Bulletin of Information

University of Notre Dame

Undergraduate Programs

Vol. 106, No. 2, August 2010

The course offerings and requirements of the University of Notre Dame are continually under examination, and revisions are expected. This *Bulletin of Information* is not a contract; it merely presents the offerings and requirements in effect at the time of publication and in no way guarantees that the offerings and requirements will remain the same. Every effort is made to provide advance information of any changes.

Nondiscrimination

The University of Notre Dame does not discriminate on the basis of race, color, national or ethnic origin, sex, disability, veteran status or age in the administration of any of its educational programs, admissions policies, scholarship and loan programs, athletic and other school-administered programs or in employment.

The University has designated the Director of its Office of Institutional Equity to handle all inquiries regarding its efforts to comply with and carry out its responsibilities under Title IX and under Section 504 of the Rehabilitation Act of 1973. The Title IX and Section 504 coordinator may be contacted as follows:

Director
Office of Institutional Equity
414 Grace Hall
University of Notre Dame

138 <i>Bachelor of Science with a Major in Applied and Computational Mathematics and Statistics</i>		

Safety Information from Notre Dame Security/Police

The security of all members of the campus community is of paramount concern to the University of Notre Dame. Each year the University publishes an annual report outlining security and safety information and crime statistics for campus. This brochure provides suggestions regarding crime prevention strategies and important policy information about emergency procedures, reporting of crimes, law enforcement services on campus, and information about support services for victims of sexual assault. The brochure also contains information about the University's policy on alcohol and other drugs, the SafeWalk program, and campus shuttle service.

This brochure is available by writing to:

Office of the Director
University Security/Police
Room 204, Hammes Mowbray Hall
Notre Dame, IN 46556-5675
or calling the department at 574-631-8338.

ACADEMIC CALENDAR

UNIVERSITY OF NOTRE DAME AND SAINT MARY'S COLLEGE JOINT ACADEMIC YEAR CALENDAR FOR 2010–2011

FALL 2010 SEMESTER

Aug. 19–21	Thur–Sat	Orientation and counseling for new students at Saint Mary's College
Aug. 19	Thursday	Orientation, advising, and registration for readmitted and new transfer students at Notre Dame Orientation for first year International students at Notre Dame
Aug. 20	Friday	Undergraduate halls open for first year student move-in beginning at 9:00 a.m. for ND Orientation, advising, and registration for new graduate students at Notre Dame
Aug. 21	Saturday	Residence halls open at 9:00 a.m. for Saint Mary's College
Aug. 21–22	Sat–Sun	Orientation and advising for freshmen at Notre Dame
Aug. 22	Sunday	Undergraduate halls open for upperclassman move-in beginning at 9:00 a.m. for ND
Aug. 23	Monday	Classes begin for Saint Mary's College
Aug. 24	Tuesday	Classes begin for Notre Dame Mass—formal opening of school year at Notre Dame
Sept. 1	Wednesday	Last date for all class changes
Sept. 6	Monday	Labor Day—classes are in session
Sept. 24	Friday	Last date to drop a class at Saint Mary's College
Oct. 15	Friday	Mid-Term deficiency reports submitted through insideND by 3:45 p.m. at Notre Dame
Oct. 16–24	Sat–Sun	Mid-Term break
Oct. 18	Monday	Mid-Term deficiency reports due in PRISM by 8:00 a.m. at Saint Mary's College
Oct. 29	Friday	Last day for course discontinuance at Notre Dame
Nov. 15–Dec. 1	Mon–Wed	Registration for the Spring 2011 semester at Notre Dame and Saint Mary's College
Nov. 24–28	Wed–Sun	Thanksgiving Holiday
Nov. 30–Dec. 12	Tue–Sun	Course Instructor Feedback administered at Notre Dame
Dec. 9	Thursday	Last class day
Dec. 10–12	Fri–Sun	Reading days (no examinations)
Dec. 13–17	Mon–Fri	Final examinations
Dec. 18	Saturday	Undergraduate halls close at 2:00 p.m.
Dec. 20	Monday	All grades submitted through insideND by 3:45 p.m. at Notre Dame
Dec. 21	Tuesday	All grades due in PRISM by Noon at Saint Mary's College
Jan. 2	Sunday	January graduation date (no ceremony)

Mission Statement of the University of Notre Dame

CONTEXT

This statement speaks of the University of Notre Dame as a place of teaching and research, of scholarship and publication, of service and community. These components flow from three characteristics of Roman Catholicism which image Jesus Christ, his Gospel, and his Spirit. A sacramental vision encounters God in the whole of creation. In and through the visible world in which we live, we come to know and experience the invisible God. In mediation the Catholic vision perceives God not only present in but also working through persons, events, and material things. There is an intelligibility and a coherence to all reality, discoverable through spirit, mind and imagination. God's grace prompts human activity to assist the world in creating justice grounded in love. God's way to us comes as communion, through the communities in which men and women live. This community includes the many theological traditions, liturgies, and spiritualities that fashion the life of the church. The emphasis on community in Catholicism explains why Notre Dame historically has fostered familial bonds in its institutional life.

A Catholic university draws its basic inspiration from Jesus Christ as the source of wisdom and from the conviction that in him all things can be brought to their completion. As a Catholic university, Notre Dame wishes to contribute to this educational mission.

THE MISSION

The University of Notre Dame is a Catholic academic community of higher learning, animated from its origins by the Congregation of Holy Cross. The University is dedicated to the pursuit and sharing of truth for its own sake. As a Catholic university, one of its distinctive goals is to provide a forum where through free inquiry and open discussion the various lines of Catholic thought may intersect with all the forms of knowledge found in the arts, sciences, professions, and every other area of human scholarship and creativity.

The intellectual interchange essential to a university requires, and is enriched by, the presence and voices of diverse scholars and students. The Catholic identity of the University depends upon, and is nurtured by, the continuing presence of a predominant number of Catholic intellectuals. This ideal has been consistently maintained by the University leadership throughout its history. What the University asks of all its scholars and students, however, is not a particular credal affiliation but a respect for the objectives of Notre Dame and a willingness to enter into the conversation that gives it life and character. Therefore, the University insists upon academic

freedom, which makes open discussion and inquiry possible.

The University prides itself on being an environment of teaching and learning that fosters the development in its students of those disciplined habits of mind, body, and spirit that characterize educated, skilled, and free human beings. In addition, the University seeks to cultivate in its students not only an appreciation for the great achievements of human beings but also a disciplined sensibility to the poverty, injustice, and oppression that burden the lives of so many. The aim is to create a sense of human solidarity and concern for the common good that will bear fruit as learning becomes service to justice.

Notre Dame also has a responsibility to advance knowledge in a search for truth through original inquiry and publication. This responsibility engages the faculty and students in all areas of the University, but particularly in graduate and professional education and research. The University is committed to constructive and critical engagement with the whole of human culture.

The University encourages a way of living consonant with a Christian community and manifest in prayer, liturgy, and service. Residential life endeavors to develop that sense of community and of responsibility that prepares students for subsequent leadership in building a society that is at once more human and more divine.

Notre Dame's character as a Catholic academic community presupposes that no genuine search for the truth in the human or the cosmic order is alien to the life of faith. The University welcomes all areas of scholarly activity as consonant with its mission, subject to appropriate critical refinement. There is, however, a special obligation and opportunity, specifically as a *Catholic* university, to pursue the religious dimensions of all human learning. Only thus can Catholic intellectual life in all disciplines be animated and fostered and a University, Notre Dame pursues its objectives through the formation of an authentic human community graced by the Spirit of Christ.

The University of Notre Dame

Notre Dame is at once a Catholic university, a national symbol, and an international community of religious faith, intellectual inquiry, and devotion to the powerless. Among its conspicuous features are its academic reputation, an elaborately designed and golden-domed administration building, a famous collegiate football team, a popular shrine to the Mother of God, two fascinating lakes, a pleasantly landscaped campus, and a spirited student body surrounded by an intensely loyal community of alumni and friends who unabashedly refer to themselves as the Notre Dame "family."

The institution was founded on the site of an old Catholic missionary outpost in 1842. The founders were a small and impoverished band of French and Irish religious brothers whose leader was Rev. Edward F. Sorin, C.S.C., an impetuous, strong-willed, and apparently tireless priest. In a memoir titled *My Notre Dame*, Thomas Stritch, professor emeritus of American Studies and Notre Dame historian, wrote that Father Sorin "carved Notre Dame out of the Northern Indiana wilderness and by sheer strength of character made it go. He built and rebuilt, recruited students where he could, and gradually began the unique image Notre Dame still enjoys. In a college or university, reputation is everything. Somehow Sorin developed a favorable one for Notre Dame, one that reverberated throughout the American Catholic world, the Eastern Seaboard as well as the Midwest. Long before football was invented, Notre Dame caught the imagination of American Catholics."

Father Sorin was a member of the Congregation of Holy Cross, a then recently formed Catholic religious community that would own and administer the University from its foundation until 1967, when the University's governance was legally transferred to a two-tiered, mixed board of lay and religious trustees and fellows. The University's bylaws ensure that the Congregation will continue to exert a prominent influence on its administration. They stipulate, for example, that Notre Dame's presidents must always be chosen from among the priests of the Congregation's Indiana Province. The Congregation also ministers to the University it founded through the many Holy Cross priests serving on the University's faculty, the counselors and chaplains who live with the undergraduate students in the residence halls, and the staff of the campus ministry office.

In 1972, five years after the change in governance, a new chapter of University history began to be written as the first undergraduate women were admitted to Notre Dame. A quarter of a century later, the majority of living Notre Dame alumni have been graduated from a fully coeducational institution.

Obviously, many other aspects of the University have been changed by more than a century and a half of turbulent and unpredictable happenings in the Catholic Church and in American life and culture. Fires, outbreaks of infectious diseases, the Civil War, waves of European immigrants and refugees, Church controversies, the Great Depression, two world wars and several smaller bloodlettings, the civil rights movement, and other social convulsions in America, all have involved members of the Notre Dame family and have left deep and indelible imprints on the character and rich tradition of the institution. Rev. William Corby, C.S.C., a successor to Father Sorin, played a memorable national role as a Union chaplain at the Battle of Gettysburg; Rev. Julius Nieuwland, C.S.C., a scientist and faculty member, invented synthetic rubber; Notre Dame students were participants in a nationally publicized scuffle

STUDENT LIFE

with a resurgent Ku Klux Klan; the University's colorful football team and something of its campus atmosphere were enshrined in American history and myth by a film featuring a memorable performance by an actor who later became a president. More recently, a second film dramatized the University's spirit and gave a new name to unheralded athletes—*Rudy*.

Most notably, Notre Dame's reputation, so zealously nurtured, sustained, and celebrated by Father Sorin and his successors, has become increasingly international in recent years because of the establishment of numerous academic and community service programs in the Holy Land, Mexico, Chile, Ireland, England, Austria, France, Italy, Spain, Australia, Japan, and other countries.

Despite these remarkable and generally welcome alterations in institutional shape and scope, Notre Dame's proud and self-conscious claim to be a Catholic university and its intent to be a great Catholic university remain unchanged from Father Sorin's day. The University boasts a core curriculum that includes required courses in theology and philosophy. In administrative and disciplinary affairs, Notre Dame holds itself responsible to the teaching of the Catholic Church, and it holds its students, faculty, and staff responsible for their own conduct, particularly in matters affecting the common good. Precisely because it is a Catholic university, it is a place where men and women from all faiths and backgrounds are to be made welcome. The staffs of the residence halls, campus ministry, the Center for Social Concerns, the Institute for Church Life, and the Alumni Association all continue to invite and encourage Notre Dame students, graduates, faculty, and administrators to pray together, to discuss and share their hopes, joys and sorrows, to bear with and sustain one another, and always to serve those most in need.

Notre Dame's Vision for Undergraduate Education

Notre Dame is a vibrant academic community dedicated to scholarship and the advancement of knowledge, where students find opportunities on campus and abroad to develop initiative and leadership, and to learn by being fully engaged in our classrooms, libraries, research laboratories, studios, and residence halls among other venues. Notre Dame seeks to nurture in its students intellectual passion and a keenly developed moral sense, goals attainable only where freedom of thought and expression flourishes in a culture built on respect, responsibility, and integrity.

Drawing on our Catholic intellectual tradition, which fosters the integration of faith and reason, Notre Dame offers an undergraduate education rooted in the fundamental belief that all truths participate in the Divine Truth, a belief that motivates the vigorous search for knowledge.

Notre Dame inspires students to pursue learning as a good in itself and to see that pursuit as involving the whole person. We cultivate each student's capacity to think creatively and critically while valuing the rich inheritance that comes from our shared past. We expect our graduates to be conversant with and equipped to contribute to the best thinking across the disciplines. Notre Dame helps students acquire the virtues necessary for living a good human life and prepares them to become leaders in their professions, for their communities, the Church, and the world.

As a community committed to service, we challenge students to grow in their understanding of complex human realities, and we call them to respond to the needs of the world with compassion and committed action. By educating students to be engaged by both their intellectual labors and their faith, we aspire to offer an education that is Catholic in the broadest sense of the word, both in welcoming all persons of good will to our university community and turning outward to embrace the larger world.

Formed by a rich liberal education and possessed of mature faith in service to others, our graduates leave Notre Dame prepared to take their places at the forefront of discovery, innovation, and human achievement.

Student Life

First and foremost, Notre Dame offers its students a quality education, made possible by an excellent faculty, advanced research facilities, experienced administration, and a well-developed educational philosophy. But cognizant that values, character, and leadership skills are developed as often in the context of caring relationships as in selected reading from various textbooks, the University offers more to its students—a student life rich in depth and variety, one that is nationally recognized and characteristically deep in its impact on those who share in it. To make our "definition" of the University more complete, we shall briefly describe some of the main aspects of student life. Our first consideration will be the students themselves.

Students. Notre Dame is one of a handful of truly national universities, with students drawn from all 50 states and more than 100 countries. One factor all the students have in common, though, is strong academic ability. In addition, an annual survey of freshmen taken by the American Council on Education indicates that Notre Dame students, to a greater degree than their peers nationally, are confident of academic success and see themselves as having originality and leadership potential.

The Campus. One especially appealing aspect of life at Notre Dame is the campus itself. The University's 1,250 acres, with two lakes, extensive wooded areas, and tree-lined quadrangles, contribute to a serene park-like atmosphere that does wonders to alleviate the pressures of academic life.

The collegiate Gothic style of many of the structures, the ornate Main Building (with a golden dome), and the Basilica of the Sacred Heart and the statuary and masonry carvings that abound on campus have always been a source of delight to students and tourists alike.

Residentiality. Over the years no single nonacademic characteristic of Notre Dame has made a greater impression on students than the University's residential tradition. It is a tradition as old as the University itself. Our founder, Father Edward Sorin, established at Notre Dame the sort of residential ambience he had known at French universities. Nineteenth-century students slept, ate, studied, and attended classes en masse in wings of the Main Building. The regimen was strict: a prefect roused students at 6 a.m., supervised their prayer, meals, study, and recreation and returned them to bed 16 hours later.

Times have changed, as well as the discipline, but not the importance of residentiality in student life. According to a committee focusing on University priorities, "Next to its academic mission and Catholic character, residentiality is the least dispensable of Notre Dame's hallmarks."

Each of Notre Dame's 29 undergraduate residence halls has an atmosphere and character of its own. Each has its traditions and generates a feeling of loyalty and camaraderie among its inhabitants. The halls are staffed by rectors, assistant rectors, and resident assistants who endeavor to challenge, facilitate, and support students in integrating the meaning and practice of Christianity today through the development of a community that is humanizing, worshipping, and service-oriented. Consequently, the residence halls form the base of many spiritual, athletic, social, and volunteer service activities. Spirited rivalries between residence halls in various sporting and social events are common. Life in the residence halls provides the context for many relationships among students; social fraternities and sororities are thus considered unnecessary.

First-year students are required to live on campus, and the vast majority of upper-class students find it worthwhile to do the same when space is available. Approximately 80 percent of undergraduates live on campus. At the same time, a variety of off-campus housing is available in the South Bend area.

Spiritual Life. Notre Dame stands for the belief that all who teach, work, and study at the University should discover, reinforce, and strengthen their convictions, values, and traditions. A mature religious or spiritual life is integral to full human development. This can be hidden, stifled, or allowed to stagnate; but it can also be challenged and encouraged to grow. In residence hall life and classroom, in liturgy and celebration, in volunteer work and athletic competition, Notre Dame people strive for a wholeness in their lives, even a holiness, as they discover who they are in these multiple arenas.

STUDENT LIFE

Notre Dame is a professedly Catholic place, which means—at its core—that all are welcome. Beliefs are strengthened by commitment to God, to one another, and to the human family in love and service, while at Notre Dame and throughout life.

The Office of Campus Ministry provides a series of retreats, catechetical instruction for those who wish to join the Catholic Church or find deeper understanding of religious matters, a program of preparation for marriage, and counseling in matters of personal conscience formation. Mass is celebrated daily in the Basilica of the Sacred Heart and in many of the residence hall chapels. There are frequent prayer services of many forms throughout the year, including ecumenical prayer services sponsored by Campus Ministry. Students who are not Catholic are always welcome at any of the various activities sponsored by Campus Ministry. Congregations of many faiths in South Bend also welcome students in their worship.

Clubs and Organizations. Notre Dame has a wealth of clubs and organizations for interested students. Interests and commitments vary widely and are reflected in the number and scope of groups.

Some clubs have an academic orientation, ranging from campus branches of national organizations, such as the American Institute of Architects, to strictly local clubs, such as the Chemistry and Finance clubs.

Other groups have an ethnic or special-interest focus. These clubs include the Asian American Association, the Black Cultural Arts Council, the Chinese Students Association, and the Native American Students Association, to name a few.

Students who enjoy music may choose from a wide selection of choirs, bands, and ensembles. Students may audition for the renowned Notre Dame Glee Club, the Notre Dame Liturgical Choir, the Notre Dame Chorale, the Notre Dame Folk Choir, Voices of Faith gospel ensemble, or the Notre Dame Women's Choir. The famous Notre Dame Marching Band, the nation's oldest, continuous university marching band, is one of many choices available for musicians. Another is the concert band, which travels to a different part of the United States each spring, representing Notre Dame in concert. Other specialty groups include a jazz band and orchestra.

Center for Social Concerns (CSC). The Center for Social Concerns provides a wide variety of service-learning and social action opportunities, programs, seminars, and courses. For more information, see "Center for Social Concerns," later in this section of the *Bulletin*.

Media. Students with interests in journalism usually are attracted to an outlet in the various media on campus.

The Observer, an independent student newspaper serving the Notre Dame-Saint Mary's College community, is published five times a week, offering

a vital line of communication within the University, as well as the chance to keep up with the "outside world."

The *Scholastic* is a news/general information magazine, and the oldest college publication in the country. The *Juggler*, Notre Dame's journal of the arts, is published once a semester and features prose, poetry, photography, and illustrations. The award-winning *Dome*, the University yearbook, appears every April.

There are a number of other student publications with more specialized audiences—for example, *Notre Dame Student Business Review* and *Technical Review*, which appear periodically throughout the year and are student-produced.

WSND/FM and WVFI are the University's student-run broadcast media. WVFI, which broadcasts over the Internet, airs mostly progressive rock and special programs, while WSND has a more classical selection (until late evening, when rock and jazz are featured).

Annual Events. Notre Dame students look forward to participating in several events that occur annually on campus.

Notre Dame's theatre department presents several major productions each year, and tryouts are open to all students. The Notre Dame Student Players present less traditional theatre, providing one drama or musical each semester.

The Notre Dame Literary Festival is a celebration of the literary arts. Visiting authors read from their works, expound on personal philosophy and offer student workshops. Guests have included Ken Kesey, W.P. Kinsella, Jean and Robert Hollander, and Candace Bushnell.

Students also take advantage of the nearby Lake Michigan beaches and the Michigan ski areas. Trips to Chicago are frequently organized to attend the theatre, museums, shops, or sporting events or just to spend the day sightseeing. South Bend, with a metro population of some 275,000, offers shopping, parks, sports, movies, and cultural events. The East Race Waterway is an attraction providing kayaking, tubing, and rafting.

Athletics. The name "Notre Dame" no longer brings thoughts of just a football powerhouse, and with good reason. Notre Dame has developed into an outstanding academic institution but at the same time has expanded its athletic excellence beyond the football field.

INTERCOLLEGIATE

The University is committed to a well-rounded program for both men and women. The Fighting Irish athletic tradition, renowned throughout the United States, encompasses much more than football and basketball. Notre Dame boasts national contenders in many Olympic sports, including women's soccer, baseball, men's and women's fencing, and hockey,

all of which ranked number one in the country at some point during the past five seasons. Since 2001, Notre Dame has won national championships in women's basketball ('01), women's soccer ('04), and fencing ('05).

The women's intercollegiate athletic program, which has grown tremendously over the last 20 years, now includes 13 varsity sports (there are also 13 men's sports). Notre Dame women student-athletes compete in basketball, tennis, fencing, lacrosse, swimming and diving, volleyball, softball, golf, indoor and outdoor track, cross country, soccer, and rowing.

The Notre Dame student body plays an important role in the success of teams that represent the University. Anyone who has attended a football pep rally or seen a top-ranked basketball team upset in the Joyce Center knows why. The pride and loyalty displayed by "the greatest student body in the world" are a moving force that embodies the spirit of the Notre Dame community. Athletic contests at Notre Dame are an integral part of the social life as well as an opportunity for the athletically gifted to test their skills with the nation's best.

Family Programming is an integral part of the RecSports programming package. With roots tied deeply to Notre Dame's mission, Family Programming seeks to meet the recreational needs of Notre Dame's families in order to help families grow stronger physically, mentally, and spiritually. Even Fridays is one of our main family programs. Even Fridays occurs on the second and fourth Friday of every month. These are traditional family recreation opportunities such as bowling, swimming, game nights, and bike rides. All Even Friday events are from 5:30–7:30PM and are designed to reach a wide range of family ages and abilities. Family FIRST (Fitness Instruction, Recreation, & Sports Training) is our other main family program. Family FIRST classes focus more specifically on the fitness needs of families. Typical classes are yoga, martial arts, cardio, fixed cycling, and rock climbing.

FACILITIES

Notre Dame is home to some of the finest athletic facilities at any university. The 78,000-square-foot Rolfs Sports Recreation Center has a large state-of-the-art fitness room with more than 30 cardiovascular machines and a full complement of strength machines and free weights. The Rolfs also has a three-lane, 1/8 mile track; three courts for basketball, volleyball, and badminton; a rink-style court for soccer and inline hockey; and two activity rooms for dance, aerobics, and martial arts. In 2007–08, Rolfs Sports Recreation Center celebrated its 10th anniversary by adding new audio-visual technology in meeting rooms and installing a new "cardio theatre" in the fitness room to enhance participant experience.

The Rockne Memorial is legendary for its highly competitive pickup basketball games but also has

STUDENT LIFE

10 handball/racquetball courts, one combination squash/handball court, a swimming pool with a spectator gallery, a smaller pool for family use, a climbing wall, a weight room, a fitness room, and two rooms for dance and group exercise. In 2007–08, the Rockne Memorial added new audio-visual technology in the First Aid/CPR classroom, completed updating of all water fountains including cooling and filtration, created a “spinning studio” in the former racquetball court and upgraded to larger 50-pound washer and dryer equipment.

In addition to the nine-hole Notre Dame Golf Course, the 18-hole William K. and Natalie O. Warren Golf Course opened in the spring of 2000 on the northeast edge of campus. Other outside facilities include basketball courts in several locations, 14 outdoor tennis courts, and several multipurpose playing fields.

Built in 1968, Notre Dame’s Joyce Center has been called one of the most complete sports complexes in the country. Not only is there a 9,800-seat basketball/volleyball arena (Purcell Pavilion) but also a field house containing a two-lane track, a 2,667-seat hockey arena, boxing and weight rooms, and five volleyball courts. Elsewhere in the building are an auxiliary gym, two intramural gyms and a gym for fencing, six handball/racquetball courts, and two squash courts. The Rolfs Aquatic Center, with its Olympic-sized swimming pool, completes this complex.

Purcell Pavilion at the Joyce Center opened in November for the 2009-10 season. The arena was redone including the installation of chair-back seating throughout the arena. The construction encompasses a new three-story structure at the south end that includes a new three-story lobby, the Notre Dame ticket operations, additional area for restrooms and concessions, a varsity shop to sell apparel and souvenirs, in addition to a new club seating and hospitality area.

The Melissa Cook Softball Stadium opened for competition on April 13, 2008. This state-of-the-art venue honors the memory of former Irish softball player Melissa Cook. It features a brick/stucco exterior, Bluegrass sod outfield, a Daktronics scoreboard with full color message center, Musco lighting, heated dugouts, home and visitor locker rooms, training room, spacious press box, six batting cages, chair back and bleacher seating, interior restrooms, and concession stand.

The Guglielmino Athletic Complex, affectionately referred to as “The Gug” (pronounced Goog) opened in the fall of 2005. The 95,840-square-foot facility houses locker rooms for both the football student-athletes and coaches, coaches’ offices, team meeting rooms, a 500-seat auditorium, athletic training, and the new 25,000-square foot Haggar Fitness Center, used by all of Notre Dame’s 26 varsity athletic teams, with the latest in state-of-the-art strength training equipment, a 50-yard track for speed workouts,

and a 45-by-18-yard Prestige Turf field for team stretching exercises and workouts.

The Loftus Sports Center houses Meyo Field. The center, which measures 614 by 210 feet, also contains practice areas for lacrosse, soccer, baseball, and softball. A six-lane indoor track circles Meyo Field, a 120-yard synthetic-turf practice field (new in 2003).

The University’s Eck Pavilion, a 35,000-square-foot structure, is the place on campus for indoor tennis. Inside are six courts, coaches’ offices, showers and lockers, a repair shop, a vending lounge, and an observation deck. The pavilion is used by the varsity men’s and women’s tennis teams.

Other facilities used by Irish athletic teams include:

Notre Dame Stadium, with its 80,795 seats, home to Irish football since 1930.

Frank Eck Stadium, with its 2,500 seats, home to Irish baseball since 1994.

Labar Practice Complex, with its two artificial turf (used primarily by the football squad) practice fields and one natural grass field, used by the Irish football, lacrosse and soccer teams, in addition to Rec Sports.

The fields are lighted and secured by an eight-foot-fence.

Recently completed new facilities include:

Alumni Soccer Stadium—Notre Dame opened the Alumni Soccer Stadium (men’s and women’s soccer) in 2009. The approximately 3,000-seat facility, which sits side by side with the new Irish lacrosse stadium, features a natural grass field, fully-equipped locker rooms, restrooms and concession areas, an expanded press box, a state-of-the-art light and sound system.

Outdoor Track and Field Complex—The new nine-lane track is located southeast of the Joyce Center and is the competition and practice site for the men’s and women’s track and field teams. Throwing and jumping events are provided in two directions, and a warm-up area is located at one end of the track.

Arlotta Lacrosse Stadium—Arlotta Stadium is the new home for men’s and women’s lacrosse programs. Located east of the Joyce Center, Arlotta Stadium features over 2,000 permanent seats with additional seating available on a grass berm opposite of the stands, lights, an artificial-turf field, locker rooms, player lounges, the press box has over 20 seats for media and support staff along with three broadcast booths, restrooms and concession areas. The first event in the new stadium was held October 16, 2009 as the men’s lacrosse team played the Iroquois National team in an exhibition contest. Women’s lacrosse held their first event in the new stadium on March 7, 2010 vs Dartmouth.

Ice Arena—Construction of the new hockey ice arena began in the spring of 2010. The yet-to-be named building is just north of Edison Road and just west of the new track and field facility. The facility will include two sheets of ice (one of them Olympic-sized). The main arena will be named the Charles W.

“Lefty” Smith Jr. Rink with seating for 5,000 fans. The facility will also include offices, locker rooms and weight and cardio training facilities for the Notre Dame hockey program. The plans also include restrooms, concessions and novelty stand areas on the main concourse with club seating set for the third level. The new ice arena will replace the Joyce Center fieldhouse as Notre Dame’s home for ice hockey, and is projected to be ready for play starting with the 2011–12 season.

Student Government. The unique blend of elements that gives the Notre Dame community its identity has, over a period of years, shaped the character of the student government.

The greatest influence on the student government is the system of residence halls, which not only provides students with a place to live but also serves as the principal center for social interaction on campus. Each hall has its own government, consisting of a hall president, vice president, Cabinet, and judicial board, which works in cooperation with the hall staff to develop the best possible environment for its residents. As the basic unit of student government, the halls, and their needs significantly shape the campus-wide student government.

The relatively simple structure of the student government has evolved gradually in response to changing attitudes and needs of the student body. At the head of the student government is its chief executive officer, the student body president. Although the duties of the job have tended to vary with the priorities of each officeholder, in general the president represents the interests of the student body in all areas of life at Notre Dame.

The most representative student government groups are the Hall Presidents’ Council and the Student Senate, both of which meet weekly to discuss the various aspects of residence and University life, and to coordinate activities among the halls and across campus.

The Campus Life Council was created by the University’s Board of Trustees to allow for discussion among students, faculty, and administrators concerning life on campus. The council is empowered to pass resolutions recommending student life policy changes to the administration.

The programming arm of the Student Senate at Notre Dame is the Student Union Board. This board coordinates such events as lectures, plays, concerts, movies, and more. In addition, it coordinates *The Show*, a major back-to-school campus concert, and the Notre Dame Literary Festival (which were previously mentioned under “Annual Events”), as well as the Collegiate Jazz Fest, Acoustic Cafe, student bands, and other student performances, professional entertainment, and special events. The Student Union Board also coordinates services such as plant and furniture sales, as well as refrigerator rentals.

Student Conduct. A Catholic university is a society composed of faculty and students whose primary

purpose is the pursuit of Christian wisdom. The society can exist only in an atmosphere of responsibility and good order. The University seeks, therefore, to provide those conditions and opportunities best suited for educating the student.

Students registering at the University of Notre Dame agree to abide by the regulations concerning student conduct set forth in *du Lac, A Guide to Student Life*, which is distributed to each student. *du Lac* is also available on the University's website, nd.edu.

The University reserves the right to deny the privilege of enrollment to any student whose conduct or attitude is believed to be detrimental to the welfare of the institution.

Saint Mary's College. Because of the proximity and rich tradition common to Notre Dame and Saint Mary's, the two institutions share many activities in the area of academics as well as social events, student organizations, and community service projects. The two institutions maintain a cooperative program permitting a limited number of courses to be taken at the neighboring institution.

The Spirit of Inclusion at Notre Dame

"Strangers and sojourners no longer." (Ephesians 2:19)

The University of Notre Dame strives for a spirit of inclusion among the members of this community for distinct reasons articulated in our Christian tradition. We prize the uniqueness of all persons as God's creatures. We welcome all people, regardless of color, gender, religion, ethnicity, sexual orientation, social or economic class, and nationality, for example, precisely because of Christ's calling to treat others as we desire to be treated. We value gay and lesbian members of this community as we value all members of this community. We condemn harassment of any kind, and University policies proscribe it. We consciously create an environment of mutual respect, hospitality and warmth in which none are strangers and all may flourish.

One of the essential tests of social justice within any Christian community is its abiding spirit of inclusion. Scriptural accounts of Jesus provide a constant witness of this inclusiveness. Jesus sought out and welcomed all people into the Kingdom of God—the gentile as well as the Jew, women as well as men, the poor as well as the wealthy, the slave as well as the free, the infirm as well as the healthy. The social teachings of the Catholic Church promote a society founded on justice and love, in which all persons possess inherent dignity as children of God. The individual and collective experiences of Christians have also provided strong warrants for the inclusion of all persons of good will in their communal living. Christians have found their life together enriched by the different qualities of their many members, and they have sought to increase this richness by

welcoming others who bring additional gifts, talents and backgrounds to the community.

The spirit of inclusion at Notre Dame flows from our character as a community of scholarship, teaching, learning and service founded upon Jesus Christ. As the Word through whom all things were made, Christ is the source of the order of all creation and of the moral law which is written in our hearts. As the incarnate Word, Christ taught the law of love of God and sent the Holy Spirit that we might live lives of love and receive the gift of eternal life. For Notre Dame, Christ is the law by which all other laws are to be judged. As a Catholic institution of higher learning, in the governance of our common life we look to the teaching of Christ, which is proclaimed in Sacred Scripture and tradition, authoritatively interpreted by Church teaching, articulated in normative understandings of the human person, and continually deepened by the wisdom born of inquiry and experience. The rich heritage of the Catholic faith informs and transforms our search for truth and our understanding of contemporary challenges in higher education.

This statement was adopted by the officers of the University on August 27, 1997, in conjunction with an Open Letter to the Notre Dame community.

Academic Profile

DEGREES AND ACADEMIC PROGRAMS

The University is organized into a First Year of Studies, four undergraduate colleges, an architecture school, a graduate school of four divisions, a graduate business school, a law school, and several graduate research study centers.

All incoming freshmen spend their first year in the First Year of Studies and then move into the college or school of their choice as sophomores—College of Arts and Letters, Mendoza College of Business, College of Engineering, College of Science, or School of Architecture.

In the 2008–2009 academic year, student enrolled in the College of Arts and Letters topped the undergraduate enrollment figures with 2,583. There were 1,671 business students, 1,138 science students, 794 in engineering, and 186 in architecture.

The College of Arts and Letters offers curricula leading to the degree of bachelor of fine arts in art studio or design and bachelor of arts majoring in:

- Africana Studies
- American Studies
- Anthropology
- Art, Art History, and Design
 - Art Studio
 - Art History
 - Design
- Classics
 - Arabic
 - Classics
 - Greek and Roman Civilization
- East Asian Languages & Cultures
 - Chinese
 - Japanese
- Economics
- English
- Film, Television, and Theatre
- German and Russian Languages and Literatures
 - German
 - Russian
- History
 - Mathematics (honors only)
- Medieval Studies
- Music
- Philosophy
- Philosophy/Theology (joint major)
- Political Science
- Program of Liberal Studies
- Psychology
- Romance Languages and Literatures
 - French
 - Italian
 - Romance Languages and Literatures
 - Spanish
- Sociology
- Theology

UNIVERSITY REQUIREMENTS

The Mendoza College of Business offers the degree of bachelor of business administration with majors in:

Accountancy
Finance
Information Technology Management
Management Consulting
Management Entrepreneurship
Marketing

The College of Engineering offers curricula leading to degrees of:

B.S. in Aerospace Engineering
B.S. in Chemical Engineering
B.S. in Civil Engineering
B.S. in Computer Engineering
B.S. in Computer Science
B.S. in Electrical Engineering
B.S. in Environmental Geosciences
B.S. in Mechanical Engineering

The College of Science offers the degree of bachelor of science majoring in:

Biochemistry
Biological Sciences
Chemistry
Chemistry/Business
Chemistry/Computing
Environmental Sciences
Mathematics
Physics
Physics/Education
Physics in Medicine
Preprofessional Studies
Science–Business
Science–Computing
Science–Education

The School of Architecture offers the degree of bachelor of architecture (five-year program).

Supplementary majors may be taken only in conjunction with a full major. The Arts and Letters supplementary preprofessional studies major provides students with an opportunity to complete a supplementary major in health-related science. Students may take supplementary majors/minors in departments of other colleges, but their dean may specify certain modifications in their curriculum. Undergraduates may obtain bachelor degrees in combination programs with other colleges in integrated five-year programs.

The course and program requirements for degrees are determined by the various colleges and schools.

These colleges are independent of one another and provide academic instruction within the various programs and departments. The dean of each college has authority, along with the college council, to determine minimum admission standards, requirements for a major and a degree from the program, and dismissal from the college and University.

The student who wishes to transfer from one college to another college within the University must have

the approval of the deans of both colleges. The accepting dean has discretion regarding which credits are acceptable toward the degree in the new college.

Dual Degree. Programs leading to dual degrees (two undergraduate degrees, such as a bachelor of arts and a bachelor of business administration, or a bachelor of arts and a bachelor of science in an engineering major) are distinct from programs in which a student receives one degree with two majors (such as a bachelor of business administration with a major in finance and a major in political science). Dual-degree programs require the permission of the deans of both colleges.

The requirements for a dual degree generally are as follows: The student completes all of the University requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a dual degree in the two colleges. (In the College of Arts and Letters, the requirement includes the College Seminar.) While the total number of hours required does depend on the two major programs, the minimum required total number of degree credits is set to be 30 degree credits beyond the college total for the college with the greater required number of degree credits.

Academic Governance. The major source of academic governance within the University is the Academic Council, made up of administrators, faculty, and students from each of the four colleges and chaired by University President Rev. John I. Jenkins, C.S.C. All major decisions concerning academic policy and scheduling throughout the University are made by this board.

Along with the Academic Council, each college is served by a college council representing its faculty and students. The purpose of the council is to suggest and plan academic programs and to make decisions regarding academic policy within the college. Most of the colleges also have a student advisory council whose function is to elicit student ideas and concerns regarding college policy, to formulate those ideas, and to make suggestions to the college council.

Advising. All first-year students enter the First Year of Studies and are assigned an advisor from its faculty. The First Year of Studies offices are located at 207 Coleman-Morse Center. Once students have chosen an upper-level college, they should contact the Office for Undergraduate Studies of the appropriate college and speak with one of the advisors: **Architecture**—110 Bond Hall; **Arts and Letters**—104 O’Shaughnessy Hall; **Business**—101 Mendoza College of Business; **Engineering**—257 Fitzpatrick Hall; **Science**—174 Hurley Hall. After a major has been declared, students are assigned a departmental advisor as well.

Pre-Law Advising. Students planning to attend law school may consult with the University pre-law

advisor, Assistant Dean Ava Preacher, in 104 O’Shaughnessy Hall.

The Summer Session. Summer courses are offered by the regular University faculty to students at all levels—undergraduate, graduate, professional, and special.

In addition to meeting the needs of the academic-year students who are continuing work on their degrees, the summer session also serves teachers, industry personnel, and professional and career groups. These graduate students are provided an opportunity to work on advanced degrees, fulfill certification requirements, improve their professional position, or take enrichment courses. The summer session embraces not only the traditional seven-week period of course work but also a series of minicourses and workshops.

University Requirements

Application must be made to the University registrar for a degree.

The receipt of a baccalaureate degree from the University requires the satisfactory completion of the curriculum. This includes:

University Requirements	Courses
Composition	1
*Mathematics	2
*Science	2
*History	1
*Social Science	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature	1
‡Physical Education	2
	—
	14

* One of these requirements must be University Seminar 13180–13189.

‡This requirement can also be fulfilled through first-year enrollment in ROTC.

- Only courses marked as “Univ. Req.” in the online Schedule of Classes can be used to fulfill a University requirement. These courses can be viewed for a particular academic term by selecting the “Schedule of Classes” link within insideND or by visiting the home page of the Office of the Registrar and clicking on the “Class Search” link.
- In addition to these university requirements, each college has its own requirements that must be completed. Without prior permission from the appropriate college dean, special studies and directed readings do not satisfy college requirements.
- First-year students are required to complete a University seminar; composition; two semester courses in mathematics; two semester courses in science; one semester course chosen from: history, social science, philosophy, theology,

UNIVERSITY REQUIREMENTS

fine arts; and two semester courses in physical education or in ROTC. The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy, theology, mathematics, or science. Foreign language is not a University requirement, but it is required in the programs of the College of Arts and Letters, the College of Science, and the School of Architecture. Three credits in a social science course (excluding economics) and three credits in a College of Arts & Letters course (excluding economics) are required in the Mendoza College of Business.

- (d) Satisfactory work in a major or a concentration program of study.
- (e) A minimum cumulative average of 2.000.
- (f) A minimum of 60 credits at the University and a minimum of 90 credit-hours earned through college and university courses.
- (g) The last year in residence.

Central to undergraduate education at Notre Dame is the core curriculum, a set of University required courses intended to provide every undergraduate with a common foundation in learning. Detailed rationales for each requirement can be found at nd.edu/~coreclm.

Composition. First-Year Composition aims to better prepare students to read and write effectively. Students learn to identify an issue amid different and conflicting points of view in what they read; frame and sustain an argument that not only includes the analysis and exposition of information, but also establishes what is at stake in accepting their views; provide relevant evidence to support a given point of view; identify and analyze potential counterarguments; develop basic skills for writing a research proposal, for conducting original research (i.e., through archival research, surveys, or interviews), and for using the library's print and electronic information resources; and learn to use and recognize conventions of language in writing academic papers.

University Seminars. The University Seminar is a distinctive opportunity for every first-year student to experience a small, writing-intensive seminar taught by a member of the University's teaching and research faculty. With a class size of no more than 18, students have the opportunity to regularly engage in class discussions around a particular issue, problem, or topic in a given field of study. Students study the paradigms, content, methodology, or problems of a particular discipline while learning the conventions for academic writing within the parameters or discourse of that field. Each seminar also fulfills one of the University requirements in fine arts, literature, history, social science, philosophy, theology, mathematics, or science.

Mathematics. Students develop quantitative reasoning skills through the disciplined study of mathematics. Solving problems fosters deductive reasoning, while drawing conclusions from

mathematical analyses promotes inductive reasoning. Students learn to convey mathematical concepts and relationships through symbols, formulas, and analytical manipulations. By modeling quantitative behavior in business, science, engineering, and the social sciences, students gain a deeper understanding of the vital role that mathematics plays in modern society.

Science. Through the study of science, students learn how knowledge of the natural world is built on observation, experiment, and evidence. They develop a basic understanding of the scientific method, including an appreciation for the interplay between theory and experiment, and how an advance in one drives the other. In addition to acquiring a working knowledge of fundamental concepts and laws in a particular field of scientific study, students learn to analyze and interpret simple sets of quantitative data and to use mathematical structures to solve problems and create models. Finally, students gain an appreciation of the important interdependence among science, technology, and society.

History. In the study of history, students explore human beings as individuals, groups, nations, or even civilizations in an attempt to comprehend the human experience. Students come to appreciate and understand the processes of continuity and change over time, and they discover how people shaped, altered, or succumbed to their environment or how, in turn, environment channeled historical experience. Thinking critically about the connections between specific events or processes and an array of contingent phenomena, students look for causes and effects, relationships, and relevance.

Social Science. Students discover the diversity of societies and world cultures, the complexity of the choices facing human beings, and the potential social and political consequences of the paths people take. Through lectures, classroom experiences, or local fieldwork, students gain an understanding of the research methods, processes and procedures used to examine human behavior. From the perspective of different social science disciplines, students uncover the competing organizations and institutional opportunities for realizing one's conceptions of justice and the good life.

Theology. Theology, the "science of God," represents "faith seeking understanding." Through the first required course, students arrive at an understanding of the distinctive nature of the discipline of theology; encounter the authoritative texts that serve to constitute the self-understanding of Christian tradition as a response to God's self-revelation; become aware of the constitution, transmission, and interpretation of these texts within the tradition; and, develop their own skills of textual interpretation in conversation with the tradition. Through the second required course, students are introduced to the riches of the Christian theological tradition; develop their theological skills, facilitating the critical retrieval of the Christian heritage; and, come to appreciate

better their rootedness in the ongoing tradition of the believing community.

Philosophy. Students engage in logical reflection on the fundamental problems of human existence and prepare to take their place as citizens capable of critically evaluating arguments which bear on public affairs. In the first course in philosophy, students read philosophical texts and identify the main lines of argument and counter-argument, reason about philosophical questions, and defend their own philosophical positions. In the second course in philosophy, students explore a subset of philosophical questions or authors of special interest to them. By studying seminal philosophical texts like those that have contributed to the Catholic tradition and those that have presented challenges to it, students learn to think in depth about the problems posed by a life of faith.

Fine Arts. Students approach works of art from critical perspectives—as viewers or listeners they apply the analytical tools needed to realize the insights and pleasures that artistic texts and works offer. Students may also create their own works of art, and in so doing gain insights as to how artists interact with their media and how creativity meshes with understanding. Through study of the fine arts, students gain an appreciation of the arts as a component of lifelong learning, and they learn how the arts speak of their societies and how societies speak through their arts.

Literature. Students gain an appreciation of the literariness of the texts they read by recognizing the formal, stylistic, and rhetorical practices, as well as the inter-relations among these. By identifying connotations and denotations, figures of speech and thought, and conventions of genre, students comprehend the way in which a given literary text is embedded in a particular social, cultural, literary, or intellectual context. They analyze the claims of competing interpretations of a literary text, especially with reference to the historical position or theoretical allegiances of the interpreter. Students think more critically about themselves and about their own place in culture or society.

Physical Education. Students will develop an appreciation of a physically active lifestyle and acquire the skills associated with particular physical activities that can be used throughout one's lifetime. Students will also learn about healthy responses to many of the major issues facing college-aged students; e.g., nutrition, exercise, stress, rest, healthy relationships, diversity, alcohol, drugs, test preparation, time management, and conflict management.

Graduation Rate

Of the students entering a full-time, first-year, bachelor degree-seeking program in the fall of 2003, 96 percent graduated within six years.

The complete IPEDS Graduation Rate Survey may be found in the Office of Institutional Research.

Honors at Graduation. In the undergraduate colleges, a degree will be granted with highest honors (summa cum laude) the student's grade point average ranks among the top 5.000 percent of those students graduating from the student's college or school; for a student whose grade point average ranks among the top 15.000 percent of the student's college or school, a degree will be granted with high honors (magna cum laude); for a student whose grade-point average ranks among the top 30.000 percent of the student's college or school, a degree will be granted with honors (cum laude). A student who meets the requirements of more than one category of honors will be awarded only the highest honor for which that student qualifies.

Accreditation and Academic Association.

The University of Notre Dame is a member of the North Central Association of Colleges and Secondary Schools, the National Catholic Education Association, the Association of American Colleges, the American Council on Education, the National Commission on Accrediting (not an accrediting agency), the Council of Graduate Schools in the United States, and the Midwest Conference on Graduate Study and Research, and it is fully accredited by the Indiana State Board of Education. The University is also a member of the Indiana Conference of Higher Education, the International Association of Universities, the Catholicum Universitatum Foederatio (Federation of Catholic Universities) and the Institute of International Education.

Transcripts for currently enrolled students can be requested online via insideND (inside.nd.edu) by clicking on the "Student Academic" tab. Then, within the "Student Academic Services" channel, click on the "Transcript Request" link. Former students can obtain the request form at registrar.nd.edu or in the Office of the Registrar, 105 Main Building, Notre Dame, IN 46556.

Grading System

Letter Grade	Point Value	Description	Explanatory Comments
A	4.000	Truly Exceptional	Work meets or exceeds the highest expectations for the course
A-	3.667	Outstanding	Superior work in <i>all</i> areas of the course
B+	3.333	Very Good	Superior work in <i>most</i> areas of the course
B	3.000	Good	Solid work across the board
B-	2.667	More than Acceptable	More than acceptable, but falls short of solid work
C+	2.333	Acceptable: Meets <i>All</i> Basic Standards	Work meets all the basic requirements and standards for the course
C	2.000	Acceptable: Meets <i>Most</i> Basic Standards	Work meets most of the basic requirements and standards in several areas
C-	1.667	Acceptable: Meets <i>Some</i> Basic Standards	While acceptable, work falls short of meeting basic standards in several areas.
D	1.000	Minimally Passing	Work just over the threshold of acceptability
F	0	Failing	Unacceptable performance
X	0		Given with the approval of the student's dean in extenuating circumstances beyond the control of the student. It reverts to "F" if not changed within 30 days after the beginning of the next semester in which the student is enrolled.

These "descriptions" and "explanatory comments" are intended to be sufficiently general to apply across the University, but obviously have to be "applied" in manners specific to each department.

Letter Grade	Grades assigned by the registrar; i.e., not to be given by the faculty
W	Discontinued with permission. To secure a "W" the student must have the authorization of the dean.
NR	Not reported. Final grade(s) not reported by the instructor because of extenuating circumstances.
F*	No final grade reported for an individual student.

Letter Grade	Grades that may be given but are not included in the computation of the average
P	Pass in a course taken on a Pass-Fail basis. Each junior or senior undergraduate may file with the student's dean during the first seven class days of the semester the decision to take one elective course, outside the student's major department and not required by the student's program, per semester on a Pass-Fail basis. Such a filing is irrevocable and will result in conversion by the registrar of the instructor's final grade report into an entry of P ("pass") or F ("fail") on the student's record. The instructor will not be informed that the student has elected the pass-fail grading option. The registrar will interpret the final grades of "A" through "D" as "pass," which is not computed into the grade point average. If a final grade of "F" is issued, it will be computed into the student's grade point average.
S	Satisfactory work (courses without semester credit hours, as well as research courses, departmental seminars or colloquia or directed studies, workshops; field education and skill courses).
U	Unsatisfactory work (courses without semester credit hours, as well as research courses, departmental seminars or colloquia or directed studies; workshops; field education and skill courses).
V	Auditor (graduate-level students only).

If, with the approval of the student's dean, an "X" grade is given in the student's graduating semester, it will revert to "F" if not changed within 30 days from the date of graduation.

ACADEMIC CODE OF HONOR

Academic Code of Honor

The University of Notre Dame is a scholarly community in which faculty and students share knowledge, ideas, and creative works. Notre Dame's Academic Code of Honor expresses our common commitment and moral responsibility to represent accurately and to credit the contributions of every individual.

The *Student Guide to the Academic Code of Honor* (nd.edu/~hnr/code) describes the standards of personal academic conduct that all Notre Dame undergraduates pledge to follow and also outlines the set of procedures by which violations of the Honor Code are reported and adjudicated.

Before matriculation, each entering student must pledge:

As a Member of the Notre Dame community, I will not participate in or tolerate academic dishonesty.

Notre Dame NetID Student Policy

The University of Notre Dame NetID accounts and related services are intended for faculty, staff, and currently enrolled students. "A student must register and enroll at the dates and times announced by the registrar." (Academic Code 4.1) A student who fails to enroll by the announced date will forfeit his or her right to access his or her NetID account and related services. University computing resources supplied by way of the NetID are normally available to a student for up to 60 days after his or her graduation date. A student granted a leave of absence would normally retain access to University computing services for up to two semesters. A student who is separated from the University due to an academic suspension, academic dismissal, or withdrawal will no longer have access to University computing services, unless an extension has been approved by the dean of his or her college. A student attending Notre Dame for the summer only, with a non-degree seeking status will normally retain access to University computing service for up to 60 days after the August graduation date. A student who is separated from the University for other reasons will no longer have access to University computing services.

Academic Regulations

Embodied within the Academic Code are policies and regulations governing the student attainment of academic credit and degrees from the University of Notre Dame. Such regulations have been enacted by the Academic Council of the University, which retains the authority and responsibility for the review and amendment of the Academic Code. The administration and interpretation of academic regulations rest with the academic officers of the University, namely, the provost, the deans, and the

University registrar. The responsibility to abide by the Academic Code resides with the students, faculty, and administration. The complete Academic Code is published in the electronic version of the *Faculty Handbook*.

Academic Resources

Faculty. In 2009–10, Notre Dame's instructional faculty numbered 947 full-time and 108 part-time. Other faculty, such as administrators, professional specialists, librarians, and research fellows numbered 399 full-time and 48 part-time. Ninety-two percent of the full-time instructional faculty have terminal degrees, 89 percent of them have doctorates. Ninety-seven percent of the full-time instructional faculty are lay persons.

Hesburgh Libraries. The Hesburgh Libraries system consists of 9 libraries that house most of the books, journals, manuscripts, and other non-book library materials available on the campus. Currently, the collections contain over 3.3 million volumes, more than 3 million microform units, more than 34,000 electronic titles, and more than 29,000 audiovisual items in support of the teaching and research programs.

Through the Notre Dame website, users have immediate access to the Hesburgh Libraries catalog, an array of electronic periodical indexes and full-text documents, and professionally developed subject guides to local and Internet-based resources. From their computers, users may request individualized reference assistance, place interlibrary loan requests, suggest titles for purchase, and recall or renew charged materials. An electronic reserves module is available, as is an arts and letters document delivery service.

Hesburgh Libraries system libraries include:

(Administered as a unit of the Law School)

Julian Samora Library
230 McKenna Hall
(574) 631-4440
<http://latinostudies.nd.edu/archives/>
(Administered as a unit of the Institute for Latino Studies)

The University maintains a membership in the Center for Research Libraries, which makes available more than five million publications, archives and collections and three million pages of digital resources important to research. The then University Libraries were elected to the Association of Research Libraries in 1962.

For further information about library facilities and services, call (574) 631-6258, or go to the following website: library.nd.edu/

Institutes, Centers, and Laboratories. The many and diverse institutes, centers, and laboratories maintained by the University are an indication of the spectrum of scholarly interest that students are able to join in and profit from.

Institutes, centers, and specialized research laboratories at Notre Dame include the Helen Kellogg Institute for International Studies, the Joan B. Kroc Institute for International Peace Studies, the Keough Institute of Irish Studies, the Erasmus Institute, the Nanovic Institute for European Studies, the Institute for Latino Studies, the Medieval Institute, and the Radiation Laboratory. Other institutes, centers, and similar entities are the Center for Environmental Science and Technology (CEST); the Center for Advanced Scientific Computing; the Center for Astrophysics at Notre Dame University (CANDU); the Center for Applied Mathematics; the Center for Molecularly Engineered Materials; the Center for Civil and Human Rights; the Center for Continuing Education; the Center for

ADMISSION

Philosophy of Religion; the Center for Research in Business, embracing the Center for Business Communication, the Center for Ethics and Religious Values in Business, and the Center for Research in Banking; the Center for Social Concerns; the Center for the Study of Contemporary Society, which embraces the Gerontological Research Center, the Laboratory for Social Research, the Multinational Management Program, and the Philosophic Institute; the Charles and Margaret Hall Cushman Center for the Study of American Catholicism; the Ecumenical Institute (Jerusalem); the Energy Analysis and Diagnostics Center; the Center for Nano Science and Technology; the Environmental Research Center (UNDERC); the W.M. Keck Center for Transgene Research; the Walther Cancer Research Center; the Institute for Church Life, which embraces the Center for Pastoral Liturgy and Retreats International; the Institute for Scholarship in the Liberal Arts; the Jacques Maritain Center; the Reilly Center for Science, Technology and Values; the Urban Institute for Community and Educational Initiatives; the Thomas J. White Center for Law and Government; and the William and Katherine Devers Program in Dante Studies.

Other laboratories include the Hessert Center for Aerospace Research, the Air and Water Quality Analysis Laboratory, the Aquatic Biology Laboratory, the Biofluid Mechanics Laboratory, the Catalysis Laboratory, the Fluid Dynamics Laboratory, the Bernard J. Hank Family Environmental Research Laboratory, the LOBUND Laboratory, the Parasitology Laboratory, the Solid State Material and Devices Laboratory, the Vector Biology Laboratory, and the Zebrafish Research Facility. These research centers contain specialized facilities and equipment.

Research. The University receives more than \$110 million in sponsored research and sponsored program funds annually. Active programs of scholarly work occur in discipline-oriented departments in the humanities, fine arts, science, social science, engineering, law, and business areas of the University. In addition, University institutes and centers facilitate research across departmental lines.

The Office of the Vice President for Research is responsible for assisting faculty in various aspects of sponsored program activity, technology transfer, and research compliance. It reviews and transmits all formal proposals, monitors the status of proposals, negotiates contracts and grants, accepts awards for the University on behalf of faculty members, and is responsible for the administrative management of all grants, contracts, and cooperative agreements supporting research, training, service, and equipment. The Office of the Vice President for Research also provides guidance in seeking external sponsored program support, assistance in proposal and budget preparation, and support in all areas of electronic research administration, research compliance, and technology transfer.

The Office's website is designed to assist faculty from all academic units in the identification of funding sources. Current issues related to sponsored program activity as well as proposal preparation and award management are also highlighted.

Inquiries regarding this information should be addressed to the Office of the Vice President for Research, 317 Main Building; nd.edu/research.

Snite Museum of Art. The museum features collections that place it among the finest university art museums in the nation.

The Mesoamerican collection highlight is the comprehensive, exceptional holdings of Olmec works, the earliest Mexican culture.

The Kress Study Collection has been the foundation for developing Italian Renaissance art, which includes a rare Ghirlandaio altarpiece panel. The Baroque collection highlights works by Bloemaert, Coypel, and van Ruisdael. Selections from the Feddersen Collection of 70 notable Rembrandt van Rijn etchings are exhibited frequently; and the 18th-century collection includes such masters as Boucher, Vigee-Lebrun, Reynolds, Conca, and de Mura.

The critically acclaimed John D. Reilly Collection of Old Master to 19th-Century Drawings includes examples by Tintoretto, Tiepolo, Oudry, Fragonard, Ingres, Gericault, Millet, and Degas. The Noah and Muriel Butkin Collection of 19th-Century French Art is the foundation of one of the museum's major strengths, featuring paintings and drawings by Corot, Boudin, Couture, Courbet, and Gerome.

The Decorative and Design Arts Gallery spans the 18th through 20th centuries and exhibits early porcelains from Sevres and Meissen. Exceptional ceramics, furniture, glass, and silver pieces represent both the Arts and Crafts and Art Nouveau styles of the 19th century in addition to the Art Deco and Bauhaus modern movements. Twentieth-century-designed pieces by Wright, Stickleby, and Hoffman are also on view.

The Janos Scholz Collection of 19th-Century European Photography contains some 5,500 images of persons and places taken during the first 40 years of camera use.

Native American art focuses on early 19th-century, Plains Indian-painted war records and costumes; it also features Mimbres- and Anasazi-painted ceramics from the prehistoric Southwest.

The developing American collection has 19th-century landscapes by Durand and Inness and portraits by Eakins, Sargent, and Chase. Among highlights of the West and the Southwest regions are paintings by Higgings, Ufer, Russell, and Remington.

Traditional works of African art such as textiles, masks, and sculptures are in the collection as well.

Twentieth-century styles and movements are seen in paintings by Miro, O'Keeffe, Avery, Glackens,

Pearlstein, and Scully. Modern sculptures by Barlach, Zorach, Cornell, Calder, and Rickey complement the paintings and drawings.

Croatian-American sculptor Ivan Mestrovic, who taught at Notre Dame from 1955 until his death in 1962, created many works that remain on campus. Major pieces can be seen in the museum, at the Eck Visitors' Center, and at the Basilica of the Sacred Heart.

Loan exhibitions from major museums and private collections mounted by the Snite are offered regularly in the O'Shaughnessy Galleries, as is the annual exhibition of student art by candidates for MFA and BFA degrees. Special events and programs include lectures, recitals, films, and symposia held in the Annenberg Auditorium and in the galleries.

Admission

This year we expect more than 14,000 students will apply for admission to Notre Dame's entering class. Most of the applicants will have the academic aptitude and preparation necessary to complete a degree program at the University. The Committee on Admissions will decide which applicants will be among the 2,000 included in the class. To understand how this is done, it is first necessary to know the procedure for applying to Notre Dame.

ACADEMIC PREPARATION

Most applicants will have taken and successfully completed the most challenging program of studies available in their high schools. We strongly recommend a curriculum including four years each of English, mathematics, science, history, and foreign language.

All successful applicants are admitted to the First Year of Studies. However, entrance requirements differ slightly for students planning to pursue studies in science and engineering. Sixteen units are required of all students as described below.

For students intending to choose a major in the College of Arts and Letters or the Mendoza College of Business, *excluding* the arts and letters premedical/pre dental program and the combined arts-engineering program, the 16 units must be distributed as follows:

English	4
Algebra, advanced algebra, trigonometry, and geometry	3
Foreign language	2
History	2
Science	2
Additional English, mathematics, science, history, social studies, and language courses	3

For students intending to major in the College of Science, the College of Engineering, the School of Architecture, the arts and letters premedical/

ADMISSION

preidental program or the combined arts-engineering program, the distribution must be:

English	4
Algebra, advanced algebra, trigonometry, and geometry	3
Advanced mathematics (calculus or precalculus)	1
Foreign language	2
History	2
Chemistry	1
Physics	1
Additional English, mathematics, science, history, social studies, and language courses	2

The unit is the credit for a year of satisfactory work in an accredited secondary school. The two language units required must be in the same language. In some cases, the Committee on Admissions waives the foreign-language requirement.

APPLICATION PROCESS

First-year students are admitted to the University of Notre Dame for *only the fall semester* of each academic year. A student who wishes to be considered must have the following items on file: (1) a completed application, (2) an official high school transcript, (3) a letter of evaluation from a secondary school teacher and (4) an official report of scores on the SAT or ACT.

Application. New application forms are available in August of each year. The application is your opportunity to tell us about yourself. Include any information about your personal and academic circumstances that will help us evaluate your application.

Notre Dame is a member of the Common Application. Students may apply online at commonapp.org or via our website: admissions.nd.edu.

High School Transcript. Your high school must submit an official copy of your transcript, including a listing of your senior-year courses.

Teacher's Evaluation. Only one evaluation will be required in your application file. The form for this evaluation is available on the Common Application website. The teacher who knows you best, both as a student and as a person, should complete the evaluation. Please do not request letters from people who have not been involved in your educational development.

Testing. All applicants are required to take the SAT or ACT. The test results are part of the evaluation process for admission. You must take one of these tests no later than January of your senior year.

The College Board code for the University of Notre Dame is 1841, and the ACT code for Notre Dame is 1252.

If you have taken other standardized tests (SAT Subject Tests, AP, IB, TOEFL), please include the

results with your application. We will use these scores as supplementary information, although they cannot be used in place of the SAT or ACT.

Anyone who wishes to continue the study of French, German, Italian, or Spanish at Notre Dame can take the SAT Subject Test in that language. The results will be used for placement purposes.

Students enrolled in home-school programs or in high school programs that substitute certification of competencies for grades must take three SAT Subject Tests: science, history, and foreign language.

DECISION AND NOTIFICATION PLANS

Students seeking admission to Notre Dame's entering class must choose to have their applications reviewed under one of two procedures.

1. **Early Action**—If you are an outstanding student with strong junior-year SAT or ACT scores, you should consider applying for Early Action admission. You must apply by November 1 and have all supporting documents in the Office of Admissions by that date. Early Action applicants will receive a decision letter before Christmas. If admitted under Notre Dame's Early Action procedures, you are not required to withdraw your other college applications and have until May 1 to confirm your enrollment at Notre Dame. You will receive financial aid consideration under the same procedures as Regular Action applicants. The Committee on Admissions will defer decisions on some Early Action applicants until we can compare their credentials with those of the Regular Action applicants. We will mail a decision to the deferred applicants by early April. If you are denied admission under Early Action, that decision is final, and you *may not reapply* in Regular Action.

2. **Regular Action**—Most applicants choose this plan, which requires that you apply by December 31 and have all supporting documents in the Office of Admissions by that date. We will mail decision letters by early April.

Early Action:

Apply by November 1
Decision before Christmas
Confirm enrollment at Notre Dame by May 1

Regular Action:

Apply by December 31
Decision by early April
Confirm enrollment at Notre Dame by May 1

Deposits. If admitted, you must confirm your intention to enroll by submitting a \$500 advance payment by May 1. This enrollment deposit is not refundable.

Waiting List. Some applicants will be notified that they have been placed on a waiting list and will receive a final decision during the period of mid-May to mid-June. If placed on the waiting list, you should make plans to attend another institution because we cannot predict how many applicants will gain admission from the waiting list in a given year. Students

admitted from the waiting list have two weeks to submit a \$500 advance payment, confirming their intention to enroll in the first-year class.

The Campus Visit. We welcome visits from prospective applicants. Our staff members meet with groups of students and parents to discuss admissions policies and procedures, the First Year of Studies program, degree programs, student life, financial aid, and other topics of interest.

Appointments for weekday sessions are available from March through early December. Appointments for Saturday morning sessions are available from early September to late April. You should call our office for an appointment at least two weeks in advance of your visit. Campus tours are available following information sessions when classes are in session and on most weekdays of the summer. Be sure to call us for an appointment before you confirm any travel plans. Our telephone number is 574-631-7505. Appointments may also be made online at admissions.nd.edu.

The Office of Undergraduate Admissions is closed on certain holidays and holiday weekends.

THE SELECTION PROCESS

Notre Dame seeks to enroll intelligent, inquisitive, energetic, and compassionate students who will bring a diversity of talents and backgrounds to our campus. In selecting the class, the Committee on Admissions evaluates thoroughly each applicant's personal and academic credentials.

Academic Achievement. In evaluating a student's academic achievement, the Committee on Admissions considers a student's curriculum, class rank, concentration of talent in the high school, test scores, teacher evaluation, and essays. Most students admitted to Notre Dame have taken the most demanding courses available, rank among the top students in their schools, and have done quite well on standardized tests. We could cite the average rank and median test results of our admitted students, but a listing of such numbers is often misinterpreted. Each year, some applicants with high test scores and class rank are not admitted while some students with less impressive numbers are selected for admission based on their other outstanding academic and personal accomplishments.

Personal Qualities. The lifeblood of Notre Dame resides in its people: faculty, staff, and students. Each potential student's application is studied to determine what talents, skills, and interests that person might offer Notre Dame's community. We have a strong interest in people who can make unique contributions and will share their talents with us—talents as musicians, writers, technicians, tutors, athletes, artists, volunteer workers, actors, organizers, thinkers, conversationalists, poets, or dancers. There is need in each freshman class for a variety of talents and personalities. The listing of activities, written statements, and evaluations gives us a view of the

FEES AND EXPENSES

person represented by the application. It is important to present talents and intellectual interests on the application form.

The Notre Dame Scholar. Each year the Committee on Admissions designates a select number of the admitted students as Notre Dame Scholars. This recognition is based upon their outstanding academic and extracurricular accomplishments throughout their high school careers. These students appear to exhibit the greatest potential for academic and social contributions within the Notre Dame community and are generally the strongest prospects from an applicant pool of more than 14,000 individuals.

All admitted applicants are considered for the Notre Dame Scholar distinction. Notre Dame Scholars will be notified of the designation in their letter of admission.

STUDENTS WITH DISABILITIES

Each year Notre Dame admits a number of academically talented students with various disabilities. Once enrolled here, students with disabilities may use a variety of services intended to reduce the effects that a disability may have on their educational experience. Services do not lower course standards or alter essential degree requirements but instead give students an equal opportunity to demonstrate their academic abilities. Students can initiate a request for services by registering with the Office for Students with Disabilities (OSD) and providing information that documents his or her disability. Individual assistance is provided in selecting the services that will provide access to academic programs and facilities of the University.

OSD provides services to students with mobility, hearing, or visual impairments, as well as students with learning disabilities. The services that are typically used include alternative formats of textbooks, modifications in the way students take exams, and readers, note takers, and academic aides. The University maintains accessible rooms in nine residence halls for students with physical disabilities.

All Notre Dame students must supply the necessary initiative and determination to discover and utilize the available campus resources. Students with disabilities will find that a truly creative ability to solve daily problems may be as important to success as developing alternative skills through academic experience. We invite admitted applicants to visit Notre Dame and become familiar with the facilities here before making a final college choice.

For more information, contact the Office for Students with Disabilities at 574-631-7157 or 574-631-7173 (TTY).

INTERNATIONAL STUDENTS

Notre Dame welcomes students from around the world. International students enhance the cultural and intellectual atmosphere of our community.

The admissions process for international students who are not Permanent Residents of the United States differs slightly from the process for U.S. citizens. To complete an application, an international student must submit a *Certification of Finances*. This document is provided on our website: admissions.nd.edu/financial-aid/for-international-students. Additionally, as English proficiency is critical to a student's academic success at the University, students who do not speak fluent English must take the Test of English as a Foreign Language (TOEFL). The SAT or the ACT is also required for admission. Students who have difficulty locating a test center that administers the SAT or ACT should contact the American Embassy or an American school in their area.

International students wishing to apply for our limited need-based financial assistance must complete both the *Certification of Finances* and a *CSS Foreign Student Aid Application*. Based upon a review of academic credentials, financial need, and availability of scholarship resources, a student may be considered for financial assistance. Financial aid packages may include student loans, student employment, and University scholarship assistance.

To avoid potential problems with international mail, we urge students living outside the United States to apply online via the Common Application website, commonapp.org, and to submit all other application materials by courier service.

TRANSFER ADMISSION

Some students are admitted to Notre Dame with advanced standing. If you wish to apply for admission as a transfer student, you must have obtained the equivalent of at least 27 semester hours of transferable credit, and maintained a cumulative "B" average in all courses. (The competition is such that the average GPA for admitted students is significantly higher.) The committee gives strong preference to applicants who have completed Notre Dame's first-year course requirements. Online courses, distance-learning courses, USAFI courses, and credits earned through the College Level Examination Program (CLEP) are not transferable.

To be eligible for an undergraduate degree, you must complete at least 60 credits at Notre Dame, including the senior year. Please note: Because of enrollment limitations, Notre Dame does not accept transfer applications for the Mendoza College of Business or the School of Architecture. We do not anticipate a change to this policy in the foreseeable future.

As a transfer applicant you must provide the Office of Admissions with (1) a completed application form, (2) an official transcript from each college attended along with course descriptions, (3) a final high school transcript, and (4) an official SAT or ACT score.

If you are interested in transferring to Notre Dame, please note that we cannot guarantee on-campus housing to transfer students. Off-campus housing close to the University is available; students are offered campus accommodations from a waiting list if rooms become available.

You must submit your transfer application for the fall semester by April 15. The Transfer Admissions Committee will notify you of its decision between June 1 and July 1.

The deadline for the spring semester is November 1. The committee will notify you of its decision between December 1 and January 5.

Please contact us to request the appropriate application form if you are interested in applying for transfer admission. Write to:

Office of Undergraduate Admissions
Attention: Transfer Admissions Committee
220 Main Building
University of Notre Dame
Notre Dame, IN 46556-5602

Students may apply online via our website: admissions.nd.edu.

Fees and Expenses

In the undergraduate colleges, the University is essentially a residence school for full-time students. As many students as accommodations will allow are housed in the campus residence halls. First-year students are obliged to live on campus. Permission to live off campus must be obtained from the dean of students. The fees listed below are for the academic year 2010–11 and are subject to change according to factors operating within the economy that affect universities as well as the country as a whole.

Campus Resident Student. The basic fee for the academic year 2010–11 ranges from \$25,392.50 to \$25,642.50 per semester. This fee entitles the student to instruction and tuition for the semester; meals in the University dining halls; a room in a residence hall*; the use of the general library and the departmental libraries; admission to many lectures, concerts, and entertainments in Washington Hall; the use of the Rockne Memorial, the Joyce Center, the Rolfs Sports Recreation Center, the athletic fields, and the University golf course (there is a nominal fee for the use of the golf course and for the ice rink in the Joyce Center); a copy of each issue of the *Scholastic* (the news magazine of the University) and a copy of the *Dome* (the yearbook of the University) in the second semester (for seniors who have left at the end of the first semester, there will be a charge of \$5 to cover the cost of mailing the *Dome*).

**Rooms are available in 29 residence halls. A security deposit of \$50 is required as a room reservation guarantee and for any damages that may be caused by the campus resident student. This deposit is refundable*

STUDENT FINANCIAL AID

upon graduation or departure from the University after review and approval by the Office of Student Accounts.

Off-Campus Student. The tuition fee for the full-time off-campus student is \$19,706 per semester for the academic year 2010–11, which entitles the student to instruction for the semester and those things listed above under the total fee for the campus resident student. For the off-campus student requiring board and lodging at the University Health Services in time of illness, there is a daily charge.

Part-Time Undergraduate Student. An undergraduate degree-seeking student **must be in full-time status each semester.** Any undergraduate student who is enrolled in at least 12 credit hours is considered **full-time.** A student who believes that special circumstances may require him or her to carry fewer than 12 semester hours in any semester (including a senior in his or her last semester) must seek approval to be part-time from his or her respective college. This request and conversion, if approved, must be made before the seventh class day of a fall or spring semester. If permission is granted, the dean will notify the Office of Student Accounts of the change of status and an adjustment to tuition will be made if necessary. There will be no adjustment of tuition unless permission is given by the dean and the class schedule is changed before the seventh class day of the fall or spring semester.

Undergraduate Fees.

- Technology Fee: \$125 per semester.
- Health Center Access Fee: \$75 per semester.
- Student Activity Fee: \$47.50 per semester.
- *Observer* Fee (daily student newspaper): \$6 per semester.

The above fees do not cover the cost of textbooks, stationery, etc., which is estimated at \$950 per year for the average undergraduate student.

The technology fee provides partial funding for the University's enterprise-wide technology infrastructure, which provides all students access to the Internet, e-mail, courseware, campus clusters, ResNet, and a wide array of the latest software. This fee provides for the growth in student services, such as course and degree requirements, Web Registration, and value-added Internet related capabilities.

The health center access fee provides students access to all services at the University Health Center and University Counseling Center, including 24-hour medical care and counseling/mental health assistance, alcohol and drug education programs, and health-education and wellness programs. This fee provides partial funding to address increasing student health and wellness needs, along with funding to maintain health facilities.

Group Sickness or Accident Insurance. To assist in financing any medical or hospital bills, a group insurance plan is available to students. Notre Dame requires all international students to have health insurance coverage.

At the beginning of the academic year, the opportunity is provided to show proof of personal health insurance coverage. In the event such proof is not presented, the student will be automatically enrolled in the University-sponsored plan and the charge for the premium will be placed on the student's account. The last date to waive from the University Student Insurance Plan is September 15, 2010.

Information regarding the University-sponsored plan is mailed to the student's home address in July. Additional information is available in University Health Services by calling the Office of Insurance and Accounts at 574-631-6114.

The cost of the premium for the 2010–11 academic year is \$1,239.

Payment Regulations. All fees and required deposits are to be paid in advance of each semester. Billing will be made one month before each semester. The University does not accept credit card payments. Remittance should be made payable to the University of Notre Dame. Notre Dame students taking certain courses at Saint Mary's College that carry special fees will be billed for such charges according to Saint Mary's rates.

Withdrawal Regulation. Any graduate, law, graduate business*, or undergraduate student who at any time within the school year wishes to withdraw from the University should contact the Office of the Registrar. To avoid failure in all classes for the semester and to receive any financial adjustment, the withdrawing student must obtain the appropriate clearance from the dean of his or her college and from the assistant vice president for Residence Life.

On the first day of classes, a full-tuition credit will be made. Following the first day of classes, the tuition fee is subject to a prorated adjustment/credit if the student (1) withdraws voluntarily for any reason on or before the last day for course discontinuance at the University, or (2) is suspended, dismissed or involuntarily withdrawn by the University, for any reason, on or before the last day for course discontinuance at the University, or (3) is later obliged to withdraw because of protracted illness, or (4) withdraws involuntarily at any time because of military service, provided no credit is received for the classes from which the student is forced to withdraw.

Upon return of the student forced to withdraw for military service, the University will allow him or her credit for that portion of tuition charged for the semester in which he or she withdrew and did not receive academic credit.

Room and board charges will be adjusted/credited on a prorated basis throughout the entire semester.

Students receiving University and/or Federal Title IV financial assistance who withdraw from the University within the first sixty percent (60%) of the semester are not entitled to the use or benefit of University and/or Federal Title IV funds beyond their withdraw date. Such funds shall be returned

promptly to the entity that issued them, on a pro rata basis, and will be reflected on the student's University account.

This Withdrawal Regulation may change subject to federal regulations. Examples of the application of the tuition credit calculation are available from the Office of Student Accounts upon request.

**Executive MBA students are subject to a different Withdrawal Regulation and Tuition Credit Calculation, both of which may be obtained from the Executive MBA Program.*

Payment Plan for Budgeting Educational

Expenses. The University makes available an interest-free monthly payment plan through the TuitionPay Plan, administered by Sallie Mae, PO Box 7448, Wilkes-Barre, PA 18773-7448. This plan allows families to spread out education payments over a 10- or 9-month period rather than make two larger payments, one at the beginning of each semester.

The annual fee to enroll in the program is \$40. For more information on the TuitionPay Plan, call Sallie Mae toll-free at 877-282-5933.

Student Financial Aid

The Office of Student Financial Services, which includes the Offices of Financial Aid, Student Accounts, and Student Employment, administers all student financial aid programs, a broad array of financial products and services, and payment plans, to assist in helping to make a Notre Dame education affordable for all families.

Principles. Notre Dame subscribes to the principles of student financial aid administration as endorsed by the College Scholarship Service (CSS) of the College Board and the National Association of Student Financial Aid Administrators. Notre Dame, along with the hundreds of other institutions, states, and organizations that follow these principles, includes demonstrated financial need as a criterion in awarding financial aid. In addition to a student's academic and personal credentials, financial need is an essential factor in the awarding of the University's scholarship/grant programs.

Among the many myths that exist about the financial aid process, perhaps the most common is that which claims that only the low-income family is eligible for financial aid. Unfortunately, as a result, many students do not even apply for aid because it is assumed that the family income is too high. Although income is an important factor in determining a family's ability to pay for college, it is only one of the many factors considered. The size of the family, age of parents, number of family members in college, assets and liabilities, and private school costs are also considered.

Equally significant in determining need is the cost of attending an institution. The same student may

STUDENT FINANCIAL AID

have adequate family resources for attendance at a public institution but may show substantial need at a higher-cost institution, such as Notre Dame. Those families feeling the need for financial assistance are encouraged to investigate the possibilities outlined herein.

Inherent in the concept of need is the premise that the primary responsibility for financing a college education lies with the family. Notre Dame assumes that families will contribute to the student's education to the extent they are capable.

The difference between the family contribution and the student's total collegiate expenses for a given year is *financial need*. Another way of expressing this concept is outlined below:

$$\begin{array}{r} \text{Cost of Attendance} \\ - \text{Family Contribution} \\ \hline = \text{Financial Need} \end{array}$$

Cost of Attendance. Expenses for college will vary from one institution to another and are subject to change from one year to the next. Estimated average expenses for first-year undergraduates at Notre Dame for the 2010–11 academic year include:

Tuition and Fees	\$39,920
Room and Board	10,870
Books	950
Personal/Transportation	1,500
Total	\$53,240

There will be variations in the above costs based on residence hall accommodations, travel costs, and personal expenses. It should be noted that, because of rising costs, annual increases in the above budget can be anticipated.

Family Contribution. The University assumes parents will contribute to their children's education to the extent they are capable as long as the student is enrolled as an undergraduate. Notre Dame cannot accept financial responsibility for students whose parents discontinue this support for reasons other than ability to pay. It is important to note that the *family* includes both the parents *and* the student. Students seeking financial aid will be expected to contribute toward their educational expenses. This self-help may include resources from a portion of their own assets, as well as earnings resulting from work prior to and during their enrollment at Notre Dame. In a very real sense, students who borrow also contribute to their costs from their future earnings.

Given the premise that families have the primary responsibility for paying for the cost of a student's education, Notre Dame is committed to making the University affordable by annually meeting the full demonstrated financial need of its students.

Verification. The federal government requires the University to verify and document certain information provided by students and their families in relation to an application for assistance. Such documents may include copies of federal income tax

returns and W-2 forms. For purposes of verification, the University currently participates in the Federal Quality Assurance Program.

Financial Aid Application Process. To be consistent in estimating a family's ability to pay, Notre Dame has subscribed to a nationally approved uniform method of *needs analysis*. Many institutions and other organizations involved in the administration of student financial aid programs also subscribe to this *institutional methodology*.

Because the federal government is a major provider of student aid, it has created a set of criteria to determine a student's eligibility for its programs. This information is gathered annually on the Free Application for Federal Student Aid (FAFSA). All students seeking financial aid consideration for either federal and/or non-federal student aid programs must file the FAFSA. The FAFSA is available at fafsa.gov and should be filed between January 1 and February 15 for prospective first-year students, January 1 and February 28 for continuing students, and January 1 and March 1 for prospective transfer students.

The CSS also provides a supplemental application known as the CSS/Financial Aid PROFILE. This application often allows the student and family to provide additional, more comprehensive information with which the institution can make a better evaluation of the family's financial circumstances. The PROFILE, available at collegeboard.com, (along with the appropriate fee) must be submitted to CSS by February 15 for prospective first-year students, February 28 for continuing students, and March 1 for prospective transfer students to be considered for all the financial aid programs administered by Notre Dame, including scholarship/grant programs. Students seeking *only* federal aid need to file only the FAFSA. Students applying for both federal *and* institutional aid consideration must file the FAFSA and the PROFILE, listing the University of Notre Dame as a recipient. The federal school code for identifying Notre Dame on the FAFSA is 001840. Notre Dame's CSS code for the PROFILE is 1841.

The PROFILE is made available in the fall semester of the student's high school senior year and may be filed as soon as the student and family have reasonable estimates of what family income figures for the current calendar year will be. In some cases, it may be necessary to wait until the calendar year is completed to obtain more accurate information. In either case, the PROFILE must be submitted as directed. If tax information for the previous calendar year is not yet completed, reasonable estimates may be used. Applicants for financial aid should also be prepared to submit copies of parents' and student's federal tax returns and parents' W-2 forms for the calendar year prior to the academic year for which financial assistance is being requested. The Office of Financial Aid reserves the right to request additional documentation and/or clarification of a family's financial situation.

It should also be noted that a *prospective first-year or transfer student should not wait for an admissions decision prior to filing for financial aid*. Priority consideration will be given to students who meet the FAFSA and PROFILE filing deadlines. Additional consideration may be given to late applicants if funding permits.

Upon proper and timely submission of the FAFSA and the PROFILE, the applicant will automatically be considered for all forms of assistance, including University scholarships, which the Financial Aid Office administers.

Financial Need. Upon receipt of the FAFSA and PROFILE, the Office of Financial Aid will carefully review the information in light of the applicant's individual circumstances and the funding levels of the various programs it administers. It will consider any special circumstances mentioned in the narrative section of the PROFILE or brought to its attention by the student or parents. The result of this analysis is an estimated *family contribution* figure, which is subtracted from the cost of attendance to determine *financial need*.

If financial need is demonstrated, the Office of Financial Aid is committed to providing financial aid resources to meet the financial need. In many cases where assistance is made available, it is done in *package* form; that is, two or more forms of assistance are combined with each other to meet the demonstrated *need*. In most cases this may include opportunities for scholarships, loans, and/or work.

Because the amount of financial aid awarded to an individual reflects the family financial situation, the University, as a matter of policy, does not publicly announce the amount of aid awarded. All information received by the Office of Financial Aid is treated as confidential.

All forms of aid awarded by the University are subject to adjustment based upon additional awards received by the student in excess of the established need. Students receiving aid from the University of Notre Dame must notify the Office of Financial Aid of all other forms of educational assistance from financial aid sources other than those directly administered by the office.

The total financial aid received by a student may not exceed the total cost of attendance.

Renewal of Financial Aid. It is important to note that the vast majority of financial aid programs are *not automatically* renewed from year to year. Because of changes in family circumstances, financial aid policies, funding levels, and college costs, the PROFILE and the FAFSA must be filed *annually*. The deadline for renewal application for all forms of assistance administered by the University's Office of Financial Aid, *including scholarships*, is February 28.

International Students. Financial aid opportunities for international students are limited. International students should be prepared to finance, either

STUDENT FINANCIAL AID

privately or through a sponsor, the full cost of their Notre Dame education. The International Student Certification of Finances (available at financialaid.nd.edu) must be submitted at the time of application for admission, illustrating and documenting sufficient financial support to meet the projected cost of a Notre Dame undergraduate education.

Prospective first-year students wishing to be considered for limited need-based financial assistance must first complete an International Certification of Finances along with a CSS International Student Financial Aid Application (available at financialaid.nd.edu). Based upon a review of academic qualifications, financial need, and availability of student aid resources, an applicant may be considered for financial assistance, including a self-help component of a student loan and student employment, along with University scholarship assistance. The Certification of Finances and the CSS International Student Financial Aid Application will be reviewed along with the student's admission application.

The Certification of Finances is kept on file for continuing international students, outlining the family's annual responsibility to meet educational expenses as a condition of continued enrollment at the University of Notre Dame and for satisfying the U.S. Department of Homeland Security's regulations required for maintaining an officially authorized U.S. student visa status.

FINANCIAL AID PROGRAMS

There are numerous types of financial aid opportunities for students. The process outlined above is that which the student follows for *all* aid programs administered by the University's Office of Financial Aid. Through this one process, applicants are considered automatically for *all* aid programs at the University for which they are eligible, including scholarships/grants. Students are also strongly encouraged to pursue opportunities outside the University. Information regarding some of these *outside* programs is outlined below. However, because students come to Notre Dame from all 50 states and many foreign countries, further details about state and local programs must be obtained through the student's and family's individual efforts.

Most aid programs will fall into one of three categories of assistance: scholarships/grants, student employment, or loans.

SCHOLARSHIPS/GRANTS

Scholarship/grant assistance is a type of aid that is free of repayment obligation.

Notre Dame Scholarships. All students accepted for admission, who have completed the financial aid process as outlined above, are automatically considered for University scholarships. The level of University assistance is first based on demonstrated financial need, and then academic performance, and will thus vary from student to student.

Renewal of University scholarship assistance is based upon a review of students' academic performance at the University and their annually demonstrated financial need. Based on the students' admitted class level, University scholarship consideration is given for a maximum of eight semesters (10 semesters for the Architecture program and Combination Five-Year Engineering Program with the College of Arts and Letters). Students electing to remain at Notre Dame to pursue a second major, second degree, or dual-degree program are not eligible for University scholarships.

A self-help component serves as the foundation of a financial aid package prior to scholarship/grant consideration. The amount of self-help may grow annually, based on several factors, including increases in cost, annually determined financial need, and self-help limits.

Students not receiving scholarship/grant assistance may be considered in subsequent years based on financial need, academic performance, and the availability of University scholarship resources.

Students accepting University scholarships authorize Notre Dame to release confidential information to scholarship donors and Notre Dame alumni clubs by signing a Scholarship Information Release Form. In addition, students agree to write their donor(s) a letter of appreciation, upon request.

Notre Dame Alumni Club Scholarships. Many Notre Dame Alumni Clubs offer scholarships to students in their geographic area. Since these awards are based upon information supplied by the University's Admissions and Financial Aid offices, applicants who follow the standard admissions and financial aid procedures of the University will be considered by alumni clubs offering such awards. Some alumni clubs will require additional steps, such as the completion of a local application and/or a personal interview.

Federal Pell Grant. The Pell Grant is a nonrepayable grant made available by the federal government to eligible undergraduate students enrolled in a degree-granting program.

Notre Dame cooperates with the U.S. Department of Education in administering this program. Applicants must be U.S. citizens or permanent residents of the United States.

The FAFSA serves as the application for the Pell program. Eligibility is determined by the Federal Methodology formula uniformly applied to all applicants. After applying, the student will receive a Student Aid Report (SAR) from the federal government. Eligible students will be notified by the University's Office of Financial Aid. In 2010–11, the grants range from \$555 to \$5,550.

SEO Grant. Notre Dame participates in the Federal Supplemental Educational Opportunity Grant Program (SEO Grant). These federal grants currently range up to \$4,000 for students with exceptional

financial need. The Office of Financial Aid selects recipients from among the most needy applicants, in accordance with guidelines established by the U.S. Department of Education. The number and amount of these grants will depend upon the availability of funds from the federal government each year. Federal SEO Grant funds are available only to U.S. citizens or permanent residents of the United States.

Federal Academic Competitiveness Grant (ACG).

The Federal Academic Competitiveness Grant is a need-based grant restricted to students who qualify for the Federal Pell Grant Program. The students must complete a rigorous high school program of study (as defined by federal regulation). This grant is restricted to students in their freshman and sophomore years of college.

The maximum award for a freshman is up to \$750. For a second-year Academic Competitiveness Grant, the student must continue to meet the eligibility criteria defined above and must achieve a cumulative GPA from their first year at Notre Dame of at least a 3.0. The maximum award for a sophomore is up to \$1,300.

National SMART Grant. The National SMART Grant is a need-based grant restricted to students who qualify for the Federal Pell Grant Program. The National SMART Grant of up to \$4,000 is restricted to students in their junior or senior year of college who have a cumulative GPA at Notre Dame of at least a 3.0 at the end of each semester. In addition, the student must be pursuing a major in mathematics; physical, life, and computer sciences; technology; engineering; or a critical foreign language.

State Scholarships and Grants. Although programs vary from state to state, all applicants are encouraged to seek information about the possibility of obtaining a state scholarship/grant as a student at Notre Dame. Details regarding application processes, eligibility requirements, amounts, etc., vary from state to state. Among the states that currently award scholarship/grant assistance to Notre Dame students are Indiana, Pennsylvania, Rhode Island, and Vermont.

Military Scholarships. The University of Notre Dame, in cooperation with the military services, offers Army, Navy, Marine Corps, and Air Force Reserve Officers' Training Corps (ROTC) programs for interested and qualified students. Satisfactory course completion leads to an Officer's Commission upon graduation from the University.

ROTC scholarships are available on a competitive basis for both men and women. Scholarships may be awarded to offset up to the full cost of tuition, books, and fees, plus an in-school subsistence.

Scholarships are awarded on merit and personal qualifications. Applications must be filed during the fall semester of the student's high school senior year.

Application forms and further program descriptions are available from high school counselors, military

STUDENT FINANCIAL AID

recruiting officers, and ROTC departments at any participating college or university.

First-year students and upperclassmen are eligible to voluntarily enroll in the three-year ROTC college programs at Notre Dame and compete for a limited number of scholarships within the units.

For more information, see financialaid.nd.edu/rotc or contact: ROTC (Army, Navy, and Marine Corps or Air Force), University of Notre Dame, Notre Dame, IN 46556.

Other Federal Assistance Benefits. Certain students may be eligible for special forms of federal agency benefits. Among these agencies are Americorps, the Veterans Administration, the Office of Vocational Rehabilitation, and the Bureau of Indian Affairs. Further details may be obtained through the appropriate local office of the particular agency.

Private Scholarships. Many private organizations provide financial assistance to Notre Dame students. Scholarship information may be obtained by contacting civic, professional, religious, and other community organizations.

The SmartStudent™ Guide to Financial Aid Information at finaid.org and the College Board at collegeboard.com provide scholarship search information.

Caution is advised when using fee-based scholarship search enterprises. Students also should be careful in providing confidential/personal information (e.g., credit card numbers) to such organizations.

STUDENT EMPLOYMENT

Part-time employment opportunities, including those offered through the need-based Federal Work-Study and Paid Community Service Programs as well as other programs, are made available in an effort to assist students in meeting some of the costs related to college attendance.

Approximately 40 percent of Notre Dame undergraduates are employed on campus annually.

Many student employees average 10–12 hours of work per week. Students are paid on a biweekly basis via a direct deposit to their personal bank account. Hourly rates vary depending on the job requirements. The basic hourly wage for the 2010–11 academic year is \$7.25.

The Job Board, at studentemployment.nd.edu, provides a comprehensive listing of jobs available to students, including community service positions (e.g., tutoring, support services, program assistants) along with on-campus jobs in areas such as the dining facilities, the many campus libraries, the computer labs, and office/clerical positions.

LOANS

Borrowing a student loan is a matter that should be undertaken with the greatest of deliberation and with full knowledge of the significant responsibilities involved. Notre Dame borrowers have a proven record of responsible borrowing and repayment of loan obligations. To assist borrowers, the University provides an outline of their rights and responsibilities. In addition, all borrowers are advised of their loan repayment options and obligation upon leaving the University. In an effort to provide additional information regarding a borrower's rights and responsibilities, the Office of Financial Aid offers general counseling to all borrowers.

Federal Perkins Loan. The Federal Perkins Loan is a need-based loan made by the University. The Perkins Loan program requires that the student borrower repay, with interest, this source of financial assistance. Additional terms, subject to revision by federal law, include: zero interest while the student is enrolled in school on at least a half-time basis and during the nine-month grace period following enrollment; no origination fee or insurance fee; five percent interest rate during repayment; repayment on both principal and interest beginning nine months after the student ceases to be enrolled in school on at least a half-time basis, generally extending over a 10-year period; \$5,500 annual loan limit; and \$27,500 maximum aggregate undergraduate borrowing limit.

Applicants are automatically considered for this program as a part of the financial aid process previously outlined. As with any federally sponsored aid program, the student must be a U.S. citizen or have permanent residence in the United States.

All or part of a Federal Perkins Loan may be cancelled for borrowers who enter certain teaching areas or specified military duty, perform volunteer work, or practice medicine in certain types of communities.

William D. Ford Federal Direct Loan (Direct Loan). The Federal Direct Loan is the most common student loan program for funding undergraduate education. There are two types of Direct Loans, Subsidized and Unsubsidized, and they differ in the following ways:

Need-Based Versus Non Need-Based—The Subsidized Direct Loan is considered a need-based loan, which means it is only awarded to those students who can demonstrate a financial need for the loan funds. The Unsubsidized Direct Loan is available to anyone whose other financial aid doesn't meet the Cost of Attendance.

In-School Interest Subsidy—Subsidized Direct Loans are interest free as long as the borrower is enrolled at least half time in a degree program and for the six-month grace period that follows. Unsubsidized Direct Loans begin accruing interest from the date of disbursement and interest continues to accrue while the borrower is in school.

Interest Rates for both loans are fixed rates. In some cases, the subsidized loans have a lower interest rate than the unsubsidized loans (see chart below).

	Interest Rate	Net Fees*
Subsidized Direct Loan	4.5%	0.5%
Unsubsidized Direct Loan	6.8%	0.5%

**The Subsidized and Unsubsidized Federal Direct Loans have a 1.0% origination fee and also offer a 0.5% rebate on the origination fee—resulting in a net fee of 0.5%, which will be deducted from the gross amount of the loan borrowed. Once you enter repayment and make your first 12 monthly payments on time, the rebate becomes permanent. If you fail to make your first 12 on-time monthly payments, a charge for the initial rebate will be added to the outstanding balance of the loan.*

Loan Limits differ depending on the borrower's grade level, dependency status, type of loan, and whether or not the borrower's parent's PLUS Loan has been denied.

- An undergraduate student's dependency status is determined by the Office of Financial Aid.
- If a student is deemed independent or his/her parent is denied a PLUS Loan, the student may borrow up to \$5,000 more in additional unsubsidized loans than shown in the following chart.
- The unsubsidized loan limits shown in the chart below are based on the borrower receiving the maximum amount of subsidized loan. If the borrower is not eligible for the maximum subsidized loan, then the borrower may be able to use additional unsubsidized loan funds to the combined limit, not to exceed the Cost of Attendance less other financial aid.

Grade Level	Subsidized Loan Limits	Unsubsidized Loan Limits	Combined Annual Limits
Freshman	\$3,500	\$2,000	\$5,500
Sophomore	\$4,500	\$2,000	\$6,500
Junior	\$5,500	\$2,000	\$7,500
Senior / 5th Year	\$5,500	\$2,000	\$7,500

Loan proceeds are typically disbursed electronically at the beginning of each semester to the student's account at the University. One-half of the annual amount, after subtracting loan fees, is credited at that time.

Private Loans. After exhausting the opportunities available from the federal aid programs, many students will consider private loan programs as a source of funding. The terms and conditions of these programs vary, and as such, students are encouraged to review the details of the programs before selecting a private loan program. Private loans are not eligible for loan consolidation programs made available for federal student loans. Interest rates, fees (both at the time of borrowing and at repayment), credit checks, and annual and aggregate loan limits require careful evaluation by students as consumers. As

STANDARDS OF PROGRESS FOR RECIPIENTS OF FINANCIAL AID

always, taking on debt for any reason should be done deliberately and only for amounts needed. Additional information may be obtained from the Office of Financial Aid or its website.

OTHER

Monthly Payment Plan. The University makes available a monthly payment plan through TuitionPay Plan. This interest-free payment plan offers a family the opportunity to spread tuition payments over a nine- or ten-month period. The annual fee to enroll in the TuitionPay Plan is \$40. Additional information may be obtained by contacting TuitionPay Plan toll-free at 877-282-5933.

Federal Direct PLUS. The Federal Direct PLUS loan provides a borrowing option for parents of dependent undergraduate students. Based upon a parent's creditworthiness, a parent may borrow through this federally guaranteed, non-need-based loan program.

Further information and electronic application may be obtained online at financialaid.nd.edu.

Standards of Progress for Recipients of Financial Aid

The University of Notre Dame requires all recipients of institutional financial aid to maintain academic good standing as outlined in *du Lac*. In addition, the Higher Education Act, as amended, and subsequent federal regulations require institutions to define, publish, and implement Standards of Progress for students receiving federal financial aid. Recipients of aid through the following programs are subject to these standards: Pell Grant, Supplemental Educational Opportunity Grant (SEO Grant), state grants, Direct Loan, Perkins Loan, PLUS Loan, Federal Work-Study (FWS), Academic Competitiveness Grant (ACG), National SMART Grant, and University scholarships. The outlined Standards of Progress are established for this purpose.

A. Academic Good Standing: In general, students must meet the University's minimum requirements for academic good standing, as outlined in *du Lac*, to receive financial aid. Failure to maintain academic good standing will result in academic probation and probation for purposes of financial aid. Students may receive aid while in this probationary status. However, once students are declared "subject to dismissal," if they are "continued on probation," they are *not* automatically eligible for financial aid.

B. Academic Satisfactory Progress: Students must earn credits at the rates prescribed to maintain eligibility for federal financial aid. The following letter grades do not result in credits earned: F, X, I, U, V, W, NR.

Full-time undergraduate students are expected to complete degree requirements in either eight or 10 semesters, depending on their academic program.

The chart below outlines the *minimum* requirements for Academic Good Standing (minimum semester GPA) and for Academic Satisfactory Progress (minimum cumulative credits earned) for undergraduate recipients of financial aid. Standards for both full-time and part-time students, as well as for four-year and five-year academic programs, are shown.

Undergraduate transfer students will be evaluated based on the advanced status determined at the point of admission (number of transfer credits accepted).

The Standards of Progress are reviewed at the end of each semester for the quantitative and the qualitative aspects of the policy. Students terminated from financial aid for failure to maintain these standards must achieve all stated grade point average and cumulative credits earned requirements for their

academic year level before aid can be reinstated. Students who are terminated and wish to return with aid for the following semester may use the time between semesters to accomplish readmittance, achieve the minimum cumulative credits earned requirement or complete courses for which the grade of X or I has been assigned.

The Office of Financial Aid will notify students in writing when failure to maintain progress results in the loss of financial aid. Appeals of such a decision, based on mitigating circumstances, must be made in writing by the student to the Office of Financial Aid. Appeals will be evaluated, and a written decision will be forwarded to the student within three weeks of the receipt of the appeal.

UNDERGRADUATE STANDARDS OF PROGRESS FOR RECIPIENTS OF FINANCIAL AID

Semesters	Minimum Semester GPA	Minimum Cumulative Credits Earned Required of Full-time Students	Minimum Cumulative Credits Earned Required of Part-time Students
1	1.7		
2	1.85	20	10
3	2.0		
4	2.0	48	24
5	2.0

15	2.0		
16	2.0		132
17	2.0		
18	2.0		150
19	2.0		
20	2.0		168

Full-time is defined as 12 hours or more; part-time is defined as 11 hours or less.

Center for Social Concerns

The Center for Social Concerns provides students with a wide array of academic opportunities for civic participation and addressing issues of injustice.

I. Social, moral, and ethical issues can be studied from a variety of perspectives through Center-initiated courses. Special attention is given to Catholic social tradition. The experiential and community-based learning courses are coordinated primarily by center staff and faculty in collaboration with various departments.

II. With the assistance of the Center for Social Concerns, students engage in multiple opportunities for direct service and other forms of extracurricular civic participation. They work to educate and mobilize themselves and others toward the creation of a more just world.

A. The center, in collaboration with various departments across the University, offers a creative array of interdisciplinary courses that integrate community-based learning with a focus on social challenges. These include three-credit offerings in the summer (Summer Service Learning Programs) and over 20 Social Concerns Seminars (one-credit) during the academic year.

B. The Center for Social Concerns helps to facilitate more than 35 service and social action student groups that work in collaboration with local community organizations, such as the Robinson Community Learning Center and the Center for the Homeless.

C. Through the Center for Social Concerns, students participate in undergraduate research opportunities in collaboration with faculty and community coalitions such as the Lead Alliance.

D. The center works with the First Year of Studies to offer community-based learning courses, and offers senior transition initiatives to facilitate career discernment (currently 10 percent of seniors enter a year or more of full-time service or civic engagement following graduation).

E. The center provides leadership development opportunities for students engaged in social action initiatives, and cosponsors justice education events (workshops, panels, and the like) with campus partners.

F. The Center for Social Concerns helps facilitate over 50 service and social action clubs. These student clubs offer numerous opportunities for advocacy, education, and local community involvement.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Center for Social Concerns](#) heading.

Reserve Officers Training Corps Programs

The University of Notre Dame offers the opportunity to combine the pursuit of an academic degree with earning an officer's commission in either the United States Army, Navy, Marine Corps, or Air Force. Students enrolled in any of the colleges of the University may participate in the Reserve Officers Training Corps (ROTC). Selection of courses in the student's academic major is independent of those selected for ROTC. First-year students enrolled in any of the three ROTC programs are exempted from the University's requirement for physical education.

The College of Arts and Letters and the College of Business Administration accept a maximum of 12 free elective credits from the 30000- and 40000-level military sciences only. Credit from the 10000- and 20000-level courses does not count toward the degree requirements and must be subtracted from the total number of degree credits listed on the transcript.

In the College of Engineering, ROTC students who complete the ROTC program are permitted a maximum of six credits of upper-level air, military or naval science as substitutes for specified degree requirements determined by the department. Not more than three credits may be substituted for history or social science. All air, military or naval science credits not so substituted are not credited toward degree requirements in programs.

In the School of Architecture, ROTC students are permitted a maximum of six credits of 40000-level air, military or naval science courses as substitutes for electives within the 163 credit hours required for the bachelor of architecture degree.

The College of Science will count a maximum of six credit hours of upper-level (30000- or 40000-level) ROTC courses toward the 124-credit-hour requirements. These courses will be counted as free electives.

MILITARY SCIENCE

Chair and Professor:

Lt. Col. Randy Crist, USA

Special Professional Faculty:

Cpt. Kyle Carter, USA

Instructors:

Msg. Rick Tripp, USA

As one of the premier Army ROTC programs in the country, the department's mission is to educate, train, develop, and inspire participants to become officers and leaders of character for the U.S. Army and the nation. The program does this through a combination of classroom instruction, leadership labs, and experiential learning opportunities focused on developing the mind, body, and spirit of participants. These opportunities are designed specifically

to enhance character and leadership ability in the students/cadets and to allow them to practice the essential components of leadership: influencing, acting, and improving. Participants become members of the Fightin' Irish Cadet Battalion and complete a planned and managed sequence of classroom courses and practical exercises intended to develop each participant into what an officer must be—a leader of character, a leader with presence, and a leader of intelligence—to enable them to reach their full potential as individuals and as effective leaders of groups. The program affords students an excellent opportunity to serve and focuses on the role of Army officers in the preservation of peace and national security, with particular emphasis placed on ethical conduct and the officer's responsibility to society to lead, develop themselves and others, and achieve success. The experience culminates ideally with participants earning commissions as second lieutenants in the Active Army, Army Reserve, or Army National Guard. As an organization committed to lifelong learning, participants may elect to pursue one of the Army's numerous opportunities for follow-on postgraduate study as well.

Student Awards and Prizes.

The Dixon Award. A \$200 cash award presented to an outstanding senior who has displayed exceptional performance during the annual Dixon Challenge.

George C. Marshall Award. An award given annually to the top cadets in cadet command. Winners participate in national summer with some of nation's highest ranking leaders.

Commander's Award. A U.S. officer's Civil War sabre given to the two cadet battalion commanders of the year by the Notre Dame Army ROTC Battalion Commander.

Patrick Haley Award. A wristwatch presented annually to the cadet who attains the highest academic grade point average.

Dr. Michael McKee Award. A \$100 cash award presented each year to the outstanding member of the battalion's Drill Team and/or Honor Guard.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the University section under the [Department of Military Science \(ROTC-Army\)](#) heading.

RESERVE OFFICERS TRAINING CORPS PROGRAMS

NAVAL SCIENCE*Chair and Professor:*

CAPT D.M. Nees, USN

Assistant Professors:

CDR E.N. Teuscher, USN

Maj. D.J. Hart, USMC

LT D.W. DeWalt, USN

LT J.S. LaFleur, USN

LT V.S. Panos, USN

LT D.V. Reinhardt, USN

The mission of NROTC is to educate, train, and screen officer candidates to ensure they possess the moral, intellectual, and physical qualities for commissioning and the leadership potential to serve successfully as company grade officers in the U.S. Navy and Marine Corps. The NROTC Scholarship Program fills a vital need in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps.

Non-NROTC students should consult with their college dean or advisor to determine if a Naval Science course will count toward graduation.

Additional NROTC Curriculum Requirements. In addition to the Naval Science requirements outlined above, NROTC scholarship students are required to complete other specified university courses. These additional requirements are taken as a part of the student's field of study or as degree electives, depending upon the college in which enrolled. Students will be notified of such requirements prior to joining the NROTC Program.

Student Organizations and Activities. All NROTC students are integrated into the Midshipman Battalion organization. In addition to participation in all other university organizations and activities for which eligible, NROTC students may participate in specific NROTC organizations and activities such as the Color Guard, intramural athletic teams, the NROTC Unit newspaper and yearbook, and the planning of the Naval Leadership Weekend national conference.

Student Awards and Prizes.

The Chief of Naval Operations Distinguished Graduate Award. The annual recognition of the top graduating midshipman.

The Edward Easby-Smith Award. A sword is awarded to one of the top graduating Navy or Marine Option midshipmen who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

The 1st LT. Vincent J. Naimoli, USMC Award. A sword is awarded to one of the top graduating Navy or Marine Option midshipmen demonstrating 110 percent dedication and effort in academic achievement, student activities, and leadership.

The George C. Strake Award. A sword is awarded to the top graduating Navy Option midshipman for

his or her dedication, leadership, esprit, and positive attitude throughout the four years at Notre Dame.

The Colonel Brian C. Regan, USMCR Award. A sword is awarded to the top graduating Marine Option midshipman for his or her superior leadership and esprit de corps throughout the four years at Notre Dame.

The Captain John A. McGurty Jr., USNR, Award. A sword is awarded to one of the top graduating Navy or Marine Option midshipmen who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

The Chicago Navy League Award. A sword is awarded to one of the top graduating Navy Option midshipmen who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

Gallagher-Snyder Award. A sword is awarded to a first class Navy or Marine Option midshipman who displayed outstanding academic achievement, superior military bearing, and exceptional leadership and physical fitness throughout their four years at Notre Dame.

Numerous other awards are presented annually by various professional and patriotic organizations to recognize excellence in academic achievement and military aptitude.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Department of Naval Science \(ROTC–Navy\)](#) heading.

AEROSPACE STUDIES*Chair and Professor:*

Col. Andrew J. Cernicky, USAF

Assistant Professors:

Lt. Col. Shawn P. "Lowen" Braue, USAF

Capt. John J. Harding, USAF

Instructor:

Capt. Jessica L. Smith, USAF

The Air Force Reserve Officer Training Corps (AFROTC) Detachment 225, "The Flyin' Irish," a premier ROTC program, is an educational and training program designed to give men and women the opportunity to become world-class leaders as Air Force officers of integrity, service and excellence, while completing an undergraduate four-year academic degree. The AFROTC Programs develop leadership and management skills students need to become effective and trusted leaders in the 21st century. In return for challenging and rewarding work, we offer the opportunity for advancement, education and training, and a sense of pride that comes from serving your great nation. Upon completion of the Air Force ROTC program students are

commissioned as second lieutenants in the United States Air Force. Following commissioning there are excellent opportunities for additional education in a wide variety of academic fields.

Student Organizations and Activities. All Air Force ROTC cadets are given opportunities to participate in a variety of extracurricular activities to develop their leadership skills. Activities available for AFROTC cadets include the Arnold Air Society (AAS), oriented toward service to the local community, the AFROTC cadet wing newspaper *Skywriting* and the annual *Yearbook*, AFROTC Career Day, Veterans Day Vigil, Junior Parents weekend, Civil Air Patrol (CAP) flying activities, intramural and varsity athletics, University bands and cheerleading activities as well as the Drill Team, Honor Guard, and Rifle Squad, who perform at campus and community functions while developing individual drill proficiency. Special AFROTC language programs, engineering programs, and cultural leadership events are available during summer.

Student Awards and Prizes.

The Notre Dame Air Force Award, and Air Force officer's sword, are presented to the top graduating senior in Air Force ROTC.

The Noël Dubé Award is presented to the senior class Arnold Air Society member who has contributed the most to furthering the ideals and goals of the society within the University and local community.

The Paul Robérge Award, named in memory of an alumnus of the Notre Dame ROTC program, annually recognizes the top pilot candidate in the Professional Officer's course.

Other awards are sponsored by various local and national organizations to recognize excellence within the cadet corps.

COURSE DESCRIPTIONS

The complete descriptions for all the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Department of Aerospace Studies \(ROTC–Air Force\)](#) heading.

** Leadership Laboratory is open to students who are members of ROTC or who are eligible to pursue a commission as determined by the professor of Aerospace Studies.*

Office of International Studies

The Office of International Studies, under the direction of Prof. Joseph Buttigieg, interim assistant provost, and Kathleen Opel, director, administers over 40 programs in more than 20 countries in a variety of academic year and summer programs:

Since 1964, Notre Dame has made it possible for students to earn credits toward graduation in international study programs. Study in another tradition, direct personal experience of another language and culture and travel all broaden and deepen the liberal education of the whole person to which the University has always been committed.

Without delay in graduation, international study programs make a unique contribution to the excellence of liberal education in the undergraduate colleges and frequently have proved an asset in career development.

Qualified students from all undergraduate colleges can apply to spend a semester or a year abroad in one of our programs. Participation is normally during the junior year, but some programs are designed to accommodate sophomores as well.

Admission into most of the programs is quite competitive and students are encouraged to apply to more than one program. Participation is a privilege, not a right. Offers of admission are made in accordance with program requirements, at the discretion of the OIS staff in consultation with faculty and staff of the University. Students considering more than a single semester or academic year program should carefully review their majors and minors to ensure that such study does not delay the completion of graduation requirements. Students who have participated in or been selected for an off-campus program may receive a lower priority in the selection process of a second program.

Participation in a summer off-campus program does not affect a student's application to a semester or yearlong program.

The Office of International Studies offers semester or yearlong programs in every continent. In Europe, students may apply to go to Angers or Paris, France; Athens, Greece; Berlin, Germany; Bologna or Rome, Italy; Dublin, Ireland; London, St. Andrew, Oxford, or Cambridge, United Kingdom; Leuven, Belgium; or Toledo, Spain. Undergraduates can study in Puebla, Mexico; Bahia or São Paulo, Brazil; or Santiago, Chile for a Latin American experience. They can participate in programs in Cairo, Egypt or Kampala, Uganda, or in Fremantle and Perth, Australia. Notre Dame also offers semester-long programs in Nagoya and Tokyo, Japan; in Shanghai, Beijing, and Hong Kong, China; and in Moscow, St. Petersburg, and Vladimir, Russia. Students can also spend a semester in Washington, D.C.

The Office of International Studies offers summer programs for students who have completed at least one year of studies at Notre Dame in London, United Kingdom; Dublin, Ireland; Jerusalem; and Toledo, Spain. We also offer several faculty-led programs. In summer 2010, they took place in Paris, France; Cape Town, South Africa; Taipei, Taiwan; and Rome, Italy; as well as an African Peace and Conflict Studies Program in Uganda and Rwanda, and Business and Culture in China. The locations of the faculty-led 2011 summer programs will vary.

Programs are also sponsored by the School of Architecture in Rome (yearlong) and by the College of Engineering in London (summer).

Students may also participate in a St. Mary's College study-abroad program, in accordance with the policy outlined on the OIS website.

Candidates for Angers, Paris, Bahia, São Paulo; Berlin, Rome, Bologna, Beijing, Shanghai, Nagoya, Tokyo, Toledo, Puebla, Santiago, and Russia must demonstrate skills in the language of the country sufficient to make their period of residence and study fully profitable. These skills may be developed through intensive or other language courses in the freshman or sophomore year. Previous study of the language in high school is mandatory for some programs.

Instruction is in English in Athens, Cairo, Dublin, Jerusalem, Perth, Fremantle, London, St. Andrew, Oxford, and Cambridge; Italian and English in Rome; Japanese and English in Nagoya and Tokyo; Chinese and English in Beijing, Shanghai, and Hong Kong; French in Angers and Paris; Spanish in Toledo, Puebla, and Santiago; Portuguese in Brazil; Italian in Bologna; Russian in Russia; and German in Berlin.

Students earn Notre Dame credit for courses taken abroad and grades are included in the Notre Dame GPA. Some courses taught abroad will fulfill core University requirements such as theology, philosophy, history, fine arts, etc. Students are required to take 15 credit hours per semester in the study abroad program.

An approved social science course in the field of anthropology, psychology, or sociology will complete a behavioral science requirement in the Mendoza College of Business.

For major credit in any department, the student must consult with the departmental advisor.

Students with compelling academic reasons for participating in non-Notre Dame programs are eligible to apply for a leave of absence for study in a program offered by another college or university. They may not, however, take a leave of absence to attend international programs in cities where Notre Dame offers its own programs.

Course descriptions for hundreds of courses taught in the following programs are available on the Web at nd.edu/-ois/Courses/Courses.html.

ANGERS, FRANCE PROGRAM

Academic Year or Semester Program
Université Catholique de l'Ouest (UCO)

Director: Paul McDowell

The Angers program is open to sophomores and juniors in all colleges. Many Angers students decide to pursue a first or second major in French. Declared and prospective French majors must go to the Department of Romance Languages and Literatures for an advising sheet before they participate in the program.

An academic year of two semesters begins after a month-long language-intensive summer session, the *préstage*. Most Angers students take the bulk of courses within the Centre International d'Études Françaises (CIDEF), UCO's language institute. CIDEF students with advanced French language skills may also register for a cours universitaire through one of the institutes at UCO. Studio art majors may pursue course work at the Ecole Supérieure des Beaux-Arts d'Angers, and in a given year a limited number of business courses may be available at the Ecole Supérieure des Sciences Commerciales d'Angers (ESSCA), an affiliate of UCO.

Students who choose to study in Angers for the entire year will have two required courses each semester: the six-hour-per-week CIDEF language course that is appropriate to their skill level, and one of the Notre Dame-sponsored cultural options. Semester students will take their required courses during the relevant semester.

An alternate academic year track is open to a limited number of students with high levels of proficiency in French. After the month-long *préstage*, these students matriculate directly in the UCO and take courses alongside their French student counterparts.

All instruction is in French.

ATHENS, GREECE PROGRAM

Semester or Academic Year Program
College Year in Athens

Sophomores and juniors study with other international students at the College Year in Athens. Classes are taught in English and the program is organized in two curricula: Ancient Greek Civilization and East Mediterranean Area Studies. Through the Ancient Greek Civilization track, students amplify their knowledge of ancient Greece and deepen their understanding of Greece's fundamental contribution to the development of Western civilization. The East Mediterranean Area Studies curriculum focuses attention on Southeast Europe, West Asia, and the Middle East in the time period between the founding of Constantinople (330 AD) to the present. It is an area of unusual importance in geopolitics, where Europe intersects with Asia and Africa and one whose problems and complexities, rooted in the past,

OFFICE OF INTERNATIONAL STUDIES

pique the interest of students of history, politics, and international affairs.

BEIJING, CHINA PROGRAM

Semester or Academic Year Program
Peking University

The Office of International Studies offers this option in conjunction with the Council for International Educational Exchange (CIEE). Students may enroll in this intensive Chinese language program at Peking University. Organized group activities complement the classroom experience. All classes are taught in Mandarin Chinese with elective area studies courses offered in English each semester. The Beijing program is strongly recommended for Chinese majors. Detailed program information is available at the Office of International Studies, 152 Hurley, or by visiting the CIEE website at ciee.org.

BERLIN, GERMANY PROGRAM

Academic Year or Semester Program
Freie Universität-Berlin

The Berlin Program is part of the Consortium for German Studies (BCGS), which is run by Columbia University. This program is designed for students with two years of university-level language instruction and is, therefore, open only to juniors. This program provides in-depth study of German language, culture, and society, and the opportunity to observe first-hand the emerging impact of a reunited Berlin—now considered Germany's cultural, political, and economic center—on the rest of Europe.

The program begins with a six-week intensive language practicum; then students enroll in one course (taught by the BCGS directors) that reflects their academic interests, focusing on topics such as culture, politics, history, literature, theater, or cinema, as well as at least two courses at Freie Universität Berlin. Freie Universität Berlin offers a wide range of courses in the humanities, social sciences, and natural sciences. All coursework will be in German.

BOLOGNA, ITALY PROGRAM

Academic Year Program

Students matriculate in the University of Bologna (UniBo) through Notre Dame's association with the Bologna Consortial Studies Program (BCSP), administered by Indiana University. Students must commit to an academic year in Bologna. They must be juniors at the time of participation and have completed the equivalent of four, preferably five, college-level Italian courses.

Students attend a four-week preparatory pre-session in September before beginning classes at UniBo. Organized group activities complement the classroom experience.

Direct matriculation in the University of Bologna, among Italy's premier universities, coupled with living in apartments with Italian students, provides a genuine experience of Italian university life and contributes to the attainment of oral and written fluency in Italian.

BRAZIL PROGRAMS

Salvador da Bahia

Semester or Academic Year Program
Universidade Católica do Salvador (UCSal),
Universidade Federal da Bahia

The Office of International Studies offers this option in conjunction with the Council for International Educational Exchange (CIEE). The program begins with a five-week, intensive language and culture program (ILCP) held in Salvador da Bahia for the fall semester and São Paulo for the spring semester. During the ILCP, students are required to take an intensive Portuguese language class and the interdisciplinary core course titled "Contemporary Brazil." Students who are near-native speakers of Spanish may be placed in a "Portuguese for Spanish Speakers" course (offered based on enrollment).

For the remainder of the semester, students must enroll in two required courses: "Portuguese Language" and "Culture and Society: Bahia and Brazil." The remainder of the course load (two or three courses) is drawn from a combination of CIEE courses and/or the wide range of courses offered at the host universities.

São Paulo

Semester or Academic Year Program
Pontifícia Universidade Católica de São Paulo

This program is also offered in conjunction with CIEE. The program begins with a five-week, intensive language and culture program (ILCP) held in Salvador da Bahia for the fall semester and São Paulo for the spring semester. During the ILCP, students are required to take an intensive Portuguese language class and the interdisciplinary core course titled "Contemporary Brazil." Students who are near-native speakers of Spanish may be placed in a "Portuguese for Spanish Speakers" course (offered based on enrollment).

For the remainder of the semester, students must enroll in two required courses: "Portuguese Language" and the CIEE core course "Brazilian Issues and Realities." In addition to the two required CIEE courses, students choose two or three electives drawn from the wide range of courses offered at PUC for which they meet the prerequisites.

CAIRO, EGYPT PROGRAM

Semester or Academic Year Program
American University in Cairo (AUC)

Students may enroll during their junior or possibly sophomore year of college. Students from all colleges are eligible for participation. Students select courses

from the general course offerings of AUC and are integrated into classes with AUC degree-seeking students. Cairo is an ideal base from which to explore the rich heritage of Arab and Islamic culture. All classes are offered in English, but AUC also offers students opportunities and options of learning the Arabic language.

DUBLIN, IRELAND PROGRAM

Semester or Academic Year Program
University College Dublin, Trinity College Dublin

Director: Kevin Whelan

The Dublin program is open to juniors in arts and letters, business, engineering, and science for a semester or a year. Students will enroll in courses in their majors at University College Dublin or Trinity College Dublin and will also take courses at Notre Dame's Keough-Naughton Center. For course listings at the Irish universities, contact the Office of International Studies, 152 Hurley Building, 631-5882.

Prof. Whelan will offer a course in "Irish History and Society." This course is mandatory for all program participants. The Notre Dame Center may also offer theology, philosophy, and fine arts courses.

FREMANTLE, AUSTRALIA PROGRAM

Semester Program
University of Notre Dame Australia

Students in the colleges of business and arts and letters will enroll in courses at the University of Notre Dame Australia (NDA) through this program. Students enroll in five courses (15 credits) either semester in any combination depending on their major/college requirement and individual need. A list of course offerings for the fall normally is available in 152 Hurley around the end of March and for the spring term around the end of September.

A listing of approved courses offered in previous semesters is available on our website or in the Office of International Studies, 152 Hurley. Students in the Fremantle program are required to take ANTH 34392 Australian History and Society (3 credits). In the fall term, students must also take BAUD 34120 Business in Asia, also cross-listed as ECON 34781 (3 credits).

HONG KONG, CHINA PROGRAM

Academic Year or Semester Program
Chinese University of Hong Kong (CUHK)

The Hong Kong program is open to juniors and is particularly suited to students in arts and letters, business, engineering, or science. CUHK is a bilingual bicultural institution with local and international students and scholars. CUHK receives students from over 180 academic institutions worldwide. No Chinese language study is required, and students may choose from many courses that

are taught in English or take courses taught in Chinese (if they meet the language requirement). Students may choose courses from the faculty of arts, business administration, engineering, science, or social science. In addition to this, students may also take courses from the International Asian Studies Program. This program includes Chinese, Asian, and international studies courses and Chinese language courses.

KAMPALA, UGANDA PROGRAM

Semester Program

School for International Training

The program is designed to expose students to as many aspects of development in Uganda as possible. Students are required to enroll in all course offerings to get a better grasp of the socio-economic issues that affect development. The program combines course work with field research during which students identify topics of interest that they pursue for their final development practicum.

LEUVEN, BELGIUM

Academic Year or Semester Program

Katholieke Universiteit Leuven (KUL)

The program in Leuven, Belgium, is open to qualified students enrolled in the undergraduate seminary program Old College. Students may apply to spend one or two semesters in Leuven during their junior year.

Students follow courses at KUL and live at the American College of the Immaculate Conception (AC). The AC was established by bishops in the United States in 1857 to educate and train seminarians who would be future priests and bishops in the new country of the United States of America. With 150 years of experience, the AC hosts theologians from many dioceses in the United States, college seminarians, and priests and religious for sabbatical programs. Regular excursions to the Vatican and cultural trips are organized by the AC and students each year. Ministry is arranged by the formation staff of the AC and includes a placement to a nearby English-speaking parish.

MOSCOW, ST. PETERSBURG, AND VLADIMIR, RUSSIA PROGRAMS

Semester or Academic Year Programs

Students may enroll in a Russian language and area studies program through the American Council of Teachers of Russian. They may choose to study in Moscow, St. Petersburg, or Vladimir for one semester or an academic year. Students should have completed two years of Russian or the equivalent at the university level before participation. They take courses in grammar and contemporary Russian language, vocabulary, and conversation, as well as in literature, Russian and Soviet culture, history, politics, and the mass media. Course descriptions are available on the OIS website.

NAGOYA, JAPAN PROGRAM

Semester or Academic Year Program

Center for Japanese Studies, Nanzan University

The Nagoya program is designed for Japanese language majors. Students are required to take an 8-credit Japanese course at the appropriate level each semester. Students choose their other courses in the areas of Japanese society, literature, religion, business, economics, history. Except for Japanese language classes, all courses are taught in English, and the subject matter is often placed in a larger Asian context.

PARIS, FRANCE PROGRAM

Spring Semester or Academic Year Program

Institut d'Etudes Politiques de Paris

In 1999, the University of Notre Dame began an exchange program with the Institut d'Etudes Politiques de Paris (Sciences-Po). Offered as a yearlong or a second-semester program, the Paris program is limited to students with a high level of French, an excellent grade-point average, and a major in history or a social science. Students will take courses in European economics, politics, sociology, and history, and in French language. Successful completion of a year of study results in a certificate from Sciences-Po, which is widely recognized in Europe and the United States.

PERTH, AUSTRALIA PROGRAM

Semester Program

University of Western Australia

A special program has been developed for juniors in the colleges of Engineering and Science to enroll at the University of Western Australia (UWA) during the fall semester only. The program combines course work with an intensive field research program established in conjunction with several Australian mining and engineering companies. A spring semester option is possible for students whose schedule can accommodate it. All students should carry a minimum of 30 UWA points, which translates to about 12 to 15 Notre Dame credits. Course offerings are available on UWA's website, handbooks.uwa.edu.au/, or on our website.

PUEBLA, MEXICO PROGRAM

Semester or Academic Year Program

Coordinator: Lisette Monterroso

Notre Dame offers a premedical program in the fall semester, which includes the first semester of general physics and internships with Mexican doctors. Other students may go in the spring semester.

Courses in Spanish language and Spanish and Latin American literature are also offered.

There are many courses taught in English at UDLA, but a major goal of studying in Mexico is to become fluent in Spanish. If students have taken advanced

Spanish at Notre Dame, they may not take more than one course in English during their semester in Mexico. Students must enroll in 15 credit hours per semester.

Sample courses taken by previous participants in the Notre Dame Puebla program are listed on our website.

ROME, ITALY PROGRAM

Semester or Academic Year Program

John Cabot University (JCU)

Students from all colleges can enroll in classes at John Cabot University, an American university in Rome, which offers courses in art, business, classics, government, history, literature, philosophy, theology, and psychology. All courses are taught in English (with the exception of Italian language classes). Many JCU courses have been approved by Notre Dame departments for major credit; however, students must consult with their department to confirm courses for their major. All students are required to take one Italian-language course during their semester or year in Rome.

For a listing of all courses offered at John Cabot, check the OIS website.

ROME, ITALY ICCS

Semester Program

The Intercollegiate Center for Classical Studies

A select number of Notre Dame students can participate for one semester in the Intercollegiate Center for Classical Studies, a consortium of 90 colleges and universities under the management of Duke University. The ICCS provides students with an opportunity in Rome to study ancient history and archaeology, Latin and Greek language and literature, and art history. Applicants must be at least sophomores majoring in classics, classical history, or archaeology, or must be art history majors with a strong classical background. Proficiency in Italian language is not required. Participants are nominated by members of the Notre Dame Classics department, and acceptance into the Rome-ICCS Program is highly selective.

SANTIAGO, CHILE PROGRAM

Semester Program

Pontificia Universidad Católica (PUC)

Director: Esteban Montes

Coordinator: Estela Rojo

Students take courses at the Pontificia Universidad Católica (PUC). All students enroll in "Spanish for Foreigners," "Chilean Politics and Society" (or a similar course), and three other courses.

Students interested in enrolling in the seminar "Perspectives on Poverty and Development" must submit an application to the Center for Social Concerns (CSC). This service-learning course is

OFFICE OF INTERNATIONAL STUDIES

offered by the Universidad Alberto Hurtado, a Jesuit University in Santiago.

The fall semester runs from late July through mid-December. The spring program runs from February through mid-July. A pre-semester, intensive language program is offered in February and July in Linares, a rural community outside Santiago.

SHANGHAI, CHINA PROGRAM

Semester or Academic Year Program East China Normal University

The Office of International Studies offers this option in conjunction with the Council on International Educational Exchange (CIEE). The Shanghai Program at East China Normal University is intended for students who wish to accelerate their acquisition of Chinese and is strongly recommended for all Chinese majors and minors. All students must take a Chinese-language course and other courses on Chinese history, culture, and politics offered in English. Students earn Notre Dame credit for courses taken in Shanghai, and grades are included in the Notre Dame GPA. Organized group activities complement the classroom experience. Detailed program information is available at 152 Hurley, or at CIEE's website: ciee.org/studyabroad.

ST. ANDREWS, SCOTLAND PROGRAM

Spring Semester

St. Andrews was founded around 1411 and bears the distinction of being Scotland's oldest and most prestigious university, ranking consistently among Britain's top five universities. St. Andrews is renowned for its academic strength in numerous disciplines, but is particularly distinguished in Medieval Studies. This program is open to students with a major, minor, or concentration in Medieval Studies or in the process of declaring their major or minor in Medieval Studies. Students will have to have completed, prior to departure, the Medieval Studies gateway course, "The World of the Middle Ages," and preference will be given to students with at least a 3.50 cumulative GPA.

Students will apply in the fall semester of their sophomore year to study at St. Andrews in the spring semester of their junior year. Qualified students are selected for interview based on applications, and participants are chosen by a selection committee for International Programs.

This program also will have a required short U.K. curricular trip, led by a Notre Dame medievalist, during the Easter break.

TOKYO, JAPAN PROGRAM

Spring Semester or Academic Year Program Sophia University

The Office of International Studies offers this option in conjunction with the Council on International

Educational Exchange (CIEE). The Tokyo Program is open to sophomores and juniors who have completed a semester of Japanese. All students must take a Japanese-language course and can choose from a wide variety of other courses offered in English including business, economics, history, literature, philosophy, and sociology. Students earn Notre Dame credit for courses taken in Shanghai, and grades are included in the Notre Dame GPA. Organized group activities complement the classroom experience. Detailed program information is available at 152 Hurley, or at CIEE's website: ciee.org/study_abroad.

TOLEDO PROGRAM

Semester or Academic Year Program Fundacion Ortega y Gasset

The Toledo program is open to sophomores and juniors in all majors. Students may study for a semester or academic year in Toledo and all courses are taught in Spanish. Students must take five courses through the Centro de Estudios Internacionales, Fundacion Ortega y Gasset. A philosophy course is offered in the fall only; a theology course is offered in the spring. Credit-bearing internships are available in Toledo. Students may apply for internships in several areas, including government, the arts, social service, and communications. Credit toward a major must be approved by an advisor in the major department.

Second semester and academic year students with advanced proficiency in Spanish may apply to do coursework at the Universidad Castilla La Mancha in Toledo.

UNDERGRADUATE LONDON PROGRAM

Notre Dame London Center

Director: Greg Kucich

Deputy Director: Laura Holt

Associate Director: Cornelius O'Boyle

2010–11 Visiting U.S. Faculty

Sam Paolucci, Professor of Engineering (fall 2010)

Yvonne Gaspar, Grad Student, Ph.D in Lit. (fall 2010)

John Griffin, Professor of Political Science (spring 2011)

John Weber, Professor of Business (spring 2011)

Notre Dame undergraduates from the colleges of arts and letters, business, engineering, and science may elect to spend one semester of their junior year in the London Undergraduate Program. While in London, students take classes offered by Notre Dame and British professors at Notre Dame London Centre near Trafalgar Square. Students participating in the program live as a group in residential facilities with supervision provided by the program. The semester enables students to combine serious academic study with the opportunity to live and travel in Europe.

The London Undergraduate Program operates within the Office of International Studies. We encourage students interested in London studies for the regular academic year to direct further inquiries regarding location, staff, facilities, curriculum, and requirements to the London Program at 153 Hurley Hall, Notre Dame, IN 46556; telephone: (574) 631-7414; fax: (574) 631-3978. Students should also visit our website at nd.edu/~ois.

Program of Studies. In 1981, the College of Arts and Letters initiated a program for a junior semester in London, believing that the educational and cultural benefits of study with British scholars in London are particularly valuable. In 1997—its tremendous success having attracted attention from other colleges within the University—the London Program was expanded to accommodate both the demand and the curricular needs of students from all of Notre Dame's colleges. Notre Dame's British faculty is selected to be at least on par with that of the home campus, including experts whose work is internationally recognized in their fields.

All London Program courses are Notre Dame courses. Credit hours are recorded on the student's transcript, and quality points are applied to the cumulative average in the usual manner. During the semester in London, each student must carry a course load of between 15 and 17 credits, including a mandatory three-credit core course, "Global London." Most students are able to earn three to six hours of credit toward their majors and to satisfy some University-wide course requirements.

Course descriptions are available on the Undergraduate London Program website.

UNDERGRADUATE OXFORD PROGRAM

Associate Director: Geraldine Meehan

The Oxford Program provides juniors in the colleges of science, engineering, and arts and letters the opportunity to study at New College, Oxford for a full academic year. Application is by invitation only. New College dictates the fields in which they will accept students each year. The college also requires that candidates have an overall GPA of 3.7 at the time of application.

While there, students participate in Oxford's celebrated tutorial system: Students work individually with a tutor to pursue their major courses of study in depth. Tutors are full-time faculty at Oxford. They include some of the most accomplished scholars in the world in their fields. Participating students live in New College accommodation and take some meals in the college dining hall. Detailed program information is available at the Office of International Studies, 153 Hurley Building, 631-7414.

UNDERGRADUATE CAMBRIDGE PROGRAM

Academic Year

King's College, Cambridge

Associate Director: Geraldine Meehan

Notre Dame students have an opportunity to spend their entire junior year studying at King's College, Cambridge. There, in addition to classes, they will participate in Cambridge's renowned system of supervisions. Within this system, they will have an opportunity to work one-on-one with Cambridge's scholars, affording them an opportunity to develop and pursue focused academic interests. At King's College, they will live in the college and have an opportunity to eat meals there. The Cambridge Program is available to students of the colleges of arts and letters, science, and engineering, and applications are by invitation only.

WASHINGTON PROGRAM

Executive Director: Thomas Kellenberg

Sophomores and juniors of any major and college are encouraged to apply to the University's only domestic off-campus program. Participants in the Notre Dame Washington Program live, study, and work in the nation's capital in either the fall or spring semester. The program seeks students who are interested in studying in a vibrant urban setting amid the high energy and excitement of national politics, policy, and the arts.

The curriculum combines course work with internships in government organizations, Congress, the not-for-profit sector, the media, and cultural organizations. Participants live in a historic neighborhood in northwest Washington, and close proximity to the metro provides easy access to internship sites, research facilities, and cultural opportunities. Students share well-fitted apartments in a secure building that includes study space, computers, and laundry facilities. There is no additional charge for the program beyond Notre Dame tuition and room-and-board fees.

All students earn 15 credits per semester by fulfilling a mandatory six-credit policy course, a mandatory three-credit internship, and two three-credit electives from five categories: art history, political science, American studies, history, and philosophy. The campus program coordinator assists each participant with the research and application process for all internships that are suitable to the student's interest and experience.

For more information, see our website at nd.edu/~wp.

Physical Education and Wellness Instruction

Chair of Physical Education and Wellness Instruction:

Thomas Kelly

Associate Professional Specialists:

Michele Gelfman

Denise Goralski

Fran McCann

Dianne Patnaude

Diane Scherzer

Marisha Schmidt

Joshua Skube

Assistant Professional Specialists:

Stephanie Gaal

Nathan Piwowar

Jill Ricker

Joshua Scott

Darin Thomas

Assistant Professional Specialist and Assistant Athletic Trainer:

William F. Meyer Jr.

The Department of Physical Education and Wellness Instruction promotes appreciation for the positive impact that life sport and wellness activities have on the whole person—mind, body, and spirit. Its integrative curriculum seeks to enhance the physical, intellectual, spiritual, and emotional growth of first-year students.

As a complement to physical education activities, the department offers a required course in Contemporary Topics for College Students. This course is designed to enhance understanding of various components of fitness and selected lifestyle issues such as stress management, nutrition, diversity, and relationships with others, that have an impact on the individual. Students will learn to formulate and implement their own fitness and wellness programs through self-testing, evaluations, exercises, and self-assessments.

The department believes that basic swimming skills are important for the student. A swim test will be administered at the beginning of the year to determine each student's ability.

Most students will be able to elect four of the following activities to complete their requirement. It is strongly recommended that activities from both the wellness and lifetime sports tracks be taken.

American Ballroom Dance

Aquatic Fitness

Bowling

Contemporary Topics for College Students

Cycling

Fencing

First Aid

Fitness for Life

Golf

Handball

Hiking/Orienteering

Ice Skating

Introduction to Coaching

Latin Ballroom Dance

Racquet Sports

Running for Fitness

Self-Defense

Skiing:

Cross Country

Downhill

Soccer

Swimming:

Lifeguard Training

Team Handball

Tennis

Ultimate Frisbee

Volleyball

Walking/Jogging

Wall Climbing

Weight Training

Yoga

All activities are offered at the beginning level; however, some activities are offered at an intermediate level. If the student has a physical disability and is unable to participate in activity classes, a specially designed program will be arranged. For further information, see our website at nd.edu/~physedu.

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Department of Physical Education](#) heading.

Information Technologies

The Office of Information Technologies (OIT) provides a robust and highly reliable technology infrastructure that supports the University's teaching, research, community service and administrative activities. Information technology services are designed to enable and empower, transform and benefit, and serve and support the entire Notre Dame community.

ResNet is the residence hall ethernet network, and is available in all undergraduate residence halls and graduate student residences. It provides a 100Mbps ethernet jack for every student living on the Notre Dame campus, and allows students to connect network-ready devices directly to the campus computer network. Students with wireless-capable computers also can connect to the campus WiFi network present in all University residence halls and campus buildings (see oit.nd.edu/network/oncampus.shtml).

The OIT provides all Notre Dame students with an nd.edu e-mail account hosted by Google, file space and distributed printing services. Google also provides students with Google Apps and over 6GB of storage.

The Notre Dame Computer Store has a variety of computers, printers, software, and other peripheral devices available for students to purchase at substantial savings. Adobe, Corel, and Microsoft are examples of software currently available for considerably less than the retail price. Students can shop online for discounted hardware and software at oit.nd.edu/store, or visit the Computer Store located at 103 IT Center. Students planning to purchase a computer should consult computer configurations recommended by the OIT at oit.nd.edu/store, or call (574) 631-7477 for assistance.

All residence hall rooms have standard cable television service with a 70-channel line-up. Additional digital cable television services, including HD, DVR and OnDemand, can be ordered directly from Comcast for an additional fee (see oit.nd.edu/cabletv). A distributed cellular antenna system (DAS) in various campus locations provides enhanced coverage for major cellular telephone providers. The two providers using the DAS are AT&T and Verizon (see oit.nd.edu/cellular).

Information technology support services are available to students from the OIT Help Desk, located at 128 DeBartolo Hall. Trained support technicians at the Help Desk are available to answer questions and help guide computer users in diagnosing and resolving problems by phone, e-mail, and in person. For more information about the Help Desk, see oit.nd.edu/helpdesk. Help Desk hours are:

Sunday 3:00 p.m. to 8:00 p.m. (telephone support only)

Monday through Thursday 8:00 a.m. to 5:00 p.m.
(telephone support until 10:00 p.m.)

Friday 8:00 to 5:00 p.m.

Closed Wednesday, Noon to 1:30 p.m., and all day Saturday

Note: Help Desk evening and weekend hours are in effect only during the academic year when classes are in session.

Free computer training classes are available through the OIT to students on a wide range of software. For more information on training programs, see oit.nd.edu/training.

There are five public-access computer labs campus-wide supported by the OIT. Students, faculty, and staff have access to these labs that include approximately 260 computers running Windows Vista and Mac OS-X operating systems.

The OIT works closely with the Office of the Registrar and Academic Space Management to design, build, and support technology-enhanced learning spaces on campus. Eighty percent of the Registrar's classrooms are equipped with audiovisual systems that allow students and faculty to present information from a variety of sources. Small, portable devices such as cameras, audio recording devices, and microphones can be loaned out for class-related use from the OIT facility at 115 DeBartolo Hall. Students and faculty can also take advantage of other OIT services, including videoconferencing, video streaming, video and audio production, and postproduction services, including media duplication.

In addition to mainstream computing services, the OIT, in partnership with the Office of Research, works with the Center for Research Computing to support computationally intensive work, large dataset management, and data visualization for the undergraduate, graduate and campus research communities. The University provides access to national supercomputing and data resource facilities via Internet2. It provides high bandwidth access to about 200 leading research universities and supercomputing centers. For more information, visit crc.nd.edu.

Anyone using Notre Dame computers and network resources must abide by the policies set forth in the document "**Responsible Use of Information Technologies at Notre Dame.**" The full text of this policy is available online at oit.nd.edu/policies/rup.shtml.

For complete information, an easy-to-use overview of OIT services and how to obtain them is available at oit.nd.edu.

The Career Center

The Career Center is dedicated to the development and implementation of innovative programs and services that promote lifelong career management skills for students and alumni. By cultivating multi-faceted partnerships/networks, our staff is committed to providing the resources for students to explore diverse career opportunities. Staff members assist undergraduate and graduate students as well as alumni with career counseling, career assessment, group workshops, presentations for academic departments, career fairs, and mock interviews, in addition to other services.

We encourage students to take ownership of their career direction, and be willing to devote the time and energy necessary to conduct a successful search for jobs, internships, fellowships, and/or the identification of graduate school programs. Students have the opportunity to utilize our online databases to pursue postgraduate opportunities, sign up for interviews, and conduct career-related research.

Workshops, Programs, and Special Seminars.

The Career Center collaborates with the College of Arts and Letters, Mendoza College of Business, College of Engineering, College of Science, and the School of Architecture to coordinate a wide variety of career programs, services, seminars, and workshops for students throughout the year. A sample list includes:

- On-campus career fairs including the Fall Career Expo, Engineering Industry Day, the Winter Career and Internship Fair and Diversity Reception, and the School of Architecture Career Fair
- Off-campus career fairs and consortia events in New York City; Washington, D.C.; Boston; Chicago; and California
- Fall Kick-Off for seniors
- A variety of workshops dedicated to resumé and cover letter writing techniques, job and internship search strategies, interview skill development, as well as a number of informative programs geared toward students interested in careers in specific industries including nonprofit, investment banking, the federal government, and media.
- Mock Interview Program
- Global Internship Initiative—internship funding programs
- Notre Dame Alumni Job Shadow Program
- Dossier/CV Services
- Four career courses for academic course credit
- Access to the Strong Interest Inventory and the Myers Briggs Type Indicator self-assessment instruments (meeting with a career counselor is a prerequisite)
- How to Recession-Proof Your Job Search workshops and other programs helping students

HOLY CROSS SEMINARY FORMATION

address the state of the economy in their job search

- Externship programs

Internships and Summer Jobs. The Career Center spends a great deal of time with first year, sophomore, and junior students identifying and applying for internships and summer jobs. Students have access to numerous internship databases containing more than 10,000 employment opportunities.

