

Daniel J. Myers, Chair, Professor of Sociology and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Ohio State Univ., 1988; MA, *ibid.*, 1991; MS, Univ. of Wisconsin-Madison, 1995; PhD, *ibid.*, 1997 (1998)

John C. Nagle, John N. Matthews Professor of Law. BA, Indiana Univ., 1982; JD, Univ. of Michigan, 1986 (1998)

Charles E. Naquin, Assistant Professor of Management. BS, Univ. of Texas at Austin, 1990; PhD, Northwestern, 1999 (1999)

Carmen J. Narvaez, Research Assistant Professor of Biological Sciences. BS, Bucknell Univ., 1982; PhD, Rutgers Univ., 1994 (2003)

Darcia F. Narvaez, Associate Professor of Psychology. BA, Univ. of Northern Colorado, 1976; MDiv, Luther Northwestern Seminary, 1984; PhD, Univ. of Minnesota, 1993 (2000)

Suhayl J. Nasr, Adjunct Assistant Professor of Psychology. BSc, Univ. of Beirut, 1970; MD, *ibid.*, 1974 (1999)

Rudolph M. Navari, MD, Associate Dean, College of Science, Professional Specialist in Pre-Professional Studies, and Director of the Walther Cancer Research Center. BS, Univ. of Notre Dame, 1966; MS, Univ. of Virginia, 1968; PhD, *ibid.*, 1970; MD, Medical College of Virginia, 1977 (1999)

Clive R. Neal, Associate Professor of Civil Engineering and Geological Sciences. BSc, Univ. of Leicester, 1982; PhD, Univ. of Leeds, 1985 (1990)

Victor W. Nee, Professor Emeritus of Aerospace and Mechanical Engineering. BS, National Taiwan Univ., 1957; PhD, Johns Hopkins Univ., 1967 (1965)

Alven M. Neiman, Professional Specialist in Philosophy and Fellow in the Institute for Educational Initiatives. BA, Univ. of Akron, 1973; PhD, Univ. of Notre Dame, 1978 (1978)

Robert C. Nelson, Professor of Aerospace and Mechanical Engineering. BS, Univ. of Notre Dame, 1964; MS, *ibid.*, 1966; PhD, Pennsylvania State Univ., 1974 (1975)

Michael E. Neller, Professor and Chair of Naval Science. MS, Clayton College, 2003 (2004)

Jennifer Ely Nemecek, Associate Professional Specialist in the College of Arts and Letters. BA, Gettysburg College, 1990; MA, Georgetown Univ., 1993 (1999)

Robert Nerenberg, Assistant Professor of Civil Engineering and Geological Sciences. Civil Engineer, Univ. of Buenos Aires, 1990; MSCE, Wayne State Univ., 1992; PhD, Northwestern Univ., 2003 (2004)

Kathie E. Newman, Professor of Physics. BSc, Michigan State Univ., 1974; PhD, Univ. of Washington, 1981 (1983)

Rev. Jerome H. Neyrey, SJ, Professor of Theology. BA, St. Louis Univ., 1963; MA, *ibid.*, 1964; PhL, *ibid.*, 1964; MDiv, Regis College, 1970; MTh, *ibid.*, 1972; MA, Yale

FACULTY

- Univ., 1975; PhD, *ibid.*, 1977; STL, Weston School of Theology, 1987 (1992)

- Rev. James A. Rigert, CSC, Associate Professor Emeritus of Civil Engineering and Geological Sciences. BS, Univ. of Portland, 1957; MS, Cornell Univ., 1960; PhD, Univ. of Illinois, 1971; PhD, Texas A&M Univ., 1980 (1973)
- Hon. Kenneth F. Ripple, Professor of Law. AB, Fordham Univ., 1965; JD, Univ. of Virginia, 1968; LLM, George Washington Univ., 1972 (1977)
- Juan M. Rivera, Associate Professor of Accountancy. BA, Tech de Monterrey, 1966; MAS, Univ. of Illinois, 1969; PhD, *ibid.*, 1975 (1983)
- John H. Robinson, Associate Dean for Academic Affairs and Associate Professor of Law. BA, Boston College, 1967; MA, Univ. of Notre Dame, 1972; PhD, *ibid.*, 1975; JD, Univ. of California, Berkeley, 1979 (1981)
- Mark W. Roche, the I.A. O'Shaughnessy Dean of the College of Arts and Letters, the Rev. Edmund P. Joyce, CSC, Concurrent Professor of German Language and Literature, and Concurrent Professor of Philosophy. BA, Williams College, 1978; MA, Univ. of Tübingen, 1980; PhD, Princeton Univ., 1984 (1996)
- Robert E. Rodes Jr., the Paul J. Schierl/Fort Howard Corporation Professor of Legal Ethics and Professor of Law. AB, Brown Univ., 1947; LLB, Harvard Univ., 1952 (1956)
- Jaime Javier Rodriguez, Assistant Professor of English. BA, North Texas State Univ., 1981; AM, Harvard, 1994; PhD, *ibid.*, 2000 (2002)
- Marc S. Rodriguez, Assistant Professor of History. BA, Univ. of Wisconsin, Milwaukee, 1993; MA, Northwestern Univ., 1994; PhD, *ibid.*, 2000; JD, Univ. of Wisconsin School of Law, Madison, 2001 (2004)
- Ryan K. Roeder, Assistant Professor of Aerospace and Mechanical Engineering. BS, Purdue Univ., 1994; PhD, *ibid.*, 1999 (2001)
- Ellen D. Rogers, Director of Sponsored Programs in the Office of Research, Graduate School, and Professional Specialist in the Graduate School. BS, Ball State Univ., 1977; MSBA, Indiana Univ., 1981; MBA, *ibid.*, 1989 (1993)
- Jeanne Romero-Severson, Associate Professor of Biological Sciences. BS, Univ. of Wisconsin, Madison, 1974; MS, *ibid.*, 1975; PhD, *ibid.*, 1984 (2003)
- Kevin Rooney, Assistant Dean of the First Year of Studies. BA, Univ. of Notre Dame, 1970; MS, State Univ. of New York, Albany, 1973 (1984)
- L. John Roos, Interim Chair and Professor of Political Science. BA, Univ. of Notre Dame, 1965; MA, Univ. of Chicago, 1968; PhD, *ibid.*, 1971 (1969)
- Jaime Ros, Professor of Economics and Fellow in the Helen Kellogg Institute for International Studies. BA, Univ. of Paris XII 1971; MA, National Autonomous Univ. of Mexico, 1974; Dipl, Univ. of Cambridge, 1979 (1987, 1990)
- Irving Joel Llamosas Rosas, Guest Research Professor in the Helen Kellogg Institute for International Studies. MS, Centro de Investigacion y Dorencia Economicas, 2004 (2004)
- Charles H. Rose III, Adjunct Assistant Professor of Law. BA, Indiana Univ., South Bend, 1987; JD, Univ. of Notre Dame, 1993 (2003)
- Charles M. Rosenberg, Professor of Art, Art History and Design. BA, Swarthmore College, 1967; MA, Univ. of Michigan, 1969; PhD, *ibid.*, 1974 (1980)
- Joachim J. Rosenthal, the Notre Dame Professor of Applied Mathematics and Concurrent Professor of Electrical Engineering. Vordiplom, Univ. of Basel, 1983; Dipl, *ibid.*, 1986; PhD, Arizona State Univ., 1990 (1990)
- Joseph T. Ross, Assistant Librarian. BA, Lycoming College, 1973; MTS, Harvard Univ., 1977; MA, Univ. of Notre Dame, 1991; MLS, Indiana Univ., 1993 (1996)
- Vincent D. Rougeau, Associate Professor of Law. AB, Brown Univ., 1985; JD, Harvard Univ., 1988 (1997)
- Yorke McDermott Rowan, Visiting Assistant Professor of Anthropology. BA, Univ. of Virginia, 1977; MA, Univ. of Texas, 1990; PhD, *ibid.*, 1998 (2004)
- David F. Ruccio, Professor of Economics. BA, Bowdoin College, 1976; PhD, Univ. of Massachusetts, Amherst, 1984 (1982)
- Randal C. Ruchti, Professor of Physics. BS, Univ. of Wisconsin, 1968; MS, Univ. of Illinois, 1970; PhD, Michigan State Univ., 1973 (1977)
- Norlin G. Rueschhoff, Professor of Accountancy. BSc, Creighton Univ., 1955; MA, Univ. of Nebraska, 1965; PhD, *ibid.*, 1968 (1969)
- Steven T. Ruggiero, Professor of Physics. BS, Rensselaer Polytechnic Institute, 1975; MS, Stanford Univ., 1977; PhD, *ibid.*, 1981 (1983)
- Fred Rush Jr., Assistant Professor of Philosophy and Fellow of the Nanovic Institute for European Studies. BA, Washington and Lee Univ., 1978; PhD, Columbia Univ., 1996 (2001)
- Jennifer K. Ryan, Assistant Professor of Management. BA, Dartmouth College, 1990; MS, Northwestern Univ., 1995; PhD, *ibid.*, 1997 (2004)
- Maura A. Ryan, Associate Professor of Theology, Faculty Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, St. Bonaventure Univ., 1979; MA, Boston College, 1987; MA, Yale Univ., 1989; MPhil, *ibid.*, 1990; PhD, *ibid.*, 1993 (1993)
- Colleen M. Ryan-Scheutz, Assistant Professor and the W.M. Scholl II Chair in Romance Languages and Literatures and Fellow in the Nanovic Institute for European Studies. BA, Univ. of Notre Dame, 1990; MA, Middlebury College, 1993; PhD, Indiana Univ., 1997 (1998)
- Kathryn M. Ryan-Zeugner, Associate Librarian, University Libraries. BA, Albertus Magnus College, 1962; MS, Columbia Univ., 1967 (1979)
- Abdul M. Saadi, Visiting Assistant Professor of Classics. BA, Univ. of Aleppo, 1984; BA, Univ. of Damascus, 1990; MA, Lutheran School of Theology at Chicago, 1993; ThM, *ibid.*, 1995; PhD, *ibid.*, 1999 (2002)
- Salma R. Saddawi, Professional Specialist in Physics. BS, Baghdad Univ. College of Engineering, 1977; MS, Warsaw Univ. of Technology, 1984; PhD, *ibid.*, 1989 (1996)
- Shafa Saddawi, Adjunct Assistant Professor of Physics. BS, Baghdad Univ., 1969; MS, Warsaw Univ., 1985; PhD, Warsaw Univ. of Technology, 1989 (1999)
- Ulyana I. Safronova, Adjunct Professor of Physics. MS, Moscow Physical-Technical Institute, 1958; PhD, Vilnus Univ., 1964 (1998)
- Michael K. Sain, the Frank M. Freimann Professor of Electrical Engineering. BS, St. Louis Univ., 1959; MS, *ibid.*, 1962; PhD, Univ. of Illinois, 1965 (1965)
- Mika Saito, Assistant Professor of Finance and Business Economics and Fellow in the Helen Kellogg Institute for International Studies. BSc, London School of Economics, 1990; MSc, London School of Economics, 1991; MA, Cornell Univ., 1998; PhD, Cornell Univ., 2000 (2000)
- Ronald J. Sakal, Visiting Associate Professor of Architecture. BA, Univ. of Illinois at Chicago, 1971; BArch, *ibid.*, 1975 (2003)
- Philip J. Sakimoto, Professional Specialist in Physics. BA, Pomona College, 1976; MA, Univ. of California, Los Angeles, 1977; PhD, *ibid.*, 1985 (2005)
- Susan E.H. Sakimoto, Assistant Professor of Civil Engineering and Geological Science. BA, Whitman College, 1989; MA, Johns Hopkins Univ., 1991; PhD, *ibid.*, 1995 (2004)

FACULTY

- Lynn Ann Salvati, Assistant Professor of Civil Engineering and Geological Sciences. BSc, Brown Univ., 1995; MS, Univ. of California, Berkeley, 1996; PhD, *ibid.*, 2002 (2002)
- Mayra J. Sandoval-Cooper, Assistant Professional Specialist in the Center for Transgene Research. HT Diploma, Hartford Hospital, School of Allied Health, 1987 (1999)
- Jonathan R. Sapirstein, Professor of Physics. BS, Stanford Univ., 1973; PhD, *ibid.*, 1979 (1984)
- Daniel J. Saracino, Assistant Provost for Enrollment. BA, Univ. of Notre Dame, 1969; MA, *ibid.*, 1975 (1997)
- David J. Sassano, Adjunct Assistant Professor of Architecture. BA, Univ. of Notre Dame, 1985 (2001)
- Craig Satterlee, Adjunct Associate Professor of Theology. BA, Univ. of Michigan, 1982; MDiv, Trinity Lutheran Seminary, 1986; STM, *ibid.*, 1993; MA, Univ. of Notre Dame, 1998; PhD, *ibid.*, 2000 (2004)
- Ken D. Sauer, Associate Professor of Electrical Engineering. BSEE, Purdue Univ., 1984; MSEE, *ibid.*, 1985; MA, Princeton Univ., 1987; PhD, *ibid.*, 1989 (1989)
- Valerie Sayers, Professor of English. BA, Fordham Univ., 1973; MFA, Columbia Univ., 1976 (1993)
- Kenneth M. Sayre, Professor of Philosophy. AB, Grinnell College, 1952; MA, Harvard Univ., 1954; PhD, *ibid.*, 1958 (1958)
- Howard J. Saz, Professor Emeritus of Biological Sciences. BS, City College of New York, 1948; PhD, Case Western Reserve Univ., 1952 (1969)
- Kevin Scanlon, Associate Professional Specialist in Finance and Business Economics. BA, Univ. of Florida, 1975; MBA, *ibid.*, 1976; PhD, *ibid.*, 1985 (1999)
- Thomas F. Schaefer, Chair and the KPMG Professor of Accountancy. BA, Northern Illinois Univ., 1974; MAS, Univ. of Illinois, 1976; PhD, *ibid.*, 1982 (1998)
- Victor A. Schaefer, Librarian Emeritus. AB, St. Benedict's College, 1929; AbL, Univ. of Michigan, 1931; AMLS, *ibid.*, 1934 (1952)
- Robert Michael Schafer, Professional Specialist in Electrical Engineering. BSEE, Univ. of Notre Dame, 1975; MSEE, *ibid.*, 1977; PhD, *ibid.*, 1980 (1996)
- Konrad Schaum, Professor Emeritus of German and Russian Languages and Literatures. MA, Queen's Univ., Canada, 1953; MA, Princeton Univ., 1954; PhD, *ibid.*, 1955 (1974)
- W. Robert Scheidt, the William K. Warren Professor of Chemistry and Biochemistry. BS, Univ. of Missouri, 1964; MS, Univ. of Michigan, 1966; PhD, *ibid.*, 1968 (1970)
- Allan H. Schell, Associate Librarian Emeritus. AB, Univ. of South Dakota, 1954; MSLS, Case Western Reserve Univ., 1963 (1963)
- Maj. Michael G. Schellinger, Assistant Professor of Military Science. BBA, Univ. of Notre Dame, 1988; MAS, Embry-Riddle Univ., 1999 (1999)
- Kenneth Schenck, Adjunct Assistant Professor of Theology. BA, Southern Wesleyan Univ., 1987; MDiv, Asbury Theological Seminary, 1990; MA, Univ. of Kentucky, 1993; PhD, Univ. of Durham, 1996 (1999, 2001)
- Diane M. Scherzer, Associate Professional Specialist in Physical Education. BS, Univ. of Wisconsin, LaCrosse, 1979; MS, Univ. of North Carolina, 1986 (1991)
- John D. Scheu, Adjunct Professional Specialist in the LOBUND Laboratory. BS, Purdue Univ., 1967; MS, *ibid.*, 1969; PhD, *ibid.*, 1973 (1985)
- Matthias J. Scheutz, Assistant Professor of Computer Science. MA, Univ. of Vienna, 1989; MS, *ibid.*, 1993; MS, Vienna Univ. of Technology, 1993; PhD, Univ. of Vienna, 1994; MS, Indiana Univ., 1996; PhD, *ibid.*, 1999 (1999)
- Sharon K. Schierling, Associate Director and Associate Professional Specialist in the Helen Kellogg Institute for International Studies. BGS, Louisiana State Univ., 1985; MA, *ibid.*, 1988 (1999)
- Donald R. Schifferl, Staff Professional Specialist Emeritus in Chemistry and Biochemistry. A.A., DeVry Technical Institute, Chicago, 1955 (1978)
- Catherine M. Schlegel, Associate Professor of Classics and Fellow of the Nanovic Institute for European Studies. BA, Univ. of Chicago, 1978; MA, *ibid.*, 1983; PhD, Univ. of California, Los Angeles, 1994 (1996)
- Thomas J. Schlereth, Professor of American Studies and Concurrent Professor of History. BA, Univ. of Notre Dame, 1963; MA, Univ. of Wisconsin, 1965; PhD, Univ. of Iowa, 1969 (1972)
- Wendy Clauson Schlereth, Univ. Archivist. BA, St. Olaf College, Minnesota, 1970; MA, Univ. of Iowa, 1972; PhD, *ibid.*, 1980 (1978)
- Donald J. Schmid, Adjunct Assistant Professor of Law. BA, Univ. of Notre Dame, 1982; JD, Univ. of Michigan Law School, 1985 (2002)
- Steven R. Schmid, Associate Professor of Aerospace and Mechanical Engineering. BS, Illinois Institute of Technology, 1986; MS, Northwestern Univ., 1989; PhD, *ibid.*, 1993 (1993)
- Marisha D. Schmidt, Assistant Professional Specialist in Physical Education. BA, Purdue Univ., 1993; MA, Western Michigan Univ., 1999 (1999)
- Roger A. Schmitz, the Keating-Crawford Professor Emeritus of Chemical and Biomolecular Engineering. BS, Univ. of Illinois, 1959; PhD, Univ. of Minnesota, 1962 (1979)
- Robert P. Schmuhl, Director of John W. Gallivan Program in Journalism Ethics and Democracy and Professor of American Studies. BA, Univ. of Notre Dame, 1970; MA, Indiana Univ., 1978; PhD, *ibid.*, 1978 (1980)
- William J. Schmuhl Jr., Adjunct Professor of Accountancy. BBA, Univ. of Notre Dame, 1965; JD, *ibid.*, 1967; MBA, Univ. of Chicago, 1972 (2001)
- Jeffrey A. Schneibel, CSC, Visiting Assistant Professional Specialist, Program of Liberal Studies. BA, Univ. of Notre Dame, 1980; MDiv, *ibid.*, 1984; PhD, Univ. of Chicago, 2000 (2001)
- William F. Schneider, Associate Professor of Chemical and Biomolecular Engineering, Concurrent Associate Professor of Chemistry and Biochemistry. BS, Univ. of Michigan-Dearborn, 1986; PhD, Ohio State Univ., 1991 (2004)
- Jeffrey Schorey, Associate Professor of Biological Sciences. BSc, Southeast Missouri State Univ., 1985; PhD, Univ. of Texas, San Antonio, 1992 (1998)
- Robert H. Schuler, the Rev. John A. Zahm, CSC, Professor Emeritus of Radiation Chemistry. BS, Canisius College, 1946; PhD, Univ. of Notre Dame, 1949 (1976)
- Paul H. Schultz, the John W. and Maude Clarke Professor of Finance. BA, Macalester College, 1978; MBA, Univ. of Chicago, 1985; PhD, *ibid.*, 1988 (1998)
- Mark R. Schurr, Chair and Associate Professor of Anthropology. BS, Purdue Univ., 1977; PhD, Indiana Univ., 1989 (1991)
- Arthur J. Schwartz, Adjunct Professor of Chemical and Biomolecular Engineering. BSChE, Univ. of Maryland, 1966; PhD, Univ. of Minnesota, 1979 (1998)
- Maurice E. Schwartz, Associate Professor Emeritus of Chemistry. BS, Presbyterian College, 1961; PhD, Vanderbilt Univ., 1966 (1968)
- Siiri Sativa Scott, Associate Professional Specialist in Film, Television, and Theatre. BA, Saint Mary's College, 1991; MFA, DePaul Univ., 1994 (1999)
- Rev. Timothy R. Scully, CSC, Professor of Political Science and Director, Institute for Educational Initiatives; Fellow, Helen Kellogg Institute for International Studies; and Fellow, Nanovic Institute. BA, Univ. of Notre Dame, 1976; MDiv, *ibid.*, 1979; MA, Univ. of California, Berkeley, 1985; PhD, *ibid.*, 1989 (1989)
- Alan Carter Seabaugh, Professor of Electrical Engineering and Associate Director of the Center for Nanoscience and Technology. BS, Univ. of Virginia, 1977; MS, *ibid.*, 1979; PhD, *ibid.*, 1985 (1999)
- James H. Seckinger, Professor of Law. BS, St. John's Univ., Minnesota, 1964; MS, Vanderbilt Univ., 1968; JD, Univ. of Notre Dame, 1968 (1974)
- Robert P. Sedlack, Assistant Professor of Art, Art History and Design. BFA, Univ. of Notre Dame, 1989; MFA, Indiana Univ., 1993 (1998)
- Lisa M. Sedor, Assistant Professor of Accountancy. BS, Univ. of Nevada, 1988; PhD, Univ. of Washington, 2001 (2001)
- James A. Seida, Associate Professor of Accountancy. BS, Arizona State Univ., 1989; MS, Univ. of Illinois, 1990; PhD, Texas A&M Univ., 1997 (2001)
- Dayle Seidenspinner-Nu-ez, Chair and Professor of Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies. BA, Univ. of California, Berkeley, 1968; PhD, Stanford Univ., 1977 (1997)
- Steven Semes, Associate Professor, School of Architecture. BS, Univ. of Virginia, 1975; M.Arch., Columbia University, 1980 (2005)
- Mihir Sen, Professor of Aerospace and Mechanical Engineering. BTech, Indian Institute of Technology, Madras, 1968; ScD, Massachusetts Institute of Technology, 1975 (1986)

FACULTY

- Raymond G. Sepeta, Professional Specialist in the First Year of Studies. BS, US Military Academy, 1966; PhD, Univ. of Notre Dame, 1975 (1975)
- George E. Sereiko, Librarian Emeritus. BA, Fenn College, Cleveland, 1949; MSLS, Case Western Reserve Univ., 1951; PhD, *ibid.*, 1972 (1961)
- Anthony S. Serianni, Professor of Chemistry. BS, Albright College, 1975; PhD, Michigan State Univ., 1980 (1982)
- Wendy Settle, Adjunct Assistant Professor of Psychology. BS, Virginia Polytechnic Institute and State Univ., 1977; MA, Univ. of Maryland, College Park, 1982; PhD, *ibid.*, 1990 (1989)
- David W. Severson, Professor of Biological Sciences. AA, Rochester Community College, 1970; BA, Winona State Univ., 1975; MSc, Univ. of Wisconsin, LaCrosse, 1978; PhD, Univ. of Wisconsin, Madison, 1983 (1997)
- Slavi C. Sevov, Professor of Chemistry and Biochemistry. BS, Univ. of Sofia, Bulgaria, 1983; MSc, *ibid.*, 1985; PhD, Iowa State Univ., 1993 (1995)
- William P. Sexton, Professor of Management. BS, Ohio State Univ., 1960; MBA, *ibid.*, 1964; PhD, *ibid.*, 1966 (1966)
- Margaret B. Shackell–Dowell, Assistant Professor of Accountancy. BA, Univ. of Waterloo, 1989; MACc, *ibid.*, 1990; PhD, Univ. of Michigan, 1999 (2000)
- Thomas L. Shaffer, the Robert and Marion Short Professor Emeritus of Law. BA, College of St. Joseph, Albuquerque, 1958; JD, Univ. of Notre Dame, 1961 (1963, 1988)
- Michelle T. Shakoff, Director, Planned Giving in the Development Office and Concurrent Assistant Professor of Law. BA, Saint Mary's College, 1978; MA, Middlebury College, VT., 1981; MS, Indiana Univ., 1987; JD, Univ. of Notre Dame, 1990 (2003)
- Paul E. Shanley, Associate Professor Emeritus of Physics. BS, Northeastern Univ., 1960; MS, *ibid.*, 1962; PhD, *ibid.*, 1966 (1968)
- Linda A. Sharp, Associate Librarian, University Libraries. BA, Univ. of Illinois, 1978; MLS, Indiana Univ., 1988 (1988)
- Mei–Chi Shaw, Professor of Mathematics. BS, National Taiwan Univ., 1977; MS, Princeton Univ., 1978; PhD, *ibid.*, 1981 (1987)
- Richard G. Sheehan, Professor of Finance and Business Economics and Alliance for Catholic Education in the Institute for Educational Initiatives. BS, College of the Holy Cross, 1971; PhD, Boston College, 1978 (1987)
- Daniel Sheerin, Professor of Classics and Concurrent Professor of Theology. BA, St. Louis Univ., 1965; PhD, Univ. of North Carolina, 1969 (1984)
- Jeannette M. Sheerin, Adjunct Assistant Professor in the Program of Liberal Studies. BA, Trinity College, 1974; PhD, Univ. of North Carolina, 1986 (1991)
- William D. Shephard, Professor Emeritus of Physics. BA, Wesleyan Univ., 1954; M.S., Univ. of Wisconsin, 1955; PhD, *ibid.*, 1962 (1963)
- Susan Guise Sheridan, the Nancy O'Neill Associate Professor of Anthropology. BA, Univ. of Maryland, 1984; MA, *ibid.*, 1986; PhD, Univ. of Colorado, 1992 (1992)
- Ann Elaine Sherman, Assistant Professor of Finance. BA, Barnard College, Columbia Univ., 1981; PhD, Univ. of Minnesota, 1988 (2000)
- John F. Sherman, Associate Professional Specialist in Art, Art History and Design. BS, Ball State Univ., 1979; MFA, Indiana Univ., 1981 (1986)
- John Sherry, Dept. Chair, Marketing, Prof. Ray w. and Kenneth G. Herrick Prof. Business Admin. Chair. BA, Univ. of Notre Dame, 1974; MA, Univ. of Illinois, 1978; PhD., *ibid.*, 1983 (2005)
- Setsuko Shiga, Associate Professional Specialist in East Asian Languages and Literatures. BA, Nanzan Univ., Japan, 1987; MA, Univ. of Iowa, 1992 (1997)
- Hojung Shin, Assistant Professor of Management. BBA, Korea Univ., 1992; MBA, Ohio State Univ., 1996; PhD, *ibid.*, 2001 (2001)
- Sophie Shive, Visiting Instructor in Finance. BS, Cornell Univ., 1998; MS, *ibid.*, 2000 (2005)
- Kristin Shrader–Frechette, the F.J. and H.M. O'Neill Professor of Philosophy, Concurrent Professor of Biological Sciences, and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Edgecliff College, Xavier, 1967; PhD, Univ. of Notre Dame, 1971 (1998)
- Gina V. Shropshire, Assistant Professional Specialist, Mendoza College of Business. BA, Univ. of Notre Dame, 1983; MA, Purdue Univ., 1993; PhD, *ibid.*, 1999 (1998)
- Christopher J. Sieving, Visiting Instructor in Film, Television, and Theatre. BA, Saint Cloud State Univ., 1993; MA, Univ. of Wisconsin at Madison, 1996 (2001)
- Rabbi Michael A. Signer, the Abrams Professor of Jewish Thought and Culture, Dept. of Theology and Fellow in the Nanovic Institute for European Studies. BA, Univ. of California, Los Angeles, 1966; MA, Hebrew Union College, 1970; PhD, Univ. of Toronto, 1978 (1992)
- David H. Sikkink, Assistant Professor of Sociology, Director of Center for the Study of American Religion and Fellow in the Institute for Educational Initiatives. BA, Bethel College, 1985; MA, Univ. of North Carolina at Chapel Hill, 1994; PhD, *ibid.*, 1998 (1999)
- Stephen E. Silliman, Professor of Civil Engineering and Geological Sciences, Associate Dean of College of Engineering and Fellow in the Center for Social Concerns. BSE, Princeton Univ., 1979; MS, Univ. of Arizona, 1981; PhD, *ibid.*, 1986 (1986)
- Daniel Simon, Professor Emeritus, Accountancy. BA, Indiana Univ., 1970; MA, Purdue Univ., 1971; PhD, Northwestern Univ., 1983 (1990)
- David A. Singer, Assistant Professor in Political Science. BA, Univ. of Michigan, 1994; MA, Harvard Univ., 2000 (2004)
- Katherine Elizabeth Singer, Adjunct Assistant Professor of Law. BA, Hope College, 1992; JD, Univ. of Notre Dame, 1997 (2000)
- Thomas H. Singer, Adjunct Professor of Law. BA, Univ. of Michigan, 1956; LLB, *ibid.*, 1959 (1975, 1988)
- Naunihal Singh, Instructor and Fellow in the Joan B. Kroc Institute for International Peace Studies.
- John E. Sitter, the Notre Dame Professor of English. AB, Harvard College, 1966; PhD, Univ. of Minnesota, 1969 (2004)
- Tamara Sivertseva, the Rockefeller Visiting Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Moscow State Univ., 1972; MA, *ibid.*, 1977; PhD, Russian Academy of Sciences–Inst. Oriental Studies, 1997 (2001)
- Steven B. Skaar, Professor of Aerospace and Mechanical Engineering. AB, Cornell Univ., 1975; MS, Virginia Polytechnic Institute and State Univ., 1978; PhD, *ibid.*, 1982 (1989)
- Gerald Paul Skelton, Assistant Professor of Film, Television, and Theatre. BS, Babson College, 1987; MA, DePaul Univ., 1993 (2004)
- Joshua C. Skube, Assistant Professional Specialist in Physical Education. BS, Indiana Univ., 1998; MS, *ibid.*, 2002 (2001)
- Roger B. Skurski, Professor Emeritus of Economics. BS, Cornell Univ., 1964; MS, Univ. of Wisconsin, 1967; PhD, *ibid.*, 1970 (1968)
- Paul J. Slaggert, Director, Operations and Engineering, Executive MBA. B.BA, Univ. of Notre Dame, 1974; M.BA, Boston College, 1979 (2001)
- Thomas P. Slaughter, the Andrew V. Tackes Professor of History. BA, Univ. of Maryland, College Park, 1976; MA, *ibid.*, 1978; MA, Princeton Univ., 1980; PhD, *ibid.*, 1983 (2001)
- Donald E. Sloan, Adjunct Instructor in the First Year Composition Program. BA, Indiana Univ., 1961; MA, *ibid.*, 1963 (1995)
- Phillip R. Sloan, Professor in the Program of Liberal Studies, Concurrent Professor of History, and Fellow in the Nanovic Institute for European Studies. BS, Univ. of Utah, 1960; MS, Scripps Institute of Oceanography, 1964; MA, Univ. of California, San Diego, 1967; PhD, *ibid.*, 1970 (1974)
- Bradley D. Smith, Professor of Chemistry and Biochemistry. BS, Univ. of Melbourne, 1982; PhD, Pennsylvania State Univ., 1988 (1991)
- Cheryl Smith, Assistant Librarian. BA, Earlham College, 1988; MLS, Indiana Univ., 1997 (2000)
- David A. Smith, Associate Professor of Psychology. BA, Univ. of Minnesota, 1983; MA, *ibid.*, 1986; PhD, State Univ. of New York, Stony Brook, 1991 (1997)
- Jackie Smith, Associate Professor, Dept. of Sociology and Joan B. Kroc Institute for International Peace Studies. BA, The Catholic University of America, 1990; MA, University of Notre Dame, 1995; PhD, *ibid.*, 1996 (2005)
- Peter H. Smith, Associate Professor of Music. BMus, Juilliard School, 1986; MM, *ibid.*, 1986; MA, Yale Univ., 1987; MPhil, *ibid.*, 1989; PhD, *ibid.*, 1992 (1991)
- Thomas Gordon Smith, Professor of Architecture. AB, Univ. of California, Berkeley, 1970; March, *ibid.*, 1975 (1989)
- Andrea L. Smith Shappel, Director of the Senior Transition Programs in the Center for Social Concerns and Concurrent Instructor in Theology. BA, Univ. of Notre Dame, 1979; MA, *ibid.*, 1985 (2002)

FACULTY

- J. Eric Smithburn, Professor of Law. BS, Indiana Univ., 1966; MA, *ibid.*, 1969; JD, *ibid.*, 1973 (1978)
- Brian B. Smyth, Professor of Mathematics. BS, National Univ. of Ireland, 1961; MS, *ibid.*, 1962; PhD, Brown Univ., 1966 (1966)
- James Smyth, Professor of History and Fellow in the Nanovic Institute for European Studies. BA, Trinity College–Dublin, 1985; PhD, Queen's College–Cambridge, 1989 (1995)
- Marina B. Smyth, Librarian, University Libraries. BS, National Univ. of Ireland, 1963; M.MS, Univ. of Notre Dame, 1977; PhD, *ibid.* and Univ. College Dublin, 1984; MLS, Indiana Univ., 1992 (1985)
- Mary Ann Burgess Smyth, Assistant Professor of English. MA, St. Andrews Univ., Scotland, 1988; PhD, Univ. of Cambridge, 2002 (1999, 2003)
- Luther M. Snavely Jr., Professor Emeritus of Music and Director of Bands. BM, Baylor Univ., 1952; MM, Vandercook College of Music, 1959; PhD, Univ. of Texas, Austin, 1971 (1987)
- Orlando Carter Snead, Associate Professor of Law. BA, St. John's College, 1996; JD, Georgetown Univ., 1999 (2005)
- Gregory L. Snider, Professor of Electrical Engineering. BSEE, California State Polytechnic Univ., 1983; MSEE, Univ. of California, Santa Barbara, 1987; PhD, *ibid.*, 1991 (1994)
- Donald C. Snięowski, Associate Professor Emeritus of English. BA, Univ. of Notre Dame, 1956; BA, Oxford Univ., England, 1958; MA, Yale Univ., 1960; PhD, *ibid.*, 1966 (1961)
- Devorah Ann Snively, Adjunct Instructor in Anthropology. BA, Sarah Lawrence College, 1992; MFA, Academy of Art, 1997 (2004)
- Dennis M. Snow, Professor of Mathematics. BS, Merrimack College, 1975; MS, Univ. of Notre Dame, 1977; PhD, *ibid.*, 1979 (1982)
- Franklin G. Snyder, Visiting Professor of Law. BA, California State Univ., Fullerton, 1977; JD, Univ. of Missouri–Columbia, 1983; LL.M., Temple Univ., 1999 (2005)
- Kathleen L. Sobieralski, Associate Director, Administration, Erasmus Institute and Concurrent Instructor in Accountancy. BBA, Saint Mary's College, 1976; MBA, Indiana Univ., 1995 (2000)
- Curt Sobolewski, Adjunct Assistant Professor of Sociology. BA, Indiana Univ., 1994; MA, Baylor Univ., 1996; PhD, Arizona State Univ., 1999 (2004)
- Juliana McGene Sobolewski, Assistant Professor of Sociology. BA, Arizona State Univ., 1998; MA, Arizona State Univ., 2000; PhD, Pennsylvania State Univ., 2003 (2004)
- W. David Solomon, Associate Professor of Philosophy and the W.P. and H.B. White Director of the Center for Ethics and Culture. BA, Baylor Univ., 1964; PhD, Univ. of Texas, Austin, 1972 (1968, 1977)
- Leonard F. Sommer, Associate Professor Emeritus of Speech and Drama. Marquette Univ. School of Speech, 1936; MA, *ibid.*, 1937 (1945)
- Andrew J. Sommese, the Vincent J. Duncan and Annamarie Micus Duncan Professor of Mathematics and Director of Center for Applied Mathematics. BA, Fordham Univ., 1969; PhD, Princeton Univ., 1973 (1979)
- Eva Johara Sonza, Visiting Assistant Professional Specialist in Romance Languages and Literatures. BBA, Univ. of Notre Dame, 2003; MA, *ibid.*, 2005 (2005)
- Jack J. Soszynski, Visiting Associate Professor, Nanovic Institute for European Studies. MA, Univ. of Warsaw, 1982; PhD, Polish Academy of Science, 1994 (2002)
- D. Andrew Spalding, Adjunct Assistant Professor of Law. AB, Miami Univ., 1983; JD, Valparaiso Univ., 1986 (2001)
- Shannon Speed, Visiting Fellow in the Helen Kellogg Institute for International Studies and Concurrent Assistant Professor in the Dept. of Anthropology. BA, San Francisco State Univ., 1989; MA, Univ. of Texas, Austin, 1992; MA, Univ. of California, Davis, 1996 (2001)
- D. Katherine Spiess, Associate Professor of Finance. BS, Univ. of Missouri, 1984; PhD, *ibid.*, 1991 (1991)
- Lynette P. Spillman, Associate Professor of Sociology and Fellow in the Helen Kellogg Institute for International Studies. BA, Australian National Univ., 1982; MA, Univ. of California, Berkeley, 1984; PhD, *ibid.*, 1991 (1991)
- Stephen B. Spiro, Associate Professional Specialist in the Snite Museum of Art. BA, Adelphi Univ., 1965; MBA, *ibid.*, 1967; PhD, Univ. of North Carolina at Chapel Hill, 1975 (1976)
- Donald E. Sporleder, FAIA, Professor Emeritus of Architecture. BS, Univ. of Illinois, 1953; MS, *ibid.*, 1955 (1963)
- Kathleen Sprows Cummings, Professional Specialist and Associate Director of the Cushwa Center for the Study of American Catholicism and Concurrent Assistant Professor in the Dept. of History. BA, Univ. of Scranton, 1993; MA, Univ. of Notre Dame, 1994; PhD, *ibid.*, 1999 (2001)
- Mark A. Stadtherr, Professor of Chemical and Biomolecular Engineering. BChE, Univ. of Minnesota, 1972; PhD, Univ. of Wisconsin, 1976 (1996)
- John W. Stamper, Associate Chair and Associate Professor of Architecture. BS, Univ. of Illinois, 1973; MA, *ibid.*, 1975; MA, Williams College, 1977; PhD, Northwestern Univ., 1985 (1984)
- Joseph B. Stanfiel, Assistant Professional Specialist and Associate Director of the Undergraduate London Program. BA, Univ. of Georgia, 1985; MA, *ibid.*, 1997; PhD, Univ. College London, 2002 (2002)
- Michael M. Stanisic, Associate Professor of Aerospace and Mechanical Engineering. BS, Purdue Univ., 1980; MS, *ibid.*, 1982; PhD, *ibid.*, 1986 (1988)
- Nancy K. Stanton, Professor of Mathematics. BS, Stanford Univ., 1969; PhD, Massachusetts Institute of Technology, 1973 (1981)
- Thomas A. Stapleford, Assistant Professor in the Program of Liberal Studies. BA, Univ. of Delaware, 1997; BME, *ibid.*, 1997; MS, Univ. of Edinburgh, 1998; PhD, Harvard Univ., 2003 (2003)
- Sergei Starchenko, Associate Professor of Mathematics. MS, Novosibirsk Univ., 1983; PhD, *ibid.*, 1987 (1997)
- Dennis J. Stark, Assistant Professor Emeritus of Physical Education. BS, Univ. of Notre Dame, 1947; MD, *ibid.*, 1949 (1956)
- John J. Staud, Associate Professional Specialist in the Master of Education Program and Administrative Director of Alliance for Catholic Education. BS, Univ. of Notre Dame, 1987; BA, *ibid.*, 1987; MA, Univ. of Michigan, 1990; PhD, *ibid.*, 1992 (1997)
- Edward J. Stech, Assistant Professional Specialist in Physics. BS, Univ. of Notre Dame, 1995; MS, *ibid.*, 2001 (2003)
- Katherine L. Steele, Adjunct Assistant Professor of Psychology. BA, Univ. of Tennessee, 1974; MA, Univ. of Notre Dame, 1989; PhD, *ibid.*, 1993 (2001)
- Susan C. Steibe–Pasalich, Concurrent Assistant Professor of Psychology. BA, Catholic Univ. of America, 1973; MA, Univ. of Ottawa, 1977; PhD, *ibid.*, 1980 (1988)
- James P. Sterba, Professor of Philosophy and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, LaSalle College, 1966; MA, Univ. of Pittsburgh, 1972; PhD, *ibid.*, 1973 (1973)
- Gregory E. Sterling, Professor of Theology and Associate Dean of the Faculty, College of Arts and Letters. AA, Florida College, 1974; BA, Houston Baptist Univ., 1978; MA, Pepperdine Univ., 1980; MA, Univ. of California, 1982; PhD, Graduate Theological Union, 1990 (1989)
- Richard Stevens, Associate Professor Emeritus of Art, Art History and Design. AB, Univ. of Notre Dame, 1951; MA, *ibid.*, 1952 (1955)
- Marsha J. Stevenson, Librarian. BA, Univ. of Wisconsin, Madison, 1974; MA, *ibid.*, 1976 (1990)
- Robert L. Stevenson, Professor of Electrical Engineering and Concurrent Professor of Computer Science and Engineering. BEE, Univ. of Delaware, 1986; PhD, Purdue Univ., 1990 (1990)
- Kay L. Stewart, Associate Professional Specialist in Freimann Life Science Center. AAS, Purdue Univ., 1982 (1986)
- Cheryl L. Stillson, Adjunct Instructor in Psychology. BA, Indiana Univ., 1966; MA, Ball State Univ., 1968; MA, Indiana Univ., 1976 (2001)
- John David Stiver, Associate Professional Specialist in Finance. BA, State Univ. of New York, 1993; MA, Univ. of Rochester, 1997; PhD, *ibid.*, 2000 (2004)
- Thomas L. Stober, Assistant Chair and Associate Professor of Accountancy. BSBA, Ohio State Univ., 1974; MBA, Univ. of Minnesota, 1975; PhD, Univ. of Chicago, 1983 (1995)
- Wilhelm F. Stoll, the Vincent J. Duncan and Annamarie Micus Duncan Professor Emeritus of Mathematics. PhD, Univ. of Tübingen, 1953 (1960)
- Stephan A. Stolz, the Rev. John A. Zahm, CSC, Professor of Mathematics. BS, Univ. of Bielefeld, 1975; MS, Univ. of Bonn, 1979; PhD, Univ. of Mainz, 1984 (1986)
- William Storey, Professor Emeritus of Theology. BA, Assumption College, 1949; MA, *ibid.*, 1950; MMS, Univ. of Notre Dame, 1954; DMS, *ibid.*, 1959 (1967)

FACULTY

- Matthew Storin, Adjunct Professor of American Studies. BA, Univ. of Notre Dame, 1964 (2003)

FACULTY

Tracey H. Thomas, Adjunct Assistant Professor of Law. BA, Dickinson College, 1981; MA, Univ. of Chicago, 1983; MA, Univ. of Kentucky, 1985; PhD, Indiana Univ., 1995 (2003)

Darrel Tidaback, Adjunct Instructor in Music. BA, St. Mary's Univ., 1997; MM, Univ. of Texas, San Antonio, 2001 (2002)

Jay Tidmarsh, Professor of Law. AB, Univ. of Notre Dame, 1979; JD, Harvard Univ., 1982 (1989)

Alvin B. Tillery Jr., Assistant Professor of Political Science. BA, Morehouse College, 1993; PhD, Harvard Univ., 2001 (2000)

M. Katherine Tillman, Professor Emerita in the Program of Liberal Studies. BA, Mundelein College, 1964; MA, St. Louis Univ., 1966; MA, New School for Social Research, 1971; PhD, *ibid.*, 1974 (1973)

Julie A. Titone, Assistant Professional Specialist in the Joan B. Kroc Institute for International Peace Studies. BS, Southern Illinois Univ., 1974 (2004)

Vikas Tomar, Assistant Professor in Aerospace and Mechanical Engineering. BA, Regional Engineering College, India, 1998; MA, Indian Institute of Technology, 2001; PhD, Georgia Institute of Technology, 2005 (2006)

Walter J. Tomasch, Professor Emeritus of Physics. BS, Case Western Reserve Univ., 1952; MS, Rensselaer Polytechnic Institute, 1955; PhD, Case Western Reserve Univ., 1958 (1968)

Maria C. Tomasula, Associate Professor of Art, Art History and Design. BFA, Univ. of Illinois, Chicago, 1987; MFA, Northwestern Univ., 1989 (1994)

Steven A. Tomasula, Assistant Professor of English. BS, Purdue Univ., 1976; MA, Univ. of Illinois, Chicago, 1982; PhD, *ibid.*, 1995 (1997, 2002)

Andrea Topash-Rios, Assistant Professional Specialist and Concurrent Lecturer in Romance Languages and Literatures. BA, Univ. of Notre Dame, 1995; MA, *ibid.*, 1996 (2000)

Maria De Los Angeles Torres, Visiting Research Fellow in Institute for Latino Studies. BA, St. Mary's Univ., San Antonio, 1975; MS, *ibid.*, 1977; PhD, Univ. of Michigan, 1986 (2001)

Marta Toth, Assistant Professional Specialist in Chemistry and Biochemistry. BS, Jozsef Attila Univ., Hungary, 1978; MS, *ibid.*, 1980; MS, *ibid.*, 1986; PhD, *ibid.*, 1986 (2004)

Alain P. Toumayan, Associate Professor of Romance Languages and Literatures and Fellow in the Nanovic Institute for European Studies. BA, Univ. of Pennsylvania, 1976; MA, Yale Univ., 1978; MPhil, *ibid.*, 1980; PhD, *ibid.*, 1982 (1989)

Vicki Toumayan, Adjunct Instructor in Romance Languages and Literatures and Adjunct Instructor in the Arts and Letters Core Course. BA, Smith College, 1973; MA, Yale Univ., 1978; MPhil, *ibid.*, 1987; PhD, Yale Univ., 2000 (1995)

Amy Townley, Assistant Professor in the Air Force Reserve Officers Training Corps. MA, Colorado Tech. Univ., 2002 (2004)

John C. Treacy Jr., Adjunct Instructor, Computer Applications Program, Office of Information Technology.

BS, Florida State Univ., 1977; MS, Indiana Univ., South Bend, 1986 (1991)

G.N.R. Tripathi, Professional Specialist in the Radiation Laboratory. BSc, Univ. of Gorakhpur, India, 1960; MSc, *ibid.*, 1962; PhD, *ibid.*, 1968 (1978)

Anthony M. Trozzolo, the Charles L. Huisiking Professor Emeritus of Chemistry and Biochemistry. BS, Illinois Institute of Technology, 1950; MS, Univ. of Chicago, 1957; PhD, *ibid.*, 1960 (1975)

Edward R. Trubac, Associate Professor Emeritus of Finance and Business Economics and the Thomas A. and James J. Bruder Chair for Administrative Leadership. BS, Manhattan College, 1957; MA, Syracuse Univ., 1960; PhD, *ibid.*, 1965 (1960)

Cameron Kim Tuai, Assistant Librarian, University Libraries. B.Com., Univ. of British Columbia, 1992; M.L.I.S., McGill Univ., 1998; MBA, Univ. of Notre Dame, 2004 (1999)

James Turner, the Rev. John J. Cavanaugh, CSC, Professor of Humanities, Professor of History, and Senior Scholar in the Erasmus Institute. BA, Harvard Univ., 1968; AM, *ibid.*, 1971; PhD, *ibid.*, 1975 (1995)

Julianne C. Turner, Associate Professor of Psychology and Fellow, Institute for Educational Initiatives. BA, College of New Rochelle, 1968; MEd, Boston Univ., 1975; PhD, Univ. of Michigan, 1992 (1995)

Barbara McGettrick Turpin, Associate Professional Specialist and Associate Dean of the Graduate School. AB, Emmanuel College, 1972; MA, Univ. of Wisconsin, 1974; MA, Univ. of Notre Dame, 1977; PhD, *ibid.*, 1980 (1984, 1985)

Kenyon S. Tweedell, Professor Emeritus of Biological Sciences. BS, Univ. of Illinois, 1947; MS, *ibid.*, 1949; PhD, *ibid.*, 1953 (1958)

Tochko Tzvetkov, Assistant Professional Specialist in Chemistry and Biochemistry. MSc, Univ. of Sofia, 1989 (2004)

Fabian E. Udoh, Associate Professor in the Program of Liberal Studies and Concurrent Assistant Professor of Theology. BPhil, Institut de Philosophie, Zaire, 1981; STB, Pontificia Univ. Gregoriana, 1985; MPhil, Oxford Univ., 1989; PhD, Duke Univ., 1996 (1998)

John J. Uhran Jr., Senior Associate Dean for Academic Affairs, College of Engineering, Professor of Computer Science and Engineering, and Professor of Electrical Engineering. BS, Manhattan College, 1957; MS, Purdue Univ., 1963; PhD, *ibid.*, 1966 (1966)

Edward A. Ulicny, Staff Professional Specialist Emeritus in the Radiation Laboratory. BS, St. Vincent College, 1953; MBA, Duquesne Univ., 1963 (1976)

Eugene C. Ulrich, the Rev. John A. O'Brien Professor of Theology. LittB, Xavier Univ., 1961; PhL, Loyola Univ., 1964; MDiv, Woodstock College, 1970; MA, Harvard Univ., 1967; PhD, *ibid.*, 1975 (1973)

Nikolai G. Uraltsev, Adjunct Associate Professor of Physics. Dipl, Special School/ Leningrad State Univ., 1973; Dipl, Physics Dept/Leningrad State Univ., 1979; PhD, Leningrad Nuclear Physics Institute, 1983 (2001)

Joel E. Urbany, Professor of Marketing. BS, Ohio State Univ., 1980; MS, *ibid.*, 1983; PhD, *ibid.*, 1984 (1994)

Reanna A. Ursin, Erskine A. Peters Fellow, Department of Africana Studies. BA, Xavier Univ. of Louisiana, 1999; MA, Univ. of Notre Dame, 1994 (2005)

Patrick W. Utz, Adjunct Associate Professor of Psychology. BA, St. Mary, Mundelein, Ill, 1960; MA, STL, *ibid.*, 1964; MA, Univ. of Notre Dame, 1971; PhD, *ibid.*, 1974 (1983)

Dominic O. Vachon, Adjunct Assistant Professor of Psychology and Concurrent Adjunct Assistant Professor of Theology. BA, Univ. of Notre Dame, 1980; MDiv, *ibid.*, 1985; PhD, Loyola Univ., Chicago, 1993 (1992)

Sergei Vakulenko, Research Assistant Professor of Chemistry and Biochemistry. MD, Leningrad Medical Institute, 1976; PhD, National Research Center of Antibiotics, Moscow, 1981 (2003)

Jacqueline Valadez, Assistant Professional Specialist in the Master of Education Program. BS, Texas State Univ., San Marcos, 1988; MEd, *ibid.*, 1994; PhD, Texas A&M, College Station, 1998 (2004)

Julio Samuel Valenzuela, Professor of Sociology, Fellow in the Helen Kellogg Institute for International Studies, and Fellow in the Nanovic Institute for European Studies. Lic, Univ. de Concepción, Chile, 1970; PhD, Columbia Univ., 1979 (1986)

Barry J. Van Dyck, Adjunct Instructor in Management, Director of Degree Programs, Executive Education, and Associate Professional Specialist in Business Administration. BS, Univ. of Cincinnati, 1970; MA, Univ. of North Dakota, 1977; PhD, Indiana State Univ., 1980; MBA, Univ. of Notre Dame, 1986 (1991)

John H. Van Engen, the Andrew V. Tackes Professor of History. AB, Calvin College, 1969; PhD, Univ. of California, 1976 (1977)

Peter van Inwagen, the John Cardinal O'Hara Professor of Philosophy. BS, Rensselaer Polytechnic Institute, 1965; PhD, Univ. of Rochester, 1969 (1995)

Elizabeth Van Jacob, Adjunct Staff Librarian, University Libraries. BA, Mundelein College, 1985; MA, Univ. of Illinois, 1988 (2004)

Scott J. Van Jacob, Librarian, University Libraries. BA, Western Oregon State College, 1980; MS, *ibid.*, 1983; MLIS, Univ. of Illinois, Urbana-Champaign, 1987 (1995)

Chris R. Vanden Bossche, Professor of English. BA, Univ. of Notre Dame, 1972; PhD, Univ. of California, Santa Cruz, 1982 (1984)

James C. Vanderkam, the Rev. John A. O'Brien Professor of Theology. AB, Calvin College, 1968; BD, Calvin Theological Seminary, 1971; PhD, Harvard Univ., 1976 (1991)

Joy Vann-Hamilton, Assistant Professional Specialist – Assistant Provost. BA, Wichita State Univ., 1987; EMBA, Univ. of Notre Dame, 1998 (1991)

Robert H. Vasoli, Associate Professor Emeritus. AB, LaSalle College, 1952; MA, Univ. of Notre Dame, 1953; PhD, *ibid.*, 1964 (1957)

Edward Vasta, Professor Emeritus of English. BA, Univ. of Notre Dame, 1952; MA, Univ. of Michigan, 1954; PhD, Stanford Univ., 1963 (1958)

FACULTY

Kevin T. Vaughan, Associate Professor of Biological Sciences. BA, Hamilton College, 1984; MS, State Univ. of New York at Buffalo, 1986; PhD, Cornell Univ., 1992 (1998)

Patricia S. Vaughan, Research Assistant Professor of Biological Sciences. BS, State Univ. of New York, Albany, 1984; PhD, Cornell Univ., 1991 (1998)

Robert P. Vecchio, the Franklin D. Schurz Professor of Management. BS, DePaul Univ., 1972; MA, Univ. of Illinois, 1974; PhD, *ibid.*, 1976 (1976)

Julian Velasco, Associate Professor of Law. BSBA, Georgetown Univ., 1991; JD, Columbia Univ., 1994 (2001)

Anre Venter, Associate Professional Specialist in Psychology. BA, Univ. of Cape Town, 1980; MA, Pepperdine Univ., 1990; MA, Univ. of Notre Dame, 1994; PhD, *ibid.*, 1996 (1997)

Sandra C. Vera–Mu–oz, Associate Professor of Accountancy. BBA, Univ. of Puerto Rico, 1981; MBA, Pennsylvania State Univ., 1985; PhD, Univ. of Texas, Austin, 1994 (1994)

Hugo J. Verani, Research Professor of Romance Languages and Literatures. BA, Phillips Univ., 1966; MA, Univ. of Wisconsin, Madison, 1967; PhD, *ibid.*, 1973 (2002)

Igor N. Veretennikov, Research Assistant Professor of Chemistry and Biochemistry. MS, Moscow Institute of Physics and Technology, 1989; PhD, Univ. of Notre Dame, 1997 (2001)

Karina M. Vernaza, Visiting Assistant Professor of Aerospace and Mechanical Engineering. BS, US Merchant Marine Academy, 1996; MS, Univ. of Notre Dame, 2001; PhD, *ibid.*, 2002 (2003)

Stephanie A. Vetne, Adjunct Assistant Professor of Law. BA, Univ. of Maine, Orono, 1990; JD, Valparaiso Univ., 1996 (2003)

Wilasa Vichit–Vadakan, Assistant Professor of Civil Engineering and Geological Sciences. BS, Cornell Univ., 1995; MS, Massachusetts Institute of Technology, 1997; MA, Princeton Univ., 1999; PhD, *ibid.*, 2002 (2003)

Thomas S. Vihtelic, Research Associate Professor of Biological Sciences. BS, Michigan State Univ., 1978; DVM, *ibid.*, 1982; PhD, Univ. of Notre Dame, 1993 (1997)

Patrick L. Vivirito, Assistant Professional Specialist in Romance Languages and Literatures. BA, Loyola Univ., 1997; BS, *ibid.*, 1997; MA, Univ. of Notre Dame, 2002 (2002)

Donald G. Vogl, Associate Professor Emeritus of Art, Art History and Design. BAE, Univ. of Chicago, 1957; MAEd, Univ. of Wisconsin, 1958 (1963)

Abigail Waggoner, Assistant Professor of Economics and Econometrics. AB, Univ. of Chicago, 1998; PhD, Harvard Univ., 2005 (2004)

Diane Wagner, Assistant Professor, Aerospace and Mechanical Engineering. BS, Univ. of Michigan, 1989; PhD., Univ. of California Berkeley, 2002 (2005)

Andrzej Walicki, Professor Emeritus of History. MA, Univ. of Warsaw, 1953; PhD, *ibid.*, 1957 (1986)

Thomas W. Walker, Concurrent Assistant Professor of Art, Art History, and Design, and staff, Notre Dame Media Group. BFA, Indiana Univ., Bloomington, 1993; MFA, Univ. of Notre Dame, 2002 (2003)

Christopher J. Waller, the Gilbert F. Schaefer Professor of Economics. BA, Bemidji State Univ., 1981; MA, Washington State Univ., 1984; PhD, *ibid.*, 1985 (2003)

Daniel J. Walsh, Instructor in Naval Science. BS, Univ. of Notre Dame, 1984; BS, Embry Riddle Univ., 1992; MS, Naval Postgraduate School, 1997 (2002)

A. Peter Walshe, Professor of Political Science and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Wadham College, Oxford Univ., 1956; MA, Oxford Univ., 1959; DPhil, *ibid.*, 1968 (1966)

Rev. Joseph L. Walter, CSC, Associate Professor Emeritus of Chemistry and Biochemistry. BS, Duquesne Univ., 1951; PhD, Univ. of Pittsburgh, 1955 (1961)

James H. Walton, Professor Emeritus of English and Visiting Fellow in the Nanovic Institute for European Studies. AB, Univ. of Notre Dame, 1959; MA, Northwestern Univ., 1960; PhD, *ibid.*, 1966 (1963)

Barbara E. Walvoord, Professional Specialist in the Office of the Provost, Fellow in the Institute for Educational Initiatives, and Concurrent Professor of English. BA, Hope College, 1963; MA, Ohio State Univ., 1964; PhD, Univ. of Iowa, 1976 (1996)

Charles Wampler, Adjunct Professor of Mathematics. BS, Massachusetts Institute of Technology, 1979; MS, Stanford Univ., 1980; PhD, *ibid.*, 1985 (2003)

Meng Wang, Associate Professor, Aerospace and Mechanical Engineering. BS, Zhejiang Univ., 1982; MS, Univ. of Colorado, 1985; PhD, *ibid.*, 1989 (2006)

Jadwiga Warchol, Research Professor of Physics. BSc, Univ. of Warsaw, Poland, 1962; MSc, *ibid.*, 1963; PhD, *ibid.*, 1969 (1984)

Ted A. Warfield, Associate Professor of Philosophy. BA, Univ. of Arkansas, 1991; PhD, Rutgers Univ., 1995 (1995)

Jennifer L. Warlick, Chair of Economics and Policies Studies and Associate Professor of Economics. BA, Duke Univ., 1972; MA, Univ. of Wisconsin, 1975; PhD, *ibid.*, 1979 (1982)

Jessica McManus Warnell, Program Manager in the Institute for Ethical Business Worldwide, and Concurrent Instructor in Business Ethics. BA, Saint Mary's College, 1998; MA, Univ. of Chicago, 2000 (2001)

Joni E. Warner, Associate Librarian. BA, Western Kentucky Univ., 1994; M.L.S., Indiana Univ., 1995 (2000)

Stephen H. Watson, Professor of Philosophy and Fellow, Nanovic Institute for European Studies. BA, Carroll College, 1972; MA, Duquesne Univ., 1975; PhD, *ibid.*, 1979 (1983)

John L. Watzke, Associate Professional Specialist, Master of Education Program. BA, Univ. of Iowa, 1990; MA, *ibid.*, 1994; PhD, *ibid.*, 2000 (2000)

Joseph P. Wawrykow, Associate Professor of Theology. BA, Univ. of Manitoba, Canada, 1978; MA, *ibid.*, 1980; MA, Yale Univ., 1981; MPhil, *ibid.*, 1984; PhD, *ibid.*, 1987 (1986)

Mitchell R. Wayne, Associate Dean of Science and Professor of Physics. BS, Univ. of California, Los Angeles, 1977; MS, *ibid.*, 1980; PhD, *ibid.*, 1985 (1991)

F. Ellen Weaver–Laporte, Professional Specialist Emerita in Theology. BA, Regis College, 1965; MA, Andover Newton Theological School, 1970; PhD, Princeton Univ., 1973 (1976)

H. Ronald Weber, Professor Emeritus of American Studies. BA, Univ. of Notre Dame, 1957; MFA, Univ. of Iowa, 1960; PhD, Univ. of Minnesota, 1967 (1963)

Hannelore H. Weber, Associate Professional Specialist in German and Russian Languages and Literatures. BA, Mount Mary College, 1966; MA, Univ. of Notre Dame, 1994 (1991)

John A. Weber, Associate Professor of Marketing. BA, Marquette Univ., 1964; PhD, Univ. of Wisconsin, 1970 (1969)

J. Robert Wegs, Professor of History, Senior Fellow of the Nanovic Institute for European Studies, Fellow in the Helen Kellogg Institute for International Studies, and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Western Illinois Univ., 1963; MA, Northern Illinois Univ., 1966; PhD, Univ. of Illinois, 1970 (1977)

Jerry Che–Yung Wei, Associate Professor of Management. BS, National Tsing Hua Univ., 1979; MEng, Rochester Institute of Technology, 1983; PhD, Texas A&M Univ., 1987 (1987)

Andrew J. Weigert, Professor of Sociology. BA, St. Louis Univ., 1958; MA, *ibid.*, 1960; BA, Woodstock College, 1964; PhD, Univ. of Minnesota, 1968 (1968)

Henry M. Weinfeld, Chair and Professor in the Program of Liberal Studies and Fellow, Nanovic Institute for European Studies. BA, City College of New York, 1970; MA, State Univ. of New York, 1973; PhD, City Univ. of New York, 1985 (1991)

Paul P. Weinstein, Professor Emeritus of Biological Sciences. AB, Brooklyn College, 1941; ScD, Johns Hopkins Univ., 1949 (1969)

Paul J. Weithman, Chair and Professor of Philosophy. BA, Univ. of Notre Dame, 1981; MA, Harvard Univ., 1986; PhD, *ibid.*, 1988 (1991)

Michael R. Welch, Associate Professor of Sociology. BA, LeMoyne College, 1972; MA, Univ. of North Carolina, 1975; PhD, *ibid.*, 1980 (1981)

John P. Welle, Professor of Romance Languages and Literatures, Concurrent Professor of Film, Television, and Theatre, and Fellow in the Nanovic Institute for European Studies. BA, St. John's Univ., 1974; MAT, St. Thomas College, 1975; MA, Indiana Univ., 1980; PhD, *ibid.*, 1983 (1983)

Christopher J. Welna, Associate Director, Fellow and Professional Specialist in the Helen Kellogg Institute for International Studies, Director of the Latin American Studies Program, and Concurrent Assistant Professor of Political Science. BA, Carleton College, 1978; MPA, Princeton Univ., 1982; PhD, Duke Univ., 1997 (1998)

Joellen Jones Welsh, Professor of Biological Sciences. BA, Rutgers Univ., 1975; PhD, Cornell Univ., 1980 (1998)

Anastasia C. Wendlinder, Visiting Assistant Professor of Theology. BA, Univ. of Colorado, 1987; MA, Univ.

FACULTY

of California at Berkeley, 1991; PhD, Univ. of Notre Dame, 2004. ()

Thomas A. Werge, Professor of English and Concurrent Professor in Master of Education Program. BA, Hope College, 1963; MA, Cornell Univ., 1964; PhD, *ibid.*, 1967 (1967)

Kathleen F. Werner, Adjunct Instructor in Romance Languages and Literatures. BA, Rosary College, 1973; MA, Eastern Michigan Univ., 1974 (1989)

Robert L. West, Assistant Professor of Psychology. BA, Western Kentucky Univ., 1991; MA, *ibid.*, 1993; PhD, Univ. of South Carolina, 1996 (1999)

Sarah E. West, Assistant Professional Specialist in Chemistry and Biochemistry. BA, Augustana College, 1996 (1998)

Joannes J. Westerink, Associate Professor of Civil Engineering and Geological Sciences. BS, State Univ. of New York, 1979; MS, *ibid.*, 1981; PhD, Massachusetts Institute of Technology, 1984 (1990)

Carroll William Westfall, the Francesco Montana Professor of Architecture. BA, Univ. of California, Berkeley, 1961; MA, Univ. of Manchester, England, 1963; PhD, Columbia Univ., 1967 (1998)

Michelle Whaley–Murphy, Associate Professional Specialist, Biological Sciences. BA, Scripps College, 1987; PhD, Univ. of Notre Dame, 1993 (2000)

Kevin Martin Whelan, Professional Specialist, the Smurfit Director of ND Keough Studies Center in Dublin and Visiting Associate Professor of History. BA, Univ. College, Dublin, 1978; PhD, National Univ. of Ireland, 1981 (1977)

Sophie Kirsten White, Assistant Professional Specialist and Assistant Director of the Program of Gender Studies. BA, St. Clare's, Oxford Univ., 1985; MA, Univ. of Edinburgh, 1990; MA, Univ. of London, 1993; PhD, *ibid.*, 2000 (2001)

Thomas L. Whitman, Professor of Psychology. BS, St. Norbert's College, 1962; MA, Univ. of Illinois, 1965; PhD, *ibid.*, 1967 (1967)

Todd D. Whitmore, Associate Professor of Theology and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Wabash College, 1979; MDiv, *ibid.*, 1985; PhD, Univ. of Chicago, 1990 (1990)

John Wibbens, Adjunct Instructor, Master of Education Program. BS, Ball State Univ., 1974; MS, Indiana Univ., South Bend, 1980 (2001)

Kristina McCollam Wiebe, Visiting Assistant Professional Specialist in Romance Languages and Literatures. BA, Pepperdine Univ., 1993; MA, Univ. of North Carolina, 1995 (2002)

Michael C. Wiescher, the Frank M. Freimann Professor of Physics. BA, Univ. of Munster, 1972; MA, *ibid.*, 1975; PhD, *ibid.*, 1980 (1986)

Olaf G. Wiest, Professor of Chemistry and Biochemistry. Vordiplom, Univ. of Bonn, 1987; MS, *ibid.*, 1991; PhD, *ibid.*, 1993 (1995)

Steven Milo Wietstock, Assistant Professional Specialist, Chemistry and Biochemistry. BS, Alma College, 1982; PhD, Uniformed Services Univ., 1988 (2005)

Charles K. Wilber, Professor Emeritus of Economics and Policy Studies and Fellow in the Joan B. Kroc Institute for International Peace Studies. BA, Univ. of Portland, 1957; MS, *ibid.*, 1960; PhD, Univ. of Maryland, 1966 (1975)

William L. Wilkie, the Al and Eleanor Nathe Professor of Marketing. BBA, Univ. of Notre Dame, 1966; MBA, Stanford Univ., 1969; PhD, *ibid.*, 1970 (1987)

John Wilkinson, Associate Professional Specialist, Keough–Naughton Institute. BA, Univ. of Cambridge, 1975; MA, *ibid.*, 1978 (2005)

Carl Williams, Concurrent Assistant Professor, Psychology. BA, San Diego State Univ., 1996; MS, Virginia Polytechnic Institute and State Univ., 1999; PhD, Univ. of California, 2004 (2005)

E. Bruce Williams, Professor of Mathematics. BS, Massachusetts Institute of Technology, 1967; PhD, *ibid.*, 1972 (1975)

Rev. Oliver F. Williams, CSC, Associate Professor of Management, Fellow in the Joan B. Kroc Institute for International Peace Studies and Director of the Center for Ethics and Religious Values in Business. BSChE, Univ. of Notre Dame, 1961; MTh, *ibid.*, 1969; PhD, Vanderbilt Univ., 1974 (1973)

Richard A. Williams, Associate Professor of Sociology. BA, Creighton Univ., 1977; MS, Univ. of Wisconsin, 1981; PhD, *ibid.*, 1986 (1986)

Shauna Williams, Visiting Assistant Professional Specialist in Romance Languages and Literatures. BA, Evangel Univ., 1989; MEd, Indiana Univ. South Bend, 2002 (2004)

Robert W. Williamson, Professor Emeritus of Accountancy. BBA, Univ. of Notre Dame, 1961; MBA, Univ. of Chicago, 1963; PhD, *ibid.*, 1971 (1967)

Ivy Glenn Wilson, Assistant Professor of English. BA, Stanford Univ., 1995; MA, Yale Univ., 1998; MPhil, *ibid.*, 1999; PhD, *ibid.*, 2002 (2002)

James R. Wilson, Adjunct Professor of Physics. BS, Univ. of California, Berkeley, 1943; PhD, *ibid.*, 1952 (1996)

Albert K. Wimmer, Associate Professor of German and Russian Languages and Literatures, Director of Graduate and Undergraduate Studies, Fellow in the Nanovic Institute for European Studies, and Fellow in the Medieval Institute. MA, Univ. of Notre Dame, 1964; MA, *ibid.*, 1967; PhD, Indiana Univ., 1975 (1964)

Gordon D. Wishon, Chief Information Officer, Associate Provost, and Associate Vice President, Office of Information Technologies. BSCS, West Virginia Univ., 1977; MSCS, Wright State Univ., 1990 (2001)

James L. Wittenbach, Professor of Accountancy. BS, Ferris State Univ., 1965; MBA, Michigan State Univ., 1967; DBA, Univ. of Oklahoma, 1972; CPA, Indiana, 1974 (1972)

Jennifer R. Woertz, Assistant Professor of Civil Engineering and Geological Sciences. BS, Univ. of Illinois, Urbana, 1996; MS, Univ. of Texas, Austin, 1998; PhD, *ibid.*, 2002 (2003)

Pamela Robertson Wojcik, Associate Professor of Film, Television, and Theatre. BA, Wellesley College, 1986; MA, Univ. of Chicago, 1988; PhD, *ibid.*, 1993 (1998)

Christina Wolbrecht, Associate Professor of Political Science. BA, Pacific Lutheran, 1992; MA, Washington Univ., 1994; PhD, *ibid.*, 1997 (1997)

Eduardo E. Wolf, Professor of Chemical and Biomolecular Engineering. BS, Univ. of Chile, 1969; MS, Univ. of California, Davis, 1972; PhD, Univ. of California, Berkeley, 1975 (1975)

Martin H. Wolfson, Associate Professor of Economics. BA, Swarthmore College, 1966; MA, American Univ., 1975; PhD, *ibid.*, 1984 (1989)

Robert J. Wolosin, Adjunct Associate Professor of Anthropology. AB, Univ. of Chicago, 1964; MS, Univ. of Michigan, 1967; PhD, *ibid.*, 1968 (1983)

Pit–Mann Wong, Professor of Mathematics. BSc, National Taiwan Univ., 1971; PhD, Univ. of Notre Dame, 1976 (1980)

Carolyn Y. Woo, the Martin J. Gillen Dean of Business and Ray and Milann Siegfried Professor of Management. BS, Purdue Univ., 1975; M.S.I.A, *ibid.*, 1976; PhD, *ibid.*, 1979 (1997)

Bruce N. Wood, Adjunct Instructor in Management. BS Accounting, Indiana Univ., South Bend, 1977 (2000)

Charles A. Wood, Assistant Professor of Management. BS, Ball State Univ., 1986; MBA, Butler Univ., 1997 (2002)

Jessica M. Wormley, Fellow in the Program of Liberal Studies. BA, Chestnut Hill College, 1997; BS, *ibid.*, 1997; MA, Washington Theological Union, 1999; MPhil, *ibid.*, 2000 (2004)

Abigail K. Wozniak, Assistant Professor of Economics. AB, Univ. of Chicago, 1998; AM, Harvard Univ., 2001; PhD, *ibid.*, 2005 (2005)

Noel Don Wycliff, Adjunct Professor of American Studies and Associate Vice President of News and Information. BA, Univ. of Notre Dame, 1969 (2004)

Frederico J. Xavier, Professor of Mathematics. BS, Univ. Federal de Pernambuco, 1971; MS, *ibid.*, 1973; PhD, Univ. of Rochester, 1977 (1985)

Huili (Grace) Xing, Assistant Professor of Electrical Engineering. BS, Peking Univ., 1996; MS, Lehigh Univ., 1998; PhD, Univ. of California, Santa Barbara, 2003 (2004)

Kwang–Tzu Yang, the Viola D. Hank Professor Emeritus of Aerospace and Mechanical Engineering. BS, Illinois Institute of Technology, 1951; MS, *ibid.*, 1952; PhD, *ibid.*, 1955 (1955)

Xiaoshan Yang, Associate Professor of East Asian Languages and Literatures. BA, Anhui Univ., 1982; MA, Peking Univ., 1985; PhD, Harvard Univ., 1994 (1997)

Chengxu Yin, Assistant Professional Specialist in East Asian Languages and Literatures. BA, Peking Univ., 1984; MA, Univ. of Massachusetts, 1990; PhD, Brandeis Univ., 1994 (2000)

Paul J. Yoder, Adjunct Assistant Professor of Psychology. BS, Eastern Mennonite College, 1977; MS, Western Michigan Univ., 1980; PhD, *ibid.*, 1984 (2004)

FACULTY

Susan L. Youens, J.W. VanGorkom Professor of Music. BMus., Southwestern Univ., 1969; MA, Harvard Univ., 1971; PhD, *ibid.*, 1975 (1984)

Samir YounŽs, Associate Professor of Architecture and Director of the School of Architecture Rome Studies Program. BSc, Univ. of Texas, 1981; MArch, *ibid.*, 1984 (1991)

Robin Darling Young, Associate Professor of Theology. BA, Mary Washington College, 1972; MA, Univ. of Chicago, 1975; PhD, Univ. of Chicago, 1982 (2003)

Jennifer A. Younger, the Edward H. Arnold Director of University Libraries and Librarian. BA, Univ. of Wisconsin, Madison, 1969; MA, *ibid.*, 1971; PhD, *ibid.*, 1990 (1997)

Lei Yu, Assistant Professor in Finance. BS, Beijing Normal Univ., 1999; PhD, New York Univ., 2005 (2004)

Ke-Hai Yuan, William J. and Dorothy K. O'Neill III Associate Professor of Psychology. BS, Beijing Institute of Technology, 1985; MA, *ibid.*, 1988; PhD, Univ. of California, Los Angeles, 1995 (2001)

Randall C. Zachman, Associate Professor of Theology. BA, Colgate Univ., 1975; MDiv, Yale Divinity School, 1980; PhD, Univ. of Chicago, 1990 (1991)

Jaroslav Zajicek, Professional Specialist in Chemistry and Biochemistry. BS, Czech Technical Univ., Prague, 1970; PhD, Charles Univ., Prague, 1980 (1995)

Eduardo A. Zambrano, Assistant Professor of Finance. BA, Univ. Catolica Andres Bello, Venezuela, 1993; MA, Cornell Univ., 1998; PhD, *ibid.*, 1999 (1999)

Michael A. Zenk, Professor and Chair of Aerospace Studies. BS, United States Air Force Academy, 1978; MA, Loyola Univ., 1987; MS, Air Force Institute of Technology, 1989 (2003)

Lorenzo A. Zeugner Jr., Associate Librarian, University Libraries. AB, Fairfield Univ., 1965; MAEd., *ibid.*, 1966; MLS, Univ. of Pittsburgh, 1969 (1978)

Helen Qi-Cong Zhu, Professional Specialist in Chemistry and Biochemistry. BS, Lanzhou Univ.; MS, Drexel Univ., 1988; PhD, *ibid.*, 1992 (2003)

Yingxi E. Zhu, Assistant Professor of Chemical and Biomolecular Engineering. BS, Tsinghua Univ., 1997; PhD, Univ. of Illinois, 2001 (2004)

Kamil S. Zingairov, Visiting Professor of Electrical Engineering. BS, Moscow Physico-Technical Institute, 1962; MS, Institute of Radioengineering and Electronics USSR, 1966; PhD, Council of Cybernetics of USSR Academy of Sciences, 1977 (2003)

Capt. William A. Zimmerman, Assistant Professor of Aerospace Studies. BA, St. Leo College, 1988; MA, George Washington Univ., 1993; MA, Univ. of Massachusetts, Lowell, 2000 (2002)

Catherine Zuckert, the Nancy Reeves Dreux Professor of Political Science and Fellow of the Nanovic Institute for European Studies. AB, Cornell Univ., 1964; MA, Univ. of Chicago, 1967; PhD, *ibid.*, 1970 (1998)

Michael P. Zuckert, the Nancy Reeves Dreux Professor of Political Science. BA, Cornell Univ., 1964; MA, Univ. of Chicago, 1967; PhD, *ibid.*, 1974 (1998)

Martha Zurita, Assistant Professional Specialist in the Institute for Latino Studies. BS, DePaul Univ., 1989; BS, Univ. of Illinois, Urbana, 1993; ME, *ibid.*, 1995; PhD, *ibid.*, 1997 (2003)

Matthew C. Zyniewicz, Associate Professional Specialist in Theology and Concurrent Associate Professional Specialist in the Institute for Church Life. BA, Univ. of Notre Dame, 1988; MDiv, *ibid.*, 1993; MA, *ibid.*, 1996; PhD, *ibid.*, 2000 (2001)

COURSE LISTINGS

College of Arts and Letters

School of Architecture

Mendoza College of Business

College of Engineering

College of Science

The University

College of Arts and Letters

Department of Africana Studies

AFAM 10401. Introduction to Jazz

(3-0-3)

A music appreciation course requiring no musical background and no prerequisites. General coverage of the history, various styles, and major performers of jazz, with an emphasis on current practice.

AFAM 10402. Current Jazz

(3-0-3) Dwyer

A study of the jazz performers and practices of today and of the preceding decade—the roots, stylistic developments and directions of individual artists, small combos, and big bands.

AFAM 20100. Introduction to African-American Literature

(3-0-3)

A survey of 300 years of African-American literature.

AFAM 20101. Harlem Renaissance

(3-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in the '20s and early '30s and the writers it fostered: Hughes, Hurston, Toomer, Redmon Fauset, Larson, and Thurman.

AFAM 20102. Women in the Americas

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

AFAM 20103. African-American Literature and the Bible

(3-0-0)

An examination of the Bible, from Genesis to the Gospel writers' parables of Jesus, and how these Hebrew and Christian stories inspired African-American artists.

AFAM 20104. Passing in Twentieth-Century American Literature

(3-0-3)

Interracial relationships as depicted in the writings of black and white American writers.

AFAM 20105. African-American Migration Narratives

(3-0-3)

Life writings and issues of self-representation in the African-American expressive cultural tradition in the 19th and 20th centuries.

AFAM 20106. Introduction to Post-Colonial Literature

(3-0-3)

Traces the development of literatures from the former colonies of various empires, but principally the British and French.

AFAM 20107. Tropical Heat Waves: Contemporary Latino/a and Caribbean Literature

(3-0-3)

A review of selected contemporary Latino/a and Caribbean novels.

AFAM 20108. Beats, Rhymes, and Life: An Introduction to Cultural Studies

(3-0-3)

An introduction to cultural studies using a variety of media: literature, film, and music.

AFAM 20175. Ethnic Identities

(3-0-3)

An exploration of the interconnectedness among literatures of prominent authors from the Americas, Africa, England, and the Caribbean.

AFAM 20367. Islamic Societies of the Middle East and North Africa: Religion, History, and Culture

(3-0-3)

This course is an introductory survey of the Islamic societies of the Middle East and North Africa from their origins to the present day. It will deal with the history and expansion of Islam, both as a world religion and civilization, from its birth in the Arabian Peninsula in the seventh century to its subsequent spread to other parts of western Asia and North Africa. Issues of religious and social ethics, political governance, gender, social relations, and cultural practices will be explored in relation to a number of Muslim societies in the region, such as in Egypt, Morocco, and Iran. The course foregrounds the diversity and complexities present in a critical area of what we call the Islamic world today.

AFAM 20475. Black Music, World Market

(3-0-3)

Slavery and the coerced migration of Africans to the New World left a multitude of popular musical styles from black peoples (and others) on both sides of the Atlantic. This course is an examination of the diversity of black popular musics on a global scale.

AFAM 20550. African Philosophy

(3-0-3)

This course explores such issues as myth and its relationship to philosophy, reality as a whole as a principle that underlies the African universe, the question of ancestors, and being and knowing. It will explore the development of African philosophy through three periods: the traditional/classical, the colonial, and the contemporary/post-colonial.

AFAM 20575. Ways of Peacemaking: Gandhi/King

(3-0-3)

An intensive study of the philosophy and spirituality of two of the greatest activists and peace educators of our century, M. Gandhi and M. Luther King. We will be especially concerned with the way each of these men came to construct new, yet quite ancient, images or controlling myths that they hoped would lead us to think and act in revolutionary ways.

AFAM 20675. Societies and Cultures of Latin America

(7.5-0-3)

This course introduces students to the diverse cultures and societies of Latin America through historical, ethnographic and literary study. Contemporary issues of globalization, violence, and migration will preoccupy the discussion of Central and South America and the Caribbean today.

AFAM 20702. Sociology of Race and Ethnicity

(3-0-3)

This course provides an overview of some of the classic and contemporary sociological understandings and perspectives of race and ethnicity. We will focus particular attention on the racial/ethnic groups common to the United States, broadly categorized as African, Asian, European, and Hispanic Americans. The course will cover areas of identity and culture and will address issues such as racism, immigration, assimilation, segregation, and affirmative action. We will use printed texts as well as film clips; some assignments may include movie viewing.

AFAM 20703. Introduction to Social Problems

(3-0-3)

Analysis of selected problems in American society such as crime, narcotic addiction, alcoholism, delinquency, racial and ethnic conflict, prostitution, and others. Discussions, debates, films, tapes, and readings.

AFAM 23701. Topics on Race in the Americas

(1-0-1)

This course takes an interdisciplinary approach to a range of historical, literary, religious, and social science topics important to the understanding of the experiences of Latino and African-American people in American society. The mini-course will focus, among other topics, on human rights, race relations, mestizaje, racism, ethnicity, social justice, and media images. Mandatory lecture series/seminar (six to seven dates). Participation is required. In addition, students will write a short paper. Students interested in this course must attend a short organizational meeting at the beginning of the semester.

AFAM 30101. Contemporary Black Literature

(3-0-3)

A survey of late 20th-century black literature in the United States and its relation to other ethnic literatures.

AFAM 30201. African-American History I

(3-0-3) Pierce

This course is a survey of the history of African Americans, beginning with an examination of their West African origins and ending with the Civil War era. We will discuss the 14th and 15th centuries, West African kingdoms, forms of domestic slavery and West African cultures, the Atlantic slave trade, early slave societies in the Caribbean, slavery in colonial America, the beginnings of African-American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery and resulting sectional disputes, and the significance of “bloody Kansas” and the Civil War.

AFAM 30202. Survey of African-American History II

(3-0-3) Pierce

This course will survey the history of African Americans from 1865 to 1980. Specifically, this course will focus on the problems of Reconstruction in the South after the Civil War, the adjustments and reactions of African Americans to freedom, the economic exploitation of sharecropping, northern black communities at the end of the 19th century, the migration of black Southerners to northern urban areas, black political leadership, the Civil Rights Movement, current examples of institutional racism, and affirmative action in America.

AFAM 30203. Colonial America

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and depeopling) of English North America.

AFAM 30204. Era of the Civil War 1846–77

(3-0-3) DeGruccio

Arguably, the study of the American Civil War is a suitable training ground for novice historians, for traditionally, a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the war, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

AFAM 30205. United States Labor History

(3-0-3)

This course will examine the history of paid and unpaid labor in the United States from colonial times to the near present. We will seek to understand how working people both shaped—and were shaped by—the American Revolution, the debates over slavery and free labor culminating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the Cold War-era repression of the Left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers created to advance their own interests, namely the labor movement. We will also pay special attention to the complicated yet crucial connections between work and racial and gender identities. Specific topics may include slavery, farm labor, women’s domestic work, trade unions, questions of industrial democracy, the role of radicalism, and the challenges confronting workers in the current era of corporate globalization and anti-sweatshop activism.