Holy Cross Seminary Formation

The Old College undergraduate seminary program is housed in the original campus structure built in 1843 by Notre Dame's founder, Rev. Edward Sorin, C.S.C. It welcomes high school graduates with a serious interest in exploring a vocation as a priest or brother in the Congregation of Holy Cross. With nearly 50 men in formation at Notre Dame, Holy Cross is a growing, international religious community with 2,000 priests, brothers, and seminarians in 15 countries throughout the world.

Old College provides an introduction to religious life and ministry in Holy Cross through participation in daily Eucharist and prayer, service placements, spiritual direction, weekly community nights, retreats, and academic preparation, including courses in philosophy and theology. Students can select their own major and tailor the rest of their academic program according to their interests. Old Collegians take all classes with other Notre Dame students and are expected to actively participate in clubs, organizations, and other aspects of campus life. They are also encouraged to spend a semester or year abroad in one of Europe's premiere college seminaries at the Catholic University of Louvain, Belgium. Old College combines a challenging religious formation structure with a complete Notre Dame undergraduate experience.

Moreau Seminary, also located on the Notre Dame campus, is the primary formation house for the Congregation of Holy Cross in the United States. The one-year Candidate Program is a pre-novitiate year designed for those with a bachelor's degree in any field who are prepared to discern a vocation to priesthood or brotherhood within vowed religious life. Candidates typically take nine to 12 hours of philosophy and/or theology credits at the University each semester and have ministry placements supervised by seminary staff. Candidates reside at Moreau Seminary with other priests, brothers, and seminarians. They discern their vocation through spiritual direction and active participation in the community life of Moreau Seminary, which is centered around the daily celebration of the Eucharist and the Liturgy of the Hours. After returning from the novitiate, newly professed seminarians begin their formal academic training in the Master of Divinity program.

Applicants to Old College and Moreau Seminary must be practicing Roman Catholics in good standing with the Church and of solid personal character, with a demonstrated commitment to apostolic ministry. Admission is selective, and personal interviews are required for acceptance into both programs. Tuition scholarship assistance is provided.

The First Year of Studies

Dean:

Hugh Page Jr.

Associate Deans:

Angie Chamblee
Kevin Rooney

Assistant Deans:

Kenneth DeBoer
Holly Martin

Advisors:

Alex Ambrose; Steve Brady; Elly Brenner; Nicole Brinkman; Maureen Dawson; Erin Ponisciak; Jennifer Fox; Raymond Sepeta; Melvin Tardy; Michelle Ware; Sean Wernert

Teaching Scholars (Burke, Hofman, Kolman

Post-Doctoral Fellowship):

Elizabeth Ramquist; Ryan White

Special Support Services:

Nahid Erfan; Barbara Whalen

The First Year of Studies is the college to which all entering first-year students at the University of Notre Dame are admitted. Its curriculum stresses broad engagement with the arts, sciences, and humanities. It has three major goals. The first is to lay the intellectual foundations necessary for the pursuit of advanced academic work in any of the University's undergraduate colleges. The second is to cultivate both a sense of curiosity about the universe and a passion for learning. The third is to infuse students with an appreciation for the intrinsic value of higher education and a sense of their responsibilities as stewards of knowledge created, learned, and applied.

The First Year of Studies views advising as a method of teaching and endeavors to keep student developmental patterns as well as sound teaching strategies in mind throughout the academic year. Advisors assist students as they plan their first year at Notre Dame and assist in the transition into the sophomore year. Advisors are charged with the responsibility of working with students through group advising sessions, individual meetings, and informal mentoring in the acquisition of the skills and disciplines of the mind and heart that will enable them to become rigorous and compassionate intellectuals. A first-year student may request a meeting with a member of his or her advising team, which includes a peer advisor along with a faculty advisor, at any time and for any reason. All first-year students are encouraged to take advantage of this opportunity for personal guidance and assistance.

The academic program for first-year students is determined by the University Academic Council and is constructed around a framework called the First-Year Curriculum. The First-Year Curriculum consists of five courses plus physical education or ROTC each semester. These courses are arranged to provide two of the most important features of an academic

program for first-year students: (1) a foundation in liberal education and (2) an opportunity to sample areas before declaring a college. Because of the specific requirements within the First-Year Curriculum, students gain a broad overview of academic areas. The options and electives found within the curriculum provide the students the opportunity to explore areas of academic interest open to them. Upon successful completion of the First-Year Curriculum, Notre Dame students advance from the First Year of Studies to one of the other undergraduate colleges: the College of Arts and Letters, the Mendoza College of Business, the College of Engineering, the College of Science, or the School of Architecture.

First-Year Curriculum

The First-Year Curriculum consists of five courses plus physical education or ROTC each semester. Many of these courses satisfy University requirements as well as requirements in the student's intended major.

Descriptions and general recommendations concerning each of the courses in the First-Year Curriculum are given in the following pages. In addition, complete instructions for making course selections and detailed course descriptions are included in the *First Year of Studies Academic Guide*, which is available on both the First Year of Studies website and is mailed to all incoming students in June.

Entering students are expected to take the First-Year Curriculum of five courses per semester, along with the laboratories and tutorials that may accompany those courses, plus physical education or ROTC. The applicability of advanced placement credit earned before entering the University is determined by the University department involved. First-year advisors are available to discuss the possibility of waiving advanced credit in order to take the equivalent University course instead. Additional one-credit courses, such as Introduction to the Fine Arts at Notre Dame, choir, band, or social concerns seminars may also be added to the schedule each semester. The various colleges have restrictions on how many one-credit voluntary courses may be applied to the total number of credits required for graduation from the colleges.

The first-year requirements are designed to ensure that all Notre Dame students begin their college career by learning the analytic, mathematic, and communication skills necessary for further work in their areas of greatest interest as well as to provide a foundation to a broad liberal education. Students are encouraged to select courses that will prepare them for advanced study in their present area of interest as well as to choose elective courses that

help them explore subjects they have not had an opportunity to study in high school and/or those that will deepen their knowledge in disciplines with which they are already familiar.

First-Year Requirements

All students must complete the following in their first year:

- 1 semester of University Seminar
- 1 semester of First-Year Composition
- 2 semesters of mathematics
- 2 semesters of science or language*
- 2 courses in physical education or ROTC
- Elective courses may be used to sample areas of study or to further general education.

**The science requirement must be completed by the end of the sophomore year. Foreign language is not a University requirement, but it is required in the College of Arts and Letters, the College of Science, and the School of Architecture.*

University Requirements

To receive a degree from the University of Notre Dame, students must complete a minimum of 60 credit-hours at the University of Notre Dame and a minimum of 90 credit-hours earned through college and university courses. In addition to first-year requirements, all Notre Dame graduates must complete the following courses before graduation:

- 1 course in history*
- 1 course in social science*
- 2 courses in philosophy*
- 2 courses in theology*
- 1 course in fine arts* or literature*
- 2 courses in physical education or ROTC
- College and major course requirements

**A University Seminar will fulfill one University requirement in one of these disciplines.*

Only courses marked as "Univ. Req." in the online Schedule of Classes can be used to fulfill a University requirement.

Course 1—A University Seminar/Composition

University Seminar and Composition are University requirements. Both courses, University Seminar and First Year Composition (FYC), must be taken, one in each semester.

University Seminars are designed to foster interaction between first-year students and faculty in small settings. Currently, these courses are offered by

UNIVERSITY REQUIREMENTS

departments within the College of Arts and Letters and will satisfy the relevant University requirement in history, literature, fine arts, social science, or the first course of the philosophy or theology requirement. These seminars include a significant writing component and require a minimum of 24 pages with at least one rewrite of a corrected paper. Every first-year student is required to complete one University Seminar.

UNIVERSITY SEMINAR CATEGORIES:

Fine Arts	13182:	Seminars offered by the departments of Art History; Film, Theater, and Television; and Music
History	13184:	Seminars offered by the Department of History
Literature	13186:	Seminars offered by the departments of American Studies, Arabic, Classics, East Asian Languages and Cultures, English, German and Russian Languages, Irish Language and Literature, Romance Languages, and the Program of Liberal Studies
Philosophy	13185:	Seminars offered by the Department of Philosophy
Social Sciences	13181:	Seminars offered by the departments of Anthropology, Economics, Political Science, Psychology, and Sociology
Theology	13183:	Seminars offered by the Department of Theology

First-Year Composition courses are designed to help students learn how to identify an issue amid conflicting points of view and craft an argument based on various sources of information. The courses stress the identification and analysis of potential counter arguments and aim to develop skills for writing a research proposal, for conducting original research, and for using print and electronic resources from the library. In addition to traditional First-Year Composition courses, community-based and multimedia courses are also offered.

FIRST-YEAR COMPOSITION COURSES:

FYC 13100: First-Year Composition
 FYC 13200: Community Based First-Year Composition
 FYC 13300: Multimedia First-Year Composition

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD. First-year composition courses can be found under the [College of Arts and Letters](#) section under the [University Writing Program](#).

Course 2—Mathematics

All Notre Dame first-year students must take two semesters of mathematics as a University requirement. Students who have credit for the first level of calculus (MATH 10250, 10350, or 10550) must fulfill the University requirement by taking a second level of calculus (MATH 10260, 10270, 10360, or 10560) or a non-calculus mathematics course.

Students in the College of Arts and Letters may fulfill their mathematics requirement by taking any two courses in mathematics. They may be calculus courses, non-calculus-based courses, or one of each. However, students may not take two beginning-level calculus courses to fulfill this requirement.

For students in the Mendoza College of Business, the required calculus sequence is MATH 10250–10260. Also acceptable are the calculus sequences required of students in the College of Engineering or the College of Science.

Students in the School of Architecture take MATH 10250 and 10270. Also acceptable are the calculus sequences required of students in the College of Engineering or the College of Science.

Students majoring in the College of Science will fulfill their University mathematics requirement through one of the following calculus sequences: MATH 10350–10360, MATH 10550–10560, MATH 10850–10860, or MATH 10450–10460. The MATH 10350–10360 and MATH 10450–10460 sequences are designed for students in programs emphasizing the life sciences, such as biological sciences and the preprofessional (premedical and other health-related) programs in either the College of Science or the College of Arts and Letters. Students planning to enter other science programs that require only two semesters of calculus also may use MATH 10350–10360 to satisfy the requirement, but they should be aware that it is not a suitable prerequisite for the upper-level courses MATH 20550 or 20580. Students planning to major in biochemistry or physics must take MATH 10550–10560.

For students in the College of Engineering, the first-year mathematics requirement is fulfilled through the

calculus sequence MATH 10550–10560 or MATH 10850–10860.

The MATH 10850–10860 sequence stresses concepts and proofs. It is a more rigorous course than MATH 10550–10560 and is designed especially for students who plan to study mathematics through either the College of Science mathematics major or the College of Arts and Letters honors mathematics major. It is also open to other students with very strong high school mathematics backgrounds.

A student who completes the MATH 10250–10260 or 10250–10270 calculus sequences and then decides to enter a science or an engineering program will have to take additional courses in mathematics, as prescribed by the administrator of the program.

MATHEMATICS COURSES:

MATH 10110: Principles of Finite Mathematics
 MATH 10120: Finite Mathematics
 MATH 10130: Beginning Logic
 ACMS 10140: Elements of Statistics
 ACMS 10150: Elements of Statistics II
 MATH 10240: Principles of Calculus
 MATH 10250: Elements of Calculus
 MATH 10260: Elements of Calculus II for Business
 MATH 10270: Elementary Calculus in Action
 MATH 10350: Calculus A
 MATH 10360: Calculus B
 MATH 10550: Calculus I
 MATH 10560: Calculus II
 MATH 10850: Honors Calculus I
 MATH 10860: Honors Calculus II
 MATH 20550: Calculus III

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Course 3—Science

First-year students take two semesters of a science as part of the First-Year Curriculum. The courses offered by the College of Science for first-year students are broadly grouped into two main categories, laboratory sciences and topical sciences. The laboratory sciences are intended for students who are planning to major in one of the sciences or in engineering or perhaps would prefer an in-depth discussion of a particular field of study with laboratory work. The second category, topical sciences, is designed for those first-year students who are planning to enter the College of Arts and Letters, the Mendoza College of Business, or the School of Architecture. These courses are rigorous and intellectually demanding and differ from the laboratory sciences chiefly in that they are often somewhat interdisciplinary in nature and/or that they focus on themes that may have an ethical or value-related dimension, and they do not include an associated laboratory requirement.

UNIVERSITY REQUIREMENTS

In determining which course to take as Course 3, students should consider the following:

1. All Notre Dame students must, as a University requirement, take two semesters of science before completion of their sophomore year. However, it is recommended that the science requirement be met in the first year. Students contemplating any of the College of Engineering or College of Science programs or preprofessional studies (premedical and other health-related fields) in the College of Arts and Letters must take the science requirement in their first year.
2. Students planning to participate in an international study program during their sophomore year must complete the science requirement in the first year, along with the required language for international study in France or Austria (see Course 5).
3. The science course is often a prerequisite for other courses in these programs. Students planning to enter the College of Arts and Letters Preprofessional Program will also take CHEM 10171 and 10172 in their first year. Students thinking of entering any of the following programs in the College of Science are advised to take CHEM 10171 and 10172 as their science requirement in the first year: environmental sciences, science preprofessional, science collegiate sequences, biological sciences, mathematics, and physics. Mathematics and physics majors who do not have an interest in the health care professions may elect to take CHEM 10171 followed by 10122. Chemistry and biochemistry majors take CHEM 10181 and 10182. A second science course is required and discussed under Course 5 for students interested in chemistry, biochemistry, biological sciences, environmental sciences, mathematics, and physics.
4. Students planning on an engineering program are required to take CHEM 10171 and 10122 as the sequence to satisfy the requirement.
5. Prospective arts and letters or business students interested in the environmental sciences second major offered by the College of Science should take CHEM 10171 and 10172 as their science requirement.
6. Students planning on entering the Mendoza College of Business programs or the College of Arts and Letters programs, other than mathematics or preprofessional studies, may select freely from among any of the science courses offered and for which they are prepared. However, the following courses are specifically designed for the students planning to enter these programs: BIOS 10104 through 10117; CHEM 10101 through 10104; PHYS 10052, 10062, 10111, 10122, 10140, 10240, 20051, 20061.
7. Students intending to enter the School of Architecture should take PHYS 10111 first semester; PHYS 10311 is also acceptable.

8. First-year students may substitute two semesters of a foreign language in place of two semesters of science to complete their first-year course requirements. They may also substitute one semester of each, but should keep in mind that the science requirement needs to be completed by the end of the sophomore year.

LABORATORY SCIENCE COURSES:

BIOS 10161: Biological Sciences I
 BIOS 10162: Biological Sciences II
 CHEM 10171: General Chemistry: Introduction to Chemical Principles
 CHEM 10172: General Chemistry: Organic Structure and Reactivity
 CHEM 10122: General Chemistry: Biological Processes
 CHEM 10181: Introduction to Chemical Principles
 CHEM 10182: Organic Structure and Mechanism
 ENVG 10110: Physical Geology
 PHYS 10310: General Physics I
 PHYS 10320: General Physics II
 PHYS 10411: General Physics A-M Mechanics
 PHYS 10424: General Physics B-M Waves/Thermo
 Topical Sciences Courses:
 BIOS 10101: Human Genetics, Evolution, and Society
 BIOS 10106: Common Human Diseases
 BIOS 10107: Ecology and Evolution
 BIOS 10119: Evolution and Society
 CHEM 10101: Foundations of Chemistry
 CHEM 10102: Chemistry, Environment, and Energy
 CHEM 10103: Chemistry and Crime
 PHYS 10052: Concepts of Energy and Environment
 PHYS 10062: Science Literacy
 PHYS 10111: Principles of Physics I
 PHYS 10122: Principles of Physics II
 PHYS 10140: Descriptive Astronomy
 PHYS 10555: Science Play
 PHYS 10240: Elementary Cosmology
 PHYS 10262: Physical Methods in Art and Archaeology
 PHYS 20051: Energy and Society
 PHYS 20061: Nuclear Warfare

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Course 4—University Requirement or Elective: History, Social Sciences, Philosophy, Theology, Literature, Fine Arts, and Languages

Elective courses are typically selected with the idea of exploring academic interests or to satisfying University or intended college program requirements. Every Notre Dame first-year student must take at least one semester of fine art, history, literature, philosophy, social science, or theology during their first year.

Specific recommendations for electives are made for only four of the intended college programs. The College of Engineering recommends that first-year students planning on majoring in engineering take PHYS 10310 in the spring semester as their Course 4 elective, as are students intending on pursuing the combined Arts and Letters/Engineering Program. Students intending to study architecture are advised to take ARCH 11011 as their Course 4 elective in the fall semester. They will then take ARCH 11021 and ARCH 10311 in the spring semester. Students intending to study business are advised to take microeconomics, ECON 10010/10011, in either the fall or spring semester.

UNIVERSITY REQUIREMENT AND ELECTIVE COURSES**History:**

HIST 10085: History of the Modern Middle East
 HIST 10106: Modern South Asia
 HIST 10200: Western Civilization I
 HIST 10210: Ancient Greece and Rome
 HIST 10400: Western Civilization II
 HIST 10600: U.S. History I: From Colonial America to 1877
 HIST 10605: U.S. History II: From Reconstruction to the Present
 HIST 10900: Latin American History Through Film
 HIST 10901: Colonial Latin America
 HIST 10990: Environment and Civilization
 HIST 20110: Ancient Japan

Social Sciences:

ANTH 10109: Introduction to Anthropology
 ANTH 20105: Introduction to Human Ethology
 ANTH 20550: Archeology of Israel, Palestine, and Jordan
 ECON 10010/10011: Principles of Microeconomics
 ECON 10020: Principles of Macroeconomics
 POLS 10100: American Politics
 POLS 10200: International Relations
 POLS 10400: Comparative Politics
 PSY 10000: Introductory Psychology
 SOC 10002: Understanding Societies
 SOC 10033: Introduction to Social Problems
 SOC 10722: Introduction to Social Psychology

UNIVERSITY REQUIREMENTS

Philosophy:

PHIL 10100: Introduction to Philosophy

Theology:

THEO 10001: Foundations of Theology:
Biblical/Historical

Literature:

CLAS 10200: Greek and Roman Mythology
ENGL 20513: Introduction to Irish Writers
IRLL 30210: The Irish Short Story
MELC 10101: Introduction to Arabic Culture
and Civilization

Fine Arts:

ARHI 20362: European Art of the Seventh-
Eighteenth Centuries
ARHI 20441: Introduction to Twentieth
Century Art
ARST 11201: Drawing I
ARST 11301: Painting I
ARST 11601: 3-D Foundations
ARST 21101: Ceramics I
ARST 21401: Photography I
DESN 11100: 2-D Foundations
FTT 10101: Basics of Film and Television
FTT 10701: Introduction to Theater
FTT 10910: Science Play
MUS 10131: Introduction to Jazz
MUS 10132: Current Jazz
MUS 10150: Music of the Catholic Rite
MUS 10912: Famous First Performances
MUS 20001: Theory I
MUS 20002: Theory II
MUS 20111: Introduction to 18th-Century
Music
MUS 20145: Appreciating World Music

Elective for Supplementary Major or Minor:

GSC 10001: Introduction to Gender Studies

Languages:

CLGR 10001: Beginning Greek I
CLGR 10002: Beginning Greek II
CLGR 20003: Intermediate Greek
CLLA 10001: Beginning Latin I
CLLA 10002: Beginning Latin II
CLLA 20003: Intermediate Latin
CLLA 20004: Intermediate Latin II
EALC 10111: Intensive First-Year Chinese I
EALC 10112: Intensive First-Year Chinese II
EALC 20211: Second-Year Chinese I
EALC 20212: Second-Year Chinese II
EALJ 10211: Intensive First-Year Japanese I
EALJ 10212: Intensive First-Year Japanese II
EALJ 20211: Second-Year Japanese I
EALJ 20212: Second-Year Japanese II
EALK 10111: Intensive First-Year Korean I
EALK 10112: Intensive First-Year Korean II
EALK 20211: Second-Year Korean I
EALK 20212: Second-Year Korean II
EALK 40421: Advanced Korean I
EALK 40422: Advanced Korean II
GE 10101: Beginning German I
GE 10102: Beginning German II
GE 10111: Intensive Beginning German I
GE 10112: Intensive Beginning German II
GE 20201: Intermediate German I
GE 20202: Intermediate German II
GE 20211: Intensive Intermediate German I
GE 20212: Intensive Intermediate German II
IRLL 10101: Beginning Irish I
IRLL 10102: Beginning Irish II
IRLL 20103: Intermediate Irish

LLRO 10101: Beginning Quechua I
MEAR 10001: Intensive First-Year Arabic I
MEAR 10002: Intensive First-Year Arabic II
MEHE 10001: Elementary Hebrew
ROFR 10101: Beginning French I
ROFR 10102: Beginning French II
ROFR 10115: Intensive Beginning French
ROFR 20201: Intermediate French I
ROFR 20202: Intermediate French II
ROFR 20215: Intensive Intermediate French
ROFR 20300: Conversational French
ROFR 27500: Approaches to French and
Francophone Cultures
ROFR 30310: Textual Analysis
ROFR 30320: Advanced Grammar and
Composition
ROIT 10101: Beginning Italian I
ROIT 10102: Beginning Italian II
ROIT 10115: Intensive Beginning Italian
ROIT 20201: Intermediate Italian I
ROIT 27500: Intermediate Italian II
ROIT 20215: Intensive Intermediate Italian

ROSP 20237: Conversation and Writing
ROSP 27500: Approaches to Hispanic
Cultures Through Writing
ROSP 30310: Textual Analysis
RU 10101: Beginning Russian I
RU 10102: Beginning Russian II
RU 20101: Intermediate Russian I
RU 20102: Intermediate Russian II

COURSE DESCRIPTIONS

Course descriptions can be found in the respective
departmental sections of the enclosed CD.

**Course 5—Program
Requirement or Elective**

Any of the courses listed under Course 4 may be
taken as a Course 5 elective, unless the student's
intended major requires him or her to take a
particular course instead. These required courses will
be discussed below. Most students should use this

elective to explore areas of academic interest, and
many students may want to consider continuing in
or beginning foreign language study.

Language is required by the College of Arts and
Letters and the College of Science. The languages
available include Arabic, Chinese, French, German,
Greek, Irish, Italian, Japanese, Latin, Portuguese,
Russian, and Spanish. Students with previous
background in a language who want to continue
their language study must take a placement exam
to determine proper placement. However, students
with no previous background in a language can
elect a beginning-level course. See the Credit and/
or Placement by Examination section below for
more information on placement in a language
course. Regardless of their scores on the credit or
placement examinations, students in the College
of Arts and Letters must take at least one language
course in residence at Notre Dame. In the College
of Science, students who place higher than the
intermediate level (third semester) are considered to
have fulfilled the language requirement and need not
take any additional courses in the language. Students
contemplating an international study program that
requires language study should consult with the
language department regarding the appropriate
language preparation. All students are encouraged to
start their study of language during their first year or
the beginning of their second year at the latest.

First-year students who plan to participate in an
International Study Program during their sophomore
year must complete both their science and foreign
language requirements during their first year. There
is no opportunity to take a science course abroad,
and the requirement must be satisfied by the end of
the sophomore year.

Students intending to major in the College of
Science's biology, biochemistry, chemistry, environ-
mental science, mathematics, or physics program
will take more than one science each semester and
need to use Course 5 to take the second science. The
second science course sequence for the chemistry and
mathematics programs is PHYS 10310–10320; for
the environmental science, biochemistry, and biology
programs, it is BIOS 10161–10162; and for the
physics program, it is PHYS 10411–10424.

Students receiving a 5 on the Biology AP examina-
tion or an IB (higher level) grade of 7, receive
credit equivalent to BIOS 10161–10162. However,
students intending on majoring in the sciences are
generally encouraged to waive this credit and take
the recommended biology courses in their intended
major.

Students intending to major in studio art should take
DESN 11100 and ARST 11201 as their fifth course,
and students intending to major in Music should
take MUS 20001 and 20002 plus a one-credit lesson
course each semester.

Students intending to major in architecture are
expected to take ARCH 11021 and 10311.

UNIVERSITY REQUIREMENTS

College of Engineering intents should enroll in EG 10111–10112 as their fifth course.

See the various college and department summaries in this Bulletin for details on the requirements for all of these programs.

PROGRAM REQUIREMENT COURSES NOT PREVIOUSLY LISTED:

ARCH 10311: Analysis of Architectural Writing
 ARCH 11011: Graphics I-Drawing
 ARCH 11021: Graphics II-Drafting
 EG 10111: Introduction to Engineering Systems I
 EG 10112: Introduction to Engineering Systems II

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Physical Education or Reserve Officers Training Corps Program

All Notre Dame first-year students must take two semesters of physical education as a University requirement. However, first-year students who enroll and remain in an ROTC program are exempted from physical education.

Specific physical education units are chosen after arriving on campus. For more information about the physical education courses offered, refer to the course descriptions under the Physical Education section of this Bulletin.

RESERVE OFFICERS TRAINING CORPS PROGRAM (ROTC) COURSES:

AS 10101: Foundations of the U.S. Air Force
 AS 10102: Foundations of the U.S. Air Force
 MSL 10101: Foundations of Officership
 MSL 10102: Basic Military Leadership
 NSCI 10101: Introduction to Naval Science
 NSCI 10102: Maritime Affairs

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Voluntary Courses

In addition to five academic courses and PE or ROTC, voluntary one- and two-credit courses are offered in the areas of the fine arts, history, music, dance, business, study skills, and theology. These courses may not be substituted for any of the six required courses. The colleges have restrictions on the number of one or two-credit courses that will be applied to the total number of credits required for graduation from the colleges.

VOLUNTARY COURSES:

BAUG 10000: Introduction to Business
 BAUG 30209: Boardroom Insights
 BAUG 30210: Ten Years Hence Lecture Series
 FYS 10107: Contemplation and the First Year Experience
 FYS 10109: Film and the Analysis of Choice
 FYS 10161: Introduction to Webfolios
 FYS 10401: Introduction to the Fine Arts at Notre Dame
 FYS 10402: Law School 101
 MUS 10201: Brass Ensemble
 MUS 10203: Chamber Ensemble
 MUS 10210: Chorale
 MUS 10221: Glee Club
 MUS 10222: Collegium Musicum
 MUS 10230: Jazz Band
 MUS 10241: Wind Ensemble
 MUS 10244: Concert Band
 MUS 10245: University Band
 MUS 10247: Concert Winds
 MUS 10249: Marching Band
 MUS 10250: Symphony Orchestra
 MUS 10251: Chamber Orchestra
 MUS 10300- MUS 11340: Voice and Instrumental Lessons
 THEO 33950: Social Concerns Seminar: Appalachia
 THEO 33963: Social Concerns Seminar: The Church and Social Action—Urban Plunge
 THEO 33936: Summer Service Learning: Confronting Social Issues

COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

Credit and/or Placement by Examination

The First Year of Studies processes advanced credit. However, it is the other University departments and colleges in coordination with First Year of Studies, who determine exactly what advanced credit will be awarded. Students are sometimes wise to waive advanced credit and to take the class at Notre Dame instead. This is especially true for students who may wish to pursue a degree in one of the preprofessional (premedical and related health-profession) majors. It is often a good idea for them to take chemistry and biology at the University even if they have advanced credit for those courses. First Year of Studies advisors are available to discuss these issues with students both in the summer and during the academic year.

Entering first-year students may become eligible for credit by examination in four ways: (1) through the Advanced Placement Program administered by the College Entrance Examination Board, (2) through the SAT II-Subject Tests in French, German, Italian, and Spanish, (3) through the International Baccalaureate Program administered by International Baccalaureate North America, (4) through the

Notre Dame Mathematics Credit Examination Program. Students' placement may be determined through the online Notre Dame French, German, and Spanish placement examinations, but no credit is awarded.

1. *Advanced Placement Program (AP)*—Students who submit results of Advanced Placement examinations are eligible to receive placement and credit in accordance with the accompanying table.

2. *SAT-II Subject Tests (SAT II)*—Results of CEEB Advanced Placement Examinations or the SAT-II Subject Tests in French, German, Italian, or Spanish are used for course placement and credit by examination purposes in accordance with the accompanying table.

3. *International Baccalaureate Program (IB)*—Students who submit results of International Baccalaureate Higher Level examinations are eligible to receive placement and credit in accordance with the accompanying table. The University does not give credit for Subsidiary Level examinations.

4. *Notre Dame Mathematics Credit Examination Program*—First-year students may take examinations for possible course placement and credit in mathematics after they arrive on campus. The examinations will be based on college-level courses.

Notre Dame Online French, German, Latin and Spanish Placement Examination Programs—

First-year students may take online examinations for placement only. These examinations are available during the summer as well as during the academic year.

When credit is awarded, the dean of the First Year of Studies has it entered on the student's transcript, which is maintained by the registrar's office. This credit can be applied toward required or elective courses if the student's particular college program permits. If Advanced Placement, International Baccalaureate, or Notre Dame Mathematics Examination credit is not applicable in a specific college program, that credit is recorded on the student's transcript, but it represents credit in excess of graduation requirements. Placement, but not credit, for the Notre Dame online placement examinations is recorded in the student's official records, but not on his or her transcript.

The general guideline is that credit by examination is counted as required or elective credit if the course is required or permitted in a particular college program. Credit by examination is not counted as required or elective credit if the number of the course for which credit is awarded is lower than the initial course required in a particular college program. For example, if a student earns a 4 on the Advanced Placement Physics B test, the six credits awarded for PHYS 10111–10122 would count toward graduation in a College of Arts and Letters, Mendoza College of Business, or School of Architecture program. The credits would not count toward graduation in a College of Engineering program since the

PEER ADVISING PROGRAM

initial physics course in this college is PHYS 10310. On the other hand, if the number of the course for which credit is awarded is higher than the initial course required in a particular college program, the credit awarded satisfies that requirement. For example, credit awarded for MATH 10550–10560 also satisfies the mathematics requirement for programs requiring MATH 10350–10360 or MATH 10250–10260.

Language placement—Students with no previous background in a language can elect a beginning-level course. Students with previous background in a language who want to continue their language study must take a placement exam to determine proper placement.

Students may use the results from a foreign language credit by examination (AP, SAT II, IB) for placement, as described under the Credit by Examination table. A maximum of six credits can be granted for performance on a foreign language credit by examination.

Students who have not taken a language credit by examination before entering Notre Dame, may take one at Notre Dame. All foreign language departments at Notre Dame offer placement exams. The French, German, Latin and Spanish placement exams are available online. Placement exams for other languages are given during the First Year Orientation Weekend in August and at least twice during the school year in time for fall and spring advance registration. Information on language placement is sent to incoming first-year students during the summer. The appropriate department and the First Year of Studies will guide students with previous instruction in their languages after reviewing their high school background and placement tests.

Regardless of their scores on credit or placement exams, students in the College of Arts and Letters must take at least one language course in residence at Notre Dame. Arts and Letters students must also complete at least one course at the intermediate or higher level that deals with texts in the original language. If placement allows, one course at Notre Dame at the intermediate or higher level may satisfy both parts of this requirement. In the College of Science, students who place higher than the intermediate level (third semester) are considered to have fulfilled the language requirement and need not take any additional courses in the language. Students contemplating an international study program that requires language study should consult with the language department regarding appropriate language preparation. All students are encouraged to start their study of language during their first year or the beginning of their second year at the latest.

College Credit from Other Institutions

The University's other colleges and departments, in consultation with the First Year of Studies, determine whether or not college courses completed after the junior year and prior to first-year enrollment and taken at other institutions will be accepted for credit. In order to be considered for credit, these courses must have been completed on college campuses and must not have been used to satisfy high school graduation requirements or Notre Dame requirements for first-year admission. An official transcript, a course syllabus, and a copy of the published description of the course are also necessary for consideration of the course for credit. Normally, courses specified in the First-Year Curriculum may

not be satisfied through transfer credit. First-year students need to resolve all college credit situations before or during their first semester at Notre Dame.

Peer Advising Program

The Peer Advising Program in the First Year of Studies at the University of Notre Dame provides the opportunity for first-year students to engage in meaningful conversation with reliable and informed upper-class students. These interactions focus on the general adjustment of the first-year student to the university setting. Peer Advising endeavors to welcome all students to the Notre Dame community by reassuring and encouraging students as they begin university-level study; informing students about a variety of campus resources; emphasizing the mission

LEARNING RESOURCE CENTER

and initiatives of the First Year of Studies; and listening for the challenges and concerns of new students

Learning Resource Center

In addition to individual and group advising, and peer advising, the First Year of Studies offers first-year students a large support system to assist them in making a successful transition from high school learning strategies to college-level skills. The Learning Resource Center houses the Learning Strategies Program, the Tutoring Program, and the Collaborative Learning Program. The assistance offered through these programs is supplemental and not meant to replace the student's own efforts, classroom instruction, meetings with the professor, or any other aids offered by the instructor or department. There is no additional charge or fee for any of these programs.

Learning Strategies Program

All first-year students interested in improving their skills for success in college may participate in small group workshops or schedule individual meetings with the First Year of Studies learning strategies specialist. The Learning Strategies Program covers a variety of topics of practical value to students (e.g., time management, note taking, test preparation) and includes individual assistance with writing and reading for various academic genres.

Tutoring Program

The First Year of Studies Tutoring Program is available to all first-year students who would like to improve on their understanding of course material. In addition to the traditional tutor-student interaction, the small size and flexible pace of these tutoring sessions encourages peer interaction and provides a conducive setting for students to ask individual questions.

Collaborative Learning Program

The Collaborative Learning Program is also open to all first-year students. In collaborative learning sessions, students solve homework problems together while focusing on the problem-solving methods. Collaborative learning resource leaders monitor the sessions, encourage problem-solving and

collaboration among group members, and answer questions when necessary.

First-Year Goals

The First Year of Studies, its curriculum, and its support systems are all designed to encourage first-year students to work toward gaining an understanding of how the Arts, Sciences, and Humanities enable one to engage in a serious exploration of the important and complicated questions, the questions that deal with matters pertaining to God, nature, and human institutions. They are designed to help students become acquainted with the disciplines that make up these areas of intellectual inquiry and to begin to engage these questions by selecting challenging classes, attending public lectures, building collaborative relationships with peers, and by seeking opportunities to forge mentoring relationships with faculty.

SAT II SUBJECT TESTS FOR FRENCH, SPANISH, AND GERMAN

SAT II Subject	Advanced Placement	Credits (Courses)	Placement Level
French and French with Listening			
790—800	5 (lang)/4 (lit)	6 (20201—20202)	30310 or 30320
690—780	4 (lang)/3 (lit)	6 (20201—20202)	20300 or 27500
590—680	3 (lang)/2 (lit)	6 (10102—20201)	20202

School of Architecture

Francis and Kathleen Rooney Dean of the School of Architecture:

Michael N. Lykoudis

Associate Dean:

John Stamper

Assistant Dean:

Rev. Richard S. Bullene, C.S.C.

Professors:

Robert L. Amico; Philip H. Bess; Dennis P. Doordan; Michael N. Lykoudis; Ingrid D. Rowland; Thomas Gordon Smith; John W. Stamper; Carroll William Westfall

Associate Professors:

Richard Economakis; David Mayernik; Steven Semes; Duncan G. Stroik; Samir Younés

Assistant Professors:

Aimee Buccellato; Krupali Uplekar

Visiting Associate Professor:

Douglas Duany

Visiting Assistant Professors:

Christine Franck; Neil Hoyt; Frank Hudervitz; Thomas Lowing; Ettore Mazzola; Richard Piccolo; William Ponko; Samantha Salden; Lucien Steil

Concurrent Assistant Professor:

Giovanna Lenzi-Sandusky

Professors of the Practice:

Sallie Hood; Ronald Sakal

Professional Specialists:

Robert J. Brandt; Kevin Buccellato; Rev. Richard S. Bullene, C.S.C.; Alan DeFrees

Programs of Studies. The study of architecture has a long and distinguished history at the University of Notre Dame. Courses in architecture were taught at the University as early as 1869. Formal instruction in architecture began in 1898. The Department of Architecture, previously part of the College of Engineering, became the free-standing School of Architecture in 1994. The school offers a five-year program leading to the degree of bachelor of architecture, a two-year program leading to the degree of master of architectural design and urbanism, and a three-year program leading to the degree of master of architecture. The professional degree programs (B.Arch. and M.Arch.) are accredited by the National Architectural Accrediting Board, and the curricula conform to NAAB requirements for the professional degree in architecture.

While the primary objective of the curriculum is professional education, students have opportunities to explore fields such as business, engineering, environmental sciences, and the liberal arts through electives and building on University requirements.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB),

which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

Since the early 1990s, the school's curriculum has been based on education in traditional and classical architecture and urbanism. Instruction teaches the skills, cultivates the talents, and imparts the knowledge necessary to produce buildings that represent innovation within long-standing traditions, use nature's materials responsibly, and contribute to building livable communities. The school believes this is best done by learning how recurring problems in designing and constructing buildings and fitting them into existing urban and rural settings have been addressed in the past and adapting those lessons to the ever-changing circumstances of the modern world.

The goals of the curriculum include developing competence in the design of individual buildings, understanding the relationship between individual buildings and their physical and cultural contexts, and recognizing the ethical dimensions of the professional practice of architecture. Architects play a primary role in shaping the built environment and have a professional responsibility to do so in a manner that contributes to the civil life of society. Their work must also help to renew and sustain the integrity of the natural world and promote social welfare.

In addition to the first professional degree of bachelor of architecture (B.Arch.), the School of Architecture offers three paths of graduate studies leading to one of two degrees. The Path A graduate course of study leads to the two-year post-professional master of architectural design and urbanism degree (MADU), which is intended for people already holding a professional degree in architecture (B.Arch. or M.Arch.). The Path B graduate course of study leads to a two-year master of architecture (M.Arch.) professional degree, and is intended for people holding a four-year undergraduate preprofessional degree with a major in architecture. The Path C graduate course of study leads to a three-year master of architecture (M.Arch.) professional degree, and is intended for

people holding undergraduate degrees in fields other than architecture. All three graduate paths of study entail a one-year concentration in either classical architecture or urban design, and conclude with a semester-long independent design project.

Concentrations in furniture design, in historic preservation and restoration, in practice and enterprise, in architectural practice and enterprise, and in building arts are also options within the first professional degree program.

Required courses for the concentration in furniture design are Beginning Furniture; Advanced Furniture Design; Special Studies in Furniture Design; and Special Studies in Furniture Design 2.

The concentration in historic preservation and restoration requires four courses: Research and Documentation of Historical Buildings, History of American Architecture (1630–1915), Historic Preservation and Traditional Construction, and History and Theory of Preservation.

In addition to the professional practice course in the B.Arch. curriculum, students in the concentration in practice and enterprise take four courses from the Mendoza College of Business: Accountancy I, Principles of Management, and two other courses chosen from offerings in various aspects of business.

The concentration in building arts requires four courses: Introduction to Architectural Models, Advanced Architectural Models and Design, and Construction of Architectural Elements I and II. All four courses consist of group projects.

Concentrations are declared at the end of the third year.

Both the undergraduate and graduate programs at Notre Dame take advantage of the school's proximity to Chicago, where the school has recently acquired studio space in the historic Santa Fe Building owned by the University. In addition, all third-year undergraduate students spend the academic year in the school's Rome Studies Center in Italy. All graduate students spend a semester there. Some limited scholarship aid is available for the additional expenses incurred in Rome.

The initial phase of undergraduate architectural study is devoted to acquiring basic design and technical skills and developing an understanding of architectural concepts by learning canonical forms of classical architecture and manipulating them in design problems. The sophomore year begins with paradigmatic projects and ends by solving complex and challenging building programs. The sophomore foundation is reinforced in the third year, spent in Rome. There, 2,500 years of building tradition provide the context for contemporary design problems.

STUDENT AWARDS AND PRIZES

Fourth-year students return to Notre Dame, where they are reintroduced to the American context. At this stage, students are encouraged to synthesize their interpretations of the historical legacy in the context of American urban centers and small cities. They are also challenged by projects that require them to engage architectural problems outside their normal Western focus. The undergraduate program culminates with a thesis design project completed in the fifth year of study.

The Center for Building Communities was begun in 2006. With financial support through a gift from Champion Enterprises, Inc., studios explore the use of contemporary modular wood and steel construction in traditional urbanism.

In addition to studio instruction, students complete course work in structural, mechanical, and environmental systems and architectural history. History and theory courses in the School of Architecture include a two-semester survey of the history of architecture from the earliest times to the present and specialized upper-level course work in selected topics involving the history and theory of architecture.

Students are in contact with practicing professionals through collaboration between the School of Architecture and the Northern Indiana Chapter of the American Institute of Architects. The School of Architecture has an active chapter of the American Institute of Architecture Students.

Facilities. The School of Architecture is located in Bond Hall of Architecture. This building, the former University Library, was thoroughly rebuilt from 1995 through 1996. The 60,000-square-foot building contains classrooms, an auditorium, library, computer lab, and studios that are both functional and designed in accord with the historical limestone structure. The Rome Studies Center is in the heart of Rome's historic center.

Richard H. Driehaus Prize in Classical Architecture

Richard H. Driehaus, the founder and chairman of Driehaus Capital Management in Chicago, initiated the Richard H. Driehaus Prize in Classical Architecture to honor a major contributor in the field of traditional and classical architecture or historic preservation. In 2004, he initiated the Henry Hope Reed prize to recognize outstanding contributions to the welfare of the traditional city and its architecture. He established the prizes through the University of Notre Dame's School of Architecture because of its reputation as a national leader in incorporating the ideals of traditional and classical architecture into the task of modern urban development.

First Year

First-year students intending to major in architecture take the following courses. Courses in italics need not be taken in the semester in which they are shown.

<i>Course</i>	<i>First Semester Credits</i>	<i>Second Semester Credits</i>
Composition/ University Seminar	3	3
MATH 10250 and 10270	3	3
PHYS 10111 and 10122 or PHYS 10111 and Science Elective	3	3
<i>Social Science</i>	3	—
ARCH 11011. Graphics I: Drawing	3	—
ARCH 11021. Graphics II: Drafting	—	3
ARCH 10311. Architectural Writings	—	4
Physical Education	—	—
	15	16

The courses listed below indicate the normal sequence for sophomore, junior, senior, and fifth years majoring in architecture.

Sophomore Year

<i>First Semester</i>		
ARCH 21111. Design I	6	
ARCH 20411. Building Technology I	3	
ARCH 20211. Architectural History I	3	
ROIT 10105. Beginning Italian I	3

<i>History</i>	3	
<i>Elective</i>	3	
	15	

Total for five years: 163 semester hours.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [School of Architecture](#) section.

Student Awards and Prizes

Henry Adams Medal and Certificate. This American Institute of Architecture (AIA) award honors the graduating architecture student who has the highest grade-point average for the complete course of study.

Henry Adams Certificate. This AIA award is given to the graduating architecture student with the second-highest grade-point average for the complete course of study.

Tau Sigma Delta Bronze Medal Winner. The Tau Sigma Delta medal is awarded to a graduating student selected by his or her peers in recognition of design excellence.

Andrew F. Kervick Award for Design and Drawing. Founded by Prof. Francis W. Kervick, former head of the School of Architecture in memory of his father, this award, selected by the fourth and fifth-year faculty, honors the student whose work in freehand

STUDENT ORGANIZATIONS

drawing in the fourth or fifth year has been of the highest merit.

Alpha Rho Chi. Selected by faculty, the Alpha Rho Chi Medal goes to the graduating student who has shown ability for leadership and has performed willing service for the School.

Ralph Thomas Sollitt Award. Founded in 1931 by Ralph Sollitt and Sons Construction Co., this award, selected by the fifth-year thesis jury, is given to the student who submits the best design as a solution to the thesis architecture problem.

Ferguson and Shamamian Undergraduate Prize. Selected by the fifth-year thesis jury, the Ferguson & Shamamian Architects Undergraduate Prize is awarded to a fifth-year student for excellence in classical design exhibited in thesis.

The Association of Licensed Architects Student Merit Award. Selected by the fifth-year faculty, the ALA Student Merit Award goes to a graduating student recognized for exemplary achievements throughout the scholastic year.

Dean's Award for Design Excellence in Architecture. Selected by the fifth-year thesis jurors and the dean, this award goes to overall excellence in a fifth-year thesis project.

Rome, Paris, Athens Prize. Selected by the fifth-year thesis faculty and the dean, this award is for the scope of exploration and the quality of individual buildings that successfully unite architecture and urban design.

The Noel Blank Design Awards. Founded by Leon W. Blank in memory of his brother, Noel, this high honor goes to the top four thesis projects as selected by the fifth-year thesis jurors.

Bond Hall Award in Architecture and Urbanism. Given to a graduating student for contribution to a culture of sustainability and civic virtue within the School of Architecture.

Gertrude S. Sollitt Prize for Architectural Structure. Founded in 1931 by Ralph Sollitt and Sons Construction Co., this award, selected by the School's faculty, goes to the student who submits the best work as a solution to a special problem in structure assigned in the scholastic year.

The St. Joseph Award in Furniture. Selected by the furniture design professor for excellence in furniture design and construction.

Norman A. Crowe Award. Given to a graduating student for their contributions to the idea of sustainability with respect to architecture and urbanism. Selected by the dean and faculty.

Nellie Wynn Kervick Award for Design and Drawing. Founded by Prof. Francis W. Kervick, former head of the School of Architecture in memory of his mother, this award, selected by the Rome Studies faculty, honors the student whose work in freehand drawing

in the third year of study has been of the highest merit.

Alice Wesoloski Scholarship. For her decades of service to the School of Architecture, this award was established in honor of Ms. Wesoloski. Selected by the faculty and the Office of Financial Aid to provide tuition assistance to a student of particular ability, character and need.

James E. Childs and Associates Scholarship. Selected by the faculty and the Office of Financial Aid to provide tuition assistance to minority students of particular ability and need.

David M. Schwarz/Architectural Services, Inc. Internship and Traveling Fellowship Award. A two-month paid internship for a fourth-year student and for a graduate student entering the final year of his or her program with David M. Schwarz/ Architectural Services, Inc. and a one-month travel fellowship involving independent research and study.

Ray Stuermer Memorial Award for Excellence in Design. Given in memory of former Professor Ray Stuermer, this award, selected by faculty, is given on the basis of design work through the fourth year for overall improvement and design excellence.

Frank Montana Rome Scholarship Award. Recipients are selected by the dean, second-year design faculty and the office of financial aid. The Montana scholarships were endowed by Prof. Frank Montana, chair of the Department of Architecture for 25 years and founder of the Rome program. The scholarships are for tuition assistance in connection with the Notre Dame Rome Studies Program.

Student Organizations

American Institute of Architecture Students (AIAS). Students begin to engage in the professional activities of the national AIAS by attending meetings and conventions and structuring activities within the School of Architecture. The AIAS sponsors educational, professional, and social events in the school.

Students for New Urbanism (SNU). SNU is a community of students from all majors that present, explore, discuss, and apply the ideals of New Urbanism and other "good urbanism" theories. Ideas especially focus on walkable neighborhoods, public transportation, affordable housing, new technology, sustainable architecture, and community participation in the context of creating healthy communities. SNU looks at the vitality of urban places and how to maintain and design great urban environments. SNU is composed of three main parts: Education (to teach others and our selves about urban design); Service (to help the communities in our area and be a part of the urban design process) and Connection (act as a facilitator between professionals and students among many disciplines that participate in the planning process).

Student Association for Women in Architecture (SAWA). SAWA is designed to encourage gender equality and diversity throughout the School of Architecture, the architecture profession, and our communities by providing a more diverse educational experience. Through collaboration with the AIAS and the SNU, we hold discussion groups with students and faculty, host guest lecturers and exhibits, create community outreach programs where architecture students educate local youth about the architecture school and the architectural profession, and support our local community through service projects.

Tau Sigma Delta. In 1961 the Sigma Chapter of Tau Sigma Delta, the national architectural honor society, was established at Notre Dame. The constitution of Tau Sigma Delta stresses as its sole function the encouragement of high scholastic standing. Election to membership is limited to the top 20 percent of the students in the School of Architecture who have completed 60 percent of their requirements for the professional degree.

College of Arts and Letters

The College of Arts and Letters is the oldest, and traditionally the largest, of the four undergraduate colleges of the University of Notre Dame. It houses 20 departments and several programs through which students at both undergraduate and graduate levels pursue the study of the fine arts, the humanities and the social sciences.

Liberal Education. The College of Arts and Letters provides a contemporary version of a traditional liberal arts educational program. In the college, students have the opportunity to understand themselves as heirs of a rich intellectual and spiritual tradition and as members of a complex national and international society. The faculty of the college are committed to the life of the mind, to the critical and constructive engagement with the whole of human experience. On the basis of a firm yet broad foundation, graduates of the college are equipped for a lifetime of learning in an ever-changing world. The overall curriculum and the specific major programs encourage students to approach issues reflectively, to analyze them carefully and to express their reasoned conclusions with clarity.

The intellectual quest conducted in the College of Arts and Letters takes place in an explicitly Catholic environment. Here ultimate questions of the meaning and value of human life before God are welcome, and efforts to deal with such questions utilize the immense resources of the Catholic tradition. Inquiry and faith are seen not as opposing forces but as complementary elements of the fully human pursuit of truth.

Organization. The college's administrative center is the Office for Undergraduate Studies, located in 104 O'Shaughnessy Hall. All undergraduates in arts and letters are invited to consult with the assistant deans regarding questions about their academic progress, educational and career goals, and any other concerns of an academic or administrative nature. Pre-law, pre-med, and pre-graduate school advising are available in this office. In particular, sophomores in the college who have not yet declared a major should begin their pursuit for academic advising in this office.

Because education is not limited to the classroom, the college also sponsors or helps to subsidize events which are intended to enrich the undergraduate experience and facilitate faculty-student interaction both on and off campus.

Curricula and Degrees. The College of Arts and Letters offers curricula leading to the degree of bachelor of fine arts in Art (Studio and Design) and of bachelor of arts in:

Africana Studies
 American Studies
 Anthropology
 Art:
 Art History
 Design
 Studio
 Classics:
 Arabic
 Classics
 Greek and Roman Civilization
 East Asian Languages & Cultures:
 Chinese
 Japanese
 Economics
 English
 Film, Television, and Theatre
 German and Russian Languages and Literatures:
 German
 Russian
 History
 Mathematics (honors only)
 Medieval Studies
 Music
 Philosophy
 Philosophy/Theology (joint major)
 Political Science
 Program of Liberal Studies
 Psychology
 Romance Languages and Literatures:
 French and Francophone Studies
 Italian
 Romance Languages and Literatures
 Spanish
 Sociology
 Theology
 The college also offers supplementary majors, but not stand-alone first or degree-yielding majors, in:
 Arts and Letters Preprofessional Studies (49 hours)
 Art History (24 hours)
 Asian Studies (24 hours)
 Chinese (24 hours)
 Classics (24 hours)
 Computer Applications (CAPP) (24 hours)
 French (24 hours)
 Gender Studies (24 hours)
 German (24 hours)
 Greek and Roman Civilization (24 hours)
 Italian (24 hours)
 Japanese (24 hours)
 Latino Studies (24 hours)
 Medieval Studies (24 hours)
 Peace Studies (24 hours)
 Russian (24 hours)
 Spanish (24 hours)
 Theology (25 hours)

Admission Policies. Admission to the College of Arts and Letters takes place at the end of the first year. The student body of the College of Arts and Letters thus comprises sophomores, juniors and seniors.

A prerequisite for admission of sophomores into the College of Arts and Letters is good standing at the end of the student's first year.

The student must have completed at least 24 credit hours and must have satisfied all of the specified course requirements of the First Year of Studies Program: University Seminar; Composition; two semester courses in mathematics; two semester courses in science or a foreign language; one semester course chosen from history, social science, philosophy, theology, literature or fine arts; and two semester courses in physical education or in ROTC. (The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy or theology.) A student who does not meet all of these conditions is retained in the First Year of Studies until all of the conditions are met. The deficiencies must be removed at the Notre Dame Summer Session or in the student's third semester at Notre Dame.

Description of General College Requirements.

Every student graduating from the College of Arts and Letters must have a minimum of 120 credit hours and must have fulfilled all University, college and major requirements. Unless special permission has been obtained in advance from the Office for Undergraduate Studies, special studies and directed readings courses do not satisfy university or college requirements.

University Requirements	Courses
Composition	1
Mathematics	2
Natural Science	2
*History	1
*Social Science	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature (Physical Education)	2
	14

** One of these requirements must be a University Seminar.*

Arts and Letters Requirements	Courses
College Seminar	1
Language	1-3
+History/Social Science	1
*Literature or Fine Arts (whichever is not taken above)	1
Major	8-12

STUDENT AWARDS AND PRIZES

+ In addition to the University requirement of one history and one social science course, the college requires a third course, which can be either history or social science.

* The arts and letters student is required to complete one fine arts and one literature course.

University requirements are described under "University Requirements," in the front section of this *Bulletin*.

Course Load. The normal course load in the College of Arts and Letters is five courses. The maximum number of credit hours per semester is 17. Overloads for juniors and seniors are allowed only with the permission of the deans in the Office for Undergraduate Studies and only during the designated days of the enrollment period.

Writing Requirement. Students in arts and letters are required to complete one course in their major at the 30xxx or 40xxx level designated as a writing-intensive course. This course may satisfy other distributional requirements within the major. Writing intensive courses require the student to work closely with a professor throughout the semester on a significant written project.

Activity and Experiential Learning Courses. Three elective credits of the required 120 hours can be derived/obtained from the following activity courses:

Band (Marching and Concert)
Orchestra
Chorale
Glee Club
Liturgical Choir
Folk Choir
Music Lessons and Ensembles
Ballet
Debate
Social Concerns Seminars

Exceptions will be made for music majors. If students complete more than three of these courses, these will appear on a student's transcript, but the extra credits will be subtracted from the student's total number of hours at the time the graduation check is made; hence, these will not count toward the 120 hours needed to graduate.

Pass-Fail. With permission from the academic dean, juniors and seniors may take one non-major, non-required elective course each semester on a pass-fail grading basis. These declarations must be made during the enrollment period of each semester, and once made, these declarations are irreversible.

Arts and Letters Degree Credit. Students may not count both examination and degree credit for the same course toward graduation hours. For example, a student who has advanced placement credit for ROSP 20201 may not take ROSP 20201 and count both toward the 120 hours required in arts and letters. Students also may not count for degree credit both of two equivalent courses taught at Notre Dame. For example, THEO 10001 and

20001 are considered to be equivalent courses, as are PHIL 10101 and 20201, and ECON 10015 and 20015. Students should take only one of each pair but not both. In cases where a student has double credit for the same course, the credits for only one course will be counted toward the student's degree credit, despite the fact that credits for both will appear on the student's transcript. A list of equivalent math and science courses can be found at the end of the College of Science section of the *Bulletin*. The same rules about double credit apply to them.

No courses in logic will satisfy the University philosophy requirement. After matriculation into the college, it is the expectation that arts and letters students will complete any outstanding math or science requirements at Notre Dame.

ROTC. First-year students enrolled in any of the three ROTC programs are exempted from the University's physical education requirement. Credits received for 10xxx- and 20xxx-level ROTC courses do not count toward a student's 120 credit hours, despite the fact that they appear on the transcript. They will be manually subtracted from the student's total number of hours appearing thereon. The College of Arts and Letters accepts a maximum of 12 free elective credits only for ROTC students from the 30xxx- and 40xxx-level military sciences only. Non-ROTC students may not take ROTC courses for credit toward graduation except by special permission obtained in advance of registering for the course from the deans in the Office for Undergraduate Studies. If a non-ROTC student registers in ROTC classes without first acquiring permission, these credits will appear on the student's transcript, but the credits will be subtracted manually from the student's total hours at the time the graduation check is made.

Dual Degree. Dual-degree programs between the College of Arts and Letters and the Colleges of Business or Science are no longer available pending review and authorization by the Academic Council of the University. The dual-degree, five-year program between the College of Arts and Letters and the College of Engineering continues to be available to eligible students and is fully articulated in the Special Programs section on page 89.

International Studies. In light of the expansion of Notre Dame's international study programs, students are encouraged to participate in University programs whenever possible. For students whose academic or programmatic needs cannot be met through existing Notre Dame programs, limited exceptions to allow a student to attend non-Notre Dame programs abroad will be made on an individual basis after extensive consultation among the students, their faculty advisors, and the deans.

Student Awards and Prizes

COLLEGIATE AWARD IN MODERN AND CLASSICAL LANGUAGES

The Robert D. Nuner Modern and Classical Language Award—presented to the graduating senior in the College of Arts and Letters with a first or second major in any classical or modern foreign language, who has earned the highest cumulative grade point average.

AFRICANA STUDIES

The Wright, Flint-Hamilton & Mason Directors Award—recognizing excellence in research on a topic exploring social, political, economic and/or cultural aspects of the African and African American Diaspora.

AMERICAN STUDIES

James E. Murphy Award for Excellence in Journalism—open to graduating American Studies majors or non-majors with an interdisciplinary minor in Journalism, Ethics and Democracy.

Paul Neville Award for Journalism—awarded to a senior in American Studies for excellence in journalism.

Hugh A. O'Donnell Award in American Studies—awarded to a senior in American Studies for superior academic achievement.

Prof. James Withey Award—awarded to a senior in American Studies for notable achievement in writing.

ANTHROPOLOGY

The Peter Brown Professional Achievement Award—awarded to the anthropology student with outstanding performance in the tasks of a professional academic in one or more of the following areas: publication, presentation at professional meetings, grants, and fellowships.

The Robert DaMatta Excellence in Anthropology Award—awarded to all students who achieve a 4.0 grade point average in the anthropology major.

The Paul Farmer Service Award—awarded to the student who has used his/her anthropological training for public service.

The David Huffinan Scholar/Athlete Award in Anthropology—awarded to the student with outstanding performance in the major and in athletics.

The Irwin Press Prize in Medical Anthropology—awarded for the best paper in medical anthropology.

The Reverend Raymond W. Murray, C.S.C., Award in Anthropology—awarded to an outstanding senior majoring in anthropology.

STUDENT AWARDS AND PRIZES

The Julian Samora Award—awarded to an outstanding senior majoring in anthropology.

ART, ART HISTORY, AND DESIGN

The Walter Beardsley Award—awarded for excellence in the MFA/BFA show.

Grief Art Awards—awarded to outstanding senior BFA students to defray the cost of their thesis exhibitions.

Emil Jacques Medals for Work in the Fine Arts—a gold and a silver medal are awarded for excellence in studio art to undergraduates pursuing a BFA.

Mabel L. Mountain Memorial Art Award—awarded for excellence in studio art.

The Radwan and Allan Riley Prize in Design—awarded to a senior design major for excellence in his or her respective field.

The Radwan and Allan Riley Prize in Studio Art—awarded to a senior studio art major for excellence in his or her respective field.

The Radwan and Allan Riley Prize in Art History and Criticism—awarded for the best essay in art history or criticism submitted by an undergraduate or graduate student.

Eugene M. Riley Prize in Photography—awarded to an undergraduate or graduate photography major for excellence in photography.

Judith A. Wrappe Memorial Award—awarded to an outstanding junior studio/design major. It is presented at the beginning of the student's senior year of study.

ARTS AND LETTERS PREPROFESSIONAL

The Dr. Robert Joseph Barnet Award—presented to an outstanding Arts and Letters preprofessional senior who has demonstrated, in addition to excellent character, superior academic achievement across the arts and sciences.

The Dr. John E. Burke Award—presented to an outstanding Arts and Letters preprofessional senior who has demonstrated, in addition to excellent academic achievement, outstanding leadership qualities through service within and/or beyond the Notre Dame community.

ASIAN STUDIES

Center for Asian Studies Undergraduate Essay Award—awarded to the student with the best undergraduate essay in Asian Studies.

CLASSICS

Departmental Award in Greek, Latin, or Arabic—awarded when merited to a graduating senior for excellence in the study of Greek, Latin or Arabic.

The Helen Hritz and Jewell Erickson Award—for excellence in Classics/Arabic Studies.

EAST ASIAN LANGUAGES & CULTURES

Departmental Awards in Chinese and Japanese—awards given when merited to graduating seniors for excellence in Chinese and Japanese language studies.

The Liu Family Distinguished Achievement Award in Asian Studies—for excellence in Asian Studies.

ECONOMICS

The John Joyce Award on the American Worker—given as merited to the best undergraduate short story or poem on the “American Worker,” by the Higgins Labor Studies Program and the Economics Department. (There is also a graduate award for the best graduate essay).

John Harold Sheehan Prize Essay Award—given to the senior economics major who has written the best senior honors essay in economics.

The Weber Award—awarded to the senior economics major who has achieved the highest academic average.

ENGLISH

The Billy Maich Academy of American Poets Award—awarded to the undergraduate or graduate student submitting the best collection of original poetry.

Eleanor Meehan Medal for Literary Merit—presented to the English major who submits the best original critical essay written for an English course.

The James E. Robinson Award—presented to the outstanding senior English major.

The Ernest Sandeen Poetry Award—awarded to the undergraduate submitting the best original poetry.

The Richard T. Sullivan Award for Fiction Writing—awarded to the undergraduate who submits the best original fiction manuscript.

FILM, TELEVISION, AND THEATRE

The Reginald Bain Award—awarded to a Notre Dame student who produced remarkable theatre projects from any area of theatre during the academic year.

Catherine Hicks Award—awarded to an outstanding graduating senior in theatre.

Joseph P. O'Toole Jr. Award—awarded to the outstanding graduating senior in film studies.

The Award in Television Studies—awarded to a graduating senior for outstanding work in television studies.

GENDER STUDIES

The David and Shari Boehmen Internship Awards—awarded for outstanding summer internships won by Gender Studies students.

The Philip L. Quinn Gender Studies Outstanding Essay Award—awarded for the best undergraduate essay.

The Genevieve D. Willis Senior Thesis Award—awarded to the student(s) judged to have produced the most outstanding senior thesis.

The Genevieve D. Willis Senior Thesis Grant—awarded to sophomores and seniors to supplement research for their senior thesis.

GERMAN AND RUSSIAN LANGUAGES AND LITERATURES

The Rev. Lawrence G. Broestl, C.S.C., Award—presented to the graduating senior with the best academic achievement in German.

Delta Phi Alpha German Honor Society Award—awarded to a graduating senior for outstanding achievement in the study of German language and literature.

Jeffrey Engelmeier Award—presented to an outstanding student of German whose leadership and contribution to the life of the department are especially conspicuous.

The Russian Senior Award—presented to the graduating senior with the best academic achievement in Russian.

The Lauren B. Thomas Scholarship—awarded by the Russian faculty to an outstanding Russian major who exhibits financial need.

HISTORY

The Monsignor Francis A. O'Brien Prize—presented to the senior who has achieved distinction with the best essay in history.

The O'Connell Award—an annual award for the best sophomore or junior essay in history.

The O'Hagan Award—awarded to the undergraduate who has submitted the best original essay on a phase of Irish history.

The Senior Honors Thesis Award—awarded for the best history thesis by a senior history major.

IRISH LANGUAGES AND LITERATURE

The Brother Simeon Prize for Distinction in Irish—for excellence in Irish language and literature.

IRISH STUDIES

The Donald and Marilyn Keough Award—for excellence in Irish Studies.

LATIN AMERICAN STUDIES

The Rev. John Considine, MM Award—awarded for outstanding student contributions to the study of, or service to, the Catholic Church in Latin America.

John J. Kennedy Prize for Latin American Studies—awarded to the senior who has written an

SERVICE AWARDS

outstanding essay on Latin America. (Occasionally there is a runner-up award).

The George Monteiro Prize—awarded to the senior who has written an outstanding essay in Portuguese.

MEDIEVAL STUDIES

Michel Prize in Medieval Studies—given to a graduating senior who has written the best essay on a medieval subject.

MUSIC

Department of Music Senior Award—awarded to an outstanding senior in the Music Department.

PHILOSOPHY

The Dockweiler Medal for Philosophy—presented to the senior submitting the best essay on a philosophical subject.

The John A. Oesterle Award in Philosophy—awards given when merited to graduating philosophy majors for excellence in philosophy.

POLITICAL SCIENCE

The Gary F. Barnabo Political Science Writing Award—awarded for the best paper contributing to nonviolent solutions to world conflicts.

Paul Bartholomew Essay Prize—awarded to the senior major submitting the best senior honors essay in the fields of American politics or political theory.

The Helen Kellogg Prize—for the best senior thesis in the field of comparative politics.

The Stephen Kertesz Prize—awarded to a senior major submitting the best senior honors essay in the field of international relations or comparative politics.

The Rooney Center for the Study of American Democracy Award—awarded to the student who submits the best senior honors thesis in the field of American politics.

PROGRAM OF LIBERAL STUDIES

The Otto A. Bird Award—awarded to the senior in the Program of Liberal Studies who has written the best senior essay.

The Susan M. Clements Award—presented to the Program of Liberal Studies female senior who exemplifies outstanding qualities of scholarly achievement, industry, compassion, and service.

The Edward J. Cronin Award—awarded annually to a student in the Program of Liberal Studies for excellence in writing in regular course work.

The Willis D. Nutting Award—given to the senior major who has contributed most to the education of fellow students.

The Stephen Rogers Award—presented to an outstanding Program of Liberal Studies senior pursuing graduate study.

PSYCHOLOGY

The John F. Santos Award for Distinctive Achievement in Psychology—to a senior psychology major in recognition of outstanding achievement in research, academic performance, and student-life activities.

Senior Recognition Award in Psychology—given in recognition of outstanding achievement in research, academic performance, and student-life activities, while pursuing a major course of study in psychology.

ROMANCE LANGUAGES AND LITERATURES

Robert D. Nuner Award—presented to the graduating senior in the College of Arts and Letters with a first or second major in any classical or modern foreign language who has earned the highest cumulative grade point average.

Endowment for Excellence Award in Romance Languages and Literatures—presented to a graduating senior for excellence in Romance languages and literatures.

Walter Langford Awards for Excellence in Spanish Literature and Excellence in French Literature—two awards—to the graduating senior majors in French and Spanish literature whose work was deemed most outstanding by the Romance languages and literatures faculty.

The Joseph Italo Bosco Senior Award—awarded to a graduating senior for excellence in Italian Studies.

SOCIOLOGY

The Margaret Eisch Memorial Prize in Sociology—awarded to an outstanding graduating senior majoring in sociology.

The Sociology Major Essay Award—presented to the senior sociology major who has written the best essay.

THEOLOGY

The Gertrude Austin Marti Award in Theology—presented to a graduating senior who has evidenced qualities of personal character and academic achievement in theological studies.

The Rev. Joseph H. Cavanaugh, C.S.C., Award—awarded to the senior who has evidenced high qualities of personal character and academic achievement, particularly in theological studies.

Service Awards

AMERICAN STUDIES

J. Sinnott Meyers Award—awarded to a senior in American Studies for outstanding service to the academic community.

ANTHROPOLOGY

The Department of Anthropology Service Award—awarded to the student who has contributed the most to the department's sense of community.

ECONOMICS

Lawrence J. Lewis Award—awarded to the senior in the Department of Economics who has best distinguished himself or herself in community service.

MUSIC

Band Vice President Prize—annual award to the elected vice president of the band.

Terry Baum Secretary Prize—awarded to the secretary of the band and presented by the University of Notre Dame.

Halland President's Prize—annual award for the outgoing president of the band.

Thomas J. Kirschner Band Treasurer Prize—annual award to the elected band treasurer.

The Kobak Memorial Scholarship—for outstanding instrument achievement for band.

Robert F. O'Brien Award—for outstanding service and dedication to the band.

Outstanding Band Member Award—for loyalty, dedication, and leadership.

Outstanding Marching Band Award—awarded for dedication, ability, and leadership during marching band season.

The Daniel H. Pektke Memorial Award—presented to two underclassmen in the Notre Dame Glee Club in recognition of musical leadership, exemplary personal character and overall contribution to the success of the group.

Gerald J. Smith Memorial Award—awarded for citizenship and loyalty to band.

Social Chairperson Award—plaque given annually to the social chairperson in appreciation for dedication and service to the Notre Dame bands.

PEACE STUDIES

The Peter Yarrow Award in Peace Studies—awarded to an outstanding student in Peace Studies with a commitment to justice and service work.

SPECIAL ARTS AND LETTERS REQUIREMENTS

POLITICAL SCIENCE

George Brinkley Service Award—awarded to the student who best exemplifies the Political Science Department's ideal of public service through service to the department, the University, or the wider community.

ROMANCE LANGUAGES AND LITERATURES

Carlos Aballi Award in Hispanic Cultural Awareness—given to a graduating Hispanic student who has taken Spanish at Notre Dame and has been active in promoting Hispanic cultural awareness at Notre Dame.

The Mara Fox Award for Service to the Hispanic Community—awarded to a graduating senior who has performed outstanding service benefiting the Hispanic community.

William Richardson Award in Hispanic Culture for an African American Student—given to a graduating African American student who has shown an unusually strong interest in Hispanic culture through his or her active participation in campus and/or community projects or activities.

José Tito Sigenza Award for Service to Hispanic Youth—awarded to the senior who has studied Spanish at Notre Dame and contributed outstanding service to Hispanic youth.

Special Arts and Letters Requirements

Language Requirement. Students in arts and letters are required to reach intermediate proficiency in a foreign language, but “intermediate proficiency” is defined differently in each of the languages, depending on the complexity of the language itself and the intensity of the course. Check with the specific language department or the assistant deans in 104 O’Shaughnessy to determine which courses fulfill the requirements. Students without Advanced Placement or SAT II credit, but who come with some background in the language they elect will be placed by examinations given during first-year orientation and prior to spring preregistration. Departmental placement exams will not be credit-bearing. Students may receive up to eight hours of credit based on their scores on the AP and SAT II tests. If, for some reason, more than eight hours of credit appear on the transcript, the credits beyond eight will be non-counted and will be manually subtracted from the total number of degree credits counting for graduation. Regardless of the scores on these exams, it is impossible for a student to test out of the language requirement in the College of Arts and Letters. Every student in arts and letters must take at least one course at the appropriate level that deals with texts in the original language. For the specific details of a given language offering or program, check with the relevant department.

College Seminar. The College Seminar is a unique one-semester course experience shared by all students majoring in the College of Arts and Letters. Typically taken in the sophomore year, the course offers students an introduction to the diversity and distinctive focus of arts and letters at the University of Notre Dame. Specific sections of the College Seminars vary in their topics and texts, but all feature an interdisciplinary approach, commitment to engaging important questions, employment of major works, and emphasis on the development of oral skills. Every College Seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the college: the arts, humanities, and social sciences. PLS majors or students who complete a great books seminar in the PLS program are exempt from the College Seminar requirement. All other arts and letters students, without exception, are required to take the College Seminar.

For descriptions of the University requirements, see “University Requirements” in the front section of this *Bulletin*.

Arts and Letters Programs

The programs offered by the College of Arts and Letters include majors, supplementary majors, and minors, which may be either departmental or interdisciplinary. Every student in the college must complete one major sequence. Supplementary majors and minors are optional and may be taken to supplement or enhance a student’s major but do not lead to graduation in and of themselves.

Double-Counting

One course may be double-counted one time to fulfill a second major, supplementary major, or minor requirement and a University or college requirement. No course may be double-counted between majors and/or minors or between a first major and University or college requirements. University Seminar, by definition, fulfills a University or college requirement and is not considered a double count under this rule.

Majors

A major sequence is a carefully chosen combination of courses from an individual department or program that stands alone in qualifying students for an undergraduate degree. It usually consists of between 8 and 12 courses. In contrast to the University and college requirements that provide students with broad exposure to a variety of the liberal arts and sciences, the major affords the student an opportunity to gain more specialized knowledge of a particular field or discipline.

The major in liberal arts programs is normally chosen during the sophomore year and is completed during the junior and senior years. Each spring before preregistration, the college holds a series of programs and meetings to inform the students about the various majors so that they may make intelligent choices. Students pursue their majors under the direction of the departmental or program chair and its advising staff.

Supplementary majors are those that cannot stand alone in qualifying a student for an undergraduate degree but must be taken in conjunction with a primary major. They include both interdisciplinary and departmental offerings:

Africana Studies (24 hours)
Arts and Letters Preprofessional Studies (49 hours)
Art History (24 hours)
Asian Studies (24 hours)
Chinese (24 hours)
Classics (24 hours)
Computer Applications (24 hours)
French (24 hours)
Gender Studies (24 hours)
German (24 hours)
Greek and Roman Civilization (24 hours)
Italian (24 hours)
Japanese (24 hours)
Latino Studies (24 hours)
Medieval Studies (24 hours)
Peace Studies (24 hours)
Philosophy (24 hours)
Russian (24 hours)
Spanish (24 hours)
Theology (25 hours)

Self-Designed Majors. A program for a special self-designed major was approved by the college council during the 1994–95 year. The self-designed major involves substantive integration of the subject matter in ways that cannot be undertaken within any existing major, minor, area studies, or concentration program.

The Process:

1. Interested students, in consultation with three faculty sponsors from at least two departments, should present a detailed written proposal of their major (which has been signed by their faculty sponsors) to the Undergraduate Studies Advisory Committee no later than the Friday before the midsemester break of any semester up to the second semester of the sophomore year. One of the faculty sponsors should be identified as the chair of the supervising committee.

2. Approval of the special major will be granted by the dean, on the recommendation of the Undergraduate Studies Advisory Committee. The committee will review the proposals and communicate their recommendations to the students before the preregistration period begins. As it deliberates, the committee may ask for additional information from the student, faculty sponsors and other colleagues in related areas to assist in further

AFRICANA STUDIES

refining and rewriting the original proposal. It is the expectation that the on-campus portions of the major will rely heavily on existing courses.

3. Special majors must culminate in a capstone essay or, where appropriate, other work, which will be evaluated by more than one faculty member. (In most cases, it is assumed that the faculty evaluators will be the faculty sponsors). A detailed proposal of the capstone project must be submitted to the faculty sponsors by November 1 of the senior year. It is expected that a capstone essay will consist of between 30 and 50 pages (7,500–15,000 words).

4. Changes in an individual program need the approval of the chair of the supervising committee and the dean. If students discover midstream that they are unable to complete the special major, it may be “dropped,” but they must then complete one of the traditional departmental majors. Retroactive proposals will not be considered. Thus, these programs should be well under way by the middle of the junior year.

5. Administration of special majors will take place through the Office for Undergraduate Studies in a manner similar to that of the ALPP program; i.e., students will pick up their PINs in 104 O’Shaughnessy.

6. The college council will periodically review the special major program.

Minors

Minors are five-course sequences that can either be departmental or interdisciplinary. The college has three categories of minors: Departmental, Interdisciplinary, and Area Studies.

Departmental:

Africana Studies
 Anthropology
 Art History
 Chinese
 Classical Literature
 French and Francophone Studies
 German
 Greek
 Greek and Roman Civilization
 Irish Language and Literature
 Italian
 Japanese
 Korean
 Latin
 Philosophy
 Portuguese and Brazilian Studies
 Russian
 Spanish
 Theology

For details, see the departmental descriptions in the section “Programs of Study.”

Interdisciplinary:

Catholic Social Tradition

Education, Schooling, and Society
 Gender Studies
 Hesburgh Program in Public Service
 International Development Studies
 Journalism, Ethics, and Democracy
 Latino Studies
 Liturgical Music Ministry
 Medieval Studies
 Peace Studies
 Philosophy and Literature
 Philosophy, Politics, and Economics
 Philosophy Within the Catholic Tradition
 Poverty Studies
 Religion and Literature
 Science, Technology, and Values
 Technology, Business, and Society

Area Studies:

Asian
 European
 Irish
 Latin American
 Mediterranean/Middle Eastern
 Russian and Eastern European

Electives

In addition to the University and college requirements and the major requirements, the balance of a student’s usual five-course-per-semester program consists of elective courses, which can be drawn from the offerings of any department or college that are open to non-majors who have met the necessary prerequisites.

Africana Studies

Chair:

Richard B. Pierce, John Cardinal O’Hara, C.S.C., Associate Professor of History

Joint Faculty:

Hugh R. Page Jr., Dean, First Year of Studies; Walter Associate Professor of Theology, Department of Theology
 Richard B. Pierce, John Cardinal O’Hara, C.S.C., Associate Professor of History
 Dianne Pinderhughes, Professor, Department of Africana Studies and Political Science

Affiliated Faculty:

Heidi Ardizzone, Assistant Professor, Department of American Studies
 Darren Davis, Professor, Department of Political Science
 Robert A. Dowd C.S.C., Assistant Professor, Political Science
 Cyrainna Johnson-Roullier, Associate Professor, Department of English
 Paul Vincent Kollman C.S.C., Assistant Professor, Fellow, Kroc Institute for International Peace Studies; Fellow, Nanovic Institute for European Studies; Fellow, Kellogg Institute for International Studies
 Rory M. McVeigh, Department Chair, Professor, Sociology
 Paulinus Odozor, Associate Professor, Department of Theology
 Donald B. Pope-Davis, Vice President and Associate Provost; Professor of Psychology, Department of Psychology; Director of McNair Scholars Program
 Jason Michael Ruiz, Assistant Professor, Fellow, Institute for Latino Studies
 Todd David Whitmore Ph.D, Associate Professor, Concurrent Associate Professor, Concurrent Instructor, Fellow of the Joan B. Kroc Institute for International Peace Studies; Concurrent Associate Professor, MNA Program; Concurrent Instructor, MNA Program

Adjunct Faculty

Jacquetta Page, Adjunct Visiting Professor, Department of Africana Studies

Administrative Assistant

Bianca Tirado

The Department of Africana Studies at the University of Notre Dame is dedicated to the holistic and integrative study of Africans and people of African descent in the Americas and the global diaspora. Building on the legacy of the former African and African American Studies Program (1967–2005), the department emphasizes a cross-regional, cross-cultural perspective, a comparative analysis of and between different diasporan groups and the national and global contexts they inhabit. This multidisciplinary department seeks to explore the history, society, politics, economic development, philosophical, theological and theoretical perspectives, literature, arts, religions, and cultures of the peoples of Africa and the African diaspora. Its

comparative and relational foci highlight the connections between culture, race, gender, class, nationality, and other categories of identity and experience.

The Department of Africana Studies aspires to become a center for academic and community activity, an innovative centerpiece for the University of Notre Dame. Undergraduates draw on a range of academic and community activities designed to stimulate intellectual inquiry, excellence in scholarship, and creative engagement. Moreover, the department provides a paradigm for integrating the intellectual and spiritual missions of the University of Notre Dame through programs such as the *Erskine Peters Fellowship Program*, the *Institute for the Study of Religion and Culture in Africa and the African Diaspora*, and the *Communitas Initiative*.

Program of Studies. The major and minor in Africana Studies offer: (1) a disciplined and rigorous intellectual environment to study the histories, literatures, languages, and cultures of African and Afrodiasporan peoples; and (2) an intellectual appreciation of the richness, diversity, and complexity of the African American experience—particularly when it is viewed within national and global contexts.

The department also has opportunities for dialogue, reflection, and social engagement within and beyond the classroom. Upon completion of all requirements, students will have received both a solid introduction to the discipline of Africana Studies and an appreciation of how it interfaces with other areas in the humanities, arts, social sciences, and theological disciplines.

Africana Studies degree options for Notre Dame undergraduates consist of a major (30 credit hours), including a “capstone” experience consisting of a senior project or thesis) and an interdisciplinary minor (15 credit hours of required course work).

Major (30 credit hours)

Introduction to Africana Studies (3 credit hours)

Interdisciplinary Requirement (9 credit hours)

Students will choose one AFST course from each of the following disciplines: literature, history, and social science

Senior Project or Senior Thesis (6 credit hours)

Four elective AFST courses (12 credit hours)

Minor (15 credit hours)

Introduction to Africana Studies (3 credit hours)

Interdisciplinary Requirement (9 credit hours)

Students will choose one course from each of the following disciplines: literature, history, and social science

One elective AFST course (3 credit hours)

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Africana Studies](#) heading.

American Studies

Chair:

Annie Coleman; Ben Giamo

Assistant Professors:

Kathleen Sprows Cummings, Collin Meissner, Jason Ruiz, Sophie White

Adjunct Professors:

Matthew Storin

Adjunct Associate Professor:

Jack Colwell

Administrative Assistant:

Jolene Bilinski

The Discipline. Since its inception in the late 1930s, the discipline of American Studies has aimed to foster new understandings of America and its multiple peoples and cultures in a rapidly changing world. Its focus on the historical and intellectual underpinnings of the cultures, societies, religions, and politics of colonial America and the United States has continually returned to one central question: What does it mean to be an American? As the answers to this question have changed in response to demographic, economic, and political transformations, the discipline of American Studies has continually re-examined its methods and central questions. Shifting from an earlier emphasis on American uniqueness, or exceptionalism, American Studies has been for the past several decades the academic discipline most creatively and rigorously engaged in analyzing the complex and multi-layered expressions of American pluralism and diversity.

Program of Studies. American Studies offers interdisciplinary perspectives on American cultures and societies, American identities, and American political cultures and institutions. The curriculum introduces students to the major ideas and methods of the discipline, hones critical understandings of these methods in advanced courses, and ends with senior level seminars aimed at the highest level of research. To add stature and credibility to the major, a 6-credit Senior Thesis is offered, allowing exceptional students the opportunity to sharpen their critical abilities and improve their research techniques by developing a year-long project.

Students are introduced to the themes and issues dominant in American Studies (AMST) in Introduction to American Studies, a 20000-level course taken at the sophomore level and intended as a gateway to the major. This required course, which explores key concepts, texts, and methods in American Studies and familiarizes students with the discipline’s working vocabulary and practices, is offered in both the fall and spring semesters,

and must be taken before students can take AMST courses at the 30000 and 40000 levels. It may be taken concurrently with a 30000-level course in AMST, pending approval of a faculty advisor in American Studies.

The introductory course is followed by five different 30000-level courses in AMST, each of which continues to explore concepts, texts, and methods particular to the discipline of American Studies. These classes are divided into three different tracks: (1) American Cultures and Societies, (2) American Identities, and (3) American Political Cultures and Institutions. Students are required to take at least one 30000-level course in each one of these areas, and faculty advisors will help determine the particular track that courses fit. (In some cases, a course will fit more than one track). The three tracks are oriented toward the following questions and issues:

1. American Cultures and Societies

How does the production, distribution, and consumption of expressive practices and forms—including novels, comic books, paintings, toys, ideas, movies, television programs, songs, and other artifacts from both elite and popular culture—reflect the diversity of American experience?

2. American Identities

How has the United States’ historic experience as a nation of people of diverse ethnic, racial, sexual, religious, and other identities shaped the varied processes by which Americans forge individual and group identities and claim rights to citizenship, and in turn transform the nation’s collective identity?

3. American Political Cultures and Institutions

How are governmental, economic, and civic institutions embedded within cultural frameworks, and how do they mediate relationships and contending claims among groups and individuals in the United States? Note: All journalism courses, including those that primarily focus on techniques, are placed in this track area.

In addition, AMST majors are required to take three OUTSIDE COURSES that are similarly oriented to the three tracks in the AMST major: (1) American Cultures and Societies; (2) American Identities; and (3) American Political Cultures and Institutions. Students are required to take one course in each of the three tracks. Specific outside courses that are included in these tracks, which are offered in a wide variety of departments and programs at the University of Notre Dame, will be found on lists regularly maintained in the AMST office. As with all courses, students must consult with their faculty advisors about registering for these courses, and once their advisor approves their course selection, the AMST administrative assistant will help students register for courses.

Finally, AMST majors complete their coursework with the Senior Seminar in American Studies, a required 40000-level course which serves as a capstone to the major. Requirements include

AMERICAN STUDIES

seminar-style discussions and a significant research project.

American Studies Major Requirements: Students must complete the general requirements of the College of Arts and Letters and 30 credit hours in American Studies, with at least seven courses taken in AMST and three courses taken in outside departments that fit within the required AMST tracks:

Major Requirements (course level)	Credits
Introduction to American Studies (20000)	3
5 Upper-Level AMST Courses (30000)	15
Senior Seminar in AMST (40000)	3
3 Outside Courses (30000 or 40000)	9
Total:	30

Internships. Internships in American Studies provide opportunities for work experience and practical application of the major under the supervision of a professional. They are arranged by the student in consultation with the Director of Undergraduate Studies. To earn credit students must spend nine to twelve unpaid, supervised hours per week on the job, as arranged by the student and the “employer.” Internship credit hours (3 hours per semester; maximum 6) will be counted as electives outside the major’s 30 credit hour requirement unless determined otherwise by the Director of Undergraduate Studies.

Study Abroad. Upon approval of the Director of Undergraduate Studies, students may take up to 3 credit hours of course work abroad towards the major. That course will fulfill the requirement for one outside course.

American Studies Senior Thesis. A senior thesis is a year-long research project developed with a faculty advisor that attempts to make a contribution to the field of American Studies. The final project may take on a variety of forms, including a scholarly paper, narrative nonfiction essay, journalistic article or series of articles, documentary film, or museum exhibition. The opportunity to write a Senior Thesis in American Studies is open to any major with a GPA of 3.5 or higher within the major as of January of their junior year. In exceptional circumstances students with a GPA below 3.5 may apply. Writing a thesis is a chance to do original research and explore a topic of your choice, to develop a deeper relationship with a faculty member, and to put what you’ve learned as an American Studies major into practice. It is also a significant commitment. Students need one if they want to earn departmental honors in American Studies, but they do not need one to satisfy the requirements for the major. Students writing a senior thesis must register for 6 credit hours in addition to the 30 required for the major, distributed as noted below.

Students choosing to write a senior thesis will submit a formal application to the department by April 1 of their junior year, which requires: 1) An idea for the project, including central research questions,

sources and research that will answer those questions, the student’s method or approach, and the shape of the final project; 2) Two faculty members to help with the project. The primary advisor must be a full-time tenured or tenure-track faculty member in AMST and will be the instructor of record for the thesis project. The secondary advisor can be faculty in AMST or in another college unit. The secondary advisor’s main responsibility is to evaluate the final draft but can also serve as a sounding board at earlier stages; 3) Information on grants applied for and won. The Center for Undergraduate Scholarly Engagement and other campus resources can help students identify fellowships, scholarships, and internships to fund thesis research. Application forms and additional information are available through the departmental website.

Once accepted, students should confirm their plans with their primary advisor and be sure to register in the fall for **Senior Thesis Capstone AMST 47909** (3 credit hours). This course is limited to thesis writers, will meet during a regular class time, and is required. It is designed to help students develop their thesis projects, conduct research, and think about how their work relates to the field of American Studies. Students will work closely with the instructor and confer with their advisors periodically. In the spring students will register for **Senior Thesis Writing AMST 47910** (3 credit hours). This course is independent work with the primary advisor; students will complete their research and writing, as well as plan and give presentations of their work. The final senior thesis project is due in early April.

Thesis writers are expected to fulfill all the requirements for the major and remain in good academic standing. Those who fail to maintain a satisfactory GPA will be asked to abandon their thesis project. Theses will be evaluated by both the primary and secondary advisors. Students will present their projects to students and faculty in April at the departmental celebration of research; presentation at the Notre Dame Undergraduate Scholar’s Conference is encouraged. Every thesis will be honored at the departmental commencement event and recognized on the departmental website.

Departmental Honors. Completion of a senior thesis is a central requirement for earning departmental honors, but not the only one. Honors in American Studies will be conferred upon graduating seniors in three levels: highest honors, high honors, and honors, based on 1) the originality and significance of the student’s senior thesis; 2) the excellence of the student’s GPA in the major as of January senior year; and 3) the student’s degree of engagement with the field of American Studies, as demonstrated by participation in relevant lectures, conferences, internships, grants and fellowships, conversations with scholars, and completion of additional advanced courses. Students seeking departmental honors must submit their thesis, unofficial transcript, and a one page statement describing their engagement with the field to the department by April 15 of their senior

year. All students receiving honors will be recognized at the departmental commencement ceremony. For more information see the departmental website or contact the Director of Undergraduate Studies.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of American Studies](#) heading.

Anthropology

Chair:

Mark R. Schurr

Edmund P. Joyce Professors of Anthropology:

Roberto A. DaMatta (emeritus); James J.

McKenna

John Cardinal O'Hara, C.S.C., Assistant Professor of Anthropology:

Donna Glowacki

Nancy O'Neill Assistant Professor of Anthropology

Vania Smith-Oka

Professors:

Susan Blum; Leo A. Despres (emeritus); Agustín Fuentes; Ian Kuijt; Carolyn Nordstrom; Carl W. O'Neill (emeritus); Irwin Press (emeritus); Mark R. Schurr; Lawrence Sullivan (concurrent)

Associate Professors:

James O. Bellis (emeritus); Douglas E. Bradley (concurrent); Meredith S. Chesson; Rev. Patrick D. Gaffney, C.S.C.; Joanne M. Mack (concurrent); Cynthia Mahmood; Kenneth E. Moore (emeritus); Susan G. Sheridan

Assistant Professors:

Maurizio Albahari; Jada Benn-Torres; Catherine Bolten; Rahul Oka

Director of Undergraduate Studies

Deborah L. Rotman

Adjunct Associate Professor:

Robert Wolosin

Program of Studies. The undergraduate program in anthropology is designed to provide each student with a broad, holistic, integrated and species-wide perspective on contemporary human behavior. Anthropology may be the only major that provides significant intellectual and professional links with the humanities and other social science fields, while also providing separate bridges into both the natural sciences and the field of business. In so doing the anthropology major prepares students for successful entry into any number of fields and disciplines and their appropriate professional graduate schools, including medical schools, public health, and law. Human evolutionary models, critical comparative analyses, ethnographic methods, and a variety of developmental approaches are taught and applied in our classes to such diverse topics and research areas as: health; illness; addiction; human communication (verbal and non-verbal); human origins; the nature of social groups; the family; worldwide political and socio-economic systems; religion; warfare; infancy and childhood; non-human primate ecology and behavior; archaeology, prehistory, and ethnology; sexuality; museum studies; evolutionary medicine; transnationalism; sex and gender; and medical anthropology. Geographic specialties of the faculty include China, Southeast Asia, North America, Latin America, Russia, Italy, Ireland, Egypt, Central and Southern Africa, and the Middle East.

In moving toward our goal to achieve national prominence as one of the top undergraduate research and teaching departments in the nation, our faculty

stress the importance of innovative and significant undergraduate research. We aim to provide as many majors as is possible with hands-on research experiences both in the field and laboratory. Smithsonian and Chicago Field Museum summer research internships created by the department are available to majors. The department also administers a paid summer internship with J.F. New Environmental Consultants. It is common throughout the school year and summer that the faculty pair up with students to conceptualize and work together on research projects both here and abroad. Often this collaborative research leads to joint publications. Our undergraduate students receive many undergraduate research awards from the University and regularly attend national professional meetings to stand alongside graduate students and professors from around the nation to present the results of their research. Our anthropology minors also participate to a high degree.

Aside from its applicability and relevance across different disciplines, professions, and careers, one of the truly unique aspects of anthropology is that it changes in a most profound and insightful way the manner in which our students experience and come to interpret their own lives. The subject of anthropology is humankind as viewed not through a local lens limited by the biases or world view of one's own culture, but by a view that attempts to reconcile and understand the intersecting and sometimes conflicting, yet, often logical alternative ways by which our fellow human beings live and think.

Perhaps it is the result of this very personal encounter, experienced alongside exposure to the very best scholarship, that permits our anthropology students to connect so easily and successfully with diverse professional communities. This relative fluidity by which our graduates make the transition into so many varied fields, the knowledge and skills gained by studying anthropology, in addition to providing keen insights into others, enriches one's understanding of one's self. In this way anthropology maximizes the chances of personal achievement and self-fulfillment, and proves a surprisingly powerful beginning point for just about any career.

Writing-Intensive Requirements: All courses taught in the department include writing components, which are both informal and formal and vary by course level. These assignments may include response papers, journals, in-class writing, analyses, field research, or research papers. Courses offered in anthropology develop both critical thinking skills and global awareness through written and other assignments. Every major is required to take an advanced theory seminar (ANTH 40400, Perspectives in Anthropological Analysis) where they develop analytical and synthetic skills through intensive writing assignments combined with class discussion.

PROGRAMS

1. **The Major.** There are no prerequisites to the major. **The major requires 30 credits, nine of which must be in the sequence of fundamentals, including ANTH 30101 (Fundamentals of Biological Anthropology), ANTH 30102 (Fundamentals of Archaeology), ANTH 30103 (Fundamentals of Social and Cultural Anthropology), and ANTH 30104 (Fundamentals of Linguistic Anthropology).** In addition, **majors must take ANTH 40400 (Perspectives in Anthropological Analysis), one methods course (3 credits), and 15 credits of electives. At least six credits of the electives must be at the 40000 level.** It is recommended that students take the fundamentals by the end of their sophomore year, whereas ANTH 40400 is usually taken as a junior or senior.

2. **The Honors Track.** The honors track requires 36 credits. In addition to the above program, the honors student will take one additional methods course (3 credits) and ANTH 48900 Anthropology Senior Thesis (3 credits) or equivalent.

3. **The Minor.** The minor requires 15 credit hours. There are no prerequisites. Students must take three of the four fundamentals, ANTH 30101, 30102, 30103, and 30104. In addition, students must take six credits of electives.

Courses taken for pass-fail credit will not satisfy requirements for the major, the honors track, or the minor.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Anthropology](#) heading.

Courses in which graduate students may enroll and for which graduate credit may be obtained are at the 40000 level and higher. Special requirements are made of graduate students who enroll in these courses.

Art, Art History, and Design

Chair:

Charles E. Barber

Professors:

Charles E. Barber; Rev. Austin I. Collins, C.S.C.;
Dennis P. Doordan; William J. Kremer; Kathleen
A. Pyne; Charles M. Rosenberg; Maria C.
Tomasula

Associate Professors:

Robert R. Coleman; Jean A. Dibble; Paul A.
Down; Richard L. Gray; Martina A. Lopez; Rev.
Martin Lam Nguyen, C.S.C.; Robin F. Rhodes;
Robert P. Sedlack

Assistant Professors:

Danielle Joyner; Gabrielle Gopinath; André
Murnieks

Associate Professional Specialists:

Ann-Marie Conrado; John F. Sherman

Concurrent Assistant Professors:

Douglas E. Bradley; Erika Doss

The Department. The Department of Art, Art History, and Design at the University of Notre Dame, as part of the College of Arts and Letters, is dedicated to the liberal education of the whole person. The art and design student, guided by an active faculty, can expect to become critically aware of the rich artistic past and challenged to become a thoughtful maker of contemporary visual expression. The art history student, under the tutelage of an expert faculty, will achieve a broad and evaluative knowledge of the art of the Western world. An active lecture and visiting artist series and the extensive collections of the Snite Museum of Art strengthen and broaden the work in the classroom and studio. The South Bend and Chicago areas provide additional cultural activities and experiences.

The department has 12 visual art and design and eight art history faculty. The student may pursue one of three degrees at the undergraduate level: the bachelor of arts (B.A.) in studio art and design or a B.A. in art history, or the bachelor of fine arts (BFA) in studio art and design. Studio concentrations are offered in ceramics, design, painting, photography, printmaking and sculpture. The size of the department enables the serious student to receive a solid foundation and, through personal contact with the faculty, to develop a creative individual direction in a discipline. The department is further enriched by an active graduate program offering the MFA degree in studio art and design and the M.A. degree in art history.

The art history classrooms and the art image library are housed on the first floor of O'Shaughnessy Hall. Offices for the art history faculty are in Decio Faculty Hall. The departmental office is in Riley Hall, as are the art and design faculty studios. Riley Hall also houses all the visual arts activities in well-equipped studios that are always available for student use. Skilled technical staff and support facilities are

available as appropriate for each medium that is offered.

Writing-Intensive Requirement: The Department of Art, Art History, and Design fulfills the College of Arts and Letters writing-intensive requirement by requiring all majors in each of the three departmental areas (ARST, DESN, and ARHI) to enroll in at least one upper-level (3xxxx or 4xxxx) art history course. All upper-level ARHI courses include a writing component that satisfies the College of Arts and Letters writing-intensive requirement.

THE STUDIO ART AND DESIGN MAJOR

Bachelor of Arts Degree in Studio Art and Design

The bachelor of arts degree program in art and design is defined as a general liberal arts degree. The B.A. degree is ideal for the student who desires a liberal education with a strong emphasis in art. Students enrolling in the B.A. degree program are required to complete a five-course core curriculum during their first three semesters. These courses are Drawing I, 2-D Foundations, 3-D Foundations, one course treating material from before 1600 taught by a regular full-time art historian in the department, and one course that treats material from after 1600 taught by a regular full-time art historian in the department. Students are not required to select a major concentration for the B.A. degree, but some focus of study is encouraged. The B.A. degree consists of 36 hours in art and design, of which 27 are in studio and nine in art history.

Bachelor of Fine Arts Degree in Studio Art and Design

The bachelor of fine arts degree program in art and design is intended for the student who wishes to pursue a professional career in the visual arts. The program is organized into a four-year sequence of study that provides a solid understanding of art and art history. The student has an opportunity to explore a variety of curricular options and then chooses an intensive and professional major concentration. In addition to a primary concentration, BFA students are encouraged to select a secondary area of interest to broaden their thinking and to enrich their creative study. BFA candidates share a close working relationship with the department's faculty who are active professional artists and designers. Intensive studio work is complemented by an academic education with strong art history and liberal arts component. The BFA degree consists of 66 credit hours in art, of which 54 are in studio and 12 in art history.

BFA Freshman and Sophomore Years

Students beginning in the program are required to complete a seven-course studio core curriculum during their first two years. Five of these courses are mandated: Drawing I, Figure Drawing, 2-D Foundations, 3-D Foundations and Photography I. The remaining two studio courses are optional, based on the student's interest. This intensive curriculum establishes a base for the studio practices

and principles for all visual art expression. At the end of the fourth semester, students who have earned a minimum 3.25 grade point average in their studio courses will be accepted as candidates for the BFA degree. Students who do not qualify are eligible for the B.A. degree. BFA candidates are waived from the second history/social science requirement and the University fine arts requirement.

BFA Junior and Senior Years

Students accepted into the BFA program begin a two-year primary concentration in one of the following studio areas: ceramics, graphic design, industrial design, painting, photography, printmaking, or sculpture. The concentration requires 15 hours of study in a major concentration area during the last four semesters. Teaching in the major is highly individualized and stresses the creative development and preparation of the student for the professional world. In addition to pursuing a concentration, all BFA majors must enroll in the BFA Seminar and the Senior Thesis Course. The culmination of the BFA degree is the completion of a senior thesis. This two-semester senior project, directed by a faculty member, will be exhibited and approved by the faculty as a requirement for graduation.

STUDIO ART AND DESIGN CONCENTRATIONS

Ceramics Concentration

Ceramics is a concentration emphasizing clay and glaze as the primary vehicles for expression. Traditional pottery, vessel making, and sculpture may be addressed through a variety of processes that include hand-building, throwing, and casting. Students are encouraged to develop technical skills and a direction of their own choosing. In addition to traditional ceramic materials and processes, students will be encouraged to study and utilize other sculptural media, as well as become familiar with contemporary and historical source material that will inform their own directions in ceramics.

Design Concentration

Design is the order of form and the control of function. It is what designers do. Humans are conditioned to assess and select commodities on the basis of appearance and textural input, accepting or rejecting information and material goods according to subtle visual cues. The power of seduction resulting from skillfully manipulated design can do more than attract interest or manipulate perception. It can enable people. Good design and careful planning can promote understanding, simplify use, improve safety, instill confidence, add value, and salvage faltering economies. Undergraduate design education begins at Notre Dame with the utilization of campus facilities through a liberal arts curriculum. This social, philosophical, critical, ethical, and historical experience helps build a foundation of cultural understanding that naturally informs the creative and problem-solving methods required by designers.

Responsible designers aspire to conceive objects with a sensitivity for human need, human aspiration, and

ART, ART HISTORY, AND DESIGN

the functional requirements for both implementing and producing made objects. At its best, design serves a community that includes industry, marketing, consumer, and the environment.

Design has been part of the curriculum at the University of Notre Dame since the early 1950s. Here design students share the advantages of a campus that is rich in contemporary technology and still retains a deep appreciation for a heritage of traditional human values and wisdom. Technically advanced lecture rooms and digital labs support all student design activities. An on site 18-station Mac Lab, a 10-station Surface Modeling PC Lab, a high performance Digital Imaging Studio, and wireless access are all supported by the vast network of software access and services from Notre Dame's Office of Information Technologies. Two model fabrication shops allow pattern making activities leading to "on site" processing that ranges from plastic molding to foundry casting. Intermediate- and advanced-level undergraduate students share an energized design community with defined studio space located in close proximity to all studio fine arts, art history, and exhibition galleries.

Graphic Design

At its most basic level, graphic design is a creative process that combines the visual arts and technology to communicate ideas. It begins with a message that, in the hands of a talented graphic designer, is transformed into visual communication that transcends mere words and pictures. By controlling color, type, movement, symbols, and images, the graphic designer creates and manages the production of visuals designed to inform and persuade a specific audience. By combining aesthetic judgment with project management skills, graphic designers develop visual solutions and communications strategies. The professional designer works with writers, editors, illustrators, photographers, code writers, and printers to complete compelling designs that effectively communicate a message.

At Notre Dame, the undergraduate graphic design curriculum begins with a foundation in the liberal arts. Such a basis is a design student's best path to meet and solve the varied communication challenges inherent in today's complex world. Because a design solution may emerge from the humanities, an algorithm, or a scientific discovery, the curriculum provides a student with the opportunity to be firmly grounded in the fundamentals of design and the visual arts, while also taking courses in science, math, history, philosophy, and theology. As students progress through the tiered design program, they develop as a designer, as an intellectual, and as a moral person, prepared to address the social, ethical, and political circumstances influenced by the design profession.

At its core, the Notre Dame graphic design program asserts that the designer can make a difference not only in the strategic plan of a business but also in the world. During their time on campus, students

develop projects that aspire to positively influence the lives of culturally diverse people, critique the ethical dimensions of contemporary culture, and give visual form to complex social issues. As design professionals, Notre Dame graduates will be responsible for the future of our visual culture.

Industrial Design

Industrial designers give form to virtually all mass-manufactured products in our culture. They seek opportunity and advantage through identifying and solving problems. Their creative contributions impact the utility, appearance, and value of our tools and environment. Their most innovative solutions lie at an intersection of what is knowable and what is possible.

The industrial design profession demands excellent organizational skills, an awareness of visual and tactile aesthetics, human behavior, human proportion, material, process, and the responsible appropriation of resource, during and after use. Designers express conceptual proposals through a combination of well-developed drawing, physical modeling, computer modeling, writing, and verbal skills. Designers best serve the consumer through sensitive and innovative collaboration with art, science, engineering, anthropology, marketing, manufacturing, and ecology. Properly implemented, industrial design affords greater benefit, safety, and economy to all participants and recipients impacted by the product development cycle.

All students access local Mac and PC computer support from a campus server, a local wireless network, projection-equipped classrooms, and input/output facilities that include on-site multiple (high-quality) large and intermediate size format printing. Basic shop facilities are complemented by access to rapid prototyping, available in the College of Engineering. Notre Dame's Industrial Design Program (NDID) is accredited by the National Association of Schools of Art and Design (NASAD) and maintains student chapter affiliation with the Industrial Designers Society of America (IDSA). NDID interacts with regional, national, and international corporate design and consulting offices in the form of annual conferences, sponsored projects, field trips, and internships.

Painting Concentration

Painting, with its many traditions, is a medium put to an extraordinary diversity of contemporary uses. Capable of representing everything from the material to the intangible, painting continues to be a means for artists of vastly different interests to address their subjects in highly individual ways. The painting concentration at Notre Dame fosters the aesthetic, critical, and technical development of each student through a program of course work, independent study, and regular critiques. Emphasis is placed on being well-versed in contemporary critical issues, on articulating individual themes, and on developing the technical means to give visual form to thematic concerns.

Photography Concentration

Photographs mediate our involvement with the physical world, taking place at the intersection between art, culture, and our own individual perceptions. The concentration in photography is committed to educating artists in a world where photographic imagery and new media representations pervade our everyday experience. From foundation work through graduate studies, courses are designed to inform students about photographic traditions while engaging them in issues and methodologies of contemporary art. The photography program seeks to facilitate growth and development of the art student through a range of courses dealing with aesthetic, historical, and critical concerns. Students have the opportunity to develop the necessary technical skills needed for professional work. The curriculum incorporates digital imaging technologies that have expanded and redefined our understanding of photographic practice.

Printmaking Concentration

The printmaking concentration emphasizes a manner of thinking and the making of images that the print media will allow and will encourage. As the student becomes familiar with the various matrixes, techniques, and technologies of photolithography, intaglio, relief, screenprint, papermaking, and the making of books, the methods of developing images and ideas are taught concurrently. Exploration and experimentation in all of the print media are encouraged, including digital art and all other forms of reproducing an image. The courses are designed to progressively develop skill, creativity, personal imagery, and knowledge of relevant current issues. Advanced students work on a professional level by creating a cohesive body of work.

Sculpture Concentration

Sculpture today encompasses diverse materials and contexts for the expression of ideas in space. Within this broad description, students are encouraged to develop the technical skills that will help them expand their ideas into thoughtful individual expression. We embrace a breadth of vision and experience which will challenge the student to investigate and respond to contemporary issues through problem-solving. A full range of traditional and non-traditional media are available in specific courses and through individual mentoring. By blending required and elective courses and independent study, students can experience a curriculum that responds to their particular needs and direction.

THE ART HISTORY MAJOR

Notre Dame's art history major is designed to equip our students with a broad overview of the development of Western art and to provide them with an in-depth knowledge of particular periods, problems, and research methods. The diversity and scholarly strength of our faculty and the research facilities of the Hesburgh Library, including the Medieval Institute, are supplemented by the rich resource of the Snite Museum of Art. With a permanent

CLASSICS

collection of over 21,000 works, the Snite Museum not only gives our students an invaluable firsthand acquaintance with important examples from all periods and many cultures—including distinguished collections of old master drawings, 19th- and early-20th-century photographs, and Pre-Columbian art—but also provides a wide range of opportunities for our students to gain practical museum experience in both volunteer and paid positions.

The University of Notre Dame offers a 33-hour Honors Program, a 30-hour first major, a 24-hour supplementary major in art history, and a 15-hour minor. These degrees are intended not only for students who are already intent upon pursuing a career in an art museum or gallery or as a college or university professor, but also for those individuals who simply wish to learn more about Western civilization through the examination of some of its most beautiful, provocative, and informative objects.

Art history first majors are required to take the Theories of Art seminar. In addition, the department offers courses in four areas of Western art: ancient, medieval, Renaissance and baroque, and modern (19th through 21st centuries). An art history major must take at least one course in each of these areas. It is strongly recommended that the four-course distribution requirement be fulfilled with 20xxx or 30xxx level introductory courses taught by regular art history faculty on campus. Students must also have taken a minimum of two seminars in addition to Theories of Art. The Theories of Art seminar should be taken in either the junior or senior year.

Art History Honors

First majors with a grade-point average of 3.667 or above in art history courses may petition the faculty for permission to enter the Art History Honors Program. This request must be made by the 10th week of the spring semester of the student's junior year. The honors program will normally consist of 33 hours, as compared to 30 hours in the regular first major. Students who enter the honors program must enroll for six hours of Honors Thesis credit, taking three hours in the fall semester of their senior year and three hours in the spring semester of their senior year. Students who earn an A- or better on their Honors Thesis will be entitled to Honors in Art History.

Students wishing to complete a second major in art history should take one course in each of the four departmental areas, two art history seminars, and two electives in art history. It is strongly recommended that the four-course distribution requirement be fulfilled with 20xxx- or 30xxx-level introductory courses taught by regular art history faculty on campus.

Students wishing to minor in art history can do so by taking five art history courses (15 credit hours total). At least one of these courses must treat material prior to 1600, and at least one must treat material from 1600 to the present.

Courses taken for the second major or the minor cannot be counted in more than one university program.

Over the last 10 years, our undergraduate majors have presented scholarly papers at conferences throughout the Midwest; held prestigious summer internships in museums in New York, Washington, Chicago, and Baltimore; found employment in galleries and museums; and pursued graduate work at Columbia, Berkeley, Cornell University, Yale University, the University of North Carolina-Chapel Hill, the University of Virginia, the University of Texas, and the University of Michigan, among other institutions.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Art, Art History, and Design](#) heading.

Classics

Acting Chair:

Li Guo

Eli J. and Helen Shaheen Professor of Classics:

Keith R. Bradley

Rev. Theodore M. Hesburgh, C.S.C., Professor of Arts and Letters:

Sabine G. MacCormack

Professors:

Joseph P. Amar (Arabic); Daniel J. Sheerin (emeritus)

Associate Professors:

W. Martin Bloomer; Elizabeth Forbis Mazurek; Li Guo (Arabic); Brian A. Krostenko; David J. Ladouceur; Hildegund Mueller; Catherine M. Schlegel

Concurrent Associate Professors:

Blake Leyerle; David O'Connor; Robin Rhodes

Assistant Professors:

Christopher Baron; David Hernandez; Mahan Mirza (Arabic); Isabelle Torrance

Assistant Professional Specialists:

Ghada Bualuan (Arabic) Tadeusz Mazurek; Abdul-Massih Saadi (Arabic)

Visiting Assistant Professional Specialist:

Maha Houssami (Arabic)

The department. The Department of Classics offers courses in the languages, literatures, archaeology, history, religions, and civilization of the ancient world. Cooperation with other departments of the college makes available to Classics students additional courses in the art, philosophy, and political theory of antiquity. Visit us online at classics.nd.edu.

The department also provides the administrative home for the programs in the languages and cultures of the Middle East.

MAJORS IN CLASSICS

Classics majors encounter at their sources the perennial cultures of Greece and Rome, cultures that continue to exercise a profound influence on Euro-American civilization. Classical training imparts enhanced skills in close reading and analysis of literary and rhetorical forms, as well as repeated experience of the integration of literature, history and ancillary studies. Thus, a major in Classics provides the archetypal humanistic education and an ideal preparation for entry into any of the professions that require mastery of language, close analysis of documents and integration of multiple details.

The lower-level courses equip the student with basic knowledge of languages and with a conspectus of ancient history and culture. Advanced courses in Latin and Greek literature and Ancient Civilization provide opportunities for more focused and detailed study and are conducted in a seminar format with emphasis on research and writing.

In addition to the other University requirements, students majoring in Classics will, under normal

CLASSICS

circumstances, complete at least 10 courses in one of two areas of concentration: Classics or Greek and Roman Civilization.

Classics Major

5 courses in Greek or Latin language/literature: 20003 and above*	15
2 courses in non-primary language (Greek or Latin)	6
1 course in Greek or Roman History	3
2 Classics courses in English	6
	<hr/> 30

*Students will typically choose one of the two classical languages, ancient Greek or Latin, in which to fulfill the language requirement at the advanced level. They will be required to take at least two semesters in the other language at the appropriate level. If students have sufficient background in both languages, it should be possible for them to complete the requirements of the major through a combination of intermediate and advanced courses in both languages, as long as the total number of language courses equals seven (21 credit hours) for the first major and five (15 credit hours) for the supplementary major.

Supplementary majors in Classics will be exempt from the two courses in the second classical language.

Greek and Roman Civilization Major

The History of Ancient Greece	3
The History of Ancient Rome	3
Greek Literature and Culture	3
Roman Literature and Culture	3
Six Classics courses in English or Greek and Latin language offerings*	18
	<hr/> 30

*Students will be strongly encouraged, but not required, to include some language study in their six elective courses.

Supplementary majors in Greek and Roman Civilization will be required to take four elective CLAS courses in translation or Greek and Latin offerings.

MINORS IN CLASSICS

Minors provide students majoring in other areas with structure and certification for a variety of approaches to the study of Greek and Latin language, literature, and civilization.

Latin Minor

The Latin Minor provides a solid grounding in the philological and literary study of Latin texts of the classical period, or, for those who prefer, of Christian Latin literature. It consists ordinarily of five courses (15 hours) in Latin: (1) Intermediate Latin or its equivalent; (2) Reading and Writing Latin Prose; (3–5) three courses to be chosen from Latin courses at the 30xxx/40xxx level. Students interested in later

Latin texts are directed to the joint offerings of the department and the Medieval Institute.

Greek Minor

The Greek Minor provides a solid grounding in the philological and literary study of Greek texts of the classical and Hellenistic periods. It consists ordinarily of five courses (15 hours) in Greek: (1) Intermediate Greek, or equivalent; (2) Reading and Writing Greek Prose; (3–5) three courses to be chosen from Greek courses at the 30xxx/40xxx level.

Classical Civilization Minor

The Classical Civilization Minor provides a broadly based orientation to the history and civilization of the classical world. It consists of five courses, three of which are required: The History of Ancient Greece, The History of Ancient Rome, and Greek and Roman mythology. The remaining two courses may be chosen, with departmental approval, either from CLAS courses, whether offered by the department or cross-listed by other programs, or from Greek and Latin language courses above the introductory level.

Classical Literature (in Translation) Minor

The Classical Literature in Translation Minor provides a broad experience of Greek and Latin literature studied in English translation. It consists of five courses, three of which are required: Greek Literature and Culture, Latin Literature and Culture, and either Greek and Roman Mythology or Classical Epic or Greek Tragedy. The remaining two courses may be chosen, with departmental approval, either from CLAS courses, whether offered by the department or cross-listed by other programs, or from Greek and Latin courses above the introductory level.

PROGRAM IN SEMITIC LANGUAGES

The program in Arabic offers a full range of courses in Modern Standard Arabic, and is geared toward proficiency in speaking, reading, and writing. Courses in Middle East history, culture, and religion complement the language component and give students the opportunity for a broad-based and comprehensive understanding of the Arab world.

MAJOR IN ARABIC

A total of 32 credit hours distributed in the following areas:

6 courses in Arabic	20
1 course in literature, taught by the Arabic faculty	3
1 course in Middle East history	3
1 course in Islam	3
1 elective, subject to departmental approval	3

MINOR IN MEDITERRANEAN/MIDDLE EAST STUDIES

Joseph P. Amar, director

An interdisciplinary focus defines this broad-based program that encourages a multidimensional approach to the Mediterranean world. This is achieved through a wide variety of courses and activities offered by departments that study southern Europe, North Africa, or the Middle East.

While language courses may serve as a component of the minor, students are offered opportunities to view the region in its full historical, cultural, and political context. In this way, students are given the opportunity to assemble a course of studies that best reflects their own interests.

Typical areas of focus might include the rich culture that developed in southern Spain as a result of the Christian, Muslim, and Jewish interactions there; the impact of the French language and culture on North Africa and the Middle East; or the contemporary Israeli-Palestinian conflict.

Requirements: (1) Intermediate Arabic (MEAR 20003); (2) the student's choice of three courses that relate to the region of southern Europe, North Africa, or the Middle East; and (3) a final research thesis that integrates coursework related to the student's area of interest.

SYRIAC STUDIES

Syriac is a form of Aramaic that was the literary language of Jews and pagans in western Asia before expanding to become the common dialect of Aramaic-speaking Christians throughout the region. Early literature in Syriac preserves sustained evidence of the distinctive character of Aramaic-speaking Christianity that is largely unhellenized and that reflects the linguistic and cultural milieu of first-century Palestine.

Syriac literary culture reveals mutual and parallel dynamics in the development of Syriac Christianity and the emergence of Rabbinic Judaism. The study of Syriac is likewise of pivotal importance to an understanding of the thought-world of the pre-Islamic Middle East, the established Christian and Arab populations of the region, and the emergence of Islam in the seventh century.

Syriac language courses are offered in the summer. Consult the *Bulletin of Information, Summer Session* or online at classics.nd.edu.

COURSE DESCRIPTIONS

Current course descriptions are available online at classics.nd.edu. The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Classics](#) heading.

East Asian Languages & Cultures

Chair:

Dayle Seidenspinner-Nunez

Research Professor:

Robert M. Gimello

Associate Professors:

Michael C. Brownstein; Liangyan Ge; Lionel M. Jensen; Sylvia Li-Chun Lin; Xiaoshan Yang

Assistant Professor:

Deborah Shamoon

Professional Specialist

Noriko Hanabusa

Associate Professional Specialists:

Jung-Hyuck Lee; Setsuko Shiga; Chengxu Yin

Assistant Professional Specialists:

Guangyan Chen; Yanjing Wang

Mission Statement: The peoples of East Asia comprise one quarter of the world's population and account for a similar proportion of the world's production and consumption. This, along with the contemporary fusion of Asia and the West politically and economically, makes knowledge of the diverse languages and cultures of East Asia vital to an understanding of our global community and indispensable for the preparation of careers in the Pacific Rim. The Department of East Asian Languages & Cultures provides the resources and instruction necessary for success in these areas. The department is dedicated to providing rigorous language training in Chinese and Japanese, as well as courses taught in English on Chinese and Japanese philosophy, religion, literature, and culture. Complementary courses in other disciplines are listed in this Bulletin under departments such as history, philosophy, theology, political science, economics, and anthropology.

Completion of First-Year Chinese, Korean, or Japanese (10 credits) will satisfy the language requirement for both the College of Arts and Letters and the College of Science. Although the College of Business does not have a language requirement, it strongly supports integration of language courses into its curriculum and encourages students to participate in the International Study Programs (See "International Study Programs" under Mendoza College of Business).

Placement and Language Requirement. Students who wish to enroll in a Chinese, Korean, or Japanese language course beyond the 10111 or 10112 level must take a placement examination administered by the Department. Students testing out of 10xxx-level language courses must complete at least one course at the 20xxx level or higher to satisfy the language requirement.

PROGRAM IN CHINESE

The program in Chinese offers language classes in Mandarin Chinese at the beginning, first-, second-, third-, and fourth- and advanced-year

levels, as well as courses in English on classical and modern Chinese literature and culture. Qualified students also have the opportunity to attend East China Normal University in Shanghai, and Peking University in Beijing, People's Republic of China.

The Chinese program offers first and supplementary majors and a minor.

Basic requirements: For the major, students must complete 30 credit hours, including third-year Chinese. For the supplementary major, students must complete 24 credit hours, including third-year Chinese. For the minor, students must complete 15 credit hours, including two semesters of language classes beyond the first-year. 10xxx-level language courses and University seminars on China-related topics do not count toward the major, supplementary major, or minor.

Other requirements: In addition to the language course requirements described above, all majors and minors must take one course in Chinese literature, which must be taught by a departmental faculty member. Remaining credit hours may be satisfied by taking additional Chinese language and literature courses, or other East Asia-related courses approved by the academic advisor.

THE HONORS TRACK IN CHINESE

Majors in Chinese are strongly encouraged to pursue the honors track. Those who are interested must meet the following criteria:

1. Fulfillment of all the requirements for a first major of 30 credit hours in either Chinese or Japanese;
2. A cumulative GPA of at least 3.6 or permission from the department chair.

Program Requirements: In addition to the 30 hours required for a major, the honors track requires the completion of a senior honors thesis of at least 30 pages that demonstrates the student's originality and ability to do research in the target field. For this endeavor, the student will receive 3 hours of graded credit. This means to graduate with departmental honors, the student must earn 33 hours of credit in the major.

Based on past experience, it is our expectation that honors projects will emerge from previous coursework where close interaction between faculty and students has planted the seeds for a larger project; from the student's leadership role in the cultural and intellectual life of the department; or as a follow-up to experiences begun during the student's study-abroad program.

PROGRAM IN JAPANESE

The program in Japanese offers language classes in modern Japanese at the beginning, intermediate, fourth-year, and/or advanced levels, as well as courses in English on classical and modern Japanese

literature and culture. Qualified students also have the opportunity to attend Nanzan University in Nagoya, and Sophia University in Tokyo, Japan.

The Japanese program offers first and supplementary majors and a minor.

Basic requirements: For the major, students must complete 30 credit hours, including two semesters of advanced Japanese. For the supplementary major, students must complete 24 credit hours, including third-year Japanese. For the minor, students must complete 15 credit hours, including two semesters of language classes beyond the first year. 10xxx-level language courses and University seminars on Japan-related topics do not count toward the major, supplementary major, or minor.

Other requirements: In addition to the language course requirements described above, all majors and minors must take one course in Japanese literature, which must be taught by a departmental faculty member. Remaining credit hours may be satisfied by taking additional Japanese language and literature courses, or other East Asia-related courses approved by the academic advisor.

THE HONORS TRACK IN JAPANESE

Majors in Japanese are strongly encouraged to pursue the honors track. Those who are interested must meet the following criteria:

1. Fulfillment of all the requirements for a first major of 30 credit hours in either Chinese or Japanese;
2. A cumulative GPA of at least 3.6 or permission from the department chair.

Program Requirements: In addition to the 30 hours required for a major, the honors track requires the completion of a senior honors thesis of at least 30 pages that demonstrates the student's originality and ability to do research in the target field. For this endeavor, the student will receive 3 hours of graded credit. This means to graduate with departmental honors, the student must earn 33 hours of credit in the major.

Based on past experience, it is our expectation that honors projects will emerge from previous coursework where close interaction between faculty and students has planted the seeds for a larger project; from the student's leadership role in the cultural and intellectual life of the department; or as a follow-up to experiences begun during the student's study-abroad program.

PROGRAM IN KOREAN

The University offers two years of Korean language instruction and a number of courses relating to Korean culture. Students who finish the sequence at Notre Dame are encouraged to continue their language study abroad.

ASIAN STUDIES MINOR

See "Area Studies Minors," later in this section of the *Bulletin*. This minor provides opportunities for students to develop an interdisciplinary understanding of Asia.

EAST ASIAN LANGUAGES & CULTURES STUDY-ABROAD PROGRAMS

Students have opportunities to study abroad for either a semester or a year in the People's Republic of China and Japan at the following locations:

Beijing, China: The program at Peking University affords students an opportunity to improve their fluency in spoken and written Mandarin Chinese through intensive training. Participants must have completed at least two semesters of college-level Mandarin or the equivalent.

Shanghai, China: The program at East China Normal University is generally designed for a semester (but it may be extended) that affords students courses in Chinese language, literature, and culture.

Nagoya, Japan: The program at the Catholic Nanzan University offers mandatory courses in intensive Japanese, as well as related courses in literature, religion, business, economics, history, art, and politics. The program is designed for sophomores who have taken a minimum of first-year, intensive Japanese (at the University of Notre Dame) or its equivalent.

Tokyo, Japan: The program at the Catholic Sophia University enables language majors to focus on their language courses while, at the same time, affording a wide-ranging selection of English-language offerings in Asian Studies, international business, economics, history, political science, art history, literature, religion, philosophy, anthropology, and sociology. Sophomores and juniors may participate.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of East Asian Languages & Cultures](#) heading.

Economics

Chair:

Richard A. Jensen

Director of Undergraduate Advising:

William Leahy

Program of Studies. The major is designed to make a unique contribution to the student's liberal education. The program provides students with the insights of scientific analysis and social perspective to deepen their understanding of the complex economic forces at work in society. Such an understanding is an essential ingredient in the development of an educated person. The program is also designed to prepare the student for a variety of options after graduation, including graduate programs and managerial programs in business and finance.

Requirements for the Economics Major

(i) Total Course Requirement

Students must complete the two-semester Principles of Economics sequence (10010/10011/20010/20011 and 10020/20020 or equivalent). Beyond the Principles courses, the major requires a minimum of eight (8) additional course (24 credits) in economics at the junior/senior level (numbered 3xxxx or 4xxxx).

(ii) Math Requirement

A course in Calculus (Math 10260 or equivalent) is a prerequisite for both of the intermediate theory courses. (See core requirement below). Simultaneous enrollment in Calculus II is permitted but not recommended.

Recommendation: It is strongly recommended that students, especially prospective economic majors, who have not had a course in Calculus I (Math 10250 or equivalent) enroll in the calculus course during their first year of study.

(iii) Core Requirement

Students must include the following four courses among their minimum of eight courses in economics beyond the Principles course.

30010 Intermediate Economic Theory Micro
30020 Intermediate Economic Theory Macro
30330 Statistics for Economists
30331 Econometrics

(iv) Advanced Course Requirement

Students must include a minimum of two courses (6 credits) at the senior level (numbered 4xxxx) that have either of the intermediate theory courses (30010, 30020) and/or Econometrics (30331) as a prerequisite.

(v) Writing-Intensive Requirement

In completing the minimum of 24 credits at the junior/senior 3xxxx/4xxxx level, the student must fulfill a writing-intensive requirement. This requirement can be satisfied in one of the following three ways: by taking a junior or senior 3xxxx/4xxxx-level economics seminar course; by taking a three credit special studies course consistent with the college's writing-intensive guidelines under the direction of an economic faculty member; or by writing a senior honors essay under the direction of an economic faculty member.

Departmental advisors will assist students in designing a program of study that meets their educational and career goals. Students are also encouraged to pursue related courses in other departments of the College of Arts and Letters, The Mendoza College of Business and the College of Science. Materials relating to professional work or graduate study in economics, law, business, public policy, foreign service are available from the director of undergraduate studies.

Undergraduate Economics Honors Program

Entry Gate.

To be eligible for admission to the Undergraduate Economic Honors Program, the student must:

(i) Complete Intermediate Economic Theory-Micro (Econ 30010), Intermediate Macro Theory (Econ 30020), and Econometrics (Econ 30331) with minimum grade point average in these courses of A- (3.667).

or

(ii) Have a minimum cumulative GPA of 3.4 and minimum GPA of A- (3.667) in Principles of Microeconomics (Econ 10010/10011/20010/20011), Principles of Macroeconomics (Econ 10020/20021) Intermediate Economic Theory-Micro (Econ 30010), Intermediate Macro Theory (Econ 30020), Statistics for Economists (30330), and Econometrics (Econ 30331).

To apply for admission, the student must complete an application form, available from the director of undergraduate studies in Economics, between the end of the sophomore year and the end of the junior

ENGLISH

year. The application will include: (1) a paragraph explaining why the student wishes to enroll in the honors program, and (2) a signature by a member of the economics faculty who endorse this student's application. The application will be returned to the director of undergraduate studies in Economics who will make recommendations for admission to the Undergraduate Studies Committee, which is responsible for the final decisions.

Enriching Experience.

The Undergraduate Economics Honors Program requires that the student complete an enriching experience. The following qualify as an enriching experience:

- (i) Completion with a grade B+ or higher of an "advanced methods" course, defined as a 4xxxx-level course in which students are required to apply methods of modern economic research. A list of these courses is available from the director of undergraduate studies.
- (ii) Completion with a grade of B or higher of a course in the core of the graduate program in economics.
- (iii) Completion of some substantive out of classroom activity directly related to the study of economics, such as presentation of the student's own original research at an external conference, an undergraduate research assistantship, an internship, or community service.

All of these activities need to be pre-approved. Students who want pre-approval for a specific activity should submit a written request with other supporting material to the director of undergraduate students in Economics who will notify applicants of the committee's decision.

Capstone experience.

The capstone experience represents the final requirement for the Undergraduate Economic Honors Program. This experience involves three elements:

- (i) Completion of a one-credit honors seminar (Econ 47961) in each semester of the senior year. The seminar not only provides instructional support for these students, but also requires each student to present progress reports to their peers at regular intervals. These seminar credits do not count as regular major (i.e., do not substitute for 3xxxx or 4xxxx-level elective economics courses) and are graded on a Satisfactory/Unsatisfactory basis. These seminars are open to juniors in the honors program who want advanced insight to what the honors essay entails.
- (II) Completion of a six credit senior honors essay (with a grade of B+ or higher). The essay is directed by an economics faculty member and represents a significant research effort. The writing of the essay is accomplished over the two semesters of the student's senior year with three credits awarded each semester (Econ 47960). These credits can be counted as economics electives toward the major and can be

used to satisfy the major's writing-intensive requirement. The results of the essay must be presented at the economics seminar open to the public during the end of the second semester of each academic year.

- (ii) Participation in all College of Arts and Letters events for departmental honors students.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc, within the [College of Arts and Letters](#) section after the [Economics](#) heading.

English

Teaching Scholar (Postdoctoral Fellow):

Joseph Teller

Program of Studies. The English major features small classes in which students read, analyze, and discuss literary works, studying issues of literacy and rhetoric, investigating the symbolic systems that shape cultural meaning, and exploring the broad range of human experience. Majors enjoy an atmosphere of immediate contact with the department's regular teaching and research faculty, who advise students on their course of study. English courses give close attention to student writing, and nearly every majors-level English course is writing-intensive.

English majors choose careers in any field valuing the ability to read, write, and analyze with intelligence and subtlety. Many of our majors find careers in

FILM, TELEVISION, AND THEATRE

law, business, education, publishing, journalism, and medicine, as well as myriad other fields. An increasing number of English majors go into service projects and programs such as Teach for America.

Requirements for the major up through the class of 2012. The major requires a minimum of 10 courses (30 credit hours) in addition to the literature course required of all students in the College of Arts and Letters. The major begins with the Introduction to Literary Studies (ENGL 30101), which is the prerequisite for all electives. Students are also required to take courses in three broad historical categories. In their senior year, students take a research seminar in which they complete an original and substantial research project; with the permission of the director of undergraduate studies and the instructor, they may take a graduate course in place of the research seminar. For the remaining five courses, students may choose from among a broad range of electives courses offered at the 30xxx level or above.

Requirements for the Class of 2013 and thereafter. The English major requires a minimum of 10 courses (30 credit hours) in addition to the literature course required of all students in the College of Arts and Letters. In completing the 10 courses, students must satisfy the following requirements:

Introduction to Literary Studies (ENGL 30101). This course, which introduces students to college-level study of literature, is a concurrent prerequisite for the major (i.e., students cannot take a major elective unless they have completed this course or are currently enrolled in it).

Research Seminar. In the research seminar (numbered ENGL 43xxx), students complete an original and substantial research project. With the approval of the director of undergraduate studies and the instructor, students may take a graduate course in place of the research seminar. The research seminar does not fulfill a distribution requirement.

Elective courses. Eight English courses at the 30xxx or above.

Distribution requirement. In selecting elective courses, students must fulfill the following distribution requirements:

History:

1 course in the period before 1500
1 course in the period 1500–1700
2 courses in the period 1700–1900
1 course after 1900

Culture:

1 course in British literature
1 course in American literature
1 course in a literature in English outside of Britain and the United States or in American ethnic minority literature

Genre:

1 course predominately concerned with poetry

2 courses predominantly concerned with a genre from the following list: fiction, drama or film, critical theory

A single course can fulfill the requirement in more than one distribution category, but it may not satisfy more than one category. For example, a survey of Renaissance literature might count for pre-1700 (history), British literature (culture), and drama (genre), but would not count for both poetry and drama (two genre categories).

Creative writing courses may satisfy the genre requirement, but no more than two may count toward the major.

The number of courses needed to satisfy the distribution requirement will vary, depending on the courses the student selects, but not all electives need fulfill a distribution requirement.

Research seminars do not fulfill the distribution requirement.

Honors Concentration. In the English Honors Concentration, select majors create programs tailored to their own particular interest. A faculty mentor guides each of these students through this intensive experience. The English Honors Concentration is particularly beneficial to students wishing to pursue graduate studies in English. The concentration experience is completed with the writing of an Honors Thesis, which can be both research and scholarly work or original creative writing.

Eligibility. At the end of their sophomore year, students are invited to apply to the Honors Concentration after being identified in one of two ways: achieving a GPA of at least 3.78 or higher in three or more English classes, or faculty nomination. Invited students declare their interest in the Honors Concentration by completing a Statement of Purpose, a 300-word statement describing what the student intends to focus on during the time in the Honors Concentration.

Requirements. The requirements for the Honors Concentration are slightly different from the prior listing of English major requirements. In addition to ENGL 30101 and the three literary history courses, a student takes two electives in his or her area of interest; the remaining three electives are taken in consultation with the faculty mentor. In the fall of senior year, the student enrolls in the Honors Colloquium; in the spring of senior year, the student enrolls in ENGL 52999, Honors Thesis to complete the writing of the thesis.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of English](#) heading.

Assistant Professional Specialist:

Karen Heisler (visiting)

Instructor:

Gary Sieber (adjunct)

The Department. The Department of Film, Television, and Theatre curriculum includes study of the arts of theatre and performance, film and video, and television. Our goal is to provide students with intellectual and intuitive resources for analysis and production of these performing and media arts. We seek both to encourage and inspire intellectual discipline and curiosity as well as to discover and nurture student creativity. We offer, therefore, both a scholarly and creative context for education of the general liberal arts student at Notre Dame as well as the individual seeking an intensive preparation for advanced study in these fields. In an interdisciplinary spirit of collaboration, students in this department investigate film, television, and theatre (and occasionally other media) as complex cultural phenomena to develop skills in analysis, evaluation, and theory formation as well as to engage in creative production.

Students graduating from this department have numerous postgraduate choices. Many of our graduates seek careers in law, medicine, business, education, public service, or other professions.

FILM, TELEVISION, AND THEATRE

Others will pursue careers in theatre, film, or television. However, we are not a professional training program. Rather, we seek to provide the creative and technological tools for student scholar/artists to build a basis for advanced study and professional careers in the arts should they so desire. It is our hope that those whose work and determination lead them to seek careers in these fields will be challenged and assisted by their liberal arts curriculum. Our courses provide tools to understand the analytical, technical and imaginative processes of the field, whether pursued as future work, study, or as an enhancement of intellectual life.

All 40xxx-level critical studies electives in film and television, and selected theatre electives, will fulfill the writing-intensive requirement.

Many FTT courses fulfill the University fine arts requirement.

For more information and up-to-date listings of courses and FTT events, visit the Web at ftt.nd.edu.

Program of Studies. Students interested in the major are encouraged to visit the departmental office (230 Marie P. DeBartolo Performing Arts Center) for information about the programs and department faculty. You also may visit our website at ftt.nd.edu.

Step-by-step instructions for becoming a major are available on our website. Students may elect to major in the department as either a first or second major in accordance with college guidelines.

Students concentrate in either film, television or in theatre. Ten courses are needed to complete the major. The film concentration requires one elective on an international subject and three courses at the 40000 level. The television concentration requires seven electives, three at the 40000 level. The theatre concentration requires six electives, one each from Groups A, B and C. The remaining electives may be from any Group.

The Department of Film, Television, and Theatre participates in several international programs by cross-listing courses and sponsoring internships. For more information, see the *Bulletin* descriptions for the international programs.

Several courses are offered in the summer session, including FTT 20102 and FTT 30405. See the *Summer Session Bulletin* for availability and further information.

FTT Honors Program

The FTT Honors Program runs two years, across junior and senior years. Majors with a GPA of 3.7 or higher, with a recommendation from faculty, will be invited to apply at the end of their sophomore year.

FILM CONCENTRATION

10 courses

4 required core courses:

Basics of Film and Television

History of Film I (fall only)

History of Film II (spring only)

Film and Television Theory

6 electives (3 at the 40000 level, including 1 international elective)

General Electives

Introduction to Film and Television Production

The Art and Science of Filmmaking

Film and Digital Culture

History of Documentary Film

Topics in Media Theory: Film and Popular Music

The Art and Science of Screenwriting

Media Internship

International Electives (30xxx and 40xxx Level)

Italian National Cinema

Comedy Italian Style

French Cinema

New Iranian Cinema

Irish Cinema and Culture

Australian Cinema

Hong Kong: Action Cinema

Upper-Level Electives

Shakespeare and Film

Intermediate Filmmaking

Advanced Filmmaking

Sex and Gender in Cinema

Walt Disney in Film and Culture

Contemporary Hollywood

Postmodern Narrative

Documentary Video Production

Sinatra

TELEVISION STUDIES CONCENTRATION

10 courses

3 required core courses:

Basics of Film and Television

History of Television

Film and Television Theory

7 electives (3 at the 40000 level)

Broadcast Journalism

History of Film I & II

Writing for Screen and Stage I and II

Introduction to Film and Television Production

Film and Digital Culture

Topics in Media Theory, History, and Research

Broadcasting and Cable

Sports Journalism

Entertainment and Arts Law

Media Ethics

Media and the Presidency

Media Stardom and Celebrity Culture

Advanced Filmmaking

Contemporary Hollywood

Media Culture

Media Internships

Special Studies

Issues in Film and Media

Walt Disney in Film and Culture

Sinatra

THEATRE CONCENTRATION

10 courses

4 required core courses:

Theatrical Production (spring only)

Theatre, History, and Society (spring only)

Script Analysis and Dramaturgy (fall only)

Performance Analysis (fall only)

Group A: Critical Studies

Performance Studies

Performance Art: History, Theory, and Practice

Shakespeare in Performance

Early English Theatre

Shakespeare and Film

History of Costume

Advanced Dramaturgy

The Hyphenated American

Dramatic Text, Production, and Social Concerns

Anglo-Irish Theatre 1700–1900

Theatre in the Age of Lincoln 1850–70

Latin American Theatre

Group B: Production

Stage Management

Scene Design

Lighting Design

Costume Design

CAD for the Stage

Makeup for the Stage

Advanced Scenic Painting

Group C: Acting/Directing

Acting Process

Writing for Stage and Screen I & II

Voice and Movement

Directing Process

Audition Seminar

Acting Shakespeare

Viewpoints for Actors and Directors

Other electives include:

Introduction to Theatre

Theatre Production Workshop

Entertainment and Arts Law

Theatre Internship

Practicum

Special Studies

Complementary Nature of Departmental Concentrations.

There is a strong creative and scholarly relationship in the mix of courses and activities of the department of which students should be aware. The concentrations offered by this department can provide many complementary areas of creative and technical study for students involved in film and television production, as well as overlapping historical, theoretical and critical concerns. Similarly, those concentrating in theatre are urged to avail themselves of the many opportunities for production experience and critical, cultural and theoretical studies offered by the theatre faculty.

Cocurricular Activities. The department encourages non-majors to elect courses, participate as audience in our extensive film and theatre series, and involve

themselves in film, television, and theatre production as a means of informing and complementing their liberal arts education at Notre Dame. Occasional guest artists and lecturers are also sponsored by the department. Information on all department-sponsored activities is available in the department office and on the department's website.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters section under the Department of Film, Television, and Theatre heading](#).

German and Russian Languages and Literatures

Chair:

Robert E. Norton

Rev. Edmund P. Joyce, C.S.C., Professor of German Language and Literature:

Mark W. Roche

Paul G. Kimball Professor of Arts and Letters:

Vittorio Hösle

Professors:

Vittorio Hösle; Randolph J. Klawiter (emeritus); Klaus Lanzinger (emeritus); Thomas G. Marullo; Robert E. Norton; Vera B. Profit; Mark W. Roche; Konrad Schaum (emeritus)

Associate Professors:

David W. Gasperetti; Alyssa W. Gillespie; Albert K. Wimmer

Assistant Professor:

Tobias Boes

Associate Professional Specialists:

Denise M. Della Rossa; Hannelore Weber

Assistant Professional Specialist:

Molly Peeney

Program of Studies. The study of German and Russian languages and literatures provides educational opportunities relevant to an increasingly interdependent world. The acquisition of foreign language skills in general is an important component of liberal education because it enhances students' powers of communication and serves to introduce them to enduring cultural achievements of other peoples. In this sense, the study of German and Russian widens students' intellectual horizons, stimulates the understanding of several significant cultural traditions and allows the examination of these traditions in a more sophisticated and cosmopolitan manner.

The goal of all levels of language courses are oral and reading competence and linguistic and stylistic mastery. Courses in advanced German or Russian language, literature, culture and civilization expose the student to a wealth of literary, cultural and humanistic traditions as well as facilitate a better understanding of the rich national cultures of the German- and Russian-speaking countries.

The Department. The Department of German and Russian Languages and Literatures offers instruction in German and Russian at all levels of competence, from beginning language courses at the 10xxx level to literature and civilization courses on the 30xxx and 40xxx levels.

THE GERMAN PROGRAM

Director of Undergraduate Studies:

Denise M. Della Rossa

Requirements: First Major, Supplementary Major, and Minor

First Major

1. Successful completion of 10 courses (30 credit hours) above the three-semester language requirement (i.e., beyond 20201).

2. Of these 10 courses, seven must be taught in German. Four of the upper-division courses must be taken at the home institution from departmental offerings, two at the 30xxx level, and two at the 40xxx level.

Supplementary Major

1. Successful completion of eight courses (24 credit hours) above the three-semester language requirement (i.e., beyond 20201).

2. Of these eight courses, six must be taught in German; three of the latter must be upper division courses taken at the home institution from departmental offerings, two at the 30xxx level, and one at the 40xxx level.

Minor

(1) Successful completion of 5 courses (15 credit hours) beginning with 20201. (2) Of these 5 courses, 4 must be taught in German, and must include a course from Cluster A and Cluster B.

Senior Thesis

German first majors who wish to graduate with honors may write a Senior Thesis. For those German majors who elect to write a thesis, several requirements must be met: (1) The student must have a GPA of 3.5 or higher in the major, (2) the thesis may be written in either German or English with a length of between 25–35 pages, including notes and references, and (3) in order to receive honors, the thesis must receive at least a grade of A–.

The student writing a thesis enrolls in GE 48499 both fall and spring semesters and receives 1.5 credits each semester for the course. These credits do not count toward the 30-credit-hour requirement for the first major. The thesis is graded by the advisor and a second reader from the department. The thesis is due the week after spring break.

SCHEMATIC ORGANIZATION OF THE GERMAN PROGRAM

•CLUSTER A (Conversation/Composition/Reading)

Prerequisite for this cluster is 20202 or the equivalent.

30102. ABCs of Speaking, Reading, and Writing about Literature

Offered in the fall semester in odd-numbered years.

30103. Advanced Conversation

Offered every spring semester.

30105. Stylistics and Composition

Offered in the fall semester in even-numbered years.

•CLUSTER B (Introduction to Culture and Literature)

Prerequisite for this cluster is at least one course from Cluster A.

30107. German Cultural History (Kulturgeschichte)

Offered every spring semester.

30108. Survey of German-language Literature (Literature von gestern und heute)

Offered every fall semester.

•CLUSTER C (30xxx-level Literature, Culture, Linguistics, and Professional German)

A variety of courses offered as dictated by student needs and faculty specialization.

•CLUSTER D (40xxx-level Literature, Culture, and Linguistics)

A variety of courses offered as dictated by student needs and faculty specialization.

Majors select at least one course each from clusters A and B (in that order) before taking courses from Cluster C and take at least one course from Cluster C before proceeding to courses from Cluster D. Courses from Cluster D are intended to serve as culminating (senior-year) courses. For first majors, at least four of these courses must be taken at the home campus; for supplementary majors, three courses must be taken at the home campus.

Study Abroad

A year of study abroad in Berlin, Germany, is an incomparable opportunity to improve language skills and strengthen cultural understanding. Majors and supplementary majors are therefore strongly encouraged to participate in this program during their junior year. For further information, see "International Study Programs" in the front section of this Bulletin. A summer semester program is offered in Vienna, Austria.

THE RUSSIAN PROGRAM

Director of Undergraduate Studies:

Molly Peeney

The Major in Russian

Majors in Russian must complete 10 courses (30 credit hours) beyond the three-semester language requirement, including at least five courses taught by departmental faculty. Courses to be taken in residence at Notre Dame will normally include Advanced Russian I and II and must include three courses on Russian literature and/or culture, two at the 30000 level and one at the 40000 level. With the permission of the director of undergraduate studies, one course on a Russian subject in another discipline, such as anthropology, history, or political science, may be counted toward the Russian major.

The Supplementary Major in Russian

Supplementary majors in Russian must complete eight courses (24 credit hours) beyond the three-semester language requirement, including at least four courses taught by departmental faculty. Courses to be taken in residence at Notre Dame will normally include Advanced Russian I and II and must include two courses on Russian literature and/or culture, one at the 30000 level and one at the 40000 level. With the permission of the director of undergraduate studies, one course on a Russian subject in another discipline, such as anthropology, history, or political science, may be counted toward the Russian supplementary major.

The Minor in Russian

The Russian minor consists of five courses (15 credits) at the 20000 level and above, including at least three courses taught by departmental faculty. Courses to be taken in residence at Notre Dame will normally include Advanced Russian I and II and must include one course on Russian literature and/or culture from departmental offerings at either the 30000 or the 40000 level. With the permission of the director of undergraduate studies, one course on a Russian subject in another discipline, such as anthropology, history, or political science, may be counted toward the Russian minor.

The Supplementary Major in Russian and East European Studies

Supplementary majors in Russian and East European Studies must have (1) three semesters (or the equivalent) of college-level Russian or another approved Central or East-European language (German will be accepted in certain cases); (2) five additional courses (15 credits) in Russian and East European area studies, normally taken in residence at Notre Dame and including at least two literature/culture courses at the 30000 level or above and two approved history courses; (3) three 1-credit courses chosen from language-across-the-curriculum tutorials, a Research Apprenticeship in political science on a Russian and East European Studies related research project (POLS 47905), and/or cultural enrichment offerings (RU 47100) in Russian and East European Studies; and EITHER (4) a substantial senior thesis directed

by a member of the Russian and East European Studies faculty (students will receive 3 credits in the fall semester for preparation of the thesis and 3 credits in the spring semester for writing the thesis) OR (5) a sixth 3-credit course in Russian and East European area studies in any discipline *and* a one-semester senior seminar with a focus on a Russian and East European Studies topic, culminating in a senior essay.

The Minor in Russian and East European Studies (Russian Majors' Track)

This minor option is available to students making good progress toward completion of a full or supplementary major in Russian. The minor requires (1) four courses (12 credits) in Russian and East European area studies, normally taken in residence at Notre Dame and including at least one Russian literature/culture course at the 30000 level or above and at least two approved history courses (language courses, including RU 40101/40102, will *not* satisfy this requirement); and (2) two 1-credit courses chosen from language-across-the-curriculum tutorials, a Research Apprenticeship in political science on a Russian and East European Studies related research project (POLS 47905), and/or cultural enrichment offerings (RU 47100) in Russian and East European Studies.

The Minor in Russian and East European Studies (History Majors' Track)

This minor option is available to students making good progress toward completion of a history major, including a Russian and East European Studies concentration consisting of at least three approved courses on topics in Russian or East/Central European history. The minor requires (1) two semesters of college-level Russian or another approved Central or East European language (German will be accepted in certain cases; language courses satisfying this requirement may *not* be double-counted between a college language requirement and the REES minor); (2) two courses (12 credits) in Russian and East European area studies, normally taken in residence at Notre Dame and consisting of two Russian literature/culture courses at the 30000 level or above, although one relevant course in another department, including history, may be substituted with approval; and (3) two 1-credit courses chosen from language-across-the-curriculum tutorials, a Research Apprenticeship in political science on a Russian and East European Studies related research project (POLS 47905), and/or cultural enrichment offerings (RU 47100) in Russian and East European Studies.

Study Abroad

Our students are encouraged to experience firsthand the excitement of being immersed in Russian culture through participation in a study program in Russia. Programs are available during the summer (five to ten weeks) or for an entire semester or academic year. Credits earned for course work taken in approved programs may be applied toward the Russian major or minor at Notre Dame. Grants are available on

HISTORY

a competitive basis for summer language study through the Center for the Study of Languages and Cultures and the Nanovic Institute for European Studies.

Senior Thesis/Honors Track

Russian majors are admitted into the honors track by application. To receive honors, a student must (1) complete all requirements for the major; (2) maintain a GPA of at least 3.5 in the major; (3) register for two 1-credit enrichment courses (RU47100) in the senior year; (4) register for two 40000-level literature courses in the senior year; and (5) receive a grade of A- or higher for a substantial honors thesis written in English. Closely supervised by one of the Russian faculty in the Department of German and Russian Languages and Literatures, the Russian honors thesis is to be the product of a three-credit honors track directed readings course taken in the senior year. The student will receive 3 credits in the fall semester for preparation of the thesis and 3 credits in the spring semester for writing the thesis. For more information, see germanandrussian.nd.edu.

Placement and Language Requirement

At the beginning of each semester, placement tests in German and Russian will be administered that will allow students either to test out of one or two semesters of the language requirement or enroll in a course commensurate with their language proficiency. The placement test is mandatory for students who had German or Russian in high school.

Students testing out of three semesters must complete an additional course at the 20xxx level or higher before testing out of the language requirement. This includes students who have taken an AP or SAT II exam.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the College of Arts and Letters section under the Department of German and Russian Languages and Literatures heading.

Program of Studies.

The Department of History offers courses for undergraduates designed to expose them to life in the past as it was experienced and understood in the Americas, Europe, Asia, Africa, and Australia. Courses offered consist of lectures and seminars that require students to develop both a critical appreciation of primary and secondary texts and skills in historical thinking and writing.

For students interested in pursuing a history major, the department offers a rigorous program consisting of ten 3-credit courses. The sequence begins with an exciting introductory seminar (HIST 33000—History Workshop), which plunges students into the work of writing history from the moment they join the major through intensive interpretation of primary source documents. To encourage breadth of historical knowledge, standard majors also take a variety of courses emphasizing different chronological periods and geographical areas. More specifically, they must take one course from four of six primary fields: Africa/Asia/Middle East; Ancient/Medieval Europe (to 1500); Modern Europe (from 1500); United States; Latin America; Special (for courses focusing on other geographical areas or courses primarily comparative or global in approach). In addition, to encourage depth in a particular field of interest, standard majors also declare a concentration consisting of three courses. (These concentrations must be approved by the major's advisor by the beginning of the senior year.) Standard majors also take an elective in any field they choose. To complete their course work, standard majors take a departmental seminar (HIST 43xxx), which offers the opportunity to conduct primary research and produce a substantial paper.

MATHEMATICS

Majors above may count up to two lower-level courses toward the major program (courses beginning with a 1 or a 2). All others must be “major-level” courses that begin with a 3 or higher. These lower-level courses may be counted toward breadth requirements, electives, or concentration area courses.

Majors must take at least one *writing-intensive course* in the form of the departmental seminar (HIST 43xxx). In addition to prioritizing research in primary sources, these courses also emphasize writing as a process, with students encouraged to perform continual revisions and share their writing with their peers.

History Honors Program. The History Department offers a special program of study, the History Honors Program, for the most talented and motivated history majors. Students are invited to apply in the fall semester of the junior year; the program begins in the spring of the junior year. A student in the History Honors Program will take 11 three-credit history courses to satisfy both the Honors Program and standard history major requirements. In addition to taking the introductory gateway course (HIST 33000, History Workshop) and a variety of courses emphasizing geographical and chronological breadth, the student will also take two special honors seminars. Instead of completing a departmental seminar, the student will research and write a yearlong senior thesis, receiving three credits in each semester of the senior year. Each history honors student will select an area of concentration tailored to his or her thesis topic and will take two additional courses in this field to complete the program.

In the spring of the junior year, the student will enroll in an Honors Program Methodology Seminar (HIST 53001), designed to introduce the student to the various methods historians utilize to analyze and write about the past. [Students admitted to the Honors Program, but studying abroad during the spring semester junior year, will be exempt from HIST 53001. They must, however, register a thesis topic and advisor with the director of Undergraduate Studies by the end of that semester.] In the fall of the senior year, the student will enroll in the Honors Program Historiography Colloquium (HIST 53002), intended to introduce the student to basic issues of critical interpretation and historiography through a specific field. In the fall and spring of the senior year, the student will work on a thesis (40 to 80 pages) under the supervision of a specific faculty member. The student will register for HIST 58003 (three senior thesis credits) each semester of the senior year.

Phi Theta Alpha. Students who have completed at least four major-level courses in history, earning a grade point average of 3.5 or above, and whose cumulative grade point average is at least 3.2, are eligible for the Notre Dame chapter of Phi Alpha Theta, a national history honor society. The History Department initiates new members once per year.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of History](#) heading.

Assistant Special Professional Faculty:

Annette Pilkington

Program of Studies. Students in the College of Arts and Letters may pursue a major in mathematics with a concentration in honors. (Note that this program should not be confused with the Arts and Letters/Science Honors program and that several concentrations, including Honors, are available with a major in mathematics in the College of Science.) The mathematics major in arts and letters aims to give the student a thorough liberal intellectual discipline and to furnish an adequate background for other fields of study. At the same time it prepares the student for graduate work in mathematics, and many of those who have taken the program have entered

MATHEMATICS

graduate schools in that field. Others have entered philosophy, medicine, law, economics and industrial management.

Students intending to follow this major in the College of Arts and Letters must declare their intention to the advisor indicated by the mathematics department and the dean of arts and letters at advance registration in the spring of their freshman year. Students must have completed or be completing satisfactory work in MATH 10850 and 10860. The program of their studies is subject in its entirety to approval by the advisor.

Students whose first major is in the College of Arts and Letters may also pursue a second major in mathematics. See "Mathematics as a Second Major" in the College of Science section of this Bulletin.

(At least six credits of mathematics electives must be at the 40xxx level.)

The Senior Thesis for Mathematics Majors

Students in the mathematics program have the option of writing a thesis on a subject in mathematics, or in an interdisciplinary area connected to mathematics. Such a thesis is strongly encouraged for math honors students and required of students in the SUMR program. This project is intended to give the student a better sense of how mathematics is done and used, and to develop in the student the habit of learning mathematics and its applications in an independent setting. In most cases, this work would be expected to be expository, but based on advanced-level readings. It should represent an effort that goes beyond what is found in an undergraduate course. It is especially desirable for a student to present a somewhat novel approach to an established subject, or to explore one of the many interesting connections that mathematics has with other disciplines.

During the second semester of the junior year and the first semester of the senior year, the student will work closely with a faculty advisor on a program of readings in preparation for the thesis, receiving 1 credit for each of these two semesters of work, under MATH 48800.

The thesis is to be crafted during the second semester of the senior year. The thesis must be submitted to the director of undergraduate studies by April 15 of the senior year. If the thesis is approved, the student will receive 1 credit under MATH 48900 and the citation of "Graduation with Senior Thesis" will appear on the transcript.

Students interested in writing a senior thesis should contact the director of undergraduate studies in the Department of Mathematics.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Mathematics](#) heading.

MEDIEVAL STUDIES

Medieval Studies

Robert M. Conway Director of the Medieval Institute:

Program of Studies. The Medieval Institute is one of Notre Dame's oldest and most renowned centers of learning. Established in 1946, it was envisaged from the start to be a premier locus for the study of the European Middle Ages. Over the decades its scope has broadened to where it now includes Islamic, Jewish, Eastern, and Western Christian studies. The academic strength and stature of the institute are due not only to its faculty, students, and library, but also to its ongoing commitment to the original liberal arts ideal.

Medieval Studies prepares students to enter graduate school, law school, medical school, or various careers such as business, government, education, publishing, ministry, curatorship, and research. With an emphasis on close reading, precise textual analysis, careful writing, and vigorous discussion, the program is designed to foster critical thinking, oral and written communication skills, and a heightened appreciation for history, religion, and culture.

Far from being the "dark ages," medieval civilization witnessed the dawn of many of today's institutions including universities, hospitals, legal and economic systems, religious communities and doctrine, architecture, engineering, science, art, and literature. Contemporary society is indebted to the Middle Ages not only for its inheritance, but also for its relevance.

The Medieval Studies program offers four undergraduate tracks, each based on an interdisciplinary model. It draws courses from Anthropology; Art, Art History, and Design; Classics; English; German and Russian Languages and Literatures; History; Music; Philosophy; Political Science; Romance Languages and Literatures; and Theology. From these 11 disciplines, students are encouraged to build a unique program of study, in consultation with a faculty advisor, around an area of concentration that captures an interest, prepares for a field, or contributes to an academic pursuit.

Students interested in Medieval Studies may elect one of the following four options:

1. Major in Medieval Studies
2. Honors Major in Medieval Studies
3. Supplementary Major in Medieval Studies
4. Minor in Medieval Studies

All three major tracks include two common components. Each student's curriculum is built around a concentration chosen by the individual (from the 11 participating departments), in conjunction with a faculty advisor. The concentration requires a minimum of four interrelated courses reflecting an intellectual and curricular coherence. An advanced seminar (3 credits) is the second common element in each of the major tracks. Students in the seminar are expected to read widely and discuss vigorously a set of sources that present a particular issue from several points of view. In addition, they are also expected to write a substantial research paper. The goal of the seminar is to engage students in thinking

critically and knowledgeably across the boundaries of traditional disciplines while maintaining a focus on a particular time, place, or issue.

The three major tracks and the minor track also have an introductory required course (3 credits), MI 20001, *The World of the Middle Ages*.

Following are brief outlines of the basic requirements for the three major tracks and the minor track. Further details can be obtained from the director of undergraduate studies in the Medieval Institute.

Medieval Studies Major (30 credits)

- The World of the Middle Ages course
- Four courses drawn from two or more departments representing a concentration
- Four electives in Medieval Studies drawn from at least two departments
- One advanced seminar (4xxx-level or above) in Medieval Studies

Medieval Studies Honors Major (36 credits)

- Same requirements as major in Medieval Studies (see above)
- EXCEPT one intermediate Latin course and one advanced Latin course are required in lieu of two medieval electives
- PLUS an honors thesis for 6 credits

Medieval Studies Supp. Major (24 credits)

- The World of the Middle Ages course
- Four courses drawn from two or more departments representing a concentration
- Two or three electives in Medieval Studies
- Medieval Studies seminar (on a space-available basis and in conjunction with MI electives option)

Medieval Studies Minor (15 credits)

- The World of the Middle Ages course
- Three or four electives in Medieval Studies drawn from at least two departments
- Medieval Studies seminar (on a space-available basis and in conjunction with MI electives option)

COURSE DESCRIPTIONS

The complete descriptions for courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Medieval Institute](#) heading.

Music

Music

Chair:

Louis MacKenzie

Michael P. Grace Chair in Medieval Studies:

Peter Jeffery

J.W. Van Gorkom Professor of Music:

Susan L. Youens

Professors:

Alexander Blachly; Calvin M. Bower (emeritus);
William Cerny (emeritus); Craig J. Cramer;
Kenneth W. Dye; Ethan T. Haimo; Georgine
Resick

Associate Professors:

John Blacklow; Karen L. Buranskas; Mary
E. Frandsen; Paul G. Johnson; Rev. Patrick
Maloney, C.S.C. (emeritus); Carolyn R.
Plummer; Peter H. Smith

Assistant Professor:

James S. Phillips (emeritus)

Artist in Residence in Piano:

Daniel Schlosberg

Visiting Assistant Professor:

Catherine Mayes

Professional Specialist

Mark Beudert

Associate Professional Specialists:

Lawrence H. Dwyer; Daniel C. Stowe

Assistant Professional Specialist

Stephen Lancaster

Adjunct Faculty:

John Apeitos; Darlene Catello; Darrel Tidaback

Band Staff:

Matthew Merten; Emmett O'Leary; Sam
Sanchez; Alison Thigpen

Program of Studies. The Department of Music offers students a variety of musical experiences in accordance with its two objectives: (1) to provide all students, regardless of their major, knowledge and training in music through introductory, historical and theoretical courses, through participation in large and small ensembles, and through applied instrumental or vocal study; and (2) to provide intensive curriculum and training for the student who chooses music as a major. Students majoring in music will choose a concentration in Theory and History or in Performance. Each concentration offers an honors option for students intending to pursue professional study in the field after graduation. These students should also continue to study at least one non-native language beyond the college's language requirement. All the concentrations have requirements beyond the course work. These may include recitals, ensembles, juries, and so forth.

Students considering these programs should contact the department as early as possible, preferably in the first year of study. This is especially important if study abroad is anticipated.

Advising. Each major will be assigned a faculty advisor who must be consulted in person to discuss the program of study before a student may register for classes.

Lessons. Music majors in the Performance concentration qualify for a 100 percent discount on weekly one-hour applied music lessons on their primary instrument and a 50 percent discount on a secondary instrument. Students in the Theory and History concentration qualify for a 50 percent discount on lessons on a primary instrument and no discount for lessons on a secondary instrument. Applied music lessons are also available for non-majors for a fee. Lessons may count as "activity" elective credits. (The College of Arts and Letters accepts up to three activity credits toward graduation.) The fee is charged to the students' accounts, and no refunds are made after the second lesson.

Interdisciplinary Minor in Liturgical Music. This 18-credit minor consists of three 3-credit courses in theology and two 3-credit courses in music, plus three credits of music lessons or approved ensembles, to be selected in consultation with the student's music advisor. Contact the director of undergraduate studies in the Department of Theology.

Master of Sacred Music degree. The M.S.M. degree is a graduate program administered jointly by Music and Theology. For information, contact the director of graduate studies in the Department of Theology.

HISTORY/THEORY

The requirements for a 33-credit major with a concentration in theory and history are:

Class	Credits
Harmony and Voice Leading (Theory I) (Prerequisite course; 3 credits count as University elective)	0
Advanced Harmony and Voice Leading (Theory II)	3
Chromatic Harmony (Theory III)	3
Twentieth-Century Music: Structure and Style (Theory/History IV)	3
Musicianship I-III	3
History I-III	9
Four 3-credit courses in history and theory, 30xxx level and above	12
Music Total	33
Collegiate/University Requirements and Electives	87
Total	120
Honors in Music (optional) (One additional 3-credit course in music history or theory, 30xxx-level or above, and a senior project, to be determined with advisor)	6

Students who have had previous music education may place out of Harmony and Voice Leading (Theory I) and Musicianship Labs, by examination.

Students with a music GPA of 3.7 or higher may be invited to participate in the honors program at the end of their sophomore year.

Applied lessons and ensembles are encouraged, but not required. Students intending to continue the study of music after graduation should maintain a rigorous program of lessons and applied music.

PERFORMANCE

Students who wish to major in performance must have had a minimum of four years of instruction on their instrument prior to their enrollment at Notre Dame.

The requirements for a 42-credit major with a concentration in performance are:

Class	Credits
Harmony and Voice Leading (Theory I) (Prerequisite course; 3 credits count as University elective)	0
Musicianship I (prerequisite course)	0
Advanced Harmony and Voice Leading (Theory II)	3
Chromatic Harmony (Theory III)	3
Twentieth-Century Music: Structure and Style (Theory/History IV)	3
History I-III	9
Two MUS 30xxx-level or above courses in music theory or history that carry 3 credits each	6
Three additional elective credits in music	3
Advanced Performance Studio (1 credit per semester for the first year; 2 credits for the six semesters thereafter)	14
1 recital	1
Total Music	42
Collegiate/University Requirements and Electives	78
Total	120
Honors in Music (optional) (Additional electives at the 30xxx-level or higher and/or applied music study (5 credits total) and an additional recital (1 credit).)	6

Students with a music GPA of 3.7 or higher may be invited to participate in the honors program at the end of their sophomore year.

In order to remain in the performance program, students must be approved by faculty. In the spring semester of the freshman, sophomore, and junior years, all performance majors must participate in juries. Afterwards, the faculty will assess the level of their performance to determine if they are qualified to continue in the program. Students who demonstrate a high level of achievement in the sophomore juries will be candidates for the honors program.

Students in the performance concentrate may take proficiency exams to pass out of one or more of the musicianship courses; however, if they do not pass the proficiencies, they must enroll in Musicianship I-III.

PHILOSOPHY

Performance concentrators must present a senior recital. (Honors majors must present an additional recital.)

Voice majors who are enrolled in colleges other than Arts and Letters must fulfill the Arts and Letters language requirement: three semesters in one language or the equivalent.

Participation in ensembles (e.g., chamber music class, large ensembles, chorale, opera, etc.) is required each semester. (No credit toward the major, but may be applied toward graduation as “activity” credits.)

Students who have had previous music education may place out of Harmony and Voice Leading (Theory I), by examination.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Music](#) heading.

Philosophy

Chair:

Richard Cross

F.J. and H.M. O'Neill Professor of Science, Technology and Values:

Kristin Shrader-Frechette

Rev. Theodore M. Hesburgh Professor Emeritus of Arts and Letters:

Rev. David Burrell, C.S.C. (emeritus)

McMahon/Hank Professor of Philosophy:

Karl Ameriks; Michael Detlefsen

Notre Dame Professor of Philosophy:

Gary Gutting

Rev. John A. O'Brien Professor of Philosophy:

Robert Audi; Richard Cross; Alvin Plantinga (emeritus)

John Cardinal O'Hara Professor Emeritus of Philosophy:

Rev. Ernan McMullin (emeritus)

John Cardinal O'Hara Professor of Philosophy:

Peter Van Inwagen

George N. Shuster Professor Emeritus of Philosophy:

Michael J. Loux (emeritus)

Rev. John A. O'Brien Senior Research Professor (Emeritus):

Alasdair C. MacIntyre (emeritus)

John and Jean Oesterle Professor of Thomistic Studies:

Alfred Freddoso

Professors:

Fred Dallmayr (emeritus); Marian A. David; Cornelius F. Delaney; Michael R. DePaul; Stephen Dumont; John Finnis (concurrent); Thomas P. Flint; Stephen Gersh (concurrent); Vittorio Hösle (concurrent); Don A. Howard; Rev. John I. Jenkins, C.S.C.; Lynn Joy; Edward Manier (emeritus); Robert Norton (concurrent); Michael Rea; Mark Roche (concurrent); Kenneth Sayre; James P. Sterba; Ted A. Warfield; Stephen H. Watson; Paul J. Weithman

Associate Professors:

Timothy Bays; Patricia Blanchette; Katherine Brading; Sheilah Brennan (emerita); Sean Kelsey; Janet A. Kourany; Vaughn R. McKim (emeritus); G. Felicitus Munzel (concurrent); John O'Callaghan; David O'Connor; Gretchen Reydams-Schils (concurrent); Fred Rush; David Solomon; Jeffrey Speaks; Leopold Stubenberg

Assistant Professors:

Curtis Franks; Anja Jauernig; Joseph Karbowski; Samuel Newlands; Grant Ramsey

Professional Specialists:

Montey G. Holloway; Alven Neiman

Program of Studies. There are two ways to major in philosophy: **Regular philosophy majors** are required to take eight courses in philosophy beyond the general two-course University requirement. Three specific courses must be included among the eight: a two-semester sequence of courses in the history of philosophy, Ancient and Medieval Philosophy (PHIL 30301) and Modern Philosophy (PHIL 30302), and a course in formal logic (PHIL 30313 or, for qualified students, PHIL 43907. The logic

requirement can also be fulfilled by MATH 10130, though this course does not count toward the eight courses required for the major). In addition, regular majors must take at least two courses at the 40xxx level and three electives at either the 30xxx level or 40xxx level.

Honors philosophy majors complete all the requirements for the regular major and in addition write a senior thesis. Students writing the senior thesis enroll in PHIL 48499 Senior Thesis in both semesters of the senior year (the equivalent of two regular 3-hour seminars). To be eligible for the honors major, and thus for the senior thesis, students must normally maintain a GPA of 3.5 or above in the majors courses. Students considering the senior thesis are strongly encouraged to have completed two of the three core courses (the two history surveys and logic) AND three 40000-level seminars by the end of the junior year.

Students majoring in other departments may take a minor in philosophy by completing the following in addition to the two-course University requirement in Philosophy. The sequence in the history of PHIL 30301 Ancient and Medieval Philosophy and 30302 Modern Philosophy; one course at the 30000 level or 40000 level; one course at the 40000 level.

All 40xxx-level philosophy courses are writing-intensive requiring at least 20 pages of written work that may take various forms: reflections on readings, class presentations, or shorter or longer research papers. Students planning to go on to graduate studies in philosophy or related disciplines typically write a senior thesis as well.

PHILOSOPHY AND THEOLOGY JOINT MAJOR

Director:

David Fagerberg, Theology

Faculty:

Additional faculty for the joint major are drawn from the departments of philosophy and theology.

Program of Studies. The joint major is intended for undergraduates who are intrigued by philosophical and theological ideas and who have an equal commitment to both disciplines. It seeks to equip such students to handle theology and philosophy adeptly. The major is structured, providing undergraduates with a suitable introduction to the study of both disciplines, but also flexible, granting students considerable scope for the pursuit of their own interests.

The joint major offers the opportunity for an informed investigation of religious and philosophical ideas and should appeal especially to those who intend to pursue graduate work in philosophy or theology.

The joint major incorporates the University requirements in the two departments and most of the formal requirements of the first majors in theology

POLITICAL SCIENCE

and philosophy. Students in the joint major will take the two-semester sequence in Christian Traditions and an upper-level course in Scripture. The joint major, however, does not require the one-credit proseminar in theology.

Other formal requirements are peculiar to the joint major. Students will study a classical language for two semesters. (For practical as well as pedagogical reasons, this will normally be Greek.) Majors will also be expected to take the joint seminar offered each spring. Each seminar, led by a theologian and a philosopher, will examine an issue in which the differing approaches of philosophy and theology may prove fruitful. The topic and instructors will change from year to year. Finally, each major will submit a senior thesis prepared under the direction of two advisors, drawn from each department. At the option of the directors, this thesis may be presented and discussed in an informal colloquium consisting of the other students in the joint major.

The remaining courses in the joint major will be at the discretion of the student. Normally taken at the 40xxx level, there should be an equal distribution in the electives between theology and philosophy. However, students who wish may devote up to six hours within the joint major to additional language work. These hours may add to the classical language previously studied, or used to begin another language of significance for philosophical and theological work.

The joint major differs from a first major in one discipline and a supplementary major in the other in that the latter requires 55 credit hours, whereas the joint major requires 60. Furthermore, the joint major calls for language instruction beyond what the University requires for all undergraduates. Finally, the joint seminars should prove especially challenging, inviting students to explore important topics in an interdisciplinary way. These features should make the joint major particularly attractive to students preparing for advanced study.

Requirements in Philosophy:

PHIL 10101 or 20201, and 20xxx-level course (University-required courses; a higher-level course may be substituted for the latter).

PHIL 30301 and 30302. History of Philosophy I and II.

PHIL 30313. Formal Logic.

Requirements in Theology:

THEO 10001 or 13183 or 2001 or 2002, and 20xxx-level course (University-required courses).

THEO 40201 and 40202. Christian Traditions I and II.

THEO 40101 or 40108. Upper-division scripture course.

Plus:

Classical language (normally Greek)—two semesters.

Joint seminar(s).

Senior thesis.

18 credit hours of electives (up to six of these may be additional hours in language study).

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Philosophy](#) heading.

Political Science

Chair:

Michael Desch

Director of Graduate Studies:

Christina Wolbrecht

Director of Undergraduate Studies:

Joshua B. Kaplan

Helen Conley Professor of Political Science:

Scott Mainwaring

Packey J. Dee Professor Emeritus of Political Science

Fred R. Dallmayr

Packey J. Dee Professor of Political Science

Rodney Hero (on leave 2010–11)

Packey J. Dee Professor of Political Science

Dana Villa

Nancy Reeves Dreux Professor of Political Science:

Catherine H. Zuckert

Nancy Reeves Dreux Professor of Political Science:

Michael P. Zuckert (on leave 2010–11)

Helen Kellogg Emeritus Professor of International Studies:

Guillermo O'Donnell

John Cardinal O'Hara, C.S.C. Associate Professor of Political Science:

David E. Campbell

President's Distinguished Professor of Political Science:

Dianne Pinderhughes

Joseph and Elizabeth Robbie Emeritus Professor of Political Science:

Donald P. Kommers

William M. Scholl Professor of International Affairs:

A. James McAdams

The Rev. Theodore M. Hesburgh, C.S.C., Professor of Peace Studies:

George A. Lopez

Professors:

Peri E. Arnold; Sotirios A. Barber; George A. Brinkley (emeritus); Michael Coppedge; Fred R. Dallmayr (emeritus); Christian Davenport; Darren Davis; Michael Desch; Alan K. Dowty (emeritus); Amitava Dutt; Michael J. Francis (emeritus); Edward A. Goerner (emeritus); Vittorio G. Hösle (concurrent); Robert Johansen (on leave spring 2011); David C. Leege (emeritus); Gilbert D. Loescher (emeritus); Peter R. Moody Jr.; Walter Nicgorski (concurrent); Benjamin Radcliff; L. John Roos (on leave spring 2011); Rev. Timothy R. Scully, C.S.C.; A. Peter Walshe (emeritus)

Associate Professors:

Ruth Abbey; Andrew C. Gould; John D. Griffin; Frances Hagopian (on leave 2010–11); Debra Javeline (on leave spring 2011); Mary Keys; Geoffrey Layman; Daniel A. Lindley III; Daniel Philpott; Emad Shahin; Christina Wolbrecht

Assistant Professors:

Rev. Robert Dowd, C.S.C. (on leave fall 2010); Alexandra Guisinger; Victoria Hui; Theodore B. Ivanus (emeritus); Rev. Sean McGraw, C.S.C.; Monika Nalepa; David Nickerson; Sebastian Rosato; Naunihal Singh (on leave 2010–11); Ernesto Verdeja

POLITICAL SCIENCE

Associate Professional Specialists:

Carolina Arroyo; Joshua B. Kaplan; Rev.

William Lies, C.S.C. (concurrent); Luc Reydam

Assistant Professional Specialists:

Matthew Doppke (concurrent)

Program of Studies. The political science major combines breadth and depth, helping students develop a general foundation for the study of politics and offering opportunities to explore particular areas of interest. Courses give students both a strong knowledge base and facility with the tools of political analysis. The department offers a substantial number of courses in all four fields of the discipline—American politics, international relations, comparative politics, and political theory—covering a range of topics and analytical perspectives. The major can prepare students for a wide variety of vocations. After graduation, many students go to law school or graduate school, or work for service organizations, government, or business.

Requirements. The major requires a minimum of 10 courses:

- four breadth requirements, consisting of a course in each of the four fields of political science: American politics, international relations, comparative politics, and political theory. Two of these must be introductory courses. The other two can be introductory courses or intermediate-level courses.
- four intermediate-level courses: students may specialize in one field or take courses in a combination of fields that suits their interests.
- two seminars.

DEPARTMENTAL HONORS IN POLITICAL SCIENCE

Effective with the class of 2010, the Department of Political Science has introduced a new honors track. The new honors track does not involve additional courses, but is designed to encourage students to make better use of their courses both within and outside the major.

To graduate with departmental honors, students will:

- take a cluster of four recommended enrichment courses in consultation with their advisors, including:
 - a dedicated methodology course such as Research Design, Quantitative Methods, or How to Do Political Research;
 - two enrichment courses taken outside the major that supplement the student's interests and prepare them for advanced study. (The default courses are Principles of Microeconomics and Principles of Macroeconomics); and
 - either a graduate course in political science, language proficiency beyond level 3, or another course chosen in conjunction with the student's advisor. This course should be directly related to the student's senior thesis.

- complete a senior thesis with a grade of B+ or higher
- graduate with a cumulative grade point average of 3.55 or higher. This number is subject to change from year to year.

For example, students primarily interested in American politics or international relations might take (1) How to Do Political Research, Research Design, or Quantitative Methods; (2) Principles of Microeconomics; (3) Principles of Macroeconomics; and (4) a graduate political science course or an upper-level history course.

Students interested in comparative politics might take (1) How to Do Political Research, Research Design, or Quantitative Methods; (2) Principles of Microeconomics; (3) Principles of Macroeconomics, a graduate course in political science or an upper-level history, sociology, or anthropology course related to their area of interest; and (4) language proficiency above level 3, or a second language.

Students interested in political theory might take (1) How to Do Political Research, Research Design; (2) a graduate course in political theory; (3) language proficiency above level 3 or a second language; and (4) an upper-level philosophy or literature course related to their area of interest.

The key to doing the new honors track is meeting with a department advisor each semester to discuss a more careful selection of courses within the major and a better use of electives outside the major that will both complement and supplement your political science courses. The selection of recommended course will depend in part on the students' own interests and career goals, so it is important for the students to discuss these with their advisor.

Students interested in the new honors track should meet with a department advisor.

Senior Thesis. Students with a grade point average of 3.5 or above are encouraged to write a senior thesis. This two-semester project involves working closely with a faculty supervisor, and offers the opportunity to explore more deeply and independently a research project of the student's choice.

Pi Sigma Alpha. Students who have taken a minimum of four political science courses, with a grade no lower than a B in their political science courses, and who are on the Dean's List are eligible to join Notre Dame's chapter of Pi Sigma Alpha, the national honor society for political science majors.

WRITING SEMINARS

Two writing intensive seminars are required for the political science major. The seminars give students the opportunity to work in a seminar setting, to explore a topic more deeply, and to gain experience writing in their field. Topics vary from semester to semester.

JUNIOR SEMINARS**POLS 43001. Junior Writing Seminar**

The department offers political science majors the opportunity to take a writing seminar in their junior year, including some writing seminars exclusively for juniors. Recent topics have included:

Civil Liberties and Civil Rights

How do courts decide cases involving civil liberties and civil rights? What rationales support the different interpretations of constitutional rights? How has the doctrine of incorporation affected our understanding of constitutional rights? Why is the concept of neutrality so important in current jurisprudence? How do courts balance formal assumptions and attention to particular situations? The purpose of this seminar is to help answer these and other basic questions about the law and politics of constitutional rights, including freedom of expression, due process, and equal protection.

The Presidency and War

Do presidents legitimately possess war power? A political scientist from Mars, observing presidents since 1945 might conclude that there is a presidential war power. But does the Constitution vest in the president the power to decide on war? Through readings, discussion, and research papers, the seminar will examine controversies and claims over presidents' decisions to initiate war, and their implications for constitutional checks and balances, for presidential effects on institutions and policies, and, finally, for presidential leadership in other contexts, such as domestic crises.

European Politics

In this course on European politics, we will examine the literature on three major issues: regional

integration, origins of modern political authority, and industrial political economy. We will seek to understand the origin, current functioning, and possible futures for key European institutions, including the EU, nation-states, social provision, unions, and political parties. Readings on the European Union, monetary politics, Germany, France, and Spain will be drawn from both scholarly sources and contemporary analyses of political events.

POLS 53001. Senior Writing Seminar

(3-0-3)

Specific topics and titles vary. Recent offerings have included:

Religion and the Constitution

The seminar centers on constitutional cases and other materials relating to the role of religion in American life and society. Students will be asked to write short papers and report on selected constitutional cases related to the First Amendment's religion clauses. These cases and reports will constitute the seminar's main focus. The emphasis is on dialogue and discussion, underscoring the critical importance of the fine art of conversation. Students who have taken American Constitutional Law are especially invited to take the seminar.

Causes of War

Why do groups of people systematically kill other groups of people? War is perverse, tragic, and compelling. War's causes must be studied to prevent it when possible and to prepare for it when necessary. This course examines the causes of interstate and intrastate/ethnic war. The central theme and question of the course is assessing the extent to which wars are caused by accidents, misperceptions, and miscalculations. If misperceptions and miscalculations are prime drivers of war, then many policy prescriptions seem to offer the hope of reducing the frequency of war. On the other hand, if the cause of war is more often deliberately aggressive states, groups, and leaders, then must we place our hopes in deterrence alone? We will see as we examine a number of case studies including WWI, WWII, Vietnam, the Gulf War, Rwanda, the former Yugoslavia, and those you research for your papers. We may also cover terrorism, Iraq, Korea, and India-Pakistan, depending on how things unfold.

U.S. Strategy

This course explores the key issues of national security policy that the United States is likely to grapple with in the next decade. We will examine core U.S. interests, threats to these interests, and policies for minimizing the danger posed by these threats. Topics include the war on terrorism; prospects for peace and conflict in Europe, the Middle East, and Asia and the U.S. role in maintaining stability in those regions; sources of and policies for dealing with ethnic and civil conflicts; roles and requirements for U.S. conventional forces; U.S. nuclear strategy and force requirements; national missile defense; and the dangers posed by the proliferation of weapons of mass destruction and policies for dealing with

these dangers. The course will provide background on the challenges the United States faced during the previous century and the policies it pursued to meet them; and will assess fundamental revisions that are required in the 21st century. While primarily concerned with contemporary strategy questions, the course will explore theoretical issues that provide the foundation for U.S. security policy.

Current Issues of Globalization

From McDonalds to the International Space Station to deforestation in Brazil, almost any topical issue can be tied into the globalization debate. Students in this class will first explore theoretically the definition of globalization in its political, economic, and social forms. As a counterpoint to current interpretation of globalization and its effects, a number of readings will cover arguably a greater period of international integration—the late 19th century. The latter part of the course will return to more current globalization issues—in particular issues of state sovereignty, the IMF and World Bank, the WTO, immigration, and the environment.

Political Philosophy and the American Founders

This seminar will explore the relations between developments in political philosophy in the 17th and 18th centuries and the thought and deeds of the American founders., hree founders of central importance will be considered: Thomas Jefferson, James Madison, and Alexander Hamilton. They will be treated in connection with the philosophies of Locke, the Scottish moral sense school, Montesquieu, and Hume.

PROGRAM OF LIBERAL STUDIES

Program of Liberal Studies

Chair:

Gretchen Reydams-Schils

Rev. John J. Cavanaugh, C.S.C., Professors of Humanities:

Stephen M. Fallon; Michael J. Crowe (emeritus);

Professors:

Kent Emery Jr.; Stephen M. Fallon; Walter J. Niegorski; F. Clark Power; Gretchen Reydams-Schils; Phillip R. Sloan (emeritus); Henry M. Weinfield

Associate Professors:

Robert Goulding; Julia Marvin; G. Felicitas Munzel; Thomas Stapleford

Assistant Professors:

Krista Duttenhaver; Bernd Goehring; Kevin Mongrain; Candida Moss; Pierpaolo Polzonetti

Program of Studies. The Program of Liberal Studies, Notre Dame's Great Books Program, offers an integrated three-year sequence of studies leading to the bachelor of arts degree. Students enter the Program at the end of the First Year of Studies.

Fundamental to the Program is a conception of a liberal arts education that aims to avoid the separation of the humanities into isolated disciplines. The Program seeks to provide a unified undergraduate education in all of the liberal arts, including music and the natural sciences. For this reason, the Program is not to be equated with a "general humanities" educational Program. The study of literature, philosophy, natural and social science, theology, history, and the fine arts will take place within a larger unifying conception of the liberal arts that cuts across many of the disciplinary boundaries suggested by these terms. Because the goal of the Program is to provide more than an introduction to various subject matters, none of the tutorials or seminars stands alone in the Program. The curriculum grows organically over the three years, with each course presuming all of its predecessors.

Although the Program provides education in the liberal arts, it also considers the liberal arts in themselves as insufficient for a complete education. The liberal arts are the critical tools of learning, but they are also to be related to the larger search for genuine understanding and philosophic wisdom. Philosophy, which explores the basic questions of epistemology, ethics, and politics, is also related to the claims of the Christian tradition. The Program maintains specific tutorials in the various disciplines to enable the relationships among them to develop systematically and also to foster a concern with what unifies or transcends them.

The normal method of instruction in the Program is through the reading and discussion of primary texts. The student is asked to take an active role in the learning process. Particularly in the seminar, the

authors of the great books are considered to be the primary teachers.

The Program requires writing throughout the curriculum, especially in the tutorial classes. In the final year, all students are required to write a senior thesis, usually involving extensive research, under the direction of a faculty advisor. The senior thesis offers students a particularly intensive writing experience and an opportunity to investigate in depth a specialized topic of interest.

Despite the Program's 68-credit curriculum, Program students may carry second majors, supplementary majors, minors, and concentrations, and they may participate in international study Programs.

Students normally declare a PLS major by the beginning of April of the first year. Declaration of major forms are available by early March in the department office (215 O'Shaughnessy) and website (pls.nd.edu). Students interested in entering the Program are urged to complete the University science and mathematics requirements in the first year. Students may join the Program after the beginning of the sophomore year, although this requires one to make up one or more courses.

SEQUENCE OF COURSES

Sophomore Year

PSYCHOLOGY

Psychology

Chair:

Daniel Lapsley

Director of Graduate Studies:

Thomas V. Merluzzi

Director of Undergraduate Studies:

Anré Venter

Andrew J. McKenna Professor of Psychology:

John G. Borkowski

Matthew A. Fitzsimons Professor of Psychology:

Scott E. Maxwell

Notre Dame Chair in Psychology:

E. Mark Cummings

Warren Foundation Professor of Psychology:

Scott M. Monroe

Professors:

Cindy S. Bergeman; John G. Borkowski; Julia M. Braungart-Rieker; Thomas Burish; Laura Carlson; Lee Anna Clark; E. Mark Cummings; Jeanne D. Day; George S. Howard; Anita E. Kelly; Daniel K. Lapsley; Scott E. Maxwell; Thomas W. Merluzzi; Scott M. Monroe; Donald B. Pope-Davis; G.A. Radvansky; David Watson; Thomas L. Whitman; Ke-Hai Yuan

Associate Professors:

Charles R. Crowell; Kathleen Eberhard; Bradley S. Gibson; Dawn M. Gondoli; Gittaa Lubke; Darcia Fe Narvaez; David A. Smith; Julianne C. Turner

Assistant Professors:

Ying (Alison) Cheng; Alexandra F. Corning; Gerry Haeffel; Nicole McNeil; Irene Kim Park; Lijuan (Peggy) Wang; Guangjian Zhang; Zhiyong (Johnny) Zhang

Professional Specialists:

Anré Venter; Mike Villano

Program of Studies. Psychology is the scientific study of the behavior of organisms with a primary focus on human behavior. It is concerned with the biological and environmental determinants of behavior as reflected in the study of physiological, sensory, perceptual, cognitive, motivational, learning, developmental, aging, and social processes. The undergraduate program seeks a balance between exposure to basic psychological principles and theories and their extension to the applied areas such as child education, counseling, mental retardation, and behavioral deviancy.

The undergraduate courses are intended to meet the needs of students who plan to (1) major in psychology and later attend graduate school in psychology or affiliated fields, (2) major in psychology as part of a general cultural program, (3) obtain training in psychology as a special supplement to their major interest or (4) use psychology to satisfy social science requirements or electives.

One of the department's main features is an emphasis on opportunities for close faculty-student involvement in research projects at the undergraduate level. The research specialties in which majors may

become involved range from basic research in such areas as psychophysics, human and animal learning, child development, aging, and psycholinguistics, to applied research in a community setting. Students planning to do graduate work in psychology will plan their program in close coordination with their faculty advisors.

Undergraduate major. The psychology major requires a minimum of seven three-credit courses, two four-credit courses (30100 and 30160) and one one-credit course (20010), and, therefore, a minimum of 30 credit hours.

The specific requirements comprising the minimum 30 credit hours are as follows. All majors are required to take three credits of PSY 10000, Introductory Psychology (for freshmen), or PSY 20000 or 20001, Introductory Psychology (for upper-class students) as a prerequisite for the content psychology courses. In addition, all psychology majors are required to take PSY 30100, Experimental Psychology I: Statistics (four credits), and PSY 30160, Experimental Psychology II: Research Methods (four credits). Majors then have a choice in that they are required to complete two of the following six courses in the Social and Developmental Processes (CLASS A): PSY 30200, Developmental Psychology; PSY 30600, Social Psychology; PSY 30300, Personality; PSY 30314, Introduction to Clinical Psychology; and PSY 30310, Abnormal Psychology; and PSY 30340, Cross-Cultural Psychology. Similarly, majors are required to complete two of the following seven courses in the Biological and Learning Processes (CLASS B): PSY 30500, Physiological Psychology; PSY 30501, Introduction to Biopsychology; PSY 30655, Cognitive Development; PSY 30430, Learning and Memory; PSY 30440, Sensation and Perception; PSY 30400, Cognitive Psychology; and PSY 30510, Behavioral Genetics. In their senior year each major must take two content courses at the 40xxx level, which are small, in-depth discussion-oriented seminars generally in the instructor's specific area of expertise. All 40xxx-level seminars are designated writing-intensive courses, satisfying the College of Arts and Letters writing requirement. (See the introductory portion of the Arts and Letters section.) PSY 47900, Research Lab, cannot be used to satisfy the 40xxx-level major requirement. Finally, in the semester following their declaration of a major in psychology, new majors are expected to participate in a one-credit-hour seminar called PSY 20010, Psychology: Science, Practice, Policy, which provides an introduction to the department and the faculty.

Note: PSY 37900 or PSY 47900, Research Lab cannot be used to satisfy any of the 30xxx-level or 40xxx-level courses. However, these credits are strongly recommended for any students intent on pursuing a graduate career in psychology. In addition, even though Introductory Psychology (PSY 10000, PSY 20000, or PSY 20001) is a prerequisite for the content area courses, it does not fulfill any of the 30-credit-hour requirements for the major.

COURSE DESCRIPTIONS

Romance Languages and Literatures

Chair:

Theodore J. Cachey Jr.

Director of Graduate Studies:

Alain Toumayan

Assistant Chair and Director of Undergraduate Studies:

Shauna Williams

Professors:

José Anadón; Maureen Boulton; Theodore J. Cachey Jr.; JoAnn DellaNeva; Bernard Doering (emeritus); Julia V. Douthwaite; Kristine Ibsen; Carlos Jerez Farrán; Dayle Seidenspinner-Núñez (Associate Dean, Arts and Letters); Alain Toumayan; John P. Welle

Associate Professors:

Thomas Anderson; Ben Heller; Encarnacion Juárez-Almendros; Louis MacKenzie; Christian R. Moevs; María Rosa Olivera Williams; Catherine Perry

Assistant Professors:

Vittoria Bosco (emerita); Sabrina Ferri; Isabel Ferreira Gould; Vittorio Montemaggi; Marisel Moreno; Alison Rice; Juan Vitulli

Associate Professional Specialists and Concurrent

Lecturers:

Geraldine Ameriks; María Coloma; Marie-Christine Escoda-Risto; Janet Fisher-McPeak; Giovanna Lenzi-Sandusky; Patrick I. Martin; Paul McDowell; Patrick Vivirito; Shauna Williams

Assistant Professional Specialists and Concurrent

Lecturers:

Virginie Askildson; Alessia Blad; Elena Mangione-Lora; Ivis Menes; Odette Menyard; Rachel Parroquin; Chiara Sbordoni; Sandra Teixeira; Andrea Topash Ríos

Program of Studies. The Romance languages derive from Vulgar Latin spoken throughout the Roman Empire. A major course of study is offered in French, Italian, and Spanish. Minors are offered in French, Italian, and Portuguese. The study of foreign languages, literatures, and cultures provides educational opportunities relevant to an increasingly interdependent world. A crucial component of a liberal education, the acquisition of foreign-language skills enhances our powers of communication and serves to introduce us to the enduring cultural achievements of other peoples. Moreover, the study of a foreign language broadens our mental horizons, encourages us to think and act more globally, and stimulates our understanding of the traditions of other nations. Elementary and intermediate courses develop the students' ability to understand, speak, read, and write a foreign language with facility and confidence.

Upper-division courses present a wealth of literary, historical, and cultural traditions and emphasize the nature and development of national cultures. Many courses focus on the literature and culture of certain

historical periods. Others trace the development of literary genres or examine a theme across periods and genres. And still others inculcate the critical and analytical skills necessary for an informed interpretation of foreign language texts. Participation in Notre Dame's international study programs in Brazil, Chile, France, Italy, Mexico, and Spain (see the International Study Programs section of this Bulletin) is highly recommended although not required to pursue a major in Romance languages and literatures. Majors and supplementary majors in French, Italian, and Spanish must complete 50 percent of their credit hours in the major in residency at Notre Dame and meet the following program requirements. For current information visit the department website: <http://romancelanguages.nd.edu/>.

PROGRAM IN FRENCH AND FRANCOPHONE STUDIES

The Major in French and Francophone Studies

The requirements for a major in French and Francophone Studies consist of successful completion of 30 credit hours or 10 courses above ROFR 20201. Of these 10 courses, no more than three may be at the 20xxx level (20202 and above), six must be in literature/culture studies, and at least half must be taken in residence at Notre Dame. Required among these 10 courses are ROFR 30310 (Textual Analysis), ROFR 30710 and ROFR 30720 (French Literary Surveys I and II), at least two courses at the 40xxx level, and the Senior Seminar (ROFR 53000). ROFR 30310 (Analyze This!) is the recommended prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this Bulletin for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credit may not be applied to the major.

The Supplementary Major in French and Francophone Studies

The requirements for a supplementary major in French and Francophone Studies consist of successful completion of 24 credit hours or eight courses above ROFR 20201. Of these eight courses, no more than three may be at the 20xxx level (20202 and above), six must be in literature/culture studies, and at least half must be taken in residence at Notre Dame. Required among these eight courses are ROFR 30310 (Analyze This!), ROFR 30710 and ROFR 30720 (French Literary Surveys I and II), and at least two courses at the 40xxx level or above, one

of which may be the Senior Seminar (ROFR 53000). ROFR 30310 (Analyze This!) is the recommended prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this Bulletin for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credit may not be applied to the major.

The Minor in French and Francophone Studies

The requirements for a minor in French and Francophone Studies consists of successful completion of 15 credit hours or five courses, taught in French, above ROFR 20215. Of these five courses, no more than two may be at the 20xxx level (20300 and above). Required among these five courses are: ROFR 30710 or ROFR 30720 (Survey of French Literature I or II) and one 40xxx-level course in literature or culture from a period not covered by the survey taken (i.e., ROFR 30710 and one 40xxx-level course covering a period after the 17th century, or ROFR 30720 and one 40xxx-level course covering a period before the 18th century). This 40xxx-level course and at least one other course must be taken in residence at Notre Dame. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the requirement of ROFR 30710 or ROFR 30720 (see the Angers pages in this Bulletin for a description of those courses and their equivalencies at Notre Dame). ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credit may not be applied to the minor.

The Honors Track in French

The honors track major consists of 33 credits or 11 courses. In addition to the general requirements for the major, honors track students must complete an 11th course at the graduate level with a grade of A- or higher, in which they will write a substantive research paper, normally in French, which constitutes the honors thesis. By invitation only, highly motivated students may consider the option of taking a semester-long directed reading tutorial as the 11th course, completing an honors thesis under faculty direction.

French majors are admitted to the honors track by invitation, although qualified students may petition for admission in the second semester of their junior

ROMANCE LANGUAGES AND LITERATURES

year. To be eligible for the honors track, students must be first majors with a minimum GPA of 3.8 in French and have completed at least seven courses toward the major by the end of their junior year. They must also receive the written support of a professor in at least one of the required literature courses (ROFR 30310, ROFR 30710, or ROFR 30720). For full consideration, students should contact the assistant chair of the Department of Romance Languages and Literatures no later than March 15 of their junior year; applications from eligible seniors will be accepted through October 1. In order to graduate with honors, students admitted to the honors track should maintain a minimum GPA of 3.7 in French.

Combined B.A./M.A. Program in French

The Department of Romance Languages and Literatures offers its majors in French the opportunity to participate in its graduate program through a combination B.A./M.A. degree in French. This program requires students to take 30 credit hours during the normal four-year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, take the qualifying exam given to all first-year graduate students, and apply to the Graduate School for admission during the Spring semester. B.A./M.A. students are eligible for a teaching fellowship during their fifth year that includes a tuition waiver and a generous teaching stipend. Well qualified students who are interested in this program should contact the director of Graduate Studies and/or the graduate coordinator in French at the beginning of their junior year.

PROGRAM IN ITALIAN LITERATURE AND CULTURE

The undergraduate program in Italian offers a major, a supplementary major, and an honors track major in each of two possible concentrations: (1) Italian literature and culture; (2) Italian Studies. In addition, the program also offers (3) a minor in Italian, and (4) a combined B.A./M.A. in Italian.

(1) *Literature and Culture Concentration*

The Major in Italian: Literature and Culture Concentration

The major in Italian with a concentration in literature and culture requires 30 credits or 10 courses at the 20000 level or above, including no more than two 20000-level courses (ROIT 20215 counts as two courses for the major), ROIT 30711 (Medieval-Renaissance Italian Literature and Culture), ROIT 30721 (Modern Italian Literature and Culture), ROIT 53000 (Italian Seminar), and a minimum of five elective ROIT courses in Italian literature or culture at the 30000 or 40000 level or above. ROIT 30310 (Passage to Italy) is recommended for all majors. A maximum of two of these elective ROIT

courses may be conducted in English or with texts in translation, or may be substituted by courses on Italian subjects originating in other disciplines or departments (for example, architecture, art history, music, or history). Equivalent Italian language, literature, or culture courses from foreign study programs or other universities may be substituted for any of the courses by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Supplementary Major in Italian: Literature and Culture Concentration

Supplementary majors in Italian with a concentration in literature and culture are expected to demonstrate competency in the language and to complete 24 credits or eight courses at the 20xxx level or above, including no more than two 20xxx-level courses (ROIT 20215 counts as two courses for the supplementary major), ROIT 30711 (Medieval-Renaissance Italian Literature and Culture), ROIT 30721 (Modern Italian Literature and Culture), ROIT 53000 (Italian Seminar), and a minimum of three elective ROIT courses in Italian literature or culture at the 30xxx or 40xxx level or above. ROIT 30310 (Passage to Italy) is recommended for all supplementary majors. A maximum of two of these elective ROIT courses may be conducted in English or with texts in translation, or may be substituted by courses on Italian subjects originating in other disciplines or departments (for example, architecture, art history, music, or history). Equivalent Italian language, literature, or culture courses from foreign study programs or other universities may be substituted for any of the courses by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Honors Track Major in Italian: Literature and Culture Concentration

The honors track major in Italian with a concentration in literature and culture consists of 33 credits or 11 courses, including all the requirements for the major, a GPA in the major of at least 3.7, plus a substantial final essay, to be written in Italian for a graduate course or for ROIT 58000, Honors Thesis Direction, which will constitute the 11th course. Majors are admitted to the honors track by invitation, but qualified students may petition their adviser for admission in the second semester of their junior year. No students will be accepted to the honors track after October 1 of their senior year.

(2) *Italian Studies Concentration*

The Major in Italian: Italian Studies Concentration

The major in Italian with a concentration in Italian Studies requires 30 credits or 10 courses at the 20000 level or above, to be chosen as follows: Five courses must be ROIT courses in Italian language, literature, and culture and taught in Italian, including at least one of ROIT 30711 (Medieval-Renaissance Italian

Literature and Culture) or ROIT 30721 (Modern Italian Literature and Culture), and one course at the 40000 level or above; ROIT 41590 (Italian Theatre Workshop) does not count toward this major. No more than two of these five courses may be at the 20000 level (ROIT 20215 counts as two courses for the major). The other five courses must be on Italian subjects or strictly relevant to Italian culture, but together they must be listed in at least one and no more than three disciplines or departments other than ROIT, such as LLRO, history, art history, classics, FTT, music, or political science (the courses may of course be listed under ROIT). Four of these five courses must be at the 30000 level or above, and include at least one course at the 40000 level or above; no more than one of the five may be at the 20000 level. In order to create a coherent program when selecting these courses, the student will form a committee of one or more faculty advisers, including at least one from ROIT, and must declare the major not later than their junior year. Equivalent courses from foreign study programs or other universities may be substituted by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Supplementary Major in Italian: Italian Studies Concentration

The supplementary major in Italian with a concentration in Italian Studies requires 24 credits or eight courses at the 20000 level or above, to be chosen as follows: Four courses must be ROIT courses in Italian language, literature, and culture and taught in Italian, including no more than two courses at the 20000 level; ROIT 41590, Italian Theatre Workshop, does not count toward this supplementary major. The other four courses must be on Italian subjects or strictly relevant to Italian culture, but must be listed in at least one discipline or department other than ROIT, such as LLRO, history, art history, classics, FTT, music, or political science (the courses may of course be listed under ROIT). Three of these four courses must be at the 30000 level or above; no more than one may be at the 20000 level. In order to create a coherent program when selecting these courses, the student will form a committee of one or more faculty advisers, including at least one from ROIT, not later than the first semester of their senior year. Equivalent courses from foreign study programs or other universities may be substituted by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Honors Track Major in Italian: Italian Studies Concentration

The honors track major with a concentration in Italian Studies consists of 33 credits or 11 courses, including all the requirements for the major in Italian with a concentration in Italian Studies, a GPA in the major of at least 3.7, plus a substantial final essay, to be written for a graduate course or for ROIT 58000, Honors Thesis Direction, which will constitute the 11th course. The course or topic

ROMANCE LANGUAGES AND LITERATURES

will be selected in consultation with the student's advisory committee for the major. Majors are admitted to the honors track by invitation, but qualified students may petition their adviser for admission in the second semester of their junior year. No students will be accepted to the honors track after October 1 of their senior year.

(3) *The Minor in Italian*

The minor in Italian comprises 15 credits or five courses at the 20000 level or above, including at least three courses at the 30000 or 40000 level. Three of the five courses must be ROIT courses in Italian language, literature, and culture, and taught in Italian; the fourth and fifth courses may be on Italian literature and culture taught in English or with texts in translation, or may be courses on Italian subjects originating in other disciplines or departments (for example, LLRO, art history, architecture, or history). Courses from foreign study programs or other universities may be substituted by permission, but at least two courses for the Italian minor must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

(4) *The Combined B.A./M.A. Program in Italian (Literature and Culture Concentration)*

The Department of Romance Languages and Literatures offers its majors in Italian with a concentration in literature and culture the opportunity to participate in its graduate program through a combination B.A./M.A. degree in Italian. This accelerated program requires students to take 30 credit hours at the 20000 level or above during the normal four year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, the qualifying oral exam given to all first-year graduate students, and apply to the Graduate School for admission during the spring semester. B.A./M.A. students are eligible for a teaching fellowship during their fifth year that includes a tuition waiver and a generous teaching stipend. Students should have a strong academic record and substantial progress toward their Italian major completed by the second semester of their junior year. It is imperative that students interested in this program contact the director of Graduate Studies and/or the graduate coordinator in Italian at during their junior year, before registering for the first semester of their senior year.

PROGRAM IN IBERIAN AND LATIN AMERICAN STUDIES

All majors in Spanish are required to take a core sequence consisting of ROSP 30310 (Textual Analysis) and one course in each of the following areas of Spanish and Spanish American Literature: Early Peninsular, Modern Peninsular, Early Spanish

American and Modern Spanish American. AP credit may not be applied toward the major.

The Major in Spanish

The major in Spanish requires 30 credits or 10 courses 20202 and above, including the required core sequence described above or equivalents, two senior-level courses, and the Senior Seminar. Equivalent courses from international study programs or other universities may be substituted with departmental approval. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

The Supplementary Major in Spanish

Supplementary majors in Spanish are required to complete 24 hours or eight courses 20202 and above, including the required core sequence described above or equivalents and one senior-level course. Equivalent courses from international study programs or other universities may be substituted with departmental approval. Fifty percent of the credits for the supplementary major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

Minor in Portuguese

The minor in Portuguese and Brazilian Studies consists of 15 credits, five courses, 3 credits each. Prerequisites are ROPO 10101 and 10102, or 10103 and 10104, or 10105 and 10106. Requirements include five courses in Portuguese language and Luso-Brazilian literature beyond the prerequisites, ROPO 20201 and 20202, and three additional courses at the 30xxx/40xxx level. Three of the five courses must be in Portuguese language and/or Luso-Brazilian literature, film, and culture taught in Portuguese; the fourth and fifth courses may be on Luso-Brazilian literature, film, and culture taught in English; and the fourth and fifth courses may be on a Portuguese or Brazilian subject in another discipline (for example, anthropology, history, Latin American Studies, FTT, political science, Romance languages and literatures, theology, etc.). Courses from foreign study programs or other universities may be substituted by permission, but at least three courses for the Portuguese minor must be taken in residence at Notre Dame. AP credit may not be applied toward the minor.

Interdisciplinary Minors

Spanish majors are encouraged to pursue allied courses offered through area studies and other interdisciplinary minors. Spanish courses offer a particularly appropriate complement to the Latin American Studies, Latino Studies, and European Studies programs. See the section on Interdisciplinary Minors in this Bulletin for more details. Majors may also apply one senior-level ROPO course in Luso-Brazilian culture and literature toward their elective credits.

The Honors Track in Spanish

The honors track major consists of 33 credits or 11 courses. In addition to the general requirements for

the major, honors track students must complete an 11th course at the graduate level with a grade of A- or higher, in which they will write a substantive research paper that constitutes the honors thesis. By invitation only, highly motivated students may consider the option of taking a semester-long directed reading tutorial as the 11th course, completing an honors thesis under faculty direction.

Spanish majors are admitted to the honors track by invitation, although qualified students may petition for admission in the second semester of their junior year. To be eligible for the honors track, students must be first majors with a minimum GPA of 3.7 and at least seven courses toward the major. For full consideration, students should contact the coordinator of undergraduate studies no later than March 15 of their junior year; applications from eligible seniors will be accepted through October 1.

The Combined B.A./M.A. Program in Spanish

The Department of Romance Languages and Literatures offers its majors in Spanish the opportunity to participate in its graduate program through a combination B.A./M.A. degree in Spanish. This accelerated program requires students to take 30 credit hours 20202 and above during the normal four-year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, the qualifying oral exam given to all first-year graduate students, and apply to the Graduate School for admission during the spring semester. During their fifth year, B.A./M.A. students are eligible for a teaching fellowship, which includes a tuition waiver and a generous teaching stipend. Students should have a strong academic record and should have made substantial progress toward their Spanish major by the second semester of their junior year. It is imperative that students interested in this program contact the director of Graduate Studies and/or the graduate coordinator in Spanish at the beginning of their junior year.

MAJOR IN ROMANCE LANGUAGES AND LITERATURES

The undergraduate major in Romance Languages and Literatures is designed for qualified students who wish to major in two programs (French, Italian, or Spanish). Cross-cultural in focus, the major recognizes the importance of studying the correspondences and differences among various Romance literatures and cultures and of reexamining traditional disciplinary boundaries. The requirements for a major in Romance languages and literatures include competency in two languages and successful completion of 36 credit hours or 12 courses, which must be distributed equally between the two respective language programs as follows:

SOCIOLOGY

(1) Two survey courses in each language and literature program (French or Italian); Spanish requires either four survey courses (two in peninsular and two in Latin American) or a combination of two survey courses in one area and two senior-level courses in the other area;

(2) Textual Analysis in one program;

(3) Two 40xxx-level courses in each program (if the survey requirement in Spanish is fulfilled with two senior-level courses, these courses may count for the senior-level requirement in Spanish);

(4) One senior seminar in one program;

(5) Two elective courses in the department (any exception requires permission).

Placement in Language Courses

For French and Spanish, there is an online placement exam for students who have not already demonstrated language proficiency through national standardized testing, such as the AP or Achievement tests. Students with previous experience are required to take one of these tests before enrolling in their first course in those languages. For Italian or Portuguese placement, please contact the department. The normal prerequisite for a 30xxx-level course is at least one 20xxx-level course or permission of the instructor. The normal prerequisite for a 40xxx-level course is at least one 30xxx-level course or permission of the instructor.

Policy Regarding Romance Language Placement Examination

The placement examination is designed to place each student at an appropriate level within a language sequence. Obtain placement examination information from the Department of Romance Languages and Literatures.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Romance Languages and Literatures](#) heading.

Program of Studies. The Department of Sociology has a national reputation and its scope of interest is worldwide. Yet it also is intensely concerned with the U.S. cultural and social experience and its problems.

The requirements for a sociology major reflect a program that offers both structure and flexibility. The program is designed to acquaint the student with the core of the discipline and with areas of specialization which can be studied in some depth.

Sociology deals with human interaction on the group level wherever it may occur: in family and business, law and politics, medicine and religion, and a host of other settings. What can you do with a sociology degree? Notre Dame's survey of alumni who majored in sociology revealed that they are employed as university professors, corporation executives, real estate agents, insurance agents, consultants, politicians, medical administrators, teachers, social workers, business managers, religious ministers, and many other occupations, including lawyers and physicians.

The requirements for the sociology major are as follows.

(a) Students must take a minimum of 31 credit hours (usually 10 courses and the proseminar which is one credit) offered by the department. Students are urged to start their major as early as possible but can declare a major or change majors at any time as long as they are able to fulfill the requirements.

(b) Central to the requirements for the major are the following four courses:

SOC 30900. Foundations of Sociological Theory
SOC 30902. Methods of Sociological Research
SOC 30903. Statistics for Sociological Research
SOC 33090. Proseminar (1 credit)

The above required courses should be taken as soon as possible, especially before taking any 4xxxx-level courses.

(c) Each major must take a minimum of three 4xxxx-level lecture, seminar or research courses. Internships (SOC 45000) and Directed Readings in Sociology (SOC 46000) do not fulfill this requirement.

(d) Each major must also acquire at least 12 credits of sociology elective courses, usually consisting of four 3-credit courses. These courses may be at any level, 10xxx-4xxxx.

The department prides itself on its program of close personal advising, in which each major can build a program of courses with the help of a faculty advisor and undergraduate director. Advisors willingly give much time to aid students in planning their course schedules and careers. Each major is assigned to a faculty advisor whose own academic interests dovetail with those of the student. Each student, working closely with a faculty advisor, can map out a personalized program of study that will satisfy the department's requirements for the major and simultaneously accommodate the student's academic interests and career aspirations.

The sociology major can be pursued along with another major. Many of our students combine sociology with a major in business, economics, political science, preprofessional studies, psychology, theology, etc. It is important to note that students in the Mendoza College of Business who wish to major in sociology in addition to their business major do not have to meet all the other requirements of the College of Arts and Letters.

Of particular interest to students in recent years have been the Gender Studies Program; the program of the International Institute for Peace Studies; the Computer Applications Program; the Hesburgh Program in Public Service; and Education, Schooling, and Society. All of the above are readily combined with a sociology major.

The department has an active Epsilon Chapter of Alpha Kappa Delta, the international sociology

SOCIOLOGY

honor society. Students interested in the various phases of the program are encouraged to contact the director of undergraduate studies (Room 823 Flanner Hall) at any time.

The department also encourages students to join the University of Notre Dame Sociology Club. The purpose of this club is to enrich the sociology major. This student organization sponsors activities oriented to careers in sociology and sociology-oriented topics, to becoming professionally active while in college, and to student interests in society, as well as to purely social activities.

Sociology Undergraduate Honors Track. The Sociology Department offers an honors track to students who excel in their sociological studies. Students must have taken at least one introductory course in sociology and be recommended by a faculty member. Interested students may also initiate the process by contacting the director of undergraduate studies. Identified students will receive a letter of invitation from the director of undergraduate studies to participate in the program. In addition to the usual requirements of the sociology major, students in the honors track are required to take at least one graduate-level course in sociology once they have completed the required 30xxx-level courses. When appropriate, a student may be given permission to take the graduate-level statistics sequence rather than beginning with the undergraduate statistics course (SOC 30903). In their senior year, students in the sociology honors track are required to enroll in the Senior Thesis Capstone Project (SOC 48009) for at least one semester and, under faculty mentors, carry out independent research projects. Students will complete a senior thesis based on this research and submit their manuscripts to *Sociological Voices* or another journal for publication. Participants are also encouraged to attend at least one regional sociology conference during their junior or senior year. Continuation in the program is subject to periodic review.

Writing in Sociology. The College of Arts and Letters is proud of the level of writing its undergraduates achieve. One way in which the college supports students' writing development is by requiring each department to offer at least one writing-intensive course. SOC 30900, Foundations of Sociological Theory, is the Sociology Department's writing-intensive course. There, students reflect on the quality of their own and others' writing and learn to articulate a sociological perspective in writing. Instructors in this course may spend more time doing textual analyses, going over students' writing, holding in-class writing workshops, and giving opportunities to do re-writes than in other courses. The department's 43xxx-level courses also demand high-level writing within a sociological perspective. In addition, students may opt to develop their research and writing skills by enrolling in the department's Capstone Project, where they carry out independent research and write a senior thesis. Also, any sociology major may submit a

paper to *Sociological Voices*. *Sociological Voices* is a student-managed journal dedicated to publishing sociological research by undergraduate students at Notre Dame. It serves as a forum where undergraduates can publish and receive recognition for scholarly accomplishments.

Course Listings by Area of Research Focus. The following is a list of courses offered by the Sociology Department, organized by research focus. Students are encouraged (but not required) to choose at least one area of concentration in the major in order to deepen their knowledge of that area. Students are also encouraged to pursue research opportunities within their area of concentration.

GENERAL INTRODUCTIONS TO SOCIOLOGY

10002. Understanding Societies
10033. Introduction to Social Problems
10722. Introduction to Social Psychology

REQUIRED COURSES FOR SOCIOLOGY MAJORS

30900. Foundations of Sociological Theory
30902. Methods of Sociological Research
30903. Statistics for Sociological Research
33090. Sociology Proseminar

INDIVIDUAL WORK WITH FACULTY/ SUPERVISOR

45000. Sociology Internship
46000. Directed Readings in Sociology
48000. Directed Research in Sociology
48001. Community-Based Research
48009. Senior Thesis Capstone Project

CLASS, GENDER, RACE, ETHNICITY

20810. Gender Roles and Violence in Society
20838. Social Inequality
30806. Race and Ethnicity
30846. Today's Gender Roles
43839. Unequal America
43849. Sociology of Masculinity

CRIMINOLOGY, DEVIANCE, and SOCIAL CONTROL

20732. Introduction to Criminology
20740. Sociology of Terrorism
30743. Sociology of Deviance
40701. Sociology of Law
40702. Law and Society
40743. Deviant Behavior
43730. Crime and Deviance in Ideological Perspective
43732. Controversies and Crises in Modern Criminology
43752. Theoretical Criminology

CULTURE

20100. Introduction to Cultural Sociology
20720. Social Psychology
30109. Sociology of Culture
30151. Popular Culture
40001. Time and Society
43113. Cultural Sociology
43171. Materializations of America

DEMOGRAPHY

43402. Population Dynamics

ECONOMICS, POLITICAL

20501. Globalization and Social Movements
20502. Today's Organizations

20533. Responding to World Crisis
30514. Social Movements
30567. Chile in Comparative Perspective
43517. Conflict Resolution: Theory and Practice
43524. Employment in a Changing Economy
43553. Building Democratic Institutions
43558. Comparing European Societies
43563. Nationalism and Globalization
43564. Global Sociology
43590. Sociology of Economic Life
48501. Analysis of Collective Contention I
48502. Advanced Analysis of Collective Contention II

EDUCATION

20228. Social Inequality and American Education
20260. Religion and Schooling in American Society
30237. Sociology of Teaching
43240. Research on School Effects

FAMILY

20342. Marriage and Family
43342. Family Development
43345. World Families and Gender
43377. Families and Their Interrelations with Gender

LATINO STUDIES

20479. Introduction to Latinos in American Society
43162. The Aesthetics of Latino Cultural Expression
43404. International Migration: Mexico and the United States
43473. Latinos in American Society
43479. International Migration and Human Rights

RELIGION

30672. Religion and Social Life
30675. Religion, Modernity, Secularization, Religious Persistence
43600. Religion and Classical Social Theory
43662. Religion and American Society
43691. Religion and Social Activism

SOCIAL PSYCHOLOGY

10722. Introduction to Social Psychology
20722. Introduction to Social Psychology
33001. Society, Self, and Catholic Social Tradition
43719. Self, Society, and the Environment
43774. Society and Identity

THEORY/METHODOLOGY

30910. Environmental Sociology
43901. Power and Identity in Modern Society
43904. Workshop: Professional Writing and Publishing
43948. Sociology of the Body
45900. Special Practicum in Journal Publishing
48002. Doing Sociology: Quantitative Senior Research Practicum
48701. Research on Moral Decision Making

SUMMER ONLY

30019. Sociology of Sport
43102. Sociology of Celebrity

THEOLOGY

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Sociology](#) heading.

Graduate Courses. Senior majors may take any 60000-level graduate course with the permission of the instructor and the Director of Undergraduate Studies. Honors track students are required to do so.

Assistant Professional Specialists:

Kristin Colberg; Michael Heintz, C.S.C.

**THE THEOLOGY PROGRAM
UNIVERSITY OF NOTRE DAME**

At the University of Notre Dame, the study of theology is carried out in the spirit of the classic formulation of theology as "Faith seeking understanding." The Theology Department dedicates itself to critical reflection on the historic faith of Catholic Christianity in service to our students, to the larger church, to the world of the academy, and for the general public.

Why major in theology?

Some students study theology to prepare for a career in high school teaching or religious ministry. Others plan to proceed to graduate work in theology or religious studies in anticipation of a university career. Most students, however, major in theology simply because they find the study fascinating and rewarding. As an inherently interdisciplinary field, theology is an ideal liberal arts major. Through close study of influential theological and religious texts, rituals, and artifacts, students learn about their own faith and our common culture.

Many other students elect theology as a secondary major whose focus on the central questions of human existence complements and extends their commitment to their first major in science, engineering, business, architecture, or in another discipline within the College of Arts and Letters. Professional schools increasingly appreciate how such diverse and balanced preparation enhances a candidate's profile.

The Department of Theology welcomes students pursuing these varied interests and goals. Students work with faculty mentors who are renowned leaders both in teaching and research, and have the opportunity to explore a wide range of subjects, including the history of Christian thought and practice, scripture, spirituality, systematic theology, liturgy, ethics, Judaism and the eastern religions. The smaller class size of most upper-division courses

THEOLOGY

creates a conducive environment for the creative exploration of ideas.

What are the requirements for the theology major?

Beyond the six theology credits required of every Notre Dame student, primary majors take 25 hours; supplementary majors take 19 hours. Each of these majors combines formally required courses and electives. To count in the major, a course must be 3 credits and graded. The two University requirements (6 credits) are generally prerequisite for upper-level courses, but see department for specific details.

The formally required courses for the primary and supplementary major are identical, and total 10 credit hours: the two-semester sequence in the history of Christian thought; an upper-division scripture course; and the one-credit hour proseminar offered each spring, which introduces students to the variety of topics and approaches covered in the study of theology. All courses in the theology major, primary or supplementary, must be 3-credit courses and graded (with the exception of the proseminar).

SUMMARY OF THE PRIMARY MAJOR:

First University requirement: THEO 10001 (first-year) or 20001 (sophomore, junior, senior) or 13183 (University seminar) or 20002 (honors).

Second University requirement: a THEO course listed between 20101 and 29999.

THEO 40201 and 40202—Christian Traditions I and II

THEO 40101 or 40108—Hebrew Scriptures or New Testament

Electives (15 hours at the upper level)

THEO 43001—Proseminar (1 credit)

Including the University requirements, the primary major thus consists of 31 credit hours.

SUMMARY OF THE SUPPLEMENTARY MAJOR:

First University requirement: THEO 10001 (first-year) or 20001 (sophomore, junior, senior) or 13183 (University seminar) or 20002 (honors).

Second University requirement: a THEO course listed between 20101 and 29999.

THEO 40201 and 40202—Christian Traditions I and II

THEO 40101 or 40108—Hebrew Scriptures or New Testament

Electives (9 hours at the upper level)

THEO 43001—Proseminar (1 credit)

Including the University requirements, the supplementary major thus consists of 25 credit hours.

What other programs are offered?

The Theology Honors Program

The Theology Department offers a special program for particularly gifted undergraduate majors who seek a deeper, more sustained experience in the major through the completion of a thesis project. Each spring semester, the junior class of theology majors will be invited to apply; those selected will be assigned a thesis director from among the faculty of the department. A minimum grade point average of 3.7 within the major is normally expected. Seniors in the Honors Program will enroll in a one-credit Honors Colloquium as well as a one-credit honors research course in the fall semester, and a three-credit Honors Thesis Writing course in the spring semester, culminating in the submission of a 50-page thesis. The Honors Program will normally consist of 36 hours, as compared to 31 hours in the regular primary major. To receive the honors designation on their transcript, students must earn an A- or higher grade on their thesis. A full description of the Theology Honors Program is available on the departmental website (see below for address).

The Minor in Theology

The minor is recognized by the University on the student's transcript. To fulfill requirements for a minor, a student must take 12 credit hours beyond the required 6 hours (for a total of 18 hours). The additional 12 hours must be composed of 3-credit graded courses, which can be taken at the 20xxx, 30xxx, or 40xxx level. The minor in theology is accepted by many parochial schools as adequate preparation for secondary school teaching.

Contact information

You may reach the director of undergraduate studies in Theology, through Dorothy Anderson at the departmental office:

University of Notre Dame
Notre Dame, IN 46556-5601

WRITING-INTENSIVE REQUIREMENT

THEO 40101 Hebrew Scriptures and 40108 New Testament have been designated writing-intensive courses by the Department of Theology. All majors are required to take one of these courses in fulfillment both of their upper-level scripture requirement within the major and of the College of Arts and Letters' writing-intensive requirement. Students will be expected to work closely with the professor throughout the semester on a significant written project, although specific writing assignments will be designed by the faculty member teaching the course.

PHILOSOPHY AND THEOLOGY JOINT MAJOR

Director:

Director of Undergraduate Studies, Theology

Faculty:

Additional faculty for the joint major are drawn from the Departments of Philosophy and Theology.

Program of Studies. The joint major is intended for undergraduates who are intrigued by philosophical and theological ideas and who have an equal commitment to both disciplines. It seeks to equip such students to handle theology and philosophy adeptly. The major is structured, providing undergraduates with a suitable introduction to the study of both disciplines, but also flexible, granting students considerable scope for the pursuit of their own interests.

The joint major offers the opportunity for an informed investigation of religious and philosophical ideas and should appeal especially to those who intend to pursue graduate work in philosophy or theology.

The joint major incorporates the University requirements in the two departments and most of the formal requirements of the first majors in theology and philosophy. Students in the joint major will take the two-semester sequence in Christian Traditions and an upper-level course in Scripture. The joint major, however, does not require the one-credit proseminar in theology.

Other formal requirements are peculiar to the joint major. Students will study a classical language for two semesters. (For practical as well as pedagogical reasons, this will normally be Greek or Latin.) Majors will also be expected to take the joint seminar offered each spring. Each seminar, led by a theologian and a philosopher, will examine an issue in which the differing approaches of philosophy and theology may prove fruitful. The topic and instructors will change from year to year. Finally, each major will submit a senior thesis prepared under the direction of two advisors, drawn from each department. At the option of the directors, this thesis may be presented and discussed in an informal colloquium consisting of the other students in the joint major.

The remaining courses in the joint major will be at the discretion of the student. Normally taken at the 40xxx level, there should be an equal distribution in the electives between theology and philosophy. However, students may devote up to six hours within the joint major to additional language work. These hours may add to the classical language previously studied, or used to begin another language of significance for philosophical and theological work.

The joint major differs from a first major in one discipline and a supplementary major in the other in that the latter requires 55 credit hours, whereas the joint major requires 60. Furthermore, the joint major calls for language instruction beyond what the

University requires for all undergraduates. Finally, the joint seminars should prove especially challenging, inviting students to explore important topics in an interdisciplinary way. These features should make the joint major particularly attractive to students preparing for advanced study.

Requirements in Philosophy:

PHIL 10101 or 20201, and 20xxx-level course (University-required courses; a higher-level course may be substituted for the latter).

PHIL 30301 and 30302. History of Philosophy I and II.

PHIL 30313. Formal Logic.

Requirements in Theology:

THEO 10001 or 20001 and 20xxx-level course (University-required courses).

THEO 40201 and 40202. Christian Traditions I and II.

THEO 40101 or 40108. Upper-division scripture course.

Plus:

Classical language (normally Greek)—two semesters.

Joint seminar.

Senior thesis.

18 credit hours of electives (up to six of these may be additional hours in language study).

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Theology](#) heading.

Supplementary Majors, Minors, and Special Programs

A supplementary major is one that cannot stand alone in qualifying a student for an undergraduate degree but must be taken in conjunction with a primary major. Several departments offer both majors and supplementary majors. They have been described above. Included below are interdisciplinary nondepartmental supplementary majors and minors.

CENTER FOR ASIAN STUDIES

Director:

Howard Goldblatt, Research Professor

The program in Asian Studies introduces students to the complexity of the continent of Asia. Students select courses in a wide variety of fields, such as anthropology, East Asian languages and cultures, economics, film, television, and theatre, history, political science, and psychology. The Center for Asian Studies also provides enriching activities such as lectures, films, gatherings, and grant opportunities to students interested in Asia.

Students with the supplementary major or the minor in Asian Studies will be very desirable employees of international business or accounting firms, nongovernmental organizations, and service organizations. They will be well prepared for graduate school in a discipline, or for professional school such as law or business. The supplementary major and the minor in Asian Studies provide recognition of students' training in this significant region of the world.

THE SUPPLEMENTARY MAJOR IN ASIAN STUDIES

The supplementary major in Asian Studies emphasizes the study of Asia as an integral part of the world today. Students study both its history and current aspects of culture, society, politics, literature, language, religion, etc. Required classes stress an interdisciplinary perspective through cross-listed classes found throughout Notre Dame.

Through the interdisciplinary nature of the major, classes draw from a broad range of topics, enabling the student to come away with a holistic and comprehensive study of Asia, including both humanistic and social scientific approaches to study.

Finally, the program culminates in the senior year with a capstone essay on a student-chosen topic and advised by a faculty member. The curriculum requires 26 credit hours in addition to one year of language study.

Requirements for the Supplementary Major:

Prerequisite: One year of study of an Asian language (9–10 credit hours)

Asia-related courses from each of the following disciplines: (Total of 23 credit hours)

- At least one semester of an Asian language beyond the first year (3–5 credit hours)
- One social science (anthropology, economics, political science, psychology, or sociology) (3 credit hours)
- One humanities (theology, philosophy, or English) (3 credit hours)
- One history: one class in ancient, early, or modern history (3 credit hours)
- One literature (3 credit hours)
- Two general electives (fine arts highly recommended) (6 credit hours)
- Capstone project during the senior year (3 credit hours)

GENDER STUDIES SUPPLEMENTARY MAJOR AND MINOR

Director:

Pamela Robertson Wojcik

Director of Undergraduate Studies:

Abigail Palko

Program Coordinator:

Linnie Caye

Objectives. Gender Studies is an interdisciplinary academic program in the College of Arts and Letters at Notre Dame. Gender Studies analyzes the significance of gender—and the cognate subjects of sex, sexuality, race, ethnicity, class, religion, and nationality—in all areas of human life, especially in the social formation of human identities, practices, and institutions. Gender Studies gives scholars the methodological and theoretical tools to analyze gender and its cognates in their chosen disciplines in the arts, humanities, social sciences, and natural sciences. Gender Studies also provides its students and alumni with an intellectual framework in which the analysis of gender and its cognates can be creatively and critically applied to their personal, familial, professional, and civic roles. In the context of the Catholic identity of Notre Dame, Gender Studies facilitates the study of the intersection of gender and religion in the shaping of ethics, culture, and politics. Alongside our diverse array of courses drawn from across the University, our summer internship and academic-credit internship programs emphasize the holistic and practical life applications of a Gender Studies education at Notre Dame.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Gender Studies](#) heading.

SUPPLEMENTARY MAJORS, MINORS, AND SPECIAL PROGRAMS

THE GLYNN FAMILY HONORS PROGRAM

In the fall semester of 1983, the University inaugurated an honors program for a small number of outstanding students in the College of Arts and Letters and the College of Science. A limited number of students with academic intents for each college are identified for this program at the time of admission. Although selection criteria include the promise of outstanding academic performance as demonstrated by standardized test scores and high school performance, the program is looking for more than mere academic ability. It hopes to identify students with a deep intellectual curiosity.

The program offers honors sections to fulfill most of the University and college requirements in the students' freshman and sophomore years. At present, there is the yearlong Honors Seminar (satisfying the writing and literature requirements), Honors Calculus, Honors Philosophy, Honors Theology, Honors Biology, Honors Physics, and an array of Honors Social Science courses. Since these courses are restricted to honors students, they are smaller than non-honors sections and are usually taught in a seminar format. The instructors for honors sections are chosen from the most outstanding faculty in each college. After the first year, students' academic work will be mainly centered in their major field (or fields) of study, but two or more honors electives are also taken during these years. In the fall of the senior year, there is an "Honors Thesis/Research Seminar," which is followed by the "Moral Problems Seminar" in the spring. The fall seminar is intended to be a spur to the students' capstone project, whereas the spring seminar brings the honors students from diverse majors back together for some concluding topical discussions. All honors students will also be expected to complete a special six-hour senior research honors project in their major field of study. In science, this is the culmination of a research project that is begun earlier, and in arts and letters, it is a two-semester project culminating in a thesis. Those writing senior theses work individually under the direction of a faculty advisor of their choosing in their major field. Funds are available for research projects during summers either at Notre Dame or other universities.

In addition to the more narrowly academic features of the honors program, students will be offered various opportunities for broadening personal, cultural and spiritual growth. Regular colloquia, informal discussions and cultural excursions are available.

Further information on the structure and content of the honors program or on the criteria for admission may be obtained by contacting Prof. Alex Hahn or Prof. Cornelius Delaney, 323 O'Shaughnessy Hall, Notre Dame, IN 46556, 574-631-5398.

**ARTS AND LETTERS
PREPROFESSIONAL STUDIES***Advisor:*

Vicki Toumayan
Assistant Dean
College of Arts and Letters

Arts and Letters Preprofessional Program students are required to complete an arts and letters primary major in addition to the preprofessional supplementary major. The ALP2 program provides students who intend to pursue a career in health science with an opportunity to complete a major in the College of Arts and Letters while building a firm foundation in the basics of science. Most students elect the ALP2 program because they wish to go on to medical or dental school; however, there are students who intend to pursue other health-related careers or simply prefer the integration of science classes into the arts and letters curriculum. Medical schools encourage prospective applicants to seek a broad, liberal arts education, which enables them to develop skills that will be useful throughout life. The ALP2 program provides students with all of the necessary prerequisites to prepare for the Medical or Dental College Admissions Test.

The use of Advanced Placement (AP) to fulfill science course work is strongly discouraged. As a rule, a student may use no more than eight credits' worth of AP toward the ALP2 major or 24 credits of transfer credits for transfer students.

Since students should aim to take the Medical/Dental College Admissions Tests in the spring semester of the junior year, students should have completed the following courses by that time: MATH 10350–10360, BIOS 20201–20202 and labs, CHEM 10171–10172 and labs, CHEM 20273–20274 and labs, and PHYS 30210–30220 and labs. Students must also take three upper-level science electives (nine credits) to complete the ALP2 program. The following electives are recommended to provide the student with the background necessary for admission to most medical and dental schools: Genetics (BIOS 20303), Biochemistry (CHEM 40420), Physiology (BIOS 30344 or BIOS 40421), Cell Biology (BIOS 30341), or Microbiology (BIOS 40401). Biochemistry (CHEM 40420) and Physiology (BIOS 33044 or BIOS 40421) are strongly recommended. CHEM 20204, MATH 20340, and PHYS 20140 do not count toward the three upper-level science electives. Research, special studies, and directed readings do not count toward the three science electives.

All curricular advising in reference to the ALP2 major is conducted by the ALP2 advisor in 104 O'Shaughnessy. The sequencing of courses taken throughout the sophomore, junior and senior years is worked out by the student in consultation with the ALP2 advisor and the student's departmental advisor so that the best schedule for each individual is arranged. One possible sequence is the following.

THE PROGRAM OF COURSES**First Year***First Semester*

FYC 13100. Composition	3

COMPUTER APPLICATIONS PROGRAM*Director:*

Charles R. Crowell

Assistant Director and Director of Advising:

Louis J. Berzai

Faculty:

Kevin Barry; Louis J. Berzai; Mike Chapple; Christopher G. Clark; Amy Coughlin; Charles R. Crowell; Kenneth Dye; Donald K. Irmiger III; Patrick Miller; John Nunemaker; Katie Rose; Raymond G. Sepeta; John F. Sherman; Steve Smith; Jeff Sucec; Michael Villano

The Computer Applications Program (CAPP) was established as a supplementary major in the College of Arts and Letters as a way to provide undergraduate students with formalized training in computing. An important mission of CAPP is to provide undergraduate majors with proficiency in various facets of computing and information technology as a supplement to their primary majors and as a springboard for further professional education or a career in a technology-related field. Technology, Business, and Society (TBS) is a complementary skills program, which is very similar to a minor. Both programs serve as a window to Notre Dame undergraduates to the worlds of technology and business.

CAPP, established in the 1970s, been a highly successful programs for arts and letters students. In terms of post-graduate job placements, the CAPP experience has been very attractive to employers, which has enabled students to be competitive in the job market. Even more important, however, has been the impact of CAPP on the lives of our majors as they move on to further education or directly into their careers. CAPP graduates commonly report that the experiences and skills they gained from the program have been extremely beneficial in the years since their graduation. TBS is a relatively new program, but student feedback so far has been very positive.

Both CAPP and TBS have three important educational goals for students. One is to provide students with sufficient knowledge of and exposure to

technology that they understand the important role it plays in both personal and professional domains. As part of this understanding, students acquire a certain minimum proficiency with computing and information technology systems in two ways: By becoming acquainted the “languages” of technology used to develop technology-based systems; and by getting practice in the application of such systems to solve important problems or create functional tools.

A second goal of CAPP and TBS is to sensitize students to the ethical issues raised by contemporary uses of computing and information technology. In this goal we follow the recommendations of a recent national steering committee of computing and technology professionals who saw such learning as integral to the undergraduate educational experience. Students, therefore, take one required course from among several options in this curriculum area.

Finally, CAPP and TBS aim to increase awareness of the important and pervasive ways in which technology affects both personal and professional domains within today's society. A new relatively new curriculum category, Technology and Society, offers courses through which students become more aware of the broader influence and impact of technology on their lives.

Also relatively new to the CAPP and TBS curricula is a foundational course in business knowledge. This course, taught by an experienced business professional, gives students an overview of the concepts and terminology critical to success in the business world. For CAPP, this course is an elective; for TBS, it is required.

COURSE DESCRIPTIONS

CURRICULUM CATEGORY	TYPES OF COURSES	CAPP REQUIRES	TBS REQUIRES
Programming Languages	Visual Basic; JavaScript; Web Development with CSS; Research Methods in Computer Programming	2	1
Technology Applications	Introduction to Computers; MIS; Systems Analysis; E-Business Strategies; La telenovela; Multimedia Technology; Building the Modern Web; CAD for the Stage; 3-D Modeling; Music through Technology; Database Programming with Oracle; Artificial Intelligence; Computers in Psychology	4	1 1
Business Knowledge	Foundations of Business Thinking		
Technology Related Ethics	Current Trends in Computer Applications	1	1
Technology and Society	The Internet and Society; Information Security	1	1
Total Courses (<i>hours</i>)		8 (24)	5 (15)

SUPPLEMENTARY MAJORS, MINORS, AND SPECIAL PROGRAMS

This combination program, instituted in 1952, offers students the advantages of both a liberal and a technical education. The student completing one of these combination programs has a background in the humanities and social sciences as well as a degree from one of the programs offered by the College of Engineering. Because it is a demanding program, only students who have both the aptitude and motivation necessary for the five-year program should apply. Advisors for the program are available for consultation about the advisability of entering the program and about meeting the particular needs of each student already pursuing this program. Qualified students are eligible to receive modest scholarship support from the John J. Reilly Endowed Scholarship Program during their fifth year of study.

The decision to enter the program ordinarily should be made prior to beginning the sophomore year, although students can also enter the program at a later stage. There are three sets of requirements that must be met for the program: University requirements, College of Arts and Letters requirements, and College of Engineering requirements, as the following table indicates.

University Requirements	<i>Credit Hours</i>
Philosophy	6
Theology	6

†The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy.

*The University degree requirement is one course in literature or fine arts. The College of Arts and Letters requires a minimum of one course in each subject area, plus one additional course in history or social science.

**One course at the intermediate or advanced series completes the requirement. Beginning or elementary series require three semesters' work to fulfill the language requirement.

‡Courses specified by the student's major engineering department. Minimum total for the five-year program to fulfill degree requirements in both colleges is 168 to 177 credit hours.

§Courses necessary to fulfill the requirements for a major in the student's major arts and letters department.

EDUCATION

Elementary Education

The Notre Dame student taking elementary education at Saint Mary's College must also complete a Notre Dame major along with the University and appropriate college requirements. Those interested in the elementary education program are encouraged to take the prerequisite course, EDU 201, at Saint Mary's in the second semester of their first year of studies. With appropriate planning, and possibly summer-school course work, both the Notre Dame major and elementary teaching certification can be completed in four years.

Secondary Education

(including middle school)

The following Notre Dame majors have been approved for secondary education licensing through the Education Department at Saint Mary's College:

In the College of Science: biology, chemistry, mathematics, physics.

In the College of Arts and Letters: English, languages (French, Spanish, Latin), art, music, social studies (history and political science). Students interested in a secondary license in social studies must also complete additional course work in political science or history (depending on the major) and in one other area: either economics, sociology, or psychology.

In the College of Business: business education.

Notre Dame undergraduates interested in one of the professional teacher education programs should apply to the department the first semester of the sophomore year, but in some cases may start as late as the first semester of the junior year.

Students in the College of Arts and Letters, contact education advisor Stuart Greene for more information and help with planning. Students in the College of Science, contact Dr. Kathleen Cannon at 574-631-5812.

Interdisciplinary Minors within the College

During the junior and senior years, students may elect to complete one or more interdepartmental minors in addition to the departmental major sequence. Composed of 15 hours of class work chosen from at least two departments, these minors encourage students to think from an interdisciplinary perspective about a given issue or topic. Requirements for completion are determined by the faculty director in consultation with the relevant college committee. Current offerings include Catholic Social Tradition; Education, Schooling, and Society; Gender Studies; Hesburgh Program in Public Service; Journalism, Ethics, and Democracy; Latino Studies; Medieval Studies; Peace Studies; Philosophy and Literature; Philosophy, Politics, and Economics; Philosophy Within the Catholic Tradition; Religion and Literature; and Science, Technology, and Values. These were formerly called concentrations and are described in detail below.

CATHOLIC SOCIAL TRADITION

Co-Directors:

Bill Purcell; Todd David Whitmore

Executive Committee:

R. Scott Appleby (history); Dan Philpott (political science); Rev. Patrick Gaffney, C.S.C. (anthropology); Maura A. Ryan (theology); Robert Sullivan (history); Erika Summers-Effler (sociology); Paul Weithman (philosophy); Charles Wilbur (economics)

The Minor in Catholic Social Tradition is an interdisciplinary program that serves as a resource for Notre Dame undergraduates to learn Catholicism's social tradition.

Catholicism offers a long-standing and profound tradition of thought and teaching that addresses, from a normative standpoint, the full range of social spheres. It does so through a constellation of concepts that, taken as a whole, give articulation to a coherent yet variegated vision of the good society. Such concepts include those of solidarity, the common good, the just wage, human rights, the free economy, subsidiarity, and the option for the poor.

Sources for the tradition go back as far as the Bible and develop even in the early church fathers. Medieval writings on topics such as usury and the origins and proper exercise of kingship bring an unprecedented level of detail to Christian analysis of the just society. Pope Leo XIII inaugurates Catholicism's effort to bring its social tradition to bear on industrial society in his 1891 encyclical, *Rerum Novarum* (The Condition of Labor). Since then, popes have drawn upon *Rerum Novarum* and the social tradition to broaden and develop Leo's set of concerns in encyclicals often titled—as with Pius XII's *Quadragesimo Anno*, Paul VI's *Octogesima Adveniens*, and John Paul II's 1991 *Centesimus*

Annus—in accordance with their relationship to the earlier document. In doing so, the popes and the Second Vatican Council have addressed issues ranging across all spheres of social life from the family to the state to the church. The U.S. bishops have made sophisticated application of these teachings to the specific circumstances of the United States.

Unfortunately, many Catholics are unaware of this tradition. Pope John Paul II writes, "It must be asked how many Christians really know and put into practice the principles of the church's social doctrine." The U.S. bishops concur. While "Catholic social teaching is a central and essential element of our faith," it is still the case that "our social heritage is unknown by many Catholics." At the same time, graduates of Notre Dame move on to assume leadership positions, often quite advanced ones, in a broad spectrum of social spheres, including in politics, law, business, education, the media, and the military. (For example: national security advisor, president of Panama, attorney general of California, CEO of Mobil Corporation, president of the Chicago Mercantile Exchange, presidents of nine universities other than Notre Dame, executive producer of *Nightline*, and secretary of the Air Force.) The Program in Catholic Social Tradition serves as a resource for Notre Dame undergraduates to learn the tradition so that it can inform life both before and after graduation.

The Minor in Catholic Social Tradition involves 15 credit hours of course work, including a core course (3 credits), three electives (each three credits), and three one-credit colloquia/social concerns seminars. The core course will have three components:

1. The close reading of classic texts of the Catholic Social Tradition, particularly but not exclusively the papal and conciliar documents from Pope Leo XIII's *Rerum Novarum* to John Paul II's *Centesimus Annus*. Other texts will include source documents (e.g., writings by Thomas Aquinas and Augustine) and contemporary appropriations (e.g., writings by liberation theologians and neoconservatives).
2. Immersion in professional context. Each student will find a placement in a location similar to that student's anticipated profession. The student is to observe, interview and, to the extent possible, participate in the life of the setting. For instance, the students can observe a law or architectural firm or a medical practice. Here, the student will keep an ongoing journal as a "pastoral ethnography" of the setting (an interpretation of the practice in the setting in light of the Catholic social tradition).
3. Final project: Students are to articulate or construct a setting in their anticipated profession in light of the Catholic social tradition (e.g., imagine and construct what a law firm/health clinic/ad agency would look like if it practiced in light of the Catholic social tradition).

The electives will be chosen by the student in consultation with the director from among courses offered

INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

in the University. The one-credit courses will be devoted to the critical reading and discussion of one or two major works each semester. Social concerns seminars are one-credit courses lodged first within the Department of Theology and often cross-listed with other departments.

Contact: Prof. Todd David Whitmore at Whitmore.1@nd.edu, or Prof. Bill Purcell at wpurcell@nd.edu.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Catholic Social Tradition](#) heading.

EDUCATION, SCHOOLING, AND SOCIETY

The primary goal of this interdisciplinary minor is to serve students who want to understand learning and education as complex and challenging aspects of human and societal experience. Education is one of the central and shared experiences of people in contemporary societies in the United States and around the world. It is both an end in itself and a means to many personal, professional, and spiritual goals. Thus, understanding its history and traditions, analyzing its processes, and critiquing its goals are of great importance to all of us.

Most societies rely on education to work fundamental changes in students and in society. We will use the tools and resources of a liberal arts perspective to help students reflect on, understand, and influence the role of education in society. In addition, the program will provide a rich body of resources for students who may want to pursue careers in education after graduation, including certification to teach, or research and teaching careers at the university level.

Normally, students apply for admission to the minor late in their freshman year or early in their sophomore year, and this is ideal. Students should be in good academic standing and demonstrate a strong interest in issues related to the causes and consequences of learning, schooling, and educational policy.

The minor in Education, Schooling and Society involves 15 hours of course work. The introductory course in the program is ESS 33600. This course must be completed by the second semester of the junior year. At the middle level of the program, students will select one course from a set of approved courses that are focused exclusively on educational issues and two courses from a set of approved courses that include education as one of several course foci. Students participate in the capstone course, ESS 43640, the Senior Research Seminar, in the fall semester of their senior year. As a capstone, this class provides students with an opportunity to build upon and extend the work they have completed in fulfilling the requirements for the minor. Students will design and execute an original research project

and write a paper of at least 25 pages. This research will be guided by a writing-intensive process (i.e., drafts, revisions, peer review when appropriate, and individual consultations between the professor and students).

The faculty work closely with students on postgraduate planning, including employment, graduate or professional school, or service opportunities.

GENDER STUDIES MINOR

Director:

Pamela Robertson Wojcik

Program Coordinator:

Linnie Caye

Objectives. Gender Studies is an interdisciplinary academic program in the College of Arts and Letters at Notre Dame. Gender Studies analyzes the significance of gender—and the cognate subjects of sex, sexuality, race, ethnicity, class, religion, and nationality—in all areas of human life, especially in the social formation of human identities, practices, and institutions. Gender Studies gives scholars the methodological and theoretical tools to analyze gender and its cognates in their chosen disciplines in the arts, humanities, social sciences, and natural sciences. Gender Studies also provides its students and alumni with an intellectual framework in which the analysis of gender and its cognates can be creatively and critically applied to their personal, familial, professional, and civic roles. In the context of the Catholic identity of Notre Dame, Gender Studies facilitates the study of the intersection of gender and religion in the shaping of ethics, culture, and politics. Alongside our diverse array of courses drawn from across the University, our summer internship and academic-credit internship programs emphasize the holistic and practical life applications of a Gender Studies education at Notre Dame.

Requirements. Students in the minor are required to complete 15 credit hours.

HESBURGH PROGRAM IN PUBLIC SERVICE

Director:

Martine De Ridder

The Hesburgh Program in Public Service prepares Notre Dame students for a life of active and effective citizenship as well as for the possibility of careers in public service. The program honors the principled, dedicated leadership and public service of Notre Dame's President Emeritus, Rev. Theodore Hesburgh, C.S.C.

The health of American society is closely related to good public policy, competent, ethical public service, and leadership. Thus, awareness of public policy and public service is not only the foundation for public-sector careers, but it is also a necessity for those who will exercise leadership roles in the nonprofit sector or in the private sector and seek to be knowledgeable citizens.

The Hesburgh Program offers an interdisciplinary curriculum in public policy designed to inform students about the dimensions of policy making, public administration and policy evaluation, and to develop skills in research, sensitivity to ethical issues, and appreciation for the character and limits of constitutional democracy.

First-year students and sophomores of all colleges are invited to apply to the interdisciplinary minor, as well as first semester junior transfers. To be admitted, students will need to be in good academic standing and demonstrate a strong interest in public policy and public service. An introduction to American politics (POLS 10100, 20100, or equivalent) and an introduction to economics (ECON 10011, 20011, or equivalent) are prerequisites to the Hesburgh Program course of study. To be admitted, students should have completed or be in the process of completing these requirements. A conditional admit may be granted to allow for completion of the prerequisites during a student's sophomore year of studies.

The public policy minor involves 15 hours of course work. The "gateway" course to the program is HESB 20010, Introduction to Public Policy, normally taken in the second semester of the sophomore year. As sophomores and juniors, Hesburgh minors choose three electives drawn from each of three categories of courses approved by the program. These are research skills, values, and institutions and processes. During the senior year, students who have been on a summer internship will register for the research seminar, HESB 43020, that builds on their field experience. Other students will take one of several senior-level policy seminars identified by the program each semester.

Many of our courses are offered through cross-listings with various arts and letters departments such as American Studies, Anthropology, Computer Applications, Economics and Policy Studies, History, Philosophy, Psychology, Political Science, Sociology, and Theology.

INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

The Hesburgh Program offers students the opportunity for summer internships in public policy contexts through the Gary Lyman Internships in Public Service. In the fall of their junior year, Hesburgh students may apply for the Lyman Internship. Up to 20 students are selected in a competitive process. Students selected as Lyman interns are aided by the program's director in securing appropriate internships in Washington, D.C., or their home state. Lyman interns receive financial help to defray their cost of living while interning.

During the course of the academic year, the Hesburgh Program sponsors student public-policy-related forums and activities and campus visits to Notre Dame by public figures. The staff works closely with students on postgraduate planning, including employment, professional schools such as law and public policy and academic graduate programs.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Hesburgh Program in Public Service](#) heading.

INTERNATIONAL DEVELOPMENT STUDIES*Director:*

Robert A. Dowd, CSC

The goal of the interdisciplinary minor in International Development Studies (IDS) is to provide undergraduate students with both the opportunity to learn about and contribute to international development. Administered by the Ford Family Program in Human Development Studies and Solidarity at the Kellogg Institute for International Studies, the IDS minor provides students with context and an academic foundation to analyze the dynamics of development across the globe. Since development studies is interdisciplinary in nature, students are required to take courses in a variety of disciplines, equipping them with a broad lens through which to view and investigate development challenges. Students from all colleges and departments are encouraged to apply.

Great innovation and advancement on the one hand, and great poverty and struggle on the other, characterize the world of today. The contrast and inequality between and within countries across the globe is remarkable given the technology available and the globalized world in which we live, where goods, capital, ideas, and people flow swiftly around the planet. The University of Notre Dame is an ideal place for exploring the nexus between technological, scientific, economic, and political solutions to development as well as the deeper ethical questions of sustainability, right relationship, and solidarity.

The IDS minor will assist in preparing students to pursue graduate studies in or related to development studies. For those wishing to do volunteer work or seek employment in this field, a student's transcript will reveal a training that reflects a firm understanding of the issues in international development.

Requirements:

A central component and requirement of the IDS minor is a field-based research project in the so-called "developing" world, allowing students to contribute to the Ford Program's mission of seeking solutions to real-world challenges by examining the causes and consequences of extreme poverty. This research project will normally be conducted the summer after a student's junior year.

Additionally, the minor in International Development Studies consists of 15 credit hours:

Gateway Course (3 credit hours): Introduction to International Development Studies

- This course is only offered in the fall and will normally be taken during sophomore year.

Three Electives (9 credit hours):

- Qualifying elective courses are listed each semester in the Schedule of Classes under IDS.
- At least two electives must be outside the student's major.
- No two electives may be from the same department.

INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

Capstone Seminar (3 credit hours)

- Each student will write a senior essay based on his or her field research.
- Bringing together their unique experiences and disciplinary perspectives, minor students will discuss and critique each other's work.

To supplement their course work, students should take advantage of the many opportunities made available by the Ford Program and the Kellogg Institute. Each semester, the Ford Program's lecture series Discussions on Development offers a forum for students and faculty to discuss current development challenges. At the annual student-led human development conference, students from around the country and world come together to present and discuss their research on international development. Students will also be encouraged to engage the "developing" world often through overseas learning experiences, including through the Kellogg Institute's summer research and internship grant programs.

Admission to the IDS minor is through a selective process each spring. Students submit an application, including short essays on motivation and academic interests, as well as a recommendation from a faculty member. Normally students apply in their freshman year in order to complete the requirements and properly prepare for their field research.

For more complete information about the minor in International Development Studies and the Ford Program, please consult our website at kellogg.nd.edu/ford or contact Tony Pohlen, assistant director, apohlen@nd.edu.

JOHN W. GALLIVAN PROGRAM IN JOURNALISM, ETHICS, AND DEMOCRACY

Director:

Robert Schmuhl

The John W. Gallivan Program in Journalism, Ethics, and Democracy offers several courses for students interested in careers in print and broadcast journalism. Begun in 1997 with a grant from the John S. and James L. Knight Foundation and now endowed by the family of John W. Gallivan, this minor combines professional training in journalistic skills along with examination of philosophical concerns related to the practice of journalism. For example, what ethical issues arise in preparing a particular story? Or what role does—and should—journalism play in a self-governing society?

The journalism minor requires completion of 15 hours in addition to a student's major requirements and a news-related internship during either the summer or the academic year. Fundamentals of

Journalism is the first, or gateway, class for students participating in the program. Other courses that count for the concentration include The Craft of Journalism; Advanced Reporting; Multimedia Journalism; Writing for Publication; Persuasion, Commentary, and Criticism; Broadcast Journalism; Media Ethics; Media Criticism; and News in American Life. In addition, new courses are currently being developed. No more than two courses beyond Fundamentals of Journalism concentrating on journalistic techniques will count for the required 15 hours.

The director of the program is Robert Schmuhl, the Walter H. Annenberg-Edmund P. Joyce Professor of American Studies and Journalism. An advisory committee of Notre Dame graduates in journalism helps guide the program. Members include Tom Bettag, senior executive producer at *CNN Worldwide*; Sarah Childress, Africa correspondent, *The Wall Street Journal*; Bill Dwyre, sports columnist, *The Los Angeles Times*; Claire Heininger, statehouse reporter, *The Star-Ledger* (Newark, N.J.); John W. Gallivan, former chairman of the board of the Kearns-Tribune Corporation and publisher emeritus of the *Salt Lake Tribune*; Monica Yant Kinney, metro columnist, *The Philadelphia Inquirer*; John McMeel, chairman and president, Andrews McMeel Universal; Bill Mitchell, director, Entrepreneurial and International Programs, Poynter Institute for Media Studies; Anne Thompson, chief environmental correspondent, *NBC News*; and Kelley Tuthill, reporter, WCVB-TV, Boston.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Gallivan Program in Journalism, Ethics, and Democracy](#) heading.

LATINO STUDIES

Director of Academic Program:

Karen Richman

Program of Studies. The College of Arts and Letters offers a minor and a supplementary major in Latino Studies in conjunction with any undergraduate major from any college at the University.

Latino Studies centers around the study, analysis, and understanding of the varied experiences of the Latino population in the United States. Its scope is broad and it strives to incorporate various disciplines in its approach.

The Latino presence is deeply rooted in American history. In the latter half of the 19th century the numbers of Latinos in the United States grew exponentially—in the aftermath of the Mexican American War (1848), with the expansion of the American Southwest and the inclusion within U.S. borders of what had previously been Mexican

territory, and the Cuban Spanish American War (1898), with the annexation of Puerto Rico. During the next century Mexicans crossed the border and Puerto Ricans traveled to the mainland to find work and, in many cases, to make their homes. The 20th century also saw waves of immigration from Cuba, the Dominican Republic, and Central and South America, a trend that continues today as the U.S. Latino population becomes increasingly diverse.

Students who pursue the minor in Latino Studies will have the opportunity to be at the forefront of the study of one of the 21st century's most significant demographic changes in the United States.

The Institute for Latino Studies is committed to scholarship that will promote critical thinking about such issues as spirituality, social action, language, race, ethnicity, class, assimilation/acclulturation paradigms, and indigenous traditions, to name a few. Literary and visual arts, which often function as vehicles for social change and creative empowerment, constitute another focus of our curriculum. Overall, Latino Studies aims to strike a balance among the social sciences, humanities, and arts in its teaching, research, and service.

As the Latino diaspora evolves, so does the field of Latino Studies. Latino Studies recognizes the value of a comparative, cross-border perspective for arriving at an in-depth understanding of Latinos' historical roots and multi-ethnic heritages. It promotes research and analyses of new issues such as emerging transnational communities, changing immigration patterns, remittances, and cultural flows between Latinos in the United States and the Caribbean and South and Central America. While the emphasis is on domestic Latino communities, the discipline's focus inevitably becomes internationalized when we consider globalization, immigration, and border issues.

In addition to the teaching program, Latino minor students are exposed to the institute's research and community outreach components. In summary, students will be able to take advantage of the resources of ILS, which also include two specialized units that conduct pioneering programs in Latino theology and spirituality.

As an interdisciplinary program, the minor in Latino Studies will complement and provide a broader cultural and social background to students in the various departments and colleges at the University. The minor is open to all undergraduate majors. Participants in the program will be prepared to work in a myriad of professional settings and to serve an increasingly diverse society.

Minor in Latino Studies Curriculum. The minor in Latino Studies consists of 15 credit hours, including a required gateway course (3 credits), practicum course (3 credits), and nine credit hours of elective course work. Although there is no language requirement for the minor, students are encouraged to study

INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

and acquire fluency in the Spanish language. **All Latino Studies courses are open to all students.**

Practicum Course

(3 credit hours, required for Latino Studies minor)
In this course, usually taken during their senior year, students will complete a practicum that will include directed research/reading on an Institute project, class discussion, and experiential work in the Latino community. Students will have the option of choosing and designing a project, regardless of their major, in keeping with their interests. They will carry out the project under the direction of a faculty mentor starting in the fall semester. A written report and a class presentation will complete this academic experience. Methods and analytical frameworks will vary depending on the student and faculty advisors. The practicum could be substituted by an approved similar course.

Elective Courses

(9 elective credit hours)
Students must take two out of three courses at the 30xxx–40xxx level unless they receive special permission from their faculty advisor. In addition, students must choose their electives from within at least two major subjects in Latino Studies, e.g., health, business, social science, theology, political science, literature, and visual arts, except for the following two cases.

Students who are pursuing Spanish language proficiency (not minor or major) may replace one elective (three credit hours) with a 20xxx-level Spanish course. Students may also replace one elective (three credit hours) from a field comparable to Latino Studies (e.g., Gender Studies, Latin American Studies, or African American Studies) as long as at least one-fourth of the course content includes Latino Studies. A list of appropriate courses will always be available for students.

Supplementary Major in Latino Studies. The supplementary major in Latino Studies consists of 24 credit hours, including the completion of the gateway course ILS 20701 (3 credits), senior seminar (3 credits), 12 credit hours of six Latino Studies course work, and six 6 credit hours of open electives.

Three of six open elective credit hours must be chosen from Latino Studies courses. The three remaining credit hours may be a Spanish language course. This open elective will give students the opportunity to further develop their Spanish language skills (non-Spanish majors only) or, with the approval of the faculty advisor in Latino Studies, they may elect a course from a field comparable to Latino Studies (e.g., Gender Studies, Latin American Studies, or Africana Studies).

Although there is no Spanish language requirement, all Latino Studies majors will be strongly encouraged to learn to speak, read, and write Spanish or strengthen their Spanish language skills as well as to participate in study abroad programs in Spanish-speaking countries.

Introductory “Gateway” Course

ILS 20701—3 credit hours, required for Latino Studies minor and major; open to all Notre Dame students

Senior Seminar in Latino Studies

(3 credit hours; required for Latino Studies supplementary major)
The senior seminar is a capstone course for the supplementary major in Latino Studies. The centerpiece of the course is a seminar paper that students research and write on a subject and discipline of their choice or possibly a topic among the institute’s research projects. The course will include directed, independent study and research with a Latino Studies faculty member resulting in a substantial and original research paper of 15 to 20 pages. The students will participate in an annual symposium where they will present their work.

Required Courses

(12 credit hours of 30xxx–40xxx level Latino Studies courses)
These required courses must be distributed in four major components: history, literature, social science, and theology courses.

Open Elective Courses

(6 credit hours)
The remaining six credit hours are considered open electives. Three credit hours must be taken from Latino Studies courses. The three remaining credit hours may be in Spanish (non-Spanish majors only) or, with the approval of the faculty advisor in Latino Studies, students may elect a course from a field comparable to Latino Studies (e.g., Gender Studies, Latin American Studies, or Africana Studies).

The following represents a sample list of courses offered in previous terms and in spring 2008:

- ILS 20701. Introduction to Latinos in American Society
- ILS 20702. Topics on Race in the Americas
- ILS 20800. U.S. Latino Spirituality
- ILS 20900. Spanish for Heritage Speakers
- ILS 30xxx. Chicanas in the Visual Arts
- ILS 30101. Caribbean Diaspora
- ILS 30201. Latinos: Wealth, Inequality, and Asset-Building Policies
- ILS 30300. Latino History
- ILS 30302. Latino/Latina American Literature
- ILS 30304. Border Crossings: Mexican and Canadian Literature
- ILS 30306. Women in the Americas
- ILS 30307. Icons and Action Figures in Latino/Latina Literature
- ILS 30308. Latino Poetry
- ILS 30309. The American Intersections of Latino/a Writing
- ILS 30310. Contemporary Latino/a Caribbean Literature
- ILS 30401. Mexican-American History
- ILS 30703. Migration, Race, and Ethnicity in Twenty-First-Century America
- ILS 30706. Toward Equity and Excellence in Education: A Review of Pedagogical and Policy Approaches from 1950 to Present

- ILS 30900. Nations in Motion: Latino/Latina Literature in the United States
- ILS 35801. Hispanic Leadership Intern Program
- ILS 40101. Mexican Migration and Transnationalism in South Bend
- ILS 40101. Race, Ethnicity, and Power
- ILS 40232. Latin Film: Culture, God, and Redemption
- ILS 40301. The Politics of Memory in Contemporary Latino/Latina Literature
- ILS 40304. Latino Literature and Visual Culture
- ILS 40406. Latinos and Christianity
- ILS 40600. Latino Psychology
- ILS 40700. International Migration: Mexican and U.S. II
- ILS 40706. Latinos in American Society
- ILS 40707. International Migration and Human Rights °
- ILS 40710. Aesthetics of Latino Cultural Expression
- ILS 40712. Legacy of Exile: Cubans in the United States
- ILS 40713. Latino Economic Development: Research and Policy
- ILS 40714. Social Demography of the U.S. Latino Population
- ILS 40716. Latino Religion and Public Life: Exploring the Social Impact of the Latino Church
- ILS 40801. Theology and Popular Piety in U.S. Catholicism
- ILS 40802. Culture, Religion, and Evangelization
- ILS 40804. Latino Film: Culture, God, and Redemption
- ILS 40900. New Readings in Modern Caribbean Literature
- ILS 40901. Cuban Literature

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Institute for Latino Studies](#) heading.

LITURGICAL MUSIC MINISTRY

This 18-credit minor consists of three 3-credit courses in theology and two 3-credit courses in music, plus 3 credits of music lessons or approved ensembles, to be selected in consultation with the student’s music advisor. Contact the director of undergraduate studies in the Department of Theology.

MEDIEVAL STUDIES

The Minor in Medieval Studies allows students who are committed to other programs of study to pursue interests in the culture of the Middle Ages and to cross the limits of individual disciplines as a means of understanding the changing social, economic, legal, intellectual, and artistic systems of medieval society.

Students may declare their intention to undertake a minor in Medieval Studies to the director of

INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

undergraduate studies at any time before the end of their third year. The undergraduate director will then act as their minor advisor and help them select a set of courses that form a coherent program of study, often in conjunction with their major if possible. Students are required to take five courses, including the introductory course, The World of the Middle Ages, and three or four electives in Medieval Studies drawn from at least two of the 11 affiliated departments: (Anthropology; Art, Art History, and Design; Classics; English; German and Russian Languages and Literatures; History; Music; Philosophy; Political Science; Romance Languages and Literatures; and Theology). The Medieval Studies Advanced Seminar (3 credits) is recommended as one of the five courses, in lieu of a medieval elective, on a space-available basis. Courses counted toward a student's major may not be used for the minor.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Medieval Institute](#) heading.

PEACE STUDIES

Director of Academic Programs:
Jaleh Dashti-Gibson

Program of Studies. Peace Studies is defined as the interdisciplinary examination of the conditions that make for peace. It also investigates the obstacles to the realization of these conditions, drawing on theories and methods from diverse disciplines to focus on what makes for the development of a just and peaceful world order. Peace Studies relates scholarship to practice and challenges those who engage in it to develop new ways of thinking and acting in the world.

Notre Dame's Peace Studies program divides its curriculum of courses into three related but distinct areas:

Area A: The role of international norms, institutions, and states in a peaceful world order. An exploration of ways of making governmental and intergovernmental institutions more effective and representative, and of strengthening governmental compliance with fundamental norms of peace and human rights.

Area B: The impact of religious, philosophical, and cultural influences on peace. The study of the ethics of the use of force, theological and philosophical visions of global justice, the ways in which the world religious traditions foment violence or encourage peace, the practice of nonviolence, and the linguistic, literary, and historical dimensions of cultures of peace.

Area C: The promotion of social, economic, and environmental justice. The study of social change, with specific attention to the role of nongovernmental organizations, commercial enterprises, and states

in fostering sustainable economic development, respect for human rights, conflict resolution and nonviolent conflict transformation, support of gender and family issues, and protection of the environment.

In both the supplementary major (24 credit hours of required course work) and in the minor (15 credit hours of required course work), students will complete an introduction course, explore the three key areas of Peace Studies, and participate in a writing-intensive integrative senior seminar.

The Supplementary Major

The supplementary major in Peace Studies requires completion of the introductory course in Peace Studies (three credit hours), one course in each of the three areas of study (nine credit hours), three elective courses in Peace Studies (nine credit hours), and the writing-intensive senior seminar (three credit hours). The program for a supplementary major in Peace Studies follows.

IIPS 30101 Introduction to Peace Studies

Area A one course from list

Area B one course from list

Area C one course from list

[elective]

[elective]

[elective]

IIPS 43101 Senior Seminar

The Minor

The minor in Peace Studies requires completion of the introductory course in Peace Studies (three credit hours), one course in each of the three areas of study (nine credit hours), and the writing-intensive senior seminar (three credit hours). The program for a minor in Peace Studies follows.

IIPS 30101 Introduction to Peace Studies

Area A one course from list

Area B one course from list

Area C one course from list

IIPS 43101 Senior Seminar

For Peace Studies undergraduate courses, the THIRD digit in the IIPS course number indicates the following:

If it is 1, the course is REQUIRED.

If it is 2 or 3, the course is an IIPS elective.

If it is 4 or 5, the course is Area A.

If it is 6 or 7, the course is Area B.

If it is 8 or 9, the course is Area C.

Electives for the supplementary major may be taken from IIPS electives or any course from Areas A, B, or C.

An alphabetical list of courses by area is available on the Kroc Institute website: kroc.nd.edu/programs/undergraduate/index.shtml.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Institute for International Peace Studies](#) heading.

Information on Peace Studies. Peace Studies at Notre Dame is centered in the Kroc Institute for International Peace Studies (in the Hesburgh Center for International Studies). Information on courses available each semester, faculty fellows in Peace Studies, and ongoing activities in Peace Studies can be found on the institute's website, kroc.nd.edu.

PHILOSOPHY AND LITERATURE

Director:

David O'Connor

The minor in philosophy and literature is designed for students who want to pursue an interdisciplinary course of studies that focuses on the intersections between literature and philosophy. Majors from any literature department or from philosophy are eligible for the concentration.

Literature and philosophy have always shared many of their concerns, and the minor is designed to explore this common ground and to establish an interdepartmental forum for both formal study and informal contacts. The minor should also be excellent preparation for students interested in graduate studies.

The curriculum of the minor in philosophy and literature consists of 15 credit hours, distributed as follows:

- A core course: "Philosophy and Literature Seminar," taken with the permission of the director of the P/L Minor and cross-listed in English and philosophy, and/or the department in which it originates. This course is to be taken in the first semester of the minor (spring of the sophomore or junior years). This gateway course is an intensive seminar and will help students and faculty from the various disciplines to speak a common language. Four credit hours.
- At least two one-credit colloquia in the semesters following the core seminar. The colloquia will be devoted to the critical reading and discussion of one or two major works each semester. The colloquia will build on the esprit de corps and intellectual common ground established in the core course.
- Three three-credit courses that fit the intellectual goals of the minor. This part of the curriculum will require written approval of the director of P/L.

Students are encouraged, though not required, to write a senior essay (in the department in which they are majoring) that in some way reflects the interdisciplinary concerns developed in P/L.

INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

For further information, students should contact Prof. David O'Connor, Department of Philosophy, doconnor@nd.edu.

PHILOSOPHY, POLITICS, AND ECONOMICS

The Minor in Philosophy, Politics, and Economics (PPE) is designed for students and faculty with serious interests at the intersection of political theory, political philosophy and economic theory. The minor integrates these three fields, and through seminars and colloquia strives to create an intellectual community among students and faculty that goes beyond formal course work. To be eligible for PPE, students normally must major in either philosophy, political science, economics, or the Program of Liberal Studies (who for PPE requirements are treated as philosophy students). The Justice Seminar, the gateway course into the minor, is always offered in the fall semester; applications for the Justice Seminar are taken in the middle of the preceding spring term.

The PPE faculty committee consists of Paul Weithman (philosophy), Mary Keys (political science), John Roos (political science), Philip Mirowski (economics), Jennifer Warlick (economics), James Sullivan (economics), Dan Philpott (political science), and Alexandra Guisinger (political science). Committee members also serve as advisors for PPE students.

The PPE curriculum consists of 15 credit hours, usually distributed over four semesters, as follows:

A. The Justice Seminar (cross-listed as POLS 43640, ECON 33250, and PHIL 43404), an intensive three-credit seminar that is the gateway course into the minor, taken in the fall semester of sophomore or junior year. Three credit hours.

B. Three one-credit PPE Colloquia, each usually devoted to the critical reading and discussion of one or two major works, normally taken in the three semesters following the Justice Seminar. Three credit hours.

C. Three approved three-credit courses from the two fields outside the student's first major, with at least one course in both non-major fields. Nine credit hours.

Total credit hours: 15.

PPE students are also encouraged (but not required) to write a senior thesis in their major field that reflects the interdisciplinary focus of the minor.

Contact: PPE director John Roos, Department of Political Science, roos.1@nd.edu.

PHILOSOPHY WITHIN THE CATHOLIC TRADITION

Director:

John O'Callaghan

This minor is only open to undergraduates who are majors in either philosophy or theology and who

wish to add to their knowledge of philosophy and theology an understanding of what the distinctively Catholic tradition in philosophy is. It is unlike most interdisciplinary minors in being restricted in this way; work in this minor presupposes a background of some significant work in either philosophy or theology. A central task assigned to philosophy within the Catholic tradition has been that of understanding the relationship of theology to the secular disciplines, so that the relevance both of theology to these disciplines and of those disciplines to theology becomes clear. In this minor, political science will be the secular discipline whose relationship with theology provides a subject for philosophical enquiry.

The Catholic philosophical tradition is one of debate and constructive disagreement and the philosophers whom it will be possible to study in satisfying the requirements for this minor will include thinkers of very different standpoints: Augustine, Anselm, Aquinas, Pascal, Arnould, Newman, Edith Stein and others. Because these thinkers have in common an allegiance to the Catholic faith, they agree in rejecting philosophical positions incompatible with that faith. But they also disagree with each other and in both cases what matters is the quality of their philosophical arguments.

The requirements of the minor are satisfied by taking 15 credit hours, beginning with Philosophy 30326, cross-listed as THEO 30802, God, Philosophy and Universities. Students have to take two appropriate courses in political science and one course on a major Catholic philosopher or set of Catholic philosophers, either in the Theology Department or in the Philosophy Department. No course can count both as satisfying one of the requirements for the student's major and as satisfying one of the requirements of this minor. All students are required to take a capstone seminar in which the question of what part philosophy can play in the integration of the secular disciplines with theology will be addressed through discussion of texts and arguments encountered in earlier courses. Lists of philosophy, theology, and political science courses that will satisfy the requirements of the minor will be available each semester from the director. For further information, please contact the director, Prof. John O'Callaghan.

The Poverty Studies Interdisciplinary Minor (PSIM) contributes to Notre Dame's mission by requiring its students to examine poverty, social injustice, and oppression from the perspectives of the social sciences, the humanities, sciences, and business.

PSIM explicitly recognizes the interlocking nature of the causes of poverty and the problems of low-income families and individuals, and provides a framework that assists students in making the links between the contributions of multiple and varied disciplines. It also helps student contextualize their personal interactions with low-income populations and the institutions that serve them, and make the connections between classroom lessons and real-world experiences.

PSIM features a gateway course that introduces students to the nature, causes, and consequences of poverty. PSIM is an appropriate supplement to every major at the University because it is designed to help students understand how their future civic and political activity and professional work—in almost any area—will invariably impinge on disadvantaged persons and communities. Once students finish the gateway course, they move on to three experiential learning credits and two elective courses. The final requirement is a capstone seminar or a special research project.

Requirements. An interdisciplinary minor in Poverty Studies consists of 15 or 16 credit hours, including a required gateway course (3 credits); three or four credits of experiential learning, depending on the option chosen (service learning, community-based research, or immersion); six credit hours of elective coursework selected from a list of courses approved by the director on the advice of the affiliated faculty; and a 3-hour senior capstone seminar or special studies/senior thesis.

INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

Gateway course (3 credits). PS 10000/20000. The gateway course introduces students to academic research about the nature, causes, and consequences of poverty. Throughout, the readings and lectures reveal the collaboration across the various disciplines, enhances our understanding of what it means to be poor and of the array of interlocking problems that lead to poverty, and guides the formulation of policies to prevent and alleviate poverty. Equal emphasis is given to poor citizens of the United States and developing nations.

Experiential learning (3 credits). The experiential learning requirement is designed to get students into the field where the concepts discussed in classrooms come to life and disciplinary boundaries are challenged. Experiential learning enhances a student's understanding of poverty and prepares students for the final capstone experience, whether it is the capstone seminar or an independent research project. The experiential learning requirement may be satisfied by satisfactorily completing one of the following options:

- three designated 1-credit Center for Social Concerns seminars; or
- three 1-credit semester-long internships with community agencies and organizations serving the poor, or
- one approved 3-credit community-based learning research course.

Three 1-credit seminars offered by the Center for Social Concerns. Participating in CSC seminars is a well-established tradition among Notre Dame students. PSIM students may satisfy the experiential learning requirements by bundling three Center for Social Concerns 1-credit experiential learning seminars with PS 300001. When choosing this option, students must take the Urban Plunge (THEO 33963/CSC 33963), the Appalachia Seminar (THEO 33950/CSC 33950), and one of the following:

- Border Issues (THEO 33966/ILS 30804 01/CSC 33966)
- Children and Poverty Seminar (PSY 23090/CSC 23090)
- Environmental Justice and Human Rights (AFAM 33601/CSC 33976)
- Holy Cross Mission in Hispanic Ministry (THEO 33969E/ILS 30803/CSC 33969#0)
- Lives in the Balance: Youth, Violence, and Society Seminar (CSC 33980)
- Migrant Seminar (THEO 33967/CSC 33967)

Three 1-credit semester-long internships. Each semester, many Notre Dame students engage in 1-credit internships with community agencies and organizations working to improve the well-being of low-income individuals and families. Three semesters of internship with the same or different agencies satisfy this requirement.

One 3-credit community-based research course/project. This requirement may be fulfilled during the academic year satisfactorily by completing a regularly scheduled course with a community-based research component, or by participating in a summer service-learning project sponsored by the Center for Social Concerns, or by completing a Shepherd Program summer internship enhanced by the addition of an academic component similar to CSC's summer service-learning courses or by completing a one-semester 3-credit internship.

Electives (6 credits). Two 3xxxx- or 4xxxx-level courses from the list of approved Poverty Studies minor electives. See nd.edu/~poverty.

Capstone Experiences (3 credits). As the final step in the PSIM, students may choose either to enroll in the capstone seminar or to undertake a 3-credit special studies project directed by one of the affiliated faculty.

Capstone Seminar (3 credits). PS 40000. The capstone seminar is topic-oriented drawing on literature from multiple disciplines. The students will be from different majors and will share the perspectives of their major disciplines as well as their varied experiences in the field, thus ensuring the interdisciplinary nature of the inquiry. Experts with diverse perspectives and professional experiences will join the seminar as special guests.

Special studies capstone option (3 credits) PS 40001. Students may also opt for an intense research or other intellectual experience by enrolling in special studies with one of the minor's affiliated faculty. In this case, the students will produce a project (manuscript, work of art, composition, poster board display of research results, etc.) that can be displayed, and will present this project to the members of PSIM at a special colloquium held in the spring semester of each academic year.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the College of Arts and Letters section under the Poverty Studies heading.

RELIGION AND LITERATURE

Director:

Jesse M. Lander

The interdisciplinary minor in Religion and Literature offers an intellectually rigorous and scholarly approach to formalized study of the inter-relationships between "religion" and "literature" broadly construed. The minor will draw on the rich resources Notre Dame offers, including the faculty and intellectual traditions of Theology and the various literature departments that exist at Notre Dame. The minor's focus is both broad and refined. Its breadth offers students the opportunity to investigate the interanimating and cross-disciplinary influences

of "religion" and "literature." As broad coverage inevitably leads to sharpened questions, students will enjoy the freedom to pursue a specific interest through a refined senior thesis.

The minor enjoys a special consultative and working relationship with many of the university's already identified centers of excellence, capitalizing on both their long-term faculty and other resource expertise as well as making full use of their visiting fellows, special seminars, and general lecture programs. To this end, students who choose the Religion and Literature concentration have extensive and first-rate scholarly resources available to support their own intellectual development.

Curricular Requirements

Normally, students apply for admission to the minor late in their freshman year or early in their sophomore year. The minor requires students to complete 15 credit hours of approved course work; of these no more than three, and in special cases six credit hours at the 20xxx or sophomore level will be accepted toward fulfillment of the concentration's requirements. The balance of the course work must be completed through course work at the senior (30xxx–40xxx) level. Of the overall 15-hour requirement, three credit hours will be awarded for completion of the senior thesis. It is intended that students will, in effect, do a thesis inspired by issues which have arisen in their course work for the minor.

One entry-level "gateway" course will be required of each student desiring a minor concentration in Religion and Literature. Several courses will serve this function, and students must take one of them to complete the minor. Ideally, the student will complete the required class early in his or her course of study.

In addition to the gateway course and senior thesis, students will be required to complete three three-credit courses approved by the Religion and Literature committee, at least two in a discipline other than the student's major.

To promote intellectual cohesiveness within the minor, participating students will be required to take part in a series of seminars and talks organized by the Religion and Literature committee. These events will be structured to take advantage of offerings by Notre Dame faculty members or lectures by visiting scholars whose topics relate to the program's focus. The seminar or lecture presentations will serve to function as either a point of departure or a concluding event in a short, focused study which will include some preparatory reading of material salient to the presentation.

Person to see: Prof. Jesse M. Lander, Decio 203.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the College of Arts and Letters section under the Religion and Literature heading.

Assistant Professor:

Katherine Brading, Philosophy

Science and technology are pivotal forces in modern society and play key roles in shaping cultural sensibilities in the modern world. Indeed, our technologies are reflected in our institutions, our work, our expectations, even in our moral problems. Science, Technology, and Values (STV) is an interdisciplinary minor within which faculty and students from a variety of disciplines and different colleges can reflectively explore the nature of science and technology as human enterprises, interacting in complex ways with our values and social institutions.

The program helps sponsor a wide range of cross-listed courses taught by faculty representing the humanities, the social sciences and the natural sciences. Students electing an STV minor can focus their work on areas of particular interest, such as science, technology and public policy; ethics, ecology and environment; medical ethics; ethical issues in science and technology; humanistic and social aspects of medicine; science and technology as cultural phenomena; history and philosophy of technology.

Students electing a minor in STV must take at least five courses (15 hours) from among those offered under the sponsorship of the STV program. These must include the core course (STV 20556). Students are urged to satisfy this requirement early in the program. At least one course also must be taken

from each of clusters one, two, and three below, and either one additional course from these clusters, or from the elective list in Cluster Four. Nearly all STV courses are cross-listed.

Core Course

20556. Science, Technology and Society

Cluster One: Human Dimensions of Science and Technology

20103. Death and Dying
 20115. Gender, Politics, and Evolution
 20120. Alcohol and Drugs
 20124. Memoirs of Madness
 20125. Philosophy and Science Fiction
 20134. The Technological American
 20139. Minds, Brains, and Persons
 20142. Architectural History II
 20146. History of Communications Technologies
 20149. Environmental Philosophy
 20152. Visual America II
 20154. Modern Physics and Moral Responsibility
 20163. Science and Religion
 20179. Science and Theology
 30106. History of Economic Modern Thought
 30110. Health, Healing, and Culture
 30113. Classical Origins of Medical Terminology
 30132. Environmental History
 30142. History of Ancient Medicine
 30146. History of Communication Technologies
 30152. History of Western Medicine
 30153. History of Psychiatry
 30154. Gender and Science
 30155. History of Photography to WWII
 30157. Introduction to the Philosophy of Biology
 34162. History of Science and Technology in Britain (taught in London only)
 30175. Environmental History
 30181. Science and Medicine in the Islamic World
 30189. Philosophical Issues in Physics
 33195. Technology and Social Change
 40113. Computer as Social Phenomenon
 40118. Witchcraft and Occult 1400–1700.
 40119. Monsters, Cyborgs, and Other Created Bodies
 40126. Philosophy of Cognitive Science
 40130. Crime, heredity, Insanity in the U.S.
 40135. Philosophy of Science
 40140. Science and Social Values
 40144. Religion and Science
 40147. History/Design: Form, Values, and Technology
 40151. Psychology and Medicine
 40152. History of Medicine to 1700.
 40153. Visits to Bedlam
 40154. Cultural Aspects of Clinical Medicine
 40155. Christ and Prometheus: Evaluation/Technology
 40157. Philosophy of Biology
 40166. History of Modern Astronomy
 40167. Global Food Systems
 40172. History of Chinese Medicine
 40174. Philosophy and Psychiatry
 40181. Philosophy of Human Biology
 40186. Medicine in Modern History

40187. Technology in History
 40194. Building America
 43134. Addiction, Science, and Values
 43136. Nature in America
 43169. Darwinian Revolution
 43171. History and Conceptual Foundations of Space/Time

Cluster Two: Science, Technology, and Ethics

20216. Biomedical Ethics and Public Health Risk
 20221. Biomedical Ethics
 20245. Medical Ethics
 20247. Environmental Ethics
 20248. Modern Science and Human Values
 20258. Philosophy of Technology
 20260. Theology, Ethics, and the Environment
 20282. Health Care Ethics in the 21st Century
 30201. Introduction to Clinical Ethics
 40175. Ethical and Professional Issues in Computer Science and Engineering
 40216. Biomedical Ethics and Public Health Risk
 43243. Ethics and Science
 43283. Ethics and Risk

Cluster Three: Science, Technology, and Public Policy

20304. Energy and Society
 20306. Environmental Chemistry
 30311. Introduction to the American Health Care System
 30382. Technology of War and Peace
 33370. Economics of Science
 34366. Medical Practice and Policy UK (Taught in London)
 40319. Self, Society, and Environment
 40357. Computers, Ethics, and Public Policy
 43328. Science Policy and Politics
 43363. Spy Culture: Surveillance, Privacy, and Society
 43364. Technology, Privacy and Civil Liberties
 43396. Environmental Justice

Cluster Four: Optional Electives

20419. Brief History of Time/Space/Motion
 20421. Writing Speculative Fiction
 20431. Philosophy and Cosmology: A Revolution
 20435. Ethics of Energy Conservation
 20441. Environmental Studies
 20452. Ethics, Ecology, Economics and Energy
 20461. Nuclear Warfare
 30445. Technologies and Shaping of America
 30476. Place, Environment, and Society in Australia and Melanesia
 40401. The Future of Energy
 40402. Wireless Communications: The Technology and Impact of 24/7. Connectivity
 40403. Nanotechnology: Opportunities and Challenges
 40424. Technology and Development in History
 40498. Energy and Climate
 43400. Science, Technology, and Values in Contemporary Society

AREA STUDIES MINORS

43409. Evolutionary Psychology and the Sacred
 43414. Abortion, Euthanasia, and Capital Punishment
 43445. The Internet—Interpretations
 43470. Molecular Revolution
 46497. Directed Readings

Because individuals attracted to the STV minor have diverse interests and differing academic backgrounds, the program advisor works closely with each student to help select courses that will complement the student's major program or be most relevant to particular career aspirations.

Contact Gregory L. Macklem, STV Program office, 309 O'Shaughnessy Hall. Web address: nd.edu/~strv.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Science, Technology, and Values](#) heading.

Area Studies Minors

Program of Studies. The College of Arts and Letters offers its students the opportunity to pursue an interdisciplinary sequence of area studies minor that may supplement the major. Currently, there are minors in African Studies, Asian Studies, Irish Studies, Latin American Studies, Mediterranean/Middle East Studies, Russian and East European Studies and West European Studies.