AFAM 30206. The United States since World War II

(3-0-3)

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of Ronald Reagan. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower presidency, the New Frontier, Vietnam, President Johnson’s Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this postwar era, and the presidencies of Jimmy Carter and Ronald Reagan.

AFAM 30207. Race in American Culture

(3-0-3)

This course will explore the history of American society—its culture, politics, and people—through an in-depth look at the defining issue of race.

AFAM 30208. US Gilded Age/Progressive Era

(3-0-3)

Through discussion and lectures, students examine the emergence of a recognizably modern United States. Topics examined will include the emergence of the corporation, progressive reforms, the changing contours of American religion, the character of the New South, the battle for women’s suffrage, developments in the arts, and American involvement in the First World War.

AFAM 30210. American Political Traditions since 1865

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy’s character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of the character of Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

AFAM 30211. History of US South to 1877

(3-0-3)

This course will provide a survey of the American South through Reconstruction. We will briefly describe Native American societies and early Spanish settlements in Florida and the Southwest before addressing in greater detail the political, cultural, and social history of the region as it was settled beginning in the Southeast. We will examine how ideas like honor, freedom, patriarchy, and religious beliefs were forged and evolved in the context of a slave economy, and how they shaped the day’s political questions. We will also consider the Confederate experience and Reconstruction.

There will be one paper (30 percent), two exams (25 percent each), reading reports (10 percent), and class participation (10 percent).

AFAM 30212. African-American Politics, 1900–50

(3-0-3)

This course examines the diverse struggles for full citizenship and human rights on the part of African Americans from 1900 to 1950. The topics to be studied include the Great Migration, the New Negro Movement and Harlem Renaissance, the Marcus Garvey Movement, the rise of A. Philip Randolph's Brotherhood of Sleeping Car Porters, the involvement of blacks in the Communist Party, and the transformations in black culture and politics brought about by the two World Wars. This course will examine the efforts of liberal-integrationist, socialist, communist, and Black Nationalist organizations to combat white racism and qualitatively improve the lives of blacks in various regions of the United States. It hopes to convey blacks' diverse thoughts on complex issues such as identity, politics, class, gender, race, and nationality.

AFAM 30213. American Social Movements

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black Civil Rights Movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

AFAM 30214. Labor and America since 1945

(3-0-3) Graff

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8 percent of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is "globalization" and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies or mass culture are particularly welcome.

AFAM 30215. Women in the US South

(3-0-3)

This course introduces students to the historical study of women in the United States South. It will cover topics such as women in slavery, the transition to freedom, race relations, and social movements. Through student-centered discussions, presentations, and a variety of different writing assignments, students will analyze how race, class, and gender structured the experiences of women in southern society. At the end of the semester, students will be prepared to pursue more advanced research in the field of women's history.

AFAM 30250. African History I

(3-0-3)

This course introduces students to major themes in African history to 1800. It investigates agricultural and iron revolutions, states and empires, religious movements, and patterns of migration and labor exploitation. The latter part of the course focuses on Africa in the era of trans-Atlantic slave trade. Questions to explore include: What was the effect of the slave trade on Africa? How did the slave trade shape the formation and destruction of African states? How did the slave trade influence social systems, gender relations, cultural practices, religious beliefs, and demographics in Africa?

AFAM 30251. Africa since 1800

(3-0-3) Osborn

This course will focus on African history from 1800 to the 1960s. In the 19th century, new states, economies, and societies emerged in Africa as African peoples developed new relations among themselves and with the rest of the world. With the "scramble for Africa" of the 1880s, European powers colonized Africa and suppressed many of these processes. In the 1960s, however, self-rule resurged as Africans threw off the yoke of colonial rule and formed independent nation-states. This course will consider the social, economic, and political history of Africa by using case studies from the Democratic Republic of Congo (Congo-Zaire), Nigeria, Sierra Leone, and South Africa.

AFAM 30252. African Resistance/Colonial Rule

(3-0-3)

A description for this course has not been filed with the Registrar's Office.

AFAM 30253. South Africa, 1795–1910

(3-0-3)

This course examines the political, social, and economic changes in South Africa since the first arrival of the British in 1795, up to the creation of the Union of South Africa in 1910. During that period one can observe great changes in South Africa, which to a great extent decided the future of the region.

We will observe the great upheavals of the first half of the 19th century (Mfecane and Great Trek), which completely changed the map of the region; the creation, development, and eventual fall of the independent African states; and the rise of Anglo-Boer antagonism, with its culmination in the South African War (1899–1902). We will analyze the dynamics of social and political interaction between different ethnic and racial groups and the impact of mineral revolution in the history of the region. We also will try to examine the birth and development of Afrikaner national consciousness, and last but not least, the process of creating the Union of South Africa.

This course requires a critical attitude toward history and historical interpretations. Its goal is to teach the methods of historical analysis, especially the analysis of primary and secondary sources. The objective of this course is also to broaden the knowledge and understanding of South African history. Students will be evaluated by exams, written work, class attendance, and participation in discussions.

AFAM 30275. History of Brazil

(3-0-3)

This course surveys the history of Brazil, Latin America's largest nation, from its pre-Columbian roots to the present, with particular emphasis on social, economic, and political developments during that time. Topics will include indigenous people, the formation of colonial societies and economies, independence, slavery, abolition and post-emancipation society, immigration, the emergence of populist politics, industrialization, and efforts to develop the Amazon, military rule, and democratization.

AFAM 30330. Race, Class, and Nation in the Black Intellectual Tradition

(3-0-3) Tillery

This course will be a survey of the way black political and social thinkers—from David Walker to Derrick Bell—have theorized these concepts and their relevance for black life in America. In short, the course asks the following two questions: (1) Is there a unified black intellectual tradition on these questions? (2) How has black thought on the questions differed from mainstream intellectual currents?

AFAM 30410. Topics in African-American Cinema

(3-2-3)

Corequisite: AFAM 31410

An investigation of selected topics concerning theory, history, and research in film, television, the media, or cultural studies.

AFAM 30476. African Cinema: Black Gazes/White Camera

(3-0-3)

A course exploring the image of black Africa through the lens of white cinematographers.

AFAM 30501. Canon and Literature of Islam

(3-0-3)

This course is an introduction to the religious literature of the Arab-Islamic world. Emphasis is on works from the classical and medieval periods of Islam, roughly from the seventh to the 14th century of the Common Era. We will read selections from the Qur'an (the sacred scripture of Islam), the Hadith literature (sayings attributed to the prophet Muhammed), the biography of the Prophet, commentaries on the Qur'an, historical and philosophical texts, and mystical poetry. All texts will be read in English translation. No prior knowledge of Islam and its civilization is assumed, although helpful.

AFAM 30575. Literature *Issue de l'immigration*

(3-0-3)

An introduction to the literary productions by African, Caribbean, and Asian immigrants to France. Students will acquire a detailed understanding of the relevant strands of current theoretical thinking, and through a close analysis of the texts themselves, will examine recurrent themes and forms in immigrant literature, including the representation of identity; the concepts of origins; the intersection of race, class, and gender; and the textual strategies underpinning these considerations. Finally, we will examine the different ways in which these authors are redefining French literature with their singular voices and styles. Writers to be studied include Farida Belghoul, Azouz Beggag, Soraya Nini, Calixthe Beyala, Bolya Baenga, Gisele Pineau, and Linda Li. The course will be taught in French.

AFAM 30576. Short Fiction of the Portuguese-Speaking World

(3-0-3)

This is a comparative study of short prose fiction in the Portuguese-speaking world, with special emphasis on theoretical issues related to this literary genre. Authors studied include Machado de Assis, Joao Guimaraes Rosa, Clarice Lispector, Mario deCarneiro, Miguel Torga, and Luandino Vieira. Texts and discussions in English.

AFAM 30601. Race/Ethnicity and American Politics

(3-0-3) Tillery

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions (the Congress, presidency, judiciary, state and local governments, etc.) play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

AFAM 30605. Social Movements

(3-0-3) McVeigh

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course, we will consider the ways in which different sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

AFAM 30650. Politics of South Africa

(3-0-3)

This course focuses on the key state of the region, the republic of South Africa. After outlining the political history of apartheid, the phenomenon of Afrikaner nationalism, and the rise of African nationalism and the liberation movements, attention turns to the country's escalating turmoil of the 1980s and resulting political transition in the 1990s. South Africa's political and economic prospects are also examined. The semester concludes with a survey of the transitions that brought South Africa's neighboring territories to independence, the destabilization strategies of the apartheid regime, and United States policy in that region.

AFAM 30651. Politics of Tropical Africa

(3-0-3) Walshe

Following an introduction to traditional political institutions, the colonial inheritance, and the rise of African nationalism, the course concentrates on the current economic and political problems of tropical Africa. This includes case studies of political organizations, ideologies, and government institutions in Ghana, Nigeria, and Tanzania.

AFAM 30652. Democracy, Development, and Conflict in Africa

(3-0-3) Singh

This course surveys African politics through the lens of the "big themes" in comparative politics—democratization, economic development, and internal conflict. Each theme is approached through both broad theories and specific case studies, so that students will learn about Africa in general and concrete ways. Students will consider the nature of Africa's challenges, what conditions distinguish Africa's successes from its failures, and what can be realistically accomplished in the future.

AFAM 30675. Introduction to Comparative Government

(3-0-3)

This course poses three questions in the study of politics: (1) Why are some countries democratic and others authoritarian? (2) In what ways do democratic regimes vary from one another? (3) What constitutes "good" government? In answering these questions, we study two different types of mobilization (nationalist and developmental) and four countries: the United States, Russia, China, and Great Britain. This course cannot be taken if you have already taken POLS 20400.

AFAM 30676. Problems of International Relations

(3-0-3)

This course looks at a series of issues important to understanding international events.

AFAM 30677. New Urbanism Applied: Community and Diversity in South Bend

(3-0-3)

This course is intended to introduce students to the social problems connected with the death of city centers in the US by examining the city of South Bend and the recent efforts by its mayor and city council to restore the city. Students will examine transportation, jobs, housing and access to culture. The class will conduct field studies of the South Bend city center to determine how well these needs are currently being met.

AFAM 30701. Fundamentals to Human Evolution

(3-0-3)

This course deals with human evolution in both biological and cultural terms. Topics covered will include primate behavior, the mechanisms of evolution, the fossil record, and the characteristics of prehistoric cultures.

AFAM 30702. Human Diversity

(3-0-3) Sheridan

Issues concerning the nature of human diversity (race, intelligence, sex, gender, etc.) are a continuing source of social and scientific debate. This course is designed to present the issues and methods used by physical anthropologists to study both the biological basis of human differences, as well as the ongoing process of human adaptation and evolution in response to climate, nutrition, and disease. Integration of the social, biological, and medical sciences will be employed to investigate modern human variation.

AFAM 30703. Fashioning Identity in American History

(3-0-3)

This course will focus on dress and material/visual culture in American history starting with the colonial period. It will introduce methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies.

AFAM 30704. Home Fronts during War

(3-0-3)

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include: critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, anti-nuclear movements; Cold War politics and fears of American communism; debates over the draft, just-war, racism at home, and US policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

AFAM 30705. Poverty/Inequality/Social Stratification

(3-0-3)

Social inequality is a prominent and persistent feature of modern society. Social stratification theory attempts to explain the causes of inequality and the reasons for its persistence. This course will address such questions as: Why are some people rich and some people poor? Why does inequality persist? Who gets ahead? Can men and women get the same jobs? Do different races have the same opportunities? Is inequality necessary? Potential topics include inner-city and rural poverty, welfare dependency, homelessness, status attainment and occupational mobility, racial and ethnic stratification, and gender stratification and class theory.

AFAM 30706. Criminology

(3-0-3)

The course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization, and goals of the clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to a car is necessary.

AFAM 30720. Cultural Aspects of Clinical Medicine

(4-0-4)

This course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization, and goals of clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to a car is necessary.

AFAM 30750. Peoples of Africa

(3-0-3) Bellis

An introduction to the societies of Sub-Saharan Africa. It examines cultures in present-day Africa as well as in the past in order to lend an understanding to the developmental processes that led to their modern forms, emphasizing the relationship between a culture and its physical environment.

AFAM 30775. Caribbean Diasporas

(3-0-3) Richman

This course explores the transnational orientations and the multidimensional consequences of movement from the Caribbean as it affects sites in Miami, London, Paris, or Brooklyn, as well as Havana, Jamaica, Haiti, or Belize. Reading works of ethnography, fiction, and history, questions about the construction and reconstruction of family bonds, community identity, religion, political power, and economic relations will be treated in the domestic and the global context.

AFAM 30776. Francophone Cultures of Africa and Caribbeans

(3-0-3)

This course examines the historical formation of Francophone culture in Africa and the Caribbeans. It familiarizes students with the colonial and post-colonial cultures of Africa and the Caribbeans. Readings in African and Caribbean studies, histories, literature, and sociology are utilized to emphasize similarities between the societies such as a shared colonial history. Furthermore, this course will enhance one's cross-cultural understanding and, therefore, facilitate the students' cross-cultural thinking and dialogue.

AFAM 30777. Religion, Myth, and Magic

(3-0-3)

The study of religious beliefs and practices in tribal and peasant societies emphasizing myths, ritual, symbolism, and magic as ways of explaining man's place in the universe. Concepts of purity and pollution, the sacred and the profane, and types of ritual specialists and their relationship to social structure will also be examined.

AFAM 30778. Creole Conversation

(1-0-1) Richman

This course introduces students to the vivid, sonorous language of Kreyol, or Creole, the vernacular language of Haiti, Martinique and Guadeloupe. The program is primarily designed to meet the needs of those who plan to conduct research among Haitians in Haiti, the United States or other parts of the Haitian diaspora, and for those looking to develop or improve their language skills.

AFAM 30779. African Diaspora in the Americas

(3-0-3)

This course will introduce students to black populations in different parts of Latin America and the Caribbean. Students will gain familiarity with elements of the history, social context, and culture of the particular populations covered, and, through the course's comparative scope, come to better understand race, ethnicity, culture, nation, and diaspora as concepts and as salient experiences contributing to the formation of group identities within and beyond the African diaspora. Students will also learn about different theoretical approaches to blackness and about some of the different forms of social and political activism associated with black populations. Haiti, Mexico, Brazil, and Bolivia will be among the national contexts considered in course readings and students will have opportunities to explore other contexts in accordance with their individual interests.

AFAM 31410. Topics: African-American Cinema Lab

(0-1-0)

Corequisite: AFAM 30410

During the lab times, certain films will be viewed for further discussion in class.

AFAM 33001. Civil Rights in America: Freedom Tour

(V-0-1)

This seminar exposes students to issues fundamental to the Civil Rights Movement. Through contact (in Birmingham and Atlanta) with communities, leaders, and religious institutions that shaped the ideology and development of the movement, students explore historical and current challenges in race relations and collaboration.

AFAM 33130. Historical Novels of the Black Diaspora

(3-0-3) Ursin

This course provides an introduction to contemporary literature of the black diaspora through the genre of the historical novel. We will evaluate strategies of narration, the significance of differing representations of single events, and the relationship between literature and history. Literary analysis will be supplemented by an examination of the historical and political issues central to the novels. Authors may include, but are not limited to Toni Morrison, Caryl Phillips, Edwidge Danticat, Charles Johnson and Andrea Levy. In addition, we will draw on selected critical essays, films, and documentaries. Requirements include reading quizzes, short response papers, small group presentations, a short research paper (6–8 pages), and a final exam.

AFAM 33232. Faith and the African-American Experience

(2-0-1)

Faith and the African-American Experience explores the relationship of African Americans and religious faith, broadly defined. Utilizing, in particular, the PBS film series, *This Far by Faith: African American Spiritual Journeys*, Prof. Hugh Page, associate professor of theology and dean of the First Year of Studies, will lead a class that delves into a practice that is overwhelmingly observed by African Americans. The course is marked by the design to incorporate guest facilitators from varying disciplines to lead discussion.

AFAM 33302. Faith and the African-American Experience

(1-0-1) Page

This course will introduce students to the African-American faith experience, with particular attention being given to the historical development of spiritualities of liberation in the American diaspora. Guest lecturers and seminar leaders will offer "perspectives" on this rich and heterogeneous tradition from several vantage points within the humanities, social sciences, and theological disciplines. In addition to a course pack of selected readings, the PBS series, *This Far by Faith: African American Spiritual Journeys*, and its companion volume will constitute the required "texts" for the course. There will be seven class meetings of two hours each. The course will meet on Wednesday evenings from 6:00 p.m. to 8:00 p.m. The course will begin on January 18, 2006 and conclude on March 1, 2006. Attendance at all class sessions, active participation in seminar discussions, completion of six short (i.e., 2-3 pages in length) weekly reflection papers, and a final examination are required.

AFAM 33601. Social Concerns Seminar: Environmental Justice and Human Rights in the Aftermath of Katrina

(1-0-1) Peters

Set in the wake of Hurricane Katrina, and centered on a journey to Louisiana during spring break, this Seminar explores domestic environmental issues from the perspective of minority communities that suffered due to Hurricane Katrina. Examines historical, political, and economic issues that created a culture of poverty in such areas. After defining key concepts such as environmental racism, culture of poverty, justice, and equality, students will consider specific issues of waste pollution and exposure to toxic substances emitted from chemical plants built in disadvantaged neighborhoods. Apply through the Center for Social Concerns.

AFAM 33730. Race and the History of Jim Crow Segregation

(3-0-3) Mills

This course will examine the rise of racial segregation sanctioned by law and racial custom from 1865-1965. Equally important, we will explore the multiple ways African Americans negotiated and resisted segregation in the private and public sphere. Topics will include: disfranchisement, labor and domesticity, urbanization, public space, housing, education, history and memory, and the lasting effects of sanctioned segregation. Music and film will supplement classroom discussions. This course aims toward an understanding of the work that race does, with or without laws, to order society based race, class, and gender.

AFAM 35775. Creole Language and Culture

(3-0-3)

This course introduces students to the vivid, sonorous language of Kreyol, or Haitian Creole, and to the fascinating culture of its speakers. This intensive, beginning-level course is intended for students with no knowledge of Haitian Creole.

AFAM 38090. Research in Africana Studies

(1-0-1)

Students will be provided with the opportunity to learn how to become competent scholarly researchers as well as general information seekers relating to Africana studies. An information literacy approach to obtaining and synthesizing relevant information currently available will be the underlying focus of this course. This will be accomplished by actively learning the University of Notre Dame library system's resources pertaining to a critical examination and discovery of research study in Africana studies. Students will begin to develop an understanding of research techniques from the perspective of producer and consumer.

AFAM 40101. Constituting Americans

(3-0-3)

This course will explore life writings and issues of self-representation in the African-American expressive cultural tradition from 1850 to 1905. This course is concerned with the concept of citizenship, its implied universalism, and the necessity of critiquing this universalism that maintains a unified notion of democracy.

AFAM 40102. Passing and Fictions of Race

(3-0-3)

A close analysis of how notions are "race" explored in Anglo and Anglo-Irish literature.

AFAM 40103. Women's Autobiography

(3-0-3)

A close analysis of women's life narratives and poetry, based on the following questions: How do women's narratives affirm or challenge cultural norms? How do concepts such as "high" and "low" art affect the reading of women's autobiographical literature? And can lines be drawn between fiction and nonfiction when studying autobiography?

AFAM 40104. Crossing Color Lines

(3-0-3)

This literature course explores the conflicted and contradictory ways in which racial and ethnic identities have been constructed and mediated in American culture.

AFAM 40105. African-American Poetry and Poetics

(3-0-3)

A close reading of selected African-American poets to discern what is called an "African-American" poetics.

AFAM 40106. Women of Color

(3-0-3)

A critical examination of the literature and scholarly writings about literature from "women of color" across disparate cultural backgrounds.

AFAM 40107. African-American Literature

(3-0-3) Irving

A historical and thematic account of the rise and achievement of African-American authors over several centuries.

AFAM 40108. Our America/African-American Literature

(3-0-3)

Close readings of various 20th-century African-American literatures, with foci on how "black subjectivity" is created; the relationship of literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

AFAM 40109. Writing Harlem: Race, Renaissance, and the Modern

(5-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in Harlem in the 1920s and 1930s.

AFAM 40111. African-American Poetry

(3-0-3) Eady

Close readings of selected contemporary African-American poets.

AFAM 40150. Literature of Southern Africa

(3-0-3)

A study of the literary culture of Southern Africa in the last 25 years of the 20th century, specifically the ways in which individual writers confronted the apartheid regime and their responses to the new South Africa in the post-apartheid period.

AFAM 40151. Masterpieces\Literature from Africa

(3-0-3)

This course offers an introduction to the diversity of literatures from the African continent. Readings are in English and some are translated from French, Arabic, and African languages, including several recorded from the oral tradition. Literature from different parts of Africa are composed in a variety of forms like novels, dramas, epics, and poetry.

AFAM 40175. Caribbean Voices

(3-0-3)

An introduction to the literature of Anglophone Caribbean.

AFAM 40201. Religion and Women's Rights

(3-0-3)

This course focuses on religious aspects of the women's rights movement and women's movements within religious communities. Focusing primarily on the Protestant, Catholic, and Jewish traditions, we will examine how women have understood the relationship between their religious beliefs and their interest in

expanding women's roles. From this beginning, we will explore several historical and contemporary examples of the influence of religion on the women's rights movement and, by the 20th century, the influence of the women's movement in American religion.

AFAM 40202. Jacksonian US: Politics/Society/Culture
(3-0-3) Graff

This course explores the early 19th-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–50). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and anti-slavery, changing gender roles and the rise of feminism, evangelical religion, and reform, and Native-American resistance and removal. The course will emphasize active participation by students through regular discussion and frequent writing assignments.

AFAM 40204. Culture Wars: 1960s America
(3-0-3)

America remains divided over the legacy of the 1960s. We worry about whether our President inhaled marijuana or served in Vietnam; we debate abortion and the extent of the welfare state; we continue to have serious problems with racial relations and the aftermath of the sexual revolution; and we wonder how our culture broke so clearly along religious lines. The 1960s continue to be a controversial part of America's historical memory because many of our current debates can be traced to that decade. How can we understand a time so recently in America's past that it is both the source of new freedoms and frustrations? This course will explore the nature of American society—its culture, politics, and people—through an in-depth look at the 1960s. By studying primary sources, biography, architecture, films, and the work of historians students will be able to locate and describe the basic divisions, main events, actors, and culture of 1960s, and be able to relate them to our present society. Cross-listed with American Studies 30313.

AFAM 40205. Labor Movements in Twentieth-Century US
(3-0-3)

This course explores American workers' collective efforts in their search for economic security, political power, and social and cultural autonomy from the 1890s to the near present. For the most part, this course will focus on the unions and related organizations forged by workers throughout the past century—from major umbrella groups like the American Federation of Labor, the Industrial Workers of the World, and the Congress of Industrial Organizations, to important sectoral actors like the Brotherhood of Sleeping Car Porters, the United Automobile Workers, the American Federation of Teachers, and the United Farm Workers. The central questions of the course will be when, where, and why have US workers organized collectively in the 20th century—and how successful have they been? What has been the response of employers, the government, and the public-at-large to these collective efforts of workers, and how and why have those responses changed over time? What has been the relationship between organized labor and racial and gender discrimination, as well as the causes of racial and gender equality? And how have Americans generally, and workers in particular, understood the labor movement in relation to capitalism, freedom, and democracy? Students will be expected to write several short papers, engage in regular classroom discussion, and screen several films outside of class.

AFAM 40250. Prophets/Protest in African History
(3-0-3)

This dialogue-intensive seminar focuses on men and women who led political, religious, and social movements in Africa in the 19th and 20th centuries. The Islamic Mouride brotherhood in Senegal, the Women's Wars of Nigeria, and the Mau Mau uprising in colonial Kenya will introduce students to important episodes in African history and to the intellectual debates of the field. Students are expected to read a variety of texts, participate vigorously in class discussion, make oral presentations, and complete written assignments.

AFAM 40275. Moving New Directions: African Diaspora
(3-0-3)

Migration and the emergence of new identities have defined the formation and evolution of the African diaspora in the modern era. This course is designed to introduce students of African-American studies to the concept of African diaspora and to provide a framework for understanding how it has changed over time. What constitutes the African diaspora? How was it formed? How have people of African descent forged new identities in the Atlantic World and what are the implications of identity construction for people of African descent in the future? These questions form the basis of our historical study of the African diaspora. We examine themes of migration and cultural change through comparative case studies of black communities in the United States, the Caribbean, Africa, and Latin America. The first half of the course will focus on the Atlantic slave trade, the middle passage, and slavery in the Americas. We will examine identity and culture for people of African descent in South Carolina, Louisiana, and Jamaica. The second half of the course will deal with the problem of freedom in the 19th-century Atlantic World. We will direct our attention to free black populations and Creole communities in Louisiana, Brazil, and Sierra Leone, West Africa. We will also consider the impact of emancipation at the end of the 19th-century through an examination of black American emigration movements, "back to Africa" and to the US West, and Afro-Brazilian identity in a post-emancipation society. This course will conclude with a discussion of the state of the African diaspora today and its implications for future transformations in African-American identity.

AFAM 40301. Race Relations in the US
(3-0-3)

This course focuses on race and ethnic relations in the United States. The course will begin by discussing basic concepts, issues, and theories of race and ethnic relations and stratification. We will then examine the extent of race and ethnic inequality in the United States, with some attention toward similarities and differences in the experiences of race and ethnic groups. We will discuss contemporary racial tensions in the United States and their expressions in racial attitudes, beliefs, and behaviors. Finally, the course will address remedies for race and ethnic inequality. The course requires a demanding reading load and intensive student participation in class discussions of the readings.

AFAM 40351. Christianity in Africa
(3-0-3)

Soon nearly half the world's Christians will be Africans. This course will explore the history of Christianity in Africa beginning with the early church, but with heightened attention to the more recent growth of Christianity on the continent. We will also participate in a conference held in September here at Notre Dame titled "A Call to Solidarity with Africa," organized to respond to the US Catholic Bishops' letter of the same title. Particular topics to be addressed in the class include the dynamics of missionary activity before, during, and after the colonial period; the rise of African Independent Churches; the interaction between Christianity and Islam in the past and present; and contemporary issues surrounding Christianity and the African nation-state. We will also investigate theological questions regarding the relationship between Christianity and culture. In addition to a final exam, students will write three five-page papers.

AFAM 40477. Third Cinema
(3-2-3)

Corequisite: AFAM 41477

"Third Cinema" is the terms for a wide, multicultural range of films from the Third World. The films' stylistic and thematic practices differentiate them from the Hollywood and European traditions that have dominated world cinema. We will not study these films merely as isolated masterpieces, but rather in relation to their larger cultural, historical, and theoretical contexts. To this end, the course readings will include essays concerning not only the films themselves but also the theoretical and political issues they engage: colonialism and post-colonialism, cultural, ethnic, racial, and sexual difference, and questions of otherness and multiculturalism.

AFAM 40601. Introduction to American Politics

(3-0-3)

This course surveys the basic institutions and practices of American politics. It examines the institutional and constitutional framework of American politics and identifies the key ideas needed to understand the subject and develop a basis for evaluating American politics today.

AFAM 40700. African-American Resistance

(3-0-3)

An exploration of a series of cases of African-American resistance throughout US history.

AFAM 40701. Multiculturalism

(3-0-3)

The course explores the economic, state, and national conditions of multiculturalism as a social relation and semiotic form. Seminal questions include the issues of difference deployed in debates over multiculturalism and anthropology's location in them as a study of human diversity.

AFAM 40702. Race, Ethnicity, and Power

(3-0-3)

Presents a review and discussion of social scientific research concerning the nature of race and ethnicity and their expression as social and cultural forces in the organization of multiethnic societies. The focus is multidisciplinary.

AFAM 40705. Men, Women, and Work in American History

(3-0-3) White

Why do Walmart's current advertising campaigns idealize the 'stay-at-home mom'? Conversely, why does Congress require that mothers on welfare be sent out to work? This course will introduce students to a broad view of American social history that foregrounds the gendered aspects of work and asks students to examine the meaning of work in American history from the colonial period to the 21st century. This broad historical perspective is especially crucial to the examination of the construction of current beliefs about work in the United States since changing gender ideologies dictated the work experiences of large race- and class-defined segments of the population. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies, including their work activities within the household. Male work practices will be similarly illuminated through a gender studies approach. Hence, an overarching purpose of the course will be to explore the fluidity and instability of those conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to white versus non-white, free versus enslaved, and public versus domestic activities.

AFAM 40710. Women and Work in Early America

(3-0-3)

This course will introduce students to a broad view of early American social history that foregrounds the gendered aspects of work in Early America defined loosely as the period from colonial settlement to 1820. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies of pre-Industrial early America, including their work activities within the household. This perspective is also crucial to the examination of the gendered ideologies of white, Native-American, and African servitude and/or slavery. These ideologies dictated the work experiences of large race- and class-defined segments of the population. Yet cultural retention also played a part and this course will invite students to investigate the impact of derivative work practices (for example examining African women's dominance of market activities in the New World through the lens of West-African work practices). Further, while the course title emphasizes women's experiences, the class and race implications of male work practices in early America will be similarly illuminated by a gender studies approach. Thus, an overarching purpose of the course will be to highlight the fluid and instable concepts of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to European versus non-European, free versus enslaved, and public versus private spheres.

AFAM 40778. Society and Culture through Films

(3-0-3)

This course will deal with a variety of social issues as they are perceived, conceptualized, represented, and understood by the movies. The focus of this course will not be on the cinema history, cinema structure, or movie-making processes, but on how important human problems such as cultural diversity, race relations, the crafting of national identity and national heroes, urban life, class conflict, family structure, war, and some ideological values such as success, love happiness, fairness, misfortune, destiny, honesty, faith, and the like are depicted and treated by the movies.

AFAM 40779. Human Rights in Latin America

(3-0-3)

This course takes the concept of international human rights as the framework to explore contemporary cultural, economic, and political debates about identity, culture, and society in Latin America. We will review the civil and political rights, the social and economic rights, and the indigenous people's rights of the International Declaration of Human Rights through ethnographic case studies. For example, we will explore freedom of speech in Chile and review the report of the findings of the Truth Commission; indigenous people's rights in Colombia and learn about the Afro-Colombian movements for ancestral lands; and social and economic rights in Guatemala and current efforts to implement socio-economic recommendations of the Commission for Historical Clarification. In each area, we will specifically address the role of anthropology, the American Anthropological Association's human rights declaration, and the unique contribution anthropologists can make to international efforts to understand human rights.

AFAM 41477. Third Cinema Lab

(0-0-0)

Corequisite: AFAM 40477

During the lab times, certain films will be viewed for further discussion in class.

AFAM 43075. Social Concerns Seminar: Gullah People

(1-0-1) Miller McGraw

This seminar will examine the rich history and culture of the Gullah people, many of whom are descendants of slaves brought over from West Africa. Because of their geographic isolation, the Gullah people have been able to retain more of their African heritage than other African Americans. Through service and cultural opportunities, participants will learn about the rich history and culture of the Gullah people as well as learn about current pressures facing the residents of the Sea Islands.

AFAM 43201. Harlem Renaissance: History and Culture

(3-0-3)

This course focuses on the broad questions that have emerged as a part of the contemporary study of the Harlem Renaissance. How did the phenomenal array of black cultural production from literature to music emerge within this section of New York City? To what degree did the Great Migration, religion, and politics influence this creativity? And how do we understand the impact of the Renaissance on African-American culture outside of New York? Discussion begins with the many works written directly about Harlem in the 1920s as well as those materials on broader African-American life that emerged from Harlem in the 1930s and early '40s. Further, while exploring the question of black Harlem and its cultural vitality, we will also deal with the interplay of white and black American artists within the New York setting. Readings include many of the traditional writers from James Weldon Johnson to Claude McKay to Zora Neale Hurston, in addition to later writers who made Harlem their focus, such as James Baldwin. To best understand the context of these works, we will discuss histories of African Americans in Harlem and New York City, as well as theoretical work on the making of black cultural expression within urban life.

AFAM 43202. Race, Gender, and Women of Color

(3-0-3) Ardizzone

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the US. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How

have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

AFAM 43204. Immigration, Ethnicity, Race in the US
(3-0-3)

Examining monographs, novels, film, photography, poetry, government records, and court cases, we will explore a variety of immigrant groups and time periods—from the Irish of the mid-19th century to Jamaicans, Mexicans, and the Vietnamese today. We will focus on questions of identity—how immigrants have come to understand themselves racially and ethnically over time—and questions of power—where immigrants have been located within America’s developing racial order and what difference this has made in their everyday lives—their jobs, homes, families, and opportunities.

AFAM 43205. Whiteness Studies
(3-0-3)

Over the last decade, “whiteness studies” has been all the rage in academic disciplines as diverse as law and literature, anthropology and art. This course will be a high-level introduction to and critical appraisal of this burgeoning literature—particularly as it relates to American studies. We will examine some of its key texts from its earliest roots among African-American scholars, to its more recent incarnations in US history, literary criticism, critical race and legal studies, sociology, anthropology, and more. We will also examine recent attempts—both scholarly and popular—to make sense of this literature. Along the way, we will focus on the following key questions: What is “whiteness studies”? Where did it come from? What is it so popular now? What are some of its contributions and limitations? What is its future?

AFAM 43701. Psychology of Race: Examining Racial and Ethnic Identity Development
(3-0-3) Burrow

The purpose of this course is to examine the psychological aspects of racial and ethnic identity development in the United States. This course will look at the general ideas of identity development from a psychological basis as well as the personal identities of American groups. The main course objectives are to increase students’ cultural awareness of their own and others’ racial and ethnic identities; to develop relevant knowledge of about identity constructs in understanding different populations; and to develop critical thinking skills in studying and evaluating research on the role of racial and ethnic identity development in psychological processes and human behavior.

AFAM 43702. The Social World and Adolescents’ Achievements
(3-0-3)

This course examines the impact of the social world on the educational performances of adolescents. The relationship between social contexts, such as the family, neighborhood, school, peer network, and religion, and adolescent achievement will be explored. Theoretical and empirical research on the impact of these social contexts will also be explored. Finally, how all the contexts work simultaneously to influence the educational performance of adolescents will be discussed.

AFAM 43703. Theoretical Criminology
(3-0-3)

This course will introduce you to theoretical interpretations of criminal behavior, empirical research on crime in diverse contexts, and policy debates on crime control and punishment. Our intent will be to raise critical questions and to challenge commonly held views about the nature of crime and punishment in the United States today. As students of sociology, we will operate under the assumption that crime and punishment are social phenomena; they can only be understood by analyzing their relationship to the broader social, political, and cultural context in which they exist. We shall explore a variety of theoretical perspectives, both classical and contemporary, that attempt to uncover the causes, etiology, and solutions of the problem of criminal behavior. This class cannot be taken if the student has previously taken SOC 30732 because of content overlap.

AFAM 43704. Ethnicity in America
(3-0-3) Chrobot

A study of the dynamic process of formation and development of the society of the United States and its cultural, religious, and racial pluralism; a review of the history and theory of interethnic relations, and their manifestation in the basic institutions of family, education, religion, economics, and government.

AFAM 43705. Social Demography of US Minorities
(3-0-3)

The intent of this demography course is to familiarize students with basic statistical methods and techniques that are applied to the study of population data. The course will offer students an opportunity to gain “hands-on” experience with manipulating quantitative data and generating results. The backdrop for the class is ethnic status. Because we will have access to social data for major ethnic categories (e.g., white, African American, Hispanic, Asian, and Native American), one of the byproducts of learning the methods and techniques of demographic analysis will be a comparative study of ethnic groups across several social dimensions.

The first topic will be population growth. This will include discussions about birth rates, mortality rates, immigration, emigration, and how to generate population estimates. Another topic will be a broader discussion of rates that will distinguish incidence rates from prevalence rates, and show how they are applied to generate indicators of health, crime, school enrollment, service usage, and other social statistics. A review of direct and indirect standardization techniques, plus a review of how to analyze changing rates, will follow this discussion. Most rate changes can be attributable to either change in behaviors or population, or changes in both. How you decompose crude differences into their component parts is an essential step in understanding the dynamics of social phenomenon. This will be followed by a review of how we collect and study such social attainments as education, occupation, and income. Here we will examine issues of measurement (e.g., do we count years of attendance or credential earned) and various ways to generate difference measure (e.g., Gini index, index of dissimilarity, mean differences). This discussion will also include ways to decompose observed differences and generate hypothetical estimates of attainment via regression and discrete Markov processes. The final area to be reviewed will be the spatial distribution of residences in specified geographic locals. The major issues of discussion will be the heterogeneity or homogeneity of neighborhoods with regard to family income, educational background, ethnicity, or immigrant status.

AFAM 45100. Senior Internship
(V-0-3)

A capstone of the AFAM supplementary major is the senior project, which may be either a senior internship or senior thesis. Either option provides seniors with an opportunity to reflect upon the larger implications of their course work and, should they desire, to incorporate a service-learning component. A written proposal describing the intended internship must be submitted to the AFAM director for formal approval. If accepted, the student will be assigned a supervisor/advisor and required to write a 10–15 page project summation. The final version of the senior project is due at the end of the term. An oral presentation on the senior project must also be made to the director and advisory committee during the week of final examinations in order to complete degree requirements.

AFAM 46100. Directed Readings
(1-0-3)

This is a specialized opportunity for a student to design a readings course with a professor on a specific topic of academic interest. A research paper is required at the end of the semester. The professor directing the readings will establish lectures and other meeting arrangements.

AFAM 47701. Subversive Culture/Social Protest
(3-0-3)

The course will explore anti-structures of society using anthropological perspectives and analyze forms of creative resistance and social protest in art, performance, literature, and popular culture, using case studies from various cultures around the world.

AFAM 48100. AFAM Thesis

(V-0-V)

A capstone of the AFAM supplementary major is the senior project, which may be either a senior internship or senior thesis. Either option provides seniors with an opportunity to reflect upon the larger implications of their course work and, should they desire, to incorporate a service-learning component. A written proposal describing the intended thesis must be submitted to the AFAM director for formal approval. If accepted, the student will be assigned a supervisor/advisor and required to write a 30- to 40- page paper for the senior thesis. The final version of the senior project is due at the end of the term. An oral presentation on the senior project must also be made to the director and advisory committee during the week of final examinations in order to complete degree requirements.

Arts and Letters (Nondepartmental)

AL 23001. Professional Development Seminar

(1-0-1) Rees

Career development is a lifelong process involving self-assessment, exploration, and career management techniques. Designed for seniors, the seminar allows students to explore oneself and develop skills they will use as they transition from the undergraduate experience. Topics include assessing your preferences, values, and skills; career exploration; the art of being new; managing expectations in the workplace; managing ambiguity; ethics in the workplace; professional etiquette; and business communication

AL 23002. Career Development Seminar

(1-0-1) Kopec

This introductory and experiential seminar is designed to meet the career development needs of first-year, sophomore, and junior students interested in self-assessment, career exploration, career decision making, and conducting an effective internship search. Topics include self-assessment inventories; internships search; résumé and cover letter writing; career trends; alumni networking; informational interviewing; developing an action plan; interviewing skills; and career research.

AL 23101. Philosophy/Literature Colloquium

(1-0-1) O'Connor

A colloquium devoted to the critical reading of one or two major works, which builds on the esprit de corps and intellectual common ground established in the "Studies in Literature and Philosophy" core course for the minor.

AL 25001. Internship

(0-0-V)

For internships taken during the regular semester. Credit toward graduation for up to two internships are available for arts and letters students upon approval by a dean in the Office for Undergraduate Studies. Students are required to provide a goals and objectives statement and to obtain a letter of offer for the internship in advance of beginning the internship; to keep a daily journal over the course of the internship; to have a letter of evaluation provided upon completion of duties; and to write a reflection paper.

AL 25002. Internship: Reflection

(0-0-V)

For internships taken prior to the semester of registration for the internship. Credit toward graduation for up to two internships are available for arts and letters students upon approval by a dean in the Office for Undergraduate Studies. Students are required to provide a goals and objectives statement and to obtain a letter of offer for the internship in advance of beginning the internship; to keep a daily journal over the course of the internship; to have a letter of evaluation provided upon completion of duties; and to write a reflection paper.

AL 25003. Internship: Social Entrepreneurship

(0-0-3)

An internship specially designed for and available only to students who are in the International Studies exchange program with PUC in Brazil.

AL 25004. Internship Business Practices

(V-0-V)

The purpose of this course is to combine three areas of knowledge and experience, then present them in an academic format, following a summer internship opportunity. The course is designed for arts and letters students who have secured an internship opportunity that is congruent to their respective majors. Students must meet with the program coordinator before starting the internship. (Up to two three-credit internships apply toward graduation.)

AL 27001. Visiting Scholar Studies

(0-0-0)

A zero-credit course for students engaged in independent research or working with a faculty member or a member of the University staff on a special project. Registration requires a brief description of the research or project to be pursued and the permission of the director of the Summer Session.

AL 37001. Special Studies

(V-0-V)

Special Studies offers students the opportunity to pursue an independent reading or research project under the direction of a faculty member. The subject matter must not be duplicated in the regular curriculum.

AL 43001. Interviewing Technique Practicum

(3-0-1) Flynn

This course is designed for seniors, acting as peer advisors, to meet with first-year students in an attempt to determine how the students are adjusting and progressing. These meetings enable first-year students to engage in discussions with reliable and informed upper-class students. The peer advisors try to identify problems, provide information, and exchange knowledge on matters pertaining to academics, study habits, campus life, and dormitory activities while gaining experience with interview skills.

AL 43101. PPE Colloquium

(1-0-1) Roos

A required colloquium devoted to the critical reading and discussion of one or two major works normally taken in the three semesters following the Justice Seminar.

AL 43102. PPE Colloquium

(1-0-1) Goerner

A one credit colloquium required for the PPE minor devoted to the critical reading and discussion of one or two major works, normally taken each semester for three semesters following the Justice Seminar for a total of three credits.

AL 48001. Area Studies Essay: Africa

(0-0-3)

A research course for the capstone essay for the minor in African studies. May not be double-counted for thesis credit in a major.

AL 48002. Area Studies Essay: Asia

(0-0-3)

A research course for the capstone essay for the minor in Asian studies. May not be double-counted for thesis credit in a major.

AL 48003. Area Studies Essay: Latin America

(0-0-3)

A research course for the capstone essay for the minor in Latin American studies. May not be double-counted for thesis credit in a major.

AL 48004. Area Studies Essay: Russia and East Europe

(0-0-3)

A research course for the capstone essay for the minor in Russian and East European studies. May not be double-counted for thesis credit in a major.

AL 48005. Area Studies Essay: Mediterranean Middle East

(0-0-3)

A research course for the capstone essay for the minor in Mediterranean/Middle Eastern studies. May not be double-counted for thesis credit in a major.

AL 48006. Area Studies Essay: Irish

(0-0-3)

A research course for the capstone essay for the minor in Irish studies. May not be double-counted for thesis credit in a major.

AL 48007. Area Studies Essay: Europe

(0-0-3)

A research course for the capstone essay for the minor in European studies. May not be double-counted for thesis credit in a major.

ALHN 13950. Honors Seminar

(3-0-3)

This is a year-long, writing intensive humanities seminar involving challenging cross-disciplinary readings running from ancient Greece to yesterday. There is an emphasis on critical thinking and informed constructive discussion.

ALHN 13951. Honors Seminar

(3-0-3)

Prerequisite: ALHN 13950 OR ALHN 195

This is a year-long, writing intensive humanities seminar involving challenging cross-disciplinary readings running from ancient Greece to yesterday. There is an emphasis on critical thinking and informed constructive discussion.

ALHN 43950. Senior Honor Thesis Colloquium

(1-0-1) Delaney, Hahn

Prerequisite: ALHN 13950 OR ALHN 195

This is a one-credit seminar consisting of presentations of ongoing thesis research as a spur to the successful completion of the senior thesis or research project.

ALHN 43951. Senior Honors Colloquium

(1-0-1) Delaney, Hahn

Prerequisite: ALHN 13950 OR ALHN 195

This is a discussion course on selected reading materials.

ALHN 46980. Directed Reading

(0-0-3)

Directed reading honors program senior thesis

ALHN 48980. Senior Honors Thesis

(0-0-3)

Prerequisite: ALHN 13950 OR ALHN 195

The capstone requirement for the arts and letters honors students is a substantive, two-semester thesis to be completed in April. This project is accorded three credits in the fall for the completion of a rough draft and three credits in the spring for the polished finished project.

CSEM 23101. College Seminar

(3-0-3)

The college seminar is a unique, one-semester course experience shared by all sophomores majoring in the College of Arts and Letters. The course offers students an introduction to the diversity and distinctive focus of arts and letters at the University of Notre Dame. Specific sections of the college seminar vary in their topics and texts (i.e., there will not be a shared reading list across sections), but all feature an interdisciplinary approach, commitment to engaging important questions, employment of major works, and emphasis on the development of oral skills. Every college seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the college: the arts, humanities, and social sciences.

CSEM 23102. College Seminar

(3-0-3)

The College Seminar is a unique, one-semester course experience shared by all sophomores majoring in the College of Arts and Letters. The course offers students an introduction to the diversity and distinctive focus of arts and letters at the University of Notre Dame. Specific sections of the college seminar vary in their topics and texts (i.e., there will not be a shared reading list across sections), but all feature an interdisciplinary approach, commitment to engaging important questions, employment of major works, and emphasis on the development of oral skills. Every college seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the College: the arts, humanities, and social sciences.

Department of American Studies

AMST 13101. History University Seminar

(3-0-3)

This course provides a social and cultural history of American domestic responses to war and threats of war throughout the 10th century and into the 21st. Scheduled readings will include historical scholarship, primary documents, media, and popular culture, personal narratives, and fiction. Our discussions and writings will focus on five periods: WWI, WWII, Cold War, Vietnam, and the Gulf War. Issues covered include meanings of patriotism, pacifist movements, and challenges to American military activities; perceptions of soldiers; images of the enemy and their impact on Americans identified with national enemies; the role of media in influencing public perception of war; and war memoirs. Throughout, we will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience.

AMST 13120. American Culture and Community

(3-0-3)

Freshman seminar in American culture and community.

AMST 13186. Metropolitan Consciousness and Modern American Identity

(3-0-3) Meissner

Henry James once remarked that Americans “are the only great people of the civilized world that is a pure democracy, and we are the only great people that is exclusively commercial.” For James, New York City defined the spot where everything modern and distinctly “American,” everything about money and about politics, everything about the individual and about society came together as a formed, physical identity for good and bad. These tensions are endemic to the notion of the city itself. For many, cities such as New York and Chicago were places to despise, places of suspicion, of immigration, of ethnicity, places that were distinctly un-American and that challenged America’s conception of itself as a country founded upon and guided by rural principles. But the democracy and commerce James identified as specifically American is a combination that depends upon the city in all its variegated senses. Using James’s comment as a beginning, this course will examine the relationship between the development of the American city and the emergence of a metropolitan consciousness. The course will be thematically driven and will focus on the roles of money, democracy, culture, and politics and will examine how these forces coalesced through the process of urbanization and became embedded in the distinctively modern American identity. While the bulk of the course will deal with the late 19th and early 20th century, we will look back to the country’s early urban development and forward to its most recent urban metamorphoses.

AMST 20101. American Political Life

(3-0-3) Schmuhl

An introductory and interdisciplinary examination of American political culture, particularly contemporary political thought and behavior. Although we will trace the development of our political culture from the nation’s beginning to the present, a principal concern of the class will be the involvement of the mass media in recent political history. In short, we will attempt to come to terms with questions about the role and influence of mass communications in modern politics.

AMST 20102. Visual America I: Art, History, Culture

(3-0-3) Schlereth

A course that provides an introduction, for prospective majors and electors, to the theory and methods of American studies scholarship by using several types of visual culture—landscape painting, portraiture, public sculpture, domestic architecture, and genre painting—as historical evidence. A sequel course, Visual America II, interpreting different visual culture, will be offered in the spring semester. The course has two basic purposes. First, to introduce students to the various methods scholars have developed to use visual evidence in cultural history research; second, to provide students with a content course in United States cultural history, one where they receive an overview of the various roles that the art forms noted above have played in American life, 1700–1950. Students prepare and submit three types of written cultural history research: (1) a historical inter-

pretation of an American master art work; (2) a critical review of an American art museum exhibition; and (3) an interdisciplinary, interpretative visual portfolio analyzing a major figure, event, or theme in American visual history. Two examinations, a midterm, and a final, are also required. An online visual archive, containing all the graphic evidence and research methods used throughout the course will be always accessible to students for preclass preparations, research and writing projects, and preexamination review. Fieldwork class meetings will be held at the Native American Galley (Snite Museum), W. Washington Historical District (South Bend), and the American Art Gallery (Snite Museum).

AMST 20103. American Men, American Women

(3-0-3) Ardizzone

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie westerns, ’50s television families, and ’60s youth culture; and into recent shifts with women’s rights, extreme sports, and talk shows.

AMST 20105. Visual America II

(3-0-3) Schlereth

An introductory course, offered as a sequel to Visual America I (AMST 20201), that will explore dimensions of several types of visual expression—popular photography, cartography, genre and historical painting, chromolithography, and the commercial and graphic arts—in American cultural history from Louis Daguerre’s development of photography in 1839 to the public exhibition of television at the 1939 New York World’s Fair.

AMST 20107. American Art: History, Identity, Culture

(3-0-3)

Introductory and historical overview of the role that arts—architecture, painting, and sculpture—played in American cultural history, 1640–1940. In addition to surveying major high-style trends, attention is given to selected regional, folk, and vernacular artistic traditions. Basically a lecture-format course in which students prepare two short papers, research and assemble a 15-page visual portfolio, and take two exams: a midterm and a final.

AMST 20109. The Millionaire in American Literature and Culture

(3-0-3)

Few figures in American history have so defined the nation as the millionaire. For good or bad, the millionaire has been an object of equally intense scrutiny and fascination. This course will examine the role of the millionaire in fiction by writers such as Wharton, James, and Fitzgerald. We will also look at the millionaire as savior and agent of corruption in children’s literature by writers such as Margaret Sidney and Louisa May Alcott. In looking at the millionaire historically, we will devote special attention to the Gilded Age with its “robber barons” such as Andrew Carnegie, Cornelius Vanderbilt, and Henry Ford, figures whose industry and greed also fueled the establishment of vast charitable enterprises that helped define American culture. In politics we will pay special attention to Theodore Roosevelt, who harbored a deep suspicion of inherited wealth and questioned whether or not the “virtuous republic” could sustain the presence and efforts of so many men of “inherited wealth.” And in contemporary society, we will try to understand how the celebrity millionaire, i.e., Donald Trump, Paris Hilton, or Ivan Boesky, has become a celebrated cultural icon.

AMST 20200. Twentieth-Century Irish and Native American Literature

(3-0-3) Dougherty-McMichael

From the outset of colonization in both Ireland and North America, literature was employed in similar fashion to romanticize, demonize and, more often than not, silence Irish and Native American cultures. Today, with the surge in post-colonial literatures, Irish and Native American literatures have found new voices that look to the past in order to explore the present. Instead of romanticizing cultural memories, these authors subvert and challenge heroic representations while dispelling stereotypes. Together these separate literary traditions intersect and diverge, challenging accepted perspectives of history and culture while blending

stories with oral tradition, popular history, and pop culture. With these intersections in mind, we will explore an array of literature from both Irish and Native American traditions, from novels to poetry to film. We will look at a variety of authors including Flann O'Brien, Nuala Ni Dhomhnaill, Eilís Ni Dhuibhne, Leslie Marmon Silko, Sherman Alexie, and Simon Ortiz. Requirements include a midterm exam, one short paper (3–5 pages), one longer paper (8–10 pages), and a presentation.

AMST 20201. Religious Imagination in American Literature

(3-0-3) Werge

A consideration of the forms, ideas, and preoccupations of the religious imagination in literature and of the historical relationships between religious faith and traditions and particular literary works.

AMST 20202. Food and Consumption in North American Literature

(3-0-3) Lee

An exploration of the literary world of eating, food, and food culture through a long chronological span of American and Mexican writing, over a wide range of genres.

AMST 20203. Stories of New America

(3-0-3) Rodriguez

A survey of selected 19th- and 20th-century Latino/a American writings.

AMST 30100. Fundamentals of Journalism

(3-0-3)

What is news? What are the most effective ways of presenting news to the public? What ethical decisions are involved in gathering and reporting news? These are a few of the questions addressed in this course.

AMST 30101. Introduction to Broadcast Journalism

(3-0-3)

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, and antinuclear movements; cold war politics and fears of American communism; and debates over the draft, just war, racism at home, and US policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

AMST 30104. *The American Scene*

(3-0-3) Meissner

"To make much so much money that you won't, that you don't mind, don't mind anything that is absolutely, I think, the main American formula." Henry James, *The American Scene*, 1907. "Greed, for lack of a better word, is good, is right, it works, and it will save that malfunctioning corporation called the USA.", Gordon Gecko, *Wall Street*, 1987. After a 20-year absence, Henry James returns to America to examine the country of his birth. His tour brought him to the above quote and dismaying conclusion. This course tries to contextualize and understand James's remark by placing it within a broader atmosphere of late 19th- and early 20th-century American culture. We will look at works that predate, are contemporary with, and follow James's American tour. We will look at works of literature and biography, of politics and philosophy, and of theology and economics. Throughout, we will keep circling around and back to James's notion of "The Main American Formula" and asking not only what exactly he meant, but how other major thinkers of the age understood or conceived of an "American Formula," and how that "formula" could be measured at the level of the individual, the corporation, the country, and, with Conrad's *Nostromo*, the world. Readings will include works of Joseph Conrad, Theodore Dreissner, Henry Ford, Henry James, Theodore Roosevelt, Thorstein Veblen, and Edith Wharton. In addition, we will view several movies, the focus of which is directly related to the course's central questions.

AMST 30107. World War II America: History and Memory

(3-0-3)

Exploring a wide range of primary and secondary sources from the 1940s and today (e.g., novels, films, ads, posters, poetry, art, museum exhibitions, and memorials), this course will examine the history of America's World War II experience and how this history is remembered and memorialized today. Areas of study will include D-Day and Pearl Harbor; the bombing of Hiroshima and Nagasaki; the Holocaust; the emerging African-American and Mexican-American civil rights movements; the Americanization of European immigrants; Japanese-American internment and redress; and "Rosie the Riveter" and other women's experiences as paid workers.

AMST 30108. American Social Movements

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black civil rights movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

AMST 30109. News in American Life

(3-0-3) Storin

This course seeks to promote an understanding of modern media by examining the goals and motivations of newsmakers, the power of instant information, the future of news delivery, and an examination of how the traditional principles of fairness, privacy, and ethics are treated. Students will read several books and newspaper articles dealing with the history and the business of the media, and will use daily newspapers throughout the course.

AMST 30112. Witnessing the Sixties

(3-0-3)

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the sixties, on the one hand, and on the other to explore the various journalistic and aesthetic representations of events, movements, and transformations. We will focus on the manner in which each writer or artist witnessed the sixties and explore fresh styles of writing and cultural expression, such as the new journalism popularized by Tom Wolfe and the music/lyrics performed by Bob Dylan. Major topics for consideration include the counterculture and the movement—a combination of civil rights and antiwar protest.

AMST 30113. American Identities

(3-0-3)

Prerequisite: (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A) OR (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A)

This course surveys the development of American culture and society by examining constructs of identity. The course explores such questions as: What is a nation? How is national identity determined? What constitutes American identity, and how has it changed over time? Who has been included and excluded from full citizenship in the past, and why? How do multicultural societies reconcile national and group identities? Where is the United States headed as a society? The course adopts historical and sociological approaches to examine such topics as the creation of national consciousness; Manifest Destiny and "the mission of America"; sectionalism and the Civil War; the West as a region; problems of immigration and citizenship; American identity and foreign policy; the struggle for civil rights and minority identities in the United States; recent multiculturalism issues; and "Americanization" and the globalization of culture. Course format includes lectures, discussion, and screenings of feature and documentary film segments. Materials cover a wide range of visual and print media.

AMST 30115. Visual America I

(3-0-3)

The course has two objectives: First, to introduce students to the various methods scholars have developed to use visual evidence in cultural history research; and second, to provide students with a content course in United States history, one where they receive an overview of the various roles that the art forms noted

above have played in 19th- and 20th-century American life. Iconographic analysis—the uncovering of past and present, conflicting and paradoxical layers of cultural meanings within an image or assemblage of images—will be an important part of the course.

AMST 30117. Representations of Urban Life: Slums and Mansions in American Literature

(3-0-3)

This course will begin with a children's tale from the 1880s, "Five Little Peppers and How They Grew," and examine how urban life has been depicted in American literature and culture.

AMST 30118. The Craft of Journalism

(3-0-3) Schmuhl

This class will focus on how print and broadcast journalists work—how they think and act as well as the dilemmas they face in delivering news, analysis, and commentary. Several sessions will be devoted to presentations by visiting correspondents, editors, and producers, explaining their approaches to specific stories and circumstances. In addition, students will discuss the issues and questions raised in a few books.

AMST 30119. Perspectives on Nature and Environment in America

(3-0-3) Doppke

Throughout American history, those who took a hand to alter nature—or raised one to preserve it—have rarely been concerned exclusively with the continent's ecosystems. Rather, they saw themselves as advancing lofty ideals, such as progress or freedom. After a general introduction to American environmental history, this course examines how 19th- and 20th-century American explorers, activists, and writers have understood our alterations to landscape and river, and what the stakes are for modern environmentalists who seek to preserve what wilderness remains.

AMST 30125. Faith and the African-American Experience

(1-0-1) Page

This course will introduce students to the African-American faith experience, with particular attention being given to the historical development of spiritualities of liberation in the American diaspora. Guest lecturers and seminar leaders will offer "perspectives" on this rich and heterogeneous tradition from several vantage points within the humanities, social sciences, and theological disciplines. In addition to a course pack of selected readings, the PBS series *This Far by Faith: African American Spiritual Journeys*, and its companion volume will constitute the required texts for the course. There will be seven class meetings of two hours each. The course will meet on Wednesday evenings from 6:00 p.m. to 8:00 p.m. The course will begin on January 18, 2006 and conclude on March 1, 2006. Attendance at all class sessions, active participation in seminar discussions, completion of six short (i.e., 2–3 pages in length) weekly reflection papers, and a final examination are required.

AMST 30126. Race and the History of Jim Crow Segregation

(3-0-3) Mills

This course will examine the rise of racial segregation sanctioned by law and racial custom from 1865 to 1965. Equally important, we will explore the multiple ways African Americans negotiated and resisted segregation in the private and public sphere. Topics will include disfranchisement, labor and domesticity, urbanization, public space, housing, education, history and memory, and the lasting effects of sanctioned segregation. Music and film will supplement classroom discussions. This course aims toward an understanding of the work that race does, with or without laws, to order society based on race, class, and gender.

AMST 30127. Race, Class, and Nation in the Black Intellectual Tradition

(3-0-3) Tillery

This course will be a survey of the way black political and social thinkers—from David Walker to Derrick Bell—have theorized these concepts and their relevance for black life in America. In short, the course asks the questions: (1) Is there a unified black intellectual tradition on these questions? (2) How has black thought on the questions differed from mainstream intellectual currents?

AMST 30128. Research in Africana Studies

(1-0-1) Morgan

Students will be provided with the opportunity to learn how to become competent scholarly researchers as well as general information seekers relating to Africana studies. An information literacy approach to obtaining and synthesizing relevant information currently available will be the underlying focus of this course. This will be accomplished by actively learning the University of Notre Dame library system's resources pertaining to a critical examination and discovery of research study in Africana studies. Students will begin to develop an understanding of research techniques from the perspective of producer and consumer.

AMST 30129. Asian-American Literature

(3-0-3) Valenzuela

This course will explore the development of Asian-American literature from the 1800s to the present, focusing on writers of Chinese, Filipino, Indian, Hmong, Japanese, and Korean descent. Discussions will focus on questions of race/ethnicity, identity/representation, nation, and exile. Primary texts, including novels, short fiction, poetry, theory, and film will be supplemented by critical articles. Some works to be discussed will include Carlos Bulosan's *America is in the Heart*, Jessica Hagedorn's *Dogeaters*, Maxine Hong Kingston's *The Woman Warrior*, Faye Ng's *BONE*, and John Okada's *No-No Boy*, in addition to other texts.

AMST 30132. Men, Women, and Work in American History

(3-0-3) White

Why do Walmart's current advertising campaigns idealize the "stay-at-home mom?" Conversely, why does Congress require that mothers on welfare be sent out to work? This course will introduce students to a broad view of American social history that foregrounds the gendered aspects of work and asks students to examine the meaning of work in American history from the colonial period to the 21st century. This broad historical perspective is especially crucial to the examination of the construction of current beliefs about work in the United States since changing gender ideologies dictated the work experiences of large race- and class-defined segments of the population. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies, including their work activities within the household. Male work practices will be similarly illuminated through a gender studies approach. Hence, an overarching purpose of the course will be to explore the fluidity and instability of those conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to white versus non-white, free versus enslaved, and public versus domestic activities.

AMST 30200. Literary Outsiders

(3-0-3)

A close study of the motif of the outsider, in his and her various guises, primarily from literary but also philosophical, sociological, and psychological perspectives, with the goals of identifying what historical literary spaces outsiders inhabit and whether these spaces are still available to literary expression in the 21st century.

AMST 30201. American Women Writers to 1930

(3-0-3)

A close reading of "major" and "minor" American women writers of the 18th, 19th, and early 20th centuries.

AMST 30202. Latino Poetry

(3-0-3)

This course will focus on several prominent contemporary Latino poets whose work has enriched and diversified the canon of American poetry in the last 20 years. Among them are such established and acclaimed authors as Gary Soto, Lorna Dee Cervantes, Pat Mora, Martín Espada, and Victor Hernández Cruz. Because Latinos are not homogeneous, emphasis will be given to these poets' diverse ethnic and cultural origins. In this regard, one important component of the course is the various ways that Latino poets respond to the spiritual and the sacred. Other topics to be discussed include social justice, the family, identity (in its multiple forms), and, of course, poetics. Readings will be assigned in individual poetry collections and in one anthology.

Assignments include group presentations, response papers, three short academic papers, and regular attendance.

AMST 30203. The City in American Literature

(3-0-3)

Literary representations of the city and social identity in American texts from the 1890s to the present, including Riis, Dreiser, Wharton, Sinclair, Yeziarska, Wright, Paley, and Cisneros, as well as contemporaneous nonfiction and films.

AMST 30204. Latin American Images of the US

(3-0-3)

Drawing upon a wide variety of sources—novels, essays, poems, travel literature, social science texts, film, art, etc.—a survey of Latin American views of North American society, customs, politics, and individual character, with a particular emphasis on United States interventionism.

AMST 30205. Harlem Renaissance

(3-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in the '20s and early '30s and the writers it fostered: Hughes, Hurston, Toomer, Redmon Fauset, Larson, and Thurman.

AMST 30206. Icons and Action Figures in Latino/a Literature

(3-0-3)

Understanding US Latino/Latina literature, art, and film through its many allusions to and reinterpretations of traditional icons and historic figures as well as legends, myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/Latina, African, Asian, and European cultures).

AMST 30207. Readings in American Novel

(3-0-3)

Novels from Hawthorne to Morrison.

AMST 30208. American Literature: Varieties of Religious Experience

(3-0-3)

Many American authors are skeptical toward religion, yet they are, nonetheless, preoccupied with the religious experience. This course explores the relationship between these attitudes in American literature.

AMST 30209. Women in the Americas

(3-0-3)

A study of short stories and novellas written in the last half of the 20th century.

AMST 30210. African-American Migration Narratives

(3-0-3)

This course will explore life writings and issues of self-representation in the African-American expressive cultural tradition in the 19th and 20th centuries. We will pay special attention to questions of gender, audience, authenticity, and competing feminist and nationalist ideologies. How do we define freedom, and what role do art and culture play? What does it mean to be a black intellectual? Can aesthetics stand in for activism? What does it mean to be a race champion? Is feminism relevant for black women in America? To what extent is self-fashioning synonymous with public responsibility? These are a few of the questions that will drive the semester.

AMST 30211. Latino/Latina American Literature

(3-0-3)

Studies of Latino and Latina authors, including Chicano, Caribbean, or South American.

AMST 30212. Twentieth-Century Ethnic American Novels

(3-0-3)

In this class we will explore several ethnic American novels by focusing on the theme of memory, specifically on the ways in which remembering one's own or one's ancestors' past becomes part of one's self-identification as an ethnic American. Since the ties between past and present are rarely straightforward, remembering one's family history is often a painful, haunting experience. Yet facing the ghosts of one's past can be a liberating process, too, allowing for self-invention. The question of memory will also highlight how the promises of the "American dream" continue to be problematic for immigrants. What does it mean to become American? Can one be fully free in the "land of freedom"?

Readings will include: F. Scott Fitzgerald, *The Great Gatsby*; Anzia Yeziarska, *Bread Givers*; James T. Farrell, *Young Lonigan*; John Okada, *No-No Boy*; Toni Morrison, *Beloved*; Art Spiegelman, *Maus I* and *Maus II*; Maxine Hong Kingston, *The Woman Warrior*; Louise Erdrich, *Love Medicine*; and Julia Alvarez, *How the Garcia Girls Lost Their Accents*.

Requirements: Regular attendance and participation, group presentation, several response papers, one final (5-page) paper, and a final exam.

AMST 30213. Introduction to Post-Colonial Literature

(3-0-3)

Traces the development of literatures from the former colonies of various empires, but principally the British and French. An essential concern of the materials is how individual identities or (neo)national subjectivities remain continually in a state of formation. Major regions include Africa, India, the Caribbean, and Southeast Asia. Authors may include Chinua Achebe, Mariama Ba, Buchi Emecheta, Anita Desai, Bessie Head, George Lamming, Salman Rushdie, Wole Soyinka, Vikram Chandra, and Derek Walcott among others. Theorists include Frantz Fanon, Edward Said, Gayatri Spivak, and Ngugi wa Thiong'o.

AMST 30214. Early Modern American Fiction

(3-0-3)

This course explores literature written between the Civil War and World War II. This is, of course, a dynamic century of American (not to mention world) history; the result is an equally dynamic century of American fiction. Our course will examine how this fiction shows the impact of economic and technological transformations on religious beliefs, conceptions of human identity, work environments (and men's and women's places in them), etc. We will not only read several important 20th-century novels, but will also come to a better understanding of our own capitalist and technology-driven culture. In addition to a few short stories and critical essays, which will be collected in a course packet, we will read the following: Herman Melville, "Bartleby, the Scrivener"; Theodore Dreiser, *Sister Carrie*; Edith Wharton, *The House of Mirth*; Frank Norris, *The Octopus*; Upton Sinclair, *The Jungle*; John Dos Passos, *The Big Money*; and Ralph Ellison, *Invisible Man*. Course Requirements: Several brief response papers, one short (four- to six-page) paper, one longer (10-page) research paper, an oral presentation, and midterm and final exams.

AMST 30215. Border Crossings: Mexican and Canadian Literature

(3-0-3)

Mexican and Canadian literature emphasizing cultural interaction between the US and its southern and northern neighbors.

AMST 30216. African-American Literature

(3-0-3)

This course is designed to familiarize students with the diverse concerns of black women's writing from the first novel written in 1854 through the present.

AMST 30217. Readings in Nineteenth-Century American Literature

(3-0-3)

Long before the automobile became a symbol of American life, travel has been a defining aspect of many sorts of American experience. For the slave seeking freedom, the settler in search of fertile land, or the Native American forced from his ancestral home, travel has necessitated fundamental transformations in the individual and the community. Often travel and mobility are identified with the freedom and social flexibility that historically have distinguished the "new" world from Europe. But travel can be punishing rather than liberating when it is undertaken out of desperation or under force. We will begin the course with a careful reading of Jack Kerouac's classic travel novel, *On the Road*. Kerouac's work develops a range of themes and concerns that we will then trace through American literature from the Puritans to the present. These will include the meaning of wilderness; pilgrimage as a search for a higher truth; the experience of freedom; the problems of identity raised by the confidence man; the relationship to the other; the search for the father. Our readings will include Mary Rowlandson's captivity narrative; selections from the journals of Lewis and Clark; Caroline Kirkland's *A New Home, Who'll Follow?*; the autobiographies of William Apess and Frederick Douglass; Thoreau's *Walden*; Melville's *Confidence Man*; Morrison's *Beloved*; and a short story by Sherman Alexis. We will also view several films. Course require-

ments include regular attendance and active participation, two short (five-page) papers, and a final exam.

AMST 30218. Travel in American Literature
(3-0-3)

Long before the automobile became a symbol of American life, travel has been a defining aspect of many sorts of American experience. For the slave seeking freedom, the settler in search of fertile land, or the Native American forced from his ancestral home, travel has necessitated fundamental transformations in the individual and the community. Often travel and mobility are identified with the freedom and social flexibility that historically have distinguished the “new” world from Europe. But travel can be punishing rather than liberating when it is undertaken out of desperation or under force. We will begin the course with a careful reading of Jack Kerouac’s classic travel novel, *On the Road*. Kerouac’s work develops a range of themes and concerns that we will then trace through American literature from the Puritans to the present. These will include the meaning of wilderness; pilgrimage as a search for a higher truth; the experience of freedom; the problems of identity raised by the confidence man; the relationship to the other; the search for the father. Our readings will include Mary Rowlandson’s captivity narrative; selections from the journals of Lewis and Clark; Caroline Kirkland’s *A New Home, Who’ll Follow?*; the autobiographies of William Apess and Frederick Douglass; Thoreau’s *Walden*; Melville’s *Confidence Man*; Morrison’s *Beloved*; and a short story by Sherman Alexis. We will also view several films. Course requirements include regular attendance and active participation, two short (5-page) papers, and a final exam.

AMST 30219. Contemporary Black Literature
(3-0-3)

A survey of late 20th-century black literature in the United States and its relation to other ethnic literatures.

AMST 30220. Latino Literatures
(3-0-3)

A survey of Latino fiction, poetry, and other literary works.

AMST 30221. Tropical Heat Waves: Contemporary Latino/a and Caribbean Literature
(3-0-3)

A review of selected contemporary Latino/a and Caribbean novels.

AMST 30222. Twentieth-Century American Feminist Fiction
(3-0-3)

Close readings of major 20th-century novels, written by both men and women, which may be accurately described as “feminist.”

AMST 30223. Beats, Rhymes, and Life: An Introduction to Cultural Studies
(3-0-3)

An introduction to cultural studies using a variety of media: literature, film, and music.

AMST 30300. Latino/a History
(3-0-3)

This is an interdisciplinary history course examining the Latino experience in the United States after 1848. We will examine the major demographic, social, economic, and political trends of the past 150 years with an eye to understanding Latino/a America. Necessarily a large portion of the subject matter will focus on the history of Mexican-Americans, and Mexican immigrants in the Southwest, and Midwestern United States, but we will also explore the histories of Puerto Ricans, Cubans, and Latin Americans within the larger Latino/a community. Latinos are US citizens, and the course will spend significant time on the status of these groups before the law and their relations with the state, at the federal, local, and community level. To explore these issues within the various Latino communities of the US, we will explore the following key topics: historical roots of “Latinos/as” in the US; the evolution of a Latino/a ethnicity and identity within the US; immigration, transmigration, and the shaping of Latino/a communities; Latino/a labor history; segregation; civil rights; nationalism and transnationalism; the Chicano Civil Rights Movement; Latinos in film; and post-1965 changes in Latino/a life.

AMST 30301. Violence in US History
(3-9-3)

In the late 1960s, black militant H. Rap Brown exclaimed, “Violence is as American as apple pie.” It might be said that the purpose of this entire course will be to evaluate the truth of Brown’s statement. This will be accomplished in two ways: first, by surveying of some of the major episodes and themes of violence in American history, from its colonial origins through contemporary foreign policy and domestic debates; and second, by assessing the meaning of that violence as it simultaneously reflects and shapes American society, culture, and values. This course will include significant reading and writing components, as well as a group project.

AMST 30302. Era of US Civil War 1846–1877
(3-0-3)

In the mid-19th century, the American political system collapsed. Divergent visions of the American ideal plunged North and South into the bloodiest war in the Republic’s history. This lecture course examines the roots of the nation’s sectional division, the disintegration of mechanisms for political compromise, the structures and policies of the wartime Confederate and Union governments, the strategic conduct of the armed conflict, the societies at war, and the Union’s first hesitant steps toward reconstruction and recovery.

AMST 30303. African-American History I
(3-0-3)

This course is a survey of the history of African Americans, beginning with an examination of their West African origins and ending with the Civil War era. We will discuss the 14th and 15th centuries, West African kingdoms, forms of domestic slavery and West African cultures, the Atlantic slave trade, early slave societies in the Caribbean, slavery in colonial America, the beginnings of African-American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery and resulting sectional disputes, and the significance of “bloody Kansas” and the Civil War.

AMST 30304. US Presidents: FDR to Clinton
(3-0-3)

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

AMST 30305. British-American Intellectual History, 1650–1900
(3-0-3)

A survey of the intellectual history of Britain and English-speaking America from around 1600 to the mid-19th century, including European backgrounds and contexts. Emphasis on writings about religion, government, natural science, education, and human nature.

AMST 30306. Women and American Catholicism
(3-0-3)

The course is a survey of women and religion in America during the 19th and 20th centuries. Among others, we will consider the following themes: how religion shaped women’s participation in reform movements such as abolition, temperance, and civil rights; how religious ideology affected women’s work, both paid and unpaid; the relationship of religion, race, and ethnicity in women’s lives; female religious leaders; and feminist critiques of religion. We will examine women’s role within institutional churches in the Protestant, Catholic, and Jewish traditions, as well as raise broader questions about gender and religious belief. How did religious belief affect women both as individuals and in community? How could religion be used to both reinforce and subvert prevailing gender ideology? Course requirements include a midterm and final examination, several short writing assignments, and a final paper (10-12 pages) on a subject of the students’ choice.

AMST 30307. Fashioning Identity in American History
(3-0-3)

This course will focus on dress and material/visual culture in colonial North America. It will introduce methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies. In our focus on the colonial period (especially in the 18th century), we will analyze the economics of dress (the production, marketing, and acquisition of cloth and

clothing) and will assess the importance of fashion and commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class, and ethnic encounters.

AMST 30308. Women and Religion in US History

(3-0-3)

The course is a survey of women and religion in America during the 19th and 20th centuries. Among others, we will consider the following themes: how religion shaped women's participation in reform movements such as abolition, temperance, and civil rights; how religious ideology affected women's work, both paid and unpaid; the relationship of religion, race, and ethnicity in women's lives; female religious leaders; and feminist critiques of religion. We will examine women's role within institutional churches in the Protestant, Catholic, and Jewish traditions, as well as raise broader questions about gender and religious belief. How did religious belief affect women both as individuals and in community? How could religion be used to both reinforce and subvert prevailing gender ideology?

AMST 30309. United States Labor History

(3-0-3)

This course will examine the history of paid and unpaid labor in the United States from colonial times to the near present. We will seek to understand how working people both shaped—and were shaped by—the American Revolution, the debates over slavery and free labor culminating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the Cold War-era repression of the Left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers created to advance their own interests, namely the labor movement. We will also pay special attention to the complicated yet crucial connections between work and racial and gender identities. Specific topics may include slavery, farm labor, women's domestic work, trade unions, questions of industrial democracy, the role of radicalism, and the challenges confronting workers in the current era of corporate globalization and anti-sweatshop activism.

AMST 30310. American Peace Movement since World War II

(3-0-3)

This course examines the emergence of the modern American peace movement between the two World Wars and its development in the Nuclear Age since World War II. It examines the shifting patterns of support for the peace movement, the curious ways Americans have searched and worked for peace, and some of the important peace groups and leaders.

AMST 30311. Survey of African-American History II

(3-0-3)

Corequisite: HIST 32800

This course will survey the history of African Americans from 1865 to 1980. Specifically, this course will focus on the problems of Reconstruction in the South after the Civil War, the adjustments and reactions of African Americans to freedom, the economic exploitation of sharecropping, northern black communities at the end of the 19th century, the migration of black Southerners to northern urban areas, black political leadership, the Civil Rights Movement, current examples of institutional racism, and affirmative action in America.

AMST 30312. The United States Since World War II

(3-0-3)

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of Ronald Reagan. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this postwar era, and the presidencies of Jimmy Carter and Ronald Reagan.

AMST 30313. Gilded Age/Progressive Era

(3-0-3)

Through discussion and lectures, students examine the emergence of a recognizably modern United States. Topics examined will include the emergence of the corporation, progressive reforms, the changing contours of American religion, the character of the New South, the battle for women's suffrage, developments in the arts, and American involvement in the First World War.

AMST 30314. Media and American Culture

(3-0-3) Graff

This course examines the myths and realities of media in the American past and present, paying particular attention to the ways in which old media and new have combined to change our lives, and the ways different groups of Americans have used various media to make history.

AMST 30315. American Political Traditions since 1865

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy's character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation, that also constitute an important part of political history. The course will begin with discussion of the character of Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

AMST 30316. US Foreign Policy since 1945

(3-0-3)

This course covers the main developments in American foreign policy from World War II through the Bush presidency. The principal topics of investigation will be wartime diplomacy and the origins of the Cold War; the Cold War and containment in Europe and Asia: Eisenhower/Dulles diplomacy; Kennedy-Johnson and Vietnam; Nixon-Kissinger and detente; Carter and the diplomacy of human rights; Reagan and the revival of containment; Bush and the end of the Cold War.

AMST 30317. Southern History, 1876 to the Present

(3-0-3)

This survey relies on cultural, social, and political analysis to develop an understanding of the region and its identity. Circumstances and events unique to the South will be evaluated in context of the common experiences of the United States.

AMST 30318. Race in American Culture

(3-0-3)

Although it seems counterintuitive, a person's race is not a biological fact, but, rather, a socially constructed idea. However, for all its genetic invisibility, race and racial identity have produced visible consequences for people in the United States. This class will examine why race has played such an important role in American culture from 1877 to the present. Throughout this class, we will examine how race and racial identity have come to define the legal, social, and economic status of American men and women. The requirements for this class include a midterm, final, and a paper.

AMST 30319. Environmental History

(3-0-3)

This course is an introduction to the new field of environmental history. In recent decades, historians have begun to actively explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course of history: the effects of the distribution of water, wood, and minerals, and of changes in climate or endemic disease. This course ranges widely in methodology from the history of ideas to paleoclimatology, geographically from the ancient Near East to modern America, topically from wood-cutting

rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th-century American West.

AMST 30320. US-Native American Relations: Revolution to Removal
(3-0-3)

Native Americans in the Eastern US remain obscure in the historical imaginations of most Americans. There is not the story of riding horseback across rolling plains, hunting buffalo, or shooting at John Wayne in movies about the Old West. Neither are the romanticized tales of suffering like in the “Trail of Tears” their only American experience. There is rather the story of persistence through change in their ever-shrinking, yet increasingly crowded, woodland homes. This course is designed to expose students to the peoples of the Trans-Appalachian West—in particular, how they initiated, engaged, manipulated, and/or accommodated the policies, practices, and presence of the Euro-Americans and US, from European colonization to the 1840s.

AMST 30321. Environmental History
(3-0-3)

This course is an introduction to the new field of environmental history. While many people think “the environment” suddenly became important with the first “Earth Day” in 1970 (or a few years earlier), environmental issues have in fact long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course history: the effects of the distribution of water, foodstuffs, wood, minerals, and of changes in climate or endemic disease. This course will range widely—in methodology from the history of ideas to paleoclimatology, geographically from the ancient Near East to modern America, topically from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th century American west. Lecture discussion format.

AMST 30322. Colonial America
(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th century to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of English North America.

AMST 30323. American Legal History
(3-0-3)

This seminar-style course deals with the interaction between the legal system and social change in the United States from the 1600s to the 1980s. Primary emphasis is given to the 19th century and 20th century, two periods where American legal culture took on much of its fundamental character and adjusted to significant social change. Main themes include the relationships between law and development; individual rights in the public and private spheres; the development of the legal profession; the post-New Deal state; and the various US “rights” movements. Reading consists of primary sources documents and a short survey text. Grades will be based on a series of short papers and classroom discussion. Prior knowledge of American history is helpful but not required.

AMST 30324. History of the American West
(3-0-3)

Few American regions have generated as many cultural narratives, myths, and icons as the trans-Mississippi West. This course takes both the reality and the romance of the West seriously, asking students to examine how the American conquest of the West inspired storytelling traditions that distorted and shaped the region’s history. To get at this interaction, we will read novels, histories, and first-hand accounts as well as view several Hollywood westerns. The class is

reading- and discussion-intensive. Students will write several short papers as well as a longer final essay.

AMST 30325. US Foreign Policy to 1945
(3-0-3)

This course covers the main developments in American foreign relations from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in the two world wars. A recurring theme will be the major traditions in American foreign policy and the ways in which these traditions influenced policy makers in the early years of the “American Century.”

AMST 30326. US Sex/Sexuality/Gender to 1890
(3-0-3)

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions’ attitudes towards sexuality (the Puritans were not anti-sex!); how different cultures’ views of sex shaped relations between colonists and Indians; why sex was an important factor in establishing laws about slavery in Virginia; birth control and abortion practices; changing patterns of courtship; men who loved men and women who loved women; and why the average number of children in American families fell by 50 percent between 1790 and 1890. Over the course of the semester, students will also design a small research proposal on some aspect of the history of American sexuality prior to 1890. Written assignments will include a weekly journal; midterm and final examinations; a book review; and a small research project.

AMST 30327. American Political Traditions since 1865
(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy’s character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of the debate over slavery and Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

AMST 30328. American Intellectual History I
(3-0-3)

This lecture course will survey major developments in American thought from the first English contacts with North America to the mid-19th century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye towards understanding the roots of our own ways of thinking. Especially in the first weeks of the course, European backgrounds will also receive attention. Students will write a midterm and a final exam, as well as a 10-page research paper.

AMST 30329. Sport in American History
(3-0-3)

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse racing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender, and class. Given Notre Dame’s tradition in athletics, we will explore the University’s involvement in this historical process.

AMST 30330. Morality and Social Change in US History

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

AMST 30331. US Civil War and Reconstruction, 1848–77

(3-0-3)

Arguably the study of the American Civil War is a suitable training ground for novice historians, for traditionally, a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the war, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

AMST 30332. Crime, Heredity, and Insanity in American History

(3-0-3)

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

AMST 30334. US Civil War Era

(3-0-3) Pratt

Arguably the study of the American Civil War is a suitable training ground for novice historians, for traditionally, a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the war, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

AMST 30335. US since World War II

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of George H.W. Bush. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this post-war era, and the presidencies of Gerald Ford through George H.W. Bush. There will be a required reading list of approximately six books, two smaller writing assignments, and three examinations.

AMST 30336. Mexican-American History

(3-0-3) Rodriguez

This course is an introductory survey of Mexican-American history in the United States. Primarily focused on events after the Texas Revolution and annexation of the American Southwest, we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican-American US citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a US-based Mexican-American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican-American life and work in the Great Lakes and Midwestern United States. We will conclude with the recent history of Mexican and Latin American migration to the United States after 1965, and the changing nature of Mexican-American identity and citizenship within this context.