The purpose of these minors is to assemble the courses dealing with the language, literature, history, politics, anthropology, philosophy, sociology and economics of each area. In this way a meaningful course structure is available to students who wish to concentrate their scholarly interest upon a cultural or geographical area as well as upon an interdisciplinary approach. Such programs can be especially useful to students who plan a career in international business, international organizations or government service or who intend to do graduate work in one of these areas.

The student who wishes to complete one of the area studies minors is required to take at least four area studies courses (12 hours) distributed over three different departments. These courses must be taken in addition to those required for the major. The student must also take courses in a language of the area being studied (Russian or an East European language for the Russian Studies program; Spanish or Portuguese for the Latin American Studies program; French, German or Italian for the West European Studies program; a Mediterranean language for the Mediterranean/Middle East Studies program; Irish for the Irish Studies program; and Japanese, Korean, or Chinese for the Asian Studies program). In most cases the required number of courses will be equivalent to those required to satisfy the arts and letters language requirement, but students should check with program directors for the specific requirements of a given area. While not required to take additional language instruction for the African Studies program, students who plan to continue their African interest at the graduate level are encouraged to develop a competency in Swahili, French, Portuguese, or Arabic. In the senior year, each student must submit a satisfactory essay based upon research that combines the major discipline with the area studies curriculum.

Students interested in an area studies minor should consult the director (listed below).

ASIAN STUDIES

Director:

Howard Goldblatt

The program in Asian Studies introduces students to the complexity of the continent of Asia. They select courses in a wide variety of fields, such as anthropology, East Asian languages and cultures, economics, film, television, and theatre, history, political science,

and psychology. The Center for Asian Studies also provides enriching activities such as lectures, films, gatherings, and grant opportunities to students interested in Asia.

Students with the supplementary major or the minor in Asian Studies will be very desirable employees of international business or accounting firms, nongovernmental organizations, and service organizations. They will be well prepared for graduate school in a discipline, or for professional school such as law or business. The supplementary major and the minor in Asian Studies provide recognition of students' training in this significant region of the world.

THE MINOR IN ASIAN STUDIES

Students who are contemplating graduate study in a particular area of the world or a career in international business or government—or those who are merely curious—are well served by the Minor in Asian Studies. It provides a well-rounded introduction to the world's most populous continent. The Minor in Asian Studies is a very appropriate accompaniment to majors in anthropology, East Asian languages and cultures, history, political science, economics, or other arts and letters departments. It is also suitable for students in the Mendoza College of Business.

This interdisciplinary minor requires four courses in Asian Studies (12 credit hours) from at least three different departments and at least one full year of a relevant Asian language. In the senior year, students write a capstone project under the direction of a faculty member affiliated with the center and overseen by the director of the Center for Asian Studies.

Students should meet with the director of the Center for Asian Studies as early as possible in their academic career in order to plan their courses wisely. They should also meet with the director each semester to select approved courses.

Requirements for the Minor:

Prerequisite: One year relevant Asian language (9–10 credit hours)

- Four Asian Studies courses, from at least three different departments (12 credit hours)
- Capstone project during the senior year (3 credit hours)

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Center for Asian Studies](#) heading.

AREA STUDIES MINORS

THE MINOR IN EUROPEAN STUDIES

Director:

A. James McAdams

The Institute

Stretching from the Atlantic Ocean to the Ural Mountains, Europe plays a critical role in global affairs. The ongoing expansion of the European Union is helping to unite many countries and people in a traditionally diverse region. As future leaders, Notre Dame students need to know about European history, politics and culture in order to succeed in the contemporary world.

The Nanovic Institute for European Studies is committed to enriching the intellectual culture of Notre Dame by creating an integrated, interdisciplinary home for students and faculty to explore the evolving ideas, cultures, beliefs, and institutions that shape Europe today.

The Minor

Administered by the Nanovic Institute, the Minor in European Studies (MES) allows students to explore topics of interest and relevance in the field of European Studies. Through both coursework and independent study, students will examine the politics, history, and culture of Europe.

The program has three component requirements:

- completion of four upper-division courses from three different departments in approved areas of European Studies
- one semester of European language study beyond the College of Arts and Letters requirement (note: this applies to students in all colleges)
- a capstone thesis essay on a topic within European Studies, to be completed during the senior year

Other Undergraduate Support

The Nanovic Institute also administers a wide range of undergraduate grant programs. European Studies minors and other undergraduates wishing to travel to Europe to conduct research, carry out internships, pursue advanced language study, or to complete other academic initiatives are encouraged to apply for support.

For more information, interested students should consult the institute's website at nanovic.nd.edu.

IRISH STUDIES

Director:

Christopher Fox

The Keough-Naughton Institute for Irish Studies provides students with a unique opportunity to explore Ireland's extraordinary tradition in literature (in both the English and Irish languages) and distinctive historical development, including its influence on the history of the United States. The Irish Studies faculty includes leaders in several fields, including English, history, film, anthropology, and Irish language and literature. The Irish Studies

Program also organizes a calendar of intellectual and cultural activities in which undergraduates are encouraged to participate; visitors to campus have included Seamus Heaney and John Hume, both Nobel Prize winners, and other leading Irish writers and public figures.

Minor

The core of the program is a minor in Irish Studies. The minor helps students develop their understanding of Irish society, culture, and politics through both course work and firsthand experience of Ireland. To qualify for the minor, students must (a) demonstrate proficiency in Irish language (by taking IRST 10101, 10102, and 20103); (b) complete four three-credit Irish Studies courses (mainly in the fields of history; English; Irish language and literature; sociology; politics; film, television, and theater; or anthropology), and (c) write a capstone essay in their senior year that links the minor with their major. Qualifying courses are listed in the Schedule of Classes under IRST; the list is available each semester from 422 Flanner Hall.

Dublin Program

The home of the Dublin program is the Keough-Naughton Notre Dame Centre in O'Connell House in the historic heart of Ireland's capital. Each semester, some 35 Notre Dame students enroll for courses in the Centre and at Trinity College Dublin, University College Dublin, and the National College of Art and Design. The program includes several field trips and a variety of social and cultural activities. Students taking the Minor in Irish Studies have a distinct advantage when applying for this highly competitive program.

Irish Internships

The Keough-Naughton Institute for Irish Studies annually awards Keough Irish Internships, which place undergraduates in internship positions in Dublin relating to Irish politics and commerce, culture, and society. In the past, students have been placed in the Irish parliament, government departments, the Irish Film Centre, and various social service organizations. The Internships last for a period of seven weeks. Two Internships are reserved for students taking the Minor in Irish Studies.

For further information, students should consult Prof. Christopher Fox, director; telephone 631-3555.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Keough-Naughton Institute for Irish Studies](#) heading.

DEPARTMENT OF IRISH LANGUAGE AND LITERATURE

The only one of its kind in North America, the Department of Irish Language and Literature gives undergraduates the opportunity to complete a minor in Irish language and literature. The minor teaches students Irish, the indigenous language of Ireland and the voice of the oldest vernacular literature in Europe. It also allows them to engage Irish culture in its native language.

Officially launched on October 1, 2004, by His Excellency Noel Fahey, Irish Ambassador to the United States of America, the Department of Irish Language and Literature recognizes Notre Dame's commitment to the Irish language and the centrality of Irish to the academic discipline of Irish Studies.

Students pursuing a minor in Irish language and literature are required to complete the following courses:

1. Take and pass the following Irish language courses: Beginning Irish I & II, Intermediate Irish and Advanced Readings in Irish Culture.
2. Take and pass three Irish literature courses offered by the Department of Irish Language and Literature, two of which must be a 300 level or above.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Irish Language and Literature](#) heading.

LATIN AMERICAN STUDIES PROGRAM

Director:

Jaime Ros

This program promotes opportunities for students to deepen their understanding of the region through a variety of courses, campus activities, internships, and firsthand overseas learning experiences. Through the Kellogg Institute, the program offers a calendar of cultural events, summer research and internship grants, current affairs panels and regular talks on Latin America by Notre Dame faculty and visiting lecturers. In addition, the institute brings several visiting fellows each semester who are from Latin America or who specialize in the region; these fellows visit classes and meet with students.

The core of the program is a minor in Latin American Studies. The minor aims to give students well-rounded training that complements their major area of study and to make this training easily recognized on a graduating student's transcript. To qualify for the minor, students must demonstrate proficiency in Spanish or Portuguese (through two courses at the University or advanced placement), and complete four courses on Latin America that are

AREA STUDIES MINORS

distributed across at least three departments. During the senior year, students must complete an area studies essay or take a designated seminar.

Qualifying courses are listed each semester in the Schedule of Classes under LAST. They include courses such as Contemporary Latin American History, Economic Development of Latin America, Latin American Politics, Liberation Theology, Sociology of Development, and Spanish-American and Brazilian Literature. The program offers the John J. Kennedy Prize annually for an outstanding senior essay dealing with a Latin American topic. The summer research grants are offered through Kellogg to students after their junior year to encourage undergraduates to undertake original research on international subjects. The summer internships aim to provide undergraduates real-world experience in dealing with Latin American issues. The summer fellowships offer freshmen and sophomores the opportunity to engage in initial exploratory projects in Latin America. For more complete information about courses that qualify each semester for the minor degree, the calendar of events or the summer research and internship competitions, please consult the LASP Web page at kellogg.nd.edu/students/lasp, or call Holly Rivers, assistant director, at 631-6023.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Latin American Studies](#) heading.

RUSSIAN AND EAST EUROPEAN STUDIES

Directors:

Alyssa Gillespie and Semion Lyandres

The interdisciplinary minor in Russian and East European Studies enables students to enrich their understanding of this rapidly changing and strategically important region of the world through a robust offering of courses in language, literature, history, politics, art, anthropology, film, music, and economics, while also encouraging firsthand experience of the area through study abroad during a summer or semester. Throughout the academic year, the Program in Russian and East European Studies sponsors a full slate of cultural activities—including film series and visits to musical events and art exhibits—that allow students to expand their knowledge of the region beyond the scope of their coursework. In addition, the Russian and East European Studies lecture series brings nationally and internationally renowned scholars to campus to share their latest research in fields pertinent to the minor; these lectures are tailored to the undergraduate audience and often tie in closely with courses currently being taught or program-sponsored cultural events. Russian and East European Studies cooperates closely with the Department of German and Russian, History, and other participating

departments to sponsor a monthly Russian language table and a variety of social gatherings.

The core of Russian and East European Studies is the undergraduate program, which offers students the option to pursue a supplementary major or minor (the minor option consists of two tracks and is available to Russian and history majors only; the supplementary major option is open to any interested student). These options offer students valuable interdisciplinary training in the areas of Russian and East European languages, literature, culture, history, and politics that will help them to understand this important region of the world from a variety of interrelated disciplinary perspectives.

The Supplementary Major in Russian and East European Studies

Supplementary majors in Russian and East European Studies must have (1) three semesters (or the equivalent) of college-level Russian or another approved Central or East-European language (German will be accepted in certain cases); (2) five additional courses (15 credits) in Russian and East European area studies, normally taken in residence at Notre Dame and including at least two literature/culture courses at the 30000 level or above and two approved history courses; (3) three 1-credit courses chosen from language-across-the-curriculum tutorials, a Research Apprenticeship in political science on a Russian and East European Studies related research project (POLS 47905), and/or cultural enrichment offerings (RU 47100) in Russian and East European Studies; and EITHER (4) a substantial senior thesis directed by a member of the Russian and East European Studies faculty (students will receive 3 credits in the fall semester for preparation of the thesis and 3 credits in the spring semester for writing the thesis) OR (5) a sixth 3-credit course in Russian and East European area studies in any discipline *and* a one-semester senior seminar with a focus on a Russian and East European Studies topic, culminating in a senior essay.

The Minor in Russian and East European Studies (Russian Majors' Track)

This minor option is available to students making good progress toward completion of a full or supplementary major in Russian. The minor requires (1) four courses (12 credits) in Russian and East European area studies, normally taken in residence at Notre Dame and including at least one Russian literature/culture course at the 30000 level or above and at least two approved history courses (language courses, including RU 40101/40102, will *not* satisfy this requirement); and (2) two 1-credit courses chosen from language-across-the-curriculum tutorials, a Research Apprenticeship in political science on a Russian and East European Studies related research project (POLS 47905), and/or cultural enrichment offerings (RU 47100) in Russian and East European Studies.

The Minor in Russian and East European Studies (History Majors' Track)

This minor option is available to students making good progress toward completion of a history major, including a Russian and East European Studies concentration consisting of at least three approved courses on topics in Russian or East/Central European history. The minor requires (1) two semesters of college-level Russian or another approved Central or East European language (German will be accepted in certain cases; language courses satisfying this requirement may *not* be double-counted between a college language requirement and the REES minor); (2) two courses (12 credits) in Russian and East European area studies, normally taken in residence at Notre Dame and consisting of two Russian literature/culture courses at the 30000 level or above, although one relevant course in another department, including history, may be substituted with approval; and (3) two 1-credit courses chosen from language-across-the-curriculum tutorials, a Research Apprenticeship in political science on a Russian and East European Studies related research project (POLS 47905), and/or cultural enrichment offerings (RU 47100) in Russian and East European Studies.

Mendoza College of Business

The Mendoza College of Business, an accredited member of AACSB—The Association to Advance Collegiate Schools of Business—was established in 1921.

As a constituent unit of Notre Dame, the Mendoza College of Business constantly strives to realize the general objectives of a Catholic university. In a special sense Notre Dame seeks to inspire a search for learning in the professional sphere of business and cultural areas so business graduates are prepared to assume the obligations of Christians in business.

The undergraduate student body of the college is made up of sophomores, juniors, and seniors. Students who successfully complete the First Year of Studies are eligible for admission to the college at the beginning of the sophomore year.

The dean of the college has responsibility for admission following the First Year of Studies, as well as the registration, rating, probation, academic dismissal, and graduation of students with a Bachelor of Business Administration (BBA) degree.

Programs of Study

Notre Dame has always recognized that education, to be effective, must be dynamic. It should be modified continually to meet the changing needs of the students and society. The primary purpose of revisions in the educational program is to continue the regular improvements of the Mendoza College of Business.

An examination of the requirements of business led to the conclusions that the business world has a growing need for competent business administrators and that Notre Dame has a responsibility to help develop young people capable of assuming important administrative positions.

The business world has always required people with initiative, a willingness to take risks and the stamina to live in a competitive world. The competitive demands for new and better products in larger quantities at lower costs produce business operations which are extensive and involve a large number of highly specialized people. The administrator, whose job it is to put the work of many specialized people together into a smooth-working whole, has traditionally developed administrative skills by rather accidental means: by knowing instinctively, by learning from experience or by building upon some specialized body of knowledge and skill. Colleges have participated principally by furnishing the specialized bodies of knowledge supplemented with liberal arts courses.

The professional purpose of the business program is to focus attention directly on the skills and

knowledge required by the business administrator and to help students acquire knowledge and develop those skills in a systematic way.

This work is especially appropriate at Notre Dame. The responsibility of business to its employees, customers, suppliers, owners, and the public is being recognized and studied with growing intensity in many quarters. This responsibility raises ethical issues to which Notre Dame and its graduates should respond in a sound and practical way. The continuing attempt to improve the practical application of ethical principles to competent performance in administrative jobs is a prime concern of the Mendoza College of Business.

Objectives. In light of the responsibility of the Mendoza College of Business for guiding students toward a liberal education in the Christian tradition and toward future responsibilities as business administrators, the following general framework has been formulated:

As a division of the University of Notre Dame, the Mendoza College of Business has the obligation to teach its students so that upon graduation they may have the knowledge of those ultimate principles whereby all things are capable of being organized into an intelligible whole.

Educational Objectives. The educational objective of the undergraduate program in the Mendoza College of Business is to assist and guide students in preparation for lifelong learning, for effective citizenship and for professional careers as competent and ethical participants in business, government, and other complex organizations. This is accomplished by educating students in the professional area of business while remaining true to the scholarly, liberalizing, and Catholic mission of the college and the University.

Within this general framework, the specific objectives of the undergraduate program of the Mendoza College of Business include the following:

1. *Providing* students with the foundation for a sound liberal education, including an appreciation for scholarship, creativity and innovation, and ethical behavior.
2. *Fostering* in students a recognition of the importance of administration, management, and entrepreneurship as professions and a recognition of the responsibility to manage organizational affairs and resources in a manner that will contribute to both organizational and societal goals.
3. *Inspiring* students to be leaders in their profession and developing the capabilities necessary for this responsibility, namely:

(a) broad knowledge of the structure, interrelationships, and problems of a rapidly changing global society;

(b) competence in analyzing and evaluating business problems, and in communication and other interpersonal skills;

(c) comprehensive understanding of the administrative function, the complexity of business and other enterprises, and the tools of management; and

(d) skill in using knowledge to develop creative responses to opportunities and threats faced by organizations and by society.

4. *Facilitating* the integration of the students' professional expertise with Notre Dame's sense of values.

The Program. The educational activities of a university and a college are broader than the mere teaching of courses. Nevertheless, one of the main expressions of an educational plan is its program of instruction. Several features of the program itself and certain fundamental concepts on which it is based deserve special comment.

The college recognizes four distinguishable but inter-related types of education to which future business leaders should be exposed: (1) study in the fields traditionally called liberal; (2) a basic understanding of the operation of a business enterprise; (3) an understanding of the economic and legal climate or atmosphere in which business functions and of which business is a part; (4) a professional concentration in a major for the student's in-depth educational pursuit, which will also provide some preparation for future employment.

The curriculum of the three-year business program combined with that of the First Year of Studies requires approximately one-half of the instruction to be in traditional liberal arts areas. The faculties of the College of Arts and Letters and the College of Science provide the instruction for the liberal arts courses.

Upon entering the Mendoza College of Business at the beginning of the sophomore year, the student registers for a program which introduces the basic tools of business and the functions of accounting, information systems, financial management, management, business statistics, marketing, and business law.

In the junior and senior years the student continues his or her studies using the analytical tools developed in the sophomore year. The student enters into a consideration of the operation of the business firm and the economic and legal climate of business. The examination of the economic climate in which business must operate is concerned with the

CURRICULUM FOR THE DEGREE OF BACHELOR OF BUSINESS ADMINISTRATION

fundamentals of money and banking, the role of the federal government in terms of its fiscal and monetary policies, and the concepts of national income accounting that afford a basis for measuring and forecasting economic change. A student gives emphasis to his or her major and may either add to minimum major requirements or elect other course areas for study.

Curriculum for the Degree of Bachelor of Business Administration

The college stands ready to accept all applicants who have successfully completed the course requirements of the First Year of Studies at Notre Dame. Ordinarily, this will represent a minimum of 30 credit hours of work (exclusive of laboratories and ROTC) from a

mong the following credits:

<i>University Requirements</i>	<i>Courses</i>
Composition	1
*Mathematics	2
*Science	2
*History	1
*Social Science	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature	1
**Physical Education	2
	14

* *One of these requirements must be University Seminar 13180–13189.*

** *This requirement can also be fulfilled through first-year enrollment in ROTC.*

Only courses designated as “Univ. Req.” in the online Schedule of Classes can be used to fulfill a University requirement. These courses can be viewed for a particular academic term by selecting the “Schedule of Classes” link within *insideND* or by using Class Search within *insideND* to seek the appropriate course attribute.

First-year students are required to complete a University seminar; composition; two semester courses in mathematics; two semester courses in science; one semester course chosen from history, social science, philosophy, theology, or fine arts; and two semester courses in physical education or ROTC. The University seminar can satisfy the relevant requirement in fine arts, literature, history, social science, philosophy, theology, mathematics, or science.

During the sophomore year, a student ordinarily will complete the following credits:

6 in Principles of Accountancy I and II
3 in Corporate Financial Management
3 in Principles of Marketing
3 in Principles of Management

3 in Business Law
3 in Statistics in Business
3 in IT Management Applications
3 in Theology or Philosophy
3 in a nonbusiness elective
1 in Ethics

The sequence and order of completion of courses will vary according to the availability of courses.

The BBA degree requires a total of 126 credits. Of these credit hours, a student has up to 8 free elective credits and 21 credits in non-business elective courses. Consequently, a student has considerable flexibility in selecting courses that meet his or her particular academic and career plans. Majors are available in accountancy, finance, marketing, management consulting, management entrepreneurship, and information technology management. Second majors or concentrations in subject areas outside the college are available. Students should refer to specific departments for opportunities and requirements.

A graduate from the college will have accumulated credits in the following areas, which include freshman- and sophomore-year credit hours:

3 in Composition
6 in Mathematics
6 in Science
3 in History*
3 in Social Science (excluding Economics)*
3 in College of Arts & Letters (excluding Economics)*
3 in Literature* or Fine Arts*
6 in Philosophy*
6 in Theology*
3 in Principles of Microeconomics
6 in Accountancy I and II
3 in Corporate Financial Management
3 in Principles of Marketing
3 in Principles of Management
3 in Statistics in Business
3 in IT Management Applications
3 in Business Law
1 in Introduction to Business Ethics
3 in Macroeconomic Analysis
3 in Managerial Economics
1.5 in Strategic Management
1.5 in Introduction to Process Analytics
3 in Foresight in Business and Society
1.5 in Integrative Course**
18–21 in major***
21 in nonbusiness electives
5–8 in free electives
2 semesters of physical education or ROTC

* *One of these three-credit requirements must be a University Seminar course.*

** *The integrative course is normally fulfilled by an approved course in the student's major, releasing 1.5 credit hours to elective status.*

*** *A minimum GPA of 2.000 is required in the major.*

General administration of the undergraduate program is accomplished in the Office of the Assistant Dean for Administration, Room 101 Mendoza College of Business, which is also the repository for BBA student records. Advisors are available in this office to counsel students and answer questions concerning university and college requirements/policies. Faculty mentoring for juniors and seniors is available from their respective major departments; however, Room 101 advisors will continue to provide general advice on college and University issues. The department offices of the college, i.e. accountancy, finance, management, and marketing, are located in Room 102 of the Mendoza College of Business.

Normal semester course load for sophomores is 15–16 hours; for juniors, 18–19 hours; and for seniors, 15–19 hours. The minimum semester course load for all students is 12 hours. Normally, a grade point average of 3.4 or higher for the previous semester is required to obtain permission to carry an overload. Interested students should contact the assistant dean's office for specific information.

With permission from the academic dean, juniors and seniors who register for and maintain a minimum of 12 credit hours may elect one course per semester under the pass-fail option. Only free elective and non-business elective courses may be taken pass-fail. No business courses, required courses, or courses in a student's second major or minor department may be taken pass-fail even though taken as a free elective. The selection of a course as pass-fail must be made during the first week of the semester and is irrevocable. Note: to be eligible for Dean's List status, a student must have a minimum of 12 graded credits for the semester.

Students may elect to fill free elective or non-B.A. elective requirements with 1-, 1.5-, or 2-credit-hour courses, AP credit, or Credit by Exam. However, a minimum of 18 of the free or non-B.A. elective credits must be filled with standard 3- to 6-credit courses or graded 1.5-credit courses.

The college accepts a maximum of six credits through AP and/or credit by exam in any one language toward degree-seeking credits.

To be eligible for the BBA degree, students must complete a minimum of 63 credits at Notre Dame, including their senior year.

Directed readings or special studies are not part of a standard curriculum for students in the Mendoza College of Business and cannot duplicate or substitute for an existing course. Directed readings or special studies are rare exceptions to established coursework, designed to support an area of research or study that is of mutual interest to a faculty member and a student. These courses contain advanced objectives beyond those covered in regularly scheduled courses—not introductory material or material taken from the popular literature that should more properly be considered “self-improvement” than academic in nature. Unless special permission

INTERNATIONAL STUDY PROGRAMS

has been obtained from the Mendoza College of Business Office of Undergraduate Administration, a directed reading special studies course will not satisfy a University, college, or major requirement. Directed readings or special studies outside of a student's major in business may count as free elective or non-B.A. elective credit only. A student may register for no more than three credit hours of directed readings or special studies in any given semester. No more than a maximum of nine directed readings or special studies credit hours may be applied toward the 126-credit-hour BBA degree requirements.

International Study Programs

Students from any of the majors in the Mendoza College of Business may participate in international study programs.

For more than a decade, Notre Dame has made it possible for students to earn credits toward graduation in international study programs. Travel, direct personal experience of another language and culture, and study in another tradition all broaden and deepen the liberal education of the whole person, to which the University has always been committed.

Qualified undergraduates can spend all or part of their sophomore or junior year in such places as Angers, France; Innsbruck, Austria; Dublin, Ireland; London, England; Fremantle, Australia; Monterrey and Puebla, Mexico; Nagoya, Japan; Santiago, Chile; Shanghai, China; Toledo, Spain; and Athens, Greece. New program locations are periodically added.

International study programs make a unique contribution to the excellence of liberal education in the undergraduate colleges and frequently have proven a real asset in career development.

For further information and advice on international study, students of the Mendoza College of Business may contact the assistant dean, Room 101 Mendoza College of Business, and/or the director of the International Study Programs, 152 Hurley.

Student Awards and Prizes

The Hamilton Awards. Founded by Robert L. Hamilton '34, Racine, Wis., these awards are given to the outstanding senior in each of the four departments of the college.

The Dean's Award. This award is given to the graduate whose leadership has contributed most significantly to the progress of the college.

The Herman Crown Award for Outstanding Achievement in Finance. An annual award made by the Department of Finance in memory of the late Herman Crown and given to the senior finance major with the highest overall grade point average.

Raymond P. Kent Award. An annual award given to a senior finance major for outstanding performance in finance classes.

Paul F. Conway Award. An annual award given to a senior in the Department of Finance who embodies the characteristics that define our tradition of excellence: a person of keen intellect who enriches the ideals of Notre Dame.

LeClair Eells Award. An annual award given to a senior finance major for outstanding leadership.

Wall Street Journal Award. Given to a senior in the Department of Finance for rendering outstanding service to the department.

Paul D. Gilbert Award for Leadership. An annual award given to a marketing senior for overall leadership in extracurricular departmental activities. The recipient is selected by the faculty of the Department of Marketing. The award is named for the late Paul D. Gilbert, a local business executive, civic leader, and longtime friend of the department.

Wesley C. Bender Award for Outstanding Performance in Marketing. An annual award given to the senior marketing major with the highest grade point average in marketing courses. The award is named for the first chairman of the Department of Marketing, Wesley C. Bender.

John R. Malone Award. An annual award given to the junior marketing major with the highest overall grade point average.

Robert M. Satterfield Award. Given to a marketing student for bringing enthusiasm, integrity, and a spirit of teamwork to the classroom.

David A. Appel Award. Given to a marketing student for exemplary service contributions.

Tara K. Deutsch Award. An annual award given to an accounting senior who has shown exemplary social consciousness and devotion to efforts to give hope to the less fortunate.

Accountancy Chairman Award. An annual award provided to an accounting senior who demonstrates outstanding service to the Department of Accountancy.

Accountancy Excellence Awards. Given annually to 20 sophomores who declare accountancy as their major and have demonstrated outstanding economic achievement. The awards are funded by annual gifts from Deloitte & Touche, Ernst & Young, KPMG, and PricewaterhouseCoopers.

Peter Brady Award. Established to honor past faculty member Peter Brady, this award is given in recognition of outstanding economic performance to a senior who is entering Notre Dame's Master of Science in Accountancy program.

Elmer Layden Awards. Given annually to graduating accounting seniors in recognition of academic

achievement. The awards are funded by the Elmer Layden Jr. Endowed Fund.

Brother Cyprian Awards. Given annually to graduating accounting seniors in recognition of academic achievement. The awards are granted in honor of Holy Cross Brother Cyprian O'Hare (iBrother Zip), who helped to launch Notre Dame's accountancy education program in 1895 and later served as department chair.

James Dincolo Awards. Given annually to graduating accounting seniors in recognition of academic achievement. The awards honor former accountancy professor James Dincolo and are funded by an endowment in his name.

The Indiana Certified Public Accountants Society Award. Founded in 1950 by the board of directors of the Indiana Association of Certified Public Accountants, this annual award provides a plaque to an outstanding senior in accountancy.

The Management Award. Given to the outstanding ITM senior in the Department of Management.

The Justin Harris Brumbaugh Memorial Award. Given annually to the graduating ITM major who has excelled academically and has been selected by the graduating seniors as best representing the unique and enduring spirit of Notre Dame.

The Accountancy Faculty Award. This award recognizes an outstanding senior in the Department of Accountancy in the Mendoza College of Business. It is given to an outstanding senior with one of the highest cumulative grade point averages.

Eugene D. Fanning Award. Given to a senior man and woman who demonstrate exceptional achievement in business communication; excellence in writing, speaking, listening, and interpersonal communication; and who demonstrate leadership potential, initiative, integrity, and respect for the dignity and rights of others.

The Charles G. Morrow Award for Business Excellence. This award was established by the five children of the late Charles G. Morrow, Class of 1938, in honor of his contributions to Notre Dame and the business community. Given to a graduating senior in the Mendoza College of Business, this award recognizes business excellence through documented service, leadership, and personal integrity.

Student Organizations and Activities

Students' academic organizations are supported and encouraged by the administration and the faculty. These associations are actively managed by student officers. Members of the faculty serve in advisory capacities.

Honorary Societies.

Beta Gamma Sigma. Notre Dame shares, with selected colleges of business nationwide, this

STUDENT ORGANIZATIONS AND ACTIVITIES

honorary society's stated purposes of encouraging scholarship and achievement among business administration majors. It promotes education in business administration and fosters integrity in the conduct of business. Undergraduate membership in this organization is restricted to the upper 10 percent or less of the senior class and the upper 5 percent or less of the junior class for all full-time students. Faculty membership is limited to those with tenure in the Mendoza College of Business at Notre Dame.

Beta Alpha Psi. Accountancy majors who have demonstrated outstanding scholastic ability and the personal characteristics requisite to professional status are eligible for membership in the Beta Sigma chapter of Beta Alpha Psi, the national professional and honorary accounting fraternity. The purposes of this fraternity are to encourage and foster the ideal of service as the basis of the accounting profession; to promote the study of accountancy and its highest ethical standards; to act as a medium between professional persons, instructors, students and others who are interested in the development of the study or profession of accountancy; to develop high moral, scholastic, and professional attainments in its members; and to encourage cordial interaction among its members and the profession generally.

Advisory Council Investment Fund. Through the generosity of William R. Daley, a former member to the college's Advisory Council, undergraduate students are able to learn the principles of investment and portfolio management firsthand. The investment policy of this fund is determined by the students under the guidance of a faculty advisor. Annual reports are submitted to the dean and to the University's investment officer.

Finance Club. The goal of the Notre Dame Finance Club is to enhance its members' knowledge of the financial world. The club achieves this goal through providing professional speakers, company information sessions, and the annual Fall Break trip to Chicago and New York. These events provide the members with exposure to the diverse careers within the financial industry. In addition, the exposure allows club members a unique networking opportunity, which may lead to career opportunities for internships or full-time employment after graduation.

Notre Dame Accounting Association (NDAA). The Notre Dame Accounting Association exists to provide junior and senior accountancy majors and sophomore business majors who are considering accountancy as a major, an organization which provides support, employment contacts, social gatherings and events, and a unifying bond in the form of membership. Sophomores, juniors, and seniors majoring in, or intending to major in, accountancy are eligible for membership. For more information, please visit nd.edu/-ndaa.

Marketing Club. The Marketing Club provides an opportunity for junior and senior marketing majors to learn about the field of marketing. Business

executives who are active in the marketing profession are invited to speak to members several times during the year. These businesspeople address the club on a variety of marketing, selling, and advertising topics. The Marketing Club is also very active in promoting the students for permanent positions or internships via a career night held each fall.

Notre Dame Information Technology Management Club (NDITM). The purpose of this club is to provide a forum for all students interested in the field of information technology management, particularly ITM majors, to exchange ideas and to more fully develop their skills and cover potentials in this dynamic field of study. The NDITM club goals are accomplished through activities that foster greater interaction among students, faculty, and corporate recruiters. These activities include inviting guest lectures, computer skill seminars, tutoring sophomores and juniors, social gatherings, and sports events.

Student International Business Council (SIBC). As one of the largest student organizations on campus, the SIBC is committed to its vision of establishing peace through commerce while educating its members and providing them an avenue to develop vital business and interpersonal skills with an international focus. The council is organized into various divisions representing all majors and concentrations within the Mendoza College of Business. Members are actively a part of projects which strive to offer unmatched, hands-on experience in everything from simulating the structure and debates of the European Central Bank and forming an in-depth fundamental and technical financial analysis of an international company, to managing the council's marketing needs and developing and maintaining our own website.

The council is also dedicated to bettering international relations by means of socially-conscious activities. One of note is the Haiti Bednet project that receives funding from both the SIBC and the W.K. Kellogg Foundation.

Within a given year, members travel to all corners of the globe. Each year, the SIBC grants around 40 students the chance to work as interns and teachers in a rapidly growing number of foreign countries—giving members the real-world experience that is highly desired in the current job market.

Management Club. The purpose of the Management Club is to involve students in activities that will take them beyond the classroom into the world of industry, labor, and government. Students obtain experience in managerial decision-making by exposure to real-life situations in which they can examine theory and principles in practice.

The Management Club schedules business professionals, labor leaders, and government officials to address its members; sponsors field trips to large industrial centers; and conducts an annual management workshop on important current issues facing management led by professional men and women.

Members also develop organizational and administrative skills by participating in such endeavors as the operation of a Mardi Gras booth to raise funds for charity. As a social function, the club has smokers that allow students and faculty to meet and exchange views on an informal level.

Undergraduate Women in Business Association. The Undergraduate Women in Business Association of Notre Dame is committed to the development of women's roles as students of business and as leaders in business-related fields. UWIB works to provide undergraduate women with the support and resources that will better prepare them for careers in business and achieving a work-life balance.

Assistant Professors:

Brad A. Badertscher; Jeffrey J. Burks; Jeremy B. Griffin

Professional Specialists:

James L. Fuehrmeyer Jr.; Edward F. Hums; Brian R. Levey; Michael J. Meyer; Tonia H. Murphy; James A. O'Brien; Janet L. O'Tousa; William J. Schmuhl

Program Objectives. The Department of Accountancy provides outstanding accounting educational experiences for its students by (a) complementing and supporting the tradition of liberal arts/general education at Notre Dame, (b) adhering to the objectives of the undergraduate program of the Mendoza College of Business, and (c) developing and continuously improving an innovative accounting curriculum for successful careers as accounting professionals. The curriculum focuses on critical thinking, research, technology, ethics, global issues, teamwork, and communication.

The department provides students with information about career options in accounting as well as career options that integrate accounting knowledge so that those with the background, interest, and motivation will choose to major in or take significant course work in accounting. The department also supports the activities of the Notre Dame Career Center while providing recruiting guidelines and assisting with the placement of students for the twofold purposes of (a) maintaining an outstanding record for placing a high percentage of graduates with national and regional accounting firms, industrial, service, and not-for-profit organizations; and (b) supporting student desires to pursue other postgraduate options, including volunteer work, military service, and graduate education.

Program of Studies. The accounting sequence begins with Accountancy I and II (ACCT 20100 and 20200). These courses, normally taken in the sophomore year and required of all business students, are designed to provide a broad introduction to the

accounting function, the profession of accountancy and the role of accounting in society. Accountancy students must also complete FIN 20150, Corporate Financial Management, with a grade of C or above.

Students choosing an accountancy major must complete the following Department of Accountancy requirements.

ACCT 30110. Accounting Measurement and Disclosure I

ACCT 30120. Accounting Measurement and Disclosure II

ACCT 30210. Strategic Cost Management

ACCT 30280. Decision Processes in

Accounting

ACCT 40510. Audit and Assurance Services

ACCT 40610. Federal Taxation

The 150-Hour Rule for CPA Certification.

Typically, 150 hours of college credit with an accounting concentration are necessary to be licensed as a CPA. The rules vary across states. Many students meet the 150-hour requirements through AP credit and overloads during their four-year undergraduate degree. Notre Dame also offers a one-year Master of Science degree program to help our students meet the 150-hour requirement.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Accountancy](#) heading.

Program of Studies. The department offers courses with the dual objective of (1) providing a broad foundation so that students can pursue further study at the graduate level and (2) equipping students with the broad base of knowledge and skills necessary for entry into the financial world. The major in finance consists of six courses offered by the department and one additional course offered by the Department of Accountancy, ACCT 30100 Corporate Financial Reporting (in addition to the courses required of all candidates for the degree of bachelor of business administration), which affords students flexibility in their career choice. The six courses are FIN 30600 Investment Theory, FIN 30400 Advanced Corporate Finance, and four 40000-level finance electives chosen from among the other advanced courses offered by the department.

All students enrolled in the Mendoza College of Business are required to take a business-finance course during their sophomore year. Finance majors must complete FIN 20150 Corporate Financial Management with a grade of C or higher. This course cannot be repeated for a higher grade. This course is concerned with internal financial management of business firms. In addition, all business administration students are required to complete two courses in business economics: Managerial Economics and Macroeconomic Analysis. The aim of these courses is to provide students with an understanding of the economic environment within which business enterprises operate.

MANAGEMENT

The advanced courses the department offers are designed to equip students with the knowledge which will enable them to progress in whatever area of business they choose upon graduation. The subject matter of these courses—investments, financial management, financial institutions, business economics, and international finance—is of fundamental importance. Graduates of the department are currently pursuing successful careers in many areas of business.

Students who intend to take the examinations leading to the Chartered Financial Analyst (CFA) designation should structure their programs with that objective in mind. BALW 20150 and ACCT 40710 should be included in their program along with appropriate courses in accounting and investments.

COURSE DESCRIPTIONS

Programs of Study. The Department of Management offers an integrated program of study with opportunities for specialization in three areas: information technology management, consulting, or entrepreneurship. All management majors are required to complete general coursework on the management of information, people, and work processes. They must then select a track that prepares them for careers in the management of information technology, consulting and problem solving, or entrepreneurship and family business.

Management Department Core Requirements

MGT 30220. Management Communication	1.5 hrs.
MGT 30660. Strategic IT Applications	1.5 hrs.
MGT 40420. Innovation and Design	3.0 hrs.
MGT 40490. Business Problem Solving	3.0 hrs.
MGT 40700. Project Management	1.5 hrs.
MGT 40750. Spreadsheet Decision Modeling	1.5 hrs.

INFORMATION TECHNOLOGY MANAGEMENT MAJOR

The ITM program is designed to prepare students to become leaders in the use of information technology for the benefit of organizations and society. This program of study focuses on educating students about the development and use of information systems as decision-making and problem-solving tools. The program also is intended to develop an understanding of the managerial issues encountered in the introduction or operation of IT solutions in organizations, particularly, how these tools can be used to gain a competitive edge and to re-engineer an organization.

ITM Major Required Courses

In addition to the core courses listed above, all ITM majors must take the following three courses, and are eligible to take the elective courses that follow:

MGTI 30610. Application Development	3.0 hrs.
MGTI 30630. System Analysis and Design	3.0 hrs.
MGTI 30640. Networking and Security	3.0 hrs.

ITM Elective Courses

MGTI 30620. Business Intelligence Systems	3.0 hrs.
MGTI 40612. Advanced Programming	3.0 hrs.
MGTI 40640. Advanced Database Topics	1.5 hrs.
MGTI 40660. Web Development	3.0 hrs.
MGTI 40670. Technology Risk Management	1.5 hrs.
MGTI 40690. ITM Capstone Project	3.0 hrs.

CONSULTING MAJOR

The consulting program prepares students to manage people and processes within both large and small organizations or to advise organizations on those management issues. A particular emphasis is placed on managing within organizations facing the challenges of rapid change and increased competition. The major is designed to provide sufficient flexibility for students to prepare for several career paths by preparing students to think systematically about the processes through which organizations achieve excellence.

Consulting Major Required Courses

In addition to the core courses listed above, all consulting majors must take any three of the following three courses:

MGTC 30300. Management Competencies	3.0 hrs.
MGTC 30450. HR Issues in High-Performance Organizations	3.0 hrs.
MGTC 30460. International Management	3.0 hrs.
MGTC 40410. Leadership and Motivation	3.0 hrs.

MARKETING

ENTREPRENEURSHIP MAJOR

The entrepreneurship program prepares students to conceive, develop and launch new ventures and to turn innovative ideas into products that can be brought to market. Emphasis is placed on the financial, legal, and marketing aspects of start-up businesses. The program culminates with a juried business plan competition for financial backing and start-up funding support.

Entrepreneurship Major Required Courses

In addition to the core courses listed above, all entrepreneurship majors must take the following four courses:

MGTE 30500. Introduction to Entrepreneurship	3.0 hrs.
MGTE 30510. Go to Market	1.5 hrs.
MGTE 30520. Funding New Ventures	1.5 hrs.
MGTE 40590. Entrepreneurship and Business Planning	3.0 hrs.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Management](#) heading.

Program of Studies. Students completing a degree in marketing at Notre Dame should: (1) understand the decision-making processes of buyers and sellers in a market; (2) know how to apply behavioral models and quantitative tools to the analysis of marketing issues; (3) be able to develop informed marketing and organizational strategies; (4) be effective in working in a team environment; and (5) recognize the ethical and social responsibilities of marketing practitioners.

In accordance with these objectives, all students in the Mendoza College of Business take Introduction to Marketing in their sophomore year. Students choosing marketing for their professional major are required to take Consumer and Industrial Buyer Behavior, Marketing Research, Strategic Marketing, and three marketing electives.

The Marketing Research and Consumer and Industrial Buyer Behavior courses, taken in the junior year, develop a foundation in the tools and concepts germane to marketing decision making. During the senior year, students take Strategic Marketing, an advanced marketing strategy course that integrates marketing concepts and the other business functions through projects and simulations.

These courses are supplemented by the extracurricular activities of the Marketing Club.

All courses in the department focus on the performance of the marketing process but do not restrict it to a particular situation. Thus, the student majoring in marketing is prepared for a wide range of opportunities in business and nonbusiness organizations, including professional sales, customer service, product or brand management, advertising, public relations, market research, retail merchandising, and electronic commerce. Marketing majors are being employed by an increasing number of firms

specializing in areas such as consulting, retailing, and other service businesses that have traditionally underestimated the importance of this function. Additionally, nonbusiness and nonprofit organizations (hospitals, educational institutions, charitable organizations) are discovering the critical importance of marketing in their operations and are seeking well-trained graduates.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Marketing](#) heading.

Nondepartmental Courses

Director:

Samuel S. Gaglio
Assistant Dean, Mendoza College of Business

Many courses in the college are designed to cross departmental lines and provide basic tools during the sophomore and junior years or to foster the integration of various disciplines during the junior and senior years. These courses are open to all business students with appropriate prerequisites.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Business \(Nondepartmental\)](#) heading.

Collegiate Sequence in International Business

The Collegiate Sequence in International Business consists of courses which offer a broad exposure to the global nature of the world of business. Completion of the program is acknowledged with an International Business Certificate at graduation. While not a major or minor, this program enriches the student's academic preparedness to take advantage of the multitude of opportunities and challenges awaiting them. The International Business Certificate substantiates a student's acquisition of knowledge and perspective in the varying aspects of our ever-evolving global economy. The multi-disciplinary aspect of the course selections enhances the student's ability to communicate and engage in the international arena with a greater appreciation of diverse commerce, cultural and social contexts.

Since its introduction, an increasing number of students have earned the International Business Certificate each year. In 2008, 73 certificates were awarded at graduation. In 2009, that number rose to 109 certificates. In 2010, 126 students were awarded the certificate—more than double the original recipients. While a semester or summer of international study is encouraged and may be helpful in completing the certificate requirements, the certificate may be earned by taking courses on the main campus.

Five courses are required from among a variety of offerings from the Mendoza College of Business, the College of Arts and Letters and other national and international institutions. A minimum of two courses must be selected from among the contemporary international business course offerings, and the remainder from contemporary international liberal arts course offerings. An international economics course may be substituted for one of the international business courses and one advanced course in a foreign language may be counted as an international liberal arts course for the International Business Certificate. With the consent of the Program Coordinator, courses that are taught at St. Mary's College, at ND International Study locations, and/or transferred from other institutions may also qualify.

Students must announce their intention to complete the Program and meet with the Program Coordinator no later than the end of their junior year and again during their senior year. Once a student's intent to pursue the Collegiate Sequence in International Business has been indicated, the Graduation Process System will include an International Business Certificate section so to assist in tracking progress toward completion of the requirements.

Courses for the International Business Certificate may not be taken on a pass/fail basis. Courses may "double count"—e.g., HIST 30432, Irish History Since 1800, would qualify as a contemporary liberal arts requirement for the certificate and would also satisfy the history requirement for graduation.

College of Engineering

The College of Engineering was established as a distinct unit of the University in 1897, although a program in civil engineering was offered in 1873. The college comprises five departments, including aerospace and mechanical engineering, chemical and biomolecular engineering, civil engineering and geological sciences, computer science and engineering, and electrical engineering.

Since its inception, the College of Engineering has regarded the primary purpose of all higher education as the development of the intellect, discriminatory power, and judgment in all students to enable them to arrive at sound decisions in their personal lives and in the professional lives they will pursue after graduation. The programs of studies offered in the various departments of the college are, therefore, constructed to give the student a good knowledge of the basic sciences and of engineering principles, and to prepare the student for the manifold duties of an educated professional and for the cultural life of an educated person. Classroom instruction is amplified by laboratory work and design experiences that give the student insight into the application of principles to practical problems. Detailed information about the College of Engineering and its many programs can be found at nd.edu/~engineer.

Mission Statement. To nurture the intellectual growth of our students and to serve humanity through the creation, application, and dissemination of knowledge relevant to technology.

The College Vision Statement.

- To provide *preeminent education experiences* that are stimulating, responsive to the needs of the 21st century, and prepare our students for leadership in their profession and society.
- To conduct *world-class research* that addresses *critical needs* of society.
- To gain *national recognition* as a first-tier college of engineering.
- To contribute to the *Catholic character* of the University.

Accreditation and Academic Association. The College of Engineering is a member of the American Society for Engineering Education, and all engineering curricula are accredited by the Engineering Accreditation Commission of ABET, Inc.

Registration of Engineers. Registration of engineers is required for many fields of practice. Recent graduates need not acquire registration immediately upon graduation, but they benefit by applying early for the required state examination. Graduating from accredited programs such as those offered by Notre Dame facilitates registration as a professional engineer.

Registration of Geoscientists. Registration is required for geoscientists to practice in many states. The degree in environmental geosciences offered by the Department of Civil Engineering and Geological Sciences provides the necessary academic background for graduates to successfully complete registration as a professional geoscientist.

Programs and Degrees

The College of Engineering offers curricula leading to the undergraduate degrees listed below:

B.S. in aerospace engineering
 B.S. in chemical engineering
 B.S. in civil engineering
 B.S. in computer engineering
 B.S. in computer science
 B.S. in electrical engineering
 B.S. in environmental geosciences
 B.S. in mechanical engineering

To complete all degree requirements, the student must take and pass all of the courses specified in the Bulletin for the given degree and must earn the total minimum number of course credit hours specified for the degree.

To obtain two undergraduate degrees from the College of Engineering, a student must successfully carry out an approved program of courses totaling no less than 157 credit hours, depending on the programs. These must include all of the courses specified in the Bulletin for each degree.

The college offers advanced degrees in the following areas:

M.S. in aerospace engineering
 M.S. in bioengineering
 M.S. in chemical engineering
 M.S. in civil engineering
 M.S. in computer science and engineering
 M.S. in electrical engineering
 M.S. in environmental engineering (through CEGEOS)
 M.S. in geological sciences (through CEGEOS)
 M.S. in mechanical engineering
 Ph.D. in aerospace and mechanical engineering
 Ph.D. in bioengineering
 Ph.D. in chemical engineering
 Ph.D. in civil engineering and geological sciences
 Ph.D. in computer science and engineering
 Ph.D. in electrical engineering

The Department of Aerospace and Mechanical Engineering also offers a non-thesis master of engineering (M.E.) in mechanical engineering.

The details of the programs and the engineering courses offered at the graduate level are in the Graduate School *Bulletin of Information*.

Engineering Common Core. All engineering curricula consist of each of the following:

Arts and Letters Core: 24 credit hours. Composition (one course), University Seminar* (one course), history (one course), social science (one course), fine arts or literature (one course), philosophy (two courses) and theology (two courses).

**The University Seminar may be selected from an appropriate history, social science, fine arts, literature course, or the first course in theology or philosophy, and will satisfy the respective requirement.*

Basic Science Core: 36 credit hours. MATH 10550 Calculus I; MATH 10560 Calculus II; MATH 20550 Calculus III, MATH 20580 Introduction to Linear Algebra and Differential Equations; CHEM 10171 General Chemistry: Fundamental Principles; CHEM 10122 General Chemistry: Biological Processes; PHYS 10310 General Physics I; PHYS 10320 General Physics II; EG 10111, 10112 Introduction to Engineering Systems I and II

First Year of Studies. A first-year student enters the Notre Dame First Year of Studies for one academic year of basic collegiate studies before entering a department within the college. In the spring of the first year of studies, a first-year student intending to major in engineering will select a major. If the student is scholastically sound for the given choice, approval will be given.

A first-year student intending to major in any of the College of Engineering programs should complete the following courses by the end of the first year:

<i>First Semester</i>	
Composition or University Seminar+	3
MATH 10550. Calculus I	4
CHEM 10171. General Chemistry: Fundamental Principles*	4
Arts and Letters course†	3
EG 10111. Introduction to Engineering Systems I#	3
Physical Education	—
	<hr/> 17
<i>Second Semester</i>	
University Seminar+ or Composition	3
MATH 10560. Calculus II	4
CHEM 10122. General Chemistry: Biological Processes*	3
PHYS 10310. General Physics I	4
EG 10112. Introduction to Engineering Systems II#	3
Physical Education	—
	<hr/> 17

PROGRAMS AND DEGREES

+ *The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy, and will satisfy the respective requirement. The College of Engineering recommends selecting the first courses in theology and philosophy, as well as composition, to enable maximum schedule flexibility in later semesters.*

* *All majors will accept CHEM 10171/10122 or CHEM 10171/10172 or CHEM 10181/10182 as satisfying the two-course chemistry requirement.*

† *See Arts and Letters Core above.*

While EG 10111–10112 is acceptable for the environmental geosciences degree, it is not required and the sequence ENVG 10110–10100 may be substituted.

General Requirements. The University of Notre Dame reserves the right to change at any time regulations included in its Bulletins with respect to admission to the University, continuance therein and graduation therefrom. Every effort is made to give advance information of such changes.

The number of credit hours carried by the undergraduate student in the College of Engineering may not exceed 19 hours without permission, granted at the discretion of the assistant dean for academic affairs.

Engineering Scholars Program (ESP). The College of Engineering has developed a program for those students whose achievements have identified them as among the best of entering high school students. This program provides special opportunities for classroom interaction, cultural enrichment, and social leadership. Admission to the program is by invitation. ESP students take a special yearlong seminar in the first year that satisfies two University core requirements. Participation in this program is independent of participation in the Engineering Honors Program.

Engineering Honors Program (EHP). The Engineering Honors Program provides an intensive, research-based experience for students who have shown exceptional promise during their first two years in the college. Admission to the EHP is made after application to the individual department program. Each student in this program will be guided by a faculty member who functions as the student's research advisor and mentor, and students and faculty meet regularly in both formal and informal settings. To graduate with recognition as an honor student, each student must, at a minimum, engage in two semesters of research and complete a research thesis in the student's major field in the senior year and be eligible for Latin honors at graduation. Individual departments retain the right to add other criteria to this minimum set of requirements.

International Study Opportunities. The University strongly supports study abroad and has encouraged the programs in the College of Engineering to participate. At present, there are semester- or yearlong opportunities during the academic year for juniors in Dublin, Ireland; London, England; Perth,

Australia; Monterrey, Mexico; Karlsruhe, Germany; Cairo, Egypt; and Santiago, Chile. The programs in Mexico and Chile require the student to be fluent in Spanish, and the program in Germany requires the student to be fluent in German. In each location, students must take at least two technical courses to remain on track for graduation. Programs vary by semester, and not all locations are appropriate for every major in the college. Students should contact an advisor in their department to work out any details.

The college currently offers two summer programs for engineering undergraduates who have completed at least the first-year engineering curriculum, in London, England, and Alcoy, Spain.

Admission to all programs is competitive and requires demonstration of satisfactory academic performance.

ROTC Programs. ROTC students who complete their programs may use a maximum of six credits of upper-level air, military, or naval science as substitutes for specified degree requirements determined by each department. Three of these credits may substitute for either a history or social science requirement; three may substitute for a technical elective at the discretion of each major program. No other air, military or naval science credits not so substituted may be credited toward degree requirements in programs in the College of Engineering.

Humanities in the Curriculum. Students enrolled in the College of Engineering must satisfy all University degree requirements, including composition (three credits), University Seminar* (three credits), history (three credits), social science (three credits), fine arts or literature (three credits), philosophy (six credits) and theology (six credits).

For specific information on course offerings to satisfy these requirements, students must consult the online course registration system.

**The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy, and will satisfy the respective requirement.*

Engineering Business Practice. The college recognizes the importance of providing its graduates with opportunities to learn how engineers function in the world of business and offers a multi-course sequence (EG 40421/40422) that provides education in this area. Students in all majors of the college may take at least the first course to satisfy technical elective requirements. The courses increase the effectiveness of engineering graduates by developing an understanding of the dynamics of business operations. They include issues related to ethics, leadership, and business practices such as marketing, management, finance, and human resources, and they examine the professional and leadership characteristics of modern industrial leaders. In the second course, students develop a business plan and execute it using a computer simulation program.

Combination Five-Year Programs with the College of Arts and Letters. The college also recognizes the benefits of a broad background in cultural, social, and technical subjects and, in 1952, in cooperation with the College of Arts and Letters of the University, instituted a five-year program that combines the liberal arts program with the requirements of the various engineering programs. Students who complete this combination program will earn two degrees: the degree of bachelor of arts and the degree of bachelor of science in the engineering major pursued. Dual-degree students are eligible to join the Reilly Program in Engineering and Arts and Letters described at nd.edu/-reilly/academic_programs.html.

Students pursuing this program must have strong scholastic ability and be acceptable to both the dean of the College of Arts and Letters and the dean of the College of Engineering. Choice of the program should be indicated by the end of the second year, but choice of a particular field in Arts and Letters may be deferred until the end of the third year.

The general sequence of courses in the five-year engineering-liberal arts program is found under "Dual Degree Programs" later in this section of the *Bulletin*.

Combination Five-Year Program with the Mendoza College of Business. To address the needs of engineering students who wish to integrate management and engineering, the College of Engineering and the Mendoza College of Business have established a program in which a student may earn the bachelor of science degree from the College of Engineering and the master of business administration from the Mendoza College of Business.

The program is structured so that a student who has completed the first three years of the bachelor's degree program, if accepted through a competitive admissions process, completes the master of business administration and the bachelor of science in engineering. This program may require summer or intersession work.

Students who wish to pursue this program should have a superior scholastic record in their undergraduate program and must apply to and be accepted by the MBA program during their third year in the College of Engineering.

The general sequence of courses in the five-year engineering-MBA program may be found under "Dual Degree Programs" later in this section of the *Bulletin*.

Combination Five-Year Program with Saint Mary's College. Students at Saint Mary's College may elect to earn a B.S. in biology, chemistry, or mathematics from Saint Mary's while simultaneously earning a B.S. in a related engineering program at Notre Dame. This program requires five years of study, with only the fifth year at Notre Dame to satisfy residency requirements. Students interested in this program must consult the appropriate advisor(s)

at Saint Mary's College before enrolling in required courses at Notre Dame.

Combination Five-Year Programs with Other Schools. The highly desirable objective to infuse more liberal arts and sciences work into the education of engineering students has been met in another way.

The University of Notre Dame has entered into agreements with Assumption College, Worcester, Mass.; Bethel College, Mishawaka, Ind.; Carroll College, Helena, Mont.; Elon University, Elon, N.C.; Goshen College, Goshen, Ind.; Loyola University Chicago, Chicago, Ill.; Saint Anselm College, Manchester, N.H.; Stonehill College, Easton, Mass.; University of St. Thomas, St. Paul, Minn.; University of St. Thomas, Houston, Tex.; and Xavier University of Louisiana, New Orleans, La., whereby the liberal arts and sciences part of a combination five-year program is given by these respective colleges and the engineering part by Notre Dame. In these dual-degree programs, the student spends three years at a college of first choice and two years at Notre Dame. After completion of the five-year program, the student receives a bachelor of arts or bachelor of science degree from the first college and a bachelor of science in engineering degree from Notre Dame.

Through a special arrangement, students at Saint Mary's College, Notre Dame, Ind., may take a combination program of science classes at Saint Mary's and engineering classes at Notre Dame beginning in their sophomore year at Saint Mary's. The student will earn her bachelor of science degree from Saint Mary's at the end of the fourth year, and complete her bachelor of science in engineering degree in her fifth year at Notre Dame.

The sequence of courses for any of these programs will vary depending on the program of study at the other institution. No attempt has been made to set up a rigid pattern, and each participating institution has some freedom concerning the choice and arrangement of courses, provided that the coverage in the areas of mathematics, physics, chemistry, computing, introductory engineering, theology, philosophy, history, social science, and literature or fine arts is appropriate. It is expected, however, that students will complete the equivalent of the first two years of the desired College of Engineering program before applying for transfer.

Students must complete at least 60 course hours at Notre Dame, and must spend the final year of study at Notre Dame to satisfy residency requirements.

Details of these programs may be obtained by writing to the institutions concerned or to the College of Engineering.

Graduate Programs in Engineering.* The Graduate School of the University of Notre Dame comprises four divisions: humanities, social science, science, and engineering. The division of engineering was organized in 1946 with power to grant advanced

degrees in the departments of aerospace and mechanical engineering, chemical and biomolecular engineering, civil engineering and geological sciences, computer science and engineering, and electrical engineering. The general conduct of graduate work is under the jurisdiction of the Graduate Council of the University, the members of which serve as specified in the Academic Articles. Director of the program in the engineering division is the dean of the College of Engineering.

* Reference should be made to the *Graduate School Bulletin of Information* for details of these programs and to the Web at nd.edu/~engineer/prospects/prospects.htm.

College Awards and Prizes

COLLEGE OF ENGINEERING AWARDS

The Rev. Thomas A. Steiner Prize. From a fund established in 1948 by former students of Rev. Thomas A. Steiner, C.S.C., former dean of the College of Engineering, a cash award is made to seniors in the college who have been selected for their all-around excellence as students.

The Reilly Scholar Designation. The designation of Reilly Scholar is given annually to those fifth-year seniors enrolled in the dual Engineering/Arts and Letters program who have excelled academically and otherwise during their first four years as students.

The Americo Darin Prize. From a fund set up by the Darin family in their father's name, a cash award is made to several engineering juniors who have demonstrated exceptional and steady improvement over their first four semesters at Notre Dame.

Departmental Awards

AEROSPACE AND MECHANICAL ENGINEERING

Patrick J. Deviny Award. Presented each year to a junior aerospace student who has displayed the most diligence and persistence in the pursuit of undergraduate studies in aerospace engineering.

Vincent P. Goddard Design Award. Presented each year to a senior in aerospace engineering for outstanding performance in the aerospace design course.

Sigma Gamma Tau Honor Award. Presented each year to a member of the Notre Dame chapter in recognition of outstanding academic performance and demonstrated professional potential.

Pi Tau Sigma Honor Award. Presented each year to a member of the Notre Dame chapter in recognition of outstanding academic performance and demonstrated professional potential.

The Aero Propulsion Award. Presented each year to a senior in aerospace engineering for outstanding

performance in the Gas Turbine and Propulsion class.

The Zahm Prize for Aeronautical Engineering was founded in 1946 by Dr. Albert J. Zahm, distinguished pioneer in aeronautics and at one time professor of physics at the University of Notre Dame. The award is made to the senior aerospace engineering student who, in the estimation of the faculty of the program, has achieved the most distinguished record in professional subjects.

The Zahm Prize for Mechanical Engineering. Beginning with 2007–08 year, awarded to a senior mechanical major who, in estimations of the faculty, has achieved the most distinguished record in professional subject.

Jerome L. Novotny Design Award. Presented each year to a junior in mechanical engineering for the best design in the junior heat transfer course.

The Rockwell Automation Power Systems Design Award. Presented each year to seniors in mechanical engineering for the best design in the senior mechanical engineering design course.

Best Undergraduate Research Paper. Presented each semester to the undergraduate who has written the best research paper based on research done during undergraduate research class for the semester.

CHEMICAL AND BIOMOLECULAR ENGINEERING

AIChE Scholarship Award. Presented to the junior chemical engineering student who has the highest scholastic average during the first two years of study.

American Institute of Chemists Award. Presented to an outstanding senior in the Department of Chemical and Biomolecular Engineering.

Chemical Engineering Alumni Award. Presented to one or more seniors who have an outstanding combination of scholarship and extracurricular activities.

Chemical Engineering Faculty Award. Presented to the senior with the highest scholastic average after seven semesters of study.

Chemical Engineering Research Award. Presented to one or more undergraduate students who have performed outstanding undergraduate research.

John C. Treacy Award. Presented to the student with the highest score in thermodynamics.

CIVIL ENGINEERING AND GEOLOGICAL SCIENCES

The American Society of Civil Engineers. The Indiana section each year presents an award to the two senior students most active in the student chapter of ASCE.

Leroy D. Graves Academic Improvement Award. Presented to a senior civil engineering student for significant development in academic performance.

The Sydney Kelsey Outstanding Scholar Award.

Presented to a senior civil engineering student for excellence and creativity in academics.

The Kenneth R. Lauer Award. Presented to a senior civil engineering student for leadership, integrity, and service to fellow students and community as determined by that student's classmates.

James A. McCarthy Scholarship in Civil Engineering. Presented to a junior civil engineering student for outstanding academic and professional excellence.

The Walter L. Shilts Award for Undergraduate Achievement. Presented to a senior civil engineering student who has best fulfilled his or her potential as a student through hard work and dedication to obtaining the best possible education.

The Rev. Alexander Kirsch, C.S.C., Award. To the senior receiving a degree in geological sciences who has evidenced high qualities of personal character, scholarship, and leadership.

Dr. Raymond C. Gutschick Award. To the graduating senior who has demonstrated the most promise in geological research as evidenced by a successful research project.

COMPUTER SCIENCE AND ENGINEERING

Outstanding Computer Engineering Award. To the graduating senior in computer engineering who has evidenced high qualities of personal character, scholarship, and leadership.

Outstanding Computer Science Award. To the graduating senior in computer science who has evidenced high qualities of personal character, scholarship, and leadership.

ELECTRICAL ENGINEERING

The Basil R. Myers Award. For achievement in electrical engineering, recalling circuit theory, the English language, and St. George Day at Notre Dame.

The James L. Massey Award. For achievement in electrical engineering, recalling communication theory, undergraduate teaching, and the Binary Examination.

The Arthur J. Quigley Award. For achievement in electrical engineering, recalling electronics, service to our neighbor, and the little man in the circuit.

The Laurence F. Stauder Award. For achievement in electrical engineering, recalling electrical power, the IEEE Student Branch, and the Notre Dame alumni.

The IEC William L. Everitt Award. For achievement in electrical engineering, computer engineering, or computer science, with an interest in the area of communications.

Student Organizations and Activities

THE NOTRE DAME TECHNICAL REVIEW

Since 1949, the students of the College of Engineering have been publishing the *Notre Dame Technical Review*. It provides the opportunity for creative writing and for the management of a technical periodical.

HONOR SOCIETIES**TAU BETA PI**

In 1960, the Indiana Gamma Chapter of Tau Beta Pi was installed at Notre Dame to foster a spirit of liberal culture in the engineering college and to recognize those who have conferred honor upon Notre Dame by distinguished scholarship and exemplary character as undergraduates in engineering or by their attainment as alumni in the field of engineering. Seniors in the top fifth of their class and juniors in the top eighth of their class are eligible for election under rigid standards of scholarship, character, leadership, and service.

ETA KAPPA NU

In 1962, the Delta Sigma Chapter of Eta Kappa Nu, the national honor society for electrical engineers, was installed at Notre Dame. Juniors, seniors, and alumni are elected to membership on the basis of scholastic attainment, leadership, and quality of character.

PI TAU SIGMA

In 1963, the Sigma Beta Chapter of Pi Tau Sigma, the national honor society for mechanical engineers, was installed at Notre Dame. Juniors, seniors, and alumni are elected to membership on the basis of scholastic attainment, leadership, quality of character, and a demonstration of probable future success in engineering.

CHI EPSILON

In 1966, the Notre Dame Chapter of Chi Epsilon, the national honor society for civil engineers, was installed at Notre Dame. Chi Epsilon recognizes those civil engineering students, faculty, and alumni who have displayed superior qualities in scholarship, character, practicality, and sociability during their professional careers.

SIGMA GAMMA TAU

In 1981, the Notre Dame Chapter of Sigma Gamma Tau, the national honor society for aerospace engineering was installed. This organization recognizes and honors those individuals in the field of aeronautics and astronautics who have distinguished themselves through scholarship, integrity, service, and outstanding achievement. Senior students who rank in the top third of their aerospace engineering class are eligible for admission.

UPSILON PI EPSILON

In 2004, the Notre Dame chapter of Upsilon Pi Epsilon, which recognizes the academic excellence of students in the computing and information disciplines, was installed at Notre Dame. Outstanding juniors, seniors, and graduate students from the Department of Computer Science and Engineering are honored each year with induction.

PROFESSIONAL SOCIETIES

The several departments of the college actively support student chapters of their respective professional societies; these are:

American Institute of Aeronautics and Astronautics (AIAA)
 American Institute of Chemical Engineers (AIChE)
 American Society of Civil Engineers (ASCE)
 American Society of Mechanical Engineers (ASME)
 Association of Computer Machinery (ACM)
 Institute of Electrical and Electronic Engineers (IEEE)
 National Society of Black Engineers (NSBE)
 Society of Hispanic Professional Engineers (SPHE)
 Society of Women Engineers (SWE)

The Joint Engineering Council (JEC), a student organization with representation from the college's professional and honor societies, coordinates the activities of all engineering organizations and encourages the pursuit of a professional attitude in the student body of the College of Engineering. The JEC sponsors activities of general interest to the engineering student body.

Aerospace and Mechanical Engineering

Chair:

John E. Renaud

Associate Chair:

J. William Goodwine Jr.

H. Clifford and Evelyn A. Brosey Professor of Mechanical Engineering:

Frank P. Incropera

Viola D. Hank Professor of Mechanical Engineering:

Hafiz M. Atassi

Clark Professor:

Thomas C. Corke

Professors:

Stephen M. Batill; Raymond M. Brach (emeritus); Patrick F. Dunn; Nai-Chien Huang (emeritus); Edward W. Jerger (emeritus); Eric J. Jumper; Francis M. Kobayashi (emeritus); Stuart T. McComas (emeritus); Thomas J. Mueller (emeritus); Victor W. Nee (emeritus); Robert C. Nelson; Timothy C. Ovaert; Samuel Paolucci; Joseph M. Powers; Francis H. Raven (emeritus); John E. Renaud; Mihir Sen; Steven B. Skaar (emeritus); Albin A. Szewczyk (emeritus); Flint O. Thomas; Kwang-tzu Yang (emeritus)

Associate Professors:

J. William Goodwine Jr.; John W. Lucey (emeritus); Karel Matous; Scott C. Morris; Glen L. Niebur; Ryan K. Roeder; Steven R. Schmid; James P. Schmiedeler; Michael M. Stanisic; Meng Wang

Assistant Professors:

James E. Houghton (emeritus); David B. Go; Philippe Sucusky; Diane Wagner

Associate Professional Specialists:

Rodney L. McClain; John Ott; Richard B. Strebinger

Program of Studies. The Department of Aerospace and Mechanical Engineering offers programs of study that lead to degrees of bachelor of science and master of science in aerospace engineering and mechanical engineering, respectively; master of engineering for mechanical engineers; and doctor of philosophy.

Program in Aerospace Engineering. This program is accredited by the Engineering Accreditation Commission of ABET, Inc. The aerospace program is designed to prepare those students interested in the design and operation of aircraft and space vehicles for entrance into a professional career. The curriculum, based on a solid foundation in mathematics, physics, chemistry and the engineering sciences, places emphasis on such basic aerospace disciplines as aerodynamics and fluid mechanics, orbital mechanics, and solid and structural mechanics, as well as such integrating disciplines as design, experimental methods and systems analysis. Technical specializations in the junior and senior year enable students to emphasize specific technical areas, including design and manufacturing, thermal

and fluid sciences, bioengineering, solid mechanics, materials, control and mechanical systems and computational engineering.

The aerospace engineering program uses laboratories in Fitzpatrick Hall of Engineering and in the Hessert Laboratory for Aerospace Research. The Hessert laboratories contain superior facilities for instruction and research.

Students are encouraged to participate in the activities of the student chapter of the American Institute of Aeronautics and Astronautics and to enter the national student paper competition conducted by the parent institute. Outstanding achievement in the aerospace program is recognized by membership in Sigma Gamma Tau, the national aerospace honor society.

Further details about the standard aerospace program, the London Program and electives can be found on the Web at ame.nd.edu. The program below pertains only to the Class of 2010 and beyond.

Aerospace Engineering Educational Objectives and Learning Outcomes.

The Engineering Accreditation Commission of ABET, Inc., encourages the explicit statement of the Educational Objectives and Learning Outcomes for all engineering programs. Publication of the objectives and desired outcomes, as well as efforts to determine if these are being achieved, are part of the process of continuous improvement in engineering education.

Educational Objectives. The Department of Aerospace and Mechanical Engineering has established the following Educational Objectives that are consistent with the mission of the University and College of Engineering. These objectives have been developed in collaboration with faculty, students, and industry representatives. Educational objectives are "broad statements that describe the *career and professional accomplishments* that the program is *preparing the graduates to achieve.*" These are usually recognized as accomplishments in the *first few years after graduation.*

The aerospace engineering program at Notre Dame appreciates the diverse set of individual goals to which our students aspire, so it has expressed the Educational Objectives in two forms. For *all graduates* of the program:

- Secure a position consistent with their personal aspirations and qualifications
- Assume a technical or managerial leadership role with their organization
- Participate as a volunteer with at least one professional or social service organization

In addition, depending on the career path selected, graduates would be prepared to achieve one or more of the following:

- Be recognized as the key technical specialist within their organization for a particular professional specialty
- Receive a graduate or professional degree
- Start their own company
- Be granted a patent

Learning Outcomes. To achieve these Educational Objectives, the curriculum is designed to provide the following Learning Outcomes that describe what students are expected to know or be able to do by the time of graduation.

First Principles and Problem Solving: Graduates understand fundamental scientific first principles of engineering and can apply them to the solution of problems or systems by way of analytical and numerical treatment.

Engineering Skills and Professional Practice:

Graduates understand the essential role of experimentation in engineering, and they are able to compare and gain insight from a combination of analytical, numerical, and experimental results. They are able to use modern engineering software tools, including CAD, and are capable of programming digital computers

Design: Graduates have a pragmatic understanding of design and the engineering design process and are able to contribute in various ways to the design of a product, system, or process.

Communication: Graduates are able to communicate well, both orally and in writing, and function effectively in multidisciplinary groups, both in leadership and support roles.

Professional Responsibility: Graduates are familiar with the responsibilities of professional practice, the roles that aerospace engineers play in society, the kinds of issues they deal with, and their influence in society.

First Year of Studies

First-year students intending to major in aerospace engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Sophomore Year

First Semester

MATH 20550. Calculus III	3.5
PHYS 10320. General Physics II	4
AME 20221. Mechanics I	3
AME 20211. Introduction to Aeronautics	3
AME 20214. Introduction to Engineering Computing	1
Arts and Letters course+	3

17.5

AEROSPACE AND MECHANICAL ENGINEERING

Second Semester

MATH 20580. Introduction to Linear Algebra and Differential Equations	3.5
AME 20222. Mechanics II	3
AME 20241. Solid Mechanics	4
AME 20231. Thermodynamics	3
AME 20213. Measurements and Data Analysis or AME 30361. Computer Aided Design and Manufacturing	3
	16.5

Junior Year*First Semester*

AME 30314. Differential Equations, Vibrations and Controls I	3
AME 20213. Measurements and Data Analysis or AME 30361. Computer Aided Design and Manufacturing	3
AME 30341. Aerospace Structures	3
AME 30331. Fluid Mechanics	3

AME 40462. Aerospace Design Technical Specialization/Prof. Development	4
Technical Specialization	3
Arts and Letters course+	3
	16

Total for the four years: 130 semester hours.

*A list of approved technical specialization and professional development courses is available on the department website.

+ See "Arts and Letters Core" on the first page of the College of Engineering section.

The most current information for the degree program course requirements is available on the department website, ame.nd.edu.

The Program in Mechanical Engineering.

This program is accredited by the Engineering Accreditation Commission of ABET, Inc. The department offers a well-rounded program at the bachelor's level. The curriculum is built on a sound foundation in mathematics, physics, chemistry and the engineering sciences. In the undergraduate curriculum the student may obtain, by suitable selection of elective courses, a program suited to enable him or her to specialize in a given sequence or to prepare as a generalist. Elective course sequences are available in aerospace, design and manufacturing, thermal and fluid sciences, bioengineering, solid mechanics, materials, control and mechanical systems, and computational engineering.

To prepare for today's changing technological world, the program requires use of a computer in many of its courses.

Finally, for professional growth during formative years as engineers in training, students are encouraged to participate in the activities of the student chapter of the American Society of Mechanical Engineers. Outstanding achievement in the mechanical engineering program is recognized by membership in Pi Tau Sigma, the national mechanical engineering honor society.

Further details about the mechanical engineering program, the London Program and electives can be found on the Web at ame.nd.edu. The program below pertains only to the Classes of 2010 and beyond.

Mechanical Engineering Educational Objectives and Learning Outcomes.

The Engineering Accreditation Commission of ABET, Inc., encourages the explicit statement of the Educational Objectives and Learning Outcomes for all engineering programs. Publication of the objectives and desired outcomes, as well as efforts to determine if these are being achieved, are part of the process of continuous improvement in engineering education.

Educational Objectives. The Department of Aerospace and Mechanical Engineering has established the following Educational Objectives that are consistent with the mission of the University and College of Engineering. These objectives have been developed in collaboration with faculty, students, and industry representatives. Educational objectives are "broad statements that describe the *career and professional accomplishments* that the program is *preparing the graduates to achieve.*" These are usually recognized as accomplishments in the *first few years after graduation.*

The mechanical engineering program at Notre Dame appreciates the diverse set of individual goals to which our students aspire, so it has expressed the educational objectives in two forms. For *all graduates* of the program:

- Secure a position consistent with their personal aspirations and qualifications
- Assume a technical or managerial leadership role with their organization
- Participate as a volunteer with at least one professional or social service organization

In addition, depending on the career path selected, graduates would be prepared to achieve one or more of the following:

- Be recognized as the key technical specialist within their organization for a particular professional specialty
- Receive a graduate or professional degree
- Start their own company
- Be granted a patent

Learning Outcomes. To achieve these educational objectives, the curriculum is designed to provide the following Learning Outcomes that describe what students are expected to know or be able to do by the time of graduation.

First Principles and Problem Solving: Graduates understand fundamental scientific first principles of engineering and can apply them to the solution of problems or systems by way of analytical and numerical treatment.

Engineering Skills and Professional Practice:

Graduates understand the essential role of experimentation in engineering, and they are able to compare and gain insight from a combination of analytical, numerical, and experimental results. They are able to use modern engineering software tools, including CAD, and are capable of programming digital computers, including microprocessors.

Design: Graduates have a pragmatic understanding of design and the engineering design process and are able to contribute in various ways to the design of a product, system, or process.

Communication: Graduates are able to communicate well, both orally and in writing, and function effectively in multidisciplinary groups, both in leadership and support roles.

Professional Responsibility: Graduates are familiar with the responsibilities of professional practice, the roles that mechanical engineers play in society, the kinds of issues they deal with, and their influence in society.

First Year of Studies

First-year students intending to major in mechanical engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

CHEMICAL AND BIOMOLECULAR ENGINEERING

Sophomore Year*First Semester*

+ See "Arts and Letters Core" on the first page of the College of Engineering section.

The most current information for the degree program course requirements is available on the department website: (ame.nd.edu).

Total for the four years: 130 semester hours.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Aerospace and Mechanical Engineering](#) heading.

A number of introductory graduate-level courses, described in the *Graduate School Bulletin of Information* and on the department website, are open to advanced undergraduates, with the permission of the department chair, to satisfy upper-level electives.

Chemical and Biomolecular Engineering*Chair:*

Mark J. McCready

Schmitt Professor of Chemical Engineering:

Paul W. Bohn

Bayer Professor of Chemical Engineering:

Hsueh-Chia Chang

Keating-Crawford Professor of Chemical Engineering:

Joan F. Brennecke; Mark A. Stadtherr

Professors:

Jeffrey C. Kantor; David T. Leighton Jr.; Edward J. Maginn; Mark J. McCready; Paul J. McGinn; William F. Schneider; Mark A. Stadtherr; Eduardo E. Wolf

Associate Professors:

Davide A. Hill; Y. Elaine Zhu

Assistant Professors:

Basar Z. Bilgicer; Jason C. Hicks

Professional Specialist:

Salma R. Saddawi

Program of Studies. The Department of Chemical and Biomolecular Engineering offers programs of study leading to the degrees of bachelor of science in chemical engineering, master of science in chemical engineering, and doctor of philosophy. The program leading to the bachelor of science degree is accredited by the Engineering Accreditation Commission of ABET, Inc.

The traditional role for chemical engineers of providing the principal technical guidance for the chemical and petroleum industries has been greatly augmented in recent years. Chemical engineers now direct the advancement and utilization of technology for the food processing and consumer products industries and are playing increasing roles in the manufacture of the highest density computer chips and in the invention of advanced drug delivery systems. In addition to creating remediation strategies, chemical engineers contribute to the prevention of deleterious impact of society on the environment by the development of new "green" process technologies that eliminate the use of dangerous solvents. They are the leaders in the field of "sustainability" which is the implementation of energy sources and raw material supplies that can sustain humankind indefinitely. In all of these areas, complex processes involving chemical changes of matter occur and, as such, sound training in chemistry, physics, mathematics, and allied applied sciences are prerequisites to resolving the challenges posed by these complex systems.

The undergraduate program at Notre Dame is notable for its combination of a strong fundamental focus in chemical engineering courses with a broad humanities and science education provided in courses other than chemical engineering. The science and humanities courses prepare students both for study of chemical engineering and to understand the complex scientific, social, and moral issues of the world today. Our intention in emphasizing

CHEMICAL AND BIOMOLECULAR ENGINEERING

fundamentals is to develop students' intellect and to equip them with enduring knowledge in chemical engineering and related fields. Thus, our undergraduate chemical engineering curriculum provides students with not only a preparation for a career as chemical engineer, but for a lifetime of learning and a lifelong career in areas that may include law, medicine, or business.

University of Notre Dame Undergraduate

Program Goals: Students who have graduated in Chemical Engineering at Notre Dame have pursued, successfully, a wide range of career paths. The faculty believes that this has resulted from the interests of students who enter our program and is facilitated by our emphasis on fundamental aspects of chemical engineering. Thus consistent with the mission of the University, the Department of Chemical and Biomolecular Engineering program seeks to develop students who:

1. Pursue knowledge and commensurate understanding and critically evaluate the consequences of these.
2. Communicate clearly and effectively.
3. Demonstrate proficiency in the art and science of chemical engineering with a strong understanding of the fundamental principles of pure and engineering sciences on which chemical engineering practice is based.
4. Appreciate their social and moral responsibilities both within their careers in engineering and through service in their communities.
5. Understand how chemical engineering connects with other major disciplines to produce the goods and services needed by society.

Within the chemical engineering degree program, students can use their electives to construct course sequences in materials, environmental chemical engineering and biomolecular engineering. A suggested course sequence for students interested in going to medical school is also available.

More than one-third of the chemical engineering undergraduates participate in research activities with faculty and graduate students at some time in their careers in such areas as advanced materials, ionic liquids as environmentally benign solvents, biomaterials, microfluidic devices, catalysis, fuel cells, and drug delivery techniques.

Further details about the chemical engineering program may be found on the Web at nd.edu/~chegdept. The program below pertains only to the Classes of 2010 and beyond.

FIRST YEAR OF STUDIES

First-year students intending to major in chemical engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Sophomore Year

Total for the four years: 129 semester hours.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Chemical and Biomolecular Engineering](#) heading.

Certain graduate courses are open to advanced undergraduates with permission from the department chair

Civil Engineering and Geological Sciences

Massman Chair:

Thomas E. Albrecht-Schmill

Associate Chair:

Tracy L. Kijewski-Correa

Henry Massman Professor of Civil Engineering:

Peter C. Burns

Robert M. Moran Professor of Civil Engineering:

Ahsan Kareem

Professors:

Thomas E. Albrecht-Schmitt; Jeremy B. Fein; Robert L. Irvine (emeritus); Sydney Kelsey (emeritus); Kenneth R. Lauer (emeritus); Patricia A. Maurice; Clive R. Neal; Stephen E. Silliman; James I. Taylor (emeritus); Joannes J. Westerink

Associate Professors:

Lloyd H. Ketchum Jr. (emeritus); Tracy L. Kijewski-Correa; David J. Kirkner; Yahya C. Kurama; Jerry J. Marley (emeritus); J. Keith Rigby Jr.; Rev. James A. Rigert, C.S.C. (emeritus)

Assistant Professors:

Andrew Kennedy; Kapil Khandelwal; Changzheng Na; Robert Nerenberg; Joshua ShROUT; Alexandros Taflanidis

Assistant Professional Specialist:

Elizabeth A. Kerr

Vision and Mission. The Department of Civil Engineering and Geological Sciences (CE/GEOS) aspires to be preeminent nationwide in our selected research and educational focus areas, to be ranked in the top quartile of civil engineering and environmental geoscience programs in the United States, to have global reach and impact in education and research, and to promote positive contributions to society in the Catholic tradition. CE/GEOS strives to provide a stimulating and unique interdisciplinary environment for learning and research by blending traditional disciplines of engineering and science. CE/GEOS offers outstanding educational programs for those aspiring to contribute as leaders in the fields of Civil Engineering, Environmental Engineering, and Environmental Geosciences. CE/GEOS's educational objective is to provide students with the knowledge, skills, vision and ethical basis to contribute as leaders in design, construction and protection of our civil infrastructure, and understanding, management and remediation of the environment.

Program of Studies. The Department of Civil Engineering and Geological Sciences offers programs of study leading to the degrees bachelor of science in civil engineering, bachelor of science in environmental geosciences, master of science in civil engineering, master of science in geological sciences, master of science in environmental engineering, and doctor of philosophy.

Program in Civil Engineering. This program is accredited by the Engineering Accreditation Commission of ABET, Inc. The department presents a well-rounded program for the bachelor's degree with the first two years devoted primarily to the basic principles of science and engineering. The third and fourth years are devoted to courses in the basic areas of civil engineering—structural analysis and design, hydraulics and hydrology, water supply and wastewater disposal, materials of construction, geotechnical engineering, and transportation engineering. A student may emphasize a particular area of interest by selecting either the environmental engineering and hydrology sequence or the structures sequence, and by the careful use of elective courses. Civil engineering electives in the senior year may be regular courses, individualized directed study or research courses.

Most courses in the program are prescribed for all civil engineering students so that each student receives a firm foundation in the many basic disciplines comprising the broad field of civil engineering. This is especially desirable, for often in the course of professional development the civil engineer is asked to coordinate the planning, design, and construction of highly complex systems and must use many or all of these disciplines.

The department has excellent facilities for research available to both graduate and undergraduate students. These facilities include a structural dynamics/structural control laboratory; a materials testing and structural research laboratory; a groundwater hydrology field laboratory; and a number of analytical laboratories for water, wastewater and hazardous waste treatment.

The professional aspects of civil engineering are emphasized and promoted by the activities of a student chapter of the American Society of Civil Engineers, in which all students of the department are eligible to participate.

Further details about the civil engineering and environmental geosciences programs may be found on the Web at nd.edu/-cegeos.

First Year of Studies. First-year students intending to major in civil engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Total degree required credits 130

+See "Arts and Letters Core" on the first page of the College of Engineering section.

**Note: Beginning in the spring semester of the junior year the student chooses to follow option A, the structural engineering concentration, or option B, the environmental engineering and water resources concentration. Each track is defined by the specialization courses shown. Note that, by an appropriate choice of electives, a student may complete both concentrations.

CIVIL ENGINEERING AND GEOLOGICAL SCIENCES

Certain graduate courses are open to advanced undergraduates with permission of the department chair.

ENVIRONMENTAL GEOSCIENCES

This degree is administered by the College of Engineering.

Program in Environmental Geosciences.

The Environmental Geosciences program at Notre Dame was founded by the Department of Civil Engineering and Geological Sciences to provide students with a quantitative preparation for professional careers or continued higher education in the disciplines of earth and environmental science. The program provides a foundation in the physical sciences, with emphasis on processes that occur near or at the surface of the Earth, and the impact of human activity on such processes. Students explore the geochemical, mineralogical, and hydrological properties of Earth's crust, and develop an understanding of the interplay of natural processes such as mineral-water-rock-bacteria interactions, with anthropogenic issues such as transport of toxic heavy metals and safe disposal of nuclear waste.

The environmental geosciences program combines classroom, laboratory, and field studies. Students are encouraged to participate in a semester study abroad, such as the Australia program (during the fall semester, junior year), which provides additional opportunity for field-based studies. All students are encouraged to conduct independent research under faculty supervision during their senior year.

An undergraduate major in environmental geosciences prepares a student for graduate study (M.S., Ph.D.) in many aspects of geology and environmental sciences, as well as for admission to a variety of professional schools. In addition, this program meets the criteria for graduates to become state-registered geologists in those states requiring such certification. Graduates with a B.S. degree may enter careers in diverse areas such as the National Park Service, industry, environmental consulting, and government research laboratories. An environmental geosciences degree is also an ideal background for those planning to teach in secondary schools at all levels. Further details can be found at nd.edu/~envgeo.

The flexibility of our undergraduate program allows engineering and science students to major in the environmental geosciences. Below you will find an example of the curriculum that can be followed by a student who commits to the **College of Engineering**. This is followed by an example of how a student committed to the College of Science may also take advantage of this major.

14.5

From the spring semester, sophomore year, the curriculum is the same as that listed above for engineering students, except a technical elective is taken in place of an Arts and Letters course during the fall semester, senior year. The total number of semester credit hours is the same.

Minor in Environmental Geosciences⁴

A minor in environmental geosciences requires the completion of 23 credit hours in geological sciences as follows.

ENVG 20110. Physical Geology + lab	4
ENVG 20120. Historical Geology	4
ENVG 20200. Mineralogy	4
ENVG 45200. Field Trip	1

13

Total

CIVIL ENGINEERING AND GEOLOGICAL SCIENCES

One of:

ENVG 20210. Ig. and Met. Petrology	4
ENVG 30400. Str. Geology and Rock Mech.	4
ENVG 30230. Sediment. and Stratigraphy	4

Total	4
--------------	----------

Two of any 30XXX or 40XXX 3-credit ENVG course.

For example:

ENVG 30300. Surficial Proc. Surf. Hydrol.	3
ENVG 40300. Geochemistry	3
ENVG 40310. Env. Imp. Res. Utilization	3
ENVG /SC 40380. Paleontology	3
ENVG 40340. Water-Rock Interaction	3
ENVG 40360. Geomicrobiology	3

Total	6
--------------	----------

Total for the Minor: 23 semester hours.

Notes:

1. EG 10111 and EG 10112 are accepted but not required for the environmental geosciences degree.

2. Under special circumstances, MATH 10240 may be an acceptable substitute for MATH 10550, and the sequence MATH 10350-10360 may be considered as an acceptable substitute for MATH 10550-10560.

3. University requirements include:

FYC 110

*Theology 6 hours

*Philosophy 6 hours

*History 3 hours

*Social Science 3 hours

*Fine Arts or Literature 3 hours

*one of these must be a University Seminar 13186.

4. Technical electives are typically junior and senior level courses in science or engineering that have been approved by the chair of Civil Engineering and Geological Sciences. Other courses must receive departmental approval. Students must ensure they have met prerequisite requirements for technical elective courses.

5. CHEM 10181 may be substituted for CHEM 10171; CHEM 10172 or 10182 may be substituted for CHEM 10122. Other substitutions will be considered on a case-by-case basis.

COURSE DESCRIPTIONS

Gregory R. Madey

Associate Professional Specialists:

Ramzi K. Bualuan; J. Curt Freeland

Program of Studies. The Department of Computer Science and Engineering offers programs of study that lead to the degrees of bachelor of science in computer science and bachelor of science in computer engineering. The program in computer engineering is accredited by the Engineering Accreditation Commission of ABET, Inc. The department also offers programs that lead to a master of science in computer science and engineering, and a Ph.D..

Educational Goals. The goals of the programs in computer science and computer engineering are (1) to prepare all students for careers in the public or private sector; (2) to prepare outstanding students for graduate study; (3) to develop lifelong learning skills in all students; (4) to provide comprehensive education in computer science, including theoretical foundations, software and hardware systems, and applications; and (5) to ensure significant design experience including working in teams.

Program Outcomes. At the time of completion of the undergraduate program, all graduates should possess (1) the ability to specify, design, test, and document software; (2) an understanding of current computer software and hardware technology; (3) an understanding of science, engineering, and mathematics; (4) a comprehensive general education; (5) the ability to continue learning in response to professional needs as well as personal desire for self-improvement; and (6) an understanding of personal and professional responsibility to society.

Programs. Programs in the Department of Computer Science and Engineering follow the four-year curricula listed below. These include required and elective courses in the basic, pure, and

applied sciences, as well as the humanities, electrical engineering, computer science, and computer engineering. Emphasis is on developing a mastery of the key principles underlying the organization, operation, and application of modern computers to real problems, with a solid grounding in math and science to permit a quantitative analysis of such solutions. In addition, central to both programs is the development of the ability to function, both independently and in multidisciplinary teams, and to be prepared for continued change in future computing technology and what effects it will have on all aspects of society. Opportunities for specialization in several professional computer disciplines are available. Students are individually assisted and advised in their choices of elective courses.

Department facilities include a laboratory to support instruction in System Administration and Network Management courses, and research facilities in distributive computing and computational techniques that are used by undergraduates as well. Moreover, the department uses UNIX workstations, which support modern computer-aided design tools for the design of computer systems and integrated circuits (VLSI) in many courses. Also available is a laboratory for the fabrication of integrated circuits designed by students in the “bits-to-chips” program.

Further information about computer science and computer engineering programs may be found on the Web at cse.nd.edu.

PROGRAM IN COMPUTER ENGINEERING

The Program in Computer Engineering focuses on understanding the basic nature of the electronic devices that go into the creation of modern computers and on the detailed architecture and organization of such systems, both within the central processing unit and in how larger systems are assembled. Modern design tools and techniques are introduced very early in the program and used throughout to design, analyze, and prototype real digital computing systems. All computer engineering students are required to enroll in at least one of a prescribed set of design courses before graduation.

PROGRAM IN COMPUTER SCIENCE

The Program in Computer Science focuses on the application of computers to real problems, especially in the design, development, and use of software. The program is designed to foster an understanding of the key properties of algorithms (the mathematical statements of how problems are to be solved), and how to recognize and design good algorithms to solve real problems in efficient fashions. The program also includes developing the ability to engineer large, efficient, portable, and scalable pieces of software that implement good algorithms in ways that are useful to the end users, and to do so in ways that use modern software development tools and techniques.

FIRST YEAR OF STUDIES

First-year students intending to major in computer engineering or in computer science when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

* These courses must be selected from a list approved by the department. For computer engineering, at least one must be a designated design course.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Computer Science and Engineering](#) heading.

Electrical Engineering*Chair:*

Thomas E. Fuja
H.C. and E.A. Brosey Professor of Electrical Engineering:

Panagiotis J. Antsaklis
Leonard Bettex Chair of Electrical Engineering in Communications:

Daniel J. Costello Jr. (emeritus)
Frank M. Freimann Professor of Electrical Engineering:
Craig Lent

Frank M. Freimann Professor of Electrical Engineering:
Ruey-wen Liu (emeritus)

Frank M. Freimann Professor of Electrical Engineering:
James L. Merz (emeritus)

Keough-Hesburgh Chair in Electrical Engineering and Biological Sciences:

Gregory Timp
Frank M. Freimann Professor of Engineering:
Anthony N. Michel (emeritus)

Frank M. Freimann Professor of Electrical Engineering:
Wolfgang Porod

Professors:

Peter H. Bauer; Gary H. Bernstein; William B. Berry (emeritus); Oliver M. Collins; Patrick J. Fay; Thomas E. Fuja; Eugene W. Henry (emeritus); Yih-Fang Huang; Joseph C. Hogan (emeritus); Michael D. Lemmon; Christine M. Maziar; Alan C. Seabaugh; Gregory L. Snider; Robert L. Stevenson; John J. Uhran Jr. (emeritus)

Associate Professors:

Martin Haenggig; Douglas C. Hall; Debdeep Jena; Thomas H. Kosel; J. Nicholas Laneman; Ken D. Sauer; Huili (Grace) Xing

Assistant Professors:

Vijay Gupta; Mark Wistey

Research Professors:

Alexander Mintairov; Alexei Orlov

Research Associate Professor:

Thomas Pratt

Professional Specialist:

R. Michael Schafer

Concurrent Faculty:

Kevin Bowyer; Jay Brockman; Patrick Flynn; Sharon Hu

Statement of Goals and Objectives. The goals of the Department of Electrical Engineering's academic programs are to provide quality education and to foster leading-edge research as a means of training highly qualified engineers and leaders of tomorrow, in keeping with the mission of the University of Notre Dame. The educational objectives through which these goals are met are:

- A thorough foundation for each graduate in basic scientific and mathematical knowledge, and in skills appropriate for practice in the field of electrical engineering immediately after graduation and well into the future.
- Preparation of electrical engineering students for graduate and professional degree programs.

DUAL DEGREE PROGRAMS

- Breadth in education preparing graduates for adaptation to varied career paths and changing professional landscapes.

Program of Studies. The Department of Electrical Engineering offers programs of study that lead to the degrees of bachelor of science and master of science in electrical engineering and doctor of philosophy. The program leading to the bachelor of science degree is accredited by the Engineering Accreditation Commission of ABET, Inc.

Program in Electrical Engineering. The four-year curriculum, listed below, includes required and elective courses in the pure and applied sciences, the humanities, and electrical engineering. Emphasis is on the mastery of fundamental principles, with added depth and provision for specialization in the major professional areas of communications, control systems, electronic circuits, design and analysis, microelectronics and integrated circuits, fabrication, photonics, and signal image processing. Students are individually assisted and advised in their choices of elective courses. Departmental facilities include laboratories for electronics, circuits, electrophysics, control systems, communications, integrated circuit fabrication, photonics, microwave circuit/device characterization, and digital signal/image processing. State-of-the-art computers are available for use in all classes.

Further details about the electrical engineering program may be found on the Web at ee.nd.edu.

Dual Degree Programs

DUAL DEGREE PROGRAM WITH THE COLLEGE OF ARTS AND LETTERS

Coordinators:

Cathy Pieronek
Assistant Dean
College of Engineering
Ava Preacher
Assistant Dean
College of Arts and Letters

Program of Studies. The five-year dual degree program between the College of Arts and Letters and the College of Engineering enables the student to acquire degrees from both colleges—the bachelor of arts from the College of Arts and Letters and the bachelor of science degree in a chosen program of the College of Engineering.

This combination program, instituted in 1952, offers students the advantages of both a liberal and a technical education. The student completing one of these combination programs has a background in the humanities and social sciences as well as a degree from one of the programs offered by the College of Engineering. Advisors for the program are available for consultation about the advisability of entering the program and about meeting the particular needs of each student pursuing this program. Qualified students are eligible to receive modest scholarship support from the John J. Reilly Endowed Scholarship program during their third, fourth, and fifth years of study.

The decision to enter the program ideally should be made prior to beginning the sophomore year, although students can also enter the program at a later stage. Three sets of requirements must be met by students in the program: University requirements, Arts and Letters requirements and Engineering requirements, as the following table indicates.

DUAL DEGREE PROGRAMS

+ The University Seminar may be selected from an appropriate history, social science, fine arts or literature course, or the first course in theology or philosophy.

* The University degree requirement is one course in literature or fine arts. The College of Arts and Letters requires a minimum of one course in each subject area, plus one additional course in history or social science.

** Two courses in the intermediate or advanced series complete the requirement. Beginning or elementary series require three semesters' work to fulfill the language requirement.

† Courses specified by the student's major engineering department.

†† Courses necessary to fulfill the requirements for a major in the student's major arts and letters department.

DUAL DEGREE PROGRAM WITH THE MENDOZA COLLEGE OF BUSINESS*Coordinators:*

Mary Goss
Director of Admissions
Master of Business Administration Program
Cathy Pieronek
Assistant Dean
College of Engineering

Program of Studies. The dual degree five-year program between the Mendoza College of Business and the College of Engineering enables the student to earn the bachelor of science in a chosen field of the College of Engineering and the master of business administration.

This program, instituted in 1991, offers students the opportunity to better integrate study in engineering and in management. The student completing this program has a background in the management sciences, as well as the first professional degree in one of the fields of engineering. Because it is a demanding program, only those students of superior scholastic ability, who have both the aptitude and motivation necessary for the combined graduate and undergraduate program, should apply. Advisors for the program are available for consultation about the advisability of applying for the program and about meeting the particular needs of each student pursuing this program.

This program is open only to those currently enrolled Notre Dame students who have completed three years of a degree program in the College of Engineering. Students interested in the MBA/engineering program should apply to the MBA program during their junior year. To facilitate the application process, students should take the Graduate Management Admission Test (GMAT) by December of their junior year.

An applicant who is not admitted to the dual degree engineering/MBA program continues in the undergraduate engineering program and completes his or her undergraduate engineering program in the usual four-year time frame.

DUAL DEGREE PROGRAMS

As a general rule, it is expected that a student accepted to this program will take two courses required for the undergraduate engineering degree during the summer session following the junior year. The following schedule of classes is an example of how a program might be accomplished.

Students in the five-year engineering/MBA program are also required to:

- (1) Complete a minimum of 48 MBA credit hours and maintain a GPA of at least 3.0 to successfully complete the program.
- (2) Take all MBA courses in their fourth year.
- (3) Maintain full-time student status (minimum course load of 12 credit hours per semester).

First Year, Sophomore Year, Junior Year:

As outlined for individual engineering degree programs in this Bulletin. 98–104 credit hours.

Summer Session Following Junior Year:

Arts and Letters course+	3
Arts and Letters course+	3
Math Review Workshop*	0
Accounting Review Workshop*	0

The MBA curriculum divides each semester into two modules.

Senior Year

36 credits, all MBA courses

First Semester, Module 1:

ACCT 60100. Financial Accounting	2
MBET 60340. Conceptual Foundation of Business Ethics	2
MGT 60100. Statistics	2
MGT 60300. Organizational Behavior	2

First Semester, Interterm Week:

Professional Development Seminar	1
Communications Seminar++	1

First Semester, Module 2:

ACCT 60200. Cost Accounting	2
FIN 60400. Finance I	2
FIN 60210. Microeconomic Analysis	2
MARK 60100. Marketing Management	2

Second Semester, Module 3:

FIN 70600. Finance II	2
FIN 60220. Macroeconomic Analysis	2
MGT 60900. Strategic Decision Making	2
Free Elective	2

Second Semester, Interterm Week:

Values in Decision Making	1
Required Course (TBD)	1

Second Semester, Module 4:

MGT 60400. Leadership and Teams	2
MGT 60700. Operations Management	2
Free Elective	2

Fifth Year

12 credits, MBA courses and remainder engineering courses

First Semester, Module 1:

MGT 60200. Problem Solving	2
Management Communication Elective I (Floating Optional Elective*)	2)

**Students have the option to take one additional two-credit-hour elective now or in any remaining module.*

First Semester, Module 2:

Ethics Elective	2
Management Communication Elective (Floating Optional Elective)	2)

Second Semester, Module 3:

Free Elective	2
Free Elective	2
(Floating Optional Elective)	2)

Second Semester, Interterm Week:

(OPTIONAL: Two one-credit-hour electives OR

Corporate Case Studies OR
Offshore Program: China or Brussels 2)

Second Semester, Module 4:

Free Elective	2
Free Elective	2
(Floating Optional Elective)	2)

+See "Arts and Letters Core" on the first page of the College of Engineering section.

++Special one/two-week courses. All other MBA courses are seven weeks in length.

**Occurs during August Orientation*

Total for both degrees: 126–132 undergraduate, 48 MBA

One MBA course will be accepted as an elective or technical elective by each College of Engineering program. No more than two MBA courses may be accepted toward an undergraduate degree from the College of Engineering. Students are advised to check specific program requirements.

College of Science

The University of Notre Dame awarded its first bachelor of science degree in 1865. Before that time, courses had been taught in mathematics (from 1842), in biology (from 1844), and in chemistry (from 1850). In 1867, a program in general science was formulated. Subsequently, specialized programs were added, leading to the degree of bachelor of science in botany and in zoology (both now covered by one degree in biological sciences), in environmental sciences, in biochemistry, in chemistry, in physics, in mathematics, and in preprofessional studies.

Departments of the College of Science

The Department of Applied and Computational Mathematics and Statistics is housed in Hurley Hall, in the academic center of campus. The facilities include office space for faculty members, graduate students and postdoctoral associates, as well as space for these department members to collaborate with undergraduate students in research and educational activities. The department has access to the computing resources of the Center for Research Computing and computing facilities dedicated to department research groups.

The Department of Biological Sciences, located in the Galvin Life Science Center, has well-equipped laboratories for undergraduate and graduate research. The facilities include controlled-environment rooms; an optics facility containing confocal microscopes, scanning and transmission electron microscopes; molecular analysis facilities for DNA sequencing, microarrays, cell sorting; and extensive data storage and retrieval equipment.

The Hank Center for Environmental Science provides more than 20,000 square feet of state-of-the-art research space for aquatic, terrestrial, and environmental studies that includes greenhouses, wet laboratories, and a field sample processing room.

The Freimann Life Science Center provides additional laboratories, vertebrate animal care, and associated specialized modern research facilities to serve the expanding needs of life science research at Notre Dame.

The Jordan Hall of Science contains 16 state-of-the-art biology laboratories for teaching undergraduate and graduate life science laboratory courses. In addition, the collections of museum specimens, including the Greene-Nieuwland Herbarium and the Museum of Biodiversity, are available for research and teaching, housed in superb facilities in Jordan Hall.

The Department of Chemistry and Biochemistry, located in Nieuwland Science Hall and Stepan Hall

of Chemistry and Biochemistry, has laboratories devoted to research in several areas of chemistry: physical, inorganic, organic, and biochemistry. The laboratories are equipped with all necessary facilities for undergraduate students, graduate students, postdoctoral investigators, and faculty. Undergraduate researchers have access to seven high-field NMR spectrometers and three state-of-the-art single crystal X-ray diffractometers, plus many other pieces of equipment such as infrared, ultraviolet, Raman, mass spectrometer; photoelectron spectroscopy; potentiostats; analytical and preparative HPLC and GC equipment; special apparatus for studying mechanisms and rates of reactions; and cell culture facilities. For theoretical work, two large parallel cluster supercomputers are available. The facilities of the Radiation Research Laboratory are used by some faculty of the chemistry department for research in physical chemistry.

The new Jordan Hall of Science houses all of the undergraduate teaching laboratories for chemistry and biochemistry. Included are spacious facilities for introductory and organic chemistry; analytical, physical, and inorganic chemistry; and biochemistry. The building also contains a new NMR spectrometer. Also within Jordan Hall are two large lecture rooms specially designed for teaching introductory science courses, along with a 150-seat multimedia visualization center.

The Department of Mathematics is housed in Hayes-Healy Center/Hurley Hall, conveniently located in central campus. The facilities for undergraduate and graduate instruction and research in mathematics include a first-rate research library; a faculty room; offices for the faculty, postdoctoral investigators, and other visitors, graduate students, and staff; several research seminar and conference rooms; and several large classrooms with state-of-the-art media capability.

The Department of Physics, located in Nieuwland Science Hall, has classrooms and laboratories for both undergraduate and graduate research. There are facilities for experimental work in astrophysics, biophysics, condensed-matter physics, elementary particle physics, and nuclear physics. There are three atomic spectroscopy laboratories, and some additional use is made of facilities at Argonne National Laboratory. Elementary particle experiments are done at the Stanford and Fermi national laboratories, and at CERN in Geneva, Switzerland. Detector development for the major accelerators is also being done in the department. The Nuclear Structure Laboratory has a tandem accelerator with a heavy ion capacity and all necessary detection equipment. A variety of solid state facilities are available for the study of metals, high T_c superconductors, and semiconductors. Off-site facilities at Argonne, the

National High Magnetic Field Laboratory, and the National Institutes of Standards and Technology are also heavily used. Notre Dame is a partner in the Large Binocular Telescope project. This will be one of the most capable facilities in the world for cutting-edge cosmology and astrophysics research. Research is conducted in many major areas of theoretical physics, including all of the above areas as well as statistical mechanics, field theory, general relativity, and astrophysics. The department has a substantial machine shop and research library and a variety of staff technicians. Many faculty members and research groups have computing facilities, and all have access to the Office of Information Technologies' very large computers.

The new Jordan Hall of Science houses all of the undergraduate teaching laboratories for physics, including spacious facilities for introductory mechanics, electricity and magnetism, and modern physics. Within Jordan Hall are also a laser and optics lab and an advanced laboratory for physics majors. The building also hosts a rooftop observatory equipped with a dozen small telescopes for introductory astronomy courses, along with a separate dome housing a large, research-quality telescope for physics and astronomy students. Jordan Hall is also home to a 150-seat digital visualization theatre that serves as a planetarium for a variety of astronomy and astrophysics courses.

The Department of Preprofessional Studies is located in the Center for Health Sciences Advising in the Jordan Hall of Science. This center centralizes the advising process for all University students interested in the health professions. All courses for students enrolled in the preprofessional program and collegiate sequence programs are provided by the other departments of the College of Science and the other colleges of the University.

Undergraduate Education

The aim of the program of undergraduate education in the College of Science is to produce intellectually able graduates who are grounded in the broad fundamental principles of the basic sciences, versed in the advanced concepts of their chosen scientific discipline and educated in the humanistic and social studies. Each graduate should be a good scientist in his or her own field; a fully developed person, aware of his or her responsibilities to society and prepared to participate fruitfully in the affairs of society.

Education in science at Notre Dame is a coordinated program involving the basic sciences, the chosen advanced science, and the humanistic and social studies, including theology and philosophy. In this education, the student should acquire a thorough,

UNIVERSITY AND COLLEGE REQUIREMENTS

integrated, and broad understanding of the fundamental knowledge in his or her field, a competence in orderly analytical thinking, and the capacity to communicate ideas to others, orally and in writing. This system of education is so arranged to develop in each student the desire and habit of continuing to learn after graduation, advancing over the years to higher levels of professional and personal stature and keeping abreast of the changing knowledge and problems of his or her profession.

Emphasis is placed on fundamental principles so that the students can develop abilities to apply these principles to the solution of new problems never before encountered by society, to the discovery of new things and to the invention of devices not learned about in books. Notre Dame stresses basic concepts useful in later learning rather than masses of particular facts and data that can better be found in books at the time of need.

Curricula and Degrees

The College of Science offers curricula leading to the degree of bachelor of science in each of five undergraduate departments:

Applied and Computational Mathematics and Statistics
 Biological Sciences
 Chemistry and Biochemistry
 Mathematics
 Physics
 Preprofessional Studies

The following are degree programs offered by these departments:

Applied and Computational Mathematics and Statistics
 Biochemistry
 Biological Sciences
 Chemistry
 Chemistry combined with Business
 Chemistry combined with Computing
 Environmental Sciences
 Mathematics
 Mathematics (combined with other programs)
 Physics
 Physics (combined with other programs)
 Preprofessional Studies
 Science-Business
 Science-Computing
 Science-Education

These degree programs are described in detail in later sections of this *Bulletin*.

See also the bachelor of science degree programs offered by the College of Engineering:

Computer Science
 Environmental Geosciences

Each College of Science student must enroll in the department of his or her major beginning with the sophomore year; however, a student may freely

change primary majors in the College of Science at any point up until the last drop day of the fall semester of the senior year. Concentrations, second and supplementary majors, and minors may be changed at any time.

The College of Science maintains a website at science.nd.edu. Further information related to programs offered by the college may be found at that location.

Listed below are the allowed options for students interested in double science majors, double majors between colleges, second majors in the College of Science, and supplementary majors and minors in the College of Arts and Letters.

Students pursuing one of these combination programs must have superior scholastic ability and be formally accepted by the dean of both colleges involved. Approval will not be granted if there is substantial overlap between the two programs.

Note: Courses taken toward the completion of an additional major, supplementary major or minor may not also be counted toward the student's other major, supplemental major, supplemental major or minor.

Double Science Majors. In certain instances, students will have the option of pursuing majors in two departments of the College of Science. Details on the double science major option and lists of combinations that are normally approved are found under "Special Programs," later in this section of the *Bulletin*.

Dual Degree. Notre Dame students pursuing majors in two of the undergraduate colleges may qualify for a five-year dual-degree program.

The requirements for a dual degree generally are as follows: The student completes all of the university requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a dual degree in the two colleges. While the total number of hours required does depend on the two major programs, the minimum required total number of degree credits is set to be 30 degree credits beyond the college total for the college with the greatest required number of degree credits. For students completing a dual degree in the College of Science and the College of Arts and Letters, the minimum number is thus 154 hours.

Double Majors in Two Colleges. Qualified Notre Dame students pursuing majors in one of the other undergraduate colleges or schools may add another major in the College of Science. Additionally, qualified Notre Dame students pursuing a major in the College of Science may also add another major in one of the other undergraduate colleges or schools.

The requirements for a double major between colleges generally are as follows: The student completes all the University requirements, the requirements of

his or her college or school, and the requirements of both majors. In general, a single course may not satisfy requirements for both majors.

Supplementary Majors and Minors. Qualified Notre Dame students pursuing majors in the College of Science may add a supplementary major or minor. Options include programs offered through the College of Arts and Letters and the Environmental Geosciences minor offered through the College of Engineering.

Not all supplementary major programs are open to science students; e.g., science students may not add the Arts and Letters Preprofessional Studies supplementary major nor the Computer Applications supplementary major.

Supplementary Majors, Minors, and Concentrations in the College of Science. In the College of Science, the term "second major" is used for a supplementary major. Three departments offer a second major program specifically for students in the other colleges: Mathematics as a second major, physics as a second major, and environmental sciences as a second major. For details, see the departmental sections of this *Bulletin*.

There are no minor programs in the College of Science.

Two departments in the College of Science offer concentration programs: Mathematics and Physics. For details, see the departmental sections of this *Bulletin*.

Combination Five-Year Program with the Mendoza College of Business. The College of Science and the Mendoza College of Business have established a competitive cooperative program in which a student may simultaneously earn a bachelor of science and a master of business administration degree. The program is structured so that the student who has completed the three years of a science bachelor's degree program, if accepted, completes the master of business administration and the bachelor of science in a major in the College of Science in a summer session and two subsequent academic years.

Students who wish to pursue this program should have a superior scholastic record in their major program and must make application to, and be accepted by, the MBA program.

The general sequence of courses in the five-year Science-MBA program may be found under "Dual Degree Program with the Mendoza College of Business," later in this section of the *Bulletin*.

University and College Requirements

A minimum of 124 credit hours is required for graduation from the College of Science. A minimum of 60 credit hours must be in science; however, each

STUDENT ORGANIZATIONS AND ACTIVITIES

department may specify more than 60 credit hours for any of its programs.

All College of Science majors must fulfill University requirements, which include:

FYC 13100	3 hours
*Theology	6 hours
*Philosophy	6 hours
*History	3 hours
*Social Science	3 hours
*Fine Arts or Literature	3 hours
* One of these courses must be a University seminar.	

In addition, all College of Science majors must take courses in:

- Chemistry (10171 and (10172 or 10122) or 10181, 10182)
- Mathematics (10350, 10360 or 10550, 10560 or 10850, 10860)
- Physics (10310, 10320 or 10411, 20435 or 30210, 30220).

The appropriate sequence for a student depends on the student's major.

The College of Science requires language proficiency through intermediate level in one of the following languages: Arabic, Chinese, French, German, Greek, Irish, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. "Intermediate proficiency" is defined differently in each of the languages, depending on the complexity of the language and the intensity of the course. Students may complete the language requirement by either completing a course taught at intermediate level or by demonstrating proficiency through placement examination. The college office maintains a list of language courses at intermediate level. (See the college website, science.nd.edu under Academic Information Frequently Asked Questions.)

Students with no previous background in a language should start with a beginning-level course. They take typically either nine credits over a three-semester period, eleven credits over a three semester sequence, or two semesters of an intensive language sequence (10 credits total). Students with Advanced Placement or SAT II credit may receive up to eight credit hours of language toward their degree. If for some reason more than eight credits appear on the transcript, only eight credits will count toward the required 124 credits. Students who arrive with some background in the language they elect, but without AP or SAT II credit, will be placed by departmental examination but will receive no credit hours.

The College of Science will count a maximum of three credit hours from the following types of activity courses:

Band (Marching and Concert)
Orchestra
Chorale
Glee Club
Liturgical Choir
Folk Choir

Music Lessons and Ensembles

Dance
Debate
Science in the Classroom

No more than one credit hour total from any of these courses may be counted toward the degree per semester. Additionally, a maximum of six credit hours of upper-level (30000- or 40000-level) ROTC courses can be counted toward the 124-credit-hour requirement. These courses will be counted as free electives.

The College of Science works with the Center for Social Concerns (see page 23 of the *Bulletin*) to develop relevant, community-based opportunities. Science majors may count as general electives up to 3 credits for approved Summer Service Learning Program courses (e.g., THEO 33936) or Social Concerns Seminars (e.g., CSC 33951).

Not all science courses will count toward degree credit or science elective credit for science majors. The survey science courses offered as options for non-science majors for their University science requirement will not count as a science elective or toward the minimum science credit hour requirement. Because of overlap in content with required courses for science majors, many of these courses will also not count toward the degree credit requirement (see "Science Degree Credit," later in this section of the *Bulletin*).

Some major programs have a science elective requirement. Recommended science electives for particular science majors are found on the college's website, science.nd.edu. For a course to be a science elective, it must meet the following rules: (1) It is offered through one of the departments of the College of Science or through the college itself. (2) It is major's level; that is, other science majors are required to take this course to meet a major requirement or it has a prerequisite course that is offered for science majors, or the *Bulletin* description for the course states that it is a science elective in the College of Science. Finally, the departments may place additional restrictions on allowed science electives, e.g., in the Department of Biological Sciences, a science elective must be a non-biology course.

All College of Science courses offered by a major program must be taken at the University of Notre Dame. If a student wants to take a course outside Notre Dame for credit toward the Notre Dame degree, prior approval of the dean's office must be obtained. This does not apply to the courses taken by a transfer student prior to attending Notre Dame.

Advising. All Notre Dame science majors have been assigned an advisor in the department of their major. All advisors are members of the faculty of the College of Science. In some departments, the director of undergraduate studies for the department advises all students. In others, the director of undergraduate studies or the department office may be contacted to find out the name of the student's

advisor. A complete list of names of advisors is kept on the science website.

Notre Dame students who have questions concerning the choice of a major or considering a change of major are urged to make appointments with the advisors of the departments involved. Students needing help choosing from similar majors may request an advising appointment with the associate or assistant dean of undergraduate studies of the College of Science, 174 Hurley Hall. Any Notre Dame student who is considering a health profession can receive advising in the Center for Health Sciences Advising in 219 Jordan Hall.

Student Organizations and Activities

In addition to participation in University-wide student activities, the undergraduate students of the College of Science may participate in activities directly related to science, including the undergraduate departmental science organizations: the Biology Club, the Notre Dame Chapter of Student Affiliates of the American Chemical Society, the Mathematics Club, the Society of Physics Students, the Premed Club (preprofessional), the Prevet Club, the Science-Business Club, and the Notre Dame Chapter of Alpha Epsilon Delta (premedical honorary fraternity).

Student Council. The Student Council of the College of Science is composed of representatives of the majors of the College of Science. The student council serves as the official body representing the undergraduate students before the administration of the College of Science.

Student Awards and Prizes

The Dean's Award. Presented to the outstanding graduating senior in the College of Science in recognition of exemplary personal character, leadership, service, and outstanding achievement. Selected by the dean and associate dean.

Outstanding Senior Biological Scientist(s). To the senior(s) who has/have demonstrated the most promise in the biological sciences as evidenced by both academic performance and research participation.

Merck Index Award. For outstanding achievements in chemistry or biochemistry.

Norbert L. Wiech Ph.D. Award. Given to a chemistry or biochemistry major in the junior year for outstanding achievement in academics and research.

Outstanding Biochemist Award. For leadership, academic achievements, research and scholarship in biochemistry.

SPECIAL OPPORTUNITIES

Outstanding Chemist Award. For academic and research achievements in chemistry as an undergraduate.

William R. Wischerath Outstanding Chemistry Major Award. For academic achievements of a graduating senior chemistry major.

Chemistry-Education Award. For academic achievements in preparation for teaching of chemistry in a secondary education system.

The General Electric Prizes for Honors Majors in Mathematics. Awarded to senior honors majors in the Department of Mathematics who, in the opinion of the members of the faculty, excelled in mathematics during their undergraduate career.

The General Electric Prizes for Majors in Mathematics. A similar award to senior majors.

The George Kolettis Award in Mathematics. An award established by friends of the late Prof. George Kolettis, for a graduating senior who excelled in mathematics and contributed notably to the esprit de corps of the mathematics student body.

The Aumann Prize for First Year Students in Mathematics. A prize given by Ms. Monika Caradonna in honor of her father, Prof. Georg Aumann, awarded on the basis of a competition among First Year honors mathematics students.

The Norman and Beatrice Haaser Mathematics Scholarships. These scholarships, made possible by the generosity of Professor and Mrs. Haaser, are awarded to worthy, needy students majoring in mathematics.

R. Catesby Taliaferro Competition for Sophomore Mathematics Honors Students. Friends and students of the late Professor Taliaferro established this prize, which is awarded to a sophomore mathematics major on the basis of an essay submitted by the student.

J & C Sophomore Award in Mathematics. Exemplary performance in mathematics classes by a non-honors math major sophomore female or minority (African-American, Asian, Hispanic, Native American) student.

Outstanding Senior Physics Major. This award is given to the outstanding senior physics major, who, in the judgment of the departmental faculty, shows the most promise for a distinguished career in physics. Course grades, the opinion of those who have taught the candidates, and any research performance are considered in making the award.

Paul Chagnon Award. An award to be given to a senior physics major for demonstrated character and leadership and for service to the University, the physics department, and to his or her fellow physics majors.

Physics Outstanding Undergraduate Research Award. A monetary award given for excellence in research to an undergraduate physics major.

DiNardo Award. To the outstanding junior preprofessional student.

Emil T. Hofman Scholarships. To six outstanding students pursuing premedical studies.

J.C. Lungren, M.D., Scholarships. Awarded to three outstanding science preprofessional students.

The Lawrence H. Baldinger Award. To seniors in the preprofessional program who excelled in scholarship, leadership, and character.

The Patrick J. Niland, M.D., Award. A monetary award given to a preprofessional studies senior to purchase books for the first year of medical school.

The Samuel Chmell, M.D., Award. To an outstanding senior in preprofessional studies who exemplifies high academic achievement and uncompromising integrity within the program.

The Rev. Joseph L. Walter, C.S.C., Award. To a senior with a keen social awareness who shows great promise as a concerned physician.

Special Opportunities

Glynn Family Honors Program. In the fall of 1983, the University inaugurated an honors program for a small number of outstanding students in the College of Arts and Letters and the College of Science.

A limited number of students with academic intents for each college are identified at the time of admission. Although selection criteria include the promise of outstanding academic performance as demonstrated by standardized test scores and high school performance, the program is looking for more than mere academic ability. It hopes to identify students with a deep intellectual curiosity.

The program offers honors sections to fulfill most of the University and college requirements in the students' freshman and sophomore years. At present, there is the yearlong Honors Seminar (satisfying the writing and literature requirements). Honors Calculus, Honors Philosophy, Honors Theology, Honors Biology, Honors Physics, and an array of Honors Social Science courses. Since these courses are restricted to honors students, they are smaller than non-honors sections and are usually taught in a seminar format. The teachers for honors sections are chosen from the most outstanding teachers in each college. After the first year, each student's academic work will be mainly centered in his or her major field (or fields) of study, but two or more honors electives are also taken during these years. In the fall of the senior year, there is an "Honors Thesis/Research Seminar," which is followed by the "Senior Seminar" in the spring. The fall seminar is intended to be a spur to the students' capstone project, whereas the spring seminar brings the honors students from diverse majors back together for some concluding topical discussions. All honors students will also be expected to complete a special six-hour senior research honors project in their major

field of study. In science, this is the culmination of a research project begun earlier, and in arts and letters, it is a two-semester project culminating in a thesis. Those writing senior theses work individually under the direction of a faculty advisor of their choosing in their major field. Funds are available for research projects during summers either at Notre Dame or other universities.

In addition to the more narrowly academic features of the honors program, students will be offered various opportunities for broadening personal, cultural, and spiritual growth. Regular colloquia, informal discussions, and cultural excursions are available.

Further information on the structure and content of the Honors Program may be obtained by contacting Prof. Alex Hahn or Prof. Cornelius Delaney, 323 O'Shaughnessy Hall, Notre Dame, IN 46556, 574-631-5398.

The Environmental Research Center (UNDERC), a University facility, is composed of approximately 7,500 acres located primarily in the Upper Peninsula of Michigan. Research is conducted at UNDERC by undergraduate as well as graduate students on a variety of environmental problems, including the manipulation of ecosystems. Internships are available to support student participation in BIOS 35502, 35503, and 35504 at UNDERC each summer semester.

International Studies Program. Students from any of the majors in the College of Science may participate in one of the University of Notre Dame's international study programs. Science students who go abroad generally do so in one of the two semesters of their junior year. Students applying to medical or dental school during the summer following their junior year (to enter after their senior year) should not study abroad in the spring semester of their junior year. Science students interested in international studies should discuss their plans with their advisor and with the associate dean, 248 Nieuwland Science Hall. Further information can be obtained through the Office of International Studies, 109 Hurley Hall.

Program of Studies. The partnership of applied mathematics, computational mathematics and statistics brings the tools of modeling, simulation and data analysis to bear on real-world problems, producing solutions with the power to predict and explain complex phenomena. These methods, often applied computationally, are being used in a wide variety of areas in business, engineering, the natural sciences, and the social sciences.

The Department of Applied and Computational Mathematics and Statistics (ACMS) offers programs of study leading to the bachelor of science degree in applied and computational mathematics and statistics. Computational skills, which are often required to solve real-world problems, will be developed continuously throughout the curriculum. For many students, significant work in an area of application will complement their core studies. Graduates of the program will be well prepared for the following post-graduate opportunities.

- Further training in professional masters or doctoral programs in applied mathematics or statistics;
- Graduate study, at the masters or doctoral level, in bioinformatics or computational biology;
- Employment in technical fields requiring skills in statistics and computation;
- Employment and further study in actuarial science and quantitative methods in business and economics.

In addition to the core bachelor of science major, ACMS offers a concentration in biological sciences, which will prepare students for further study or employment in computational biology, bioinformatics, ecological modeling, or epidemiology.

BACHELOR OF SCIENCE WITH A MAJOR IN APPLIED AND COMPUTATIONAL MATHEMATICS AND STATISTICS

The requirements for the degree include courses that develop a strong foundation in the methods of applied mathematics and data analysis, while allowing students to also take courses in a wide variety of application areas. The specific requirements for the bachelor of science in applied and computational mathematics and statistics, beyond the university and college requirements are as follows.

Chemistry (CHEM 10171, 10122 or CHEM 10171, 10172)¹
 Physics (PHYS 10310, 10320)¹
 Calculus I, II (MATH 10550, 10560)¹
 Introduction to Applied Mathematics Methods, I, II (ACMS 20550, 20750)
 Scientific Computing (ACMS 20210)
 Applied Linear Algebra (ACMS 20620)
 Introduction to Probability (ACMS 30530)
 Mathematical Statistics (ACMS 30540)
 Numerical Analysis (ACMS 40390)
 ACMS electives (9 credits in ACMS courses numbered 30000 and above)²
 MATH or ACMS elective (3 credits in MATH or ACMS courses numbered 30000 or above)^{2,3,4}
 Science elective (3 credits)

These requirements total 42 credits in ACMS and MATH and 60 credits in Science.

Concentration in biological sciences. The required courses for this concentration are as follows.

Introduction to Chemical Principles (CHEM 10171)¹
 Organic Chemistry (CHEM 10172, 20273, 21273)¹
 Physics (PHYS 10310, 10320)¹
 Biological Sciences I, II (BIOS 10161, 10162 or 20201, 21201, 20202, 21202)
 Calculus I, II (MATH 10550, 10560)¹
 Introduction to Applied Mathematics Methods, I, II (ACMS 20550, 20750)
 Scientific Computing (ACMS 20210)
 Applied Linear Algebra (ACMS 20620)
 Introduction to Probability (ACMS 30530)
 Mathematical Statistics (ACMS 30540)
 Numerical Analysis (ACMS 40390)
 ACMS electives (9 credits in ACMS courses numbered 30000 and above)^{2,5}
 Genetics (BIOS 20303)
 Cellular Biology (BIOS 30341) or Ecology (30312)
 Biology Elective (3 credits in BIOS which has BIOS 10162 or BIOS 20202 as a prerequisite)
 Elective in Biology, Chemistry or Physics (3 credits)

These requirements total 39 credits in ACMS and MATH and 78 credits in Science.

Notes:

1. Equivalent or higher sequences in science may be substituted, e.g., MATH 10850, 10860 for MATH 10550, 10560.
2. Some ACMS courses, ACMS 30440 in particular, are not acceptable as electives for the major. The list of acceptable courses for ACMS majors can be obtained from the student's advisor.
3. Introduction to Mathematical Reasoning (MATH 20630) is also an acceptable elective.
4. Students with an interest in attending graduate school in mathematics or applied mathematics are encouraged to take Algebra (MATH 30710).
5. An appropriate class in bioinformatics, biophysics, or a related topic, may be substituted for 3 credits in ACMS coursework with the permission of the Director of Undergraduate Studies.
6. A student should take three core requirement courses during the first year, including one course that is designated a University Seminar. It is recommended that one course in history or social sciences be taken in the first year and one philosophy and one theology be taken by the end of sophomore year.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Applied and Computational Mathematics and Statistics](#) heading.

Michael L. Blakesley (adjunct); Michael T. Ferdig; Paul R. Grimstad; David A. Halperin (adjunct); Jessica Hellmann; Hope Hollocher; Lei Li; Mary Ann McDowell; Edward E. McKee (adjunct); John F. O'Malley (adjunct); Michael E. Pfrender; Jeanne Romero-Severson; Jeffrey S. Schorey; Kevin T. Vaughan

Assistant Professors:

Suzanne Bohlson (adjunct); Patricia A. Champion; Giles Duffield; Molly Duman Scheel (adjunct); Stuart Jones; Shaun W. Lee; Jason McLachlan; Benjamin Ridenhour; Peter Velázquez (adjunct); Tracy Vargo-Gogola (adjunct); Rebecca Wingert

Program of Studies. The Department of Biological Sciences offers programs of study leading to the degrees of bachelor of science with a major in biological sciences or bachelor of science with a

BIOLOGICAL SCIENCES

major in environmental sciences, master of science in biological sciences and doctor of philosophy. Also offered is a second major in environmental sciences for students in the College of Arts and Letters or in the College of Business Administration.

Program in Biological Sciences. The biological sciences encompass all aspects of life sciences, including microbial, plant, and animal life. This includes the biochemistry, genetics, development, physiology, evolution, and ecology of all living things. Every educated person must have sound knowledge of the fundamental principles and facts of the biological sciences to understand himself or herself and the world in which he or she lives. In addition biologists, through their research, contribute to the development of theories and methods required for the solution of humanity's problems in the fields of health, agriculture, industry, and the preservation of the environment.

An undergraduate major in biological sciences prepares a student for graduate study (M.S., Ph.D., MD/Ph.D.) leading to a research career, and also for admission to medical, veterinary, and other professional schools. Graduates with a bachelor's degree may enter careers in industry, government, or health-related research laboratories. Those who wish to teach at the elementary or secondary level should be sure to include required education courses such as those offered through Saint Mary's College. College and university teaching requires the Ph.D. degree.

The goal of the Department of Biological Sciences is to educate its majors first as scientists prepared for the challenges of modern biology and second for any specialty area(s) in which they develop an interest, especially if that interest is directed-- toward graduate school and research. Also, for the approximately 70 percent of biology majors who initially express an interest in going to medical school or other health-related graduate programs, the key topic areas of modern biology emphasized in the core curriculum are also very relevant to their training as "medical biologists."

Students majoring in biological sciences are required to follow a core curriculum. This core not only provides exposure to most areas of modern biology but also includes courses representative of all the levels of biological organization, i.e., from atoms and molecules through ecosystems. Students unsure of which area of biology most appeals to their interests will more easily arrive at that decision through the completion of the core.

Policy Statement on the Use of Organisms in Biological Sciences Teaching Laboratories. Some laboratory courses offered by the Department of Biological Sciences may involve the use of living or preserved organisms. Instructors use these animal specimens in cases where this is deemed necessary for teaching important biological concepts and principles. *Students who have concerns about the use of organisms in classes must, prior to registering, submit a request for alternate materials to the course instructor.*

It is up to the discretion of the instructor(s) as to whether and how non-organism alternatives may be substituted for biological materials in classes. *Students permitted to use alternate materials are responsible for the same knowledge and application as their classmates and may be required to complete examinations that involve the inspection or handling of biological specimens.*

Biology Courses. The biology courses included in this Bulletin are those reasonably expected to be offered several times to every semester during the next four years. However, changes may occur as faculty add new courses or drop those with little demand. Courses without laboratories are indicated as lecture only. With the move into the new Jordan Hall of Science in fall 2006, biology faculty have begun the creation of new laboratory courses that will count toward the major laboratory requirements.

Biology Survey Courses (10101–10119) have a prerequisite of one year of high school chemistry and biology and are designed for first-year students needing to satisfy the University science requirements. These courses will address fundamental aspects of modern biology ranging from genetics to wildlife biology. There will generally be as many as six sections of biology courses available each year; any course may have multiple sections. The listed courses and new courses are offered when demand warrants, allowing subject matter to change depending on students' interests and needs and emerging or changing areas of life sciences. These survey courses are generally recommended University electives and are not open to science majors.

These 101xx-level survey courses satisfy the science requirement for non-science majors at Notre Dame.

They do not satisfy the science requirements for science majors at Notre Dame or elsewhere. Students may not take courses with overlapping or similar lecture material such as BIOS 10101 and 10110 or BIOS 10107, 10118, and 10119, for example. A table listing these overlapping courses is on the final pages of the College of Science section of this *Bulletin*.

BACHELOR OF SCIENCE WITH A MAJOR IN BIOLOGICAL SCIENCES

The biological sciences majors take the following basic sequence of courses in the College of Science:

General Chemistry (CHEM 10171 and 20274)
Organic Chemistry (CHEM 10172 and 20273)
Physics (PHYS 30210–30220)1
Calculus (MATH 10350–10360 or 10550–10560)

The requirements in biological sciences include courses from a basic six core sequence and sufficient numbers of BIOS electives to complete the 41-credit-hour requirement. **All majors are strongly encouraged to complete the sequence Biological Sciences I and II (BIOS 10161–10162) in their first year** to ensure the completion of all requirements in four years. Students may begin

the core with General Biology A and B (BIOS 20201–20202); however, they will be at a considerable disadvantage in scheduling requirements in the two remaining years; they also will have one year less to explore their interests in biology.

There are seven components to the biology core requirement, consisting of courses in the following areas:

Core I: Introductory Biology

- Metabolism and Genetics
- Ecology, Diversity, and Physiology

Students choose from either:

- Biological Sciences I and II (BIOS 10161–10162) (includes two labs)2 or
- General Biology A and B (BIOS 20201–20202) (includes two labs)2

These labs are designated Lab #1 and Lab #2 of the six required for the major.

Core II: Genetics

Students choose from either:

- Classical and Molecular Genetics (BIOS 20250 and 21250; lab #3)3 or
- Fundamentals of Genetics (BIOS 20303 and 21303; alternate lab #3)

Core III: Cellular Biology

Students choose from either:

- Molecular Cell Biology (BIOS 20241)3 or
- Cellular Biology (BIOS 30341)

Optional labs available are BIOS 21241, a research-orientated 2-credit laboratory3, or BIOS 31341, a basic 1-credit cell biology laboratory primarily for pre-professional students. Students may not take both cell labs.

Core IV: Physiology

Students choose from either:

- Vertebrate (Human) Physiology (BIOS 30344)4 or
- Integrative Comparative Physiology (BIOS 30421).

Optional labs available are BIOS 41344 and BIOS 31421. Students may take both labs if they choose.

Core V: Evolutionary Biology

Students choose from either:

- Evolution (BIOS 30305) or The History of Life (BIOS 30310)
- Other courses as designated in the future, prior to the Class of 2014 graduation.

Core VI: Ecology

Students choose from either:

- General Ecology (BIOS 30312; optional lab BIOS 31312 is offered fall semesters only)

BIOLOGICAL SCIENCES

b. Aquatic Ecology (BIOS 30420 and required lab BIOS 31420—offered fall only).

c. Select overseas ecology courses that have been approved for science credit may satisfy the Core VI requirement if approved by the Director of Undergraduate Studies in Biological Sciences *before* taking the class.

BIOS ELECTIVES

The minimum required credits in the core including labs is 27. An additional 14 credits of electives in biological sciences are chosen to complete the required total of 41 credits. 5–8 All biological sciences majors are encouraged to include non-science among their “free electives.”

Notes:

1. Alternatively, students may select the physics sequences PHYS 10310–10320 or PHYS 10411, 20435.
2. Students are required to take a total of six laboratories; three of the six labs will be part of the Core (Core I(a,b), II, and the remaining three of the six laboratories are chosen among the core III through Core VI and/or BIOS electives, including 50000- and 60000-level courses. Thus, there are three required “named” BIOS labs and three additional elective BIOS labs. As an option, students who conduct a minimum of three semesters of undergraduate research (BIOS 48498) in the same laboratory or research group at Notre Dame and earn a minimum of 3 credits (i.e., 3 x 1.0 credit), may substitute those research semesters for one of the six required labs.
3. Career-oriented majors in biological sciences, as well as those considering a professional school (medicine, veterinary science, others), are urged to select the courses Molecular Cell Biology (BIOS 20241) and Classical and Molecular Genetics (BIOS 20250). These should be taken in the sophomore year but no later than the junior year. The two-credit cell research lab (BIOS 27241) is especially ideal for those interested in obtaining summer research internships, doing undergraduate research at Notre Dame or elsewhere, and is *especially* critical to any graduate research career. Students enrolled during the summer sessions may take the 2-credit cell biology lab (BIOS 38499) as an alternative. Only one of the three available cell biology labs may count toward the required six, however.
4. Physiology should be completed by the end of the junior year for students planning to take the MCAT exam or the seventh semester for students planning to take the GRE biology subjects exam.
5. Most graduate (60000-level) courses (through 60579) are open to eligible juniors and seniors; often the majority of students in these advanced courses are undergraduates.
6. Students may choose additional courses in the Core areas III through VI or among courses not

assigned to the core (e.g., BIOS 40411, Biostatistics, or BIOS 48498, Undergraduate Research), or 60000-level courses as BIOS electives, to meet the required total of 41 credit hours in biological science courses.

7. Select non-BIOS major-level College of Science courses (i.e., those taken to meet science-major requirements and not among those designated as “Recommended University electives”) that are not being used to fulfill other specific graduation requirements can be chosen with the consent of the director of undergraduate studies for the Department of Biological Sciences and counted toward the BIOS elective credits. While majors are allowed to take one 3-credit, non-BIOS lecture course and have that count toward the 41 required credits, students may also include one non-BIOS lab *if* it is required for that non-BIOS lecture and have that laboratory satisfy one of the six required laboratories. For example, Physical Geology (SC 20110, ENVG 10110/20110) has a required laboratory, and majors who choose BIOS electives based on their environmental or ecological interests may elect to take Physical Geology for a total of 4 credits toward the 41 required credits. Majors who might have transferred into BIOS from BCHM and had taken the required biochemistry (CHEM 30341) lecture and laboratory course will be allowed to count both the lecture and laboratory toward the 41 credits. The same would be true of other relevant science courses (e.g., analytical chemistry, physical chemistry) as approved by the director of their major and the associate dean of the College of Science.

8. Undergraduate Research (BIOS 48498) and Directed Readings (BIOS 46497) count toward the 41-credit biological sciences requirement; however, only a maximum of two credits per semester per course and a combined total of six credits from these two courses may be counted in fulfilling the 41-credit requirement. A maximum of two credits of BIOS 37495 (Teaching Practicum) may be included in any combination of these six credits. A maximum of only nine credits in these courses may be used toward graduation; however, additional credits do remain on a student’s permanent transcript record.

RECOMMENDED COURSE GROUPINGS

After consultation with the director of undergraduate studies or other faculty advisors including research mentors, each student is encouraged to select the curriculum which best fits his or her career goals. A great deal of flexibility is permitted in designing each individual’s projected course schedule, within the context of the core curriculum. *In essence, each student will be able to design his or her unique biology curriculum in the context of the core requirements and additional biology electives to reflect individual career intent or life science interests.* For students wishing to emphasize specific areas of biology in their curricula, the following four course groupings are *provided as guides* that have proved to be appropriate for most of our previous

graduates. Students may wish to consider these and others that are available as the equivalent of a “concentration in a specific area of biology or simply view these as examples of how a particular interest or career goal can be supported by a structure set of courses.

General Biosciences: This grouping gives the student a broad foundation in biological sciences by requiring electives from each of its major areas. This grouping may be designed as preparation for the Graduate Record Examination (GRE) in biology, or the Medical College Admission Test (MCAT). Students considering graduate school or secondary science education, or those without a clear career goal, should consider these courses.

Here, students follow the core curriculum, making choices in Cores III through VI. For MCAT preparation, it is essential for students to complete one semester of genetics (BIOS 20250 or BIOS 20303), one semester of cell biology (BIOS 20241 or BIOS 30341), and one semester of physiology (BIOS 30344 or BIOS 30421) prior to taking that exam. Majors are strongly encouraged to take additional biology courses such as developmental biology (BIOS 30342) as additional MCAT coursework preparation.

Also recommended for electives in biological sciences is a course in either vertebrate or invertebrate biology (e.g., BIOS 30404, Vertebrate Biology, or BIOS 30406, General Entomology). Dependent on the credits associated with the choice of courses made in the core, students will be required to pick three to five more electives in biological sciences to complete the requirement of 41 credits.

Premedicine/Pre-Health: In addition to the core requirements in genetics, cell biology, and physiology, biology premed/pre-health majors are advised to include developmental biology (BIOS 30342), one or more courses in infectious diseases or disease mechanisms, biostatistics, and additional relevant electives (neurobiology, tumor cell biology, etc.), and biochemistry (CHEM 40420) as BIOS electives to reach the required 41 credits in biology.

Majors intending to go on for an MD/Ph.D. should include multiple semesters of undergraduate research and/or summer research internships in their overall program.

Cellular and Subcellular: This grouping was designed for students considering graduate study in any of the many areas of cellular biology and biochemistry. It is also appropriate for premedical students.

For this grouping, students follow the core curriculum, making choices in Cores III through VI. In the area of Core IV, Physiology, students should consider taking both courses listed. The courses Introduction to Microbiology (BIOS 30401) and Virology (BIOS 40416) are recommended. For electives in biological sciences, a course in Immunology (BIOS 40419), Genomics (BIOS 30423), or Advanced Cell Biology

BIOLOGICAL SCIENCES

(BIOS 60539) is recommended. Dependent on the credits associated with the choice of courses made in the core, students will generally be required to pick two more electives in biological sciences to complete the requirement of 41 credits.

Organismal and Community: This grouping is primarily intended for students planning careers in ecology, environmental biology and related areas and allows students to develop considerable expertise during their undergraduate years. It may include electives in biological sciences beyond the 41 credits required of the major. Individual interests may be accommodated by judicious choice of biological science courses and of the science elective.

Students interested in this area of biological sciences may wish to take advantage of the University of Notre Dame Environmental Research Center (UNDERC), a University facility which comprises about 7,000 acres, including more than 20 lakes, in the Upper Peninsula of Michigan. Biological research (including whole-ecosystem experiments), graduate studies and undergraduate course work take place at the center. Paid internships are available to support student participation in BIOS 35502 at UNDERC each summer. Students who participate in UNDERC (EAST) (BIOS 35502) are also then eligible to participate in UNDERC WEST (BIOS 35503) and/or UNDERC (SOUTH) (BIOS 35504 or 35505). However, only a maximum of 7.0 "UNDERC" credits may count towards the required 41.0 BIOS credits for this major. Credits beyond 7 are considered as general elective credits for the purpose of graduation.

In this grouping, students follow the core curriculum, making choices in Cores III through VI. In the area of Core VI, Ecology, students should consider taking both courses listed. Students are encouraged to take Plant Science (BIOS 30325). Also recommended are Vertebrate Biology (BIOS 30404) and/or General Entomology (BIOS 30406) and Animal Behavior (BIOS 30407).

Microbiology and Infectious Disease: This grouping is intended for students interested in microorganisms and molecular biology and who are considering graduate study in these areas. It is also appropriate for premedical students. It requires electives in biological sciences beyond the 41 credits required of the major.

Here, students follow the core curriculum, making choices in Cores III through VI. Students should take Principles of Microbiology (BIOS 30401 and the lab BIOS 31401); Virology (BIOS 40416); or Medical and Veterinary Parasitology (BIOS 40415); Immunology (BIOS 40419); Cellular and Molecular Basis of Human Disease (BIOS 40435); and/or AIDS (BIOS 40440).

Sample Curriculum: The sample curriculum for the four-year program listed below *is only one of a number of ways* a student can complete all the requirements for a biology major. Students should

discuss their specific interests with their departmental advisor and plan their semesters accordingly.

Alternative sample curricula can be developed with the assistance of the biology advisor.

Note that this *sample curriculum* assumes that no AP or language CE credits are included.

First Year*Fall Semester*

BIOS 10161 (Core Ia: Principles) (Lab #1)	4
MATH 10350 or 10550	4

TOTAL: 124 minimum

1 Students who begin with the CHEM 10181–10182 sequence and select BIOS as their major would complete the four-semester sequence with CHEM 20273–20274.

2 One of these courses must be a University seminar.

3 For premedical students, it is strongly recommended that the student take a 20000-level English literature course. This ensures that the student will be able to meet the standard medical-school admission requirement of two English courses. Medical ethics and biochemistry are also generally required or highly recommended.

4 While not required, many students choose to take a supporting 3-credit non-BIOS science course that counts toward the required 41 credits in their major.

Also, Biostatistics (BIOS 40411/42411) is highly recommended for all students planning on a health-related professional program or a graduate program, especially in ecology, environmental biology, or other field of life science. A non-BIOS/Science elective can be any 30000- 50000-level course other than those required, and approved by the director of undergraduate studies for the Department of Biological Sciences. Biochemistry (e.g., CHEM 40420) is especially recommended.

In addition to the undergraduate curriculum, the Department of Biological Sciences offers programs of graduate study leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

UNDERC FIELD BIOLOGY PROGRAMS

Seven-credit programs for undergraduates that emphasize field biology are offered at the University's Environmental Research Centers (Michigan and Montana). The programs entail course work, group research projects, and an independent research project. Application to the programs occurs in the fall of the sophomore and junior years and enrollment is limited by housing at each location. If selected, students enroll in BIOS 35501 during the spring semester and BIOS 35502 during the summer. To participate in the Montana (BIOS 35503) or other programs (BIOS 35504, 35505), one must first participate in the Michigan program.

CHEMISTRY AND BIOCHEMISTRY

SELECT GRADUATE-LEVEL COURSES

Many 60000-level courses in biological sciences are open to qualified undergraduates, subject to the approval of the course instructors and the director of undergraduate studies. Graduate-level courses generally include a majority of upper-class students and are recommended to undergraduate majors. These include:

60508. Population Genetics
 60515. Vector Genetics
 60523. Practicum in Environmental Biology
 60527. Stream Ecology
 60529. Population and Disease Ecology
 60530. Immunobiology of Infectious Diseases
 60531. Molecular Biology I
 60532. Molecular Biology II
 60558. Biological Electron Microscopy
 60562. Aquatic Insects
 60570–60579. Topics Courses

Additional undergraduate and graduate-level courses are expected to be added during the next four years.

The above 60000-level courses are described in the Graduate School Bulletin of Information.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Biological Sciences](#) heading.

Chemistry and Biochemistry

Chair:

Kenneth W. Henderson

George and Winifred Clark Professor of Chemistry:

Marvin J. Miller

Emil T. Hofman Professor of Chemistry

Bradley D. Smith

Charles L. Huisiking Professor of Chemistry:

Xavier Creary

Kleiderer/Pezold Professor of Biochemistry

Francis J. Castellino

Navari Family Professor of Life Sciences:

Shahriar Mobashery

William K. Warren Professor of Chemistry:

W. Robert Scheidt

Rev. John A. Zahn Professor of Science:

Prashant V. Kamat

Professors:

Ian Carmichael; Gregory V. Hartland; Paul

Helquist; Kenneth W. Henderson; Paul W.

Huber; Dennis C. Jacobs; A. Graham Lappin;

Joseph P. Marino; Dan Meisel; Thomas L.

Nowak; Anthony Serianni; Slavi Sevov; Richard

E. Taylor; Olaf G. Wiest

Associate Professors:

Brian M. Baker; Seth Brown; Patricia L. Clark; J.

Daniel Gezelter; Holly V. Goodson; S. Alexander

Kandel; Masaru Kenneth Kuno; Marya

Lieberman; Jeffrey W. Peng

Assistant Professors

Brandon L. Ashfeld; Steven A. Corcelli; Jennifer

DuBois; Amanda B. Hummon; Zachary D.

Schultz; Franklin Tao

Emeriti:

Subhash C. Basu; Roger K. Bretthauer; Thomas

P. Fehlner; Richard W. Fessenden; Jeremiah P.

Freeman; Robert G. Hayes; Emil T. Hofman;

Robert H. Schuler; J. Kerry Thomas; Anthony

M. Trozzolo; Rev. Joseph L. Walter, C.S.C.

Program of Studies. Chemistry is the science of substances that comprise the world about us and is concerned with their structure, their properties and the reactions that change them into other substances. Chemists and biochemists practice their profession in many ways—in educational institutions, government laboratories, private research institutions and foundations and in many commercial areas, including the chemical, drug, health, biotechnology, pharmaceutical and food industries.

The Department of Chemistry and Biochemistry has a strong undergraduate program together with a strong graduate education and research program. The graduate program greatly benefits undergraduate education by attracting highly qualified faculty and results in the availability of excellent research facilities and modern instrumentation necessary to train the scientists of tomorrow. This department is able to provide an excellent program of undergraduate research to complement regular course work. Student

SUMMARY OF REQUIREMENTS FOR GRADUATION FOR ANY BIOLOGICAL SCIENCES MAJOR		
		<i>Year Usual Credits Taken</i>
Biological Sciences*	41	all
Chemistry (10171–10172 or 10181–10182)	8	First year
	8	Sophomore
Physics (30210–30220 with labs)	8	Junior
Mathematics (10350–10360 or 10550–10560)	8	First year
Total Science:	73	
History**	3	First year
Social Science**	3	First year
Philosophy**	6	Sophomore/Junior
Theology**	6	Sophomore/Junior
FYC 13100	3	First year
Language	Intermediate Level Competency (3)	Sophomore/Junior
Literature/Fine Arts**	3	Junior/Senior
Free Electives	24+	Sophomore/Senior
Physical Education or ROTC (2 semesters)	0	First year
124 credits		
* It is essential for prospective biology majors to begin their general biology courses in the first year to schedule all required core curriculum courses within a four-year period.		
** One of these courses must be a University Seminar.		
+ Minimum number of free electives based on the assumption that intermediate-level competency in language was achieved by taking a minimum of one three-credit course.		
Majors with AP course credits and/or language Credit by Exam (CE) often have time to incorporate 20 or more free elective credits (i.e., a second major or minor) into their four-year course selection.		

CHEMISTRY AND BIOCHEMISTRY

participation in research is highly encouraged as a key part of the education of chemistry and biochemistry majors.

The programs in chemistry and biochemistry described in the following pages prepare students for graduate studies and professional work in the chemical and biochemical sciences, as well as in interdisciplinary areas that rely heavily on chemistry. Bachelor of science degrees are offered with a major in chemistry or a major in biochemistry. At the graduate level, the Department of Chemistry and Biochemistry offers programs leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

BACHELOR OF SCIENCE WITH A MAJOR IN CHEMISTRY

The chemistry curriculum at Notre Dame includes two programs: the Chemistry Career Program, designed for students interested in a professional career in chemistry, and the Chemistry Combination Program, designed for those students who are interested in combining chemistry with business or with computing.

All chemistry majors take the following basic sequence of courses:

General Chemistry (CHEM 10181, 11181 recommended; or optionally, CHEM 10171, 11171)
Organic Chemistry (CHEM 10182, 11182, 20283, 21283)¹

Inorganic Chemistry (CHEM 20284, 21284, 40443, 41443)

Physical Chemistry (CHEM 30321, 30322, 31322)

Analytical Chemistry (CHEM 30333, 31333)

Physical Methods of Chemistry (CHEM 40434)

Principles of Biochemistry (CHEM 40420)

Chemistry Seminars (CHEM 23201, CHEM 23202), three semesters

Physics (PHYS 10310, 10320)¹

Mathematics (MATH 10550, 10560, and CHEM 20262)

In addition to this basic sequence, the following courses are required for each program.

Chemistry Career Program

Science Electives (six credit hours)²

Combination Program

Program Electives (15 credit hours)

Science Electives (three credit hours)²

The program electives for the Chemistry Combination Program are from either the area of business or from the area of computing and are the same as those in the corresponding Collegiate Sequence programs:

Chemistry with Business

Accounting and Accountancy I (ACCT 20100)

Accounting and Accountancy II (ACCT 20200)

Business Finance (FIN 20100)

Introduction to Management (MGT 20200)

Introduction to Marketing (MARK 20100)

Introduction to Economics (ECON 10010 or 12101) is suggested, as a non-program elective, as a prerequisite to MARK 20100 and meets the University social science requirement.

Chemistry with Computing

Each student selects 15 credit hours of computer science and engineering and chemistry courses in consultation with a departmental advisor. Program electives require careful scheduling.

Notes:

1. *Substitution with permission only.*
2. *Undergraduate research, CHEM 48498, is a recommended science elective in all programs beginning in the sophomore year, with typically one or two credits per semester.*
3. *The student should take three general requirement courses during the first year, including one course that is designated a University Seminar. Economics is required for the Chemistry with Business program.*
4. *One course in theology and philosophy should be completed by the end of the sophomore year. These courses may be taken in either semester of the first or second year.*
5. *In all the programs, one chemistry seminar is generally taken in each of the sophomore, junior and senior years.*

BACHELOR OF SCIENCE WITH A MAJOR IN BIOCHEMISTRY

The biochemistry curriculum emphasizes the chemical basis of biological processes. All biochemistry majors are required to take the following courses:

General Chemistry (CHEM 10181 AND 11181 recommended; or optionally CHEM 10171, 11171)
Organic Chemistry (CHEM 10182, 11182, 20283, 21283) ¹
Inorganic Chemistry (CHEM 20284, 21284)
Physical Chemistry (CHEM 30321–30322)
Analytical Chemistry (CHEM 30333, 31333)
Chemistry Seminars (CHEM 23201, 23202), three semesters
Biochemistry Seminar (CHEM 23212)
Biochemistry (CHEM 30341, 31341, 30342)
Mathematics (MATH 10550, 10560, and CHEM 20262)
Physics (PHYS 30210–30220 or PHYS 10310, 10320)
General Biology (BIOS 10161–10162 or 20201, 21201, 20202, 21202)
Genetics (BIOS 20303, 21303)
Cell Biology (BIOS 30341, 31341)
Molecular Biology (BIOS/CHEM 50531)

5. In all the programs, one chemistry seminar is generally taken in each of the sophomore, junior and senior years.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the College of Science section under the [Department of Chemistry and Biochemistry](#) heading.

Graduate courses in chemistry are open to qualified advanced undergraduate students, subject to the approval of the departmental advisor. These courses are listed in the *Graduate School Bulletin of Information*.

Environmental Sciences

Director, Associate Professor of Biological Sciences:

Paul R. Grimstad

Program in Environmental Sciences. The form and function of planet Earth have been changed as a result of the activities of humans. Current concerns, such as environmental pollution and global warming, are the results of complex processes. It is now important for people in all walks of life to be aware of how we interact with the Earth and how environmental changes will affect us in the future.

The environmental sciences major is an interdisciplinary program designed to build sensitivity and breadth in environmental areas. The curriculum is designed to expose students to a scientific view of our environment from biological, chemical and geological perspectives. Particular emphasis is placed on understanding how humans interact chemically and biologically with the environment. Material and energy resource limitations, chemical and thermal pollution, and effects of environmental pollution on public health are major considerations within the environmental sciences curriculum. Emphasis is also placed on understanding interactions between human societies and the environment from social, ethical, economic, anthropological, and governmental points of view. Students are also encouraged to strengthen their mathematical and computational skills and to participate voluntarily in environmentally oriented research projects or summer internships.

The First Major. College of Science students who major in Environmental Sciences will earn the degree of bachelor of science. Students following the Environmental Sciences first major program complete a total of 69 credits of science. A second major in Environmental Science is also offered to students in the College of Arts and Letters or in the Mendoza College of Business.

The Second Major for Arts and Letters and Business: Most students in the College of Arts and Letters or in the Mendoza College of Business may participate in the Environmental Sciences Program as a second major. Second majors are required to complete a minimum of 37 credits of science. Students considering this program should investigate options brought to a first major by adding course work in environmental sciences. For example, students majoring in government and in environmental sciences could consider postgraduate study or careers in *public policy*. Students majoring in economics and in environmental sciences would have a good background for the developing field of *environmental economics*. A second major in Environmental Sciences also complements majors in the other sociological fields of anthropology, psychology, or sociology. Similarly, business students will likely find environmental sciences to be useful background when working with local or federal governments on issues of *environmental compliance*.

ENVIRONMENTAL SCIENCES

or when considering the impact of business decisions on the environment (*environmental assessment*). All students are urged to discuss their long-range career plans with advisors in both majors.

Relationship with Other Programs: The Environmental Sciences Major Program has a special collaborative relationship with the Science, Technology, and Values (STV) Concentration program housed in the Reilly Center in O'Shaughnessy Hall. Select courses required of environmental sciences first majors are also cross-listed as STV courses. Thus, students in the STV program from across the university are expected to benefit in the curricular endeavors of the Environmental Sciences Program. Environmental sciences first majors often enroll in the STV program. (Environmental science students with flexibility in their program often have room to complete an STV concentration by taking STV courses beyond those required by the first major or university requirements.) However, arts and letters students with second majors in environmental science will be encouraged to participate in further interdisciplinary course work through the STV concentration. Second majors are especially encouraged to take the capstone course, SC 40491, Current Topics in Environmental Science, provided it completes that second program.

Related Options: A similar bachelor's degree program, Environmental Geosciences (ENVG), is offered by the College of Engineering.

Also available through the College of Engineering is the Environmental Geosciences minor. Note, for students in ES (or SCBU, SCCO, and SCED): the College of Science will allow the course SC/ENVG 20110 to count toward both the science major and this minor. Any courses taken for completion of this minor may not also be counted as science electives or science requirements for a science major.

BACHELOR OF SCIENCE WITH A MAJOR IN ENVIRONMENTAL SCIENCES

All environmental sciences first majors take the following courses in science:

Introductory Biology (BIOS 10161–10162 and 11161–11162) or (20201–20202 and 21201–21202)

Chemistry (CHEM 10171 and 10172)

Calculus (MATH 10350–10360) or (10550–10560)^{1, 2, 3}

Physical Geology (SC 20110/21110)

Physics (PHYS 10310–10320 or 30210–30220)

Biostatistics (BIOS 40411)⁴

Ecology (BIOS 30312 and 31312)⁵

Chemistry Elective⁶

Current Topics in Environmental Science (SC 40491)

Students also will choose science electives chosen from an approved list,⁷ completing a required minimum total of 69 credits in science.

Also required for the major are the following non-science courses:

An ethics course with emphasis on environmental biology or life science issues, i.e., Environmental Ethics or Science, Technology, and Society, or other approved arts and letters courses.⁸

Introduction to Microeconomics (ECON 10010 or 20010)^{9, 10}

Students are also urged to choose their electives from a recommended list of arts and letters courses.¹¹

Requirements for the program are summarized in the table in this section.

Notes:

1. *Equivalent or higher-level sequences in mathematics may be substituted, e.g., MATH 10850–10860 for MATH 10350–10360.*

2. *Students interested in the area of ecological modeling are strongly urged to take MATH 10550–10560 for their mathematics requirement. Other mathematics courses should be taken as science electives.*

3. *Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350–10360 or MATH 10550–10560. Students having taken MATH 10250, 10110 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found later in this section of the Bulletin.)*

4. *Students transferring into the ES or ES2 major, or transfer students who have previously taken a statistics course equivalent to MATH 20340, are not required to take BIOS 40411 (Biostatistics). Students will be allowed to substitute MATH 20340, or an equivalent statistics course (e.g., PSY 30100) as ES or ES2 majors in exceptional cases with the permission of the director of their major and the associate dean of the College of Science.*

5. *While General Ecology (BIOS 30312 and BIOS 31312) is normally required for ES and ES2 majors, students may substitute an alternative ecology lecture and laboratory course (e.g., BIOS 30420 Aquatic Ecology) when their career interests indicate the alternative is a more appropriate introductory ecology course as determined by the director of their major and approved by the associate dean of the College of Science.*

6. *The 4-credit chemistry elective requirement is satisfied by either one additional course in organic chemistry (CHEM 20273) or Inorganic Chemistry (CHEM 20243) or by Analytical Chemistry (CHEM 30333, 31333) or by an alternative 4-credit CHEM course as approved by the director of their major and by the associate dean of the College of Science. Students are also allowed to take the 3-credit CHEM 10122 lecture with the understanding that if/when a laboratory is established for that course, they will be required to take that lab prior to graduation.*

7. *The following are examples of many approved science electives for this program:*

Botany (BIOS 30304) or at St. Mary's

Evolution (BIOS 30305)

The History of Life (BIOS 30310)

Genetics (BIOS 20250 or 20303)

Principles of Microbiology (BIOS 30401)

Animal Behavior (BIOS 30407)

Aquatic Ecology (BIOS 30420)

Stream Ecology (BIOS 60527)

Numerous other BIOS courses as designated by the ES director, including 60000-level graduate courses are accepted.

Environmental Chemistry (CHEM 20204)

Further chemistry electives (from Note 6 above)

Second course in general chemistry (CHEM 20274)

Principles of Biochemistry (CHEM 40420)

Computer Programming and Problem Solving (MATH 20210)

Calculus III (MATH 20550)

Introduction to Linear Algebra and Differential Equations (MATH 20580)

Differential Equations (MATH 30650)

Topics in Computing

Historical Geology (SC 20120)

Environmental Geosciences (SC 10100 or 20100)

Mineralogy and Optical Mineralogy (SC 20220)

Environmental Geology (SC 30111)

Sedimentation and Stratigraphy (SC 30230)

Geochemistry

Paleontology (SC 40350)

Other SC courses as approved by the ES director may be included as they become available. Select courses offered in International Studies Programs (UC-Dublin, UWA-Perth) also may be counted toward the ES science electives as well as select ENVG courses not cross-listed with SC, with permission of the ES director.

Students interested in attending graduate school in environmental sciences should consider taking science electives beyond requirements of this major. For example, for admission into some graduate programs, a year of organic chemistry would be a requirement. Deviations from the approved list of science electives must be approved by the advisor for the major.

8. *For this major, the University requirement of a second philosophy or theology or other University-required course may be fulfilled by one of these courses.*

9. *The economics requirement for this major is fulfilled by taking Introduction to Economics (Microeconomics) either in the first year (ECON 10010) or in the second through fourth years (ECON 20010). Note, the course ECON 13181 (Social Science University Seminar) will not fulfill the economics requirement for this major.*

10. *For this major, the University social science requirement will be fulfilled by the required microeconomics course.*

ENVIRONMENTAL SCIENCES

11. Numerous STV courses are recommended as electives, including *Environment and Environmentalism in History* (STV 30175); *Self, Society and the Environment* (STV 40319) and others as approved by the ES director. The STV courses may be taken either under the STV label or from the primary departmental cross-list.

***Ideally, students who decide to major in environmental sciences before beginning their first year should take BIOS 10161–10162.** This will allow for an additional year of relevant science and other electives to be included in their total curriculum. See notes accompanying BIOS 10161–10162 and BIOS 20201–20202 for additional information.

** One of these must be a University Seminar (13180–18189).

ENVIRONMENTAL SCIENCES AS A SECOND MAJOR

Most students in the College of Arts and Letters or in the Mendoza College of Business may participate in the Environmental Sciences Program as second majors. Students who are considering the environmental sciences second major must have a first major in one of the departments of the College of Arts and Letters or the Mendoza College of Business. Because of the sizable overlap in requirements, students in the College of Arts and Letters who have a second major in preprofessional studies will not be allowed to add this second major program.

The requirements for second majors consist of the following science courses:12

General Biology (BIOS 10161+11161 and BIOS 10162+11162) or (BIOS 20201+21201 and BIOS 20202+21202)

Ecology (BIOS 30312, 31312)5

Chemistry (CHEM 10171, 10172) or (CHEM 10171, 10122)

Environmental Chemistry (CHEM 20204) or approved alternative

Geology (SC 20100 with lab)

Biostatistics (BIOS 40411)13

Biology or Geology elective (3 or 4 credits)14

The total required course work requires a minimum total of 32 credits in science beyond the University math requirement.

Note, the same policy applies for Environmental Sciences first and second majors: All College of Science courses specified by the major program must be taken at the University of Notre Dame.

(An exception is made for any science courses taken for this major through an approved Notre Dame International Studies Program.)

Notes (a continuation from above):

12. As is the case for science first majors, six credits of the science course work in this program may also be counted toward the student's university science requirement.

13. While *Biostatistics* (BIOS 40411) is the preferred course, other 3- or 4-credit statistics courses required for completion of a first major (i.e., economics, psychology) may be substituted for BIOS 40411 with the permission of the ES2 director. MATH 101430 is not an acceptable substitute for BIOS 40411 or other statistics course, however. Although mathematics course work is not specifically required of this program, several required courses (BIOS 40411 or some of the first courses in physics) do have a prerequisite of one year of calculus (MATH 10350–10360 or equivalent). For all students in the College of Arts and Letters or the Mendoza College of Business, the mathematics sequence MATH 10350–10360 is acceptable for completion of the university mathematics requirement; thus, this sequence is recommended for students considering Environmental Sciences as a second major. Students lacking this mathematics background may have to take further course work in mathematics to meet the prerequisites in mathematics of courses in this program.

14. Chosen from approved biology or geology electives listed in note 7 above or one first course in physics (PHYS 10111 or 10310 or 10411 or 30210) or an approved survey course: *Concepts of Energy and the Environment* (PHYS 10052) or *Energy and Society* (PHYS 20051) and others as designated.

Sample Curriculum (Second Majors):

Students should remember that all science major programs require course work that builds upon prerequisites and thus require careful planning. A sample curriculum for second majors is given below. Note: Only the courses for the second major are listed.

First Year**First Semester*

CHEM 10171. Chemical Principles and Lab 4

Second Semester

CHEM 10122 or CHEM 10172 3/4

Sophomore Year*First Semester*

General Biology I (10161 or 20201) 3

Annette Pilkington

Program of Studies. Mathematics has had a profound effect upon civilization since ancient times, when the legend originally inscribed on the entrance to Plato's academy was "Let no one ignorant of geometry enter here." It was equally true during the medieval period, when arithmetic and geometry constituted two of the seven subjects considered essential for a liberal education. It has been said that the second most influential book in the span of Western civilization—after the Bible—is Euclid's *Elements*. Although mathematics is usually associated with science and technology in the modern mind, it seems apparent from the writings of the great

mathematicians of the 17th and 18th centuries that religious belief played a great role in their pursuit of mathematics. They saw the "system of the world" obeying mathematical laws and as a consequence felt impelled to study mathematics so as to better appreciate the world's Creator.

Mathematics continues to have a profound influence in our century. From the theory of relativity, with its applications to the study of the large-scale structure of the universe, to the development of the modern computer, with its manifold applications in science, technology and business, mathematics has played a fundamental role. It is surely the most universal of all scientific tools, and the student equipped with a strong mathematical background will be in the enviable position of being able to employ his or her expertise in any area in which rigorous thought and precision of results are mandated.

The department is dedicated to the development of undergraduate studies, to the teaching of mathematics to scientists, engineers and teachers, to graduate education and research, and to the discovery of new mathematics. The entire faculty is involved with undergraduate affairs, and students have the opportunity of associating with scholars of international repute. Mathematics at Notre Dame provides students with a discipline of the mind and a stimulation of the imagination par excellence.

Programs in mathematics prepare students for graduate studies or for professional work in fields in which mathematics plays a dominant role. They provide an excellent preparation for law school, medical school, business school and secondary school teaching. Graduates may enter careers in research institutes or industrial or government positions.

In addition to its undergraduate programs, the department offers programs of graduate study leading to the degree of doctor of philosophy, as described in the Graduate School *Bulletin of Information*.

The department recognizes that, besides those students who wish to pursue a career devoted primarily to mathematical research and teaching, many will wish to take positions in business, industry or government where they will be using their mathematical skills in close collaboration with engineers as well as biological, physical and social scientists. These students will find among the listed programs one well suited to their needs. Besides these programs a student may, in consultation with the director of undergraduate studies and the department chair, create a program especially tailored to his or her career goals.

BACHELOR OF SCIENCE WITH A MAJOR IN MATHEMATICS

The mathematics curriculum at Notre Dame includes seven course sequences or areas of concentration within the College of Science. These programs are designed to accommodate the academic

MATHEMATICS

and professional interests of all mathematics majors. Brief descriptions are given below, and more detailed descriptions of these programs are available on request from the Department of Mathematics.

College Requirements. All must take the following College of Science courses: (CHEM 10171, 10172) or (CHEM 10171, 10122); PHYS 10310, 10320; and an additional science elective.

A student who takes two semesters of organic chemistry or two semesters of general biology is only required to take PHYS 30210-30220.

Mathematics Honors Program

This program is suited to students who are interested in graduate work in one of the mathematical sciences and to those whose career plans require a strong background in modern mathematics.

Honors Calculus I (MATH 10850)
 Honors Calculus II (MATH 10860)
 Honors Calculus III (MATH 20850)
 Honors Calculus IV (MATH 20860)
 Honors Algebra I (MATH 20810)
 Honors Algebra II (MATH 20820)
 Honors Algebra III (MATH 30810)
 Honors Algebra IV (MATH 30820)
 Honors Analysis I (MATH 30850)
 Honors Analysis II (MATH 30860)
 Electives (12 credit hours with six at the 40000 level)

Mathematics Courses for the Other Programs

All other mathematics programs (except the computing program) require the following mathematics core courses:

Calculus I (MATH 10550)
 Calculus II (MATH 10560)
 Calculus III (MATH 20550)
 Ordinary Differential Equations (MATH 20750)
 Linear Algebra (MATH 20610)
 Introduction to Math Reasoning (MATH 20630)
 Algebra (MATH 30710)
 Real Analysis (MATH 30750)

In addition to this basic sequence, the following courses are required for each program:

Mathematics Career Program

This program is designed to give students a general background in mathematics. In addition to the basic sequence of courses listed above, 15 hours of mathematics electives are required, at least three of which are at the 40000 level.

Mathematics and Life Sciences Program

This program is designed for mathematics majors who are interested in life-science-oriented careers.

The following mathematics courses are required in addition to the basic sequence of courses listed above:

Introduction to Probability (MATH 30530)
 Mathematical Statistics (MATH 30540)
 Elective in Mathematics (three credit hours at the 40000 level)

The following College of Science courses are required:

Chemistry (CHEM 10171, 10172, 20273, 20274)
 General Biology (BIOS 20201, 21201; 20202, 21202)
 Genetics (BIOS 20303, 21303)

Mathematics and Computing Program

This program is designed for students who plan to pursue graduate study or industrial careers in computing science. All of the mathematics core courses listed above are required, as well as 15 hours of mathematics electives, at least three hours of which are at the 40000 level.

In addition, the student must complete one of the following sequences of computing courses:

Software design option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 30246, fourth elective
 Theory option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 30151, CSE 40113
 Theory and compilers option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 301351, CSE 40243
 Computer architecture option: CSE 20211, CSE 20212, CSE 20221, CSE 30321, CSE 30322, fourth elective

Mathematics Education Program

This program is designed for students who plan a career in secondary education. The following mathematics courses are required in addition to the basic sequence listed above:

Introduction to Probability (MATH 30530)
 Mathematical Statistics (MATH 30540)
 Elective in Geometry (three credit hours)
 Two electives in Mathematics (6 credit hours)
 (One of these classes must be at the 40000 level)

The following education courses are to be taken at Saint Mary's College: EDUC 201, 220, 340, 350, 356, 404, 451, and 475.

Mathematics and Business Administration Program

This program is designed to prepare students for a career in business or in the actuarial profession. The following mathematics courses are required in addition to the basic sequence:

Introduction to Probability (MATH 30530)
 Mathematical Statistics (MATH 30540)
 Introduction to Operations Research (MATH 30210)
 Two elective in Mathematics (including three credits at the 40000 level)⁵

Also required are ECON 20010 or its equivalent and the following courses from the College of Business: ACCT 20100, FIN 20100, MARK 20100, MGT 20200, and one course from the following list: ACCT 20200, FIN 30210, FIN 30220, FIN 30600, MGT 30610, MGT 40750, MARK 30110.

Mathematics and Engineering Science Program

This program is designed for students interested in applied or industrial mathematics. In addition to the mathematics core courses, the student is required to take one of MATH 40480, MATH 40390 or MATH 40750, and 12 more credits of mathematics electives. The student must also complete one of the following two sequences of engineering classes:

Thermal option: AME 20221, AME 20222, AME 30031, AME 20231, AME 30334
 Structures and design option: AME 20221, CE 20170, AME 20231, CE 30200, CE 30356

Mathematics as a Second Major

Students in the Mendoza College of Business or the College of Arts and Letters may pursue a second major in mathematics by completing all mathematics courses required for the career mathematics concentration. See the list below. To list mathematics as a second major on the transcript, the student must satisfy all of the requirements for a major in some department of the Mendoza College of Business or the College of Arts and Letters.

MATH 10550–10560–20550. Calculus I-III	11.5
MATH 20750. Ordinary Differential Equations	3.5
MATH 20610. Linear Algebra	3
MATH 20630. Introduction to Abstract Math	3
MATH 30710. Algebra	3
MATH 30750. Real Analysis	3
Mathematics Electives	12*
Mathematics Elective at the 40000 Level	3*

42 credits

* Students majoring in finance and business economics may reduce the number of mathematics electives to 12 credits total by taking the following courses: MATH 30530, MATH 30540, MATH 60850, and a mathematics elective.

Sample Curriculum

(Mathematics Career Program):

First Year

<i>First Semester</i>	
MATH 10550. Calculus I	4

Second Semester

Mathematics Elective	3
Electives	9
	12

1 The student should take three general requirement courses during the first year, including one course that is designated a University Seminar. It is recommended that one course in history or social science be taken in the first year and one philosophy and one theology course be taken by the end of the sophomore year.

The Senior Thesis for Mathematics Majors

Students in the mathematics program have the option of writing a thesis on a subject in mathematics, or in an interdisciplinary area connected to mathematics. Such a thesis is strongly encouraged for math honors students and required of students in the SUMR program. This project is intended to give the student a better sense of how mathematics is done and used, and to develop in the student the habit of learning mathematics and its applications in an independent setting. In most cases, this work would be expected to be expository, but based on advanced-level readings. It should represent an effort that goes

beyond what is found in an undergraduate course. It is especially desirable for a student to present a somewhat novel approach to an established subject, or to explore one of the many interesting connections that mathematics has with other disciplines.

During the second semester of the junior year and the first semester of the senior year, the student will work closely with a faculty advisor on a program of readings in preparation for the thesis, receiving 1 credit for each of these two semesters of work, under MATH 48800.

The thesis is to be crafted during the second semester of the senior year. The thesis must be submitted to the director of undergraduate studies by April 15 of the senior year. If the thesis is approved, the student will receive 1 credit under MATH 48900 and the citation of "Graduation with Senior Thesis" will appear on the transcript.

Students interested in writing a senior thesis should contact the director of undergraduate studies in the Department of Mathematics.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the College of Science section under the Department of Mathematics heading.

Certain graduate courses in mathematics are open to qualified advanced undergraduates, subject to the approval of the director of undergraduate studies. Other graduate courses are described in the *Graduate School Bulletin of Information*.

Physics*Chair:*

Mitchell R. Wayne

Director of Graduate Studies:

Kathie E. Newman

Director of Undergraduate Studies:

Anthony K. Hyder

Frank M. Freimann Professor of Physics:

Michael C.F. Wiescher

Aurora and Tom Marquez Professor of Physics:

Jacek K. Furdyna

Grace-Rupley II Professor of Physics:

Ikaros I. Bigi

Professors:

Mark Alber; Ani Aprahamian; Gerald B. Arnold; H. Gordon Berry; Howard A. Blackstead; Samir K. Bose (emeritus); Bruce A. Bunker; Neal M. Cason (emeritus); Paul R. Chagnon (emeritus); Margaret Dobrowolska-Furdyna; Stefan G. Fraundorff; Emerson G. Funk (emeritus); Umesh Garg; Peter M. Garnavich; Anthony K. Hyder; Boldizsar Janko; Walter R. Johnson (emeritus); Gerald L. Jones (emeritus); V. Paul Kenney (emeritus); James J. Kolata; A. Eugene Livingston; John M. LoSecco; Grant Mathews; William D. McGlenn (emeritus); James Merz; John W. Mihelich (emeritus); Kathie E. Newman; John A. Poirier (emeritus); Terrence W. Rettig; Randal C. Ruchti; Steven T. Ruggiero; Jonathan R. Sapirstein; William D. Shephard (emeritus); Carol E. Tanner; Walter J. Tomasch (emeritus); Mitchell R. Wayne

Associate Professors:

Dinshaw Balsara; Philippe Collon; Morten Eskildsen; Michael D. Hildreth; Colin Jessop; Christopher F. Kolda; Paul E. Shanley (emeritus); Zoltan Toroczka

Assistant Professors:

Mark A. Caprio; Antonio Delgado; J. Christopher Howk; Kevin P. Lannon; Xiaodong Tang

Program of Studies. Physics is the study and description of the structure and behavior of the physical universe. As such, it is fundamental to all physical sciences, pure and applied. A knowledge of physics is basic to an understanding of astronomy, chemistry, geology and even biology in that physics contributes to the interpretation and detailed description of many of the natural phenomena which constitute the proper subjects of investigation in these sciences.

In addition to the undergraduate curricula, the Department of Physics offers programs for graduate study leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

PHYSICS

BACHELOR OF SCIENCE WITH A MAJOR IN PHYSICS

Science undergraduates may choose from three different majors within the Department of Physics: **physics**, **physics-in-medicine**, and **physics education**. The course sequences in these three programs are designed to accommodate the academic and professional interests of the majority of physics majors.

The basic **physics** major is a particularly flexible option for students, and is the one that will be chosen by the majority of undergraduates majoring in the department. Students following the physics major program will gain a broad understanding of physics. Depth is gained through the addition of one or more supplemental concentration programs offered through the department. Two of these concentration programs, **advanced physics** and **astrophysics**, help to prepare the student for graduate work in physics and astronomy or astrophysics. The **computing** concentration prepares the student for professions requiring working knowledge of various computer languages and experience using current computer technology. Students with interests in other areas have time to explore second-major, minor, or concentration options offered through departments in the College of Arts and Letters. The department expects to develop more concentration options as needed; students with alternative interests are encouraged to discuss these with the director of undergraduate studies.

The **physics-in-medicine** major is designed for those students planning to attend medical school after completion of their degree, or who intend to work or study in the fields of biophysics or biomedical technology. The degree contains a core set of requirements in physics, augmented with courses in organic chemistry, biochemistry, biology, and biophysics.

The **physics education** major is primarily intended for students wishing to pursue careers in secondary science education, and combines courses in physics with other general sciences, as well as education courses and student teaching through the Education Department at Saint Mary's College.

No supplemental concentration is required of **physics** majors, but interested students are allowed and encouraged to follow as many concentrations as their schedules and interests allow. Students following either the **physics-in-medicine** or **physics education** major programs are not allowed to add concentrations; their major programs are designed to accommodate the special interests of students intending careers in medicine, medical technology, or high school teaching.

Physics as a second major is an option for students in the colleges of engineering, arts and letters, or business.

Requirements for the Physics Major

A total of 60.5 credits in science and mathematics is required for the **physics** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 104111, 10424, 204352)

Intro to Chemical Principles (CHEM 101713) and General Chemistry Biological Processes (CHEM 101223)

Calculus I, II, III (MATH 10550,4 10560,4 205504)

Sophomore Seminar (PHYS 23411)

Mathematical Methods in Physics I, II (PHYS 20451, 20452)

Intermediate Mechanics (PHYS 20454)

Electricity and Magnetism (PHYS 30471)

Modern Physics I (PHYS 20464)

Topics in Modern Physics II (PHYS 30465)

Modern Physics I Laboratory (PHYS 40441) or 40000-level Math elective

Thermal Physics (PHYS 30461)

Quantum Mechanics I (PHYS 40453)

Physics majors may add as many of the following concentrations as their interests and schedules allow. Completion of these concentrations is indicated on the student's final transcript.

Concentration in Advanced Physics

The following outlines the course requirements (totaling 14 credits) for the **advanced physics** concentration:

Junior Seminar (PHYS 33411)

Electromagnetic Waves (PHYS 30472)

Quantum Mechanics II (PHYS 40544)

Senior Seminar (PHYS 43411)

Modern Physics II Laboratory (PHYS 40442) or 40000-level math elective

Physics Elective5

Concentration in Astrophysics

The following outlines the course requirements (totaling 14 credits) for the **astrophysics** concentration:

Junior Seminar (PHYS 33411)

Intro. Astronomy and Astrophysics M (PHYS 20481)

Modern Observational Techniques (PHYS 30481)

Senior Seminar (PHYS 43411)

Astrophysics (PHYS 40445)

Relativity: Special and General (PHYS 50472)

Concentration in Computing

The requirements are that the student completes 14-15 credits of computer science engineering courses, chosen with the aid of the Director of Undergraduate Studies.

Requirements for the Physics-in-Medicine Major

A total of 77.5 credits in science and mathematics is required for the **physics-in-medicine** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 104111, 10424, 204352)

General Chemistry I-IV (CHEM 10171, 10172, 20273, 21273, 20274, 21274)13

Calculus I, II, III (MATH 105504, 105604, 205504)

Sophomore Seminar (PHYS 23411)

Mathematical Methods in Physics I, II (PHYS 20451, 20452)

Intermediate Mechanics (PHYS 20454)

Electricity and Magnetism (PHYS 30471)

Modern Physics I (PHYS 20464)

Topics in Modern Physics II (PHYS 30465)

General Biology A, B (BIOS 202016, 21201, 202026, 21202)

Three science electives (9 credits total)7

Requirements for the Physics Education Major

A total of 61.5 credits in science and mathematics and 27 credits in education are required for the **physics education** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 104111, 10424, 204352)

Intro to Chemical Principles (CHEM 101713) and (General Chemistry Biological Processes (CHEM 101223) or Organic Structures and Reactivity (CHEM 10172))

Calculus I, II, III (MATH 105504, 105604, 205504)

Mathematical Methods in Physics I, II (PHYS 20451, 20452)

Intro Astronomy & Astrophysics M (PHYS 20481)

Intermediate Mechanics (PHYS 20454)

Electricity and Magnetism (PHYS 30471)

Modern Physics I (PHYS 20464)

Topics in Modern Physics II (PHYS 30465)

Advanced physics laboratory8

Science elective (4 credits)9

Teaching in a Multicultural Society (EDUC 201F)10

Applied Media and Instructional Technology (EDUC 220)

Curriculum and Assessment in the High School Setting (EDUC 345)

Instructional Strategies and Classroom Management in the High School Setting (EDUC 346)

Educational Psychology: Human Growth and the Development of the Adolescent (EDUC 350)

Educational Psychology: Educating Exceptional Learners (EDUC 356)

Teaching Science in the Middle School and High School (EDUC 475)

PHYSICS

Requirements for Physics as a Second Major

The requirements for physics as a second major, for students in the colleges of engineering, arts and letters or business, consists of the physics and mathematics courses listed above for the **physics** major, except the chemistry sequence. To list physics as a second major on the transcript, the student must satisfy all of the requirements for a major in some department and college of the university.

Notes

1. *Alternatively, PHYS 10310 and its laboratory and tutorial.*
2. *Alternatively, PHYS 10320 and its laboratory and tutorial.*
3. *Alternatives for CHEM 10171 and 10122 include CHEM 10171–10172 or CHEM 10181–10182 plus the associated laboratories and tutorials.*

4. *Honors Calculus I through IV (MATH 10850, 10860, 20850, and 20860) may substitute for Calculus I to III.*

5. *Options include PHYS 20421 (Scientific Programming), PHYS 20481 (Introduction to Astronomy and Astrophysics), PHYS 30481 (Modern Observational Techniques), PHYS 30405 (Numerical Methods), PHYS 30432 (Lasers and Modern Optics), PHYS 48480 (Undergraduate Research: The student must take at least 3 credits in research with one advisor and the credits taken must be distributed over at least two semesters), PHYS 50445 (Astrophysics), PHYS 50472 (Relativity: Special and General), MATH 40480 (Complex Variables). Physics electives cannot be double counted with requirements for the Astrophysics concentration.*

6. *BIOS 10161, 11161, 10162, 11162 may substitute for BIOS 20201, 21201, 20202, 21202.*

7. *Students take three from the following: CHEM 40420 (Principles of Biochemistry), BIOS 20303 (Fundamentals of Genetics), BIOS 30344 (Vertebrate Physiology), BIOS 30341 (Cellular Biology), PHYS 40371 (Medical Physics), PHYS 40432 (Biological Physics).*

8. *Students choose one course from PHYS 30432, 31432 (Lasers and Modern Optics), PHYS 30481 (Modern Observational Techniques), and PHYS 40441, 41441 (Modern Physics I Laboratory).*

9. *The 4-credit science elective is a biology or geology course which includes a laboratory. Allowed choices include BIOS 20201, 21201 (General Biology A and its lab) or SC 20110, 21110 (Physical Geology and its lab). See the Director of Undergraduate Studies to discuss alternative choices.*

10. *All Education courses are taken through the co-exchange agreement with Saint Mary's College.*

11. *One of these courses must be a University Seminar.*

12. *PHYS 20481 (Introduction to Astronomy and Astrophysics) is offered in the fall of even years; PHYS 30481 (Modern Observational Techniques) is offered in the fall of odd years.*

13. *Alternatives for CHEM 10171–10172 and 20273–20274 are CHEM 10181–10182 and CHEM 20283–20284.*

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Physics](#) heading.

PREPROFESSIONAL STUDIES

SUMMARY OF REQUIREMENTS FOR THE DEGREE OF BACHELOR OF SCIENCE IN PHYSICS

	<i>Physics</i>	<i>Physics in Medicine</i>	<i>Physics Education</i>
Mathematics	11.5	11.5	11.5
Physics	42	33	39

Free Electives	28.5**	11.5**	0**
	124	124	129.5

* One of these courses must be a University Seminar.

** Assumes intermediate-level competency in language was achieved by taking two 4-credit courses at the introductory level and one 3-credit course at the intermediate level.

Preprofessional Studies

Chair and Assistant Dean:

Rev. James K. Foster, C.S.C., M.D.

Associate Dean:

Sr. Kathleen Cannon, O.P.

Assistant Dean:

Kathleen J.S. Kolberg, Ph.D.

Program of Studies. The Department of Preprofessional Studies offers several programs in the two major sequences, namely the program sequence in premedical science studies and the programs in the Collegiate Sequence.

All of the programs are quite flexible and allow the student to design a curriculum, in consultation with the chair or the associate dean in the College of Science, to enable the student to enter the profession best suited for his or her talents. The program in premedical science studies enables the student to obtain an excellent preparation to enter any of the professions of medicine, dentistry or the other ancillary fields of the healing professions. The interdisciplinary programs of the collegiate sequence have been designed to offer significant flexibility to prepare students for the professions of science-education, science-business, and science-computing. All of the programs allow for a strong science background while also allowing a diverse background in the arts and humanities for individuals with a desire to obtain a broad educational background.

The major goal of this department is to provide an education in the best of liberal traditions of scientific thought and analysis, which the student can utilize for career opportunities in a variety of fields.

The program sequence in premedical science studies is a special program within the Department of Preprofessional Studies for students preparing to enter the professions of medicine, dentistry, osteopathy, veterinary medicine, podiatry, optometry, or other allied-health professions.

Notre Dame has been recognized as an accredited institution for premedical studies for more than 100 years. A proper selection of courses leading to the degree of bachelor of science will qualify the student for admission to any medical or dental school. The year before his or her expected entrance to medical school, the student takes the Medical College Admission Test or Dental Admission Test. Students taking this test should have completed the basic courses in chemistry, biology and physics. The curricula leading to the degree of bachelor of science in other departments in the College of Science also satisfy the requirements for admission to medical or dental school.

Information concerning the requirements for admission to schools of medicine, dentistry, osteopathy, veterinary medicine, optometry and podiatry, as well as information on several ancillary health careers, is available from the new office in the Center for Health Science Advising, 219 Jordan Hall of Science.

BACHELOR OF SCIENCE WITH A MAJOR IN PREPROFESSIONAL STUDIES

13

* One of these courses must be a University Seminar; the literature University Seminar in English 13186 is recommended (see note 6).

** See note 3.

Notes:

1. Most of the course instruction in the curricula of the Department of Preprofessional Studies is provided by other departments in the College of Science and other colleges of the University.

2. The elective courses in the senior year may include a thesis based on laboratory work performed in a registered course in a given department with the approval of the head of that department, who will specify the number of credits assigned to the thesis.

** 3. The choice by the student of elective courses in science for the program in preprofessional studies will be based upon the requirements of the professional schools and upon the lists of courses suggested or recommended by those schools in which the student is interested; the choice will be based also upon the advice and counseling of the chair of the department. From the Medical and Dental School Requirements Books, the following courses would be the most highly recommended in addition to the five basic science courses, giving the student applicant the best science background to be a most attractive candidate to any school to which he or she wishes to apply: biochemistry, genetics, physiology, cell biology, developmental biology, and microbiology. Additional courses in higher mathematics, statistics and computer science are recommended for qualified students. Students not only must fulfill their requirements but, in the case of the sciences (mathematics, chemistry, biology and physics), also are strongly encouraged to follow the sequence of courses as listed. This sequence is designed in the light of health-related professional school requirements so that one course builds on knowledge gained from a prior course, even one from a different department; it is also structured to maintain a rigorous course load of at least two such courses per semester, with some adjustment possible in the senior year. Summer sessions, transfer credits and other modification in the regular curriculum should not be allowed to disturb this sequence of courses in the sciences without good reason.

4. For the selection of non-science electives for the programs, students should know that medicine and

the other healing professions need individuals with a diversity of educational backgrounds and a wide variety of talents and interests. All of these schools recognize the desirability of a broad education—a good foundation in the sciences (mathematics, chemistry, biology and physics), highly developed communication skills and a solid background in the social sciences and humanities.

5. Recommendation 1 of the recent Report of the Association of American Medical Colleges titled "Physicians for the 21st Century" encourages a broadening of preparation. The department continues to encourage students to follow that recommendation by using the requirements of history and social science, English and the general elective credits "to be an informed participant in contemporary society by understanding its politics, history and economics. To appreciate the many dimensions of human experience requires informed reflection upon the literature, the philosophy and the arts... of all people in our society."

6. To fulfill the medical school requirements of two semesters of English, students are required to take FYC 32000-level composition and one literature course taught in English. The literature course can be either a literature University Seminar in English 13186 or an upper-level literature course offered by the English Department and approved by the Department of Preprofessional Studies. Thus, if a student's University Seminar requirement is met by one of the literature options (in English), then the student will not be required to take upper-level English literature. Note, for this major only, a course in fine arts is not acceptable for the University literature/fine arts requirement. (A fine arts course will count as a general elective.)

7. In the curriculum for the program, there are listed the several courses required for the degree, including one semester each of history and social science, a course in literature, two courses in philosophy and two courses in theology. Students should remember that none of the required courses can be taken as a pass-fail option.

8. Students who have completed only six hours of mathematics in the first year of studies may transfer into the program but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360, or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. Those students should see also the discussion on degree credit found later in this section of the Bulletin.

9. PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–31210.

10. Undergraduate Research (BIOS 48498 or SC 48100), Teaching Practicum (BIOS 37495), and Directed Readings (BIOS 48497) count toward the 64-hour preprofessional studies major science requirement; however, a maximum of two credits per semester and a combined total of six credit hours may be counted in fulfilling the 64-credit-hour science requirement as well as the maximum credit hours counted toward

graduation. Directed Readings (SCPP 46397) counts as general elective credit.

11. All students are welcome to join the Preprofessional, Premedical or Pre dental Societies. In addition, premedical students are encouraged to join AMSA, the American Medical Student Association.

12. All students who have had previous exposure to language will be required to take a placement examination in that language for placement in the proper course if the student wishes to continue in that language for the college requirement. If a student wishes to take a new language, of course, he or she must start from the beginning.

13. Interested parties may obtain additional information including various statistics from the department Web page. See preprofessional.nd.edu.

Summary of Requirements for the Degree of Bachelor of Science in Preprofessional Studies

	Credits

* One of these courses must be a University Seminar.

** Assumes Intermediate-level Competency in Language was achieved by taking two four-credit and one three-credit courses.

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Preprofessional Studies](#) heading.

COLLEGIATE SEQUENCE PROGRAMS

The three collegiate sequence programs, science-business, science-computing, and science-education, were instituted in 1987. These three programs allow students to obtain a strong science background while simultaneously preparing them for professions in health care, business, computing or education.

SCIENCE-BUSINESS COLLEGIATE SEQUENCE

The Science-Business Collegiate Sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates

PREPROFESSIONAL STUDIES

courses from the basic areas of business along with the four basic areas of science. The major prepares students to pursue health care professional education such as medical school, dental school, public health, or health care administration. It also enables students to attain a diversified background to enter an MBA program leading to a position in the scientific or health professions business area. It is also a complete and sufficient program to enable the B.S. graduate of the sequence to enter the scientific business market immediately upon graduation.

Information on the areas of public health and hospital administration, as well as the business needs of the pharmaceutical, biological and chemical industries are available in the office of the Department of Health Professions, 219 Jordan Hall of Science.

The other departments in the College of Science as well as the colleges of arts and letters and business administration provide all course instruction in the curricula of the Science-Business Collegiate Sequence.

BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-BUSINESS

All science-business majors take the following basic sequence of science courses:

General Biology (BIOS 20201–20202 and 21201 and 21202)¹
 CHEM 10171 and 11171 and (10172 and 11172 or 10122) and two of the following: 20273 and 21273, 20274 and 21274, ENVG 20110
 Calculus (MATH 10350–10360 or 10550–10560)^{1,2}
 Physics (PHYS 30210–30220)³ and 31210, 31220
 Statistics (ACMS 20340 or BIOS 40411)
 They also are required to take 20–21 credits of science electives,⁴ completing a minimum of 64 credits of science courses.
 Also required for the major are the following business and economics courses:
 Principles of Microeconomics (ECON 10010 or 20010)^{5,6}
 Accountancy I (ACCT 20100)
 Corporate Finance Essentials (FIN 20100)
 Principles of Management (MGT 20200)
 Principles of Marketing (MARK 20100)
 One upper-level business elective for which prerequisites are completed.

Requirements for the program are summarized in the table following this section.

Notes:

1. *Equivalent or higher-level sequences in science may be substituted, e.g., BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.*

2. *Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250, (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit, found later in this section of the Bulletin.)*
3. *PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.*
4. *The choice by the student of the elective courses in science for the program will be discussed with the student and will be based on the future industrial or health professions business interests of the student. Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as “Recommended University electives”) and that are not being used to fulfill other specific graduation requirements can be used to satisfy the “Science Elective” requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits per semester (six total) for science credit and three credits per semester (nine total) for graduation credit of courses such as Undergraduate Research or Directed Readings.*
5. *The economics requirement for this major is fulfilled by taking Principles of Microeconomics either in the first year (ECON 10010) or in the sophomore year (ECON 20010). Note: The course ECON 13181 (Social Science University Seminar) will not fulfill the economics requirement for this major.*

6. *For this major, the University social science requirement will be fulfilled by the required economics course. Additional social science courses are recommended and will count toward the student’s general electives.*

Suggested Curriculum for the Degree of Bachelor of Science in the Science-Business Collegiate Sequence (124 semester hour credits: 64 science hour credits, minimum)

SCIENCE-COMPUTING COLLEGIATE SEQUENCE

The science-computing collegiate sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates courses from the four basic areas of science along with a sequence of computing courses. The program will give the student working knowledge of various computer languages and experience using current computer technology. By choosing science electives appropriately, the student has the option of focusing in an area in science of particular interest. Graduates

PREPROFESSIONAL STUDIES

of this program earn a B.S. degree and are able to enter the scientific computing job market immediately upon graduation.

The other departments in the College of Science as well as the colleges of arts and letters and engineering provide all course instruction in the curricula of the Science-Computing Collegiate Sequence.

BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-COMPUTING

All science-computing majors take the following basic sequence of science courses:

- General Biology (BIOS 20201–20202 and 21201 and 21202)¹
 CHEM 10171 and 11171, 10172 and 11172 or 10122 and two of (CHEM 20273 AND 21273, 20274 and 21274, SC 20110)
 Calculus (MATH 10350–10360 or 10550–10560)^{1,2}
 Physics (PHYS 30210–30220 and 31210–31220)³ and 3121, 31220
 Statistics (MATH 20340 or BIOS 40411)
 They also are required to take 20–21 credits of science elective,⁴ completing a minimum of 64 credits of science courses.

They also are required to complete 14–15 credits in computing courses.

Please see advisor for information on possible sequences in computing.

Requirements for the program are summarized in the table on the following page.

Notes:

- Equivalent or higher-level sequences in science may be substituted, e.g., BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.
- Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 103600 or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found later in this section of the Bulletin.)
- PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.
- The choice by the student of the elective courses in science for the Science-computing program will be based on the student's scientific interest as developed during his or her studies of the four basic areas of science. Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as "Recommended University electives") and that are not being used to fulfill other specific graduation requirements can be used to satisfy

the "Science Elective" requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits of courses such as Undergraduate Research or Directed Readings in the science elective total.

Suggested Curriculum for the Degree of Bachelor of Science in the Science-Computing Collegiate Sequence (124 semester hour credits: 64 science hour credits, minimum)

* One of these must be a University Seminar.

SCIENCE-EDUCATION COLLEGIATE SEQUENCE

The science-education collegiate sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates many courses from the four basic areas of science along with education courses that most states require to give the student the background necessary to receive a certificate to teach in a secondary education system. Information concerning the requirements for secondary education in the various states, as well as the general course requirements for a certificate necessary to teach science in a secondary education program, is available in the College of Science office, 174 Hurler Hall.

The other departments in the College of Science and the other colleges of the University, as well as the Education Department at Saint Mary's College, provide all course instruction in the curricula of the Science-Education Collegiate Sequence.

BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-EDUCATION

All science-education majors take the following basic sequence of science courses:

- General Biology (BIOS 20201–20202 and 21201 and 21202)¹
 CHEM 10171 and 10172 and [CHEM 20273 and 21273, CHEM 20274 and 21274] or (CHEM 20273 AND 21273, ENVG 20110) OR (ENVG 20110, ENVG 20120)]
 Calculus (MATH 10350–10360 or 10550–10560)^{1,2}
 Physics (PHYS 30210–30220)³ and 31210, 31220

They also are required to take 20 credits of science electives,^{4,5} completing a minimum of 60 credits of science courses.

Also required for the major are the following education courses taught by Saint Mary's College:

- EDUC 201 Teaching in a Multicultural Society
 EDUC 220 Applied Media and Instructional Technology
 EDUC 345 Curriculum and Assessment in the High School Setting

PREPROFESSIONAL STUDIES

EDUC 346 Instructional Strategies and Classroom Management in the High School Setting
 EDUC 350 Educational Psychology: Human Growth and Development of the Adolescent
 EDUC 356 Educational Psychology: Educating Exceptional Learners
 EDUC 449 Teaching Science in the Secondary School
 EDUC 475 Student Teaching in the Secondary School (spring of senior year)

The education courses are those required in the State of Indiana but are also those that are required most often by the educational accrediting agencies of most states. The practical teaching experience which is required will also be arranged through the Education Department at Saint Mary's College.

Requirements for the program are summarized in the table found two pages back.

Notes:

- Equivalent or higher-level sequences in science may be substituted, e.g., BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.
- Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found in this section.)
- PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.
- The choice by the student of the elective courses in science for the Science-education program will be based upon the requirements and list of courses suggested by the various state educational systems. Since the timing of the course work is particularly constrained for this major, the student should work closely with his or her advisors: an associate dean in the College of Science and an assigned advisor in the Education Department at Saint Mary's College.
- Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as "Recommended University electives") and that are not being used to fulfill other specific graduation requirements can be used to satisfy the "Science Elective" requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits of courses such as Undergraduate Research or Directed Readings in the science elective total.

Special Programs

DOUBLE MAJORS IN SCIENCE

In certain instances, students have the option of pursuing majors in two departments in the College of Science. Combinations that are normally approved include: Biological Sciences with Chemistry, Biological Sciences with Mathematics, Biological Sciences with Physics, Biochemistry with Mathematics, Biochemistry with Physics, Chemistry with Mathematics, Chemistry with Physics, Environmental Sciences (first major) with Mathematics, and Mathematics with Physics.

Examples of combinations that are normally forbidden include: Preprofessional Studies and any of the Collegiate Sequence majors with one another or with any other science major, parallel subprograms such as Mathematics and Life Sciences with Physics-in-Medicine and either of those with Biological Sciences or Biochemistry. All requirements of each major must be met, with no exceptions. Failing to complete a required course terminates that major for a student. Every student who wishes to major in two departments in the College of Science must prepare an agenda of specific courses to be taken, which both advisors and the dean must approve. This should be done as early as possible, but absolutely no later than the seventh day of the senior year. In certain instances, a student may possibly receive approval of a normally forbidden combination of majors, but only if a specific program has been set up by the seventh day of the sophomore year.

All double major programs in science are extremely challenging programs that require that the student take four or five science courses at a time. Thus, only students of superior scholastic ability should consider this as an option.

Students are warned that it is almost certain that completing a double major in two sciences will require total credits well over the college minimum of 124. Conflicts in scheduling of required courses may occur; neither the college nor the departments undertake to reschedule courses for the sake of double majors. For these reasons, it must be emphasized that completing a double major may well require more than four years. Only one degree is awarded (degrees in science do not specify a field).

Dual Degree Program with the Mendoza College of Business

Coordinators:

Mary Goss
 Director of Admissions
 Master of Business Administration Program
 Steven Buechler
 Associate Dean, College of Science

Program of Studies. The dual degree five-year program in the Mendoza College of Business and the College of Science enables the student to earn the master of business administration and bachelor of science degrees in a major in one of the five undergraduate departments in the College of Science.

This program, instituted in 1994, offers students the opportunity to better integrate studies in science and in management. The student completing this program will have a background in management as well as the first professional degree in one of the undergraduate majors of the College of Science. Because it is a demanding program, only those students of superior scholastic ability who have the aptitude, motivation and maturity necessary for the combined graduate and undergraduate program should apply. Those with outstanding internship experiences in business will be looked upon favorably. Advisors for the program are available for consultation about the advisability of applying for the program and about meeting the particular needs of students pursuing this program.

The program is open only to those currently enrolled Notre Dame students who have completed three years of an undergraduate science first major. Students interested in making application for the MBA/Science program should apply to the MBA program during their junior year. They should take the GMAT by December of their junior year. All candidates must schedule a personal interview as a part of the MBA admissions process. Students must also declare their intentions to the dean's office in the College of Science and request that a dean's eligibility letter be sent to the MBA Office for them.

An applicant who is not admitted to the dual degree MBA/Science program continues in the undergraduate program and completes his or her science major in the usual four-year period.

As a general guide, it is expected that a student accepted to this program will take two courses for the undergraduate degree during the summer session following his or her junior year. Every dual-degree student is also expected to participate in the orientation for the MBA program. This program will occupy the entire day for the two weeks prior to the first day of classes. Orientation is mandatory for all students beginning the MBA program.

Students in the five-year science/MBA program are also required to:

- (1) Complete a minimum of 48 MBA credit hours and maintain a GPA of at least 3.0 to successfully complete the program.
- (2) Take all MBA courses in their fourth year.
- (3) Maintain full-time student status (minimum courseload of 12 credit hours per semester). Credit hours can come from science or MBA programs.

The MBA curriculum divides each semester into two modules. In addition to the courses required to complete undergraduate and University requirements, students must complete the following MBA course work:

Summer Session Following Junior Year:	
Math Review Workshop*	0
Accit Review Workshop*	0
(Science Undergraduate Requirements)	6)

Senior Year—(Science Undergraduate Requirements Each Semester) 3–7)

<i>First Semester, Module 1:</i>	
ACCT 60100. Financial Accounting	2
MBET 60340. Conceptual Foundation of Business Ethics	2
MGT 60100. Statistics	2
MGT 60300. Organizational Behavior	2
<i>First Semester, Interterm Week:</i>	
Professional Development Seminar	0
Communications Seminar++	1
<i>First Semester, Module 2:</i>	
ACCT 60200. Cost Accounting	2
FIN 60400. Finance I	2
FIN 60210. Microeconomic Analysis	2
MARK 60100. Marketing Management	2
<i>Second Semester, Module 3:</i>	
FIN 70600. Finance II	2
FIN 60220. Macroeconomic Analysis	2
MGT 60900. Strategic Decision Making	2
Free Elective	2
<i>Second Semester, Interterm Week:</i>	
Values in Decision Making	1
Elective Course	1
<i>Second Semester, Module 4:</i>	
MGT 60400. Leadership and Teams	2
MGT 60700. Operations Management	2

Fifth Year—(Science Undergraduate Requirements Each Semester) 3–7)

<i>First Semester, Module 1:</i>	
MGT 60200. Problem Solving	2
Management Communication Elective I	2
Free Elective*	2
<i>Interterm Week:</i>	
OPTIONAL: Two one-credit-hour electives (TBD) OR	
Corporate Case Studies OR	
Offshore Program: China or Brussels	2
<i>First Semester, Module 2:</i>	
Ethics Elective	2
Management Communication Elective II	2
<i>Second Semester, Module 3:</i>	
Free Electives	4
(Floating Optional Elective)	2)

*Students have the option to take one additional two-credit-hour elective now or in any remaining module.

Second Semester, Interterm Week:
(OPTIONAL: Two one-credit-hour electives OR

Corporate Case Studies OR	
Offshore Program: China or Brussels	2)
<i>Second Semester, Module 4:</i>	
Free Electives	4
(Floating Optional Elective)	2)

+ See “Arts and Letters Core” on the first page of the *College of Engineering* section.

++ *Special onetwo-week courses. All other MBA courses are seven weeks in length.*

*Occurs during August Orientation

Total for both degrees: 126–132 undergraduate, 48 MBA

Students involved in the MBA/Science program will complete their undergraduate program while completing MBA requirements. MBA course work will not apply to the undergraduate degree. Sample schedules for particular majors are available from advisors or the dean’s office. Students who are behind in the completion of their major requirements are strongly recommended to obtain permission and advising before applying to the joint program.

Nondepartmental Courses

Director:

Steven Buechler
Associate Dean, College of Science

COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Nondepartmental](#) heading.

Science Degree Credit

Courses are generally taken in the College of Science for one of three reasons: (1) for students in either the College of Arts and Letters, or the Mendoza College of Business, or the School of Architecture, to fulfill a University requirement; (2) for students in either the College of Engineering or the College of Science to fulfill a college requirement; and (3) for students in the College of Science, to fulfill a major requirement. As a result, the College of Science offers different sequences of courses which overlap considerably in content but not level. Thus it is possible for a student who has changed his or her college or major to have taken two courses which overlap in content. Both courses will appear on the student’s transcript, but only one will count for degree credit.

As a guideline for the student and the student’s advisors, listed below are the groups of courses that overlap considerably in content. (Courses within the same group are shown in the same row and are also enclosed within parentheses; courses listed within the same column generally show a typical normal progression through course work.) In every case, only one course per group should be counted for degree credit. Generally, only the course taken last should be counted. Students and advisors are warned not to use these groups when moving between course sequences but rather to seek advice from the offering department or the College of Science office.

For overlap with courses no longer taught in the year of publication of this *Bulletin*, please refer to previous editions of this *Bulletin*.

Credit is not given for both ACMS and MATH courses with the numbers 10140, 10150, 20210, 20340, 20610, 20750, 30440, 30530, 30540, or any course cross-listed between ACMS and MATH. In the following table the restrictions on MATH courses numbered 10140 and 20340 also apply to the ACMS courses with the same numbers.

SCIENCE DEGREE CREDIT

Biological Sciences						
(10101 10110	10156	10161		10191	10098	20201)

(20451	MATH 20570	MATH 20610	MATH 20580)			
(20452 MATH 20571	MATH 20750	MATH 30650				
<i>Note also that no degree credit is given to any students for MATH 10101; additionally, science majors will not receive degree credit for MATH 10120 or MATH 10110.</i>						

Officers of Administration

In the College of Science

GREGORY P. CRAWFORD, Ph.D.
Dean of the College of Science

STEVEN A. BUECHLER, Ph.D.
Associate Dean of the College of Science

SR. KATHLEEN CANNON, O.P., DMin.
Associate Dean of the College of Science

RICHARD E. TAYLOR, Ph.D.
Associate Dean of the College of Science

REV. JAMES K. FOSTER, C.S.C., M.D.
Assistant Dean of the College of Science

KATHLEEN J.S. KOLBERG, Ph.D.
Assistant Dean of the College of Science

In the Departments and Programs

GARY A. LAMBERTI, Ph.D.
Chair of the Department of Biological Sciences

KASTURI HALDER, Ph.D.
Director of the Center for Rare and Neglected Diseases

BEI HU, Ph.D.
Chair of the Department of Mathematics

MITCHELL R. WAYNE, Ph.D.
Chair of the Department of Physics

REV. JAMES K. FOSTER, C.S.C., MD
Chair, Preprofessional Studies

MORRIS POLLARD, Ph.D.
Director of the Lobund Laboratory

IAN CARMICHAEL, Ph.D.
Director of the Radiation Laboratory

ANDREW J. SOMMESE, Ph.D.
Director of the Center for Applied Mathematics

MARK S. ALBER, Ph.D.
Director of the Center for Study of Biocomplexity

FRANK H. COLLINS, Ph.D.
Director of the Eck Family Center for Global Health and Infectious Diseases

DAVID R. HYDE, Ph.D.
Kenna Director of the Center for Zebrafish Research

MARK A. SUCKOW, D.V.M.
Director of the Freimann Life Sciences Center

RUDOLPH M. NAVARI, M.D., Ph.D.
Director of the Walther Cancer Research Center

FRANCIS J. CASTELLINO, Ph.D.
Director of the W.M. Keck Center for Transgene Research

Advisory Council

DR. MONICA Y. ALLEN-ALEXANDER
West Bloomfield, Michigan

Faculty

The following is the official faculty roster for the 2010–11 academic year as of June 21, 2010. This roster includes faculty members who are on leave during the academic year. The date in parentheses at the close of each entry is the year the individual joined the Notre Dame faculty.

Carl B. Ackermann. *Associate Professional Specialist of Finance.* Bachelor of Arts (Latin), Amherst College, 1984; Philosophiae Doctor, UNC at Chapel Hill, 2000 (1998)

John F. Affleck-Graves. *Professor of Finance and Executive Vice President of the University.* BSc., Univ. of Cape Town, South Africa, 1972; MSc, *ibid.*, 1974; PhD, *ibid.*, 1977; Bcomm, *ibid.*, 1982 (1986)

Gaurav Aggarwal. *Research Assistant Professor of Computer Science and Engineering.* Btech, Indian Institute of Tech, 2002; MS Computer Science, 2004; *ibid.*, Philosophiae Doctor, *ibid.*, 2008 (2010)

Maurizio Albahari. *Assistant Professor of Anthropology and Fellow, Nanovic Institute.* Bachelor of Arts, Università Degli Studi, 2000; Master of Arts, Univ California Irvine, 2002; Philosophiae Doctor, *ibid.*, 2006 (2008)

Mark S. Alber. *Professor of Mathematics and Concurrent Professor, Physics and Director, Center for Biocomplexity and The Notre Dame Chair in Applied Mathematics.* Master of Science, Moscow Institute of Technology, 1983; Philosophiae Doctor, Univ of Pennsylvania, 1990 (1990)

Thomas E. Albrecht-Schmitt. *Professor of Civil Engr/Geological Sciences and Concurrent Professor, Chemistry & Biochemistry and Frank M. Freimann Endowed Professor, Civil Engineering and Geological Sciences.* Bachelor of Science, Southwest State University, 1993; Master of Science, Northwestern University, 1994; Philosophiae Doctor, *ibid.*, 1997 (2009)

Simeon Alder. *Assistant Professor of Economics and Econometrics and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts, Graduate Inst of Int'L Studies, 1998; Master of Arts, UCLA, 2005; Philosophiae Doctor, *ibid.*, 2009 (2009)

Joan Aldous. *Professor of Sociology and The William R. Kenan, Jr., Chair.* Bachelor of Science, Kansas State University, 1948; Master of Arts, Univ of Texas-Austin, 1949; Philosophiae Doctor, University of Minnesota at Dul, 1963 (1976)

Robert L. Alworth. *Assistant Professional Specialist of Dean's Office - Engineering.* Bach of Sci in Mech Engr, University of Notre Dame, 1972; Master of Science, Cornell University, 1974 (2009)

Samuel Amago. *Associate Professor of Romance Languages and Literature and Fellow, Nanovic Institute for European Studies and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts, Univ California San Diego, 1996; Master of Arts, University of Virginia, 1999; Philosophiae Doctor, *ibid.*, 2003 (2003)

Joseph P. Amar. *Professor of The Classics and Concurrent Professor Theology.* Philosophiae Doctor, Catholic University of America, 1988 (1988)

George A. Ambrose. *Assistant Professional Specialist of Dean's Office - First Yr of St and Assistant Professor, Military Science.* Bachelor of Arts, Rutgers State University of NJ, 2002; Master of Education, *ibid.*, 2003 (2008)

Geraldine A. Ameriks. *Associate Professional Specialist of Romance Languages and Literature and Associate Teaching Professor.* Bachelor of Arts, Smith College, 1969; Master of Arts, Stanford University, 1971 (1980)

Karl P. Ameriks. *Professor of Philosophy and Fellow, Nanovic Institute for European Studies and The McMahon-Hank Chair in Philosophy.* Bachelor of Arts, Yale University, 1969; Philosophiae Doctor, *ibid.*, 1973 (1973)

Robert L. Amico. *Professor of Architecture.* Bachelor of Architecture, Univ of IL Urbana-Champaign, 1961; Master of Architecture, Harvard University, 1965 (1978)

Jose Anadon. *Professor of Romance Languages and Literature.* Bachelor of Arts, Albion College, 1968; Master of Arts, University of Michigan, 1970; Philosophiae Doctor, *ibid.*, 1974 (1975)

Gary A. Anderson. *Professor of Theology, the Hesburgh Professor of Catholic Theology.* Bachelor of Arts, Albion College, 1977; Master of Divinity, Duke University, 1981; Philosophiae Doctor, Harvard University, 1985 (2003)

Thomas F. Anderson. *Associate Professor of Romance Languages and Literature and Fellow, Institute for Latino Studies and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts, Bowdoin College, 1992; Master of Arts, Univ of Pennsylvania, 1994; Philosophiae Doctor, *ibid.*, 1998 (1998)

Corey M. Angst. *Assistant Professor of Management.* Bach of Sci in Mech Engr, Western Michigan University, 2001; Master of Business Admin, University of Delaware, 2006; Philosophiae Doctor, University of Maryland, 2007 (2007)

Panos J. Antsaklis. *Professor of Electrical Engineering and Concurrent Professor, Computer Science and Engineering and H. Clifford & Evelyn A. Brosey II Chair.* Diploma, Natl Technical Univ of Athens, 1972; Master of Science, Brown University, 1974; Philosophiae Doctor, *ibid.*, 1977 (1980)

Robert S. Appleby. *Professor of History and Fellow, Kellogg Institute for International Studies and The John M. Regan Jr. Directorship and Fellow, The Joan B. Kroc Institute for International Peace Studies and Director, The Joan B. Kroc Institute for International Peace Studies.* Bachelor of Arts, University of Notre Dame, 1978; Master of Arts, University of Chicago, 1979; Philosophiae Doctor, *ibid.*, 1985; Philosophiae Doctor, *ibid.*, 1985 (1994)

Ani Aprahamian. *Professor of Physics and The Frank M. Feimann Professor of Physics I.* Bachelor of Arts, Clark University, 1980; Philosophiae Doctor, *ibid.*, 1986 (1989)

Francisco J. Aragon. *Assistant Professional Specialist of Institute for Latino Studies.* Bachelor of Arts, Univ of California Berkeley, 1989; Master of Arts, New York University, 1990; Master of Arts, Univ California Davis, 2000; Master of Fine Arts, University of Notre Dame, 2003 (2003)

J. Douglas Archer. *Librarian of University Libraries.* Bachelor of Arts, Duke University, 1968; Master in Library Science, Western Michigan University, 1981; Master of Divinity, Colgate Rochester Divinity Sch, 1972 (1978)

Elizabeth A. Archie. *Assistant Professor of Biological Sciences.* Bachelor of Arts, Bowdoin College, 1997; Philosophiae Doctor, Duke University, 2005 (2009)

FACULTY

Heidi L. Ardizzone. *Assistant Professor of American Studies and Concurrent Assistant Professor History.* Bachelor of Arts, Cornell University, 1989; Master of Arts, University of Michigan, 1991; Philosophiae Doctor, *ibid.*, 1997 (1999)

Gerald B. Arnold. *Professor of Physics.* Bachelor of Arts, Northwestern University, 1969; Master of Science, UCLA, 1972; Philosophiae Doctor, *ibid.*, 1977 (1978)

Peri E. Arnold. *Professor of Political Science.* Bachelor of Arts, Roosevelt University, 1964; Master of Arts, University of Chicago, 1967; Philosophiae Doctor, *ibid.*, 1972 (1972)

Julie E. Arnott. *Librarian of University Libraries.* Bachelor of Arts, University of Missouri-St. Lou, 1976; M.S. Library Science, Univ of IL Urbana-Champaign, 1986 (2005)

Carolina Arroyo. *Associate Professional Specialist of Political Science.* Bachelor of Arts, SUNY at Buffalo, 1983; Master of Arts, Stanford University, 1990 (1996)

Brandon L. Ashfeld. *Assistant Professor of Chemistry and Biochemistry.* Bachelor of Science, University of Minnesota, 1998; Philosophiae Doctor, Univ of Texas-Austin, 2004 (2007)

James M. Ashley. *Associate Professor of Theology and Fellow, Center for Social Concerns.* Bachelor of Science, Saint Louis University, 1982; Master of Teacher Science, Weston School of Theology, 1988; Philosophiae Doctor, University of Chicago, 1993 (1993)

Lance R. Askildson. *Associate Professional Specialist of Dean's Office - Arts & Letters and Fellow, Nanovic Institute and Associateiate Professor of the Practice and Director, Center for the Studies of Languages and Cultures.* Bachelor of Arts, University of Minnesota, 2001; Master of Arts (Latin), Florida State University, 2004 (2008)

Virginie Askildson. *Assistant Professional Specialist of Dean's Office - Arts & Letters and Fellow, Nanovic Institute and Assistant Professor of the Practice.* Bachelor of Arts, College Lycee Gerard Philipe, 1995; Master of Science, Florida State University, 2004; Philosophiae Doctor, University of Arizona, 2008 (2008)

Ann W. Astell. *Professor of Theology.* Bachelor of Science, Marquette University, 1974; Master of Arts, *ibid.*, 1981; Philosophiae Doctor, Univ of Wisconsin-Madison, 1987 (2007)

Hafiz M. Atassi. *Professor of Aerospace & Mech Engineering and The Viola D. Hank Chair in Aerospace and Mechanical Engineering.* Philosophiae Doctor, University of Paris I, 1966 (1969)

Robert Audi. *Professor of Management and The David E. Gallo Chair in Business Ethics.* Bachelor of Arts, Colgate University, 1963; Master of Arts, University of Michigan, 1965; Philosophiae Doctor, *ibid.*, 1967 (1987)

David E. Aune. *Professor of Theology and Walter Chair, Theology.* Bachelor of Arts, Wheaton College, 1961; Master of Arts, University of Minnesota, 1965; Master of Arts, Wheaton College, 1963; Philosophiae Doctor, University of Chicago, 1970 (1999)

Yury P. Avvakumov. *Assistant Professor of Theology.* Master of Arts, Leningrad State University, 1981; Philosophiae Doctor, Ludwig-Maximilians Univ Munich, 2001; Philosophiae Doctor, Russian Theological Seminary, 1990 (2010)

Brad A. Badertscher. *Assistant Professor of Accountancy.* Bachelor of Arts, Univ. of Nebraska at Kearney, 2001; Master of Business Admin, University of Iowa, 2003; Philosophiae Doctor, *ibid.*, 2007 (2007)

Brian M. Baker. *Associate Professor of Chemistry and Biochemistry.* Bachelor of Science, New Mexico State Univ. Park, 1992; Philosophiae Doctor, University of Iowa, 1997 (2001)

Harriet E. Baldwin. *Associate Professional Specialist of Dean's Office - Arts & Letters.* Bachelor of Science, Kansas State University, 1966 (1980)

Aaron B. Bales. *Assistant Librarian of University Libraries.* Bachelor of Arts, Harvard University, 1988; Master in Library Science, Indiana Univ-Bloomington, 2001 (1992)

Dinshaw S. Balsara. *Associate Professor of Physics.* Bachelor of Science, Jai Hind College, 1977; Master of Science, Indian Inst of Tech Kanpur, 1982; Master of Science, University of Chicago, 1986; Philosophiae Doctor, Univ of IL Urbana-Champaign, 1990 (2001)

Rashna D. Balsara. *Research Assistant Professor of Chemistry and Biochemistry.* Bachelor of Science, University of Bombay, 1985; Master of Science, *ibid.*, 1991; Philosophiae Doctor, *ibid.*, 1998 (2007)

Charles E. Barber. *Professor of Art, Art History, and Design.* Bachelor of Arts, Courtauld Institute of Art, 1986; Philosophiae Doctor, *ibid.*, 1989 (1996)

Sotirios A. Barber. *Professor of Political Science.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1964; Master of Arts, University of Chicago, 1967; Philosophiae Doctor, *ibid.*, 1973 (1986)

Christopher A. Baron. *Assistant Professor of The Classics.* Bachelor of Arts (Latin), Illinois Wesleyan University, 1995; Master of Arts, University of Chicago, ; Philosophiae Doctor, Univ of Pennsylvania, 2000 (2006)

Amy C. Barrett. *Professor of Law School.* Bachelor of Arts, Rhodes College, 1994; Juris Doctor, University of Notre Dame, 1997 (2002)

Matthew J. Barrett. *Professor of Law School.* Bachelor of Business Admin., University of Notre Dame, 1982; Juris Doctor, *ibid.*, 1985; Juris Doctor, *ibid.*, 1985 (1990)

Katrina D. Barron. *Assistant Professor of Mathematics.* B.S. Mathematics, University of Chicago, 1986; B.S. Physics, *ibid.*, 1987; Philosophiae Doctor, Rutgers University, 1996 (2001)

Kevin Barry. *Associate Professional Specialist of Kaneb Ctr for Teaching and Lea and Associateiate Director, Kaneb Ctr for Teaching and Learning.* Bachelor of Science, Florida Institute of Technolog, 1988; Master of Science, *ibid.*, 1990 (1994)

David M. Bartels. *Professional Specialist of Radiation Laboratory and Concurrent Professor, Chemistry & Biochemistry and Concurrent Professor, Chemistry & Biochemistry.* Bachelor of Science, Hope College, 1977; Philosophiae Doctor, Northwestern University, 1982 (2003)

Viva O. Bartkus. *Associate Professor of Management and Fellow, Nanovic Institute for European Studies and Fellow, Joan B. Kroc Institute for International Peace Studies.* Bachelor of Arts, Yale University, 1989; Master of Arts, University of Oxford, 1991; Master of Arts, Yale University, 1989; Philosophiae Doctor, University of Oxford, 1993 (2004)

Stephen M. Batill. *Professor of Aerospace & Mech Engineering.* Bachelor of Science, University of Notre Dame, 1969; Master of Science, *ibid.*, 1970; Philosophiae Doctor, *ibid.*, 1972 (1978)

Robert H. Battalio. *Professor of Finance.* Bachelor of Science, Texas A&M University, 1988; Philosophiae Doctor, Indiana Univ-Bloomington, 1995 (2000)

Joseph P. Bauer. *Professor of Law School.* Bachelor of Arts, Univ of Pennsylvania, 1965; Juris Doctor, Harvard University, 1969 (1973)

Peter H. Bauer. *Professor of Electrical Engineering.* Philosophiae Doctor, University of Miami, 1987 (1988)

FACULTY

- Gerard F. Baumbach.** *Professional Specialist of Institute for Church Life and Concurrent Professor, Theology.* B.S. Political Science, Saint Michael's College, 1968; Bachelor of Arts, *ibid.*, 1968; Doctorate of Education, New York University, 1989; Master of Arts, Univ of Maryland Baltimore Cou, 1975 (2003)
- Barry W. Baumbaugh.** *Professional Specialist of Physics.* Bachelor of Science, Indiana Institute of Technolog, 1976 (1978)
- Laura A. Bayard.** *Librarian of University Libraries.* Bachelor of Arts, Shippensburg University, 1969; Master of Science, University of Pittsburgh, 1974 (1989)
- Terri L. Bays.** *Assistant Professional Specialist of Kaneb Ctr for Teaching and Lea.* Bachelor of Arts, Northwestern University, 1989; Philosophiae Doctor, UCLA, 2000 (2000)
- Timothy J. Bays.** *Associate Professor of Philosophy.* Bachelor of Arts, Northwestern University, 1988; Doctor of Philosophy, UCLA, 1999; Philosophiae Doctor, *ibid.*, 1994 (1999)
- Edward N. Beatty.** *Associate Professor of History and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts, Princeton University, 1983; Master of Arts, University of New Mexico Main, 1992; Philosophiae Doctor, Stanford University, 1996 (2000)
- Christine A. Becker.** *Associate Professor of Film, Television, and Theatre and Fellow, Nanovic Institute for European Studies.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1993; Master of Arts, Univ of Wisconsin-Madison, 1995; Philosophiae Doctor, *ibid.*, 2001 (2000)
- Mary P. Beckman.** *Professional Specialist of Center for Social Concerns and Concurrent Associate Professor, Economics and Policy Studies.* Bachelor of Arts, University of Notre Dame, 1975; Master of Arts, *ibid.*, 1984; Philosophiae Doctor, *ibid.*, 1986 (2001)
- Gail Bederman.** *Associate Professor of History and Concurrent Associate Professor, American Studies.* Bachelor of Arts, New York University, 1978; Master of Arts, Brown University, 1984; Philosophiae Doctor, *ibid.*, 1993 (1992)
- Susanta K. Behura.** *Research Assistant Professor of Biological Sciences.* Bachelor of Science, Utkal University, 1995; Master of Science, Guru Nanak Dev University, 1998; Philosophiae Doctor, Utkal University, 2000 (2008)
- Anthony J. Bellia Jr.** *Professor of Law School.* Bachelor of Arts, Canisius College, 1991; Juris Doctor, University of Notre Dame, 1994 (2000)
- Patricia L. Bellia.** *Professor of Law School.* Bachelor of Arts (Latin), Harvard University, 1991; Juris Doctor, Yale University, 1995 (2000)
- Gary E. Belovsky.** *Professor of Biological Sciences and The Martin J. Gillen Director of the Environmental Research Center and Director, UNDERC.* Bachelor of Business Admin., University of Notre Dame, 1972; Master of Science, Yale University, 1974; Philosophiae Doctor, Harvard University, 1977 (2001)
- Harvey A. Bender.** *Professor of Biological Sciences.* Bachelor of Arts, Case Western Reserve Univ., 1954; Master of Science, Northwestern University, 1957; Philosophiae Doctor, *ibid.*, 1959 (1960)
- Matthew F. Benedict.** *Associate Professional Specialist of English.* Bachelor of Arts, Univ of Massachusetts, 1986; Master of Fine Arts, University of Notre Dame, 1994 (1998)
- Jada P. Benn Torres.** *Assistant Professor of Anthropology.* Bachelor of Arts, University of Notre Dame, 1999; Master of Science, University of New Mexico Main, 2001; Philosophiae Doctor, *ibid.*, 2006 (2008)
- David P. Bennett.** *Research Associate Professor of Physics.* Bachelor of Science, Case Western Reserve Univ., 1981; Master of Science, Stanford University, 1983; Philosophiae Doctor, *ibid.*, 1986 (1996)
- Geoffrey J. Bennett.** *Concurrent Professor of Law School and London Concurrent Professor and Director of the London Law Program.* Master of Arts, University of Cambridge, 1978 (1995)
- John J. Bentley.** *Associate Professional Specialist of Radiation Laboratory.* Bachelor of Science, College of the Holy Cross, 1967; Master of Science, Carnegie Mellon University, 1970; Philosophiae Doctor, *ibid.*, 1975 (1978)
- Mark Berends.** *Professor of Sociology.* Bachelor of Arts, Calvin College, 1985; Master of Science, Univ of Wisconsin-Madison, 1988; Philosophiae Doctor, *ibid.*, 1992 (2009)
- Cindy S. Bergeman.** *Professor of Psychology.* Bachelor of Science, University of Idaho, 1979; Master of Science, Pennsylvania State University, 1987; Philosophiae Doctor, *ibid.*, 1989 (1990)

- Emily S. Block.** *Assistant Professor of Management.* Bachelor of Arts, University of Notre Dame, 1999; Philosophiae Doctor, Univ of IL Urbana-Champaign, 2009 (2008)
- Matt Bloom.** *Associate Professor of Management.* Bachelor of Science, Baker University, 1983; Master of Arts, University of Kansas, 1989; Philosophiae Doctor, Cornell University, 1996 (1996)
- W. Martin Bloomer.** *Associate Professor of The Classics.* Bachelor of Arts, Yale University, 1982; Master of Arts, *ibid.*, 1983; Master of Philosophy, *ibid.*, 1984; Philosophiae Doctor, *ibid.*, 1987 (1998)
- Susan D. Blum.** *Professor of Anthropology and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts (Latin), Stanford University, 1980; Master of Arts, University of Michigan, 1986; Master of Arts, *ibid.*, 1988; Philosophiae Doctor, *ibid.*, 1994 (2000)
- Joseph G. Bock.** *Professional Specialist of Joan B. Kroc Inst. for Intl.* Bachelor of Social Work, Univ of Missouri-Columbia, 1980; Master of Science, *ibid.*, 1981; Philosophiae Doctor, American University, 1985 (2007)
- Andriy Bodnaruk.** *Assistant Professor of Finance.* Bachelor of Science, Univ. of Kiev-Mohyla Academy, 1997; Master of Arts, *ibid.*, 1999; Philosophiae Doctor, Stockholm School of Economics, 2005 (2008)
- Tobias Boes.** *Assistant Professor of German/ Russian Lang & Lit and Fellow in the Nanovic Institute for European Studies.* Bachelor of Arts, Reed College, 1999; Master of Philosophy, Yale University, 2003; Philosophiae Doctor, *ibid.*, 2006 (2007)
- William C. Boggess Jr.** *Professional Specialist of Chemistry and Biochemistry and Assistant Chair.* Bachelor of Science, Davis and Elkins College, 1988; Philosophiae Doctor, University Tennessee Knoxville, 1994 (1994)
- Paul W. Bohn.** *Professor of Chemical and Biomolecular Eng and Arthur J. Schmitt Chair, Chemical & Biomolecular Engineering and Concurrent Professor, Chemistry and Biochemistry and Concurrent Professor, Chemistry and Biochemistry.* Bachelor of Science, University of Notre Dame, 1977; Philosophiae Doctor, Univ of Wisconsin-Madison, 1981 (2006)
- Catherine E. Bolten.** *Assistant Professor of Anthropology and Fellow, Kellogg Institute for International Studies.* B.S. Biology, Williams College, 1998; Master of Science, University of Cambridge, 2000; Philosophiae Doctor, University of Michigan, 2008 (2009)
- Frank J. Bonello.** *Associate Professor of Economics and Policy Studies and Assistant Professor Emeritus.* Bachelor of Science, University of Detroit, 1961; Master of Arts, *ibid.*, 1963; Philosophiae Doctor, Michigan State University, 1968 (1968)
- Oleg Borbulevych.** *Assistant Professional Specialist of Chemistry and Biochemistry.* Master of Science, Moscow State University, 1995; Master of Science, New Mexico Highlands University, 1999; Master of Science, Russian Academy of Sciences, 2001 (2008)
- Jennifer A. Borek.** *Associate Professional Specialist of Alliance for Catholic Educatio.* Bachelor of Arts, Southern Illinois Univ at Carb, 1986; Master of Fine Arts, Univ California San Diego, 2008; Master of Science, Southern Illinois Univ at Edwa, 1993; Philosophiae Doctor, Saint Louis University, 1996 (2008)
- John G. Borkowski.** *Professor of Psychology and Fellow, Institute for Educational Initiatives and The Andrew J. McKenna Family Chair in Psychology.* Bachelor of Arts, Benedict College, 1960; Master of Arts, Ohio University, 1962; Philosophiae Doctor, University of Iowa, 1965 (1967)

FACULTY

Eileen H. Botting. *Associate Professor of Political Science and Director, Gender Studies (2006–2009) and Rolfs TJ and RT and Fellow in the Nanovic Institute for European Studies and Fellow, Kroc Institute for International Peace Studies.* B.A., Bowdoin College, 1993; B.A., University of Cambridge, 1995; M.A., Yale University, 1996; M.A., *ibid.*, 1997; C6, *ibid.*, 1998; C6, *ibid.*, 1998; M.A., University of Cambridge, 1999; Ph.D., Yale University, 2001 (2001)

D'Arcy J. Boulton. *Professional Specialist of Medieval Institute and Professor of the Practice.* Bachelor of Arts, U of Trinity Coll Toronto, 1969; Master of Arts, Univ of Pennsylvania, 1970; Philosophiae Doctor, *ibid.*, 1978; Philosophiae Doctor, University of Oxford, 1976 (1989)

Maureen B. Boulton. *Professor of Romance Languages and Literature.* Bachelor of Arts, College of New Rochelle, 1970; Master of Arts, Univ of Pennsylvania, 1972; Master of Literature, University of Oxford, 1980; Philosophiae Doctor, Univ of Pennsylvania, 1976 (1985)

Kevin W. Bowyer. *Professor of Computer Science and Engineering and Concurrent Professor, Electrical Engineering and The Schubmehl-Prein Family Chair in Computer Science and Engineering and Department Chair.* B.S. Economics, George Mason University, 1976; Philosophiae Doctor, Duke University, 1980 (2001)

Sunny K. Boyd. *Professor of Biological Sciences and Associate Vice President for Research.* Philosophiae Doctor, Oregon State University, 1987 (1987)

Patricio E. Boyer. *Assistant Professor of Romance Languages and Literature and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts, Yale University, 1998; Master of Philosophy, *ibid.*, 2001; Philosophiae Doctor, *ibid.*, 2005 (2005)

Fernandre D. Boze. *Associate Librarian of University Libraries.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1977; Master of Science, *ibid.*, 1989 (1991)

Carol A. Brach. *Associate Librarian of University Libraries.* Bachelor of Arts, Duquesne University, 1974; Master in Library Science, University of Pittsburgh, 1975 (1991)

Kevin D. Bradford. *Associate Professional Specialist of Marketing.* Bachelor of Arts, University of Northern Iowa, 1984; Master of Business Admin, University of Notre Dame, 1991; Philosophiae Doctor, University of Florida, 2000 (1999)

Tonya P. Bradford. *Assistant Professor of Marketing.* Bachelor of Arts, Northwestern University, 1986; Master of Arts, *ibid.*, 1991; Philosophiae Doctor, *ibid.*, 2007 (2007)

Douglas E. Bradley. *Professional Specialist of Snite Museum and Concurrent Associate Professor, Anthropology.* Bachelor of Arts, University of Notre Dame, 1971; Master of Arts, University of Michigan, 1976 (1979)

Gerard V. Bradley. *Professor of Law School.* Bachelor of Arts, Cornell University, 1976; Juris Doctor, *ibid.*, 1980 (1992)

Keith R. Bradley. *Professor of The Classics and The Eli J. Shaheen Chair in Classics and Concurrent Professor, History.* Bachelor of Arts, University of Sheffield, 1967; Doctor of Fine Arts, University College Oxford, 1970; Master of Arts, University of Sheffield, 1968; Philosophiae Doctor, *ibid.*, 1980 (2001)

Rev. Paul F. Bradshaw. *Professor of Theology.* Bachelor of Arts, Clare College Cambridge, 1966; Doctorate of Divinity, Oriel College Oxford, 1994; Master of Arts, Clare College Cambridge, 1970; Philosophiae Doctor, King's College Cambridge, 1971 (1985)

Steven J. Brady. *Assistant Professional Specialist of Dean's Office - First Yr of St and Concurrent Assistant Professor, History.* Bachelor of Arts, Roosevelt University, 1989; Master of Arts, University of Notre Dame, 1992; Philosophiae Doctor, *ibid.*, 1998 (1998)

Jay W. Brandenberger. *Professional Specialist of Center for Social Concerns and Fellow, Institute for Educational Initiatives and Concurrent Associate Professor, Psychology.* Bachelor of Arts, University of Notre Dame, 1978; Master of Arts, University of Pittsburgh, 1987; Philosophiae Doctor, *ibid.*, 1990 (1991)

Robert J. Brandt. *Professional Specialist of Architecture.* Bachelor of Science, University of Southern Indiana, 1986; Master of Fine Arts, Indiana State University Main, 1989 (1992)

John M. Brauer. *Associate Professional Specialist of Dean's Office - Engineering.* Bachelor of Science, State Univ of NY-Buffer, 1967; Master of Science, *ibid.*, 1969 (2003)

Julia M. Braungart-Rieker. *Professor of Psychology.* Bachelor of Science, Syracuse University, 1987; Master of Science, Pennsylvania State University, 1990; Philosophiae Doctor, *ibid.*, 1992 (1992)

Joan F. Brennecke. *Professor of Chemical and Biomolecular Eng and The Bernard Keating-Crawford Chair in Engineering.* Philosophiae Doctor, Univ of IL Urbana-Champaign, 1989 (1989)

Paul R. Brenner. *Research Assistant Professor of Computer Science and Engineering and Concurrent Assistant Professor.* Bach of Sci in Civil Engr, University of Notre Dame, 1998; Bachelor of Science, *ibid.*, 1998; Master of Science, Ohio State University, 2003 (2007)

Sarah E. Brenner. *Associate Professional Specialist of Dean's Office - First Yr of St and Associate Professional Specialist.* Bachelor of Arts, University of Notre Dame, 1998; M.S. Social Work, Ohio State University, 2003; Master of Arts, *ibid.*, 2003 (1995)

Robert D. Bretz Jr. *Professor of Management and The Joe and Jane Giovanini Chair in Management.* Bachelor of Arts, Bethany College, 1980; Master of Business Admin, University of Kansas, 1984; Philosophiae Doctor, *ibid.*, 1988 (1997)

Margaret Brinig. *Professor of Law School and Fritz Duda Family Chair in Law and Associate Dean, Law School.* B.A. History, Duke University, 1970; Juris Doctor, Seton Hall University, 1970; Master of Arts (Latin), George Mason University, 1993 (2006)

Nicole Brinkmann. *Assistant Professional Specialist of Dean's Office - First Yr of St.* Bachelor of Arts, College of Wooster, 1999; Philosophiae Doctor, University of Georgia, 2003 (2008)

Daniel Brinks. *Associate Professor of Political Science and Fellow, Kellogg Institute for International Studies and Concurrent Associate Professor, Law School.* Bachelor of Arts, Calvin College, 1984; Juris Doctor, University of Michigan, 1987; Philosophiae Doctor, University of Notre Dame, 2004 (2009)

Jay B. Brockman. *Associate Professor of Computer Science and Engineering and Concurrent Associate Professor, Electrical Engineering.* Bachelor of Science, Brown University, 1982; Master of Engineering, Carnegie Mellon University, 1988; Philosophiae Doctor, *ibid.*, 1992 (1992)

James R. Brockmole. *Associate Professor of Psychology.* Bachelor of Arts, University of Notre Dame, 1999; Master of Arts, Univ of IL Urbana-Champaign, 2001; Philosophiae Doctor, *ibid.*, 2003 (2009)

FACULTY

Jacqueline V. Brogan. *Professor of English and Concurrent Professor, American Studies.* Bachelor of Arts, Southern Methodist University, 1974; Master of Arts, *ibid.*, 1975; Philosophiae Doctor, Univ of Texas-Austin, 1982 (1986)

Nyame O. Brown. *Assistant Professor of Art, Art History, and Design.* Bachelor of Fine Arts, School of the Art Institute of, 1993; Master of Fine Arts, Yale University, 1997 (2002)

Seth N. Brown. *Associate Professor of Chemistry and Biochemistry.* Bachelor of Science, Massachusetts Institute of Tec, 1988; Philosophiae Doctor, Univ of Washington, 1994 (1996)

Allert R. Brown-Gort. *Associate Professional Specialist of Institute for Latino Studies and Fellow, Kellogg Institute for International Studies and Associate Director, Institute for Latino Studies.* Master of Public Affairs, Univ of Texas-Austin, 1998 (1999)

Michael C. Brownstein. *Associate Professor of East Asian Langs and Literature and Fellow, Nanovic Institute for European Studies.* Bachelor of Arts, California St. Univ-Northridge, 1972; Bachelor of Arts, Monterey Inst. International, 1973; Master of Arts, Columbia University, 1978; Philosophiae Doctor, *ibid.*, 1981 (1982)

Ghada N. Bualuan. *Assistant Professional Specialist of The Classics.* Bachelor of Business Admin., American University of Beirut, 1993; Master of Business Admin, Lebanese American University, 1999 (2008)

Ramzi K. Bualuan. *Associate Professional Specialist of Computer Science and Engineering and Assistant Teaching Professor.* Bachelor of Science, American University of Beirut, 1983; M.S. Electrical Engr, University of Notre Dame, 1986 (1990)

Aimee P. Buccellato. *Assistant Professor of Architecture.* Bachelor of Arts, University of Notre Dame, 2000; Master of Arts, Jesus Hall Cambridge, 2005 (2008)

Kasey S. Buckles. *Assistant Professor of Economics and Econometrics.* Bachelor of Arts, University of Kentucky, 2000; Master of Arts, Boston University, 2003; Philosophiae Doctor, *ibid.*, 2005 (2005)

Nero Budur. *Assistant Professor of Mathematics and The Rev. Howard J. Kenna, C.S.C., Memorial Director of the Zebrafish Research Center.* Bachelor of Science, Univ of Illinois-Chicago, 1998; Master of Science, *ibid.*, 1999; Philosophiae Doctor, *ibid.*, 2003 (2006)

Steven A. Buechler. *Professor of Mathematics and Associate Dean for Undergraduate Affairs.* Bachelor of Arts, Eastern Illinois Univ, 1977; Philosophiae Doctor, University of Maryland Unvers, 1981 (1987)

Rev. Richard S. Bullene CSC. *Associate Professional Specialist of Architecture and Assistant Dean, Architecture.* Bachelor of Architecture, University of Notre Dame, 1976; Master of Divinity, *ibid.*, 1981; Master of Divinity, *ibid.*, 1981; Master of Science, Univ of Pennsylvania, 1992; Philosophiae Doctor, *ibid.*, 1994 (1993)

Bruce A. Bunker. *Professor of Physics.* Bachelor of Science, Univ of Washington, 1974; Philosophiae Doctor, *ibid.*, 1980 (1983)

Karen L. Buranskas. *Associate Professor of Music.* Bachelor of Music, Indiana Univ-Bloomington, 1973; Master of Music, Yale University, 1977 (1979)

Thomas G. Burish. *Professor of Psychology and Provost, Provost Office.* Bachelor of Arts, University of Notre Dame, 1972; Doctor of Arts, University of Kansas Medical C, 1976; Master of Arts, University of Kansas, 1975 (2005)

Bartley A. Burk. *Associate Librarian of University Libraries.* Bachelor of Science, Brigham Young University, 1978; Master in Library Science, *ibid.*, 1990 (1990)

Leo F. Burke. *Professional Specialist of Executive MBA.* Bachelor of Arts, University of Notre Dame, 1970; Master of Arts, Indiana Univ-Bloomington, 1979; Master of Business Admin, Aurora University, 1988 (2007)

Jeffrey J. Burks. *Assistant Professor of Accountancy.* Bachelor of Business Admin., University of Notre Dame, 1997; Master of Business Admin, Creighton University, 2002; Philosophiae Doctor, University of Iowa, 2007 (2007)

Peter C. Burns. *Professor of Civil Engr/Geological Sciences and The Henry Massman Chair in Civil Engineering (Collegiate Chair) II and Concurrent Professor, Chemistry and Biochemistry and Department Chair, Civil Engineering and Geological Sciences and Concurrent Professor, Chemistry and Biochemistry.* Bachelor of Science, University of New Brunswick, 1988; Master of Science, University of Western Ontario, 1990; Philosophiae Doctor, University of Manitoba, 1994 (1997)

Jorge A. Bustamante. *Professor of Sociology and Fellow, Kellogg Inst for Intrnl Studies and The Eugene P. and Helen Conley Chair in Sociology.* Master of Arts, University of Notre Dame, 1970; Philosophiae Doctor, *ibid.*, 1975 (1986)

Joseph A. Buttigieg. *Professor of English and The William R. Kenan Jr. Chair in English and Fellow, Nanovic Inst for European Studies.* Philosophiae Doctor, State Univ of NY-Binghamton, 1976 (1980)

Sondra Byrnes. *Associate Professional Specialist of Management.* Bachelor of Arts, University of North Dakota Mai, 1967; Juris Doctor, University of Detroit, 1986 (2006)

Theodore J. Cachey Jr. *Professor of Romance Languages and Literature and Fellow, Nanovic Inst for European Studies and Department Chair, Romance Languages and Literatures and Ravarino Directorship.* Philosophiae Doctor, UCLA, 1986 (1990)

Matthew Cain. *Assistant Professor of Finance.* Bachelor of Science, Grove City College, 2001; Philosophiae Doctor, Purdue University, 2007 (2008)

Pascal V. Calarco. *Associate Librarian of University Libraries.* Bachelor of Arts, University of Western Ontario, 1991; Master in Library Science, McGill University, 1995 (2004)

Alejandro E. Camacho. *Associate Professor of Law School and Fellow in the Institute for Latino Studies.* Bachelor of Arts, Univ California Irvine, 1995; Bachelor of Laws, Univ of California Riverside, 1995; Juris Doctor, Harvard University, 1998 (2005)

David E. Campbell. *Associate Professor of Political Science and Fellow, Inst for Educational Initiatives.* Bachelor of Arts, Brigham Young University, 1996; Philosophiae Doctor, Harvard University, 2002 (2002)

Sr. Kathleen Cannon OP. *Professional Specialist of Dean's Office - Science and Concurrent Associate Professor, Theology.* Bachelor of Arts, Ohio Dominican College, 1965; Doctor of Ministry, Catholic University of America, 1982; Master of Arts, Providence College, 1975 (1990)

Jianguo Cao. *Professor of Mathematics.* Bachelor of Science, Nanjing University, 1982; Master of Science, *ibid.*, 1985; Philosophiae Doctor, Univ of Pennsylvania, 1989 (1996)

Matthew Capdevielle. *Assistant Professional Specialist of Univ Writing Program and Director, University Writing Center.* Bachelor of Arts, Saint Louis University, 1996; Master of Arts, Saint Johns College at Santa F, 2002; Master of Arts, *ibid.*, 2002; Master of Arts, University of Wisconsin Center, 2004 (2009)

Mark A. Caprio. *Assistant Professor of Physics.* Bachelor of Science, Oglethorpe University, 1998; Master of Science, Yale University, 1998; Philosophiae Doctor, *ibid.*, 2003 (2007)

FACULTY

William J. Carbonaro. *Associate Professor of Sociology and Fellow, Inst for Educational Initiatives and Assistant Director, CREO.* Bachelor of Arts, Washington University, 1990; Master of Arts, Univ of Wisconsin-Madison, 1996; Master of Arts, Washington University, 1991; Philosophiae Doctor, Univ of Wisconsin-Madison, 2000 (2000)

Gilberto Cardenas. *Professor of Sociology and Fellow, Kellogg Inst For Int'l Studies and The Julian Samora Chair in Latino Studies and Director, Institute for Latino Studies and Concurrent Professor, American Studies.* Master of Arts, University of Notre Dame, 1972; Philosophiae Doctor, *ibid.*, 1977 (1999)

Laura A. Carlson. *Professor of Psychology and Associate Dean of Professional Development, Graduate School.* Bachelor of Arts, Dartmouth College, 1987; Master of Arts, Michigan State University, 1991; Philosophiae Doctor, Univ of IL Urbana-Champaign, 1994 (1994)

Ian C. Carmichael. *Professor of Chemistry and Biochemistry and Director, Radiation Lab.* B.S. Chemistry, University of Glasgow, 1971; Philosophiae Doctor, *ibid.*, 1975 (1976)

Paolo G. Carozza. *Professor of Law School and Fellow, Nanovic Inst for European Studies and Fellow, Kellogg Inst for Intrnl Studies and Fellow, Joan B. Kroc Inst. for Int'l. Peace.* Bachelor of Arts (Latin), Harvard University, 1985; Juris Doctor, *ibid.*, 1989 (1996)

Kyle A. Carter. *Assistant Professor of Army Science and Assistant Professor, Military Science.* (2009)

Lisa L. Casey. *Associate Professor of Law School.* Bachelor of Arts (Latin), Stanford University, 1984; Juris Doctor, *ibid.*, 1987 (2001)

Douglass W. Cassel. *Professor of Law School and Fellow, Kellogg Inst For Int'l Studies and Director, Center for Civil & Human Rights.* Bachelor of Arts, Yale University, 1969; Juris Doctor, Harvard University, 1972 (2005)

Francis J. Castellino. *Professor of Chemistry and Biochemistry and The Kleiderer-Pezold Chair in Biochemistry.* Bachelor of Science, University of Scranton, 1964; Master of Science, University of Iowa, 1966; Philosophiae Doctor, *ibid.*, 1968 (1970)

John C. Cavadini. *Associate Professor of Theology and McGrath-Cavadini Director, Institute for Church Life and Department Chair, Theology.* Bachelor of Arts, Wesleyan University, 1985; Philosophiae Doctor, Yale University-Div School, 1988 (1990)

David Cavalieri. *Research Specialist of Aerospace & Mech Engineering.* Bachelor of Arts, Illinois Institute of Technolo, 1992; Bachelor of Science, *ibid.*, 1992; Master of Arts, *ibid.*, 1995; Master of Science, *ibid.*, 1996 (2003)

Dominic T. Chaloner. *Research Assistant Professor of Biological Sciences and Woodrow Wilson Fellowship.* Bachelor of Science, University of London, 1991; Philosophiae Doctor, *ibid.*, 1995 (2001)

Angie R. Chamblee. *Associate Professional Specialist of Dean's Office - First Yr of St.* Bachelor of Arts, University of Notre Dame, 1973; Master of Arts, Michigan State University, 1974 (1976)

Matthew M. Champion. *Research Assistant Professor of Chemistry and Biochemistry.* Bachelor of Science, University of Iowa, 1997; Philosophiae Doctor, Texas A&M University, 2005 (2009)

Patricia A. Champion. *Assistant Professor of Biological Sciences.* Bachelor of Science, Carnegie Mellon University, 1998; Master of Arts, Princeton University, 2000; Philosophiae Doctor, *ibid.*, 2003 (2009)

Hsueh-Chia Chang. *Professor of Chemical and Biomolecular Eng and The Bayer Corporation Chair in Engineering and Concurrent Professor, Aerospace and Mechanical Engineering.* Philosophiae Doctor, Princeton University, 1980 (1987)

Mayland Chang. *Professional Specialist of Chemistry and Biochemistry.* Bachelor of Science, Sorbonne University, 1977; Bachelor of Science, Univ of Southern California, 1981; Philosophiae Doctor, University of Chicago, 1985 (2003)

Vandhana M. Chari. *Research Assistant Professor of Biological Sciences.* Bachelor Degree - Unspecified, Stella Maris College, 1991; Doctorate of Medicine, Hahnemann University, 1999; Master of Science, Madras University, 1993 (2000)

Amitabh Chaudhary. *Assistant Professor of Computer Science and Engineering.* Doctor of Science, Johns Hopkins University, 2002; Master of Science, Indian Inst of Tech - Mumbai, 1996 (2004)

Nitesh V. Chawla. *Assistant Professor of Computer Science and Engineering.* Bach of Sci in Computer Sci, Maharashtra Inst of Tech, 1997; Doctor of Science, Univ of South Florida, 2002; Master of Science, *ibid.*, 2000 (2004)

Danny Z. Chen. *Professor of Computer Science and Engineering.* Bachelor of Science, Univ of San Francisco, 1985; Master of Science, Purdue University, 1988; Philosophiae Doctor, *ibid.*, 1992 (1992)

Guangyan Chen. *Assistant Professional Specialist of East Asian Langs and Literature.* Bachelor of Arts, Anhui Normal University, 1998; Master of Arts, Nanjing University, 2001; Master of Arts, University of Iowa, 2004 (2009)

Li-Jing Cheng. *Research Assistant Professor of Chemical and Biomolecular Eng.* Bachelor of Science, National Chiao Tung University, 1998; Master of Science, *ibid.*, 2000; Master of Science, University of Michigan, 2006; Philosophiae Doctor, *ibid.*, 2008 (2010)

Ying Cheng. *Assistant Professor of Psychology.* Bachelor of Arts, Anhui Institute of Technology, 2003; Master of Science, Univ of IL Urbana-Champaign, 2007; Philosophiae Doctor, *ibid.*, 2008 (2008)

Meredith S. Chesson. *Associate Professor of Anthropology.* Bachelor of Arts, Brown University, 1989; Master of Arts, Harvard University, 1993; Philosophiae Doctor, *ibid.*, 1997 (2000)

Daniel M. Chipman. *Professional Specialist of Radiation Laboratory and Concurrent Professor, Chemistry & Biochemistry and Concurrent Professor, Chemistry & Biochemistry.* Bachelor of Science, Iowa State University, 1967; Philosophiae Doctor, Univ of Wisconsin-Madison, 1972 (1976)

Peter A. Cholak. *Professor of Mathematics.* Bachelor of Arts, Union College University, 1984; M.S. Mathematics, Univ of Wisconsin-Madison, 1988; Master of Science, *ibid.*, 1988; Philosophiae Doctor, University of Wisconsin Center, 1991 (1994)

Kevin J. Christiano. *Associate Professor of Sociology.* Bachelor of Arts, Coll of William & Mary, 1977; Master of Arts, Princeton University, 1980; Philosophiae Doctor, *ibid.*, 1983 (1983)

Mathew A. Chrystal. *Assistant Professional Specialist of Science Computing.* Bachelor of Science, California State Polytechnic, 1983; Master of Science, University of Minnesota, 1997; Philosophiae Doctor, *ibid.*, 2001 (2001)

David A. Clairmont. *Assistant Professor of Theology.* Bachelor of Business Admin., University of Notre Dame, 1996; Master Degree - Unspecified, U of Chicago School Divinity, 2000; Philosophiae Doctor, *ibid.*, 2005 (1994)

FACULTY

- G. Christopher Clark.** *Associate Professional Specialist of Kaneb Ctr for Teaching and Lea and Concurrent Instructor Computer Applications Program.* Bachelor of Arts, Cornell University, 1975; Master of Arts, University of Rochester, 1980 (1997)
- Patricia L. Clark.** *Associate Professor of Chemistry and Biochemistry.* Bachelor of Science, Georgia Institute of Technolog, 1991; Philosophiae Doctor, University Texas Medical Schoo, 1997 (2001)
- Ryan K. Clark.** *Assistant Professional Specialist of Alliance for Catholic Educatio.* Bachelor of Arts, University of Notre Dame, 1995; Master of Arts, University of Portland, 1998; Philosophiae Doctor, Univ of Oregon, 2007 (2006)
- Patrick J. Clauss.** *Associate Professional Specialist of Univ Writing Program.* Bachelor of Science, Indiana Univ-Bloomington, 1990; Master of Arts, Indiana State University Main, 1992; Philosophiae Doctor, Ball State University, 1999 (2008)
- Aedin N. Clements.** *Associate Librarian of University Libraries.* Bachelor of Arts, University College Dublin, 1980; Master of Library & Info Sci, *ibid.*, 1982 (2005)
- Christopher Clemons.** *Assistant Professional Specialist of Alliance for Catholic Educatio.* Bachelor of Arts, Univ of Pennsylvania, 2001; Master of Business Admin, Massachusetts Institute of Tec, 2009 (2009)
- Laurel P. Cochrane.** *Associate Librarian of Library Law.* Bachelor of Arts, Indiana Univ-Bloomington, 1979; Master in Library Science, *ibid.*, 1988 (2002)
- Kristin M. Colberg.** *Assistant Professional Specialist of Theology.* Bachelor of Arts, University of Notre Dame, 1994; Master of Divinity, Yale University-Div School, 2000; Philosophiae Doctor, University of Notre Dame, 2008 (2009)
- Clayton K. Cole.** *Associate Professional Specialist of Film, Television, and Theatre.* Bachelor of Arts, Coll of William & Mary, 1986; Master of Fine Arts, Yale University, 1991 (2003)
- Anne G. Coleman.** *Associate Professor of American Studies.* Bachelor of Arts, Williams College, 1987; Master of Arts, Univ of Colorado-Boulder, 1992; Philosophiae Doctor, *ibid.*, 1996 (2009)
- Jon T. Coleman.** *Associate Professor of History and Concurrent Associate Professor, American Studies.* B.A. History, Univ of Colorado-Boulder, 1992; Doctorate Degree, Yale University, 2003; Master Degree - Unspecified, Harvey Mudd College, 1997 (2004)
- Robert R. Coleman.** *Associate Professor of Art, Art History, and Design and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, State Univ College New Paltz, 1970; Master of Arts, University of Chicago, 1973; Philosophiae Doctor, *ibid.*, 1988 (1982)
- Jessica Collett.** *Assistant Professor of Sociology and Fellow, Kroc Institute for International Peace Studies.* Master of Arts, University of Arizona, 2006; Philosophiae Doctor, *ibid.*, 2006 (2006)
- Kristen Collett-Schmitt.** *Assistant Professional Specialist of Finance.* Bachelor of Arts, Bellarmine College, 2003; Master of Education, North Carolina State Universit, 2004; Philosophiae Doctor, *ibid.*, 2008 (2008)
- Brian S. Collier.** *Assistant Professional Specialist of Alliance for Catholic Educatio.* Bachelor of Arts, Loyola University Chicago, 1995; Master of Arts, Colorado State University, 2000; Philosophiae Doctor, Arizona State University, 2006 (2009)
- Rev. Austin I. Collins CSC.** *Professor of Art, Art History, and Design.* Bachelor of Arts, University of Notre Dame, 1977; Master of Divinity, Graduate Theological Union, 1981; Master of Fine Arts, Claremont Graduate School, 1985 (1986)
- Frank H. Collins.** *Professor of Biological Sciences and The George and Winifred Clark Chair in Biological Sciences (I) and Director, Center for Global Health and Infectious Diseases.* Bachelor of Arts, Johns Hopkins University, 1966; Master of Arts, University of East Anglia, 1973; Philosophiae Doctor, Univ California Davis, 1981 (1997)
- James M. Collins.** *Professor of Film, Television, and Theatre and Concurrent Professor, English.* Philosophiae Doctor, University of Iowa, 1984 (1985)
- Oliver M. Collins.** *Professor of Electrical Engineering.* Bachelor of Science, California Institute of Techno, 1986; Master of Science, *ibid.*, 1987; Philosophiae Doctor, *ibid.*, 1989 (1995)
- Sandra D. Collins.** *Associate Professional Specialist of Management and Concurrent Assistant Professor, Psychology.* Bachelor of Arts, Indiana Univ South Bend, 1994; Master of Arts, University of Notre Dame, 1997; Philosophiae Doctor, *ibid.*, 1999 (1994)
- Philippe A. Collon.** *Associate Professor of Physics.* Bachelor of Science, Universite Catholique De Louva, 1993; Philosophiae Doctor, Wirtschaftsuniversitat Wien, 1999 (2003)
- Maria S. Coloma.** *Associate Professional Specialist of Romance Languages and Literature.* Bachelor of Arts, Nat'L University of San Marcos, 1984; Master of Arts, University of Pittsburgh, 1998 (2000)
- Edward J. Conlon.** *Professor of Management and Associate Dean, Mendoza College of Business and Edward Frederick Sorin Society, Professor of Management.* Bachelor of Science, Pennsylvania State University, 1972; Master of Science, Carnegie Mellon University, 1975; Philosophiae Doctor, *ibid.*, 1978 (1992)
- Barbara M. Connolly.** *Assistant Professor of Political Science.* Bachelor of Arts, Brown University, 1988; Master of Arts, Univ of California Berkeley, 1990; Philosophiae Doctor, *ibid.*, 1997 (2001)
- Francis X. Connolly.** *Professor of Mathematics.* Bachelor of Science, Fordham University, 1961; Master of Science, *ibid.*, 1963; Philosophiae Doctor, University of Rochester, 1965 (1971)
- Rev. Michael E. Connors CSC.** *Associate Professional Specialist of Theology.* Bachelor of Arts, Illinois College, 1977; Doctor of Arts of Theology, University of Toronto, 1997; Master of Divinity, University of Notre Dame, 1983 (1997)
- Ann-Marie Conrado.** *Associate Professional Specialist of Art, Art History, and Design.* Bachelor of Arts, University of Notre Dame, 1993; Master of Arts, University of Chicago, 2003 (2007)
- Olivia R. Constable.** *Professor of History and Robert M. Conway Director, Medieval Institute.* Bachelor of Arts, Yale University, 1983; Philosophiae Doctor, Princeton University, 1989 (1995)
- Michael J. Coppedge.** *Professor of Political Science and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Arts, Randolph Macon College Men, 1979; Master of Arts, Yale University, 1982; Philosophiae Doctor, *ibid.*, 1988 (1995)

FACULTY

Steven A. Corcelli. *Assistant Professor of Chemistry and Biochemistry.* Bachelor of Science, Brown University, 1997; Doctor of Science, Yale University, 2002 (2005)

Thomas C. Corke. *Professor of Aerospace & Mech Engineering and Clark Equipment Chair in Engineering.* Bachelor of Science, Illinois Institute of Technology, 1974; Master of Science, *ibid.*, 1976; Philosophiae Doctor, *ibid.*, 1981 (1999)

Alexandra F. Corning. *Assistant Professor of Psychology.* Bachelor of Science, University of Florida, 1988; Master of Science, Loyola University Chicago, 1990; Philosophiae Doctor, Ohio State University, 1994 (2000)

David B. Cortright. *Professional Specialist of Joan B. Kroc Inst. for Int'l. and Director of Policy Studies, Joan B. Kroc Institute for International Peace Studies.* Bachelor of Arts, University of Notre Dame, 1968; Master of Arts, New York University, 1970; Philosophiae Doctor, The Union Institute, 1975 (2008)

Shane A. Corwin. *Associate Professor of Finance and Bernard J. Hank Professor.* Bachelor of Science, Mankato State University, 1990; Master of Business Admin, *ibid.*, 1992; Philosophiae Doctor, Ohio State University, 1996 (2000)

Suzanne M. Coshow. *Associate Professional Specialist of Management.* Bachelor of Arts, San Francisco State University, 1994; Master of Arts, University of Notre Dame, 1997; Philosophiae Doctor, *ibid.*, 2003 (2009)

Thomas F. Cosimano. *Professor of Finance and Concurrent Professor, Department of Econometrics.* Bachelor of Science, State Univ of NY-Buffalo, 1974; Master of Arts, *ibid.*, 1977; Philosophiae Doctor, *ibid.*, 1979 (1987)

Manoel J. Couder. *Research Assistant Professor of Physics.* Bachelor of Science, Universite Catholique De Louva, 1998; Master of Science, *ibid.*, 1999; Philosophiae Doctor, *ibid.*, 2004 (2004)

Rev. John J. Coughlin OFM. *Professor of Law School and Concurrent Professor.* Bachelor of Arts, Niagara University, 1976; Doctor of Canon Law, Pontifical Gregorian Universit, 1994; Juris Doctor, Harvard University, 1987; Licentiate of Canon Law, Pontifical Gregorian Universit, 1990; Master of Arts, Columbia University Teachers C, 1982; Master of Theology, Princeton Theological Seminary, 1984 (2003)

Donald Crafton. *Professor of Film, Television, and Theatre and Fellow, Nanovic Inst for European Studies and Endowed Chair, Notre Dame Professor of Film and Culture and Department Chair, Film, Television, and Theatre.* Bachelor of Arts, University of Michigan, 1969; Master of Arts, University of Iowa, 1970; Master of Arts, Yale University, 1974; Philosophiae Doctor, *ibid.*, 1977 (1997)

Craig J. Cramer. *Professor of Music and Fellow, Nanovic Institute.* Bachelor of Music, Westminster Choir College, 1976; Doctor of Music, Eastman School Music, 1983; Master of Music, *ibid.*, 1977 (1981)

Michael J. Cramer. *Asistant Professional Specialist of Biological Sciences.* Bachelor of Arts, Earlham College, 1998; M.S. Biology, Texas Tech University, 1998; Philosophiae Doctor, University of Cincinnati, 2006 (2007)

J. Michael Crant. *Professor of Management and Chair, Management Department.* Philosophiae Doctor, UNC at Chapel Hill, 1990 (1990)

Gregory P. Crawford. *Professor of Physics and Dean of College of Science and The W.K. Warren II Chair.* Bachelor of Science, Kent State University, 1987; Master of Arts, *ibid.*, 1988; Philosophiae Doctor, *ibid.*, 1991 (2008)

Xavier Creary. *Professor of Chemistry and Biochemistry and The Charles L. Huisking Chair.* Bachelor of Science, Seton Hall University, 1968; Philosophiae Doctor, Ohio State University, 1973 (1974)

Jon R. Crist. *Professor of Army Science.* Bachelor of Science, U. S. Military Academy, 1991; Master of Business Admin, Embry-Riddle Aeronautical Univ, 2003 (2007)

Richard A. Cross. *Professor of Philosophy and The Rev. John A. O'Brien Chair in Philosophy (11).* Bachelor of Theology, University of Oxford, 1986; Master of Arts, *ibid.*, 1986; Philosophiae Doctor, *ibid.*, 1991 (2007)

Charles R. Crowell. *Associate Professor of Psychology.* Bachelor of Arts, University of Notre Dame, 1970; Master of Arts, University of Iowa, 1972; Philosophiae Doctor, *ibid.*, 1973 (1974)

Gyorgy Csaba. *Research Assistant Professor of Center for Nano Science & Tech.* Bachelor of Science, Technical University of Budape, 1998; Master of Science, *ibid.*, 1998; Philosophiae Doctor, *ibid.*, 1999; Philosophiae Doctor, University of Notre Dame, 2003 (2010)

Hal R. Culbertson. *Professional Specialist of Joan B. Kroc Inst. for Int'l.* Bachelor of Arts, Wheaton College, 1986; Juris Doctor, Univ of IL Urbana-Champaign, 1991; Master of Arts, University of Notre Dame, 1996; Master of Philosophy, Univ of IL Urbana-Champaign, 1990 (1997)

E. M. Cummings. *Professor of Psychology and Professor, Notre Dame Chair in Psychology and Fellow, Nanovic Inst for European Studies and Fellow, Joan B. Kroc Inst. for Int'l. Peace.* Bachelor of Arts, Johns Hopkins University, 1972; Master of Arts, UCLA, 1973; Philosophiae Doctor, *ibid.*, 1977 (1996)

Kathleen S. Cummings. *Assistant Professor of American Studies and Concurrent Asst. Professor, History and Concurrent Asst. Professor in Theology.* Bachelor of Arts, University of Scranton, 1993; Master of Arts, University of Notre Dame, 1995; Master of Arts, University of Scranton, 1995; Philosophiae Doctor, University of Notre Dame, 1999 (2001)

Lawrence S. Cunningham. *Professor of Theology and The Rev. John A. O'Brien Chair in Theology.* Master of Literature, Florida State University, 1963; Master of Sacred Theology, Pontifical Gregorian Universit, 1961; Philosophiae Doctor, Florida State University, 1969 (1987)

Paulette G. Curtis. *Associate Professional Specialist of Anthropology.* Bachelor of Arts (Latin), Harvard College, 1992; Philosophiae Doctor, Harvard University, 2003 (2009)

Mary R. D'Angelo. *Associate Professor of Theology.* Bachelor of Arts, Fordham University, 1969; Master of Arts, Yale University, 1972; Philosophiae Doctor, *ibid.*, 1976 (1993)

John P. D'Arcy. *Assistant Professor of Management.* Bachelor of Science, Pennsylvania St University, 1997; Master of Business Admin, La Salle University, 2000; Philosophiae Doctor, Temple University, 2005 (2007)

Crislyn D'Souza-Schorey. *Associate Professor of Biological Sciences and Walther Cancer Institute Chair I.* Bachelor of Science, University of Bombay, 1986; Master of Science, *ibid.*, 1988; Philosophiae Doctor, Univ of Texas-San Antonio, 1992 (1998)

Zhi Da. *Assistant Professor of Finance.* Bachelor of Arts, National University of Singapo, 1999; Doctor of Philosophy, Northwestern University, 2006; M.S. Engineering, National University of Singapo, 2001 (2006)

FACULTY

- Rev. Brian E. Daley SJ.** *Professor of Theology and The Catherine F. Huisiking Chair in Theology.* Bachelor of Arts, Fordham University, 1961; Bachelor of Arts, Merton College Oxford, 1964; Doctor of Philosophy, University of Oxford, 1978; Licentiate in Philosophy, Loyola University Chicago, 1966; Licentiate in Sacred Theology, Philosophisch-Theologische, 1972; Master of Arts, Merton College Oxford, 1964 (1996)
- Christian M. Dallavis.** *Assistant Professional Specialist of Alliance for Catholic Education.* Bachelor of Arts, University of Notre Dame, 1997; Master of Arts, University of Portland, 1999; Philosophiae Doctor, University of Michigan, 2008 (2007)
- Gay N. Dannelly.** *Librarian of Hesburgh Libraries.* Bachelor of Arts, University of Denver, 1965; Master in Library Science, Univ of Wisconsin-Madison, 1970 (2000)
- John Darby.** *Professional Specialist of Joan B. Kroc Inst. for Int'l.* Bachelor of Arts, Queens University of Belfast, 1962; Doctor of Philosophy, New University of Ulster, 1985 (2000)
- Jaleh M. Dashti-Gibson.** *Associate Professional Specialist of Joan B. Kroc Inst. for Int'l. and Director, Academic Programs.* Bachelor of Arts, Texas A&M University, 1990; Master of Arts, University of Notre Dame, 1992; Philosophiae Doctor, *ibid.*, 1998 (1998)
- Christian Davenport.** *Professor of Political Science and Political Science, Professor and Sociology, Professor.* Bachelor of Arts, Clark University, 1987; Master of Arts, SUNY at Binghamton, 1990; Philosophiae Doctor, *ibid.*, 1992 (2008)
- Marian A. David.** *Professor of Philosophy.* Master of Arts, University of Arizona, 1989; Philosophiae Doctor, *ibid.*, 1990 (1989)
- Darren W. Davis.** *Professor of Political Science and Associate Vice President for Research and Concurrent Professor, Psychology.* B.S. Political Science, Lamar University, 1988; Master of Arts, Louisiana State University, 1990; Philosophiae Doctor, Univ Texas Houston, 1994 (2007)
- James H. Davis.** *Associate Professor of Management and O'Shaughnessy Chair in Family Business.* Philosophiae Doctor, University of Iowa, 1991 (1991)
- Keith W. Davis.** *Assistant Professional Specialist of Science Computing and Director, The Digital Visualization Theatre and Concurrent Assistant Professional Specialist in Dept. of Physics.* Bachelor of Science, University of Tulsa, 1999; Master of Science, Clemson University, 2003; Philosophiae Doctor, *ibid.*, 2007 (2008)
- Maureen G. Dawson.** *Assistant Professional Specialist of Dean's Office - First Yr of St and Director of Special Projects and First Year Intellectual Initiatives.* B.S. Biology, Rutgers Univ Cook College, 1984; Doctor of Arts, New York University, 1996; Master of Literature, Middlebury College, 1987 (2005)
- Jeanne D. Day.** *Professor of Psychology and Fellow, Inst for Educational Initiatives.* Bachelor of Arts, Univ California San Diego, 1974; Master of Arts, Univ of IL Urbana-Champaign, 1977; Philosophiae Doctor, *ibid.*, 1980; Undeclared, *ibid.*, 1977 (1980)
- Martine M. De Ridder.** *Associate Professional Specialist of College Seminar - A&L and Director, Hesburgh Program in Public Service.* Philosophiae Doctor, University Tennessee Knoxville, 1980 (1986)
- Kenneth J. DeBoer.** *Associate Professional Specialist of Dean's Office - First Yr of St and Assistant Dean, Dean-First Year Of Studies.* Bachelor of Arts, Hope College, 1974; Master of Arts, University of Notre Dame, 1976 (1978)
- Alan R. DeFrees.** *Professional Specialist of Architecture.* Bachelor of Architecture, University of Notre Dame, 1974 (1996)
- Michael R. DePaul.** *Professor of Philosophy.* Bachelor of Arts, University of Notre Dame, 1976; Master of Arts, Ohio State University, 1979; Philosophiae Doctor, Brown University, 1983 (1982)
- John Deak.** *Assistant Professor of History and Fellow, Nanovic Institute for European Studies.* Bachelor of Arts, UNC at Chapel Hill, 1998; Master of Arts, University of Chicago, 2000; Philosophiae Doctor, *ibid.*, 2009 (2009)
- Noreen Deane-Moran.** *Associate Professional Specialist of English and Associate Professional Specialist, Graduate School.* Bachelor of Arts, College of New Rochelle, 1963; Master of Arts, University of Notre Dame, 1964; Master of Arts, *ibid.*, 1968; Philosophiae Doctor, *ibid.*, 1982 (1982)
- Mark Dehmlow.** *Associate Librarian of Hesburgh Libraries.* Bachelor of Arts, University of Maine at Orono, 2000; Bachelor of Mathematics, *ibid.*, 2000; Master of Library & Info Sci, Univ of Illinois-Chicago, 2004 (2001)
- Cornelius F. Delaney.** *Professor of Philosophy and Director, Arts and Letters Honors Program.* Bachelor of Arts, St. John's Seminary, 1961; Master of Arts, Boston College, 1962; Philosophiae Doctor, Saint Louis University, 1967 (1967)
- Antonio Delgado.** *Assistant Professor of Physics.* Bachelor of Science, Universidad Autonoma, 1997; Philosophiae Doctor, *ibid.*, 2001 (2007)
- Andrew B. Deliyannides.** *Associate Professional Specialist of Institute for Latino Studies.* Bachelor of Arts, Calvin College, 1989; Master of Arts, University of Notre Dame, 1993; Philosophiae Doctor, *ibid.*, 2000; Philosophiae Doctor, *ibid.*, 2000 (2007)
- Jo Ann Della Neva.** *Professor of Romance Languages and Literature.* Bachelor of Arts, Bryn Mawr College, 1976; Master of Arts, Princeton University, 1980; Master of Arts, Univ of Pennsylvania, 1978; Philosophiae Doctor, Princeton University, 1982 (1982)
- Denise M. DellaRossa.** *Associate Professional Specialist of German/Russian Lang & Lit and Fellow, Nanovic Institute and Associate Teaching Professor.* Bachelor of Arts (Latin), Montana State University, 1989; Master of Arts (Latin), Mississippi St Univ, 1991; Philosophiae Doctor, Univ of Wisconsin-Madison, 2002 (2006)
- Michael Desch.** *Professor of Political Science and Fellow for Kroc Institute for International Peace Studies and Chair, Political Science.* Bachelor of Arts, Marquette University, 1982; Master of Arts, University of Chicago, 1984; Philosophiae Doctor, *ibid.*, 1988 (2008)
- Michael Detlefsen.** *Professor of Philosophy and McMabon-Hank Chair in Philosophy II.* Bachelor of Arts (Latin), Wheaton College, 1971; Philosophiae Doctor, Johns Hopkins University, 1976 (1983)
- Sarvanan Devaraj.** *Professor of Management and Bernard J. Hank Professor.* Bachelor of Science, Bangalore University, 1989; Master of Science, University of Alabama, 1991; Philosophiae Doctor, University of Minnesota, 1997 (1996)

FACULTY

Jean A. Dibble. *Associate Professor of Art, Art History, and Design.* Bachelor of Science, Univ of Wisconsin-Madison, 1979; Master of Arts, Univ of Wisconsin-Milwaukee, 1988; Master of Arts, University of New Mexico Main, 1981 (1989)

Joshua Diehl. *Assistant Professor of Psychology.* Bachelor of Arts (Latin), Princeton University, 2000; Master of Arts, University of Rochester, 2004; Philosophiae Doctor, *ibid.*, 2007 (2009)

Jeffrey A. Diller. *Professor of Mathematics.* Bachelor of Science, University of Dayton, 1988; Philosophiae Doctor, University of Michigan, 1993 (1998)

Malgorzata Dobrowolska-Furdyna. *Professor of Physics.* Master of Science, Warsaw University, 1972; Philosophiae Doctor, Polish Academy of Science, 1980 (1987)

Elizabeth J. Doering. *Professional Specialist of Program of Liberal Studies and Concurrent Associate Professor, College Seminar.* Bachelor of Arts, Douglas College, 1954; Master of Arts, University of Notre Dame, 1969; Masters in Education, Goucher College, 1955; Philosophiae Doctor, Northwestern University, 1992 (2008)

Deborah L. Donahue. *Associate Professional Specialist of Center For Transgene Research.* Associate - Unspecified, Columbia Greene Community Coll, 1994; Bachelor of Science, Cornell University, 1996 (2001)

William L. Donaruma. *Associate Professional Specialist of Film, Television, and Theatre and Associate Professor of the Practice.* Bachelor of Arts, University of Notre Dame, 1989 (1998)

Richard E. Donnelly. *Professional Specialist of Film, Television, and Theatre.* Bachelor of Fine Arts, University of Wisconsin Center, 1974; Master of Fine Arts, School of the Art Institute of, 1975 (1991)

Margaret A. Doody. *Professor of English and The John and Barbara Glynn Family Chair in Literature and Director, PhD in Literature Program and Fellow in the Nanovic Institute for European Studies.* Bachelor of Arts, Dalhousie University Halifax, 1960; Bachelor of Arts, Lady Margaret Hall Oxford, 1962; Doctor of Philosophy, University of Oxford, 1968; Master of Arts, Lady Margaret Hall Oxford, 1967 (2000)

Dennis Doordan. *Professor of Architecture and Fellow, Nanovic Institute.* Philosophiae Doctor, Columbia University, 1983 (1990)

Matthew J. Doppke. *Assistant Professional Specialist of College Seminar - A&L.* Bachelor of Arts, Oakland University, 1988; Philosophiae Doctor, Washington University, 1999 (1997)

Kirk B. Doran. *Assistant Professor of Economics and Econometrics and Fellow, The Helen Kellogg Institute for International Studies.* Bachelor of Arts, Harvard University, 2002; Master of Science, *ibid.*, 2004; Philosophiae Doctor, Princeton University, 2008 (2007)

Erika Doss. *Professor of American Studies and Department Chair, American Studies and Concurrent Professor, History.* Bachelor of Arts, Ripon College, 1978; Master of Arts, University of Minnesota, 1981; Philosophiae Doctor, *ibid.*, 1983 (2007)

Julia V. Douthwaite. *Professor of Romance Languages and Literatu and Fellow, Nanovic Inst for European Studies.* Philosophiae Doctor, Princeton University, 1990 (1991)

Rev. Robert A. Dowd CSC. *Assistant Professor of Political Science.* Bachelor of Arts, University of Notre Dame, 1987; Philosophiae Doctor, American College for the Appli, 2003 (2001)

Paul A. Down. *Associate Professor of Art, Art History, and Design.* Bachelor of Arts, Andrews University, 1969; Master of Fine Arts, University of Notre Dame, 1982 (1983)

Thomas L. Doyle. *Professional Specialist of Alliance for Catholic Educatio and Fellow, Inst for Educational Initiatives and Director, Master of Education Program.* Philosophiae Doctor, University of Notre Dame, 1973 (2001)

Robert A. Drevs. *Associate Professional Specialist of Marketing.* Bachelor of Business Admin., University of Notre Dame, 1966; Master of Business Admin, Northwestern University, 1967 (1993)

Kevin C. Dreyer. *Associate Professor of Film, Television, and Theatre.* Bachelor of Fine Arts, Carnegie Mellon University, 1975 (1989)

Rev. Michael S. Driscoll. *Associate Professor of Theology.* Doctor of Sacred Theology, Catholic Institute of Paris, 1986; Licentiate in Sacred Theology, Pontificum Athenaeum Anselmian, 1980; Master of Sacred Theology, Pontifica Universita Gregorian, 1977; Philosophiae Doctor, Universite de Paris-Sorbonne, 1986 (1994)

Jennifer DuBois. *Assistant Professor of Chemistry and Biochemistry.* B.S. Chemistry, Cornell University, 1995; Bachelor Degree - Unspecified, Cornell College, 1995; Doctorate Degree, Stanford University, 2000 (2004)

Elizabeth A. Dube. *Associate Librarian of University Libraries.* Bachelor of Arts, Univ of Connecticut, 1993 (1998)

Jean-Christophe Ducom. *Associate Professional Specialist of Science Computing.* Doctor of Science, University of Aix-Marseilles I, 1997; Master of Science, University of Bordeaux I, 1991 (2001)

Giles E. Duffield. *Assistant Professor of Biological Sciences.* Bachelor of Science, University of Nottingham, 1992; Philosophiae Doctor, University of Cambridge, 1998 (2006)

John M. Duffy. *Associate Professor of English and Fellow, Inst for Educational Initiatives and The O'Malley Director of the University Writing Program and O'Neill Family Chair and Director, College Seminar.* Bachelor of Arts, Boston College, 1977; Master of Arts, Columbia University Teachers C, 1982; Master of Arts, University College Dublin, 1979; Philosophiae Doctor, Univ of Wisconsin-Madison, 2000 (1998)

Timothy L. Dukeman. *Assistant Professor of Army Science.* Bachelor of Science, U. S. Military Academy, 1990; Master of Science, Sam Houston State University, 1997 (2006)

John G. Duman. *Professor of Biological Sciences and The Martin J. Gillen Chair in Biological Sciences.* Bachelor of Science, Pennsylvania St University, 1968; Philosophiae Doctor, Univ California San Diego, 1974 (1974)

Stephen D. Dumont. *Professor of Philosophy and Department Chair, Philosophy.* Bachelor of Arts, Wabash College, 1974; Master of Arts, University of Toronto, 1976; Philosophiae Doctor, *ibid.*, 1983 (2001)

Ian B. Duncanson. *Staff Professional Specialist of Radiation Laboratory.* B.S. Business Administration, University of Nebraska at Omah, 1979; Bachelor of Arts (Latin), Dartmouth College, 1972 (1985)

Patrick F. Dunn. *Professor of Aerospace & Mech Engineering.* Bachelor of Science, Purdue University, 1970; Master of Science, *ibid.*, 1971; Philosophiae Doctor, *ibid.*, 1974 (1985)

Robert M. Dunn. *Professional Specialist of Center for Nano Science & Tech and Managing Director, NDnano.* Bachelor of Science, University of Notre Dame, 1965; Master of Science, Pennsylvania State University, 1967; Philosophiae Doctor, Univ of IL Urbana-Champaign, 1971 (2008)

FACULTY

Rev. John S. Dunne CSC. *Professor of Theology and The John A. O'Brien Chair in Theology.*

Bachelor of Arts, University of Notre Dame, 1951; Doctor of Sacred Theology, Pontifical Gregorian University, 1958 (1957)

Fernand N. Dutile. *Professor of Law School.*

Bachelor of Arts, Assumption College, 1962; Juris Doctor, University of Notre Dame, 1965 (1971)

Amitava K. Dutt. *Professor of Economics and Policy Studies and Fellow, Inst. for International Peace Studies.* Philosophiae Doctor, Massachusetts Institute of Tec, 1983 (1988)

Krista E. Duttenhaver. *Instructor of Program of Liberal Studies.* Bachelor of Arts, Princeton University, 1998; Master of Theological Studies, Claremont School of Theology, 2002 (2008)

Lawrence H. Dwyer. *Associate Professional Specialist of Music and Assistant Director, Music and Associate Teaching Professor.* Bachelor of Arts, University of Notre Dame, 1966; Master of Science, Univ of IL Urbana-Champaign, 1967 (2001)