AMST 30337. History of American West

(3-0-3) Coleman

Few American regions have generated as many cultural narratives, myths, and icons as the trans-Mississippi West. This course takes both the reality and the romance of the West seriously, asking students to examine how the American conquest of the West inspired storytelling traditions that distorted and shaped the region's history. To get at this interaction, we will read novels, histories, and first-hand accounts as well as view several Hollywood westerns. The class is reading- and discussion-intensive. Students will write several short papers as well as a longer final essay.

AMST 30338. Morality and Social Change in US History

(3-0-3) Abruzzo

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

AMST 30339. Sport in American History

(3-0-3) Soares

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse racing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender, and class. Given Notre Dame's tradition in athletics, we will explore the University's involvement in this historical process.

AMST 30340. US Environmental History

(3-0-3) Coleman

This course is an introduction to the new field of environmental history. While many people think "the environment" suddenly became important with the first "Earth Day" in 1970 (or a few years earlier), environmental issues have in fact long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course history: the effects of the distribution of water, foodstuffs, wood, minerals, and of changes in climate or endemic disease. This course will range widely—in methodology from the history of ideas to paleoclimatology, geographically from the ancient near east to modern America, topically from wood-cutting rights in medieval France to the

rise of the organic farming movement and water-allocation laws in the 20th century American west. Lecture discussion format.

AMST 30341. African-American History II

(3-0-3) Pierce

African-American History II is a course that examines the broad range of problems and experiences of African Americans from the close of the American Civil War to the 1980s. We will explore both the relationship of blacks to the larger society and the inner dynamics of the black community. We will devote particular attention to Reconstruction, the migration of African Americans from the rural South to the urban North, and the political machinations of the African-American community. We will also examine the political impact of cultural exhibitions. The course will utilize historical documents in the form of primary sources, scholarly articles, and other secondary sources. Classes will be conducted as lecture-discussions. Students enrolled in History 30800 must also take HIST 32800, a tutorial.

AMST 30342. US Foreign Policy Since 1945

(3-0-3) Miscamble

This course offers an overview of US foreign policy since World War II, focusing on the major crises and conflicts that have occurred since then—US and Soviet Union, Korea, Vietnam, Gulf War, and Kosovo.

AMST 30343. US Sex/Sexuality/Gender since 1880

(3-0-3) Bederman

Topics may include representations of sexuality in movies and advertising; new courtship practices among unmarried heterosexuals (from courting to dating to hooking up); changing concepts of same-sex love (from inversion to homosexuality to gay liberation to LGBTQ); the demographic shift to smaller families; the 20th-century movements for and against birth control and legal abortion; and the late-20th-century politicization of sexual issues.

AMST 30344. American Intellectual History II

(3-0-3) Turner

This lecture course will survey major developments in American thought from the later 19th century to the end of the 20th century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our present ways of thinking.

AMST 30345. Twentieth-Century American Military Experience

(3-0-3) Jordan

Is America, as historian Geoffrey Perret contends, a “country made by war”? Regardless of one’s opinion, a systematic study of America’s wars is essential to either confirm or refute the above statement and obtain a more complete understanding of the nation. There have certainly been ample historical occurrences to support Perret’s assertion over the last century, and this course will investigate the validity of the question by examining the modern American military experience from after the Franco-Prussian War of 1871 to the present. We will explore the causes, conduct, and consequences of the major military conflicts of the 20th century in which the US was involved or that had a significant impact on the US, using traditional historical materials. We will also read several battlefield memoirs to further examine the conflicts at the tactical level and also explore the human dimension of war. Using a fundamental thesis to address war at the political, strategic, operational, and tactical levels, the goal of the course will be to gain a better understanding of the relationship among the different levels as well as the importance of each. As a part of their discovery process, students will take three essay exams and write a research paper assessing the combat effectiveness of a particular unit that existed during this period to assist them in determining, developing, and delivering a response to Perret’s statement.

AMST 30348. US South since 1865

(3-0-3) Poche

Popular notions of the South tend to portray it as a region lost in time, trapped within backwards traditions and a hostile view of the modern world. Yet, no region of the country has experienced such sweeping social, cultural, and economic changes as the American South between the Civil War and the 1980s. Over the course of that period, southerners witnessed rapid economic transformation from plantation economy to Sunbelt industrialism; the rise and fall of Jim

Crow and the tremendous racial strife that accompanied these changes; a literary flourishing brought on by what writers called the region’s unique sense of tragedy and loss; the movement of southern folk life away from the farms and mill towns into urban areas; and the rising appeal of southern politics and culture to a larger national community in the modern day. This course will examine these and other developments in the context of American history, casting a comparative eye toward how other societies have sought to embrace modernization while clinging to a variety of traditions, real and imagined.

AMST 30350. Technology of War and Peace

(3-0-3)

This course surveys the impact of military technologies on world history from the 16th century onward. Topics include the rise of gunpowder weaponry and the fortification revolution in the early modern period, navalism, particularly in the 19th century, the role of military technologies in European colonial expansion, and the science-based military of the 20th century, chemical and biological (and so-called “soft-kill”) weapons, leading up to the age of nuclear weapons. The course considers also military technologies as deterrents, military technologies as expressions of culture, and the issue of warfare as a stimulus to technological development.

AMST 30351. US Civil War Era

(3-0-3) Pratt

Arguably the study of the American Civil War is a suitable training ground for novice historians, for traditionally, a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the war, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

AMST 30352. US 1900–45

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. Major topics will include the background for Progressive reform, the New Nationalism and New Freedom administrations of Theodore Roosevelt and Woodrow Wilson, the diplomacy of the early 20th century, the causes and results of World War I, the Republican administrations of the 1920s, the New Deal administration of Franklin D. Roosevelt, isolationism and neutrality in the inter-war period, and the American home front during World War II. There will be a required reading list of approximately seven books, two shorter writing assignments, and three major examinations, including the final.

AMST 30353. Women and American Catholicism

(3-0-3) Cummings

This course is a survey of the history of American Catholic women from the colonial period to the present. Through a combination of lectures, reading and discussion, we will explore the following themes and topics: the role of religious belief and practice in shaping Catholics’ understanding of gender differences; the experience of women in religious communities and in family life; women’s involvement in education and social reform; ethnic and racial diversity among Catholic women; devotional life; the development of feminist theology, and the emergence of the “new feminism” as articulated by Pope John Paul II. We will seek to understand how Catholic women, both lay and religious, contributed to the development of Church and nation, and examine how encounters with the broader American society have shaped Catholic women’s relationship to the institutional church over the last three centuries.

AMST 30354. Mexican-American History

(3-0-3) Rodriguez

This course is an introductory survey of Mexican-American history in the United States. Primarily focused on events after the Texas Revolution and annexation of the American Southwest, we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-

Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican-American US citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a US-based Mexican-American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican-American life and work in the Great Lakes and Midwestern United States. We will conclude with the recent history of Mexican and Latin American migration to the United States after 1965, and the changing nature of Mexican-American identity and citizenship within this context.

AMST 30355. Sport in American History

(3-0-3) Soares

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse racing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender, and class. Given Notre Dame's tradition in athletics, we will explore the University's involvement in this historical process.

AMST 30356. American Religious History

(3-0-3) Grow

This course will examine religion in American life from the encounter between Europeans and Native Americans in the 16th century to the present. We will explore the ways in which religion has shaped American society, culture, and politics, and in turn how the US setting has shaped religious expression. Themes will include the rise of religious diversity and ideas of religious freedom; the interactions between the American religious "mainstream" and minority religious traditions; the relationship between religion in the US and its international setting; and the diversity and persistence of religion in American culture.

AMST 30358. African-American History to 1877

(3-0-3) Pierce

This African-American history survey begins with an examination of West African origins and ends with the Civil War era. We will discuss the Atlantic slave trade, slavery in colonial America, the beginnings of African-American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, and the political economy of slavery and resulting sectional disputes. Particular attention will be paid to northern free blacks.

AMST 30359. US Sex, Sexuality, and Gender to 1900

(3-0-3) Bederman

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions' attitudes towards sexuality (the Puritans were not anti-sex!); how different cultures' views of sex shaped relations between colonists and Indians; why sex was an important factor in establishing laws about slavery in Virginia; birth control and abortion practices; changing patterns of courtship; men who loved men and women who loved women; and why the average number of children in American families fell by 50 percent between 1790 and 1890. Over the course of the semester, students will also design a small research proposal on some aspect of the history of American sexuality prior to 1890. Written assignments will include a weekly journal; midterm and final examinations; a book review; and a small research project.

AMST 30360. American Intellectual History 1

(3-0-3) Turner

The first half of a two-semester sequence surveying the American intellectual history.

AMST 30361. US Presidents, FDR to Clinton

(3-0-3) DeSantis

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

AMST 30362. Labor and America since 1945

(3-0-3) Graff

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8 percent of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is "globalization" and what has been its impact on American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies, or mass culture are particularly welcome.

AMST 30363. Imagining America: Encounters, Expectations, and Perceptions in Early America

(3-0-3) Lee

The European encounter with America brought the peoples of Africa, America, and Europe into close contact and intertwined their fates. What happened to Europeans' conceptions of the world and their place in it as they became aware of the existence of America? How did they view the land and the peoples of Africa and America? Conversely, how did the Africans and the Indians perceive the Europeans? This course surveys the responses of Africans, Indians, and Europeans to the social, economic, and intellectual changes wrought by their mutual encounter from their first contact to the 18th century. Europeans projected their best hopes and worst nightmares onto the New World. Some imagined it to be a paradise populated by noble savages. Others believed Indians and Africans were barbaric pagans, devoid of humanity. The close contact between Europeans, Africans, and Indians prompted new discussions of the differences between what we now call "races." Many Europeans came to the Americas for economic profit. Yet others saw the new world as a mission field or a land in which they could build a new, pristine, Christian civilization, free from the corruptions of Europe. The course will be divided into three broad categories: empire, anthropology, and religion.

AMST 30400. Presidential Leadership

(3-0-3) Arnold

This course examines the role of the presidency in the American regime and its change over time. Particular attention will be given to expectations about presidential leadership through the course of American political history. Beginning with questions about the original design and role of the presidency, the course turns to consideration of the role of leadership styles for change and continuity in American politics. Finally, cases of presidential leadership are studied to comprehend the way leadership and political context interact.

AMST 30401. American Congress

(3-0-3)

This class will expose the student to the practical workings of the US Congress, some major theories attempting to explain those workings, and some of the methods and materials needed to do research on Congress. It will place the study of Congress in the context of democratic theory, and in particular the problem of the way in which the institution across time grapples with the problem of the common good.

AMST 30402. Race/Ethnicity and American Politics

(3-0-3) Tillery

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

AMST 30403. Constitutional Interpretation

(3-0-3)

Prerequisite: (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A) OR (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A)

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

AMST 30404. Race/Ethnicity and American Politics

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

AMST 30405. American Voting and Elections

(3-0-3)

This course will examine voting and opinions, and the linkage between political leaders and the mass public. Possible topics include an introduction to electoral analysis; the history of recent electoral politics; the nature of political participation, especially the rationality of voting turnout and nonelectoral specialization; party identification and opinions, attitudes and ideology; social groups and cultural identities; mass media and image campaigns; and differences between presidential and congressional elections.

AMST 30406. Introduction to Public Policy

(3-0-3)

Prerequisite: (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A) OR (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A)

The objective of this course is to introduce students to the process of public policy formation in American politics. The course will be divided into three parts. The first section will encompass a brief review of some of the more important mechanisms of American politics that affect the legislative process (political participation, interest groups, congressional elections, etc.). We will then engage in a general review of how such factors have affected the direction and tone of federal public policy over the past 30 years. The final two sections of the course will be devoted to detailed analysis of two public policy areas of particular interest to younger voters: education reform and drug laws. Building on the earlier readings and the analytical tools developed, we will examine the current debates and prospects for reform in these policy areas, with an eye toward understanding the political realities of public policy formation.

AMST 30407. Political Participation

(3-0-3)

This course is intended to explore some of the causes of citizens' differentiated rates of political participation in American politics, as well as the impact that this has on the representational relationship between constituents and legislators. We will begin with a theoretical overview of some of the unique aspects of our representational system. Next, we will analyze the factors that influence the formation of individuals' political preferences, and their propensity to undertake various forms of political participation. Then we will turn to an analysis of the formation and uses of public opinion. Finally, the class will investigate the consequences of using institutional reforms geared toward "direct democracy" to increase political participation and/or the weight of public opinion on the legislative process.

AMST 30408. Race/Ethnicity and American Politics

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities like gender and class animating political actions? What role do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

AMST 30409. Latin American International Relations

(3-0-3)

This course examines the international relations of Latin America with an emphasis on what determines US policy toward Latin America, and the policies of Latin American states toward the United States, other regions of the world, and each other. It analyzes recurring themes in US-Latin American relations, including the response of the United States to dictatorships, expropriations of US-owned property, and revolution. It also studies new directions and issues in Latin America's international relations, e.g., trade policy, the environment, migration, and drugs in a post-Cold War world.

AMST 30410. American Political Thought

(3-0-3)

This course will examine different ideas, approaches, and issues within feminist political thought. The first part of the course will compare different theoretical perspectives, from liberalism to Marxism, that have been employed by contemporary feminists. The course will pay particular attention to the meanings ascribed to "woman" and her roles in society. The second part of the course will examine how women have been represented throughout Western political thought, and the values ascribed to them by political theorists. Finally, in the last part of the course, we will turn to an examination of several contemporary political issues particularly relevant to feminist thought.

AMST 30412. Race/Ethnicity and American Politics

(3-0-3)

This course examines the role that race and ethnicity play in American political life. Among the key questions it seeks to address are: What are the origins of racial and ethnic categories (white, Irish-American, African-American, Latino, Asian, etc.)? What role have political institutions and group behavior played in effecting the transformation and sometimes destruction of racial categories? What role do patterns of racial and ethnic formation (the values that we attach to certain identities) play in structuring American politics? What role do race and ethnicity play in the generation of public policies in America? Is an America where race is irrelevant possible?

AMST 30413. Presidential Leadership

(3-0-3)

This course examines the role of the presidency in the American regime and its change over time. Particular attention will be given to expectations about presidential leadership through the course of American political history. Beginning with questions about the original design and role of the presidency, the course turns to consideration of the role of leadership styles for change and continuity in

American politics. Finally, cases of presidential leadership are studied to comprehend the way leadership and political context interact.

AMST 30414. Religion and Politics

(3-0-3)

Voters hear increasing amounts of religious discourse in American political campaigns and administrations are turning to religious institutions for social service delivery. The linkages between religion and politics, however, are very complex and constitutionally delicate. This course utilizes a burgeoning body of empirical studies, drawn from political science, sociology, and psychology, that address relationships among religious beliefs and organizations on the one hand, and political attitudes and actions, on the other. Topics include the meaning and measurement of religiosity; linkages between religion and politics at the level of the individual, the local community of faith, and the policy maker; foundational beliefs, images of God, conceptions of human nature, and their consequences for the political order; religious values embedded in the American political system; religion and the state, as seen in selected court cases; and denominational bodies, interest groups, and religious movements in American politics. Students will be responsible for one or two exams, oral presentations, and an original research paper. Depending on class size, either a lecture-discussion or a seminar-tutorial mode of teaching will be used. Students will read books by Wald, Benson, and Williams, and several other authors, and may do directed research on NES or GSS datasets. (Also open to graduate students.)

AMST 30415. Latino Politics

(3-0-3)

This course provides a careful and “critical” analysis of the political status, conditions, and the political activities of the major Latino (or “Hispanic”) groups in the United States—Mexican Americans, Puerto Ricans, and Cuban Americans. To provide a context and grounding, various theoretical perspectives are first considered, followed by discussions of the historical experiences and contemporary socioeconomic situations of the several Latino groups. Attention then turns to a number of issues concerning political attitudes, behaviors, and activities. Assessments of Latino influence upon the major local, state, and national institutions of the political system, and vice versa, are then considered. Policy areas particularly significant for Latinos are also examined. Finally, the major issues, questions, and themes considered throughout the semester are “revisited” and reconsidered.

AMST 30416. Constitutional Law

(3-0-3)

This course examines the main principles of American constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers and impeachment, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, taxing and spending power of the national government, and the American federal system. A great deal of attention will be given to the evolving constitutional policies of the Rehnquist court and the “great debate” currently taking place, inside and outside the judiciary, over the interpretation of our written constitution. Required text is Kommers and Finn, *American Constitutional Law: Essays, Cases, and Comparative Notes* (Boston: West-Wadsworth, 1998). This course is a University elective. Requirements are a midterm and final examination and possibly, depending on enrollment, a short paper.

AMST 30417. American Political Thought

(3-0-3)

This course examines the ideas that form the foundations of American politics. We will read the Declaration of Independence, selected Federalist and Anti-Federalist writings, Tocqueville’s *Democracy in America*, and the Lincoln-Douglas debates with the goal of exploring and assessing competing definitions of liberty, democracy, and human nature within the American tradition. Requirements include four short papers, class participation, and a final exam. This course assumes you are familiar with the structure of American government and the basic history of the period. If you have background in political theory, you should find it useful.

AMST 30418. Introduction to Public Policy

(3-0-3)

The objective of this course is to introduce students to the process of public policy formation in American politics. The course will be divided into three parts. The first section will encompass a brief review of some of the more important mechanisms of American politics that impact on the legislative process (i.e., political participation, interest groups, congressional elections, etc.). We will then engage in a general review how such factors have impacted the direction and tone of federal public policy over the last 30 years. The final two sections of the course will be devoted to detailed analysis of two public policy areas of particular interest to younger voters, education reform and drug laws. Building on the earlier readings and the analytical tools developed, we will examine the current debates and prospects for reform in these policy areas, with an eye toward understanding the political realities of public policy formation.

AMST 30419. Constitutional Law

(3-0-3)

This course examines the main principles of American Constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given over to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court’s opinions. A background in American national government is desirable.

AMST 30420. Political Participation

(3-0-3) Ayala

This course is intended to explore some of the causes of citizens’ differentiated rates of political participation in American politics, as well as the impact that this has on the representational relationship between constituents and legislators. We will begin with a theoretical overview of some of the unique aspects of our representational system. After analyzing the factors that influence the formation of individuals’ political preferences, and their propensity to undertake various forms of political participation, we will focus on the historical developments and reforms that have fundamentally shaped the institutions that connect constituents to their government representatives. We will also review the uses of public opinion polls, and end the class by discussing the consequences of using institutional reforms geared toward “direct democracy” to increase political participation and/or the weight of public opinion on the legislative process.

AMST 30423. American Congress

(3-0-3)

This class will expose the student to the practical workings of the US Congress, some major theories attempting to explain those workings, and some of the methods and materials needed to do research on Congress. It will place the study of Congress in the context of democratic theory, and in particular the problem of the way in which the institution across time grapples with the problem of the common good.

AMST 30426. Constitutional Law

(3-0-3) Kommers

This course examines the main principles of American Constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given over to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court’s opinions. A background in American national government is desirable.

AMST 30427. American Foreign Policy

(3-0-3) Lindley

The United States is the most powerful state in the world today. Its actions are important not just for US citizens, but they also affect whether others go to war, whether they will win their wars, whether they receive economic aid, whether

they will go broke, or whether they will starve. What determines US foreign policy? What is the national interest? When do we go to war? Would you send US soldiers into war? If so, into which wars and for what reasons? How do our economic policies affect others? Does trade help or hurt the US economy and its citizens? We first study several theories about foreign policy. We then examine the US foreign policy process, including the President, Congress, the bureaucracy, the media, and public opinion. To see how this all works, we turn to the history of US foreign policy, from Washington's farewell address through the World Wars and the Cold War to the Gulf War. We then study several major issue areas, including weapons of mass destruction, trade and economics, and the environment. Finally, we develop and debate forecasts and strategies for the future.

AMST 30500. Race and Ethnicity

(3-0-3)

This course focuses on race and ethnic relations in the United States. Current cases involving racial and ethnic issues will be presented and discussed in class. Readings and materials will present three approaches to the study of majority-minority group relations, the emergence and maintenance of group dominance, and minority-group adaptations to modes of dominance, including separation, accommodation, acculturation, and assimilation. Class participation and students' experiences will be emphasized.

AMST 30501. Social Movements

(3-0-3)

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course we will consider the ways in which difference sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

AMST 30502. Catholicism in Contemporary America

(3-0-3)

This course offers a sociological overview of the Roman Catholic Church in the United States since World War II. Recent trends will be examined at the societal, organizational, and individual levels of analysis. Topics include the involvement of the Church in public life, the causes and consequences of the priest shortage, and increasing individualism and personalism among lay Catholics.

AMST 30503. Social Deviance

(3-0-3)

In this course, students will discuss deviant people and activities with special attention paid to the process whereby deviance is defined. Discussions will focus on issues of social power, moral entrepreneurship, and human variation.

AMST 30504. Poverty, Inequality, and Social Stratification

(3-0-3)

Social inequality is a prominent and persistent feature of modern society. Social stratification theory attempts to explain the causes of inequality and the reasons for its persistence. This course will address such questions as: Why are some people rich and some people poor? Why does inequality persist? Who gets ahead? Can men and women get the same jobs? Do different races have the same opportunities? Is inequality necessary? Potential topics include inner-city and rural poverty, welfare dependency, homelessness, status attainment and occupational mobility, racial and ethnic stratification, gender stratification, and class theory.

AMST 30506. Criminology

(3-0-3)

This course will introduce you to theoretical interpretations of criminal behavior, empirical research on crime in diverse contexts, and policy debates on crime control and punishment. Our intent will be to raise critical questions and to challenge commonly held views about the nature of crime and punishment in the United States today. As students of sociology, we will operate under the assumption that crime and punishment are social phenomena; they can only be understood by analyzing their relationship to the broader social, political, and cultural context in which they exist. With a particular emphasis on race, class, and gender, we will explore crime and practices of punishment in three social contexts: "the street," paid work settings, and intimate and family relations. Cannot take if previously taken SOC 43752; content overlap.

AMST 30507. Religion and Social Life

(3-0-3) Christiano

How does social life influence religion? How does religion influence society? What is religion's social significance in a complex society like ours? Is religion's significance declining? This course will consider these and other questions by exploring the great variety in social expressions of religion. The course examines the social bases of churches, sects, and cults, and it focuses on contemporary religion in the United States.

AMST 30508. Sociology of Deviance

(3-0-3) Pressler

This course is concerned primarily with the sociological conceptions and theories of deviance. At the onset, deviance is differentiated from those phenomena designated as social problems and social disorganization and the remainder of the course focuses on deviant acts and deviants. Various responses are explored to such questions as who are deviants? What does it mean to be a deviant—to the deviant himself, as well as to others? What common social processes and experiences do most deviants undergo? Various theories or models of delinquency, crime, suicide, sex deviation, and drug use are utilized to aid in constructing a sociological understanding of deviance, the analysis of deviant acts and the formation of deviant careers or roles.

AMST 30509. Race and Ethnicity

(3-0-3) Sobolewski

This course has three objectives. First, the course will help you to think critically about issues related to race and ethnicity in American society. These issues include the meaning of race and ethnicity; the extent of racial and ethnic inequality in the US, the nature of racism, discrimination, and racial stereotyping; the pros and cons of affirmative action; the development of racial identity; differences between assimilation, amalgamation, and multiculturalism; and social and individual change with respect to race relations. The second objective is to foster a dialogue between you and other students about racist and ethnocentric attitudes and actions. The third objective is to encourage you to explore your own racial and ethnic identity and to understand how this identity reflects and shapes your life experiences.

AMST 30510. Polish Americans

(3-0-3) Chrobot

A study of the cultural and racial pluralism of American society through the focus of the Polish-American experience; a review of the social and historical background, the immigration experience, and adaptation to the American experiment in terms of family, religion, education, work, and government.

AMST 30511. Social Movements

(3-0-3) Summers-Effler

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course we will consider the ways in which difference sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

AMST 30512. Social Movements

(3-0-3) McVeigh

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course we will consider the ways in which difference sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

AMST 30513. Critical Issues in Criminology

(3-0-3) Welch

In this course, students will discuss deviant people and activities with special attention paid to the process whereby deviance is defined. Discussions will focus on issues of social power, moral entrepreneurship, and human variation.

AMST 30600. Prehistory of Western North America

(3-0-3)

Archaeological data and cultural life of prehistoric Western North America over the last 20,000 years will be covered. This course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated, diverse cultures of Native Americans.

AMST 30601. Prehistory of Western North America

(3-0-3)

Tremendous variation exists between the cultures of the peoples of North America. This course will offer an opportunity to glimpse this variation, which occurs in technology, social organization, economic, political, and religious systems, and in the arts.

A brief introduction of the archaeological and linguistic evidence will provide information on the debate as to when and by what means people entered America and spread throughout its vast area. The course will then move on to consider the many different cultural adaptations to the various environments of North America. The comparative approach will be used to discuss the similarities and differences between specific cultures. The readings will focus upon particular groups (i.e., Eskimo, Cahuilla, Dakota, Navajo, etc.).

The course will also be concerned with the cultural changes that occurred within Native American cultures during the colonial and expansion periods of Euro-American cultures. The course will end with consideration of the current issues significant to Native-American cultures.

Lectures, film, discussions of readings, and research will allow students a range of learning experiences. Both exams and short papers, as well as a research paper, provide students with an opportunity to demonstrate their understanding of the basic information and issues.

AMST 30602. American Social Movements

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black civil rights movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

AMST 30606. Prehistory of the American Southwest

(3-0-3)

This course uses archaeological data and theory to explore the cultural life of prehistoric Southwest Americans over the last 12,000 years. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated and diverse cultures of the American Southwest. The descendants of these cultures include the Pueblo peoples, the Dene, and the O'odham peoples. In the course students will explore cultural change, land-use patterns, economics, and political complexity, using information on environmental relationships, technology, and other aspects of material culture.

AMST 30607. Native Peoples of North America

(3-0-3)

Tremendous variation exists between the cultures of the peoples of North America, both in the past and today. This course will offer an opportunity to glimpse at this variation, which occurs in technology, social organization, economic, political, and religious systems, and in the arts. A brief introduction of the archaeological and linguistic evidence will provide information on the debate as to when and by what means people entered America and spread throughout its vast area. The course will then move on to consider the many different cultural adaptations to the various environments of North America. The comparative approach will be used to discuss the similarities and differences between specific cultures. The readings will focus upon particular groups (i.e., Eskimo, Cahuilla, Dakota, Navajo, etc.). The course will also be concerned with the cultural changes that occurred within Native American cultures during the Colonial and Expansion periods of Euro-American cultures. The course will end with consideration of the current issues significant to Native American cultures. Lectures,

films, discussions of readings, and research will allow students a range of learning experiences. Both exams and short papers, as well as a research paper, provide students with an opportunity to demonstrate their understanding of the basic information and issues.

AMST 30608. Infancy: Evolution, History and Development

(3-0-3) McKenna

This course explores aspects of infant biology and socio-emotional development in relationship to western child care practices and parenting. Western pediatric approaches to infancy and parenting are evaluated in light of western cultural history and cross-cultural, human evolutionary and developmental data. A variety of mammals are included as a comparative background to explore the relationships between infant physiology, mental and physical health, and contemporary infant caregiving concepts.

AMST 30609. Caribbean Diasporas

(3-0-3) Richman

This course explores the transnational orientations and the multidimensional consequences of movement from the Caribbean as it affects sites in Miami, London, Paris, or Brooklyn as well as Havana, Jamaica, Haiti, or Belize. Reading works of ethnography, fiction, and history; questions about the construction and reconstruction of family bonds; community identity; religion; political power; and economic relations will be treated in the domestic and the global context.

AMST 40100. Writing Nonfiction

(5-0-3)

The techniques of nonfiction writing from the basic journalistic news story to the magazine feature to the personal essay. Students will complete a wide range of assignments and also discuss examples of various kinds of nonfiction prose.

AMST 40105. The Craft of Journalism

(3-0-3)

This class will focus on how print and broadcast journalists work—how they think and act as well as the dilemmas they face in delivering news, analysis, and commentary. Several sessions will be devoted to presentations by visiting correspondents, editors, and producers, explaining their approaches to specific stories and circumstances. In addition, students will discuss the issues and questions raised in a few books.

AMST 40108. Media Criticism

(3-0-3)

This course will explore the work of such seminal American media critics as A.J. Liebling and Walter Lippmann, as well as the plethora of contemporary critics in newspapers, magazines, television, and Web publications. It will examine the philosophical principles against which journalism in the American democracy ought to be measured. It also will explore the phenomenon of the ombudsman, or reader representative, in modern American media, with a particular focus on whether ombudsmen have been able to build or buttress the credibility of news organizations. And it will challenge students to write on a regular basis their own media criticism.

AMST 40200. Introduction to African-American Literature

(3-0-3)

A historical and thematic account of the rise and achievement of African-American authors over several centuries.

AMST 40201. American War Literature

(3-0-3)

American war literature is multifaceted, highly charged with personal agonies and national interrogations. Viewed as a broad field, these texts offer opportunities for diverse research into national ideology, the views and interpretations of the enemy, the accounts of interior conflicts, and the historical moments that shape these tales. How should we read works that contemplate collective and individual violence? What kinds of analysis and historical recovery bring us to points of understanding and meaning? Our panoramic explorations will include the canonically familiar such as Mary Rowlandson's captivity narrative; the Civil War poetry of Whitman and Melville, *The Red Badge of Courage* by Stephen Crane, the more recent such as Kurt Vonnegut's *Slaughterhouse-Five*, and Tim O'Brien's *The Things They Carried*; and the ongoing such as writings from the wars in Iraq.

Our texts will serve as entry points for aesthetic, historical, and theoretical studies aimed at illuminating the functions and values of war writing in the United States. This course will require several short papers, a long final essay, and active student participation.

AMST 40202. Crossing Color Lines

(3-0-3)

This class will explore the conflicted and contradictory ways in which racial and ethnic identities have been constructed and mediated in American culture. We will specifically focus on what the psychology and performance of “passing” reveal about the limitations and possibilities of what we often generically understand as “American” identity. We will thus be able to question essentialist notions of “whiteness” and “race,” and raise questions such as: Who gets to be American? Who doesn’t? How does popular culture construct and perpetuate racist stereotypes, and how can it at other moments resist, critique, and deconstruct such practices? Readings may include *The Autobiography of an Ex-Colored Man* (James Weldon Johnson), *The Great Gatsby* (F. Scott Fitzgerald), *Passing* (Nella Larsen), *Absalom, Absalom!* (William Faulkner), *George Washington Gomez* (Americo Paredes), *Black Like Me* (John Griffin), and *Caucasia* (Danzy Senna). Films may include: *The Jazz Singer*, *Six Degrees of Separation*, *Imitation of Life*, and *Bamboozled*. Requirements: active participation, group presentation, short paper (five to six pages), final exam, and final research paper (10 pages).

AMST 40203. African-American Poetry and Poetics

(3-0-3)

An examination of poetry and poetics by black Americans from the beginnings to the present. Formal attention concerning the aesthetics of poetry are considered within their historical and intellectual contexts. Poets include Phillis Wheatley, Paul Laurence Dunbar, Claude McKay, Langston Hughes, Robert Hayden, Gwendolyn Brooks, LeRoi Jones, Audre Lorde, Michael Harper, Yusef Komunyakaa, and Rita Dove.

AMST 40204. Mark Twain

(3-0-3)

A study of Twain’s life and writings in light of the history of ideas and the literary, political, philosophical, and religious currents of 19th-century American culture. We will also consider such figures as Harte, Stowe, Douglass, and Lincoln, who illuminate Twain’s style and social and moral preoccupations as well as compelling questions centering on the nature of an American identity. Special concerns: Twain’s place in the tensions between conventional literary forms and the emerging American vernacular; his vision and critique of American democracy, slavery, “exceptionalism,” and later geopolitical expansionism; his medievalism, including *Joan of Arc*, and larger interpretations of history; his treatment of women, individualism, and the family; and the later gnosticism of #44, *The Mysterious Stranger*. We will also address the current (and perennial) discussions of unity and pluralism in American culture, as in Garry Wills’s delineation of an underlying American identity in *Under God* and Arthur Schlesinger Jr.’s fear of “balkanization” in *The Disuniting of America*. Readings: selected shorter works, including *Diary of Adam and Eve*, *Innocents Abroad*, *Life on the Mississippi*, *Tom Sawyer*, *Huckleberry Finn*, *A Connecticut Yankee*, *Pudd’nhead Wilson*, #44, *The Mysterious Stranger*; and selections from the *Autobiography*.

AMST 40205. American Film

(3-0-3)

Presentations and discussions of the several genres of film produced in America since the early 1900s.

AMST 40206. Constituting Americans

(3-0-3)

This course will explore life writings and issues of self-representation in the African-American expressive cultural tradition from 1850 to 1905. This course is concerned with the concept of citizenship, its implied universalism, and the necessity of critiquing this universalism that maintains a unified notion of democracy.

AMST 40207. The City in American Literature

(3-0-3)

An exploration of the connections between literary representations of the city and social identity in a variety of American literary texts from the 1890s to the present.

AMST 40208. Mark Twain

(3-0-3)

A study of Twain’s life and writings in light of the history of ideas and the literary, political, philosophical, and religious currents of 19th-century American culture. We will also consider such figures as Harte, Stowe, Douglass, and Lincoln, who illuminate Twain’s style and social and moral preoccupations as well as compelling questions centering on the nature of an American identity. Special concerns: Twain’s place in the tensions between conventional literary forms and the emerging American vernacular; his vision and critique of American democracy, slavery, “exceptionalism,” and later geopolitical expansionism; his medievalism, including *Joan of Arc*, and larger interpretations of history; his treatment of women, individualism, and the family; and the later gnosticism of #44, *The Mysterious Stranger*. We will also address the current (and perennial) discussions of unity and pluralism in American culture, as in Garry Wills’s delineation of an underlying American identity in *Under God* and Arthur Schlesinger Jr.’s fear of “balkanization” in *The Disuniting of America*. Readings: selected shorter works, including *Diary of Adam and Eve*, *Innocents Abroad*, *Life on the Mississippi*, *Tom Sawyer*, *Huckleberry Finn*, *A Connecticut Yankee*, *Pudd’nhead Wilson*, #44, *The Mysterious Stranger*; and selections from the *Autobiography*.

AMST 40209. Our America/African-American Literature

(3-0-3)

This course is interested in the shaping of national identity and the historical, cultural, and moral assumptions about America that facilitate such a shaping. How does one become American? We will read 20th-century African-American literature with focus on how “black subjectivity” is created. How does an author’s literary imagination construct a character and hail a reader? We will explore the relationship between literature, history, and cultural mythology; the American obsession with race; sexual ideology and competing representations of domesticity. In light of the way blackness is often construed as the ultimate sign of race in America, how do these texts approach the American political landscape to offer a critique of power, identity, and social subjectivity in a manner that interrogates whiteness and its ascribed universality?

AMST 40210. Native-American Literature

(3-0-3)

This course serves as an introductory exploration of the literatures written by Native American authors—oral literatures, transitional literatures (a combination of oral and written expression), and contemporary poetry and prose.

AMST 40211. American Fiction

(3-0-3)

A close examination of major mid-20th-century American novelists.

AMST 40212. Our America/African-American Literature

(3-0-3)

I will tell you something about stories,
[he said]

They aren’t just entertainment.

Don’t be fooled.

They are all we have, you see,

all we have to fight off

illness and death.

You don’t have anything

if you don’t have the stories.

Their evil is mighty

but it can’t stand up to our stories.

So they try to destroy the stories

let the stories be confused or forgotten.

They would like that

They would be happy

Because we would be defenseless then.

----Leslie Marmon Silko, *Ceremony* (2).

Autobiography and biography are modes of narrative discourse, and certain marginalized groups—women and people of color—use narratives to define questions of identity, to question power relations, to explore their own voices as writers and as learners in hegemonic institutions, like schools. And while we might critique these narratives for their “locality”—that is, these narratives are often critiqued on the basis of telling a story about an individual at a specific point in history, saying little about their ability to tell a “total story”—as the epigraph opening this description suggests, stories are much more and are sometimes “all we have” to face a world that is hostile, painful, and unjust; In other words, individual stories do often reflect the socio-political contexts from which they emerge.

In this course we will explore the tensions raised above by examining the ways in which narratives/stories, specifically autobiographical and biographical ones, tell an individual as well as a total story. What do the Latino/a writers say about their own identities and cultures as Chicanos/Mexicanos, as Cubanos, Puertorriquenos, and as women? How and in what ways are ethnic identities within a Latino diaspora constructed, and what issues cut across ethnic and racial lines? How do Latinos construct race/ethnicity vis-a-vis whiteness? In other words, how do we frame ourselves and how are we framed in relation to the dominant constructions of race in this country?

AMST 40213. Nature in America

(3-0-3)

This course examines the central and changing role of nature in American literature, from the typological eschatology of the Puritans to the pop-culture apocalypticism of Don DeLillo's *White Noise*.

AMST 40214. Voices of American Renaissance

(3-0-3)

The human voice manifested tremendous cultural, spiritual, and political power for antebellum Americans. “Vox populi, vox dei” (“The voice of the people is the voice of God”) proclaimed the popular political slogan. Transcendentalist writers such as Emerson considered the written word to be merely the dead letter of inspired speech. Vernacular literatures, Native American and African American oral traditions, and sacred and political oratory all contributed distinctive models of voice to the antebellum babel. In this course, we will focus on the trope of voice as it shaped the literatures of the American renaissance period and explore the cluster of meanings that antebellum Americans attached to it. Our readings will include works by Emerson, Thoreau, Poe, Dickinson, Whitman, Douglass, Melville, Stowe, Hawthorne, and a number of lesser known authors and oral performers. Requirements include active class participation (25 percent); one short (5-page) essay (15 percent) and two longer (8-10 page) essays (20 percent each); and a final exam (20 percent).

AMST 40215. Realism and Naturalism in American Literature

(3-0-3)

This course will consider American literature between the Civil War and World War I in relation to the literary movements known as realism and naturalism. We will start out by making an effort to define these terms, looking at the statements of writers and critics from those years as well as recent critical and theoretical essays on realism and naturalism. We will then read a wide range of texts from the period, discussing their relations to these literary movements. We will ask questions such as: What distinguishes novels usually referred to as realist, such as Henry James's *Portrait of a Lady*, from those seen as naturalist, such as Frank Norris's *McTeague*? Is it useful to apply the concepts of realism and naturalism to the 1890s explosion of writings by black women like Frances Harper (*Lola Leroy*) and Pauline Hopkins (*Contending Forces*)? How were new forms of nonfiction writing about social problems—books like Jacob Riis's *How the Other Half Lives*, Jane Addams's *Twenty Years at Hull House*, W.E.B. DuBois's *The Souls of Black Folk*, and Thorstein Veblen's *Theory of the Leisure Class*—related to realist novels dealing with similar issues, such as Stephen Crane's *Maggie: A Girl of the Streets*, Charles Chesnut's *The Marrow of Tradition*, Theodore Dreiser's *Sister Carrie*, James Weldon Johnson's *Autobiography of an Ex-Colored Man*, and Edith Wharton's *The House of Mirth*? Does the “reality” or “nature” represented in realism and naturalism look different depending on the perspective of writers who differ along lines of race, gender, ethnicity, and class, as well as in other ways? Evaluation will be based heavily on class participation in discussions of these and other questions, but also on short papers engaging with the critical essays that will

supplement our literary readings, as well as on a final essay due at the end of the term.

AMST 40216. African-American Women

(3-0-3)

At the end of the millennium, at a time of great anxiety for at least a portion of our society, we have also witnessed a great explosion of African-American women writers. This course will seek to understand the relation of these women to the larger American culture and what they have to say about our collective vision and future. At the same time, we will engage in an in-depth study of two of our most prominent writers within this group—specifically Alice Walker and Toni Morrison. The purpose here will be to understand individual works and the individual authors, as well as the significant ways these writers both converge and diverge. Finally, we will place these writers in the context of both poetry and essays by other African-American writers, particularly Audre Lorde and June Jordan.

AMST 40217. Literature and Democracy in Nineteenth-Century United States

(3-0-3)

A survey of 19th-century American literature, emphasizing the efforts of American writers to identify and define “democracy” and the “democratic citizen.”

AMST 40219. Writing Harlem: Race, Renaissance, and the Modern

(5-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in Harlem in the 1920s and 1930s.

AMST 40220. Poetry and Painting in Manhattan 1950–1960

(3-0-3)

An examination of the vibrant Manhattan art community in the 1950s and 1960s, with a particular emphasis on the intersections of poets and painters.

AMST 40221. Great American Novels

(3-0-3)

Close readings of selected classic American novels.

AMST 40222. Class, Labor, and Narrative

(3-0-3)

This course explores the works of selected American writers addressing class and labor.

AMST 40223. American War Literature

(3-0-3)

Beginning with Mary Rowlandson's captivity narrative and ending with Tim O'Brien's *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

AMST 40224. Tragedy: Shakespeare and Melville

(3-0-3)

Using concepts of tragedy as a linking principle, this course reads several Shakespearean plays and then *Moby-Dick*, noting Shakespeare's influence on the American novelist.

AMST 40225. Our America: Exploring the Hyphen between African and American

(3-0-3)

Close readings of various 20th-century African-American literatures, with foci on how “black subjectivity” is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

AMST 40226. Strains in twentieth-Century American Fiction

(3-0-3) Brogan

Beginning with F. Scott Fitzgerald's “Jazz Age” and ending with Toni Morrison's “Jazz,” a study of thematic commonalities and dissonances in selected 20th-century American novels.

AMST 40227. Latino/a Poetry

(3-0-3) Menes

A study of prominent contemporary Latino/a poets whose work has enriched and diversified the canon of American poetry in the last 20 years.

AMST 40228. American Literature and Visual Culture

(3-0-3) Shortall

From early national fiction and portraiture to American modernist poetry and painting, an exploration of the relationships between American literature and the visual arts.

AMST 40229. African-American Poetry

(3-0-3) Eady

Close readings of selected contemporary African-American poets.

AMST 40230. Grand Collage: California Poetry, Arts, and Culture at Mid-Century

(3-0-3) Fredman

An exploration of the ways that poetry took a leading role among the arts in California, creating a California culture that through the Beats and the Hippies became a national and international phenomenon.

AMST 40231. American Novel

(3-0-3) Werge

A survey of selected 19th- and 20th-century American novels.

AMST 40232. Early American Literature

(3-0-3) Hendler

Close readings of selected 17th- and 18th-century American literature.

AMST 40233. Our America: African-American Literature

(3-0-3) Irving

Close readings of selected classic American novels.

AMST 40235. Great American Novels

(3-0-3)

Close readings of selected classic American novels.

AMST 40300. American Thought, Belief, and Values since 1865

(3-0-3)

A study of Americans' most characteristic intellectual, moral, and religious beliefs, especially as expressed by leading thinkers, and of why these beliefs have flourished in the American cultural setting. Topics will include questions such as the competing authorities of faith and science, the search for truth in a pluralistic society, professional and popular philosophies, including pragmatism and post-modernism, moral authority in democratic culture, social science and law, the relation of individuals to communities, the relation of American materialism to American beliefs, the outlooks of diverse subcultures, African-American outlooks, feminist perspectives, competing religious and secular faiths, and roles of various forms of Christianity and other religious beliefs in American life.

AMST 40301. Women and Work in Early America

(3-0-3)

This course will introduce students to a broad view of early American social history that foregrounds the gendered aspects of work in Early America—defined loosely as the period from colonial settlement to 1820. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies of preindustrial early America, including their work activities within the household. This perspective is especially crucial to the examination of white, Native American, and African servitude and/or slavery since gender ideologies dictated the work experiences of large race- and class-defined segments of the population. Yet cultural retention also played a part and this course will invite students to investigate the impact of derivative work practices (for example, examining African women's dominance of market activities in the New World through the lens of West African work practices). Further, while the course title emphasizes women's experiences, the class and race implications of male work practices in early America will be similarly illuminated by a gender studies approach. Thus, an overarching purpose of the course will be to highlight the fluid and instable conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied

to European versus non-European, free versus enslaved, and public versus private spheres.

AMST 40302. United States 1900–1945

(3-0-3)

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. The principal topics to be investigated will be the Progressive Period legislation of Presidents Theodore Roosevelt, William Taft, and Woodrow Wilson, the causes and effects of World War I, the cultural developments of the 1920s, the causes of the *Wall Street* Crash and Great Depression, the New Deal legislation of President Franklin Roosevelt, the diplomacy of the interwar period, and the home front during World War II.

AMST 40303. Women in the US South

(3-0-3)

This course introduces students to the historical study of women in the United States South. It will cover topics such as women in slavery, the transition to freedom, race relations, and social movements. Through student-centered discussions, presentations, and a variety of different writing assignments, students will analyze how race, class, and gender structured the experiences of women in southern society. At the end of the semester students will be prepared to pursue more advanced research in the field of women's history. All are welcome.

AMST 40304. Labor Movements in Twentieth-Century US

(3-0-3)

This course explores American workers' collective efforts as workers in their search for economic security, political power, and social and cultural autonomy from the 1890s to the near present. For the most part, this course will focus on the unions and related organizations forged by workers throughout the past century—from major umbrella groups like the American Federation of Labor, the Industrial Workers of the World, and the Congress of Industrial Organizations, to important sectoral actors like the Brotherhood of Sleeping Car Porters, the United Automobile Workers, the American Federation of Teachers, and the United Farm Workers. The central questions of the course will be: When, where, and why have US workers organized collectively in the 20th century? And how successful have they been? What has been the response of employers, the government, and the public at large to these collective efforts of workers, and how and why have those responses changed over time? What has been the relationship between organized labor and racial and gender discrimination, as well as the causes of racial and gender equality? And how have Americans generally, and workers in particular, understood the labor movement in relation to capitalism, freedom, and democracy? Students will be expected to write several short papers, engage in regular classroom discussion, and screen several films outside of class.

AMST 40305. Colonial America

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Native Americans, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of English North America.

AMST 40306. Catholicism in Twentieth-Century America

(3-0-3)

The course examines the patterns of Catholic intellectual life, religious culture, social engagement, and public presence in the United States throughout the 20th century. Themes receiving special attention in the lectures and class discussions will include the US Catholic response to the theory of evolution and to the social sciences, the rise and decline of Thomism as the philosophical framework of Catholic thought and education, Catholic participation in the labor movement and the Civil Rights Movement, the new theologies and social ethics of the '60s, the impact of the Second Vatican Council, shifting modes of public Catholicism, and the Catholic culture wars of the 1980s and 1990s.

AMST 40307. Sex, Sexuality, and Gender in the United States to 1890
(3-0-3)*Corequisite:* HIST 32706

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions' attitudes toward sexuality (the Puritans were not anti-sex!), how different cultures' views of sex shaped relations between colonists and Indians, why sex was an important factor in establishing laws about slavery in Virginia, birth control and abortion practices, changing patterns of courtship, men who loved men and women who loved women, and why the average number of children in American families fell by 50 percent between 1790 and 1890.

AMST 40308. Latinos and Religion

(3-0-3)

This course examines the unique religious history of US Latinos/as, starting with the Spanish and Latin American colonial origins and outlining the rise of parishes and congregations north of Mexico. Readings and lectures will present historical, sociological, and theological methods for examining contemporary issues facing Latino Catholics and Protestants, such as social justice movements, religion in the thought of prominent Latino/a writers and commentators, and ecumenical trends in Latin American and US Latino Christianity. Other important themes include the changing role of Latinos in the US immigrant church, the impact of Latin American liberation theology on US Latinos, and the linkages between religion and cultural identity among peoples with roots in Mexico, the Hispanic Caribbean, and Central and South America presently living in the US. Lectures and discussions will be supplemented with visual material. Grading will be based on midterm essay exams, class discussion, and a final research paper (12 pages).

AMST 40309. US Foreign Policy before 1945

(3-0-3)

This course covers the main developments in American foreign policy from the Spanish American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in two world wars.

AMST 40310. Medicine and Public Health in US History

(3-0-3)

An exploration of themes in European and American medicine. This course integrates the perspectives and issues of social history—Who were the medical practitioners? Who were their patients? What relations existed between these groups? How have the realities of illness and death figured in the lives of ordinary people in different places and times?—with the perspectives and issues of the history or medicine as a science—What understandings of the human body and its ills have practitioners had? What tools have they developed and used for intervening in illnesses? Topics include the humoral pathology, epidemics as social crises, the rise of pathological anatomy, the germ theory and public health, the transformation of the hospital, the history of nursing, changing modes of health care, finance, and administration, and relations between “regular” doctors and sectarian medical traditions such as homeopathy and osteopathy.

AMST 40311. Moving New Directions: African Diaspora

(3-0-3)

Migration and the emergence of new identities have defined the formation and evolution of the African diaspora in the modern era. This course is designed to introduce students of African-American studies to the concept of African diaspora and to provide a framework for understanding how it has changed over time. What constitutes the African diaspora? How was it formed? How have people of African descent forged new identities in the Atlantic World and what are the implications of identity construction for people of African descent in the future? These questions form the basis of our historical study of the African diaspora. We examine themes of migration and cultural change through comparative case studies of black communities in the United States, the Caribbean, Africa, and Latin America. The first half of the course will focus on the Atlantic slave trade, the middle passage, and slavery in the Americas. We will examine identity and culture for people of African descent in South Carolina, Louisiana, and Jamaica. The sec-

ond half of the course will deal with the problem of freedom in the 19th-century Atlantic world. We will direct our attention to free black populations and Creole communities in Louisiana, Brazil and Sierra Leone, and West Africa. We will also consider the impact of emancipation at the end of the 19th century through an examination of black American emigration movements, “back to Africa” and to the US West, and Afro-Brazilian identity in a post-emancipation society. This course will conclude with a discussion of the state of the African diaspora today and its implications for future transformations in African-American identity.

AMST 40312. Consumers and Culture in US History

(3-0-3)

This course will explore the emergence of modern consumer society in the United States. From the vantage point of the close of the 20th century, American culture seems to be defined by the conspicuous consumption of goods. It is important to remember, however, that phenomena like mass marketing, advertising, and mass distribution were not always so entrenched. A historical approach allows us to explore the changing relationship of Americans to consumer goods and the cultural transformation that went along with this change. The course is roughly chronological, with readings organized around a specific theme each week. The course will consist of both lectures and class discussions. Topics covered include the evolution of the American economy, advertising, retailing, gender and consumption, leisure, and consumer protest. There will be two short written assignments and one longer research paper.

AMST 40313. Revolutionary America

(3-0-3)

This course examines the American Revolution as both a process of change and an event with profound consequences for the history of the American people. It emphasizes conditions and consequences of the Revolution for common people and for those living at the fringes of economic subsistence and political power—laborers, women, slaves, and Native Americans—in addition to the ambitions of the founding fathers. The long-term preconditions for revolution are considered within the contexts of domestic and international politics. We will focus on the conflict that was the heart of the Revolutionary experience and that was the fundamental legacy of the war for American society.

AMST 40314. History of the American Woman II

(3-0-3)

This course surveys women's relationship to the social, cultural, and political developments shaping American society from 1890 to the present, concentrating on developments in women's activism and in popular culture. Topics include the new woman and progressivism, the transformation of feminism in the 1920s, women's paid and unpaid labor, the “feminine mystique,” the Women's Liberation Movement of the 1960s, and changing gender roles in recent decades. Particular attention will be paid to the impact of class, race, and ethnicity on issues of gender.

AMST 40315. African-American Politics, 1900–50

(3-0-3)

This course examines the diverse struggles for full citizenship and human rights on the part of African Americans from 1900 to 1950. The topics to be studied include the Great Migration, the New Negro Movement and Harlem Renaissance, the Marcus Garvey Movement, the rise of A. Philip Randolph's Brotherhood of Sleeping Car Porters, the involvement of blacks in the Communist Party, and the transformations in black culture and politics brought about by the two World Wars. This course will examine the efforts of liberal-integrationist, socialist, communist, and Black Nationalist organizations to combat white racism and qualitatively improve the lives of blacks in various regions of the United States. It hopes to convey blacks' diverse thoughts on complex issues such as identity, politics, class, gender, race, and nationality.

AMST 40316. Women and War in US History

(3-0-3)

This course will explore new perspectives on wars fought by Americans and will provide an overview of American conflicts from the colonists' wars with Native Americans to the current war on terrorism. By looking at the various roles women play in war and examining the ways in which women's lives can be shaped by war, the course will also introduce students to important themes in women's history

and to new methodologies influential in the study of history. Films and documentaries, and primary and secondary readings will be used.

AMST 40319. History of Cubans in the US

(3-0-3)

Cuba's national hero, Jose Marti, spent most of his adult life in the United States, from 1880 until shortly before his death fighting in Cuba in 1895. Ironically, his most influential writings on Cuban nationalism, still used today by the Cuban government to justify many of their political positions, were written in the United States. Despite the deeply conflictive relationship between Cuba and the United States since 1959, Cubans have always had "ties of singular intimacy" with their neighbors to the north, which explains their northward migrations. For two centuries Cubans have lived in the United States, mostly in Florida but also in many of the nation's largest cities including New York, Chicago, Los Angeles, Dallas, Houston, and New Orleans. This course will examine the Cuban experience in the United States, especially through the concept of exile. As early as 1820, Cuban exiles arrived in the United States to promote Cuban independence from Spain and, since that time, Cuban communities have consistently influenced political and socioeconomic developments in their homeland. The course will examine the history of Cuban immigration, community formation, socioeconomic integration, political development, expressions of exile and national identity, the emergence of Cuban-American identity and impact of Cuban exiles on US foreign policy towards Cuba. The course will also explore those aspects of Cuban history that have contributed historically to the creation of exile communities in the United States, including Cuba's nineteenth century wars of independence against Spain, early 20th-century efforts at political stability, and the Cuban Revolution of 1959.

AMST 40320. History of American Women I

(3-0-3)

This course surveys the social, cultural, and political developments that shaped American women's lives from the colonial period to 1890. It will analyze both the ways American culture defined women's place during different historical periods and the ways women themselves worked to comply with or to resist those definitions. Topics include preindustrial society, transformations in work and family life, industrialism and class formation, slavery, women's culture, and the emergence of a woman's movement. Throughout, stress will be laid on the importance of class, race, and ethnicity in shaping women's historical experience.

AMST 40321. America between the World Wars

(3-0-3)

This course will examine the social, cultural, and political developments that occurred between the United States' entrance into World War I and the conclusion of the Second World War. Topics to be considered include the post-World War I resurgence of nativism, the changing social norms and gender roles of the 1920s, the rise of mass culture, the Great Depression, the New Deal, and of course, American involvement in both world wars, with an emphasis on the home front.

AMST 40322. Chicano History

(3-0-3)

This course will trace the history of Mexican Americans from colonial times to the present. After examining Hispanic colonial origins in 16th-century New Spain, the course will trace the development of Spanish/Mexican colonial communities in what is now the US Southwest, follow their conquest and incorporation into the United States, and explore the development of a Mexican-American identity in the 19th century. Themes to be examined for the 20th century include immigration, community growth and formation, exclusion and the Civil Rights Movement, cultural expressions, and the nationalizing of the Mexican-American experience.

AMST 40323. American Indian History

(3-0-3)

This course examines the complicated history of American Indian relations with the British North American colonies and the United States. Beginning with a brief survey of American Indian cultures, we will focus on relations along the moving frontier between the two peoples. Topics include mutual adaptation and exchange, invasion and resistance, environment and economics, and racism and ethnic identity. Covering almost half a millennium, the course will give roughly

equal time to the four centuries that followed the first serious attempt at British colonization (1585). Almost two-thirds of the course will, therefore, deal with peoples east of the Mississippi River in the years before 1838.

AMST 40324. US and the Vietnam War

(3-0-3) Brady

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an "American" as opposed to a "Vietnamese" perspective. Broad topics to be covered include Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–1975: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture AND a discussion course. Attendance at BOTH is required. Approximately six books will be assigned.

AMST 40325. Technology in History

(3-0-3)

A thematic survey of the history of technology from the neolithic discovery of agriculture to the information age. Topics include the chemistry and metallurgy of antiquity (high tech c. 1000 BCE); technology in Christian theology; the power revolution of 1200; arms races from the 15th century onward; the marriage of art and science; the industrial, agricultural, transport, and communications revolutions; the American system of manufactures; the evolution of the engineering profession; and modern efforts to plan the technological future. These topics form the basis for exploring the following themes: How does technology change? How did we get where we are—Do we have the technology now that we must have, should have, or need to have? What guides technical creativity? How have social effects of technologies been assessed and dealt with? How have technologies fundamentally changed ordinary life and societal organization? This course format includes lectures, two exams, exercises, and a paper.

AMST 40326. African-American Resistance

(3-0-3)

An exploration of a series of cases of African-American resistance throughout US history.

AMST 40327. Crime, Heredity, Insanity in the US

(3-0-3) Przybyszewski

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

AMST 40328. History of Sport and the Cold War

(3-0-3) Soares

This course will explore the ways that sport reflected the political, ideological, social, economic, and military struggle known as the Cold War. Sport permitted opportunities to defeat hated rivals or to develop competition more peacefully. It reflected the internal politics and societies in nations, and also illuminated relations among allies. Using a variety of readings, media accounts, and film clips, this course will look at a number of crucial teams, athletes and events from the Cold War, including the 1980 US Olympic hockey team, the controversial 1972 Olympic basketball final, "ping pong diplomacy," Olympic boycotts, Martina Navratilova and other Eastern European tennis stars, East German figure skater Katarina Witt, Romanian gymnast Nadia Comaneci, the ferocious Soviet-Czechoslovakian hockey rivalry following the Soviet invasion of 1968, and more.

AMST 40400. Constitutional Law

(3-0-3) Kommers

This course examines the main principles of American Constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given over to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court's opinions. A background in American national government is desirable.

AMST 40401. American Political Parties

(3-0-3)

Political parties play many vital roles in American politics: They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices—candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, how they have changed over time—have consequences for the working of the American political system. This class explores the contribution of political parties to the functioning of American democracy.

AMST 40402. Public Policy and Bureaucracy

(3-0-3)

This course explores the process, substance, and efficacy of public policy making and policy implementation in the United States. We begin by asking: Why do some problems become public issues while others do not? Attention is given to how government identifies problems and formulates policies meant to address them. Then we ask, once formulated, how policies are implemented. The course will examine government's "menu" of options for policy implementation. Student research papers will focus on the evolution over time of a specific policy, examining how that policy's implementation affected its impact. Requirements for the course include a midterm exam, a research paper, and a final exam. During the semester, students will be required to prepare several shorter papers as progress reports on their research papers. Students taking this course already should have taken POLS 10100 or 20100, Introduction to American Government. It also will be helpful to have had an introductory economics course.

AMST 40403. Field Seminar in American Politics

(3-0-3)

This is the "core" seminar in American politics, designed to provide a survey of the most important literature in the field. The seminar is intended to present the student with a broad, eclectic view of the current state of the literature in American politics. The readings attempt to provide a sampling of classic and recent theory and substance in the hope of suggesting where scholars stand, and where they seem to be headed, with respect to some major topics in the American subfield.

AMST 40404. First Amendment

(3-0-3)

This seminar offers an advanced exploration of Supreme Court jurisprudence involving freedom of speech and expression, freedom of the press, freedom of association, and freedom of religion and religious establishment. We examine the reasoning and assumptions behind these opinions, and we assess the foundations and implications of competing interpretations of cherished constitutional principles. We conclude by evaluating the effects of these decisions on American politics and American society. Requirements include midterm and final exams, a research paper, and active class participation. Enrollment is limited to students with previous course work in constitutional law or constitutional interpretation.

AMST 40405. American Constitutional Law

(3-0-3)

The focus of this course is the Constitution as interpreted by the United States Supreme Court. It covers landmark constitutional cases in leading topical areas such as abortion, death penalty, freedom of speech, church-state relations, equal

protection, and the war powers of president and congress. The main goals of the course are three: (1) To introduce students to the leading principles and policies of American constitutional law; (2) to acquaint them with the process of constitutional interpretation; and (3) to explore with them the role of the federal judiciary, and most particularly the Supreme Court, in the American political system.

AMST 40406. Federalism and the Constitution

(3-0-3)

Beginning in 1995, the Rehnquist Court has sought to restore some of the immunities from federal power that the states had enjoyed prior to the late 1930s. These cases reflect the view that "federalism" is a fundamental feature of the American constitutional order, an institutional principle dear to the framers of the Constitution and integral to the values of "limited government" and "liberty." Critics of this view contend that the framers' first priority was a strong national government and that advances in personal and civil liberties in America historically have come at the expense of "states rights." This course asks what "federalism" is in the American context; whether "federalism" in any sense is a genuine constitutional principle; and if so, for what textual, historical, or moral reasons. The first part of the course will be concerned with questions of constitutional interpretation and the decisions of the Supreme Court in the principal areas of federal-state conflict: commerce clause, civil rights, and criminal justice. The second part of the course will turn to what statesmen and philosophers have said about our subject and related matters. In addition to around 30 Supreme Court cases, readings will include selections from *The Federalist Papers* and writings by Tocqueville, Calhoun, Lincoln, Martin Diamond, Herbert Storing, Charles Taylor, and John Rawls. Grades will be based on an objective exam covering the Supreme Court cases, optional oral reports in class, and a term paper. This course is available for graduate credit (as a reading course), with the instructor's approval. Interested graduate students can reach Prof. Barber at mailto: flaxbar@msn. com.

AMST 40407. Constitutional Interpretation

(3-0-3)

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to familiarize students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

AMST 40408. Comparative Constitutional Liberties

(3-0-3)

This course is offered in the London Program. The course focuses on the civil liberties jurisprudence of England and the United States. It compares American constitutional cases with English judicial decisions and statutory policies on church-state relations, freedom of speech, political representation, sex and racial discrimination, and privacy and personhood (dealing mainly with abortion, death penalty, and assisted suicide). A major question prompted by these readings—one we will periodically explore—is whether civil liberties or fundamental rights are more effectively secured under England's unwritten or America's written Constitution. Still another question the class will explore is the manner in which English judges and parliamentarians seek to reconcile the principles of parliamentary supremacy and constitutionalism in the face of the recently enacted Human Rights Act (incorporating the European Convention on Human Rights into English law).

AMST 40409. Comparative Government

(3-0-3)

This course is offered in the London Program. Its purpose is to assess the integrity and validity of American governmental institutions and political processes in the light of the German and English models of constitutional governance. The seminar plans to focus on executive power arrangements, executive-legislative relations, judicial review, relations between levels of government, electoral and party systems, and selected areas of public policy.

AMST 40410. Interest Group Politics

(3-0-3)

Interest groups have long been considered central to an understanding of the working of American politics. As mediating institutions, interest groups sit at the intersection between the public and the political decision makers who gov-

ern them. Examining if and how interest groups facilitate effective representation thus tells us a great deal about the functioning and quality of American democracy. In this course, we will consider the historical development of interest group politics, the current shape of the interest group universe, potential bias in representation and function, membership and group maintenance, strategies and tactics, and above all, the influence and role of interest groups on democratic policy making and practice in the United States. We will explore broad theoretical issues, grounded in substantive cases from the current and historic experience of American group politics.

AMST 40411. Civil Liberties and the Constitution
(3-0-3)

Most courses in constitutional law narrate the Supreme Court's evolving positions on constitutional rights and institutions. This course starts not with the Supreme Court but with *The Federalist Papers*, from which it develops a general theory of the social and economic goals or ends of constitutional government in America. It then uses this theory as a framework for assessing the Supreme Court's position on property rights, race relations, personal privacy, and the place of religion in American life. This exercise can yield results that make for lively class discussion, not only about the Court, but about the adequacy of the Constitution itself. Grades will be based on a midterm and a final exam, with a paper option in lieu of the final.

AMST 40412. Schools and Democracy
(3-0-3)

Education sits high on the public policy agenda. We are living in an era of innovations in education policy, with heated discussion surrounding issues such as vouchers, charter schools, and the No Child Left Behind Act. This course introduces students to the arguments for and against these and other educational innovations, and does so through the lens of how schools affect the civic health of the nation. Often forgotten amidst debates over school choice and standardized testing is the fact that America's schools have a civic mandate to teach young people how to be engaged citizens. Students in this course will grapple with the civic implications of America's educational landscape, and have an opportunity to propose ways to improve the civic education provided to young people.

AMST 40413. Race and the Constitution
(3-0-3)

This course will cover the decisions of the Supreme Court in the area of race relations, from the 19th-century problem of fugitive slaves to current problems involving school desegregation, affirmative action and "private" acts of race discrimination. Class will focus not only on court cases but also on the broader constitutional and philosophical implications.

AMST 40414. Diplomacy of American Foreign Policy
(3-0-3)

The United States emerged from World War II in a new peacetime role as a superpower. We had to discover for ourselves how to combine diplomacy and military power in a manner consistent with our democratic principles. While the policy choices were stark in the days of the Cold War, they have become more complex in recent years. Presented by a career diplomat who headed US overseas missions in four countries, the course emphasizes case studies and the practical problems that have confronted US leaders from the end of World War II to the present. The issues treated will illustrate the height of tensions in the Cold War, the emergence of detente and deterrence, and the challenges of the global agenda after the end of the Cold War. The course aims to help the student understand current foreign policy issues, which will be discussed briefly in class. A research paper (10 pages), a midterm exam, and a final exam are required.

AMST 40415. Religion and Politics: Comparative Perspective
(3-0-3) Dowd

An examination of the linkage among religious beliefs, world views, group identifications, political attitudes, and behavior, based on literature in political science, sociology, psychology, and theology. Topics include the meaning and measurement of religiosity; religious and anti-religious values embedded in American political institutions; religious world views and political philosophy; cue giving and political mobilization by religious groups, denominational traditions, partisanship and issue positions; religious movements, social conflict, and political coalitions.

AMST 40416. Constitutional Interpretation
(3-0-3)

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

AMST 40500. Ethnicity in America
(3-0-3)

A study of the ethnic and racial formation of American society and cultural pluralism; a review of the theory and history of ethnicity, its policy implications for family, education, economics, religion, government, and international relations; and in-depth study of one ethnic group of choice.

AMST 40501. Theorizing Popular Culture
(3-0-3)

The first half of the course is designed to introduce a variety of theoretical perspectives to the students. We develop a historical overview of popular cultural theory and the several iterations it has taken, to include mass culture theory, Marxism, the Frankfurt Schools, Structuralism, Semiotics, Feminism, and Post-Modernism. During the first section of the course, students will be required to write a paper using one of the theories to analyze a popular culture phenomenon of the instructor's choice. The second half of the semester is devoted to a historical analysis of the social impact and meaning of rock'n'roll. The course begins with a demonstration of African music, using recordings of early chants and celebratory music, and then moves to some example of known slave songs, indicating the presence, as early as 1750, of elements that eventually became R and B, then rock'n'roll. This course is not recommended for students who have taken SOC 34151, as the content will overlap.

AMST 40502. Deviant Behavior
(3-0-3)

This course is concerned primarily with the sociological conceptions and theories of deviance. At the onset, deviance is differentiated from those phenomena designated as social problems and social disorganization. The remainder of the course focuses on deviant acts and deviants. Various responses are explored to questions such as: Who are deviants? What does it mean to be a deviant—to the deviant himself, as well as to others? What common social processes and experiences do most deviants undergo? Various theories or models of delinquency, crime, suicide, sex deviation, and drug use are used to aid in constructing a sociological understanding of deviance, the analysis of deviant acts, and the formation of deviant careers or roles.

AMST 40503. Theoretical Criminology
(3-0-3)

This course will introduce theoretical interpretations of criminal behavior, empirical research on crime in diverse contexts, and policy debates on crime control and punishment. Our intent will be to raise critical questions and to challenge commonly held views about the nature of crime and punishment in the United States today. As students of sociology, we will operate under the assumption that crime and punishment are social phenomena; they can only be understood by analyzing their relationship to the broader social, political, and cultural context in which they exist. We shall explore a variety of theoretical perspectives, both classical and contemporary, that attempt to uncover the causes, etiology, and solutions of the problem of criminal behavior. This class cannot be taken if the student has previously taken SOC 30732 because of content overlap.

AMST 40504. Meaning and Materialism in Modern Life
(3-0-3)

In the 20th century, the twin problems of meaning and materialism have come to the forefront of modern civilization, forming the basis of variety of philosophies and social theories, animating revolutionary movements in art, looming as the silent specter behind mass society and its dramas of consumption. It is by no means clear that the massive technological advances and material gains in advanced industrial societies have contributed to a better way of life—many would say increased meaninglessness is the actual result.

AMST 40505. Social Demography of the US Latin Population

(2-0-2)

This course is an introduction to the social demography of Latino or Hispanic populations in the United States as to historical background, sociological fields, and current statistics and studies. First, in exploring the demographic perspective on the Latino population, a strikingly young and increasing segment of the US population, the processes of fertility, mortality, and migration are presented. Next to be addressed is the literature on conceptualizing and quantifying the US Latino population, legal frameworks for residence status of migrants, and Latinos in the context of social institutions of family, education, and government. In the future, the changing Latino population is expected to contribute to a US population profile different from the US population of the past century. Thus, the course is relevant in contemporary discussions of immigration policy, globalization, and environment.

AMST 40506. Sociology of the Body

(3-0-3)

The human body, that extraordinary organic basis of the self and its sign-making abilities, remains very much present in human communication and culture. Though many of our cognitive beliefs may have been developed in civilized societies and their cultural conventions, the self reaches deep into the human body, and that body was refined over many tens of thousands of years of hunter-gatherer life, and developed over an even longer period of hominid, primate, and mammalian evolution. This course aims to focus directly on the organic human body itself as a center of self and society. We will explore a variety of readings related to the human body as organic matrix of meaning, and that reveal bodily bases of social life, such as Ashley Montagu's *Touching: On the Significance of Skin*, or issues of human development. We will also explore the body as a source of self-originated experience through class "practice" sessions, and ways contemporary techno-culture seems to seek to displace bodily based experience.

AMST 40507. Religion in Post-War America

(3-0-3)

This course surveys the major developments in religious life in the United States since the 1950s through an in-depth examination of several of the most important recent books on the subject, such as Wade Clark Roof's *Spiritual Marketplace*, Tom Beaudoin's *Virtual Faith*, Christian Smith's *American Evangelicalism*, and Helen Berger's *A Community of Witches*. With these works as the backdrop, each student will research and write his or her family's religious history across three generations.

AMST 40508. Latino Image in American Films

(3-0-3)

This course traces the historical depiction of Chicanos, Mexicanos, Puerto Ricans, Cubans, and other Latinos in Hollywood-made movies. Cinematic plots, roles, and motifs, from the earliest of silent films through the onset of the 1980s, are examined to explore the changing physical, social, and cultural definitions of Latinos in the United States. All films and filmmakers are considered within their historical context. Though the main object of study is the Latino image, the course also surveys corresponding images for other ethnic minority groups.

AMST 40509. Social Demography of the US Latino Population

(3-0-3)

This course is an introduction to the social demography of Latino or Hispanic populations in the United States as to historical background, sociological fields, and current statistics and studies. First, in exploring the demographic perspective on the Latino population, a strikingly young and increasing segment of the US population, the processes of fertility, mortality, and migration are presented. Next to be addressed is the literature on conceptualizing and quantifying the US Latino population, legal frameworks for residence status of migrants, and Latinos in the context of social institutions of family, education, and government. In the future, the changing Latino population is expected to contribute to a US population profile different from the US population of the past century. Thus, the course is relevant in contemporary discussions of immigration policy, globalization, and environment.

AMST 40510. Race Relations in the US

(3-0-3)

This course focuses on racism and race relations in the United States. Current cases involving racial issues will be presented and discussed in class. Readings, discussion and lectures will examine the background and current status of the dominant ethnic minority groups in the United States today. The issue of race will also be viewed in relationship to police practices, housing patterns, economic opportunities, gender relations, and politics. Class participation and student experiences will be emphasized.

AMST 40511. Aesthetics of Latino Culture

(3-0-3) Cardenas

This course will analyze the philosophy and principles underlying the social and political aspects of Latino art. We will approach this by examining a range of topics, including Chicano and Puerto Rican poster art, muralism, Latina aesthetics, and border art. The readings will enable us to survey a number of important exhibitions of Latino art and to explore new possibilities for exhibition and representation. We will examine descriptive material and critical writings concerning issues pertaining to the representation and interpretation of Latino culture and art as well as how these questions surface in a national museum context.

AMST 40512. Building Democratic Institutions

(3-0-3) Valenzuela

Elements of democratic regimes emerged long before the regimes as such can be identified as being minimally in place. Beginning with a brief discussion of the essential features of democracies, the course examines how and why such institutions emerged, and the critical moments in which the actual transitions to the new democratic regimes occurred. The course focuses on democratizations that took place before the Second World War, and will examine key European and Latin American cases.

AMST 40513. Theorizing Popular Culture

(3-0-3) Pressler

The first third of the course will introduce a variety of theoretical perspectives, presented as a historical overview of popular culture studies, both in the United States and Britain. The theories to be considered are similar to those of SOC 34151, although somewhat more time and effort will be spent with theories associated with post-modernism, because. . . . Next, students will use a specifically post-modern, deconstructive approach as they examine the meaning systems and messages present in the animated films produced by Disney since 1989, e.g., *The Little Mermaid*, *Aladdin*, *The Lion King*, *The Hunchback of Notre Dame*, and *Mulan*. Students will prepare an analytical paper in which they apply a theory from the course to another of the movies in the Disney oeuvre. Finally, the course will address the social history of rock'n'roll, as noted above. In this section, however, we shall also explore the comparisons of meanings and values, whether in common or in conflict, of both Disney films and rock'n'roll music. To complete this section, students will write a research paper in which they examine some aspect of the American rock revolution. This course is not open to students who have taken SOC 34151, as the content will overlap substantially.

AMST 40514. Ethnicity in American Society

(3-0-3) Chrobot

A study of the dynamic process of formation and development of the society of the United States and its cultural, religious, and racial pluralism; a review of the history and theory of interethnic relations, and their manifestation in the basic institutions of family, education, religion, economics, and government.

AMST 40600. Film and Society

(3-0-3)

Students will contextualize the films via a reader packet drawing on articles from anthropology, film studies, basic film production, and culture theory. Course work will include research papers and the production of a short visual narrative piece representing students' conceptualizations of a theme.

AMST 40601. Native North American Art

(3-0-3)

Traditional Native North American art will be studied through form, technique, and context, as well as the perception of this art as exemplified through changing content, technique, and context. Students will work with the collections in the Snite Museum of Art.

AMST 40602. Native Americans Fact/Fiction

(3-0-3)

This course focuses on our images of Native Americans and how popular and scientific writing and film may have shaped these images. The course uses books and film displaying Indian stereotypes and compares them to ethnographic studies that reveal more realistically the diversity of Native American culture.

AMST 40603. Global Crime and Corruption

(3-0-3) Nordstrom

This class will look at what constitutes the illegal today; who is engaged in crime and corruption; and what kinds of economic, political, and social powers they wield. It will also look at the societies and cultures of “out-laws.”

AMST 40604. Terrorism

(3-0-3) Mahmood

This course questions basic assumptions of the “war on terror” using ethnographic literature to challenge conceptions and policies on terrorism today. Is “terrorism” in fact a definable term? How can we use the experience-near methods of anthropology to study people cognitively and politically placed as irretrievably distant? Differences among terrorism, crime, and revolution are explored through examination of specific cases. Building peace in a climate of violence is the ultimate aim of our study.

AMST 40605. Native North American Art

(3-0-3) Mack

Native North American art existed for thousands of years and continues to be created today. Its original context was often sacred (both public and private) and/or political or decorative. Contact with Western Europeans and their art traditions along with the art traditions of Africans, Asians and South Americans beginning about 1600 AD. and thereafter modified form, technique, and context of Native North American art. However, traditional form, techniques, and context continued through the centuries since 1600. The perception of this art also changed. Most frequently until into the 20th century, the art of Native North Americans was viewed as craft by non-native North Americans and Europeans, but during the 20th century that view was modified. Native American artists also began to view their own art differently. This change occurred among artists working in traditional mediums as well as those producing art using non-traditional mediums. The collections of Native North American art curated at the Snite Museum exemplify the changing content, techniques, and contexts of this art. This course will allow students to work with our collections under direct supervision. The use of our collections will permit students to observe some of the changes in art that have occurred in the last 150 years. The students’ final projects will include a visual presentation of a particular change in material, context, or technique that they have determined through research and direct examination of selected pieces from our collections. For this reason, the course will be limited to 15 students and will be sometimes held in the Snite Museum during hours when the museum is not usually open to the public. The culminating activity will be to create a small exhibit that will be displayed at the Snite at the end of the semester.

AMST 43100. Immigration, Ethnicity, and Race in the United States, 1840s to the Present

(3-0-3)

Examining monographs, novels, film, photography, poetry, government records, and court cases, we will explore a variety of immigrant groups and time periods—from the Irish of the mid-19th century to Jamaicans, Mexicans, and the Vietnamese today. We will focus on questions of identity—how immigrants have come to understand themselves racially and ethnically over time—and questions of power—where immigrants have been located within America’s developing racial order and what difference this has made in their everyday lives—their jobs, homes, families, and opportunities.

AMST 43102. Confronting Homelessness in American Culture and Society

(3-0-3)

The purpose of this seminar is to examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw upon insights from history, literature, documentary film and photography, and the social sciences. We will focus on the degree of permanence and change in our approach to both traditional and modern forms of the social problem. There will be an experiential component to the seminar as well.

AMST 43103. Race, Gender, and Women of Color

(3-0-3) Ardizzone

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the US. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

AMST 43104. Persuasion, Commentary, Criticism

(3-0-3) Colwell

This course will consider the roles of persuasion, commentary, and criticism in contemporary American culture, and will explore the techniques of these forms of expression. Following introductory sessions dealing with principles and concerns, students will prepare and discuss their own writing assignments—including opinion columns, editorials, and book or performance reviews.

AMST 43105. Writing for Publication

(3-0-3) Collins

This course is designed to improve and extend student skills in writing nonfiction articles, with emphasis on writing for magazines. It will touch on freelancing, researching markets, understanding audience, finding salable topics, writing query letters, and working with editors. Students will be expected to write several short articles and one major one, and they will be responsible for developing a marketing plan for the long article. The instructor of this course is the editor emeritus of *Notre Dame Magazine*.

AMST 43108. Literary Journalism

(3-0-3)

This writing course is open by application to a few students who have shown unusual promise in other journalism courses and/or have demonstrated superior writing skills in student publications or media internships. Literary journalism is a demanding form of communication that combines fictional techniques with scrupulous adherence to fact. Students will be responsible for two to three major pieces of writing and will work closely with one another and the instructor, who is the editor emeritus of *Notre Dame Magazine* and an experienced freelance writer.

AMST 43109. Material America: Creating, Collecting, Consuming

(3-0-3)

A seminar exploring how historians, archaeologists, art historians, folklorists, geographers, and cultural anthropologists use material culture as important evidence in interpreting the American historical and contemporary experience. Research fieldwork in area museums and historical agencies such as the Snite Museum, the Northern Indiana Center for History, National Studebaker Museum, and Copshaholm/Oliver Mansion will be part of the seminar.

AMST 43110. Media Ethics

(3-0-3) Storin

This course will examine the journalistic and ethical challenges that newsroom managers face as well as the issues that reporters in the field must tackle on a daily basis. Roughly half of the course will deal with case studies of ethical dilemmas and the other half will involve students in making choices for the front of the mythical newspaper. Although there will be readings from books on the topics, students will be expected to read the *New York Times*, *The South Bend Tribune*, and *The Observer* on a regular basis, especially on the class days when the front-page decisions will be made. The stories in those newspapers will provide the

basis for those decisions. We will also consider how television deals with news on local and network levels.

AMST 43113. Understanding Story: Conflict, Culture, Identity
(3-0-3)

During the last decade interest in narratives has increased dramatically. Feminist studies, cultural studies, and anthropology have broadened our appreciation for the role story plays not simply in personal psychology but also in constructing and mediating our social life. The purpose of this seminar-style course is to investigate the shape, purposes, and multiple meanings of narratives both in the lives of individuals and within institutions and cultures. In order to understand how story influences personal identity, contributes to or ameliorates conflict, constructs, deconstructs, and reconstructs history, and advances political agendas, we will examine how story is used by (1) journalists in reporting news as story; (2) medical professionals in collecting case histories; (3) ethnographers in describing unfamiliar cultural practices or investigating inter-group or inter-state conflict situations; (4) historians in interpreting the past; (5) political leaders in establishing public policy and political power; and (6) advertising and marketing interests.

AMST 43114. Nature in America
(3-0-3)

A seminar designed to explore the concept of nature in the American historical and contemporary experience within an interdisciplinary context of art, history, literature, and ecology. In addition to weekly reading discussions, the seminar will meet, on a number of occasions, at several “nature” sights: Morris Conservatory and Muessel-Ellison Tropical Gardens; Potawatomi Zoo; Elkhart Environmental Center; Shiojiri Niwa Japanese Garden; Fernwood Botanical Garden and Nature Preserve; University of Notre Dame Grene-Nieuwland Herbarium. Purpose: to study nature in American art (painting, photography, sculpture). Seminar meetings will be held at the Snite Museum of Art; South Bend Regional Museum of Art; South Bend Regional Museum of Art; and the Midwest Museum of American Art.

AMST 43115. Advanced Reporting
(3-0-3) Colwell

This is an advanced course in journalistic reporting and writing devoted to learning how to prepare, in a professional manner, in-depth articles on issues and events of community interest for Notre Dame and in this area. Emphasis will be on the techniques, ethics, and responsibilities of conducting interviews and research and crafting pieces for newspapers and other publications.

AMST 43119. Building America: Architecture, Economics, Politics
(3-0-3) Schlereth

A seminar designed to examine the social and economic factors, energy and land use policies, demographic urban/suburban trends, technological innovations, and artistic impulses that have produced the American built environment, 1640–1940. Comparing several building types—the private residence, the workplace, and the public building—the seminar will explore structures and spaces as material culture evidence of American domestic, real estate, political, and cultural history.

AMST 43120. Leadership and Social Responsibility
(3-0-3)

This course examines leadership and empowerment issues from multidisciplinary perspectives, focusing on the role of the leader within organizations that promote service, social action, or other forms of social responsibility. Alternative models of leadership are explored, with attention to value and moral implications.

AMST 43121. American Spaces
(3-0-3)

A comparative survey of the multiple histories of several natural and human-made environments created in America from the New England common to the Los Angeles freeway. Using specific cases studies, the course will analyze sites such as the Mesa Verde pueblo, Rockefeller Center, the Southern plantation, the Midwest Main Street, the Prairie-style residence, the Brooklyn Bridge, New Harmony (Indiana), US Route 40, the American college campus, Pullman (Illinois), the skyscraper, Spring Grove Cemetery (Cincinnati), the Victorian suburb, Grand Central Station, Golden Gate Park, Coney Island, Yosemite National Park, Chautauqua (New York), and the 1939 New York World's Fair.

AMST 43122. Grecian Architecture and Furniture I
(3-0-3)

Students explore Notre Dame's holdings of British and American architectural books that introduced “Grecian” architecture to the English-speaking world.

AMST 43123. Jack Kerouac, the Beats, and Dylan
(3-0-3) Giamo

This seminar will re-examine Kerouac and his prose in relation to Beat subculture and the larger context of post-World War II American society. Although the work of other Beat writers, such as William S. Burroughs, Allen Ginsberg, and Gary Snyder will be considered, the primary focus will be on Kerouac. Moreover, the seminar will question the cultural codification of Kerouac as “King of the Beats” and advance the notion that he was a prose artist on a spiritual quest. Or, as Ginsberg aptly put it—an “American lonely Prose Trumpeter of drunken Buddha Sacred Heart.”