William G. Dwyer. *Professor of Mathematics and The William J. Hank Family Chair in Mathematics.* Bachelor of Arts, Boston College, 1969; Philosophiae Doctor, Massachusetts Institute of Tec, 1973 (1980)

Kenneth W. Dye. *Professor of Music and Concurrent Professor, Computer Applications and Director, Band.* Doctorate of Education, University of Houston, 1983 (1998)

Matthew J. Dyer. *Associate Professor of Mathematics.* Philosophiae Doctor, University of Sydney, 1988 (1989)

Cornelius R. Eady. *Associate Professor of English.* Bachelor of Arts, SUNY Empire College, 1986; Master of Fine Arts, Warren Wilson College, 1986 (2005)

Robert F. Easley. *Associate Professor of Management.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1976; Master of Business Admin, Pennsylvania State University, 1989; Philosophiae Doctor, Indiana Univ-Bloomington, 1996 (1994)

Peter Easton. *Professor of Accountancy and Andersen Alumni Professor of Accountancy.* B.A. Economics, University of Adelaide, 1973; Philosophiae Doctor, Univ of California Berkeley, 1984 (2003)

Kathleen M. Eberhard. *Associate Professor of Psychology.* Bachelor of Arts, University of Rochester, 1987; Master of Arts, Michigan State University, 1991; Philosophiae Doctor, *ibid.*, 1993 (1996)

Richard M. Economakis. *Associate Professor of Architecture.* Bachelor of Arch in Arch, Cornell University, 1983; Master of Architecture, *ibid.*, 1995 (1996)

Edmund P. Edmonds. *Professor of Law School and Director, Law Library.* Bachelor of Arts, University of Notre Dame, 1973; Juris Doctor, University Toledo, 1978 (2006)

Scott P. Egan. *Research Specialist of Adv Diag & Therapeutics.* Bachelor of Science, Univ of Texas-Austin, 1999; Master of Science, Texas State Univ - San Marcos, 2004 (2010)

Rev. Virgilio P. Elizondo. *Professor of Theology and The Notre Dame Chair in Pastoral and Hispanic Theology and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Science, St. Mary's University, 1957; Master of Arts, Ateneo de Manila University, 1969; Philosophiae Doctor, Institut Catholique de Paris, 1978 (2000)

Maud Ellmann. *Professor of English and The Donald and Marilyn Keough Chair in Irish Studies.* Bachelor of Arts, King's College Cambridge, 1975; Philosophiae Doctor, St Anne's College Oxford, 1978 (2004)

Kent Emery Jr. *Professor of Program of Liberal Studies and Fellow, Medieval Institute.* Bachelor of Arts, University of Virginia, 1966; Master of Arts, University of Toronto, 1968; Philosophiae Doctor, *ibid.*, 1976 (1985)

Scott Emrich. *Assistant Professor of Computer Science and Engineeri.* Bachelor of Science, Loyola College Maryland, 2002; Philosophiae Doctor, Iowa State University, 2007 (2007)

Georges Enderle. *Professor of Marketing and Fellow, Nanovic Inst for European Studies and Fellow, Kellogg Inst for Intrnl Studies and John T. Ryan Jr. Professor of International Business Ethics.* Philosophiae Doctor, University of Fribourg, 1982 (1992)

Nahid A. Erfan. *Associate Professional Specialist of Dean's Office - First Yr of St.* Bachelor of Science, Purdue University, 1979; M.S. Engineering, *ibid.*, 1985; Master of Science, *ibid.*, 1981 (1991)

Marie-Christine M. Escoda-Risto. *Associate Professional Specialist of Romance Languages and Literature and Associate Teaching Professor.* Bachelor of Arts, Central Michigan University, 1976; Master of Arts, University of Notre Dame, 1992; Master of Arts, Western Michigan University, (1991)

Morten R. Eskildsen. *Associate Professor of Physics.* Bachelor of Science, University of Copenhagen, 1993; Master of Science, *ibid.*, 1994; Philosophiae Doctor, *ibid.*, 1998 (2003)

Linda N. Espahbodi. *Associate Professional Specialist of Master Of Accountancy.* Bachelor of Arts, Florida International University, 1985 (1999)

Guillermina L. Estiu. *Research Assistant Professor of Chemistry and Biochemistry.* Bachelor of Science, National University of La Plat, 1983; Philosophiae Doctor, *ibid.*, 1988 (2008)

William N. Evans. *Professor of Economics and Econometrics and Keough-Hesburgh Professor of Economics.* Bachelor of Arts, Wake Forest University, 1983; Master of Arts, Duke University, 1985; Philosophiae Doctor, *ibid.*, 1987 (2007)

Samuel R. Evens. *Associate Professor of Mathematics.* Bachelor of Arts, Haverford College, 1984; Philosophiae Doctor, Massachusetts Institute of Tec, 1998 (1999)

David W. Fagerberg. *Associate Professor of Theology and Director, Center for Pastoral Liturgy.* Bachelor of Arts, Augsburg College, 1973; Master of Arts, St. John's University, 1982; Master of Arts, Yale University, 1990; Master of Divinity, Luther Theological Seminary, 1977; Master of Sacred Theology, Yale University-Div School, 1983; Philosophiae Doctor, Yale University, 1991 (2003)

Stephen M. Fallon. *Professor of Program of Liberal Studies and Department Chair, Program of Liberal Studies and Reverend John J. Cavanaugh, C.S.C. Professor of the Humanities (II) and Professor, English.* Bachelor of Arts, Princeton University, 1976; Master of Arts, McGill University, 1978; Philosophiae Doctor, University of Virginia, 1985 (1985)

Margot Fassler. *Professor of Theology and Keough-Hesburgh Professor of Music History and Liturgy.* Bachelor of Arts, SUNY, Master of Arts, *ibid.*, 1978; Philosophiae Doctor, Cornell University, 1980 (2010)

FACULTY

Larissa A. Fast. *Assistant Professor of Sociology.* Bachelor of Arts, Bethel College, 1992; Master of Arts, University of Notre Dame, 1995; Philosophiae Doctor, George Mason University, 2002 (2007)

Lauren N. Faulkner. *Assistant Professor of History and Fellow, Nanovic Institute for European Studies.* Bachelor of Arts, Simon Fraser University, 2001; Master of Arts, *ibid.*, 2003; Philosophiae Doctor, Brown University, 2009 (2009)

Patrick J. Fay. *Professor of Electrical Engineering.* Bach of Sci in Electrical Engr, University of Notre Dame, 1991; Master of Science, Univ of IL Urbana-Champaign, 1993; Philosophiae Doctor, *ibid.*, 1996 (1997)

Leonid Faybusovich. *Professor of Mathematics.* Master of Science, Leningrad State University, 1971; Philosophiae Doctor, Harvard University, 1991 (1991)

Jeffrey L. Feder. *Professor of Biological Sciences.* Bachelor of Science, Pomona College, 1980; Philosophiae Doctor, Michigan State University, 1989 (1993)

Jeremy B. Fein. *Professor of Civil Engr/Geological Sciences and Director, CEST.* Bachelor of Arts, University of Chicago, 1983; Master of Science, Northwestern University, 1986; Philosophiae Doctor, *ibid.*, 1989 (1996)

Michael T. Ferdig. *Associate Professor of Biological Sciences.* Bachelor of Science, Univ of Nebraska-Lincoln, 1987; Master of Science, *ibid.*, 1990; Philosophiae Doctor, Univ of Wisconsin-Madison, 1997 (2001)

Felipe Fernandez-Armesto. *Professor of History and William P. Reynolds Chair for Mission in Arts and Letters and Fellow, Nanovic Institute for European Studies.* Bachelor of Arts, St John's College Oxford, 1972; Master of Arts, *ibid.*, 1976; Philosophiae Doctor, *ibid.*, 1977 (2009)

Luis C. Fernandez-Torres. *Research Assistant Professor of Chemistry and Biochemistry.* Bachelor of Science, Pennsylvania St University, 1996; Master of Science, University of Puerto Rico Maya, 1998; Philosophiae Doctor, University of Houston, 2003 (2009)

Harindra J. Fernando. *Professor of Civil Engr/ Geological Sciences and Concurrent Professor, Aerospace and Mechanical Engineering and Wayne and Diana Murdy Endowed Professor in Engineering and Geo Sciences.* Bachelor of Science, The Open Univ. of Sri Lanka, 1979; Master of Arts, Johns Hopkins University, 1982; Philosophiae Doctor, *ibid.*, 1983 (2010)

Guillermo J. Ferraudi. *Professional Specialist of Chemistry and Biochemistry.* Master of Science, University of Buenos Aires, 1967; Philosophiae Doctor, University of Chile, 1972 (1976)

Isabel A. Ferreira Gould. *Assistant Professor of Romance Languages and Literature and Fellow, Nanovic Inst for European Studies and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Arts, Rhode Island College, 1994; Master of Arts, Brown University, 1997; Philosophiae Doctor, *ibid.*, 2003 (2001)

Sabrina Ferri. *Assistant Professor of Romance Languages and Literature and Fellow, Nanovic Institute for European Studies.* Bachelor of Arts, University of Rome, 2000; Philosophiae Doctor, Stanford University, 2007 (2009)

Barbara J. Fick. *Associate Professor of Law School and Fellow, Joan B. Kroc Inst. for Int'l. Peace.* Bachelor of Arts, Creighton University, 1972; Juris Doctor, Univ of Pennsylvania, 1976 (1983)

Kenneth E. Filchak. *Associate Professional Specialist of Biological Sciences.* Bachelor of Science, Michigan State University, 1994; Philosophiae Doctor, University of Notre Dame, 2001 (2001)

John M. Finnis. *Professor of Law School and Concurrent Professor, Philosophy and The Biolchini Family Chair in Law.* LLB - Law, University of Adelaide, 1961; Philosophiae Doctor, University College Oxford, 1965 (1995)

Jed F. Fisher. *Professional Specialist of Chemistry and Biochemistry.* B.S. Chemistry, SUNY at Stony Brook, 1972; Doctor of Science, Massachusetts Institute of Tec, 1976 (2004)

Janet Fisher-McPeak. *Associate Professional Specialist of Romance Languages and Literature.* Bachelor of Arts, Middlebury College, 1987; Master of Arts, *ibid.*, 1976; Master of Arts, *ibid.*, 1979; Philosophiae Doctor, *ibid.*, 1997 (1989)

Robert M. Fishman. *Professor of Sociology and Fellow, Kellogg Inst for Intrnl Studies and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Yale University, 1977; Master of Arts, *ibid.*, 1979; Master of Philosophy, *ibid.*, 1980; Philosophiae Doctor, *ibid.*, 1985 (1992)

Joseph D. Flenner. *Research Assistant Professor of Mathematics.* Bachelor of Science, University of Michigan, 2000; Philosophiae Doctor, Univ of California Berkeley, 2008 (2009)

Thomas P. Flint. *Professor of Philosophy.* Bachelor of Arts, Saint Ambrose College, 1975; Philosophiae Doctor, University of Notre Dame, 1980 (1982)

Robert P. Flood. *Professor of Economics and Econometrics.* Bachelor of Arts, Wake Forest University, 1970; Master of Arts, University of Rochester, 1975; Philosophiae Doctor, *ibid.*, 1977 (2009)

Patrick J. Flynn. *Professor of Computer Science and Engineering and Concurrent Professor, Electrical Engineering.* Bach of Sci in Electrical Engr, Michigan State University, 1985; Master of Science, *ibid.*, 1986; Philosophiae Doctor, *ibid.*, 1990 (2001)

Margaret M. Forster. *Associate Professional Specialist of Finance.* B.S. Industrial Engineering, University of Sao Paulo, 1982; Doctor of Science, Cornell University, 1990; Master of Business Admin, *ibid.*, 1985; Master of Science, *ibid.*, 1987 (2005)

Rev. James K. Foster CSC. *Associate Professional Specialist of Preprofessional Studies and Baldinger Endowment.* Bachelor of Science, University of Notre Dame, 1977; Doctorate of Medicine, Univ of IL Urbana-Champaign, 1981; Doctorate of Medicine, University of Illinois Medical, 1981; Master of Divinity, University of Notre Dame, 1994 (1997)

Christopher Fox. *Professor of English and Director, Keough Inst. for Irish Studies and Fellow, Nanovic Institute and Department Chair, Irish Language and Literature.* Bachelor of Arts, Cleveland State University, 1971; Master of Arts, State Univ of NY--Binghamton, 1974; Philosophiae Doctor, *ibid.*, 1978 (1986)

Jennifer R. Fox. *Assistant Professional Specialist of Dean's Office - First Yr of St.* Bachelor of Arts, Marquette University, ; Master of Arts, Boston College, 2005 (2008)

Judith L. Fox. *Associate Professional Specialist of Legal Aid Clinic.* Bachelor of Science, Wilkes College, 1985; Juris Doctor, University of Notre Dame, 1993 (1997)

James M. Frabutt. *Associate Professional Specialist of Alliance for Catholic Educatio.* Bachelor of Arts, University of Notre Dame, 1995; Master of Science, Univ of NC at Greensboro, 1998; Philosophiae Doctor, *ibid.*, 2000 (2007)

Mary E. Frandsen. *Associate Professor of Music.* Bachelor of Music, SUNY College at Potsdam, 1980; Master of Arts, University of Rochester, 1985; Philosophiae Doctor, *ibid.*, 1997 (1997)

Curtis D. Franks. *Assistant Professor of Philosophy.* Bachelor of Mathematics, Rice University, 2000; Doctor of Philosophy, Univ California Irvine, 2006 (2006)

FACULTY

Malcolm J. Fraser Jr. *Professor of Biological Sciences.* Bachelor of Science, Wheeling College, 1975; Master of Science, Ohio State University, 1979; Philosophiae Doctor, *ibid.*, 1981 (1983)

Stefan G. Frauendorf. *Professor of Physics.* Master of Science, Technical University of Dresde, 1968; Philosophiae Doctor, *ibid.*, 1971 (1998)

Thomas J. Frecka. *Professor of Accountancy and The Vincent and Rose Lizzadro Professor of Accountancy.* Master of Science, Ohio University, 1966; Philosophiae Doctor, Syracuse University, 1978 (1990)

Alfred J. Freddoso. *Professor of Philosophy and J.A. Oesterle Chair.* Bachelor of Arts, St John Vianney Minor Seminary, 1968; Philosophiae Doctor, University of Notre Dame, 1976 (1979)

Stephen A. Fredman. *Professor of English.* Bachelor of Fine Arts, California Institute of Arts, 1971; Master of Arts, California State College Sonom, 1976; Philosophiae Doctor, Stanford University, 1980 (1980)

Joseph C. Freeland. *Associate Professional Specialist of Computer Science and Engineeri.* Bachelor of Science, Purdue University, 1985 (1995)

Dolores W. Frese. *Professor of English.* Bachelor of Arts, College of Notre Dame of Maryl, 1958; Master of Arts, University of Iowa, 1962; Master of Theological Studies, University of Notre Dame, 2005; Philosophiae Doctor, University of Iowa, 1972; Philosophiae Doctor, *ibid.*, 1972 (1973)

Laura S. Fuderer. *Librarian of University Libraries and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, College of Wooster, 1969; Master in Library Science, Kent State University, 1971; Master of Arts, Fairleigh Dickinson University, 1979; Undeclared, College of Wooster, 1969; Undeclared, Fairleigh Dickinson University, 1979; Undeclared, Kent State University, 1971 (1982)

James L. Fuehrmeyer Jr. *Associate Professional Specialist of Accountancy.* Bachelor of Science, U. S. Military Academy, 1973; Master of Business Admin, Chicago State University, 1980 (2007)

Agustin Fuentes. *Professor of Anthropology and Nancy O'Neil Chair in Anthropology and Fellow, Institute for Latino Studies and Fellow, Center for Social Concerns and Fellow, Kroc Institute for International Peace Studies and Director, Institute for Scholarship in the Liberal Arts.* Bachelor of Arts, Univ of California Berkeley, 1989; Master of Arts, *ibid.*, 1991; Philosophiae Doctor, *ibid.*, 1994 (2002)

Thomas E. Fuja. *Professor of Electrical Engineering and Department Chair, Electrical Engineering.* Bach of Sci in Electrical Engr, University of Michigan, 1981; Bachelor of Science, *ibid.*, 1981; Philosophiae Doctor, Cornell University, 1987 (1998)

Susan Fullerton Shirey. *Research Assistant Professor of Electrical Engineering.* Bach of Sci in Chemical Engr, Pennsylvania St University, 2002; Philosophiae Doctor, *ibid.*, 2009 (2009)

Jacek K. Furdyna. *Professor of Physics and The Aurora and Thomas Marquez Chair in Information Theory and Computer Technology and Fellow, Nanovic Inst for European Studies.* Bachelor of Science, Loyola University Chicago, 1955; Philosophiae Doctor, Northwestern University, 1960 (1986)

Stephanie L. Gaal. *Assistant Professional Specialist of Physical Education.* Bachelor of Science, Univ of Wisconsin-Whitewater, 2007 (2009)

Rev. Patrick D. Gaffney CSC. *Associate Professor of Anthropology and The Joseph E. Morahan III Chair and Fellow, Kroc Institute for International Peace Studies and Fellow, Kellogg Inst for Intrnl Studies and Dorothy G. Griffin Associate Professor of Early Modern European History.* Bachelor of Arts, University of Notre Dame, 1969; Master of Arts, University of Chicago, 1977; Master of Arts, University of Notre Dame, 1970; Master of Arts, *ibid.*, 1973; Philosophiae Doctor, University of Chicago, 1982 (1980)

Samuel S. Gaglio. *Professional Specialist of Management and Concurrent Instructor, Management and Assistant Dean, Mendoza College of Bus.* Bachelor of Arts, Troy State University, 1979; Master of Science, Univ of Southern California, 1982 (1989)

David Galvin. *Assistant Professor of Mathematics.* Bachelor of Mathematics, University of Cambridge, 1995; Philosophiae Doctor, Rutgers University, 2002 (2007)

Pengjie Gao. *Assistant Professor of Finance.* Bachelor of Engineering, Qingdao University, 1998; Master of Science, University Tennessee Knoxville, 2002; Philosophiae Doctor, Northwestern University, 2007 (2007)

Kenneth N. Garcia. *Professional Specialist of Dean's Office - Arts & Letters and Associate Director, Arts & Letters.* Bachelor of Arts, Old College School Humanities, 1983; Master of Arts, Catholic University of America, 1997 (1996)

Umesh Garg. *Professor of Physics.* Bachelor of Science, Birla Institute of Technology, 1972; Master of Science, *ibid.*, 1974; Master of Science, SUNY at Stony Brook, 1975; Philosophiae Doctor, *ibid.*, 1978 (1982)

Peter M. Garnavich. *Professor of Physics.* Bachelor of Science, University of Maryland, 1980; Master of Science, Massachusetts Institute of Tec, 1983; Philosophiae Doctor, Univ of Washington, 1991 (2000)

Nicole S. Garnett. *Professor of Law School and Fellow, Inst for Educational Initiatives.* Bachelor of Arts (Latin), Stanford University, 1992; Juris Doctor, Yale University, 1995 (1999)

Richard Garnett. *Professor of Law School and Fellow, Inst for Educational Initiatives and Associate Dean, Law School.* Bachelor of Arts, Duke University, 1990; Juris Doctor, Yale University, 1995 (1999)

Carlos Gartner. *Research Assistant Professor of Biological Sciences.* Bachelor of Science, University of Houston, 1989; Philosophiae Doctor, Univ of Washington, 2001 (2009)

John F. Gaski. *Associate Professor of Marketing.* Bachelor of Business Admin., University of Notre Dame, 1971; Master of Business Admin, Univ of Wisconsin-Madison, 1979; Master of Business Admin, University of Notre Dame, 1973; Philosophiae Doctor, Univ of Wisconsin-Madison, 1982 (1980)

David W. Gasperetti. *Associate Professor of German/Russian Lang & Lit.* Bachelor of Arts, Lawrence University, 1975; Master of Arts, UCLA, 1978; Philosophiae Doctor, *ibid.*, 1985 (1989)

Liangyan Ge. *Associate Professor of East Asian Langs and Literaturer.* Bachelor of Arts, Hefei Polytechnic University, 1982; Master of Arts, Nanjing University, 1984; Philosophiae Doctor, Indiana Univ-Bloomington, 1995 (1995)

Michael Gekhtman. *Professor of Mathematics.* Bachelor of Science, Kiev State University, 1985; Master of Science, *ibid.*, 1985; Philosophiae Doctor, National Academy of Science, 1990 (1998)

FACULTY

Michele Gelfman. *Associate Professional Specialist of Physical Education.* B Science Education, Northeast Missouri State Univ, 1976; Master of Science, Indiana Univ-Bloomington, 1977 (1985)

Gretchen A. Gerrish. *Assistant Professional Specialist of Biological Sciences.* Bachelor Degree - Unspecified, Lawrence University, 1998; Master of Science, Univ of IL Urbana-Champaign, 2001 (2007)

Stephen E. Gersh. *Professor of Philosophy and Concurrent Professor, Philosophy.* Bachelor of Arts, University of Cambridge, 1969; Master of Arts, *ibid.*, 1973 (1977)

J. Daniel Gezelter. *Associate Professor of Chemistry and Biochemistry.* Bachelor of Science, Duke University, 1989; Master Degree - Unspecified, University of Cambridge, 1990; Philosophiae Doctor, Univ of California Berkeley, 1995 (1999)

Nasir Ghiaseddin. *Associate Professor of Management.* Bachelor of Science, Arya-Mehr Univ of Technology, 1970; Master of Science, Purdue University, 1975; Philosophiae Doctor, *ibid.*, 1982 (1982)

Roya R. Ghiaseddin. *Associate Professional Specialist of Management and Concurrent Associate Professor, Psychology.* Bachelor of Science, Arya-Mehr Univ of Technology, 1977; Master of Arts, University of Notre Dame, 1991; Master of Science in Admin., *ibid.*, 1989; Philosophiae Doctor, *ibid.*, 1995 (1995)

Benedict F. Giamo. *Associate Professor of American Studies.* Bachelor of Arts, Baldwin Wallace College, 1976; Master of Arts, New School for Social Research, 1978; Philosophiae Doctor, Emory University, 1987 (1990)

Bradley S. Gibson. *Associate Professor of Psychology.* Bachelor of Science, Colorado State University, 1982; Philosophiae Doctor, University of Arizona, 1992 (1994)

Timothy J. Gilbride. *Associate Professor of Marketing.* Bachelor of Business Admin., University of Dayton, 1988; Master of Business Admin, Ohio State University, 1993; Philosophiae Doctor, *ibid.*, 2004 (2004)

Alyssa W. Gillespie. *Associate Professor of German/Russian Lang & Lit and Fellow, Nanovic Inst for European Studies and Notre Dame Chair in Russian Language and Literature.* Bachelor of Arts, Brandeis University, 1990; Master of Arts, Univ of Wisconsin-Madison, 1992; Philosophiae Doctor, *ibid.*, 1998 (1999)

Robert M. Gimello. *Research Professor of Theology.* Bachelor of Arts, Seton Hall University, 1964; Master of Arts, *ibid.*, 1965; Philosophiae Doctor, Columbia University, 1976 (2006)

Donna M. Glowacki. *Assistant Professor of Anthropology.* Bachelor of Arts, Miami University, 1992; Master of Arts, Univ of Missouri-Columbia, 1995; Philosophiae Doctor, Arizona State University, 2006 (2007)

David B. Go. *Assistant Professor of Aerospace & Mech Engineering.* Bachelor of Science, University of Notre Dame, 2001; Master of Science, University of Cincinnati, 2004; Philosophiae Doctor, Purdue University, 2008 (2008)

Jill Godmilow. *Professor of Film, Television, and Theatre.* Bachelor of Arts, Univ of Wisconsin-Madison, 1965 (1992)

Bernd Goehring. *Assistant Professor of Program of Liberal Studies and Fellow, Nanovic Institute.* Master of Arts, Cornell University, 2003; Master of Philosophy, University of Bonn, 1999; Philosophiae Doctor, Cornell University, 2006 (2006)

Joachim Goerres. *Research Professor of Physics.* Bachelor of Science, University of Munster, 1974; Philosophiae Doctor, *ibid.*, 1983 (1987)

Dawn M. Gondoli. *Associate Professor of Psychology.* Bachelor of Arts, State Univ of NY-Buffalo, 1986; Master of Science, University of Arizona, 1991; Philosophiae Doctor, *ibid.*, 1994 (1994)

DeeAnne M. Goodenough-Lashua. *Associate Professional Specialist Chemistry and Biochemistry.* Bachelor of Science, Valparaiso University, 1994; Philosophiae Doctor, University of Michigan, 2001 (2001)

Holly V. Goodson. *Associate Professor of Chemistry and Biochemistry.* Bachelor of Arts (Latin), Princeton University, 1988; Philosophiae Doctor, Stanford University, 1995 (2000)

John W. Goodwine Jr.. *Associate Professor of Aerospace & Mech Engineering.* Bach of Sci in Mech Engr, University of Notre Dame, 1988; Juris Doctor, Harvard University, 1991; Master of Science, California Institute of Techno, 1993; Philosophiae Doctor, *ibid.*, 1997 (1998)

Gabrielle Gopinath. *Assistant Professor of Art, Art History, and Design.* Bachelor of Arts, Univ of Texas-Austin, 1998; Master of Arts, Yale University, 2004; Master of Fine Arts, Rhode Island School of Design, 2000; Master of Philosophy, Yale University, 2005; Philosophiae Doctor, *ibid.*, 2008 (2009)

Denise M. Goralski. *Associate Professional Specialist of Physical Education.* Master of Science, Southern Illinois Univ at Carb, 1985 (1998)

Stanislav V. Gordeyev. *Research Assistant Professor of Aerospace & Mech Engineering.* Bachelor of Arts, Moscow Inst. of Physics & Tech, 1991; Master of Science, Moscow Inst. Physics & Thec., 1991; Philosophiae Doctor, University of Notre Dame, 1999 (1999)

Rev. Eugene F. Gorski CSC. *Professional Specialist of Theology and Teaching Professor.* Bachelor of Philosophy, University of Notre Dame, 1953; Doctor of Sacred Theology, Catholic Institute of Paris, 1971; Licentiate in Sacred Theology, Pontifical Gregorian Universit, 1961; Master of Music, University of Notre Dame, 1955 (1986)

Andrew C. Gould. *Associate Professor of Political Science and Fellow, Nanovic Inst for European Studies and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Arts (Latin), Harvard University, 1985; Master of Arts, Univ of California Berkeley, 1986; Philosophiae Doctor, *ibid.*, 1992 (1993)

Robert D. Goulding. *Associate Professor of Program of Liberal Studies and Concurrent Assistant Professor, History.* Bachelor of Arts, University of Canterbury, 1990; Bachelor of Science, *ibid.*, 1989; Master of Arts, The Warburg Institute, 1992; Philosophiae Doctor, *ibid.*, 1999 (2003)

Daniel A. Graff. *Associate Professional Specialist of History.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1990; Master of Arts, Univ of Wisconsin-Madison, 1993; Philosophiae Doctor, *ibid.*, 2004 (2001)

Karen Graubart. *Associate Professor of History and Fellow, Kellogg Inst for International Studies.* Bachelor of Arts, Barnard College, 1984; Philosophiae Doctor, Univ of Massachusetts, 2000 (2007)

Richard L. Gray. *Associate Professor of Art, Art History, and Design.* Bachelor of Science, Illinois State University, 1976; Master of Fine Arts, Rochester Inst of Technology, 1982 (1982)

Barbara J. Green. *Associate Professor of English.* Philosophiae Doctor, University of Virginia, 1991 (1991)

FACULTY

- Stuart Greene.** *Associate Professor of English and Fellow, Inst for Educational Initiatives and The O'Malley Director of the University Writing Program and Associate Dean, Arts and Letters.* Bachelor of Arts, State Univ of NY--Binghamton, 1978; Master of Arts, *ibid.*, 1980; Philosophiae Doctor, Carnegie Mellon University, 1990 (1997)
- Brad S. Gregory.** *Associate Professor of History and Fellow, Nanovic Inst for European Studies and Dorothy G. Griffin Associate Professor of Early Modern European History.* Bachelor of Arts, Universite Catholique De Louva, 1984; Bachelor of Science, Utah State University, 1985; Master of Arts, University of Arizona, 1987; Philosophiae Doctor, Princeton University, 1996 (2003)
- Thomas A. Gresik.** *Professor of Economics and Econometrics and Fellow, Helen Kellogg Institute for International Studies.* Bachelor of Arts, Northwestern University, 1981; Master of Science, California Institute of Techno, 1982; Philosophiae Doctor, Northwestern University, 1987 (2000)
- John D. Griffin.** *Associate Professor of Political Science.* Bachelor of Arts, Boston College, 1990; Juris Doctor, Univ of Colorado-Boulder, 1995; Philosophiae Doctor, Duke University, 2002 (2002)
- Patrick N. Griffin.** *Professor of History.* Bachelor of Arts, University of Notre Dame, 1987; Master of Arts, Columbia University, 1991; Philosophiae Doctor, Northwestern University, 1999 (2008)
- Paul R. Grimstad.** *Associate Professor of Biological Sciences.* Bachelor of Science, Concordia College at Moorhead, 1967; Master of Science, Univ of Wisconsin-Madison, 1972; Philosophiae Doctor, *ibid.*, 1973 (1974)
- Rev. Daniel G. Groody CSC.** *Associate Professor of Theology and Fellow, Nanovic Institute and Fellow in the Joan B. Kroc Institute for International Peace Studies.* Bachelor of Arts, University of Notre Dame, 1986; Licentiate in Sacred Theology, Jesuit School of Theology, 2001; Master of Divinity, *ibid.*, 1992; Philosophiae Doctor, Graduate Theological Union, 2000 (2000)
- Karsten Grove.** *Professor of Mathematics and The Rev. Howard J. Kenna, C.S.C., Memorial Chair in Mathematics.* Master of Science, University of Aarhus, 1974; Philosophiae Doctor, *ibid.*, 1974 (2007)
- Joseph P. Gultinan.** *Professor of Marketing.* Bachelor of Business Admin., University of Notre Dame, 1966; Doctorate of Bus. Admin., Indiana Univ-Bloomington, 1969; Master of Business Admin, Indiana University, 1967 (1987)
- Alexandra Guisinger.** *Assistant Professor of Political Science and Fellow, Kellogg Inst for Intrnl Studies and Fellow, Kroc Institute for International Peace Studies.* Bachelor of Arts, Harvard University, 1994; Master of Arts, Yale University, 2004; Philosophiae Doctor, *ibid.*, 2005 (2004)
- Hong Guo.** *Assistant Professor of Management.* Bachelor of Engineering, Renmin University Beijing, 1999; Master of Engineering, *ibid.*, 2002; Master of Science, University of Rochester, 2005; Philosophiae Doctor, University of Florida, 2009 (2009)
- Li Guo.** *Associate Professor of The Classics.* Bachelor of Arts, Shanghai International Studies, 1979; Philosophiae Doctor, Yale University, 1994 (1999)
- Vijay Gupta.** *Assistant Professor of Electrical Engineering.* Bachelor of Science, Indian Inst of Tech-Delhi, 2001; Master of Science, California Institute of Techno, 2002; Philosophiae Doctor, *ibid.*, 2006 (2008)
- Matthew J. Gursky.** *Professor of Mathematics.* Bachelor of Science, University of Michigan, 1986; Philosophiae Doctor, California Institute of Techno, 1991 (2001)
- Jimmy Gurule.** *Professor of Law School and Fellow of the Institute for Latino Studies.* Bachelor of Arts, University of Utah, 1974; Juris Doctor, *ibid.*, 1980 (1989)
- Sandra M. Gustafson.** *Associate Professor of English and Concurrent Associate Professor, American Studies.* Bachelor of Arts, Cornell University, 1985; Philosophiae Doctor, Univ of California Berkeley, 1993 (1993)
- Gustavo A. Gutierrez.** *Professor of Theology and Fellow, Kellogg Inst for Intrnl Studies and The John Cardinal O'Hara Chair in Theology and Fellow, Institute for Latino Studies.* Licentiate in Sacred Theology, Universite Catholique de Lyon, 1959; Philosophiae Doctor, *ibid.*, 1985 (2001)
- Gary M. Gutting.** *Professor of Philosophy and Fellow, Nanovic Inst for European Studies and The Notre Dame Chair in Philosophy.* Bachelor of Arts, Saint Louis University, 1964; Philosophiae Doctor, *ibid.*, 1968 (1969)
- Juan C. Guzman.** *Assistant Professional Specialist of Institute for Latino Studies.* Bachelor of Arts, Universidad de los Andes, 1995; Master of Arts, Princeton University, 2002; Master of Arts, Universidad de los Andes, 1996; Philosophiae Doctor, Princeton University, 2005 (2009)
- David S. Hachen Jr.** *Associate Professor of Sociology and Fellow, Inst for Educational Initiatives.* Bachelor of Arts, Lake Forest College, 1974; Master of Arts, Univ of Wisconsin-Madison, 1978; Philosophiae Doctor, *ibid.*, 1983 (1987)
- Gerald Haefel.** *Assistant Professor of Psychology.* Bachelor of Arts (Latin), Lawrence University, 1997; Philosophiae Doctor, Univ of Wisconsin-Madison, 2005 (2006)
- Martin Haenggi.** *Associate Professor of Electrical Engineering.* Philosophiae Doctor, University of Zurich, 1999 (2001)
- Jan L. Hagens.** *Associate Professional Specialist of College Seminar - A&L and Fellow, Nanovic Inst for European Studies.* Master of Arts, Princeton University, 1990; Master of Arts, University of Virginia, 1983; Philosophiae Doctor, Princeton University, 1993 (1997)
- Kristin M. Hager.** *Assistant Professor of Biological Sciences.* Bachelor of Science, Univ of IL Urbana-Champaign, 1989; Philosophiae Doctor, University Alabama Birmingham, 1996 (2000)
- Frances Hagopian.** *Associate Professor of Political Science and Fellow, Kellogg Inst for Intrnl Studies and Michael P. Grace II Chair in Latin American Studies and Fellow, Inst. for Intl. Peace Studies and Michael P. Grace II Chair in Latin American Studies.* Bachelor of Arts, Brandeis University, 1975; Philosophiae Doctor, Massachusetts Institute of Tec, 1986 (1985)
- Alexander J. Hahn.** *Professor of Mathematics and Fellow, Nanovic Inst for Eurpoean Studies.* Bachelor of Science, Loyola Univ New Orleans, 1965; Master of Science, University of Notre Dame, 1968; Philosophiae Doctor, *ibid.*, 1970 (1972)
- Ethan T. Haimo.** *Professor of Music.* Bachelor of Arts (Latin), University of Chicago, 1972; Master of Fine Arts, Princeton University, 1974; Philosophiae Doctor, *ibid.*, 1978 (1976)
- Kasturi Haldar.** *Professor of Biological Sciences and Director or Rare and Neglected Disease and The Rev. Julius A. Nieuwland, C.S.C. Professor of Biological Sciences.* Bachelor of Arts, Bryn Mawr College, 1978; Philosophiae Doctor, Massachusetts Institute of Tec, 1982 (2008)

FACULTY

- Brian C. Hall.** *Professor of Mathematics.* B.S. Engineering Physics, Cornell University, 1988; Bachelor of Arts, *ibid.*, 1988; Philosophiae Doctor, *ibid.*, 1993 (1999)
- Douglas C. Hall.** *Associate Professor of Electrical Engineering.* Bachelor of Science, Miami University, 1985; Master of Science, Univ of IL Urbana-Champaign, 1988; Philosophiae Doctor, *ibid.*, 1991 (1994)
- Thomas N. Hall.** *Professor of English.* Bachelor of Arts (Latin), Baylor University, 1982; Master of Arts (Latin), *ibid.*, 1985; Philosophiae Doctor, Univ of IL Urbana-Champaign, 1990 (2006)
- Maureen T. Hallinan.** *Professor of Sociology and Fellow, Institute for Educ. Initiatives and The William P. and Hazel B. White Chair in English (I).* Bachelor of Arts, Marymount College, 1961; Master of Science, University of Notre Dame, 1968; Philosophiae Doctor, University of Chicago, 1972 (1984)
- John A. Halloran.** *Associate Professor of Finance.* Bachelor of Science, Saint Louis University, 1968; Master of Business Admin, Washington University, 1970; Philosophiae Doctor, *ibid.*, 1976 (1976)
- Eugene W. Halton.** *Professor of Sociology.* Bachelor of Arts, Princeton University, 1972; Philosophiae Doctor, University of Chicago, 1979 (1982)
- Christopher S. Hamlin.** *Professor of History and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Antioch University, 1974; Master of Arts, Univ of Wisconsin-Madison, 1977; Philosophiae Doctor, *ibid.*, 1982 (1985)
- Qing Han.** *Professor of Mathematics.* Bachelor of Science, Beijing University, 1986; Master of Science, New York University, 1991; Philosophiae Doctor, *ibid.*, 1993 (1994)
- Noriko Hanabusa.** *Associate Professional Specialist of East Asian Langs and Literatur and Teaching Professor.* Bachelor of Arts, Keio University, 1988; Master of Arts, Univ of Wisconsin-Madison, 1994 (1994)
- Barbara J. Hanrahan.** *Associate Professional Specialist of University Press and Director, University Press.* Bachelor of Arts, Wheaton College, 1969; Master of Arts, University of Chicago, 1970 (1999)
- Susan C. Harris.** *Associate Professor of English and Fellow, Keough Inst. for Irish Studies.* Bachelor of Arts, Yale University, 1991; Master of Arts, UNC at Chapel Hill, 1993; Philosophiae Doctor, Univ of Texas-Austin, 1998 (1998)
- Jeffrey R. Hart.** *Associate Professional Specialist of Finance.* Bachelor of Arts, University of Iowa, ; Master of Business Admin, Loyola University Chicago, ; Philosophiae Doctor, University of Texas at Dallas, 1999 (2008)
- Gregory V. Hartland.** *Professor of Chemistry and Biochemistry.* Bachelor of Science, University of Melbourne, 1985; Philosophiae Doctor, UCLA, 1991 (1994)
- David B. Hartvigsen.** *Professor of Management.* Bachelor of Arts, Colgate University, 1979; Master of Science, Carnegie Mellon University, 1980; Philosophiae Doctor, *ibid.*, 1984 (1993)
- Mandy L. Havert.** *Assistant Librarian of University Libraries.* Bachelor of Arts, Ball State University, 1996; Master of Library & Info Sci, Indiana-Purdue Univ Indpls, 2007 (1997)
- Stephen M. Hayes.** *Librarian of University Libraries.* Bachelor of Science, Michigan State University, 1972; Master in Library Science, Western Michigan University, 1974; Master of Science in Admin., University of Notre Dame, 1979 (1974)
- Anne E. Hayner.** *Associate Professional Specialist of Joan B. Kroc Inst. for Int'l.* Bachelor of Arts, University of Michigan, 1981; Master of Arts, Earlham College, 1985 (1987)
- Barbara J. Hellenenthal.** *Assistant Professional Specialist of Biological Sciences and Curator of the Museum of Biodiversity and Greene-Nieuwland Herbarium.* Bachelor of Science, University of Minnesota, 1974 (1980)
- Ronald A. Hellenenthal.** *Professor of Biological Sciences.* Associate in Arts, Los Angeles Valley College, 1965; Bachelor of Arts, California St. Univ-Northridge, 1967; Philosophiae Doctor, Univ of Minnesota of Minneapol, 1977 (1977)
- Ben A. Heller.** *Associate Professor of Romance Languages and Literature and Fellow, Kellogg Inst for Intrnl Studies and Fellow, Institute for Latino Studies.* Bachelor of Arts, Univ of Pennsylvania, 1981; Master of Arts, Washington University, 1990; Philosophiae Doctor, *ibid.*, 1990 (2000)
- Jessica J. Hellmann.** *Associate Professor of Biological Sciences.* Bachelor of Science, University of Michigan, 1996; Philosophiae Doctor, Stanford University, 2000 (2003)
- Paul Helquist.** *Professor of Chemistry and Biochemistry and Associate Chair, Chemistry & Biochemistry.* Bachelor of Arts, University of Minnesota at Dul, 1969; Master of Science, Cornell University, 1971; Philosophiae Doctor, *ibid.*, 1972 (1984)
- Michael L. Hemler.** *Associate Professor of Finance.* Bachelor of Science, University of Dayton, 1974; Master of Business Admin, University of Chicago, 1985; Philosophiae Doctor, *ibid.*, 1988; Philosophiae Doctor, Washington University, 1980 (1992)
- Douglass R. Hemphill.** *Assistant Professional Specialist of Management.* Bachelor of Arts, Bucknell University, 1966; Master of Arts, University of Notre Dame, 1980 (1991)
- Kenneth W. Henderson.** *Professor of Chemistry and Biochemistry.* Bachelor of Arts, University of Strathclyde, 1990; Philosophiae Doctor, *ibid.*, 1993 (2002)
- Jennifer A. Herdt.** *Professor of Theology and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Oberlin College, 1989; Master of Arts, Princeton University, 1991; Philosophiae Doctor, *ibid.*, 1994 (1998)
- David R. Hernandez.** *Instructor of The Classics.* Bachelor of Arts, Univ of California Berkeley, 1996; Master of Arts, University of Cincinnati, 2004 (2009)
- Rodney E. Hero.** *Professor of Political Science and Fellow, Institute for Latino Studies and The Packey J. Dee Chair in American Democracy.* Bachelor of Science, Florida State University, 1975; Philosophiae Doctor, Purdue University, 1980 (2000)
- Dusan Hesek.** *Assistant Professional Specialist of Chemistry and Biochemistry.* Bachelor of Science, Technical Univ of Bratislava, 1977; Master of Science, *ibid.*, 1979; Philosophiae Doctor, *ibid.*, 1987 (2003)
- Michael D. Hildreth.** *Associate Professor of Physics.* Bachelor of Arts (Latin), Princeton University, 1988; Philosophiae Doctor, Stanford University, 1995 (2000)
- Prof. M. Catherine Hilker OP.** *Professor of Theology.* Bachelor of Arts, University of Dayton, 1971; Master of Arts, Catholic University of America, 1979; Philosophiae Doctor, *ibid.*, 1984 (1995)
- Davide A. Hill.** *Associate Professor of Chemical and Biomolecular Eng.* Bachelor of Science, University of Naples, 1984; Philosophiae Doctor, Univ of California Berkeley, 1989 (1990)
- Alex A. Himonas.** *Professor of Mathematics.* Philosophiae Doctor, Purdue University, 1985 (1989)

FACULTY

Richard K. Hind. *Associate Professor of Mathematics.* Bachelor of Arts, University of Cambridge, 1993; Philosophiae Doctor, Stanford University, 1997 (2000)

Peter D. Holland. *Professor of Film, Television, and Theatre and Concurrent Professor, English and Professor, McMeel Chair Shakespeare Studies and Associate Dean, College of Arts & Letters.* Bachelor of Arts, Trinity Hall Cambridge, 1972; Philosophiae Doctor, *ibid.*, 1977; Philosophiae Doctor, *ibid.*, 1977 (2002)

Hope Hollocher. *Associate Professor of Biological Sciences.* Bachelor of Arts, Univ of Pennsylvania, 1982; Philosophiae Doctor, Washington University, 1991 (2000)

Montey G. Holloway. *Professional Specialist of Philosophy.* Bachelor of Arts, Huntington College, 1972; Philosophiae Doctor, University of Notre Dame, 1981 (1982)

Laura G. Holt. *Professional Specialist of London-On Site and Concurrent Associate SPE, Theology and Deputy Director, London Program.* Bachelor of Arts, Vassar College, 1968; Bachelor of Arts (Latin), *ibid.*, 1968; Master of Arts, University of Notre Dame, 1992; Philosophiae Doctor, *ibid.*, 1999 (1999)

Anthony C. Holter. *Assistant Professional Specialist of Alliance for Catholic Education.* Bachelor of Arts, Saint Mary's University, 2000; Master of Science, Univ of Wisconsin-Madison, 2004; Philosophiae Doctor, *ibid.*, 2007 (2008)

Sallie A. Hood. *Professional Specialist of Architecture.* Bachelor of Arts, Carleton College, 1966; Master of Architecture, University of IL at Chicago, 1979 (2001)

Vittorio G. Hosle. *Professor of German/Russian Lang & Lit and Fellow, Nanovic Inst for European Studies and Concurrent Professor, Philosophy and Concurrent Professor, Political Science and The Paul G. Kimball Chair in Arts and Letters and Fellow, The Joan B. Kroc Institute for International Peace Studies.* Philosophiae Doctor, Eberhard Karl Univ of Tübingen, 1982 (1999)

Don A. Howard. *Professor of Philosophy and Fellow, Nanovic Inst for European Studies and Director, Hist & Philosophy of Science.* Bachelor of Science, Michigan State University, 1971; Master of Philosophy, Boston University, 1973; Philosophiae Doctor, *ibid.*, 1979 (1997)

George S. Howard. *Professor of Psychology and Fellow, Institute for Intl. Peace Studies and Fellow, Institute for Educ. Initiatives.* Bachelor of Arts, Marist College, 1970; Master of Arts, Southern Illinois Univ at Carb, 1972; Philosophiae Doctor, *ibid.*, 1975 (1981)

Jay C. Howk. *Assistant Professor of Physics.* Bachelor Degree - Unspecified, Hanover College, 1994; Doctorate Degree, University of Wisconsin Center, 1999 (2005)

Robert A. Howland Jr. *Associate Professor of Aerospace & Mech Engineering.* Bachelor of Arts, Yale University, 1965; Master of Science, *ibid.*, 1966; Philosophiae Doctor, North Carolina State University, 1974 (1981)

Bei Hu. *Professor of Mathematics.* Bachelor of Science, East China Normal University, 1982; Master of Science, *ibid.*, 1984; Philosophiae Doctor, University of Minnesota, 1990 (1990)

Xiaobo Hu. *Professor of Computer Science and Engineering and Concurrent Associate Professor, Electrical Engineering.* Bachelor of Science, Tianjin University, 1982; Master of Science, Polytechnic Institute of New Y, 1984; Philosophiae Doctor, Purdue University, 1989 (1996)

Libai Huang. *Research Assistant Professor of Chemistry and Biochemistry.* Bachelor of Science, Peking Normal University, 2001; Philosophiae Doctor, University of Rochester, 2006 (2008)

Luoxiu Huang. *Assistant Professional Specialist of Center For Transgene Research.* Bachelor of Arts, W China University of Medical, 1985; Philosophiae Doctor, Fudan University, 2002 (2008)

Roger D. Huang. *Professor of Finance and The Kenneth R. Meyer Chair in Global Investment Management and Department Chair, Finance.* Bachelor of Science, Purdue University, 1975; Master of Arts, Univ of Pennsylvania, 1978; Philosophiae Doctor, *ibid.*, 1980 (2000)

Yih-Fang Huang. *Professor of Electrical Engineering and Concurrent Professor, Computer Science and Engineering.* Bach of Sci in Electrical Engr, National Taiwan University, 1976; Master of Science, University of Notre Dame, 1979; Philosophiae Doctor, Princeton University, 1982 (1982)

Paul W. Huber. *Professor of Chemistry and Biochemistry.* Bachelor of Science, Boston College, 1973; Philosophiae Doctor, Purdue University, 1978 (1985)

Michelle Hudson. *Assistant Librarian of University Libraries.* Bachelor of Science, Pacific University, 2006; Master of Library & Info Sci, Univ of Washington, 2008 (2009)

Tin-bor V. Hui. *Assistant Professor of Political Science and Visiting Fellow, Kellogg Inst for Intrnl Studies and Fellow, Kroc Institute for International Peace Studies.* Bachelor Degree - Unspecified, Chinese University of Hong Kon, 1990; Doctor of Arts, Columbia University, 2000; Master of Arts, *ibid.*, 1995; Master of Philosophy, *ibid.*, 1997 (2004)

Romana C. Huk. *Associate Professor of English and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Coll of William & Mary, 1981; Philosophiae Doctor, University of Notre Dame, 1987 (2002)

Amanda B. Hummon. *Assistant Professor of Chemistry and Biochemistry.* AB, Cornell University, 1999; Philosophiae Doctor, Univ of IL Urbana-Champaign, 2004 (2009)

Edward F. Hums. *Associate Professional Specialist of Accountancy.* Bachelor of Business Admin., University of Notre Dame, 1975; Master of Business Admin, Indiana Univ South Bend, 1989; Master of Science, *ibid.*, 1979 (1975)

Daniel M. Hungerman. *Assistant Professor of Economics and Econometrics.* Bachelor of Arts, Miami University, 2000; Philosophiae Doctor, Duke University, 2005 (2005)

David E. Hutchison. *Associate Professional Specialist of Finance.* Bachelor of Arts, Illinois Wesleyan University, 1987; Master of Science, Univ of IL Urbana-Champaign, 1985; Philosophiae Doctor, *ibid.*, 1993 (2008)

David R. Hyde. *Professor of Biological Sciences and The Rev. Howard J. Kenna, C.S.C., Memorial Director of the Zebrafish Research Center and Director, Center for Zebrafish Research.* Bachelor of Science, Michigan State University, 1980; Philosophiae Doctor, Pennsylvania State University, 1985 (1988)

Anthony K. Hyder. *Professor of Physics.* Bachelor of Science, University of Notre Dame, 1962; Master of Science, Air Force Institute Technology, 1964; Philosophiae Doctor, *ibid.*, 1971 (1991)

Kristine L. Ibsen. *Professor of Romance Languages and Literature and Fellow, Kellogg Inst for Intrnl Studies and Institute for Latino Studies Fellow.* Bachelor of Arts, California State College, 1983; Master of Arts, UCLA, 1984; Philosophiae Doctor, *ibid.*, 1991 (1992)

FACULTY

Frank P. Incropera. *Professor of Aerospace & Mech Engineering and The H. Clifford and Evelyn A. Brosey Chair in Engineering.* Bach of Sci in Mech Engr, Massachusetts Institute of Tec, 1961; M.S. Mechanical Engr, Stanford University, 1962; Philosophiae Doctor, *ibid.*, 1966 (1998)

Jesus A. Izaguirre. *Associate Professor of Computer Science and Engineeri.* Bachelor of Science, University of Monterrey, 1991; Master of Science, Univ of IL Urbana-Champaign, 1996; Philosophiae Doctor, *ibid.*, 1999 (1999)

Pamela E. Jackson. *Associate Professional Specialist of ND Center for Liturgy.* Bachelor of Arts, Yale University, 1972; Master of Arts, *ibid.*, 1981; Master of Divinity, Yale University-Div School, 1980; Philosophiae Doctor, Yale University, 1987 (2000)

Dennis C. Jacobs. *Professor of Chemistry and Biochemistry and VP and Associate Provost, Provost Office.* Bachelor of Science, Univ California Irvine, 1982; Philosophiae Doctor, Stanford University, 1988 (1988)

Ireneusz Janik. *Research Assistant Professor of Chemistry and Biochemistry.* Master of Science, University of Lodz, 1995; Philosophiae Doctor, Technical University of Lodz, 2001; Philosophiae Doctor, University of Lodz, 2001 (2004)

Boldizar Janko. *Professor of Physics.* Bachelor of Arts, Eotvos Lorand University, 1991; Diploma, *ibid.*, 1991; Philosophiae Doctor, Cornell University, 1996 (2000)

Anja Jauernig. *Assistant Professor of Philosophy and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, University of Bonn, 1995; Bachelor of Science, *ibid.*, 1995; Master of Arts, Princeton University, 1999; Master of Arts, University of Bonn, 1997; Philosophiae Doctor, Princeton University, 2004 (2002)

Debra Javeline. *Associate Professor of Political Science and Fellow in the Nanovic Institute for European Studies.* Bachelor Degree - Unspecified, Brown University, 1989; Doctorate Degree, *ibid.*, 1997 (2004)

Peter G. Jeffery. *Professor of Music and Michael P. Grace Chair in Medieval Studies and Concurrent Professor, Theology and Fellow, Nanovic Institute for European Studies.* Bachelor of Arts, Brooklyn College, 1975; Philosophiae Doctor, Princeton University, 1980 (2009)

Debdeep Jena. *Associate Professor of Electrical Engineering.* Bachelor of Science, Indian Inst of Tech Kanpur, 1998; Philosophiae Doctor, Univ of California Sta Barbara, 2002 (2003)

Rev. John I. Jenkins CSC. *President of the University and Professor of Philosophy.* BA, Univ. of Notre Dame, 1976; MA, *ibid.*, 1978; B.Phil, Oxford Univ., 1987; Mdiv, Jesuit School of Theology at Berkeley, 1988; STL, *ibid.*, 1988; PhD, Oxford Univ, 1989 (1988)

Lionel M. Jensen. *Associate Professor of East Asian Langs and Literaturer and Fellow, Kellogg Inst for Intrnl Studies and Concurrent Associate Professor, History and Fellow, Kroc Institute for International Peace Studies.* Bachelor of Arts, Williams College, 1976; Master of Arts, Washington University, 1980; Philosophiae Doctor, Univ of California Berkeley, 1992 (2000)

Richard A. Jensen. *Professor of Economics and Econometrics and Fellow, Kellogg Inst for Intrnl Studies and Concurrent Professor, Finance and Department Chair, Economics and Econometrics.* Bachelor of Arts, University of Kansas, 1971; Philosophiae Doctor, Northwestern University, 1980 (2000)

Michael J. Jenuwine. *Professional Specialist of Law School and Concurrent Associate Professor, Psychology.* Bachelor Degree - Unspecified, University of Michigan, 1988; Doctor of Arts, University of Chicago, 2000; Juris Doctor, Loyola University Chicago, 2000; Master of Arts, University of Chicago, 1990 (2005)

Christopher Jerde. *Research Assistant Professor of Biological Sciences.* Bachelor of Science, Montana State University, 1998; Master of Science, *ibid.*, 2002; Philosophiae Doctor, University of Alberta, 2008 (2009)

Carlos Jerez-Farran. *Professor of Romance Languages and Literature and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, University of Sheffield, 1980; Master of Arts, Univ of Massachusetts, 1983; Philosophiae Doctor, *ibid.*, 1987 (1986)

Colin P. Jessop. *Associate Professor of Physics.* Bachelor of Arts, Trinity College Cambridge, 1986; Master of Arts, *ibid.*, 1987; Philosophiae Doctor, Harvard University, 1993 (2004)

Diana Jimeno-Ingrum. *Assistant Professor of Management.* Bachelor of Arts, Colorado State University, 2000; Master of Arts, California St. Univ-Northridge, 2000; Philosophiae Doctor, Univ of IL Urbana-Champaign, 2007 (2007)

Robert C. Johansen. *Professor of Political Science and Fellow, Kellogg Inst for Intrnl Studies and Fellow, Joan B. Kroc Inst. for Int'l. Peace.* Bachelor of Arts, Manchester College, 1962; Master of Arts, Columbia University, 1963; Philosophiae Doctor, *ibid.*, 1968 (1986)

James F. Johnson. *Associate Professional Specialist of Chemistry and Biochemistry.* Bachelor of Arts, University of St Francis, 1970; Master of Science, University of Notre Dame, 1975 (1975)

Rev. Maxwell E. Johnson. *Professor of Theology.* Bachelor of Arts, Augustana College, 1974; Master of Arts, Saint John's University, 1982; Master of Arts, University of Notre Dame, 1989; Master of Divinity, Wartburg Theological Seminary, 1978; Master of Sacred Theology, St John's University, 1982; Philosophiae Doctor, University of Notre Dame, 1992 (1997)

Paul G. Johnson. *Associate Professor of Music.* Bachelor of Music, Northwestern University, 1976; Master of Fine Arts, Princeton University, 1980; Philosophiae Doctor, *ibid.*, 1981 (1981)

Cyraina E. Johnson-Roullier. *Associate Professor of English and Fellow, Institute for Latino Studies.* Master of Arts, State Univ of NY at Albany, 1990; Philosophiae Doctor, State Univ of NY-Buffalo, 1992 (1991)

Joyce V. Johnstone. *Professional Specialist of Alliance for Catholic Educatio and Director, Alliance for Catholic Education and Ryan Chair.* Bachelor of Arts, Catholic University of America, 1961; Master of Science, Butler University, 1973; Philosophiae Doctor, Indiana Univ-Bloomington, 1994 (1998)

Robert L. Jones Jr.. *Professional Specialist of Law School and Director, Legal Aid Clinic.* Bachelor of Arts, University of Notre Dame, 1980; Juris Doctor, Harvard University, 1984 (2002)

Sherri L. Jones. *Librarian of University Libraries.* Bachelor of Arts, Marshall University, 1975; Master in Library Science, Kent State University, 1988; Master of Arts, Marshall University, 1979 (2000)

Louis E. Jordan. *Librarian of University Libraries.* Bachelor of Arts, University of Massachusetts Bo, 1972; Doctor of Medieval Studies, University of Notre Dame, 1980; Master in Library Science, Indiana Univ-Bloomington, 1981; Master of Arts, University of Chicago, 1974 (1980)

Madhav R. Joshi. *Research Assistant Professor of Joan B. Kroc Inst. for Int'l.* Master of Arts, Tribhuvan University, 2001 (2010)

FACULTY

Essaka Joshua. *Professional Specialist of College Seminar - A&L and Concurrent Professional Specialist, English and Teaching Professor.* Bachelor of Arts, Somerville College Oxford, 1991; Master of Arts, *ibid.*, 1995; Philosophiae Doctor, Birmingham Southern College, 1995; Philosophiae Doctor, University of Birmingham, 1995 (2008)

Lynn S. Joy. *Professor of Philosophy.* A.B., Radcliffe College, 1971; A.M., Harvard University, 1981; Philosophiae Doctor, *ibid.*, 1982 (2000)

Michelle V. Joyce. *Assistant Professional Specialist of Chemistry and Biochemistry.* Bachelor of Science, University of Notre Dame, 1999; Diploma in Philosophy, Duke University, 2003 (2004)

Danielle B. Joyner. *Assistant Professor of Art, Art History, and Design.* Bachelor of Arts, University of Utah, 1994; Master of Arts, *ibid.*, 1998; Philosophiae Doctor, Harvard University, 2007 (2007)

Anthony Juan. *Professor of Film, Television, and Theatre.* Doctorate Degree, University of Athens, 1990 (2005)

Encarnacion Juarez-Almendros. *Associate Professor of Romance Languages and Literature and Fellow, The Nanovic Institute for European Studies.* Master of Arts, Univ of California Berkeley, 1981; Philosophiae Doctor, *ibid.*, 1987 (1995)

Eric J. Jumper. *Professor of Aerospace & Mech Engineering.* Philosophiae Doctor, Air Force Institute Technology, 1975 (1989)

James W. Kaiser. *Professional Specialist of Physics.* Bachelor of Science, University of Dayton, 1965; Master of Arts, University of Notre Dame, 1967; Master of Science, *ibid.*, 1978 (1969)

Prashant V. Kamat. *Professor of Chemistry and Biochemistry and Concurrent Professor, Chemistry & Biochemistry & Radiation Laboratory and Reverend John A. Zahm, CSC Professor of Science.* Bachelor of Science, Karnatak University, 1972; Master of Science, University of Bombay, 1974; Philosophiae Doctor, *ibid.*, 1979 (1983)

Moshe Kamensky. *Research Assistant Professor of Mathematics.* B.S. Mathematics, Open University, 1996; M.S. Computer Sci and Engr, Weizmann Institute of Science, 1999; Philosophiae Doctor, Hebrew University of Jerusalem, 2007 (2009)

S. Alex Kandel. *Associate Professor of Chemistry and Biochemistry.* Bachelor of Science, Yale University, 1993; Philosophiae Doctor, Harvard University, 1999 (2001)

Jeffrey C. Kantor. *Professor of Chemical and Biomolecular Eng.* Bachelor of Science, Univ of Minnesota of Minneapolis, 1976; Master of Arts, Princeton University, 1977; Philosophiae Doctor, *ibid.*, 1981 (1981)

Joshua B. Kaplan. *Associate Professional Specialist of Political Science.* Bachelor of Arts (Latin), Univ California Santa Cruz, 1974; Master of Arts, University of Chicago, 1977 (1987)

Joseph Karbowski. *Assistant Professor of Philosophy.* Bachelor of Arts, University of Pittsburgh, 2003; Philosophiae Doctor, Univ of California Berkeley, 2009 (2009)

Ahsan Kareem. *Professor of Civil Engr/Geological Sciences and The Robert M. Moran Chair in Engineering.* Philosophiae Doctor, Colorado State University, 1978 (1990)

Daniel J. Karmgard. *Research Assistant Professor of Physics.* Bachelor of Science, UCLA, 1993; Master of Science, California State U-Long Beach, 1995; Philosophiae Doctor, Florida State University, 1999 (1999)

Asher Kaufman. *Associate Professor of History.* Bachelor of Arts, Hebrew University of Jerusalem, 1989; Master of Arts, *ibid.*, 1994; Philosophiae Doctor, Brandeis University, 2000 (2005)

M. Cathleen Kaveny. *Professor of Law School and The John P. Murphy Foundation Chair in Law.* Bachelor of Arts (Latin), Princeton University, 1984; Juris Doctor, Yale University, 1990; Master of Arts, *ibid.*, 1986; Philosophiae Doctor, *ibid.*, 1991 (1995)

Jessica N. Kayongo. *Associate Librarian of University Libraries.* Bachelor of Arts, South Dakota State University, 1996; Juris Doctor, Univ of Nebraska-Lincoln, 1998; Master of Library & Info Sci, Univ of Wisconsin-Madison, 2002 (2002)

Barry P. Keating. *Professor of Finance.* Bachelor of Business Admin., University of Notre Dame, 1967; Master of Arts, Lehigh University, 1968; Philosophiae Doctor, University of Notre Dame, 1974 (1978)

Thomas M. Kellenberg. *Professional Specialist of Washington, DC and Concurrent Associate Professor, Washington DC Program and Director, Washington DC Program.* Bachelor of Arts, University of Notre Dame, 1980; Juris Doctor, Harvard University, 1986 (1997)

Kenneth Kelley. *Assistant Professor of Management.* Bachelor of Arts, University of Cincinnati, 2000; Master of Arts, University of Notre Dame, 2003; Philosophiae Doctor, *ibid.*, 2005 (2008)

William K. Kelley. *Associate Professor of Law School.* Bachelor of Arts, Marquette University, 1984; Juris Doctor, Harvard University, 1987 (1995)

Anita E. Kelly. *Professor of Psychology.* Bachelor of Arts, Northwestern University, 1986; Master of Science, University of Florida, 1988; Philosophiae Doctor, *ibid.*, 1991 (1994)

Daniel B. Kelly. *Associate Professor of Law School.* Bachelor of Arts, University of Notre Dame, 2002; Juris Doctor, Harvard University, 2005 (2009)

Michelle Kelly. *Research Assistant Professor of Electrical Engineering.* Bachelor of Science, Colorado School of Mines, 2000; Master of Science, University of WI-Madison, 2003; Philosophiae Doctor, *ibid.* 2007 (2009)

Sean P. Kelly. *Assistant Professor of Sociology.* Bachelor of Arts, UNC at Chapel Hill, 1998; Master of Science, Univ of Wisconsin-Madison, 2001; Philosophiae Doctor, *ibid.*, 2005 (2005)

Thomas W. Kelly. *Professional Specialist of Dean's Office - First Yr of St and Department Chair, Physical Education.* Bachelor of Science, Western Michigan University, 1960; Master of Arts, University of Notre Dame, 1970; Master of Science, Pennsylvania St University, 1962; Philosophiae Doctor, University of Notre Dame, 1975 (1965)

Sean Kelsey. *Associate Professor of Philosophy.* Bachelor of Arts, Thomas Aquinas College, 1992; Philosophiae Doctor, Princeton University, 1997 (2009)

Andrew B. Kennedy. *Assistant Professor of Civil Engr/Geological Sciences.* Bachelor of Science, Queen's University, 1991; Master of Science, Univ. of British Columbia, 1993; Philosophiae Doctor, Monash University, 1998 (2008)

John J. Kennedy. *Professor of Marketing.* Bachelor of Science, Newark College Engineering, 1955; Master of Business Admin, Ohio State University, 1957; Philosophiae Doctor, *ibid.*, 1962 (1963)

Kathryn E. Kerby-Fulton. *Professor of English and Notre Dame Chair in English.* Bachelor of Arts, York University Toronto, 1977; Doctor of Philosophy, University of York, 1986; Master of Philosophy, University of Oxford, 1979 (2004)

FACULTY

Elizabeth A. Kerr. *Assistant Professional Specialist of Civil Engr/Geological Sciences.* Bachelor of Science, University of Evansville, 2003; Master of Science, University of Notre Dame, 2008; Philosophiae Doctor, *ibid.*, 2008 (2009)

Mary M. Keys. *Associate Professor of Political Science and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Boston College, 1988; Master of Arts, University of Toronto, 1989; Philosophiae Doctor, *ibid.*, 1997 (1994)

Qayum Khan. *Research Assistant Professor of Mathematics.* Bachelor of Science, University of IL at Chicago, 1998; Master of Science, *ibid.*, 1999; Philosophiae Doctor, Indiana Univ-Bloomington, 2006 (2009)

Kapil Khandelwal. *Assistant Professor of Civil Engr/Geological Sciences.* Master of Arts, Indian Inst of Tech-Delhi, 2000; Philosophiae Doctor, University of Michigan, 2008 (2008)

Tracy L. Kijewski-Correa. *Associate Professor of Civil Engr/Geological Sciences and The Rooney Family Chair in Engineering (Collegiate Chair) and Associate Chair, Civil Engineering and Geological Sciences.* Bach of Sci in Civil Engr, University of Notre Dame, 1997; Bachelor of Science, *ibid.*, 1997; M.S. Civil Engr, *ibid.*, 2000; Philosophiae Doctor, *ibid.*, 2003 (2003)

Peter K. Kilpatrick. *Professor of Dean's Office - Engineering and Matthew H. McCloskey Dean of the College of Engineering Endowed Professorship.* Bachelor of Arts, Occidental College, 1978; Philosophiae Doctor, University of Minnesota, 1983 (2008)

Kwan S. Kim. *Professor of Economics and Policy Studies and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Arts, Seoul National University, 1959; Master of Arts, Univ of Minnesota of Minneapol, 1961; Philosophiae Doctor, *ibid.*, 1967 (1967)

Dwight B. King Jr. *Librarian of Library Law.* Bachelor of Arts, University of Michigan, 1977; Juris Doctor, *ibid.*, 1980; Master in Library Science, *ibid.*, 1981 (1986)

Carmela R. Kinslow. *Associate Librarian of Library Law.* Bachelor of Science, Indiana Univ-Bloomington, 1986; Master in Library Science, *ibid.*, 1989; Master of Science in Admin., University of Notre Dame, 1991 (1974)

Kenneth J. Kinslow. *Assistant Librarian of University Libraries.* Bachelor of Arts, St. Joseph's University, 1968; Master of Science, Indiana University, 1992; Philosophiae Doctor, University of Notre Dame, 1978 (1985)

Elizabeth R. Kirk. *Assistant Professional Specialist of Center for Ethics and Culture.* Bachelor of Arts, Univ of Missouri-Columbia, 1993; Juris Doctor, University of Notre Dame, 1996 (2005)

David J. Kirkner. *Associate Professor of Civil Engr/Geological Sciences and Associate Chair, Civil Engineering and Geological Sciences.* Bach of Sci in Civil Engr, Youngstown State University, 1971; Philosophiae Doctor, Case Western Reserve Univ., 1979 (1979)

Michael S. Kirsch. *Professor of Law School and Associate Dean, Law School.* Bachelor of Arts (Latin), Cornell University, 1985; Juris Doctor, Harvard University, 1988; Legum Magister, New York University, 1989 (2001)

Alexander Kiselev. *Research Assistant Professor of Biological Sciences.* Master of Arts, Moscow State University, 1974; Philosophiae Doctor, USSR Academy of Sciences: Inst, 1979 (2008)

Tanyel Kiziltepe Bilgicer. *Research Assistant Professor of Chemical and Biomolecular Engineering.* Bachelor of Science, Bilkent University, 1998; Philosophiae Doctor, Massachusetts Institute of Tec, 2005 (2008)

Sandra S. Klein. *Associate Librarian of Library Law.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1981; M.S. Library Science, *ibid.*, 1988; Masters in Education, *ibid.*, 1983 (1998)

Julia F. Knight. *Professor of Mathematics and The Charles L. Huisking Chair.* Bachelor of Arts, Utah State University, 1964; Philosophiae Doctor, Univ of California Berkeley, 1972 (1977)

Peter M. Kogge. *Professor of Computer Science and Engineering and Concurrent Professor, Electrical Engineering and The Ted H. McCourtney Chair in Computer Science and Engineering.* Bachelor of Science, University of Notre Dame, 1968; Master of Science, Syracuse University, 1970; Philosophiae Doctor, Stanford University, 1972 (1994)

James J. Kolata. *Professor of Physics.* Bachelor of Science, Marquette University, 1964; Master of Science, Michigan State University, 1966; Philosophiae Doctor, *ibid.*, 1969 (1977)

Kathleen J. Kolberg. *Professional Specialist of Preprofessional Studies.* Bachelor of Arts, Albion College, 1980; Philosophiae Doctor, University of Notre Dame, 1989 (1993)

Christopher F. Kolda. *Associate Professor of Physics and Provost Fellow.* Bachelor of Arts, Johns Hopkins University, 1990; Master of Arts, University of Michigan, 1992; Philosophiae Doctor, *ibid.*, 1995 (2003)

Rev. Paul V. Kollman CSC. *Associate Professor of Theology and Fellow, Nanovic Inst for European Studies and Fellow, Kellogg Inst for Intrnl Studies and Fellow, Kroc Inst. for Intl. Peace Studies.* Bachelor of Arts, University of Notre Dame, 1984; Master of Divinity, *ibid.*, 1990; Philosophiae Doctor, University of Chicago, 2001 (2001)

Mary Ellen Konieczny. *Assistant Professor of Sociology.* Bachelor of Science, University of Notre Dame, ; Master of Divinity, Weston School of Theology, ; Philosophiae Doctor, University of Chicago, 2005 (2008)

Joseph T. Kosek. *Assistant Professor of Army Science.* Bachelor of Arts, University of Notre Dame, 2001 (2008)

Thomas H. Kosel. *Associate Professor of Electrical Engineering.* Bachelor of Science, Univ of California Berkeley, 1967; Master of Science, *ibid.*, 1970; Philosophiae Doctor, *ibid.*, 1975 (1978)

Janet A. Kourany. *Associate Professor of Philosophy.* Bachelor of Science, Columbia University, 1965; Philosophiae Doctor, *ibid.*, 1977 (1998)

Viktor Krchnak. *Research Professor of Chemistry and Biochemistry.* Doctor of Science, Prague Inst. Chem. Tech, 1974 (2003)

William J. Kremer Jr. *Professor of Art, Art History, and Design.* Bachelor of Fine Arts, University Wisconsin Superior, 1969; Master of Fine Arts, Univ of Wisconsin-Madison, 1971; Master of Science, *ibid.*, 1971 (1973)

Robert A. Krieg. *Professor of Theology and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Stonehill College, 1969; Philosophiae Doctor, University of Notre Dame, 1976 (1977)

Alan D. Krieger. *Associate Librarian of University Libraries.* B.S. Physics, University of Chicago, 1974; Bachelor of Arts, Columbia University, 1972; Bachelor of Arts, Columbia University Teachers C, 1972; Master in Library Science, University of Arizona, 1983; Master of Arts, University of Chicago, 1974 (1983)

William J. Krier. *Associate Professor of English.* Bachelor of Arts, University of Notre Dame, 1965; Master of Arts, University of Michigan, 1966; Philosophiae Doctor, Indiana Univ-Bloomington, 1973 (1969)

Brian A. Krostenko. *Associate Professor of The Classics.* Bachelor of Arts, Princeton University, 1986; Master of Arts, Harvard University, 1989; Philosophiae Doctor, *ibid.*, 1993 (2001)

FACULTY

- Krupali A. Krusche.** *Assistant Professor of Architecture and Fellow, Nanovic Institute.* Master of Arts, Hochschule de Kunst, 2003; Philosophiae Doctor, Technical University of Dresde, 2005 (2005)
- Claudia Kselman.** *Professional Specialist of Off-Campus Programs and Program Manager, Office of International Studies.* Bachelor of Arts, Univ of California Berkeley, 1970; Master of Arts, University of Michigan, 1972; Philosophiae Doctor, *ibid.*, 1980 (1985)
- Thomas A. Kselman.** *Professor of History and Fellow, Nanovic Inst for European Studies.* Bachelor Degree - Unspecified, St. Joseph's University, 1970; Bachelor of Arts, *ibid.*, 1970; Master of Arts, University of Michigan, 1972; Philosophiae Doctor, *ibid.*, 1978 (1979)
- Warren N. Kubitschek.** *Associate Professional Specialist of Ctr for Research Educational O.* Bachelor of Arts, Grinnell College, 1976; Master of Arts, Univ of Akron, 1980 (1987)
- Gregory P. Kucich.** *Professor of English and Fellow, Nanovic Inst for European Studies and Director, London Program, Undergrad Studies.* Bachelor of Arts, San Francisco State University, 1978; Master of Arts, University of Michigan, 1979; Philosophiae Doctor, *ibid.*, 1983 (1983)
- Jessica A. Kuczenski.** *Associate Professional Specialist of Chemical and Biomolecular Eng.* Bachelor of Science, Iowa State University, 2002; Master of Science, University of Notre Dame, 2006 (2008)
- Ian Kuijt.** *Professor of Anthropology and Fellow, Keough Institute for Irish Studies.* Associate of Music, Harvard University, 1991; Bachelor of Arts, University of Lethbridge, 1984; Master of Arts, Simon Fraser University, 1988; Philosophiae Doctor, Harvard University, 1995 (2000)

- Lei Li.** *Associate Professor of Biological Sciences.* Bachelor of Science, Shandong Medical University, 1985; Philosophiae Doctor, Georgia State University, 1995 (2003)
- Zhong Liang.** *Associate Professional Specialist of Chemistry and Biochemistry.* Bachelor of Science, Ocean University of Qingdao, 1982; Master of Science, Institute of Tropical Medicine, 1993 (2008)
- Marya Lieberman.** *Associate Professor of Chemistry and Biochemistry.* Bachelor of Science, Massachusetts Institute of Tec, 1989; Philosophiae Doctor, Univ of Washington, 1994 (1996)
- Rev. William M. Lies CSC.** *Associate Professional Specialist of Political Science and Concurrent Associate SPF, Political Science and Executive Director, Center for Social Concerns and Fellow, Joan B. Kroc Institute for International Peace Studies and Fellow, The Helen Kellogg Institute for International Studies.* Associate in Arts, Crosier Seminary Junior Colleg, 1982; Bachelor of Arts, Saint John's University, 1984; Master of Arts, University of Pittsburgh, 1998; Master of Divinity, University of Notre Dame, 1993; Philosophiae Doctor, University of Pittsburgh, 2003 (2001)
- Chong Keat A. Lim.** *Associate Professional Specialist of Mathematics.* B.S. Mathematics, National University of Singapo, 1993; M.S. Mathematics, *ibid.*, 1994; M.S. Mathematics, University of Utah, 1996; Philosophiae Doctor, *ibid.*, 2001 (2006)
- Sylvia L. Lin.** *Associate Professor of East Asian Langs and Literaturer and Notre Dame Chair in Chinese.* Bachelor of Arts, Tamkang University, 1984; Master of Arts, St. John's University, 1988; Master of Arts, Tamkang University, 1987; Master of Arts, Univ of Oregon, 1991; Philosophiae Doctor, Univ of California Berkeley, 1998 (2002)
- Daniel A. Lindley.** *Associate Professor of Political Science and Fellow, Inst. for Intl. Peace Studies and Director, Flatley Office of Post-Baccalaureate Fellowships.* Bachelor of Arts, Tufts University, 1983; Philosophiae Doctor, Massachusetts Institute of Tec, 1998 (1999)
- Molly Lipscomb.** *Assistant Professor of Economics and Econometrics and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts, Claremont McKenna College, 1999; Master of Arts, Univ of Colorado-Boulder, 2005; Philosophiae Doctor, *ibid.*, 2008 (2009)
- Chao-Shin Liu.** *Associate Professor of Accountancy.* Philosophiae Doctor, Univ of IL Urbana-Champaign, 1992 (1992)
- Lei Liu.** *Research Assistant Professor of Electrical Engineering.* Bachelor of Science, Nanjing University, 1998; Master of Science, *ibid.*, ; Philosophiae Doctor, University of Virginia, 2007 (2009)
- Xiaobo Liu.** *Professor of Mathematics.* Bachelor of Science, Tsinghua University, 1987; Philosophiae Doctor, Univ of Pennsylvania, 1994 (1999)
- Xinyu Liu.** *Research Assistant Professor of Physics.* Bachelor of Science, Univ. of Sci. & Tech. of China, 1993; Master of Science, *ibid.*, 1996; Philosophiae Doctor, University of Notre Dame, 2003 (2002)
- A. Eugene Livingston.** *Professor of Physics.* Bachelor of Science, University of Alberta, 1969; Master of Science, *ibid.*, 1970; Philosophiae Doctor, *ibid.*, 1974 (1978)
- Omar A. Lizardo.** *Assistant Professor of Sociology and Fellow, Kroc Institute for International Peace Studies and Fellow, Nanovic Institute.* Bachelor of Science, Brooklyn College, 1997; Master of Arts, University of Arizona, 2002; Philosophiae Doctor, *ibid.*, 2006 (2006)

FACULTY

John M. LoSecco. *Professor of Physics.* Bachelor of Science, Cooper Union, 1972; Master of Arts, Harvard University, 1973; Philosophiae Doctor, *ibid.*, 1976 (1985)

Neil F. Lobo. *Research Assistant Professor of Biological Sciences.* B.S. Microbiology, St. Joseph's College, 1995; Bachelor of Science, Bangalore University, 1995; Doctorate Degree, Univ of IL Urbana-Champaign, 2000; Philosophiae Doctor, University of Notre Dame, 2001 (2000)

David M. Lodge. *Professor of Biological Sciences.* Bachelor of Science, The University of the South, 1979; Doctor of Philosophy, University of Oxford, 1982 (1985)

Patricia A. Loghry. *Associate Librarian of University Libraries.* Bachelor of Arts, Univ of Wisconsin-Madison, 1986; Master in Library Science, *ibid.*, 1991 (2000)

George A. Lopez. *Professor of Political Science and Fellow, Inst. for Intl. Peace Studies and Reverend T. Hesburgh, CSC Professor of Peace Studies and Fellow in the Kellogg Institute for International Studies and Fellow of the Institute for Latino Studies.* Bachelor of Arts, Saint John Fisher College, 1972; Philosophiae Doctor, Syracuse University, 1975 (1986)

Martina A. Lopez. *Associate Professor of Art, Art History, and Design.* Bachelor of Fine Arts, Univ of Washington, 1985; Master of Fine Arts, School of the Art Institute of, 1990 (1993)

Thomas J. Loughran. *Professional Specialist of Physics.* Bachelor of Science, University of Notre Dame, 1980; Master of Arts, *ibid.*, 1983; Philosophiae Doctor, *ibid.*, 1986 (2005)

Timothy J. Loughran. *Professor of Finance and The C. R. Smith II Director of the Institute for Ethical Business Worldwide.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1985; Master of Business Admin, Indiana Univ-Bloomington, 1989; Philosophiae Doctor, Univ of IL Urbana-Champaign, 1993 (1999)

Michael J. Loux. *Professor of Philosophy and Professor, The George N. Shuster Chair.* Bachelor of Arts, Univ of St. Thomas, 1964; Master of Arts, University of Chicago, 1965; Philosophiae Doctor, *ibid.*, 1968 (1968)

Iossif Lozovatsky. *Research Professor of Civil Engrl Geological Sciences.* Master of Science, Moscow State University, 1971; Philosophiae Doctor, Russian Academy of Sciences, 1975 (2010)

Gitta Lubke. *Associate Professor of Psychology.* B.S. Medical Technology, Johann W Goethe U of Frankfurt, 1979; Doctorate Degree, Free University Amsterdam, 2002; Master of Science, University of Amsterdam, 1997 (2004)

Steven Lugauer. *Assistant Professor of Economics and Econometrics.* Bachelor of Arts, University of Chicago, 1998; Master of Business Admin, University of Miami, 2003; Master of Science, Carnegie Mellon University, 2005; Philosophiae Doctor, *ibid.*, 2008 (2008)

Natalia Lyandres. *Associate Librarian of University Libraries.* Bachelor of Arts, Moscow State University, 1990; M.S. Librarianship, San Jose State University, 1993 (2001)

Semion Lyandres. *Associate Professor of History and Fellow, Nanovic Inst for European Studies and Fellow Kellogg Inst for Intrnl Studies.* Bachelor of Arts, St Petersburg University, 1980; Master of Arts, Boston University, 1987; Master of Arts, Stanford University, 1988; Philosophiae Doctor, *ibid.*, 1992 (2001)

Michael N. Lykoudis. *Professor of Architecture and Francis and Kathleen Rooney Dean of Architecture.* Bachelor of Architecture, Cornell University, 1979; Master of Architecture, Univ of IL Urbana-Champaign, 1983 (1991)

Sabine G. MacCormack. *Professor of History and Fellow, Kellogg Inst for Intrnl Studies and The Rev. Theodore M. Hesburgh, C.S.C., Chair in Arts and Letters and Fellow, The Nanovic Institute for European Studies.* Bachelor of Arts, University of Oxford, 1964; Philosophiae Doctor, *ibid.*, 1974 (2003)

Alasdair C. MacIntyre. *Research Professor of Philosophy and Professor Emeritus.* Master of Arts, University of Oxford, 1961 (1988)

Louis MacKenzie. *Associate Professor of Romance Languages and Literature and Department Chair, Music.* Bachelor of Arts, University of Notre Dame, 1969; Master of Arts, Middlebury College, 1972; Philosophiae Doctor, Cornell University, 1977 (1983)

Nicole R. MacLaughlin. *Assistant Professional Specialist of Univ Writing Program.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1992; Master of Arts, *ibid.*, 1995; Master of Arts, *ibid.*, 1995 (2007)

Tara A. MacLeod. *Assistant Professional Specialist of Irish Language and Literature and Assistant Teaching Professor.* Bachelor of Science, University College Dublin, 1991; Master of Science, University College Cork, 1997 (2005)

Joanne M. Mack. *Associate Professional Specialist of Snite Museum and Concurrent Associate Professor, Anthropology.* Associate in Arts, College of Marin, 1962; Bachelor of Arts, San Francisco State University, 1964; Master of Arts, University Wyoming, 1971; Philosophiae Doctor, Univ of Oregon, 1979 (1997)

Gregory R. Madey. *Research Professor of Computer Science and Engineeri.* Bachelor of Science, Cleveland State University, 1974; Master of Science, Case Western Reserve Univ., 1979; Master of Science, Cleveland State University, 1975; Philosophiae Doctor, Case Western Reserve Univ., 1984 (2008)

Edward J. Maginn. *Professor of Chemical and Biomolecular Eng and Associate Dean of Academic Programs, Graduate School.* Bach of Sci in Chemical Engr, Iowa State University, 1987; Philosophiae Doctor, Univ of California Berkeley, 1995 (1995)

Aaron H. Magnan-Park. *Assistant Professor of Film, Television, and Theatre and Fellow, Nanovic Inst for European Studies.* Bachelor Degree - Unspecified, University of Michigan-Flint, 1990; Doctorate Degree, University of Iowa, 2002; Master of Science, *ibid.*, 1994 (2004)

Cynthia K. Mahmood. *Associate Professor of Anthropology and Fellow, Inst. for Intl. Peace Studies.* Bachelor of Arts, New College University S Flori, 1977; Master of Arts, Tulane University, 1981; Philosophiae Doctor, *ibid.*, 1986 (2001)

Andrew R. Mahon. *Research Assistant Professor of Biological Sciences.* Bachelor of Science, Truman State University, 1997; Master of Science, *ibid.*, 1999; Master of Science, University Alabama Birmingham, 2000; Philosophiae Doctor, Old Dominion University, 2008 (2009)

Scott P. Mainwaring. *Professor of Political Science and Fellow, Kellogg Inst for Intrnl Studies and The Eugene P. and Helen Conley Chair in Political Science (Departmental Chair) and Fellow, Joan B. Kroc Inst. for Int'l. Peace.* Bachelor of Arts, Yale University, 1976; Master of Arts, *ibid.*, 1976; Philosophiae Doctor, Stanford University, 1983 (1983)

Linda J. Major. *Assistant Professional Specialist of Medieval Institute.* Bachelor of Arts, University of St Francis, 1973; Master of Medieval Studies, University of Notre Dame, 1983 (2008)

Collette Mak. *Associate Librarian of University Libraries.* Bachelor of Arts, University of Michigan, 1978; Master in Library Science, *ibid.*, 1980 (2008)

FACULTY

Bradley J. Malkovsky. *Associate Professor of Theology.* Master of Arts, Eberhard Karl Univ of Tübingen, 1983; Philosophiae Doctor, *ibid.*, 1994 (1992)

Rev. Edward A. Malloy CSC. *Professor of Theology and President Emeritus and Concurrent Professor, English.* Bachelor of Arts, University of Notre Dame, 1963; Master of Arts, *ibid.*, 1967; Master of Arts, *ibid.*, 1969; Philosophiae Doctor, Vanderbilt University, 1975 (1974)

Theodore E. Mandell. *Associate Professional Specialist of Film, Television, and Theatre.* Bachelor of Arts, University of Notre Dame, 1986; Master of Arts, University of Iowa, 1989 (1988)

Elena M. Mangione-Lora. *Assistant Professional Specialist of Romance Languages and Literature.* Bachelor of Arts, Saint Mary's College, 1990; Master of Arts, University of Notre Dame, 1998 (1998)

Michael J. Mannor. *Assistant Professor of Management.* Bachelor of Science, Aquinas College, 2002; Master of Business Admin, Grand Valley State Univ, 2004; Philosophiae Doctor, Michigan State University, 2007 (2008)

Nancy Marinelli. *Research Assistant Professor of Physics.* Bachelor of Arts, University of Bari, 1993; Philosophiae Doctor, *ibid.*, 1997 (2006)

Joseph P. Marino. *Professor of Chemistry and Biochemistry and Fellow, Institute for Latino Studies.* B.S. Chemistry, Pennsylvania State University, 1963; Doctor of Science, Harvard University, 1967; Master of Arts, *ibid.*, 1965 (2002)

Nelson Mark. *Professor of Economics and Econometrics and Fellow, Kellogg Inst for Intrnl Studies and Concurrent Professor, Finance and The Alfred C. DeCrane Jr. Chair in International Economics.* Bachelor of Arts, Univ of California Sta Barbara, 1978; Philosophiae Doctor, University of Chicago, 1983 (2002)

Kate E. Marshall. *Assistant Professor of English.* Bachelor of Arts, Univ California Davis, 1997; Master of Arts, Univ of Southern California, 2006; Philosophiae Doctor, UCLA, 2009 (2009)

Alexander Martin. *Associate Professor of History and Fellow, Nanovic Institute.* B.A., Cornell University, 1985; M.A., Columbia University, 1986; Ph.D., University of Pennsylvania, 1993 (2006)

Holly E. Martin. *Professional Specialist of Dean's Office - First Yr of St and Assistant Dean, First Year of Studies.* Bachelor of Arts, Saint Olaf College, 1978; Master of Arts, University of Notre Dame, 1979; Philosophiae Doctor, *ibid.*, 1983 (1983)

Patrick I. Martin. *Associate Professional Specialist of Romance Languages and Literature and Fellow, Nanovic Institute and Associate Teaching Professor.* Associate - Unspecified, Columbia University, ; Bachelor of Arts, University of Notre Dame, 1974; Master of Arts, Columbia University, 1975; Master of Philosophy, *ibid.*, 1977 (1986)

Thomas G. Marullo. *Professor of German/ Russian Lang & Lit and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, College of the Holy Cross, 1970; Master of Arts, Cornell University, 1971; Master of Business Admin, Indiana Univ South Bend, 1989; Philosophiae Doctor, Cornell University, 1975 (1975)

Julia J. Marvin. *Associate Professor of Program of Liberal Studies.* Bachelor of Arts, Princeton University, 1988; Master of Arts, *ibid.*, 1992; Philosophiae Doctor, *ibid.*, 1997 (1997)

Patrick Q. Mason. *Research Associate Professor of History.* Bachelor of Arts, Brigham Young University, 1999; Master of Arts, University of Notre Dame, 2003; Master of Arts, *ibid.*, 2003; Philosophiae Doctor, *ibid.*, 2009 (2009)

Nancy Masters. *Assistant Professional Specialist of Alliance for Catholic Educatio.* Master of Arts, Indiana Univ-Bloomington, 1979 (2001)

Grant J. Mathews. *Professor of Physics.* Bachelor of Science, Michigan State University, 1972; Philosophiae Doctor, University of Maryland Unvers, 1977 (1994)

Eric H. Matlis. *Research Assistant Professor of Aerospace & Mech Engineering.* Master of Science, Illinois Institute of Technolo, 1997; Philosophiae Doctor, University of Notre Dame, 2004 (2008)

Karel Matous. *Associate Professor of Aerospace & Mech Engineering.* Bachelor of Science, Czech Technical Univ of Prague, 1996; Master of Science, *ibid.*, 1998; Philosophiae Doctor, *ibid.*, 2000 (2009)

Timothy M. Matovina. *Professor of Theology and Fellow, Latino Studies and Director, Cushman Center Amer Catholicism and Concurrent Professor, American Studies.* Bachelor of Arts in Education, Indiana Univ-Bloomington, 1978; Master of Divinity, University of St Michaels Coll, 1983; Philosophiae Doctor, Catholic University of America, 1993 (2000)

Khalil F. Matta. *Professor of Management.* Bachelor of Science, West Virginia Inst Technology, 1978; Master of Science, University of Notre Dame, 1980; Philosophiae Doctor, *ibid.*, 1982 (1982)

Jennifer C. Matthews. *Assistant Librarian of University Libraries.* Bachelor of Music, Ball State University, 1996; Master of Arts, University of Kentucky, 1999 (2007)

Diana C. Matthias. *Associate Professional Specialist of Snite Museum and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, University of Notre Dame, 1979; Master of Arts, Indiana University, 1990 (1990)

Sara L. Maurer. *Assistant Professor of English and Fellow, Keough-Naughton Institute.* Bachelor of Arts, Rice University, 1995; Master of Arts, Indiana Univ-Bloomington, 1997; Philosophiae Doctor, *ibid.*, 2003 (2003)

Patricia A. Maurice. *Professor of Civil Engr/ Geological Sciences and Associate Dean for Research.* Bachelor of Arts, Johns Hopkins University, 1982; Master of Science, Dartmouth College, 1985; Philosophiae Doctor, Stanford University, 1994 (2000)

Scott E. Maxwell. *Professor of Psychology and Fellow, Inst For Educational Initiatives and The Matthew A. Fitzsimons Chair in Psychology.* Bachelor of Science, Duke University, 1972; Master of Arts, UNC at Chapel Hill, 1974; Philosophiae Doctor, *ibid.*, 1977 (1982)

Lloyd H. Mayer. *Associate Professor of Law School.* Bachelor of Laws, Stanford University, 1989; Juris Doctor, Yale University, 1994 (2005)

David T. Mayernik. *Associate Professor of Architecture.* Bachelor of Architecture, University of Notre Dame, 1983 (2002)

Julliet N. Mayinja. *Associate Professional Specialist of Off-Campus Programs and Associate Director, Off-Campus Programs.* Bachelor of Arts, Makerere University, 1989; Bachelor of Science, *ibid.*, 1989; Master of Arts, University of Notre Dame, 1994; Master of Science in Admin., *ibid.*, 1997 (1993)

Sister Gail A. Mayotte SASV. *Associate Professional Specialist of Alliance for Catholic Educatio and Fellow, Inst for Ed Initiatives.* Bachelor Degree - Unspecified, University of Lowell, 1983; Doctorate Degree, Boston College, 2001; Master Degree - Unspecified, *ibid.*, 1991 (2004)

FACULTY

Christine M. Maziar. *Professor of Electrical Engineering and VP and Senior Associate Provost Provost Office.* Bach of Sci in Electrical Engr, Purdue University, 1981; M.S. Electrical Engr, *ibid.*, 1984; Philosophiae Doctor, *ibid.*, 1986 (2004)

Elizabeth F. Mazurek. *Associate Professor of The Classics and Department Chair, Classics.* Bachelor of Arts, Dickinson College, 1983; Philosophiae Doctor, UNC at Chapel Hill, 1988 (1990)

Tadeusz R. Mazurek. *Assistant Professional Specialist of The Classics and Assistant Teaching Professor.* Bachelor of Arts, Yale University, 1985; Philosophiae Doctor, UNC at Chapel Hill, 1997 (1997)

Dan Meisel. *Professor of Chemistry and Biochemistry.* Bachelor of Science, Hebrew University of Jerusalem, 1967; Master of Science, *ibid.*, 1969; Philosophiae Doctor, *ibid.*, 1974 (1998)

Collin Meissner. *Assistant Professor of American Studies.* Bachelor of Arts, Univ. of British Columbia, 1985; Master of Arts, University of Notre Dame, 1987; Philosophiae Doctor, *ibid.*, 1995 (1995)

Richard R. Mendenhall. *Professor of Finance.* Bachelor of Science, U. S. Naval Academy, 1974; Master of Business Admin, Indiana Univ-Bloomington, 1981; Philosophiae Doctor, *ibid.*, 1986 (1985)

Ivis Menes. *Assistant Professional Specialist of Romance Languages and Literature.* Associate in Arts, Miami-Dade Community College, 1993; Bachelor of Arts, Florida International University, 1994; Master of Arts, Loyola University Chicago, 1996 (2000)

Orlando R. Menes. *Associate Professor of English and Fellow, Institute for Latino Studies.* Bachelor of Arts, University of Florida, 1980; Master of Arts, *ibid.*, 1982; Philosophiae Doctor, University of IL at Chicago, 1998 (2000)

Odette M. Menyard. *Assistant Professional Specialist of Romance Languages and Literature and Fellow, Nanovic Inst for European Studies.* Diploma, University of Orleans, 1969; Master of Arts, University of Notre Dame, 1995; Master of Literature, University of Orleans, 1969 (1995)

Thomas V. Merluzzi. *Professor of Psychology.* Associate in Arts, Saint Thomas Seminary, 1966; Bachelor of Arts, Central Connecticut State Coll, 1969; Master of Arts, Ohio State University, 1971; Philosophiae Doctor, *ibid.*, 1975 (1974)

Margaret H. Meserve. *Associate Professor of History and Fellow, Nanovic Institute.* Bachelor of Arts (Latin), Harvard University, 1992; Master of Arts, The Warburg Institute, 1993; Philosophiae Doctor, *ibid.*, 2001 (2003)

Anthony M. Messina. *Associate Professor of Political Science.* Bachelor of Arts, Assumption College, 1975; Master of Arts, Drew University, 1977; Philosophiae Doctor, Massachusetts Institute of Tec, 1984 (1999)

Kerry L. Meyers. *Associate Professional Specialist of Dean's Office - Engineering.* M.S. Engineering, Oakland University, 1998; Master of Science, Purdue University, 1999 (2005)

John G. Michel. *Associate Professional Specialist of Management.* Bachelor of Arts, Tulane University, 1982; Master of Philosophy, Columbia University, 1992; Philosophiae Doctor, *ibid.*, 1995 (2006)

Connie L. Mick. *Associate Professional Specialist of Center for Social Concerns and Director, Center for Social Concerns and Concurrent Associate Professional Specialist, Management.* Bachelor of Arts, Manchester College, 1994; Master of Arts, Boston College, 1997; Philosophiae Doctor, Loyola University Chicago, 2007 (2000)

Juan C. Migliore. *Professor of Mathematics.* Bachelor of Arts, Haverford College, 1978; Philosophiae Doctor, Brown University, 1983 (1989)

Kenneth W. Milani. *Professor of Accountancy.* Bachelor of Science, Bradley University, 1962; Master of Business Admin, *ibid.*, 1967; Philosophiae Doctor, University of Iowa, 1972 (1972)

Barbara V. Miller. *Assistant Professional Specialist of Management.* Bachelor of Science, Indiana Univ-Bloomington, 1977; Master of Science, *ibid.*, 1983 (2009)

Douglas A. Miller. *Assistant Professional Specialist of Chemistry and Biochemistry.* Bachelor of Arts, Drew University, 1981; Philosophiae Doctor, Pennsylvania St University, 1989 (1997)

Jeffrey S. Miller. *Associate Professor of Accountancy.* Bachelor of Science, Ohio State University, 1982; Master of Business Admin, University of Michigan, 1988; Philosophiae Doctor, Univ of Texas-Austin, 2000 (2000)

Marvin J. Miller. *Professor of Chemistry and Biochemistry and The George and Winifred Clark Chair in Chemistry (II).* Bachelor of Science, North Dakota State University, 1971; Master of Science, Cornell University, 1974; Philosophiae Doctor, *ibid.*, 1976 (1977)

Thurston D. Miller. *Associate Librarian of University Libraries.* Bachelor of Arts, Univ of Washington, 1987; Master in Library Science, *ibid.*, 1989 (1992)

Alexander Mintairov. *Research Professor of Electrical Engineering.* Philosophiae Doctor, St Petersburg University, 1987 (2000)

Philip E. Mirowski. *Professor of Economics and Policy Studies and The Carl E. Koch Chair in Economics.* Philosophiae Doctor, University of Michigan, 1979 (1990)

Mahan Mirza. *Instructor of The Classics.* Bachelor of Science, Univ of Texas-Austin, 1995; Master of Arts, Hartford Seminary, 1998; Master of Arts, Yale University, 2005; Master of Philosophy, *ibid.*, 2005 (2009)

Rev. Wilson D. Miscamble CSC. *Professor of History.* Bachelor of Arts, University of Queensland, 1974; Master of Arts, University of Notre Dame, 1978; Master of Arts, University of Queensland, 1976; Master of Divinity, University of Notre Dame, 1987; Philosophiae Doctor, *ibid.*, 1980; Philosophiae Doctor, *ibid.*, 1980 (1986)

Jennifer Mish. *Assistant Professor of Marketing.* Bachelor of Arts, Arizona State University, 1985; Master of Business Admin, University of Montana, 2003; Philosophiae Doctor, University of Utah, 2009 (2009)

FACULTY

- Kevin M. Misiewicz.** *Associate Professor of Accountancy.* Bachelor of Business Admin., Western Michigan University, 1970; Philosophiae Doctor, Michigan State University, 1974 (1978)
- Gerard K. Misiolek.** *Associate Professor of Mathematics.* Master of Arts, University of Warsaw, 1988; Master of Science, Technical University of Warsaw, 1987; Philosophiae Doctor, SUNY at Stony Brook, 1992 (1993)
- Nathan D. Mitchell.** *Professor of Theology and Concurrent Professional Specialist, Center for Pastoral Liturgy.* Bachelor of Arts, Saint Meinrad College, 1966; Master of Arts, Indiana Univ-Bloomington, 1971; Master of Divinity, Saint Meinrad School of Theolo, 1970; Philosophiae Doctor, University of Notre Dame, 1978 (1990)
- H. Fred Mittelstaedt.** *Professor of Accountancy and PricewaterhouseCoopers Faculty Fellow and Department Chair, Accountancy.* Bachelor of Science, Illinois State University, 1979; Master of Science, *ibid.*, 1982; Philosophiae Doctor, Univ of IL Urbana-Champaign, 1987 (1992)
- Shahriar Mobashery.** *Professor of Chemistry and Biochemistry and Navari Family Chair in Life Sciences.* Bachelor of Science, Univ of Southern California, 1980; Bachelor of Science, *ibid.*, 1981; Philosophiae Doctor, University of Chicago, 1985 (2003)
- Christian R. Moevs.** *Associate Professor of Romance Languages and Literature and Fellow in the Nanovic Institute for European Studies.* Bachelor of Arts, Harvard University, 1980; Master of Arts, Columbia University, 1989; Philosophiae Doctor, *ibid.*, 1994 (1994)
- Michael A. Mogavero.** *Professional Specialist of Economics and Econometrics.* Bachelor of Arts, Canisius College, 1971; Master of Arts, Univ of Connecticut, 1971; Philosophiae Doctor, *ibid.*, 1979 (2009)
- Kevin J. Mongrain.** *Assistant Professor of Program of Liberal Studies and Concurrent Assistant Professor, Theology.* Bachelor Degree - Unspecified, Saint John's University, 1989; Doctorate Degree, Yale University, 1999; Master of Science, Saint John's University, 1992 (2004)
- Scott M. Monroe.** *Professor of Psychology and The William K. Warren Foundation Chair in Theology.* Bachelor Degree - Unspecified, Saint Olaf College, 1972; Doctorate Degree, Suny College at Buffalo, 1979; Master Degree - Unspecified, Southern Illinois Univ at Carb, 1975 (2006)
- Susannah B. Monta.** *Associate Professor of English and Fellow in the Nanovic Institute for European Studies.* Bachelor of Arts, Urbana University, 1992; Bachelor of Science, *ibid.*, 1992; Master of Arts, Univ of Wisconsin-Madison, 1993; Philosophiae Doctor, *ibid.*, 1998 (2007)
- Vittorio Montemaggi.** *Assistant Professor of Romance Languages and Literature and Fellow, Nanovic Institute for European Studies.* Bachelor of Arts, University of Cambridge, 2000; Master of Philosophy, *ibid.*, 2001; Philosophiae Doctor, *ibid.*, 2006 (2009)
- Peter R. Moody Jr..** *Professor of Political Science.* Bachelor of Arts, Vanderbilt University, 1965; Master of Arts, Yale University, 1967; Philosophiae Doctor, *ibid.*, 1971 (1971)
- Patrick J. Mooney.** *Professional Specialist of Physics.* Bachelor of Science, University of Notre Dame, 1978; Philosophiae Doctor, *ibid.*, 1986 (1998)
- Elizabeth S. Moore.** *Associate Professor of Marketing and Notre Dame Chair in Business.* Bachelor of Arts, Mount Holyoke College, 1980; Doctorate of Bus. Admin., University of Florida, 1994; Masters in Education, *ibid.*, 1989 (1999)
- Dennis W. Moran.** *Professional Specialist of Review of Politics.* Bachelor of Arts, Youngstown State University, 1966; Philosophiae Doctor, University of Notre Dame, 1976 (1976)
- Marisel C. Moreno.** *Assistant Professor of Romance Languages and Literature and Fellow, Institute for Latino Studies and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts, Univ of Pennsylvania, 1995; Doctor of Arts, Georgetown University, 2004 (2007)
- Rachel S. Moreno.** *Professional Specialist of Alliance for Catholic Educatio and Fellow, Inst for Educational Initiatives.* Bachelor of Science, University of Arizona, 1969; Doctorate of Education, Northern Arizona University, 1994; Masters in Education, University of Arizona, 1977 (1999)
- Eric L. Morgan.** *Librarian of University Libraries.* Bachelor of Arts, Bethany College, 1982; Master of Library & Info Sci, Drexel University, 1987 (2001)
- Leslie L. Morgan.** *Assistant Librarian of University Libraries.* Bachelor of Arts, Mercy College of Detroit, 2001; Master in Library Science, Wayne State University, 2005 (2007)
- Akio Mori.** *Research Associate Professor of Biological Sciences.* Bachelor of Arts, Kagoshima University, 1970; Doctorate of Medicine, Nagasaki University, 1980; Master of Science, Kagoshima University, 1972 (1997)
- Stephen R. Moriarty.** *Associate Professional Specialist of Snite Museum.* Bachelor of Arts, University of Notre Dame, 1969; Master of Arts, *ibid.*, 1980 (1990)
- Karen M. Morris.** *Assistant Professional Specialist of Alliance for Catholic Educatio.* Bachelor of Science, Purdue University, 1986; Master of Arts, Andrews University, 1993 (2008)
- Michael H. Morris.** *Professor of Accountancy.* Bachelor of Science, Case Western Reserve Univ., 1972; Master of Business Admin, University of Cincinnati, 1974; Philosophiae Doctor, *ibid.*, 1980 (1979)
- Scott C. Morris.** *Associate Professor of Aerospace & Mech Engineering.* Bach of Sci in Mech Engr, Michigan State University, 1994; M.S. Mathematics, *ibid.*, 2001; M.S. Mechanical Engr, *ibid.*, 1997; Philosophiae Doctor, *ibid.*, 2002 (2002)
- Candida R. Moss.** *Assistant Professor of Program of Liberal Studies and Concurrent Assistant Professor, Theology.* Bachelor of Arts, Worcester College Oxford, ; Master of Arts, Yale University, ; Master of Arts, Yale University-Div School, ; Philosophiae Doctor, Yale University, 2008; Philosophiae Doctor, Yale University-Div School, 2008 (2008)
- Alexander S. Mukasyan.** *Research Professor of Chemistry and Biochemistry.* Master of Science, Moscow Physical-Technical Inst, 1980; Philosophiae Doctor, Moscow Inst. of Chem. Tech., 1986 (2007)
- Hildegund G. Muller.** *Associate Professor of The Classics.* Bachelor of Arts, University of Vienna, 1988; Philosophiae Doctor, *ibid.*, 2004 (2008)
- Vincent P. Munoz.** *Associate Professor of Political Science and Concurrent Associate Professor, Law School.* B.A. Economics, Claremont McKenna College, 1993; Philosophiae Doctor, Claremont Graduate School, 2001 (2009)
- G. Felicitas Munzel.** *Associate Professor of Program of Liberal Studies and Fellow, Nanovic Inst for European Studies and Concurrent Associate Professor, Philosophy.* Bachelor of Arts, Mercer University Main Campus, 1983; Master of Arts, Emory University, 1988; Philosophiae Doctor, *ibid.*, 1990 (1992)

FACULTY

Patrick E. Murphy. *Professor of Marketing and Fellow, Nanovic Inst for European Studies.* Bachelor of Business Admin., University of Notre Dame, 1970; Master of Business Admin, Bradley University, 1971; Philosophiae Doctor, University of Houston, 1975 (1984)

Patrick M. Murphy. *Professional Specialist of Dean's Office - Engineering and Managing Director, Notre Dame Energy Center.* Bachelor of Arts, University of Notre Dame, 1994; Bachelor of Science, *ibid.*, 1998; Master of Science, George Washington Univ, 2000 (2009)

Tonia H. Murphy. *Associate Professional Specialist of Accountancy.* Bachelor of Arts, University of Notre Dame, 1984; Juris Doctor, University of Michigan, 1987 (1992)

Dian H. Murray. *Professor of History.* Bachelor of Arts, Cornell College, 1971; Master of Arts, Cornell University, 1974; Philosophiae Doctor, *ibid.*, 1979 (1984)

Daniel J. Myers. *Professor of Sociology and Fellow of The Joan B. Kroc Inst. for Int'l. Peace and Associate Dean Research Graduates Studies and Center and Associate Dean, College of Arts and Letters.* Bachelor of Arts, Ohio State University, 1988; Master of Arts Education, *ibid.*, 1991; Master of Science, Univ of Wisconsin-Madison, 1995; Philosophiae Doctor, *ibid.*, 1997 (1998)

Chongzheng Na. *Assistant Professor of Civil Engr/Geological Sciences.* Bachelor of Science, Tsinghua University, 1998; Master of Science, Pennsylvania State University, 2000; Philosophiae Doctor, University of Michigan, 2005 (2009)

Jaroslav Nabrzyski. *Professional Specialist of Center for Research Computing and Director, Center for Research Computing and Concurrent Associate Professor, Computer Science and Engineering.* Master of Science, Technical University of Poznan, 1992; Philosophiae Doctor, *ibid.*, 2000 (2009)

John C. Nagle. *Professor of Law School and The John N. Matthews Chair in Law.* Bachelor of Arts, Indiana Univ-Bloomington, 1982; Juris Doctor, University of Michigan, 1986 (1998)

Monika A. Nalepa. *Assistant Professor of Political Science and Fellow, Kroc Institute for International Peace Studies and Fellow, Nanovic Institute and Fellow, Kellogg Institute for International Studies.* Master of Arts, Columbia University, 2001; Master of Arts, Warsaw University, 1999; Master of Philosophy, Columbia University, 2003; Philosophiae Doctor, *ibid.*, 2005 (2008)

Darcia F. Narvaez. *Associate Professor of Psychology and Fellow, Latino Studies and Fellow, Inst For Educational Initiatives and Concurrent Associate Professor, Inst For Educational Initiatives and Fellow, Center for Social Concerns.* Bachelor of Arts, Univ of Northern Colorado, 1976; Master of Divinity, Lutheran School of Theology, 1984; Philosophiae Doctor, University of Minnesota, 1993 (2000)

Clive R. Neal. *Professor of Civil Engr/Geological Sciences.* Bachelor of Science, University of Leicester, ; Philosophiae Doctor, University of Leeds, 1985 (1990)

Alven M. Neiman. *Professional Specialist of Philosophy.* Bachelor of Arts, Univ of Akron, 1973; Philosophiae Doctor, University of Notre Dame, 1978 (1978)

Robert C. Nelson. *Professor of Aerospace & Mech Engineering.* Bachelor of Science, University of Notre Dame, 1964; Master of Science, *ibid.*, 1966; Philosophiae Doctor, Pennsylvania St University, 1974 (1975)

Robert Nerenberg. *Associate Professor of Civil Engineering and Geological Sciences.* Bachelor of Arts, Universidad de Buenos Aires, 1990; Master of Music Education, Wayne State University, 1992; Philosophiae Doctor, Northwestern University, 2003 (2004)

Samuel Newlands. *Assistant Professor of Philosophy.* Bachelor of Philosophy, Wake Forest University, 2000; Master of Arts (Latin), Yale University, 2001; Master of Philosophy, *ibid.*, 2003; Philosophiae Doctor, *ibid.*, 2006 (2006)

Kathie E. Newman. *Professor of Physics.* Bachelor of Science, Michigan State University, 1974; Philosophiae Doctor, Univ of Washington, 1981 (1983)

Nell Newton. *Professor of Law School and Dean, Law School.* Bachelor of Fine Arts, Univ of California Berkeley, 1973; Juris Doctor, Hastings College of Law-Univ o, 1976 (2009)

Rev. Martin Lam Nguyen CSC. *Associate Professor of Art, Art History, and Design.* Bachelor of Arts, University of Portland, 1982; Master of Arts, Yale University, 1993; Master of Divinity, University of Notre Dame, 1988; Master of Fine Arts, Univ of California Berkeley, 1995 (1995)

Briona M. Nic Dhiarmada. *Professor of Irish Language and Literature.* Bachelor of Arts, Trinity College, ; Master of Arts, *ibid.*, ; Philosophiae Doctor, University College Dublin, 1995 (2008)

Walter J. Nicgorski. *Professor of Program of Liberal Studies and Concurrent Professor, Political Science.* Bachelor of Arts, Georgetown University, 1960; Master of Arts, University of Chicago, 1962; Philosophiae Doctor, *ibid.*, 1966 (1964)

William D. Nichols. *Professor of Accountancy.* Bachelor of Business Admin., Western Michigan University, 1969; Doctorate of Bus. Admin., Florida State University, 1978; Master of Business Admin, Western Michigan University, 1973 (1977)

David Nickerson. *Assistant Professor of Political Science.* Bachelor of Arts, Williams College, 1997; Philosophiae Doctor, Yale University, 2004 (2005)

Liviu Nicolaescu. *Associate Professor of Mathematics.* Bachelor of Science, Al I Cuza University, 1987; Philosophiae Doctor, Michigan State University, 1994 (1998)

Bei Nie. *Research Assistant Professor of Chemistry and Biochemistry.* Bachelor of Science, Univ. of Sci. & Tech. of China, 1995; Master of Science, Changchun Inst. of Appl. Chem., 2001; Philosophiae Doctor, University of Wisconsin Center, 2006 (2009)

Glen L. Niebur. *Associate Professor of Aerospace & Mech Engineering.* Bach of Sci in Mech Engr, University of Minnesota, 1986; Master of Arts (Latin), *ibid.*, 1995; Philosophiae Doctor, Univ of California Berkeley, 2000 (2000)

Michael T. Niemier. *Assistant Professor of Computer Science and Engineeri.* Bach of Sci in Computer Engr, University of Notre Dame, 1998; Bachelor of Science, *ibid.*, 1998; M.S. Computer Sci and Engr, *ibid.*, 2000; Philosophiae Doctor, *ibid.*, 2004 (2008)

Jonathan Noble. *Associate Professional Specialist of Provost Office and Advisor, Asia Initiatives and Fellow, The Helen Kellogg Institute for International Studies.* Bachelor of Arts, Coll of William & Mary, 1994; Master of Arts, Ohio State University, 1996 (2007)

Thomas F. Noble. *Professor of History and Fellow, Nanovic Inst for European Studies and Chair, Department of History.* Bachelor of Arts, Ohio University, 1969; Master of Arts, Michigan State University, 1971; Philosophiae Doctor, *ibid.*, 1974 (2001)

FACULTY

Mark Noll. *Professor of History and Endowed Chair, History and Fellow, Kroc Institute for International Peace Studies.* Bachelor of Arts (Latin), Wheaton College, 1968; Master of Arts, Trinity Evangelical Divinity S, 1972; Master of Arts (Latin), University of Iowa, 1970; Master of Arts (Latin), Vanderbilt University, 1974; Philosophiae Doctor, *ibid.*, 1975 (2006)

Carolyn R. Nordstrom. *Professor of Anthropology and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Arts, University of Colorado, 1978; Master of Arts, Univ of California Berkeley, 1980; Philosophiae Doctor, *ibid.*, 1986 (1997)

Robert E. Norton. *Professor of German/Russian Lang & Lit and Fellow, Nanovic Inst for European Studies and Department Chair, German/Russian Lang and Lit and Concurrent Professor, Philosophy.* Bachelor of Arts, Univ of California Sta Barbara, 1982; Master of Arts, Princeton University, 1985; Philosophiae Doctor, *ibid.*, 1988 (1998)

Michael T. Novick. *Assistant Professor of Theology and Jordan Kapson Chair in Jewish Studies.* Bachelor of Science, Yale University, 1998; Juris Doctor, *ibid.*, 2002; Master of Science, Yeshiva University, 2003 (2008)

Thomas Nowak. *Professor of Chemistry and Biochemistry.* Bachelor of Science, Case Western Reserve Univ., 1964; Philosophiae Doctor, University of Kansas, 1969 (1972)

Rev. Ronald J. Nuzzi. *Professional Specialist of Alliance for Catholic Educatio.* Bachelor of Arts, Saint Gregory's Seminary, 1979; M.S. Education, Ursuline College, 1991; Master of Arts, Athenaeum of Ohio, 1984; Philosophiae Doctor, University of Dayton, 1995 (2002)

James A. O'Brien Sr.. *Associate Professional Specialist of Accountancy.* Bachelor of Business Admin., University of Notre Dame, 1988; Juris Doctor, *ibid.*, 1993 (1997)

Sean T. O'Brien. *Assistant Professional Specialist of Keough Inst. for Irish Studies.* Bachelor of Arts, Xavier University, 1997 (2005)

Christopher S. O'Byrne. *Assistant Librarian of Library Law.* Bachelor of Arts, Reed College, 1998; Juris Doctor, Univ of Washington, 2005; Master of Arts, Univ of Massachusetts, 2001 (2006)

John P. O'Callaghan. *Associate Professor of Philosophy and Director, Maritain Center and Fellow, Nanovic Inst for European Studies.* B.S. Physics, St. Norbert College, 1984; Bachelor of Arts, *ibid.*, 1984; Master of Arts, University of Notre Dame, 1990; Master of Science, *ibid.*, 1986; Philosophiae Doctor, *ibid.*, 1996 (2003)

Brian O'Conchubhair. *Assistant Professor of Irish Language and Literature and Fellow, Keough Inst. for Irish Studies.* Bachelor of Arts in Education, Mary Immaculate College, 1991; Master of Arts, Boston College, 1999; Master of Arts, University College Galway, 1995; Philosophiae Doctor, National Univ of Ireland Galwa, 2002 (2004)

Mary E. O'Connell. *Professor of Law School and The Robert and Marion Short Chair in Law and Fellow, Kellogg Inst for Intrnl Studies and Fellow, The Joan B. Kroc Inst.* B.A. History, Northwestern University, 1980; Juris Doctor, Columbia Coll Columbia Univ, 1985; Master Degree - Unspecified, London School of Economics, 1981 (2005)

David K. O'Connor. *Associate Professor of Philosophy and Concurrent Associate Professor, The Classics.* Bachelor of Arts, University of Notre Dame, 1980; Philosophiae Doctor, Stanford University, 1985 (1985)

Patricia A. O'Hara. *Professor of Law School and The Joseph A. Matson Dean of the Notre Dame Law School and Dean, Law School and Matson Chair.* Bachelor of Arts, Santa Clara University, 1971; Juris Doctor, University of Notre Dame, 1974 (1981)

Cyril J. O'Regan. *Professor of Theology and Fellow, Nanovic Inst for European Studies and The Catherine F. Huisiking Chair in Theology.* Bachelor of Arts, University College Dublin, 1974; Master of Arts, *ibid.*, 1978; Master of Christian Studies, Yale University, 1983; Master of Philosophy, *ibid.*, 1983; Philosophiae Doctor, *ibid.*, 1989 (1999)

James S. O'Rourke. *Professional Specialist of Management and The Arthur F. and Mary J. O'Neil Director of the Fanning Center Business Communication.* Bachelor of Business Admin., University of Notre Dame, 1968; Master of Arts, University of New Mexico Main, 1973; Master of Science, Temple University, 1970; Philosophiae Doctor, Syracuse University, 1980 (1990)

William A. O'Rourke. *Professor of English and Director, University Writing Program.* Bachelor of Arts, Univ of Missouri-Kansas City, 1968; Master of Fine Arts, Columbia University, 1970 (1981)

Janet L. O'Tousa. *Associate Professional Specialist of Accountancy.* B.S. Biology, Univ California Irvine, 1975; Master of Business Admin, University of Notre Dame, 1988 (1988)

Joseph E. O'Tousa. *Professor of Biological Sciences and Associate Chair, Biology.* Bachelor of Science, Univ California Irvine, 1976; Philosophiae Doctor, Univ of Washington, 1980 (1985)

Rev. Paulinus I. Odozor CSSP. *Associate Professor of Theology.* Bachelor of Sacred Theology, Bigard Memorial Seminary, 1984; Doctor of Theology, University of Toronto, 1993; Master of Theology, *ibid.*, 1989 (2000)

Patti J. Ogden. *Librarian of Library Law.* Juris Doctor, Univ of Texas-Austin, 1980 (1991)

Susan C. Ohmer. *Associate Professor of Film, Television, and Theatre and The William T. Carey and Helen Kuhn Carey Chair in Modern Communication and Assistant Provost and Concurrent Associate Professor, American Studies.* Bachelor of Fine Arts, Ohio State University, 1978; Bachelor of Letters, *ibid.*, 1976; Master of Arts, New York University, 1984; Philosophiae Doctor, *ibid.*, 1997 (1998)

Allen G. Oliver. *Research Associate Professor of Chemistry and Biochemistry.* Bachelor of Science, University of Waikato, 1993; Master of Science, *ibid.*, 1994; Philosophiae Doctor, *ibid.*, 2000 (2008)

Maria R. Olivera-Williams. *Associate Professor of Romance Languages and Literature and Fellow, Nanovic Inst for European Studies and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Arts, University Toledo, 1976; Master of Arts, Ohio State University, 1978; Philosophiae Doctor, *ibid.*, 1983 (1982)

T. Mark Olsen. *Associate Professional Specialist of Biological Sciences.* Bachelor of Arts (Latin), Saint Michael's College, 1981; Master of Science, University of Notre Dame, 1989; Philosophiae Doctor, *ibid.*, 1994 (1994)

Abdul R. Omar. *Assistant Professional Specialist of Joan B. Kroc Inst. for Int'l. and Fellow, Joan B. Kroc Inst. for Int'l. Peace.* B.A. Economics, University of Cape Town, 1980; B.A. History, *ibid.*, 1987; Bach of Religious Science, *ibid.*, 1989; Master of Arts, *ibid.*, 1992; Master of Arts, University of Notre Dame, 2001 (2000)

Atalia Omer. *Assistant Professor of Sociology.* Bachelor of Arts, Univ of California Sta Barbara, 1998; Master of Arts, Harvard University, 2002; Philosophiae Doctor, *ibid.*, 2008 (2008)

FACULTY

Kathleen C. Opel. *Associate Professional Specialist of Off-Campus Programs and Director, Off-Campus Programs.* Bachelor of Arts, Pennsylvania State University, 1973; Master of Arts, Fairfield University, 1977 (1999)

Margaret J. Oravez S.S.J.. *Associate Professional Specialist of Theology.* Bachelor of Arts, Chestnut Hill College, 1972; Master of Arts, Fordham University College of, 1981 (2008)

Alexei Orlov. *Research Professor of Electrical Engineering.* Master of Science, Moscow State University, 1983; Philosophiae Doctor, Moscow Inst. Radioengineering, 1990 (1994)

John L. Ott. *Associate Professional Specialist of Aerospace & Mech Engineering.* Bach of Sci in Electrical Engr, Tri-State University, 1998 (1984)

Timothy C. Ovaert. *Professor of Aerospace & Mech Engineering.* Bachelor of Science, Univ of IL Urbana-Champaign, 1981; Master of Engineering, Northwestern University, 1985; Philosophiae Doctor, *ibid.*, 1989 (2000)

Harold L. Pace. *Registrar, Office of the Registrar.* Bachelor of Science, Southern Arkansas University, 1970; Master of Science, East Texas State University, 1971; Philosophiae Doctor, Texas A&M University, 1984 (1991)

Page Jr.. *Associate Professor of Theology and The Walter Chair in Theology of the New Testament and Dean, First Year Of Studies.* Bachelor of Arts, Hampton University, 1977; Master of Arts, Harvard University, 1988; Master of Divinity, General Theological Seminary, 1980; Master of Sacred Theology, *ibid.*, 1983; Philosophiae Doctor, Harvard University, 1990 (1992)

Samuel Paolucci. *Professor of Aerospace & Mech Engineering.* Philosophiae Doctor, Cornell University, 1979; Undeclared, Drexel University, (1989)

Irene J. Park. *Assistant Professor of Psychology.* Bachelor of Arts, Wesleyan University, 1993; Master of Arts, Univ of California Sta Barbara, 1998; Philosophiae Doctor, *ibid.*, 2001 (2003)

Jennifer N. Parker. *Assistant Librarian of University Libraries.* Bachelor of Arts, California State U-Long Beach, 2000; Master of Arts, University of Virginia, 2002; Master of Library & Info Sci, University of Maryland Unvers, 2003 (2008)

Dianne Patnaude. *Associate Professional Specialist of Physical Education.* Master of Science in Admin., University of Notre Dame, 1990 (1978)

Jessica Payne. *Asistant Professor of Psychology.* Bachelor of Arts, University of San Diego, 1995; Master of Arts, Mount Holyoke College, 1999; Philosophiae Doctor, University of Arizona, 2005 (2009)

Molly V. Peeney. *Assistant Professional Specialist of Romance Languages and Literature.* Bachelor of Arts, University of Notre Dame, 1995; Master of Arts, Univ of Wisconsin-Madison, 2000 (2007)

Rev. Robert S. Pelton CSC. *Associate Prof Specialist Emeritus of Kellogg Inst for Intrnl Studie and Fellow, Kellogg Inst For Int'l Studies and Concurrent Professor, Theology and Lanacc Director.* Bachelor of Arts, University of Notre Dame, 1945; Doctor of Sacred Theology, University of Rome, 1952; Licentiate in Sacred Theology, *ibid.*, 1952 (1975)

Adela Penagos. *Assistant Professional Specialist of Office of A&L Undergrad Study and Assistant Dean, Office of Undergraduate Studies.* Bachelor of Arts, Knox College, 1989; Master of Arts, University of Notre Dame, 1992; Philosophiae Doctor, Boston University, 2007 (2008)

Jeffrey W. Peng. *Associate Professor of Chemistry and Biochemistry.* Bachelor of Science, Cornell University, 1987; Philosophiae Doctor, University of Michigan, 1993 (2003)

Jaime M. Pensado. *Assistant Professor of History and Fellow of the Institute for Latino Studies and Fellow of the Helen Kellogg Institute for International Studies.* Bachelor of Arts, California State U Los Angeles, 1997; Master of Arts (Latin), *ibid.*, 2000; Master of Arts (Latin), University of Chicago, 2002; Philosophiae Doctor, *ibid.*, 2008 (2008)

Catherine Perry. *Associate Professor of Romance Languages and Literature and Fellow, Nanovic Inst for European Studies and Fellow, Joan B. Kroc Inst. for Int'l. Peace.* Bachelor of Arts, Indiana Univ-Bloomington, 1987; Master of Arts, *ibid.*, 1989; Master of Arts, Princeton University, 1992; Philosophiae Doctor, *ibid.*, 1995 (1993)

Kathleen A. Peterson. *Associate Professional Specialist of Chemistry and Biochemistry.* Bachelor of Arts, St. Xavier's College, 1965; Master of Science, University of Chicago, 1967 (1980)

Margaret R. Pfeil. *Assistant Professor of Theology and Fellow of the Joan B. Kroc Institute for International Peace Studies.* Bachelor of Arts, University of Notre Dame, 1987; Master of Arts, *ibid.*, 1997; Master of Theological Studies, Weston School of Theology, 1994; Master of Theology, *ibid.*, 1994; Philosophiae Doctor, University of Notre Dame, 2000 (2002)

Michael Pfrender. *Associate Professor of Biological Sciences.* Bachelor of Science, University of Michigan, 1988; Master of Science, *ibid.*, 1992; Philosophiae Doctor, Univ of Oregon, 1998 (2009)

Lara A. Phillips. *Research Assistant Professor of Physics.* Bachelor of Science, McGill University, 1996; Philosophiae Doctor, Princeton University, 2003 (2009)

James D. Philpott. *Associate Professor of Political Science and Fellow, Nanovic Inst for European Studies and Fellow in the Nanovic Institute for European Studies and Associate Professor of Political Science and Peace Studies.* Bachelor of Arts, University of Virginia, 1989; Master of Arts, Harvard University, 1991; Philosophiae Doctor, *ibid.*, 1996 (2001)

Richard B. Pierce. *Associate Professor of History and Fellow, Inst. for Intl. Peace Studies and Endowed John Cardinal O'Hara CSC, Associate Professor.* Bachelor of Arts, Valparaiso University, 1985; Master of Arts, Univ of Wisconsin-Milwaukee, 1988; Philosophiae Doctor, Indiana Univ-Bloomington, 1996 (1996)

Catherine F. Pieronek. *Assistant Professional Specialist of Dean's Office - Engineering and Assistant Dean of Academic Affairs in Engineering.* Bach of Sci in Aerospace Engr, University of Notre Dame, 1984; Juris Doctor, *ibid.*, 1995; Master of Science, UCLA, 1987 (1996)

Barbara A. Pietraszewski. *Assistant Librarian of University Libraries.* Bachelor of Science, University of Notre Dame, 1997; Master of Science, Indiana Univ-Bloomington, 2000 (2009)

Anne B. Pilkington. *Assistant Professional Specialist of Mathematics.* Bachelor of Arts, University College Dublin, 1984; Master of Arts, *ibid.*, 1985; Master of Arts, *ibid.*, 1985; Master of Science, University of Notre Dame, 1989; Philosophiae Doctor, *ibid.*, 1991 (1999)

Carole Pilkinton. *Librarian of University Libraries and Interim Associate Director for ISDA.* Bachelor of Arts, Coe College, 1964; Master in Library Science, Indiana Univ-Bloomington, 1991; Master of Arts, *ibid.*, 1968 (1996)

Mark C. Pilkinton. *Professor of Film, Television, and Theatre.* Bachelor of Science, University of Memphis, 1969; Master of Arts, University of Virginia, 1971; Philosophiae Doctor, University of Bristol, 1975 (1984)

FACULTY

- Dianne M. Pinderhughes.** *Professor of African and African Amer Studi and Fellow, Kellogg Inst for International Studies and Concurrent, Political Science and Concurrent Professor, American Studies.* Bachelor of Arts (Latin), Albertus Magnus College, 1969; Master of Arts (Latin), University of Chicago, 1973; Philosophiae Doctor, *ibid.*, 1977 (2006)
- Dilkushi Pitts.** *Research Assistant Professor of Civil Engr/Geological Sciences.* B.S. Mathematics, Royal College, 1994; Master of Science, Rochester Inst of Technology, 1999; Philosophiae Doctor, Cornell University, 2006 (2009)
- Nathan W. Piwowar.** *Assistant Professional Specialist of Physical Education.* B Science Education, Western Michigan University, 2003 (2008)
- Alvin Plantinga.** *Professor of Philosophy and The Rev. John A. O'Brien Chair in Philosophy (I).* Bachelor of Arts, Calvin College, 1954; Master of Arts, University of Michigan, 1955; Philosophiae Doctor, Yale University, 1958 (1977)
- Victoria A. Ploplis.** *Research Professor of Chemistry and Biochemistry.* Bachelor of Arts, Rosary College, 1975; Philosophiae Doctor, University of Notre Dame, 1981 (1998)
- Carolyn R. Plummer.** *Associate Professor of Music.* Bachelor of Music, Indiana Univ-Bloomington, 1970; Master of Music, New England Conservatory of Mu, 1973 (1989)
- Christian Poellabauer.** *Associate Professor of Computer Science and Engineering.* Doctorate Degree, Georgia Institute of Technolog, 2004 (2004)
- Claudia Polini.** *Professor of Mathematics.* Philosophiae Doctor, Rutgers University, 1995 (2001)
- Morris Pollard.** *Professor Emeritus of Biological Sciences and Director, Lobund Institute.* Doctor of Veterinary Medicine, Ohio State University, 1938; Master of Science, Virginia Polytechnic Institute, 1939; Philosophiae Doctor, Univ of California Berkeley, 1950 (1961)
- Pierpaolo Polzonetti.** *Assistant Professor of Program of Liberal Studies and Fellow, Nanovic Institute.* Bachelor of Arts (Latin), University of Rome, 1995; Master of Arts (Latin), Cornell University, 2001; Philosophiae Doctor, *ibid.*, 2003 (2006)
- Erin D. Ponisciak.** *Assistant Professional Specialist of Dean's Office - First Yr of St.* Bachelor of Science, University of Notre Dame, 2003; Juris Doctor, DePaul University, 2008 (2008)
- Janice M. Poorman.** *Professional Specialist of Theology.* Bachelor of Science, Southern Illinois Univ at Carb, 1976; Master of Arts, University of Notre Dame, 1988; Philosophiae Doctor, *ibid.*, 1996 (1993)
- Donald B. Pope-Davis.** *Professor of Psychology and Fellow, Inst for Educational Initiatives and Fellow, Center for Social Concerns and Faculty Board on Athletics and VP and Associate Provost, Provost Office and Fellow, Kroc Institute for International Peace Studies.* Bachelor of Arts, Benedictine University, 1976; Master of Science, Indiana Univ-Bloomington, 1978; Philosophiae Doctor, Stanford University, 1989 (2000)
- Wolfgang Porod.** *Professor of Electrical Engineering and The Frank M. Freimann Chair in Electrical and Computer Engineering (II) and Fellow in the Nanovic Institute for European Studies.* Master of Science, University of Graz, 1979; Philosophiae Doctor, *ibid.*, 1981 (1986)
- Constance E. Porter.** *Assistant Professor of Marketing.* B.S. Business Administration, Bloomsburg Univ Pennsylvania, 1988; Doctorate of Bus. Admin., Georgia State University, 2004; Master of Business Admin, University of Michigan, 1992 (2004)
- G. Margaret Porter.** *Librarian of University Libraries.* Bachelor of Arts, Indiana Univ South Bend, 1975; Bachelor of Arts, Indiana Univ-Bloomington, 1975; Master Degree - Unspecified, Western Michigan University, 1977; Master in Library Science, *ibid.*, 1977 (1981)
- Jean Porter.** *Professor of Theology and The Rev. John A. O'Brien Chair in Theology.* Philosophiae Doctor, Yale University, 1984 (1990)
- AnnMarie R. Power.** *Associate Professional Specialist of Sociology.* Bachelor of Science, West Chester University, 1974; Master of Arts, University of Notre Dame, 1993; Masters in Education, Boston University, 1977; Philosophiae Doctor, University of Notre Dame, 1999 (1999)
- Clark Power.** *Professor of Program of Liberal Studies and Fellow, Inst for Educational Initiatives and Concurrent Professor, Psychology and Program Director, Play Like a Champion Today.* Bachelor of Arts, Villanova University, 1970; Certificate Program, Harvard University, 1976; Doctorate of Education, *ibid.*, 1979; Master of Arts, Washington Theological Coaliti, 1974 (1982)
- Gerard F. Powers.** *Professional Specialist of Joan B. Kroc Inst. for Intl. and Director, Policy Studies.* Bachelor of Arts (Latin), Princeton University, 1980; Juris Doctor, University of Notre Dame, 1986; Master of Arts, *ibid.*, 1988 (2004)
- Joseph M. Powers.** *Professor of Aerospace & Mech Engineering.* Bachelor of Science, Univ of IL Urbana-Champaign, 1983; Master of Science, *ibid.*, 1985; Philosophiae Doctor, *ibid.*, 1988 (1989)
- Thomas G. Pratt.** *Research Associate Professor of Electrical Engineering.* Bachelor of Science, University of Notre Dame, 1985; Master of Science, Georgia Institute of Technolog, 1989; Philosophiae Doctor, *ibid.*, 1999 (2008)
- Ava Preacher.** *Associate Professional Specialist of Office of A&L Undergrad Study and Associate Director, Ofc. of Dean of Arts & Letters.* Bachelor of Arts, University of Iowa, 1975; Master of Arts, *ibid.*, 1981 (1989)
- Lynette A. Prezyna.** *Associate Professional Specialist of Dean's Office - Science.* Bachelor of Science, Daemen College, ; Master of Science, Rensselaer Polytechnic Institut, ; Philosophiae Doctor, *ibid.*, 1993 (2010)
- Michael J. Pries.** *Associate Professor of Economics and Econometrics.* Bachelor of Arts, University of Notre Dame, 1993; Philosophiae Doctor, Stanford University, 1999 (2007)
- Yael Prizant.** *Assistant Professor of Film, Television, and Theatre and Concurrent Assistant Professor, American Studies.* Bachelor of Arts, Univ of California Sta Barbara, 1995; Master of Fine Arts, Univ of Massachusetts, 2000; Philosophiae Doctor, California State U Los Angeles, 2007 (2008)
- Vera B. Profit.** *Professor of German/Russian Lang & Lit and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Alverno College, 1967; Master of Arts, University of Rochester, 1969; Philosophiae Doctor, *ibid.*, 1974 (1975)
- Tatiana H. Prokrym.** *Assisant Librarian.* Bachelor of Science, Georgetown University, 1979, M.B.A. Michigan State University, 1985 (2010)
- Linda Przybyszewski.** *Associate Professor of History.* Bachelor Degree - Unspecified, Northwestern University, 1984; Doctor of Arts, Stanford University, 1989; Master of Arts, *ibid.*, 1986 (2005)
- William J. Purcell Jr.** *Assistant Professional Specialist of Center for Social Concerns and Associate Director Catholic Social Teaching.* Bachelor of Arts, University of Notre Dame, 1986; Master of Divinity, *ibid.*, 1992 (2005)

FACULTY

J. Keith Rigby Jr. *Associate Professor of Civil Engr/Geological Sciences.* Bachelor of Science, Brigham Young University, 1971; Master of Philosophy, Columbia University, 1974; Philosophiae Doctor, *ibid.*, 1977 (1982)

Kenneth F. Ripple. *Professor of Law School.* Bachelor of Arts, Fordham University, 1965; Juris Doctor, University of Virginia, 1968; Legum Magister, George Washington Univ, 1972 (1977)

Juan M. Rivera. *Associate Professor of Accountancy and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Arts, Inst of Technology Monterrey, 1966; Master of Accounting Science, Univ of IL Urbana-Champaign, 1969; Philosophiae Doctor, *ibid.*, 1975 (1983)

John H. Robinson. *Associate Professor of Law School and Associate Dean, Law School.* Bachelor of Arts, Boston College, 1967; Juris Doctor, Univ of California Berkeley, 1979; Master of Arts, University of Notre Dame, 1972; Philosophiae Doctor, *ibid.*, 1975 (1981)

Mark W. Roche. *Professor of German/Russian Lang & Lit and Fellow, Nanovic Inst for European Studies and The Rev. Edmund P. Joyce, C.S.C., Chair in German Language and Literature and Concurrent Professor, Philosophy.* Bachelor of Arts, Williams College, 1978; Master of Arts, Eberhard Karl Univ of Tubingen, 1980; Philosophiae Doctor, Princeton University, 1984 (1996)

Robert E. Rodes Jr. *Professor of Law School and The Paul J. Schierl / Fort Howard Corporation Chair in Legal Ethics.* Bachelor of Arts, Brown University, 1947; LLB - Law, Harvard University, 1952 (1956)

FACULTY

Marc S. Rodriguez. *Assistant Professor of History and Fellow, Latino Studies and Concurrent Assistant Professor, Law School.* B.A. History, Univ of Wisconsin-Madison, 1993; Bachelor of Arts, Univ of Wisconsin-Milwaukee, 1993; Doctorate Degree, Northwestern University, 2000; Juris Doctor, Univ of Wisconsin-Madison, 2001; Master Degree - Unspecified, Northwestern University, 1994; Master of Arts, *ibid.*, 1994; Philosophiae Doctor, *ibid.*, 2000 (2003)

Ryan K. Roeder. *Associate Professor of Aerospace & Mech Engineering.* Bachelor of Science, Purdue University, 1994; Philosophiae Doctor, *ibid.*, 1999 (2001)

Jeanne Romero-Severson. *Associate Professor of Biological Sciences.* Bachelor of Science, Univ of Wisconsin-Madison, 1974; Master of Science, *ibid.*, 1975; Philosophiae Doctor, *ibid.*, 1984 (1997)

Kevin M. Rooney. *Associate Professional Specialist of Dean's Office - First Yr of St and Associate Dean, Dean-First Year Of Studies.* Bachelor of Arts, University of Notre Dame, 1970; Master of Science, State Univ of NY at Albany, 1973 (1984)

Leon J. Roos. *Professor of Political Science.* Bachelor of Arts, University of Notre Dame, 1965; Master of Arts, University of Chicago, 1968; Philosophiae Doctor, *ibid.*, 1971 (1970)

Jaime Ros. *Professor of Economics and Policy Studies and Fellow, Kellogg Inst for Intrnl Studies.* Master of Arts, Natl Autonomous U of Mexico, 1974; Philosophiae Doctor, University of Cambridge, 1978 (1990)

Sebastian Rosato. *Assistant Professor of Political Science and Fellow, Kroc Institute for International Peace Studies.* Bachelor of Arts, University of Cambridge, 1994; Master of Arts (Latin), University of Chicago, 2000; Master of Philosophy, University of Oxford, 1996; Philosophiae Doctor, University of Chicago, 2005 (2006)

Charles M. Rosenberg. *Professor of Art, Art History, and Design.* Bachelor of Arts, Swarthmore College, 1967; Master of Arts, University of Michigan, 1969; Philosophiae Doctor, *ibid.*, 1974 (1980)

Joseph T. Ross. *Assistant Librarian of University Libraries.* Bachelor of Arts, Lycoming College, 1973; Master in Library Science, Indiana Univ-Bloomington, 1993; Master of Arts, University of Notre Dame, 1991; Master of Theological Studies, Harvard University, 1977 (1996)

Deborah L. Rotman. *Associate Professional Specialist of Anthropology.* Bachelor of Arts, Grand Valley State Univ, 1993; Doctor of Arts, Univ of Massachusetts, 2001; Master of Arts, Western Michigan University, 1995 (2006)

Vincent D. Rougeau. *Professor of Law School and T. J. White Chair.* Bachelor of Arts, Brown University, 1985; Juris Doctor, Harvard University, 1988 (1997)

Ingrid D. Rowland. *Professor of Architecture.* Bachelor of Arts, Pomona College, 1974; Master of Arts (Latin), Bryn Mawr College, 1976; Philosophiae Doctor, *ibid.*, 1980 (2005)

David F. Ruccio. *Professor of Economics and Policy Studies and Fellow, Kroc Institute for International Peace Studies.* Bachelor of Arts, Bowdoin College, 1976; Philosophiae Doctor, Univ of Massachusetts, 1984 (1982)

Randal C. Ruchti. *Professor of Physics.* Bachelor of Science, Univ of Wisconsin-Madison, 1968; Master of Science, Univ of IL Urbana-Champaign, 1970; Philosophiae Doctor, Michigan State University, 1973 (1977)

Steven T. Ruggiero. *Professor of Physics.* Bachelor of Science, Rensselaer Polytechnic Institutu, 1975; Master of Science, Stanford University, 1977; Philosophiae Doctor, *ibid.*, 1981 (1983)

Jason M. Ruiz. *Assistant Professor of American Studies and Fellow, Institute for Latino Studies.* Bachelor of Arts, University of Minnesota, 2001; Philosophiae Doctor, *ibid.*, 2008 (2008)

Fred L. Rush Jr. *Associate Professor of Philosophy and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Washington & Lee University, 1978; Philosophiae Doctor, Columbia University, 1996 (2001)

Maura A. Ryan. *Associate Professor of Theology and Associate Dean, Arts and Letters.* Bachelor of Arts, St. Bonaventure University, 1979; Master of Arts, Boston College, 1987; Master of Philosophy, Yale University, 1990; Philosophiae Doctor, *ibid.*, 1993 (1993)

Abdul M. Saadi. *Assistant Professional Specialist of The Classics and Assistant Teaching Professor.* Bach of Sci in Civil Engr, Aleppo University, 1984; Bachelor of Business Admin., Damascus University, 1990; Doctor of Theology, Lutheran School of Theology, 1999; M.S. Environmental Engr, *ibid.*, 1995; Master of Christian Studies, *ibid.*, 1993 (2002)

Salma Saddawi. *Professional Specialist of Chemical and Biomolecular Eng.* Bachelor of Science, University of Baghdad, 1977; Master of Science, Technical University of Warsaw, 1984; Philosophiae Doctor, *ibid.*, 1989 (1996)

Shafa Saddawi. *Professional Specialist of Physics.* Bachelor of Science, University of Baghdad, 1969; Master of Science, Warsaw University, 1985; Philosophiae Doctor, *ibid.*, 1989 (1997)

Ronald J. Sakal. *Professional Specialist of Architecture.* Bachelor of Architecture, University of IL at Chicago, 1975; Bachelor of Arts, *ibid.*, 1971 (2005)

Mayra J. Sandoval-Cooper. *Associate Professional Specialist of Center For Transgene Research.* Bachelor of Science, Trinity College Burlington, 1984; Specialist, Hartford State Technical Colle, 1987 (1999)

Jonathan R. Sapirstein. *Professor of Physics.* Bachelor of Science, Stanford University, 1973; Philosophiae Doctor, *ibid.*, 1979 (1984)

Daniel J. Saracino. *Assistant Provost for Enrollment.* Bachelor of Arts, University of Notre Dame, 1969; Master of Arts, *ibid.*, 1975 (1997)

Koshala Sarveswaran. *Assistant Professional Specialist of Chemistry and Biochemistry.* B.S. Chemistry, University of Jaffna, 1992; Philosophiae Doctor, University of Cambridge, 1999 (2009)

Ken D. Sauer. *Associate Professor of Electrical Engineering.* Philosophiae Doctor, Princeton University, 1989 (1989)

Valerie L. Sayers. *Professor of English and Concurrent Professor, American Studies.* Bachelor of Arts, Fordham University, 1973; Master of Fine Arts, Columbia University, 1976 (1993)

Kenneth M. Sayre. *Professor of Philosophy.* Bachelor of Arts, Grinnell College, 1952; Master of Arts, Harvard University, 1954; Philosophiae Doctor, *ibid.*, 1958 (1958)

Kevin P. Scanlon. *Associate Professional Specialist of Finance.* Bachelor of Arts, University of Florida, 1975; Master of Business Admin, *ibid.*, 1976; Philosophiae Doctor, *ibid.*, 1985 (1985)

Thomas F. Schaefer. *Professor of Accountancy and The KPMG Chair in Accountancy.* Bachelor of Arts, Northern Illinois Univ, 1974; Master of Accounting Science, Univ of IL Urbana-Champaign, 1976; Philosophiae Doctor, *ibid.*, 1982 (1998)

R. Michael Schafer. *Professional Specialist of Electrical Engineering.* Bachelor of Science, University of Notre Dame, 1975; Master of Science, *ibid.*, 1977; Philosophiae Doctor, *ibid.*, 1980 (1991)

FACULTY

Zachary T. Schafer. *Assistant Professor of Biological Sciences.* Bachelor of Science, University of Notre Dame, 2001; Philosophiae Doctor, Duke University, 2006 (2009)

W. Robert Scheidt. *Professor of Chemistry and Biochemistry and The William K. Warren (III) Foundation Chair in Science.* Bachelor of Science, Univ of Missouri-Columbia, 1964; Master of Science, University of Michigan, 1966; Philosophiae Doctor, *ibid.*, 1968 (1970)

Michael G. Schellinger. *Assistant Professor of Army Science.* Bachelor of Arts, University of Notre Dame, ; Master of Science, Embry-Riddle Aeronautical Univ, (2006)

Diane M. Scherzer. *Associate Professional Specialist of Physical Education.* Bachelor of Science, University Wisconsin La Crosse, 1979; Master of Science, Univ of NC at Greensboro, 1986 (1991)

Sharon K. Schierling. *Professional Specialist of Kellogg Inst for Intrnl Studie and Associate Director, Kellogg Inst for Intrnl Studies.* B.S. General Studies, Louisiana State University, 1985; Master of Arts, *ibid.*, 1988 (1999)

Catherine M. Schlegel. *Associate Professor of The Classics and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, University of Chicago, 1978; Master of Arts, *ibid.*, 1983; Philosophiae Doctor, UCLA, 1994 (1996)

Wendy C. Schlereth. *University Archivist.* Bachelor of Arts, Saint Olaf College, 1970; Master of Arts, University of Iowa, 1972; Philosophiae Doctor, *ibid.*, 1980 (1973)

Steven R. Schmid. *Associate Professor of Aerospace & Mech Engineering.* Bachelor of Science, Illinois Institute of Technolo, 1986; Master of Science, Northwestern University, 1989; Philosophiae Doctor, *ibid.*, 1993 (1993)

Marisha D. Schmidt. *Associate Professional Specialist of Physical Education.* Bachelor of Arts, Purdue University, 1993; Master of Arts, Western Michigan University, 1999 (1999)

James P. Schmiedeler. *Associate Professor of Aerospace & Mech Engineering.* Bachelor of Science, University of Notre Dame, 1996; Master of Science, Ohio State University, 1998; Philosophiae Doctor, *ibid.*, 2001 (2008)

Robert P. Schmuhl. *Professor of American Studies and Annenberg-Joyce Chair in Journalism.* Bachelor of Arts, University of Notre Dame, 1970; Master of Arts, Indiana Univ-Bloomington, 1978; Philosophiae Doctor, *ibid.*, 1978 (1980)

William J. Schmuhl Jr. *Associate Professional Specialist of Accountancy.* Bachelor of Business Admin., University of Notre Dame, 1965; Juris Doctor, *ibid.*, 1967; Master of Business Admin, University of Chicago, 1972 (2001)

William F. Schneider. *Professor of Chemical and Biomolecular Eng and Concurrent Professor, Chemistry and Biochemistry.* B.S. Chemistry, Univ of Michigan-Dearborn, 1986; Doctor of Science, Ohio State Univ-Newark, 1991 (2004)

Jeffrey S. Schorey. *Associate Professor of Biological Sciences.* Bachelor of Science, Southeast Missouri St Univ, 1985; Philosophiae Doctor, Univ of Texas-San Antonio, 1991 (1998)

Paul H. Schultz. *Professor of Finance and The John W. and Maude Clarke Chair in Finance.* Bachelor of Arts, Macalester College, 1978; Master of Business Admin, University of Chicago, 1985; Philosophiae Doctor, *ibid.*, 1988 (1998)

Zachary D. Schultz. *Assistant Professor of Chemistry and Biochemistry.* Bachelor Degree - Unspecified, Ohio State University, 2009; Bachelor of Science, *ibid.*, 2000; Philosophiae Doctor, Univ of IL Urbana-Champaign, 2005 (2009)

Robert A. Schulz. *Professor of Biological Sciences and The Rev. John A. Zahm, C.S.C., Professor of Science.* B.A. Chemistry, UNC at Chapel Hill, 1976; Philosophiae Doctor, Georgetown University, 1981 (2007)

Mark R. Schurr. *Professor of Anthropology and Department Chair, Anthropology.* Bachelor of Science, Purdue University, 1977; Philosophiae Doctor, Indiana Univ-Bloomington, 1989 (1991)

Joshua G. Scott. *Assistant Professional Specialist of Physical Education.* Bachelor of Science, Western Michigan University, 2007; Master of Science, *ibid.*, 2009 (2009)

Siiri S. Scott. *Professional Specialist of Film, Television, and Theatre.* Bachelor of Arts, Saint Mary's College, 1991; Master of Fine Arts, DePaul University, 1994 (1999)

Rev. Timothy R. Scully CSC. *Professor of Political Science and Fellow, Nanovic Inst for European Studies and Director, Institute for Educational Initiatives and Fellow, Kellogg Inst For Int'l Studies.* Bachelor of Arts, University of Notre Dame, 1976; Master of Divinity, *ibid.*, 1979; Master of Divinity, *ibid.*, 1979; Philosophiae Doctor, Univ of California Berkeley, 1989 (1989)

Alan C. Seabaugh. *Professor of Electrical Engineering.* Bach of Sci in Electrical Engr, University of Virginia, 1977; M.S. Electrical Engr, *ibid.*, 1979; Philosophiae Doctor, *ibid.*, 1985 (1999)

James H. Seckinger. *Professor of Law School.* Bachelor of Science, Saint John's University, 1964; Juris Doctor, University of Notre Dame, 1968; Master of Science, Vanderbilt University, 1968 (1974)

Robert P. Sedlack Jr. *Associate Professor of Art, Art History, and Design.* Associate - Unspecified, Indiana Univ-Bloomington, ; Bachelor of Fine Arts, University of Notre Dame, 1989; Master of Fine Arts, Indiana Univ-Bloomington, 1993 (1998)

James A. Seida. *Associate Professor of Accountancy and Bernard J. Hank Professor.* Bachelor of Science, Arizona State University, 1989; Master of Science, Univ of IL Urbana-Champaign, 1990; Philosophiae Doctor, Texas A&M University, 1997 (2001)

Dayle Seidenspinner-Nunez. *Professor of Romance Languages and Literature and Fellow, Nanovic Inst for European Studies and Associate Dean, Arts and Letters.* Bachelor of Arts, Univ of California Berkeley, 1968; Master of Arts, *ibid.*, 1971; Philosophiae Doctor, Stanford University, 1977 (1997)

Steven W. Semes. *Associate Professor of Architecture and The Francis and Kathleen Rooney Chair Architecture and Fellow, The Nanovic Institute for European Studies.* Bachelor Degree - Unspecified, University of Virginia, 1975; Master of Architecture, Columbia University, 1980 (2005)

Mihir Sen. *Professor of Aerospace & Mech Engineering.* Bachelor of Science, Indian Inst of Tech-Madras, 1968; Doctor of Science, Massachusetts Institute of Tec, 1975 (1986)

Jayanta Sengupta. *Assistant Professor of History.* Bachelor of Arts, University of Calcutta, 1982; Master of Arts, *ibid.*, 1987; Philosophiae Doctor, University of Cambridge, 1995 (2007)

Raymond G. Sepeta. *Professional Specialist of Dean's Office - First Yr of St and Concurrent Assistant Professor, Computer Science & Eng.* Bachelor of Science, U. S. Military Academy, 1966; Philosophiae Doctor, University of Notre Dame, 1975 (1975)

Anthony S. Serianni. *Professor of Chemistry and Biochemistry.* Bachelor of Science, Albright College, 1975; Philosophiae Doctor, Michigan State University, 1980 (1982)

FACULTY

David W. Severson. *Professor of Biological Sciences and Director, Eck Institute for Global Health.* Associate in Arts, Rochester Community College, 1970; Bachelor of Arts, Winona State University, 1975; Master of Science, University Wisconsin La Crosse, 1978; Philosophiae Doctor, Univ of Wisconsin-Madison, 1983 (1997)

Slavi C. Sevov. *Professor of Chemistry and Biochemistry.* Bachelor of Science, University of Sofia, 1983; Master of Science, *ibid.*, 1985; Philosophiae Doctor, Iowa State University, 1993 (1995)

Jindal K. Shah. *Research Assistant Professor of Chemical and Biomolecular Eng.* Master of Science, University of Cincinnati, 1999; Philosophiae Doctor, University of Notre Dame, 2005 (2007)

Emad Shahin. *Associate Professor of Political Science.* Bachelor of Arts, The American University in Cai, 1980; Master of Arts, Johns Hopkins University, 1984; Master of Arts, The American University in Cai, 1983; Philosophiae Doctor, Johns Hopkins University, 1989 (2009)

Deborah M. Shamoon. *Assistant Professor of East Asian Langs and Literaturer.* Bachelor of Arts, University of Michigan, 1994; Master of Arts (Latin), Univ of Washington, 1999; Philosophiae Doctor, Univ of California Berkeley, 2005 (2006)

Andrea S. Shappell. *Associate Professional Specialist of Center for Social Concerns and Concurrent Instructor, Theology.* Bachelor of Arts, University of Notre Dame, 1979; Master of Arts, *ibid.*, 1985 (1997)

Linda A. Sharp. *Associate Librarian of University Libraries.* Bachelor of Arts, Univ of IL Urbana-Champaign, 1977; Master in Library Science, Indiana Univ-Bloomington, 1988 (1988)

Mei-Chi Shaw. *Professor of Mathematics.* Philosophiae Doctor, Princeton University, 1981 (1987)

Richard G. Sheehan. *Professor of Finance and Fellow, Inst for Educational Initiatives.* B.S. Economics, Holy Cross College, 1971; Doctorate of Bus. Admin., Boston College, 1978 (1987)

Zhenyu Sheng. *Assistant Professional Specialist of Center For Transgene Research.* Bachelor of Science, Univ of Science and Technology, 1998; Philosophiae Doctor, *ibid.*, 2003 (2008)

Susan G. Sheridan. *Associate Professor of Anthropology.* Bachelor of Arts, University of Maryland, 1984; Master of Arts, *ibid.*, 1986; Philosophiae Doctor, Univ of Colorado-Boulder, 1992 (1992)

John F. Sherman. *Associate Professional Specialist of Art, Art History, and Design and Associate Teaching Professor.* Bachelor of Science, Ball State University, 1979; Master of Fine Arts, Indiana Univ-Bloomington, 1981 (1986)

John F. Sherry Jr. *Professor of Marketing and The Ray W. and Kenneth G. Herrick Chair in Marketing and Department Chair, Marketing.* Bachelor of Arts, University of Notre Dame, 1974; Doctor of Arts, Univ of IL Urbana-Champaign, 1983; Master Degree - Unspecified, *ibid.*, 1978 (2005)

Setsuko Shiga. *Associate Professional Specialist of East Asian Langs and Literaturer and Associate Teaching Professor.* Bachelor of Arts, Nanzan University, 1987; Master of Arts, University of Iowa, 1992 (1996)

Kazuhiko Shinagawa. *Assistant Professional Specialist of Chemistry and Biochemistry.* Bachelor of Science, Osaka University, 1987; Master of Science, *ibid.*, 1989; Philosophiae Doctor, *ibid.*, 2004 (2004)

Sophie A. Shive. *Assistant Professor of Finance.* Bachelor of Science, Cornell University, 1998; Master of Science, *ibid.*, 2000; Philosophiae Doctor, University of Michigan, 2006 (2005)

Denise M. Shorey. *Associate Librarian of University Libraries.* Bachelor of Arts, University of West Indies, 1981; Master in Library Science, Rutgers State University of NJ, 1990 (2008)

Kristin Shrader-Frechette. *Professor of Philosophy and Fellow, Joan B. Kroc Inst. for Int'l. Peace and Concurrent Professor, Biological Sciences and The O'Neill Family Chair in Philosophy.* Bachelor of Arts, Xavier University, 1967; Philosophiae Doctor, University of Notre Dame, 1971 (1998)

Gina V. Shropshire. *Assistant Professional Specialist of Management.* Bachelor of Arts, University of Notre Dame, 1983; Master of Arts, Purdue University, 1993; Philosophiae Doctor, *ibid.*, 1999 (1998)

Joshua Shrout. *Assistant Professor of Civil Engr/Geological Sciences.* Bachelor of Science, Northwestern University, 1994; Master of Science, Marquette University, 1998; Philosophiae Doctor, University of Iowa, 2002 (2007)

David H. Sikkink. *Associate Professor of Sociology and Fellow, Inst for Educational Initiatives and Fellow, Ctr for Research and Ed Opp.* Bachelor of Arts, Bethel College, 1985; Master of Arts, UNC at Chapel Hill, 1994; Philosophiae Doctor, *ibid.*, 1998 (1999)

Stephen E. Silliman. *Professor of Civil Engr/ Geological Sciences and Fellow, Center for Social Concerns and Fellow in the Kellogg Institute for International Studies and Associate Chair, Civil Engineering & Geological Sciences.* Master of Science, University of Arizona, 1981; Philosophiae Doctor, *ibid.*, 1986; Undeclared, Princeton University, 1979 (1986)

Antonio Simonetti. *Research Associate Professor of Civil Engr/Geological Sciences and Concurrent Associate Professor, Civil Engineering & Geological Sciences.* Bachelor of Science, McGill University, 1987; Master of Science, *ibid.*, 1989; Philosophiae Doctor, Carleton University Ottawa, 1994 (2008)

Eric R. Sims. *Assistant Professor of Economics and Econometrics.* Bachelor of Arts, Trinity University, 2003; Master of Arts, University of Michigan, 2006; Philosophiae Doctor, *ibid.*, 2009 (2009)

Indra Deo Singh. *Research Professor of Chemical and Biomolecular Eng.* Bachelor of Science, University of Gorakhpur, 1964; Master of Science, University of Allahabad, 1966; Philosophiae Doctor, University of Gorakhpur, 1972 (2008)

Naunihal Singh. *Assistant Professor of Political Science and Fellow, Inst. For Intl. Peace Studies.* Bachelor of Arts, Yale University, 1992; Doctorate Degree, Harvard University, 2005 (2004)

John Sitter. *Professor of English and Notre Dame Chair, English and Department Chair, English.* Bachelor Degree - Unspecified, Harvard College, 1966; Doctorate Degree, University of Minnesota, 1969 (2004)

Gerald P. Skelton. *Assistant Professor of Film, Television, and Theatre and Fellow in the Nanovic Institute for European Studies.* Bachelor of Science, Babson College, 1987; Master of Fine Arts, DePaul University, 1993 (2004)

Josh Skube. *Associate Professional Specialist of Physical Education.* Bachelor of Science, Indiana Univ-Bloomington, 1998 (2001)

FACULTY

Phillip R. Sloan. *Professor of Program of Liberal Studies and Fellow of Institute, Nanovic Inst for European Studies.* Bachelor of Science, University of Utah, 1960; Master of Arts, Univ California San Diego, 1967; Master of Science, Scripps College, 1964; Philosophiae Doctor, Univ California San Diego, 1970 (1974)

Bradley D. Smith. *Professor of Chemistry and Biochemistry and Endowed Professor, Chemistry and Biochemistry and Director, Notre Dame Integrated Imaging Facility.* Bachelor of Science, University of Melbourne, 1983; Philosophiae Doctor, Pennsylvania State University, 1988 (1991)

Cheryl S. Smith. *Associate Librarian of University Libraries.* Bachelor of Arts, Earlham College, 1988; Master in Library Science, Indiana Univ-Bloomington, 1997 (2000)

Christian Smith. *Professor of Sociology and Endowed Chair, William R. Kenan, Jr. and Director, ND Center for Social Research.* Bachelor of Arts, Gordon College, 1983; Master of Arts (Latin), Harvard University, 1987; Philosophiae Doctor, *ibid.*, 1990 (2006)

David A. Smith. *Associate Professor of Psychology.* Bachelor of Arts, University of Minnesota, 1983; Master of Arts, *ibid.*, 1986; Philosophiae Doctor, SUNY at Stony Brook, 1991 (1997)

Felicia A. Smith. *Associate Librarian Hesburgh Libraries.* Bachelor of Arts, University of IL at Chicago, 1994; Master of Library & Info Sci, Dominican University, 2004 (2007)

Jackie G. Smith. *Associate Professor of Sociology.* Bachelor of Arts, Catholic University of America, 1990; Master of Arts, University of Notre Dame, 1995; Philosophiae Doctor, *ibid.*, 1996 (1996)

Peter H. Smith. *Associate Professor of Music.* Bachelor of Music, The Juilliard School, 1986; Master of Arts, Yale University, 1987; Master of Music, The Juilliard School, 1986; Master of Philosophy, Yale University, 1989; Philosophiae Doctor, *ibid.*, 1992 (1991)

Stephen F. Smith. *Professor of Law School.* Bachelor of Arts, Dartmouth College, 1988; Juris Doctor, University of Virginia, 1992 (2008)

Thomas G. Smith. *Professor of Architecture.* Bachelor of Arts (Latin), Univ of California Berkeley, ; Master of Arts in Architecture, *ibid.*, 1975 (1989)

Vania Smith. *Assistant Professor of Anthropology and Fellow, Helen Kellogg Institute for International Studies.* Bachelor of Arts, Lawrence University, 1998; Master of Arts (Latin), University of Florida, 2001; Philosophiae Doctor, Univ of Illinois-Chicago, 2006 (2006)

Michelle K. Smith Ware. *Assistant Professional Specialist of Dean's Office - First Yr of St.* Bachelor of Science, Xavier University, 2002; Master of Science, Springfield College, 2004 (2008)

John E. Smithburn. *Professor of Law School.* Bachelor of Science, Indiana Univ-Bloomington, 1966; Juris Doctor, *ibid.*, 1973; Master of Arts, *ibid.*, 1969 (1978)

Brian B. Smyth. *Professor of Mathematics.* Bachelor of Science, National Univ of Ireland Dubli, 1961; Master of Science, *ibid.*, 1962; Philosophiae Doctor, Brown University, 1966 (1966)

James Smyth. *Professor of History and Fellow, Nanovic Inst for European Studies and Fellow, Keough Inst. for Irish Studies.* Bachelor of Arts, Trinity College, 1985; Philosophiae Doctor, Queen's College Cambridge, 1989 (1995)

Marina B. Smyth. *Librarian of University Libraries.* Bachelor of Arts, National Univ of Ireland Galwa, 1963; Bachelor of Science, National Univ of Ireland Dubli, 1963; Bachelor of Science, National Univ of Ireland Galwa, 1963; Master of Library & Info Sci, Indiana Univ-Bloomington, 1992; Master of Medieval Studies, University of Notre Dame, 1977; Philosophiae Doctor, *ibid.*, 1984 (1984)

Mary A. Smyth. *Assistant Professor of English and Fellow, Keough Inst. For Irish Studies.* Master of Arts, University of St Andrews, 1986; Philosophiae Doctor, University of Cambridge, 2002 (2000)

Orlando C. Snead. *Associate Professor of Law School.* Bachelor of Arts, Saint Johns College Main Campu, 1996; Juris Doctor, Georgetown University, 1999 (2005)

Gregory L. Snider. *Professor of Electrical Engineering.* Bachelor of Science, Calif St Poly U Pomona, 1983; Master of Science, Univ of California Sta Barbara, 1987; Philosophiae Doctor, *ibid.*, 1991 (1994)

Dennis M. Snow. *Professor of Mathematics.* Bachelor of Science, Merrimack College, 1975; Master of Science, University of Notre Dame, 1977; Philosophiae Doctor, *ibid.*, 1979 (1982)

William D. Solomon. *Associate Professor of Philosophy and The William P. and Hazel B. White Director of the Center for Ethics and Culture and Director, Center for Ethics and Culture.* Bachelor of Arts, Baylor University, 1964; Philosophiae Doctor, Univ of Texas-Austin, 1972 (1977)

Andrew J. Sommese. *Professor of Mathematics and The Vincent J. and Annamarie Micus Duncan Chair in Mathematics and Director, Center for Applied Mathematics.* Bachelor of Arts, Fordham University, 1969; Philosophiae Doctor, Princeton University, 1973 (1979)

Richard P. Sorrentino. *Research Assistant Professor of Biological Sciences.* Bachelor of Arts, New York University, 1988; Master of Arts, City University of New York, 1996; Master of Philosophy, *ibid.*, 2000; Philosophiae Doctor, *ibid.*, 2003 (2009)

Jeffrey J. Speaks. *Associate Professor of Philosophy.* Bachelor of Arts, University of Notre Dame, 1997; Philosophiae Doctor, Princeton University, 2003 (2006)

D. Katherine Spiess. *Associate Professor of Finance.* Philosophiae Doctor, Univ of Missouri-Columbia, 1991 (1991)

Lynette P. Spillman. *Associate Professor of Sociology and Fellow, Helen Kellogg Institute of International Studies.* Philosophiae Doctor, Univ of California Berkeley, 1991 (1991)

Jason A. Springs. *Assistant Professor of Sociology.* Bachelor of Arts, Georgetown University, 1995; Master of Arts, Baylor University, 1996; Master of Divinity, Princeton Theological Seminary, 2000; Philosophiae Doctor, Harvard University, 2005 (2008)

Katherine Sredl. *Assistant Professor of Marketing and Fellow, Nanovic Institute for European Studies and Fellow, Kellogg Institute for International Studies.* Bachelor of Arts, Centre College of Kentucky, 1995; Master of Science, Univ of IL Urbana-Champaign, 2002; Philosophiae Doctor, *ibid.*, 2009 (2009)

Susan M. St. Ville. *Assistant Professional Specialist of Joan B. Kroc Inst. for Int'l.* Bachelor of Arts, University of Notre Dame, 1985; Philosophiae Doctor, University of Chicago, 1996 (2008)

Mark A. Stadtherr. *Professor of Chemical and Biomolecular Eng and the Keating-Crauford Professor of Chemical and Biomolecular Engineering II.* Bachelor of Science, University of Minnesota, 1972; Philosophiae Doctor, Univ of Wisconsin-Madison, 1976 (1996)

FACULTY

- John W. Stamper.** *Professor of Architecture and Associate Dean, Architecture.* Bachelor of Science, Univ of IL Urbana-Champaign, 1973; Master of Architecture, *ibid.*, 1975; Master of Arts, Williams College, 1977; Philosophiae Doctor, Northwestern University, 1985 (1984)
- Joseph B. Stanfiel.** *Assistant Professional Specialist of Dean's Office - Arts & Letters.* Bachelor of Arts, University of Georgia, 1985; Master of Arts, *ibid.*, 1997; Master of Arts, *ibid.*, 1997; Philosophiae Doctor, University of London, 2001 (2001)
- Michael M. Stanisc.** *Associate Professor of Aerospace & Mech Engineering.* Bachelor of Science, Purdue University, ; Philosophiae Doctor, *ibid.*, 1986 (1988)
- Nancy K. Stanton.** *Professor of Mathematics.* Bachelor of Science, Stanford University, 1969; Philosophiae Doctor, Massachusetts Institute of Tec, 1973 (1981)
- Thomas A. Stapleford.** *Associate Professor of Program of Liberal Studies and Concurrent Assistant Professor, History.* Bach of Sci in Mech Engr, University of Delaware, 1997; Bachelor of Arts, *ibid.*, 1997; M.S. Engineering, University of Edinburgh, 1998; Philosophiae Doctor, Harvard University, 2003 (2003)
- Sergei Starchenko.** *Professor of Mathematics.* Master of Science, Novosibirsk University, 1983; Philosophiae Doctor, *ibid.*, 1987 (1997)
- John J. Staud.** *Professional Specialist of Alliance for Catholic Educatio and Sr. Director Pastoral Formation and Administration.* Bach of Sci in Chemical Engr, University of Notre Dame, 1987; Bach of Sci in Chemical Engr, *ibid.*, 1987; Bachelor of Arts, *ibid.*, 1987; Master of Arts, University of Michigan, 1990; Philosophiae Doctor, *ibid.*, 1992 (1996)
- Edward J. Stech.** *Associate Professional Specialist of Physics.* Bachelor of Science, University of Notre Dame, 1995; Master of Science, *ibid.*, 2001; Philosophiae Doctor, *ibid.*, 2004 (1991)
- James P. Sterba.** *Professor of Philosophy and Fellow, The Joan B. Kroc Institute for International Peace Studies.* Bachelor of Arts, La Salle University, 1966; Master of Arts, University of Pittsburgh, 1972; Philosophiae Doctor, *ibid.*, 1973 (1973)
- Gregory E. Sterling.** *Professor of Theology and Dean, The Graduate School.* Bachelor of Arts, Houston Baptist College, ; Master of Arts, Pepperdine University, 1980; Master of Arts, Univ California Davis, 1982; Philosophiae Doctor, Graduate Theological Union, 1990 (1989)
- Marsha Stevenson.** *Librarian of University Libraries.* Master of Arts, Univ of Wisconsin-Madison, 1976 (1990)
- Robert L. Stevenson.** *Professor of Electrical Engineering and Concurrent Professor, Computer Science and Engineering.* Philosophiae Doctor, Purdue University, 1990 (1990)
- Kay L. Stewart.** *Associate Professional Specialist of Freimann Animal Care Facility.* Associate in Applied Science, Purdue University, 1982 (1985)
- John Stiver.** *Associate Professional Specialist of Finance.* B.A. Economics, State Univ of NY-Buffalo, 1993; Doctorate Degree, University of Rochester, 2000; Master of Science, *ibid.*, 1997 (2004)
- Thomas L. Stober.** *Associate Professor of Accountancy.* B.S. Business Administration, Ohio State University, 1974; Master of Business Admin, University of Minnesota, 1975; Philosophiae Doctor, University of Chicago, 1983 (1995)
- Stephan A. Stolz.** *Professor of Mathematics and The Rev. John A. Zahm, C.S.C., Chair in Mathematics.* Bachelor of Science, University of Bielefeld, 1975; Master of Science, Rhenish Friedrich Wilhelm U Bo, 1979; Philosophiae Doctor, Johannes Gutenberg Univ of Mai, 1984 (1986)
- Daniel C. Stowe.** *Associate Professional Specialist of Music and Director, Glee Club and Associate Teaching Professor.* Bachelor of Arts (Latin), Univ California Davis, 1984; Master of Music, Cornell University, 1989; Master of Music, Univ of Southern California, 1986 (1993)
- Sean Straus.** *Assistant Professor of Army Science.* Bachelor of Science, Marquette University, ; Master of Business Admin, Saint Martin's College, (2007)
- Richard B. Strebinger.** *Associate Professional Specialist of Aerospace & Mech Engineering.* Bach of Sci in Mech Engr, Tri-State University, 1981; M.S. Mechanical Engr, Rensselaer Polytechnic Institu, 1983 (1986)

- Philippe Sucusky.** *Assistant Professor of Aerospace & Mech Engineering.* Bachelor of Science, Ecole Nationale Supérieure de, 1999; Master of Science, Georgia Institute of Technology, 2000; Philosophiae Doctor, *ibid.*, 2005 (2008)
- James X. Sullivan.** *Associate Professor of Economics and Econometrics.* Bachelor of Arts, University of Notre Dame, 1993; Master of Arts, Northwestern University, 1997; Philosophiae Doctor, *ibid.*, 2002 (2002)
- Lawrence E. Sullivan.** *Professor of Theology and Concurrent Professor, Anthropology and Fellow, The Kroc Institute for International Peace Studies.* Bachelor of Arts, St. Francis University, 1971; Doctorate Degree, University of Chicago, 1981; Master of Arts, *ibid.*, 1979 (2004)
- Rev. Robert E. Sullivan.** *Associate Professor of History and Fellow, Nanovic Inst for European Studies and Vice President for the Office of Academic Mission Support.* Bachelor of Arts, Oakland University, 1968; Master of Divinity, St. John's Seminary, 1980; Philosophiae Doctor, Harvard University, 1977 (1997)
- Erika M. Summers-Effler.** *Assistant Professor of Sociology.* Bachelor of Arts, University of Notre Dame, 1995; Master of Arts, Univ of Pennsylvania, 1998; Philosophiae Doctor, *ibid.*, 2003 (2004)
- Daewon Sun.** *Assistant Professor of Management.* Bachelor of Business Admin., Korea University, 1994; Master of Business Admin, Bowling Green State University, 1999; Philosophiae Doctor, Pennsylvania St University, 2004 (2004)
- Christopher R. Sweet.** *Research Assistant Professor of Computer Science and Engineeri.* B.S. Mathematics, University of Leicester, 2001; Doctorate Degree, *ibid.*, 2004 (2005)

FACULTY

Alexandros A. Taflanidis. *Assistant Professor of Civil Engr/Geological Sciences.* Bachelor of Arts, Aristotle University of Thessa, 2002; Master of Science, *ibid.*, 2003; Philosophiae Doctor, California Institute of Techno, 2007 (2008)

John C. Tan. *Assistant Professional Specialist of Biological Sciences and Managing Director, Genomics Core Facility.* Bachelor of Science, University of North Carolina A, 2002 (2008)

Wanpeng Tan. *Research Assistant Professor of Physics.* B.S. Physics, Beijing University, 1994; Master of Science, Chinese Academy of Sciences, 2002; Philosophiae Doctor, Michigan State University, 2002 (2010)

Seizo Tanaka. *Research Assistant Professor of Civil Engr/Geological Sciences.* Bachelor of Arts, Chuo University, 1999; Master of Arts, *ibid.*, 2001; Philosophiae Doctor, *ibid.*, 2006 (2008)

Xiao-Dong Tang. *Assistant Professor of Physics.* Bachelor of Science, Nanjing University, 1994; Philosophiae Doctor, Texas A&M University, 2002 (2006)

Jennifer L. Tank. *Professor of Biological Sciences and The Ludmilla E. Stephen J. and Robert T. Galla Chair in Biological Sciences (Collegiate Chair).* Bachelor of Science, Michigan State University, 1988; Master of Science, Virginia Polytechnic Institute, 1992; Philosophiae Doctor, *ibid.*, 1996 (2000)

Carol E. Tanner. *Professor of Physics.* Bachelor of Science, Univ of IL Urbana-Champaign, 1980; Master of Science, Univ of California Berkeley, 1982; Philosophiae Doctor, *ibid.*, 1985 (1990)

Melvin R. Tardy. *Assistant Professional Specialist of Dean's Office - First Yr of St.* Bachelor of Arts, University of Notre Dame, 1986; Master of Business Admin, *ibid.*, 1990; Master of Business Admin, *ibid.*, 1990 (1990)

Katherine A. Taylor. *Research Professor of Biological Sciences and Director of Operations, Eck Institute for Global Health.* B.S. Biology, Purdue University, 1979; Master of Science, University of Notre Dame, 1985; Philosophiae Doctor, Vrije Universiteit Brussel, 1997 (2009)

Laurence R. Taylor. *Professor of Mathematics.* Bachelor of Arts (Latin), Princeton University, 1967; Philosophiae Doctor, Univ of California Berkeley, 1971 (1973)

Richard E. Taylor. *Professor of Chemistry and Biochemistry and Associate Dean, College of Science.* Bachelor of Science, SUNY College at Oswego, 1987; Master of Science, Rensselaer Polytechnic Institu, 1990; Philosophiae Doctor, *ibid.*, 1992 (1995)

Sandra M. Teixeira. *Assistant Professional Specialist of Romance Languages and Literature.* Bachelor of Arts, Pontifical Cath Univ Sao Paulo, 1975; Bachelor of Arts in Education, Faculdade Mozarteum Sao Paulo, 1976; Master of Arts, Pontifical Cath Univ Sao Paulo, 1975 (2007)

Ann E. Tenbrunsel. *Professor of Management and The Arthur F. and Mary J. O'Neil Director of the Institute for Ethical Business Worldwide.* Bachelor of Science, University of Michigan, 1986; Master of Arts, Northwestern University, 1990; Philosophiae Doctor, *ibid.*, 1995 (1995)

Douglas L. Thain. *Associate Professor of Computer Science and Engineering.* Bachelor of Science, Univ of Minnesota of Minneapolis, 1997; Master of Science, Univ of Wisconsin-Madison, 1999; Philosophiae Doctor, *ibid.*, 2004 (2004)

Darin J. Thomas. *Assistant Professional Specialist of Physical Education.* B Science Education, SUNY College at Cortland, 1995; M.S. Education, *ibid.*, 1996 (2005)

David W. Thomas. *Associate Professor of English.* Bachelor of Philosophy, University of North Dakota Mai, 1988; Doctor of Arts, Univ California Davis, 1996; Master of Arts, *ibid.*, 1991 (2005)

Flint O. Thomas. *Professor of Aerospace & Mech Engineering.* Bachelor of Science, Indiana State University Main, ; Philosophiae Doctor, Purdue University, 1983 (1988)

Joseph W. Thomas. *Librarian of Library Law.* Bachelor of Arts, University of Kentucky, 1980; Master of Arts, University of Chicago, 1983 (1989)

Julia A. Thomas. *Associate Professor of History.* Bachelor of Arts (Latin), Princeton University, 1981; Master of Arts, University of Chicago, 1984; Philosophiae Doctor, *ibid.*, 1993 (2001)

Jay H. Tidmarsh. *Professor of Law School.* Bachelor of Arts, University of Notre Dame, 1979; Juris Doctor, Harvard University, 1982 (1989)

Gregory L. Timp. *Professor of Electrical Engineering and Keough-Hesburgh Chair, Electrical Engineering and Keough-Hesburgh Chair, Biological Sciences.* Bach of Sci in Electrical Engr, Univ of IL Urbana-Champaign, 1978; M.S. Electrical Engr, Massachusetts Institute of Tec, 1980; Philosophiae Doctor, *ibid.*, 1984 (2010)

Tsuyoshi Tokusumi. *Research Assistant Professor of Biological Sciences.* Bachelor of Arts, University of Tsukuba, 1991; Philosophiae Doctor, *ibid.*, 1997 (2007)

Maria C. Tomasula. *Professor of Art, Art History, and Design and The Michael P. Grace II Chair in Arts and Letters (Collegiate Chair).* Bachelor of Fine Arts, Univ of Illinois-Chicago, 1987; Master of Fine Arts, Northwestern University, 1989 (1994)

Steve A. Tomasula. *Associate Professor of English.* Bachelor of Science, Purdue University, 1976; Master of Arts, Univ of Illinois-Chicago, 1982; Philosophiae Doctor, *ibid.*, 1995 (1996)

Andrea L. Topash-Rios. *Assistant Professional Specialist of Romance Languages and Literature and Assistant Teaching Professor.* Bachelor of Arts, University of Notre Dame, 1995; Master of Arts, *ibid.*, 1996 (2000)

Zoltan Toroczka. *Professor of Physics and Concurrent Professor in Computer Science and Engineering.* Bachelor of Science, Babes Bolyai University, 1990; Master of Science, *ibid.*, 1992; Philosophiae Doctor, Virginia Polytechnic Institute, 1997 (2006)

Isabelle C. Torrance. *Assistant Professor of The Classics and Fellow, Nanovic Institute.* Philosophiae Doctor, Trinity College, 2004 (2007)

Marta Toth. *Assistant Professional Specialist of Chemistry and Biochemistry.* Bachelor Degree - Unspecified, Jozsef Attila University, 1979; Doctorate Degree, *ibid.*, 1986; M.S. Biology, *ibid.*, 1980; Master of Science, *ibid.*, 1986 (2003)

Alain P. Toumayan. *Associate Professor of Romance Languages and Literature and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Univ of Pennsylvania, ; Philosophiae Doctor, Yale University, 1982 (1989)

Vicki M. Toumayan. *Assistant Professional Specialist of Office of A&L Undergrad Study and Assistant Dean, Office of A&L Undergrad Study.* Master of Philosophy, Yale University, 1987 (1995)

Andres Tovar. *Research Assistant Professor of Aerospace & Mech Engineering.* Bachelor of Science, National University of Colombi, 1995; Master of Science, *ibid.*, 2000; Master of Science, University of Notre Dame, 2004; Philosophiae Doctor, *ibid.*, 2005 (2008)

Elizabeth A. Tuleja. *Associate Professional Specialist of Management.* Bachelor of Arts, University of New Mexico Main, 1984; Masters in Education, Univ of Pennsylvania, 1989; Philosophiae Doctor, *ibid.*, 2000 (2009)

FACULTY

- James C. Turner.** *Professor of History and The Rev. John J. Cavanaugh, C.S.C., Chair in the Humanities.* Bachelor of Arts, Harvard University, 1968; Master of Arts, *ibid.*, 1971; Philosophiae Doctor, *ibid.*, 1975 (1995)
- Julianne C. Turner.** *Associate Professor of Psychology and Fellow, Inst for Educational Initiatives.* Bachelor Degree - Unspecified, College of New Rochelle, 1968; Doctorate Degree, Boston College, 1984; Masters in Education, Boston University, 1975; Philosophiae Doctor, University of Michigan, 1992 (1995)
- Barbara M. Turpin.** *Professional Specialist of Off. of Grad Studies & Resear and Associate Dean, VP Graduate Studies and Research.* Bachelor of Arts (Latin), Emmanuel College, 1972; Master of Arts, Univ of Wisconsin-Madison, 1974; Master of Arts, University of Notre Dame, 1977; Philosophiae Doctor, *ibid.*, 1980 (1980)
- Eugene C. Ulrich.** *Professor of Theology and The Rev. John A. O'Brien Chair in Theology (IV).* Licentiate in Philosophy, Loyola University Chicago, 1964; Master of Arts, Harvard University, 1967; Philosophiae Doctor, *ibid.*, 1975 (1973)
- Joel E. Urbany.** *Professor of Marketing.* Bachelor of Science, Ohio State University, 1980; Master of Science, *ibid.*, 1983; Philosophiae Doctor, *ibid.*, 1984 (1994)
- Sergei Vakulenko.** *Research Associate Professor of Chemistry and Biochemistry.* M.S. Environmental Design, Pavlov State Medical Univ., 1976; Philosophiae Doctor, Nat. Res. Ctr. of Antibiotics, 1981 (2003)
- Jacqueline P. Valadez.** *Assistant Professional Specialist of Alliance for Catholic Educatio and Fellow, Institute for Educational Initiatives.* B.S. Education, Texas State Univ - San Marcos, 1988; Doctorate of Education, Texas A&M University, 1998; Master of Arts Education, Texas State Univ - San Marcos, 1994 (2004)
- Kristin Valentino.** *Assistant Professor of Psychology.* Bachelor of Arts, Georgetown College, 2002; Master of Arts, University of Rochester, 2005; Philosophiae Doctor, *ibid.*, 2007 (2009)
- J. Samuel Valenzuela.** *Professor of Sociology and Fellow, Kellogg Inst for Intrnl Studies.* Philosophiae Doctor, Columbia University, 1979 (1986)
- Barry J. Van Dyck.** *Professional Specialist of Executive MBA.* B.S. Biology, University of Cincinnati, 1970; Master Degree - Unspecified, University of North Dakota Mai, 1977; Master of Business Admin, University of Notre Dame, 1986; Philosophiae Doctor, Indiana State University Main, 1980 (1991)
- John H. Van Engen.** *Professor of History and The Andrew V. Tackes Chair in History.* Bachelor of Arts, Calvin College, 1969; Philosophiae Doctor, Univ of California Berkeley, 1976 (1977)
- Chris R. Vanden Bossche.** *Professor of English and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, University of Notre Dame, 1972; Philosophiae Doctor, Univ California Santa Cruz, 1982 (1984)

- Michael A. Villano.** *Research Assistant Professor of Psychology.* Bachelor of Arts, University of Notre Dame, 1983; Master of Arts, New York University, 1986; Philosophiae Doctor, *ibid.*, 1991 (2006)
- Juan M. Vitulli.** *Assistant Professor of Romance Languages and Literature and Fellow of The Helen Kellogg Institute for International Studies and Fellow in the Nanovic Institute for European Studies.* Bachelor of Arts, National University of Rosario, 2000; Master of Arts, Vanderbilt University, 2005; Philosophiae Doctor, *ibid.*, 2007 (2007)
- Patrick L. Vivirito.** *Associate Professional Specialist of Romance Languages and Literature.* B.S. Criminal Justice, Loyola University Chicago, 1997; Bachelor of Arts, *ibid.*, 1997; Master of Arts, University of Notre Dame, 2002 (2009)
- Sergey I. Voropayev.** *Research Professor of Civil Engr/Geological Sciences.* Master of Science, Moscow Institute of Technology, 1970; Philosophiae Doctor, Russian Academy of Sciences, 1980 (2010)
- Diane R. Wagner.** *Assistant Professor of Aerospace & Mech Engineering.* Bach of Sci in Mech Engr, University of Michigan, 1989; Doctor of Engineering, Univ of California Berkeley, 2002 (2005)
- Peter N. Wallensteen.** *Research Professor of History and Starmann Sr. Research Chair in Peace Studies.* Master of Arts, Uppsala Universitet, 1976; Philosophiae Doctor, *ibid.*, 1969 (2009)

FACULTY

Christopher J. Waller. *Professor of Economics and Econometrics and The Gilbert F. Schaefer Chair in Economics and Fellow, Kellogg Inst for Intrnl Studies.* Bachelor of Arts, Bemidji State University, 1981; Master of Arts, Washington State University, 1984; Philosophiae Doctor, *ibid.*, 1985 (2003)

Haitao Wang. *Research Assistant Professor of Computer Science and Engineering.* Bachelor of Engineering, East China Institute of Chemic, 2003; M.S. Computer Sci and Engr, Fudan University, 2006 (2006)

Lijuan Wang. *Assistant Professor of Psychology.* Bachelor of Science, Renmin University Beijing, 2000; Master of Arts, University of Virginia, 2006; Master of Science, Renmin University Beijing, 2003; Philosophiae Doctor, University of Virginia, 2008 (2008)

Meng Wang. *Associate Professor of Aerospace & Mech Engineering.* B.S. Engineering Science, Zhejiang University, 1982; Doctor of Engineering, Univ of Colorado-Boulder, 1989; M.S. Mechanical Engr, *ibid.*, 1985 (2006)

Tao Wang. *Research Assistant Professor of Electrical Engineering.* Bachelor of Science, University of Science & Techno, 1984; Master of Science, Louisiana State University, 2000; Master of Science, Xian Institute of Metallurgy &, 1989; Philosophiae Doctor, Univ of Wisconsin-Madison, 2009 (2009)

Yanjing Wang. *Assistant Professional Specialist of East Asian Langs and Literatur and Assistant Teaching Professor.* Bachelor of Arts, Nanjing University, 2002; Master of Arts, Univ of Colorado-Boulder, 2006 (2008)

Jadwiga Warchol. *Research Professor of Physics.* Bachelor of Science, University of Warsaw, 1962; Master of Science, *ibid.*, 1963; Philosophiae Doctor, *ibid.*, 1969 (1984)

Ted A. Warfield. *Professor of Philosophy.* Bachelor of Arts, University Arkansas Fayettevil, 1991; Philosophiae Doctor, Rutgers Univ Douglass College, 1995 (1994)

Jennifer L. Warlick. *Associate Professor of Economics and Policy Studies and Fellow, Inst. For Intl. Peace Studies and Department Chair, Economics and Policy Studies.* Bachelor of Arts, Duke University, 1972; Master of Arts, Univ of Wisconsin-Madison, 1975; Philosophiae Doctor, *ibid.*, 1979 (1982)

Stephen H. Watson. *Professor of Philosophy and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, Carroll College, 1972; Master of Arts, Duquesne University, 1975; Philosophiae Doctor, *ibid.*, 1980 (1983)

Joseph P. Wawrykow. *Associate Professor of Theology.* Bachelor of Arts, University of Manitoba, 1978; Master of Arts, *ibid.*, 1980; Master of Arts, Yale University, 1981; Master of Philosophy, *ibid.*, 1985; Philosophiae Doctor, *ibid.*, 1988 (1986)

Mitchell R. Wayne. *Professor of Physics and Department Chair, Physics.* Bachelor of Science, UCLA, 1977; Master of Science, *ibid.*, 1980; Philosophiae Doctor, *ibid.*, 1985 (1991)

Hannelore H. Weber. *Associate Professional Specialist of German/Russian Lang & Lit and Associate Teaching Professor.* Bachelor of Arts, Mount Mary College, 1968; Master of Arts, University of Notre Dame, 1994 (1991)

John A. Weber. *Associate Professor of Marketing.* Bachelor of Arts, Marquette University, 1964; Philosophiae Doctor, Univ of Wisconsin-Madison, 1970 (1969)

Jerry C. Wei. *Associate Professor of Management.* Philosophiae Doctor, Texas A&M University, 1987 (1987)

Andrew J. Weigert. *Professor of Sociology and Fellow, Inst. For Intl. Peace Studies.* Master of Arts, Saint Louis University, 1960; Philosophiae Doctor, University of Minnesota, 1968 (1968)

Henry M. Weinfeld. *Professor of Program of Liberal Studies and Concurrent Professor, English and Fellow, Nanovic Inst for European Studies.* Bachelor of Arts, City College of New York, 1970; Master of Arts, State Univ of NY--Binghamton, 1973; Philosophiae Doctor, City University of New York, 1985 (1991)

Paul J. Weithman. *Professor of Philosophy and Fellow, Kroc Institute for International Peace Studies.* Bachelor of Arts, University of Notre Dame, 1981; Philosophiae Doctor, Harvard University, 1988 (1990)

Michael R. Welch. *Professor of Sociology.* Bachelor of Arts, Le Moyne College, 1972; Master of Arts, UNC at Chapel Hill, 1975; Philosophiae Doctor, *ibid.*, 1980 (1981)

John P. Welle. *Professor of Romance Languages and Literatu and Fellow, Nanovic Inst for European Studies and Concurrent Professor, Film, Television, & Theatre.* Bachelor of Arts, Saint John's University, 1974; M.A. Teaching, St Thomas College, 1975; Master of Arts, Indiana Univ-Bloomington, 1980; Philosophiae Doctor, *ibid.*, 1983 (1983)

Thomas A. Werge. *Professor of English.* Bachelor of Arts, Hope College, 1963; Master of Arts, Cornell University, 1964; Philosophiae Doctor, *ibid.*, 1967 (1967)

Sean P. Wernert. *Assistant Professional Specialist of Dean's Office - First Yr of St.* Bachelor of Arts, Xavier University, 2002; Master of Arts, University Toledo, 2008 (2008)

Sarah E. West. *Assistant Professional Specialist of Chemistry and Biochemistry.* Bachelor of Arts, Augustana College, 1996 (1998)

Joannes J. Westerink. *Professor of Civil Engr/ Geological Sciences and Concurrent Associate Professor, Mathematics.* Bachelor of Science, State Univ of NY- Buffalo, ; Master of Science, *ibid.*, ; Philosophiae Doctor, Massachusetts Institute of Tec, 1984 (1990)

Carroll W. Westfall. *Professor of Architecture and The Francesco Montana Chair in Architecture.* Bachelor of Arts, Univ of California Berkeley, 1961; Master of Architecture, University of Manchester, 1963; Philosophiae Doctor, Columbia University, 1967 (1998)

Michelle A. Whaley. *Associate Professional Specialist of Biological Sciences.* Bachelor of Arts, Scripps College, 1987; Philosophiae Doctor, University of Notre Dame, 1993 (1993)

Kevin Whelan. *Professional Specialist of Dublin and The Smurfit Director of the Keough-Notre Dame Study Centre, Ireland.* Bachelor of Arts, University College Dublin, 1978; Philosophiae Doctor, National Univ of Ireland Dubli, 1981 (1998)

Sophie K. White. *Assistant Professor of American Studies.* Doctor of Arts, Courtauld Institute of Art, 2000; Master of Arts, *ibid.*, 1993 (2001)

Thomas L. Whitman. *Professor of Psychology.* Bachelor of Science, St. Norbert College, 1962; Master of Arts, Univ of IL Urbana-Champaign, 1965; Philosophiae Doctor, *ibid.*, 1967 (1967)

Todd D. Whitmore. *Associate Professor of Theology and Fellow of the Joan B. Kroc Inst. for Intl. Peace Studies and Concurrent Associate Professor, MNA Program and Concurrent Instructor, MNA Program.* Philosophiae Doctor, University of Chicago, 1990 (1990)

Michael C. Wiescher. *Professor of Physics and Fellow, Center for Social Concerns and The Frank M. Freimann Chair in Physics (II) and Director, Joint Institute for Nuclear Astrophysics.* Bachelor of Arts, University of Munster, 1972; Master of Arts, *ibid.*, 1975; Philosophiae Doctor, *ibid.*, 1980 (1986)

Olaf G. Wiest. *Professor of Chemistry and Biochemistry.* Diploma, University of Bonn, 1991; Philosophiae Doctor, *ibid.*, 1993 (1995)

FACULTY

Steven M. Wietstock. *Associate Professional Specialist of Chemistry and Biochemistry.* B.S. Chemistry, Alma College, 1982; Philosophiae Doctor, Uniformed Services Health Sci., 1988 (2005)

William L. Wilkie. *Professor of Marketing and The Aloysius and Eleanor Nathe Chair in Marketing Strategy.* Bachelor of Business Admin., University of Notre Dame, 1966; Master of Business Admin, Stanford University, 1969; Philosophiae Doctor, *ibid.*, 1971 (1987)

John Wilkinson. *Research Professor of English.* Bachelor of Arts, University of Cambridge, 1975; Master of Arts, *ibid.*, 1978 (2007)

Edward B. Williams. *Professor of Mathematics.* Bachelor of Science, Massachusetts Institute of Tec, 1967; Philosophiae Doctor, *ibid.*, 1972 (1975)

Rev. Oliver F. Williams CSC. *Associate Professor of Management and Fellow, Joan B. Kroc Inst. For Int'l Peace.* Bachelor of Science, University of Notre Dame, 1961; Master of Arts, *ibid.*, 1969; Philosophiae Doctor, Vanderbilt University, 1974 (1973)

Richard A. Williams. *Associate Professor of Sociology.* Bachelor of Arts, Creighton University, 1977; Master of Science, Univ of Wisconsin-Madison, 1981; Philosophiae Doctor, *ibid.*, 1986 (1986)

Shauna L. Williams. *Associate Professional Specialist of Romance Languages and Literature.* Bachelor of Arts, Evangel College, 1989; Master of Arts Education, Indiana Univ South Bend, 2002 (2004)

Albert K. Wimmer. *Associate Professor of German/Russian Lang & Lit and Fellow, Nanovic Inst for European Studies.* Master of Arts, University of Notre Dame, 1964; Master of Arts, *ibid.*, 1967; Philosophiae Doctor, Indiana Univ-Bloomington, 1975 (1964)

Abraham Winitzer. *Assistant Professor of Theology.* Bachelor of Arts, Brandeis University, 1992; Master of Arts, *ibid.*, 1995; Philosophiae Doctor, Harvard University, 2006 (2008)

Damrongsak Wirasaet. *Research Assistant Professor of Civil Engr/Geological Sciences.* Bachelor of Engineering, King Mongkut's Inst of Tech-Th, 1997; M.S. Mechanical Engr, University of Notre Dame, 2005; Master of Engineering, King Mongkut's Inst of Tech-Th, 1999 (2008)

Michelle M. Wirth. *Assistant Professor of Psychology.* Bachelor of Arts, Swarthmore College, 1999; Master of Arts, University of Michigan, 2003; Philosophiae Doctor, *ibid.*, 2006 (2009)

Mark Wistey. *Assistant Professor of Electrical Engineering.* Bachelor of Science, Montana State University, 1994; Master of Science, Stanford University, 1999; Philosophiae Doctor, *ibid.*, 2004 (2009)

James L. Wittenbach. *Professor of Accountancy.* Bachelor of Science, Ferris State University, 1965; Doctorate of Bus. Admin., Univ of Oklahoma-Norman, 1972; Master of Business Admin, Michigan State University, 1967 (1972)

Pamela Wojcik. *Associate Professor of Film, Television, and Theatre; Director, Gender Studies (2009–2012).* B.A., Wellesley College, 1986; M.A., University of Chicago, 1988; Ph.D., *ibid.*, 1993 (1998)

Christina K. Wolbrecht. *Associate Professor of Political Science.* Bachelor of Arts, Pacific Lutheran University, 1992; Master of Arts, Washington University, 1994; Philosophiae Doctor, *ibid.*, 1997 (1997)

Eduardo E. Wolf. *Professor of Chemical and Biomolecular Eng.* Bachelor of Science, University of Chile, 1969; Master of Science, Univ California Davis, 1972; Philosophiae Doctor, Univ of California Berkeley, 1975 (1975)

Martin H. Wolfson. *Associate Professor of Economics and Policy Studies and Fellow, Inst. For Intl. Peace Studies.* Bachelor of Arts, Swarthmore College, 1966; Master of Arts, American University, 1975; Philosophiae Doctor, *ibid.*, 1984 (1989)

Pit-Mann Wong. *Professor of Mathematics.* Bachelor of Science, National Taiwan University, 1971; Philosophiae Doctor, University of Notre Dame, 1976 (1980)

Carolyn Y. Woo. *Professor of Management and Dean, Mendoza College of Business and Martin J. Gillen Dean and Ray and Milann Siegfried Chair in Entrepreneurial Studies.* Bachelor of Science, Purdue University, 1975; Master of Science, *ibid.*, 1976; Philosophiae Doctor, *ibid.*, 1979 (1997)

Charles A. Wood. *Assistant Professor of Management.* Bachelor of Science, Ball State University, 1986; Master of Business Admin, Butler University, 1997; Philosophiae Doctor, University of Minnesota, 2002 (2001)

Abigail K. Wozniak. *Assistant Professor of Economics and Econometrics.* Bachelor of Arts (Latin), University of Chicago, 1998; Master of Arts (Latin), Harvard University, 2003; Philosophiae Doctor, *ibid.*, 2005 (2005)

Timothy E. Wright. *Research Assistant Professor of Computer Science and Engineering.* Bachelor of Arts, Indiana Univ South Bend, 1991; M.S. Computer Sci and Engr, Univ of NC-Charlotte, 2000; Philosophiae Doctor, University of Notre Dame, 2009 (2009)

Frederico J. Xavier. *Professor of Mathematics.* Bachelor of Science, Fed Univ of Pernambuco Recife, 1971; Master of Science, *ibid.*, 1973; Philosophiae Doctor, University of Rochester, 1977 (1985)

Yu Xie. *Research Assistant Professor of Mathematics.* Bachelor of Science, East China Normal University, 1996; Master of Science, Sichuan University, 1999 (2009)

Huili Xing. *Associate Professor of Electrical Engineering.* Bach of Sci in Electrical Engr, Peking University, 1996; Doctor of Engineering, Univ of California Sta Barbara, 2003; M.S. Electrical Engr, Lehigh University, 1998 (2004)

Zhiliang Xu. *Assistant Professor of Mathematics.* Bach of Sci in Mech Engr, Beijing University, 1994; M.S. Mechanical Engr, *ibid.*, 1997; Philosophiae Doctor, SUNY at Stony Brook, 2002 (2006)

Vineeta Yadav. *Assistant Professor of Political Science.* B.S. Economics, Univ of Wisconsin-Madison, 1995; M.S. Applied Mathematics, *ibid.*, 1999; Philosophiae Doctor, Yale University, 2006 (2007)

Xiaoshan Yang. *Associate Professor of East Asian Langs and Literaturer.* Bachelor of Arts, Anhui Normal University, 1982; Master of Arts, Peking University, 1985; Philosophiae Doctor, Harvard University, 1994 (1997)

Nejla Y. Yarkin. *Associate Professional Specialist of Film, Television, and Theatre.* Master of Arts, The Etage, 1993 (2008)

Chengxu Yin. *Associate Professional Specialist of East Asian Langs and Literaturer and Assistant Teaching Professor.* Bachelor of Arts, Peking University, 1984; Master of Arts, Univ of Massachusetts, 1990 (2000)

Susan L. Youens. *Professor of Music and J.W. Van Gorkom Professor of Music.* Bachelor of Music, Southwestern University, 1969; Master of Arts, Harvard University, 1971; Philosophiae Doctor, *ibid.*, 1975 (1984)

FACULTY

Samir Younes. *Associate Professor of Architecture.* Bachelor of Science, University of Texas at Dallas, 1981; Master of Architecture, *ibid.*, 1984 (1991)

Robin D. Young. *Associate Professor of Theology.* Bachelor of Arts, Mary Washington College, 1972; Master of Arts, University of Chicago, 1975; Philosophiae Doctor, *ibid.*, 1981 (2002)

Jennifer A. Younger. *Librarian of University Libraries and Edward H. Arnold Director of Libraries.* Bachelor of Arts, Univ of Wisconsin-Madison, 1969; Master of Arts, *ibid.*, 1971; Philosophiae Doctor, *ibid.*, 1990 (1997)

Ke-Hai Yuan. *Professor of Psychology.* Bachelor of Science, Beijing Institute of Technolog, 1985; Master of Arts, *ibid.*, 1988; Philosophiae Doctor, UCLA, 1995 (2001)

Hayong Yun. *Assistant Professor of Finance.* Bach of Sci in Mech Engr, Seoul National University, 1991; M.S. Mechanical Engr, Massachusetts Institute of Tec, 1993; Master of Philosophy, Columbia University, 2004; Philosophiae Doctor, *ibid.*, 2006; Philosophiae Doctor, Massachusetts Institute of Tec, 1995 (2006)

Randall C. Zachman. *Professor of Theology.* Philosophiae Doctor, University of Chicago, 1990 (1991)

Jaroslav Zajicek. *Professional Specialist of Chemistry and Biochemistry.* Bachelor of Science, Czech Tech. Univ. of Prague, 1970; Philosophiae Doctor, Charles University Praha, 1980 (1995)

William F. Zech. *Assistant Professional Specialist of Physics.* Associate in Science, Lake Michigan College, 1999; Bachelor of Science, Indiana Univ South Bend, 2002; Master of Science, University of Notre Dame, 2005; Master of Science, *ibid.*, ; Philosophiae Doctor, *ibid.*, 2009 (2009)

Erliang Zeng. *Research Assistant Professor of Computer Science and Engineeri.* Bachelor of Science, Shanghai Jiao Tong University, 1998; Master of Science, Florida International Universi, 2007; Master of Science, Shanghai Jiao Tong University, 2001; Philosophiae Doctor, Florida International Universi, 2008 (2009)

Guangjian Zhang. *Assistant Professor of Psychology.* Bachelor of Medicine, Tianjin Medical College, 1994; Master of Science, Ohio State University, 2004; Masters in Education, Beijing University, 1999; Philosophiae Doctor, Ohio State University, 2006 (2006)

Yongtao Zhang. *Assistant Professor of Mathematics.* Bachelor of Mathematics, Nankai University, 1996; Master of Science, *ibid.*, 1999; Philosophiae Doctor, Brown University, 2003 (2006)

Zhiyong Zhang. *Research Assistant Professor of Psychology.* Bachelor of Science, Renmin University Beijing, 2000; Master of Arts, University of Virginia, 2005; Master of Science, Renmin University Beijing, 2003 (2008)

Xuying Zhao. *Assistant Professor of Management.* Bachelor of Science, Zhejiang University, 2000; Master of Science, University of Texas at Dallas, 2005; Philosophiae Doctor, Zhejiang University, 2007 (2007)

Wei Zhu. *Research Assistant Professor of Mathematics.* Bachelor of Science, University of Science & Techno, 2003; Philosophiae Doctor, Rice University, 2007 (2008)

Yingxi E. Zhu. *Associate Professor of Chemical and Biomolecular Engineering.* Bachelor of Science, Tsinghua University, 1997; Doctorate Degree, Univ. of Illinois -Springfield, 2001 (2004)

Katherine G. Ziemann. *Assistant Professor of English.* Bachelor of Arts (Latin), Oberlin College, 1989; Bachelor of Music, *ibid.*, 1989; Philosophiae Doctor, Univ of California Berkeley, 1997 (2006)

Catherine H. Zuckert. *Professor of Political Science and Fellow, Nanovic Inst for European Studies and The Nancy Reeves Dreux Chair in Political Science.* Bachelor of Arts (Latin), Cornell University, 1964; Master of Arts, University of Chicago, 1967; Philosophiae Doctor, *ibid.*, 1970 (1998)

Michael P. Zuckert. *Professor of Political Science and Fellow, Nanovic Inst for European Studies and The Nancy Reeves Dreux Chair in Political Science.* Bachelor of Arts, Cornell University, 1964; Philosophiae Doctor, University of Chicago, 1974 (1998)

Peter van Inwagen. *Professor of Philosophy and Fellow, Nanovic Inst for European Studies and The John Cardinal O'Hara Chair in Philosophy.* Bachelor of Science, Rensselaer Polytechnic Institu, 1965; Philosophiae Doctor, University of Rochester, 1969 (1995)

First Year of Studies

FYS 00500. Balfour Program

(12-0-2) Chamblee

The Balfour-Hesburgh Scholars Program is designed to help students make a successful initial transition from high school to university-level academic work and campus life. The centerpiece of the Program is a summer academic experience, during which students who have been accepted into the First Year of Studies spend four weeks taking introductory, college-level courses in composition, calculus, finite mathematics, chemistry, biological sciences, and physics. Students learn to identify and apply appropriate learning strategies to maximize their performance in courses. They learn to navigate the physical campus and various academic and social resources, and meet faculty who introduce them to diverse disciplines and research. The Program also helps students to establish peer-group support, upon which they can rely during the academic year. Permission is required to register for the Program.

FYS 00501. Balfour-Hesburgh Scholars Program—Fall Session

(0.5-0-1) Chamblee

The Balfour-Hesburgh Scholars Program (Fall Session) is designed to follow-up with Balfour Scholars after their participation in the summer program. Topics include academic and social adjustment, learning strategies, undergraduate research, and course selection for spring. Dates/Class Time: 2 hours monthly (dates TBD), September–December, Learning Resource Center, Coleman-Morse. Credit Hours: 1.

FYS 10107. Contemplation and the First-Year Experience

(2-0-1) Page

This one-credit course has, as its primary learning objective, enabling students in their first year of college to incorporate a range of contemplative practices into academic life. It will employ three educational modalities: 1) classroom and experiential exposure to a selection of those activities noted in the Center for Contemplative Mind in Society's *Tree of Contemplative Practices*; 2) an introduction to select disciplines that stimulate embodied contemplation and promote awareness of the natural, social, and academic environment into which undergraduates are embedded—e.g., wandering the library “stacks”; contemplative reading; poetry writing; photography; and martial arts that encourage hard, soft, and spontaneous movement; and 3) guided reflection on nine specific educational maxims that seek to promote integrated learning during the initial year of post-secondary education.

FYS 10108. Let Your Life Speak: Listening for Your Calling

(1-0-1) White

This one-credit experiential course focuses on students discerning a sense of call in their lives at Notre Dame and beyond. The course will encourage the engagement of such questions as: What is a calling? Who am I uniquely? What are my particular talents, gifts and strengths? What is the role of work in the human life? and How does service relate to work and calling? Students will a) explore the concept of calling (e.g., universal call to faith and service and the vocational call to use one's joys and gifts to meet the world's needs), b) engage in theological listening and discernment, c) further develop personal awareness, and d) set relevant short- and long-term goals (e.g., academic major, post-college plans). The course will draw upon biblical and theological texts, spiritual exercises, films, stories, self-analysis, and psychological inventories.

FYS 10109. Film and Analysis of Choice

(2-0-1) Wernert

This fun, one-credit voluntary course will focus on the student's capacity to make decisions with an eye toward how those decisions impact their life. The course will use a variety of classic and contemporary films to prompt analysis and discussion on life choices. In-depth discussion on the decision-making process, and analysis

of those decisions will be central to the course. Students will be asked through writing and group discussion to reflect on their own life choices including, but not limited to, social choices, academic course and major choices, volunteer and research activity choices, etc. Students completing this class will have a better appreciation of the decision-making process and how it impacts their own life choices.

FYS 10151. E-Portfolio Seminar

(1.5-0-1) Martin

Teaching 21st-century communications literacy, even to “Internet natives,” is one of the University's responsibilities. To assist in this effort, this one-credit seminar allows a small number of upper-level students to collaborate with the course instructors in designing a blended First Year of Studies course, Introduction to E-Portfolios, that will be offered to incoming first year students in the fall. Students in the E-Portfolio Seminar will be asked to collaborate with the instructors in designing and testing e-portfolio assignments and projects for the future Introduction to E-Portfolios course. Through assigned reading, discussion, group and individual projects, students will help to design a course that will assist first year students in forming, assessing, and demonstrating their progress toward their academic goals (learning objectives) while also building their own e-portfolios (on-line résumés). Students will complete the E-Portfolio Seminar with a detailed knowledge of e-portfolio design and best practices, as well as with their own well-constructed e-portfolios.

FYS 10161. Introduction to Webfolios

(1-0-1) Martin

In this one-credit course students will work with their First Year advisors to design and develop their own web-based learning portfolio. The course will proceed as a hybrid course, utilizing both online and face-to-face instruction. The students' webfolios will be used to reflect on learning, document skills, set goals, make academic plans, and explore areas of interest. Before the end of the semester, students will modify their learning portfolios to make them showcase portfolios (digital résumés) that can be used as the basis of conversations with departmental advisors as well as in applying for internships, research grants, summer positions, graduate schools, and/or first jobs.

FYS 10190. Advanced Strategies for Discipline Specific Study

(2-0-1)

This course is designed for people who want to gain greater understanding of the perspectives of the academic disciplines. The focus of the course will be to provide students with a methodology that will enable them to determine the significant questions they need to ask for a particular discipline. At the same time, the course addresses the fact that college students not only have to read large amounts of material but also have to read more critically than ever before. Based on the premise that our learning depends our ability to handle disparate kinds of reading efficiently and intelligently, the course will help students read strategically, selectively, and actively.

FYS 10191. Competition Strategies

(2-0-1)

Competition pervades our culture, even the friendly confines of classrooms at Notre Dame. Most students arrive having mastered the competition at their previous academic institution, but may struggle with the competitive life at Notre Dame. “Competition Strategies” is designed for students whose performance is not meeting their expectations or who are not managing to adapt to the significant cultural change. Using the concepts of Wellness (Spiritual, Physical, Occupational, Environmental, Emotional, Intellectual, and Social), the course helps students with strategies to achieve success in a competitive environment. The class

simulates challenges and creates a learning format for continuous improvement and development of self-responsibility. Students are expected to draw from their successes to address current and future challenges.

FYS 10192. The Secrets of Successful Time Management

(3-0-1)

To understand what it means to “manage time”, it might be useful to consider what “management” entails. According to Stephen Covey, management is “the breaking down, the analysis, the sequencing, the specific application of effective self-government” (Covey 147). The ability to make decisions and choices and to act in accordance with them makes effective self-management possible (148). Effective “self-management” is an essential element of effective “time management”.

FYS 10200. Intensive Discipline Specific Study Strategies

(4-0-2)

To introduce students to some basic strategies for reading, review and organization. To give students the opportunity to practice those strategies for a particular course they are taking. Readings: *Entering the Conversation*, *The Nature of Social Science* and *Writing to See and Think*. Students will be asked to maintain a learning portfolio in which they will record: description of their study/learning habits at the beginning of class, a personal goal statement for the course, time management data, strategies attempted (SQ3R, complex reading without headings, concept mapping and stages of review) positive/negative aspects for their own heuristic, and an exit essay in which they discuss their own learning “biography.”

FYS 10300. Learning Strategies I: Active Engagement and Task Management

(1-0-1) Sakimoto

An interactive seminar and practicum in which students will apply techniques of active engagement and task management to improve study habits and academic performance. Topics will include setting academic goals; proactive approaches to reading, studying, and note taking; and task management approaches to papers, problem sets, and use of time. Students will be introduced to recommended principles and techniques and required to apply them to situations arising from classes in which they are currently enrolled.

FYS 10401. Introduction to the Fine Arts at the University of Notre Dame

(1-0-1)

This one-credit, interdisciplinary seminar is designed to introduce first-year students to some of the University’s finest art treasures. Students will have an opportunity to enjoy the arts at Notre Dame from a vantage point of academic preparation, direct personal observation and experience, and the insights of those who work in the arts. The following is a sample of the topics to be explored in the course: the Mesoamerican and the Rembrandt collections in the Snite Museum of Art, the work of the Actors From The London Stage and the Notre Dame Film, Television and Theater Department, the art of Ivan Mestrovic as found on campus, the Dante collection in the Rare Book Room, and a selection of on-campus classical and jazz concerts. Preparation to enjoy these and other topics will be built on pertinent readings, class discussions, and short written assignments, as well as tours, guest-led discussions, and attendance at exhibits, plays, films, and concerts. First-year students **only**.

FYS 10402. Law School 101: Understanding and Applying for Law School

(1-0-1) Ponisiak

This course is for first year students who are considering attending law school after graduation. The aims of this course are to provide students with an undergraduate law school timeline, tips on studying for the Law School Admissions Test (LSAT), and advice on selecting and applying for law school. Students who complete this course should have a better understanding of the law school admissions process as well as information on making themselves strong applicants.

FYS 10510. What Am I Doing Here?: Reflecting, Writing, and Publishing

(3-0-3)

Prerequisite: FYS 10300

The first-year experience at Notre Dame encourages students to explore, reflect, and stretch themselves in ways that they might not have done previously. This course gives students an opportunity to process the journey, and ultimately, publish their insights in book form. Students will take a deliberate look at the new world of higher education and then learn how to document and share their findings. Finally, they will participate in the hands-on experience of publishing their own work.

FYS 10600. Introduction to the Fine Arts at Notre Dame

(3-0-3) Martin

This three-credit interdisciplinary seminar is designed to introduce students to some of the University’s finest art treasures. Students will have an opportunity to enjoy the arts at Notre Dame from a vantage point of academic preparation, direct personal observation and experience, and the insights of those who work in the arts. The following is a sample of the topics to be explored in the course: permanent and special exhibits at the Snite Museum of Art; play productions by the Actors from the London Stage and Notre Dame Shakespeare Festival; the art of Ivan Mestrovic as found on campus; the Dante collection and other highlights of the Rare Book Room; and a selection of on-campus classical and jazz concerts. This course is especially recommended to students interested in the European Studies minor and may be of special interest to those who intend to study abroad. Students will complete the course with a knowledge of the fine art venues on campus and the skills to do the basic background work necessary to enjoy new forms of art.

FYS 13182. Fine Arts University Seminar

(3-0-3) Martin

This writing-intensive course will be devoted to a variety of different topics in film, television, new media, and theatre depending on the individual instructor’s interests.

School of Architecture

ARCH 01110. Career Discovery: Architecture at Notre Dame (3-6-0)

Two-week summer program for high school students interested in architecture. A two-week summer program for high school students who have completed their sophomore or junior year, to discover the nature of architecture and to experience university life firsthand. The studies include studio classes in architectural design and construction, freehand drawing, and lectures on the history, theory, and practice of architecture.

ARCH 10311. Analysis of Architectural Writing (4-0-4) Bullene

This course examines concepts of architecture within writings about architecture. It explores universal issues of function, strength, and beauty, along with the interactions between theory and practice and the tensions between tradition and innovation. The course work consists of analytical drawings, design exercises, and exams. It is open to all students. Required for those intending to enter the architecture program. Spring.

ARCH 11011. Graphics I: Drawing (3-0-3)

Instruction and practice in drawing as a means of exploring and communicating formal and theoretical concepts. Aspects of freehand drawing in pencil, charcoal, and watercolor are taught with subjects from buildings, nature, and the human figure. The course is open to all students. Studio format. Strongly recommended for those entering the architecture program. Fall.

ARCH 11021. Graphics II: Drafting (3-0-3)

Instruction and practice in the skills necessary to draw and think as an architect. The course emphasizes mechanical drawing with exercises that include descriptive geometry, perspective, and other means of representing three-dimensional architectural problems with two-dimensional techniques, including those using computers. The course is open to all students. Studio format. Required for those intending to enter the architecture program. Spring.

ARCH 12011. Graphics I: Drawing—Tutorial (0-1-0)

Tutorial supplement to ARCH 11011

ARCH 20211. Architectural History I (3-0-3) Stamper

This course provides a survey of architectural history from the Egyptian, Greek, and Roman civilizations to Europe during the Romanesque and Gothic periods. Also included are Islamic, pre-Columbian, and Far Eastern building traditions. Each period is studied in relation to physical determinants, such as climate, materials, technology, and geography, and historical determinants such as economics, religion, politics, society, and culture. Fall.

ARCH 20221. Architectural History II (3-0-3) Doordan

Prerequisite: ARCH 20211

This course continues the history survey, beginning with Renaissance and Baroque Europe and continuing to the 18th and 19th centuries in Europe and the United States. It extends to the modern movement as it affected countries as far-reaching as Japan and Australia.

ARCH 20411. Building Technology I (3-0-3) Buccellato

Exploration and application of qualitative principles and theory of building construction to the design process. Fall.

ARCH 20511. Principles of Structural Engineering (3-0-3) DeFrees

Principles of statics, force, and moment equilibrium; area properties; stress and strain; beam and column analysis. Spring.

ARCH 21111. Design I (0-12-6)

This studio and lecture course introduces students to design beginning with the classical elements of architecture. It proceeds to the design of components of buildings. Fall.

ARCH 21121. Design II (0-12-6)

Prerequisite: ARCH 21111

Principles of planning, design, and construction are developed in urban contexts and in complex building programs. The concentration on classical paradigms as a basis for architecture and urban design is continued. Spring.

ARCH 24211. Architecture and Politics in France (3-0-3)

Introduction to the history of architecture. Original elements of French architecture: Romanesque, Gothic, the Renaissance In 16th century France, the 17th and 18th centuries, the development of Paris in the 19th century, the Universal Exhibitions, Haussman and his much imitated model, and the question of 20th-century modernity.

ARCH 24311. Reflections on Architecture and Urbanism (2-0-2)

Formation of the vision of architecture by learning, as Corbusier stated, how to look and see. Understand and analyze our current mode of life and the realizations of the past in order to elaborate the future of construction and environment

ARCH 30211. Etruscan and Roman Art and Architecture (3-0-3)

Roman art of the Republic and the Empire is one focus of this course, but other early cultures of the Italian peninsula and their rich artistic production are also considered. In particular, the arts of the Villanovans and the Etruscans are examined and evaluated as both unique expressions of discrete cultures and as ancestors of and influences on Rome. The origins and development of monumental architecture, painting, portraiture, and historical relief sculpture are isolated and traced from the early first millennium B.C.E. through the early fourth century of the modern era.

ARCH 34012. Advanced Graphics: Freehand Drawing (3-0-3)

Freehand graphic communication with pencil, pen, and charcoal; drawing a variety of subjects, such as exteriors and interiors of architecture and the human form. Consideration of light, shade, and form. Fall and spring.

ARCH 34022. Advanced Graphics: Watercolor (3-0-3)

Freehand graphic communication with watercolor; painting a variety of forms, such as still life, exteriors and interiors of architecture and the human form. Fall and Spring.

ARCH 34112. Design III (0-12-6)

Architectural and urban design relating to Rome and its environs, with an emphasis on the urban scale. Fall.

ARCH 34122. Design IV

(0-12-6)

Architectural and urban design relating to Rome and its environs, with an emphasis on building scale.

ARCH 34212. Roman Urbanism and Architecture I

(3-0-3)

Examines the essential elements of Roman urbanism, architectural composition, and tectonic considerations over time, through extensive analysis and direct on-site experience with an emphasis on composition and formal order.

ARCH 34222. Roman Urbanism and Architecture II

(3-0-3)

Examines the essential elements of Roman urbanism, architectural composition, and tectonic considerations over time, through extensive analysis and direct on-site experience with an emphasis on tectonics.

ARCH 34223. Seeing Power in Rome: Exploring the Pagan, Christian, and Modern City

(3-0-3)

The course is an investigation of Rome as an illustration of the way in which buildings and their role in the physical form of cities both serve and represent the power of the government they serve. The course will run from pagan antiquity through the Christian Medieval, Renaissance, and Baroque periods and the succession of secular states since Italian unification in 1870.

ARCH 34312. Architectural History III

(3-0-3)

Structured field study and lecture presentations analyzing buildings and urban complexes in Italy from antiquity through the Middle Ages.

ARCH 34322. Architectural History IV

(3-0-3)

Structured field study and lecture presentations analyzing buildings and urban complexes in Italy from the Renaissance to the present.

ARCH 36111. Directed Readings

(3-0-3)

Directed readings on a topic serving the student's particular academic project.

ARCH 37011. Special Studies: Drawing

(0-3-3)

Freehand drawing and watercolor

ARCH 37211. Research Assistance—Graphic Documentation of Historic Buildings

(V-0-V)

Student assists instructor in academic research of historic buildings through graphic documentation.

ARCH 37411. Directed Research in Building Technology

(3-0-3)

Research on a topic in building technology, proposed by the student and agreed with the instructor and dean.

ARCH 40211. Greek Architecture

(3-0-3)

Cross-listing of ARHI 40121

ARCH 40221. Survey: Greek Art/Architecture

(3-0-3)

Open to all students. This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period from the 8th through 2nd century B.C., with some consideration of prehistoric Greek forebears of the

Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes toward the gods, human achievement, and the relationship between the divine and the human.

ARCH 40411. Environmental Systems I

(3-0-3) DeFrees

This course investigates the relationship between architecture and environmental systems. Lectures, readings, and exercises probe topics that include passive energy design, safety systems, water conservation and usage, vertical transportation, heating, ventilating, and air conditioning. Special emphasis is placed on sustainability issues, energy conservation, and public health and safety.

ARCH 40421. Building Technology II

(3-0-3) DeFrees

A study of building construction methods and materials.

ARCH 40511. Structural Design—for Architect

(3-0-3) DeFrees

Prerequisite: ARCH 20511

The application of the principles of mechanics to the stress and deformation analysis and design of reinforced concrete structural elements and framing systems. Fall.

ARCH 40521. Applied Structural Systems

(3-0-3) Loring

Prerequisite: ARCH 40511 and ARCH 20511

Application of structural systems in relation to architectural concepts meeting economic and building-code requirements. Spring.

ARCH 41011. Graphics V: Computers

(3-0-3)

Study of basic skills necessary for the analysis and representation of architectural form through the medium of the computer. Students will study drafting as well as three-dimensional modeling.

ARCH 41111. Design V

(0-12-6)

Prerequisite: ARCH 34122

Design V involves the design of buildings within urban settings, with a special emphasis on building types in relation to cultural, ethnic, and civic priorities.

ARCH 41121. Design VI

(0-12-6)

Prerequisite: ARCH 41111

Design VI presents students with the opportunity to select one among a number of studio options. Specific focus of studios varies from year to year and is designed to address needs and specific to each fourth-year class.

ARCH 41811. Beginning Furniture

(3-0-3)

Students gain an understanding of scale, proportion, and construction of furniture. Lectures and demonstrations expose students to the history of furniture, properties of wood, and the use of woodworking equipment. Fall.

ARCH 41821. Advanced Furniture

(3-0-3)

Prerequisite: ARCH 41811

Students construct furniture of original design. They learn to understand furniture's relationship to architectural context. Spring.

ARCH 41831. Introduction to Carving Classical Elements

(3-0-3)

In this introductory course students are instructed in the fundamental issues of woodworking power equipment, hand tools, carving tools and the physical proper-

ties of wood. The emphasis is on design and shaping of classical architectural elements and ornamentation. Working as a team students will construct a full-scale architectural element, such as the corner condition of a Doric entablature.

ARCH 41841. Advanced Carving of Classical Elements

(0-6-3)

Prerequisite: ARCH 41831

Continuation of ARCH 41831.

ARCH 42011. Graphics V: Computers—Tutorial

(0-0-0)

Corequisite: ARCH 41011

Tutorial for ARCH 41011.

ARCH 43211. Topics in Greek and/or Roman Art

(3-0-3)

Topics course on special areas of Greek and/or Roman art.

ARCH 43221. The Effect Christianity Has Had on Architecture

(3-0-3)

A survey of the effect Christianity has had on architecture, including its spatial, representational, symbolic, and moral content, from architecture's theoretical foundations in Vitruvius through to the present day.

ARCH 43851. Space, Place and Landscape

(3-0-3)

In this course, we will explore human relationships to the built environment and the complex ways in which people consciously and unconsciously shape the world around them. Cultural landscapes are not empty spaces, but rather places we imbue with meaning and significance. We are particularly interested in the ways in which the built environment has worked as an agent of cultural power as well as how social relations (notably class, gender, and ethnicity) have been codified and reproduced through landscapes. We will examine how people perceive, experience, and contextualize social spaces at the intersection of symbolic processes, senses of place, memory, and identity formation as well as how these change through time and across space. As an interdisciplinary endeavor, we will draw from history, geography, art, environmental science, architecture, landscape studies, anthropology, and urban planning, among other disciplines. Students will undertake a significant original research project that investigates the human experience through space, place, and landscape.

ARCH 44111. Summer Design Studio: Bath, England

(6-12-6)

Design studio in the heart of the historic city of Bath in England. The course will begin with the study of the city's Roman, medieval and eighteenth century architecture and urbanism, with a special focus on building typology. Areas of the city that are yet to be developed, or which suffered in the post World War II period, will be studied with a view to producing design proposals sympathetic to the city's historic fabric.

ARCH 44121. Summer Design Studio: Frome, England

(12-12-6)

Design studio in the historic town of Frome in England. The course will begin with the study of the city's Anglo Saxon origins, rich 1000-year history as a market center, and architecture and urbanism spanning from the medieval to the early twentieth century, with a special focus on building and urban typologies. Central portions of the town will be studied with a view to producing design proposals sympathetic to the city's historic fabric and anticipating sustainable future development.

ARCH 44211. Chinese Architecture and Urbanism: Traditional and Modern

(3-0-3)

Exploration of traditional and modern Chinese architecture.

ARCH 47211. Japanese and Chinese Architecture and Urbanism: Traditional and Modern

(3-0-3)

Exploration of traditional and modern Japanese and Chinese architecture and urbanism, including gardens. The program begins in Japan with visits to Kyoto, Takayama, Shiragawa and Tokyo. The three-week visit in China will concentrate on Hong Kong, Njing, and Beijing with visits to Shanghai and the water towns and gardens in the Yangtze River basin. The program's principal activities will involve looking, listening, drawing, and sketching. There will be a brief design segment. This is the third year the School has conducted this program. The program's host institution is the Graduated School of Architecture at the University of Nanjing, which will supply members of its faculty to present lectures in Nanjing, and graduate architecture students who will accompany us on our post Hong Kong itinerary. Tentatively, the program begins with students arriving in Japan on June 7th and ends in China on July 1st. Architecture students enrolling in the summer session course must attend all of the class meetings of ARCH 46211 during the spring semester, 2007. Students enrolled only in this summer session course will be required to complete a special study project based on work done in China and approved during the spring semester. A minimum number of students is required if the program is to be conducted; the maximum number is 8–10. The cost of the program is \$4,500 not including the cost of travel to and from China and the cost of visas (approximately \$50 per person). This figure includes all lodging, most meals, and air and mini bus transportation within Japan and China during the program as well as most admission fees to sites being visited, etc., but excludes incidental personal expenses. Architecture students must commit to their going by making a deposit (non-refundable to students canceling) of \$500 by April 2nd with the final balance due May 4, 2007. Norman Crowe will direct the program in Japan and Michael Lykoudis and Zhao Chen will direct the China portion of the program. For further information, contact Cindy DuBree at 110 Bond Hall, 574-631-8437 or Barbara Panzica at 110 Bond Hall, 574-631-4699.

ARCH 50211. Grecian Architecture and Furniture I

(3-0-3) Smith

Students explore Notre Dame's holdings of British and American architectural books that introduced Greek architecture to the English-speaking world.

ARCH 50218. Teaching Concepts/History of Architecture I

(3-0-3) Stamper

Teaching assistants aid professor in grading examinations and preparing lectures for ARCH 20211. Fall.

ARCH 50221. Architecture—Twentieth Century

(3-0-3)

This course continues the history survey, beginning with Renaissance and Baroque Europe and continuing to the 18th and 19th centuries in Europe and the United States. It extends to the modern movement as it affected countries as far-reaching as Japan and Australia.

ARCH 50228. Teaching Concepts/History of Architecture II

(3-0-3) Doordan

Teaching assistants aid professor in grading examinations and preparing lectures for ARCH 20221. Spring.

ARCH 50318. Teaching Concepts/Architectural Writings

(3-0-3) Bullene

Prerequisite: ARCH 10311

Teaching assistants aid in seminar sessions and provide guidance in drawing for ARCH 10311. Spring.

ARCH 50411. Restoration and Historic Preservation

(3-0-3)

America is slowly developing the taste of saving old heritage and increasing interest is being placed on restoration and preservation of buildings. This is a relatively new field and advance methods are being generated every day that could help in betterment of preservation of old structures. Restoration and Historic Preservation

course is needed to help architectural students understand the need of preserving traditional architecture and in some cases studying the art of restoration of traditional building, which have degenerated due to various reasons. The course provides a detailed reference to the recording methods and techniques that are fundamental tools for examining any existing structure. It also includes information on recent technological advances such as laser scanning, new case studies, and material on the documentation of historic monuments.

ARCH 50418. Teaching Concepts/Building Technology I

(3-0-3) Buccellato

Teaching assistants guide second-year students taking ARCH 20411 in developing technical solutions to architectural studies. They assist in evaluation of submitted work and prepare and deliver short presentations on current building techniques. Fall.

ARCH 50419. Environmental Systems II

(3-0-3) DeFrees

Study of the basic concepts that lead to the design of the mechanical, acoustical, and illumination services for the control of the architectural environment.

ARCH 50428. Teaching Concepts/Building Technology II

(3-0-3) DeFrees

Teaching assistants guide second-year students taking ARCH 20419 and students in ARCH 20411 in developing technical solutions to architectural studies. They assist in evaluation of submitted work and prepare and deliver short presentations on current building techniques. Spring.

ARCH 50438. Teaching Concepts: Environmental Systems I

(3-0-3) DeFrees

Prerequisite: ARCH 40411

Teaching Assistance in ARCH 40411, Environmental Systems I, guiding students in projects and assisting in grading.

ARCH 50518. Teaching Concepts/Structural Design

(3-0-3) DeFrees

Teaching assistants aid professor in grading examinations, assigning homework, and preparing lectures for ARCH 40511. Fall.

ARCH 50528. Teaching Concepts/Structural Mechanics

(3-0-3) DeFrees

Teaching assistances in structures

ARCH 50711. Professional Practice

(3-0-3) Eide

Lecture and assignments covering professional services, marketing, economics of practice, programming, design drawing development, contracts, and project management. Spring.

ARCH 50811. History of Design: Form, Values, and Technology

(3-0-3)

This course will provide a historical perspective on the development of industrial and product design in the modern era, when design has been a powerful tool for shaping the development of technology and articulating the values of modern culture. The role of the modern designer as both a facilitator and a critic of industrial technology will be examined.

ARCH 51018. Teaching Concepts/Drawing

(3-1-3)

Assist professor in demonstrating techniques and critiquing student work for ARCH 11011. Fall.

ARCH 51021. Traditional Architectural Rendering in India Ink Wash

(1-2-1)

This course introduces the student to the traditional architectural rendering media of India ink and toned ink, and the various ways in which they can be used to

create non-perspectival wash renderings of architectural subjects. Among the topics covered are materials, India ink wash, toned ink wash, casting of shades and shadows, atmospheric perspective, sheet composition, and the production of the Beaux-Arts drawing type called the analytique. Classes are conducted primarily in a studio format, with formal lectures and instruction provided at the beginning of each session.

ARCH 51028. Teaching Concepts/Graphics II

(0-6-3)

Teaching assistant in the first-year drafting course.

ARCH 51058. Teaching Concepts/Graphics V

(3-0-3)

Teaching assistants for ARCH 41011 provide instructional support to students in the computer cluster during class and help with grading.

ARCH 51068. Teaching Concepts/Computers

(3-0-3)

Teaching assistant for advanced computer drawing.

ARCH 51111. Design VII

(0-12-6)

Prerequisite: ARCH 41121

Integrates the students' previous study of building design and construction in thematic studios.

ARCH 51121. Design VIII Thesis

(0-12-6)

Prerequisite: ARCH 51111

Required of all students in architecture. Students devote the semester to the preparation and presentation of an independent architectural project fulfilling the NAAB criteria of a comprehensive project. Spring.

ARCH 51368. Teaching Concepts: Introduction to CAD

(3-0-3)

Prerequisite: ARCH 41011

Teaching assistance for ARCH 61021: Introduction to CAD

ARCH 51411. Research and Documentation of Historical Buildings

(0-3-3)

The course provides a detailed reference to the recording methods and techniques that are fundamental tools for examining any existing structure. It also includes information on recent technological advances such as laser scanning, new case studies, and material on the documentation of historic monuments. The students will get to work on a live project and help serve in saving a historic building in the city of South Bend.

ARCH 51811. Design and Construction of Architectural Elements

(0-6-3)

Working as a team, the class will study precedents for an architectural element determined by the instructor and design and build an example of the element.

ARCH 51818. Teaching Concepts/Advanced Furniture

(0-6-3)

Teaching assistant in advanced furniture design.

ARCH 51821. Design and Construction of Architectural Elements II

(0-6-3)

Advanced work, as a team, in studying precedents for an architectural element determined by the instructor and in designing and building an example of the element.

ARCH 51828. Teaching Concepts: Beginning Furniture

(0-6-3)

Prerequisite: ARCH 41811

Teaching assistant in beginning furniture design.

ARCH 51831. Introduction to Architectural Models

(0-6-3)

Group project researching a significant historical building, chosen by the instructor, and constructing a large scale detailed model of that building.

ARCH 51841. Advanced Architectural Models

(0-6-3)

Advanced group project researching a significant historical building, chosen by the instructor, and constructing a large scale detailed model of that building.

ARCH 53231. History and Theory of Preservation

(3-0-3) Zeiger

This class will introduce students to the history, theory, and practice of architectural historic preservation in Europe and the United States, beginning with the origins of the movement in the late eighteenth century, classic theoretical statements of the nineteenth, and its application by means of legislation and regulation worldwide in the twentieth. Required for students in the Preservation/Restoration Concentration in the B.Arch. degree. Open to all juniors, seniors, fifth-year and graduate students.

ARCH 53311. Issues in Sacred Architecture

(3-0-3) Stroik

An upper-level seminar exploring themes related to issues in sacred architecture. The course is open to architecture students and students in other disciplines.

ARCH 53321. Principles of Architectural Composition

(3-0-3)

Seminar format with studio component. The objective is to identify a theory of composition applicable to traditional and classical architecture and urbanism, with emphasis on paired principles like symmetry and asymmetry, repetitions and punctuation, alternation and juxtaposition, framing and bookending, repose and contraposition, foregrounding and backgrounding, figure-ground relationships, etc.

ARCH 53341. Architectural Theory

(3-0-3) Westfall

This course reviews, through lectures, discussions, analysis of assigned texts, and the writing of research papers, what theories of architecture from antiquity to the present day say about the intersection of the religious, civil, architectural and urban characteristics of the built world within the Western tradition.

ARCH 53411. History of American Architecture 1630–1915

(3-0-3) Stamper

Prerequisite: (ARCH 20211 or ARCH 20221) or (ARCH 60211 or ARCH 60221)

This course is seminar on the history of architecture in the United States from the colonial period in the 1600s until World War I. The purpose of this course is to introduce some of the formative ideas, major monuments, and characteristic experiences of different building cultures in the United States and to investigate various problems of interpretation raised by the material under review. Architecture will be defined in the broadest possible terms to include vernacular as well as high architecture examples of buildings, distinctive urban configurations, and landscape design. Architectural history will be defined as the record of the rich diversity of human experiences evident in the different ways Americans have shaped the built environment to pursue social, civil, and religious ends. By the end of the semester, students should have an understanding of the cultural and historical factors that shaped American architecture from 1630 to 1915 and should have the ability to identify and distinguish between the different styles and periods of architecture from this period. They should have the research skills to prepare scholarly and theoretical papers and essays on the subject, and they will have experience with

in-class presentations on topics related to their research. Course requirements consist of attendance at seminars, completion of required readings and writing assignments.

ARCH 53421. Historic Construction and Preservation

(3-0-3)

This course explores the materials, methods and resources available to American architects of the eighteenth through the early twentieth centuries, and the means to preserve their structures today. Historic Construction and Preservation will provide preservation professionals with information needed to analyze, modify, and certify historic buildings for modern use. A survey of data on period structural components, such as foundations, masonry walls, and wood, wrought-iron, and cast-iron columns and beams will provide a basis to determine loads that structural components were originally designed to bear and methods to determine if they are still capable of performing as intended. Demonstrations of production or fabrication methods for stone, brick, mortar, paints and wood framing and trim will give first-hand knowledge to preservation specialists. Acceptable practices for structural rehabilitation will be discussed and evaluated. Students completing this course will have the basis for understanding the process used to build historic structures and the means to preserve them.

ARCH 54113. Summer Program at the Tuscan Classical Academy

(3-0-3)

This program focuses on three themes: 1) the history and theory of Florentine humanism; 2) Tuscan classical architecture and its regional variants; and 3) drawing and painting. The history and theory component consists of a series of lectures on Renaissance humanism and site visits to important cities and buildings throughout Tuscany. These will center primarily on Florence and the Mugello Valley. The study of Tuscan classical architecture and its regional variants examines the rediscovery of classical architecture in quattrocento Florence and its creative interpretations throughout Tuscany. The drawing and painting component introduces students to the basics of landscape drawing and painting based on observations from nature.

ARCH 57011. Advanced Studies in Computers

(3-0-3)

Prerequisite: ARCH 41011

In ARCH 57011, students pursue specific interests in computer applications to architecture. Spring.

ARCH 57021. Advanced Wash Rendering

(0-1-3)

An independent study, using a single large, formal wash as subject of the composition, and techniques of architectural wash rendering.

ARCH 57031. Special Computer Applications in Architectural Representation

(3-0-3)

Prerequisite: ARCH 41011

The study of particular applications for students already experienced in more basic technique.

ARCH 57111. Special Studies in Design and Presentation—Taiwan

(0-3-3)

Research project involving design and language skills based on independent summer research in Taiwan, to develop an architectural/design project and create a bilingual website for presentation. Graded S/U.

ARCH 57121. Special Studies

(0-6-3)

Special studies in high-rise building design.

ARCH 57131. Special Studies in Accessibility

(0-6-3)

Special studies in handicapped accessible architecture through a group design project.

ARCH 57141. Competitions and Independent Studio

(3-0-3)

Students have the option of selecting either a national or international design competition or a design project of special interest to them. Spring.

ARCH 57211. Research on an Architectural Element

(0-0-3)

Research into the canons for and variations on a traditional architectural element, chosen by the student and the instructor, and the design of an example of the element.

ARCH 57319. Topics in Design Studies

(0-0-3)

Special studies in design issues.

ARCH 57421. Special Studies: Building Documentation and Preservation

(3-0-3)

Special studies in documenting and preserving of historical buildings.

ARCH 57611. Special Studies: Historical Approaches to Environmental Issues in Architecture

(3-0-3)

Special studies of approaches to environmental issues in historical architecture and their application to current conditions.

ARCH 57811. Special Projects in Furniture I

(3-0-3)

Prerequisite: ARCH 41821

Students pursue specific interests in design and construction of furniture. Fall.

ARCH 57821. Special Studies in Furniture Design II

(3-0-3)

Prerequisite: ARCH 57811

Continuation of Architecture 57811. Spring.

ARCH 57831. Special Projects in the Carving of Classical Elements

(3-0-3)

Prerequisite: ARCH 41841

Carving of classical elements selected by instructor and student.

ARCH 57841. Special Projects in the Carving of Classical Elements II

(3-0-3)

Prerequisite: ARCH 57831

Carving of classical elements selected by instructor and students, level two.

ARCH 57851. Special Projects in Carving Classical Elements III

(0-6-3)

Carving of classical elements selected by instructor and students, level three.

ARCH 57861. Special Projects in Carving Classical Elements IV

(0-6-3)

Carving of classical elements selected by instructor and students, level four.

College of Arts and Letters

Africana Studies

AFST 10401. Introduction to Jazz

(3-0-3) Dwyer

A music appreciation course requiring no musical background and no prerequisites. General coverage of the history, various styles, and major performers of jazz, with an emphasis on current practice.

AFST 13275. The Bible, the Black Church and the Blues

(3-0-3)

This class will examine three historical matrices that have had a decided impact on the development of Africana identity and culture in the North American Diaspora. The first centers on the reception, interpretation, and appropriation of the Christian Bible by peoples of African descent. The second focuses on the evolution of the Black Church, the collective body of adherents in traditionally African American and other Christian faith communities. The third consists of the emergence of Blues music, artists, and performance spaces as non-ecclesial loci of protest and crucibles in which Africana spiritualities of resistance were forged. Thus, the course will, in effect, introduce students to the essential sources—both primary and secondary—methodologies, animating questions, and debates crucial to three historically based subfields within Africana Studies: 1) the history of Africana biblical interpretation in North America; 2) Black Church Studies; and 3) Blues Studies. By the end of the class, students will be able to identify the core texts essential in each of these subfields; discuss the major periodization schemes proposed by scholars for African American biblical hermeneutics, the development of the Black Church in the Americas, and the growth of Blues; discuss the methodological paradigms employed in each of the aforementioned research domains; explain cogently some of the major issues and debates that drive each of these subfields; and offer a reasoned explanation as to why the Bible, the Black Church, and the Blues can be construed as symbiotic matrices in which historical memories are preserved, individual and corporate identities are formed, institutional life is preserved, and social traumas are ameliorated.

AFST 13610. Black Politics After the Civil Rights Revolution

(3-0-3) Pinderhughes

This course delves into African American Politics after the Civil Rights Revolution. The long centuries of slavery and de jure segregation in which African Americans existed outside of American political institutions, created distinct divisions between dominant views in the nation and Black perspectives on politics. The United States is now in transition from earlier periods when the boundaries of Black politics were very clear, into more recent decades when those boundaries became considerably more permeable. The course considers how racial and ethnic political officials and organizations tried to solve certain types of problems as they first began to participate in national politics. The political subject matter explored in the course ranges widely. Electoral and partisan politics, civil society and interest groups, national public policy, foreign policy and international affairs are important sectors in which African American political interests were represented and controversies developed. Presidential politics including the Obama administration will also be discussed.

AFST 20080. Music and World Religions

(3-0-3)

Through this ethnomusicology course students will learn the roles music occupies in world religions. More than a world music course, we will examine the creative expression of the divine through the universal language of organized sound as music, as music plays a major role in the practice of most religions worldwide. This study involves all the major continents, highlighting new perspectives

as to the confluence between religious culture and musical expression. Knowledge of music beneficial but not required, just open ears and minds to the diverse ontological understandings comprising various worldviews.

AFST 20081. Music of Africa and the African Diaspora

(3-0-3)

Students explore music from West Africa, Southern Africa, East Africa, and the Caribbean, South America, and the United States, paying close attention to how their reception and performance inform and influence each other historically and contextually. The seminar emphasizes an interdisciplinary approach to the subject, drawing from ethnomusicology, African and African American studies anthropology, colonial and post-colonial studies.

AFST 20082. Introduction to Africana Studies

(3-0-3) Page

Through a multidisciplinary and cross-cultural exploration, this course will 1) introduce students to key concepts, themes, and theories in the field of Africana Studies; and 2) introduce students to the identities and experiences of black populations throughout the global African Diaspora. Over the course of the semester, we will tackle the following questions: What is Africana Studies? What are the historical, intellectual, and political origins of Africana Studies? What are race and ethnicity? What is blackness? What roles do class, culture, gender, nationality, and religion, play in blackness? What is the African Diaspora? What role does Africa play in blackness? How do the arts, humanities, and social sciences help us investigate, analyze, conceptualize, represent, and understand this thing we refer to as “blackness?” What are some of the historical, geographical, socio-political, and cultural points of divergence observable between populations of African descent throughout the Diaspora and what, if any, are the points of commonality that unite these dispersed populations?

AFST 20100. Introduction to African-American Literature

(3-0-3)

A survey of 300 years of African American literature.

AFST 20101. Harlem Renaissance

(3-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in the '20s and early '30s and the writers whom it fostered: Hughes, Hurston, Toomer, Redmon Fauset, Larson, Thurman.

AFST 20102. Women in the Americas

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

AFST 20103. African-American Literature and the Bible

(3-0-0)

An examination of the Bible, from Genesis to the Gospel writers' parables of Jesus, and how these Hebrew and Christian stories inspired African-American artists.

AFST 20106. Introduction to Post-Colonial Literature

(3-0-3)

Traces the development of literatures from the former colonies of various empires, but principally the British and French.

AFST 20108. Writing Harlem

(3-0-3) Johnson-Roullier

A multicultural study of the historical, cultural, and political circumstances behind what has come to be known as the Harlem Renaissance of the 1920s and 1930s.

The course will focus on the many different cultural voices that were a part of the movement, and examine their contributions to the cultural meaning of race at this time in literary history.

AFST 20109. Literature of Sport

(3-0-3)

Sports and athletics have held prominent roles in human societies since the beginnings of civilization. Across centuries, nation states have used athletic competition for a variety of purposes, from paying homage to distant gods to demonstrating superiority over neighboring tribes/cultures. And the individuals, the “warriors”, who excel on those “fields of battle” are venerated as heroes, champions, “gods”. In this course, we’ll look at a variety of literature (fiction, nonfiction, poetry, film, broadcasts of athletic events, etc.) related to sports and athletics. From depictions of wrestlers on temple walls in Ancient Egypt to Grantland Rice’s New York Herald Tribune *Four Horsemen* article to podcasts of ESPN’s *SportsCenter*, our investigation of the literature of sport will cover a range of topics—race, gender, class, globalization, and the purposes and functions of athletic competition, to name a few—including the rise of the super star athlete as a “god”. Required work: quizzes, two essays, midterm, final examination.

AFST 20111. Chicago in Words

(3-0-3)

Early twentieth-century Chicago was famous for its railways and stockyards, jazz and gangsters. The city saw the creation of great industrial fortunes and the birth in 1905 of the Industrial Workers of the World. The literature taken up in this class brings the dynamic contradictions of the Chicago experience to life. We will look at work by Jane Addams, Nelson Algren, Sherwood Anderson, Gwendolyn Brooks, John Dos Passos, Carl Sandburg, Upton Sinclair, Theodore Ward, and Richard Wright, covering a range of literary expression from impassioned journalism, to poetry, novels, and drama. We will consider the relation of modernism to realism. We will look at the ways in which Chicago capitalism altered nature, challenged traditional forms of identity, and created new forms of urban community. We will spend a week exploring Chicago’s jazz and blues, while we will also look at the 1932 gangster film *Scarface*, screenplay by Chicago journalist and Oscar winner Ben Hecht. Chicago is a city of tremendous vitality and shocking brutality that has reinvented itself time and again, and the writers we will read have taken up this task of urban invention with a shared urgency and a wide range of voices. Course requirements: Active class participation, short response papers, creative responses (poems), a class presentation of a scene from *Big White Fog* by Theodore Ward, and an 8–10 page paper. Many “Contemporary Fiction” classes conclude with works published around the time that you were born in the mid to late 1980s. This course focuses on novels published during the decade in which you are living and examines the interpretive difficulties raised by such works. Without being able to rely on an established history of scholarly criticism or their place among the so-called “great books” of civilization, the reader of contemporary novels must actively consider why these works are worth studying as well as how they function. The major aims of this course are to introduce you to these exciting novels and to provide you with the critical and interpretive framework for determining what contemporary literature is and why it matters. We will focus on eight novels and novellas examining the intersections between self and society and between literary art and the popular cultures of film, television, hip-hop, rock, and comic books. Readings include novels and novellas by Paul Auster, Don DeLillo, Dave Eggers, Jonathan Safran Foer, Nicole Krauss, Jonathan Lethem, David Markson, and Toni Morrison. The course also includes a screening of the film adaptation of Foer’s *Everything is Illuminated*. Because this course is intended for non-majors, each unit will include introductions to the basic tools of literary study including close reading, how to write a literary argument, how to incorporate secondary criticism and theory, and the basic principles of film and television. Course requirements include two 5–7 page papers and one 7–10 page paper.

AFST 20112. American Novel

(3-0-3)

We will read, discuss, and study selected novels of significant importance within the American literary tradition. As we explore these novels within their historical

and cultural context, we will consider the various reasons for their place within the canon of American literature. Indeed, we will scrutinize the very nature of this literary canon and self-consciously reflect on the inevitably arbitrary nature of this, or any, reading list. Even so, we will see, I hope, that these authors share deep engagement with ideas and themes common to American literature and do so, through their art, in ways that both teach and delight. Required texts: *Moby-Dick*, *The Adventures of Huckleberry Finn*, *The Awakening*, *The Great Gatsby*, *Invisible Man*, *The Old Man and the Sea*, *The Bluest Eye*.

AFST 20113. Second City: Literature on Location in Chicago

(3-0-3)

A study of literature that takes up the history, urban concerns, and national presence of what for much of the twentieth century was America’s second largest city.

AFST 20149. African American Literature: Black Reconstruction

(3-0-3)

If “critique” refers to the analysis of the present towards the transformation of society then this course considers how African American literature has functioned in this creative and critical mode from its inception. Through lecture and class discussion, this course focuses on writings from African American authors pondering the possibilities and goals of reconstructing their communities and the United States at large. We will cover various periods of literary activity, including antebellum slave narratives, the post-Reconstruction era, the Harlem Renaissance, and the Black Arts movement. We will cover multiple literary genres—including poetry, slave narrative, novel, and the essay, among others—used in the African American literary tradition placed in their historical, cultural, and institutional contexts. By reading the African American literary tradition in these contexts, we will pursue a number of questions, regarding issues of political agency, the role of the writer as intellectual, the relationship of literature to the folk, and literature as an avenue of recovering alternative histories. We will read material from Phillis Wheatley, Harriet Jacobs, Charles Chesnut, Zora Neale Hurston, Ann Petry, Amiri Baraka, and others.

AFST 20201. American Men, American Women

(3-0-3)

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, ‘50s television families, and ‘60s youth culture; and into recent shifts with women’s rights, extreme sports, and talk shows.

AFST 20275. Some Other Mess: The Role of Black Outsiders in the African Diaspora

(3-0-3)

They go by many names: bohos, artists, radicals, intellectuals, TRAs, mixies, and punks. They are members of the African diaspora who defy the stereotypical construction of black people that the media and a history of marginalization by the “mainstream” culture have created. People who look like them and with whom they share the same politicized racial identity often ostracize them. Are these individuals dangerous outsiders, who by eschewing the communal traditions that led to the securing of civil rights for a united African American population are imperiling black identity with a quest for individual freedom? Or, are they renegades whose explorations outside of accepted constructions of black identity challenge entrenched ideas of race, class, sexuality and gender, not only for African Americans, but for everyone living in a postmodern multicultural world? Are they part of a long and illustrious history of identity exploration by African Americans who helped to shape and change American culture? These are some of the questions we will explore in this course. It is an investigation into the lives, work, and legacies of members of the African diaspora who are clearly into “some other mess,” that is, those who insist on doing their own thing in world that still

takes issue with individual freedom of expression for some marginalized peoples. The assertion of the right to individual expression raises questions that are at the heart of the American ideal of integration and the African American construct of community. By critically engaging the works of artists like Jean-Michel Basquiat, writings by generations of cultural critics, the stories of adoptees and multiracial African Americans, the music of progressive musicians, scholarship by black feminists of both genders, and the media representations of African Americans in the postwar United States, we will begin to understand the role of people of African descent in America as outsiders, both communally and individually.

AFST 20367. Islamic Societies of the Middle East and North Africa: Religion, History, and Culture

(3-0-3)

This course is an introductory survey of the Islamic societies of the Middle East and North Africa from their origins to the present day. It will deal with the history and expansion of Islam, both as a world religion and civilization, from its birth in the Arabian Peninsula in the seventh century to its subsequent spread to other parts of western Asia and North Africa. Issues of religious and social ethics, political governance, gender, social relations, and cultural practices will be explored in relation to a number of Muslim societies in the region, such as in Egypt, Morocco, and Iran. The course foregrounds the diversity and complexities present in a critical area of what we call the Islamic world today.

AFST 20375. Regarding the Islamic Challenge to Christian Theology

(3-0-3)

While many Christians have described Islam as a Christian heresy, many Muslims consider Christianity to be an Islamic heresy. Jesus, they maintain, was a Muslim prophet. Like Adam and Abraham before him, like Muhammad after him, he was sent to preach Islam. In this view Islam is the natural religion—eternal, universal and unchanging. Other religions, including Christianity, arose only when people went astray. Therefore Muslims have long challenged the legitimacy of Christian doctrines that differ from Islam, including the Trinity, the Incarnation, the Cross, the New Covenant and the Church. In this course we will examine Islamic writings, from the Qur'an to contemporary texts, in which these doctrines are challenged. We will then examine the history of Christian responses to these challenges and consider, as theologians, how Christians might approach them today.

AFST 20376. U.S. Latino Spirituality

(3-0-3)

U.S. Latino spirituality is one of the youngest spiritualities among the great spiritual traditions of humanity. The course will explore the indigenous, African, and European origins of U.S. Latino spirituality through the devotions, practices, feasts, and rituals of the people.

AFST 20377. War, Peace, and Conscience

(3-0-3) Baxter

This course examines ancient, medieval, and modern understandings of the ethics of war primarily, but not exclusively, within Christian tradition. It comes in three parts. First, it surveys the emergence and development of the morality of war from ancient times (Jewish, Christian, and classical), through the medieval period (church canonists, Aquinas, the scholastics), and into the modern period (Grotius and later sources of international law). Second, it examines the nature of modern warfare by means of historical illustrations, including the Civil War, the so-called Indian Wars, World War I, World War II, the Vietnam War, and the Gulf War. Third, it takes up several cases with the aim of exploring the tension between traditional conceptions of just war theory and the practice of modern warfare, focusing on issues involved in the use of weapons of mass destruction, the “fog of war,” wars of revolution, ethnic and religious conflict, and the continuing “war on terrorism.” Texts include: Roland Bainton, *Christian Attitudes Toward War and Peace*, Erich Maria Remarque, *All Quiet on the Western Front*, John Hersey, *Hiroshima*, Olson and Roberts, *My Lai: A Brief History with Documents*, plus writings on the attacks of September 11. Requirements include a take-home test, several short papers, and a final exam.

AFST 20380. World Religions and Catholicism in Dialogue

(3-0-3) Gorski

To explore Hinduism, Buddhism, Islam, and to examine the Christian theological appraisal of the other world religions. This course is a study in comparative theology and will enable students to gain a deeper understanding of Christianity by “passing over” into and experiencing, as well as appraising, the different major religious traditions of the world.

AFST 20381. Christianity and World Religions

(3-0-3) Malkovsky

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate Mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply in the spirituality of other traditions. By course's end we ought to have a greater understanding of what is essential to Christian faith and practice as well as a greater appreciation of the spiritual paths of others. Requirements: short papers, midterm exam, and final exam.

AFST 20382. Societies and Cultures of Africa

(3-0-3)

Sub-Saharan Africa is a geographically massive territory distinguished by a tremendous diversity of cultures, customs, languages, histories, identities, and experiences. In this course, we explore this wealth of diversity, alongside a survey of some of the broad historical and contemporary trends and movements that have characterized the subcontinent. A brief introduction to African geography is followed by an overview of African history in the pre-colonial, colonial, and post-colonial eras. The remainder of the course is devoted to the study of present-day Africa, including readings on social organization, religion, music, art, popular culture, politics, economics, as well as on the contemporary crises and challenges of warfare, poverty, and HIV/AIDS and other diseases. Readings will include historical, ethnographic, literary, and autobiographical texts, and will be supplemented by a number of African-directed films.

AFST 20401. Introduction to Jazz

(3-0-3) Dwyer

A music appreciation course requiring no musical background and no prerequisites. General coverage of the history, various styles, and major performers of jazz, with an emphasis on current practice. Receive permission from the instructor <mailto:ldwyer@nd.edu>

AFST 20550. African Philosophy

(3-0-3)

This course explores such issues as myth and its relationship to philosophy, reality as a whole, as a principle that underlies the African universe, the question of ancestors, and being and knowing. It will explore the development of African philosophy through three periods: the traditional/classical, the colonial, and the contemporary/post-colonial.

AFST 20575. Ways of Peacemaking: Gandhi/King

(3-0-3)

An intensive study of the philosophy and spirituality of two of the greatest activists and peace educators of our century, M. Gandhi and M. Luther King. We will be especially concerned with the way each of these men came to construct new, yet quite ancient, images or controlling myths that they hoped would lead us to think and act in revolutionary ways.

AFST 20582. Women in Islamic Society

(3-0-3)

This course is a broad survey of women's and gender issues in various Islamic societies, with a focus on the Arab Middle East. The first half of the semester will

concentrate on the historical position of women in Islamic societies, defined by the normative values of Islam and by cultural traditions and norms. We will discuss how the interpretations of these values in diverse circumstances and who gets to do the interpreting have had an important impact on women's societal roles. The second half of the course will privilege women's voices and agency in articulating their gendered identities and roles in a number of pre-modern and modern Islamic societies. Our sources for discovering these voices are women's memoirs, fiction, magazine articles, and public speeches. We will also focus on how historical phenomena such as Western colonialism, nationalist liberation movements, civil and other forms of war have given rise to women's organized movements and a feminist socio-political consciousness in many cases.

AFST 20583. Islam: Religion and Culture

(1.15-0-3)

This introductory course will discuss the rise of Islam in the Arabian peninsula in the seventh century of the Common Era and its subsequent establishment as a major world religion and civilization. Lectures and readings will deal with the life of the Prophet Muhammad, the Qur'an and its role in worship and society, early Islamic history, community formation, law and religious practices, theology, mysticism, and literature. Emphasis will be on the core beliefs and institutions of Islam and on its religious and political thought from the Middle Ages until our own time. The latter part of the course will deal with the spread of Islam to the West, resurgent trends within Islam, both in their reformist and extremist forms, and contemporary Muslim engagements with modernity.

AFST 20600. Comparative Politics

(3-0-3) Coppedge

In this course students learn to think more clearly about politics, especially about how and why political life takes place as it does around the world. We study why nation-states are the dominant form of political organization today and why nation-states differ, especially in their economic and political development. Why are some countries democracies? Why are others dictatorships? Why do political movements participate in elections, start civil wars, or engage in terrorism? We develop answers to these questions by focusing on the experiences of Britain, France, Germany, Japan, Russia, China, Iran, India, Mexico, and South Africa.

AFST 20613. African American Politics

(3-0-3)

This course explores the basic elements associated with Black Politics in the U.S.: the role of Black institutions such as the Black Church, the importance of the civil rights movement in challenging barriers to Black political participation, the mid-20th-century legal framework created to create access to the political system, and an exploration of Black political participation in northern cities, where there are also increasing numbers of Latinos and other nonwhite groups. Since the course will be taught in spring 2009 immediately after the 2008 Presidential campaign, we will also have the chance to explore the impact of Illinois Senator Obama's campaign on national politics, whatever the outcome, and to consider the impact on African American politics itself.

AFST 20675. Societies and Cultures of Latin America

(7.5-0-3)

This course introduces students to the diverse cultures and societies of Latin America through historical, ethnographic and literary study. Contemporary issues of globalization, violence and migration will preoccupy the discussion of Central and South America and the Caribbean today.

AFST 20702. Sociology of Race and Ethnicity

(3-0-3)

This course provides an overview of some of the classic and contemporary sociological understandings and perspectives of race and ethnicity. We will focus particular attention on the racial/ethnic groups common to the United States, broadly categorized as African, Asian, European, and Hispanic Americans. The course will cover areas of identity and culture and will address issues such as racism, immigration, assimilation, segregation, and affirmative action. We will use printed texts as well as film clips; some assignments may include movie viewing.

AFST 20703. Introduction to Social Problems

(3-0-3)

Analysis of selected problems in American society such as crime, narcotic addiction, alcoholism, delinquency, racial and ethnic conflict, prostitution, and others. Discussions, debates, films, tapes, and readings.

AFST 20716. Introduction to Social Problems

(3-0-3)

Today's society is beset by many serious social problems, for example, crime and deviance, drug abuse and addiction, domestic violence, hunger and poverty, and racial/ethnic discrimination. How do we think about these problems in ways that lead to helpful solutions? In what ways does one's own social background and role in society affect his/her views of these problems? In this course, students will learn to take a sociological perspective not only in examining the causes, consequences, and solutions to some of society's most troubling social problems, but also in taking a critical look at their own perceptions of the problem.

AFST 20770. Business, Economics and Culture

(1.5-0-3)

Economic, political and cultural interactions between geographically distant groups have been intensifying over the past century and the 21st century is being seen as the Global century. In this rapidly changing world, it is becoming increasingly important to understand the role of cultural (religious, ethnic and political/socio-economic) factors in determining and shaping interactions. In this course, we will use an ethnographic focused approach to explore the impact of cultural variations on many issues that have arisen or will potentially arise in the course of contemporary global economic interactions. These include the relationships between reciprocity, redistribution and market behaviors, cultural differences in business strategies, relationship building and formation of partnerships, marketing techniques, consumer behavior, and political and environmental situations. We will also look at the impact of business interaction on regional and local economies in Asia (India), Africa (Kenya and the Sudan) and Latin America (Mexico and Guatemala). Course work will include discussions based on readings, documentaries, an individual ethnographic project and report, and a final paper on the application of cultural factors for global interactions.

AFST 20781. Intro to Latinos in American Society

(3-0-3) Cardenas

This course will examine the sociology of the Latino experience in the United States, including the historical, cultural and political foundations of Latino life. We will approach these topics comparatively, thus attention will be given to the various experiences of a multiplicity of Latino groups in the U.S.

AFST 23701. Topics on Race in the Americas

(1-0-1)

This course takes an interdisciplinary approach to a range of historical, literary, religious, and social science topics important to the understanding of the experiences of Latino and African-American people in American society. The mini-course will focus, among other topics, on human rights, race relations, mestizaje, racism, ethnicity, social justice, and media images. Mandatory lecture series/seminar (six to seven dates). Participation is required. In addition, students will write a short paper. Students interested in this course must attend a short organizational meeting at the beginning of the semester.

AFST 27600. U.S. Civil Rights Movement

(3-0-3)

This course will trace the struggle for equal rights undertaken by various marginalized groups in the twentieth-century United States, focusing particularly on the experience of African Americans. We will examine in detail the civil rights movement of the 1950s and 1960s, considering its contesting visions for African American liberation and the meaning of American freedom and democracy. This will be put in context of the "long" struggle, going back to early efforts to fight Jim Crow and moving forward to current debates over issues such as affirmative action and reparations, with a consideration of conservative white backlash. We will also

look briefly at other traditionally marginalized groups' struggles to achieve a full measure of constitutional rights and cultural acceptance. All of this will provide opportunities to discuss normative questions such as the nature of a just society and the means by which violence and injustice should be confronted. With so many powerful voices available to us from participants in these struggles, much of our study will be done through the reading and analysis of primary sources.

AFST 30101. Contemporary Black Literature

(3-0-3)

A survey of late 20th-century Black literature in the United States and its relation to other ethnic literatures.

AFST 30103. Black Arts and the Diaspora

(3-0-3) Ford

This course offers a survey of black diasporic artistry. At the same time, it answers the question, "who constitutes the Black Diaspora?" in unique ways. We will focus primarily on this conversation's development from the 1920s up to the present through poetry, prose fiction and nonfiction, visual art, film, and television. Attention will be devoted to how these different genres and media frame what is known (or unknown) about the Black Diaspora. Moreover, we will consider how these media and genres influence political activism in the Black Diaspora. Due to the diversity of the materials covered, the themes will give the course its unity. Students will be urged to follow a particular theme (or two) throughout the course. Some of these themes might include race, gender, class, the body, and leadership. Some of the artists and intellectuals in this survey will include: African American writers Zora Neale Hurston, Langston Hughes, and Nathaniel Mackey; Trinidadian-Canadian poet M. Nourbese Philip; musicians like Nigerian artist and activist Fela Kuti; Martinican philosopher and psychoanalyst Frantz Fanon; orator and activist Martin Luther King, Jr.; the Haitian-Puerto Rican visual artists Jean-Michel Basquiat; and the visual artist Kehinde Wiley. Class participation is paramount. Students will also write reader response papers and research essays.

AFST 30111. Thinking Through Crisis: Reading 20th- and 21st-Century African American Literature and Cultural Theory

(3-0-3) Ford

What does it mean to be in a "crisis"? We live only a few years after a natural disaster ravaged the southern coast of the United States; we live only a few years after incidents of racial violence and judicial mishaps culminated in national protest; finally, these issues have been swallowed up by our worry over an economic breakdown that has been called a mere downturn by some, a recession by others, and even fewer have called it a depression. But none of these descriptions help us understand what we mean by "crisis" and what potential there is to think and act in such turbulent times. The same sorts of issues troubling our present also troubled Americans living in the Great Depression. African American writers of that period wrote novels, short stories, autobiographies, historiographies, poetry and other literary pieces that were both aesthetically rich and experiments in thinking critically about these issues. This course simply asks: How can Depression-era African American literature help us understand what it means to think during a "crisis," and see the word as a concept, not just a media buzz word? Readings will include canonical authors like W.E.B. Du Bois, Ida B. Wells, Zora Neale Hurston, Langston Hughes, and Carter G. Woodson, studied alongside artistic and theoretical responses to Hurricane Katrina, Jena 6, and other recent events.

AFST 30201. African-American History I

(3-0-3)

This course is a survey of the history of African Americans, beginning with an examination of their West African origins and ending with the Civil War era. We will discuss the 14th and 15th centuries, West African kingdoms, forms of domestic slavery and West African cultures, the Atlantic slave trade, early slave societies in the Caribbean, slavery in colonial America, the beginnings of African-American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery and resulting sectional disputes, and the significance of "bloody Kansas" and the Civil War.

AFST 30202. African-American History II: Since 1865

(3-0-3) Pierce

African American History II is a course that examines the broad range of problems and experiences of African Americans from the close of the American Civil War to the 1980s. We will explore both the relationship of blacks to the larger society and the inner dynamics of the black community. We will devote particular attention to Reconstruction, the migration of African Americans from the rural south to the urban north, and the political machinations of the African American community. The course will utilize historical documents in the form of articles and other secondary sources. Classes will be conducted as lecture-discussions.

AFST 30203. Colonial America

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and depeopling) of English North America.

AFST 30204. U.S. Civil War and Reconstruction, 1848–77

(3-0-3)

Through intensive reading and writing students will explore the social and cultural history of America's most costly war. We will focus on various topics as they relate to the war: antebellum origins, religion, gender, Lincoln's reasons for waging war, dead bodies, freedmen's families, black soldiers, and the uses of war memory. This will not be a guns-and-generals-smell-the-smoke course, though knowledge of military matters can be helpful. We will ask and try to answer who really "won" and "lost" the war.

AFST 30205. United States Labor History

(3-0-3)

Corequisite: HIST 32618

This course will examine the history of paid and unpaid labor in the United States from the American Revolution to the near present. We will seek to understand how working people both shaped—and were shaped by—the American Revolution, early industrialization, the debates over slavery and free labor culminating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the Cold War-era repression of the left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers themselves created to advance their own interests, namely the unions and affiliated institutions that have made up the labor movement. We will also pay special attention to the crucial connections between work and identities of class, race, and gender as they evolved over the past two centuries.

AFST 30206. The United States Since WWII

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of George H.W. Bush. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this post-war era, and the presidencies of Gerald Ford through George H.W. Bush. There will be a required reading list of approximately six books, two smaller writing assignments, and three examinations.

AFST 30207. Race in American Culture

(3-0-3)

This course will explore the history of American society—its culture, politics, and people—through an in-depth look at the defining issue of race.

AFST 30209. Jacksonian America: Politics, Culture, and Society, 1815–1848

(3-0-3) Graff

This course explores the early 19th-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–48). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and antislavery, changing gender roles and the rise of feminism, evangelical religion and reform, and Native American resistance and removal.

AFST 30210. American Political Traditions since 1865

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy's character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of the character of Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

AFST 30211. History of U.S. South to 1877

(3-0-3)

This course will provide a survey of the American South through Reconstruction. We will briefly describe Native American societies and early Spanish settlements in Florida and the Southwest before addressing in greater detail the political, cultural, and social history of the region as it was settled beginning in the Southeast. We will examine how ideas like honor, freedom, patriarchy, and religious beliefs were forged and evolved in the context of a slave economy, and how they shaped the day's political questions. We will also consider the Confederate experience and Reconstruction. There will be one paper (30 percent), two exams (25 percent each), reading reports (10 percent) and class participation (10 percent).

AFST 30212. African-American Politics, 1900–50

(3-0-3)

This course examines the diverse struggles for full citizenship and human rights on the part of African Americans from 1900 to 1950. The topics to be studied include the Great Migration, the New Negro Movement and Harlem Renaissance, the Marcus Garvey Movement, the rise of A. Philip Randolph's Brotherhood of Sleeping Car Porters, the involvement of blacks in the Communist Party, and the transformations in black culture and politics brought about by the two World Wars. This course will examine the efforts of liberal-integrationist, socialist, communist, and Black Nationalist organizations to combat white racism and qualitatively improve the lives of blacks in various regions of the United States. It hopes to convey blacks' diverse thoughts on complex issues such as identity, politics, class, gender, race, and nationality.

AFST 30213. American Social Movements

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black Civil Rights movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values

and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

AFST 30214. Labor and America since 1945

(3-0-3) Graff

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8% of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is “globalization” and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies or mass culture are particularly welcome.

AFST 30215. Witnessing the Sixties

(2.5-0-3) Giamo

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the sixties, on the one hand, and on the other to explore the various journalistic representations of events, movements, and transformation. Much that was written during the period was ephemeral. There are, however, certain lasting accounts of the sixties by authors who command respect today, writers whose new publications or publications about them get front-page reviews in the *New York Times* Book Review section. We will focus on the manner in which each writer witnessed the sixties as well as the unique interaction between personal expression, social event, and cultural meaning. We will focus on fresh styles of writing, such as the new journalism popularized by Tom Wolfe, as well as writing that is aimed toward protest, resistance, dislocation, solipsism, and reportage. Major topics for consideration include the counterculture and the movement—a combination of civil rights and anti-war protest. These topics will sharpen our interest in social history, cultural change, politics, foreign affairs, music, literature, and documentary film.

AFST 30216. The United States, 1900–45

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. Major topics will include the background for Progressive reform, the New Nationalism and New Freedom administrations of Theodore Roosevelt and Woodrow Wilson, the diplomacy of the early 20th century, the causes and results of World War I, the Republican administrations of the 1920s, the New Deal administration of Franklin D. Roosevelt, isolationism and neutrality in the inter-war period, and the American home front during World War II. There will be a required reading list of approximately seven books, two shorter writing assignments, and three major examinations, including the final.

AFST 30217. History of American Sport

(3-0-3) Soares

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horseracing and games of chance in the colonial period through the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will

explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender and class. Given Notre Dame's tradition in athletics, we will explore the university's involvement in this historical process.

AFST 30219. Race and Culture in the American South to 1865
(3-0-3)

This course traces the roots of southern American culture by exploring the centrality of the relationships between sex, manliness, and slavery in the development of the U.S. South from 1619 to 1865. By examining how European men viewed their own sexuality and that of European women in contrast to that of African men and women, this course seeks to examine the complex racial and gendered identities at the center of southern culture. The underlying current of the class is to understand the complexity with which racial and gendered identities defined all relationships and culture in the South. Using primary and secondary sources, we will critically engage the debates about slavery, racism, gender, and class in southern culture. We will reevaluate the historiographic arguments on American racism. We will take the notion of "southern gentlemen" to task, juxtaposing their responsibility as patriarchs to the ugly underbelly of slavery, race, and sexual exploitation. Our efforts in this class will be to understand the contours of the relationships between sexual control, manliness, and racism. We will explore the daily lives of men and women who lived during the time. A variety of perspectives will constitute our sources about slavery, including those of blacks, free and enslaved, as well as planters, abolitionists, women, and yeomen.

AFST 30220. Women in the U.S. South
(3-0-3)

This course introduces students to the historical study of women in the United States South. It will cover topics such as women in slavery, the transition to freedom, race relations, and social movements. Through student-centered discussions, presentations, and a variety of different writing assignments, students will analyze how race, class, and gender structured the experiences of women in southern society. At the end of the semester, students will be prepared to pursue more advanced research in the field of women's history.

AFST 30222. U.S. During the 1960s
(3-0-3) Swartz

Few periods in American history have been as controversial as the 1960s. Sometimes called the "Long Sixties," it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the U.S., the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a combination of readings, videos, mini-lectures, and class discussions. Toward the second, they will be exposed to four different approaches: 1) discussing primary documents and writing a paper on some of them; 2) studying three small-scale case studies; 3) examining the large-scale phenomenon of protest; and 4) reading the memoirs of a Cabinet member, hence gaining an insider's view of the life and activities in the White House.

AFST 30224. American Men, American Women
(3-0-3) Ardizzone

What does it mean to be male or female in America? Where did our ideas about gender come from and how do they influence our lives, institutions, values, and cultures? In this course we will begin by reviewing colonial and Victorian gender systems in the U.S. Our focus, however, is the twentieth century, and the development of modern (early 20th-century) and contemporary (post-1970s) gender roles and ideas. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and

economic needs have shaped the definition of acceptable behavior and life choices based on sex and gender. We will also pay close attention to the roles that race, class, culture, sexuality, marital status and other key factors play in determining male and female roles and influencing images of femininity and masculinity.

AFST 30225. Civil Rights and Protest Movements
(3-0-3) Ardizzone

This course will look at protest movements for civil rights and other related issues, focusing on the 20th century, especially the second half. One central theme will be the African American civil rights movement of the 1950s and 1960s. How did race, gender, class, religion, and region impact the strategies, goals, and reception of various threads of black struggles for full citizenship? In addition, we will explore previous and later generations of African American activism, as well as other protest movements in the post WWII period. How did the civil rights movement that emerged in the 1950s draw on early 20th-century activism and leadership? What directions did African American protest movements take after the late 1960s? How did other civil rights, racial and ethnic consciousness, and social reform movements in the 1960s, '70s, and '80s develop from their own historical experiences and in relationship to other protest movements?

AFST 30226. American Men, American Women
(3-0-3)

What does it mean to be male or female in America? Where did our ideas about gender come from and how do they influence our lives, institutions, values, and cultures? In this course we will begin by reviewing colonial and Victorian gender systems in the U.S. Our focus, however, is the twentieth century, and the development of modern (early 20th-century) and contemporary (post-1970s) gender roles and ideas. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on sex and gender. We will also pay close attention to the roles that race, class, culture, sexuality, marital status and other key factors play in determining male and female roles and influencing images of femininity and masculinity.

AFST 30250. African History I
(3-0-3)

Corequisite: HIST 32050

This course introduces students to major themes in African history to 1800. It investigates agricultural and iron revolutions, states and empires, religious movements, and patterns of migration and labor exploitation. The latter part of the course focuses on Africa in the era of trans-Atlantic slave trade. Questions to explore include: What was the effect of the slave trade on Africa? How did the slave trade shape the formation and destruction of African states? How did the slave trade influence social systems, gender relations, cultural practices, religious beliefs, and demographics in Africa?

AFST 30251. African History To 1800
(3-0-3)

This course introduces students to major themes in African history to 1800. It investigates agricultural and iron revolutions, states and empires, religious movements, and patterns of migration and labor exploitation. The latter part of the course focuses on Africa in the era of trans-Atlantic slave trade, from 1550 to 1800. We will study the various methods that historians use to investigate the past; we will also delve into some of the intellectual debates surrounding pre-colonial Africa and the slave trade. By the end of the course, students will have a firm understanding of states and societies in Africa in the pre-colonial period.

AFST 30253. History of South Africa
(3-0-3)

This course offers an overview of modern South Africa from the perspective of radical social history, a major intellectual tradition in South African studies. It will begin by identifying processes of dispossession, urbanization and proletarianization set in train by South Africa's mineral revolution. It will then look at the clash between imperial and Boer interests, and the South African war. The Union of South Africa in 1910 represented a re-organization of white power, and the course

will turn to the experiences of Union for both black and white, including the emergence of African nationalism and other, culturally-located, forms of resistance. The apartheid state was inaugurated in 1948, and the course will examine the consolidation of the state, how it sought to control black and white citizens and subjects, and the accelerating politics of defiance. There will be particular emphasis on Black Consciousness and its role in the 1976 Soweto revolt. By way of conclusion the course will turn to the culture and politics of resistance in the 1980s, up to the initial dismantling of apartheid in 1990.

AFST 30274. Slavery in the Atlantic World

(3-0-3)

This survey course explores the role of coerced African labor in the birth of the Atlantic World. What do we mean by Atlantic World? What do we mean by slavery? What varied and nuanced claims to humanity did Africans make against a dehumanizing labor system? How did sexuality and gender norms shape the experiences of slavery for men and women? Together we will examine slave autobiographies, travel diaries, and pictorial sources to address these questions. We will focus on the peoples of West Africa, Brazil, the United States and the Caribbean who were enslaved from the fifteenth to the nineteenth century.

AFST 30275. History of Brazil

(3-0-3)

This course surveys the history of Brazil, Latin America's largest nation, from its pre-Columbian roots to the present, with particular emphasis on social, economic, and political developments during that time. Topics will include indigenous people, the formation of colonial societies and economies, independence, slavery, abolition and post-emancipation society, immigration, the emergence of populist politics, industrialization, and efforts to develop the Amazon, military rule, and democratization.

AFST 30276. African American Women's History

(2.7-0-3)

This course will trace the cultural, economic and political history of African American women in the United States from slavery to the present. Through a combination of books, primary sources, and film we will explore how African American women have addressed what is often referred to as the "double burden" of sexism and racism while seeking to define their own identities as individuals, wives, mothers, workers, and citizens. Major themes will include labor, family social movements, and civil rights.

AFST 30277. Mixed Race America

(3-0-3)

Despite popular images of American as a "melting" both of races and ethnicities, our institutions, values, and practices have often tried to create or maintain spatial and social distance between groups defined as racially different. This course will explore that ways in which Americans have transgressed those boundaries or found other ways of interacting across cultural lines, primarily in the 19th and 20th centuries. We will examine popular cultural perceptions of people of mixed ancestry, their social experiences, the development of various mixed-ancestry communities, and historical attempts to limit interracial socializing, relationships, and marriage. These issues were and are deeply imbedded in debates over the meaning of race, gender expectations and ideas about sex and sexuality. We will also pay close attention to how minority communities have understood people of mixed ancestry in the United States, and how mixed-race identities intersect with African American, Native American, Asian, White, and Latino identities.

AFST 30279. Abraham Lincoln's America, 1809–1865

(3-0-3)

This course explores the social, economic, intellectual, cultural, and political history of the early to mid-nineteenth-century United States through the prism of Abraham Lincoln's biography. Topics may include trans-Appalachian migration and settlement, U.S.-Native American relations, race and slavery, gender and family, market developments and labor relations, formal and informal politics, the law, and the promise and limits of studying history through singular lives.

AFST 30299. Caribbean History after Slavery

(3-0-3)

This course explores the history of the Caribbean from the destruction of slavery in 1804 to the Cuban Revolution of 1959.

AFST 30358. Societies and Cultures of Africa

(3-0-3)

Sub-Saharan Africa is a geographically massive territory distinguished by a tremendous diversity of cultures, customs, languages, histories, identities, and experiences. In this course, we explore this wealth of diversity, alongside a survey of some of the broad historical and contemporary trends and movements that have characterized the subcontinent. A brief introduction to African geography is followed by an overview of African history in the pre-colonial, colonial, and post-colonial eras. The remainder of the course is devoted to the study of present-day Africa, including readings on social organization, religion, music, art, popular culture, politics, economics, as well as on the contemporary crises and challenges of warfare, poverty, and HIV/AIDS and other diseases. Readings will include historical, ethnographic, literary, and autobiographical texts, and will be supplemented by a number of African-directed films.

AFST 30410. Topics in African-American Cinema

(3-2-3)

Corequisite: AFST 31410

An investigation of selected topics concerning theory, history, and research in film, television, the media, or cultural studies.

AFST 30575. Islam and Modernity

(1.15-0-3)

Islam and its compatibility with modernity is a much-debated issue in the contemporary period. The course will address this timely topic and discuss the most important "hot-button" issues involved: political Islam, democracy, pluralism, rights of women, and secularism. The historical contexts in which these issues have been debated will also receive attention. What internal resources exist within Islamic thought, which are being drawn upon by modernists to make a strong case for an essential compatibility between Islam, modernity, and democracy, for example? Is democracy (or Islam, for that matter) a monolithic concept? Students will be expected to actively take part in discussions centered around such questions, the assigned readings, and class lectures. Prior exposure to at least one class on Islam or the Middle East is strongly recommended.

AFST 30600. Political Economy of North/South Relations

(3-0-3) Baker

This course will introduce the changing perspectives and current controversies concerning international economic relations between the developed and developing worlds. What do we mean by "development"? To what extent should states intervene in free markets? Does it matter that today's developing countries operate in a different global environment than countries like Britain and the U.S. did during their development period? Should developing countries be given special consideration in trade and financial agreements? Do international financial institutions (IFIs) like the IMF, the World Bank and the WTO act in the interest of the world as a whole or serve the narrower interest of the powerful north? How are domestic imperatives balanced with global aims? The course will have a strong interdisciplinary flavor, with readings taken from both political science and economics.

AFST 30601. Race/Ethnicity and American Politics

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions (the Congress, presidency,

judiciary, state and local governments, etc.) play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

AFST 30602. Race and Political Equality

(3-0-3)

This course will describe and seek to explain racial differences in public opinion, political participation, party affiliation, representation, and policy outcomes.