AMST 43124. Comparative Cultural Studies
(3-0-3)

The purpose of this seminar is to introduce students to comparative dimensions of American studies. International perspectives will be explored and approaches that compare American culture with another national culture will be encouraged. Intranational comparative topics will also be welcome (example: Asian-American studies). Concepts, methods, and materials related to comparative studies will be examined. Students will work on selecting appropriate comparative topics, organizing information and ideas, developing themes, and designing an interdisciplinary framework for their projects.

AMST 43125. Writing and Editing
(3-0-3)

This course takes students beyond the basics of reporting the news to work on longer journalistic projects and the editing process involved in completing more extended features and pieces of analysis. Students will review assignments completed for the class and act as editors to make suggestions for improving individual efforts. Several projects will make up the principal work of the semester.

AMST 43126. American Nonfiction
(3-0-3) Kotlowitz

This course will, through both reading and writing, explore the place and the art of what is often called literary journalism or narrative nonfiction. What makes for a compelling story? Why employ the use of narrative? How does it form our view of people and events? We'll read nonfiction narratives on such issues as war, poverty, and race. Readings will include John Hersey's *Hiroshima*, Philip Gourevitch's *We Wish to Inform You that Tomorrow We Will Be Killed with Our Families*, and Richard Wright's *Black Boy*, as well as the instructor's *The Other Side of the River*. We'll also explore the craft and work with rigor and discipline on the art of reporting and writing story. There will be regular writing assignments, and students will be encouraged to report and craft a narrative on an issue of interest to them. This course will be run as a seminar, so there will be an emphasis on critical class discussion, including presentations by students.

AMST 43127. Multimedia Journalism
(3-0-3) Collins

The 21st-century journalist needs to be comfortable with what is called “writing across the media” and can no longer be selective about which form of communication to build a career around. In many newsrooms, print journalists are now expected to perform on radio or in front of TV cameras, while the bylines of electronic journalists are turning up in newspapers and magazines. Such media “convergence” is already more the norm than the exception. On top of that, the Internet has become a major medium in its own right, encompassing different styles of communication. While the focus of this course will be on writing, it will expose students to a variety of media in an effort to prepare them for the reality of modern communications careers. The instructor of this course is the editor emerita of *Notre Dame Magazine* and has had experience in several media.

AMST 43128. Limitless Desire: Literature and the Creation of Consumer Culture in America

(3-0-3)

This course traces the social changes that accompanied America's movement from early retailing to a full-blown consumer culture. Beginning with representations from the later part of the 19th century, particularly of the development of Chicago as a mail order capital of the world and moving into the present through an examination of television shopping networks, this course will use material from a variety of perspectives and disciplines to examine what became a wholesale transformation of American life. In attempting to trace the trajectory of change from a country often identified by its rural isolation to a country of relentless publicity, from the farm to Paris Hilton, (who returned to *The Simple Life*), we will look at a series of linkages, each of which played a specific and contributory role in the cultural shift toward a fully saturated consumerism. For instance, the early mail order catalogue empires of Aaron Montgomery Ward and Richard Warren Sears depended on the capacity of the railroad and postal service to transport their goods from shopping catalogues to country kitchens, goods which went beyond kitchen utensils, clothes, ornaments, and shoes to include assembly-ready homes. South Bend has several Sears and Roebuck homes and part of our class time will be spent in looking at these houses in the context of the course themes. All of our discussion will take place against the backdrop of a larger question about the democratization of desire, about why American culture became more or less democratic after the introduction of the mail order catalogue. Thus the linkage between the catalogue, the home shopping network, and the notion that freedom to desire goods is a measure of democratic freedom. Of course, the possibilities for manipulation and control are also limitless.

AMST 43129. Images of Women in American Cinema

(3-0-3)

In viewing any film, we must ask ourselves what the filmmakers want us to think. To answer that question for a specific genre, we will be studying portrayals of 20th-century women in film and how these images have evolved in reaction to, and as a backlash against, the modern feminist movement.

AMST 43130. Media Criticism

(3-0-3) Wycliff

This course will explore the work of such seminal American media critics as A.J. Liebling and Walter Lippmann, as well as the plethora of contemporary critics in newspapers, magazines, television, and Web publications. It will examine the philosophical principles against which journalism in the American democracy ought to be measured. It also will explore the phenomenon of the ombudsman, or reader representative, in modern American media, with a particular focus on whether ombudsmen have been able to build or buttress the credibility of news organizations. And it will challenge students to write on a regular basis their own media criticism.

AMST 43131. Nature in America

(3-0-3) Schlereth

This course examines the central and changing role of nature in American literature, from the typological eschatology of the Puritans to the pop-culture apocalypticism of Don DeLillo's *White Noise*.

AMST 43132. Fashion Identities in Colonial America

(3-0-3) White

This course will focus on dress and material/visual culture in colonial North America. It will provide an introduction to methodology, and offer an overview of key themes in the history of dress (the production, marketing, and acquisition of cloth and clothing) and will assess the importance of fashion to commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class, and ethnic encounters.

AMST 43133. Civil Liberties

(3-0-3) Barber

Most courses in constitutional law narrate the Supreme Court's evolving positions on constitutional rights and institutions. This course starts not with the Supreme Court but with *The Federalist Papers*, from which it develops a general theory of the social and economic goals or ends of constitutional government in America. It then uses this theory as a framework for assessing the Supreme Court's posi-

tion on property rights, race relations, personal privacy, and the place of religion in American life. This exercise can yield results that make for lively class discussion, not only about the Court, but about the adequacy of the Constitution itself. Grades will be based on a midterm and a final exam, with a paper option in lieu of the final.

AMST 43135. Women and Work in Early America

(3-0-3) White

This course will introduce students to a broad view of early American social history that foregrounds the gendered aspects of work in Early America—defined loosely as the period from colonial settlement to 1820. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies of preindustrial early America, including their work activities within the household. This perspective is especially crucial to the examination of white, Indian, and African servitude and/or slavery since gender ideologies dictated the work experiences of large race- and class-defined segments of the population. Yet cultural retention also played a part and this course will invite students to investigate the impact of derivative work practices (for example examining African women's dominance of market activities in the New World through the lens of West African work practices). Further, while the course title emphasizes women's experiences, the class and race implications of male work practices in early America will be similarly illuminated by a gender studies approach. Thus, an overarching purpose of the course will be to highlight the fluid and instable conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to European versus non-European, free versus enslaved, and public versus private spheres. This course fulfills the humanities requirement and the diversity requirement for second majors.

AMST 43307. History of US South to 1877

(3-0-3)

This course will provide a survey of the American South through Reconstruction. We will briefly describe Native American societies and early Spanish settlements in Florida and the Southwest before addressing in greater detail the political, cultural, and social history of the region as it was settled beginning in the Southeast. We will examine how ideas like honor, freedom, patriarchy, and religious beliefs were forged and evolved in the context of a slave economy, and how they shaped the day's political questions. We will also consider the Confederate experience and Reconstruction. There will be one paper (30 percent), two exams (25 percent each), reading reports (10 percent), and class participation (10 percent).

AMST 45900. Publishing Internship

(V-0-V)

Apprentice training with *Notre Dame Magazine*. Satisfactory/Unsatisfactory credit only.

AMST 45901. Community Service Internship

(3-0-3)

Apprentice training with community social service organizations. Satisfactory/Unsatisfactory credit only.

AMST 45902. Historical Research Internship

(3-0-3)

Apprentice training in archives or museums or historical preservation with local organizations. Satisfactory/Unsatisfactory credit only.

AMST 45903. News Internship

(3-0-3)

Apprentice training with newspapers. Satisfactory/Unsatisfactory credit only.

AMST 45905. News Internship

(3-0-3)

Apprentice training with newspapers. Satisfactory/Unsatisfactory credit only.

AMST 46920. Directed Readings

(3-0-3)

Directed readings taught by individual faculty members. Permission required.

AMST 47910. Senior Honors

(0-0-3)

Senior Honors Program

AMST 47930. Special Studies: Reading and Research

(V-0-V)

Special Studies offers students the opportunity to pursue an independent, semester-long reading or research project under the direction of a faculty member. The subject matter of special studies must not be duplicated in the regular curriculum.

Gallivan Program in Journalism, Ethics, and Democracy

See also [American Studies](#).

JED 30100. Fundamentals of Journalism

(3-0-3) Ciccone

What is news? What are the most effective ways of presenting news to the public? What ethical decisions are involved in gathering and reporting news? These are a few of the questions addressed in this class.

JED 30101. Broadcast Journalism

(3-0-3) Sieber

Four major topics are covered: (1) Writing for broadcast: Emphasis on developing the student's understanding of grammar and style in the construction of effective news stories; (2) newsroom structure: understanding who does what in today's broadcast newsroom and how economics affects the flow of information. (3) journalism ethics: analysis of personal values, ethical principles, and journalistic duties that influence newsroom decisions; and (4) legal considerations in news gathering with special attention paid to libel laws and invasion of privacy.

JED 30102. News in American Life

(3-0-3) Storin

This course seeks to promote an understanding of modern media by examining the goals and motivations of newsmakers, the power of instant information, the future of news delivery, and an examination of how the traditional principles of fairness, privacy, and ethics are treated. Students will read several books and newspaper articles dealing with the history and the business of the media, and will use daily newspapers throughout the course.

JED 30105. The Craft of Journalism

(3-0-3) Schmuhl

Prerequisite: AMST 30100 OR AMST 301

This class will focus on how print and broadcast journalists work—how they think and act as well as the dilemmas they face in delivering news, analysis, and commentary. Several sessions will be devoted to presentations by visiting correspondents, editors, and producers, explaining their approaches to specific stories and circumstances. In addition, students will discuss the issues and questions raised in a few books.

JED 30106. Witnessing the Sixties

(3-0-3) Giamo

Prerequisite: AMST 30100 OR AMST 301

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the sixties, on the one hand, and on the other to explore the various journalistic representations of events, movements, and transformation. Much that was written during the period was ephemeral. There are, however, certain lasting accounts of the sixties by authors who command respect today, writers whose new publications or publications about them get front-page reviews in the *New York Times Book Review* section. We will focus on the manner in which each writer witnessed the sixties as well as the unique interaction between personal expression, social event, and cultural meaning. We will focus on fresh styles of writing, such as the new journalism popularized by Tom Wolfe, as well as writing that is aimed toward protest, resistance, dislocation, solipsism, and reportage. Major topics for consideration include the counterculture and the movement—a combination of civil rights and antiwar protest. These topics will sharpen our interest in social history, cultural change, politics, foreign affairs, music, literature, and documentary film.

JED 40100. Media and the Presidency

(3-0-3) Ohmer

As the brouhaha over Howard Dean's "yell" illustrates, media have come to play a key role in the coverage of presidential elections. This course examines how print and broadcast media have functioned in US elections since the way we choose a president was first established. After a brief overview of changing relationships between journalists and presidential candidates in the 19th century, we will focus on elections since the 1920s, when radio first broadcast election updates. We will analyze how candidates have used radio, television, and the Internet to construct images of themselves and their platforms, and how journalists have become an

active force in representing the political process. Rather than see electronic media as neutral or "objective," we will assess the narrative strategies and visual and verbal codes by which media present politics to us, the voters.

JED 40101. American Nonfiction

(3-0-3) Kotlowitz

This course will, through both reading and writing, explore the place and the art of what is often called literary journalism or narrative nonfiction. What makes for a compelling story? Why employ the use of narrative? How does it form our view of people and events? We'll read nonfiction narratives on such issues as war, poverty and race. Readings will include John Hersey's *Hiroshima*, Philip Gourevitch's *We Wish to Inform You that Tomorrow We Will Be Killed with Our Families*, and Richard Wright's *Black Boy*, as well as the instructor's *The Other Side of the River*. We'll also explore the craft and work with rigor and discipline on the art of reporting and writing story. There will be regular writing assignments, and students will be encouraged to report and craft a narrative on an issue of interest to them. This course will be run as a seminar, so there will be an emphasis on critical class discussion, including presentations by students.

JED 40102. Persuasion, Commentary, and Criticism

(3-0-3) Colwell

This course will consider the roles of persuasion, commentary, and criticism in contemporary American culture and will explore the techniques of these forms of expression. Students will prepare and discuss their own writing assignments, including opinion columns, editorials, and critical reviews of performances or books. Ethics and responsibilities in contemporary American journalism in expression of opinions also will be explored. Assignments will serve as the examinations in this course, which is taught by a political columnist for the *South Bend Tribune* who also serves as host of public affairs programs on WNIT-TV, Public Broadcasting. Open to American studies majors and journalism, ethics, and democracy minors by permission. Other applicants must submit writing samples for review.

JED 40103. Writing for Publication

(3-0-3) Collins

This course is designed to improve and extend student skills in writing nonfiction articles, with emphasis on writing for magazines. It will touch on freelancing, researching markets, understanding audience, finding salable topics, writing query letters, and working with editors. But the major emphasis of the course will be on writing: Students will be expected to write several short articles and one major one, and they will be responsible for developing a marketing plan for the long article. The instructor of this course is the editor emeritus of *Notre Dame Magazine*. Open to American studies majors and journalism, ethics, and democracy minors by permission. Other applicants must submit writing samples for review.

JED 40105. Advanced Reporting

(3-0-3) Colwell

This is an advanced course in journalistic reporting and writing devoted to learning how to prepare, in a professional manner, in-depth articles on issues and events of community interest for Notre Dame and in this area. Emphasis will be on the techniques, ethics, and responsibilities of conducting interviews and research and crafting pieces for newspapers and other publications. Open to American studies majors and journalism, ethics, and democracy minors by permission. Other applicants must submit writing samples for review.

JED 40106. Media Ethics

(3-0-3) Storin

This course will examine the journalistic and ethical challenges that newsroom managers face as well as the issues that reporters in the field must tackle on a daily basis. Roughly half of the course will deal with case studies of ethical dilemmas and the other half will involve students in making choices for the front of the mythical newspaper. Although there will be readings from books on the topics, students will be expected to read *The New York Times*, *The South Bend Tribune*, and *The Observer* on a regular basis, especially on the class days when the front-page decisions will be made. The stories in those newspapers will provide the basis for those decisions. We will also consider how television deals with news on local and network levels.

JED 40107. Multimedia Journalism

(3-0-3) Collins

The 21st-century journalist needs to be comfortable with what is called “writing across the media” and can no longer be selective about which form of communication to build a career around. In many newsrooms, print journalists are now expected to perform on radio or in front of TV cameras, while the bylines of electronic journalists are turning up in newspapers and magazines. Such media “convergence” is already more the norm than the exception. On top of that, the Internet has become a major medium in its own right, encompassing different styles of communication. While the focus of this course will be on writing, it will expose students to a variety of media in an effort to prepare them for the reality of modern communications careers. The instructor of this course is the editor emeritus of *Notre Dame Magazine* and has had experience in several media. Open to American studies majors and journalism, ethics, and democracy minors by permission. Other applicants must submit writing samples for review.

JED 40108. Media Criticism

(3-0-3) Wycliff

An examination of the different types of criticism that has been—and is being—directed at American journalism. The class will consider the strengths, shortcomings, and significance of critics who analyze and assess press performance.

JED 40301. News Internship

(3-0-3)

Apprentice training with newspapers and other journalistic organizations. Satisfactory/Unsatisfactory credit only.

Department of Anthropology

ANTH 10109. Introduction to Anthropology

(7-0-3) Kuijt, Lende

This course deals with the nature of anthropology as a broad and diverse area of study. The anthropological study of humankind will be approached from the perspectives of physical anthropology; prehistory and archaeology; and linguistic anthropology and socio-cultural anthropology. The diversity of humankind will be explored in all its aspects from times past to the present.

ANTH 10195. Introduction to Anthropology Honors

(3-0-3) McKenna

Prerequisite: ALHN 13950 OR ALHN 195

Anthropology moves forward from the classification of our species in biological terms to explore, in theory and by empirical investigation, the particular forms of cultural expression that characterize the development of human societies and account for their richness and their remarkable variety. It addresses evolution and genetics, ecological adaptation, and the emergence of complex societies. It looks into language and other symbolic systems. It studies the vast domain of social and cultural life, from kinship to kingship and from cyborgs to shamans. Seminar format.

ANTH 13181. Social Science University Seminar

(3-0-3) Bellis, Kuijt

Anthropology, the holistic study of humans and their societies and cultures, is the focus of this seminar course. Through discussion and analysis of a variety of anthropology texts, this seminar course aims to develop writing skills among first-year students while exposing them to some central problems and issues within anthropology. Adopting an approach that reflects the four-field character of anthropology, the seminar will encourage students to explore topics such as: (1) anthropology as a way of knowing; (2) anthropology as an encounter with, and effort to explain, human diversity; (3) anthropology as a discipline that uniquely contributes to our understanding of the symbolic dimensions of human behavior and communication; (4) anthropology as a discipline that uniquely contributes to our understanding of human strategies for subsistence and survival; and (5) anthropology as a discipline that uniquely contributes to our understanding of human biological and cultural origins.

ANTH 20010. *Cine de la Raza: Latino Film*

(1-0-1)

This mini-course will explore the Latino experience from the perspective of contemporary Latino filmmakers. Ranging from cross-border organizing, to economic globalization, transnational communities, American society, and the impact of gentrification, Latino filmmakers are giving voice to the complexity of La Raza in the United States. This course will examine these themes through documentary, independent film, and lectures and discussion with the filmmakers themselves. Graded Satisfactory/Unsatisfactory.

ANTH 20105. Introduction to Human Ethology

(3-0-3)

This course explores the cultural and evolutionary origins of language, nonverbal communication, infant behavior, parenting, human aggression, sexual behavior, gender development, and human courtship rituals. Each subject is examined from a cross-species, cross-cultural, evolutionary, and developmental (including historical) perspective.

ANTH 20111. Anthropology of Human Sexuality

(3-0-3) Fuentes

This course seeks to examine human sexuality in an anthropological context. We will review sexuality in an evolutionary perspective via a comparison of nonhuman primate sexual behavior and the theoretical constructs surrounding adaptive explanations for human sexuality. The physiology of sex and the development of the reproductive tract will also be covered. The remainder of the course will consist of the evaluation of data sets regarding aspects of human sexual practice, sexual preference, mate choice, gendered sexuality, and related issues of human sexuality.

ANTH 20120. Current Topics in Bioanthropology

(3-0-3)

This course explores the latest developments in biological anthropology such as, but not limited to, aggression and cooperation in human and nonhuman primates, population genetics, human diversity, the concept of race, primate evolution and behavior, patterns of adaptation, and evolutionary medicine. Emphasis will be on the role of biological systems and evolutionary theory.

ANTH 20220. Alcohol and Drugs: Anthropology of Substance Use and Abuse

(3-0-3) Lende

This class addresses the use and abuse of psychoactive substances in different cultures. It integrates biological, historical, and sociocultural factors to present a holistic understanding of substance abuse, as well as how we might address the problems that result from use.

ANTH 20300. Current Topics in Cultural Anthropology

(3-0-3)

This course explores the latest developments in cultural anthropology such as, but not limited to, nationalism and transnationalism; colonialism and post-colonialism; political-economy; gender; religion; ritual; ethnicity; language; kinship; and social organization. Emphasis will be on social and cultural transformations in specific historical contexts.

ANTH 20330. Societies and Cultures of South Asia

(3-0-3)

This course provides a broad introduction to societies and cultures of South Asia (including India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, and the Maldives).

ANTH 20335. Peoples of Southeast Asia

(3-0-3)

This course will introduce Southeast Asia through close readings of important accounts of some of its peoples. It will examine the region's history, religions, and social organizations tracing themes and variations that give this region its unity and, for all its diversity and its many waves of immigration, make Southeast Asia a field of related cultures.

ANTH 20340. Japanese Society

(3-0-3)

This course presents a survey of the social structures and forms of expression that make up the complex society of contemporary Japan, using anthropological writings, history, reporting, film, and fiction.

ANTH 20350. Chinese Society and Culture

(3-0-3)

This course introduces students to the complexities of contemporary Chinese society in the context of the past. Topics covered include food, family and gender, political activity, ethnicity and identity, urban and rural life, work and unemployment, economic complexity, multilingualism, arts, religion, medicine and the body, and literature.

ANTH 20360. Societies and Cultures of Latin America

(3-0-3)

This course introduces students to the diverse cultures and societies of Latin America through historical, ethnographic, and literary study. Contemporary issues of globalization, violence, and migration will preoccupy the discussion of Central and South America and the Caribbean today.

ANTH 20400. Language, Culture, and Society

(3-0-3)

This course examines language and communication from an anthropological perspective. That is, we look at language as it is fully embedded in human culture and society rather than as an object in itself. A complete understanding of the range of language in human life requires some investigation of its variations and the meanings these variations have for speakers and hearers. Language and, secondarily, other communicative behavior have both referential meaning and also social and pragmatic meaning; they do things as well as mean things. Our goal in this course is to become aware of the many ways language functions in social

life, whether social actors are aware of these functions or not. Hence, we will read about investigations into language from a number of different perspectives, and will do some of our own investigations, helping to sharpen our appreciation of the ways of speaking observable around us. Topics will include (1) language, culture, and thought; (2) practicing ethnography in linguistic anthropology; (3) conversational analysis; and (4) language and identity.

ANTH 20502. Ancient Technology: Rocks to Silicon Chips
(2-0-2)

This class explores the social, cultural and intellectual contexts of ancient technologies. In this class students will learn when and how humans developed critical technologies in the past, and discuss how they have affected the world we live in today.

ANTH 20503. Archaeology: Myths and Facts
(3-0-3) Rowan

This course explores the public's perception of what archaeologists do and why they do it, and seeks to better understand the broader goals and contributions of the study of archaeology. We will draw on case studies from throughout the world, including examples from North America, Europe, Australia, and the Middle East.

ANTH 20510. Origins of Human Civilization
(3-0-3)

This course is an introduction to archaeology and to world prehistory. Themes include the origins of food production, the rise of cultural complexity, the peopling of the world, and the development of technology. The course covers cultural evolution from the invention of the first stone tools through the rise of ancient civilizations such as the Maya, Incas, Egyptians, and peoples of the Near East.

ANTH 20520. Archaeology of Egypt
(3-0-3) Chesson

The course focuses on key anthropological concepts, such as kinship, ritual, political economy, mortuary practices, cultural contact, and the future of Egyptian archaeology, by exploring case studies that highlight the extraordinary archaeological heritage of Egypt.

ANTH 20540. Ancient Cities and States
(3-0-3)

This course looks at the archaeology of ancient cities and states, with a special emphasis on those of the eastern Mediterranean and the Near East. It also explores theories about why ancient civilizations rose and fell.

ANTH 20550. Archaeology of Ancient Palestine
(3-0-3)

This course introduces students to the rich prehistoric and early historic archaeology of the southern Levant, the region encompassing modern Israel, Palestine, and Jordan.

ANTH 30001. Mesoamerican Art: Olmec and Their Legacy
(3-0-3)

This course will introduce the student to the Mesoamerican worldview by tracing the origins of Mexican art, religion, and culture from the development of the Olmec civilization up to Aztec times. Examination of the iconography and function of art objects through slide lectures, as well as hands-on, in-depth study of individual pieces of sculpture. A good visual memory is helpful.

ANTH 30101. Fundamentals of Human Evolution
(3-0-3) Rowan

This course deals with human evolution in both biological and cultural terms. Topics covered will include primate behavior, the mechanisms of evolution, the fossil record and the characteristics of prehistoric cultures.

ANTH 30102. Fundamentals of Archaeology
(3-0-3) Rotman

This course is an introduction to the methods, goals, and theoretical concepts of archaeology, with a primary focus on that practiced in the Middle East, North America, Central America, Europe, and Africa.

ANTH 30103. Fundamentals of Social and Cultural Anthropology
(3-0-3)

This course addresses the question of how and why cultures differ, the relationship between environment and culture, and how humans use culture to solve common problems. Students examine the cultural nature of language, personality, religion, economics, politics, family and kinship, play, and even deviant behavior.

ANTH 30104. Fundamentals of Linguistic Anthropology
(3-0-3)

An inquiry into the origins of language, the nature of meaning, the power of language, and how language systems are acquired and variously function in culture and society.

ANTH 30130. Biocultural Anthropology: Human Nature and Culture
(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)

This course will present the theoretical and empirical bases of biocultural anthropology, the integration of biological and cultural anthropology. Dichotomies such as nature versus nurture and mind versus body will be reconsidered in a biocultural perspective.

ANTH 30190. Infancy: Evolution, History, and Development
(3-0-3) McKenna

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 20105 OR ANTH 205 OR ANTH 305 OR ANTH 305A OR ANTH 305B) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

Explores aspects of infant biology and socio-emotional development in relationship to Western child care practices and parenting. Western pediatric approaches to infancy and parenting are evaluated in light of Western cultural history and cross-cultural, human evolutionary, and developmental data. A variety of mammals are included as a comparative background to explore the relationships between infant physiology, mental and physical health, and contemporary infant care giving concepts. Not open to students who have had ANTH 30194.

ANTH 30320. Native Peoples of North America
(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

This course offers a survey of the major groups with an emphasis on their forms of social organization; their political and economic patterns; and their technological, religious, and artistic realms. Beginning with archaeological and linguistic evidence that traces the process by which the American Indians came to occupy the continent, the presentation of material will then follow the classical "culture area" paradigm. This overview recognizes a set of 11 basic divisions such as Eastern Woodlands, the Great Plains, and the Northwest Coast.

ANTH 30330. Religion, Myth, and Magic
(3-0-3) Gaffney

The study of religious beliefs and practices in tribal and peasant societies emphasizing myths, ritual, symbolism, and magic as ways of explaining man's place in the universe. Concepts of purity and pollution, the sacred and the profane, and types of ritual specialists and their relation to social structure will also be examined.

ANTH 30335. Christianity, Colonialism, and Culture
(3-0-3)

This course examines Christian belief and practice in historically non-Christian areas, focusing on Africa and the Pacific Islands. Topics to be addressed include the lingering effects of European colonial missions, new forms of post-colonial Christianity, and the relationship of Christianity and culture.

ANTH 30345. Food and Culture

(3-0-3)

This course examines the many roles of food played in a variety of cultures. We consider food choices and taboos, religious and symbolic meanings of food, dining and social interactions, obesity and thinness, and the political and industrial issues of fast food and the slow food movement. There will be practical and field studies associated with the course. Materials fee \$30.

ANTH 30359. Peoples of Africa

(3-0-3) Bellis

An introduction to the societies of Sub-Saharan Africa. It examines cultures in present-day Africa as well as in the past in order to lend an understanding to the developmental processes that led to their modern forms, emphasizing the relation between a culture and its physical environment.

ANTH 30365. The Contemporary Middle East

(3-0-3)

Surveys Islamic civilization, the most important cultural influence in the Middle East, as context for discussion of the life of Middle Eastern peoples. Topics include the foundations of Islam, Muslim ethics, Sunni-Shi'a split, religious pilgrimage, ethnicity, ecological adaptations, religious brotherhoods and sisterhoods, Sufism, and concepts of the state.

ANTH 30370. Caribbean Diasporas

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 10195 OR ANTH 195)

This course explores the transnational orientations and the multidimensional consequences of movement from the Caribbean as it affects sites in Miami, London, Paris, or Brooklyn as well as Havana, Jamaica, Haiti, or Belize. Reading works of ethnography, fiction, and history; questions about the construction and reconstruction of family bonds; community identity; religion; political power; and economic relations will be treated in the domestic and the global context.

ANTH 30371. Caribbean Fiction

(1-0-1)

Caribbean writers are masters of sonority, eloquence, and irony. Their vivid, musical prose sings with Creole orality. Their bitter imagery simmers with the violence and struggle for freedom that define Caribbean colonial history. In this course we listen to diverse voices of male and female writers, of those at home in Barbados, Antigua, Trinidad, Martinique, Haiti, Cuba, and Puerto Rico and those in diaspora.

ANTH 30372. Creole Conversation

(1-0-1)

This course introduces students to the vivid, sonorous language of Kreybl, or Creole, the vernacular language of Haiti, Martinique and Guadeloupe. The program is primarily designed to meet the needs of those who plan to conduct research among Haitians in Haiti, the United States or other parts of the Haitian diaspora, and for those looking to develop or improve their language skills.

ANTH 30375. Culture and Conflict in the Pacific

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

Diverse cultures of the Pacific are examined in historical perspective, analyzing contemporary conflicts of military coups, crises of law and order, struggles for land rights, battles over nuclear testing, indigenous rights, relations between indigenous people and migrants, and the role of outside powers in Pacific Island states.

ANTH 30382. The Anthropology of Gender

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)

This course introduces students to the main issues and debates characterizing the anthropology of gender and explores how anthropologists have attempted to understand changing roles, sexual asymmetry, and stratification.

ANTH 30395. Russian Realms: Societies/Cultures of Eastern Europe and Beyond

(3-0-3)

This course explores the social structures, the historical contexts, and the symbolic universes of the peoples who either identify themselves as Russian or whose way of life has come to be deeply affected by the Russian tradition.

ANTH 30580. The Forager/Farmer Transition

(3-0-3)

Prerequisite: (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)

This course explores the transition from hunting and gathering ways of life to agricultural societies and systems of food production in the Old and New Worlds and the origins of food production in diverse areas as a long-term social, conceptual, and economic process.

ANTH 30590. Prehistory of Eastern North America

(3-0-3)

This course traces the development of a Native American culture from its earliest beginnings in North America to the time of European contact. Topics include Moundbuilders, agriculture, development of sophisticated societies, and why historic Native American tribes were so diverse.

ANTH 30591. Prehistory of Western North America

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 20501 OR ANTH 301) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)

Archaeological data and cultural life of prehistoric Western North America over the last 20,000 years will be covered. This course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated, diverse cultures of Native Americans.

ANTH 30592. Prehistory of the American Southwest

(3-0-3)

This course uses archaeological data and theory to explore the cultural life of prehistoric Southwest Americans over the last 12,000 years. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated and diverse cultures of the American Southwest. Students will explore cultural change, land-use patterns, economics, and political complexity, using information on environmental relationships, technology, and other aspects of material culture.

ANTH 35106. Primate Behavior

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)

This course will explore the similarities and differences in behavior among primates. Aspects of primate social interaction—mother/infant bonds, male/female interactions, dominance hierarchies, communication, reproductive strategies, and aberrant behaviors—will be explored in light of their relationship to human origins.

ANTH 35210. Health, Healing, and Culture

(3-0-3)

This course provides an introduction to the field of medical anthropology. Medical anthropology examines beliefs, practices, and experiences of illness, health, and healing from a cross-cultural perspective to show that illness, health,

medicine, and the body are shaped by social relationships and cultural values from the local level of the family and community to the global level of international development and transnational capitalism. This course will consider the ways in which medical anthropology has historically been influenced by debates within the discipline of anthropology as well as by broader social and political movements. Particular emphasis will be placed on the importance of viewing biomedicine as one among many culturally constructed systems of medicine. Some of the key issues which we will explore are: medical pluralism and therapeutic choice; biocultural studies; medicalization; the political economy of health and disease; the anthropology of the body; the role of medicine and disease in colonialism and postcolonial movements; and applied medical anthropology. The format of the course will combine lecture and discussion with in-class presentations. In addition, requirements will include an ethnographic research paper, a midterm, and a final exam.

ANTH 35250. Cultural Aspects of Clinical Medicine
(3-1-4)

The course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization and goals of the clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to transportation is necessary.

ANTH 35331. Creole Language and Culture
(3-0-3)

This course introduces students to the vivid, sonorous language of Kreyol, or Haitian Creole, and to the fascinating culture of its speakers. This intensive, beginning-level course is intended for students with no knowledge of Haitian Creole.

ANTH 35582. Archaeology of Ireland
(3-0-3)

Prerequisite: ANTH 30102 OR ANTH 327 OR ANTH 327A
This course examines the cultural and historical trajectory of the archaeology of Ireland from the Neolithic through the Viking period. Topics include the emergence of the unique systems of communities, the development of systems of metallurgy in the Iron Age, regionalism, monetary practices and ritual, and discussion of village life in ring forts during the Bronze Age.

ANTH 35588. Archaeology Field School
(3-0-3)

Three weeks of practical instruction in the methods and theory of archaeological survey, excavation and laboratory analysis. Students learn field techniques and apply them to investigations of both prehistoric and historic archaeological materials by working with artifacts collected during the field course. In addition to the basic archaeological techniques the class will introduce modern remote sensing methods, including lessons on how to use a total station (laser transit) and equipment for magnetic and resistivity surveys. Student teams will learn how to operate the geophysical survey instruments and will use the instruments to conduct geomagnetic and soil resistivity surveys of a portion of the archaeological features present, and the field school excavations will be designed to evaluate their theories. There are no prerequisites for this course, but prior exposure to an introductory course in anthropology or archaeology is helpful. In addition to tuition, this course requires payment of a laboratory/transportation fee.

ANTH 40303. Anthropology of Art
(3-0-3) Bellis

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 10195 OR ANTH 195)

This course will examine art as a functional part of culture from an anthropological point of view. Attention is given to evolution of art as part of human culture and to evolution of the study of art by anthropologists. Open to graduate students.

ANTH 40311. Topics in Social/Cultural Anthropology
(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)
This course explores the latest developments in social-cultural anthropology including, but not limited to, nationalism and transnationalism; colonialism and post-colonialism; political-economy; gender; religion; ethnicity; language; and medicine and the body. Emphasis will be on social and cultural transformations in specific historical contexts.

ANTH 40312. Topics in Asian Anthropology
(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)
This course explores the latest developments in the anthropology of Asian societies and cultures. The course may include the study of nationalism and transnationalism; colonialism and post-colonialism; political-economy; gender; religion; ethnicity; language; and medicine and the body. Emphasis will be on social and cultural transformations of Asian societies in specific historical contexts.

ANTH 40319. Multiculturalism
(3-0-3)

Prerequisite: (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)
This course explores the economic, state, and national conditions of multiculturalism as a social relation and semiotic form. Seminal questions include the issues of difference deployed in debates over multiculturalism and anthropology's location in them as a study of human diversity.

ANTH 40321. Religious Life in Asian Cultures
(3-0-3)

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 10109 OR ANTH 109)
This course examines diverse religious expressions and lives of contemporary Asian peoples from an anthropological perspective. This course explores topics such as ritual, ancestor worship, shamanism, spirit possession, divination, and festivals in changing Asian societies, including Japan, Korea, China, Malaysia, and India.

ANTH 40333. Gender and Violence
(3-0-3) Mahmood

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A)
This upper-level anthropology course focuses on the problematic intersection between gender and violence. The question of male aggression and female pacifism is explored, with attention to female fighters and male practitioners of nonviolence. Women in circumstances of war, trauma, and healing are studied for the insight such study may provide for peace-building initiatives. Gender in the military, gender and violence, ritual cross-culturally, and rape as a sociopolitical phenomenon are among the other topics considered. Primary source readings complement intensive class discussion; substantial writing and speaking buttress academic skills.

ANTH 40336. Gender and Power in Asian Cultures
(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)
This class studies the representations of women and men in different Asian societies and in different political, social, and economic contexts, and their effect on kinship, family, work, religion, and the state. Ethnographic studies will cover Japan, Korea, China, Malaysia, Indonesia, and India.

ANTH 40340. Native Americans in Fact and Fiction

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)

This course focuses on our images of Native Americans and how popular and scientific writing and film may have shaped these images. The course uses books and film displaying Native American stereotypes and compares them to ethnographic studies that reveal more realistically the diversity of Native American culture.

ANTH 40355. Race, Ethnicity, and Power

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)

Presents a review and discussion of social scientific research concerning the nature of race and ethnicity and their expression as social and cultural forces in the organization of multiethnic societies. The focus is multidisciplinary.

ANTH 40400. Perspectives in Anthropological Analysis

(3-0-3) Blum, Mahmood

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

The material to be covered in this course includes the seminal contributions to American and European anthropological thought as these emerged in approximate chronological order. Ideas about the place of human beings in nature, the uniqueness of the human condition, and the evolution of all nature dominated the intellectual ferment that gave rise to anthropology. This initial stage was followed by varied reactions to and revisions of the evolutionary scheme, including controversy over the culture concept and the inception of theoretical schools such as functionalism, historicism, materialism, and structuralism, as well as the advancement of systematic field research, the primary tool in anthropological study.

ANTH 40800. Topics in Biological Anthropology

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 30101 OR ANTH 329) OR (ANTH 30102 OR ANTH 327)

This course explores the latest developments in biological anthropology, including but not limited to aggression and cooperation in human and nonhuman primates, population genetics, human diversity, the concept of race, primate evolution and behavior, patterns of adaptation, and evolutionary medicine. Emphasis will be on the role culture plays in the development of biological systems and theory.

ANTH 40805. Humans and the Global Environment: Co-Evolution or Mutual Destruction?

(3-0-3)

All human populations, from the simplest to the most complex, interact with their natural environment. Humans alter the environment, and are in turn altered by it through biological or cultural adaptations. Global environmental changes helped to create and shape our species and modern industrial societies are capable of altering the environment on scales that have never been seen before, creating many questions about the future of human-environmental coexistence. This course explores the ways that humans are altering the global environment and the ways that global environmental changes alter humans in return. Four major topics are examined: global climate change, alterations of global nutrient cycles, biodiversity and habitat loss, and ecosystem reconstruction. Students will complete the course with an understanding of the metrics and physical science associated with each type of change, their ecological implications, and the ways in which environmental changes continually reshape human biology and culture. This course is for graduate students and upper-division undergraduates. This course meets a core requirement for GLOBES students.

ANTH 40810. Human Diversity

(3-0-3) Sheridan

Prerequisite: (ANTH 30101 OR ANTH 329 OR ANTH 329A)

Issues concerning the nature of human diversity (race, intelligence, sex, gender, etc.) are a continuing source of social and scientific debate. This course is designed to present the issues and methods used by physical anthropologists to study both the biological basis of human differences, as well as the ongoing process of human adaptation and evolution in response to climate, nutrition, and disease. Integration of the social, biological, and medical sciences will be employed to investigate modern human variation.

ANTH 40815. Advanced Perspectives on Human Evolution

(3-0-3)

This course takes an in-depth integrative approach to issues in human evolution. Beginning with an overview of current innovation and discourse in evolutionary theory we will move on to tackle various topical issues related to human evolutionary history and its relevance to being human today. Focal points of discussion will include; in-depth analyses of fossil hominid species and their ecologies, a detailed assessment of nonhuman primate behavior as used in modeling the patterns and contexts of human behavior, a review and analyses of current debate surrounding the origin of modern humans, and current topics in the field of human evolution and paleoanthropological theory. Students will be required to produce a focused research paper and be involved in course presentations and discussions. Readings will be drawn from relevant fields, including biology, anthropology, ecology, and occasionally, philosophy.

ANTH 40820. Evolutionary Medicine

(3-0-3)

This course will reconceptualize a variety of human diseases, syndromes and disorders from the standpoint of evolution, in the modern cultural context. The evolution of infectious diseases will be considered, especially the evolution of HIV and the role of antibiotics in promoting antibiotic-resistant strains of bacteria. Menopause, women's reproductive cancers, allergy, pediatric topics (colic, physiologic jaundice, sleep problems, SIDS), breast feeding, obstetrics, geriatric medicine, structural and genetic abnormalities, psychiatric disorders, psychological health, eating disorders, nutrition, obesity, myopia, emotional disorders, touch therapy, and massage will be examined in the context of this exciting and emerging new field. Four-person teams of students will explore one area of evolutionary medicine and present a joint poster session as a final project.

ANTH 40830. Transnational Societies and Cultures

(3-0-3)

This course analyzes how cultural identities and behaviors are formed in the context of global systems. Through specific case studies, students will explore how different social groups construct their cultures in interaction with other cultures, and how, in so doing, these groups are both responding to and shaping global agendas. Focusing on linkages between local and international systems, this course will investigate issues such as the globalization of Western media (especially cable TV, films, Internet); the rise of transnational corporations and their effects on indigenous economies; the anthropology of development; population displacement (e.g., refugee populations, migrant workers, and other deterritorialized communities); tourism and ecotourism and their effects on local populations; the growth of transnational social movements; the economics of the environment in global contexts; and the effects of "free trade" and structural adjustment policies in the Third World. This course will expose students to different theories of globalization, transnationalism, and modernity, and will discuss why the study of regional, national, and international linkages has become a critical component of contemporary anthropological research.

ANTH 40840. Person, Self, and Body

(3-0-3)

How is "person" different from "self"? What do these have to do with the body? In anthropological usage, the "person" is often regarded as public and the "self" as private, though we will explore this distinction in a variety of settings. The body seems straightforward enough, but anthropologists and other scholars have shown in recent decades that it is conceived of differently in different places. Some cultures see the self at the control tower operating the body; some see the self as the body. In some societies, people in social groups regard themselves as sharing bodily substance (as in southern India). In some societies a single physical ideal

shapes people's perception of themselves (as in the US), with many finding themselves falling short. In every society, there are norms that shape notions of the life cycle, thought and feeling, gender, sexuality, ethnicity, social class, power, morality, health and illness, and nation, and these intersect in fascinating ways with how people are seen both as individuals and as members of their social groups. We will read contemporary and classical theoretical works as well as ethnographic accounts of persons, selves, and bodies. Students will do projects of their own design, incorporating ideas from course material.

ANTH 40845. Subversive Culture

(3-0-3)

Every society has rebels—those who refuse to conform to the mainstream's rigid rules, aesthetics, and beliefs. From punk rockers, disgruntled artists, radical writers, and reclusive loners, to revolutionary guerrilla fighters and brick-throwing anarchists, such groups form niches that are defined by their exclusion from society. Some are content to remain safely out of sight, while others set out to confront and even destroy the social systems that persecute them. Anthropologists routinely analyze the structure of society, politics, and ritual, and explore systems of symbol and belief. Implied in any understanding of these structures is also anti-structure, marginality, resistance to and protest against the established norm. These reactive movements of anti, outside, underground, and fringe, and their demands for social transformation are often condemned by the mainstream as dissident, subversive, and dangerous, and are thus controlled, their actions punished. In this class, we will analyze forms of creative resistance and social protest in art, music, performance, literature, and popular culture, using examples from Cuba, South Africa, Russia, China, and the United States.

ANTH 40850. Cultural Memory

(3-0-3)

What is cultural memory? Where does it originate, and how is it shared, perpetuated, and altered? How and why is it important within processes of cultural production? Finally, when and how is it contested? Looking at examples from around the world through readings, films, slides, recordings, and other media, we will consider a variety of strategies humans use to instill a sense of socially and culturally shared memory, including ritual; performative traditions such as dance and theater; written and oral histories; art and literature; media and popular culture; museums and monuments; science and technology (particularly archaeology, craft production, and ecology); and certain aspects of everyday life, such as food, clothing, jokes, and the transference of knowledge. We will also discuss the political aspects of cultural memory.

ANTH 40855. Cultural Difference and Social Change

(3-0-3) Tsitsopoulou

This course is designed especially for students returning from summer service projects or study abroad programs in the developing world. Students can only enroll with the permission of the instructor. In the class, students will conduct research to better understand the sites that they visited during their overseas projects, orienting them in relation to broader global, regional, and national patterns. Course readings will cover such topics as world systems theory, globalization, development, NGOs, various understandings of "human rights," applied anthropology, activism, and the relation between cultural relativism and service. Students will develop three collaborative websites during the semester (although each student will receive individual grades for their work). These collective projects will present the student's own research interests based on their overseas experience, and will focus on the site where they worked, a problem that they observed in cross-cultural perspective, and an analysis of strategies for redressing this sort of problem. The overall goal of the course will be for students to gain an understanding of how social science analysis might help to understand and confront problems in cross-cultural contexts.

ANTH 40860. Genocide, Witness, and Memory

(3-0-3) Mahmood

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)
How are episodes of mass killing experienced, survived, and remembered? In this course we consider political, social, and cultural trauma as expressed in memoir, documentary, fiction, and academic text. Witness as an ethical stance is exam-

ined; the role of memory in shaping morality is questioned. (Does "Never Again" actually work?) We also look at the perpetrators of genocidal killing: who are they? What prompts their actions? Moreover: are any of us incapable of this kind of violence?

ANTH 40880. Household Archaeology

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 20510) OR (ANTH 20540 OR ANTH 340) OR (ANTH 30102 OR ANTH 327) OR (ANTH 30590 OR ANTH 389) OR (ANTH 35588 OR ANTH 388) OR (ANTH 40890 OR ANTH 473)

This course explores the theoretical and methodological challenges faced by archaeologists excavating ancient households. Students will explore the social, economic, political, and physical characteristics of households; the relationship between households and communities; and the contribution of household archaeology to architectural, artifactual, and social analyses of ancient communities.

ANTH 40885. Environmental Archaeology

(3-0-3)

Environments and human use of them have both changed dramatically over time. This course explores the relationships between past societies and the ecosystems they inhabited and constructed. It will show how archaeologists investigate the relations between past societies and their environments using concepts from settlement archaeology, human geography, and paleoecology (the study of ancient ecosystems). We will review theories and techniques used in environmental archaeology and will learn about new approaches for the study of prehistoric human ecology. Modern data processing techniques (such as geographical information systems, data base software, spatial statistics, and computer-aided mapping programs) will be introduced along with new theoretical approaches that attempt to decode the social meanings of built environments. The materials will be presented through a mixture of lectures, demonstrations, and assignments designed to introduce you to the basic concepts and techniques presented in the course. The term paper will explore some aspects of environmental archaeology of interest to the student.

ANTH 40890. Archaeology of Death

(3-0-3) Schurr

Prerequisite: (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

Our species is unique because it is the only species that deliberately buries its dead. Mortuary analysis (the study of burial patterns) is a powerful approach that archaeologists use for the study of prehistoric social organization and ideology. This course explores the significance of prehistoric human mortuary behavior, from the first evidence of deliberate burial by Neanderthals as an indicator of the evolution of symbolic thought, to the analysis of the sometimes spectacular burial patterns found in complex societies such as ancient Egypt and megalithic Europe. We will also examine the theoretical and practical aspects of the archaeology of death, including the applications of various techniques ranging from statistics to ethnography, and the legal and ethical issues associated with the excavation and scientific study of human remains.

ANTH 45075. Addiction Science and Values

(3-0-3)

Students take one of two paths through this course. One involves community-based learning; the other is purely academic. The two paths share common sessions during the first seven weeks of the class. These deal with best current clinical approaches to prevention of and recovery from drug abuse. The two paths diverge during the next five weeks when those on the CBL path in the course focus upon 2 hr/week observational visits to the South Bend Life Treatment Center for those recovering from substance abuse and dependence, while those who choose the academic path focus, during the second half of the semester, upon current field and laboratory research into the biological and cultural aspects of substance abuse and substance dependence. Students who enroll in the CBL course path must notify the instructor of that intent before the end of the spring semester, 2006.

ANTH 45308. Native North American Art

(3-0-3)

Prerequisite: (ANTH 30102 OR ANTH 327 OR ANTH 327A) AND ((ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A))
Traditional Native North American art will be studied through form, technique, and context, as well as the perception of this art as exemplified through changing content, technique, and context. Students will work with the collections in the Snite Museum of Art.

ANTH 45337. Film and Society: Americana

(3-0-3)

This course will examine the “American experience” via cinematic representation and analysis. It will center on the work of American directors whose films skirt the periphery of the mainstream and focus on American culture. Students will contextualize the films via a reader packet drawing on articles from anthropology, film studies, basic film production, and culture theory. Course work will include research papers and the production of a short visual narrative piece representing students’ conceptualizations of Americana.

ANTH 45339. Cultures of Fear: Horror Film

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)
This course will examine the construction and application of central themes in the scope of international horror cinema and how they reveal salient aspects of cultural similarities and differences, including gender, sexuality, violence, and socio-political climates.

ANTH 45390. Ethnographic Method and Writing for Change

(3-0-3)

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A) AND (ANTH 30101 OR ANTH 329 OR ANTH 329A OR ANTH 30102 OR ANTH 327 OR ANTH 327A OR ANTH 30104 OR ANTH 326 OR ANTH 326A)
The notion that a written text can itself be a “site of resistance,” a location where political commitment and rigorous scholarship intersect, undergirds this course on ethnographic method. We study the construction and interpretation of field notes, subjectivity and objectivity in research, ethical issues in fieldwork, feminist and postcolonial critiques of ethnographic practice, “voice” and oral history, and aspects of ethnographic inquiry that impact on change processes.

ANTH 45500. Theory and Method in Archaeology

(3-0-3)

Prerequisite: (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 10109 OR ANTH 109)
The practice of archaeological research will be covered, from the various methods of identifying sites in the field, to excavation procedures, to analysis of material in the laboratory. Useful to individuals in anthropology, history, theology, classics, and art history.

ANTH 45510. Historical Archaeology

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30101 OR ANTH 329) OR (ANTH 30102 OR ANTH 327) OR (ANTH 30103 OR ANTH 328) OR (ANTH 30104 OR ANTH 326)
This course examines the methodological and theoretical foundations for the archaeology of European colonization and the post-colonial material world. Course materials focus on material life and the diversity of sociocultural experiences in North America since 1492. The class examines how historical archaeologists have interpreted life in the world of global capitalism and colonization over the last half millennium and how archaeological insights can be used to understand and critique our own world. The distinctive analytical techniques of historical archaeology will be studied, including documentary research, artifact analysis methods, and field excavation techniques. The course will probe the interdisciplinary nature of historical archaeology, assess the social significance of archaeological knowledge, and scrutinize cultural, class, and gendered influences on archaeological interpretation.

ANTH 45817. Human Osteology

(3-1-4)

Prerequisite: (ANTH 30101 OR ANTH 329 OR ANTH 329A)
This is a lab-intensive course that explores the methods used in physical anthropology for studying individual human skeletal remains, as well as those employed to establish biocultural connections at the population level. Forensic techniques utilized in individual identification will be developed in the first third of the course.

ANTH 45818. Research in Biocultural Anthropology

(6-0-6)

Prerequisite: (ANTH 30101 OR ANTH 329 OR ANTH 329A)
The field school will engage students in an experiential learning environment that immerses them in anthropological method and theory. Using the large Byzantine St. Stephen’s skeletal collection as the cornerstone, historical and archaeological information will be synthesized in a biocultural reconstruction of ancient monastic life. Students will conduct original research and participate in a lecture program delivered by top scholars in the fields of biological anthropology, classics, and Near Eastern studies.

ANTH 45820. Researching Disease: Methods in Medical Anthropology

(3-0-3)

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30210 OR ANTH 310)
This class will provide extensive classroom and hands-on training in research methods for medical anthropology. It will place slightly greater emphasis on qualitative methods, such as participant observation and interviewing, but will provide an overview of quantitative methods (including building surveys and some basic statistical analysis). Students will learn by doing, conducting original research on contemporary health issues in the local community (such as HIV/AIDS and substance abuse).

ANTH 45830. Documentary: Critical Analysis and Method

(3-1-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)
We see documentaries in many different forms every day via journalism, reality television, the Discovery channel, and nonfiction film. This course turns a critical, anthropological, and methodological eye toward interpreting, constructing, and contextualizing the documentary.

ANTH 45832. Anthropology of War and Peace

(3-0-3)

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A) AND ((ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A))
This class will explore the human capacity for war and for peace. The course will explore the many forms of war, from tribal conflicts through guerrilla warfare to conventional and nuclear war. It will also study societies without war, the place of war and peace in human society, whether violence is inherent in human nature or learned, and what the future of war and peace is likely to be on our planet.

ANTH 45833. Global Crime and Corruption

(3-0-3)

Prerequisite: (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)
This class will look at what constitutes the illegal today; who is engaged in crime and corruption; and what kinds of economic, political, and social powers they wield. It will also look at the societies and cultures of “out-laws.”

ANTH 45835. Anthropology of Christianity

(3-0-3)

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

Christianity is a global religion but it takes radically different local forms. By examining diverse Christian communities past and present, the course aims to de-familiarize a religion that seems very familiar to many Americans. It gives particular attention to case studies from colonial and post-colonial contexts, including Africa, Latin America, Southeast Asia, and the Pacific Islands, but it also asks students to bring an anthropological lens to Christian ideology and practice closer to home.

ANTH 45839. Mexican Transnationalism in South Bend

(3-0-3)

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 20360 OR ANTH 361) OR (ANTH 47314 OR ANTH 414) OR (ANTH 40355 OR ANTH 431)

This course uses experiential learning in the Mexican community of South Bend in order to understand how Mexican migrants conduct their lives across the vast distances separating South Bend and their homeland.

ANTH 45842. Doing Things with Words

(3-0-3)

Prerequisite: (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A)

This course looks at some of the ways humans do things with words. Topics include religious language; silence; politeness and sincerity; truth, deception, lying, and cheating; linguistic variety, identity, and stereotypes; moral evaluations made of language; and language used for power and solidarity.

ANTH 45854. Museum Anthropology: An Introduction

(3-0-3)

Prerequisite: (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)

An introduction to the history, philosophy, and professional practices of museums. It includes an examination of the ethical and practical issues of museum work through readings, discussions, and hands-on experience.

ANTH 45855. Archaeology and Material Culture

(3-0-3)

Prerequisite: (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)

This will be an archaeology lab class that will provide an activity-based setting to explore the meanings and interpretations of archaeological artifacts. It will provide an in-depth introduction to basic laboratory methods for the organization, curation, and analysis of artifacts such as pottery, stone tools, metals, soil samples, and floral and faunal remains. Lab exercises will introduce course concepts that students will use to analyze a small collection of artifacts from an archaeological site.

ANTH 45856. Pottery in Archaeology

(3-0-3)

Prerequisite: (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 326 OR ANTH 326A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

In many archaeological sites, pottery is the most common type of artifact recovered. The analysis and interpretation of ceramic remains allow archaeologists to accomplish several goals: establish a chronological sequence, track interaction between different areas, and suggest what types of activities people may have conducted at the site. This course will focus on the ways that archaeologists bridge the gap between the analysis and the interpretation of ceramic data.

ANTH 45857. Archaeological Materials Analysis: Lithic Technology

(4-0-4)

Prerequisite: (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)

This course will cover laboratory procedures and techniques used in the analysis of a range of excavated chipped stone artifacts from prehistoric contexts. Students will participate in flintknapping practice and work intensively with several archaeological collections.

ANTH 45858. Archaeological Field School

(6-0-6)

Six weeks of practical instruction in the methods and theory of archaeological survey, excavation, and laboratory analysis. Students learn field techniques and apply them to investigations of both prehistoric and historic archaeological materials by working with artifacts collected during the field course. There are no prerequisites for this course, but prior exposure to an introductory course in anthropology or archaeology is helpful.

ANTH 45860. Food and Culture

(3-0-3)

Prerequisites: (ANTH 30103 OR ANTH 328 OR ANTH 328A) AND ((ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A))

This course examines the many roles of food played in a variety of cultures. We consider food choices and taboos, religious and symbolic meanings of food, dining and social interactions, obesity and thinness, and the political and industrial issues of fast food and the slow food movement. There will be practical and field studies associated with the course. Materials fee \$30.

ANTH 45862. Anthropology of Emotion

(3-0-3)

Prerequisite: (ANTH 30103 OR ANTH 326 OR ANTH 326A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

Do people within different cultural and historical contexts “feel” in the same ways? Are the emotions we recognize universal, or are they learned? How has language shaped the way we define and think about emotions, and what role do these ideas play in shaping our thinking about personhood and gender, our perceptions of the body, and our experiences of health and illness? This course addresses these questions by surveying the most important anthropological, historical, and psychological approaches to the study of emotion. We will also think about affect as that quality or state which exceeds or escapes being captured by categories, including nameable “emotions,” and which can never quite be completely controlled. The course will conclude with specific ethnographic and historical case studies, including examinations of love, anger, jealousy, sympathy, and shame. Course requirements include active class participation, several short exercises in methods, presentations, a midterm exam, and a final research paper on a course-related topic of each student’s choice.

ANTH 45870. Terrorism

(3-0-3)

Prerequisite: (ANTH 30103 OR ANTH 328 OR ANTH 328A)

Looking at terrorism through the anthropological lens means studying violent actors close up and face-to-face. It also means exploring the culture of counter-terrorism, with its own discourse, belief system, and rituals. This course questions basic assumptions of the “war on terror,” using ethnographic literature to challenge conceptions and policies on terrorism today. Is “terrorism” in fact a definable term? How can we use the experience-near methods of anthropology to study people cognitively and politically placed as irretrievably distant? Differences among terrorism, crime, and revolution are explored through examination of specific cases. Building peace in a climate of violence is the ultimate aim of our study.

ANTH 45880. Archaeology of Gender

(3-0-3)

Prerequisite: (ANTH 30101 OR ANTH 329 OR ANTH 329A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A)

This course will consider the historical and theoretical foundations of creating an engendered past, the methodological and practical aspects of “doing” engendered archaeology, and the intersection between political feminism, archaeological knowledge production, and the politics of an engendered archaeology.

ANTH 46100. Directed Readings in Biological Anthropology

(V-0-V)

Intensive independent readings on a special problem area in biological anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46110. Directed Readings in Bioarchaeology

(V-0-V)

Intensive independent readings on a special problem area in biological anthropology and/or archaeology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46200. Directed Readings—Medical Anthropology

(V-V-V)

Intensive independent readings on a special problem area in medical anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46300. Directed Readings in Socio-cultural Anthropology

(V-0-V)

Intensive independent readings on a special problem area in socio-cultural anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46400. Directed Readings—Linguistic Anthropology

(V-V-V)

Intensive independent readings on a special problem area in linguistic anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46500. Directed Readings in Archaeology

(V-0-V)

Intensive independent readings on a special problem area in archaeology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48100. Directed Research in Biological Anthropology

(V-0-V)

Intensive independent research on a special problem area in biological anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48110. Directed Research in Bioarchaeology

(V-0-V)

Intensive independent research on a special problem area in biological anthropology and/or archaeology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48120. Directed Research—Sleep Lab

(V-0-V)

Intensive independent research at the Mother-Baby Behavioral Sleep Laboratory about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48200. Directed Research—Medical Anthropology

(V-V-V)

Intensive independent research on a special problem area in medical anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48300. Directed Research in Socio-Cultural Anthropology

(V-0-V)

Intensive independent research on a special problem area in socio-cultural anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48310. Directed Research—Visual Anthropology

(V-V-V)

Intensive independent research on a special problem area in visual anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper or produce a video.

ANTH 48400. Directed Research—Linguistic Anthropology

(V-V-V)

Intensive independent research on a special problem area in linguistic anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48500. Directed Research in Archaeology

(V-0-V)

Intensive independent research on a special problem area in archaeology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48900. Anthropology Senior Thesis

(V-0-V)

This course provides the student with the opportunity for independent study and the development of skills in research and writing. The effort is the student's own, from the choosing of a topic to the conclusion presented in the final paper. A thesis director is chosen to guide the student and provide assistance.

ANTH 56100. Directed Readings in Biological Anthropology

(V-V-V)

Intensive independent readings on a special problem area in biological anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

Department of Art, Art History, and Design

See also [Art Studio](#) and [Design](#).

ARHI 13182. Fine Arts University Seminar

(3-0-3) Rosenberg

University seminars will address a variety of topics in the history of art depending on the interests of the professor. These courses require several short papers as well as a final written exercise appropriate to the material.

ARHI 20100. Introduction to Ancient Greece, Rome, Egypt

(3-0-3)

This course will examine the origins of western art and architecture, beginning with a brief look at the Bronze Age cultures of the Near East and Egypt, then focusing in detail on Greece and Rome, from the Minoan and Mycenaean world of the second millennium BCE to the rule of the Roman emperor Constantine in the fourth century CE. Among the monuments to be considered are ziggurats, palaces, and the luxuriously furnished royal graves of Mesopotamia; the pyramids at Giza in Egypt and their funerary sculpture; the immense processional temple of Amon at Luxor; the Bronze Age palaces of Minos on Crete—the home of the monstrous Minotaur—and Agamemnon at Aycanae, with their colorful frescoes and processional approaches; the great funerary pots of early Athens and the subsequent traditions of Red and Black Figure vase painting; architectural and freestanding sculpture of the Archaic and Classical periods; the Periclean Acropolis in Athens, with its monumental gateway and shining centerpiece, the Parthenon; and finally, among the cultural riches of Rome, the painted houses and villas of Pompeii; the tradition of republican and Imperial portraiture; the Imperial fora; the exquisitely carved Altar of Peace of Augustus; the Colosseum; and the Pantheon of the Philhellene Emperor Hadrian.

ARHI 20300. Introduction to Renaissance Art

(3-0-3)

This course will survey the major trends in the art of Italy and Northern Europe from roughly 1300 to 1575. It will concentrate on such major figures as Giotto, Donatello, Masaccio, Botticelli, Raphael, Michelangelo, and Titian in Italy, and the Limbourg Brothers, Jan van Eyck, Rogier van der Weyden, Hieronymus Bosch, Albrecht Durer, Mathias Grunewald, and Pieter Brueghel in the north. It will consider such themes as artistic production and technique, public and private spirituality, naturalism, narrative, and the changing status of the artist.

ARHI 20310. Survey of Italian Renaissance Art

(3-0-3)

Open to all students. This course will examine the painting, sculpture, and architecture produced in Italy from the very end of the 12th through the beginning of the 16th century, from Giotto's Franciscan spirituality to Michelangelo's heroic vision of man and God. A wide variety of questions will be considered in the context of this chronological survey, including changing conventions of representation, the social function of art, and the impact of the Renaissance ideology of individual achievement on the production of art and the role of the artist.

ARHI 20362. European Art and Architecture of the Seventeenth and Eighteenth Centuries

(1-0-3) Coleman

This course will survey major stylistic trends in 17th- and 18th-century painting, sculpture, and architecture in Italy, Spain, France, the Low Countries, England, and Germany. The course will begin with the art of the Counter-Reformation in Italy and will end with the Age of the Enlightenment, encompassing the reigns of Pope Urban VIII to the death of Louis XVI. Stylistic trends such as the Baroque, Rococo, and the origins of Neoclassicism will be discussed through the works of such diverse artistic personalities as Bernini, Caravaggio, Gentileschi, Velasquez, Poussin, Rembrandt, Rubens, Wren, Hogarth, Reynolds, Watteau, Boucher, Fragonard, Robert Adam, Neumann, Tiepolo, and Zimmermann. Discussion will also focus on the impact on art and artists by religious orders, emerging modern European states, capitalism, and global expansionism.

ARHI 20420. Nineteenth-Century European Art and Architecture

(3-0-3)

This course will survey the major monuments of painting, sculpture, and architecture that were produced in the dynamic 100 years following the French Revolution. We will investigate how artists and architects envisioned a new modern society, at the same time that the old social structures and supports crumbled around them. We also will consider how new materials and experimental techniques contributed to ways of representing the experience of modern life.

ARHI 20440. Introduction to Twentieth-Century Art

(3-0-3)

This course provides an introduction to art, aesthetic philosophy, art criticism, and cultural politics from 1900 to the present. European and American art are the primary focus. Rather than a mere chronological survey of artistic movements, the course addresses a range of conceptual problems to engage students in different modern methods (Marxist, psychoanalytic, formal, feminist and so forth) for interpreting art and its history. Painting, sculpture, photography, video, and graphic design are among the media analyzed. Among the artists studied are Henri Matisse, Pablo Picasso, Georgia O'Keeffe, Alexander Rodchenko, Max Ernst, Jackson Pollock, Andy Warhol, Judy Chicago, Cindy Sherman, and others. Lectures, class discussions of assigned readings, and museum visits are key components of the course.

ARHI 20441. Twentieth-Century Art I: 1900–55

(3-0-3)

This course focuses on early 20th-century art and cultural politics in Europe and the US. In the early modern period, many ambitious and innovative artists strove to destroy old models of art, replacing them with models that advocated revolutionary forms for a new, imaginary society. At other times, artists employed art to undermine accepted norms of bourgeois culture and to liberate art and experience from convention. These themes are addressed in this course, along with the contradictory reality in which the art arose: an era defined by both optimism and fear, technological progress and massive wars, violent racism, and political liberation. Among the selected artists analyzed are Pablo Picasso, Henri Matisse, Piet Mondrian, Marcel Duchamp, Hannah Hoch, Lyubov Popova, Salvador Dali, Walter Gropius, Diego Rivera, and Jackson Pollock.

ARHI 20442. 20th-Century Art II: 1955 to present

(3-0-3) Cushwa

This introductory course is subtitled "Techno-Capitalism and the Art of Accommodation." The post-World War II era, particularly in the United States, is marked by the greatest expansion of corporate and consumer capitalism in history. Massive wars are fought to defend capitalist ideology. (A case in point is the tragic Vietnam War.) How has art figured into these social transformations? Has art protested these conditions or easily accommodated itself to overpowering economic, political, and legalistic techno-capitalist regimes? These questions arise throughout this course, which concentrates on selective artistic events in the United States and Europe during the second half of the 20th century. Movements considered include pop art, minimalism, op art, arte povera, postminimalism, earth art, conceptual art, photo-realism, video and performance art, and other recent picture/theory approaches to art making. This course focuses on recent developments in painting and sculpture. It also examines associated theories of art criticism.

ARHI 20500. Introduction to Art and Catholicism

(3-0-3)

This undergraduate lecture/discussion course will give students the opportunity to analyze and discuss the history of Catholic doctrine as it pertains to the visual arts. From the Council of Elvira in AD 306 to John Paul II's "Letter to Artists" of 1999, Catholicism has engaged with and debated the role of the arts as a legitimate vehicle for spiritual experience and theological knowledge. In this course, we will examine the changing, complex, and various ideas that have been brought to the question of the function of art in the Church. It will become clear that Catholic attitudes to the arts have been subject to a range of influences that have helped shape a still fluid and potential relationship between Catholicism and art. Among other topics we will examine the accommodation of traditional pagan practices in Late Antiquity; the impact of Byzantine and Carolingian theological discourse on the arts; Mendicant thought and practice regarding the arts; lay piety in the Later Middle Ages; issues raised by the Reformation; the Council of Trent,

and the Counter-Reformation; the implications of Modernism; neo-Thomist aesthetics; and the aftermath of Vatican II. In all instances, the course will be shaped by the discussions of primary readings (in translation when necessary) that will set these texts in a context that is social, intellectual, theological, and cultural. Each reading will then lead to an examination of the artistic environment that preceded and succeeded the ideas shaped by these texts. It is expected that students will leave this course with a rich knowledge of the central ideas and works of art that have come to shape the continuing dialogue between Catholicism and art.

ARHI 20510. Understanding Museums

(3-0-3)

This course is designed to present the museum as a resource from the past, present, and future for learning and enjoyment. It introduces the student to the issues that challenge art museums in general and the Smithe Museum of Art in particular. It provides the tools that make a museum visit more meaningful and immediate.

ARHI 20830. Chicano Art Survey

(2-0-2)

The student will investigate the social turmoil and conditions of Chicano people that gave rise to the Chicano Art Movement. The course will illuminate the fundamental concerns to the artist and why the mural and the poster were chosen to confront these conditions. The original intentions of the artists and the direction of their work has taken will be examined and analyzed within this social context.

ARHI 30101. Hellenistic and Roman Art and Architecture

(3-0-3)

This course explores the architecture, urban planning, sculpture, and painting of Hellenistic Greece and Rome, from the time of Alexander the Great in the fourth century BCE to the reign of the Roman emperor Constantine in the fourth century CE. The art and architecture of Greece and Rome will be analyzed as expressions of their culture and time and as tools for understanding these cultures more completely. A variety of themes will be addressed, including changing conceptions of monumentality in art and architecture; imperial propaganda in art, architecture, and religion; technology as inspiration for new conceptions of art and architecture; the contrasting natures of Greek and Roman art and culture; the influence of Greek culture on Rome; and the nature and significance of the ever-changing mixture of Greek and native Italic elements in Roman art and architecture.

ARHI 30120. Survey of Greek Art and Architecture

(3-0-3)

This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period, from the eighth through the second centuries BC, with some consideration of prehistoric Greek forebears of the Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes towards the gods, human achievement, and the relationship between the divine and the human.

ARHI 30130. Etruscan and Roman Art and Architecture

(3-0-3)

Open to all students. Roman Art of the Republic and Empire is one focus of this course, but other early cultures of the Italian peninsula and their rich artistic production are also considered. In particular, the arts of the Villanovans and the Etruscans are examined and evaluated as both unique expressions of discrete cultures and as ancestors of and influence on Rome. The origins and development of monumental architecture, painting, portraiture, and historical relief sculpture are isolated and traced from the early first millennium BC through the early fourth century of the modern era.

ARHI 30200. Introduction to Medieval Art

(3-0-3) Rowe

This course will provide an introduction to the visual arts of the period c. AD 300 to c. AD 1300. In the course of the semester, we shall devote much time to considering the possibility of a history of Medieval art, as the objects and practices of the Middle Ages will be shown to make our assumptions about the nature of art history problematic. Working from individual objects and texts we will construct a series of narratives that will attend to the varieties of artistic practices available to the Middle Ages. From these, it will be shown that art was a vital,

complex, lucid and formative element in the societies and cultures, both secular and sacred, that shaped this period.

ARHI 30202. The Contest of Word and Image in Early Medieval Art
(3-0-3)

This course will introduce students to the architecture of the Middle Ages (ca. 300-1400). This introductory course will begin with early Christian architecture and culminates in the great Gothic Cathedrals of northern Europe. Students will not only be invited to consider the development of the architectural forms of the church building, but will also be able to consider the degree to which the changing nature of the church building reflects broader issues in the history of Christianity in the Middle Ages.

ARHI 30213. Art into History: Byzantine

(3-0-3) Barber

Byzantine art has often been opposed to the traditions of Western naturalism, and as such has been an undervalued or little known adjunct to the story of Medieval art. In order to develop a more sophisticated understanding of this material, we will examine the art produced in Byzantium in the period from the ninth to the 12th century, a period that marks the high point of Byzantine artistic production and influence. Stress will be placed upon the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear upon our various analyses of material from all media. How we, as art historians can write the history of this rich culture will be a central issue in this course.

ARHI 30240. Romanesque Art

(3-0-3)

This course examines sculpture, architecture, manuscript illumination, and mural painting along with the arts produced for church and court treasuries in Western Europe during the 11th and 12th centuries. Pilgrimage to the holy shrines, the veneration of saints, and crusades to Jerusalem are among the issues discussed in relation to the arts. Monastic and ecclesiastical reform, heresy, and renewed interest in antiquity are also considered.

ARHI 30250. Gothic Art

(3-0-3)

It was during the Gothic period, stretching approximately from the 12th to the 15th centuries, that artists raised their social status to a higher level and produced a greater quantity of works than ever before seen in the Christian West. The architectural forms that we identify as characterizing the Gothic style, such as pointed arches, flying buttresses, pinnacles, and quatrefoils were applied not only to buildings, but to altarpieces, illuminated manuscripts, liturgical objects, and even to domestic items such as spoons, beds, and chests. This style has a powerful legacy, and has been frequently revived to various purposes in the modern era. In this course we analyze representative examples of Gothic art and architecture in light of their production at a time of great social, intellectual, religious, and political dynamism and upheaval.

ARHI 30311. Fifteenth-Century Italian Renaissance Art

(3-0-3)

This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and audience, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

ARHI 30313. High Renaissance and Mannerist Art

(3-0-3) Coleman

Leonardo, Michelangelo, Bramante, and Raphael provide the basis of study of one of the most impressive periods of artistic activity in Italy - the High Renaissance in Rome and Florence. The course also investigates the origins of Mannerism in the excessive achievements of Jacopo Pontormo, Rosso Fiorentino, and the succeeding generation of late-Renaissance maniera artists who helped to formulate a new courtly style.

ARHI 30340. Survey of Baroque Art

(3-0-3)

This course will examine the art of Europe during the 17th century. The first third of the semester will be devoted to the work of Counter-Reformation Italy and the work of individual artists such as Caravaggio and Gian Lorenzo Bernini. The second third of the term will focus on Spanish painting, particularly the work of Francisco Zurbaran and Diego Velazquez. The final section of the course will consider painting in the Low Countries looking at the art of Rubens, Rembrandt, Vermeer, and others. Among the issues that will be addressed are art and spirituality, shifting modes of patronage, art and politics, and definitions of gender.

ARHI 30350. Survey of Italian Baroque Art: From Caravaggio to Tiepolo

(3-0-3) Coleman

This course surveys Italian painting, sculpture, and architecture of the 17th and 18th centuries, a period that also witnessed the foundation and suppression of the Jesuit Order, the Counter-Reformation, absolute monarchy, and democratic nations. Thus, the course begins with the “new Rome” of Pope Sixtus V, which attracted pilgrims and artists from all over Europe, and ends with the early years of Enlightenment. From Northern Italy came Caravaggio and the Carracci, artists who were responsible for creating a new style based upon High Renaissance principles and a new kind of naturalism derived from the study of life. There was Bernini, whose architectural and sculptural monuments almost single-handedly gave Rome its Baroque character. Other artists and architects of this era under discussion include such diverse personalities as Borromini, Guarini, Algardi, Artemisia Gentileschi, and the great ceiling painters Pietro da Cortona, Baciccio, Pozzo, and Tiepolo.

ARHI 30360. The Age of Rembrandt: Northern Baroque Painting

(3-0-3)

Epitomized by the self-conscious art of Rembrandt, Northern Baroque painting and printmaking not only became a domestic commodity sold in a more modern-looking marketplace, it also continued to serve its traditional political, moral, and spiritual functions. This course will concentrate on paintings and prints produced in Flanders, Spain, and the Dutch Republics during the seventeenth century, an era of extraordinary invention. The work of artists such as Rubens, van Dyck, Velazquez, Zurbaran, Leyster, Hals, and Rembrandt will be considered in the context of a number of interrelated themes including the business of art, the status of the artist, art in service of the state, the rise of genre, gender stereotypes, allegory, and art and religion and spirituality.

ARHI 30417. British Art

(3-0-3) Pyne

This course focuses on the dynamic between art and society in the period in which the Industrial Revolution shaped the face of modern Britain. We will examine paintings and architectural monuments that register the devastating human consequences of modernization during this 100-year period. As we survey the response of British society to the forces of industrialization, our themes will be the worship of science and progress; the Romantic discovery of nature, the imagination, and the exotic; images of the rural and urban poor; the new constructions of masculinity and femininity; the return to the Middle Ages for sources of national identity and social reform. The principal artists discussed will be Joseph Wright of Derby, William Blake, John Constable, Joseph Mallord William Turner, Edwin Landseer, the Pre-Raphaelites, and William Morris.

ARHI 30420. Nineteenth-Century European Painting

(3-0-3)

This survey of 19th-century painting treats the major figures of the period within the context of the social, political, and intellectual ferment that shaped the culture—primarily, the numerous political revolutions and the rise of industrial capitalism and the middle class in France, England, and Germany. Among the artistic movements discussed are neoclassicism, romanticism, realism, pre-Raphaelitism, impressionism, and symbolism. Some of the major themes addressed are the relationships between tradition and innovation, between the artist and public, and between gender and representation, as well as the multiple meanings of “modern” and “modernism.” The class will visit the Snite Museum of Art on occasion to discuss special exhibitions related to topics in the course.

ARHI 30441. Twentieth-Century Art I: 1900-55

(3-0-3)

This course focuses on early 20th-century art and cultural politics in Europe, Russia, and the US. In the early modern period, many of the most ambitious and innovative artists strove to destroy old models of art, often replacing them with models that advocate revolutionary forms for a new, imaginary society. At other times, artists have employed art to undermine accepted norms of bourgeois culture and to liberate art and experience from convention. These are themes addressed in this course, along with the contradictory reality in which the art arose: an era defined by massive wars, racist ideologies, and violent suppressions. Among the selected artists analyzed are Pablo Picasso, Henri Matisse, Piet Mondrian, Marcel Duchamp, Hannah Hoch, Lyubov Popova, Salvador Dali, Walter Gropius, Diego Rivera, and Jackson Pollock.

ARHI 30502. The Art and Literature of *Metamorphoses*

(3-0-3)

This course begins with a critical study of Ovid’s great poem, the *Metamorphoses*. The poem itself became a subject of metamorphosis in poetry and art in the hands of such figures as Statius, Dante, Botticelli, Bernini, Rembrandt, Hughes, and Heaney. The course addresses the modeling of transformation within the literary text by examining first Ovid and his sources, and second, adaptations of his poem by writers such as Shakespeare and Kafka. Connections with folklore, magic, and religion are explored. The graphic arts receive equal consideration as the course explores how Ovid’s ideas of the transformation of the body, the capacity of the human body for allegory, and the fragility of identity have influenced later artists and authors.

ARHI 30521. The Art of Mythology

(3-0-3)

Open to all students. This cross-disciplinary class is an exploration of the representation of classical myth in Western art and literature, ranging from the seventh century BCE to the 18th century CE. Beginning with mythological subjects in the political and religious sculpture, temple architecture, and vase decoration of Ancient Greece, we will move on to study Roman painting and sculpture, medieval Ovidian allegory, the Renaissance reinvention of classical types, and 18th-century neoclassicism. We will compare literary and visual narratives, evaluating the discursive modes of each, and analyzing how and why poets, philosophers, artists, sculptors, and architects selected and adapted the episodes that they did. Primary readings will include selections from Greek and Roman epic, lyric, and dramatic poetry, Greek and Roman philosophical mythology, and early analyses of the relationship between art and myth such as Philostratus’ *Eikones*. Among the artistic works that we will examine will be Raphael’s Roman cycles, Bellini and Titian’s poesie, and Bernini’s sculpted dramas. We will consider the erudite contexts for such works, including gardens, drawing rooms, princely residences, and civic institutions. We will discuss the connection between political power and myth, and concepts such as heroism, metamorphosis, and earthly and divine love. One aim of this class will be to identify the explanatory character of myth, and of storytelling within culture, as means of historical self-understanding, self-revelation, and catharsis.

ARHI 30522. Fashioning Identity in American History

(3-0-3)

This course will focus on dress and material/visual culture in colonial North America. It will introduce methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies. In our focus on the colonial period (especially the 18th century), we will analyze the economics of dress (the production, marketing, and acquisition of cloth and clothing) and will assess the importance of fashion to commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class, and ethnic encounters.

ARHI 30550. History of Photography

(3-0-3) Moriarty

Open to all students. This course deals with the development and use of photography as an artistic medium from time of its invention in the mid-19th century up to the present moment. Besides viewing slides, the student will be able to view a large number of original photographs from the Snite Museum of Art.

ARHI 30801. Mesoamerican Art: Olmec and Their Legacy

(3-0-3)

The Olmec civilization was the mother culture of Mesoamerica, and beginning in 1500 BC. This course will introduce the student to the Mesoamerican worldview by tracing the origins of Mexican art, religion and culture from the development of the Olmec civilization up to Aztec times.

ARHI 30830. Mexican Photography

(3-0-3)

This course examines Mexican photography from the 19th century on to contemporary works. Theoretical issues pertaining to the histories of photography, with emphasis in documentary photography, photography as an art form, photojournalism and photo manipulation are part of this course. Key films, such as *Mala Hierba* from 1940 and *Canoa* (1970), will be discussed in the context of the relation they have with still images. Photography and film will be situated to particular photographic moments and specific socio-cultural and political developments in Mexico. Critical questions on the role of photography in the formation of national narratives and the role of photographers in the life of art and culture will be addressed. Works by Romulado Garcia, Agustin Casasola, Manuel Alvarez Bravo, Nacho Lopez, Lola Alvarez Bravo, Tina Modotti, Lourdes Grobet, Graciela Iturbide, and other artists will be discussed.

ARHI 30840. Aesthetics of Latino Cultural Expression

(3-0-3) Cardenas

This course analyzes the philosophy, principles, and practice underlying the social and political aspects of Latino art. We will approach this by examining a range of topics, including Chicano and Puerto Rican poster art, mural art, Latina aesthetics, and border art.

ARHI 30841. Undocumented Immigrants in the American Imagery

(2-0-2) Cardenas

This course examines the social realities of undocumented immigration to the United States. Special attention will be given to the historical presence and current dynamics of migration in the contemporary era drawing on the visual record of migration from the western hemisphere. A film series will accompany this course; attendance is required.

ARHI 33835. Topics in Latino Art

(3-0-3)

Topics course on specific aspects of Latino art. Topics may vary depending on instructor.

ARHI 40121. Greek Architecture

(3-0-3) Rhodes

Open to all students. In this course the development of Greek monumental architecture, and the major problems that define it, will be traced from the 8th to the 2nd centuries BC, from the late Geometric through the Archaic, Classical, and Hellenistic periods. Among themes to be related are the relationship between landscape and religious architecture, the humanization of temple divinities, the architectural expression of religious tradition and even specific history, architectural procession and hieratic direction, emblem and narration in architectural sculpture, symbolism and allusion through architectural order, religious revival and archaism, and the breaking of architectural and religious canon.

ARHI 40210. Late Antique and Early Christian Art

(3-0-3)

Art in late antiquity has traditionally been characterized as an art in decline, but this judgment is relative, relying on standards formulated for art of other periods. Challenging this assumption, we will examine the distinct and powerful transformations within the visual culture of the period between the third and the eighth centuries AD. This period witnesses the mutation of the institutions of the Roman Empire into those of the Christian Byzantine Empire. The fundamental change in religious identity that was the basis for this development had a direct impact upon the visual material that survives from this period, such that the eighth century witnesses extensive and elaborate debates about the status and value of religious art in Jewish, Moslem, Byzantine, and Carolingian society. This course will examine the underlying conditions that made images so central to cultural identity at this period.

ARHI 40212. Byzantine Art

(3-0-3)

Open to all students. Byzantine art has often been opposed to the traditions of Western naturalism, and as such has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material we will examine the art produced in Byzantium in the period from the ninth to the twelfth century, a period that marks the high point of Byzantine artistic production and influence. Stress will be placed upon the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear upon our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue of this course.

ARHI 40220. Early Medieval Art

(3-0-3)

This course will investigate the art produced in Western Europe between the seventh and 11th centuries. Often characterized as a Dark Age, this period in fact demonstrates a fertile, fluid, and inventive response to the legacy of Late Antique Christianity. The course will focus on the production and reception of illuminated manuscripts, using facsimiles of these works as a basis for teaching. Students will become familiar with art-historical methods for the examination of such works, and will be invited to contemplate the interplay of word and image that these books propose. Categories of material discussed include: Insular art, the Carolingian scriptoria, Ottonian imperial image making, Anglo Saxon art, Spanish Apocalypses, and Italian Exultets.

ARHI 40311. Fifteenth-Century Italian Art

(3-0-3) Rosenberg

Open to all students. This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and audience, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

ARHI 40312. Venetian and Northern Italian Renaissance Art

(3-0-3)

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan, Parma, Varallo, and Vercelli also provide insight into the traditions of the local schools and their patronage.

ARHI 40313. High Renaissance and Mannerist Art

(3-0-3)

Leonardo, Michelangelo, Bramante, and Raphael provide the basis of study of one of the most impressive periods of artistic activity in Italy—the High Renaissance in Rome and Florence. The course also investigates the origins of mannerism in the excessive achievements of Jacopo Pontormo, Rosso Fiorentino, and the succeeding generation of late-Renaissance maniera artists who helped to formulate a new courtly style.

ARHI 40320. Northern Renaissance Art

(3-0-3)

This course traces the development of painting in Northern Europe (France, Germany, and Flanders) from approximately 1300 to 1500. Special attention is given to the art of Jan Van Eyck, Rogier van der Weyden, Heironymous Bosch, and Albrecht Durer. Through the consideration of the history of manuscript and oil painting and the graphic media, students will be introduced to the special wedding of nature, art, and spirituality that defines the achievement of the Northern Renaissance.

ARHI 40360. Age of Rembrandt: Northern Baroque

(3-0-3) Rosenberg

Open to all students. Epitomized by the self-conscious art of Rembrandt, Northern Baroque painting and printmaking not only became a domestic commodity sold in a more modern-looking marketplace, it also continued to serve its traditional political, moral, and spiritual functions. This course will concentrate on paintings and prints produced in Flanders, Spain, and the Dutch Republics during the 17th century, an era of extraordinary invention. The work of artists such as Rubens, van Dyck, Velázquez, Zurbarán, Leyster, Hals, and Rembrandt will be considered in the context of a number of interrelated themes, including the business of art, the status of the artist, art in service of the state, the rise of genre, gender stereotypes, allegory, and art, religion, and spirituality.

ARHI 40361. Eighteenth-Century European Art

(3-0-3)

Profound and universal inquiry into all aspects of knowledge marked the history of the century of Enlightenment and the Grand Tour. The rise of the collective idea of nature, the study and instrumentality of the antique, the foundations of religion, the state, morality and reason, the relationship of the arts to the state, the philosophy of aesthetic, were all critically analyzed and questioned. This course investigates various stylistic trends in 18th-century art in Italy, France, and England with a focus on the institutionalization of art through the academies. Discussion also centers on classical art theory and its relationship to the academies in light of the social, political, and religious climate of the period. We will also consider the aesthetic, art historical, and social consequences of the writings of Kant, Burke, and Winckelmann. The course begins with the late baroque paintings of Carlo Maratti and his followers, and then moves to subsequent stylistic trends as neoclassicism, Egyptian revival, and the rococo. Attention is also given to the vedute painters, and such diverse personalities as Piranesi, Mengs, Kauffmann, Tiepolo, Watteau, and Chardin.

ARHI 40416. American Art

(3-0-3)

This course examines American painting, architecture, and sculpture from Puritan culture to World War I. The approach is to examine the development of American art under the impact of social and philosophical forces in each historical era. The course explores the way in which artists and architects give expression to the tensions and sensibilities of each period. Among major themes of the course are the problem of America's self-definition, the impact of religious and scientific thought on American culture, Americans' changing attitudes toward European art, and the American contribution to Modernism.

ARHI 40441. Twentieth-Century Art I: 1900-55

(3-0-3)

This course focuses on early 20th-century art and cultural politics in Europe and the US. In the early modern period, ambitious and innovative artists strove to destroy old models of art, replacing them with models that advocated revolutionary forms for a new society. At other times, artists employed art to undermine accepted norms of bourgeois culture and to liberate art and experience from convention. These themes are addressed in this course, in the context of the contradictory reality in which the art arose: an era defined by both optimism and fear, technological progress and massive wars, violent racism and political liberation. Among the selected artists analyzed are Pablo Picasso, Henri Matisse, Piet Mondrian, Marcel Duchamp, Hannah Hoch, Lyubov Popova, Salvador Dali, Walter Gropius, Diego Rivera, and Jackson Pollock.

ARHI 40442. Twentieth-Century Art II

(3-0-3)

Open to all students. This introductory course is subtitled "Techno-Capitalism and the Art of Accommodation." The post-World War II era, particularly in the United States, is marked by the greatest expansion of corporate and consumer capitalism in history. Massive wars are fought to defend capitalist ideology. (A case in point is the tragic Vietnam War.) How has art figured into these social transformations? Has art protested these conditions or easily accommodated itself to overpowering economic, political, and legalistic techno-capitalist regimes? These questions arise throughout this course, which concentrates on selective artistic events in the United States and Europe during the second half of the 20th century. Movements considered include pop art, minimalism, op art, arte povera, postminimalism, earth art, conceptual art, photo-realism, video and performance

art, and other recent picture/theory approaches to art making. This course focuses on recent developments in painting and sculpture. It also examines associated theories of art criticism.

ARHI 40445. Christianity and Architecture

(3-0-3)

A survey of the effect Christianity has had on architecture, including its spatial, representational, symbolic, and moral content, from architecture's theoretical foundations in Vitruvius through to the present day.

ARHI 40470. Architecture of the Twentieth Century

(3-0-3) Doordan

This course is a survey of the significant themes, movements, buildings, and architects in 20th-century architecture. Rather than validate a single design ideology such as Modernism, Postmodernism, or Classicism, this account portrays the history of architecture as the manifestation-in design terms-of a continuing debate concerning what constitutes an appropriate architecture for this century. Topics include developments in building technologies, attempts to integrate political and architectural ideologies, the evolution of design theories, modern urbanism, and important building types in modern architecture such as factories, skyscrapers, and housing. Class format consists of lecture and discussion with assigned readings, one midterm exam, a final exam, and one written assignment.

ARHI 40490. Architecture Now: Trends in Contemporary Architecture

(3-0-3)

This is a survey of contemporary trends in global architecture with a focus on recent developments in design theory and building technologies. The course will examine a broad spectrum of architecture produced in the past decade.

ARHI 40520. Anthropology of Art

(3-0-3) Bellis

This course will examine art as a functional part of culture from an anthropological point of view. Attention is given to evolution of art as part of human culture and to evolution of the study of art by anthropologists. Open to graduate students.

ARHI 40522. Fashioning Identities in Colonial America

(3-0-3) White

This course will focus on dress and material/visual culture in colonial North America. It will provide an introduction to methodology, and offer an overview of key themes in the history of dress (the production, marketing and acquisition of cloth and clothing) and will assess the importance of fashion to commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class, and ethnic encounters.

ARHI 40580. History of Design: Form, Values, and Technology

(3-0-3)

This course will provide a historical perspective on the development of industrial, product, and graphic design in the 19th and 20th centuries. More than the aesthetic styling of products, design mediates the intersection of technology and cultural values in the modern era. The role of the modern designer as both a facilitator and a critic of industrial technology will be examined.

ARHI 40850. Native North American Art

(3-0-3) Mack

Native North American art existed for thousands of years and continues to be created today. Its original context was often sacred (both public and private) and/or political or decorative. Contact with Western Europeans and their art traditions along with the art traditions of Africans, Asians, and South Americans beginning about 1600 AD and thereafter modified form, technique, and context of Native North American art. However, traditional form, techniques, and context continued through the centuries since 1600.

ARHI 43105. Seminar: Topics in Ancient Art

(3-0-3)

Topics course on special areas of Greek and/or Roman art.

ARHI 43122. Seminar in Greek and/or Roman Art
(3-0-3)

Seminar on specific subjects in Greek and/or Roman art.

ARHI 43123. Athenian Acropolis in Context
(3-0-3)

Permission required. The monumental elaboration of the Athenian Acropolis did not begin with Pericles and Pheidias in the mid-fifth century BC. Greek monumental art and architecture were spawned in the context of religion, and by the early Archaic period, the Acropolis was the center of Athenian religion; almost immediately, religious awe and piety were expressed in the form of impressive freestanding sculptural dedications and in large and meticulously wrought stone buildings, elaborately decorated with carved and painted designs and, most impressively, with figural relief sculpture. The monuments of the Athenian Acropolis must be understood first in this context—as the embodiment of religious concepts—and then in the context of Greek art and culture as a whole. An ultimate goal of the seminar will be to arrive at an understanding of the evolving meaning of the Greek temple and monumental form, and how they find unique expression in the fifth-century Acropolis-building program of Pericles. Among the themes that will be treated to one degree or another are the relationship between landscape and religious architecture, the humanization of temple divinities, the monumental expression of religious tradition and even specific history, architectural procession and hieratic direction, emblem and narration in architectural sculpture, symbolism and allusion through architectural order, religious revival and archaism, and the breaking of architectural and religious canon. Taken together, they constitute the specific architectural narrative of the Periclean Acropolis.

ARHI 43205. Seminar: Topics in Medieval Art
(3-0-3)

The topic and format of this course will vary from year to year.

ARHI 43305. Seminar: Topics in Renaissance Art
(3-0-3) Coleman

Topics course on special areas of Renaissance art.

ARHI 43312. Seminar: Venetian and Northern Italian Art
(3-0-3)

Seminar on specific subjects in Venetian and Northern Italian Renaissance Art.

ARHI 43314. Seminar: Mannerism/Painting and Sculpture
(3-0-3)

This course will explore the artistic trends in Italy after the High Renaissance (c. 1520) and before the Baroque (c. 1580), and will begin with definitions of terminology and a brief historiographic survey. Our attention will then turn to the Roman art of Raphael's heirs, Giulio Romano, Perino del Vaga, and Polidoro da Caravaggio, and the emerging Tuscan painters Pontormo, Rosso Fiorentino, and Domenico Beccafumi. We will also investigate the dispersal of the Roman school: Giulio Romano to the Gonzaga court in Mantua, in 1524, and following the sack of Rome by imperial troops in 1527, other maniera artists to Genoa, Bologna, Parma, and as far as the French royal chateau at Fontainebleau. Rome consequently experienced a revival at the end of the reign of Clement VII, and under the pontificate of Paul III, notably, the arts, politics, and theology flourished. This period may be marked by such diverse works and Michelangelo's monumental *Last Judgment* (1536–41) and his frescoes (1542–45) in the Pauline Chapel, Vatican Palace, the decorations (1536–51) by various mannerist artists in San Giovanni Decollato, Perino's elegant frescoes in the Sala Paolina (1545–47), Castel Sant' Angelo, Giorgio Vasari's fantastic murals in the Palazzo Cancellaria (1546), and Francesco Salviati's beautiful, secular frescoes in the Palazzo Ricci-Sacchetti (c. 1553–54). Attention will also be given to the art of the Counter-Reformation in Rome, and to painting and sculpture by Bronzino, Salviati, Cellini, Bandinelli, Vasari, Giambologna, and others at the Florentine courts of Dukes Cosimo I and Francesco I.

ARHI 43315. Seminar: Courts of Renaissance Italy
(3-0-3)

Seminar on specific subjects in Renaissance art.

ARHI 43340. Topics in Baroque Art
(3-0-3) Coleman

Topics course on special areas of Baroque art.

ARHI 43351. Seminar: Rome in the Age of Bernini
(3-0-3)

Permission required. Seminar on specific subjects in Baroque art.

ARHI 43404. Seminar: Narratives of Modern Art
(3-0-3)

Permission required. Seminar on specific subjects in 19th-century and 20th-century art.

ARHI 43405. Topics in Modern Art
(3-0-3) Cushwa

Topics course on special areas of modern art.

ARHI 43416. Topics in American Art
(3-0-3)

Topic courses on special areas of American art.

ARHI 43576. Theories of Art
(3-0-3) Barber

Required of all art history majors. This seminar is a survey of the historiography of art history with special attention paid to the various types of methodology that have been applied to the analysis of art. Special attention is given to 19th-century and 20th-century art historical methods, including connoisseurship, biography, iconology, psychoanalysis, semiotic, and feminist approaches.

ARHI 45511. Museum Anthropology: An Introduction
(3-0-3)

An introduction to the history, philosophy, and professional practices of museums. It includes an examination of the ethical and practical issues of museum work through readings, discussions, and hands-on experience. Emphasis is on the role of anthropologists in museums and the exhibition of non-Western European art in museums, which focus on art, ethnography, or history.

ARHI 46572. Directed Readings
(V-0-V)

Permission required. Specialized reading related to the student's area of study.

ARHI 47171. Special Studies—Ancient Art History
(V-0-V)

Independent study in ancient art history under the direction of an individual faculty member.

ARHI 47271. Special Studies—Medieval Art History
(V-0-V)

Independent study in medieval art history under the direction of an individual faculty member.

ARHI 47272. Special Studies—Medieval
(V-0-V)

Independent study in medieval art history under the direction of an individual faculty member.

ARHI 47371. Special Studies—Renaissance/Baroque
(V-0-V)

Independent study in Renaissance/Baroque art history under the direction of an individual faculty member.

ARHI 47372. Special Studies—Renaissance/Baroque
(V-0-V)

Independent study in renaissance or baroque art history under the direction of an individual faculty member.

ARHI 47431. Special Studies—Nineteenth Century
(V-0-V)

Independent study in 19th-century art history under the direction of an individual faculty member.

ARHI 47471. Special Studies—Modern Art History

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

ARHI 47472. Special Studies—Modern

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

ARHI 47473. Special Studies—Modern

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

ARHI 47571. Special Studies

(V-0-V)

Permission required. Independent study in art history under the direction of an individual faculty member.

ARHI 48573. Senior Thesis Direction

(V-0-V)

The senior thesis, normally between 20 and 30 pages in length, is done under the direction of one of the regular art history faculty, who serves as an advisor. It is expected to demonstrate the student's ability to treat an important historical topic in a manner that shows his or her writing skills and methodological training. It is expected that the thesis will be suitable for submission as a writing sample for those students intending to apply to art history graduate programs.

See also [Art History](#) and [Design](#).

ARST 11201. Drawing I

(3-0-3)

This course deals with form depiction in its many aspects and modes and is intended for beginning students as well as advanced students who need additional experience in drawing. Lab fee.

ARST 11301. Painting I

(0-6-3)

Open to all students. This course is an introduction to oil painting techniques and to stretcher and canvas preparation. The emphasis is on finding a personal direction. Lab fee.

ARST 11601. 3-D Foundations

(0-6-3)

This required core course for all art majors introduces the student to three-dimensional art by producing sculptures (both figurative and abstract) in a variety of media. Contemporary movements in sculpture are examined through slide lectures and attendance at visiting artist lectures and visits to exhibitions. Lab fee.

ARST 21101. Ceramics I

(0-6-3)

Open to all students. This course examines basic techniques of wheel-thrown and hand-built clay structures for sculpture and pottery. Lab fee.

ARST 21303. Watercolor I

(0-6-3)

Open to all students. This course is an introduction to the watercolor medium and deals with a variety of methods, materials, and techniques (both realistic and abstract) with special emphasis on color and composition. Lab fee.

ARST 21401. Photography I

(3-0-3)

This course is an introduction to the tools, materials, and processes of black-and-white photography. Lectures and demonstrations expose students to both traditional and contemporary practices in photography. Critiques of ongoing work encourage students to begin discovering and developing their individual strengths and interests in the medium. A 35mm camera with manual shutter speed and "F" stop is needed. Lab fee.

ARST 21501. Silkscreen I

(0-6-3)

Open to all students. This course is an introduction to stencil processes and printing. Hand-drawn and photographic stencil-making techniques are explored. Mono-printing and discovery of unique aspects of serigraphy are encouraged. Emphasis is on exploration of color and development of student's ideas and methodologies. Lab fee.

ARST 21503. Etching I

(0-6-3)

Open to all students. This basic studio class introduces techniques of intaglio (etching). Students learn basic platemaking and printing techniques while learning to incorporate their own drawing skills and points of view. Historical and contemporary prints are reviewed. Emphasis is on development of the student's own ideas and methodology. Lab fee.

ARST 21505. Artists Books and Papermaking

(0-6-3)

Open to all students. This introductory course explores the making of artists' books and papermaking. Students learn basic bookbinding techniques for books and printing techniques for stationery and posters. They also learn how to make handmade papers. Part of the focus is on historical books as well as on what contemporary artists are doing with books. Lab fee.

ARST 21507. Relief and Collography

(3-0-3)

This course investigates various relief methods of printmaking, including linocut, woodcut, and collograph. Emphasis is on experimentation and combining media.

ARST 21508. Experimental Printing without the Press

(0-6-3)

This course examines the many ways to make prints without using a press; from potato prints and relief to digital transfers. It is designed to introduce the student to methods of constructing prints ranging from traditional forms to collage and beyond to layering media. It is a course that encourages creativity and teaches students to make unique images on paper.

ARST 21509. Print Business and Photogravure

(3-0-3)

This course is concerned with learning the business of the contract printing for photogravure prints. These prints look exactly like photographs, but are printed onto soft printmaking papers. The class will invite a photographer to produce a suite of six black-and-white photographic prints that the class will convert into photogravure prints. The class will learn the business of production, including costs, while engaging in the scheduling, platemaking, printing, packaging, and sales of a suite of photogravures.

ARST 21510. Lithography

(0-6-3)

This is an introduction to planographic print techniques including drawing, painting, photographic, and transfer on stone and metal plate. Basic black and white and color printing techniques are practiced. Contemporary and historical prints are reviewed. Emphasis is on development of the student's own ideas and methodology.

ARST 21512. Photolithography

(0-6-3)

Photolithography is a method of printmaking utilizing a metal plate that is photosensitive. Hand-drawn and computer-generated images as well as traditional photographs are used to create prints that reflect an individual's creativity. Emphasis is placed on the student developing his or her own vision and its expression. Lab fee.

ARST 21602. Wood Sculpture

(0-6-3)

Open to all students. This course uses wood as a primary medium. Emphasis is placed on individual concept and design. Students learn the use of hand and power tools as well as techniques of joining, laminating, fabricating, and carving. Lab fee.

ARST 21603. Metal Foundry

(0-6-3)

Open to all students. The course focuses on work in cast aluminum and cast bronze sculptures. Students learn basic welding techniques using oxygen and acetylene, arc and heliarc welding. Mold making, work in wax, and metal finishing techniques are also explored. Lab fee.

ARST 21604. Metal Sculpture I

(0-6-3)

Open to all students. Metal is the medium of choice in this course designed to explore three-dimensional design with a variety of projects grounded in historical precedents. Students become familiar with as many metalworking techniques as time and safety allow, such as gas and arc welding, basic forge work, and several methods of piercing, cutting, and alternative joinery. Lab fee.

ARST 21606. Figure Sculpture

(0-6-3)

Open to all students. This course concentrates on modeling from the figure. Work is predominantly in clay, but mold making and casting techniques are also explored. Lab fee.

ARST 27272. Special Studies—Painting/Drawing

(V-0-V)

Independent study in painting/drawing under the direction of an individual faculty member.

ARST 31102. Ceramics II

(0-6-3)

Prerequisite: (ARST 21101 OR ARST 209S OR ARST 210S)

This course explores advanced processes in clay for pottery and sculpture as well as techniques of glazing. Lab fee.

ARST 31202. Figure Drawing

(0-6-3)

Open to all students. The emphasis is on drawing in all its aspects: materials, methods, techniques, composition, design, and personal expression. The human figure is the subject matter. While anatomy is studied, the course is not an anatomy class. Male and female models, clothed and nude, are used. Lab fee.

ARST 31302. Painting II

(0-6-3)

Prerequisite: (ARST 11301 OR ARST 133S OR ARST 134S)

This course extends and develops the skills and concepts initiated in Painting I. Students are engaged in projects that allow them to hone their technical skills while they define and develop their individual concerns as well as the formal means through which to communicate those concerns. Lab fee.

ARST 31315. Scene Design and Techniques

(3-0-3)

This is a beginner's course in basic scenic design techniques and hand drafting for the stage. This course will take the student through the process of design, from how to read a script, research, presentation, rendering, basic drafting and, if time allows, model building. No previous experience necessary. Offered fall only. Materials fee TBA.

ARST 31402. Photography II

(0-6-3)

Prerequisite: (ARST 21401 OR ARST 285 OR ARST 285S)

This course extends and develops the skills and concepts initiated in Photography I. Students also are introduced to a variety of photographic possibilities outside traditional black-and-white printing. Techniques explored include darkroom manipulations, photo-constructions, Polaroid transfers, installations, and non-silver processes. Projects encourage students to continue defining their own areas of interest and to locate their own concerns within the broad range of photographic issues. Lab fee.

ARST 31405. Color Photography

(0-6-3)

This course is an introduction to technical and aesthetic issues in color photography with an emphasis on the development of personal imagery and the history of color picture making. Lab fee.

ARST 31415. Introduction to Film and Video Production

(4-0-4)

Prerequisite: (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

An introductory course in the fundamentals of shooting, editing, and writing for film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. The course requires significant amounts of shooting and editing outside class. Students produce short video projects using digital video and Super 8mm film cameras and edit digitally on computer workstations. The principles of three-camera studio production are also covered.

ARST 31421. Performance Art: History, Theory and Practice

(3-0-3)

Performance art is anti-art. Performance art is art that contradicts tradition—that aims to shock. This class will equip the student with an overview of its offenses. Class content may include Dada's early 20th-century assaults on the audience; absurdist experimental performance works by Yoko Ono, Lygia Clark, John Cage, and Nam June Paik from the 1960s; performance art addressing racism by Adrian Piper and William Pope L. from the 1980s; and current performance works by Internet artists and others. Discussions will focus on the aesthetics and politics of marginality. In other words: why shock? Why experiment? Is there any market for such work today? We will also look at critical and theoretical texts about performance, modernism, and the avant-garde and consider their relation to the works themselves. These may include manifestos by performers and artists; debates about the autonomy of art; poststructuralist writings on art and aesthetics; and theories of performativity. Finally, students will be expected to create one or more performance art pieces themselves. Students should expect to be asked to participate in other students' pieces as well as in their own.

ARST 41103. Ceramics—Studio

(0-6-V)

This advanced course is for students pursuing an individual direction in ceramics. Emphasis is on individual concepts and techniques.

ARST 41203. Figure Drawing, Multilevel

(3-0-3)

Open to all students. The emphasis is on drawing in all its aspects: materials, methods, techniques, composition, design, and personal expression. The human figure is the subject matter. While anatomy is studied, the course is not an anatomy class. Male and female models, clothed and nude, are used. Lab fee.

ARST 41304. Watercolor, Multilevel

(3-0-3)

Prerequisite: (ARST 21303 OR ARST 231S OR ARST 232S)

This course is a continuation of the watercolor medium and deals with a variety of methods, materials, and techniques (both realistic and abstract) with special emphasis on color and composition.

ARST 41305. Painting Studio

(0-6-V)

This course is devoted to defining personal painting directions (oil/acrylic). Students gain experience in criticism and in exhibition techniques.

ARST 41307. Painting, Multilevel

(3-0-3)

Prerequisite: (ARST 11301 OR ARST 133S OR ARST 134S) OR (ARST 31302 OR ARST 334S)

This course extends and develops the skills and concepts initiated in Painting I and II. Students are engaged in projects that allow them to hone their technical skills while they define and develop their individual concerns as well as the formal means through which to communicate those concerns. Lab fee.

ARST 41402. Advanced Photography

(0-6-3)

Prerequisite: (ARST 31405 OR ARST 375S) OR (ARST 31402 OR ARST 366S)

This is an advanced photography course that allows students to explore their own areas of interest while learning about a broad range of contemporary photographic issues. Students may work in any photo medium (black-and-white, color, digital, etc.) they choose. Emphasis is on creating a portfolio of images.

ARST 41403. Digital Photography

(0-6-3)

Prerequisite: (ARST 31402 OR ARST 366S) OR (ARST 31405 OR ARST 375S)

This course uses computers for creative image making. Students are introduced to the practices and procedures of digital imaging with an emphasis on exploring their own personal work. Lab fee.

ARST 41407. Studio Photography

(0-6-3)

Prerequisite: (ARST 31402 OR ARST 366S) OR (ARST 31405 OR ARST 375S)

This course introduces the student to the fundamentals of studio photography. Included are lighting skills and the basics of medium- and large-format cameras. The course serves as an introduction to both commercial illustration and methods for personal work with the view camera.

ARST 41416. Intermediate Film Production

(3-0-3)

Prerequisite: (FTT 30410 OR FTT 361)

This film production course will focus on 16mm black-and-white silent narrative filmmaking. We will explore the technical use and aesthetic application of the film camera and related equipment as well as the development of the short film narrative script. Students will shoot a short film lighting and composition exercise and in-class film test, and ultimately produce, shoot, and edit one four- to six-minute, 16mm B/W film in teams of two. The projects will be edited digitally, but there will be NO effects, fades, dissolves, titles, or sound. The film-making process requires a lot of fieldwork on locations and transporting heavy equipment. In addition to the projects there will be a midterm and a few papers required. Materials fee required.

ARST 41417. Advanced Film Production

(3-0-3)

Prerequisite: (FTT 40410 OR FTT 448A)

This production workshop encourages the development of short scripts (including casting, preproduction, and storyboarding) for fiction, nonfiction, or formal film projects by pairs of students. It stresses writing skills with an emphasis on the development of innovations that expand the existing traditions of and boundaries between fiction and nonfiction practices. Application may be obtained from the Web at <http://www.nd.edu/~ftt/> or in 230 DeBartolo Performing Arts Center.

ARST 41418. Professional Video Production

(4-0-4)

PA course for the advanced production student interested in the techniques and technology of the broadcast video industry, utilizing the following post-production software: Avid Media Composer, Adobe After Effects, Lightwave 3D, and Digidesign Pro Tools. Students produce projects using BetacamSP and DV video equipment while learning the basics of non-linear editing, digital audio sweetening, 2-D compositing, and 3-D animation techniques.

ARST 41506. Multilevel Books and Printmaking

(0-6-3)

Prerequisite: (ARST 21501 OR ARST 489S) OR (ARST 21503 OR ARST 292S) OR (ARST 21505 OR ARST 297S) OR (ARST 21507 OR ARST 287S) OR (ARST 21509 OR ARST 291S)

This course offers advanced experience in making artist's books, lithography, photolithography, etching, silkscreen, and relief. Emphasis is on developing personal work and imagery. Lab fee.

ARST 41608. Sculpture Studio

(0-6-3)

Prerequisite: (ARST 11601 OR ARST 149S)

This advanced sculpture course offers serious students an opportunity to pursue a sculptural direction and to carry that direction to a professional level of competence. It also develops the student's awareness of definitions and criticism of sculpture. The work may be done in any three-dimensional medium.

ARST 43406. Topics in Photography

(3-0-3) Krajnak

Prerequisite: (ARST 31402 OR ARST 366S) OR (ARST 31405 OR ARST 375S)

This is a topics course for advanced photography students. Students are engaged in critical issues involving contemporary studio practice through slide lectures, discussions, visiting artist interviews, gallery visits, and student presentations. Directed readings and critical writings will be assigned during the semester. Students will concurrently develop a creative project. Lab fee.

ARST 43702. BFA Seminar

(3-0-3) Collins

BFA majors only. Required of all BFA studio and design majors. This course is designed to broaden the context of the student's chosen major in the department by introducing the student to alternative and integrated points of view from all areas of study that are represented by the studio and design field. This course will help first semester senior BFA majors to orient toward their chosen direction and project for the BFA thesis. Critical writing and directed readings will be assigned throughout the semester. Slide lectures, visiting artist interviews, gallery visits, student presentations, portfolio preparation, and graduate school application procedures will supplement the course.

ARST 47171. Special Studies—Ceramics

(0-V-V)

Independent study in ceramics: research or creative projects.

ARST 47271. Special Studies—Painting/Drawing

(0-V-V)

Independent study in painting or drawing: research or creative projects.

ARST 47272. Special Studies—Painting/Drawing

(0-V-V)

Independent study in painting/drawing under the direction of an individual faculty member.

ARST 47471. Special Studies—Photography

(0-V-V)

Independent study in photography: research or creative projects. Open to upper-level students with permission of the instructor.

ARST 47472. Special Studies—Photography

(V-0-V)

Independent study in photography under the direction of an individual faculty member.

ARST 47571. Special Studies—Printmaking

(0-3-3)

Independent study in printmaking: research or creative projects.

ARST 47671. Special Studies—Sculpture

(0-V-V)

Independent study in sculpture: research or creative projects.

ARST 47672. Special Studies—Sculpture

(0-V-V)

Independent study in sculpture under the direction of an individual faculty member.

ARST 47771. Special Studies

(V-0-V)

Independent study in art studio: research or creative projects.

ARST 48103. BFA Thesis—Ceramics
(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The student signs up with a faculty member working in ceramics, who serves as an advisor for the thesis project.

ARST 48203. BFA Thesis—Painting/Drawing
(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The student signs up with a faculty member working in painting or drawing, who serves as an advisor for the thesis project.

ARST 48204. BFA Thesis—Painting/Drawing
(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The BFA thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

ARST 48205. BFA Thesis—Painting/Drawing
(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The BFA thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

ARST 48403. BFA Thesis—Photography
(3-0-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in photography, who serves as an advisor for the thesis project.

ARST 48404. BFA Thesis—Photography
(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The BFA

thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

ARST 48503. BFA Thesis—Printmaking
(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in printmaking, who serves as an advisor for the thesis project.

ARST 48603. BFA Thesis—Sculpture
(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in sculpture, who serves as an advisor for the thesis project.

ARST 48703. BFA Thesis
(3-0-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

DESN 11100. 2-D Foundations
(0-6-3)

Art majors only. This course deals with fundamentals of two-dimensional design and is intended for students entering studio practice for the first time. The course is also open to more advanced students who wish to increase their knowledge of the elements and principles of design. The course is project-oriented. Studio practice in the basic principles of design employing color theory, form, and space organization, as well as materials and processes used in the design process, are emphasized. Lab Fee.

DESN 21101. Graphic Design I
(0-6-3)

Prerequisite: (DESN 11100 OR DESN 111S)

This introductory course explores the origins, concepts, and processes affecting traditional and contemporary graphic design. Laboratory activities introduce and implement computer and print technology for the creation of original design projects. Lab Fee.

DESN 21200. Visual Dialogue
(0-6-3)

Open to all students. This cross-disciplinary course in rapid sketching and rendering technique serves studio art, design, and architecture. The course is intended for students entering studio practice for the first time as well as for advanced students who wish to deepen their visualization and illustration skills. Lab Fee.

DESN 21201. Product Design I
(0-6-3)

This foundation 3-D design studio begins as a natural extension of Basic Design. Students are encouraged to think and work in three-dimensional media. A series of fundamental design problems are assigned during the course of the semester. Emphasis is placed on the transformation of imagination from mind to paper to

model. Computer-aided design (CAD) is also introduced into assignments. Lab Fee.

DESN 31203. Product Design Research Project

(0-6-3)

Prerequisite: (DESN 21200 OR DESN 217S) OR (DESN 21201 OR DESN 218S)

This course exposes art and design students to common low- and high-production manufacturing processes. Students use these methods to execute their own original designs. Students are introduced to plastic thermoforming, injection molding, sheet and profile extrusion, blow-molding, rotational molding, reaction-injection, molding and open mold laminating. Metal processes include roll forming, foundry sand casting, die-casting, extrusion, stamping, anodizing, and plating.

DESN 31204. Advanced Product Design

(0-6-3)

Prerequisite: (DESN 21200 OR DESN 217S) OR (DESN 21201 OR DESN 218S)

This advanced-level studio is directed toward the product design student who is preparing to enter either graduate school or professional practice. Fulfillment of this studio requires the completion of one research and design project. In addition, portfolios and resumes are prepared. Emphasis is placed on knowledge, analytical skills, logic, creativity, and excellence in visual communication.

DESN 31205. Digital 3-D

(0-6-3)

Prerequisite: (DESN 21201 OR DESN 218S)

This course introduces students to Alias Wavefront software, a powerful conceptual tool for modeling and animating complex objects. In this digital exploration, computer technology will be used to generate, modify, and present design ideas. Lab Fee.

DESN 31208. Furniture Design I

(0-6-3)

This course is an introduction to furniture design encompassing the study of modern designers and contemporary design issues. A series of furniture design problems are assigned that serve as focus for investigations into contemporary and nontraditional applications of design principles. Full-scale furniture is produced for each project. Lab Fee.

DESN 31316. Stagecraft: Theory and Practice

(3-0-3)

A practical introduction to techniques, processes, and materials. The student will explore traditional and modern stagecraft methods: carpentry, rigging, basic scenic painting as well as basic technical drafting, design ideas, equipment use, safety, material handling, and problem solving. Students will gain practical experience participating on realized projects and productions.

DESN 41102. Graphic Design II

(0-6-3)

Prerequisite: (DESN 21101 OR DESN 281S)

This advanced course in visual communication is for students interested in the art of typography, its history, and the use of type as a critical element in the world of graphic design. Lab Fee.

DESN 41103. Graphic Design III

(0-6-3)

Prerequisite: (DESN 41102 OR DESN 415S)

This advanced course in visual communication is for students who intend to pursue the field of graphic design after graduation. The class will help prepare students both technically and creatively for professional practice by focusing on research-based projects. Lab Fee.

DESN 41104. Multi-Media Design I

(0-6-3)

Prerequisite: (DESN 21101 OR DESN 281S)

This advanced multimedia course will give the studio, design, or CAPP major an introduction to the design of motion graphics. Students will develop short information movies, movie trailers, or movie opening sequences. The course will use Apple's Motion software and cover basic DVD and QuickTime movie development. Skill with various graphics software useful, with expertise in Adobe Photoshop being very important.

DESN 41105. Multimedia Design II

(0-6-3)

Prerequisite: (DESN 21101 OR DESN 281S)

This advanced digital image-making course gives the studio or design major the opportunity to pursue research and development in an advanced area of technology. In some semesters, a topic is announced as a focus for the course such as Postscript programming or hyper-media design.

DESN 41106. Web Page Design

(0-3-3)

This course will cover the design considerations for the internet including techniques of graphic production and web page efficiency. Design with Macromedia Dreamweaver, Flash, and the use and creation of style sheets will also be covered. Experience with Macintosh graphics programs needed. Work outside of class is expected.

DESN 41209. Furniture Design Studio

(0-V-V)

Prerequisite: (DESN 31208 OR DESN 330S)

This course offers advanced students an opportunity to develop a personal direction, using wood as a material of expression. Lab Fee.

DESN 41419. CAD for the Stage

(0-3-3)

The study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design and progress to 2-D and then 3-D design techniques. A basic understanding of computer systems is necessary, and significant computer work is required outside class.

DESN 41420. Advanced Technical Production

(0-3-3)

Advanced course work in the tools, materials, and processes used in the creation of theatrical scenery. Topics may include (but not limited to) scenic welding, advanced rigging techniques, electronic controls, pneumatics, hydraulics, structural design for the stage, CAD, and other state-of-the-art technologies. Laboratory required.

DESN 45310. Design Internship

(V-0-V)

Permission required. This course provides an opportunity for the design student to earn credit at an approved design office.

DESN 47171. Special Studies—Graphic Design

(V-0-V)

Independent study in graphic design: research or creative projects.

DESN 47172. Special Studies-Graphic Design

(0-V-V)

Independent study in product design under the direction of an individual faculty member.

DESN 47271. Special Studies—Product Design

(V-0-V)

Independent study in product design: research or creative projects.

DESN 47272. Special Studies-Product Design

(0-V-V)

Independent study in product design under the direction of an individual faculty member.

DESN 47371. Special Studies

(V-0-V)

Permission required. Independent study in design.

DESN 48103. BFA Thesis—Graphic Design

(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

DESN 48104. BFA Thesis—Graphic Design

(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The BFA thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

DESN 48203. BFA Thesis—Product Design

(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

DESN 48204. BFA Thesis—Product Design

(0-3-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The BFA thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

DESN 48303. BFA Thesis

(3-0-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

Center for Asian Studies

ASIA 20106. Modern South Asian History

(3-0-3) Rawat

More than one-fifth of the world's population lives in South Asia, a region comprised of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan and the Maldives. This introductory course will provide a survey of issues and events in South Asian history from the establishment of British East India Company rule in 1757 to the decolonization of South Asia in 1947. The course will explore the following themes: the rise of a trading company, the East India Company and its transition into a colonial power; the emergence of a colonial economy; colonial production of knowledge; 19th- and 20th-century cultural, religious, and political movements and formations of new identities; the emergence of elite and popular nationalisms; independence; and the partition of the subcontinent.

ASIA 20301. Chinese Society and Culture

(3-0-3)

This course introduces students to the complexities of contemporary Chinese society in the context of the past. Topics covered include food, family and gender, political activity, ethnicity and identity, urban and rural life, work and unemployment, economic complexity, multilingualism, arts, religion, medicine and the body, and literature.

ASIA 20304. Societies and Cultures of South Asia

(3-0-3)

This course provides a broad introduction to societies and cultures of South Asia (including India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, and the Maldives). Emphasis will be on the Indian subcontinent.

ASIA 20825. World Religion and Catholicism in Dialogue

(3-0-3)

A theological exploration of Hinduism, Buddhism, Taoism, Judaism, Islam, and the relationship of Christianity to those religions. The goal of this exploration is specifically: (1) to set forth the essential characteristics of the world's great religions; (2) to disengage the essential differences between Christianity and the other world religions; (3) to identify the distinctiveness of Catholicism within the family of Christian traditions; and (4) to examine historically and systematically the Christian theological appraisal of other world religions. The ultimate goal of this course is to enable the students to gain a deeper understanding of Christianity by "passing over" into and experiencing as well as appraising the different major religious traditions of the world. To enhance the learning experience, the course will make abundant use of films. The students are required to attend class regularly and punctually. Indeed, strong emphasis is placed on the requirement to attend class faithfully. Students are allowed but one single absence during the semester.

ASIA 20828. Christianity and World Religions

(3-0-3) Malkovsky

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate Mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths are related to the Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply into the spirituality of other traditions. By course end we ought to have a greater understanding of what is essential to Christian faith and practice as well as a greater appreciation of the spiritual paths of others. Requirements: Short papers, midterm exam, and final exam.

ASIA 30011. Asian-American Literature

(3-0-3) Valenzuela

This course will explore the development of Asian-American literature from the 1800s to the present, focusing on writers of Chinese, Filipino, Indian, Hmong, Japanese, and Korean descent. Discussions will focus on questions of race/ethnicity, identity/representation, nation and exile. Primary texts, including novels,

short fiction, poetry, theory, and film will be supplemented by critical articles. Some works to be discussed will include Carlos Bulosan's *America is in the Heart*, Jessica Hagedorn's *Dogeaters*, Maxine Hong Kingston's *The Woman Warrior*, Faye Ng's *BONE*, John Okada's *No-No Boy*.

ASIA 30107. Debating Empire: Themes from Modern South Asian History

(3-0-3) Rawat

This course introduces undergraduates to contentious themes in the history of British Empire in South Asia through a close examination of historiography. By focusing on the centrality of colonialism in instituting change and fundamentally transforming South Asian society, the course traces the emergence of dominant schools of South Asian (particularly Indian) historiography. Historical approaches to be examined include imperial and colonial historical writing, the Cambridge School, several forms of nationalist historiography (including secular and religious), Marxist perspectives, and the more recent Subaltern Studies collective, as well as critiques of these. Topics of analysis will include: (1) de-industrialization and the colonial economy; (2) agriculture and the idea of private property; (3) the 1857 rebellion or "Sepoy Mutiny"; (4) continuity and change in eighteenth century India; (5) colonialism and its impact upon knowledge production; (6) gender and colonial law; (7) the construction of religious identities and communal violence in colonial India; (8) capitalist development or socialist planning; (9) affirmative action; and (10) environment and development. These debatable themes in South Asian history have generated an enormous corpus of literature, enabling us to problematize the relationship of the historian to "facts" by drawing attention to the ways in which diverse positions and perspectives privilege different categories, actors, and modes of analysis. The course also looks at the role of history within the development of colonial governance and the rise of nationalist movements, and examines the relationship of different segments of the population to history and to the nation.

ASIA 30120. Modern Japan

(3-0-3) Thomas

This introduction to modern Japanese history focuses on political, social, economic, and military affairs in Japan from around 1600 to the early post-WWII period. It considers such paradoxes as samurai bureaucrats, entrepreneurial peasants, upper-class revolutionaries, and Asian fascists. The course has two purposes: (1) to provide a chronological and structural framework for understanding the debates over modern Japanese history, and (2) to develop the skill of reading texts analytically to discover the argument being made. The assumption operating both in the selection of readings and in the lectures is that Japanese history, as with all histories, is the site of controversy. Our efforts at this introductory level will be dedicated to understanding the contours of some of the most important of these controversies and judging, as far as possible, the evidence brought to bear in them.

ASIA 30280. International Relations in East Asia

(3-0-3) Moody

This course explores the interactions of the states and societies in the East Asian region, focusing mainly on the relationships of China and Japan, their interactions with each other and with the outside "Asian" powers, the United States, and Russia (Soviet Union). The first set of class discussions examines the China-centered system in East Asia prior to the intrusion of the new world system carried by Western imperialism. The course then turns to a discussion of this Western impact: the colonization of most of the Southeast Asian societies; the reduction of China to a "semi-colony" and the subsequent process of revolution, both nationalist and communist, in that country; and Japan's turn to "defensive modernization" and its own imperialism to ward off the West and claim status as a great power on a par with the Western countries.

ASIA 30302. Culture and Conflict in the Pacific

(3-0-3)

In recent years, many Pacific societies have been unsettled by conflict, military coups, crises of law and order, struggles for land rights, and battles over nuclear testing. This course introduces students to the diverse cultures of the Pacific by examining some of these contemporary conflicts in historical perspective. Topics of particular interest are indigenous rights, relations between indigenous people and migrants, and the role of outside powers in Pacific Island states. In addition to examining the indigenous cultures of the Pacific, we will compare and con-

trast societies in which indigenous islanders are disenfranchised minorities (as in Hawaii, New Zealand, and Australia) and those societies in which they are the dominant majority (as they are in Fiji and Solomon Islands).

ASIA 30376. Place, Environment, and Society in Australia and Melanesia

(3-0-3) McDougall

Aboriginal Australian and Melanesian approaches to place have long intrigued and puzzled outsiders, challenging commonly held assumptions about the division between nature and culture or between human societies and their physical environments. This course introduces students to some of these exotic approaches to place and encourages them to see their own environment in a new way. It also considers how indigenous Melanesian and Australian conceptualizations of place are being transformed through engagement with a global capitalist economy and in the context of modern nation states. How do notions of place change when land becomes a commodity? How are shifting connections to place transformed into legal ownership? What happens when kin networks are divided by national boundaries? Students will read several ethnographic monographs that convey a holistic sense of social life in particular locales. Topics that may be of particular interest include mythic and ritual relationships to the land; connections between language, place, and cultural identity; the ways that modern states enforce geographic boundaries; legal battles for land rights; and the relationship between global environmentalism and indigenous people.

ASIA 33302. Human Rights Environment and Development: In South Asia

(3-0-3)

The course, with the help of real-world cases, will identify that the issues of development, human rights, and the protection of the environment are of great importance to all of human society. They assume critical importance in South Asian countries where the issues are intricately linked to complex socio-political and economic factors. At first glance, development would appear to be instrumental, the prime vehicle for promoting the realization of human rights, in particular economic rights such as the right to an adequate standard of living, the right to work, the right to social security, right to education, the right to food, and to the right to housing. Environmental preservation and rehabilitation also should be achieved through development. It is a sad fact however, that the development projects in the South Asian countries have overtaken poverty as the single largest cause of human rights violations and environmental degradation. Many development projects that should have brought well-being to local populations have, in fact, brought violations of human rights and environmental degradation.

ASIA 33311. Reading the Japanese Women in Literature

(3-0-3)

The Japanese woman is a favorite site of fantasy and anxiety, both in Japan and abroad. From the famously demure Madame Chrysanthemum of Pierre Loti's late 20th century novel to the sassy modern girl of the roaring 20s to contemporary busty battlin' babes, the Japanese woman has been available as a site of cultural imagination, and those images often tell us less about real Japanese women than they do about the dreams and nightmares of those doing the imagining. This class focuses on important works that variously glorify, orientalize, and/or trouble the idea of the Japanese woman in literature—both in Japan and in the West—over the past centuries. Readings will also include theoretical, historical, anthropological, sociological and popular sources.

ASIA 33312. Labor and Literature in Modern Japan

(3-0-3) Bowen-Struyk

The modernization project begun in the late 19th century relied on new and changing labor relations and roles in order to transform Japan into a modern nation-state in a short 50 years. Central to the way men and women relate to their society, labor consequently figured prominently albeit quite differently in the literature of the early 20th-century elite as well as in the labor-conscious literature that emerged in the '20s and '30s. With "labor" as the organizing principle, then, we'll think about the intersections of gender/sex, class, and subjectivity; theories of the transformation from a "feudal" society to a "modern" one; a "bourgeois" and a "proletarian" class ethos; politically engendered "proletarian literature;" the significance of agrarian versus urban labor; Marxist/Socialist critiques of the exploitation of labor by capital; the relationship of nation-state to empire to labor; and the place of literature and its relationship to labor in Japan.

ASIA 33313. Japanese Literature in the 1990s: Lost and Found in Contemporary Japan

(3-0-3) Bowen-Struyk

The bursting of the high growth "economic bubble" in Japan in 1991 revealed that some of the costs of high economic growth—such as socially prescribed gender differentiation, which urged dedication to the company for men and to the home for women, tremendous pressure put on children to achieve academically at ever younger ages, and emphasis on high growth policies at the risk of the environment—were simply too great to bear unreflectingly anymore. The '90s, then, knows itself as a "lost" decade, a decade in which an American, Alex Kerr, won a prestigious literary prize for his nonfictional *Lost Japan* (originally written in Japanese); a decade in which international best-seller Murakami Haruki continuously rejects the tenets of the past decades—family and company—for a fluffy lyricism of loneliness; a decade in which the resurgence of millenarian cults captivated readers and writers; a decade featuring apocalyptic animation and adult comics; a decade well suited to the noir detective novel, with its seamy underside and lack of redemption; a decade in which even the awarding of the Nobel Prize for Literature to Oe Kenzaburo in 1994 served ironically to question whether Japan has lost its tradition of high literature. As the "lost" narratives of multiply, however, so too do the "found" narratives, whether they take the forms of neo-nationalism, personal memoir, post-national globalism, aestheticized alienation, or other. As the most salient features of the '90s continue, this class is also about the way that the present knows the past.

ASIA 40123. American Occupation of Japan

(3-0-3) Thomas

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The "Basic Initial Post-Surrender Directive" charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort, namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The Big Question—one that we will return to again and again in our discussions—is what is democracy and how is it created and sustained?

ASIA 40185. History from Below: Colonialism, Nationalism, and Subalterns

(3-0-3) Rawat

This course introduces advanced undergraduates and graduate students to methods of doing and writing history that intervene within dominant historical narratives and frameworks by redefining historians' relationships with sources and the questions asked of them. The Subaltern Studies collective that emerged from South Asia in the 1980s and 1990s is now recognized as one of the more important historical interventions in recent years. Subaltern Studies' historiographic writing has questioned dominant nationalist narratives by arguing that they represent only the history of elites. The objective of the course is to draw attention to differing understandings of colonialism and nationalism by laying out the perspectives of "subalterns"—untouchables, tribals, peasants, workers, women, and other marginalized groups. In addition "subaltern" perspective would also be extended to studying themes like democracy, politics, modernity, development, cities, environment, films, and television in South Asia. The interventions by the Subaltern Studies collective will be situated in relationship to developments in European historiography, with special attention to the unique departures of this new school. Debates within and critiques of the collective's approach will also be examined. A background in South Asian history or culture is not a prerequisite.

ASIA 40241. Hong Kong Action Cinema

(3-0-3) Magnan-Park

Corequisite: ASIA 41201

This course addresses the global significance of the *gong fu vague* [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create

a version of action cinema that supersedes Hollywood's dominance in the genre? Is this purely a "Chinese" phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic, and economic significance within a larger framework or must they be critically dismissed outright? What does it mean that "everybody was kung fu fighting" and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English. Fulfills FTT international requirements.

ASIA 40710. International Trade

(3-0-3) Kim

The objective of this course is to provide students with the basics of theory, institution, and practices of global trade and investment, with special references to economic integration at the regional and global levels. By mastering the basic concepts and analytical skills, you will gain a better understanding of complex economic relations in today's global economy. The course at the same time emphasizes the application of basic theories and tools you have learned in analyzing contemporary issues. The level of the course is designed to be accessible to the students with a background in microeconomic theory at an intermediate level. Some classes (as such occasions call for) will begin with a discussion of current developments in global economic relations. You are urged to have access to *The Wall Street Journal* and/or other international news media (such as *The New York Times*, *Economist*, *Business Week*, the *World Bank's World Development Report*, or even listening to NPR as lectures attempt to link theories to events out in the world. The assigned textbook is largely to complement and supplement lectures. Given the time constraint, lectures will focus on a broad, analytical overview of policy-related global issues. Detailed points and other issues are left behind for you to read the relevant textbook chapters and reference readings.

ASIA 40843. US and the Vietnam War

(3-0-3) Brady

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an "American" as opposed to a "Vietnamese" perspective. Broad topics to be covered include Vietnamese background (land, people, history, culture); American political and diplomatic decision making, 1950–1975; how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture AND a discussion course. Attendance at BOTH is required. Approximately six books will be assigned.

ASIA 41201. Hong Kong Cinema

(0-1-0)

Corequisite: ASIA 40241

Certain films will be viewed for further discussion in class.

Department of Computer Applications

CAPP 20505. Introduction to Computer Systems

(3-0-3) Berzai

As an introduction to information processing, this is a literacy course that explains computer systems, including hardware, software, systems analysis, and other related topics. The class learns some computer programming, logic, design, and documentation using the BASIC language. The students also work on teams to learn some phase of the IS environment, learn multimedia software, and make presentations to the class.

CAPP 20506. Introduction to Computer Systems

(3-0-3) Berzai

As an introduction to information processing, this is a literacy course that explains computer systems including hardware, software, systems analysis, and other related topics. The class learns some computer programming, logic, design, and documentation using the BASIC language. The students also work on teams to learn some phase of the IS environment, learn multimedia software, and make presentations to the class.

CAPP 23507. *La telenovela: historia, el significado cultural y produccion estudiantil*

(3-0-3) Barry

The aim of this course is to explore the genre of the telenovela. Students will sharpen oral and written language skills through exposure to authentic telenovelas from Spain and Latin America, and through the creation and production of their own telenovela. They will be able to learn the idiosyncrasies of Hispanic culture as well as popular expressions. Writing and oral production will be stressed as the students write, direct, act, tape and edit a telenovela. During this process students will learn basic videography and online video and audio editing techniques.

CAPP 30310. Intro to C++ Programming

(3-0-3) Treacy

Although COBAL programs support many of today's information systems, new development has migrated to object-oriented C++. If students majoring in information systems are to be competitive when they graduate, they need some competence working with the object-oriented paradigm and, in particular, C++.

CAPP 30320. Introduction to Scheme Programming

(3-0-3) Sepeta

Scheme is a modern programming language that is both powerful and easy to learn. Scheme teaches many important programming ideas and, with knowledge of scheme, students can readily learn other languages like C++ and Java. The scheme course will be a beginning course and will not require programming experience. The course will emphasize problem-solving skills and it will demonstrate how data drives program development.

CAPP 30350. Visual Basic Programming

(3-0-3) Irmiger

Prerequisite: CAPP 20505 OR CAPP 243

The course will investigate object-oriented data processing concepts using Microsoft's Visual Basic Programming Language. Terminology and technique will be combined to explore the object-oriented paradigm. Object-oriented will be compared to traditional procedural paradigms wherever appropriate.

CAPP 30360. World Wide Web Programming

(3-0-3) Manier

This course covers several languages that are used to construct sites on the World Wide Web. These languages are: (1) HyperText-Markup Language (HTML), a scripting language used to control the format of Web pages; (2) JavaScript, an object-based scripting/processing language used to provide client-side interactivity for Web pages; and (3) Java, an object-oriented compiled processing language that can create applets that are platform-independent.

CAPP 30380. Web Development: HTML and Java

(5-0-3) Barger

Students will study materials necessary to construct and maintain World Wide Web pages. They will learn the basics of the Hypertext Markup Language (HTML), a scripting language for formatting Web pages. They will also learn

Java, a secure object-oriented language that can be used for stand-alone applications or for applets that provide client-side processing within Web pages. In the Java section, the course will concentrate on applets. Learning activities will be done online. These activities will include laboratory assignments, a Web page project, and HTML and Java examinations. The object of the course is not to produce expert-level programmers in HTML and Java, but to provide a basic level of skills in these languages so that graduates of the course will be able to work knowledgeably with future clients, corporate analysts, and professional programmers.

CAPP 30510. Management Information Systems

(3-0-3) Berzai

Students are introduced to leadership and management skills in the information processing environment. Discussions on why and how management makes decisions are an important part of the course, as are discussions of current problems of management in the business world related to computer applications.

CAPP 30515. Systems Analysis and Design

(3-0-3) Berzai

Administered in two major segments, this course first exposes students to the full scope of analyzing and designing computer systems by covering problem definition, data collection, documentation of existing systems, and definition of new systems requirements. We use the methodology of Systems Development Life Cycle (SDLC). The second segment deals first with students working on genuine business projects. A part of this segment gets into object-oriented systems analysis, that is a new concept in systems analysis and design.

CAPP 30521. e-Business Strategies

(3-0-3) Amoni

E-business employs the use of the Internet and the Web to transact business, creating electronic markets where prices are transparent, markets are global, and trading is highly efficient. E-business has a direct impact on a firm's relationship with suppliers, customers, competitors, and partners as well as the method it uses to advertise, sell, and use products. In this course, students will analyze the business models and strategies of online companies, explore failed e-business ventures, understand the strategic, financial, marketing, and organizational challenges facing e-business firms, and consider the societal impact of e-business development.

CAPP 30523. Applied Multimedia Technology

(3-0-3) Clark

The goal of this course is to explore the use of multimedia in communicating information and solving problems. Using Macromedia Flash and other tools, students create interactive multimedia applications that incorporate text, animation, images, sound, and video. They also learn how to evaluate the aesthetics, functionality, and usability of a website. Finally, the course equips students with strategies for enhancing their skills after the semester ends.

CAPP 30525. Advanced Applied Multimedia Technology

(3-0-3)

Prerequisite: CAPP 30523 OR CAPP 395

The advanced multimedia course will be using Macromedia Director to explore the development of multimedia applications using an object-oriented approach. In addition to the object-oriented approach to development of complex projects, we will learn how to use net lingo and exploit the ability of director objects to communicate with one another across networks. Acquisition of media to be used in the creation of projects by digitizing and editing still images, audio, and video will be part of the course, and we will explore some advanced techniques in video editing.

CAPP 40140. Computer Ethics

(3-0-3) Barger

The course concentrates on the theory and practice of computer ethics. The aim of the course is to study the basis for ethical decision making and the methodology for reaching ethical decisions concerning computing matters. Methodologies used in the course include lectures by the instructor, lectures by visiting lecturers, in-class discussions, in-class writing assignments, individual class presentations, individual case analyses, and examinations. The course is open only to Notre Dame students who have a second major in computer applications or a minor in technology, business, and society. CAPP/TBS seniors only.

CAPP 40150. Current Trends in Computer Applications

(3-0-3) Berzai

The Current Trends course allows the students to think about and discuss issues openly that pertain to computer ethics, business ethics, and some social ethical issues. We start out by having an understanding of the distinction between the terms moral and ethical. The class works through the generally accepted theories for resolving moral and ethical conflicts. These are egoism, natural law, utilitarianism, and respect for persons. We also discuss the reasons businesses exist and what they think their responsibility toward society is now and how it might change in the future. The students also debate several business ethical issues. In the area of information technology, there is discussion about what the student sees as right or wrong, ethical or not ethical in the many issues of discussion that are presented. Restriction: CAPP/TBS seniors only.

CAPP 40210. The Internet and Society

(3-0-3) Monaghan

This course will spend the semester studying the impact the World Wide Web has had on several key areas of our society, including communications, commerce, marketing, productivity, education, collaboration, and our sense of community. Through a combination of discussion, group presentation, guest lectures, and out of class research, students will be exposed to some of the profound effects this medium has had on our culture. In spite of the bursting of the dot com bubble, the Web has left all of the mentioned areas substantially changed, many for the long term. The positive and negative forces brought on by this technology must be recognized, studied, and dealt with if we are to truly embrace the momentous opportunities brought about by the World Wide Web.

CAPP 40260. Information Security

(3-0-3) Chapple

This course provides students with a working knowledge of information security topics through a focus on best practices, applications, and implementation strategies. Students will learn the fundamental principles of information security and explore contemporary topics in the field, including access control methodologies, business continuity/disaster recovery planning, firewalls, network security, operating system security, intrusion detection, cryptography, and incident handling.

CAPP 40540. CAD for the Stage (FTT)

(3-0-3) Cole

The study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design and progress to 2-D and then 3-D design techniques. A basic understanding of the Macintosh computer system is necessary, and significant computer work is required outside class.

CAPP 40545. Computers in Psychological Research and Education (PSY)

(3-0-3) Crowell

This course and its counterpart in psychology (PSY 20671) are project-oriented. It is not an introductory course on computer applications. Students need to already have (or learn during the semester) the skills needed to complete whatever project is defined. Generally, projects are applications or systems that fit into the broad spectrum of the instructor's interests, which students can determine by consulting the instructor's Web page (<http://www.nd.edu/~ccrowell>). New projects are defined each semester. Some recent projects have involved: (1) Developing a multimedia presentation on management and coaching using PowerPoint slides and audio files or Director. (2) Creating a visual basic application to administer surveys on disk. (3) Exploring the capabilities of WebCT as a teaching tool. (4) Developing a website for student advising in the Psychology Department. (5) Completing a database application in Microsoft Access for tracking and reporting manager coaching sessions. Students are expected to plan and develop a functional application.

CAPP 40547. Multimedia Design I (Art)

(3-0-3) Sherman

This advanced multimedia course will give the studio, design, or CAPP major an introduction to the design of motion graphics. Students will develop short information movies, movie trailers, or movie opening sequences. The course will use Apple's Motion software and cover basic DVD and quicktime movie devel-

opment. Skill with various graphics software is useful, with expertise in Adobe Photoshop very important.

CAPP 40550. Digital 3-D Modeling (Design)

(3-0-3) Walters

This is an introductory course to Alias Wavefront Studio Software. The focus of this class is to learn how to use the software to generate 3D virtual models with an emphasis on industrial design concerns as well as creating manufacturable data for rapid prototyping. The class will be devoted to learning tools, interface, modeling and rendering methods. This will be achieved by completing specific assignments and tutorials. The final assignment will be to virtually model and render a product or scene from a concurrent class or personal interest

CAPP 40553. Music through Technology (Music)

(3-0-3) Dye

Music through Technology is a lecture/lab course open primarily to CAPP majors and musicians with consideration of other interested students. Lecture topics include the historical evolution of technology in music, surveying the influence that technology had on the music world, from a creative standpoint to the accessibility and distribution of music to the masses. Other examples of technology's influence in music may include the development of multi-track recording on popular music, synthesizer and midi technology, technology's applications for musical composition, and the adaptation of CD and mp3 formats to musical performers. The historical influence of technology is an illuminating foundation to current developments in the creative processes of music. Lab topics cover an introduction to current music technology including digital audio recording and editing, midi technology (sound and notation), and the digital management and distribution of music. Students will experience all of these technologies on an introductory level, but focus their interests on a technology-based final project to develop and display their acquired skills.

CAPP 40555. Introduction to Relational Databases using Oracle

(3-0-3) Miller

This course provides the student a working knowledge of enterprise relational database systems and how they can be used in the development of applications. The course will utilize the Oracle enterprise relational database, but the principles and skills learned in this course will apply to other relational database systems. The student will learn the terminology and fundamental concepts of relational database design and Structured Query Language (SQL) and develop a relational database for an application including principles of authentication and authorization in a Web application.

CAPP 40557. Developing Database Applications with Microsoft Access

(5-0-3) Crowell

Students will learn how to develop database-driven applications using Microsoft Access. Among the topics to be covered in this course will be designing and organizing a database, building forms to enter and edit data, using queries to reorganize or summarize data, developing reports to display and output data, developing macros to automate application functions, creating menus and controls to simplify application use by non-experts, and issues related to using applications over the Internet. The course will assume no previous background with programming or database systems. Some familiarity with Microsoft Windows and Office Applications, like Word or Excel, would be helpful. Class time will be devoted both to lecture and hands-on activities. In addition, a series of homework assignments building in complexity and scope will result in each student developing his or her own useable database application over the course of the Summer Session. Final grades in the class will be determined by attendance, completion of homework, weekly test performance, and the design and functionality of their final completed database application.

CAPP 40610. Foundations of Business Thinking

(3-0-3) Sucec

This course is designed to provide an integrated understanding of the foundational business disciplines of accounting, finance, marketing, and management, especially for CAPP majors planning a career in business. Fundamental leadership and consulting skills will also be addressed. Case analysis, coupled with a highly interactive format, will be employed to ensure practical exposure to today's business environment. Primary areas of focus will address the critical elements for success in the corporate environment, the knowledge and preparation necessary

to facilitate your interviewing process, and the business fundamentals for those with entrepreneurial aspirations.

CAPP 45565. Internship

(3-0-3)

This encompasses working with various civic, public, and/or private organizations using acquired computer applications knowledge and skills. Credit is given only if work is done in the information systems area of an organization.

CAPP 45566. Internship

(3-0-3)

This encompasses working with various civic, public, and/or private organizations using acquired computer applications knowledge and skills. Credit is given only if work is done in the information systems area of an organization.

CAPP 47557. Special Project Arts and Letters

(3-0-3)

This course gives students an opportunity to apply their information technology skills to create a project in their first major. Students will work with a faculty member in their first major to design and develop a functional application (including, but not limited to, a website, database, or CD-ROM).

CAPP 47566. Special Studies

(V-0-V)

Special Projects/Arts and Letters.

CAPP 47567. Special Studies

(V-0-V)

Individually designed course work between a student and the advisor in his/her first major or in the computer applications program constitute a special topic. This involves working with a faculty member, ND department, or an outside firm to do either programming or working with multimedia software. Permission required.

Center for Social Concerns

CSC 20629. War, Law, and Ethics

(3-0-3) Jordan, Pfeil

This course is designed to explore the ethical and legal considerations related to war and the use of force. Beginning with a historical overview of Christian thinking on war and peace, we will develop an account of various ethical positions on the use of force, including views rooted in the just war tradition and in pacifism. We will also consider the ethical implications of contemporary issues related to the use of force, e.g., sanctions, war crimes, humanitarian intervention, and terrorism. In collaboration with the Center for Social Concerns and La Casa de Amistad, students will have the opportunity to engage in service-learning by working with students from Washington High School to collect stories from local war veterans as part of the Library of Congress's "Veterans History Project."

CSC 20635. The Ethics of Energy Conservation

(3-0-3) Pfeil

This is a joint theology and engineering course exploring the ethics of energy conservation by using the method of community-based learning. Students will begin by using the university campus as a "trial laboratory" for measuring energy efficiency and thinking creatively about possible energy conservation measures. We will then ask them to conduct a limited energy efficiency and conservation study for selected non-profit organizations in the South Bend community. This course will fulfill a number of civic learning goals, including the cultivation of theological and scientific competence in environmental ethics; the identification of leadership skills necessary to address the concrete concerns facing nonprofit organizations as they strive to meet pressing human needs in an environmentally sound manner; and, formation of consciences sensitive to the social responsibility of caring for the environment. Maximum enrollment: 20 students. By permission only.

CSC 23090. Social Concerns Seminar: Children and Poverty

(1-0-1) Brandenberger

This seminar focuses on concerns that affect the youth of our nation, especially poverty and violence, and examines efforts to foster positive youth development. Immersion in New York City. Participants read Catholic social teaching focused on youth/family issues.

CSC 23094. Social Concerns Seminar: Understanding Mental Illness

(0-0-1) Beckman

Prerequisite: (PSY 30310 OR PSY 354 OR PSY 354A OR PSY 354B OR PSY 354C OR PSY 354D)

This course will expose students to the concepts of mental illness, available services, the National Alliance on Mental Illness (NAMI), and the impact of stigma. It will introduce and define the different major mental illnesses: schizophrenia, bipolar, major depression, anxiety disorders, and obsessive compulsive disorder. The genetic, biological, psychological, and environmental influences involved in the onset of mental illness will be addressed. The link between chemical imbalances, symptoms, and medications will also be covered as well as information regarding addictions/substance abuse and teen suicide. An exposure to a variety of social programs related to the treatment and support of persons with mental illness will be studied through experiential opportunities facilitated by the Center for Social Concerns.

CSC 23855. Social Concerns Seminar: Take Ten

(0-0-1) Brandenberger, Overdyck

This seminar allows graduate students to participate in an experiential learning opportunity designed to concentrate on civic engagement and social responsibility. Emphasis will be placed on understanding issues/conflicts from the perspective of the various participants. Preparation and follow-up sessions are tailored to the specific opportunity.

CSC 33401. Animal Welfare and the Human-Animal Bond: Community-Based Learning Seminar

(1-0-1) Stewart

Consider the fact that in six short years, one female dog and her offspring can give birth to 67,000 puppies. In seven years, one cat and her young can produce 420,000 kittens. Three to four million dogs and cats are euthanized each year. It

is estimated that there are 60 million feral cats in the US. In a society that considers pets as part of their family, watches Animal Planet, and spends millions of dollars on pet products, it is imperative that we acknowledge and educate ourselves on the issues of over population of pet animals in our society. What is our responsibility to these animals, and how can we solve these pressing problems? The focus of this course will be on animal behavior from an evolutionary perspective. The students will learn to recognize both desirable and undesirable behaviors in pet animals. They will learn how to use evolutionary behavior training methods to alter detrimental behaviors and reinforce those that are advantageous. This course will also cover animal welfare issues, and will intimately and meaningfully connect the state of humans, to that of animals. The students will carry out community research projects of their choice and will immerse themselves in an important issue and generate a product that can help the plight of animals (and therefore humans) in our community.

CSC 33858. Social Concerns Seminar: International Issues

(1-0-1) Tomas Morgan

This course revolves around international experiential learning opportunities, examining the culture, community and life of the people encountered, including the poor. Students participate in preparation and follow-up sessions.

CSC 33931. Summer Service-learning International: ACCION

(1-0-1) Shappell

The ACCION Internships run 10–12 weeks in micro-lending offices across the country. For junior Business majors only.

CSC 33932. Summer Service-learning: African American

(3-0-3) Shappell

This is a leadership internship for African-American students who work 10–12 weeks in an African-American area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 359 and work with the Center for Social Concerns to build partnerships with the agencies and people involved. An application and interview are necessary for participation.

CSC 33933. Summer Service-Learning: Hispanic

(3-0-3) McDowell

This is a leadership internship for Hispanic studies working 10–12 weeks in a Hispanic/Latino area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 33933 and work with the Center for Social Concerns to build partnerships with the agencies and people involved. Application and interview necessary for participation.

CSC 33934. Summer Service-learning: Worker Justice

(3-0-3)

Many of the 32 million people who live in poverty in our country hold full time jobs. Immigrant workers often make \$6 an hour with no health benefits, working under dangerous conditions. In a recent Department of Labor study, 100 percent of poultry plants, 60 percent of nursing homes, 50 percent of restaurants and 90 percent of farms were found to be violating wage and hour laws. In this internship, students from Notre Dame and other Catholic colleges and universities will work for ten weeks during the summer with one of 60 interfaith committees around the country through the National Interfaith Committee for Worker Justice (NICWJ). They will assist local staff on a wide range of worker issues, including access to affordable health care, immigrant worker rights, and worker rights to organize. They will explore how economic theory, trends, and policy inform the experience of workers in this country and gain a solid introduction to Catholic social teaching on labor issues.

CSC 33936. Summer Service-learning: Confronting Social Issues

(3-0-3) Shappell

This three-credit service-learning course takes place before, during, and after student participation in eight-week "Summer Service Projects" sponsored by the Center for Social Concerns. The goals of the course are to reflect on the meaning and dynamics of Christian service, compassion and Catholic social teaching through readings and writing, along with discussion and reflection with site supervisors and alumni, and scheduled group discussions upon return to campus. Writing assignments include a journal, reflection paper of six to eight pages and responses to study questions related to the course packet. This course is com-

pleted during the first five weeks of fall semester and is graded Satisfactory or Unsatisfactory. Acceptance is based on the student's application and interview.

CSC 33938. Summer Service-Learning: International

(3-0-3) Tomas Morgan

This three-credit course provides students the opportunity to encounter international realities through work with poor and marginalized people. Same academic requirements as THEO 33938 with the addition of area/country specific readings and meetings.

CSC 33939. Summer Service-Learning: NYSP

(1-0-1) Pettit

The National Youth Sports Program runs for six weeks on the Notre Dame campus. Students work with low-income children from the South Bend area in educational enrichment and recreation. Same requirements as THEO 33939.

CSC 33950. Social Concerns Seminar: Appalachia

(1-0-1) Miller McGraw

This seminar involves experiential learning during the semester break. The course is centered on a service-learning immersion in the region of Appalachia and provides preparation for and follow-up to that experience. Students may focus on particular themes (e.g., rural health care, environmental issues) at various sites while learning about the region and rural issues.

CSC 33951. Social Concerns Seminar: Washington, D.C.

(1-0-1) Miller McGraw

This course centers on a trip to Washington, D.C., over the semester break, during which time students analyze a significant social issue through contact with various agencies, government offices, and church organizations. Students participate in preparation and follow-up sessions. Themes (e.g., educational reform, violence in America) vary each year.

CSC 33953. Social Concerns Seminar: Contemporary Issues

(1-0-1) Tomas Morgan

This seminar allows students to participate in an experiential opportunity designed to examine contemporary social problems. Emphasis will be placed on understanding issues/conflicts from the perspective of the various participants. Preparation and follow-up sessions are tailored to the specific opportunity.

CSC 33954. Social Concerns Seminar: Leadership Issues

(1-0-1) McDowell

This course is open to student leaders of various campus organizations focused on community service and social action (e.g., student groups affiliated with the Center for Social Concerns, social concerns commissioners of dorms, etc.). It will examine leadership and empowerment issues from a multi-disciplinary perspective, focusing on the role of the leader within organizations promoting community service, social awareness, and action for justice and peace.

CSC 33957. Conscience in the Crossfire

(1-0-1) Pfeil

This one-credit course will explore the meaning of conscience as it applies in moral decision making. We will focus in particular on the formation of conscience, both individual and social, and consider specific applications as capital punishment, environmental justice, workplace ethics, politics, and conscientious objection to war. Students will be required to engage in several experiential learning activities.

CSC 33959. Social Concerns Seminar: Cultural Diversity

(1-0-1) Pettit

The purpose of this course is to begin to analyze the positive aspects of ethnic and cultural diversity as well as related tensions, including racism. Students will participate in a five-day program during break at selected sites that provides an orientation to culturally diverse communities and allows students to engage in discussions on relevant issues with local residents and community leaders. Students participate in preparation and follow-up sessions.

CSC 33960. Social Concerns Seminar: Mexico Service-Learning

(1-0-1) Tomas Morgan

This seminar involves three weeks of service-learning in Oaxaca, Mexico. It is designed to expose students to the reality of Latin America through inter-cultural exchange, shared work experience, and faith reflection. Students examine the social, cultural, and international forces operative in the region through discussion, relevant readings, and written reflection.

CSC 33961. Social Concerns Seminar: Discernment

(1-0-1) Mackenzie

This seminar focuses on senior students discerning and envisioning the integration of faith/theology and social concerns into their lives beyond Notre Dame. The objective is to provide students the opportunity to integrate their experience with the insights of speakers and authors, emphasizing the Catholic social tradition, in written and oral expression.

CSC 33962. Social Concerns Seminar: Gospel of Life

(1-0-1) Miller McGraw

The Gospel of Life Seminar provides opportunities to read, reflect and be of service on a variety of life issues through service and experiential learning. Exploration begins in orientation classes where students will become familiar with the issues through reading Church documents such as *The Gospel of Life* and through meeting people of the South Bend and Notre Dame communities that work on pro-life issues. During the week of service and experiential learning in Washington D.C. over fall break, the seminar participants will learn from Church and government leaders, various agencies, and individuals. The follow-up classes facilitate analysis and synthesis of insights gained during the week in Washington, D.C.

CSC 33963. Social Concerns Seminar: Church and Social Action

(0-0-1) Pettit

This course centers on a 48-hour immersion (colloquially known as the Urban Plunge) in an urban setting during the winter break (prior to return to campus). The course includes a preparation workshop in the fall semester, readings, two reflection papers, and follow-up educational meetings.

CSC 33964. Social Concerns Seminar: Education

(0-0-1) Purcell

This seminar focuses on the educational and outreach endeavors of St. John Vianney Catholic Parish in Goodyear, Arizona, and builds upon Notre Dame's relationships with the Congregation of Holy Cross. Participants are hosted by parish families and spend several days in the classroom with a mentor teacher. Participants also visit organizations in Phoenix doing outreach to people who are homeless and to pregnant women.

CSC 33965. Social Concerns Seminar: Organizing Power and Hope

(0-0-1) Caponigro

This seminar focuses on diverse church, school, leadership, and community-organizing initiatives to improve life in Chicago neighborhoods. Participants will be challenged to examine perceptions of power, service, and social action.

CSC 33966. Social Concerns Seminar: Border Issues

(0-0-1) Paladino

The seminar examines immigration and related issues that exist between the United States and Mexico. Participants travel to El Paso, Texas and Ciudad Juarez, Mexico to meet with refugees, Border Patrol, parish organizations, and families who live in "squatter" villages. Participants also analyze and discuss policy issues. The immersion is in partnership with Annunciation House.

CSC 33967. Social Concerns Seminar: Migrant Experience

(0-0-1) Miller McGraw

This seminar offers a unique immersion into the lives of migrant farm workers in Florida during the spring harvest. Students pick tomatoes in the fields (donating their wages), live with migrant families, assist church and social agencies that serve migrants, and meet with community leaders, never again to take food for granted.

CSC 33968. Social Concerns Seminar: L'Arche Community

(0-0-1) Miller McGraw

This seminar centers around travel to a L'Arche community (e.g., Toronto, Canada) to share community life with developmentally challenged persons. Students draw from the philosophy of Jean Vanier, the works of theologian Henri Nouwen, and other spiritual writings to augment this participatory learning experience.

CSC 33969. Social Concerns Seminar: Hispanic Ministry

(0-0-1) Purcell

This seminar gives participants the opportunity to experience the Church's option for the poor through an immersion into the spirituality, culture, and economy of the rural, Southern California valley community of Coachella. Students work with the members of the Congregation of Holy Cross who are in ministry there.

CSC 33970. Social Concerns Seminar: International Issues

(0-0-1) Tomas Morgan

This seminar serves as the required orientation course for all THEO 33938: International Service Learning Program participants. It will provide students with an introduction to international issues in developing countries through the lens of Catholic social tradition, guidance in independent country/area study, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the seminar with permission from the instructor.

CSC 33975. Social Concerns Seminar: Poverty and Development in Chile

(1-0-1) Cahill Kelly

This seminar serves as the required orientation course for all participants in the international study program in Chile. It will provide an introduction to international issues in developing countries through the lens of Catholic social tradition, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the Seminar with permission from the Instructor.

CSC 33976. Social Concerns Seminar: Environmental Justice and Human Rights in the Aftermath of Katrina

(1-0-1) Miller McGraw

Set in the wake of Hurricane Katrina, and centered on a journey to Louisiana during spring break, this seminar explores domestic environmental issues from the perspective of minority communities that suffered due to Hurricane Katrina. Examines historical, political, and economic issues that created a culture of poverty in such areas. After defining key concepts such as environmental racism, culture of poverty, justice, and equality, students will consider specific issues of waste pollution and exposure to toxic substances emitted from chemical plants built in disadvantaged neighborhoods. Apply through the Center for Social Concerns.

CSC 38801. From Power to Communion

(3-0-3)

Prerequisite: Six hours of theology. This seminar explores the present and the future of the Catholic Church, placing emphasis on how its future is foreshadowed in the growing ecclesial interdependence that exists between the churches of North and Latin America. Emphasis is placed on the growing involvement of the laity in Latin America and where this may lead the North American church. In a particular way, attention is given to the role of small Christian communities.

CSC 41008. Theatre and Social Activism

(3-0-3) Arons

In this course we will explore the potential of theatre as social activism and as a vehicle for social change. The course will involve two modes of study: 1) investigation of a variety of techniques and approaches to creating activist, "grassroots" theatre (e.g. looking work by artist/activists like Augusto Boal ("Theatre of the Oppressed"), Bread and Puppet Theatre, ACT/UP, etc.) and 2) creation of original theatre pieces addressing social concerns in the local community (for example, students might focus on creating theatre centered on local environmental issues,

the living wage campaign, the Michiana Peace Coalition, etc.). The class will culminate in public performances of our own "activist theatre," with the aim of making an impact and effecting change through the performing arts.

CSC 43075. Social Concerns Seminar: Gullah People

(1-0-1) Miller McGraw

Permission required.

CSC 43705. Addiction, Science, and Values

(3-0-3)

Students will be introduced to topics in the ethics of care for the indigent; to alternative therapies for recovery and maintenance; and to current brain models of addiction. They will be placed as volunteers (for 14 weeks) with institutions serving indigent recovering addicts in St. Joseph and Elkhart counties.

CSC 45836. Applied Anthropology: Immigrant Labor Rights

(4-0-4)

In conjunction with local organizations and social science researchers, students will work within Elkhart, collecting ethnographic data from immigrant community members. They will also learn how to apply the data they have collected to models for serving the community to find ways to better serve the local community and meet its needs.

CSC 47600. Social Concerns Seminar: Haiti

(1-0-1)

Individual or small group study under the direction of a faculty member in Haiti, with opportunities to learn via service.

Department of Classics

CLAS 10100. Ancient Greece and Rome

(3-0-3) Mazurek, T.

This first-year course introduces the general history and culture of ancient Greece and Rome to students coming to the subject for the first time. Literary texts central to the ancient Greek and Roman traditions receive prime attention, including works by Homer, Plato, Cicero, and Virgil, but students are also exposed to the importance of learning from documentary texts, archaeology, and art history. Topics discussed include concepts of divinity and humanity, heroism and virtue, gender, democracy, empire, and civic identity, and how they changed in meaning over time. The course allows students to develop a rich appreciation for the Greek and Roman roots of their own lives, and prepares them to study the Greco-Roman past at more advanced levels. Offered annually.

CLAS 10200. Introduction to Greco-Roman Mythology

(3-0-3) Mazurek

This first-year course introduces the mythologies of Greece and Rome—some of the foundational narratives of the Western literary and artistic tradition, and traces their transmission and influence over two-and-a-half thousand years from ancient to modern times. The course is particularly valuable as an initial course in the humanities because it pays special attention to such current interpretative theories as structuralism, psychoanalysis, feminism, and post-modernism that allow the many meanings of myths to be deciphered and understood. Offered annually.

CLAS 13186. Literature University Seminar

(3-0-3) Mazurek, E.

Introduces first-year students to the study of classical literature on a comparative basis, with readings from Greco-Roman and Arabic literature.

CLAS 20400. Introduction to the Ancient Art of Greece, Rome, Egypt, and the Near East

(3-0-3)

This course will examine the origins of Western art and architecture, beginning with a brief look at the Bronze Age cultures of the Near East and Egypt, then focusing in detail on Greece and Rome, from the Minoan and Mycenaean world of the second millennium BCE to the rule of the Roman emperor Constantine in the fourth century CE. Among the monuments to be considered are ziggurats, palaces, and the luxuriously furnished royal graves of Mesopotamia; the pyramids at Giza in Egypt and their funerary sculpture; the immense processional temple of Amon at Luxor; the Bronze Age palaces of Minoan Crete—the home of the monstrous Minotaur and Agamemnon at Mycenae, with their colorful frescoes and processional approaches; the great funerary pots of early Athens and the subsequent traditions of Red and Black Figure vase painting; architectural and free-standing sculpture of the Archaic and Classical periods; the Periclean Acropolis in Athens, with its monumental gateway and shining centerpiece, the Parthenon; and finally, among the cultural riches of Rome, the painted houses and villas of Pompeii; the tradition of republican and Imperial portraiture; the Imperial fora; the exquisitely carved Altar of Peace of Augustus; the Colosseum; and the Pantheon of the phillhellene emperor Hadrian.

CLAS 30021. Greek Literature and Culture

(3-0-3)

This course surveys the leading works of ancient Greek literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from a thousand years of extraordinary literary creativity. Among the authors introduced are Homer, Sappho, Aeschylus, Herodotus, Aristophanes, Plato, Theocritus, Plutarch, Lucian, and Longus. Special attention is paid to the formal structures of Greek literary works, the cultural issues they raise, and the lasting value of Greek literature to the modern age. The course prepares students for more advanced work in classical literature and culture. Offered annually.

CLAS 30022. Roman Literature and Culture

(3-0-3) MacCormack

This course surveys the leading works of ancient Roman literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from six hundred years of literary versatility that combined enormous originality with a literary tradition inherited from the Greeks. Among the authors introduced are Plautus, Lucretius, Catullus, Cicero, Horace, Livy, Lucan, Tacitus, Apuleius, Ammianus, and Augustine. Special attention is paid to the formal structures of Roman literary works, the cultural issues they raise, and the lasting value of Latin literature to the modern age. The course prepares students for more advanced study in classical literature and culture. Offered annually.

CLAS 30105. The History of Ancient Greece

(3-0-3) Baron

An outline introduction to the history of ancient Greece from the Bronze Age to the Roman conquest. The topics covered include the rise of the distinctive Greek city-state (the 'polis'), Greek relations with Persia, Greek experiments with democracy, oligarchy, and empire, the great war between Athens and Sparta, the rise to power of Philip and Alexander of Macedon, and the Greeks' eventual submission to Rome. Readings include narrative, documentary, and archaeological sources. The course prepares students for advanced study in ancient history. Offered biennially.

CLAS 30110. Democracy and the Greeks

(3-0-3)

This course builds on CLAS 30105, The History of Ancient Greece, and examines the theory, practice, and development of ancient Greek, especially Athenian, democracy. Particular attention is devoted to comparing ancient with modern forms of democracy. Among the special topics studied are the origins of democracy, its advantages and disadvantages as a form of government, Greek ideas of alternatives to democracy, and democracy as an abiding legacy of Greek civilization to the modern world.

CLAS 30120. The Greeks and Their Gods

(3-0-3)

An introduction to the varied and unique religious beliefs and practices of the ancient Greeks. With the aid of anthropological and comparative material on religion from other cultures and societies, the course stresses the intersection of religious conventions with politics, gender, and class in the Greek city-states, and gives special attention to the religious life of the best documented Greek community of all, ancient Athens.

CLAS 30205. The History of Ancient Rome

(3-0-3)

An outline introduction to the history of ancient Rome from Romulus to Constantine. The topics covered include the meteoric spread of Roman rule in the ancient Mediterranean, the brilliance of a republican form of government tragically swept away by destructive civil war, the rise of repressive autocracy under the Caesars, and the threats to empire in late antiquity posed inside by the rise of Christianity and outside by hostile invaders. Readings include narrative, documentary, and archaeological sources. The course prepares students for advanced study in ancient history. Offered biennially.

CLAS 30210. Roman Law and Governance

(3-0-3)

An introduction to the nature and influence of Roman law, one of the most celebrated and distinctive elements of ancient Roman culture. The course surveys the development of Roman civil and criminal law from the very early and enigmatic Twelve Tables to the very late and amazingly great *Digest* of Justinian. Topics covered include legal procedures, the creation of law, and Roman jurisprudence, all of which are studied in the broad context of Roman government and administration. The lasting effects of Roman law on modern legal systems are also considered.

CLAS 30214. Cicero and Political Tradition

(3-0-3)

The life and writings of Marcus Tullius Cicero (106–43 BC) have been studied in light of the different aspects of his eventful career as a lawyer and advocate, orator, politician, statesman, and philosopher. His surviving writings, political and judicial speeches, treatises on religion, law, ethics, political philosophy and rhetoric, and also many personal letters, shed light on the diverse successes and reversals of his public and private life. Those who study Cicero tend to focus on one or two aspects of his achievement to the exclusion of others. In this course, we will try to understand how the different branches of Cicero's life and work fit together, why he thought that philosophy, law, and religion were relevant to politics, and why and how ethical considerations should condition one's private and public life. In pursuing these issues, we will think about Cicero's intellectual and political predecessors, both Greek and Roman, before reading a selection of his own writings. By way of understanding some aspect of Cicero's enormous influence we will conclude with reading part of *The Federalist Papers*.

CLAS 30215. The Roman Revolution

(3-0-3)

This course builds on the work of CLAS 30012 and CLAS 30022 and examines the climactic events in Roman history of the late first century BC and early first century AD that changed Rome from an open republic to a repressive military monarchy. Chronologically the course begins with the appearance on the Roman political stage of the unabashedly ambitious Julius Caesar, and ends with the accession of a hereditary autocrat in the person of the morose ruler Tiberius. Exploring a variety of sources, the course focuses on the political tensions and civil commotions of the revolutionary era associated with warlords like Pompey, Crassus, Caesar, and Antony, and concentrates especially on the rise to power of Augustus, the most ruthless warlord of all, and his creation of a personal political regime that was to last in style for centuries.

CLAS 30220. The Romans and Their Gods

(3-0-3)

An introduction to the way in which the Romans conceived of, worshipped, and communicated with the myriad gods of their pantheon. The course focuses first on conventional religious rituals and their cultural meaning, and secondly on the success of Roman polytheism in adapting to changing historical and social conditions. Particular attention is paid to the so-called "mystery religions," including Christianity, and their relationship to conventional forms of Roman religious behavior.

CLAS 30225. Romans and Christians

(3-0-3)

The early development of the Christian religion in its historical Roman context. The course surveys the political, social, and administrative structures of the Roman Empire, examines the complexity of Rome's religious life, and analyzes the rise of the Jesus movement and Rome's reaction to it. Particular topics studied include pagan and Christian magic and miracle-working, the sectarian and subversive character of early Christianity, martyrdom and persecution, and Constantine's emergence as Rome's first Christian emperor.

CLAS 30315. Sex and Gender in Greco-Roman Antiquity

(3-0-3)

This course examines the differing roles and stereotypes, forms of behavior, and values associated with women and men in Greco-Roman antiquity. Special attention is given to the preoccupations of the Greeks and Romans with the categories of "female" and "male" and to the dynamics of relations and relationships between women and men. The course both deepens knowledge of Greco-Roman society and provides an informed background for contemporary gender debates.

CLAS 30320. Family and Household in Greco-Roman Antiquity

(3-0-3)

A survey of the life-course in Roman antiquity. Topics studied will include marriage, divorce, child-rearing, old age, the way in which family and household were conceptualized by the Romans, and the demography of the Roman world.

CLAS 30328. War and Society in the Ancient World

(3-0-3)

The political structures, societal practices, and artistic productions of Greece and Rome were profoundly shaped by military activity. This course surveys the practice of war and its effects on art and society from Homeric Greece to the end of Roman hegemony in Western Europe. Questions to be considered include: what were the strategy and tactics of ancient armies? How did military organization affect and reflect social organization and political and economic policy? What is the ideology of war? How did the experience of war affect the attitudes of different generations? Texts to be read include Homer, Aeschylus, Thucydides, Plutarch, Caesar, Horace, Vergil, Josephus, Frontinus, and Tacitus.

CLAS 30329. Self and Society in the Ancient World

(3-0-3) Niesiolowski-Spano

This course seeks to answer the question "Who am I and how should I present myself?" through an investigation of self and society in the ancient world. Surveying the literature of the Ancient Near East, with special emphasis on biblical texts and Classical texts from Greece and Rome, students will explore how ancient peoples defined themselves, and to what extent the methods of self-defining have changed (or not changed) up to the present. Students will read and analyze a variety of ancient texts as they explore how ancient societies conceptualized individual and group identity in ethnic, national, and religious aspects. Students will also read classic and recent historical and anthropological scholarship, which will place the texts in a greater context and invite the students to think about the problems of ethnic, national, religious, and political identities in the modern world.

CLAS 30330. The Greek and Latin Origins of Medical Terminology

(3-0-3)

This course offers an introduction to the ancient Greek and Latin languages that enables students to decipher the arcane and often perplexing vocabulary of modern medicine. Basic linguistic concepts are explained, the manner in which medical terms are constructed from Greek and Latin roots is analyzed, and appropriate contextual material on ancient medicine is provided. This is a course of great practical value, not least for the attention it pays to human anatomy.

CLAS 30335. The History of Ancient Medicine

(3-0-3)

This course traces the development of medicine in the ancient Mediterranean world, concentrating on the medical beliefs, theories, and practices of the Egyptians, Greeks, and Romans. The course emphasizes the value of studying written sources such as the Hippocratic treatises and the works of Galen with artistic evidence and human remains. A connection between ancient and modern medicine is made by considering two contrasting models of disease—the biomedical and the biopsychosocial—that figure as the focus of a contemporary debate on health care.

CLAS 30360. Words and/of Power: The Theory and Practice of Persuasive Speech in Greece and Rome

(3-0-3) Krostenko

Rhetoric occupied a prominent place in the democracy of the Athenians and in the republican era of Roman history. This course examines the theory, practice and context of ancient rhetoric, and pays special attention to developments caused by radical changes in the political character of the Athenian and Roman civic communities. Representative readings from Greek and Roman orators and writers on rhetorical theory.

CLAS 30365. The Art and Literature of Metamorphosis

(3-0-3)

This course begins with a critical study of Ovid's great poem, the *Metamorphoses*. The poem itself became a subject of metamorphosis in poetry and art in the hands of such figures as Statius, Dante, Botticelli, Bernini, Rembrandt, Hughes, and Heaney. The course addresses the modeling of transformation within the literary text by examining first Ovid and his sources, and second, adaptations of his poem by writers such as Shakespeare and Kafka. Connections with folklore, magic, and religion are explored. The graphic arts receive equal consideration as the course explores how Ovid's ideas of the transformation of the body, the capacity of the human body for allegory, and the fragility of identity have influenced later artists and authors.

CLAS 30410. Hellenistic and Roman Art and Architecture

(3-0-3)

This course explores the architecture, urban planning, sculpture, and painting of Hellenistic Greece and Rome, from the time of Alexander the Great in the fourth century BCE to the reign of the Roman emperor Constantine in the fourth century CE. The art and architecture of Greece and Rome will be analyzed as expressions of their culture and time and as tools for understanding those cultures more completely. A variety of themes will be addressed, including changing conceptions of monumentality in art and architecture; imperial propaganda in art, architecture and religion; technology as inspiration for new conceptions of art and architecture; the contrasting natures of Greek and Roman art and culture; the influence of Greek culture upon Rome; and the nature and significance of the ever-changing mixture of Greek and native Italic elements in Roman art and architecture.

CLAS 30420. Late Antique/Early Christian Art

(3-0-3) Barber

Art in Late Antiquity has traditionally been characterized as an art in decline, but this judgment is relative, relying on standards formulated for art of other periods. Challenging this assumption, we will examine the distinct and powerful transformations within the visual culture of the period between the third and sixth centuries AD. This period witnesses the mutation of the institutions of the Roman Empire into those of the Christian Byzantine Empire. Parallel to these social changes we can identify the emergence of a Christian art that defines our basic assumptions about the role of art in a Christian society. The fundamental change in religious identity that was the basis for this development had a direct impact upon the visual material that survives from this period. This course examines the underlying conditions that made images so central to cultural identity at this period.

CLAS 30431. The Art of Mythology

(3-0-3)

This cross-disciplinary course explores representations of classical myth in Western literature and art from the seventh century BC to the 18th century of the modern era. Literary and visual narratives are compared and contrasted, and the procedures of poets, philosophers, artists, sculptors, and architects in selecting and adapting mythological subjects are analyzed. The course raises questions about the connections between myth and political power, and about such major concepts as heroism, metamorphosis, and earthly and divine love. Readings from classical sources on Greek myths, and special attention to such works of art as Raphael's Roman cycles and Bernini's sculpted dramas.

CLAS 30799. Hieroglyphs and History

(3-0-3) Ladouceur

This course will focus on Egyptian hieroglyphs both as a means to reconstruct Egyptian history and culture as well as a reflection of that culture. The student will be taught to translate and interpret primary sources especially on monuments and archaeological finds. Material from the tomb of Tutankhamen will be read and analyzed in detail. In addition there will be lectures and discussions on specific historical topics and also on developing chronologies, understanding color symbolism, recognizing the numerous Egyptian deities, and interpreting Pharaonic names.

CLAS 40125. Classical Greek Tragedy

(3-0-3)

This advanced course in literature provides detailed study of the theory and practice of classical Greek tragedy. The structures and sensibilities that inform tragedy are assessed, with special attention to plays written by the three great tragedians, Aeschylus, Sophocles, and Euripides. The Greeks' own responses to tragedy, as represented by Aristophanes, Plato and Aristotle, are also discussed. The form and function of Greek tragic plays, their place in classical culture, and their distinctive approach to issues of human life are key topics of the course.

CLAS 40130. Socrates and Athens

(3-0-3)

This course examines the moral upheaval evident in classical Athens during the Peloponnesian War, the great fifth-century struggle between Athens and Sparta and their respective satellites. The history of Thucydides, the comedies of Aristophanes, and the tragedies of Euripides and Sophocles provide the basic

reading. The course also draws on some of Plato's writings to assess Socrates' reaction to the Athenian moral crisis.

CLAS 40340. The Roman Empire: Governance, Society and Culture

(3-0-3) Bradley

This advanced course in ancient history examines the Roman Empire from Augustus to Constantine. It deals with the establishment of the Augustan Principate and the progression of autocracy at Rome in the first two centuries of the imperial age, leading to discussion of what is generally called the third-century crisis and the new monarchy of Diocletian and Constantine. It investigates how the Roman Empire as a geopolitical unit was governed and administered (paying particular attention to the all-powerful figure of the Roman emperor), and how the diverse regional cultures of the greater Mediterranean world were affected by Roman rule. Among topics studied are contemporary debates on Roman society, economy, demography, and culture.

CLAS 40342. Rome, the Christians, and Early Europe

(3-0-3) MacCormack

The course studies continuity and discontinuity in the Mediterranean world during a formative period, the transition from Roman Empire to early medieval European kingdoms. Christianity played a vital role during this transformation, but not the only one. Beginning with a review of Roman institutions, law, culture, and religion, we will observe the changes they underwent between c. 150 CE and c. 750 CE. At this latter point in time, some people were still thinking of themselves as living within the Roman empire, even though the local potentate was a non-Roman king. Also, Roman law had become Christian law, and Latin was beginning to generate the languages now collectively described as "Romance." On the fringes of Europe, in England and Ireland, meanwhile, missionaries shared with their converts not just Christianity but also the Latin language and Latin literature along with certain Roman concepts of culture and political organization.

CLAS 40350. The Myths of the Greeks and Romans

(3-0-3) Turkeltaub

This advanced course investigates the mythologies of Greece and Rome and traces their transmission to and influence on modern literature and art. Special attention is given to the wide range of media in which ancient stories about gods and heroes were expressed and communicated, and to the process by which these marvelous stories survived in later literature and the visual arts, inspiring writers and artists to adapt them to their own purposes. Current interpretative theories at the forefront of scholarship in the humanities are explored for their value in interpreting myths.

CLAS 40355. Greek and Roman Epic Poetry

(3-0-3) Schlegel

This advanced course in literature provides detailed study of the major epic poems of the classical literary tradition: the *Iliad* and *Odyssey* of Homer, the *Aeneid* of Virgil, and the *Metamorphoses* of Ovid. Discussion centers on the cultural contexts in which the works were written or produced, and the literary conventions on which they rely for their ever-appealing aesthetic and emotional power.

CLAS 40360. Humor and Violence in Western Culture

(3-0-3)

This course explores the relationship between humor and violence in Western cultural history from Greco-Roman antiquity to the present. It takes as a guiding premise the idea that humor is a response and antidote to violence and suffering, and pursues the theme in a wide range of literary works and films. The course is linked to History 30350.

CLAS 40407. Seminar: Greek and/or Roman Art

(3-0-3)

Seminar on specific subjects in Greek and/or Roman art. Variable content.

CLAS 40420. Art into History: Reading the Art of Medieval Byzantium

(3-0-3) Barber

Byzantine art has often been opposed to the traditions of Western naturalism, and as such has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material we will examine the art produced in Byzantium in the period from the ninth to

the 12th century, a period that marks the high point of Byzantine artistic production and influence. Stress will be placed upon the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear upon our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue of this course.

CLAS 47801. Special Studies
(V-0-V)

Individual or small group study under the direction of a faculty member. Permission of the department required.

CLAS 50100. Honors Seminar
(3-0-3) Schlegel

This course is offered each fall semester and is a requirement for all majors in Classics and Greek and Roman Civilization who wish to receive an honors degree. The specific content of the seminar varies from year to year, but its broad purpose is to introduce students to scholarly methods of research, and through research to reflect on the value of studying classical antiquity.

CLAS 53400. Seminar: Topics in Ancient Art
(3-0-3)

Topics course on special areas of Greek and/or Roman art.

CLGR 10001. Beginning Greek I
(4-0-4) Baron

This two-semester sequence of courses introduces students to the language of the ancient Greeks for the first time. It emphasizes the fundamentals of ancient Greek grammar and vocabulary, and prepares students to read original Greek texts. An appreciation for ancient Greek culture is also fostered through secondary readings and class discussion. CLGR 10001 is offered each fall semester and CLGR 10002 is offered each spring semester.

CLGR 10002. Beginning Greek II
(4-0-4)

Prerequisite: CLGR 10001 OR CLGR 101

This two-semester sequence of courses introduces students to the language of the ancient Greeks for the first time. It emphasizes the fundamentals of ancient Greek grammar and vocabulary, and prepares students to read original Greek texts. An appreciation for ancient Greek culture is also fostered through secondary readings and class discussion. CLGR 10001 is offered each fall semester and CLGR 10002 is offered each spring semester.

CLGR 20003. Intermediate Greek
(3-0-3) Ladouceur

Prerequisite: CLGR 10002 OR CLGR 102 OR CLGR 10111 OR CLGR 200
This second-year language course builds on the work of Beginning Greek I and II. It combines a review of grammar with careful reading of classical Greek authors such as Homer and Plato. The course improves students' translating skills, introduces methods for studying Greek literature in its historical and cultural contexts, and prepares students for more advanced work in the rich literature of the ancient Greeks. Offered each fall semester.

CLGR 20004. Reading and Writing Greek Prose
(3-0-3)

Prerequisite: CLGR 20003 OR CLGR 103 OR CLGR 201

This second-year language course continues the review of grammar begun in CLGR 20003 and introduces students to stylistic analysis through close readings of classical Greek prose authors such as Herodotus and Xenophon. A special feature of the course is that students learn how to write classical Greek for themselves. Offered each spring semester.

CLGR 30011. Homer
(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 202

This third-year course builds on CLGR 20003 and CLGR 20004, and offers close reading of passages from the *Iliad* and *Odyssey*. Homer's epic poems stand at the head of the tradition of European literature; their themes and poetic style have substantially influenced the works of Dante, Milton, and many other

European writers. The poems are discussed in their cultural context, and features of poetic oral composition are examined. The course prepares students for advanced offerings in Greek literature, especially CLGR 40021 and CLGR 40031. Offered in fall semester, alternate years.

CLGR 30012. Herodotus
(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 325 OR CLGR 202

This third-year course builds on the work of CLGR 20003 and CLGR 20004, and offers close reading of passages from the *Histories* of Herodotus. The *Histories* tells of the momentous wars between the Greeks and the Persians in the early classical era, and is the earliest surviving narrative of the Western historical tradition. The political, social, and cultural conditions of fifth-century Greece that inspired Herodotus are discussed, and the development of Greek history-writing is examined. The course prepares students for advanced offerings in Greek literature, especially CLGR 40022, CLGR 40032, and CLGR 40042. Offered in spring semester, alternate years.

CLGR 30013. Greek Tragedy

(3-0-3) Turkeltaub

Prerequisite: CLGR 20004 OR CLGR 325

This third-year course builds on the work of CLGR 20003 and CLGR 20004 and offers close reading of passages from the tragedies of Sophocles and Euripides. These plays illustrate the Athenian invention and development of tragedy that took place when Athens dominated Greece politically between the Persian Wars and the Peloponnesian War, the great fifth-century war against Sparta. The ways in which the plays reveal and address the city's ideological, political, and sexual tensions are key themes for discussion in the course, and matters of style are appropriately examined. The course prepares students for advanced offerings in Greek literature, especially CLGR 40023. Offered in fall semester, alternate years.

CLGR 30095. Socratic Literature

(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 325

This course will study the character and philosophical significance of Socrates within the context of the intellectual ferment of late fifth-century Athens. The Greek primary texts that constitute the heart of the course are Plato's *Laches* and *Lysis* and sections of Xenophon's *Memorabilia*. Issues that arise from those texts, like the ideal of rational character and Socrates' great interest in Eros, will provide opportunities for student research and classroom discussions.

CLGR 40021. Hesiod

(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 325

This advanced course introduces students to the poetry of Hesiod through close reading and detailed study of the *Theogony* and the *Works and Days*. Both works represent an early poetic tradition in Greek literature parallel to but separate from that of Homer focusing on the human condition in a cosmos controlled by all-powerful and vengeful gods. The relationship of these central works of archaic Greek literature to other archaic texts is a key theme for discussion in the course.

CLGR 40022. Thucydides

(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 325

This advanced course introduces students to the historical writing of Thucydides through close reading and detailed study of the *History of the Peloponnesian War*. Often considered the most accurate and methodical of the ancient historians, Thucydides brought to Greek history-writing a high level of precision in both language and analysis. His uniquely candid accounts of the history, politics, and social effects of the great war between Athens and Sparta, and the connection between content and literary style are key themes for discussion in the course.

CLGR 40026. The Age of Alexander

(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 325

Alexander the Great (356–323 BC) had a stunning impact on the ancient Mediterranean world. Leading a panhellenic crusade against the Persians, he created an empire of enormous proportions that included his native Macedonia, Greece, Egypt, and much of the ancient Near East. In so doing he laid the foun-

datations for the dispersal of Greek ideas and practices over a huge area. This course examines Alexander's meteoric and ruthless career through careful study of two Greek authors who wrote extensively about him, Arrian, and Plutarch.

CLGR 40031. Greek Lyric Poetry

(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 325 OR CLGR 202

This advanced course includes readings from Archilochus's iambic and elegiac poems, Sappho's monodies, and Pindar's choral works. It introduces students to archaic and classical Greek lyric poetry, which represents a literary tradition that drew inspiration from religious ritual, contemporary politics, and private experience. Its authors experimented with diction, style, and meter in ways distinct from those of the epic poets. The manner in which they wrote and the ways in which they responded to the epic tradition are key themes for discussion in the course.

CLGR 40034. Plato

(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 202 OR CLGR 325

This advanced course offers accelerated reading and detailed study of the philosophical dialogues of Plato, whose writings, often radical and challenging, represent a cornerstone in the Western intellectual tradition. The development of Plato's philosophical ideas in their historical context is a key theme for discussion in the course, and attention is paid to the main features of his prose style in selections of his works.

CLGR 40042. Plutarch

(3-0-3) Schlegel

Prerequisite: CLGR 20004 OR CLGR 325

This advanced course introduces students to the most famous biographical literature from antiquity, Plutarch's *Parallel Lives*. Illuminating the virtues and vices of famous and infamous men from Greek and Roman history, the *Parallel Lives* offers an important guide to understanding the ethical imperatives of the Greco-Roman world. Plutarch's literary style, his conception of biography, and the Roman imperial context in which he wrote are key themes for discussion in this course.

CLGR 40063. Euripides

(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 325

This advanced course offers accelerated reading and detailed study of the tragic plays of Euripides, the last of the great tragedians of classical Athens and the object of ridicule from the comic writer Aristophanes. Euripides plays depart from those of his predecessors first because of their escapist and romantic plots and secondly because of their fierce engagement with contemporary Athenian politics and society. The course dwells on this development, and also considers why Euripides is sometimes considered the most radical of the Athenian tragedians.

CLGR 40071. Greek Wisdom Literature

(3-0-3)

Prerequisite: CLGR 20004 OR CLGR 202

In this course we will read samples of one of the oldest and most enduring forms of literature, wisdom or sapiential literature. The wise man instructs his audience through fables, proverbs, traditional tales, and accounts of the universe in the right way to live. The texts read in Greek range from the archaic period (Hesiod) to collections of wise sayings from the Hellenistic period, the *Life of Aesop*, Lucian's account of a trip to the moon, and the *Wisdom of Ben Sirach*. The Near Eastern origins and the Jewish and Christian traditions will also be considered (in translation and some in the original Greek).

CLGR 47801. Special Studies

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

CLLA 10001. Beginning Latin I

(4-0-4) Garvey; Mazurek, T.; Perett

This two-semester sequence of courses introduces students to the language of the ancient Romans for the first time. It emphasizes the fundamentals of Latin grammar and vocabulary, and prepares students to read original Latin texts. An appreciation for ancient Roman culture is also fostered through secondary readings and class discussion. CLLA 10001 is offered each fall semester and CLLA 10002 is offered each spring semester.

CLLA 10002. Beginning Latin II

(4-0-4) Mazurek, T.; Perett

Prerequisite: CLLA 10001 OR CLLA 101

This two-semester sequence of courses introduces students to the language of the ancient Romans for the first time. It emphasizes the fundamentals of Latin grammar and vocabulary, and prepares students to read original Latin texts. An appreciation for ancient Roman culture is also fostered through secondary readings and class discussion. CLLA 10001 is offered each fall semester and CLLA 10002 is offered each spring semester.

CLLA 10010. Intensive Beginning Latin

(5-0-5) Mazurek

This accelerated course provides an introduction to the Latin language for beginners and covers in one semester the contents of CLLA 10001 and CLLA 10002. Students who complete the course are eligible to proceed to the intermediate level of study. The course meets five days a week and requires considerable work outside the classroom.

CLLA 20003. Intermediate Latin I

(3-0-3) Krostenko; Mazurek, T.; Taylor

Prerequisite: CLLA 10002 OR CLLA 102 OR CLLA 118 OR CLLA 10111 OR CLLA 200

This second-year language course builds on the work of Beginning Latin I and II. It combines a review of grammar with careful reading of classical Latin authors such as Cornelius Nepos, and Ovid. The course improves students' translating skills, introduces methods for studying Latin literature in its historical and cultural contexts, and prepares students for more advanced work in the sophisticated literature of the ancient Romans. Offered each fall semester.

CLLA 20004. Reading and Writing Latin Prose

(3-0-3) Krostenko; Mazurek, T.

Prerequisite: CLLA 20003 OR CLLA 103 OR CLLA 103A OR CLLA 20103 OR CLLA 201

This second-year language course continues the review of grammar begun in CLLA 20003 and introduces students to stylistic analysis through close readings of Latin prose authors such as Cicero and the younger Pliny. A special feature of the course is that students learn to write classical Latin for themselves. Offered each spring semester.

CLLA 30011. Virgil

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 202 OR CLLA 20103

This third-year course builds on CLLA 20003 and CLLA 20004, and offers close reading of passages from the *Aenid*. Virgil's inspired adaptation of Homer's epic poems traces the story of the flight of Aeneas from Troy to Italy, where Rome, a new Troy, will be founded. The place of Virgil's epic in the emperor Augustus cultural program, various critical approaches to the poem, and its compositional techniques provide subjects for discussion. The course prepares students for advanced study in Latin literature, especially CLLA 40021, CLLA 40031, CLLA 40041, and CLLA 40051. Offered in fall semester, alternate years.

CLLA 30012. Latin History-Writing

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This third-year course builds on CLLA 20003 and CLLA 20004, and offers close reading of passages from the works of the historical writers Caesar and Sallust. Latin historiography is a sophisticated instrument for narrating past events, for showing how notions of cause and effect and change over time develop in historical thinking, and for indicating the relevance of the past to the present. The political and social conditions of Rome that informed the writings of Caesar and

Sallust are discussed, and the compositional techniques of their works are examined. The course prepares students for advanced offerings in Latin literature, especially CLLA 40022, CLLA 40032, and CLLA 40052. Offered in spring semester, alternate years.

CLLA 30013. Roman Lyric Poetry

(3-0-3) Mazurek, E.

Prerequisite: CLLA 20004 OR CLLA 325

This third-year course builds on CLLA 20023 and CLLA 20024, and offers close reading of passages from the lyric poetry of such authors as Catullus and Horace. The lyric form gives precise and economical expression to a wide range of human thoughts and emotions, from the highly personal to the grandly patriotic. The range of Roman lyric, the technique of its practitioners, and the place of lyric poetry in Roman life are themes that receive special attention. This course prepares students for advanced offerings in Latin literature, especially CLLA 40023, CLLA 40033, CLLA 40043, and CLLA 40053. Offered in fall semester, alternate years.

CLLA 30014. Cicero's Speeches

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This third-year course builds on the work of CLLA 20003 and CLLA 20004, and offers close reading of select speeches of Rome's greatest orator, Cicero. The art of persuasion was an essential requirement for success in Roman public life, and no one was more persuasive than Cicero. The flexibility and complexity of Cicero's grammatical expression, the range of his styles, and the political contexts in which his speeches were delivered are all given careful treatment. The course prepares students for advanced offerings in Latin prose, especially Latin CLLA 40024, CLLA 40034, and CLLA 40054. Offered fall semester, alternate years.

CLLA 30025. The Age of Nero

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325 OR CLLA 202

The reign of the emperor Nero (AD 54–68) witnessed a remarkable efflorescence of Latin literature. Nero's mentor Seneca was a prolific author of moral philosophy and drama, Seneca's nephew Lucan wrote a stirring and strange epic about civil war (the *Pharsalia*), the enigmatic Persius composed brilliant satires, and the senator Petronius, a member of Nero's court, authored the famous comic novel, the *Satyricon*. Even Nero, a devotee of the arts at large, was an aspiring poet. This third-year course introduces students to this special age of Latin letters through close reading of excerpts from the major works mentioned, and also from the technical writing of the contemporary expert on farming, Columella. Whether a distinctive character to the literature of Nero's age can be discovered is the main theme for discussion.

CLLA 40016. Introduction to Christian Latin Texts

(3-0-3) Taylor

Prerequisite: CLLA 20004 OR CLLA 325

This class has two goals: to improve the student's all-around facility in dealing with Latin texts and to introduce the student to the varieties of Christian Latin texts. Medieval Latin II, a survey of Medieval Latin texts, follows this course in the spring term.

CLLA 40017. Medieval Latin Survey

(3-0-3) Bloomer

Prerequisite: CLLA 40016 OR CLLA 475 OR MI 40003 OR MI 475

The aim of this course is to experience a broad spectrum of Medieval Latin texts. Readings representative of a variety of genres (literary and subliterary), eras, and regions will be selected. Students planning to enroll in this course should be completing Introduction to Christian Latin Texts or they must secure the permission of the instructor. Those with interests in particular text types should inform the instructor well in advance so that he can try to accommodate their interests.

CLLA 40018. Introduction to Latin Paleography

(3-0-3)

Although paleography, study of the history of letter forms, has been called "a science of the very small," it can play a very large role: it equips philologists with otherwise unavailable resources for their studies, it furnishes historians of culture and the arts with abundant new data and comparanda, and it is a source of delight to anyone who loves books and calligraphy. This course is an introduction:

it will provide an overview of the history of Latin letters and writing from the first century BC through the 15th century AD considered as products of the cultures that produced them; special attention will be given to developing facility in reading the principal script types used for the transmission of texts (bookhands) and in transcribing and editing texts so transmitted; but students will also develop a good acquaintance, a basis for future study, with the more obscure script types, display scripts, and letter forms employed on coins, inscriptions, and seals.

CLLA 40022. Caesar

(3-0-3) Krostenko

Prerequisite: CLLA 20004 OR CLLA 325

This advanced course introduces students to the highly stylized historical writings of Julius Caesar through close reading of excerpts from the Gallic War, a commentary on Caesar's dramatic extension of Roman power in northern Europe, and the civil wars, a work on the destructive conflict between Caesar and his rival Pompey the Great. The central questions Caesar's works raise are whether an objective history can be composed by someone who participated in the events narrated, whether a record of contemporary events is real history, and why warfare was such an attractive topic to a Roman audience. These questions form the main themes of the course, which are considered in the light of Caesar's style and compositional methods.

CLLA 40023. Roman Elegiac Poetry

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This advanced course introduces students to Latin elegy, a form of verse that served Roman poets as a vehicle for expressing and exploring personal feelings, especially those associated with love. Readings from Catullus, Propertius, Tibullus, and Ovid expose how Roman poets adapted and experimented with the elegiac form to express highly charged personal emotions often at odds with conventional Roman values.

CLLA 40024. Roman Rhetoric

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This advanced course introduces students to Roman writings on rhetoric, a vital art in Roman public and cultural life. Readings from the *Rhetorica ad herennium*, Cicero, the elder Seneca, Quintilian, and Tacitus allow differing concepts of rhetoric to be seen, the relationship between rhetorical theory and practice to be understood, and the lasting value of Roman efforts to theorize the power of speech to be appreciated.

CLLA 40025. Cicero and the Ideal and Reality of Friendship

(3-0-3)

Cicero wrote the dialogue *de Amicitia*, which we will be reading, in 44 BCE just before and after the assassination of Caesar. Recalling his youth, when he was a student of Mucius Scaevola the augur, Cicero imagined, in this dialogue, an episode from his favorite period, the second century BCE, by way of having C. Laelius, the friend of the Younger Scipio, speak about the joys this friendship brought him. Cicero described an ideal, the shared pursuit of virtue and virtuous desires, but he also thought that this ideal could and should find scope in public life. By way of comparing ideal and reality, we will be reading, alongside *de Amicitia*, a selection of Cicero's letters that shed light on the practical aspects of friendship as pursued by Cicero himself. Time allowing, we will also read Cicero's *Somnium scipionis* and some letters of the humanist Francesco Petrarca.

CLLA 40026. The Vulgate and Related Texts

(3-0-3)

Readings and critical discussion of the various layers of text, commentary, and glosses in the Vulgate Bible: (1) Jerome's translation from the Hebrew (Canonical Books of the Hebrew Scriptures) including his introductions, including recent secondary scholarship on St. Jerome; (2) Jerome's revised Gospels, with particular attention to St. Luke; (3) a glossed commentary on the gospel of St. Luke recently purchased by Notre Dame and Newberry Library (Notre Dame-Newberry ms. no. 9); and (4) a transcription and evaluation of the Notre Dame-Newberry glosses. The class will have access to the manuscript itself, as well as photographic reproductions. An elementary knowledge of Latin is prerequisite; students will be expected to translate in class, and to read from reproductions of medieval manuscripts.

CLLA 40027. Medieval Latin Texts

(3-0-3)

A survey of Medieval Latin texts, designed to introduce intermediate students to Medieval Latin literature and to help them progress in translation skills.

CLLA 40031. Virgil

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This advanced course deals with the full corpus of Virgil's poetry, and explores the creative history of Rome's greatest poet through close readings of passages from his pastoral poetry, the *Georgics* and *Eclogues*, and his masterpiece the *Aeneid*. Special attention is given to the settings in which Virgil composed his works, and current and traditional critical interpretations of his poetry are considered.

CLLA 40032. Livy

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This advanced course introduces students to the historian Livy through close reading and detailed study of passages from his grand narrative of Rome's history from the founding of the city to the age of Augustus. Aeneas' flight from Troy, Rome's conquest of Italy, and Hannibal's dramatic invasion of Italy across the Alps are some of the stirring topics to which attention is given. Livy's artistic and historical methods, and his position in the emperor Augustus' cultural program are key themes for discussion in the course.

CLLA 40033. Roman Satire

(3-0-3) Schlegel

Prerequisite: CLLA 20004 OR CLLA 325 OR CLLA 202

This advanced course introduces students to the genre of satire, a distinctively Roman creation in which poets express reflections on contemporary life and morals grounded in personal experience. Readings from such authors as Lucilius, Horace, Persius, and Juvenal reveal a wide range of literary tone, from the self-deprecating to the brutally acerbic. The relationship of satiric poetry to its social, cultural, and political context is a key theme for discussion in the course.

CLLA 40041. Ovid

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This advanced course provides an introduction to the poetry of the prolific author Ovid. It explores the creative history of the one writer who can truly be called a poet of the Augustan age through close reading of passages from his love poetry (the *Amores* and the *Ars Amatoria*, a handbook on seduction), his great mythological poem, the *Metamorphoses*, and the poems written after Ovid was exiled by Augustus to a remote spot on the shores of the Black Sea (the *Tristia* and *Epistulae ex ponto*). Special attention is paid to the contexts in which Ovid composed his works, and current and traditional interpretations of his poetry are considered.

CLLA 40043. Roman Comedy

(3-0-3)

This advanced course introduces students to Latin comic drama. Comic plays were a popular attraction at Roman religious festivals, and Rome produced two outstanding comic writers of completely opposite temperament, the boisterous and broad Plautus, and the wry and elegant Terence. Both continue to influence Western dramatic forms. Readings from Plautus and Terence reveal the conventions of comic drama and its use as a distinctive instrument to reflect upon the concerns of Roman life.

CLLA 40044. The Roman Novel

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This advanced course offers close reading and detailed study of excerpts from Petronius's *Satyricon* and Apuleius's *The Golden Ass*. Ribald and full of comic adventures, these works have much in common with modern picaresque novels. Petronius' Trimalchio, an ex-slave buffoon, and Apuleius' Lucius, a young aristocrat magically transformed into an ass, are two of Latin literature's most memorable creations. Narrative technique, critical interpretation, and the special perspective on Roman life the works present, are major subjects for discussion in the course.

CLLA 40054. Augustine's Confessions

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This advanced course introduces students to the thought and manner of writing of Augustine through close reading and detailed study of excerpts from his highly self-reflective autobiography, the *Confessions*. Augustine's extended analysis of his spiritual development combines in a masterful way the language and habits of thought of the Christian tradition with those of classical philosophy and literature. The style of the *Confessions*, the significance of the work, and its relation to Augustinian thought at large are major topics for discussion in the course.

CLLA 40094. Augustan Poets

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

With an initial glance back to Catullus and Lucretius, this course will concentrate on the Roman poets who flourished under the aegis of Augustus. The focus of the course, alongside the basic literary and stylistic marvels of this poetry, will be the poets' use of emotion and its consequent destabilizing effects. We will look at the complexities of the poetry that belongs to this era of social and political upheaval. Our readings in Latin will consist of selections from Catullus and Lucretius, the last three books of Virgil's *Aeneid* (the whole of which students should know in translation), and readings from Horace's Odes and Propertius's ELEGIES. We will also look at some modern critical views of Augustan poetry. Students' mastery of the Latin texts, and their ability to speak and write about these, will be evaluated.

CLLA 40095. Ovid's Metamorphoses

(3-0-3)

Prerequisite: (CLLA 20004 OR CLLA 325)

In this course, we translate and discuss selected passages from the *Metamorphoses*, Ovid's idiosyncratic poetic history of the world. Topics for our discussions include the spiritual, moral, religious, political, and physical transformations portrayed between the creation story at the beginning and the deification of Caesar at the end of the text; the tension between Ovid's adherence to Roman traditions and his irreverent, sometimes subversive, artistic originality; the poem's narrative techniques, poetic style, and structure; the significance of intertextual allusions to Greek drama, Virgilian epic, and Ovid's own love poetry; the instability of gender; portraits of the poet within the work; and the innumerable faces of love, as presented through characters who are pious, raging with passion, inseparable, violent, infatuated, lovesick, devoted, and much more. Above all, this course aims at clarifying how Ovid's inexhaustible playfulness and delightful wit contributed to shaping a work of both epic grandeur and lyric intimacy that continues to inspire poets, composers, novelists, painters, and at least one playwright whose version recently made it all the way to Broadway. Daily preparation and active participation in class are essential components of the course; brief written assignments, one midterm exam, one brief project, and a final exam also count toward the final grade.

CLLA 40096. Postclassical Satire

(3-0-3)

Prerequisite: CLLA 20004 OR CLLA 325

This survey will begin with introductory readings in classical satire and satiric invective and narrative, and then move on to consider specimens of a variety of late antique and medieval texts written in a satiric mode: satire, invective, parody, mock epic, etc. A sound knowledge of Latin is required. Course requirements include in-class reports, an annotated translation, and an interpretative essay.

CLLA 47801. Special Studies

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

CLSS 43221. Advanced Seminar in Syriac

(3-0-3) Amar

The seminar for the current year is based on a close reading of *The Odes of Solomon*, the *Acts of Judas Thomas* (with special emphasis on the two allegorical hymns that predate the *Acts* themselves and have been conflated into them), Bardaisan, and select *Hodayot*. This last category of texts will be referenced for purposes of comparison only and will be read in English translation.

MEAR 10001. First-Year Arabic I

(3-0-3) Saadi

This two-semester sequence of courses is a basic introduction to all aspects of the Arabic language through a comprehensive and integrated method. The focus is on language proficiency in all areas of the language including speaking, reading, and writing. The course also introduces students to aspects of Arabic culture and everyday life in the Middle East. MEAR 10001 is offered each spring semester and MEAR 10002 is offered each fall semester.

MEAR 10002. First-Year Arabic II

(3-0-3) Saadi

Prerequisite: MEAR 10001 OR MEAR 101

This two-semester sequence of courses is a basic introduction to all aspects of the Arabic language through a comprehensive and integrated method. The focus is on language proficiency in all areas of the language including speaking, reading, and writing. The course also introduces students to aspects of Arabic culture and everyday life in the Middle East. MEAR 10001 is offered each spring semester and MEAR 10002 is offered each fall semester.

MEAR 20003. Second-Year Arabic I

(3-0-3) Amar, Saadi

Prerequisite: MEAR 10002 OR MEAR 102

This second-year Arabic course builds on the previous two semesters. The emphasis is on speaking and writing for self-expression with continued study of the basic grammatical structures. Proficiency remains the focus through readings and conversations in the language. Students develop skill in the use of the Arabic dictionary.

MEAR 20004. Second-Year Arabic II

(3-0-3)

Prerequisite: MEAR 20003 OR MEAR 103 OR MEAR 10101

This course is geared to consolidating skills gained in the previous three semesters while enhancing the ability to converse and conduct oneself in Arabic. Reading skills are enhanced by exposure to more sophisticated examples of literature. Original written expression is encouraged through the composition of short essays.

MEAR 30005. Third-Year Arabic I

(3-0-3) Saadi

Prerequisite: MEAR 20004 OR MEAR 104

This third-year Arabic course emphasis is on developing listening, speaking, reading, and writing skills in interactive settings. Vocabulary building will be the focus of drills; we will cover basic vocabulary in various authentic uses of the language. Special attention will also be given to media Arabic. Basic Arabic grammar should be completed by the end of the year. We will continue with part 2 of the *Kitaab* sequence. Supplementary materials, mainly from Arabic media (BBC Arabic News, newspapers, magazines), will be provided. Tests, both oral and written, will cover the textbook materials, in addition to the basic grammar and the cumulative vocabulary.

MEAR 30006. Third-Year Arabic II

(3-0-3)

Prerequisite: MEAR 30005 OR MEAR 105 OR MEAR 301 OR MEAR 410

This third-year Arabic course emphasis is on developing listening, speaking, reading, and writing skills in interactive settings. Vocabulary building will be the focus of drills; we will cover basic vocabulary in various authentic uses of the language. Special attention will also be given to media Arabic. Basic Arabic grammar should be completed by the end of the year. We will continue with Part 2 of the *Kitaab* sequence. Supplementary materials, mainly from Arabic media (BBC Arabic News, newspapers, magazines), will be provided. Tests, both oral and written, will cover the textbook materials, in addition to the basic grammar and the cumulative vocabulary.

MEAR 47801. Special Studies

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

MEHE 10001. Elementary Hebrew I

(3-0-3)

This is a two-semester introductory course in biblical Hebrew; under normal circumstances, the student must complete the first to enroll in the second. The fall semester will be devoted to learning the grammar of biblical Hebrew. The spring semester will be divided into two parts. For the first six weeks we will finish and review the grammar. In the remaining part of the course we will read and translate texts from the Hebrew Bible, Qumran, and Rabbinic literature. The course will focus on developing reading and comprehension skills in biblical Hebrew through the study of biblical texts. In addition, students will learn how to use reference grammars, concordances, and apparatus to the *Biblia Hebraica*. The course encourages students to think about the grammatical forms and their implications for biblical interpretation.

MEHE 10002. Elementary Hebrew II

(3-0-3) Schweitzer

Prerequisite: MEHE 10001 OR MEHE 481

This is a two-semester introductory course in biblical Hebrew; under normal circumstances, the student must complete the first to enroll in the second. The fall semester will be devoted to learning the grammar of biblical Hebrew. The spring semester will be divided into two parts. For the first six weeks we will finish and review the grammar. In the remaining part of the course we will read and translate texts from the Hebrew Bible, Qumran, and Rabbinic literature. The course will focus on developing reading and comprehension skills in biblical Hebrew through the study of biblical texts. In addition, students will learn how to use reference grammars, concordances, and apparatus to the *Biblia Hebraica*. The course encourages students to think about the grammatical forms and their implications for biblical interpretation.

MELC 10101. Introduction to Arabic Culture and Civilization

(3-0-3) Amar

This course is an introductory survey of Arabic culture and civilization from the pre-Islamic era to the conquest of Constantinople in 1453. The course will trace the origins of the Arab people and their distinctive culture and literature. The revelation of the Qur'an to the Prophet Muhammad and subsequent development of Islam will be treated in detail. Following this, the course will focus on the spread of Islamic civilization, its interactions with other cultures, and its contributions to scholarship in the areas of literature, art, and architecture.

MELC 13186. Literature University Seminar in English

(3-0-3) Guo

Introduces first-year students to the study of classical literature on a comparative basis, with readings from Greco-Roman and Arabic literature.

MELC 20010. Arabic Fiction in Translation

(3-0-3)

The object of this course is to introduce the student to Arabic literature—a major world literature that remains largely unexplored in the West—from its beginning to the present. The course will read and discuss, in a seminar context and from a comparative perspective, key works of medieval Arabic narrative prose, the *Arabian Nights* and the *Maqamat*, and selected works of modern Arabic fiction by the Nobel laureate Naguib Mahfouz (Egypt), among others. There will also be several screenings of the film adaptations. Some of the issues to be discussed are: the influence of the *Arabian Nights* in Western literature, representation and interpretation, and literary compositional strategies in “domesticating” an “imported” genre—fiction—used by modern Arab writers.

MELC 20020. Revelation to Revolution: Arabic Literature in a Global Context

(3-0-3)

This basic introduction to Arabic literature links the phenomenon of “literature” to the larger world of Islamic studies. The course emphasizes connections between Arabic literature, the Classics, and contemporary western literary tradition from a broadly comparative perspective. Topics include: early Arabic mytho-poetics; the idea of Scripture; philosophy, science, and the Renaissance; the literature of empire; Arab Spain. No knowledge of Arabic is required.

MELC 20040. Islamic Societies of the Middle East and North Africa: Religion, History, and Culture

(3-0-3)

This course is an introductory survey of the Islamic societies of the Middle East and North Africa from their origins to the present day. It will deal with the history and expansion of Islam, both as a world religion and civilization, from its birth in the Arabian Peninsula in the seventh century to its subsequent spread to other parts of western Asia and North Africa. Issues of religious and social ethics, political governance, gender, social relations and cultural practices will be explored in relation to a number of Muslim societies in the region, such as in Egypt, Morocco, and Iran. The course foregrounds the diversity and complexities present in a critical area of what we call the Islamic world today.

MELC 20050. The Ancient Middle East

(3-0-3)

The origins of human civilization, the first written languages, and the myths that revolutionized religion: this course introduces students to the civilizations of Mesopotamia and western Asia that form the basis of the way much of the world today thinks, sees reality, believes, and expresses itself. Topics include “The History of God”: religions, myths; life and literature of the Sumerians, Akkadians, and Babylonians; Phoenician and Aramaic contributions to written language, law, literature, and legend.

MELC 20060. Islam: Religion and Culture

(3-0-3)

This introductory course will discuss the rise of Islam in the Arabian Peninsula in the seventh century of the Common Era and its subsequent growth as a major world religion and civilization. Lectures and readings will deal with the life of the Prophet Muhammad, the Qur’an and its role in worship and society, early Islamic history, community formation, law and religious practices, theology, mysticism, and literature. Emphasis will be on the core beliefs and institutions of Islam and on its religious and political thought from the Middle Ages until our own time. The latter part of the course will deal with the spread of Islam to the West, resurgent trends within Islam, both in their reformist and extremist forms, and contemporary Muslim engagements with modernity.

MELC 20070. Introduction to Islamic Civilization

(3-0-3) Guo

This course is designed to introduce students to Islamic civilization and Muslim culture and societies. The course will cover the foundations of Islamic belief, worship, and institutions, along with the evolution of sacred law (*al-shari‘a*) and theology, as well as various aspects of intellectual activities. The Qur’an and the life of the Prophet Muhammad will be examined in detail. Both Sunni and Shi‘i perspectives will be considered. Major Sufi personalities will be discussed to illuminate the mystical, and popular, tradition in Islam. Topics on arts, architecture, literary culture, and sciences will be covered. Although the course is concerned more with the history of ideas than with modern Islam as such, it has great relevance for understanding contemporary Muslim attitudes and political, social, and cultural trends in the Muslim world today.

MELC 20080. Women in Islamic Societies

(3-0-3)

This course serves as a broad survey of women’s and gender issues within the contexts of multiple societies what is usually termed the Islamic world. The first half of the semester will concentrate on the historical presentation of the position of women in Islamic societies, defined by the normative values of Islam and by cultural traditions and norms that are sometimes at odds with religious prescriptions. We will discuss how the interpretation of these values in diverse circumstances and who gets to do the interpreting have important repercussions for women’s societal roles. The second half of the course will privilege women’s voices in articulating their gendered identities and roles in a number of mainly contemporary Islamic societies in different historical circumstances as expressed in memoirs, fiction, magazine articles, and public speeches. As part of the historical contextualization of such works, we will focus on how modern phenomena like Western colonialism, nationalist liberation movements, and civil and other forms of war have fostered women’s organized movements, and their socio-political empowerment in some cases and marginalization in others, with lasting implications for these developing societies.

MELC 30030. Love, Death, and Exile in Arabic Literature and Cinema

(3-0-3) Guo

This course explores literary and artistic presentation of the themes of “love, death, and exile” in Arabic literature and popular culture from pre-Islamic era to the present day. Through close readings of Arabic poetry, essays, short stories, and novels (in English translation), and analyzing a number of Arabic movies (with English subtitles), we discuss the following issues: themes and genres of classical Arabic love poetry; gender, eroticism, and sexuality in Arabic literary discourse; alienation, fatalism, and the motif of *al-hanin ila al-watan* (nostalgia for one’s homeland) in modern Arabic poetry and fiction.

MELC 30040. Christianity in the Middle East

(3-0-3)

The spread of Christianity from Palestine to the West is well documented. Less well known is the development of Christianity in the lands of its origin, the Middle East. This course introduces students to the largely untold story of Christianity that expresses itself in the native Aramaic language and culture of the Semitic East. Topics include: The origins of the indigenous Christian churches of Syria, Lebanon, Palestine, Armenia, Iraq, and Iran; The development of these traditions will be viewed in relation to western/European forms of Christianity that have come to dominate and that are viewed as “mainstream” and “normative.” The course concludes with an assessment of the impact of religious “fundamentalisms,” the diaspora of Middle Eastern Christians throughout Europe and the United States, and the contemporary state of Christianity in the Middle East.

MELC 30050. Canon and Literature of Islam

(3-0-3)

This course is an introduction to the fundamental religious texts and literature of Islam. The list includes the Qur’an (the central, sacred scripture of Islam), the Hadith (record of the speech and actions of the Prophet Muhammad), biography of the Prophet, exegetical literature, historical texts, and mystical and devotional literature. Students will read primary texts in English translation with a focused discussion and analysis of form, content, historical background, religious significance, and literary allusions of the various texts. Themes such as “the unity and majesty of God;” “prophecy and revelation,” “good and evil,” and “this world and the hereafter” will be dealt with in the lectures and conversation in class. The course lays heavy emphasis on class discussion and student preparedness.

MELC 30070. Islam and Modernity

(3-0-3)

Islam and its compatibility with modernity is a much-debated issue in the contemporary period. The course will engage this timely topic and discuss the most important “hot-button” issues involved in these debates; political Islam, democracy, pluralism, rights of women, and secularism. The historical contexts that provide the backdrop for the range of responses to the phenomenon of modernity and its attendant issues will also receive attention. What internal resources exist within Islamic thought that are being drawn upon by modernists to make a strong case for an essential compatibility between Islam and democracy, for example? Is democracy (or Islam, for that matter) a monolithic concept? Students will be expected to actively take part in discussions centered on such questions, the assigned readings, and class lectures. Prior exposure to at least one class on Islam or the Middle East is strongly recommended.

MELC 30700. Islamic Ethics

(3-0-3) Omar

Since September 11, 2001, topics related to Islam have inundated the airwaves, aroused the curiosity of many, and troubled the minds of some. In order to better understand current events, it is important to have a greater understanding of the worldview of Islam. This course on “Islamic Ethics” will provide students with such an opportunity. It examines the major principles of Islamic ethics and the key theories of classical and contemporary Muslim ethicists. These principles and theories will be applied to case studies representing major global concerns such as weapons of mass destruction, the ecological crisis, abortion, and stem cell research. Cognizant of the various contexts within which ethical questions are debated, students will be encouraged to explore the impact of modernity, post-modernity, globalization, and liberalism on Muslim ethical discourses. Students will also be required to compare the ethical principles and theories of Islam with that of other philosophical and religious theories to discover points of difference as well as convergence.

MELC 40700. Islamic Ethics of War and Peace

(3-0-3) Omar

Since September 11, 2001, topics related to Islam have inundated the airwaves, aroused the curiosity of many and troubled the minds of some. In order to better understand current events, it is important to have a greater understanding of the worldview of Islam. This course on “Islamic Ethics of War and Peace” will provide students with such an opportunity. It examines the major principles of Islamic ethics of war and peace and the key theories of classical and contemporary Muslim ethicists. These principles and theories will be applied to case studies representing major global concerns. Cognizant of the various contexts within which ethical questions are debated, students will be encouraged to explore the impact of modernity, post-modernity, globalization, and liberalism on Muslim ethical discourses. Students will also be required to compare the ethical principles and theories of Islam with that of other philosophical and religious theories to discover points of difference as well as convergence.

MELC 46801. Directed Readings

(V-0-V)

Individual or small group study under the direction of a faculty member. Permission of the department required.

Economics

ECON 1000. Principles of Microeconomics

(3-0-3) Staff

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, and trade and the international economy.

ECON 1001. Principles of Microeconomics

(3-0-3) Staff

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, and trade and the international economy.

ECON 1002. Principles of Macroeconomics

(3-0-3) Staff

Prerequisite: (ECON 10010 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C)

A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, and fiscal and monetary policy.

ECON 12010. Principles of Microeconomics Tutorial

(0-1-0)

Corequisite: ECON 10010

Tutorial for ECON 10010.

ECON 13181. Social Science University Seminar

(3-0-3) Staff

Economics sections will deal with different aspects of economic analysis and policy issues. The focus will be on understanding how economists think about theoretical issues and how they apply their analytical tools to real-world economic problems and policies. No background in economics is assumed.

ECON 20010. Principles of Microeconomics

(3-0-3) Staff

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, and trade and the international economy.

ECON 20011. Principles of Microeconomics

(3-0-3) Staff

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, and trade and the international economy.

ECON 20020. Principles of Macroeconomics

(3-0-3) Staff, Waller

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B OR ECON 201C)

A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, and fiscal and monetary policy.

ECON 20501. Poverty in Rural America

(1-0-1) Warlick

This one-credit course examines poverty in rural America to determine in what ways it is similar and in what ways it is distinct from poverty in urban American settings. Anti-poverty strategies particular to rural settings are examined. Recommended for students participating in the Center for Social Concerns Appalachian Seminar.

ECON 20502. Poverty and the Bishop's Pastoral Letter

(1-0-1) Wilber

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B)

This class is designed to rewrite the poverty section of Chapter 3 in the Bishops' 1986 letter, "Economic Justice for All." There will be hearings with groups of economists, theologians, community activists, et al. The idea is to simulate the process the bishops went through in writing the original document and to update the material in light of changes in the economy over the past 19 years. Each student will prepare a paper (8-10 pages) that rewrites the poverty section.

ECON 22010. Principles of Microeconomics Tutorial

(0-1-0)

Corequisite: ECON 20010

Tutorial for ECON 20010.

ECON 23210. Economics and Ethics

(1-0-1) Wilber

This course will focus on the interaction between ethics and economics, both in economic theory and economic policy. There are three ways in which ethics are important in economics: (1) Economists have ethical values that help shape the way they do economics. (2) Economic actors have ethical values that help shape their behavior. (3) Economic institutions and policies impact people differentially and thus ethical evaluations must be applied in addition to economic evaluations.

ECON 30010. Intermediate Economic Theory—Micro

(3-0-3) Staff

Prerequisites: ((ECON 10010 OR ECON 10011 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B OR ECON 201C) AND ((ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B OR ECON 20020 OR ECON 202A OR ECON 202B))

An examination of the language and analytical tools of microeconomics, emphasizing the functional relationship between the factor and product markets and resource allocation.

ECON 30020. Intermediate Economic Theory—Macro

(3-0-3) Staff, Waller

Prerequisite: (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B)

A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, and fiscal and monetary policy.

ECON 30220. Marxian Economics

(3-0-3) Ruccio

Prerequisite: ECON 10011 OR ECON 10010 OR ECON 20010 OR ECON 20011 OR ECON 101A OR ECON 101B OR ECON 201A OR ECON 201B

An introduction to Marxian economic analysis. Topics include the differences between mainstream and Marxian economics, general philosophy and methodology, Marxian value theory, and critical appraisals and current relevance of Marx's "critique of political economy."

ECON 30240. Economics of War and Peace

(3-0-3) Dutt

Prerequisite: ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011 OR ECON 101A OR ECON 101B OR ECON 201A OR ECON 201B

This course examines the consequences of wars, including international wars, civil wars, and terrorism. It also examines approaches to peace building and post-war reconstruction. While it focuses mainly on economic factors at work and makes us use the tools of economic analysis, it adopts a broader political economy framework.

ECON 30260. Political Economy of Development

(3-0-3) Kim

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011) AND (ECON 10020 OR ECON 20020)

This course surveys broad-ranging developmental problems in the Third World from a political-economy perspective, focusing in particular on the currently debated policy issues along with the basic analytical frameworks useful for the understanding of these issues. Although the subject matters largely concern the economic aspects of development, the approach taken for this course is interdisciplinary, involving, *inter alia*, an ethical and normative dimension.

ECON 30330. Statistics for Economics

(3-0-3) Lee

The course is devised to present statistics and statistical inference appropriately for economics students. There are two goals for the course: first, to prepare the student to read elementary quantitative analysis studies; and second, to prepare the student to undertake elementary quantitative analyses.

ECON 30331. Econometrics

(3-0-3) Buckles

Prerequisite: ECON 30330

Provides students with an understanding of when and how to use basic econometric methods in their work as economists, including the ability to recognize which econometric technique is appropriate in a given situation as well as what explicit and implicit assumptions are being made using the method. Topics covered include estimation and hypothesis testing using basic regression analysis, problems with basic regression analysis, alternative econometric methods, limited dependent variables, and simultaneous equation models.

ECON 30400. Labor Economics

(3-0-3) Ghilarducci, Sullivan

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B)

A survey course covering the economics of employment and unemployment; wages and income distribution; poverty, education, and discrimination; unions and labor and industrial relations systems; and comparative labor systems.

ECON 30460. Economics of Gender and Ethnic Discrimination

(3-0-3) Ghilarducci

Prerequisite: ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011 OR ECON 101A OR ECON 101B OR ECON 201A OR ECON 201B

Women and ethnic minorities have the lowest incomes, worst jobs, and highest levels of unemployment and poverty in the United States today. This course examines the role of racism and sexism in the US economy.

ECON 30490. Economics of Aging

(3-0-3) Ghilarducci

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B)

The course covers how the risks of work and the conflict between labor and capital have been handled by welfare capitalism and government policy. We will pay attention to worker response and demands in retirement security—a touchstone for the debate on security and risk. We are concerned with how labor force institutions will respond in the next century given the aging of the workforce. We look especially at two issues: The emergence of women workers into a more secure labor market, and the debate about Social Security reform and privatization. We also examine issues of intergenerational equity. There are three readings where the students will be asked to apply abstract neoclassical theory (but they are not highly mathematical). This is an ambitious class—mixing current policy issues with history and economic theory.

ECON 30500. Economics of Poverty

(3-0-3) Warlick

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B)

This course examines the problem of poverty in the United States from an economic perspective. By the course's end you will be able to answer six central questions: (1) What is poverty and how is it measured? (2) Who are the poor? (3) What are the causes of poverty? (4) What policies are used to fight poverty? (5) How effective are these anti-poverty policies? (6) What more needs to be done? Equally important, you to be familiar with the resources that will enable you to pursue these questions independently in greater depth and into the future. Because the study of poverty is an interdisciplinary pursuit, we examine literature from other social sciences where appropriate.

ECON 30520. Economics of Education

(3-0-3) Warlick

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B) AND ((ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B))

This course reviews economic literature addressing current educational issues in America, including the adequacy of our K-12 public school system, the effectiveness of maker-based reforms (vouchers and public schools) and administered forms of accountability (standardized testing). We also examine the rate of return of additional years of education (how much education should individuals undertake?), access to higher education, financial aid systems, and options to offset the rising cost of higher education.

ECON 30530. Environmental Economics

(3-0-3) Jensen

Prerequisite: (ECON 10010 OR ECON 10011) OR (ECON 20010 OR ECON 20011)

An analysis of the welfare economics of environmental problems, emphasizing market failures because of negative environmental externalities. Air, water, and land pollution are classic examples of these externalities, which occur when third parties bear costs resulting from the transactions of the two primary market participants. The theory and practice of environmental policy to promote efficiency at the US local, state, and federal levels and in other countries is explored. International problems such as transboundary pollution and global warming are also studied.

ECON 30800. Development Economics

(3-0-3) Kim, Ros

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B)

The current problems of Third World countries are analyzed in a historical context, with attention given to competing theoretical explanations and policy prescriptions. The course will combine the study of the experiences of Latin American, African, and Asian countries with the use of the analytical tools of economics.

ECON 30810. Regional Economic Development

(3-0-3) Leahy

Prerequisite: (ECON 30010 OR ECON 301) OR (ECON 30020 OR ECON 302)

This course looks at the spatial dimensions of economics with a major emphasis on where economic activity takes place and why. Theories and methods of regional analysis and regional programs will be stressed with reference to selected regions in the US and elsewhere. A major part of this class will be a major research project, paper, and presentations by you on a selected region. Research presentations and discussions by you will be a regular feature of the class as your research proceeds.

ECON 32510. Addressing US Poverty at the Local Level

(3-0-3)

Prerequisite: ECON 10011 OR ECON 10010 OR ECON 20010 OR ECON 20011 OR ECON 101A OR ECON 101B OR ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B

This course focuses on four arenas where poverty manifests itself: homelessness, education, health care, and jobs. Writing-intensive.

ECON 33100. Philosophy of Economics

(3-0-3)

Prerequisite: ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011 OR ECON 101A OR ECON 101B OR ECON 201A OR ECON 201B

What does it mean to do good work in economics? If you thought the answer to this question was straightforward, you will be in for a surprise! The intention of the course is to problematize such notions as “prediction is the goal of economics” or “there is progress in economics” or “assumptions in economics should be (un)realistic.” To do this, we will explore literature on philosophy of science, sociology of scientific knowledge, and economic theory.

ECON 33120. Seminar in the History of Economic Thought

(3-0-3)

Prerequisite: ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011 OR ECON 101A OR ECON 101B OR ECON 201A OR ECON 201B

This course explores literature on philosophy of economics, history of economic thought, and new directions in economic methodology.

ECON 33200. Introduction to Political Economics

(3-0-3) Ruccio

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B) OR (ECON 20020 OR ECON 123A OR ECON 123B OR ECON 202 OR ECON 202A OR ECON 202B)

The course is an introduction to the “other” side of economics: heterodox economics or political economy. Political economy perspectives include Marxian, Post Keynesian, radical, institutionalist, feminist, and other approaches. The course will also investigate the theoretical and social consequences of different approaches, and how policies and institutional changes that promote social justice and human dignity can be formulated in our current economic environment.

ECON 33240. Economics of War and Peace

(3-0-3) Dutt

Prerequisite: ((ECON 10010 OR ECON 10011 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B)) AND ((ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B))

Seminar version of ECON 30240. See description above.

ECON 33250. Justice Seminar

(3-0-3) Roos

An examination of major theories of justice, both ancient and modern. Readings include representatives of liberal theorists of right, such as John Rawls, as well as perfectionist alternatives. The course also serves as the core seminar for the philosophy, politics, and economics concentration.

ECON 33260. Political Economy of Development

(3-0-3) Kim

Prerequisite: (ECON 10010 OR ECON 10011 OR ECON 101 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B OR ECON 223) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B)

Seminar version of ECON 30260. See description above.

ECON 33270. Economics of Science

(3-0-3) Mirowski

This course describes the changing history of the organization and subsidy of scientific research, then surveys the different methods of economic theories and applied scientific process.

ECON 33410. Labor Relations Law

(3-0-3) Leahy

A study of the development of common and statutory law with reference to industrial relations in the United States with emphasis on the case method.

ECON 33420. Employee Relations Law

(3-0-3)

Prerequisites: (ECON 10010 OR ECON 10011 OR ECON 101A OR ECON 101B OR ECON 101C OR ECON 20010) OR ECON 20011 OR ECON 201A OR ECON 201B AND (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B OR ECON 20020) OR ECON 202 OR ECON 202A OR ECON 202B

A study of the development of common and statutory law with reference to industrial relation in the United States, giving emphasis to the case method.

ECON 33430. Collective Bargaining: Private Sector

(3-0-3) Leahy

The analysis of the procedures and economic implications of collective bargaining as it now operates in the United States. Emphasizes a game theory approach resulting in the negotiation of a labor contract

ECON 33440. Collective Bargaining: Public Sector

(3-0-3)

This course will examine the relevant state and federal laws covering the public-sector collective bargaining. It will examine the various issues and techniques covering collective bargaining in government. The major part of this course will be a game theory in which an actual contract will be bargained.

ECON 33470. Labor Arbitration

(3-0-3) Leahy

Prerequisites: ((ECON 10010 OR ECON 10011 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B)) AND ((ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B))

Analysis of the practice and procedures of arbitration in labor grievances with emphasis on rights and interest issues is both public and private sector employment. Course stresses an analysis of arbitral awards.

ECON 33480. Migration, Education, and Assimilation: Three Forces that Built America

(3-0-3) Wozniak

This course uses the tools of economics to understand driving trends and episodes of migration, education, and assimilation throughout America's history. Readings will apply economic concepts in various historical contexts, from the settling of the country by Europeans to the present day. Examples of course topics include: the major waves of European migration to the US, including waves of Irish immigration; the development and rise of the high school in America; important trends in educational attainment particularly of women and minorities; the economic effects of civil rights legislation; and the English-language-only debate. Economics knowledge at the level of Principles of Microeconomics would be helpful but is not required. A research paper is required.

ECON 33500. Economics of Poverty

(3-0-3) Warlick

Prerequisite: (ECON 10101 OR ECON 10011 OR ECON 101) OR (ECON 10015 OR ECON 115) OR (ECON 20010 OR ECON 20011 OR ECON 201)

Seminar version of ECON 30500. See description above.

ECON 33540. Restoring Economic Vitality to the Inner City: What Works, What Doesn't, and Why

(3-0-3) Beckman

This community-based learning and research course examines the political economy of US inner-city revitalization, with South Bend as a case study. Community-Based Learning (CBL) requires that students both learn and apply what they are learning within a setting outside the classroom. In addition to in-class seminar sessions, CBL activities will include meetings with local organizations that link public agencies and private enterprise, visits to varied businesses in urban South Bend, and meetings with area government representatives and relevant church and neighborhood organizations. During the first third of the semester, students will learn about the central problems of the US city and their roots, viewing the issues firsthand locally. In the second third, they will study how inner-city problems are being addressed in selected areas of the country as well as in South Bend. The South Bend Heritage Foundation (SBHF) will act as a client organization for this course by posing research questions for students to investigate during the last third of the semester. The SBHF is a private, not-for-profit service and community development corporation dedicated to the stabilization, enhancement, and empowerment of South Bend's inner-city neighborhoods.

ECON 33810. Regional Economic Development

(3-0-3) Leahy

Prerequisite: (ECON 30010 OR ECON 301) OR (ECON 30020 OR ECON 302)

Seminar version of ECON 30810. See description above.

ECON 37950. Special Studies

(V-0-V)

Independent study under the direction of a faculty member. Course requirements may include substantial writing as determined by the director.

ECON 40050. Game Theory and Strategic Analysis

(3-0-3) Rath

Prerequisites: ((MATH 10250 OR MATH 105) OR (MATH 10550 OR MATH 125 OR MATH 125A OR MATH 125B OR MATH 125C OR MATH 125E OR MATH 125F)) AND ((ECON 30010 OR ECON 301) OR (FIN 30210 OR FIN 360))

The objective of this course is to help students develop a good understanding of the basic concepts in game theory and learn how to employ these concepts to better understand strategic interactions. Topics covered will include normal form games, extensive form games, pure and mixed strategies, Nash Equilibrium, sub-game perfect equilibrium, repeated games, and introduction to games of incomplete information. Selected applications will include competition and collusion in oligopoly, entry deterrence, political competition and rent seeking, and social norms and strategic interaction.

ECON 40060. Advanced Microeconomic Theory

(3-0-3)

Prerequisites: (ECON 30010 OR ECON 301 OR FIN 30210) AND (MATH 10250 OR MATH 105 OR equivalent)

This course will focus on some selective topics in modern micro economic theory. It may vary from term to term. A possible choice of a broad range of topics are: Choice under uncertainty, game theory, market mechanisms, coalitional analysis, public goods, and welfare economics. Each of these topics will be discussed with mathematical rigor. Some of the objectives of the course are to familiarize students with important analytical techniques of micro theory and their applications to the study of various economic phenomena and to help students to cultivate the ability to critically evaluate the usefulness and limitations of economic models.

ECON 40203. Political Economics of War and Peace

(3-0-3) Dutt

Prerequisites: ((ECON 10010 OR ECON 10011 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR ECON 201B)) AND ((ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20020 OR ECON 202 OR ECON 202A OR ECON 202B))

Reviews key economic concepts and methods relevant for peace research, and examines the relation between political economy issues and war and peace. It examines the political economy of the causes of war, including the roles of arms races,

poverty, inequality, ethnicity, natural resources, the environment, and globalization. It explores the economic consequences of war and military expenditures, including those on human development indicators and economic growth. Finally, it discusses the political economy of the prevention of conflict and of post-war reconstruction.

ECON 40300. Math for Economists

(3-0-3)

Prerequisites: (ECON 30010 OR ECON 301 OR FIN 30210) AND (MATH 10250 OR MATH 105 OR equivalent)

Exposition of mathematical methods used in economic theory and analysis with application of these methods to economic theory. Major methods covered include differential and integral calculus and matrix algebra. Recommended for students planning to go to graduate school in economics.

ECON 40320. Applied Econometrics

(3-0-3) Lee

Prerequisite: (ECON 30010 OR ECON 301) OR (FIN 30210 OR FIN 360)

This course introduces the statistical and econometric methods using the least squares estimation method in empirical economic applications. It is oriented toward the practical applications of economic theory with econometric methods rather than the theoretical development of these subjects. Emphasis will be placed on the analysis of economic problems such as the capital asset pricing model, wage discrimination, and the married women workforce participation decision issues.

ECON 40360. Money, Credit, and Banking

(3-0-3) Bonello

Prerequisites: ((ECON 30020 OR ECON 302) OR (FIN 30220 OR FIN 361)) AND ((ECON 30010 OR ECON 301) OR (FIN 30210 OR FIN 360))

An examination of the money and credit-supply processes and the role of money and credit in the economy. Topics include financial intermediaries, financial markets, the changing regulatory environment, monetary policy, and international monetary arrangements.

ECON 40361. Federal Reserve Policy

(2-0-2) Bonello

An in-depth analysis of Federal Reserve Open Market Committee policy actions. Students must participate in college Fed Challenge competition.

ECON 40540. Public Economics

(3-0-3) Hungerman

Prerequisite: ECON 30010 OR ECON 301 OR FIN 30210 OR FIN 361

This class will survey the field of public economics, showing students how economic research can address many of the most important questions and controversies facing policy makers today. Some of the issues the class will discuss are contraception, taxation, Medicare, Social Security, welfare programs, and education. The course will familiarize students with current policy programs and policy debates, introduce students to cutting-edge research methods used to study these programs, and show students what economists know and do not know about improving public policy.

ECON 40550. Public Budget Expenditure Policy

(3-0-3)

Prerequisite: (ECON 30010 OR ECON 301) OR (FIN 30210 OR FIN 360)

This course will introduce students to normative and positive economic theories of the role of governmental agencies in the economy, privatization, and the role of nonprofits; discussion of what level of government should undertake collective action (fiscal federalism); examination of the level and composition of our federal and local governments' budgets as well as the current budgeting process; cost-benefit analysis, theoretical and pragmatic practices; and the impact of governmental rules and regulations on the economy.

ECON 40555. Theory of Public Budget Expenditure Policy

(3-0-3) Betson

Prerequisite: ECON 30010 OR ECON 301 OR FIN 30210 OR FIN 360

"Can rational individuals make collective decisions that are also rational?" This is the primary question that will be addressed in this course. The first question that will be addressed is what is meant by rational or more importantly is the interests

of the group or society? Markets where individuals pursue their own self-interests can be shown to be efficient but efficiency is the only goal of collective decisions? Can markets used for all goods or will non-market mechanisms be needed? Will these non-market mechanism work?

ECON 40560. Tax Policy

(3-0-3) Betson

Prerequisite: (ECON 30010 OR ECON 301) OR (FIN 30210 OR FIN 360)

This course will introduce students to the following topics: description of alternative tax instruments; historical trends of tax policies of the federal and state governments; discussion of what would be a “good” tax and criteria for choosing among different taxes; theoretical analysis of taxes on household and business decisions; empirical evidence of the distribution and efficiency consequences of different taxes; and debt and deficits.

ECON 40580. The Economics of Industrial Organization

(3-0-3) Warlick

Prerequisite: (ECON 30010 OR ECON 301) OR (FIN 30210 OR FIN 360)

An investigation into the structure of American industry and an analysis of the implications of corporate economic power for public welfare.

ECON 40700. International Economics

(3-0-3) Rakowski

Prerequisite: (ECON 30010 OR ECON 301) OR (ECON 30020 OR ECON 302) OR (ECON 30010)

A study of the general theory of international trade; the pattern of trade, gains from trade, tariffs, trade and special interest groups, trade and growth, foreign exchange markets, balance-of-payment problems, and plans for monetary reform.

ECON 40710. International Trade

(3-0-3) Kim

Prerequisite: (ECON 30010 OR ECON 301) OR (FIN 30210 OR FIN 360)

This course examines major theoretical, empirical and institutional issues in the study of international trade and international factor movements. The topics covered include determinants of trade patterns, trade and welfare, commercial policy, trade and growth, customs unions, international capital and labor movements, and trade and development.

ECON 40720. International Money

(3-0-3)

Prerequisite: (ECON 30020 OR ECON 302) OR (FIN 30220 OR FIN 361)

This course examines major institutional changes in the international financial system, theoretical developments in the field of international monetary economics, and policy issues in the contemporary global finance. Topics include balance-of-payments accounts, exchange rate markets and systems, open-economy macroeconomics, international debt, and contemporary international monetary and financial arrangements.

ECON 40820. Economic Development of Latin America

(3-0-3) Ros

Prerequisite: (ECON 30020 OR ECON 302) OR (FIN 30220 OR FIN 361)

An examination of the roots of independence in Latin America. An analysis of the key problems of economic development and the policies prescribed for their solution.

ECON 40830. Economic Growth

(3-0-3)

Prerequisite: (ECON 30020 OR ECON 302) OR (FIN 30220 OR FIN 361)

This is an advanced undergraduate course that covers how economists have come to understand the long-run growth of economies. We will cover theory, evidence, and policy aspects of growth. We begin with empirical evidence—how rich are the rich countries, how poor are the poor, and how fast do the rich and poor countries grow? Next, we cover major theories of growth from the Solow model of the 1950s to the new growth theory that has ignited the field in recent years. These growth theories emphasize the role of saving, physical and human capital accumulation, technological change, structural change, and income distribution. On the policy side, we will critically examine the motivation and the success of various policies that have been implemented by international agencies such as the

World Bank to promote growth—policies such as subsidized investment, education, birth control, and debt forgiveness.

ECON 43130. History of Economic Thought in the Context of Intellectual History

(3-0-3) Mirowski

Prerequisite: (ECON 30010 OR ECON 301) OR (ECON 30020 OR ECON 302)

This course intends to ask how it is that we have arrived at this curious configuration of doctrines now called “economics”; and importantly, how differing modes of historical discourse tend to ratify us in our prejudices about our own possible involvement in this project. The course will begin in the 18th century with the rise of a self-conscious discipline, and take us through the stabilization of the modern orthodoxy in WWII. Effort will be made to discuss the shifting relationship of economics to the other sciences, natural and social. A basic knowledge of economics (including introductory economics and preferably intermediate economics) will be presumed.

ECON 43202. Problems in Political Economy

(3-0-3) Wolfson

Prerequisite: (ECON 33200 OR ECON 3151)

A seminar course on the political economy of globalization. Topics include neo-liberalism, corporate strategies, capital mobility, outsourcing, free-trade agreements, international financial crises, the IMF, immigration, race and gender, plant closures, labor solidarity, and union strategies. The course will compare and contrast orthodox views of globalization with perspectives drawn from the writings of Marx, Keynes, Veblen, Polanyi, and other economists in the political economy tradition.

ECON 43230. Political Economy of War and Peace

(3-0-3) Dutt

Prerequisites: (ECON 10010 OR ECON 10011 OR ECON 101A OR ECON 101B OR ECON 101C) OR (ECON 20010 OR ECON 20011 OR ECON 201A OR 201B OR 201C) AND (ECON 10020 OR ECON 102 OR ECON 102A OR ECON 102B) OR (ECON 20020 OR ECON 202 OR ECON 102A OR ECON 102B)

Seminar version of ECON 40203. See description above.

ECON 43280. Consumption and Happiness

(3-0-3) Dutt

Prerequisites: (ECON 30010 OR ECON 301) OR (ECON 30020 OR ECON 302) AND (ECON 30010)

We live in an age and in a country where human consumption seems to be increasing without bounds. But what are the effects of this on the supposed consequence of this increase, that is, the happiness of human beings? Many believe that this question has an obvious answer: since people are freely choosing to consume more, it must be making them happier. But others are not so sure, and argue that increasing consumption has bad consequences on the poor, on the environment, and on future growth, that it results in moral deprivation, and that it does not even make those who consume more any happier. This course is concerned with this all-important debate.

ECON 43570. Economics and the Law

(3-0-3) Betson

Prerequisite: (ECON 30010 OR ECON 301) OR (FIN 30210 OR FIN 360)

This course will introduce students to the economics analysis of our legal framework pertaining to property, contract and tort law. Additional topics will include an examination of the legal process and the relationship between crime and punishment.

ECON 43730. European Economics and Monetary Unions

(3-0-3) Waller

Prerequisites: ((ECON 30010 OR ECON 301) AND (ECON 30020 OR ECON 302)) OR ((FIN 30210 OR FIN 360) AND (FIN 30220 OR FIN 361))

This course focuses on Europe’s movement towards economic and monetary union since the end of World War II. The course will discuss monetary theory, monetary policy, labor and capital market mobility, fiscal transfers political economy issues of central banking and EU enlargement. Class discussion is a critical

part of the course in addition to standard lectures. Grades will be based on two exams, in-class discussion, attendance and presentations.

ECON 47950. Special Studies

(V-0-V)

Independent study under the direction of a faculty member. Course requirements may include substantial writing as determined by the director.

ECON 47955. Senior Essay

(3-0-3)

Permission of the instructor

The senior essay is a yearlong project that involves original research by the student who works on an individual basis with an economics faculty member. The student takes three credits of Senior Essay in each semester of his or her senior year. This course is not open to students completing the Economics Honors Program.

ECON 47960. Senior Honors Essay

(3-0-3)

Permission of the instructor

The senior honors essay is a yearlong project that involves original research by the student who works on an individual basis with an economics faculty member. The student takes three credits of Senior Honors Essay in each semester of his or her senior year. This course is open only to students completing the Economics Honors Program.

ECON 47961. Economics Honors Program Seminar

(1-0-1)

This seminar provides instructional support for economics majors completing the undergraduate economics honors program. It also provides a venue where honors program students present progress reports on their senior honors essays to their peers at regular intervals. The seminar is graded on a satisfactory/unsatisfactory basis and may be taken twice.

Department of English

ENGL 10501. Introduction to Irish Writers

(3-0-3) Fox

Corequisite: ENGL 22514

This course will include the study of Irish writers such as W.B. Yeats, Elizabeth Brown, Bram Stoker, J.M. Synge, Seamus Heaney, and Medbh McGuckian.

ENGL 13186. Literature University Seminar

(3-0-3)

An introduction to the seminar method of instruction, emphasizing the analysis of literary texts.

ENGL 20000. Introduction to Creative Writing

(3-0-3)

An introduction to writing fiction and poetry, with outside readings and coverage of basic critical terms. In-class discussion of student work.

ENGL 20001. Introduction to Fiction Writing

(3-0-3) Bliss

This course is a workshop on the writing of fiction.

ENGL 20002. Introduction to Poetry Writing

(3-0-3) Aragon, Chien

This course is a workshop on the writing of poetry.

ENGL 20011. Fiction Writing

(3-0-3)

A course in writing the short story and related forms of fiction.

ENGL 20012. Fiction Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (PLS 20201 OR PLS 243) OR (PLS 23101 OR PLS 281)

A course in writing the short story and related forms of brief fiction.

ENGL 20013. Fiction Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A course in writing the short story and related forms of fiction.

ENGL 20014. Fiction Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A course in writing the short story and related forms of brief fiction.

ENGL 20015. Fiction Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A course in writing the short story and related forms of brief fiction.

ENGL 20016. Fiction Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A course in writing the short story and related forms of brief fiction.

ENGL 20017. Fiction Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (LLRO 13186 OR LLRO 180J) OR (PLS 13186 OR PLS 180J) OR (LLEA 13186 OR LLEA 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A course in writing the short story and related forms of fiction.

ENGL 20018. Fiction Writing

(3-0-3) Sayers

Prerequisite: (AMST 13186 OR AMST 180J) OR (ANTH 13181 OR ANTH 180E) OR (ARHI 13182 OR ARHI 180F) OR (LLEA 13186 OR LLEA 180J) OR (ECON 13181 OR ECON 180E) OR (ENGL 13186 OR ENGL 180J) OR (FTT 13182 OR FTT 180F) OR (GE 13186 OR GE 180J) OR (HIST 13184 OR HIST 180H) OR (IRLL 13186 OR IRL 180J) OR (MUS 13182 OR MUS 180F) OR (PHIL 13185 OR PHIL 180I) OR (POLS 13181 OR POLS 180E) OR (PLS 13186 OR PLS 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346) OR (PSY 13181 OR PSY 180E) OR (LLRO 13186 OR LLRO 180J) OR (SOC 13181 OR SOC 180E) OR (THEO 13183 OR THEO 180G)

A course in writing the short story and related forms of fiction.

ENGL 20019. Fiction Writing

(3-0-3)

A course in writing the short story and related forms of fiction.

ENGL 20020. Fiction Writing

(3-0-3)

Prerequisite: (AMST 13186 OR AMST 180J) OR (ANTH 13181 OR ANTH 180E) OR (ARHI 13182 OR ARHI 180F) OR (LLEA 13186 OR LLEA 180J) OR (ECON 13181 OR ECON 180E) OR (ENGL 13186 OR ENGL 180J) OR (FTT 13182 OR FTT 180F) OR (GE 13186 OR GE 180J) OR (HIST 13184 OR HIST 180H) OR (IRLL 13186 OR IRL 180J) OR (MUS 13182 OR MUS 180F) OR (PHIL 13185 OR PHIL 180I) OR (POLS 13181 OR POLS 180E) OR (PLS 13186 OR PLS 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346) OR (PSY 13181 OR PSY 180E) OR (LLRO 13186 OR LLRO 180J) OR (SOC 13181 OR SOC 180E) OR (THEO 13183 OR THEO 180G)

A course in writing the short story and related forms of fiction.

ENGL 20021. Fiction Writing: Writing Speculative Fiction

(3-0-3) Micklem

Prerequisite: (AMST 13186 OR AMST 180J) OR (ANTH 13181 OR ANTH 180E) OR (ARHI 13182 OR ARHI 180F) OR (LLEA 13186 OR LLEA 180J) OR (ECON 13181 OR ECON 180E) OR (ENGL 13186 OR ENGL 180J) OR (FTT 13182 OR FTT 180F) OR (GE 13186 OR GE 180J) OR (HIST 13184 OR HIST 180H) OR (IRLL 13186 OR IRL 180J) OR (MUS 13182 OR MUS 180F) OR (PHIL 13185 OR PHIL 180I) OR (POLS 13181 OR POLS 180E) OR (PLS 13186 OR PLS 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346) OR (PSY 13181 OR PSY 180E) OR (LLRO 13186 OR LLRO 180J) OR (SOC 13181 OR SOC 180E) OR (THEO 13183 OR THEO 180G)

A creative fiction writing course for students interested in writing speculative (historical, fantastical, or scientific) fiction.

ENGL 20031. Poetry Writing

(3-0-3) Menes

Prerequisite: (AMST 13186 OR AMST 180J) OR (ANTH 13181 OR ANTH 180E) OR (ARHI 13182 OR ARHI 180F) OR (LLEA 13186 OR LLEA 180J) OR (ECON 13181 OR ECON 180E) OR (ENGL 13186 OR ENGL 180J) OR (FTT 13182 OR FTT 180F) OR (GE 13186 OR GE 180J) OR (HIST 13184 OR HIST 180H) OR (IRLL 13186 OR IRL 180J) OR (MUS 13182 OR MUS 180F) OR (PHIL 13185 OR PHIL 180I) OR (POLS 13181 OR POLS 180E) OR (PLS 13186 OR PLS 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346) OR (PSY 13181 OR PSY 180E) OR (LLRO 13186 OR LLRO 180J) OR (SOC 13181 OR SOC 180E) OR (THEO 13183 OR THEO 180G)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20032. Poetry Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20033. Poetry Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (PLS 20201 OR PLS 243) OR (PLS 23101 OR PLS 281)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20034. Poetry Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20035. Poetry Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (LLRO 13186 OR LLRO 180J) OR (PLS 13186 OR PLS 180J) OR (LLEA 13186 OR LLEA 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20036. Poetry Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (LLRO 13186 OR LLRO 180J) OR (PLS 13186 OR PLS 180J) OR (LLEA 13186 OR LLEA 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20037. Poetry Writing

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (LLRO 13186 OR LLRO 180J) OR (PLS 13186 OR PLS 180J) OR (LLEA 13186 OR LLEA 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20038. Poetry Writing

(3-0-3)

Prerequisite: (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20039. Poetry Writing

(3-0-3)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20040. Poetry Writing

(3-0-3)

Prerequisite: (AMST 13186 OR AMST 180J) OR (ANTH 13181 OR ANTH 180E) OR (ARHI 13182 OR ARHI 180F) OR (LLEA 13186 OR LLEA 180J) OR (ECON 13181 OR ECON 180E) OR (ENGL 13186 OR ENGL 180J) OR (FTT 13182 OR FTT 180F) OR (GE 13186 OR GE 180J) OR (HIST 13184 OR HIST 180H) OR (IRLL 13186 OR IRL 180J) OR (MUS 13182 OR MUS 180F) OR (PHIL 13185 OR PHIL 180I) OR (POLS 13181 OR POLS 180E) OR (PLS 13186 OR PLS 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346) OR (PSY 13181 OR PSY 180E) OR (LLRO 13186 OR LLRO 180J) OR (SOC 13181 OR SOC 180E) OR (THEO 13183 OR THEO 180G)

A workshop on writing poetry, from exercises on the making of images to poetry as objective narrative, subjective journal, monologue, and direct address.

ENGL 20071. Creative Nonfiction

(3-0-3)

Prerequisite: (ENGL 13186 OR ENGL 180J) OR (LLRO 13186 OR LLRO 180J) OR (PLS 13186 OR PLS 180J) OR (LLEA 13186 OR LLEA 180J) OR (PLS 20201 OR PLS 243) OR (PLS 30202 OR PLS 346)

This is a course in "close writing" in a wide range of dynamic and innovative genres of creative nonfiction, from the personal essay to meditations to literary journalism.

ENGL 20091. Writing, Rhetoric, and Public Life

(3-0-3)

This course is devoted to the study and practice of writing in public life, or writings about political, environmental, and cultural issues.

ENGL 20100. Monsters in Literature

(3-0-3)

A survey of two thousand years of "monsters" in literature, ranging from *Metamorphoses* by Ovid to *Frankenstein* by Shelley to *Grendel* by Gardner.

ENGL 20101. Introduction to Greek Literature

(3-0-3)

Introduction to Greek Literature combines study of the literary genres that have broadly influenced the course of Western letters with representative works chosen for their traditional interest and openness to a variety of critical approaches. All Greek literature begins with the epic *Iliad*, which may be taken as the foundational text for the tragic view of life. This will be followed by readings of choral and solo lyric poetry, and then by drama, both tragic and comic. Critical historiography was a notable Greek contribution to the Western tradition, and it is represented by Herodotus, Thucydides, and Polybius. Demosthenes' courtroom attack on Neaira illustrates rhetoric and reveals a great deal about gender and culture in the 4th century BCE. Plato's social and moral criticisms will be addressed in *Georgics* or *Symposium*. Finally, literature of the imperial period will be represented by chosen *Lives* of Plutarch and satirical essays of Lucian.

ENGL 20102. Scandal, Intrigue in Traditional Japanese Literature

(3-0-3)

Explore the aesthetics and politics of courtship and marriage among the aristocracy of Japan. Readings include 10th- and 11th-century classics such as *The Pillow Book*, *The Tale of Genji*, and *The Gossamer Years*.

ENGL 20103. Love, Death, and Revenge in Japanese Drama

(3-0-3)

An introduction to Japanese classical theater (Noh, Kyogen, Bunraku, and Kabuki) through readings and videotapes of selected plays.

ENGL 20104. Image of Women in Chinese Literature

(3-0-3)

This course explores changing images of woman in Chinese literature, from her early appearance in folk poetry to the dominant role she comes to play in the vernacular novel and drama.

ENGL 20105. Border Crossings: Mexican and Canadian Literature

(3-0-3)

Mexican and Canadian literature emphasizing cultural interaction between the US and its southern and northern neighbors.

ENGL 20106. Point-of-View in the Novel

(3-0-3)

This course focuses on an introduction to the novel as a form, as a means to view the world of the author/artist and that of the reader.

ENGL 20107. Satire

(3-0-3)

An introduction to satire in Western literature.

ENGL 20108. Text and Image

(3-0-3)

This course investigates the interaction between the verbal language of poetry and prose on the page and the visual images designed to accompany them.

ENGL 20109. Self and Society in Modern Japanese Fiction

(3-0-0)

An exploration, in English, of how native Japanese fiction writers responded to the challenges of an “imported” modernity after World War II, including contemporary and post-modern Japanese fiction.

ENGL 20110. Late-Twentieth-Century Canadian Literature

(3-0-3)

The course examines selected works by contemporary Canadian authors, including those from Quebec.

ENGL 20111. Realism and the Supernatural

(3-0-3)

An attempt to develop a theory of the supernatural and the uncanny in “realistic” fiction from Daniel Defoe to Henry James.

ENGL 20112. Comedy

(3-0-3)

A multimedia examination of different and recurring patterns, themes, characters, types, and problems in comedy-in drama, opera, and operetta, film, fiction, and radio and TV—with particular focus on the role and treatment of women.

ENGL 20113. Fictions of Insanity

(3-0-3)

An examination of the literary motif of insanity in novels and short stories from the 19th and 20th centuries, tracing cultural fascinations with “abnormal,” “insane,” “mad,” “psychotic,” “crazy,” and “irrational” minds.

ENGL 20114. From *Beowulf* to *Monty Python*

(3-0-3)

An exploration of the historical epoch known as “the Middle Ages” through its own texts as well as the modern texts that represent it.

ENGL 20116. Poetry and Prayer

(3-0-3) Wilson

An examination of how the words “poetry” and “prayer” are connected.

ENGL 20117. Comedy

(3-0-3)

Various forms of comic literature through the ages.

ENGL 20118. Age of Augustus

(3-0-3)

The purpose of this course is to consider the historical events, cultural productions, social and political issues, and legacy of the age of Augustus. Topics to be considered will include the fall of the Republic, the Augustan architectural and literary program, artistic freedom under an autocracy, and the nature of empire. Readings will be taken from Cicero, Vergil, Livy, Horace, Ovid, Tibullus, Propertius, and Suetonius.

ENGL 20119. Fairy and the Christian Myth

(3-0-3)

This course will explore the interface and conflict between fairy and Christian in the medieval and renaissance tradition by discussing the legend of the holy grail and by reading *Sir Gawain and the Green Knight*, Book 1 of Spenser’s *Fairie Queene*, Shakespeare’s *A Midsummer Night’s Dream*, Milton’s *Comus*, and parts of Tennyson’s *Idylls of the King*. In the second half of the course, we will turn to a modern mythmaker by reading Tolkien’s *Lord of the Rings*.

ENGL 20122. Animal Antics of Britain

(3-0-3)

A close reading of some of the best animal stories in British literature: from Chaucer, Shakespeare, Spenser, Aesop’s Fables, and the story cycle of Reynard the Fox, to the novellas of A.S. Byatt, the film *Babe*, and the controversial art of Damien Hirst.

ENGL 20126. One Thousand Years of Monsters

(3-0-3)

A survey of “monsters” in Western literature.

ENGL 20127. Weird Tales: Literature of the Supernatural and Fantastic

(3-0-3) Smith

Supernatural and fantastic elements in selected classic and contemporary world literatures.

ENGL 20135. Post-Colonial New Zealand Literature and Cinema

(3-0-3) Magnan-Park

Through literature and cinema, a study of New Zealand’s national attempts to identify itself outside of the Caucasian Pakeha vs. indigenous Maori ethnic divide.

ENGL 20200. Kingship in Renaissance Literature

(3-0-3)

An examination of the mystique of kingship in the English Renaissance.

ENGL 20202. Love in the Middle Ages

(3-0-3)

An exploration of the complex, moving, and often contradictory medieval literatures of love.

ENGL 20203. Shakespeare in Performance

(3-0-3)

A performance-oriented Shakespeare course based on the rapprochement of theatrical and literary disciplines, techniques, and interpretations.

ENGL 20204. Shakespeare and Film

(3-0-3)

A survey of how Shakespeare uses sex and violence as potential literary devices within his plays, and how film adaptations of the plays help us understand the effects of this sensationalism.

ENGL 20205. From *Beowulf* to *Monty Python*

(3-0-3)

An exploration of the historical epoch known as “The Middle Ages” through its own texts as well as the modern texts that represent it.

ENGL 20206. Dante: *Divine Comedy*

(3-0-3)

A study of *The Divine Comedy*, in translation with facing Italian text, with special attention to the history of ideas, the nature of mimesis and allegory, and Dante’s sacramental vision of life.

ENGL 20207. The Journey in Medieval Literature

(3-0-3)

Map’s *The Quest of the Holy Grail*; Dante’s *Divine Comedy*; Chaucer’s *Canterbury Tales*; Cervantes’ *Don Quixote*.

ENGL 20208. Staging the Religious: Marlowe and Shakespeare

(3-0-3) Dodson

How the Elizabethan playwrights Christopher Marlowe and William Shakespeare explored religion and religious themes in their works.

ENGL 20209. Love’s Knowledge in the Renaissance

(3-0-3)

A survey of Renaissance literature based on what kind of knowledge these texts think love affords.

ENGL 20210. Religious Writings and Images in Medieval England

(3-0-3)

This course examines the visual and dramatic aspects of literary religious writings. Texts include *The Mirror of the Blessed Life of Jesus Christ* (selections), *The Cloud of Unknowing* (selections), Julian of Norwich’s *Showings*, *The Book of Margery Kempe*, the *York Corpus Christi Plays*, from the *Creation* to the *Last Judgment*, and Chaucer’s *Summoner’s Tale*.

ENGL 20211. Shakespeare’s Comedies

(3-0-3)

A survey of the comedic plays of William Shakespeare.

ENGL 20213. The World of the Middle Ages

(3-0-3) Noble

Corequisite: MI 22000

The Middle Ages have been praised and reviled, romanticized and fantasized. The spectacular popularity of *Harry Potter*, *The Lord of the Rings*, and *Narnia* have brought a revival of interest in and curiosity about the Middle Ages. But what were they like, these 10 centuries between Rome and the Renaissance? In this course, we will explore major themes and issues in medieval civilization in an attempt to offer some basic answers to that question. We will have in view three kinds of people: rulers, lovers, and believers. But we will also study carefully those who wrote about those kinds of people. We will constantly ask how can we know about the Middle Ages, and what kinds of things can we know? We will consider major literary texts as both works of art and historical documents. We will explore various kinds of religious literature. We will try to understand the limits, boundaries, and achievements of philosophy and theology. Some lectures will incorporate medieval art so as to add a visual dimension to our explorations. This course will constitute an extended introduction to the dynamic and fascinating world of the Middle Ages.

ENGL 20215. Introduction to Shakespeare

(3-0-3) Martin

An examination of selected plays of Shakespeare, with an emphasis on Shakespeare's development as a dramatist and his techniques of character development.

ENGL 20302. The Romantic Tradition

(3-0-3)

Between 1790 and 1830, the movement known as Romanticism profoundly changed the artistic, musical, historical, religious, and political sensibilities on the Continent and in Britain. Romanticism marked a turn from the rational formalism of the Classical period and reawakened an interest in myth, religious faith, the imagination, and emotional experience. In this course, we will focus principally on the German contribution to Romanticism and trace its origins, development, and eventual decline in works of literature, philosophy, theology, music, painting, and architecture. Works to be studied will include those by the writers Ludwig Tieck, Friedrich von Hardenberg (Novalis), and Friedrich Schlegel; the philosophers Fichte and Schelling; the theologian Friedrich Schleiermacher; the painters Caspar David Friedrich and some members of the Nazarene school; the composers Franz Schubert, Felix Mendelssohn, and Robert Schumann; and the architect Karl Friedrich Schinkel.

ENGL 20303. C.S. Lewis, Tolkien, and Inklings

(3-0-3)

"Otherworldly" fiction as well as the theological, critical, and philosophical writings of C.S. Lewis, J.R.R. Tolkien, and the Inklings.

ENGL 20304. Madness in Victorian Literature

(3-0-3)

An exploration of the Victorian fascination with the aberrant, the peculiar, and the fantastic alongside of the Victorians' notorious reputation for prudery and repressiveness.

ENGL 20305. Victorian Empire Writing 1868–1901

(3-0-3)

An exploration of the empire as theme in selected Irish writers of the late 19th century.

ENGL 20306. Crime in Nineteenth-Century Novels

(3-0-3)

Diverse perspectives on Irish and British history and literature provide a frame for discussing violence and social change, sexuality, economics, and politics in novels written in Ireland and Britain during the last half of the 19th century.

ENGL 20308. Love and Money in the Nineteenth-Century British Novel

(3-0-3)

This course focuses on the ways in which the novel both reflected and produced transformations in the relationship between class, gender, and love in 19th-century England.

ENGL 20309. British Novel: Economics, Politics, Gender

(3-0-3)

Major British novels of the 18th, 19th, and 20th centuries confront the political, economic, and gender issues of their times.

ENGL 20311. Evolving Science Fictions

(3-0-3)

A historical perspective on the development and growth of British science fiction literature in the 19th century.

ENGL 20319. Art and Sexuality in Late Victorian Britain

(3-0-3)

How sexuality, particularly women's sexuality, was depicted in literature and other art forms in Britain during the late Victorian era.

ENGL 20325. Gender and the Nineteenth-Century British Novel

(3-0-3) Cameron

How gender and gender relations in 19th-century Britain are explored and revealed in selected novels of the period.

ENGL 20333. Religion and Ridicule in Eighteenth-Century British Literature

(3-0-3)

How the topics of religion and religious satire were explored by 18th-century British writers.

ENGL 20400. World War I: Narratives of War

(3-0-3)

A study of how narratives concerning World War I affected two connected discourses: feminism and psychoanalysis, particularly in light of men's and women's differing roles in the war through the work (physical, emotional, and artistic) in which they were engaged.

ENGL 20401. History and Twentieth-Century Novels

(3-0-3)

An exploration of how history and memory are narrated and constructed in American and European novels throughout the 20th century through answering such questions as: How is novel writing different than history writing? How does the process of writing relate to the process of memory, particularly in the case of a traumatic memory? What makes a novel "literary" versus merely "popular"? And does the creation of a narrative, story, or history have value, even if it leaves something, or someone, out of the story?

ENGL 20402. Paranoia and Narrative in Twentieth Century

(3-0-3)

An evaluation of the ways in which narrative is implicated in our need to find a comfortable pattern for our lives, even if that pattern is self-destructive.

ENGL 20403. History and Twentieth-Century Novels

(3-0-3)

An exploration of how history and memory are narrated and constructed in American and European novels throughout the 20th century through answering such questions as: How is novel writing different than history writing? How does the process of writing relate to the process of memory, particularly in the case of a traumatic memory? What makes a novel "literary" versus merely "popular"? And does the creation of a narrative, story, or history have value, even if it leaves something, or someone, out of the story?

ENGL 20404. Postmodern British Macabre

(3-0-3)

A survey of texts by late-20th-century British novelists and musicians who, through various aesthetic strategies, attempted to reflect the chaos and insanity that seemed to be enveloping Britain as it finally imploded as an empire.

ENGL 20406. Mysticism in Modern Literature

(3-0-3)

This course examines the persistence of mystical and spiritual traditions in the literary texts of the early 20th century: Underhill, Hopkins, Yeats, Conrad, Joyce, Owen, Eliot, Crane, Hesse, Forster, Mansfield, Woolf, and Waugh.

ENGL 20407. Christianity and Modernism

(3-0-3)

A study of Christian writers and how they struggle with the literary and cultural movement labeled “modernism.”

ENGL 20408. Faith and Fragmentation in Modernity

(3-0-3)

How British and American modernist writers responded to an upheaval of traditional religious belief in the first half of the 20th century.

ENGL 20432. Social Unrest and the British Novel: 1730-1980

(3-0-3)

How the novel chronicled the changes and social upheaval in British society and culture over the 18th, 19th, and 20th centuries.

ENGL 20440. British Modernism and Its Post-Colonial Legacy

(3-0-3)

An exploration of the aesthetic and political aspects of modernist fiction in colonial Britain from 1900 to 1935.

ENGL 20501. Irish Fiction, 1945–2000

(3-0-3)

A study of major Irish writers since World War II.

ENGL 20502. National Cinema: Irish Cinema/Culture

(3-2-3)

Corequisite: ENGL 21001

Every industrialized country, and many a non-industrialized one, has developed distinctive national cinemas. Often these productions are a dynamic mix of Hollywood influences, assertive local cultures, and government control. This course examines the films of one or more countries to reveal their distinctive styles, stories, and visual and narrative techniques. (The nationality varies each year.) The idea of “nation” as a critical concept is also addressed. May be repeated. Fulfills the film/TV international area requirement.

ENGL 20503. Northern Irish Writing and Politics

(3-0-3)

A study of Irish writers in the North since the Troubles began in the 1960s.

ENGL 20504. Writing in Northern Ireland

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

ENGL 20505. Imprisonment in Irish Literature

(3-0-3)

The theme of imprisonment in 19th-century Irish writing.

ENGL 20506. Celtic Heroic Literature

(3-0-3)

An exciting introduction to Celtic literature and culture, this course introduces the thrilling sagas, breathtaking legends, and prose tales of Ireland and Wales. Readings include battles, heroic deeds, feats of strength and daring, and dilemmas faced by the warrior heroes of the Celts. Celtic Heroic Literature, which requires no previous knowledge of Irish or Welsh, studies the ideology, belief system, and concerns of the ancient Celtic peoples as revealed in their saga literature. By examining the hero's function in society, students investigate the ideological concerns of a society undergoing profound social transformation and religious conversion to Christianity and the hero's role as a conduit for emotional and social distress. Among the heroes to be studied in depth are: Cu Chulainn, Lug, St. Patrick, and the king-heroes. Wisdom literature, archaeological and historical evidence will also be considered in this course. No prior knowledge of Irish required. All texts provided in English.

ENGL 20507. Crime and Progress in the Nineteenth-Century British Novel

(3-0-3)

Diverse perspectives on Irish and British history and literature provide a frame for discussing violence and social change, sexuality, economics, and politics in novels written in Ireland and Britain during the last half of the 19th century.

ENGL 20508. The Irish in Their Own Words

(3-0-3)

This course is designed as an introduction to the literature of medieval Ireland. Particular emphasis will be placed on the prose saga texts like the *Tain Bo Cualnge* or *Cattle Raid of Cooley*, which features the legendary hero Cu Chulainn; also the various texts in both prose and poetry of the Fenian cycle of Fionn Mac Cumhaill (Finn McCool). The manner in which such texts shed light on the nature of medieval Irish society will be examined. There will be regular reading and writing assignments, and students will be expected to take part in class discussion.

ENGL 20509. Twentieth-Century Irish Literature

(3-0-3)

The cultural and political factors that have shaped Ireland's extraordinary literary achievement, paying particular attention to Irish Decolonization and the Northern Troubles. Readings from Shaw, Yeats, Joyce, Bowen, Friel, Heaney, and Deane.

ENGL 20510. The Hidden Ireland

(3-0-3) O'Buachalla

Daniel Corkery's study of the literature and society of Irish-speaking Munster in the 18th century (*The Hidden Ireland*, first published in 1924) is an acknowledged classic of Irish literary history. This course will examine aspects of the corpus of 18th-century poetry in the Irish language in the light of Corkery's analysis and of subsequent reassessments of that analysis (Louis Cullen and Brendan O' Buachalla, for example). Selections from the corpus of poetry will be taken from O' Tuama and Kinsella *An Dunaire: Poems of the Dispossessed* (1981).

ENGL 20511. Modern British and Irish Drama

(3-0-3)

Dramatic representations of the Irish “character” and the Irish nation from the end of the 19th century through the 20th. Includes Yeats, Lady Gregory, O'Casey, Shaw, and Synge.

ENGL 20512. Culture and Politics in Northern Ireland

(3-0-3)

This course explores the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

ENGL 20513. Introduction to Irish Writers

(3-0-3) Fox

Corequisite: ENGL 22514

W.B. Yeats, Elizabeth Brown, Bram Stoker, J.M. Synge, Seamus Heaney, Medbh McGuckian.

ENGL 20514. Introduction to Irish Writers

(3-0-3)

Prerequisite: FYC 13100 OR FYC 110

Corequisite: ENGL 22514

W.B. Yeats, Elizabeth Brown, Bram Stoker, J.M. Synge, Seamus Heaney, Medbh McGuckian.

ENGL 20515. Celtic Mythology

(3-0-3) Hennessey

A review of the legends and myths of the Celtic world, along with some of their contemporary adaptations.

ENGL 20516. The Irish in Their Own Words

(3-0-3)

This course is designed as an introduction to the literature of medieval Ireland. Particular emphasis will be placed on the prose saga texts like the *Tain Bo Cualnge* or *Cattle Raid of Cooley*, which features the legendary hero Cu Chulainn; also the various texts in both prose and poetry of the Fenian cycle of Fionn Mac Cumhaill (Finn McCool). The manner in which such texts shed light on the nature of medieval Irish society will be examined. There will be regular reading and writing assignments, and students will be expected to take part in class discussion.

ENGL 20518. Anglo-Irish Literature

(3-0-3)

An examination of Irish identity through an introduction to the literature, both historical and contemporary, of Anglo Ireland.

ENGL 20519. Irish Gothic/Union to Troubles

(3-0-3)

An exploration of the ways in which Irish literature, both historical and contemporary, uses ghosts, vampires, demons, and rebels to grapple with threats facing Irish society.

ENGL 20520. Alienation and Connection in British and Irish Modernism

(3-0-3)

How the themes of alienation and connection are explored in selected works of British and Irish modernist literature.

ENGL 20528. Folklore in Irish Literature

(3-0-3)

A close reading of traditional Irish myths, tales, songs, customs, rituals, and beliefs.

ENGL 20530. Twentieth-Century Irish and Native-American Literature: When We Were Noble Savages

(3-0-3)

From the outset of colonization in both Ireland and North America, literature was employed in similar fashion to romanticize, demonize and, more often than not, silence Irish and Native American cultures. Today, with the surge in post-colonial literatures, Irish and Native American literatures have found new voices that look to the past in order to explore the present. Instead of romanticizing cultural memories, these authors subvert and challenge heroic representations while dispelling stereotypes. Together these separate literary traditions intersect and diverge, challenging accepted perspectives of history and culture while blending stories with oral tradition, popular history, and pop culture. With these intersections in mind, we will explore an array of literature from both Irish and Native American traditions, from novels to poetry to film. We will look at a variety of authors, including Flann O'Brien, Nuala Ni Dhomhnaill, Eilís Ni Dhuibhne, Leslie Marmon Silko, Sherman Alexie, and Simon Ortiz. Requirements include a midterm exam, one short paper (3–5 pages), one longer paper (8–10 pages), and a presentation.

ENGL 20532. City Streets, City Beats: Belfast, Dublin, London, and Paris from Baudelaire to Bono

(3-0-3)

As one of the most dominant themes of modernity, the city figures as a poster child of trendsetters, go-getters, floozies, and philanderers. It is the embodiment of shabby chic. Wherever there's couture there are cutthroats, and if there's a ballroom there's bound to be a bordello. Baudelaire's Paris sets the tone for the modern city's fast-paced but staggering tempo, and 150 years later, it can still be heard in Bono's gravelly tones and nostalgic lyrics. This course focuses on four cities intimately connected through literature, art, music, and film. It will study both their tense political and social relationships with one another as well as their idiosyncratic cultures and geographies (including their landmarks, streets, transportation and water systems, etc.), and will think about the resonance of these cities' histories on global, contemporary culture. Readings include selections from Baudelaire and Apollinaire, works by Padraic O Conaire, Joseph Conrad, James Joyce, Liam O'Flaherty, Samuel Beckett, Virginia Woolf, Elizabeth Bowen, John Banville, and Michael McLaverty, and selected poems from Seamus Heaney, John Montague, Derek Mahon, and Ciaran Carson. Photos, paintings, and song lyrics will supplement the readings, and there will also be a few movie showings. Course requirements include class participation, weekly quizzes, one 10–12 page paper, and a midterm.

ENGL 20601. Early Modern American Fiction

(3-0-3)

An examination of selected literatures written between the Civil War and World War II, specifically focusing on how this fiction shows the impact of economic and technological transformations on religious beliefs, conceptions of human identity, and work environments and men's and women's places in them.

ENGL 20602. Readings in Nineteenth-Century American Literature

(3-0-3)

This course focuses on major literary figures and works of 19th-century America, focusing chiefly on the two decades before the Civil War, a period often hailed as the first flowering of a genuine "American" literature.

ENGL 20603. Readings in Early American Literature

(3-0-3)

Close examination of selected works written by Americans from the 17th century through the Civil War.

ENGL 20604. American Fiction

(3-0-3)

An exploration of selected novels, written by a variety of American authors, that consider the question "what characteristics and values define "American" identity"?

ENGL 20605. American Literature: Varieties of Religious Experience

(3-0-3)

Many American authors are skeptical toward religion, yet they are, nonetheless, preoccupied with the religious experience. This course explores the relationship between these attitudes in American literature.

ENGL 20606. American Women Writers to 1930

(3-0-3)

A close reading of "major" and "minor" American women writers of the 18th, 19th, and early 20th centuries.

ENGL 20607. Religious Imagination in American Literature

(3-0-3) Werge

A consideration of the forms, ideas, and preoccupations of the religious imagination in literature and of the historical relationships between religious faith and traditions and particular literary works.

ENGL 20626. American War Literature

(3-0-3)

Beginning with Mary Rowlandson's captivity narrative and ending with Tim O'Brien's *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

ENGL 20702. Travel in American Literature

(3-0-3)

A close examination of the theme of "travel" in American literature from the Puritans to the present, focusing on literatures written by slaves seeking freedom, settlers in search of fertile land, Native Americans forced from ancestral homes, and other characters seeking "freedom" or a return to "home."

ENGL 20703. Passing in Twentieth-Century American Literature

(3-0-3)

Interracial relationships as depicted in the writings of black and white American writers.

ENGL 20704. Contemporary Short Fiction

(3-0-3)

A study of short stories and novellas written in the last half of the 20th century.

ENGL 20705. The Criminal in American Literature

(3-0-3)

A survey of "criminals" in American literature.

ENGL 20706. Readings in American Novels

(3-0-3)

Close readings of selected novels of significant importance within the American literary tradition.

ENGL 20707. American Novel

(3-0-3)

Novels from Hawthorne to Morrison.

ENGL 20708. The City in American Literature

(3-0-3)

Literary representations of the city and social identity in American texts from the 1890s to the present, including Riis, Dreiser, Wharton, Sinclair, Yeziarska, Wright, Paley, and Cisneros, as well as contemporaneous nonfiction and films

ENGL 20709. God and Evil in Modern Literature

(3-0-3) Werge

A study of selected modern writers whose concern with God and evil, faith and despair, and the reality and significance of suffering animates their writings.

ENGL 20710. Latino/a Literatures: Stories of New America

(3-0-3) Rodriguez

A survey of selected 19th- and 10th-century Latino/a American writings.

ENGL 20717. Modernism, Life-Writing, and the Politics of Everyday Life

(3-0-3)

A close study of modernist personal narratives.

ENGL 20790. Asian American Literature

(3-0-3) Valenzuela

This course will explore the development of Asian-American literature from the 1800s to the present, focusing on writers of Chinese, Filipino, Indian, Hmong, Japanese, and Korean descent. Discussions will focus on questions of race/ethnicity, identity/representation, nation, and exile. Primary texts, including novels, short fiction, poetry, theory, and film will be supplemented by critical articles. Some works to be discussed will include Carlos Bulosan's *America is in the Heart*, Jessica Hagedorn's *Dogeaters*, Maxine Hong Kingston's *The Woman Warrior*, Faye Ng's *BONE*, and John Okada's *No-No Boy*.

ENGL 20800. Ethnic Identities

(3-0-3)

An exploration of the interconnectedness among literatures of prominent authors from the Americas, Africa, England, and the Caribbean.

ENGL 20801. African-American Literature and the Bible

(3-0-0)

An examination of the Bible, from Genesis to the Gospel writers' parables of Jesus, and how these Hebrew and Christian stories inspired African-American artists.

ENGL 20802. Twentieth-Century Ethnic American Novels

(3-0-3)

An exploration, based on the theme of memory, of several ethnic American novels, specifically the ways in which remembering one's own or one's ancestors' past becomes part of one's self-identification as an ethnic American.

ENGL 20803. A Survey of Black Women Writing in America

(3-0-3)

This course is designed to familiarize students with the diverse concerns of black women's writing from the first novel written in 1854 through the present.

ENGL 20804. Testimonios

(3-0-3)

"Testimonios" are statements or testaments by women and about their lives, and this course will explore Latinas' testimonios as literature, life stories, and "holy" texts.

ENGL 20805. Twentieth-Century Ethnic American Novels

(3-0-3)

An exploration, based on the theme of memory, of several ethnic American novels, specifically the ways in which remembering one's own or one's ancestors' past becomes part of one's self-identification as an ethnic American.

ENGL 20806. Latin American Images of the United States

(3-0-3)

Drawing upon a wide variety of sources—novels, essays, poems, travel literature, social science texts, film, art, etc.—a survey of Latin American views of North American society, customs, politics, and individual character, with a particular emphasis on United States interventionism.

ENGL 20807. The Harlem Renaissance

(3-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in the '20s and early '30s and the writers it fostered: Hughes, Hurston, Toomer, Redmon Fauset, Larson, and Thurman.

ENGL 20808. Latino- and Latina-American Literature

(3-0-3)

Studies of Latino and Latina authors, including Chicano, Caribbean, or South American.

ENGL 20809. West Indian Poetry

(3-0-3)

Poems from the many languages and cultures of the Caribbean region.

ENGL 20810. African-American Migration Narratives

(3-0-3)

Life writings and issues of self-representation in the African-American expressive cultural tradition in the 19th and 20th centuries.

ENGL 20811. Women in the Americas

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

ENGL 20812. Icons and Action Figures in Latino/Latina Literature

(3-0-3)

Understanding US Latino/Latina literature, art, and film through its many allusions to and re-interpretations of traditional icons and historic figures as well as legends, myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/Latina, African, Asian and European cultures).

ENGL 20813. Latino/a Poetry

(3-0-3)

Close readings of prominent contemporary Latino poets.

ENGL 20814. Introduction to African-American Literature

(3-0-3)

A survey of 300 years of African-American literature.

ENGL 20815. The Postmodern Gothic

(3-0-3) Paice

A survey of selected postmodern Gothic American novels.

ENGL 20820. Contemporary Black Literature

(3-0-3)

A survey of late 20th-century black literature in the United States and its relation to other ethnic literatures.

ENGL 20821. Latino Literatures

(3-0-3)

A survey of Latino fiction, poetry, and other literary works.

ENGL 20822. Beats, Rhymes, and Life: An Introduction to Cultural Studies

(3-0-3)

An introduction to cultural studies using a variety of media: literature, film, and music.

ENGL 20828. Tropical Heat Waves: Contemporary Latino/a and Caribbean Literature

(3-0-3)

A review of selected contemporary Latino/a and Caribbean novels.

ENGL 20838. Twentieth-Century American Feminist Fiction

(3-0-3)

Close readings of major 20th-century novels, written by both men and women, which may be described as “feminist.”

ENGL 20840. Performing Personality: Democratic Selves in the Public Sphere

(3-0-3)

From the Salem witchcraft trials to the 1960s, how Americans created, discovered, and performed their “American” identities through public social formations such as audiences, traditions, political orders, reform movements, churches, friendships, and cities.

ENGL 20902. Introduction to Linguistics

(3-0-3)

Study of the basic forms and syntax of the English language with application to teaching, writing, and literature.

ENGL 20903. Introduction to Post-Colonial Literature

(3-0-3)

Traces the development of literatures from the former colonies of various empires, but principally the British and French.

ENGL 20949. Masterpieces of Japanese Literature

(3-0-3) Brownstein

This course is a survey of Japanese poetry, fiction, and drama from the earliest times through the 20th century. All texts are in English and no special knowledge of Japan or Japanese is required. The course is divided into four units. We will begin with the development of court poetry (*waka*) as found in the *Manyōshū* (*Collection of Ten Thousand Leaves*) and the first Imperial Anthologies, followed by episodes from the *Tales of Ise*, and selected chapters from Murasaki Shikibu's masterpiece of courtly love, *The Tales of Genji* (ca. AD 1000). In addition to social and historical factors influencing the development of a courtly aesthetic, we will also consider the influential role played by Buddhism and Chinese literature. In the second unit we will look at how Japanese literature developed under the patronage of the samurai aristocracy during Japan's “medieval” period (12–16th centuries) with readings of Noh plays, linked verse (*renga*) and philosophical essays such as “An Account of My Hut” and “Essays in Idleness.” For the third unit, we move to the Early Modern Period with the haiku poetry of Bashō, short stories by Saikaku (“Five Women Who Loved Love”), and *The Love Suicides at Amijima*, a play by Chikamatsu Monzaemon. For the last unit, we will read a selection of modern stories and plays.

ENGL 20994. Topics in Literature

(3-0-3)

A survey of selected literatures and the cultural milieu in which they were written.

ENGL 20995. Topics in Literature

(3-0-3)

A survey of selected literatures and the cultural milieu in which they were written.

ENGL 20996. Topics in Literature

(3-0-3)

A survey of selected literatures and the cultural milieu in which they were written.

ENGL 20997. Topics in Literature

(3-0-3)

A survey of selected literatures and the cultural milieu in which they were written.

ENGL 20998. Creative Writing

(3-0-3)

Credit for courses taken away from Notre Dame.

ENGL 20999. Studies in Literature

(3-0-3)

Credit for courses taken away from Notre Dame.

ENGL 21001. National Cinema: Irish Cinema/Culture Lab

(0-3-0)

Film lab/corequisite for ENGL 20502.**ENGL 22514. Introduction to Irish Writers/Discussion**

(3-1-0)

Corequisite for ENGL 20513 and 20514.**ENGL 27999. Special Studies**

(V-0-V)

Independent study under the direction of a faculty member.

ENGL 30011. Fiction Writing for English Majors

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An intensive fiction workshop exclusively for English majors.

ENGL 30012. Poetry Writing for English Majors

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

A intensive poetry workshop exclusively for English majors.

ENGL 30101. Introduction to Literary History

(3-0-3)

A seminar-style course introducing beginning English majors to the critical skills necessary to analyze, interpret, and appreciate literary works of different kinds and eras.

ENGL 30110. British Literary Traditions I

(3-0-3) Smith, Wilcox

Intensive survey of British writers and literary forms from the beginnings through the Renaissance.

ENGL 30111. British Literary Traditions II

(3-0-3)

Intensive survey of British writers and literary forms of the 18th and 19th centuries.

ENGL 30115. American Literary Traditions I

(3-0-3) Staud

Introduction to American literature from its beginnings through the Civil War, emphasizing important figures, literary forms, and cultural movements.

ENGL 30116. American Literary Traditions II

(3-0-3) Brogan

Introduction to American literature from the Civil War through the 20th century, emphasizing important figures, literary forms, and cultural movements.

ENGL 30302. Methods: Introduction to Critical Theory

(3-0-3)

An introduction to methods of literary study through contemporary theories of literature, emphasizing Continental approaches: Saussure, Derrida, Foucault, Freud, Lacan, Said, and others, applied to Joyce.

ENGL 30304. Methods: Interpretation of 1850s America

(3-0-3)

A close reading of three or four widely discussed American literary texts from the 1850s—perhaps Hawthorne's *The Scarlet Letter*, Stowe's *Uncle Tom's Cabin*, Melville's *Benito Cereno*, and Jacobs's *Incidents in the Life of a Slave Girl*—in an attempt to explore a range of critical approaches to analyzing each.

ENGL 30307. Methods: *Paradise Lost*

(3-0-3)

A “hands-on” introduction to literary scholarship through an exploration of John Milton's *Paradise Lost* and its subsequent reception in 19th- and 20th-century England and America.

ENGL 30309. Methods: Close Reading—Poetry

(3-0-3)

An introduction to the study of literature through learning how to read poetry, with close attention to details of sound and sense.

ENGL 30311. Methods: Woolf and Bloomsbury

(3-0-3)

A close investigation of the novels, essays, art, and political writings of some of the members of “The Bloomsbury Group,” including Virginia Woolf, E.M. Forster, Roger Fry, and Leonard Woolf.

ENGL 30315. Methods: Caribbean Voices

(3-0-3)

Through close analysis of several Caribbean voices, students will explore issues such as silence, voice, and language in cultural representation, the relation of these issues to cultural identity, and the shaping of such identity, to come to an understanding of the larger implications of Caribbean literature.

ENGL 30316. Methods: Reading for the Plot

(3-0-3)

Through readings and re-readings of a few long Victorian and modern novels, this course will examine how literary works can be read through a variety of critical lenses.

ENGL 30317. Methods: Natives and Novels

(3-0-3)

A close examination of the concepts of “natives” and “outsiders” in selected English Victorian novels.

ENGL 30850. Fiction Writing for Majors

(3-0-3) Benedict, Sherwood

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An intensive fiction workshop exclusively for English majors.

ENGL 30852. Poetry Writing for Majors

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

A intensive poetry workshop exclusively for English majors.

ENGL 40011. Advanced Fiction Writing

(3-0-3)

Prerequisite: (ENGL 20011 OR ENGL 301) OR (ENGL 20012 OR ENGL 301G) OR (ENGL 20013 OR ENGL 301R) OR (ENGL 20014 OR ENGL 301A) OR (ENGL 20015 OR ENGL 301Q) OR (ENGL 20016 OR ENGL 301V) OR (ENGL 20017 OR ENGL 301D) OR (ENGL 20018 OR ENGL 301C) OR (ENGL 20019 OR ENGL 301K) OR (ENGL 20020) OR (ENGL 30011 OR ENGL 401B)

An advanced fiction writing workshop.

ENGL 40012. Advanced Fiction Writing

(3-0-3)

Prerequisite: (ENGL 20011 OR ENGL 301) OR (ENGL 20018 OR ENGL 301C) OR (ENGL 20017 OR ENGL 301D) OR (ENGL 20015 OR ENGL 301Q) OR (ENGL 20013 OR ENGL 301R) OR (ENGL 20016 OR ENGL 301V)

A seminar in the students' own writing of prose fiction; for students with previous experience or course work in writing.

ENGL 40013. Advanced Fiction Writing

(3-0-3)

A seminar in the students' own writing of prose fiction; for students with previous experience or course work in writing.

ENGL 40014. Advanced Fiction Writing

(3-0-3)

A seminar in the students' own writing of prose fiction; for students with previous experience or course work in writing.

ENGL 40015. Advanced Fiction Writing

(3-0-3) Tomasula

Prerequisite: (ENGL 10101 OR ENGL 201) OR (ENGL 20011 OR ENGL 301) OR ENGL 20013 OR ENGL 20014 OR ENGL 20015 OR ENGL 20016 OR ENGL 20017 OR ENGL 20018 OR ENGL 20019 OR ENGL 30011 OR ENGL 20012

A seminar in the students' own writing of prose fiction; for students with previous experience or course work in writing.

ENGL 40030. Advanced Poetry Writing

(3-0-3)

Prerequisite: (ENGL 20031 OR ENGL 302G) OR (ENGL 20032 OR ENGL 302H) OR (ENGL 20033 OR ENGL 302C) OR (ENGL 20034 OR ENGL 302I) OR (ENGL 20035 OR ENGL 302F) OR (ENGL 20036 OR ENGL 302J) OR (ENGL 20037 OR ENGL 302K) OR (ENGL 20038 OR ENGL 302N) OR (ENGL 20039) OR (ENGL 30012 OR ENGL 402B)

An advanced poetry writing workshop.

ENGL 40031. Advanced Poetry Writing

(3-0-3)

Prerequisite: (ENGL 10102 OR ENGL 202 OR ENGL 202F) OR (ENGL 30012 OR ENGL 402B OR ENGL 402I)

An advanced poetry writing workshop.

ENGL 40032. Advanced Poetry Writing

(3-0-3)

An advanced poetry writing workshop.

ENGL 40033. Creative Versions: Art of Translation

(3-0-3)

This course provides the tools necessary for meaningful translation of Spanish texts to English.

ENGL 40071. Writing Non-Fiction

(3-0-3)

The techniques of nonfiction writing—from the basic journalistic news story to the magazine feature to the personal essay.

ENGL 40093. Writing the Family

(3-0-3)

A nonfiction writing workshop in which students will learn how to access family stories through oral history and genealogical research, and to use the raw materials of these stories as the basis or starting point of publishable fiction or poetry.

ENGL 40101. Greek and Roman Mythology

(3-0-3)

The major mythical tales and figures from the classical world that have influenced world literature. Study of the Olympic and vegetation cults. Homer and Hesiod, national and local myth, Syncretism, Mysteries.

ENGL 40103. Images of War and Peace in Literature

(3-0-3)

Using English-language novels and poetry of the 20th century, an examination of the metaphors and themes that unmask the realities of war, and how the texts themselves become battlegrounds on which the human imagination both creates an individual's sense of self and constructs and deconstructs cultural ideologies.

ENGL 40104. Dramatic Literature since 1900

(3-0-3)

An advanced survey of theatrical literature and criticism since the beginning of the 20th century. Students will read one to two plays per week along with selected secondary critical literature.

ENGL 40105. Irony

(3-0-3)

A survey of the irony in a variety of Western literatures.

ENGL 40106. Classical Greek Tragedy

(3-0-3)

This advanced course in literature provides detailed study of the theory and practice of classical Greek tragedy. The structures and sensibilities that inform tragedy are assessed, with special attention to plays written by the three great tragedians, Aeschylus, Sophocles, and Euripides. The Greeks' own responses to tragedy, as represented by Aristophanes, Plato, and Aristotle, are also discussed. The form and function of Greek tragic plays, their place in classical culture, and their distinctive approach to issues of human life are key topics of the course.

ENGL 40107. Religion and Literature

(3-0-3)

A close analysis of the forms, ideas, and preoccupations of both the religious imagination in literature and of the historical relationships between religious faith and traditions in particular literary works.

ENGL 40108. Dramatic Literature before 1900

(3-0-3)

An advanced survey of theatrical literature and criticism from the earliest plays to the beginning of the 20th century. Students will read one to two plays per week along with selected secondary critical literature.

ENGL 40109. Literature Masterpieces from Africa

(3-0-3)

An introduction to the diversity of literatures from the African continent.

ENGL 40110. Studies in Comedy

(3-0-3)

A multimedia examination of recurring patterns and themes in comedy.

ENGL 40111. Faith in a Changed World

(3-0-3)

A close, formal analysis of the English translation of the Bible (King James Version), focusing the distinctive poetic and literary qualities of theme, image, myth, and narrative form.

ENGL 40112. Understanding Story

(3-0-3)

Corequisite: ENGL 41001

An investigation of the shape(s), purposes, and multiple meanings of narratives both in the lives of individuals and within institutions and cultures by sampling the work of journalists in reporting news as story, medical professionals in collecting case histories, ethnographers in describing unfamiliar cultural practices or investigating inter-group or inter-state conflict situations, historians in interpreting the past, political leaders in establishing public policy and political power, and advertising and marketing interests.

ENGL 40113. Literature of Southern Africa

(3-0-3)

A study of the literary culture of Southern Africa in the last 25 years of the 20th century, specifically the ways in which individual writers confronted the apartheid regime and their responses to the new South Africa in the post-apartheid period.

ENGL 40114. Latin Literature in Translation

(3-0-3)

This is a survey, in lecture/discussion format, of selected works of classical Latin literature. In addition to close reading of the texts, we routinely give attention to the socio-cultural worlds that produced Latin literature and to the character of Latin literature's abiding influence in Christian antiquity, the Middle Ages, the Renaissance and early modern periods, and modern cultures. Weekly quizzes, biweekly essays, and a final.

ENGL 40115. Bible and Literary Theory

(3-0-3)

An intense focus on the distinctive poetic and literary qualities of the English translation of the Bible (King James Version) through close formal analysis and through discussions of theme, image, myth, and narrative form.

ENGL 40116. Greek and Roman Epic Poetry

(3-0-3) Schlegel

A study of the epic literature of classical antiquity in English translation, this course will give students a solid grasp of the texts of the classical epics and the cultural contexts in which they were set.

ENGL 40117. Christian Autobiography

(5-0-3) Hart

This course examines three major yet very different attempts at Christian autobiography: St Augustine's *Confessions*, St Teresa of Avila's *Life*, and John Henry Newman's *Apologia pro vita sua*. Throughout, we will attend to three demands: a close reading of the texts themselves, including their narrative and rhetorical structures; an sense of how the self is imagined by the three writers; and an awareness of the authors' religious contexts.**ENGL 40118. Philosophy and Literature Seminar**

(4-0-4) O'Connor

This intensive four-credit seminar is the introduction to the concentration in philosophy and literature and will pursue interdisciplinary approaches to literary, theoretical, and philosophical texts.

ENGL 40119. Monsters to Cyborgs

(3-0-3) Tomasula

A critical analysis of monsters, cyborgs, and other "created bodies" in literature.

ENGL 40120. Greek Literature and Culture

(3-0-3)

This course surveys the leading works of ancient Greek literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from a thousand years of extraordinary literary creativity. Among the authors introduced are Homer, Sappho, Aeschylus, Herodotus, Aristophanes, Plato, Theocritus, Plutarch, Lucian, and Longus. Special attention is paid to the formal structures of Greek literary works, the cultural issues they raise, and the lasting value of Greek literature to the modern age. The course prepares students for more advanced work in classical literature and culture. Offered annually.

ENGL 40121. The Art and Literature of Metamorphosis

(3-0-3)

This course begins with a critical study of Ovid's great poem, *Metamorphoses*. The poem itself became a subject of metamorphosis in poetry and art in the hands of such figures as Statius, Dante, Botticelli, Bernini, Rembrandt, Hughes, and Heaney. The course addresses the modeling of transformation within the literary text by examining first Ovid and his sources, and second, adaptations of his poem by writers such as Shakespeare and Kafka. Connections with folklore, magic, and religion are explored. The graphic arts receive equal consideration as the course explores how Ovid's ideas of the transformation of the body, the capacity of the human body for allegory, and the fragility of identity have influenced later artists and authors.

ENGL 40122. Love, Death, and Exile in Arabic Literature and Cinema

(3-0-3)

This course explores literary and artistic presentation of the themes of "love, death, and exile" in Arabic literature and popular culture from pre-Islamic era to the present day. Through close readings of Arabic poetry, essays, short stories, and novels (in English translation), and analyzing a number of Arabic movies (with English subtitles), we discuss the following issues: themes and genres of classical Arabic love poetry; gender, eroticism, and sexuality in Arabic literary discourse; alienation, fatalism, and the motif of *al-hanin ila al-watan* (nostalgia for one's homeland) in modern Arabic poetry and fiction.

ENGL 40123. Canon and Literature of Islam

(3-0-3)

This course is an introduction to the fundamental religious texts and literature of Islam. The list includes the Qur'an (the central, sacred scripture of Islam), the Hadith (record of the speech and actions of the Prophet Muhammad), biography of the Prophet, exegetical literature, historical texts, and mystical and devotional literature. Students will read primary texts in English translation with a focused discussion and analysis of form, content, historical background, religious significance, and literary allusions of the various texts. Themes such as "the unity and majesty of God," "prophecy and revelation," "good and evil," "this world and the hereafter" will be dealt with in the lectures and conversation in class. The course places heavy emphasis on class discussion and student preparedness.

ENGL 40124. Japanese Literature in the 1990s

(3-0-3)

Japanese Literature in the 1990s looks at the Japanese literary boom of the '90s as a literary project of re-remembering the past and intervening in the present. In the last decade-and-a-half, Japan has undergone a transformation from the "economic miracle" of the '60s and '70s to economic recession, and with the recession, many of the values that helped to sustain high economic growth have come to be questioned: strict gender differentiation, dedication to the company for men and to the home for women, frugality, sacrifice of the personal for the social, emphasis on high growth policies at the risk of the environment, a resurgence in narratives of national homogeneity, etc. In this course, we will look at work by Japanese writers from the beginning of the recession until today, thinking about the way writers are problematizing previous homogenous notions of gender, ethnicity, and race; raising questions about the costs of high economic growth on society's subalterns; rethinking the emblem of that growth, the salaryman, who has lately become a favorite butt of dissatisfaction; rethinking the as-of-yet unresolved significance of an ambitious and often cruel imperialist war on the Asian mainland; and finally, we will think about the significance of globalization and nationalism in Japanese literature.

ENGL 40125. Heroism and Eroticism in Traditional Chinese Fiction

(3-0-3) Ge

In this course we will read works in Chinese fiction from the late imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian, Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which coincided with a general trend of "domestication" in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation, and no prior knowledge of China or the Chinese language is required.

ENGL 40126. Writing From Prison

(3-0-3) Frese

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An historical exploration of fiction, poetry, and nonfiction written by persons rightly and wrongly incarcerated.

ENGL 40128. Twentieth-Century International Poetry

(3-0-3) Zhao

Close readings of masterpieces of 20th-century international poetry, including, among others, the works of Federico Garcia Lorca, Georg Trakl, Paul Celan, Rainer Maria Rilke, Boris Pasternak, Osip Mandelstam, Gennady Agyi, Gunnar Ekelof, Thomas Transtromer, Paul Eluard, and Dylan Thomas.

ENGL 40129. *The Brothers Karamazov*

(5-0-3)

No prerequisite. This course is a multifaceted investigation into the philosophical, political, psychological, religious, and literary determinants of Fyodor Dostoevsky's longest and most complex novel, *The Brothers Karamazov*. Emphasis is placed on daily, in-depth discussions based on a close reading of the text. Additional assignments illuminate a variety of themes in the novel, from the author's visionary political predictions and rejection of West European materialism to his critique of rationalism and insistence on the link between faith and morality.

ENGL 40139. The Individual in Nineteenth-Century Literature

(3-0-3)

This course analyzes a seminal transition in Western society as it moves from an agrarian world centered around the rural estate to an urban culture built on industry and commerce. Literary texts emphasize the physical, psychological, and moral consequences to the individual of the decline of the estate, the rise of capitalism, the nontraditional nature of life and work in the city, various challenges to the established order (socialism, anarchism), and changing notions of gender. Texts include Daniel Defoe, *Robinson Crusoe*; Nikolai Gogol, "The Overcoat"; Eugene Sue, *The Mysteries of Paris* (excerpts); Leo Tolstoy, *Childhood*; Charles Dickens, *Hard Times*; Horatio Alger, *Ragged Dick*; Emile Zola, *Germinal*; and Henrik Ibsen, *A Doll's House*. Nonliterary texts used to support the literary depiction of the era include John Locke, "Of Property," Adam Smith, *The Wealth of Nations* (excerpts); Karl Marx and Friedrich Engels, *The Communist Manifesto*; and Henry Mayhew, *London Labour and the London Poor* (excerpts).

ENGL 40140. Russia Confronts the East

(3-0-3) Hope

An exploration of the prominent place the Caucasus and the Islamic East hold in the Russian literary imagination, ranging from medieval epic to modern film, from prose to poetry, and from literature's "greatest hits" to the justly and unjustly

forgotten, and works by Pushkin, Lermontov, and Tolstoy, among others (in English).

ENGL 40170. History and Theory of Literary Criticism

(3-0-3) Ellmann

The evolution of modern literary criticism.

ENGL 40180. Performance Art: History, Theory, Practice

(3-0-3) Chalmers

Performance art is anti-art. Performance art is art that contradicts tradition, that aims to shock. This class will equip the student with an overview of its offenses. Class content may include Dada's early 20th-century assaults on the audience; absurdist experimental performance works by Yoko Ono, Lygia Clark, John Cage, and Nam June Paik from the 1960s; performance art addressing racism by Adrian Piper and William Pope L. from the 1980s; and current performance works by Internet artists and others. Discussions will focus on the aesthetics and politics of marginality. In other words: Why shock? Why experiment? Is there any market for such work today? We will also look at critical and theoretical texts about performance, modernism, and the avant-garde and consider their relation to the works themselves. These may include manifestos by performers and artists; debates about the autonomy of art; poststructuralist writings on art and aesthetics; and theories of performativity. Finally, students will be expected to create one or more performance art pieces themselves. Students should expect to be asked to participate in other students' pieces as well as in their own.

ENGL 40190. Literacy, Schooling, Society

(3-0-3)

An examination of several histories of education, with particular emphasis on English studies, and how these histories have helped to shape culture.

ENGL 40191. Perspectives on Literacy

(3-0-3)

What it means to be "literate" and the conditions that enable literacy to flourish.

ENGL 40192. Introduction to Linguistics

(3-0-3)

An examination of both the technical aspects of linguistics (phonetic transcription, morphology, syntax, etc.) as they relate to the development of the English language and the applications of linguistics to the study of literature.

ENGL 40193. Classical Rhetoric in Our Time

(3-0-3)

A survey of the history of rhetoric.

ENGL 40194. Writing Center Theory/Practice

(1-0-1) Duffy

A one-credit course for students interested in tutoring in the University Writing Program.

ENGL 40195. The Literature of Disability

(3-0-3) Duffy

A review of literature about "disability," how the "disabled" experience literature, and how to teach literature to the "disabled."

ENGL 40196. The Teaching of Writing

(3-0-3) Kinney

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

A theory- and practice-based course in the teaching of writing to junior and high school students.

ENGL 40201. Chaucer and the City

(3-0-3)

An exploration of the idea of "the city" in Chaucer's work by looking at the cities he does represent (Troy, London) in his work, by examining his relationship to urban forms of cultural expression (mystery cycles, mumblings, processions), and by investigating city life in 14th-century London.

ENGL 40202. Arthurian Legends

(3-0-3) Frese

An examination of the textual traditions surrounding the once-and-future-king, Arthur, through readings of Geoffrey of Monmouth's *History of the Kings of Britain*, Chretien de Troyes' *The Story of the Grail*, *The Quest of the Holy Grail*, selected short fictions from the Welsh Mabinogion, Marie de France's *Lais*, *Sir Gawain and the Green Knight*, and selections from Malory's *Morte d'Arthur*, Tennyson's *Idylls of the King*, and T. H. White's *The Once and Future King*.

ENGL 40205. Shakespeare and the Supernatural

(3-0-3)

An examination of the supernatural in Shakespeare.

ENGL 40206. Advanced Topics in Theatre Studies

(3-0-3) Holland

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Corequisite: FTT 41600

This course explores the phenomenon of Shakespeare and film, concentrating on the ranges of meaning provoked by the conjunction. We shall be looking at examples of films of Shakespeare plays both early and recent, both in English and in other languages, and both ones that stick close to conventionalized and historicized conceptualizations of Shakespeare and adaptations at varying degrees of distance towards the erasure of Shakespeare from the text. The transposition of different forms of Shakespearean textualities (printed, theatrical, filmic) and the confrontation with the specificities of film produce a cultural phenomenon whose cultural meanings—meaning as Shakespeare and meaning as film—will be the subject of our investigations. There will be regular (though not necessarily weekly) screenings of the films to be studied.

ENGL 40208. British Drama 1660–1775

(3-0-3)

Close readings of British dramatic literature created between the Restoration of Charles II in 1660 to the production of Sheridan's *The Rivals* in 1775.

ENGL 40209. *The Canterbury Tales*

(3-0-3) Kerby-Fulton

The Canterbury Tales read in the original Middle English, with the twin goals of obtaining a deepened knowledge of the text-world contained within it, along with how applications of contemporary critical practices can be used to produce new insights into the work.

ENGL 40211. History of the English Language

(3-0-3)

This course is designed to introduce students to the historical development of the English language, from its earliest recorded appearance to its current state as a world language.

ENGL 40212. Introduction to Old English

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Training in reading the Old English language and study of the literature written in Old English.

ENGL 40213. Readings in Medieval Literature

(3-0-3)

Close readings of selected medieval literary texts written by men and women written between 500 and 1500 ACE.

ENGL 40214. Falling in Love in the Middle Ages

(3-0-3)

This course attempts to explore the variety of medieval representations of love, and to show how they are intimately bound up with questions of free will and destiny, gender relations, the secularization of learning, time, and eternity.

ENGL 40215. Milton

(3-0-3)

This course includes close readings of Milton's work, from all stages of his career, and discussions of his highly self-conscious attempt to make himself into England's greatest poet.

ENGL 40216. Mother Love

(3-0-3)

A close reading of medium-length story-making poems (shorter than epics, longer than lyrics) with an eye to their handling of matters related to maternity, covering texts from the Homeric *Hymn to Demeter* and Claudian's *The Rape of Proserpina* to excerpts from Virgil's *Georgics* to poetic works of the Renaissance.

ENGL 40217. Tudor-Stuart Drama

(3-0-3)

A survey of Tudor-Stuart drama.

ENGL 40218. Renaissance and Romantic Lyric

(3-0-3)

A study of the development of lyric poetry from the late 16th century up through the mid-19th century.

ENGL 40219. Chaucer: Canterbury Tales

(3-0-3)

Chaucer's masterwork, studied in its original Middle English.

ENGL 40220. Love and Gender in the Renaissance

(3-0-3)

Examining works by Sydney, Spenser, Shakespeare, Marvell, Donne, and others, this course discusses how cultural understandings of gender influence the depiction of love.

ENGL 40221. *Beowulf*: Text and Culture

(3-0-3)

Using a glossed text of *Beowulf* in Old English, an examination of a wide range of critical and cultural issues: What relationship do we expect between "heroic" texts and the society that produced and enjoyed them? What cultural investments of our own lead us to read certain Old English texts and not others? How did *Beowulf* receive canonical status? What is a translation? And what strategies of reading can we bring to a thousand-year-old poem?

ENGL 40222. Medieval Drama

(3-0-3)

A study of the literary, theatrical, and religious imaginations of medieval dramatic texts through readings, critical writing, discussion, and enactments of these texts.

ENGL 40223. Dante II

(3-0-3) Moevs

An in-depth study, over two semesters, of the entire *Comedy*, in its historical, philosophical and literary context, with selected readings from the minor works (e.g., *Vita Nuova*, *Convivio*, *De Vulgari Eloquentia*). Lectures and discussion in English; the text will be read in the original with facing-page translation.

ENGL 40224. Dante

(3-0-3) Werge

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

A study of *The Divine Comedy*, with special attention to the history of ideas, the nature of mimesis and allegory, and Dante's sacramental vision of life.

ENGL 40225. Shakespeare in Performance

(3-0-3)

An introduction to Japanese classical theater—Noh, Kyogen, Bunraku, and Kabuki—through readings and videotapes of selected plays.

ENGL 40226. Shakespeare I

(3-0-3) Lander

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

First half of a year-long survey of the works of Shakespeare, beginning with *Two Gentlemen of Verona* and concluding with *Henry V*.

ENGL 40227. Shakespeare II

(3-0-3)

The companion course to Shakespeare I: the second half of a chronological study of the works of William Shakespeare.

ENGL 40228. Restoration, Early Eighteenth-Century Literature

(3-0-3)

Questions of the developing interest in the concept of "human nature" in late 17th- and early 18th-century literature: What does it mean to be human? Are humans "animals"? Are humans "naturally" selfish or benevolent? Are gender differences natural or cultural? What sort of obligations do humans have to the rest of the creation? What is the relation of the sort of innocence that the pope imagined as "the eternal sunshine of the spotless mind" to mature development?

ENGL 40229. Shakespeare's Religions

(3-0-3)

A critical analysis of religious influences and iconography in selected Shakespeare plays.

ENGL 40230. Shakespeare's London

(3-0-3) Lander

An analysis of how Shakespeare's migrations between rural England and metropolitan London affected his writings.

ENGL 40231. Renaissance Woman

(3-0-3) Della Neva

This course is designed as an introduction to the study of women and literature of the Renaissance period in Europe. It will treat the subject of the "Renaissance woman" in three ways. First, there will be a brief historical overview of the condition of women of different social classes during this period, focusing on topics such as their education, the role of marriage, and the convent as an alternative to married life. Secondly, it will survey how women were viewed in the literature written by men in various European countries. Here we shall read excerpts from Dante and the courtly love tradition, Petrarch and the Petrarchists, Shakespeare, and Rabelais, among others. We shall also consider the portrayal of women in artistic works of this time, comparing this to their literary representation. Next, we shall study the literature created by women during the Renaissance in Europe. During this part of the course, we shall consider some of the problems generated by women's writing, using Virginia Woolf's *A Room of One's Own* as a point of departure for our discussions. At the end of the course, we will resume our study of the image of woman in the Renaissance by reading a modern play set at that time (Peter Whelan's *The Herbal Bed* on the trial of Shakespeare's daughter) that treats some of the issues facing women at that time. All foreign texts will be read in English translation.

ENGL 40232. Shakespeare Media: Book and Screen

(5-0-3) Lander

This course will cover not only standard film versions of the plays but also adaptations and appropriations in order to examine the way in which Shakespeare circulates in popular and elite culture. Likely films include Olivier's *Hamlet* and *The Last Action Hero* (with Arnold Schwarzenegger); Zefirelli's *Romeo and Juliet*, Luhmann's *Romeo and Juliet* and *Shakespeare in Love*; Polanski's *Macbeth* and Billy Morrisette's *Scotland, PA*; Derek Jarman's *The Tempest* and Peter Greenaway's *Prospero's Books*. In each case, we will begin with a reading of the play before moving on to film versions and adaptations.

ENGL 40233. Tolkien, Lewis, and Medieval Literature

(3-0-3) Wilcox

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

How Tolkien and Lewis used allegory and symbolism in their writings.

ENGL 40239. Love, Desire, and Sexuality in the Renaissance

(3-0-3) Nichols

An exploration of different visions of love in 16th- and 17th-century poetry and narrative, focusing on the social, religious, and political demands that complicated love relationships.

ENGL 40242. Milton and Political Theology

(3-0-3)

Using Milton as a guide, close readings of Hobbes and Spinoza.

ENGL 40250. Medieval Visions

(3-0-3)

A survey of medieval literature, excluding Chaucer.

ENGL 40260. Swift and the Arts

(3-0-3)

An examination of the ways in which Jonathan Swift regarded the non-literary arts in 18th-century Ireland and England—gardening, music, architecture, and painting—and how his views on those art forms are reflected in his poetry and prose.

ENGL 40302. Romanticism and the Public Theatre

(3-0-3) Kucich

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Readings of drama written during the English Romantic period.

ENGL 40305. Global Romanticisms: Lakers, Cockneys, and Cosmopolitans

(3-0-3) Kucich

An exploration of the intersections between the local, the national, and the global in well known and lesser known works of British Romantic era literature including fiction, drama, poetry, journalism, travel writing, abolitionist writing, political prose, and women writers.

ENGL 40306. Irish and British Literature, 1790–1815

(3-0-3)

Burke, Paine, Godwin, Wordsworth, Edgeworth, and Scott in the context of the French Revolution and the Irish political situation at the end of the 18th century.

ENGL 40307. European Modernist Novel

(3-0-3)

An introduction to modernism as it formed in Europe.

ENGL 40308. Twice-Told Tales

(3-0-3)

How a fiction might exist as a critical reconstruction or a revision of another (previous) work.

ENGL 40309. Love and the Novel

(3-0-3)

Beginning with *The Symposium* and ending with selected modernist writings, how Eros has appeared and been expressed in the West.

ENGL 40310. Visits to Bedlam

(3-0-3) Fox

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Literary, medical, and social views of madness in the 18th century.

ENGL 40311. Victorian Literature: Science and Art

(3-0-3)

Novels by Braddon, Eliot, and James in the context of art, science, and their place in a changing social structure.

ENGL 40312. Victorian Novel

(3-0-3) Elliott

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An examination of major Victorian novels.

ENGL 40314. Hopkins and the Jesuits

(3-0-3)

A close reading of Hopkins's major poems, and a careful attention to their literary and religious contexts.

ENGL 40317. The Victorian National Romance

(3-0-3) Maurer

By examining texts from the different nations within the British Isles—Scotland, Ireland, and England—we will explore the complex question of how national boundaries are drawn, how a sense of membership in a nation is created, and what that might have to do with falling in love, getting married, and staying married.

ENGL 40318. Religious Poetry: Herbert and Hopkins

(3-0-3)

A close examination of the religious origins and underpinnings in, and of, the poetry of Herbert and Hopkins.

ENGL 40319. Virtue, Sex, and the Good Life

(3-0-3)

A thematic analysis of "virtue" in selected 18th-century novels: How should I behave? Am I completely independent or should I rely on the advice of others? Am I defined by my birth or do I make myself? If "virtue" is a guide, what exactly is "virtue"? Is virtue really possible in a highly mobile society that values change above stability?

ENGL 40320. Dandies, Decadents, and New Women

(3-0-3)

An introduction to the three major literary movements in Britain—the aesthetic movement, decadence, and the new woman novel—in the later half of the 19th century.

ENGL 40325. Decadent Modernity

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An examination of "decadence" as both a fin-de-siecle fashion-craze of debauched poets and as a more expansive critique of European modernity itself.

ENGL 40329. British Romanticism

(3-0-3)

A close examination of the literary movement known as Romanticism.

ENGL 40330. The Victorian City

(3-0-3)

How "the city" was depicted in 19th-century British Literature.

ENGL 40331. Victorian Radicals

(3-0-3)

"Fringe" characters in, and elements of British Victorian literature, with a particular emphasis on a modern world being increasingly defined in economic terms.

ENGL 40333. Romanticism and Revolution

(3-0-3)

The relationship between the Romantic movement and rebellions against governments around the world.

ENGL 40335. Nineteenth-Century British Victorian Literature

(3-0-3)

A survey of selected works of 19th-century Victorian literature.

ENGL 40339. The Very Long Victorian Novel

(3-0-3)

A close reading of selected 19th-century British novels.

ENGL 40362. Hermeneutics, Deconstruction, and Medieval Thought

(3-0-3)

The aims of this course are both methodological and historical. The methodological part will consist of an introduction to hermeneutics (in a broad sense) as theorized and/or practiced in certain areas of modern continental philosophy. After a brief look at the crucial innovations of Husserl, we shall study carefully chosen extracts (in English translation) of Heidegger: *Being and Time* and *What is Called Thinking*, Gadamer: *Truth and Method*, and Derrida: *Of Grammatology*, *Writing and Difference*, *Dissemination* in order to illuminate the different (even opposing) ways in which the idea of "hermeneutics" can develop. This general discussion will be combined with specific consideration of the themes of allegory and negativity. The historical part of the course will concentrate on late ancient, patristic, and early medieval readings (Origen: *On First Principles*, Augustine: *On Christian Teaching*, Literal Interpretation of Genesis, Proclus: *Commentary on Plato's Timaeus*). Here, we shall attempt to advance our comprehension of ancient literature by (1) looking for parallels with modern hermeneutic techniques, and (2) applying the modern techniques in test cases. The course is intended to be relatively open-ended; i.e., students will be expected to think about the way in which these discussions are internally coherent and also relate to their own areas of interest, which may be elsewhere in philosophy, theology, or literature, (Latin or vernacular). Requirement: one final essay of approximately 20 pages.

ENGL 40401. Literature Between the Wars

(3-0-3) Wilson

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

A close analysis of the fiction, poetry, drama, and nonfiction written during the 1930s.

ENGL 40403. Studies in Modern Poetry

(3-0-3)

This course focuses on four highly important and innovative, though still often underrated, poets: Velimir Khlebnikov, Gertrude Stein, Mina Loy, and Miron Biaoszewski.

ENGL 40404. Early British Modernism

(3-0-3)

An analysis of the early stages of British modernism as the novel shifted (in some cases) away from the predominant forms of Victorian Realism and toward the more experimental structures of the early 20th century.

ENGL 40405. Postmodern British Poetry

(3-0-3)

Study of competing galaxies of late-20th-century British poets, for whom more than art was at stake: agendas of race, gender, region, class, and other cultural materials.

ENGL 40406. Methods: T.S. Eliot

(3-0-3)

A close reading of Eliot's religious poetry, principally his "Four Quartets."

ENGL 40407. Seminar: The Modern Revolution

(3-0-3)

A focus on the first quarter of 20th-century British literature in order to tease out the relationships between revolutions in art and seismic social change.

ENGL 40408. Five Modern Poets

(3-0-3)

Close readings of three British—David Jones, W.H. Auden, and Geoffrey Hill—and two Irish poets—W.B. Yeats and Seamus Heaney.

ENGL 40409. Readings in the Novel

(3-0-3) Buttigieg

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Close readings of selected European modernist novels.

ENGL 40410. Existentialism: Philosophy and Literature

(3-0-3)

We will read representative literary and philosophical texts by Sartre (excerpts from *Being and Nothingness*, *Nausea*, a few plays), Beauvoir (*The Philosophy of Ambiguity*, excerpts from *The Second Sex*, *A Very Easy Death*, a novel and/or excerpts from *A Memoir*), and Camus (*Myth of Sisyphus*, excerpts from *The Rebel*, *The Stranger*, *The Plague*, and/or *The Fall*).

ENGL 40411. Twentieth-Century British Women Writers

(3-0-3) Green

Modern and postmodern fiction (and some nonfiction prose) by British women. Authors may include Woolf, Butts, Rhys, Cunard, Richardson, Carrington, West, Mansfield, Carter, and Winterson.

ENGL 40412. Twentieth-Century British Novels

(3-0-3)

In looking at several British novels, each published at different moment of the 20th century, students will explore how art, in this case literature, engaged, or did not engage, the social world.

ENGL 40415. The Avant-Garde: From Dada to Punk and Beyond

(3-0-3)

Considering various genres and mediums (poetry, art, cinema, music, drama, and performance) from a range of geographic locations, an investigation of the avant-garde movement of the late 19th and early 20th centuries.

ENGL 40419. Gender, Sexuality, and Literacy Experiment in Post-War British and Irish Poetry

(3-0-3) Huk

An analysis of British and Irish poetry written after War II.

ENGL 40422. Modernism and Magazines

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Attention to the circulation of ideas about literary modernism and modernity in a range of publications: little magazines, "slicks", feminist periodicals, women's magazines, and alternative/oppositional journals.

ENGL 40501. Contemporary Irish Drama

(3-0-3)

A close analysis of the dramatic literature produced by Irish playwrights during the latter half of the 20th century.

ENGL 40502. Poetry and Politics in Early Modern Ireland 1541–1688

(3-0-3)

The political poetry of the period 1541–1688 will be discussed and analyzed against the historical background. The primary focus will be the mentality of the native intelligentsia as it is reflected in the poetry and as it responded to the momentous changes of the period. The origins and rise of the cult of the Stuarts will be examined and the historiography of the period will be assessed.

ENGL 40503. Anglo-Irish Identities 1600–1800

(3-0-3)

An exploration of the complex and contested cultural, political, and ideological identities of the Anglo-Irish.

ENGL 40504. Gothic Images in Modern Literature

(3-0-3)

An exploration of the ways in which such themes as doubling, haunting, terror, and sexual anxiety, themes that inhere in the Gothic novel, operate in modernist fiction.

ENGL 40505. Studies in Six Irish Writers

(3-0-3)

W.B. Yeats, Elizabeth Brown, Bram Stoker, J.M. Synge, Seamus Heaney, and Medbh McGuckian.

ENGL 40506. Modern Irish Drama

(3-0-3)

A study both the drama produced by the playwrights of the Irish literary renaissance—W.B. Yeats, J.M. Synge, Lady Gregory, and Sean O'Casey—and the political struggle for Irish independence that was taking place at the same time.

ENGL 40509. Modern Irish Drama

(3-0-3) Harris

In this course, we will study both the drama produced by the playwrights of the Irish literary renaissance—Yeats, Synge, Lady Gregory, and O'Casey—and the political struggle for Irish independence that was taking place at the same time.

ENGL 40510. New Writing from Britain and Ireland: Contemporary Fiction

(5-0-3) Smyth

This course will introduce students to the contemporary fiction of Ireland, England, Scotland and Wales, as well as some of the best recent Black British fiction. Some of the authors whose work we will read are: Pat McCabe, Neil Jordan, John Banville, Zadie Smith, Monica Ali, Andrea Levi, Irvine Welsh, James Kelman, and Pat Barker. These writers will be read in the context of "the Break-up of Britain" and a concomitant sense of the changes in British and Irish identity in the past 20 years or so.

ENGL 40511. Film, Literature, and Irish Culture

(3-0-3) Gibbons

Corequisite: ENGL 41005

An examination of the dominant images of Ireland in film and literature, and a review of development in a wider cultural and historical context.

ENGL 40512. Versions of the Gothic

(3-0-3)

A survey of Gothic fiction in England and Ireland from the mid-18th century to the Victorian Age.

ENGL 40513. Culture and Politics in Northern Ireland

(3-0-3)

Using a broad range of texts—drama, fiction, poetry, film, painting, and documentary material—an examination of the politics of culture, and the cultures of politics, in the North of Ireland during the 20th century.

ENGL 40515. Contemporary British and Irish Fiction

(3-0-3) Smyth

A survey of major contemporary novelists and short story writers from Britain and Ireland, including black Irish, Scottish, and northern and southern Irish writers as well as English writers who fit into none of these categories.

ENGL 40516. The Irish in Their Own Words

(3-0-3) McQuillan

The purpose of this course is to introduce students to the richness and variety of literature produced in the Irish language during the medieval and early modern periods (we will cover primarily the period between approximately AD 800 and 1700). The emphasis in the first half of the semester will be on studying the mainly prose saga literature of the medieval period in its various literary, cultural, and historical contexts. This will involve both a close reading of the texts themselves in English translation and an examination of the material in the light of recent scholarship in this area. The second half will investigate the literature of the early modern period, in this case largely the poetry. This period is one of cumulative crisis for the Irish and their linguistic and cultural well-being. Students read closely a selection of texts representative of various facets of this crisis and of Irish responses to them in their own language rather than in the English language of their colonizers. All the translations are accompanied by facing original text so that students gain some working knowledge of the Irish language, which will assist them in evaluating the translations they are reading and in appreciating the sensuous beauty of much of this poetry. The material provides interesting contrasts and comparisons for those who have already studied some Anglo-Irish literature and it should also be of interest to students of modern Irish history.

ENGL 40520. Reading *Ulysses*

(3-0-3) Johnson-Roullier

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

A close analysis of James Joyce's *Ulysses*.

ENGL 40525. Gender, Genre, and the Short Story

(3-0-3) Molitor

This course discusses how representations of gender were explored in a survey of 19th- and 20th-century short stories from England, Ireland, France, Russia, and the southern United States.

ENGL 40601. Voices of American Renaissance

(3-0-3)

A focus on the trope of “voice” as it shaped the literatures of the American renaissance period through an exploration of works by Emerson, Thoreau, Poe, Dickinson, Whitman, Douglass, Melville, Stowe, Hawthorne, and a number of lesser known authors and oral performers.

ENGL 40602. Tragedy: Shakespeare and Melville

(3-0-3)

Using concepts of tragedy as a linking principle, this course reads several Shakespearean plays and then *Moby-Dick*, noting Shakespeare's influence on the American novelist.

ENGL 40603. Realism and Naturalism in American Literature

(3-0-3)

An examination of American literature between the Civil War and World War I in relation to the literary movements known as realism and naturalism.

ENGL 40604. Nature in American Literature

(3-0-3)

This course examines the central and changing role of nature in American literature, from the typological eschatology of the Puritans to the pop-culture apocalypticism of Don DeLillo's *White Noise*.

ENGL 40605. *The American Scene*

(3-0-3)

“To make much so much money that you won't, that you don't mind, don't mind anything—that is absolutely, I think, the main American formula.” Henry James, *The American Scene*, 1907. “Greed, for lack of a better word, is good, is right, it works...and it will save that malfunctioning corporation called the USA,” Gordon Gecko, *Wall Street*, 1987. After a 20-year absence, Henry James returned to America to examine the country of his birth. His tour brought him to the above quoted and dismaying conclusion. This course tries to contextualize and understand James's remark by placing it within a broader atmosphere of late 19th- and early 20th-century American culture. We'll look at works that predate, are contemporary with, and follow James's American tour. We'll look at works of literature and biography, of politics and philosophy, and of theology and economics. Throughout, we will keep circling around and back to James's notion of “The Main American Formula” and asking not only what exactly he meant, but how other major thinkers of the age understood or conceived of an “American Formula,” and how that “formula” could be measured at the level of the individual, the corporation, the country, and, with Conrad's *Nostromo*, the world. Readings will include works of the following authors: Joseph Conrad, Theodore Dreissner, Henry Ford, Henry James, Theodore Roosevelt, Thorstein Veblen, and Edith Wharton. In addition, we will view several movies whose focus is directly related to the course's central questions.

ENGL 40606. Mark Twain

(3-0-3)

A study of Twain's life and writings in light of the history of ideas and the literary, political, philosophical, and religious currents of 19th-century America.

ENGL 40607. Early American Literature

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Close readings of selected 17th- and 18th-century American literature.

ENGL 40612. Literature and Democracy in the Nineteenth-Century United States

(3-0-3)

A survey of 19th-century American literature, emphasizing the efforts of American writers to identify and define “democracy” and the “democratic citizen.”

ENGL 40701. The American Novel

(3-0-3) Werge

A consideration of the forms and preoccupations of selected 19th- and 20th-century American novels, with special attention to their major ideas and moral concerns.

ENGL 40702. American Film

(3-0-3)

Presentations and discussions of the several genres of film produced in America since the early 1900s.

ENGL 40703. Poetry and Pragmatism

(3-0-3)

An exploration of the complex relationships between poetry, philosophy, and science at the end of the 19th century and the beginning of the 20th century through American poets as evinced in the works of Emily Dickinson, Robert Frost, and Wallace Stevens.

ENGL 40704. Methods: Contemporary American Poetry

(3-0-3)

An exploration of the aesthetic, literary, and social significance of poetry, focusing on such issues as language itself, representation, history, power, and gender.

ENGL 40705. Kerouac and the Beats

(3-0-3)

This seminar will re-examine Kerouac and his prose in relation to Beat subculture and the larger context of post-World War II American society. Although the work of other Beat writers, such as William S. Burroughs, Allen Ginsberg, and Gary Snyder will be considered, the primary focus will be on Kerouac. Moreover, the seminar will question the cultural codification of Kerouac as “King of the Beats” and advance the notion that he was a prose artist on a spiritual quest. Or, as Ginsberg aptly put it—an “American lonely Prose Trumpeter of drunken Buddha Sacred Heart.”

ENGL 40706. Lost Generation

(3-0-3)

This course studies the writings of authors, mostly Americans, who achieved prominence in the 1920s: Hemingway, Fitzgerald, H.D., Stein, Cummings, Hughes, and others.

ENGL 40707. Experimental Writing by Contemporary Women Poets

(3-0-3) Bruns

Close readings of selected contemporary “experimental” women poets.

ENGL 40708. Poetry and Performance

(3-0-3)

An investigation of the meeting-ground of poetry, conceptual art, new music, and performance art.

ENGL 40709. The American Novel between the Two World Wars

(3-0-3)

This course pays particular attention to the different social contexts from which narratives emerged in order to see how novels participated in the contemporary cultural and political debates. Each of these works probes some defining notion of American identity, asking who or what constitutes “America.” We will also attend to that question by discussing each narrative’s formal characteristics and how they meet the author’s aims.

ENGL 40710. Some Strains in Twentieth-Century American Fiction

(3-0-3)

This course studies the interconnections among six of our best fiction writers of the last century, tracing the dynamic aesthetic and moral development of American fiction from Fitzgerald through Hemingway, Faulkner, Hurston, and Walker to Morrison.

ENGL 40711. Women’s Autobiography

(3-0-3)

A close analysis of women’s life narratives and poetry, based on the following questions: How do women’s narratives affirm or challenge cultural norms? How do concepts such as “high” and “low” art impact the reading of women’s autobiographical literature? And can lines be drawn between fiction and nonfiction when studying autobiography?

ENGL 40712. American Fiction

(3-0-3)

A close examination of major mid-20th-century American novelists.

ENGL 40713. And Now: Literature as Contemporary Art

(3-0-3)

A close reading and analysis of all writers who made presentations during the spring 2004 “And Now: Literature as Contemporary Art” conference at Notre Dame.

ENGL 40714. City in American Literature

(3-0-3)

An exploration of the connections between literary representations of the city and social identity in a variety of American literary texts from the 1890s to the present.

ENGL 40715. American Religious Imagination

(3-0-3)

Beginning with Ralph Waldo Emerson and ending with Harold Bloom, how Christianity has been refigured in America.

ENGL 40716. Crossing Color Lines

(3-0-3)

An exploration of the conflicted and contradictory ways in which racial and ethnic identities have been constructed and mediated in American culture.

ENGL 40717. American War Literature

(3-0-3)

Beginning with Mary Rowlandson’s captivity narrative and ending with Tim O’Brien’s *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

ENGL 40718. Historical Novels of the Black Diaspora

(5-0-3) Ursin

This course provides an introduction to contemporary literature of the black diaspora through the genre of the historical novel. We will evaluate strategies of narration, the significance of differing representations of single events, and the relationship between literature and history. Literary analysis will be supplemented by an examination of the historical and political issues central to the novels.

ENGL 40720. Manhattan 1950–65

(3-0-3)

An examination of the vibrant Manhattan art community in the 1950s and 1960s, with a particular emphasis on the intersections of poets and painters.

ENGL 40721. Some Strains in Twentieth-Century American Fiction

(3-0-3) Brogan

Beginning with F. Scott Fitzgerald’s “Jazz Age” and ending with Toni Morrison’s “Jazz,” a study of thematic commonalities and dissonances in selected 20th-century American novels.

ENGL 40725. Class, Labor, and Narrative

(3-0-3)

This course explores the works of selected American writers addressing class and labor.

ENGL 40726. American Literature and Visual Culture

(3-0-3) Shortall

From early national fiction and portraiture to American modernist poetry and painting, an exploration of the relationships between American literature and the visual arts.

ENGL 40728. “Our America”: Exploring the Hyphen in African-American Literature

(3-0-3) Irving

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Close readings of various 20th-century African-American literatures, with foci on how “black subjectivity” is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

ENGL 40730. Great American Novels

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

Close readings of selected classic American novels.

ENGL 40731. American Novel

(3-0-3) Werge

A survey of selected 19th- and 20th-century American novels.

ENGL 40735. Witnessing the Sixties in America

(3-0-3)

Beginning with a review of post World War II authors, a close analysis of both fiction and nonfiction written in America in the 1960s, with a particular emphasis on the Vietnam experience and the development of the counter culture.

ENGL 40740. Literature and Consumer Culture

(3-0-3)

This course traces the social changes that accompanied America’s movement from early retailing to a full-blown consumer culture. Beginning with representations from the later part of the 19th century, particularly of the development of Chicago as a mail order capital of the world and moving into the present through an examination of television shopping networks, this course will use material from a variety of perspectives and disciplines to examine what became a wholesale transformation of American life. In attempting to trace the trajectory of change from a country often identified by its rural isolation to a country of relentless publicity, from the farm to Paris Hilton, (who returned to *The Simple Life*), we will look at a series of linkages each of which played a specific and contributory role in the cultural shift toward a fully saturated consumerism. For instance, the early mail order catalogue empires of Aaron Montgomery Ward and Richard Warren Sears depended on the capacity of the railroad and postal service to trans-

port their goods from shopping catalogues to country kitchens, goods that went beyond kitchen utensils, clothes, ornaments, and shoes to include assembly-ready homes. South Bend has several Sears and Roebuck homes and part of our class time will be spent in looking at these houses in the context of the course themes. All of our discussion will take place against the backdrop of a larger question about the democratization of desire, about whether American culture became more or less democratic after the introduction of the mail order catalogue. Thus, the linkage between the catalogue, the home shopping network, and the notion that freedom to desire goods is a measure of democratic freedom. Of course, the possibilities for manipulation and control are also limitless.

ENGL 40741. The Sacred and the Divine in Latino/a Literature

(3-0-3) Delgadillo

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An examination of faith, religion, the sacred, and the divine in selected Latino/a writings.

ENGL 40743. Literature of the 1990s

(3-0-3)

Prerequisite: (ENGL 30101) OR (ENGL 30301 OR ENGL 404M) OR (ENGL 30302 OR ENGL 406M) OR (ENGL 30303 OR ENGL 414M) OR (ENGL 30304 OR ENGL 481M) OR (ENGL 30305 OR ENGL 489M) OR (ENGL 30306 OR ENGL 405M) OR (ENGL 30307 OR ENGL 435M) OR (ENGL 30308 OR ENGL 493M) OR (ENGL 30309 OR ENGL 402M) OR (ENGL 30310 OR ENGL 416M) OR (ENGL 30311 OR ENGL 470M) OR (ENGL 30312 OR ENGL 407M) OR (ENGL 30313 OR ENGL 421M) OR (ENGL 30314) OR (ENGL 30315 OR ENGL 423M) OR (ENGL 30316) OR (ENGL 30317) OR (ENGL 30318) OR (ENGL 30319) OR (ENGL 30320) OR (ENGL 30321) OR (ENGL 30325)

An examination of selected novels written during the 1990s.

ENGL 40745. Perspectives on Nature and Environment in America

(3-0-3)

Throughout American history, those who took a hand in altering nature— or raised one to preserve it— have rarely been concerned exclusively with the continent’s ecosystems. Rather, they saw themselves as advancing lofty ideals, such as progress or freedom. After a general introduction to American environmental history, this course examines how 19th- and 20th-century American explorers, activists, and writers have understood our alterations to landscape and river, and what the stakes are for modern environmentalists who seek to preserve what wilderness remains.

ENGL 40755. Grand Collage: California Poetry, Arts and Culture at Mid-Century

(3-0-3) Fredman

An exploration of the ways that poetry took a leading role among the arts in California, creating a California culture that through the Beats and the Hippies became a national and international phenomenon.

ENGL 40801. “Our America”: Exploring the Hyphen Between African and American in African-American Literature

(3-0-3)

Close readings of various 20th-century African-American literatures, with foci on how “black subjectivity” is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

ENGL 40802. African-American Women Writers

(3-0-3)

An exploration of the works of several African-American women writers, including Alice Walker, Toni Morrison, Audre Lorde, and June Jordan, specifically the relation these writers have to the larger American culture and what they have to say about our collective vision and future.

ENGL 40803. Women of Color

(3-0-3)

A critical examination of the literature and scholarly writings about literature from “women of color” across disparate cultural backgrounds.

ENGL 40806. Growing Up Latino: Narrative and Literature

(3-0-3)

An exploration of the narratives/stories written by Latino/a writers and what these works say about personal as well as cultural identities.

ENGL 40807. African-American Literature

(3-0-3)

A historical and thematic account of the rise and achievement of African-American authors over several centuries.

ENGL 40808. Latino/a Poetry

(3-0-3) Menes

A study of prominent contemporary Latino/a poets whose work has enriched and diversified the canon of American poetry in the last 20 years.

ENGL 40809. Constituting Americans

(3-0-3)

An exploration of life writings and issues of self-representation in the African-American expressive cultural tradition from 1850 to 1905.

ENGL 40810. Caribbean Voices

(3-0-3)

An introduction to the literature of Anglophone Caribbean.

ENGL 40811. Native-American Literature

(3-0-3)

This course serves as an introductory exploration of the literatures written by Native American authors—oral literatures, transitional literatures (a combination of oral and written expression), and contemporary poetry and prose.

ENGL 40812. African-American Poetry and Poetics

(3-0-3)

An examination of poetry and poetics by black Americans from the beginnings to the present.

ENGL 40815. African-American Poetry

(3-0-3) Eady

Close readings of selected contemporary African-American poets.

ENGL 40820. Writing Harlem: Race, Renaissance, and the Modern

(5-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in Harlem in the 1920s and 1930s.

ENGL 40825. Latino Literature and Visual Culture

(3-0-3)

Understanding US Latino/a literature, art, and film through its many allusions to and representations of traditional icons and historic figures as well as legends, myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/a, African, Asian, and European cultures).

ENGL 40830. Passing and Fictions of Race

(3-0-3)

A critical examination of how “fictions” in the artistic sense (novels, stories, and movies) have both fostered and challenged “fictions” in the ideological sense, that is, the lies and mystifications about race that pervade American cultural life.

ENGL 40850. Advanced Fiction Writing

(3-0-3) O'Rourke

Prerequisite: (ENGL 20011 OR ENGL 301) OR (ENGL 20012 OR ENGL 301G) OR (ENGL 20013 OR ENGL 301R) OR (ENGL 20014 OR ENGL 301A) OR (ENGL 20015 OR ENGL 301Q) OR (ENGL 20016 OR ENGL 301V) OR (ENGL 20017 OR ENGL 301D) OR (ENGL 20018 OR ENGL 301C) OR (ENGL 20019 OR ENGL 301K) OR (ENGL 20020) OR (ENGL 30011 OR ENGL 30850 OR ENGL 401B)

An advanced fiction writing workshop.

ENGL 40851. Advanced Poetry Writing

(3-0-3) Eady

Prerequisite: (ENGL 20031 OR ENGL 302G) OR (ENGL 20032 OR ENGL 302H) OR (ENGL 20033 OR ENGL 302C) OR (ENGL 20034 OR ENGL 302I) OR (ENGL 20035 OR ENGL 302F) OR (ENGL 20036 OR ENGL 302J) OR (ENGL 20037 OR ENGL 302K) OR (ENGL 20038 OR ENGL 302N) OR (ENGL 20039) OR (ENGL 30012 OR ENGL 30852 OR ENGL 402B)

An advanced poetry writing workshop.

ENGL 40858. Introduction to African-American Literature

(3-0-3)

A broad introduction to the major writings of African Americans.

ENGL 40901. Feminist Theory

(3-0-3)

An exploration of the main literary and artistic movements of the historical European avant-garde: Cubism, Vorticism, Italian and Russian Futurism, Dada, and Surrealism.

ENGL 40902. Joyce: Introduction to Critical Theory

(3-0-3)

An exploration of the challenges to structuralism represented by post-structuralism (Derrida), new historicism (Foucault), psychoanalysis (Freud, Lacan, Kristeva), discourses of race and gender (W.E.B. DuBois, Audre Lorde, Luce Irigaray, Hortense Spillers, and Judith Butler) and post-colonialism (Said) through the reading of James Joyce's *A Portrait of the Artist as a Young Man* from these various critical perspectives.

ENGL 40906. Gender and Culture

(3-0-3)

An introduction to literary theories of gender and culture in film, literature, and other media.

ENGL 40947. Love, Death, and Exile in Arabic Literature

(3-0-3) Guo

This course explores literary and artistic presentation of the themes “love, death, and exile” in Arabic literature and popular culture from pre-Islamic era to the present day. Through close readings of Arabic poetry, essays, short stories, and novels (in English translation), and analyzing a number of Arabic movies (with English subtitles), we discuss the following issues: themes and genres of classical Arabic love poetry; gender, eroticism, and sexuality in Arabic literary discourse; alienation, fatalism, and the motif of al-hanin ila-al-watan (nostalgia for one's homeland) in modern Arabic poetry and fiction.

ENGL 40948. Myths of the Greeks and Romans

(3-0-3)

This advanced course investigates the mythologies of Greece and Rome and traces their transmission to and influence on modern literature and art. Special attention is given to the wide range of media in which ancient stories about gods and heroes were expressed and communicated, and to the process by which these marvelous stories survived in later literature and the visual arts, inspiring writers and artists to adapt them to their own purposes. Current theories at the forefront of scholarship in the humanities are explored for their value in interpreting myths.

ENGL 40949. Roman Literature and Culture

(3-0-3) MacCormack

This course surveys the leading works of ancient Roman literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from six hundred years of literary versatility that combined enormous originality with a literary tradition inherited from the Greeks. Among the authors introduced are Plautus, Lucretius, Catullus, Cicero, Horace, Livy, Lucan, Tacitus, Apuleius, Ammianus, and Augustine. Special attention is paid the formal structures of Roman literary works, the cultural issue they raise, and the lasting value of Latin literature to the modern age. The course prepares students for more advanced study in classical literature and culture. Offered annually.

ENGL 40999. Studies in Literature

(3-0-3)

Major credit for courses taken away from Notre Dame.

ENGL 41001. Film Melodrama Lab

(3-3-0)

During the lab times, certain films will be viewed for further discussion in class.

ENGL 41005. Lab: Irish Film and Culture

(3-1-0)

Corequisite: ENGL 40511**Corequisite for ENGL 40511.****ENGL 43102. Seminar: Religion and Literature**

(3-0-3)

A consideration of the forms, ideas, and preoccupations of the religious imagination in literature and of the historical relationships between religious faith and traditions and particular literary works. The conflicts and tensions between modern Gnosticism, in literature and ideology, and the sacramental imagination will constitute a recurring point of focus. We will also lend special attention to the vision and imagery of the journey and wayfarer and the conflicts and affinities between private and communal expressions of faith.

ENGL 43103. Seminar: Imperialism and Its Interlocutors

(3-0-3)

By canvassing the Age of Empire, this seminar examines articulations of imperialism in the late Victorian and early modernist British imagination and contemporaneous or subsequent responses of resistance to it. "Imperial" writers may include Cary, Conrad, Forster, Rider Haggard, and Kipling; "interlocutors" may include Achebe, Naipaul, Kincaid, and Rhys.

ENGL 43201. Seminar: The Pearl Poet

(3-0-3)

Close readings of the Arthurian romance of Gawain, Patience (the whimsical, pre-Pinnocchio-and-Gepetto paraphrase of the story of Jonah and the whale), Cleanness (a series of homiletic reflections of great power, beauty, grim wit, and compassionate insight centered on varying conceptions of "purity"), and Pearl (the elegiac dream-vision that begins with the mourning father who has lost a young daughter, then moves with amazing grace from the garden where he grieves into a richly envisioned earthly paradise where he is astonished to re-encounter his lost "Pearl," who then leads him to the vision of a New Jerusalem whose post-apocalyptic landscape is populated exclusively by throngs of beautiful maidens).

ENGL 43202. Seminar: Milton and His Contemporaries

(3-0-3)

A close analysis of differing, and divergent, ways of seeing and representing reality in 17th-century Dutch painting and English poetry.

ENGL 43203. Seminar: Shakespeare and His Contemporaries

(3-0-3)

This seminar places Shakespeare's plays within the vibrant world of Tudor-Stuart drama.

ENGL 43204. Seminar: Medieval Romance

(3-0-3)

An intensive analysis of medieval romance literature both in England and on the continent, beginning with the work of Chretien de Troyes and including Chaucer's *Troilus and Criseyde* and Malory's Arthurian legends, focusing on the role of women in romance narratives, the relationship of the romance to history, modifications of and developments in the Arthurian tradition over time, and the place of the other (the foreign, the monstrous, the magical) in the romance.

ENGL 43205. Seminar: American Women Writers

(3-0-3)

This course will focus on the work of women writers after World War II and up to the end of this past century, with the idea of gaining an understanding of the range of women writers in this country during this period.

ENGL 43206. Seminar: Medieval Dream before Freud

(3-0-3)

Close readings of selected works from the medieval textual tradition in English where dreams hold a central place in the inscription of meaning.

ENGL 43207. Seminar: Everybody's Shakespeare

(3-0-3)

A close analysis of Shakespeare's plays (including tragedies, comedies, and romances), as well as a number of contemporary "re-visions" of those works by authors of varying cultural, ethnic, or gender backgrounds.

ENGL 43208. Seminar: Enlightenment Drama

(3-0-3)

A close study of drama, tragic and comic, after Shakespeare.

ENGL 43209. Seminar: *The Canterbury Tales*

(3-0-3)

In this course, we will read *The Canterbury Tales* from start to finish, focusing on questions of genre, poetic voice and authority, the relationship of history to literature, the development of character, and the emergence of vernacular poetry in English.

ENGL 43210. Seminar: Shakespeare's Religions

(3-0-3)

A critical analysis of religious influences and iconography in selected Shakespeare plays.

ENGL 43211. Seminar: Ideas of Justice

(3-0-3)

An examination of various ideas of justice in early modern culture, from the trials of Socrates and Jesus to Shakespeare and Milton.

ENGL 43215. Seminar: Love and Society in Renaissance Poetry

(3-0-3)

How depictions of "love" in selected Renaissance poetry reflected notions of "love" in the larger Renaissance society.

ENGL 43222. Seminar: Old English and Middle English Literatures

(3-0-3)

Close readings of selected Old English and Middle English prose.

ENGL 43223. Seminar: Shakespeare's Major Tragedies

(3-0-3) Lander

A close reading of William Shakespeare's major tragedies, including historical and biographical aspects of the works.

ENGL 43301. Seminar: Virtue, Sex, and the Good Life: Eighteenth-Century Novels

(3-0-3)

The 18th-century novel deals with the questions of social, political, sexual, and economic identities and choices in a time of great change, and this course examines several novels representative of the time period.

ENGL 43302. Seminar: Jane Austen and Her World

(3-0-3)

Research in the novels of Jane Austen.

ENGL 43303. Seminar: Victorian Fiction

(3-0-3)

A close reading of five late-Victorian novels—Trollope's *The Eustace Diamonds*, James's *Portrait of a Lady*, Hardy's *Tess of the D'Urbervilles*, Eliot's *Daniel Deronda*, and Collins's *Armadale*—that organize themselves around the thoughts and deeds of “bad girls.”

ENGL 43304. Seminar: Nineteenth-Century British Novel

(3-0-3)

The British novel, 1830–60, as a popular medium through which writers explored serious concerns: E. Bronte, Gaskell, Dickens, Collins.

ENGL 43305. Seminar: Victorian Radicals

(3-0-3)

“Fringe” characters in, and elements of, British Victorian literature, with a particular emphasis on a modern world being increasingly defined in economic terms.

ENGL 43306. Seminar: Romanticism and Human Rights

(3-0-3) Thomas

How the Romantic movement in literature presaged and influenced civic rights on the micro and macro scales.

ENGL 43310. Seminar: Nature Poetry

(3-0-3)

A seminar focusing on the great body of poetry in English of the last two centuries in which “nature” takes center stage, rather than functioning as scenery, with a particular emphasis on the relationship between humankind, nature, and ecology.

ENGL 43401. Seminar: Modernism and Modernity

(3-0-3)

By engaging a wide variety of modern writers ranging from D.H. Lawrence, T.S. Eliot, Larsen, Fauset, Barnes, Rhys, Woolf, Langston Hughes, and West, to Lewis, Joyce, and Beckett, the changing contours of literary modernism in the larger context of the philosophical, social, and political cultures of modernity.

ENGL 43402. Seminar: “God” in Postmodern British Poetry

(3-0-3) Huk

A multifaceted analysis of modes of “belief” in postmodern British poetry, with a particular emphasis on how the operations of ancient Hebraic and Christian texts come back into practice for these writers, and why those earlier frameworks for conceptualizing language and “saying God,” or failing to say it, seem newly hospitable in the face of deconstructive postmodern theories about “the word.”

ENGL 43403. Seminar: Gender and Modernism

(3-0-3)

An intensive study of “feminine” or “women’s” modernism: modernist aesthetics read in relation to questions of race and gender; the formation of literary modernism’s often tense relation to mass culture; the development of political and literary avant-garde cultures (with specific emphasis on those marked by gender and race such as the suffrage movement and the Harlem Renaissance); the development of modern discourses of sexuality; the intimate and complex relationship between modernism and race; and the special attention given to women’s experiences of modernity, especially in relation to those aspects of culture typically excluded from definitions of the modern (shopping, maternity, consuming popular, sentimental fictions, etc.).

ENGL 43409. Seminar: Woolf and Bloomsbury

(3-0-3)

An analysis of the novels, essays, art, and political writings of some of the members of the Bloomsbury Group—including Woolf, E.M. Forster, Roger Fry, and Leonard Woolf—in order to explore the complex moments of cross-fertilization, critique, and revision that define their encounters, along with notions of a “feminine” or “women’s” modernism.

ENGL 43410. Seminar: Feminism, Print, and Spectacle in the Twentieth Century

(3-0-3) Green

How feminist cultures of the 20th century have engaged print culture and visual culture in imaginative ways to carve a space for discussions of women’s issues.

ENGL 43411. Twentieth-Century British Women Writers

(3-0-3) Green

Modern and postmodern fiction (and some nonfiction prose) by British women. Authors may include Woolf, Butts, Rhys, Cunard, Richardson, Carrington, West, Mansfield, Carter, and Winterson.

ENGL 43501. Seminar: James Joyce

(3-0-3)

Close readings and discussion of Joyce’s *Dubliners*, *A Portrait of the Artist as a Young Man*, and *Ulysses*.

ENGL 43502. Seminar: Contemporary Irish Literature

(3-0-3)

Irish drama, fiction, and poetry of the second half of the 20th century.

ENGL 43503. Seminar: Anglo-Irish Identities 1600–1800

(3-0-3)

Focusing on the 200-year historical period that was crucial in the formation of “Ireland,” this course explores the complex and contested cultural, political, and ideological identities of a group we have come to call the Anglo-Irish, including Swift, Berkeley, Edgeworth, and Goldsmith.

ENGL 43504. Seminar: Modern Irish Fiction

(3-0-3) Smyth

A close examination of the works of major Irish writers of fiction after the Second World War—Flann O’Brien, Frank O’Connor, Mary Lavin, Patrick Kavanagh, Edna O’Brien, Michael MacLaverty, Sam Hanna Bell, and Brian Moore.

ENGL 43505. Seminar: Gender Troubles—Contemporary Irish Fiction

(3-0-3) Harris

How relations between men and women in contemporary Irish literature reflect the past and present, and suggest a future, of those relations.

ENGL 43601. Seminar: Landscape in American Literature

(3-0-3)

A thematic reading of “landscape” in American literature from the Puritans to Toni Morrison.

ENGL 43602. Seminar: Gender and Emotion in American Literature

(3-0-3) Hender

An examination of the changing representations of men’s and women’s emotions in literature and other cultural forms, with a focus on 19th-century American literature.

ENGL 43701. Seminar: Southern Fiction

(3-0-3)

Close readings of Southern fiction from 1900 to 1960, including Chopin, Glasgow, Toomer, Faulkner, Wright, Ellison, Hurston, Warren, Welty, and O’Connor.

ENGL 43702. Seminar: Suffragettes and Literature

(3-0-3)

A close study devoted to tracing and defining the feminist literary cultures of the 20th century through, first, reading the writings created during the “First Wave” of feminist activism that defined women’s militant and nonmilitant struggle for the vote at the beginning of the last century, followed by exploration of the feminist writing and thought that followed the suffrage movement and paved the way for discussions of Women’s Liberation in the “Second Wave.”

ENGL 43703. Seminar: Memory in Latino/a Literature

(3-0-3) Delgadillo

This course will focus on several prominent contemporary Latino and Latina poets—among them, Gary Soto, Lorna Dee Cervantes, Victor Hernandez Cruz, Martin Espada—whose work has enriched and diversified the canon of American poetry.

ENGL 43801. Seminar: Women of Color

(3-0-3)

An examination of the literatures of “women of color,” encompassing the linguistic, national, ethnic, and cultural experiences and connections among women of color in cultural diasporas around the world, and how these women use their work to (re)map the “margin,” recreating it as a place of connection and conversation, rather than exclusion and otherness.

ENGL 43802. Seminar: Black Cultural Studies

(3-0-3)

This interdisciplinary course considers the conflicted ways in which “racial” identities and differences have been constructed throughout US culture.

ENGL 43803. Seminar: American War Literature

(3-0-3)

Beginning with Mary Rowlandson’s captivity narrative and ending with Tim O’Brien’s *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

ENGL 43804. Seminar: Memory in Latino/a Literature

(3-0-3)

This course will focus on several prominent contemporary Latino and Latina poets—among them, Gary Soto, Lorna Dee Cervantes, Victor Hernandez Cruz, Martin Espada—whose work has enriched and diversified the canon of American poetry.

ENGL 43805. Seminar: Twentieth-Century Black Women Writers

(3-0-3)

A close examination of major 20th-century African-American women writers.

ENGL 43806. Seminar: Caribbean Voices

(3-0-3)

An introduction to the literature of the Anglophone Caribbean.

ENGL 43810. Seminar: Latino Literature

(3-0-3)

A close examination of the historic, cultural, and artistic foundations of selected Latino writers.

ENGL 47999. Special Studies

(V-0-V)

Independent study under the direction of a faculty member.

ENGL 52998. Honors Thesis

(V-0-V)

Arranged by department honors advisor. Credits for research and writing honors thesis.

ENGL 52999. Honors Thesis

(3-0-3)

Arranged by department honors program advisor. Credits for research and writing honors thesis.

Department of Film, Television, and Theatre

FTT 10101. Basics of Film and Television

(3-0-3)

Corequisite: FTT 11101

This course introduces students to the study of film and television, with particular emphasis on narrative. Students will learn to analyze audio-visual form, including editing, framing, *mise-en-scene*, and sound. Students will consider topics in film and television studies such as authorship, genre, stardom, and feminism. Focusing on classical Hollywood and American TV, the course will also introduce students to international and/or alternative cinemas and television styles. Evening screenings are required. Serves as prerequisite to most upper-level courses in film and television.

FTT 10401. Introduction to the Fine Arts

(1-0-1) Martin

This one-credit, interdisciplinary seminar is designed to introduce first-year students to some of the University's finest art treasures. Students will have an opportunity to enjoy the arts at Notre Dame from a vantage point of academic preparation, direct personal observation and experience, and the insights of those who work in the arts. The following is a sample of the topics to be explored in the course: the Mesoamerican and the Rembrandt collections in the Snite Museum of Art, the work of the Actors From The London Stage and the Notre Dame Film, Television, and Theater Department, the art of Ivan Mestrovic as found on campus, the Dante collection in the Rare Book Room, and a selection of on-campus classical and jazz concerts. Preparation to enjoy these and other topics will be built on pertinent readings, class discussions, and short written assignments, as well as tours, guest-led discussions, and attendance at exhibits, plays, films, and concerts. First-year students ONLY.

FTT 10701. Introduction to Theatre

(3-0-3)

A study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Through lectures, readings, and discussion, students will study this art form and understand its relevance to their own life as well as to other art forms. A basic understanding of the history of theatre and the recognition of the duties and responsibilities of the personnel involved in producing live theatre performances will allow students to become more objective in their own theatre experiences.

FTT 10900. Script Analysis and Dramaturgy

(3-0-3)

In this course, students will learn: (1) how to read and interpret a play script for production (script analysis) and (2) how to read and understand a dramatic text in terms of its historical and literary contexts (dramaturgical analysis).

FTT 11101. Basics/Film and Television Lab

(0-2-0)

Corequisite: FTT 10101

During the lab times, certain films will be viewed for further discussion in class.

FTT 12101. Basics of Film and Television Tutorial

(0-0-0)

Corequisites: FTT 10101 AND FTT 11101

A tutorial in conjunction with Basics of Film and Television.

FTT 13182. Fine Arts University Seminar

(3-0-3)

This writing-intensive course will be devoted to a variety of different topics in film, television, news media, and theatre depending on the individual instructor's interests.

FTT 20009. Broadway Theatre Experience

(1-0-1) Donnelly

This short course offers students the opportunity to experience theatre at its finest. The course will include three days and two nights in New York City where we will see four professional productions: three Broadway shows (a musical, a com-

edy, a drama) and one off-Broadway show. The trip will include a talkback with professional theatre artists as well as a backstage tour of a current Broadway show. The course has a lab fee, which includes round-trip bus and air transportation from Notre Dame to the Hotel Edison in Manhattan, two nights at the hotel, best seats available for the four shows, and the theatre talkback and backstage tour. Prior to the tour, the class will meet to discuss the shows that will be seen, to become familiar with theatre conventions, and to understand the structure and development of professional theatre in America.

FTT 20101. Basics of Film and Television

(3-0-3)

Corequisite: FTT 21101

This course introduces students to the study of film and television, with particular emphasis on narrative. Students will learn to analyze audio-visual form, including editing, framing, *mise-en-scene*, and sound. Students will consider topics in film and television studies such as authorship, genre, stardom, and feminism. Focusing on classical Hollywood and American TV, the course will also introduce students to international and/or alternative cinemas and television styles. Evening screenings are required. Serves as prerequisite to most upper-level courses in film and television.

FTT 20240. Forming and Nurturing the Creative Habit

(3-0-3)

This course is about you: changing your lifestyle so that you have the discipline, energy, awareness, resources, and ideas required to repeatedly produce high-quality creative work—creative work in whatever your field: the arts, science, engineering, business, or architecture. This course is based on the tenets and follows the sequence of choreographer Twyla Tharp's book *The Creative Habit: Learn It and Use It for Life*. Our seminar-journey will explore and learn—and practice!—how to prepare to be creative, overcome "blocks;" reinforce our unique creative traits, exercise our creative memories, and build a bank of info, ideas and stimuli; brainstorm effectively; take advantage of serendipity; protect the "spine" of our ideas; strengthen our required skills; get out of ruts; get into "the zone"; grow through failure; and improve our creative output throughout our lives. We'll work individually, in collaboration, and with creative guests from diverse fields. Sometimes we'll meet with diversely creative Notre Dame people in metaphorically appropriate campus locations. At all times we will challenge and support each other to do our best work—the written and oral assignments—and by the end of the semester each student will have produced a creative work that represents her/his journey in forming and nurturing his/her creative habit.

FTT 20260. *La Telenovela*: History, Culture, Production

(3-0-3) Barry

The aim of this course is to explore the genre of the telenovela, a major social, cultural, political, and economic force in Latin America. You will sharpen oral and written language skills through watching, analyzing and discussing authentic telenovelas from Spain and Latin America, and through the creation and production of your own telenovela. You will learn the idiosyncrasies of Hispanic culture as well as popular expressions and apply this knowledge during the creation of your telenovela. Writing and oral production will be stressed as you write, produce, direct, act, tape, and edit a telenovela. During this process you will learn and apply basic videography and online video and audio editing techniques.

FTT 20280. Culture, Media, and Entertainment in China Today

(3-0-3)

This course is designed to provide students with an introduction to aspects of contemporary Chinese culture, media, and entertainment. The class focuses on the development of China's media and entertainment industries, including the online industry, the music industry, advertising, television, and the film industry. Students will learn to critically analyze authentic cultural products, study their cultural and literary dimensions, and discuss how culture affects the political and economic aspects of these industries. This class aims to be interdisciplinary and is designed to accommodate students from a large range of academic interests, including business, marketing, political science, economics, communication, media studies, music, sociology, literature, film, cultural studies, and Asian studies. No prior knowledge of China or the Chinese language is required.

FTT 20480. Introduction to New Media

(3-0-3)

The Internet, interactive computer technologies, and unprecedented ways of performing and expressing ideas make an awareness of new media (broadly defined) necessary. This course examines the history, application, and social impact of these new systems.

FTT 20701. Introduction to Theatre

(3-0-3)

A study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Through lectures, readings, and discussion, students will study this art form and understand its relevance to their own life as well as to other art forms. A basic understanding of the history of theatre and the recognition of the duties and responsibilities of the personnel involved in producing live theatre performances will allow students to become more objective in their own theatre experiences.

FTT 20702. Stage Management

(3-0-3) Dreyer

This course will explore the duties and functions of the stage manager in both the preproduction and production phases of the mounting of a show. Students will learn how to produce a promptbook and to track and block a show. They will also learn performance etiquette and documentation of a production.

FTT 20703. Theatrical Production

(5-0-3) Cole

An introductory study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Students will gain a basic understanding of live theatre performances with the goal of becoming more objective about their own theatre experiences.

FTT 20704. Theatre, History and Society

(3-0-3) Pilkinton

This course treats theatre as a culture industry and employs the case-study approach to examine deeply selected periods and sites in theatre history to understand the theatrical event and how it was marketed and to whom, and what cultural attitudes prevailed. Each case study will emphasize theatre as a site of cultural debate and political and social change, while considering the larger question of the role of representation in human society through time.

FTT 20705. Performance Analysis

(3-0-3) Juan

Performance Analysis moves beyond analysis of scripts to teach a student how to "read" a performance. How do we understand an artist's choices in a given performance? Can we determine who is responsible for every choice in a production? Attention will be given to the role of each individual theatre artist and how the collaborative process evolves. This course will introduce theories of representation and interpretation and will involve analysis of both performances and text. This is part of the new theatre core concentration curriculum.

FTT 20706. Introduction to Theatre

(5-0-3)

A study of theatre viewed from three perspectives: historical, literary, and contemporary production practices. Through lectures, readings, and discussion, students will study this art form and understand its relevance to their own life as well as to other art forms. A basic understanding of the history of theatre and the recognition of the duties and responsibilities of the personnel involved in producing live theatre performances will allow students to become more objective in their own theatre experiences. This summer course is equivalent to FTT 10701 and 20701.

FTT 20900. Script Analysis and Dramaturgy

(3-0-3) Arons

In this course, students will learn: (1) how to read and interpret a play script for production (script analysis) and (2) how to read and understand a dramatic text in terms of its historical and literary contexts (dramaturgical analysis).

FTT 21001. Acting: Process

(3-0-3)

The purpose of this class is self-discovery and growth as an actor. You will be introduced to basic principles and techniques for preparation and performance, as well as a context for developing a working methodology for personal creative growth as an actor, the creation of a role, realization of a scene, and an introduction to the production process. You are expected, therefore, to know and apply these principles and processes. Scene work is prepared and rehearsed with a partner(s) outside of class for presentation in class. Written textual analysis (including detailed character study) is required for all scene work. A critical journal will reflect on assigned readings, responses to the work, and continuing assessment of personal growth.

FTT 21002. Improvisation Practicum

(1-0-1)

Offered in conjunction with the Law School, this course offers students character and improvisation work over the course of the semester. Students work with law students in role-playing exercises and chronicle their work through journals and conversation.

FTT 21007. Writing for Screen and Stage 1

(3-0-3)

This class focuses on the basics of dramatic writing: story, dialogue, character, and style. Students will develop three short scenes as stage plays or as screenplays. The last section will be devoted to developing one of these for public reading. This class is a prerequisite for Writing for Screen and Stage II, FTT 31007, which will be offered during the spring semester.

FTT 21101. Basics/Film and Television Lab

(0-2-0)

Corequisite: FTT 20101

During the lab times, certain films will be viewed for further discussion in class.

FTT 30000. National Theatre: Contemporary Europe

(3-0-3)

This course provides students with insight into the development of European theatre, from Brecht-Weigel's work at the Berliner Ensemble to the theatre works of Giorgio Strehler at the Piccolo (Italy), Peter Brook at the Buffes de Nord (UK, France), Ariane Mnouchkine at Theatre de Soleil (France), Peter Stein at the Schaubuehne, Pina Bausch at Tanztheater Wuppertal, and Heiner Mueller and Einar Schlee at the Volksbuehne and the Berlin Ensemble (Germany). Students are introduced to the main productions of these directors, their theatrical roots, and their influence on contemporary European theater and playwriting.

FTT 30004. Makeup for the Stage

(3-0-3) Donnelly

Theory and practice of makeup design, including basic, corrective, old-age, and special character makeup.

FTT 30005. History of Costume Design

(3-0-3) Donnelly

This course is an overview of the history of costume and fashion from the prehistoric cultures through the 20th century. The course will look at the ever-changing trends in clothing and provide an understanding of the cultural and historical effects of those changes. The class will investigate how fabric, style, color, and the psychology of clothing reflects personal choice, cultural impressions and historical perspectives.

FTT 30008. Love, Death, Revenge: Japanese Drama

(3-0-3)

An introduction to Japanese classical theater (Noh, Kyogen, Bunraku, and Kabuki) through readings and videotapes of selected plays.

FTT 30009. Contemporary Plays

(3-0-3) Scott

This course will familiarize you with major plays and playwrights of the past 20 years. You will examine the style, structure and societal context of each play. Specific focus will be given to the demands each play requires of the artistic staff. Emphasis will also be placed on your ability to evaluate and articulate thoughts

about theatrical concepts and performances. Contemporary Plays fulfills the dramatic literature requirement for the theatre major.

FTT 30101. History of Film I

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 31101

This course traces the major developments within the history of US and international cinema from its beginnings to 1946. It will look at films from the major cinematic movements and genres and from major filmmakers. These films and filmmakers will be considered in terms of the social, economic, technological, and aesthetic forces that have shaped them.

FTT 30102. History of Film II

(3-0-3)

Prerequisite: FTT 30101

Corequisite: FTT 31102

This course traces the major developments in world cinema from the post-WWII era to the present. The course will examine the shifting social, economic, technological, and aesthetic conditions of this period, especially the demise of the Hollywood studio system, the rise of new technologies and auxiliary marketing outlets, and the globalization of cinema. The course will not be limited to Hollywood filmmaking, but will also look at various international movements, including Italian Neorealism, the French New Wave, and recent Asian cinemas.

FTT 30103. Teen Culture

(3-0-3) Ohmer

Prerequisites: (FTT 10101 OR FTT 20101) AND (FTT 30101 OR FTT 30102 OR FTT 30460)

Corequisite: FTT 31103

Adolescence has long been recognized as a period of life marked by physical and psychological changes, but it was only in the 20th century that people experiencing these changes became known as “teenagers.” This class examines the history and significance of teen culture and the films and television programs that have represented teens’ experiences.

FTT 30230. Australian Cinema

(3-0-3)

Corequisite: FTT 31232

This course presents a survey of Australian cinema from the silent era to the present with special attention to the new Australian cinema of the 1970s. Students will examine these films in their social and political context. Throughout, we will consider how Australian films fashion an Australian identity. We will discuss Australia’s complex relationship to European and American culture, representations of Aboriginal culture, women in the Australian cinema, the representation of the outback vs. the city, tourism and the film industry, the role of film festivals, and more.

FTT 30231. Comedy, Italian Style!

(3-0-3)

An exploration of comic traditions in Italy: the popular film genre known as “comedy Italian style” is analyzed in its historical development in the 1950s and ’60s, together with Italian film comedies from the silent period through the present. Roberto Benigni’s new film version of *Pinocchio*, for example, to be released in the United States in December of 2002, extends a long line of comic genius. The commedia dell’arte, Goldoni’s comedy of manners, and the political farce of Nobel Prize winner Dario Fo provide further examples of a comic tradition that continues to be a vital force of aesthetic pleasure and political comment. Requirements include attendance at mandatory film screenings, participation in class discussions, a number of short papers, and midterm and final exams. The class will be conducted in English.

FTT 30232. National Cinema: Irish Cinema/Culture

(3-0-3)

Corequisite: FTT 31232

Every industrialized country, and many non-industrialized ones, have developed distinctive national cinemas. Often these productions are a dynamic mix of Hollywood influences, assertive local cultures, and government control. This course examines the films of one or more countries to reveal their distinctive

styles, stories, and visual and narrative techniques. (The nationality varies each year.) The idea of “nation” as a critical concept is also addressed. May be repeated. Fulfills the film international area requirement.

FTT 30233. New Iranian Cinema

(3-0-3)

Corequisite: FTT 31233

This seminar course will take up a selection of the best of the new wave of Iranian cinema (films by Kiarostami, *Close-up, Taste of Cherry, And Life Goes On, Through the Olive Trees*; Mahkmalbaf: *Gabbeh, The Cyclist*; Samira Makhmalbaf, *The Apple*; Panahi, *The Circle*; *Naderi, The Runner*; and others) and debate its sources and its paradoxical arrival on the international film scene. We will consider the role of censorship, limited budgets, Islamic proscriptions, national history and aspirations, issues of gender and, in particular, the persistent influence of a 2,500-year old, popular Persian poetic tradition in the inspiration and refinement of this unexpected and celebrated cultural phenomenon.

FTT 30234. New Directions in Russian Cinema

(3-0-3)

Freed from the constraints of Soviet-era censorship, since 1990 Russian filmmakers have exploited the unique qualities of the film medium in order to create compelling portraits of a society in transition. The films we will watch cover a broad spectrum: reassessing Russia’s rich pre-Revolutionary cultural heritage as well as traumatic periods in Soviet history (World War II, the Stalinist era); grappling with formerly taboo social issues (gender roles, anti-Semitism, alcoholism); taking an unflinching look at new social problems resulting from the breakdown of the Soviet system (the rise of neo-fascism, the war in Chechnya, organized crime); and meditating on Russia’s current political and cultural dilemmas (the place of non-Russian ethnicities within Russia, Russians’ love-hate relationship with the West). From this complex cinematic patchwork emerges a picture of a new, raw Russia, as yet confused and turbulent, but full of vitality and promise for the future. Short readings will supplement the film component of the course.

FTT 30235. Italian National Cinema

(3-0-3)

Corequisite: LLRO 41545

Conducted in English, this course examines the concept and reality of “national cinema” in the Italian case. A history of one of the world’s most renowned national cinemas focusing on the construction of national identity in film.

FTT 30237. Nazi Past in Postwar German Film

(3-0-3)

How have German films since 1945 been trying to deal with the Nazi past? How do Germans picture their memories of the Third Reich? How do they define themselves within and against their country’s history? And how do they live with their remembrances now? Primarily, this class aims at issues in the realm of ethics (perpetrators, victims, and passive accomplices; stereotypes; courage and cowardice; personal and national guilt; revisionism, coming-to-terms, and productive memory; responsibility and the [im]possibility of reconciliation). Some central questions about German history during the Third Reich and the postwar era will be dealt with. The course will also develop basic categories of film analysis and ask questions about the special capacity of film to help a nation work through its past. Films subtitled, dubbed, or English language. Readings, lectures, and discussions in English.

FTT 30238. Short Story in East Asia and Beyond

(3-0-3)

This course introduces students to short stories by 20th-century writers in China, Taiwan, Korea, Japan, and the East Asian diasporas. The goals of the course are to examine the intertwined modern histories of East Asian nation-states, investigate the short story as a literary genre, and explore critical concepts of literary and cultural identity studies. The stories will be read in conjunction with critical essays on nation, gender, and the short story, with particular attention to the narrative strategies of the authors. Reading the stories both in terms of the cultural and ideological contexts in which they were written and as material artifacts available to us in English today helps to problematize the meanings of “Chinese,” “Japanese,” or “Korean” in East Asia and beyond. Ultimately, this course will provide students with the conceptual framework and vocabulary to interrogate gender, race, and

nationality as socially constructed categories. All readings are in English; no prior knowledge of Asia is presumed.

FTT 30239. New Asian Cinema

(3-0-3)

Corequisite: FTT 31239

This course will introduce students to contemporary Asian cinema. We will examine how Asian filmmakers define themselves and their (inter)national identity through their aesthetic choices. We will also explore the impact of globalization on regional cinema, and the effect international audiences and international investment have on the films that are made. The course will focus on internationally acclaimed films representing countries including China, Japan, Taiwan, and Hong Kong. It will also place these Asian films in their political, cultural, and social context. Weekly film screening required. All films with English subtitles. Course taught in English. The course could satisfy the international area requirement for film concentrators.

FTT 30240. Japanese Film and Fiction

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

For Japan, an island nation whose feudal state followed a policy of isolation for over 150 years (1600–1868), the transition to modernity has been an abrupt and complicated process. Modernization has involved a transformation at every level of Japanese society, ranging from the political and economic realms, to the scientific, cultural, and educational. This course focuses on how some of Japan's most creative authors and film directors have responded to debates relating to the strategies and sacrifices involved in enacting sweeping social changes, and to developing a modern, educated citizenry that would include not only elite males, but women, the poor, and ethnic or other minorities. Students will be introduced to the concepts of authorial empathy and tension between realism and fabrication in fiction writing and filmic expressions; and to ways in which gender, nationality, and other affiliations have been constructed in the Japanese cultural imagery.

FTT 30241. New Chinese Cinema

(3-0-3) Noble

This class explores “underground” films produced in mainland China since the 1980s. Many films that were produced illegally or banned in China have garnered awards in prestigious international film festivals—Cannes, Berlin, Venice, Toronto, Tribeca (and the list runs on). How and in what ways were the films subversive? What is the role of China as a nation and state in the production of film today and in the past? How do these films play to the international film festival circuit and international market? Is commercialization realizing less government control of film and other media in China? The class will view both feature films and documentaries, including those unavailable in the US (but all with English subtitles). No prior knowledge of Chinese language, culture, or history is required.

FTT 30242. African Cinema: Black Gazes/White Camera

(3-0-3)

Corequisite: ROFR 31555

A course exploring the image of black Africa through the lens of white cinematographers. Fulfills FTT international requirement.

FTT 30410. Introduction to Film and Video Production

(4-0-4) Mandell

Prerequisite: FTT 10101 OR FTT 20101 OR FTT 20102

An introductory course in the fundamentals of shooting, editing, and writing for film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. The course requires significant amounts of shooting and editing outside class. Students produce short video projects using digital video and Super 8mm film cameras and edit digitally on computer workstations. The principles of three-camera studio production are also covered.

FTT 30411. Art and Science of Filmmaking

(3-0-3) Donaruma

Prerequisite: FTT 10101 OR FTT 20101

This course is a behind-the-scenes look at the artists and craft people who work together to create both theatrical films and television programs. We will explore the many roles people play and the techniques used to make movies specifically the director, producer, and cinematographer's relationship on a set. This study will combine history, technology, and the politics of both big budget shows and independent cinema. This is a course about film production without all of the hands-on experience, which will provide a basis for those thinking about doing production as well as expand the expertise for those who have taken production courses. We will, however, conduct various in-class film tests. There will be screenings, a midterm, and final paper (10 pages) regarding a chosen researched topic about filmmaking. Materials fee required.

FTT 30430. History of Documentary Film

(3-0-3) Godmilow

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 31430

This course will track the history of nonfiction film and television, examining various structures and formats including expository, narrative, experimental, formalist, docudrama, and “reality TV.” It will also examine the uses of “actuality” footage in films that make no pretense to objectivity. At the center of the course will be a deconstruction of the notion of “film truth.” Students will develop skills in the critical analysis of documentary and examine the standards by which we evaluate them.

FTT 30436. Topics: Film and Popular Music

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 31436

This course examines the relationship between popular music and film through an examination of film scores, the genre of the musical, musical performance, the use of prerecorded pop songs in films, rockumentaries, music video, and pop biopics. We'll see films using popular music of all kinds: Tin Pan Alley, '50s rock'n'roll, jazz, disco, country, French pop, and more. We'll consider the role of the star—ranging from Astaire to Travolta, Dylan to Madonna—and films by directors such as Scorsese and Welles. Looking at films from the 1930s to the present, we'll consider the narrative function and meaning of music, industrial practices, changing social values, how songs get Academy Awards, how soundtracks circulate, and how film relates to various other musical media, such as radio and MTV. Throughout, we will pay special attention to how pop music affects film's ideologies of gender, race, and sexuality. Students do not need a background in music. Films will include *The Band Wagon*, *American Graffiti*, *A Man and a Woman*, *Saturday Night Fever*, *Touch of Evil*, *Truth or Dare*, *The Umbrellas of Cherbourg*, *Round Midnight*, and *Nashville*.

FTT 30461. History of Television

(3-0-3) Becker

Corequisite: FTT 31461

This course analyzes the history of television, spanning from its roots in radio broadcasting to the latest developments in digital television. In assessing the many changes across this span, the course will cover such topics as why the American television industry developed as a commercial medium in contrast to most other national television industries; how television programming has both reflected and influenced cultural ideologies through the decades; and how historical patterns of television consumption have shifted due to new technologies and social changes. Through studying the historical development of television programs and assessing the industrial, technological, and cultural systems out of which they emerged, the course will piece together the catalysts responsible for shaping this highly influential medium.

FTT 30462. Broadcast Journalism

(3-0-3) Sieber

Four major topics are covered: (1) Writing for broadcast with emphasis on developing the student's understanding of grammar and style in the construction of effective news stories; (2) newsroom structure: understanding who does what in today's broadcast newsroom and how economics affects the flow of information; (3) journalism ethics: analysis of personal values, ethical principles, and journalism-

tic duties that influence newsroom decisions; and (4) legal considerations in news gathering with special attention paid to libel laws and invasion of privacy.

FTT 30463. Broadcasting and Cable

(3-0-3) Heisler

This course examines the history and current practices of the broadcast and cable television industry and looks at its effect on American culture and society. Topics of discussion include important issues in the industry, government regulation, news, sports, and entertainment programming strategies and practices, ratings, and advertising.

FTT 30464. Television in American Culture

(3-0-3)

This course examines the formation of commercial broadcast television in the United States, focusing on the industrial, economic, technological, and social forces that have shaped the images we see. We will look at how American television developed in the competitive business climate of the 1920s and 1930s, and how advertiser-supported networks came to dominate. We then analyze the role of television in America's social and political life: its links to suburbia and consumerism, its impact on the political movements of the 1960s, and the ways it has represented America's changing ideas of race, gender, and ethnicity.

FTT 30465. Sports and Television

(3-0-3) Heisler

Sports have played an integral role in the television industry since the medium's early days. This course will highlight the history of sports on television and focus on the nuts and bolts of how television sports programming works today. The course will also examine the impact of televised sports on our culture as well as the ethical issues raised by the media's coverage of sports.

FTT 30466. Film and Digital Culture

(3-0-3) Ohmer

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 31466

This class examines the many and varied ways in which new digital technologies are changing traditional methods of film production, distribution, exhibition and reception. Some of the topics we will explore include: the impact of digital cameras and editing on film production; new narrative structures that result from the temporal and spatial manipulations of digital technology; new media in animation; the legal issues raised by digital technologies and the industry's efforts to combat piracy; new forms of audience engagement through fan websites; the implications of DVD extras and the future of digital video in the home.

FTT 30467. Principles of Mass Communication

(3-0-3)

This course is designed to provide a fundamental understanding of television, multimedia, and Web-based production, from initial concept to final program delivery. The point of view is from the executive producer, who oversees all business and creative aspects of media productions. Topics include proposal development and budgets; defining the messages and target audiences; distribution, attention, perception and retention barriers; production elements; locations and studios; script writing; sponsor relations; media credibility and ethics; effects on behavior; television interview techniques; interactive learning; distance education; and Web design and advertising.

FTT 30491. Debate

(V-0-V) Ohmer

This course introduces students to methods for gathering research material, analyzing evidence, and structuring the kinds of arguments used in debates. Students learn how to evaluate ideas for multiple perspectives and to discuss different sides of an issue through well-reasoned arguments. Verbal presentation and analysis are stressed, but the course also requires written case studies.

FTT 30801. Scene Design and Techniques for the Stage

(3-0-3) Phillips

This is a beginner's course in basic scenic design techniques and hand drafting for the stage. This course will take the student through the process of design from how to read a script, research, presentation, rendering, basic drafting, and if time allows, model building. No previous experience necessary.

FTT 30802. Lighting Design and Methodology

(3-0-3) Dreyer

This course serves as an introduction to the theories and practice of lighting design for the stage. Students will explore the design process as well as study the practical considerations of the execution of a design. Specific topics covered will include electricity, light, theatrical equipment and its development, communication of the design, and the role of the designer within the artistic infrastructure.

FTT 30803. Costume Design and Methodology

(3-0-3) Donnelly

This course teaches the principles of costume design for the stage and the techniques of constructing costumes. The course will explore the use of costumes to express character traits by analyzing play scripts. The course will include an introduction of the basic skills needed to construct costumes.

FTT 31001. Acting: Character

(3-0-3)

Prerequisite: FTT 21001

The second course in the acting progression, this course expands on basic methodology and incorporates physical techniques for building a character. Students explore psychological gestures, Laban effort shapes, and improvisation as they develop a personal approach to creating a role.

FTT 31002. Voice and Movement

(3-0-3)

A course designed to help the advanced acting student focus on kinesthetic awareness. The actor will identify and work to remove physical and vocal tensions that cause habituated movement and impede natural sound production. Through movement and vocal exercises created for actors, students will experience what "prepared readiness" for the stage consists of, and how to meet the demands of a live performance.

FTT 31003. Acting Role /Contemporary

(3-0-3)

Prerequisite: FTT 21001

Advanced exploration of technique and methodology, focusing on problem solving in approaching roles from the literature of the contemporary theatre.

FTT 31005. Acting: Role—Classical

(3-0-3)

Prerequisite: FTT 21001

This course looks at Shakespeare's texts from the actor's perspective. Various techniques for unlocking meaning and emotional content will be introduced. Students will use the *First Folio* for textual analysis and explore the fine arts in Elizabethan England to discover the physical world of Shakespeare's characters. The course culminates in a series of vignettes allowing each student to create several different classical roles.

FTT 31006. Directing: Process

(3-0-3)

This course familiarizes students with the creative components of basic play direction, including skills such as play selection, script analysis, casting, blocking, rehearsal techniques, and collaboration with designers. Students will read plays from various historical periods, participate in class directing exercises, learn from guest speakers (including professional actors, designers, and directors) and observe seasoned directors in rehearsal. This course will culminate in each student auditioning, casting, and directing a short play, documented in a production promptbook.

FTT 31007. Writing for Screen and Stage II

(3-0-3)

Advanced class for students interested in completing a major writing project for reading/staging at the end of the semester. Writing for Screen and Stage I is not a prerequisite, but Writing for Screen and Stage II is by application only. Applications available in November in the Department of Film, Television, and Theatre.

FTT 31010. Performance Art: History, Theory, and Practice

(3-0-3)

Performance art is anti-art. Performance art is art that contradicts tradition, that aims to shock. This class will equip the student with an overview of its offenses. Class content may include Dada's early 20th-century assaults on the audience; absurdist experimental performance works by Yoko Ono, Lygia Clark, John Cage, and Nam June Paik from the 1960s; performance art addressing racism by Adrian Piper and William Pope.L. from the 1980s; and current performance works by Internet artists and others. Discussions will focus on the aesthetics and politics of marginality. In other words: Why shock? Why experiment? Is there any market for such work today? We will also look at critical and theoretical texts about performance, modernism, and the avant-garde and consider their relation to the works themselves. These may include manifestos by performers and artists; debates about the autonomy of art; poststructuralist writings on art and aesthetics; and theories of performativity.

FTT 31011. Theatre Production Workshop

(V-0-V)

Prerequisite: FTT 21001

A workshop course in the process of theatre production in which students assume a major non-performance production responsibility including, but not limited to: stage manager, assistant stage manager, prop master, costumer, technical director or assistant director. This course can be repeated for up to four hours credit.

FTT 31012. Approaches to Acting for Stage and Screen

(3-0-3)

Prerequisite: FTT 21001

An active and participatory overview of several techniques that actors and directors can employ for the best results in any given situation whether it be on the stage or in front of the camera. Discover what process will work for you and/or your actors! Methods explored in the course will include Stanislavski, Grotowski, Meisner, Viewpoints, and Suzuki.

FTT 31013. Performance, Culture and Creativity

(3-0-3)

Performance, Culture and Creativity seeks to integrate cultural experiences with the intellectual practice of examination and discovery. The focal point of the course requires students to identify the cultural and universal semiotics in stage plays and then to create performances based on their research. Theatre becomes the framework you will use to make sense of disparate realities. We will look at theatre as both an artistic endeavor, and more specifically, as subjective experiences that occur for each individual in drastically different ways—dependent upon that person's cultural background and current environment. This course is intended for the student who has recently returned from studying abroad, but all students are welcome.

FTT 31101. History of Film I Lab

(0-V-0)

Corequisite: FTT 30101

During the lab times, certain films will be viewed for further discussion in class.

FTT 31102. History of Film II Lab

(0-V-0)

Corequisite: FTT 30102

During the lab times, certain films will be viewed for further discussion in class.

FTT 31103. Teen Culture Lab

(0-V-0)

Corequisite: FTT 30103

Certain films will be viewed for further discussion in class.

FTT 31231. Comedy, Italian Style Lab

(0-V-0)

Certain films will be viewed for further discussion in class.

FTT 31232. National Cinema: Irish Cinema/Culture Lab

(0-V-0)

During the lab times, certain films will be viewed for further discussion in class.

FTT 31233. New Iranian Cinema Lab

(0-V-0)

Corequisite: FTT 30233

Lab for FTT 30233.

FTT 31239. New Asian Cinema Lab

(0-0-0)

Corequisite: FTT 30239

During the lab times, certain films will be viewed for further discussion in class.

FTT 31430. History/Film Documentary Lab

(0-V-0)

Corequisite: FTT 30430

During the lab times, certain films will be viewed for further discussion in class.

FTT 31436. Topics: Film and Popular Music Lab

(0-V-0)

Corequisite: FTT 30436

Certain films will be viewed for further discussion in class.

FTT 31461. History of Television Lab

(0-V-0)

Corequisite: FTT 30461

During the lab times, certain television shows will be viewed for further discussion in class.

FTT 31466. Film and Digital Culture Lab

(0-V-0)

Corequisite: FTT 30466

Certain films will be viewed for further discussion in class.

FTT 31803. Costume Design/Methodology Lab

(0-2-0)

Corequisite: FTT 30803

Students will design costumes, learn how to construct costumes for the stage, and explore the process of organizing the script from the costume designer's viewpoint.

FTT 40000. CAD for the Stage

(3-0-3) Cole

The study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design and progress to 2-D and then 3-D design techniques. A basic understanding of the Macintosh computer system is necessary, and significant computer work is required outside class.

FTT 40001. Shakespeare in Performance

(3-0-3) Skelton

This course will explore Shakespeare's plays in performance across a wide range of history and forms. It will include explorations of the physical spaces and institutional organization of the theatres for which Shakespeare wrote and the effects of the actors and staging methods on his plays. It will look at the history of Shakespeare in performance from then until now, including Shakespeare adapted, Shakespeare restored, and Shakespeare reinvented. It will examine contemporary productions on stage, film, and audio. It will involve visits to productions and workshoping scenes ourselves.

FTT 40002. Directing: Practice

(3-0-3)

Advanced independent projects in directing. Students considering this course should consult with the instructor for departmental guidelines.

FTT 40003. Advanced Scenic Production

(3-0-3) Cole

Advanced course work in the tools, materials, and processes used in the creation of theatrical scenery. Topics may include (but not limited to) scenic welding, advanced rigging techniques, electronic controls, pneumatics, hydraulics, structural design for the stage, CAD, and other state-of-the-art technologies.

FTT 40010. Visual Communication for the Stage

(3-0-3)

Do I draw? Should I paint it? What about perspective? Model making? How can I make the director see what it's supposed to look like up there? These are some of the questions facing every person who wants to "visually communicate" for the stage. In this course, we'll be looking at the various ways and methods of how one communicates for the stage—we'll explore the various forms, rendering, model making, perspective, etc. for theatre design.

FTT 40011. Italian Theatre Workshop

(2-0-2)

A full-immersion language experience for the study, practice, production, and performance of authentic Italian texts. Includes analytical and writing components.

FTT 40012. The Theatre of Tom Stoppard

(3-0-3)

This course will provide students with insights into the theatre of Tom Stoppard and his plays between 1973 and 2001. We will read the plays *Travesties*, *Arcadia*, and the trilogy *Coast of Utopia*. Students will discuss the historical, philosophical, and scientific background for these plays and develop their own ideas for contemporary productions.

FTT 40101. Film and Television Theory

(3-0-3)

Prerequisite: FTT 30101 OR FTT 10101 OR FTT 20101

Corequisite: FTT 41101

This course offers an introduction to the philosophical, aesthetic, cultural, and historical issues that inform current scholarship and production in film and television. The focus of the course may vary from semester to semester.

FTT 40230. Contemporary Canadian Cinema

(3-0-3)

Corequisite: FTT 41230

This course examines recent trends in both English and French Canadian cinema, focusing on the work of such directors as Atom Egoyan, Favid Cronenberg, Denys Arcand, and Patricia Rozema, among others. The goal is to better understand the challenges of producing films in a small nation and to interrogate the idea of a "national cinema" that represents the ideals and culture of a country. This discussion-oriented course will feature an engaging mix of comedies, horror films, and dramas. Students should be advised that a number of films in this course contain challenging sexual content.

FTT 40231. Italian Cinema: Realities of History

(3-0-3)

Corequisite: ROIT 41508

This course explores the construction and development of the Italian cinematic realist tradition from the silent era to the early 1970s, although its primary focus is on the period 1934–66, which stretches from the appearance of Blasetti's openly fascist "historical" reconstruction, *La Vecchia Guardia*, to Pasolini's "eccentric" exercise in Left-wing commitment, *Uccellacci e Uccellini*, with its mix of expressionist and hyper-realist techniques. At the center of this period are found some of Italy's most highly regarded films made by directors, such as Vittorio De Sica, Roberto Rossellini, and Luchino Visconti, who belonged to the neorealist movement (1945–53). These filmmakers rejected escapist cinema and tried to make films that examined the contemporary experiences of ordinary Italians. As well as analyzing the films in themselves, the course examines the formal and ideological continuities and differences between neorealist films and their silent and fascist predecessors. In a similar way, it analyzes neorealism's impact on later filmmakers, such as Federico Fellini, Pietro Germi, Pier Paolo Pasolini, illo Pontecorvo, Dino Risi, and Francesco Rosi, who attempted to develop new versions of cinematic realism. Finally, the course aims to locate the films in their historical and cultural contexts and to address theoretical issues arising from the concept of "realism." Taught in English. Fulfills FTT international requirements.

FTT 40232. Americanization of European Culture

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

This course focuses on Americanization seen as the result of cultural diffusion and a part of larger global processes. This subject has been long discussed by Western European scholars but from 1989 it has gained a significant importance in the countries of the former Soviet block. We will see how the issue of Americanization of popular culture is presented by scholars from both the West and the East. The subjects to be discussed include: fashion, popular music (including rap, hip-hop, rock, blues, etc.), movies, different television genres based on American models (talk shows, quizzes, sitcoms, soap operas, reality-based shows), changes in university education, fast-food restaurants, foodways, the fashion of reading self-help books and undergoing therapies, fitness, corporate cultures, advertising, shopping malls, multiplexes, cartoons, American holidays (St. Valentine's Day, Halloween), the way the cities look, and finally, the American influence on the contemporary European languages. Fulfills FTT international requirement.

FTT 40234. Film and the Latin American Imagination

(3-0-3)

Corequisite: ROSP 41555

This course considers the issue of Latin American identity through films from various national traditions, including Cuba, Chile, Mexico, and Brazil. Class discussions consider how shared cultural elements are represented in Latin American film and how these representations challenge assumptions about identity politics.

FTT 40238. Film, Literature, and Irish Culture

(3-0-3) Gibbons

Corequisite: FTT 41238

An examination of the dominant images of Ireland in film and literature, and a review of development in a wider cultural and historical context.

FTT 40239. Brazilian Cinema and Popular Music

(3-0-3) Ferreira Gould

This course offers social, cultural, and historical perspectives on Brazil through film and popular music. Topics include the reception of Cinema Novo and post-Cinema Novo films, bossa nova, samba, and Tropicalia (a movement with key manifestations in literature, cinema and popular music) and the circumstances surrounding its creation, the repressive military regime that governed Brazil from 1964 to 1985.

FTT 40240. German Cinema/Weimar Republic

(3-0-3)

The years between 1918 and 1933 are the Golden Age of German film. In its development from expressionism to social realism, the German cinema produced works of great variety, many of them in the international avant-garde. This course gives an overview of the silent movies and sound films made during the Weimar Republic and situate them in their artistic, social, and political context. The oeuvre of Fritz Lang, the greatest German director, receives special attention. Should we interpret Lang's disquieting visual style as a highly individual phenomenon independent of its environment, or can we read his obsessive themes (world conspiracies and terrorized masses, compulsive violence and revenge, entrapment, and guilt) as a mirror image of the historical period? Might his films, as some critics have suggested, even illustrate how a national psyche gets enmeshed in fascist ideology? Films subtitled, dubbed, or in English; readings, lectures, and discussions in English.

FTT 40241. Hong Kong Action Cinema in a Global Context

(3-0-3) Magnan-Park

Prerequisites: (FTT 10101 OR FTT 20101) AND FTT 30101 AND FTT 30102

Corequisite: FTT 41241

This course addresses the global significance of the *gong fu vague* [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national popula-

tion sustain a commercially viable film industry? How can a film industry create a version of action cinema that supersedes Hollywood's dominance in the genre? Is this purely a "Chinese" phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic, and economic significance within a larger framework or must they be critically dismissed outright? What does it mean that "everybody was kung fu fighting" and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English. Fulfills FTT international requirements.

FTT 40410. Intermediate Film Production

(4-0-4) Donaruma

Prerequisite: FTT 30410 OR FTT 30405

Corequisite: FTT 41410

This film production course will focus on 16mm black and white silent narrative filmmaking. We will explore the technical use and aesthetic application of the film camera and related equipment as well as the development of the short film narrative script. Students will shoot a short film lighting and composition exercise, an in-class film test, and ultimately produce, shoot, and edit one 4–6 minute, 16mm B/W film in teams of two. The projects will be edited digitally, but there will be NO effects, fades, dissolves, titles, or sound. The film-making process requires a lot of fieldwork on locations and transporting heavy equipment.

FTT 40411. Advanced Digital Video Production

(4-0-4) Mandell

Prerequisite: FTT 30410

A course for the advanced production student interested in the techniques and technology of the broadcast video industry, utilizing the following post-production software: Avid Media Composer, Adobe After Effects, Lightwave 3D, and Digidesign Pro Tools. Students produce projects using BetacamSP and DV video equipment while learning the basics of non-linear editing, digital audio sweetening, 2-D compositing, and 3-D animation techniques.

FTT 40412. Advanced Film/Video Production: Script Development

(3-0-3) Godmilow

Prerequisite: FTT 40410

Corequisite: FTT 40413

This production workshop encourages the development of short scripts (including casting, preproduction, and storyboarding) for fiction, nonfiction, or formal film projects by pairs of students. It stresses writing skills with an emphasis on the development of innovations that expand the existing traditions of and boundaries between fiction and nonfiction practices.

FTT 40413. Advanced Film Production—Laboratory

(3-0-3) Godmilow

Prerequisite: FTT 40410

Corequisite: FTT 40412

This lab course stresses advanced production and editing skills on short scripted projects developed in FTT 40412, produced collaboratively by pairs of students, utilizing 16 mm color film technology. Film and projects are mixed and on-lined on digital video. Lab fee required.

FTT 40431. Sex and Gender in Cinema

(3-0-3) Wojcik

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 41431

This course analyzes representations of and theories about sex and gender in cinema. Students will read major texts in feminist theory, queer theory, and masculinity studies, in order to become familiar with important concepts and debates within the field. Topics covered will include "the male gaze," spectatorship, performance and stardom, camp, "reading against the grain," consumption, gender and genre, race and gender, masquerade, authorship, and masculinity "in crisis." Students will view classical Hollywood films, silent films, and avant-garde films and videos.

FTT 40432. Topics: Sound Design

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 41432

"Sound design" did not enter the lexicon of Hollywood production until the 1970s. Nevertheless, the concept is useful for tracing the history of the relation of sound and images in cinema from its earliest days. The range of this course will cover the function of musical accompaniment in the "silent" film, focus on the 1926–31 transition period, and end with an examination of the development of new acoustic technologies and concepts, such as Dolby and THX. The course is appropriate for students who are interested in film sound and music as historical and critical subjects, and for those who aim to use sound in producing films and videos.

FTT 40433. Cinema Ideologies

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 41433

Cinema, both in fiction and nonfiction forms, is one of the major contributing forces to the construction of ourselves and our perception of "others" in terms of class, gender, and race. This course proposes to study and dissect these constructions in films like *Malcolm X*, *Schindler's List*, *Philadelphia*, *The Killing Fields*, and *Striptease* through a close-reading practice.

FTT 40434. Topics: Film Noir

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 41434

This is an advanced study of the use of film or television technique. Students examine group styles—such as the Hollywood cinema or the European art cinema—or the individual styles of major film or television artists. Topics vary from semester to semester.

FTT 40437. Media Culture: Popular Taste

(3-0-3)

Prerequisite: FTT 30101

An advanced investigation of selected topics concerning media or cultural studies.

FTT 40439. Cultures of Fear/Horror Film

(3-0-3) Snively

This course will examine the construction and application of central themes in the scope of international horror cinema and how they reveal salient aspects of cultural similarities and differences including: gender, sexuality, violence, and socio-political climates.

FTT 40442. The Horror Film: Theories and Histories

(3-0-3) Sieving

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 41442

This seminar examines one of the most enduring and popular movie genres: the horror film. We will consider the genre from a historical perspective, tracking how it has evolved over time and across movements (examples: silent-era German Expressionism, Hollywood's classic monster movies of the 1930s, the nuclear anxiety pictures of the '50s, the slasher films of the '80s, contemporary Japanese horror cinema). In addition to the social, political and industrial factors that have influenced horror's development, we will also examine several influential (and competing) theories that attempt to explain horror's seemingly paradoxical appeal.

FTT 40490. Media Ethics

(3-0-3) Storin

This course will examine the journalistic and ethical challenges that newsroom managers face as well as the issues that reporters in the field must tackle on a daily basis. Roughly half of the course will deal with case studies of ethical dilemmas and the other half will involve students in making choices for the front of the mythical newspaper. Although there will be readings from books on the topics, students will be expected to read *The New York Times*, *The South Bend Tribune*, and *The Observer* on a regular basis, especially on the class days when the front-page decisions will be made. The stories in those newspapers will provide the

basis for those decisions. We will also consider how television deals with news on local and network levels.

FTT 40492. Media Stardom and Celebrity Culture

(3-0-3) Becker

Corequisite: FTT 41492

Much of America's contemporary popular culture, movies, TV, music, even sports revolves around stars, and yet few of us understand the implications of, or even the reasons for, our society's fascination with fame and celebrity. This course interrogates the cultural phenomenon of stardom from a variety of historical and theoretical perspectives. Across the semester, we will explore how stardom developed as a concept across the twentieth century, learn how to "read" star images, look at the development of the Hollywood star system, consider what the popularity of certain film stars might tell us about the issues of social identity, examine stardom as a global phenomenon, and question why celebrity is such an obsession today. Overall, our goal will be to develop tools for investigating the cultural significance of stardom and to use those tools to uncover what stardom and celebrity reveal about both our society and ourselves.

FTT 40493. Media Industries: History, Structure, Current Issues

(3-0-3) Ohmer

Prerequisites: (FTT 10101 OR FTT 20101 OR) AND (FTT 30101 OR FTT 30102 OR FTT 30461)

Corequisite: FTT 41493

This class is designed for students planning to seek jobs in film and television companies and for those wanting a better understanding of how the media industry has taken the shape it has today. We will explore the histories of particular companies and broader changes in the structure of the media industry as a whole in the last century. Some of the topics to be considered include: the impact on projects and performers of multimedia conglomerates such as GE/NBC/Universal and Disney/ABC/ESPN; the effects of recent mergers between Disney and Pixar and the WB and UPN; the increasing globalization of media companies, such as News Corp/Fox; and the trend towards media convergence, as evidenced by AOL Time Warner and Sony. Readings and discussions will familiarize students with concepts from historiography and political economy.

FTT 40501. Media and the Presidency

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

As the brouhaha over Howard Dean's "yell" illustrates, media have come to play a key role in the coverage of presidential elections. This course examines how print and broadcast media have functioned in US elections since the way we choose a president was first established. After a brief overview of changing relationships between journalists and presidential candidates in the 19th century, we will focus on elections since the 1920s, when radio first broadcast election updates. We will analyze how candidates have used radio, television, and the Internet to construct images of themselves and their platforms, and how journalists have become an active force in representing the political process. Rather than see electronic media as neutral or "objective," we will assess the narrative strategies and visual and verbal codes by which media present politics to us, the voters.

FTT 40600. Shakespeare and Film

(3-0-3) Holland

Corequisite: FTT 41600

Advanced study in the areas of theatre history, dramatic literature, criticism, and theory. Topics are taught in a seminar format. May be repeated for credit.

FTT 40630. Topics: Film/History/Controversy

(3-0-3)

Prerequisite: FTT 10101 OR FTT 20101

Corequisite: FTT 41432

From the earliest days of feature films, filmmakers have drawn on historical topics to tell enticing stories. At the same time, historical films have always drawn controversy from those who wish to correct the version of events portrayed. What is it about filmmaking that encourages such dramatization of historical events, and why do films often cause controversy when historical fiction novels rarely do? Does historical accuracy matter in film, and why? In this class, we will examine a number of films with historical subjects with the aim of understanding how films "make" history and why these films have such an effect on public debate.

We will also be studying a number of the films of director Oliver Stone, who has repeatedly drawn criticism for his historical films, and entered into debates with academic historians. This will be a seminar-style class dependent on discussion and debate.

FTT 40702. Audition Seminar

(3-0-3) Scott

Prerequisite: FTT 21001

Corequisite: FTT 41702

Preparation for advanced study of acting. A course of study for the semester is developed between the student and a faculty advisor or advisors (selected on the basis of goals established at the beginning of the course). Students who will be taking this course should consult with the instructor during the spring preregistration period in order to preliminary discuss future goals.

FTT 40900. History of Theatre before 1700

(3-0-3)

A rigorous survey of the development of theatre as an art form from the recorded beginnings in fifth-century BC Athens to the end of the 17th century, including the physical theatre, dramatic literature, production practices, cultural contexts, and theoretical foundations.

FTT 40901. History of Theatre since 1700

(3-0-3)

This course is a study of theatre history from 1700 to the present (1642 to the present in Britain), including theatre structures, production techniques, and drama, with an emphasis on the Western tradition (although Asian and African theatre are included). The course also relates to the development of the theatrical medium during the past three centuries to accompanying political, religious, technological, and socio-economic change. No prerequisite is required.

FTT 40902. Dramatic Literature before 1900

(3-0-3)

An advanced survey of theatrical literature and criticism before the beginning of the 20th century. Students will read one to two plays per week along with selected secondary critical literature.

FTT 40903. Dramatic Literature since 1900

(3-0-3)

This survey of theatrical literature of the 20th century will look at the ways theatre has reflected and shaped people's perception of themselves and their society in the last century. We will pay particular attention to issues of race, gender, and power in 20th-century dramatic literature, focusing on theatre's contribution to ongoing debates about gender and identity in the modern world. The plays we'll read will include Pirandello's *Six Characters in Search of an Author*, an early theatrical exploration of existentialism; Lorca's *The House of Bernarda Alba*, a chilling depiction of the restricted life of women in early 20th-century Spain; Barak's *Dutchman*, a controversial and shocking play about sexual and racial tension between a white woman and a black man; Churchill's *Top Girls*, an early feminist work by one of Britain's foremost female playwrights; and Hwang's *M. Butterfly*, in which a white man's assumptions about the "Orient" and women are unexpectedly turned against him.

FTT 40904. Voice in Theatre: Vocal Bodies

(3-0-3)

In the 20th century, voice gained importance in literature and theatre. Stressing innovative forms of vocality, modern texts and vanguard theatre aim to reveal the unconscious function of voice in written and spoken language. Verse or voice delivery are recognized not only as strategies to integrate physical heterogeneity in language and theatre, but poets and theatre artists emphasize the vocal aspect of language as different vocal bodies. This course proposes to study the theoretical and esthetic implication of this phenomenon by confronting the new strategies of voice in text and theater with historic ones. Among others, examples for text voices will be extracts from works by Dante, Sollers, Racine, Goethe, Shakespeare, Artaud, Brecht, Heiner Muller featuring the vocal delivery styles of artists themselves or of interpreters like Carmelo Bene, Alexander Moissi, Fritz Kortner, Dario Fo, Klaus Michael Gruber, Robert Wilson, Meredith Monk, and Laurie Anderson.

FTT 41000. French Theatre Production

(1-0-1)

Students transform into actors of the Illustre Theatre de l'Universite de Notre Dame du Lac in a creative collaboration that has come to be known as the French play. We rehearse during the fall semester, and perform the play in late January. Students from all levels are encouraged to audition; theatrical experience is not expected.

FTT 41001. Advanced Scene Study

(3-0-3)

Prerequisite: FTT 21001

This course will be an in-depth look at the acting process through a workshop study of monologues and scenes from the masters of modern theatre. The course begins with the plays of Chekhov and works through the 20th century to contemporary times.

FTT 41002. Advanced Acting Techniques

(3-V-3)

Prerequisite: FTT 21001

A course intended for the serious acting student, this advanced course uses method techniques in scene study and monologue work to hone the skills acquired in Character and Advanced Scene Study. Students will be responsible for finding, rehearsing, and performing texts from several genres. Class work will focus on impulse and response, creating realistic characters, and partner work. Rehearsals outside of class are mandatory.

FTT 41003. Advanced Film/Video Script Development

(3-0-3)

This class will introduce students to "Viewpoints," the movement-based acting training system developed by Anne Bogart. Viewpoints training helps to raise an actor's awareness of his or her body as a tool in creating theatrical meaning through its relationship to, and use of, space, architecture, rhythm, tempo, gesture, shape, and kinesthetic response. During the semester we will do a series of exercises in which actors will create their own non-script based theatre by exploiting the expression inherent in movement and relationship. Viewpoints training is a stimulating, exciting, and innovative method for expanding the actor's range and ability. Students must wear clothing and shoes that allow for a full range of movement.

FTT 41004. Advanced Theatre Production Workshop

(3-0-3)

Corequisite: FTT 41004

A workshop course in the process of theatre production, in which students learn to do a dramaturgical analysis of a play for production as well as assume a major production responsibility including, but not limited to, that of performer, stage manager, assistant stage manager, prop master, costumer, technical director, and assistant director.

FTT 41005. Acting Shakespeare

(3-0-3)

Prerequisites: FTT 21001 AND ONE OTHER ACTING CLASS

This course looks at Shakespeare's texts from the actor's perspective. Various techniques for unlocking meaning and emotional content will be introduced. Students will learn to analyze and perform the text through scene work and monologues. The class structure allows each student to create several different roles that will be performed at the end of the semester.

FTT 41008. Theatre and Social Activism

(3-0-3)

In this course we will explore the potential of theatre as social activism and as a vehicle for social change. The course will involve two modes of study: (1) investigation of a variety of techniques and approaches to creating activist, "grassroots" theatre (e.g. looking work by artist/activists like Augusto Boal ("Theatre of the Oppressed"), Bread and Puppet Theatre, ACT/UP, etc.); and (2) creation of original theatre pieces addressing social concerns in the local community (for example, students might focus on creating theatre centered on local environmental issues, the living wage campaign, the Michiana Peace Coalition, etc.). The class will culminate in public performances of our own "activist theatre," with the aim of making an impact and effecting change through the performing arts.

FTT 41101. Film and Television Theory Lab

(0-V-0)

Corequisite: FTT 40101

During the lab times, certain films will be viewed for further discussion in class.

FTT 41230. Contemporary Canadian Cinema Lab

(0-V-0)

Corequisite: FTT 40230

During the lab times, certain films will be viewed for further discussion in class.

FTT 41238. Irish Film and Culture Lab

(0-V-0)

Corequisite: FTT 40238

Certain films will be viewed for further discussion in class.

FTT 41241. Hong Kong Action Cinema in a Global Context Lab

(0-V-0)

Corequisite: FTT 40241

Certain films will be viewed for further discussion in class.

FTT 41410. Intermediate Film Production Lab

(0-V-0)

Corequisite: FTT 40410

This film production course will focus on 16mm black and white silent narrative filmmaking. We will explore the technical use and aesthetic application of the film camera and related equipment as well as the development of the short film narrative script. Students will shoot a short film lighting and composition exercise, an in-class film test, and ultimately produce, shoot, and edit one 4–6 minute, 16mm B/W film in teams of two. The projects will be edited entirely on film. The filmmaking process requires a lot of fieldwork on locations and transporting heavy equipment.

FTT 41431. Sex and Gender in Cinema Lab

(0-V-0)

Corequisite: FTT 40431

During the lab times, certain films will be viewed for further discussion in class.

FTT 41432. Topics: Sound Design Lab

(0-V-0)

Corequisite: FTT 40630

During the lab times, certain films will be viewed for further discussion in class.

FTT 41433. Cinema Ideologies Lab

(0-V-0)

Corequisite: FTT 40433

During the lab times, certain films will be viewed for further discussion in class.

FTT 41442. The Horror Film: Theories and Histories Lab

(0-V-0)

Corequisite: FTT 40442

Certain films will be viewed for further discussion in class.

FTT 41492. Media Stardom and Celebrity Culture Lab

(0-V-0)

Corequisite: FTT 40492

Certain presentations will be viewed for further discussion in class.

FTT 41493. Media Industries: History, Structure, Current Issues Lab

(0-V-0)

Corequisite: FTT 40493

Presentations will be viewed for further discussion in class.

FTT 41600. Shakespeare and Film Lab

(0-V-0)

Corequisite: FTT 40600

During the lab times, certain films will be viewed for further discussion in class.

FTT 41601. Issues in Film and Media Lab

(0-V-0)

Corequisite: FTT 43601

Lab attendance at screenings is required.

FTT 41602. Honors Seminar: Hitchcock Lab

(0-V-0)

Corequisite: FTT 43602

Certain films will be viewed for further discussion in class.

FTT 41702. Audition Seminar Lab

(0-V-0)

Corequisite: FTT 40702

Lab component for FTT 40702.

FTT 43601. Issues in Film and Media

(3-0-3) Crafton

Prerequisite: FTT 30101 OR FTT 30102*Corequisite:* FTT 41601

The purpose of this capstone course is to provide students concentrating in film and media with a senior seminar in which they may participate in some of the current critical debates in advanced film, television, and new media studies, through class discussion and in individual projects. The topics vary each semester, but might include the role of government control of and social influence on the media, the effects of new global markets, concerns about representing race and gender, and new critical and aesthetic approaches. The course will be formatted as the kind of seminar that one might encounter in a graduate program, with students sitting around a table giving oral presentations based on readings and screenings. The class will meet in one 150-minute session, with a short mid-session break. There will be guest faculty visiting the class.

FTT 43602. Honors Seminar: Hitchcock

(3-0-3) Wojcik

Corequisite: FTT 41602

This course aims to teach honors students research methods, project development and advanced writing techniques through an examination of Alfred Hitchcock. Students will see numerous Hitchcock films and TV shows, and read and research extensively in the literature on Hitchcock. Students will consider different approaches to Hitchcock, including auteurist, generic, feminist, psychoanalytic, and queer methodologies. Students will also consider the work of Hitchcock collaborators, including James Stewart, Cary Grant, and Bernard Hermann. By invitation only.

FTT 45001. Theatre Internship

(V-0-V)

Placement of advanced students with professional or community theatre organizations. Students can take no more than two 45001 internships for a total of no more than six credit hours.

FTT 45430. Documentary: Critical Analysis and Method

(3-0-3)

We see documentaries in many different forms every day through journalism, reality television, the Discovery channel, and the nonfiction film. Documenting ourselves and others has become a major component of the American discourse for education, entertainment, and propaganda purposes. This course turns a critical, anthropological, and methodological eye towards interpreting, constructing, and contextualizing the documentary. The students will view and analyze a variety of documentary formats as well as participate in the production of a short video documentary. Lectures and readings will be drawn from anthropology, culture theory, film theory, and practice with an emphasis on elements of production.

FTT 45501. Media Internship

(V-0-V)

Students who successfully complete at least two of the following courses, FTT 30410, FTT 30462, or FTT 30463, may be eligible for an internship at a television station or network, radio station, video production company, film production company or similar media outlet. Interns must work 10–15 hours per week and compile 150 work hours by the end of the semester (120 hours for the

summer session) to obtain three credits. Interns will complete a project, mid-semester progress report and a final evaluation paper.

FTT 46600. Thesis/Undergraduate Research

(V-0-V)

Research for the advanced student. Taken S/U only.

FTT 47001. Practicum

(V-0-V)

Individual practical projects for the advanced student. May be repeated up to six hours of credit. Taken S/U only.

FTT 47601. Special Studies

(V-0-V)

Research for the advanced student.

FTT 47602. Special Studies: Film Society

(V-0-V)

The Film Society is a film screening-and-discussion group that meets once a week in the Browning Cinema to watch an independent, foreign, or classic film. Students can take the course for either zero credit or one credit. Those taking it for one credit will have a minimum attendance and writing requirement. The meeting times and requirements may vary from semester to semester. Contact the sponsoring professor for more information.

FTT 50300. Directed Readings

(3-0-3)

By permission of professor only.

FTT 50404. Introduction to Film and Video Production

(4-0-4)

An introductory course in the fundamentals of shooting, editing, and writing for film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. The course requires significant amounts of shooting and editing outside class. Students produce short video projects using digital video and Super 8mm film cameras and edit digitally on computer workstations. The principles of three-camera studio production are also covered. (Summer only).

FTT 50530. Contemporary Hollywood

(3-0-3) Collins

This course concentrates on the most important developments in American cinema and culture since the 1960s. Beginning with the collapse of the classic studio system at the end of the 1950s, this course explores the profound changes that the film industry has undergone over the decades, and investigates the major aesthetic developments that occurred in film and other media during the same period—pop art, metafiction, and postmodernism. (Summer only).

FTT 50591. Entertainment and Arts Law

(3-0-3) Wilson

Persons in various positions in the arts and entertainment communities encounter a wide range of legal issues. Students will be introduced to the basic concepts of contract, copyright and First Amendment issues. In addition, students will examine the concepts of rights of publicity and privacy, story ideas, receipt of credit, and trademarks. Students are also exposed to the inner workings of the film, television, theatre, music, and publishing industries. It is assumed the students have no prior experience in the study of law. (Summer only).

FTT 56602. Thesis Direction

(V-0-V)

Permission required.

FTT 57601. Special Studies

(V-0-V)

Special projects for the advanced student.

University Writing Program

FYC 13090. Introduction to Academic Writing and Research

(3-0-3) Kinney

The aim of First-Year Composition 13090 is to give students a thorough overview of the conventions of academic writing and research. During the course of the term, students will write three kinds of papers: (1) a “framed” argument that integrates an interpretation of different readings; (2) a “researched” argument based on both assigned readings and library sources; and (3) rhetorical analyses that entail focusing on how writers use language to fulfill their goals. These papers help students come to terms with the conventions of academic writing and argument, preparing them for the kind of writing assignments they will encounter in FYC 13100 and other writing-intensive courses. Unlike in FYC 13100, however, students in FYC 13090 write papers that are relatively brief, allowing extra time and opportunity to practice and cultivate their revision skills.

FYC 13100. First-Year Composition

(3-0-3)

First-Year Composition is designed to help students learn how to identify an issue amid conflicting points of view and craft an argument based on various sources of information. The course stresses the identification and analysis of potential counter-arguments and aims to develop skills for writing a research proposal, for conducting original research, and for using print and electronic resources from the library.

FYC 13200. Community-Based First-Year Composition

(3-1-4)

In cooperation with the Center for Social Concerns, these sections of composition place students in learning situations in the wider community where they are in contact with people who are dealing with the specific content issue of their section. Because the necessary time commitment for these sections is greater, students are awarded an extra credit hour for their enrollment (four instead of three). We welcome students with commitment to social justice and community service to enroll.

FYC 13300. Multimedia First-Year Composition

(3-0-3)

Because researching and composing arguments is increasingly linked to technological tools, multimedia sections of First-Year Composition teach students how to make the most of a wide array of resources. From standard tools, such as Microsoft Word to more powerful websites and software, students in multimedia sections use composition technology to its fullest while exploring the unique opportunities and challenges of composing in the 21st century. While students do not need any prior technological skills, they should be ready to learn many of these skills over the course of the semester. Students will be required to bring a wireless laptop to class and to keep their laptops functioning properly throughout the semester.

FYC 13400. Advanced First-Year Composition

(3-0-3)

Advanced First-Year Composition is a writing workshop designed as an elective for students who have advanced placement credit for First-Year Composition but who seek opportunities to enhance their academic writing skills. Space is limited.