AFST 30603. Contentious Politics and Resistance Movements

(3-0-3)

This course analyzes prominent resistance movements in the twentieth and twenty-first centuries. We first examine the conceptual tools of contentious politics, domination and resistance, state-society relations, and violent vs. nonviolent strategies of resistance. We then examine various nationalist independence movements, revolutionary movements, communist insurgencies, civil wars, and peaceful democracy movements. To better understand resistance movements from the perspectives of leaders and participants, we will watch a series of documentaries and read the (auto-) biographies of Mahatma Gandhi, Nelson Mandela, Aung San Suu Kyi, the Dalai Lama, Wei Jingshen, and others. In analyzing democracy movements, we will further examine what the third wave of democracy entails, why some movements succeed while others fail, how new democracies should reconcile with past dictators, to what extent constitutional engineering can solve past problems and facilitate successful transitions, and why some new democracies remain fragile.

AFST 30604. Modern Political Thought

(3-0-3)

In this course, students will study the focal ideas and arguments that helped shape the development of Western modernity—and its notions of freedom, equality, citizenship, rights, democracy, nationality, justice, and cosmopolitanism—through close readings of classic texts of European and American political thought. Hobbes's *Leviathan*, Locke's *Second Treatise of Government*, Rousseau's *First Discourse*, *Second Discourse*, and *Social Contract*, plus several historical and political essays by Kant will offer students the opportunity to understand the evolution of the vastly influential "social contract" tradition and the variants of democracy that have sprung from it. In addition, we will read contemporary works of political theory by John Rawls, Anthony Appiah, and Martha Nussbaum that both build on and move beyond the early modern social contract tradition in order to engage pressing issues of global justice that are inflected by race, ethnicity, nationality, class, sex, and gender. Students will participate in an on-campus conference on "Cosmopolitanism: Gender, Race, Class and the Quest for Global Justice," which will feature Appiah and Nussbaum as keynote speakers.

AFST 30605. Social Movements

(3-0-3)

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course, we will consider the ways in which different sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

AFST 30606. Black Chicago Politics

(3-0-3)

This course introduces students to the vast, complex and exciting dimensions of black Chicago politics. First, institutional structures, geographic distribution and population characteristics will inform students about the sociodemographic background of the African American population in the city. Second, the course explores varying types of political expression that have developed over more than a century, including electoral politics, mass movements, and partisan politics; it will also examine the impact of the Chicago machine, and of the Washington era on the political and economic status of African Americans in the city. Third, public policy developments in housing, education and criminal justice will be discussed.

Fourth, the course also compares black political standing with other racial and ethnic groups in the city. Finally, the course will introduce students to the long tradition of social science research centered on the city of Chicago.

AFST 30613. African American Politics: The End or a New Beginning?

(3-0-3) Pinderhughes

This course explores the core elements associated with black politics in the U.S.: the role of black institutions such as the black Church, the importance of the civil rights movement in challenging barriers to black political participation, the mid 20th century legal framework created to open access to the political system, and the development of black political participation in northern cities. Competition for leadership roles and public resources from the increasing numbers of Latinos, Asians and other immigrants will also be addressed. Since the course will be taught in spring 2010 at the beginning of the second year of the Obama administration, we will also have the chance to explore the impact of the first black president on national politics, and to consider the impact of the president and his administration on African American politics itself. The course incorporates political science concepts, but the readings and other materials are accessible to students from a variety of disciplines and levels of knowledge.

AFST 30648. The Politics of Poverty and Social Welfare

(3-0-3)

The United States is the wealthiest nation in the world, yet poverty remains a persistent concern. In this course, we will study the sources of poverty and economic inequality and what has and can be done to address the problem. We begin by discussing different theories on to what extent citizens' income and wealth should be equal in a society and the government's prescribed role, if any, in the process. We then trace the history of poverty in the United States and various government efforts to address the problem through social welfare programs. Finally, we will closely study the different forms poverty takes on today and enter the ongoing debate over what public policies should be implemented in response. Throughout the course, we will pay particular attention to the decidedly political dimension of poverty in America.

AFST 30649. Public Opinion and Political Behavior

(3-0-3)

A principal tenet underlying democratic governance is the belief that public opinion or the "will of the people" should dictate governmental behavior. To the extent this belief is a realistic consideration; difficult questions remain concerning the capacity for citizens to develop reasoned opinions and how to conceptualize and measure opinion. This course explores the foundations of political and social attitudes and the methodology used to observe what people think about politics. The course is structured around four key questions: 1) How reliable is the methodology of public opinion polling? 2) How do people acquire, organize, and change their political beliefs and attitudes? 3) What factors in the political world influence and shape public opinion, including the effects of the media, political events, and social forces? 4) What are the main lines of cleavage in American public opinion? How polarized is the American public and on what issues is there a consensus?

AFST 30650. Politics of Southern Africa

(3-0-3) Walshe

This course focuses on the key state of the region—the Republic of South Africa. After outlining the political history of apartheid, the phenomenon of Afrikaner nationalism, and the rise of African nationalism and the liberation movements, attention turns to the country's escalating turmoil of the 1980s and resulting political transition in the 1990s. South Africa's political and economic prospects are also examined. The semester concludes with a survey of the transitions that brought South Africa's neighboring territories to independence, the destabilization strategies of the apartheid regime and United States policy in that region.

AFST 30654. Radical Islam in Comparative Perspective

(3-0-3) Bligh

Muslim radical movements are not new to the Middle East. They made their debut in the 18th century Arabian Peninsula paving the way for the first Saudi Kingdom.

However, the use Islam by individuals, movements and nation states for political purposes has become common since the mid-1970s. Many of the contemporary Muslim actors use religious terminology in their ideology and activities but are active as political actors per se. This course is studying the roots of the political Islam, its current political activities and their implications, the distinction between mainstream Islam and radical Islam, and finally the phenomena of religious terror used by several of these movements.

AFST 30660. Islam and Politics in the Middle East

(3-0-3) Shahin

This course is designed to provide students with an understanding of the phenomenon of political Islam in the Arab and Muslim worlds. It examines the reasons, implications, and consequences of the reassertion of Islam in today's politics. The first part of the course provides a thorough analysis of the Islamic order and the model(s) that inspires modern Islamist activists. The second part critically examines the ideas of the main ideologues of contemporary Islamic movements. The third part discusses the approaches to the understanding of contemporary political Islam and the Islamic movements and presents cases studies of mainstream and radical Islamic movements in a number of Arab and Muslim countries. Finally, the course concludes with a critical analysis of the future of political Islam and its relations with the West.

AFST 30677. Political Psychology

(3-0-3)

Political Psychology is a multidisciplinary field of study concerned with how psychological processes are influenced by and inform political behavior of individual citizens, groups, political leaders, and behavior within political institutions. This class explores some of the major lines of political psychology theory and research, and their application to political life. These applications include the role of personality in the formation of political attitudes and democratic values; racism, stereotyping, ethnocentrism, and nationalism; the influences of emotion and cognition on voting decisions; social identity theory; information processing and political decision making; inter-group conflict; political intolerance; and methodological approaches in political psychology. This course will attempt to answer the following questions: What is racism and where does it come from? Is political intolerance an automatic response to objective stimuli or is intolerance functional? To what extent are political attitudes and values ingrained in personality? Is the support for democracy, political trust, and support for the political system linked to personality? How do individuals utilize and process information in political campaigns? Is negative campaigning effective? How did a heightened sense of fear and anxiety, following the September 11 terrorist attacks on America, influence political decisions, the support for President Bush's policies, and intolerance toward social groups? How does social group identity form? Does linking or identifying with one group leads to the rejection of other groups? What motivates George Bush? To what extent are personality theories useful in explaining the behavior of presidents and other political leaders? What are the political psychological underpinnings of inter-group conflict, mass violence, and genocide? Is the truth and reconciliation movement an effective means of recovering from genocide and violence?

AFST 30681. Contentious Politics and Resistance Movements

(3-3-3)

This course analyzes prominent resistance movements in the twentieth and twentyfirst centuries. We first examine the conceptual tools of contentious politics, domination and resistance, state-society relations, and violent vs. nonviolent strategies of resistance. We then examine various nationalist independence movements, revolutionary movements, communist insurgencies, civil wars, and peaceful democracy movements. To better understand resistance movements from the perspectives of leaders and participants, we will watch a series of documentaries and read the (auto-) biographies of Mahatma Gandhi, Nelson Mandela, Aung San Suu Kyi, the Dalai Lama, Wei Jingshen, and others. In analyzing democracy movements, we will further examine what the third wave of democracy entails, why some movements succeed while others fail, how new democracies should

reconcile with past dictators, to what extent constitutional engineering can solve past problems and facilitate successful transitions, and why some new democracies remain fragile.

AFST 30690. Political Development: Lessons From Sub-Saharan African and Central America

(3-0-3)

This course will focus on the initiatives launched to foster development in Sub-Saharan Africa and Central America (Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua). What has been tried and what is the situation today? What are the constraints to social and economic development in those regions? What is being proposed now? We will focus on the current thinking on development and how the different countries in the regions have responded to it.

AFST 30702. Human Diversity

(3-0-3)

Issues concerning the nature of human diversity (race, intelligence, sex, gender, etc.) are a continuing source of social and scientific debate. This course is designed to present the issues and methods used by physical anthropologists to study both the biological basis of human differences, as well as the ongoing process of human adaptation and evolution in response to climate, nutrition, and disease. Integration of the social, biological, and medical sciences will be employed to investigate modern human variation.

AFST 30704. Homefronts During War

(3-0-3)

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include: critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, anti-nuclear movements; cold war politics and fears of American communism; debates over the draft, just-war, racism at home, and U.S. policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

AFST 30705. Poverty/Inequality/Social Stratification

(3-0-3)

Social inequality is a prominent and persistent feature of modern society. Social stratification theory attempts to explain the causes of inequality and the reasons for its persistence. This course will address such questions as: Why are some people rich and some people poor? Why does inequality persist? Who gets ahead? Can men and women get the same jobs? Do different races have the same opportunities? Is inequality necessary? Potential topics include inner-city and rural poverty, welfare dependency, homelessness, status attainment and occupational mobility, racial and ethnic stratification, and gender stratification and class theory.

AFST 30707. Multicultural Psychology

(3-0-3) Park

Given the changing demographics of the U.S. population, it has become increasingly important to understand how culture influences everyday life. This course will examine the impact of culture, ethnicity, and race on human behavior within the framework of psychological theory and research. Using an ecological perspective, the multiple contexts of individual, family, community, and society will inform the study of diverse populations. In particular, there will be an emphasis on ethnic minority groups in the U.S., including: African Americans, American Indians, Asian Americans/Pacific Islanders, and Latino/a Americans. Within-group variations associated with culture-specific or indigenous concepts, acculturation, and minority identity development will be explored in depth.

AFST 30745. Race and Ethnicity and the Latino Population in the U.S.

(3-0-3) Duarte

How Latinos are racialized often defies the common understanding of race as either black or white. This course attempts to complicate this debate by exploring the historical, political, economic and social structures that determine the ethnic and racial stratification of Latinos in the United States. Topics include the multigenerational experience of Latinos, contemporary immigration, Latino youth and gender.

AFST 30749. Anthropology of Race

(3-0-3)

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle what race is and what it is not from an anthropological perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

AFST 30775. Caribbean Diasporas

(3-0-3)

This course examines the development of Creole societies in the French, Spanish, Dutch, and British Caribbean in response to colonialism, slavery, migration, nationalism and, most recently, transnationalism. The recent exodus of as much as 20 percent of Caribbean populations to North America and Europe has afforded the rise of new transnational modes of existence. This course will explore the consciousness and experience of Caribbean diasporas through ethnography and history, religion, literature, music, and culinary arts.

AFST 30779. African Diaspora in the Americas

(3-0-3)

This course will introduce students to black populations in different parts of Latin America and the Caribbean. Students will gain familiarity with elements of the history, social context, and culture of the particular populations covered, and, through the course's comparative scope, come to better understand race, ethnicity, culture, nation, and Diaspora as concepts and as salient experiences contributing to the formation of group identities within and beyond the African diaspora. Students will also learn about different theoretical approaches to blackness and about some of the different forms of social and political activism associated with black populations. Haiti, Mexico, Brazil, and Bolivia will be among the national contexts considered in course readings, and students will have opportunities to explore other contexts in accordance with their individual interests.

AFST 30780. Social Movements in the African Diaspora

(1.1-0-3)

This course will introduce students to organizations and movements arising from and on behalf of black populations in the Diaspora, including the United States and various nations in Latin America and the Caribbean. "Movements" is defined broadly in this course to include both historical and contemporary instances of collective activism and organizing around artistic, cultural, social, intellectual, political, and/or religious agendas aimed at bringing about black liberation, social justice, and cultural/ethnic/racial awareness and pride. Among the topics to be considered are varying expressions of black nationalism within the U.S., Rastafarianism in Jamaica, black identity groups in Brazil, and black organizational presence and community building on the internet. Readings and class discussions will encourage students to think about blackness (and identity and mobilization more generally) in global terms, searching for points of connection across international borders along with points of disconnect based on differing historical, cultural, and socio-political realities and differing local understandings of race and ethnicity.

AFST 30781. Religion, Myth, and Magic

(3-0-3)

The study of religious beliefs and practices in tribal and peasant societies emphasizing myths, ritual, symbolism, and magic as ways of explaining man's place in the universe. Concepts of purity and pollution, the sacred and the profane, and types of ritual specialists and their relationship to social structure will also be examined.

AFST 30782. Kinship and Comparative Social Organization

(3-0-3) Rotman

The course uses a broad cross-cultural comparative perspective to identify and analyze the major forms of human social organization. Emphasis is on kinship terminology, descent, marriage, residence units, economic exchange, political structure, and social inequality, among other topics.

AFST 30783. Anthropology of Africa

(1.15-0-3)

Africa is known as the cradle of humanity and has the longest record of "human" activity of any continent. Yet it is also the least understood in terms of its past. The discipline of anthropology has the primary field of study used to understand the development of societies and cultures of Africa. In this course, students will learn and critically apply techniques drawn from biological anthropology, archaeology, ethnography, history and linguistic anthropology for understanding the evolution of human societies within Africa, and the inter-connections between Africa and the rest of the world from the earliest times to the present era. Topics covered in the readings, lectures, practical laboratory work, and assignments will include the beginnings of cultural development (tool-making and social networks), the interactive development of agriculture, pastoralism and foraging, the rise of social complexity, urbanism and states within Africa, colonialism, and post-colonial African states.

AFST 30784. Archaeology of the African Diaspora

(3-0-3)

This course is designed to serve as an in-depth undergraduate level introduction to archaeological perspectives on the African diaspora. In this course, we examine the formation and transformation of the black Atlantic world beginning with the transatlantic slave trade to the middle of the 19th century through the study of archaeological and historical sources. The emphasis in this course is on English-speaking African America, where the vast majority of archaeological investigations have been undertaken. A major objective of this course is to understand the material world of communities of the African diaspora within the context of the history and historiography of the black Atlantic. This course is organized around the following themes: 1) diaspora and the Atlantic world; 2) material life of the diaspora; 3) diverse communities of the diaspora; and 4) intersections of race, class, gender, and representation.

AFST 30787. Immigration in Global Perspective

(3-0-3) Albahari

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How is immigration related to urban immigrant riots? And what can anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the U.S., Europe, Australia, and Japan will enable us to appreciate both global and U.S. distinctive trends. Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class; the mass-media; border enforcement; racism; the economy; territory and identity formation; and religion.

AFST 30799. Caribbean History: From Colonization to Emancipation

(3-0-3)

"Sun, Sex & Fun" is how the global tourism industry often packages the Caribbean to its potential travelers. In this course we will unpack such simplistic

representations of the region. Students will be introduced to the diverse experiences and cultures of the peoples that made up the Caribbean from colonization in the 15th century to slave emancipation in the 19th century. The four major themes that we will examine are Indigenous peoples and European encounters; the laboring lives and the cultural worlds of enslaved Afro-Caribbean peoples; resistance and rebellion; abolition and emancipation. In this course we will watch films, use pictorial sources, slave narratives and diaries to capture the commonality of the experiences of the peoples of the Spanish, French, British and Dutch Caribbean.

AFST 30840. Survey of American Education

(3-0-3) McKenna

This course is an opportunity for students from a variety of disciplines to familiarize themselves with a lynchpin of U.S. democracy—American schooling. The course will begin with a focus on the political, social, and economic factors impacting the emergence and evolution of American schooling over the history of the nation. A special emphasis within the evolution of American schooling will be placed on how a variety of constituent groups—immigrants, Native Americans, and African-Americans were, and often still are, educated separately and differently than their white counterparts. Private and parochial education will also be touched upon. This course is in no way meant to be an exhaustive history of American schooling but an introduction into the significant events in the history of American schooling and their social, political, and economic influences. Students will garner additional historical contexts to use when analyzing modern day educational trends and issues in American education.

AFST 30848. Education Innovations in Poverty

(3-0-3) Chattopadhyay
description on file.

AFST 30849. Development Economics

(3-0-3) Ros
on file.

AFST 30875. Political Economy of Development

(3-0-3) Kim

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

AFST 31410. Topics: African-American Cinema Lab

(0-1-0)

Corequisite: AFST 30410

During the lab times, certain films will be viewed for further discussion in class.

AFST 33149. African Americans in U.S. Society and the World: Thinking With W.E.B. Du Bois

(3-0-3) Ford

How might thinking of the African American increase our understanding of U.S. society's diversity and its relation to the modern world? If such a task could be addressed by looking at the work of one thinker, who would it be? This course offers writer and philosopher W.E.B. Du Bois as one avenue to answering these questions. Not only did Du Bois predict that the problem of the twentieth century would be the "problem of the color line," and study for his Ph.D at the University of Berlin and Harvard University in the 1890s. Not only did he found

the NAACP and gained the respect of thinkers and activists like Martin Luther King and Albert Einstein, W.E.B. Du Bois was also a prolific writer of philosophy, fiction, correspondence, editorials, novels, and lectures, resulting in a 70-year career and over 175,000 pages of published and unpublished writings. This course will only read (and, in some cases, view or listen to) some of the key moments in Du Bois's intellectual career, primarily *Souls of Black Folk*, *John Brown*, *Dark Princess*, selections from *Black Reconstruction* and *Darkwater*. We will examine how he reconfigured philosophical concepts, literary genres and tropes in specific contexts to think in innovative ways about African Americans and our modern world in general. We will also contextualize Du Bois in relation to national and international figures in Europe, Africa, and Asia. Ultimately, we will consider how his ideas can inform critical thinking about the present. Grades will consist of class participation and writing assignments based on particular themes that encountered in Du Bois's thought.

AFST 33302. Faith and AFAM Experience

(1-0-1)

This course will introduce students to the African American faith experience, with particular attention being given to the historical development of spiritualities of liberation in the American diaspora. Guest lecturers and seminar leaders will offer perspective on this rich and heterogeneous tradition from several vantage points within the humanities, social sciences, and theological disciplines. In addition to a course pack of selected readings, the PBS series, *This Far by Faith: African American Spiritual Journeys*, and its companion volume will constitute the required texts for the course. There will be seven class meetings of two hours each. The course will meet on Wednesday evenings from 6:00 p.m. to 8:00 p.m. Attendance at all class sessions, active participation in seminar discussions, completion of six short (i.e., 2–3 pages in length) weekly reflection papers, and a final examination are required.

AFST 33550. Love, Death, and Exile in Arabic Literature

(3-0-3) Guo

This course explores the literary and artistic presentation of the themes of love, death, and exile in medieval and modern Arabic literature and popular culture. Through close readings of Arabic poetry, essays, short stories, and novels (with English subtitles), we discuss the following issues: topics and genres of love and poetry, gender, eroticism, and sexuality in literary discourse, the traditional motif of al-hanin Ilal al-watan ("yearning for the homeland") in modern poetry and fiction.

AFST 33701. Sociology of Sport

(3-0-3) Welch

The primary objective of this course is to examine the nature of sport in American society and the modern world. A variety of topics will be covered, including sociological perspectives on the history of sport, the relationship between sports and the entertainment industry, problems in intercollegiate and professional sports, and other issues. The course should be particularly helpful for students who are interested in careers in athletic administration, sports journalism or broadcasting, coaching, higher education administration, sports and entertainment law, and other aligned fields.

AFST 38090. Research in Africana Studies

(3-0-3)

Students will be provided with the opportunity to learn how to become competent scholarly researchers as well as general information seekers relating to Africana Studies. An Information Literacy approach to obtaining and synthesizing relevant information currently available will be the underlying focus of this course. This will be accomplished by actively learning the University of Notre Dame library system's resources pertaining to a critical examination and discovery of research study in Africana Studies. Students will begin to develop an understanding of research techniques from the perspective of producer and consumer.

AFST 40104. Homeland Security: Surveillance, Terror and Citizenship in America

(1.15-0-3)

This course explores the relationship between popular myths about the American experience and the actual experience of marginalized subjects in American society. It serves to make concrete a theoretical discussion of citizenship in the context of American Individualism and explores the relationships among social stratification, institutional coercion, and national narratives. As along view of the last century, Homeland Security considers old forms of terror and surveillance evident in African American literature that anticipates and mimics the fear and anxiety in the nation after September 11. We will consider themes such as space, place, border, home, community, protection, and nationalism. The literature and critical essays under consideration straddle regional, class, gender, and social boundaries to facilitate our understanding of how African Americans within the nation create narratives of cultural fragmentation, exile, and alienation. In the process we will explore the condition of African American migration—from early-twentieth-century movements to urban centers, to early-twenty-first century migrations as a result of Katrina—and consider the way mobility may inform new landscapes of hope and displacement. Some of the texts we will read are *Passing*, *The Street*, *Invisible Man*, *I Know Why The Caged Bird Sings*, *The Color Purple*, and *Eva's Man*. These texts may be considered counter-narratives in the way that they stress exploitation, failure, disillusionment, and exile, but they intervene in formative debates about how to define a national identity and, to echo Langston Hughes, they too sing America. Course requirements: one oral presentation (15%); three 2-page response papers (10% each); one paper proposal; one 10–12 page essay (35%); class participation (20%).

AFST 40106. Race, Gender and Women of Color

(2.5-0-3)

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the U.S. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

AFST 40107. African-American Literature

(3-0-3)

A survey of selected seminal works of African-American literature.

AFST 40109. Writing Harlem: Race, Renaissance, and the Modern

(5-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African-American literature in Harlem in the 1920s and 1930s.

AFST 40111. Southern Fiction

(3-0-3)

Readings in twentieth century southern fiction from 1900–1960, including Kate Chopin, Jean Toomer, William Faulkner, Richard Wright, Zora Neale Hurston, Ralph Ellison, Flannery O'Connor, and Eudora Welty. We will examine both the recurring subjects of the Jim Crow era—"sin, sex, and segregation," in the old Southern phrase—and the stylistic innovations of the writers. We'll pay special attention to contemporary criticism that explores the period from historical, political, and cultural perspectives.

AFST 40113. African-American Poetry

(3-0-3)

Close readings of selected contemporary African-American poets.

AFST 40114. New African-American Poetry

(3-0-3)

This course is designed as an exploration and showcase of African American poetry and poetics, as seen through the poetry and essays of the post civil rights/black arts movement generation of poets. Although this course will also examine the

historical elements of the African-American voice, the main focus of our reading and discussions will concentrate on the different and various facets of present day African-American poetry. While some of the writers we encounter during the semester may be known to many: Elizabeth Alexander, Terrance Hayes, Harryette Mullen; many more will prove to be poets with only first or second books under their belts. Though their pages, we will attempt to trace the path their poetry leads; what is their sense of voice? What obligations (if any) do they feel with the writing that's come before them? What new territories do they claim? It is hoped that the student will come away with a deeper understanding of what elements and issues define the 21st African American poetic voice.

AFST 40150. Literature of Southern Africa

(3-0-3)

A study of the literary culture of Southern Africa in the last 25 years of the 20th century, specifically the ways in which individual writers confronted the apartheid regime and their responses to the new South Africa in the post-apartheid period.

AFST 40174. Caribbean Voices

(3-0-3)

An introduction to the literature of Anglophone Caribbean.

AFST 40201. Harlem's Americas

(3-0-3)

What was the Harlem Renaissance? While traditional notions of this time in literary history have conceived of it as a brief but luminous flowering of the arts in African-American culture, not so much attention has been given to the many different voices that contributed to the movement, and which shaped its representations of race in the early twentieth century. In this course, we will examine the meaning and significance of the Harlem Renaissance as conventionally understood, then move on to an exploration of Harlem's Americas, or the many cultural locations from which race and racial representation were being considered both inside and outside the movement's accepted parameters. Thus, rather than studying the Harlem Renaissance solely as an African-American phenomenon, we'll also explore the interrelationships between a number of its core works, along with several others from the same period not generally studied in this context. In seeking to understand the writing of Harlem's Americas, we'll investigate how all of the texts we examine are engaged in a larger dialogue on the meaning of race in the early twentieth century, both in the United States and beyond. In so doing, we'll try to gain a deeper understanding of the complexity of the Harlem Renaissance, while considering what this may have to tell us about race and racial representation not only in the early twentieth century, but on into the twenty-first. Course texts: Booker T. Washington, *Up From Slavery*; W. E. B. Du Bois, *The Souls of Black Folk*; Jessie Fauset, *Plum Bun*; Nella Larsen, *Quicksand & Passing*; Sherwood Anderson, *Dark Laughter*; Jean Toomer, *Cane*; Carl van Vechten, *Nigger Heaven*; Claude McKay, *Home to Harlem*; Anna Julia Cooper, *A Voice from the South*. Course requirements: Three five-page essays, in-class writing, 20-minute group presentation

AFST 40205. Labor Movements in Twentieth-Century U.S.

(3-0-3)

This course explores American workers' collective efforts in their search for economic security, political power, and social and cultural autonomy from the 1890s to the near present. For the most part, this course will focus on the unions and related organizations forged by workers throughout the past century—from major umbrella groups like the American Federation of Labor, the Industrial Workers of the World, and the Congress of Industrial Organizations, to important sectoral actors like the Brotherhood of Sleeping Car Porters, the United Automobile Workers, the American Federation of Teachers, and the United Farm Workers. The central questions of the course will be when, where, and why have U.S. workers organized collectively in the 20th century—and how successful have they been? What has been the response of employers, the government, and the public-at-large to these collective efforts of workers, and how and why have those responses changed over time? What has been the relationship between organized labor and racial and gender discrimination, as well as the causes of racial and gender

equality? And how have Americans generally, and workers in particular, understood the labor movement in relation to capitalism, freedom, and democracy? Students will be expected to write several short papers, engage in regular classroom discussion, and screen several films outside of class.

AFST 40275. Gandhi's India

(3-0-3)

The dominant figure in India's nationalist movement for nearly thirty years, M. K. "Mahatma" Gandhi has also been the twentieth century's most famous pacifist, and a figure of inspiration for peace and civil rights movements throughout the world. This course offers an examination of Gandhi and the nature of his unconventional and often controversial politics. It charts Gandhi's career against the background of events in London, South Africa, and India; and examines the evolution and practical application of his ideas and techniques of non-violent resistance, and his attitudes toward the economy, society and state. Gandhi's influence on Indian politics and society is critically assessed and his reputation as the "apostle of non-violent revolution" examined in the light of developments since his death in 1948. Some of the questions that will be discussed are: How far did the distinctive character of Gandhian politics derive from his absolute commitment to India's nationalist struggle? Was his success due to the force and originality of his political ideas and his advocacy of nonviolent action? Can his achievements be explained by political willness and pragmatism, or by willingness to embark on new experiments with the truth? Though helpful, a prior knowledge of Indian history is not required for this course.

AFST 40301. Race Relations in the U.S.

(3-0-3)

This course focuses on race and ethnic relations in the United States. The course will begin by discussing basic concepts, issues, and theories of race and ethnic relations and stratification. We will then examine the extent of race and ethnic inequality in the United States, with some attention toward similarities and differences in the experiences of race and ethnic groups. We will discuss contemporary racial tensions in the United States and their expressions in racial attitudes, beliefs, and behaviors. Finally, the course will address remedies for race and ethnic inequality. The course requires a demanding reading load and intensive student participation in class discussions of the readings.

AFST 40348. Approaches to Black Theology

(3-0-3)

This is an introductory course to theology from African American perspective. The course will not only open students to Roman Catholic (intellectual) theological traditions but also to the diversity of approaches in theology within which black theology is located. The dialectical engagement of black theology, the methodological and interpretative shifts that account for its emergence and ongoing development, are rooted in black history and tradition (African and African American). The course has an added pastoral dimension—the preparation for and enhancement of ministry in the Roman Catholic Church to peoples of African descent.

AFST 40351. Christianity in Africa

(3-0-3) Kollman

Soon nearly half the world's Christians will be Africans. This course will explore the history of Christianity in Africa beginning with the early church, but with heightened attention to the more recent growth of Christianity on the continent. We will also participate in a conference held in September here at Notre Dame titled "A Call to Solidarity with Africa," organized to respond to the U.S. Catholic Bishops' letter of the same title. Particular topics to be addressed in the class include the dynamics of missionary activity before, during, and after the colonial period; the rise of African independent churches; the interaction between Christianity and Islam in the past and present; and contemporary issues surrounding Christianity and the African nation-state. We will also investigate theological questions surrounding the relationship between Christianity and culture. In addition to a final exam, students will write three five-page papers.

AFST 40375. Missionary Encounters

(3-0-3)

This course will study the missionary activity of the church. After a brief look at mission and evangelization in the New Testament and the early church, we will then explore several important moments of missionary contact in the Americas, Africa, and Asia in the modern (post-Columbian) period. The course will conclude with a look at contemporary missionary practice and theory.

AFST 40575. Fictions of the South Atlantic

(3-0-3)

Taught in English, this seminar offers a comparative study of 19th-, 20th-, and 21st-century fiction writing in the Lusophone South Atlantic, particularly exploring the historical connections and the cultural links between Brazil and Angola. Topics for discussion include the slave trade, colonialism, luso-tropicalism, race relations, religion, diaspora, postcolonial identities, and the charged notion of Lusophone black cultures. Readings in Brazilian and Angolan fiction, as well as in historical and anthropological writing. Among the authors to be considered are, on the Brazilian side, Machado de Assis, Lima Barreto, Jorge Amado, and Antônio Olinto, and, on the Angolan side, Luandino Vieira, Pepetela, José Eduardo Agualusa, and Ondjaki.

AFST 40576. Brazilian Film and Popular Music

(3-0-3)

This course provides insights into 20th- and 21st-century Brazilian history, culture, and politics through film, photography, literature, and popular music. Topics discussed include Samba, Bossa Nova, Tropicalia, and the reception of Cinema Novo and of the new Brazilian Cinema. Special attention will be paid to Tropicalia (a movement with key manifestations in the visual arts, cinema, popular music, and literature) and the circumstances surrounding its creation, including the repressive military regime that governed Brazil from 1964 to 1985. This course satisfies the fine arts requirement and is cross-listed in FTT. Offered in English.

AFST 40601. Introduction to American Politics

(3-0-3)

This course surveys the basic institutions and practices of American politics. It examines the institutional and constitutional framework of American politics and identifies the key ideas needed to understand the subject and develop a basis for evaluating American politics today.

AFST 40700. Anthropology of Poverty

(3-0-3) Oka

What is poverty? What does it mean to be poor, destitute and powerless? Does poverty in the developed world refer to the same conditions and factors that determine poverty in developing and undeveloped countries? What does genteel poverty mean? Does the ability to possess material goods and to consume indicate lack of poverty? What is the cycle of poverty? Can one break out of it? This course will address these and other questions on poverty through anthropological analysis. The course is divided into two parts: a) poverty in the pre-industrial era, and b) poverty in contemporary societies. Topics covered in Part A include the beginnings of poverty and social inequality in the earliest complex urban societies of the Middle East, Africa and South Asia, urbanism, production, distribution and poverty in various time periods including classical Greece and Rome, the Middle Ages and the Early Modern Era, and slavery, colonialism and poverty. Part B will address issues such as the relationship between industrialism, colonialism and poverty in the 19th and 20th centuries, instituted poverty in post-colonial and post-industrial societies, and global manifestations of poverty in the 21st century. The course materials include readings from anthropology (archaeology, cultural anthropology, and biological anthropology), history, economics, theology, political science, as well as documentaries and films.

AFST 40701. Multiculturalism

(3-0-3)

The course explores the economic, state, and national conditions of multiculturalism as a social relation and semiotic form. Seminal questions include the issues of difference deployed in debates over multiculturalism and anthropology's location in them as a study of human diversity.

AFST 40702. Race, Ethnicity, and Power

(3-0-3)

Presents a review and discussion of social scientific research concerning the nature of race and ethnicity and their expression as social and cultural forces in the organization of multiethnic societies. The focus is multidisciplinary.

AFST 40705. Men, Women and Work

(3-0-3)

Why do Walmart's current advertising campaigns idealize the stay-at-home mom? Conversely, why does Congress require that mothers on welfare be sent out to work? This course will introduce students to a broad view of American social history that foregrounds the gendered aspects of work and asks students to examine the meaning of work in American history from the colonial period to the 21st century. This broad historical perspective is especially crucial to the examination of the construction of current beliefs about work in the United States since changing gender ideologies dictated the work experiences of large race- and class-defined segments of the population. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies, including their work activities within the household. Male work practices will be similarly illuminated through a gender studies approach. Hence, an overarching purpose of the course will be to explore the fluidity and instability of those conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to white versus non-white, free versus enslaved, and public versus domestic activities.

AFST 40710. African American Resistance

(3-0-3) Pierce

Through a close examination of 12 historical events, we will study African-American resistance in the United States from the 17th century through the 20th century. We will employ a case-study method and seek to categorize and characterize the wide variety of African-American resistance. Our study will include the politics of confrontation and civil disobedience, polarization of arts, transformation of race relations, the tragedies and triumphs of Reconstruction, interracial violence, black political and institutional responses to racism and violence, the Harlem Renaissance, jazz, blues, and the civil rights and black Power movements. Students will be confronted with conflicting bodies of evidence and challenged to analyze these issues and arrive at conclusions. Music and film will supplement classroom discussions.

AFST 40776. Caribbean Migrations: An Interdisciplinary Excursion

(3-0-3)

What is the meaning of identity in a transnational space straddling the United States and the Caribbean? Migration, settlement and return are central to the historical experiences and the literary and aesthetic expressions of Caribbean societies. This course combines literary and anthropological perspectives to the study of novels and historical and anthropological texts in which themes of migration, immigration and transnationalism play central roles.

AFST 40778. Society and Culture through Films

(3-0-3)

This course will deal with a variety of social issues as they are perceived, conceptualized, represented, and understood by the movies. The focus of this course will not be on the cinema history, cinema structure, or movie-making processes, but on how important human problems such as cultural diversity, race relations, the crafting of national identity and national heroes, urban life, class conflict, family

structure, war, and some ideological values such as success, love happiness, fairness, misfortune, destiny, honesty, faith, and the like are depicted and treated by the movies.

AFST 43201. Harlem Renaissance: History and Culture

(3-0-3)

This course focuses on the broad questions that have emerged as a part of the contemporary study of the Harlem Renaissance. How did the phenomenal array of black cultural production from literature to music emerge within this section of New York City? To what degree did the Great Migration, religion, and politics influence this creativity? And how do we understand the impact of the Renaissance on African-American culture outside of New York? Discussion begins with the many works written directly about Harlem in the 1920s as well as those materials on broader African-American life that emerged from Harlem in the 1930s and early '40s. Further, while exploring the question of black Harlem and its cultural vitality, we will also deal with the interplay of white and black American artists within the New York setting. Readings include many of the traditional writers from James Weldon Johnson to Claude McKay to Zora Neale Hurston, in addition to later writers who made Harlem their focus, such as James Baldwin. To best understand the context of these works, we will discuss histories of African Americans in Harlem and New York City, as well as theoretical work on the making of black cultural expression within urban life.

AFST 43644. Black Politics in Multiracial America

(2.5-0-3)

This course undertakes a broad examination of black politics in multiracial America. Racial issues have provoked crises in American politics; changes in racial status have prompted American political institutions to operate in distinctive ways. The course examines the interface of black politics with and within the American political system. How successful have blacks been as they attempted to penetrate the electoral system in the post civil rights era. What conflicts and controversies have arisen as African Americans have sought to integrate the American system of power. Now that the laws have been changed to permit limited integration, should African Americans integrate politically, that is should they attempt to "deracialize" their political appeals and strategy, with an effort to crossover politically; are some approaches such as those of President Barack Obama "not black enough?" What internal political challenges do African Americans face; some such as the increasing importance of class and socioeconomic factors, as well as gender and sexuality may reshape the definition of the black community. Finally how stable will the past patterns and political organizations and institutions of African American politics be, as America and American politics becomes increasingly multiracial.

AFST 43701. Psychology of Race

(3-0-3)

The purpose of this course is to examine the psychological aspects of racial and ethnic identity development in the United States. This course will look at the general ideas of identity development from a psychological basis as well as the personal identities of American groups. The main course objectives are: to increase students' cultural awareness of their own and others' racial and ethnic identities; to develop relevant knowledge of about identity constructs in understanding different populations; and to develop critical thinking skills in studying and evaluating research on the role of racial and ethnic identity development in psychological processes and human behavior.

AFST 43704. Ethnicity in America

(3-0-3)

A study of the dynamic process of formation and development of the society of the United States and its cultural, religious, and racial pluralism; a review of the history and theory of interethnic relations, and their manifestation in the basic institutions of family, education, religion, economics, and government.

AFST 43751. International Migration and Human Rights

(3-0-3) Bustamante

This course is an extension from the mini-course to a full term, with a wider coverage of international migration experiences in the world with an emphasis on

human rights. It starts with a historical approach to various immigration waves to the United States, from the years of the Industrial Revolution to the present. It focuses on the current debate on the impact of the undocumented immigration from Mexico and Central America, with a discussion of the gap between public perceptions and research findings. Differences between Mexico and the United States' migration policies, and its social and economic implications, are discussed. The recent developments within the context of the United Nations' Commission of Human Rights on the relationship between migration and human rights are also covered.

AFST 45100. Internship

(3-0-3)

A capstone of the AFST major is the 6-credit senior project, which may be either a senior internship or senior thesis. Either option provides seniors with an opportunity to reflect upon the larger implications of their course work and, should they desire, to incorporate a service-learning component. A written proposal describing the intended internship must be submitted to the AFST chair for formal approval. If accepted, the student will be assigned a supervisor/advisor and required to write a 30-40 page project summation. The final version of the senior project is due at the end of the term. An oral presentation on the senior project must also be made to the director and advisory committee during the week of final examinations in order to complete degree requirements. Minors may undertake a 3-credit internship with the permission of the chair.

AFST 46100. Directed Readings

(3-0-3)

This is a specialized opportunity for a student to design a readings course with a professor on a specific topic of academic interest. A research paper is required at the end of the semester. The professor directing the readings will establish lectures and other meeting arrangements.

AFST 48100. Thesis

(3-0-3)

A capstone of the AFST major is the 6-credit senior project, which may be either a senior internship or senior thesis. Either option provides seniors with an opportunity to reflect upon the larger implications of their course work and, should they desire, to incorporate a service-learning component. A written proposal describing the intended thesis must be submitted to the AFST chair for formal approval. If accepted, the student will be assigned a supervisor/advisor and required to write a 30- to 40-page paper for the senior thesis. The final version of the senior project is due at the end of the term. An oral presentation on the senior project must also be made to the director and advisory committee during the week of final examinations in order to complete degree requirements. Minors may undertake a 3-credit internship with the permission of the chair.

Arts and Letters Nondepartmental

AL 20101. Maximizing Language Acquisition Abroad

(1-0-1) Askildson

This course is intended for recipients of the Center for the Study of Languages and Cultures' Summer Language Abroad Grant. It will introduce students to a variety of second language acquisition strategies that will help them prepare for their language immersion programs as well as maximize their language acquisition during study abroad. The course will incorporate a variety of readings, activities and exercises alongside formal pre-program language proficiency testing and a reflective journaling component to be carried out during the immersion period. This course meets only during the final four weeks of the spring semester. Spring 2010 dates: 4/1, 4/8, 4/15, and 4/22.

AL 23001. Professional Development Seminar

(1-0-1)

Career development is a lifelong process involving self-assessment, exploration, and career management techniques. Designed for seniors, the seminar allows students to explore self and develop skills they will use as they transition from the undergraduate experience. Topics include assessing your preferences, values, and skills; career exploration; the art of being new; managing expectations in the workplace; managing ambiguity; ethics in the workplace; professional etiquette; business communication.

AL 23002. Career Development Seminar

(1-0-1) Ferguson

This introductory and experiential seminar is designed to meet the career development needs of first-year, sophomore, and junior students interested in self-assessment, career exploration, career decision-making, and conducting an effective internship search. Topics include self-assessment inventories, internships search, résumé and cover letter writing, career trends, alumni networking, informational interviewing, developing an action plan, interviewing skills, career research.

AL 23050. American Cultural Patterns

(1-0-1) Penagos

This course will examine trends in American culture from the perspective of international students and with a specific emphasis on language use. Students will analyze cultural manifestations of linguistic register, rhetorical genre and conceptual metaphor and relate these patterns to expectations for both oral and written communication within an American cultural context. This course is intended for first-time undergraduate international transfer students and incoming undergraduate international exchange students in the College of Arts and Letters.

AL 23101. Philosophy/Literature Colloquium

(1-0-1)

Corequisite: PHIL 43313

A colloquium devoted to the critical reading of one or two major works, which builds on the esprit de corps and intellectual common ground established in the "Studies in Literature and Philosophy" core course for the minor.

AL 23200. Research Strategies for the Information Age

(1-0-1) Smith

This one credit course offers an introduction to developing skills for the location, critical evaluation, and ethical use of information in all formats and disciplines. Development of research topics and strategies for finding relevant information will be discussed and practiced. Other topics include the evolution of information throughout history, developing effective research strategies, evaluating information for quality and relevance, organizing information, and ethical issues surrounding the creation and dissemination of information.

AL 25001. Internship

(0-0-V)

For internships taken during the regular semester. Credit toward graduation for up to two internships is available for Arts and Letters students upon approval by a

dean in the Office for Undergraduate Studies. Students are required to provide a goals and objectives statement and to obtain a letter of offer for the internship in advance of beginning the internship, to keep a daily journal over the course of the internship, to have a letter of evaluation provided upon completion of duties, and to write a reflection paper.

AL 25002. Internship: Reflection

(0-0-V)

For internships taken prior to the semester of registration for the internship. Credit toward graduation for up to two internships is available for arts and letters students upon approval by a dean in the Office for Undergraduate Studies. Students are required to provide a goals and objectives statement and to obtain a letter of offer for the internship in advance of beginning the internship, to keep a daily journal over the course of the internship, to have a letter of evaluation provided upon completion of duties, and to write a reflection paper.

AL 25004. Internship Business Practices

(V-0-V)

The purpose of this course is to combine three areas of knowledge and experience, and then present them in an academic format, following a summer internship opportunity. The course is designed for arts and letters students who have secured an internship opportunity that is congruent to their respective majors. Students must meet with the program coordinator before starting the internship. (Up to two three-credit internships apply toward graduation.)

AL 27001. Special Studies

(V-0-V)

This is a zero-credit course for students engaged in independent research or working with a faculty member or a member of the University staff on a special project. Registration requires a brief description of the research or project to be pursued and the permission of the director of the Summer Session.

AL 30001. College of Arts & Letters Business Bootcamp

(1-0-1) Bill

This course is intended for students in the College of Arts & Letters and is an overview for business principles, marketing strategies, and application of case studies.

AL 37001. Special Studies

(V-0-V)

Special Studies offers students the opportunity to pursue an independent reading or research project under the direction of a faculty member. The subject matter must not be duplicated in the regular curriculum.

AL 40700. Phoenix Institute: Heroism Reconsidered

(3-0-3) Evans

This Phoenix Institute course is not intended for Notre Dame students. Starting with the heroic quest paradigm that originated with Gilgamesh and Greek mythology, we will explore the attributes and evolution of heroism from ancient to modern times. Because the warrior-heroes of history have often ignored the common good with disastrous consequences, we will look at the various faces of heroism and ask if mankind would profit by loosening the grip that warrior-heroes have on the human imagination. Collaterally, we will explore what can be appropriated from competing models of the hero for personal strength of character, happiness, and humanity's hopes for peace on earth. Texts for this class will include the following: Homer's *Iliad* (Robert Fagles' translation); Plutarch's *Life of Alexander the Great*; the Bible (Moses, David, Jesus); selections from John Milton's *Paradise Lost*; selections from *Early Christian Fathers*; selections from *The Last Letters of Thomas More*; war poetry of World War I (Wilfred Owen, "On Passing the Menin Gate" and Siegfried Sassoon, "Dulce et Decorum Est"); World War II war letters from Andrew Carroll's *Behind the Lines*; Alexandr Solzhenitsyn's *One Day in the Life of Ivan Denisovich*; Viktor Frankl, *Man's Search for Meaning*; and *Schindler's List* (film).

AL 40701. Phoenix Institute: Democracy, War, and Empire—Thucydides's History of the Peloponnesian War

(3-0-3) Lewis

This Phoenix Institute course is not intended for Notre Dame students. Thucydides's *History of the Peloponnesian War* is one of the greatest historical narratives ever produced, telling the story of the epic struggle between democratic Athens and oligarchic Sparta and their allies that took place between 431 and 404 BC. But it is much more: along the way Thucydides presents deep analyses of the nature of democracy and other political regimes, the moral hazards of empire, justice among nations, and the causes of war. He penetrates to the roots of political life in human nature. His reflections are thus not only of historical interest but take us to matters of permanent relevance in human affairs.

AL 43001. Interviewing Technique Practicum

(3-0-3) Brenner

This course is designed for seniors, acting as peer advisors, to meet with first year students in an attempt to determine how the students are adjusting and progressing. These meetings enable first year students to engage in discussions with reliable and informed upper-class students. The peer advisors try to identify problems, provide information, and exchange knowledge on matters pertaining to academics, study habits, campus life, and dormitory activities while gaining experience with interview skills.

AL 43002. Great Questions and the Liberal Arts

(3-0-3) Profit

This course, designed primarily for graduating seniors, will revisit and expand some of the great questions explored in the College Seminar on "Faith, Doubt, and Reason," and it will encourage broad reflection on the value of a liberal arts education. The course will be student-centered, with considerable focus on discussion. Readings in the humanities will be taken from such works and authors as Plato, Goethe, Hegel, Kafka, and Benedict. Readings from the social sciences will be taken from works by Neil Postman, Christian Smith, and Richard Light. The arts will be included via a campus performance of Marlowe's *Doctor Faustus*; films by Alfred Hitchcock, John Ford, and Woody Allen; and engagement with the works of a contemporary painter, Maria Tomasula. Permission of instructor required.

AL 43101. PPE Colloquium

(1-0-1) Roos

A required colloquium devoted to the critical reading and discussion of one or two major works normally taken in the three semesters following the Justice Seminar.

AL 43102. PPE Colloquium

(1-0-1) Roos

A one credit colloquium required for the PPE minor devoted to the critical reading and discussion of one or two major works, normally taken each semester for three semesters following the Justice Seminar for a total of 3 credits.

AL 43103. Philosophy/Literature Colloquium

(1-0-1) O'Connor

A colloquium devoted to the critical reading of one or two major works, which builds on the *esprit de corps* and intellectual common ground established in the "Studies in Literature and Philosophy" core course for the minor.

AL 48001. Area Studies Essay: Africa

(0-0-3)

A research course for the capstone essay for the minor in African Studies. May not be double-counted for thesis credit in a major.

AL 48002. Area Studies Essay: Asia

(0-0-3)

A research course for the capstone essay for the minor in Asian Studies. May not be double-counted for thesis credit in a major.

AL 48003. Area Studies Essay: Latin America

(0-0-3)

A research course for the capstone essay for the minor in Latin American Studies. May not be double-counted for thesis credit in a major.

AL 48004. Area Studies Essay: Russia and East Europe

(0-0-3)

A research course for the capstone essay for the minor in Russian and East European studies. May not be double-counted for thesis credit in a major.

AL 48005. Area Studies Essay: Mediterranean Middle East

(0-0-3)

A research course for the capstone essay for the minor in Mediterranean/Middle Eastern Studies. May not be double-counted for thesis credit in a major.

AL 48006. Area Studies Essay: Irish

(0-0-3)

A research course for the capstone essay for the minor in Irish Studies. May not be double-counted for thesis credit in a major.

AL 48007. Area Studies Essay: Europe

(0-0-3)

A research course for the capstone essay for the minor in European Studies. May not be double-counted for thesis credit in a major.

AL 48999. Research Experience for Undergraduates

(0-0-0)

This is a zero-credit course for students engaged in independent research for working with a faculty member or a member of the University staff on a special project. Registration requires a brief description of the research or project to be pursued and the permission of the director of the Summer Session. This course is taken as an indication of the student's status on campus and is meant to allow the registered student to use the University facilities as the Summer Session permits. No course work is required.

AL 73001. English for Academic Purposes Fellows— Seminar Program

(0-1-1) Askildson

The EAP Seminar is offered through the Center for the Study of Languages & Cultures (CSLC) and is intended to provide EAP Fellows with foundational knowledge in both second language acquisition theory and English as a Second Language teaching methodology that will assist them in their roles as teachers and tutors in the EAP Program. Following an intensive weekend orientation session, EAP Fellows meet for 90 minutes each week with the CSLC Director during their first semester in order to complete a preparatory seminar program that includes an introduction to English linguistics, principles of second language acquisition and strategies for corrective feedback. EAP Fellows are trained in curriculum and workshop development and provided with an array of references, textbooks and technological aids to support their teaching and tutoring.

ALHN 13901. Modern art history: episodes from the history of modernism and postmodernism

(3-0-3) Speaks

This course will look across the history of 20th century art in order to investigate some of the key movements and criticism of which it is comprised. We will focus on a series of art historical texts chosen to introduce the central theories that characterize modernism and postmodernism in art history. Class participation and discussion will be essential components of the course; discussion will focus on the practice visual analysis and understanding approaches to art history. Both primary texts by artists and critics and secondary sources by art historians will be consulted, and images will be examined regularly in class. Theoretical texts will also be examined in order to familiarize ourselves with various art historical approaches such as formalism, social art history, feminism, theories of the avant-garde, conceptualism, and postmodernism.

ALHN 13950. Honors Seminar

(3-0-3)

This is a yearlong writing intensive humanities seminar involving challenging cross-disciplinary readings running from ancient Greece to yesterday. There is an emphasis on critical thinking and informed constructive discussion.

ALHN 13951. Honors Seminar

(3-0-3)

Prerequisite: ALHN 13950

This is a yearlong writing intensive humanities seminar involving challenging cross-disciplinary readings running from ancient Greece to yesterday. There is an emphasis on critical thinking and informed constructive discussion.

ALHN 33951. Thesis Seminar

(1-0-1) Delaney

Prerequisite: ALHN 13950 or ALHN 13951

This is a one-credit seminar intended to prepare juniors for their senior thesis project by providing methodological guidance for projects in the humanities, social sciences or fine arts.

ALHN 43950. Senior Honor Thesis Colloquium

(1-0-1) Delaney; Hahn

Prerequisite: ALHN 13950

This is a one-credit seminar consisting of presentations of ongoing thesis research as a spur to the successful completion of the senior thesis or research project.

ALHN 43951. Senior Moral Problems Colloquium(1-0-1) Delaney; Hahn *Prerequisite:* ALHN 13950

This is a discussion course on selected reading materials.

ALHN 46980. Directed Reading

(0-0-3)

Directed reading honors program senior thesis.

ALHN 48980. Senior Honors Thesis

(0-0-3)

Prerequisite: ALHN 13950

The capstone requirement for the arts and letters honors students is a substantive two-semester thesis to be completed in April. This project is accorded three credits in the fall for the completion of a rough draft and three credits in the spring for the polished finished project.

College Seminar

CSEM 23101. College Seminar

(3-0-3)

Please note: The “Enhanced Information” tab in the pop-up window of the online Class Search provides more instruction-specific information about the content for this course.

The college seminar is a unique one-semester course experience shared by all sophomores majoring in the College of Arts and Letters. The course offers students an introduction to the diversity and distinctive focus of Arts and Letters at the University of Notre Dame. Specific sections of the College Seminar vary in their topics and texts (i.e., there will not be a shared reading list across sections), but all feature an interdisciplinary approach, commitment to engaging important questions, employment of major works, and emphasis on the development of oral skills. Every College Seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the College: the Arts, Humanities, and Social Sciences. To learn more about the course and to read the specific course descriptions associated with each section, please visit the college seminar website at <http://www.nd.edu/~csem>.

CSEM 23102. College Seminar

American Studies

AMST 13120. American Culture and Community

(3-0-3)

Freshman seminar in American culture and community.

AMST 13184. History University Seminar

(3-0-3) Cummings

An introduction to the seminar method of instruction that explores the major methodologies of the historical discipline, and which accents the organization and expression of arguments suggested by readings in historical topics. The Spring 2010 section will center on Canonization, the process by which the Roman Catholic Church recognizes people who have lived lives of “heroic virtue,” offering a useful interpretive tool for understanding the past. Presently there are eight American Catholics officially recognized as saints, and about twenty others at various points on the road to canonization. Like all saints, they became popular in certain contexts. In this course we will not only explore the saints as historical figures, but also examine who promoted them, when, and why, focusing on what the canonization of each has revealed about the shifting relationship between Catholicism and American culture. We will also consider a number of “unofficial” American saints, people whose causes have not been recognized by Rome but who have nonetheless attracted significant devotees in the United States. Ranging from Kateri Tekakwitha, a 17th-century Mohawk convert, to Father Mychal Judge, a Franciscan firefighter killed at Ground Zero, our cast of characters includes saints and sinners, martyrs and missionaries, patriot priests and unruly women. We will view these American saints through a number of lenses: immigration, race, gender, sexuality, commercialization, and nationalism.

AMST 13186. Literature University Seminar

(3-0-3) Ruiz

This seminar will explore the representations of homelessness in American literature from the 1890s to the 1990s. Although we will initially focus on the urban and rural conditions of extreme poverty and homelessness, our interests will broaden to other conceptions—and realities—of what it means to be homeless (whether the foundation is laid by class, race, or existential and spiritual matters). Throughout, we will pay attention to the interaction between text and context, critically examining the strategies employed by an author to encompass a situation—to size it up, define its larger meaning, juggle with the factors of identity, and convey a particular social attitude that relates the individual and group to the dominant culture.

AMST 20100. Introduction to American Studies

(3-0-3) Doss

Corequisite: AMST 22100

This course introduces the interdisciplinary field of American Studies, emphasizing key texts and methods for critically understanding what “America” means (and to whom), and what it means to be American. How have ideas about race, gender, religion, sexuality, ethnicity, and class shaped the making and meaning of America and Americans? What are the dominant myths and values that Americans seem to share? What is the American Dream? In particular, this class considers the ways in which concepts of America and American are performed: how notions of citizenship and national identity are constructed through particular acts and actions, from reciting the Pledge of Allegiance to watching football, going shopping, marching on Washington, and touring America’s National Parks.

AMST 22100. Introduction to American Studies Discussion

(0-0-0)

Corequisite: AMST 20100

Intro to American Studies discussion section.

AMST 30101. Homefronts During War

(3-0-3)

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities

has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements and antinuclear movements; cold war politics and fears of American communism; and debates over the draft, just-war, racism at home, and U.S. policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

AMST 30102. American Utopias

(3-0-3)

From our colonial roots to the present day, from the Puritans' "City Upon a Hill" to the Branch Davidians and the Waco compound, Americans have been trying to create ideal communities based on their particular version of the truth. In this course, we will survey a wide variety of utopian communities; some based on protection from the world, others based on free love and/or perfection of human relations; some now considered cults, and others mainstream religions. We will examine how they were supposed to work versus how they worked in reality, and the dreams and beliefs upon which they were based. We will explore the ways these experiments in living were created by American culture and have, in turn, transformed it.

AMST 30104. The American Scene

(3-0-3)

"To make so much money that you won't, that you don't mind, don't mind anything—that is absolutely, I think, the main American formula." In 1904, after a nearly thirty-year absence, Henry James returned to America to examine the country of his birth. His tour left him with impression of an entire society "dancing, all consciously, on the thin crust of a volcano," and brought him to the above conclusion about money and the American scene. This course tries to contextualize and understand James's remark by placing it within a broader atmosphere of American culture from the Gilded Age to the current Age of Globalization. We'll look at works of literature and biography, of politics and philosophy, and of theology and economics. Throughout, we will keep circling around and back to James's notion of "the main American formula" and asking not only what he meant, but also how other major thinkers past and present have understood or conceived of an "American formula." The course moves over a vast period of American history from the Gilded Age to the present. Contemporary works will shape discussion about how globalization and phenomena like the credit crisis and global financial collapse offer specific challenges to American identity. Students will write a series of short papers, a longer research paper, make class presentations, and take a final exam.

AMST 30107. World War II America: History and Memory

(3-0-3)

Exploring a wide range of primary and secondary sources from the 1940s and today (e.g., novels, films, ads, posters, poetry, art, museum exhibitions, and memorials), this course will examine the history of America's World War II experience and how this history is remembered and memorialized today. Areas of study will include D-Day and Pearl Harbor, the bombing of Hiroshima and Nagasaki, the Holocaust, the emerging African-American and Mexican-American civil rights movements, the Americanization of European immigrants, Japanese-American internment and redress, and "Rosie the Riveter" and other women's experiences as paid workers.

AMST 30108. American Social Movements

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black civil rights movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values

and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

AMST 30109. News in American Life

(3-0-3) Storin

What difference does journalism make? This lecture course traces the impact of news on public policy since the start of World War II. In addition to that period, this course studies the impact of coverage on the Civil Rights movement of the '50s and '60s, the era of Sen. Joseph McCarthy's crusade against Communism, the war in Vietnam, the investigation of the Watergate scandal and, finally, the impact of media on the local 2006 Congressional election. Taught by the former editor of *The Boston Globe*.

AMST 30110. Confronting Homelessness in American Culture and Society

(3-0-3) Giamo

The course will examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw upon insights from history, literature, documentary film and photography, and the social sciences. We will focus on the degree of permanence and change in our approach to both traditional and modern forms of the social problem.

AMST 30112. Witnessing the Sixties

(3-0-3) Giamo

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the sixties, and to explore the various journalistic and aesthetic representations of events, movements, and transformations. We will focus on the manner in which each writer or artist witnessed the sixties and explore fresh styles of writing and cultural expression, such as the new journalism popularized by Tom Wolfe and the music/lyrics performed by Bob Dylan. Major topics for consideration include the counterculture and the movement—a combination of civil rights and anti-war protest.

AMST 30118. The Craft of Journalism

(3-0-3) Schmuhl

This class will focus on how print and broadcast journalists work—how they think and act as well as the dilemmas they face in delivering news, analysis, and commentary. Several sessions will be devoted to presentations by visiting correspondents, editors, and producers, explaining their approaches to specific stories and circumstances. In addition, students will discuss the issues and questions raised in a few books.

AMST 30119. Perspectives on Nature and Environment in America

(3-0-3)

Throughout American history, those who took a hand to alter nature—or raised one to preserve it—have rarely been concerned exclusively with the continent's ecosystems. Rather, they saw themselves as advancing lofty ideals, such as progress or freedom. After a general introduction to American environmental history, this course examines how nineteenth- and twentieth-century American explorers, activists and writers have understood our alterations to landscape and river, and what the stakes are for modern environmentalists who seek to preserve what wilderness remains.

AMST 30132. Men, Women and Work in American History

(3-0-3)

Why do Walmart's current advertising campaigns idealize the "stay-at-home mom"? Conversely, why does Congress require that mothers on welfare be sent out to work? This course will introduce students to a broad view of American social history that highlights the gendered aspects of work and asks students to examine the meaning of work in American history from the colonial period to the 21st century. This broad historical perspective is especially crucial to the examination of the construction of current beliefs about work in the United States, since changing

gender ideologies dictated the work experiences of large race- and class-defined segments of the population. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies, including their work activities within the household. Male work practices will be similarly illuminated through a gender studies approach. Hence, an overarching purpose of the course will be to explore the fluidity and instability of those conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to white versus non-white, free versus enslaved, and public versus domestic activities.

AMST 30137. Media Criticism

(3-0-3)

This course will explore the work of such seminal American media critics as A.J. Liebling and Walter Lippmann, as well as the plethora of contemporary critics in newspapers, magazines, television, and web publications. It will examine the philosophical principles against which journalism in the American democracy ought to be measured. It also will explore the phenomenon of the ombudsman or reader representative in modern American media, with a particular focus on whether ombudsmen have been able to build or buttress the credibility of news organizations. And it will challenge students to write on a regular basis their own media criticism.

AMST 30138. Advanced Reporting

(3-0-3) Colwell

This is an advanced course in journalistic reporting and writing devoted to learning how to prepare, in a professional manner, in-depth articles on issues and events of community interest for Notre Dame and this area. Emphasis will be on the techniques, ethics, and responsibilities of conducting interviews, and research and crafting pieces for newspapers and other publications.

AMST 30140. Multimedia Journalism

(3-0-3) Schmuhl

The 21st century journalist needs to be comfortable with what is called "writing across the media" and can no longer be selective about which form of communication to build a career around. In many newsrooms, print journalists are now expected to perform on radio or in front of TV cameras, while the bylines of electronic journalists are turning up in newspapers and magazines. Such media "convergence" is already more the norm than the exception. On top of that, the Internet has become a major medium in its own right, encompassing different styles of communication. While the focus of this course will be on writing, it will expose students to a variety of media in an effort to prepare them for the reality of modern communications careers.

AMST 30142. Media Ethics

(3-0-3) Storin

This course will examine the ethical challenges that newsroom managers face as well as the issues that reporters in the field must tackle on a daily basis. Much of the course will deal with case studies of actual ethical dilemmas at major news organizations. Also, students will be asked to seek out and bring to class issues dealing with the full range of media from network news to Internet blogs. The course endeavors to teach both the aspiring professional journalist and the non-professional news consumer how to evaluate what they see and read. Taught by the former editor-in-chief of *The Boston Globe*.

AMST 30143. Fashioning Identities in Colonial America

(3-0-3) White

Did Puritans really only wear black and white, or did they wear fashionable lace, silk ribbons and bright colors? Did early settlers wash their bodies to get clean? What role did fashion play in the making of the American Revolution? And how did slaves and Native Americans adorn their bodies? This course will address such questions by focusing on dress and material culture. We will consider the role of dress in the construction of colonial identities, and examine the ways that bodies operated as sites for negotiating class and ethnic encounters.

AMST 30144. Women and Work in Early America

(3-0-3)

What did shopping, tavern-keeping, and midwifery have in common in early America? They could all be considered legitimate forms of "women's work." This course introduces students to early American social history (from colonial settlement to 1820) by considering the dynamic relationship of women and work. We will consider the ways that girls and women helped make the world of pre-Industrial America through their contributions both inside and outside of the home. The course will consider different forms of labor: skilled and unskilled, free and enslaved, and paid and unpaid. It will also pay special attention to the ways that women of European, African and Indian descent wove their own cultural beliefs and social practices into the broader laboring regimes of early America. Throughout, we will explore the changing meanings of "women's work" and "men's work" and assess how these definitions helped to shape boundaries of race and class. We will cover a range of sites from New England to Charleston, Louisiana to Jamaica, and analyze topics such as the gendering of agricultural work, African women's market activities in the New World, women and politics in Washington, and shopping as skilled work.

AMST 30145. Writing for Publication

(3-0-3)

This course is designed to improve and extend student skills in writing non-fiction articles, with emphasis on writing for magazines. It will touch on freelancing, researching markets, understanding audience, finding salable topics, writing query letters, and working with editors. But the major emphasis of the course will be on writing students will be expected to write several short articles and one major one, and they will be responsible for developing a marketing plan for the long article. The instructor of this course is the editor emeritus of *Notre Dame Magazine*. Open to American Studies majors and Journalism, Ethics, and Democracy minors by permission. Other applicants must submit writing samples for review.

AMST 30146. Persuasion, Commentary and Criticism

(3-0-3) Colwell

This course will consider the roles of persuasion, commentary, and criticism in contemporary American culture and will explore the techniques of these forms of expression. Students will prepare and discuss their own writing assignments, including opinion columns, editorials, and critical reviews of performances or books. Ethics and responsibilities in contemporary American journalism in expression of opinions also will be explored. Assignments will serve as the examinations in this course, which is taught by a political columnist for the *South Bend Tribune* who also serves as host of public affairs programs on WNIT-TV, Public Broadcasting. Open to American Studies majors and Journalism, Ethics, and Democracy minors by permission. Other applicants must submit writing samples for review.

AMST 30147. American Art and Culture 1945–1970

(3-0-3)

This course covers art and culture in the United States of America from pre-World War II through the early 1970s, focusing on art styles and movements ranging from Regionalism and Abstract Expressionism to Earthworks and early Feminist art. The "triumph of American painting" in the post-World War II era, links between art and politics, development of American art theory, intersections between the avant-garde, popular culture, consumer culture, and institutionalization of art museums and markets will be analyzed in detail.

AMST 30148. Culture and Society in the Great Depression

(3-0-3) Giamo

This course explores the culture and society of one of the most turbulent periods in American history. The economic collapse and ensuing national crisis altered the political, social, and symbolic landscape of the country. We will examine the historical context and social activism of this period (1929–1941), including the conditions and responses of those affected by various hardships. Also, we will be concerned with the cultural expression and representation of Depression America. How was the crisis confronted? What ways of seeing and understanding the events,

and the people who lived through them, provided value, merit, and worth? In what ways did social positions and cultural values clash? In order to answer these and related questions we will study the role and importance of documentary expression (letters, photographs, reportage), the art of urban social realism, literature, and film.

AMST 30151. We the People

(3-0-3)

The United States Constitution was created to provide governmental stability and to define individual liberties. In this course we will study the original intent of its words and the ways in which its applications and additions have been defining moments in American culture.

AMST 30152. Visualizing America: Survey of American Art and Culture

(3-0-3)

This course examines American visual and material cultures from the pre-colonial era to the present day. Providing a broad, historical account and considering a variety of media from paintings and sculptures to quilts, photographs, world's fairs, and fashion styles, this survey explores American art within the context of cultural, social, economic, political, and philosophical developments. In particular, it considers the role that American art has played in the formation of national identity and understandings of class, race, gender, and ethnicity.

AMST 30153. "Mixed Race America"

(3-0-3)

Despite popular images of American as a "melting" both of races and ethnicities, our institutions, values, and practices have often tried to create or maintain spatial and social distance between groups defined as racially different. This course will explore the ways in which Americans have transgressed those boundaries or found other ways of interacting across cultural lines, primarily in the 19th and 20th centuries. We will examine popular cultural perceptions of people of mixed ancestry, their social experiences, the development of various mixed-ancestry communities, and historical attempts to limit interracial socializing, relationships, and marriage. These issues were and are deeply imbedded in debates over the meaning of race, gender expectations and ideas about sex and sexuality. We will also pay close attention to how minority communities have understood people of mixed ancestry in the United States, and how mixed-race identities intersect with African American, Native American, Asian, White, and Latino identities.

AMST 30154. The Craft of Journalism

(3-0-3) Schmuhl

This class will focus on how print and broadcast journalists work—how they think and act as well as the dilemmas they face in delivering news, analysis, and commentary. Several sessions will be devoted to presentations by visiting correspondents, editors, and producers, explaining their approaches to specific stories and circumstances. In addition, students will discuss the issues and questions raised in a few books.

AMST 30155. American Men, American Women

(3-0-3)

What does it mean to be male or female in America? Where did our ideas about gender come from and how do they influence our lives, institutions, values, and cultures? In this course we will begin by reviewing colonial and Victorian gender systems in the U.S. Our focus, however, is the twentieth century, and the development of modern (early 20th century) and contemporary (post 1970s) gender roles and ideas. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on sex and gender. We will also pay close attention to the roles that race, class, culture, sexuality, marital status and other key factors play in determining male and female roles, and influencing images of femininity and masculinity.

AMST 30156. The City in American Culture

(3-0-3) Meissner

Jane Jacobs wrote in *The Death and Life of Great American Cities* that all cities are governed by a marvelous and complex order. This order, she said, is composed of movement and change; and though it is life, not art, we may call it the form of the city, and liken it to the dance. "The City in American Culture" looks closely at the origins and continuation of that dance as it analyzes some of the forces that have shaped and continue to shape America's cities and their surrounding metropolitan areas. The course will center on a number of literary and nonliterary texts and be guided by a series of questions such as: Does urbanization thrive on a culture of poverty? Are twentieth-century gated communities a continuation of the brownstone mansion? Does the American Dream require vivid urban poverty? Is there such a thing as enough? Who lives in cities today? How are societal changes and the goals of urban development rewriting the role of cities? How has gentrification and evolving patterns of metropolitanism/cosmopolitanism effected the modern city and its composite neighborhoods. Why and how do cities compete for target communities such as arts, gay/lesbian, minority, young, urban, and professional? The course will have a written, research, and a practical/experiential component.

AMST 30157. Popular Culture and the U.S.-Mexico Border

(3-0-3)

Drawing upon critical work in history, cultural studies, and American studies, this course will explore the history and meanings of the U.S.-Mexican border since 1848. We will pay special attention to American popular culture (located in film, literature, art, music, and even dime novels) to understand the myriad, often contradictory, roles that the border has played in the popular imagination of the United States.

AMST 30158. Gender and American Catholicism

(3-0-3)

This course surveys gender and American Catholicism, focusing on the following themes: the role of religious belief and practice in shaping Catholics' understanding of gender differences; gender in the context of family and religious life; masculinity, sport, and American culture; embodiment; gender, education, and work; gender and sainthood; and Catholicism and feminism. The class format will involve discussion of assigned primary and secondary sources, supplemented by occasional background lectures. We will take several field trips, including a visit to the Notre Dame Archives for a presentation on Catholic material culture, a tour of the Basilica of the Sacred Heart to enhance our understanding of church architecture and devotional life before the Second Vatican Council, an evening at South Bend's Catholic Worker House, and a visit to Catholic Chicago, an interactive exhibit at the Chicago History Museum.

AMST 30160. Intro to Oral History

(3-0-3)

This is the first of a two-semester senior seminar in oral history theory and methods. By surveying the current field, students will learn how oral history is uniquely suited to both contribute to historical knowledge and challenge dominant narratives. The final project will prepare students to engage in collecting oral histories during the spring semester if they register in Oral History 2: Practicum.

AMST 30161. The Millionaire in American Literature and Culture

(3-0-3)

Few figures in American history have so defined the nation as the millionaire. For good or bad, the millionaire has been an object of equally intense scrutiny and fascination. This course will examine the role of the millionaire from several disciplinary perspectives. In the fiction of writers such as Wharton, Fitzgerald, Steinbeck, and DeLillo the millionaire is an object of envy, intrigue, fear, and even contempt. In looking at the millionaire historically, we will devote special attention to the Gilded Age with its "robber barons" such as Andrew Carnegie, Cornelius Vanderbilt, Jay Gould, and John D. Rockefeller; figures whose industry, dedication to the making of money, and greed also fueled the establishment of vast charitable enterprises that helped define American culture. With A.G. Gaston's

biography, *Black Titan*, we will look at the complex and historically unequal relationship between race and wealth attainment in American culture. In politics, we will pay special attention to Theodore Roosevelt who harbored a deep suspicion of inherited wealth and questioned whether or not the “virtuous republic” could sustain the presence and efforts of so many men of “inherited wealth.” In contemporary society, we will try to understand how the celebrity millionaire—i.e., Donald Trump, Paris Hilton, Ivan Boesky, Martha Stewart, and the Wall Street/Hedge Fund Manager millionaire—has become a celebrated (and now vilified) cultural icon. And finally, we’ll examine the current credit crisis in the context of America’s love of money, conspicuous consumption, and belief that anyone can become a millionaire. Students will write a series of short papers, a longer research paper, make class presentations, and take a final exam.

AMST 30162. Latinos in American Film

(3-0-3) Ruiz

This course will survey the history of representations of Latinos in American cinema from the silent era to the present. We will examine how stereotypes associated with Latinos have been produced, reinforced, and challenged in American films—from greasers and Latin lovers to gangsters, kingpins, and border crossers. We will explore the fascinating contradiction that, despite a long history of misrepresentation and under representation, Latinos have made significant contributions to Hollywood and independent cinema. We will also examine the rise of Latino directors in recent years and their drive to reframe the Latino image for American audiences. Screenings will range from the silent epic *Martyrs of the Alamo* (1915) to more recent films such as *Maria Full of Grace* (2004). Our interdisciplinary approach to the subject will draw upon readings from history, film theory and criticism, and ethnic/American studies. Students will take a midterm exam and make class presentations.

AMST 30163. Jack Kerouac, the Beats, and Dylan

(3-0-3)

This seminar will re-examine Kerouac and his prose in relation to Beat subculture and the larger context of post-World War II American society. Although the work of other Beat writers such as Allen Ginsberg, Joyce Johnson, and Gary Snyder will be considered, the primary focus will be on Kerouac. Moreover, the seminar will question the cultural codification of Kerouac as “King of the Beats” and advance the notion that he was a prose artist on a spiritual quest. Or, as Ginsberg aptly put it, an “American lonely Prose Trumpeter of drunken Buddha Sacred Heart.” Finally, in order to trace the development of the Beat influence, we’ll examine Bob Dylan and his songs as the representation of sixties’ social consciousness and expressive individualism.

AMST 30164. Catholics in America

(3-0-3)

Since 1850 Roman Catholics have constituted the single largest religious denomination in the United States. This course explores what the presence of Catholics has meant for the American experience, focusing on themes of church/state separation, religion and politics, education, and social reform. We will also examine how the American context has transformed the practice of Catholicism, with attention to ethnicity, gender, region, race and class as variables that have shaped the American Catholic experience. Assigned readings range from excerpts of anti-Catholic publications to first-hand accounts written by American Catholics from the colonial period to the present. In addition we will study the representation of Catholics in American film, themes of Catholic fiction, material culture relating to Catholic devotional life and the sacraments, and the shifting position of American Catholics in the universal Roman Catholic Church.

AMST 30165. Fashioning American Identities

(3-0-3)

This course will focus on dress and material culture in Colonial North America. It will provide an introduction to methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies. In our focus on the colonial period (especially the 18th century), we will analyze the economics of dress (the production, marketing and acquisition of cloth and

clothing) and will assess the importance of fashion to commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class and ethnic encounters.

AMST 30166. Magazine Writing

(3-0-3) Temple

This course will examine various forms of magazine journalism, from the direct presentation of information to narrative journalism to the art of the first-person essay. The class, requiring students to complete a variety of written assignments while performing in a workshop setting, will emphasize those storytelling techniques essential to writing for publication.

AMST 30167. The Literature of Fact

(3-0-3)

Non-fiction writers are “artists under oath,” according to the luminous definition coined by Desmond McCarthy, British critic and essayist who was a member of the Bloomsbury group of writers and painters in the early twentieth century. The phrase is apt because it captures the dual challenge of non-fiction writing that aspires to rise above mere workaday journalism: It must be absolutely truthful and utterly fact-based, but it also should display a literary quality that puts it in the front rank of the very best imaginative works. We will be reading and analyzing books and articles that achieve this rare blend of fact and artistry, from the controversial true-crime chronicle *In Cold Blood* to a book such as *The Devil’s Highway*, that helps personalize the debate over immigration policy, to a book such as *Sons of Mississippi*, that traces the complicated question of race as it moves through recent American history. Along with reading and discussing these works and others, we will be attempting our own non-fiction narratives, developing strategies to help turn the reporting of information into works that transcend the limits of daily journalism.

AMST 30169. Race and American Popular Culture

(3-0-3)

While race is a notoriously difficult concept to define, it is undoubtedly a powerful force in American life. But how do we know what we know about race? Where do these ideas come from? How will matters of race and representation change in the era of Barack Obama? Focusing on the late nineteenth century to the present, this course explores the ways in which ideas about race are formed, negotiated, and resisted in the arena of American popular culture. From blackface minstrelsy on the vaudeville stage to contemporary comedy, television, and music, this course will ask how popular culture actively shapes—rather than merely reflects—American ideas about race and ethnicity. Rather than emphasizing on a particular racial or ethnic group, we will more broadly examine the politics and practices of representing difference in the United States. By engaging with a diverse set of theoretical, historical, and primary texts, students will learn to approach and analyze popular culture with a critical eye.

AMST 30171. Faith and Feminism in American Culture

(3-0-3)

This course explores the relationship between religious belief and secular feminism in the United States. Though its primary focus is on Christianity, we will briefly consider feminism in other religious traditions. Themes include religious movements and women’s rights; women, work, and vocation; sexuality and the body; and feminist critiques of religion.

AMST 30172. The U.S.-Mexico Border in the American Imagination

(3-0-3)

The U.S.-Mexico border has been a hotly contested social and political space since it took its current shape in the mid-nineteenth century. Today, the border remains the source of contentious debates in the United States—from proposed amnesty for undocumented workers and unprecedented activism for migrants’ rights to those who argue for a 700-mile fence to physically divide the two nations—even as Latinos have become America’s largest minority group. This course will unpack these varied (and often contradictory) meanings of the border, paying particular

attention to the history of representations of Mexico and “Mexicanness” in the United States and their impact upon foreign policy, political organizing, and cultural relations. Our approach will be interdisciplinary, drawing on methods and texts from history, sociology, film studies, critical race theory, cultural studies, and ethnic studies. Together we will read texts as varied as Gloria Anzaldúa’s *Borderlands/La Frontera* and Steven Soderberg’s *Traffic*.

AMST 30173. American Sports, Recreation and Leisure

(3-0-3)

This course will examine sports, recreation, and leisure as forms of American cultural and political expression, identity formation, and as resources for community building through the 19th and 20th centuries. This semester readings and discussion will focus on the theme of **gender**, but race and class will also figure prominently, as will politics, the environment, media, consumption, and spectacle.

AMST 30174. American Wilderness

(3-0-3) Coleman

How is a national park different from a national wilderness area, a city park, the lakes at Notre Dame, or your back yard? Why are some considered wilder than others, and why is wilderness such an attractive idea? Writers, historians, painters, photographers, and politicians have described American landscapes as wild to great effect, in concert with identities of gender, class, race, and nation. This class will explore how the idea of wilderness—and the places associated with that idea—has developed during the 19th and 20th centuries. We will examine how wilderness has supported the growth of a national identity but largely failed to recognize the diversity of the American people. Course themes include: 1) developing the wilderness idea; 2) national parks and the problem of wilderness; 3) wilderness experience and politics; and 4) wilderness narratives. Readings will range from Henry David Thoreau and John Muir to Edward Abbey and Jon Krakauer, and there will be a strong visual culture component. For their final project students will choose a wild place of their own to interpret.

AMST 30177. Civil Rights and Protest Movements

(3-0-3)

This course will look at protest movements for civil rights and other related issues, focusing on the 20th century, especially the second half. One central theme will be the African American civil rights movement of the 1950s and 1960s. How did race, gender, class, religion, and region impact the strategies, goals, and reception of various threads of black struggles for full citizenship? In addition, we will explore previous and later generations of African American activism, as well as other protest movements in the post-WWII period. How did the civil rights movement that emerged in the 1950s draw on early 20th century activism and leadership? What directions did African American protest movements take after the late 1960s? How did other civil rights, racial and ethnic consciousness, and social reform movements in the 1960s, '70s, and '80s develop from their own historical experiences and in relationship to other protest movements?

AMST 30180. Native American Histories and Cultures in the Twentieth Century and Beyond

(3-0-3) Collier

This course will explore Native American literature, history, arts, perspectives, government, and law. However, it is important to remember that there is no singular Native American point of view. Rather, there are diverse perspectives, ideas, thoughts, movements, and priorities among the more than 500 distinct cultural and linguistic groups who are the Indigenous people of the modern United States.

AMST 30181. American Political Life

(3-0-3) Schmuhl

An introductory and interdisciplinary examination of American political culture, particularly contemporary political thought and behavior. Although we will trace the development of our political culture from the nation’s beginning to the present, a principal concern of the class will be the involvement of the mass media in recent political history. In short, we will attempt to come to terms with questions about the role and influence of mass communications in modern politics.

AMST 30182. Capital Crimes: Money, Literature, and American Culture

(3-0-3) Meissner

At a meeting in 2003, R. Allen Stanford, accused multibillion-dollar Ponzi embezzler and president of Stanford International Bank, is said to have taken a “blood-oath” with the chief regulator of his Antiguan bank. When news of this oath broke in the fall of 2009 Stanford joined Bernard Madoff in the league of the most undignified “gentlemen” in American culture. Like Madoff, Stanford had committed a “capital crime” which robbed many and riveted the nation’s attention. Like Stanford and many another “capital” criminals (Al Capone comes to mind), until his arrest Madoff enjoyed the welcome of society’s elite and was generally regarded as a celebrity. “Capital Crimes” is thus about American culture’s love affair with money. The course begins with Mark Twain’s blistering satire *The Gilded Age* and moves through the current economic crises, which some critics like Paul Krugman and Kevin Phillips have referred to as coming at the tail end of America’s second Gilded Age. Twain’s satire was aptly called “A Tale of Today.” In looking over the time between the two Gilded Ages, this course will try to construct a coherent account of the uneasy relationship between the period’s major literary figures and its political and mercantile elite. We’ll see if and how writers and artists who set themselves up as the voices of culture often share much in common with political and business leaders—both a Ponzi scheme and a political campaign are after all “fictions in progress” which require an audience and a fairly complete willing suspension of disbelief. In looking over material drawn from literature, film, television, news media, politics, and academia we’ll try to measure the personal and cultural benefits and consequences associated with American culture’s embrace of money, its hagiographic celebration of the CEO, its adoration of celebrity culture, and its elevation of the market as an idol.

AMST 30183. Slums, Little Brown Houses, and Brownstone Mansions: Representations of Urban Life

(3-0-3) Meissner

This course will begin with a children’s tale from the 1880s, *Five Little Peppers and How They Grew*, and examine how urban life has been depicted in American literature and culture. The course will trace the experiences of Mrs. Pepper and her five children as they move from life in a rural New England clapboard house to an urban Brownstone mansion in New York City, through to Charles Bukowski’s modern San Francisco rooming house madrigals and the down-and-out wanderings of his poet/barfly Henry Chinaski. Along the way we will ask a series of questions such as: Does urbanization thrive on a culture of poverty? Are today’s gated communities a continuation of the brownstone mansion? Why do neighbors gentrify? Does the American Dream require vivid urban poverty? How has the global and American economic collapse, credit crisis, and mortgage meltdown changed our perception of slums, little brown houses, and brownstone mansions. Is there such a thing as “enough”?

AMST 30184. Latinos in Chicagoland and Northern Indiana: A Cultural History

(3-0-3) Ruiz

Latinos have long contributed to the social fabric of the region popularly known as “Chicagoland,” which includes Northwestern and North Central Indiana. From food to sports to politics to the arts, Latinos have shaped and reshaped the local culture and formed vibrant communities. However, Midwestern Latinos have been marginalized by both local/regional approaches to history and by the field of Latino studies, which tends to focus on the east and west coasts and the U.S. Southwest. This interdisciplinary course will explore Latino communities from Chicago to South Bend to better understand how these communities fit into the broader Latino experience but remain uniquely Midwestern. Some of the questions that we will ask include: Why did Latinos settle in Chicagoland and Northern Indiana? Why do new migrants keep coming? How has gentrification affected urban Latino communities? How are individuals and organizations working to improve the lives of migrant workers in rural areas? How do Latinos contribute to the Chicago arts scene? The course will include several site visits

to community organizations and cultural institutions throughout the region and will require students to collect an oral history from a member of one of the communities encountered in class.

AMST 30185. American West

(3-0-3) Coleman

The American West is a region characterized at once by its physical setting, the historical processes that have occurred there, and the set of meanings American culture has ascribed to the region. It is home to a highly diverse set of peoples that have been interacting with one another for centuries. It is described by physical and political boundaries (the Mississippi River, the Pacific Ocean, and borders with Canada and Mexico), economic development (extractive industry, tourism), and by imaginative constructs (the “frontier,” the “Wild West,” and the mythic characters inhabiting such places). This semester we will use a variety of approaches to explore the American West from the mid-19th century through the late 20th century. We will focus on two specific themes: the political, economic, social, and environmental relationships that have shaped the region; and the cultural meanings and mythic representations people have attached to it. The Mythic West, far from separate and distinct, has always been intimately connected to real western people, places, resources, and politics. We will study how the American West and its images have developed together, often in tension with one another, and how they have created the West that we know today.

AMST 30220. Latino Literatures

(3-0-3)

A survey of Latino fiction, poetry, and other literary works.

AMST 30221. Tropical Heat Waves: Contemporary Latino/a and Caribbean Literature

(3-0-3)

A review of selected contemporary Latino/a and Caribbean novels.

AMST 30222. Twentieth-Century American Feminist Fiction

(3-0-3)

In this course we will read a number of works by both women and men that may be described as feminist fiction. In so doing, we will raise issues about the relation of aesthetics to politics, the process of canonization, and aesthetic integrity. Ultimately, we will also be examining the place of women within American culture during the twentieth century—how it has changed and how it has remained the same. At the end of the course, students should feel that they have discovered a new body of exciting literature, as well as new ways of reading some of our best-known literature. Texts: Kate Chopin, *The Awakening*; Edith Wharton, *The Age of Innocence*; Zora Neale Hurston, *Their Eyes Were Watching God*; William Faulkner, *The Sound and the Fury*; F. Scott Fitzgerald, *The Great Gatsby*; Alice Walker, *The Color Purple* and *The Temple of My Familiar*; Toni Morrison, *Sula* and *Song of Solomon*; possibly Elizabeth Dewberry Vaughn, *Many Things Have Happened Since He Died*. Requirements: Two papers, a mid-term, and a final examination (25% each).

AMST 30223. Beats, Rhymes, and Life: An Introduction to Cultural Studies

(3-0-3)

An introduction to cultural studies using a variety of media: literature, film, and music.

AMST 30224. Modernism to Punk

(3-0-3)

In this course we will be focusing on the significance poetic communities have had on poetry in the 20th century. From the Modernists until today, poetic communities have been the primary center of writing, publication, collaboration, and theorizing. We will start from the premise that poets do not work alone, but cultivate a community of poets and artists with whom they write. When we look at poetry through the lens of community rather than through individual poets, we are able to understand the art worlds they inhabited and the ways in which collaboration with painters, filmmakers, and musicians helped to create a poetry that

addressed the needs and ambitions of a particular group. Poetic communities are politically engaged groups that often function as sites of resistance, critique, and exploration. With each poetic community we study—from Modernism, to Black Mountain, to The New York School, to Minimalism, to the Beat Generation, to Punk rock—we will be asking what particular historical circumstances enabled the formation of the community, what challenge does each community address, how does one community’s concerns differ politically or historically from another community, and how do these group affiliations condition their poetry. By focusing on poetry that is created within and between poetic communities we will examine how their writing is able to engage the construction of self and other, how modern poetry challenges artistic and academic institutions, and how modern poetry interacts with various media, such as painting, music, and film.

AMST 30225. Women in the Americas

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, *testimonio*, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

AMST 30226. Latino/a Poetry, Art, and Film

(3-0-3)

The literature of Latina/o immigration and migrancy brings together a range of contemporary concerns, from identity, to the transnational, to definitions of the literary. How does international movement inflect notions of American identity? How do writers create and describe communities in constant movement? These are only two questions that can be posed to the literatures of Latina and Latino transnational and intra-national movement. In this course, we will read a range of recent materials dealing with immigration between Mexico and Latin America and the United States, and with intra-national migrancy. Key texts will include Luis Alberto Urrea’s *The Devil’s Highway*, Julia Alvarez’s *How the Garcia Girls Lost Their Accents*, Cristina Garcia’s *Dreaming in Cuban*, Tomas Rivera’s *and the Earth did not devour him*, and Elva Treviño Hart’s *Barefoot Heart: Stories of a Migrant Child*. In addition, we will draw upon various critical readings focusing on transnationalism, displacement, and new theories about contemporary globalization. Students will write three short essays and a final exam, and will be required to participate actively in class.

AMST 30227. Harlem’s Americas

(3-0-3)

What was the Harlem Renaissance? While traditional notions of this time in literary history have conceived of it as a brief but luminous flowering of the arts in African-American culture, not so much attention has been given to the many different voices that contributed to the movement, and which shaped its representations of race in the early twentieth century. In this course, we will examine the meaning and significance of the Harlem Renaissance as conventionally understood, then move on to an exploration of Harlem’s Americas, or the many cultural locations from which race and racial representation were being considered both inside and outside the movement’s accepted parameters. Thus, rather than studying the Harlem Renaissance solely as an African-American phenomenon, we’ll also explore the interrelationships between a number of its core works, along with several others from the same period not generally studied in this context. In seeking to understand the writing of Harlem’s Americas, we’ll investigate how all of the texts we examine are engaged in a larger dialogue on the meaning of race in the early twentieth century, both in the United States and beyond. In so doing, we’ll try to gain a deeper understanding of the complexity of the Harlem Renaissance, while considering what this may have to tell us about race and racial representation not only in the early twentieth century, but on into the twenty-first. Course texts: Booker T. Washington, *Up From Slavery*; W. E. B. DuBois, *The Souls of Black Folk*; Jessie Fauset, *Plum Bun*; Nella Larsen, *Quicksand & Passing*; Sherwood Anderson, *Dark Laughter*; Jean Toomer, *Cane*; Carl van Vechten, *Nigger Heaven*; Claude McKay, *Home to Harlem*; Anna Julia Cooper, *A Voice from the South*. Course requirements: three five-page essays, in-class writing, 20-minute group presentation.

AMST 30228. Asian American Sexuality

(3-0-3)

This course will introduce students to major works of Asian American literature while exploring issues of sexuality and gender in this body of literature. We will focus on race/ethnicity, authenticity, and representation as contested sites in Asian American literature and how these contested sites produce inter/intracultural tensions about the Asian body as it is viewed from within Asian American literature and from without. Primary texts will include novels, short fiction, poetry, film, drama, the graphic novel and critical essays.

AMST 30229. Hemingway & Walker

(3-0-3)

A comparative study of the fiction of Ernest Hemingway and Alice Walker, with particular emphasis on gender, class, and historical issues explored in each author's works.

AMST 30230. Caribbean Women Writers

(3-0-3)

A sampling of novels written by Caribbean writers, with a particular emphasis on such themes as colonization, madness, childhood, and memory.

AMST 30231. Outcasts and Misfits in American Literature

(3-0-3)

Representations of "black sheep" in selected 20th century American novels.

AMST 30232. Native-American Perspectives in American Literature

(3-0-3)

A survey of Native American perspective in selected works of American literature, written by Caucasians and non-Caucasians, dating from the 17th to the 20th centuries.

AMST 30233. The Stranger in American Literature

(3-0-3)

Fictional representations of "strangers" and "outsiders" in American literature from the 18th to 21st centuries.

AMST 30234. Literatures of Immigration

(3-0-3)

Close reading of recent literature that explores the immigration between Mexico, Latin America, and the United States.

AMST 30235. American Poetry after 1945

(3-0-3)

A survey of American poets and poetry after World War Two

AMST 30237. Literature of the Early Americas

(3-0-3)

Close examination of selected works written by Americans from the 17th century through the Civil War.

AMST 30238. African-American Literature

(3-0-3)

A survey of selected seminal works of African-American Literature.

AMST 30239. Religious Imagination in American Literature

(3-0-3)

A consideration of the forms, ideas, and preoccupations of the religious imagination in literature and of the historical relationships between religious faith and traditions and particular literary works.

AMST 30240. Contemporary American Literature

(3-0-3)

What does it mean to write fiction in the "Naughts" (2000–2010)? In the age of MySpace, RSS feeds, *American Idol*, and YouTube, is the term "fiction" even valid anymore? Or, for that matter, books? In this class, we will read several novels

published since January 2001. In addition to covering the usual topics (plot, character relationships, themes, etc.), we'll also think about what it means to write "fictions"—to write "novels"—in a world, in an America, that is increasingly being parsed into smaller and smaller pieces. A partial list of texts include (subject to change): Mark Danielewski, *Only Revolutions: A Novel*; Jennifer Egan, *Look at Me*; Joshua Ferris, *Then We Came to the End*; Dinaw Menegstu, *The Beautiful Things This Heaven Bears*; and Dana Spiotta, *Eat the Document: A Novel*. We'll also view excerpts of television shows, movies, and other media, as well as attend some campus literary events. Required work: two short essays, midterm, final, occasional quizzes.

AMST 30241. Homeland Security: Surveillance, Terror and Citizenship in America

(3-0-3)

This course explores the relationship between popular myths about the American experience and the actual experience of marginalized subjects in American society. It serves to make concrete a theoretical discussion of citizenship in the context of American Individualism and explores the relationships among social stratification, institutional coercion, and national narratives. As a long view of the last century, Homeland Security considers old forms of terror and surveillance evident in African American literature that anticipates and mimics the fear and anxiety in the nation after September 11. We will consider themes such as space, place, border, home, community, protection, and nationalism. The literature and critical essays under consideration straddle regional, class, gender, and social boundaries to facilitate our understanding of how African Americans within the nation create narratives of cultural fragmentation, exile, and alienation. In the process we will explore the condition of African American migration—like the early-twentieth-century movements to urban centers, and the early-twenty-first century migrations as a result of Katrina—and consider the way mobility may inform new landscapes of hope and displacement. Some of the texts we will read are *Passing*, *The Street*, *Invisible Man*, *I Know Why The Caged Bird Sings*, *The Color Purple*, and *Eva's Man*. These texts may be considered counter-narratives in the way that they stress exploitation, failure, disillusionment, and exile, but they intervene in formative debates about how to define a national identity and, to echo Langston Hughes, they too sing America. Course requirements: one oral presentation (15%); three 2-page response papers (10% each); one paper proposal; one 10–12 page essay (35%); class participation (20%).

AMST 30242. Literature of Sport

(3-0-3)

Sports and athletics have held prominent roles in human societies since the beginnings of civilization. Across centuries, nation states have used athletic competition for a variety of purposes, from paying homage to distant gods to demonstrating superiority over neighboring tribes/cultures. The individuals, the "warriors", who excel on those "fields of battle" are venerated as heroes, champions, "gods." In this course, we'll look at a variety of literature (fiction, nonfiction, poetry, film, broadcasts of athletic events, etc.) related to sports and athletics. From depictions of wrestlers on temple walls in ancient Egypt to Grantland Rice's *New York Herald Tribune* "Four Horsemen" article to podcasts of ESPN's *SportsCenter*, our investigation of the literature of sport will cover a range of topics—race, gender, class, globalization, and the purposes and functions of athletic competition, to name a few—including the rise of the super star athlete as a "god." Required work: quizzes, two essays, midterm, final examination.

AMST 30244. The Real Contemporary Novel: American Fiction 2000–Present

(3-0-3)

Many "Contemporary Fiction" classes conclude with works published around the time that you were born in the mid-to-late 1980s. This course focuses on novels published during the decade in which you are living and examines the interpretive difficulties raised by such works. Without being able to rely on an established history of scholarly criticism or their place among the so-called "great books" of civilization, the reader of contemporary novels must actively consider why these works are worth studying as well as how they function. The major aims of this

course are to introduce you to these exciting novels and to provide you with the critical and interpretive framework for determining what contemporary literature is and why it matters. We will focus on eight novels and novellas examining the intersections between self and society and between literary art and the popular cultures of film, television, hip-hop, rock, and comic books. Readings include novels and novellas by Paul Auster, Don DeLillo, Dave Eggers, Jonathan Safran Foer, Nicole Krauss, Jonathan Lethem, David Markson, and Toni Morrison. The course also includes a screening of the film adaptation of Foer's *Everything is Illuminated*. Because this course is intended for non-majors, each unit will include introductions to the basic tools of literary study including close reading, how to write a literary argument, how to incorporate secondary criticism and theory, and the basic principles of film and television. Course requirements include two 5–7 page papers and one 7–10 page paper.

AMST 30245. Chicago in Words

(3-0-3)

Early twentieth-century Chicago was famous for its railways and stockyards, jazz and gangsters. The city saw the creation of great industrial fortunes and the birth in 1905 of the Industrial Workers of the World. The literature taken up in this class brings the dynamic contradictions of the Chicago experience to life. We will look at work by Jane Addams, Nelson Algren, Sherwood Anderson, Gwendolyn Brooks, John Dos Passos, Carl Sandburg, Upton Sinclair, Theodore Ward, and Richard Wright, covering a range of literary expression from impassioned journalism, to poetry, novels, and drama. We will consider the relation of modernism to realism. We will look at the ways in which Chicago capitalism altered nature, challenged traditional forms of identity, and created new forms of urban community. We will spend a week exploring Chicago's jazz and blues, while we will also look at the 1932 gangster film *Scarface*, screenplay by Chicago journalist and Oscar winner Ben Hecht. Chicago is a city of tremendous vitality and shocking brutality that has reinvented itself time and again, and the writers we will read have taken up this task of urban invention with a shared urgency and a wide range of voices. Course requirements: active class participation, short response papers, creative responses (poems), a class presentation of a scene from *Big White Fog* by Theodore Ward, and an 8–10 page paper.

AMST 30246. American Novel

(3-0-3)

We will read, discuss, and study selected novels of significant importance within the American literary tradition. As we explore these novels within their historical and cultural context, we will consider the various reasons for their place within the canon of American literature. Indeed, we will scrutinize the very nature of this literary canon and self-consciously reflect on the inevitably arbitrary nature of this, or any, reading list. Even so, we will see, I hope, that these authors share deep engagement with ideas and themes common to American literature and do so through their art, in ways that both teach and delight. Required texts: *Moby-Dick*, *The Adventures of Huckleberry Finn*, *The Awakening*, *The Great Gatsby*, *Invisible Man*, *The Old Man and the Sea*, *The Bluest Eye*.

AMST 30248. Twentieth Century American Drama

(3-0-3)

This class is designed to fulfill the University's literature requirement. It will focus on key works of modern and contemporary American drama from three plays by Eugene O'Neill (*Desire Under the Elms*, *The Iceman Cometh*, *Long Day's Journey into Night*) to Nilo Cruz's Pulitzer Prize winning 2003 play *Anna in the Tropics*. In addition to critical readings and selected European plays on reserve, focal playwrights include Edward Albee, Sam Shephard, Paula Vogel, Amiri Baraka, Luis Valdez, David Mamet, August Wilson, Josefina López, Yellow Robe, Anna Devere Smith, Eve Ensler, and Moisés Kaufmann. Requirements will include group-staged scenes, journal entries on selected plays, and three 4-page papers. In addition, students are required to attend one campus play over the course of the semester and write a written critique of the production and performance.

AMST 30249. American Modernisms

(3-0-3)

Discussions of the late nineteenth and early twentieth century literary and cultural movement of Modernism often center on those qualities of the movement described in the work of early Modernist literary critics, such as Harry Levin or Edmund Wilson. Such examinations emphasize the Modern movement's experiments in form, structure, linguistic representation, characterization, etc., while paying much less attention to the role of the Modernist movement in the larger context of a given culture. In this course, we will explore the significance of the Modern movement from the perspective of American culture, as well as the manner and meaning of American literary participation in the movement. To that end, we will consider not only the work of authors generally accepted as Modernists, such as F. Scott Fitzgerald, Ernest Hemingway and Gertrude Stein; we will also consider the role of authors such as Sherwood Anderson and Waldo Frank, of the early Chicago Renaissance (1910–1925), and a number of authors from the Harlem Renaissance. We will examine the work of these authors not only in the context of Modernism, but also as it relates to many issues of the day, including progressivism, primitivism, race and ethnicity, immigration, cosmopolitanism vs. regionalism, and the importance of the vernacular, in addition to the question of "Americanness" and its importance to an understanding of American literature during this time. Considering these different vantage points in American literary Modernism, we will try to imagine the contours of "American Modernisms," and draw some conclusions about their significance within the larger modernist context. In so doing, we'll seek to arrive at a more comprehensive, more nuanced perspective on the meaning of the Modern in American literature and culture. Course texts: Edith Wharton, *Age of Innocence*; Willa Cather, *O Pioneers!*; Sherwood Anderson, *Dark Laughter*; Waldo Frank, *Holiday*; Theodore Dreiser, *Si-*

AMST 30250. The Poetics of Black Popular Cultures

(3-0-3)

This interdisciplinary course focuses on cultural studies as a critique of larger systems of domination, and will introduce you to major voices of African American critical theory. Paul Gilroy suggests that "popular culture always has its base in the experiences, the pleasures, the memories, the traditions of the people." Black cultural studies is interested in the wider sphere of critical practice, national politics and how popular culture can both resist and perpetuate the idea of America. While visual and literary studies have been seen as historically separate disciplines, we will use theories from each to study those forms of self-representation that defy disciplinary boundaries. With an eye on the way black popular culture is mythologized through commodification and rife with contradictions, we will examine the conflicted ways in which racial identities and differences have been constructed throughout American culture. We will consider how new debates about the history of race have changed American literary, historical and cultural studies. We will put theoretical tracks in conversation with literature, music, visual art, the body, film and food, and use these cultural texts as a method of engaging sustained social and political critique.

AMST 30251. Contemporary American Women Poets

(3-0-3)

Although the range and productivity of American women writers over the last two centuries has been enormous, the proliferation of extremely accomplished and important women writers has virtually mushroomed in the last few decades, embracing leading poets such as Elizabeth Bishop and Adrienne Rich, leading novelists such as Alice Walker, Joyce Carol Oates, and Toni Morrison, and altogether new voices such as the Chicana poet Lorna Dee Cervantes, the Asian-American novelist Amy Tan, and the Native-American Susan Power (to name only a few). To narrow the range of this explosive development in American literature, we will primarily focus on the work of women written in this country after WWII, with special interest on the last two decades. In addition to a small sampling of a number of different writers to be found in our class reader, we will ultimately focus on seven writers: Elizabeth Bishop (poetry), Adrienne Rich (poetry and essays), June Jordan (poetry and essays), Amy Tan (fiction), Lorna Dee Cervantes (poetry), Susan Power (fiction), and Sandra Gilbert (poetry and essays).

AMST 30252. From Work to Text: Representing Labor in Twentieth-Century America

(3-0-3)

This course is designed to introduce you to the ways in which American novelists, poets, artists, musicians, and filmmakers have attempted to represent labor and labor issues throughout the twentieth century. In traditional approaches to literary studies, labor is often subsumed within broader discussions of class or literature's general engagement with political or social questions. This course, however, will focus as much as possible on direct representations of actual laboring bodies and the labor movement, and their evolution throughout the twentieth century. Our engagement with these issues will focus specifically on the relationship between labor and American identity and the ways in which representations of labor raise questions about the literary treatment of race and gender throughout the same time period. Although the primary objective of the class will be to get you to bring these issues to bear on literary interpretation, the course will also include a very basic introduction to American labor history. This will include a discussion of recent phenomena, such as the WGA strike, which bring the relationship between labor and culture into sharp relief, as well as the cultural repercussions of labor in its current form under globalization. The texts we will look at will include novels by Upton Sinclair, John Steinbeck, Jack London, and Richard Wright; labor songs by Joe Hill, Woody Guthrie, and Pete Seeger; films such as *Harlan County U.S.A.* and *Modern Times*; and poetry by Langston Hughes and Tillie Olsen.

AMST 30253. Contemporary Women Writers

(3-0-3)

We will read, discuss, and write about a wide range of contemporary writing by women, with a particular concentration on the short story and the writers visiting Notre Dame's Women Writers Festival. Our readings will include realistic fiction as well as innovative and experimental work, including graphic fiction; some of our readings will focus on women's experiences and perspectives, but some will "make the leap" to imagine men's consciousness and reality. We'll also read critical essays and reflections by the writers themselves to situate the work within the history of women writers; we'll be especially interested in the publishing and critical realities facing women writers today. Reading journal, midterm and final, brief presentation, and 8–10 page critical paper.

AMST 30254. American Fiction since 1945

(3-0-3)

Many contemporary writers began long and productive careers during the decades after the Second World War. In this course we will study some of them, using representative texts to try to work out an aesthetic of the time. We will need to look at questions of personal identity as they embrace spiritual, sexual, social, and racial dimensions. And we will also give close attention to the elasticity of the novel form itself. A very tentative reading list: Ralph Ellison, *The Invisible Man*; Richard Brautigan, *Trout Fishing in America*; Kurt Vonnegut, *Slaughterhouse-Five*; Saul Bellow, *Herzog*; John Barth, *Lost in the Funhouse*; John Updike, *Rabbit Run*; Anne Tyler, *Dinner at the Homesick Restaurant*; and Walker Percy, *The Second Coming*. There will be a mid-term and final as well as an independent paper on a novel selected by each student.

AMST 30255. Literatures of the American Hemisphere

(3-0-3)

National borders mark our Americas today, but for the first European explorers the landscapes of their "new world" were uncharted and unbounded. The newly encountered land invited utopian dreams even as it became the arena for genocidal violence. To reconsider these moments of violence and possibility, we will approach early American literature intra-hemispherically, reading not just from the British colonial record, but also Spanish documents in English translation. We will read comparatively in order to ask key questions about American identity both then and now. For example, what do we learn when we juxtapose Cortés' invasion of the Mexican empire to King Philip's war in the New England colonies? To what degree do these legacies of imperialism still shape our modern world? What comparisons arise between the poetry of Anne Bradstreet and Sor Juana Inés de La Cruz; between the captivity adventures of Cabeza de Vaca and Mary Rowlandson?

How might these contact points continue to shape our views of "others"? How have Native Nations across the Americas written or spoken the loss of worlds? The authors and subjects noted above will serve as key markers, but we will also read primary works by William Bradford, Bernal Díaz, John Smith, William Apess, and others as we reconsider the literatures and histories of the Americas in a cross-national paradigm. Students will be expected to write three short papers, take a final exam, and participate actively in class.

AMST 30261. Modern American Poetry

(3-0-3) Goransson

In his masterpiece, *A Season in Hell*, French visionary and boy-genius Arthur Rimbaud proclaimed: "One must be absolutely modern." This remained at the core of the varied, radical artistic explorations that form the category Modern Poetry. In the late 19th century and the first half of the 20th century, to be modern meant to keep up with and try to respond to vertigo-inducing, often brilliant and often shocking changes in technology and politics, including the invention of trains and planes, films and cars, and the horrific violence of two world wars. We will study how the intense and greatly varied impulse of modern poetry took shape in the U.S., from Walt Whitman through Modernism to the upheavals of the 1960s. In the process, we will discuss such still pervasive questions as what is the value of "the new"? Must the new always be shocking? Can art be political? Should it be? We will also problematize our own positions as historians of this movement. What thinkers, writers and administrators have determined our views of these poets? Is poetry still "modern"? What does modern mean today?

AMST 30262. Novels of American Naturalism

(3-0-3) Marshall

In this course we will undertake a comparative survey of twentieth-century American naturalist novels, tracing a trajectory from turn-of-the-century texts by Norris, Chesnut, and Dreiser, to the neo-naturalist fiction of a few decades later that operated alongside developments in modernist literary form (Stein, Wright), and concluding with a look at its postwar resurgence in the novels of authors such as Don DeLillo and Cormac McCarthy. We will also discuss the return to these novels in recent films including *There Will Be Blood* and *No Country for Old Men*. Students will be asked to write one short formal analysis and two mid-length papers, in addition to regular discussion assignments.

AMST 30263. American Short Story

(3-0-3) Krier

A study of literature that takes up the history, urban concerns, and national pretense of what for much of the twentieth century was America's second largest city.

AMST 30264. African American Politics: The End or a New Beginning?

(3-0-3) Pinderhughes

This course explores the core elements associated with black politics in the U.S.: the role of black institutions such as the black church, the importance of the civil rights movement in challenging barriers to black political participation, the mid-20th century legal framework created to open access to the political system, and the development of black political participation in northern cities. Competition for leadership roles and public resources from the increasing numbers of Latinos, Asians and other immigrants will also be addressed. Since the course will be taught in spring 2010 at the beginning of the second year of the Obama administration, we will also have the chance to explore the impact of the first black president on national politics, and to consider the impact of the president and his administration on African American politics itself. The course incorporates political science concepts, but the readings and other materials are accessible to students from a variety of disciplines and levels of knowledge.

AMST 30265. Black Reconstruction

(3-0-3) Ford

If "critique" refers to the analysis of the present towards the transformation of society then this course considers how African American literature has functioned in this creative and critical mode from its inception. Through lecture and class discussion, this course focuses on writings from African American authors

pondering the possibilities and goals of reconstructing their communities and the United States at large. We will cover various periods of literary activity, including antebellum slave narratives, the post-Reconstruction era, the Harlem Renaissance, and the Black Arts movement. We will cover multiple literary genres—including poetry, slave narrative, novel, and the essay, among others—used in the African American literary tradition placed in their historical, cultural, and institutional contexts. By reading the African American literary tradition in these contexts, we will pursue a number of questions regarding issues of political agency, the role of the writer as intellectual, the relationship of literature to the folk, and literature as an avenue of recovering alternative histories. We will read material from Phillis Wheatley, Harriet Jacobs, Charles Chesnut, Zora Neale Hurston, Ann Petry, Amiri Baraka, and others.

AMST 30266. Thinking Through Crisis

(3-0-3) Ford

What does it mean to be in a crisis? We live only a few years after a natural disaster ravaged the southern coast of the United States; after incidents of racial violence and judicial mishaps culminated in national protest. These issues have been swallowed up by our worry over an economic breakdown that has been called a mere downturn by some, a recession by others, and even fewer have called it a depression. But none of these descriptions help us understand what we mean by “crisis” and what potential there is to think and act in such turbulent times. The same sorts of issues troubling our present also troubled Americans living in the Great Depression. African American writers of that period wrote novels, short stories, autobiographies, historiographies, poetry and other literary pieces that were both aesthetically rich and experiments in thinking critically about these issues. This course simply asks: How can Depression-era African American literature help us understand what it means to think during a “crisis,” and see the word as a concept, not just a media buzz word? Readings will include canonical authors like W.E.B. Du Bois, Ida B. Wells, Zora Neale Hurston, Langston Hughes, and Carter G. Woodson, studied alongside artistic and theoretical responses to Hurricane Katrina, Jena 6, and other recent events.

AMST 30267. Writing Harlem

(3-0-3) Johnson-Roullier

A multicultural study of the historical, cultural, and political circumstances behind what has come to be known as the Harlem Renaissance of the 1920s and 1930s. The course will focus on the many different cultural voices that were a part of the movement, and examine their contributions to the cultural meaning of race at this time in literary history.

AMST 30300. Latino/a History

(3-0-3)

This is an interdisciplinary history course examining the Latino experience in the United States after 1848. We will examine the major demographic, social, economic, and political trends of the past 150 years with an eye to understanding Latino/a America. Necessarily a large portion of the subject matter will focus on the history of Mexican-Americans, and Mexican immigrants in the Southwest, and Midwestern United States, but we will also explore the histories of Puerto Ricans, Cubans, and Latin Americans within the larger Latino/a community. Latinos are U.S. citizens, and the course will spend significant time on the status of these groups before the law and their relations with the state, at the federal, local, and community level. To explore these issues within the various Latino communities of the U.S., we will explore the following key topics: historical roots of Latinos/as in the U.S.; the evolution of a Latino/a ethnicity and identity within the U.S.; immigration, transmigration, and the shaping of Latino/a communities; Latino/a labor history; segregation; civil rights; nationalism and transnationalism; the Chicano civil rights movement; Latinos in film; and post-1965 changes in Latino/a life.

AMST 30301. Violence in U.S. History

(3-9-3)

In the late 1960s, black militant H. Rap Brown exclaimed, “Violence is as American as apple pie.” It might be said that the purpose of this entire course will be to evaluate the truth of Brown’s statement. This will be accomplished in two

ways: first, by surveying of some of the major episodes and themes of violence in American history, from its colonial origins through contemporary foreign policy and domestic debates; and second, by assessing the meaning of that violence as it simultaneously reflects and shapes American society, culture, and values. This course will include significant reading and writing components, as well as a group project.

AMST 30302. Era of U.S. Civil War 1846–1877

(3-0-3)

In the mid-19th century, the American political system collapsed. Divergent visions of the American ideal plunged North and South into the bloodiest war in the Republic’s history. This lecture course examines the roots of the nation’s sectional division, the disintegration of mechanisms for political compromise, the structures and policies of the wartime Confederate and Union governments, the strategic conduct of the armed conflict, the societies at war, and the Union’s first hesitant steps toward reconstruction and recovery.

AMST 30303. African-American History I

(3-0-3)

This course is a survey of the history of African Americans, beginning with an examination of their West African origins and ending with the Civil War era. We will discuss the 14th and 15th centuries, West African kingdoms, forms of domestic slavery and West African cultures, the Atlantic slave trade, early slave societies in the Caribbean, slavery in colonial America, the beginnings of African-American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery and resulting sectional disputes, and the significance of “bloody Kansas” and the Civil War.

AMST 30304. U.S. Presidents: FDR to Clinton

(3-0-3)

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

AMST 30305. British-American Intellectual History, 1650–1900

(3-0-3)

A survey of the intellectual history of Britain and English-speaking America from around 1600 to the mid-19th century, including European backgrounds and contexts. Emphasis on writings about religion, government, natural science, education, and human nature.

AMST 30309. United States Labor History

(3-0-3)

This course will examine the history of paid and unpaid labor in the United States from colonial times to the near present. We will seek to understand how working people both shaped—and were shaped by—the American Revolution, the debates over slavery and free labor culminating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the Cold War-era repression of the Left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers created to advance their own interests, namely the labor movement. We will also pay special attention to the complicated yet crucial connections between work and racial and gender identities. Specific topics may include slavery, farm labor, women’s domestic work, trade unions, questions of industrial democracy, the role of radicalism, and the challenges confronting workers in the current era of corporate globalization and anti-sweatshop activism.

AMST 30310. American Peace Movement since World War II

(3-0-3)

This course examines the emergence of the modern American peace movement between the two World Wars and its development in the Nuclear Age since World War II. It examines the shifting patterns of support for the peace movement, the curious ways Americans have searched and worked for peace, and some of the important peace groups and leaders.

AMST 30311. Survey of African-American History II

(3-0-3)

Corequisite: HIST 32800

This course will survey the history of African Americans from 1865 to 1980. Specifically, this course will focus on the problems of Reconstruction in the South after the Civil War, the adjustments and reactions of African Americans to freedom, the economic exploitation of sharecropping, northern black communities at the end of the 19th century, the migration of black Southerners to northern urban areas, black political leadership, the Civil Rights Movement, current examples of institutional racism, and affirmative action in America.

AMST 30312. The United States Since WWII

(3-0-3)

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of Ronald Reagan. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this postwar era, and the presidencies of Jimmy Carter and Ronald Reagan.

AMST 30313. U.S. Gilded Age/Progressive Era

(3-0-3)

Through discussion and lectures, students examine the emergence of a recognizably modern United States. Topics examined will include the emergence of the corporation, progressive reforms, the changing contours of American religion, the character of the New South, the battle for women's suffrage, developments in the arts, and American involvement in the First World War.

AMST 30314. Jacksonian U.S.: Politics/Culture/Society

(3-0-3) Graff

This course examines the myths and realities of media in the American past and present, paying particular attention to the ways in which old media and new have combined to change our lives, and the ways different groups of Americans have used various media to make history.

AMST 30315. We Hold These Truths: Catholics in 20th Century America

(3-0-3) Appleby

As a survey of the Catholic presence in the United States during "the American century," the focus of the class will be on the ways Catholics integrated their national and religious identities. Defining American culture broadly, we will discuss Catholic politicians and laborers, monks and nuns, pacifists and cold warriors. What was the relationship between Catholic spirituality, cultural criticism and social reform? What consequences did conflict over sex and gender have in the realm of church authority and lay practice? Why did Catholics stop going to confession in the mid-sixties? We will examine the challenges of being American and Catholic by exploring Catholic themes in American popular music, film, and fiction; Catholic social teaching on the economy and nuclear war; and the changes in Catholic religious practice and self-understanding inspired by the events of the 1960s, including the Second Vatican Council and the civil rights movement. Profiles of "everyday Catholics" drawn from primary historical sources will be complemented by brief excerpts from the writings of influential thinkers and activists such as John Ryan, Dorothy Day, John Courtney Murray, Thomas Merton, Richard Rodriguez, Cardinal Joseph Bernardin and Cathleen Kaveny. Two class sessions will be devoted to Notre Dame's role in this story, including the vocation and career of Father Ted Hesburgh, while three class sessions will be devoted to contemporary challenges facing Catholics and the Church. This course satisfies the university history requirement and is open to all students.

AMST 30316. The Louisville Bloody Monday Riot of 1855: Politics, Religion, Ethnicity and Violence in 1850s U.S.

(3-0-3)

The ultimate goal of this course is to move through the historical process with students: curiosity, researching, organizing, argument, writing. This course incorporates both meanings of the phrase "history-making." First, students will investigate the events surrounding a specific riot in 1855 Louisville, Kentucky. Called "Bloody Monday" by those few who know of it at all, the riot took place on an election day when xenophobic nativists targeted businesses, dwellings, and churches of immigrant Catholics. Students will learn the details of the event as well as those groups that converged so violently. Important corollaries such as immigration, urban space, religious conflict, ethnicity, politics, and violence are also a part of the students' readings and discussions. The course will seek answers to the usual questions of history: What happened? Who was involved? "Why did it happen in this particular way? The other way in which this course involves "making history" is by integrating the process by which historians investigate and understand the past. In addition to a heavy emphasis on primary documents and secondary materials relating to the riot, students will read a variety of materials on topics that relate to an anti-Catholic riot in an antebellum city. The goals of the investigation will also include crafting arguments, imagining historical events, innovative techniques to present data, and novel approaches to material. Students in this course will also participate in several activities designed to stimulate thinking about the past. The questions to which this aspect of the course may offer answers include: "How did this event compare to other violence in the nineteenth century U.S.?" and "How have past scholars treated (or ignored) this event?"

AMST 30320. Race and Ethnicity and the Latino Population in the U.S.

(3-0-3) Duarte

How Latinos are racialized often defies the common understanding of race as either black or white. This course attempts to complicate this debate by exploring the historical, political, economic and social structures that determine the ethnic and racial stratification of Latinos in the United States. Topics include the multigenerational experience of Latinos, contemporary immigration, Latino youth and gender.

AMST 30321. American Environmental History

(3-0-3) Coleman

This course is an introduction to the new field of environmental history. While many people think "The Environment" suddenly became important with the first Earth Day in 1970 (or a few years earlier), environmental issues have in fact long been of central importance. In recent decades historians have begun to actively explore the past sensibilities of various groups toward their surroundings and fellow creatures. They have also increasingly paid attention to the ways environmental factors have affected history. This course will range widely, from world history to the story of a single river, from arguments about climate change to the significance of pink flamingos, and will survey a number of types of history including cultural, demographic, religious, and animal.

AMST 30322. Colonial America

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th century to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of English North America.

AMST 30323. American Legal History

(3-0-3)

This seminar style course deals with the interaction between the legal system and social change in the United States from the 1600s to the 1980s. Primary

emphasis is given to the 19th century and 20th century, two periods where American legal culture took on much of its fundamental character and adjusted to significant social change. Main themes include the relationships between law and development, individual rights in the public and private spheres, the development of the legal profession, the post-New Deal state, and the various U.S. “rights” movements. Reading consists of primary sources documents and a short survey text. Grades will be based on a series of short papers and classroom discussion. Prior knowledge of American history is helpful but not required.

AMST 30324. History of the American West

(3-0-3)

Few American regions have generated as many cultural narratives, myths, and icons as the trans-Mississippi West. This course takes both the reality and the romance of the West seriously, asking students to examine how the American conquest of the West inspired storytelling traditions that distorted and shaped the region’s history. To get at this interaction, we will read novels, histories, and first-hand accounts as well as view several Hollywood westerns. The class is reading- and discussion-intensive. Students will write several short papers as well as a longer final essay.

AMST 30325. U.S. Foreign Policy to 1945

(3-0-3)

This course covers the main developments in American foreign relations from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in the two world wars. A recurring theme will be the major traditions in America foreign policy and the ways in which these traditions influenced policy makers in the early years of the “American Century.”

AMST 30326. Sex, Sexuality and Gender in the United States to 1880

(3-0-3) Bederman

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions’ attitudes towards sexuality (the Puritans were not anti-sex!), how different cultures’ views of sex shaped relations between colonists and Indians, why sex was an important factor in establishing laws about slavery in Virginia, birth control and abortion practices, changing patterns of courtship, men who loved men and women who loved women, and why the average number of children in American families fell by 50 percent between 1790 and 1890. Over the course of the semester, students will also design a small research proposal on some aspect of the history of American sexuality prior to 1890. Written assignments will include a weekly journal, midterm and final examinations; a book review; and a small research project.

AMST 30327. American Political Traditions since 1865

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy’s character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of the debate over slavery and Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

AMST 30328. American Intellectual History since 1870

(3-0-3) Turner

This lecture course will survey major developments in American thought from the first English contacts with North America to the mid-19th century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye towards understanding the roots of our own ways of thinking. Especially in the first weeks of the course, European backgrounds will also receive attention. Students will write a midterm and a final exam, as well as a 10-page research paper.

AMST 30329. Sport in American History

(3-0-3)

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horseracing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender and class. Given Notre Dame’s tradition in athletics, we will explore the University’s involvement in this historical process.

AMST 30330. Morality and Social Change in U.S. History

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

AMST 30331. U.S. Civil War and Reconstruction, 1848–77

(3-0-3)

This course examines the social, political, and cultural history of the United States from the ratification of the Constitution to the beginnings of the political crisis over expansion and slavery. It covers the democratization of politics and the problems of national independence in the wake of the Revolution; territorial expansion; economic change; the development of regional, class, religious, racial, ethnic, and gendered subcultures; slavery and resistance to slavery; and the new political and reform movements that responded to the era’s deep and lasting changes.

AMST 30332. Crime, Heredity, and Insanity in American History

(3-0-3) Przybyszewski

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

AMST 30334. U.S. Civil War Era

(3-0-3)

Arguably the study of the American Civil War is a suitable training ground for novice historians, for traditionally a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on

the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the War, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

AMST 30335. The United States Since WWII

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of George H.W. Bush. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal program of President Truman, the Cold War, the Korean conflict, the Eisenhower presidency, the New Frontier, Vietnam, President Johnson's Great Society, the civil rights movement, the Nixon years, the social and intellectual climate of this post-war era, and the presidencies of Gerald Ford through George H.W. Bush. There will be a required reading list of approximately six books, two smaller writing assignments, and three examinations.

AMST 30336. Mexican-American History

(3-0-3) Rodriguez

This course is an introductory survey of Mexican-American history in the United States. Primarily focused on events after the Texas Revolution, and annexation of the American Southwest we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican-American U.S. citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a U.S.-based Mexican-American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican American life and work in the Great Lakes and midwestern United States. We will conclude with the recent history of Mexican- and Latin-American migration to the United States after 1965, and the changing nature of Mexican-American identity and citizenship within this context.

AMST 30337. History of American West

(3-0-3)

Few American regions have generated as many cultural narratives, myths, and icons as the trans-Mississippi West. This course takes both the reality and the romance of the West seriously, asking students to examine how the American conquest of the West inspired storytelling traditions that distorted and shaped the region's history. To get at this interaction, we will read novels, histories, and first-hand accounts as well as view several Hollywood westerns. The class is reading- and discussion-intensive. Students will write several short papers as well as a longer final essay.

AMST 30338. Morality and Social Change in U.S. History

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

AMST 30339. History of American Sport

(3-0-3) Soares

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horseracing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender and class. Given Notre Dame's tradition in athletics, we will explore the university's involvement in this historical process.

AMST 30340. U.S. Environmental History

(3-0-3)

This course is an introduction to the new field of environmental history. While many people think "The Environment" suddenly became important with the first Earth Day in 1970 (or a few years earlier), environmental issues have in fact long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course history: the effects of the distribution of water, foodstuffs, wood, minerals, and of changes in climate or endemic disease. This course will range widely—in methodology from the history of ideas to paleoclimatology, geographically from the ancient near east to modern America, typically from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th century American west. Lecture discussion format.

AMST 30341. African-American History II: Since 1865

(3-0-3) Pierce

African American History II is a course that examines the broad range of problems and experiences of African Americans from the close of the American Civil War to the 1980s. We will explore both the relationship of blacks to the larger society and the inner dynamics of the black community. We will devote particular attention to Reconstruction, the migration of African Americans from the rural south to the urban north, and the political machinations of the African American community. The course will utilize historical documents in the form of articles and other secondary sources. Classes will be conducted as lecture-discussions.

AMST 30342. U.S. Foreign Policy in the Cold War

(3-0-3) Miscamble

This course offers an overview of U.S. foreign policy since World War II, focusing on the major crises and conflicts that have occurred since then—U.S. and Soviet Union, Korea, Vietnam, Gulf War, and Kosovo.

AMST 30344. American Intellectual History II

(3-0-3)

This lecture course will survey major developments in American thought from the later nineteenth century to the end of the twentieth century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our present ways of thinking.

AMST 30345. 20th Century American Military Experience

(3-0-3)

Is America, as historian Geoffrey Perret contends, a "country made by war"? Regardless of one's opinion, a systematic study of America's wars is essential to either confirm or refute the above statement and obtain a more complete understanding of the nation. There have certainly been ample historical occurrences to support Perret's assertion over the last century, and this course will investigate the validity of the question by examining the modern American military experience

from after the Franco-Prussian War of 1871 to the present. We will explore the causes, conduct, and consequences of the major military conflicts of the 20th century in which the U.S. was involved or that had a significant impact on the U.S., using traditional historical materials. We will also read several battlefield memoirs to further examine the conflicts at the tactical level and also explore the human dimension of war. Using a fundamental thesis to address war at the political, strategic, operational, and tactical levels, the goal of the course will be to gain a better understanding of the relationship among the different levels as well as the importance of each. As a part of their discovery process, students will take three essay exams and write a research paper assessing the combat effectiveness of a particular unit that existed during this period to assist them in determining, developing, and delivering a response to Perret's statement.

AMST 30346. African Americans in U.S. Society and the World: Thinking with W.E.B. Du Bois

(3-0-3) Ford

How might thinking of the African American increase our understanding of U.S. society's diversity and its relation to the modern world? If such a task could be addressed by looking at the work of one thinker, who would it be? This course offers writer and philosopher W.E.B. Du Bois as one avenue to answering these questions. Not only did Du Bois predict that the problem of the twentieth century would be the "problem of the color line," studying for his PhD at the University of Berlin and Harvard University in the 1890s. Not only did he found the NAACP and gain the respect of thinkers and activists like Martin Luther King and Albert Einstein, W.E.B. Du Bois was also a prolific writer of philosophy, fiction, correspondence, editorials, novels, and lectures, resulting in a 70-year career and over 175,000 pages of published and unpublished writings. This course will only read (and, in some cases, view or listen to) some of the key moments in Du Bois's intellectual career, primarily *Souls of Black Folk*, *John Brown*, *Dark Princess*, selections from *Black Reconstruction* and *Darkwater*. We will examine how he reconfigured philosophical concepts, literary genres and tropes in specific contexts to think in innovative ways about African Americans and our modern world in general. We will also contextualize Du Bois in relation to national and international figures in Europe, Africa, and Asia. Ultimately, we will consider how his ideas can inform critical thinking about the present. Grades will consist of class participation and writing assignments based on particular themes that encountered in Du Bois's thought.

AMST 30348. U.S. South Since 1865

(3-0-3)

Popular notions of the South tend to portray it as a region lost in time, trapped within backwards traditions and with a hostile view of the modern world. Yet, no region of the country has experienced such sweeping social, cultural and economic changes as the American South between the Civil War and the 1980s. Over the course of that period, southerners witnessed rapid economic transformation from plantation economy to Sunbelt industrialism; the rise and fall of Jim Crow and the tremendous racial strife that accompanied these changes; a literary flourishing brought on by what writers called the region's unique sense of tragedy and loss; the movement of southern folk life away from the farms and mill towns into urban areas; and the rising appeal of southern politics and culture to a larger national community in the modern day. This course will examine these and other developments in the context of American history, casting a comparative eye toward how other societies have sought to embrace modernization while clinging to a variety of traditions, real and imagined.

AMST 30351. U.S. Civil War Era

(3-0-3)

Arguably the study of the American Civil War is a suitable training ground for novice historians, for traditionally a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the

Civil War, the War, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

AMST 30352. The United States, 1900–45

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. Major topics will include the background for Progressive reform, the New Nationalism and New Freedom administrations of Theodore Roosevelt and Woodrow Wilson, the diplomacy of the early 20th century, the causes and results of World War I, the Republican administrations of the 1920s, the New Deal administration of Franklin D. Roosevelt, isolationism and neutrality in the inter-war period, and the American home front during World War II. There will be a required reading list of approximately seven books, two shorter writing assignments, and three major examinations, including the final.

AMST 30353. Women and American Catholicism

(3-0-3)

This course is a survey of the history of American Catholic women from the colonial period to the present. Through a combination of lectures, reading and discussion, we will explore the following themes and topics: the role of religious belief and practice in shaping Catholics' understanding of gender differences; the experience of women in religious communities and in family life; women's involvement in education and social reform; ethnic and racial diversity among Catholic women; devotional life; the development of feminist theology, and the emergence of the "new feminism" as articulated by Pope John Paul II. We will seek to understand how Catholic women, both lay and religious, contributed to the development of Church and nation, and examine how encounters with the broader American society have shaped Catholic women's relationship to the institutional church over the last three centuries.

AMST 30354. Mexican-American History

(3-0-3)

This course is an introductory survey of Mexican American history in the United States. Primarily focused on events after the Texas Revolution, and annexation of the American Southwest we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican American U.S. citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a U.S.-based Mexican American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican American life and work in the Great Lakes and Midwestern United States. We will conclude with the recent history of Mexican and Latin-American migration to the United States after 1965, and the changing nature of Mexican American identity and citizenship within this context.

AMST 30355. Sport in American History

(3-0-3)

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horseracing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender and class. Given Notre Dame's tradition in athletics, we will explore the university's involvement in this historical process.

AMST 30356. American Religious History

(3-0-3) Bain-Conkin

This course will examine religion in American life from the encounter between Europeans and Native Americans in the sixteenth century to the present. We will explore the ways in which religion has shaped American society, culture, and politics, and in turn how the U. S. setting has shaped religious expression. Themes will include the rise of religious diversity and ideas of religious freedom; the interactions between the American religious “mainstream” and minority religious traditions; the relationship between religion in the U.S. and its international setting; and the diversity and persistence of religion in American culture.

AMST 30358. African-American to 1877

(3-0-3)

This African-American history survey begins with an examination of West African origins and ends with the Civil War era. We will discuss the Atlantic slave trade, slavery in colonial America, the beginnings of African-American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery and resulting sectional disputes. Particular attention will be paid to northern free blacks.

AMST 30359. Sex, Sexuality, and Gender in the United States to 1900

(3-0-3)

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions’ attitudes towards sexuality (the Puritans were not anti-sex!), how different cultures’ views of sex shaped relations between colonists and Indians, why sex was an important factor in establishing laws about slavery in Virginia, birth control and abortion practices, changing patterns of courtship, men who loved men and women who loved women, and why the average number of children in American families fell by 50 percent between 1790 and 1890. Over the course of the semester, students will also design a small research proposal on some aspect of the history of American sexuality prior to 1890. Written assignments will include a weekly journal, midterm and final examinations; a book review; and a small research project.

AMST 30360. American Intellectual History to 1870

(3-0-3) Turner

The first half of a two-semester sequence surveying the American intellectual history.

AMST 30361. U.S. Presidents, FDR to Clinton

(3-0-3)

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

AMST 30362. Labor and America since 1945

(3-0-3) Graff

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8% of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been

the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is “globalization” and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies or mass culture are particularly welcome.

AMST 30364. Early American Empires

(3-0-3)

Between 1400 and 1750, a fierce battle for Empire was waged between and among the Spanish, French, and British nations and the peoples they sought to control, particularly Africans and Amerindians. The result of this fateful encounter would determine the political, economic, cultural, racial, and ecological character of what became the United States of America. Students will engage with this momentous event in several ways: through select readings in the theoretical and historiographical literature, by using primary sources written by the colonizers and the colonized, and by reading important secondary works. The themes we will explore include the symbols used by the various Empires to establish rights to the land, the different patterns of settlement, the various European interactions with Africans and Amerindians, the effect that contestants for Empire had upon the land, and the response of Africans and Amerindians to European attempts at subjugation.

AMST 30365. Religion and American Politics

(3-0-3)

Corequisite: HIST 32630

Since the early 1950s, religion has been an obviously major factor in American political life, driven first by the African-American leaders of the civil rights movement and then, in more recent decades, by the concerns of the Religious Right. Especially after the election of John F. Kennedy in 1960, Catholics have also been fully recognized participants in the nation’s political uses of religion—as well as in debates over whether and how religion should be used politically. This class tries to show that modern political-religious connections are but new instances of what has always gone on in the American past. The shape of contests over religion and politics may have changed considerably over time, but not the fact of dense connections between the two spheres. Readings for the course include primary and secondary accounts that treat notable incidents, problems, debates, and controversies from the colonial period to the present. Lectures spotlight major issues of historical interpretation, like religion and the Constitution, religion and antebellum debates over slavery, religion and Reconstruction, Catholic versus Protestant understandings of liberty, civil rights and the New Christian Right.

AMST 30366. Consumerism in 20th Century U.S.

(3-0-3)

By 1900 the development of mass production made the possibility of consumption for private enjoyment available to increasing numbers of Americans. This course will explore the creation of contemporary consumer culture beginning with the advent of mass production and mass marketing in the 19th century, including the rise of advertising and the growth of department stores. We will then examine how the ideas and institutions associated with consumerism changed throughout the 20th century during times of depression, war, and into the present. Additional topics will include how consumers have used consumption to fashion individual and group identities, as well as how Americans have embraced or challenged consumerism over time.

AMST 30367. The New American Nation, 1787–1848

(3-0-3)

This course examines the social, political, and cultural history of the United States from the ratification of the Constitution to the beginnings of the political crisis over expansion and slavery. It covers the democratization of politics and the problems of national independence in the wake of the Revolution; territorial expansion; economic change; the development of regional, class, religious, racial, ethnic, and gendered subcultures; slavery and resistance to slavery; and the new political and reform movements that responded to the era’s deep and lasting changes.

AMST 30373. The American Revolution

(3-0-3)

Corequisite: HIST 32602

When speaking of the American Revolution, many writers reach for a comment made by John Adams in 1818 that, “[T]he Revolution was effected before the war commenced. The Revolution was in the minds and hearts of the people...” Whether this assertion is true historically or not, it still does not adequately describe what that revolution was. The American Revolution obviously had its political elements, primarily the formation of the United States. To reach its political goals, military means were necessary. Without a successful War for Independence, there would have been no revolution. To leave matters there, however, would be insufficient. A fuller understanding of the revolution would need to address how it affected the whole spectrum of American life. It would consider the revolution as a social movement that challenged the political and social hierarchies of the day. It would also ask how the revolution affected those who were not white males, especially women, slaves, and Native Americans. Without considering the possible negative implications of the revolution, any telling would be incomplete. This class will take up these challenges and attempt to make a full-orbed presentation of the events surrounding the American Revolution. It will introduce students both to elites and to those whom the popular narrative glosses over. It will attempt to count the losses, as well as the gains, which flowed from the move to independence from Britain. Finally, it will attempt to describe the many changes through this period, which resulted, not only in a new political nation, but in a new society and culture—changes that in varying degrees are still with us today and of which contemporary Americans are the inheritors.

AMST 30374. Caribbean Historiography

(3-0-3)

This class will introduce students to major events in Caribbean history and the various ways in which these histories have been represented. This course will present a picture of the Caribbean very different from that held by many North Americans. For 500 years, this region has been the site of encounters and clashes among Native Americans, Europeans, Africans, and Asians. For three centuries Europe’s leading states fought each other to control these islands, which were the most valuable real estate in the Atlantic world. At the same time Dutch, English, French and Spanish colonists imported millions of enslaved men, women, and children from Africa to work on the sugar and coffee plantations that made the region so profitable for its masters. Supported by racism and colonialism, plantation slavery left its mark on the Caribbean long after emancipation and independence. We will be emphasizing recent, representative texts, monographs and essays but placing them in the context of early research.

AMST 30375. Archaeology of the African Diaspora

(3-0-3)

This course will introduce students to organizations and movements arising from and on behalf of black populations in the Diaspora, including the United States and various nations in Latin America and the Caribbean. “Movements” is defined broadly in this course to include both historical and contemporary instances of collective resistance, revolt, and rebellion as well as sustained collective activism and organizing around artistic, cultural, social, intellectual, political, and/or religious agendas aimed at bringing about black liberation, social justice, and cultural/ethnic/racial awareness and pride. Among the topics to be considered are varying expressions of black nationalism within the U.S., Rastafarianism in Jamaica, black identity groups in Brazil, and black organizational presence and community building on the internet. Readings and class discussions will encourage students to think about blackness (and identity and mobilization more generally) in global terms, searching for points of connection across international borders along with points of disconnect based on differing historical, cultural, and socio-political realities and differing local understandings of race and ethnicity.

AMST 30376. What’s Love Got to Do with It? Marriage and the Family in American History

(3-0-3)

From the heated trenches of America’s “culture wars” few things are as polarizing as marriage and the family. At the extremes, some hearken back to less troubled days when one man and one woman made enduring commitments to each other; others imagine a narrative of progress with women throwing off the shackles of patriarchy, as both men and women forged new kinds of relationships informed by individual needs. Through intensive reading and writing students will grapple with these conflicting narratives of decline and triumph. We will explore Native-American families, polygamy, free-love communities, Cold War homemakers, the black family, and gay marriage. In all of these we will flesh out the ways in which defining “the family” has always been entangled with citizenship, national politics, and religious intolerance.

AMST 30377. The United States in the 1960s

(3-0-3)

Few periods in American history have been as controversial as the 1960s. Sometimes called the “Long Sixties,” it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the U.S., the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a combination of readings, videos, mini-lectures, and class discussions. Toward the second, they will be exposed to four different approaches: (1) discussing primary documents and writing a paper on some of them; (2) studying three small-scale case studies; (3) examining the large-scale phenomenon of protest; and (4) reading the memoirs of a Cabinet member, hence gaining an insider’s view of the life and activities in the White House.

AMST 30378. The U.S. Civil War Era, 1848–1877

(3-0-3)

Arguably the study of the American Civil War is a suitable training ground for novice historians, for traditionally a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the War, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

AMST 30379. American Catholic Experience

(3-0-3)

Corequisite: HIST 32615

This course is a survey of the history of Roman Catholicism in the United States from colonial times to the present. We will consider, among others, the following topics: immigrant and ethnic Catholicism, women in the Church, Catholic social reform, devotional and parish life, and the relationship between Catholicism and American democracy.

AMST 30380. United States Labor History

(3-0-3)

Corequisite: HIST 32618

The Labor Questions “Who does the work? Who reaps the rewards? And who makes the decisions?” are central to any society, and this course explores how those questions have been answered throughout the history of the United States

of America. “Working for a Living in the U.S.” will introduce you to the major themes, events, organizations, individuals, and scholarly controversies in American labor history from 1776 to the present. We will study the diversity of the working-class experience in the US by exploring the past from multiple perspectives, and we will analyze competing interpretations put forth by labor historians over the past half-century. The workers, workplaces, communities, institutions, and issues will range widely over the semester, but we will investigate some core themes for the duration: issues of power, structure, and agency, from the workplace to Washington, D.C.; workers’ wide-ranging efforts to forge organizations, namely labor unions, to represent their collective interests; intersections between class, race, and gender at work, at home, at play, and in politics; and tensions between capitalism, industrialization, and democracy in U.S. history.

AMST 30381. The Religious Factor in American Culture

(3-0-3)

This course is about understanding American culture and its history, taking religion into account as one important factor among many—but one often neglected. Subjects include how religion has interacted with just about everything else in the culture, from politics and warfare to intellectual life, ideals, morality, science, schooling, race, immigration, ethnicity, family, sexuality, and so forth.

AMST 30382. Slavery, Captivity, and the Company Store in American History

(3-0-3)

What does it mean to be a slave in America? Were African-Americans the only slaves in America? Are indentured servants, captives, or laborers in company towns free? Are they slaves? This course examines slavery and other forms of unfree labor in the United States. Through lectures and discussions, the class will investigate unfree labor in American history—chattel slavery in the South and New England, Puritan captives in French Canada, Indian slave trade in the South and Southwest, indentured servants in Virginia, and company towns in the post-war South and West. By the end of the course, students will be equipped to explore how chattel slavery in America fit into a global context, how modernity was related to slavery, and how the experiences of African-American slaves differed by time and region in the United States. After a broad survey of slavery and unfree labor in the United States, students will be prepared to tackle the following questions: What does it mean to be free in America? What was the impact of slavery and unfree labor on American politics and society?

AMST 30383. Race and Culture in the American South to 1865

(3-0-3)

This course traces the roots of southern, antebellum culture by exploring the centrality of the relationships between sex, manliness, and slavery in the development of south from 1619 to 1865. By examining how European men viewed their own sexuality and that of European women in contrast to that of African men and women this course seeks to examine the complex racial and gendered identities at the center of southern culture. The underlying current of the class is to understand the complexity with which racial and gendered identities defined relationships and culture in the south. Using primary and secondary sources, we will critically engage the debates about slavery, racism, gender, and class in southern culture. We will reevaluate the historiographic arguments on American racism. We will take the notion of “southern gentlemen” to task, juxtaposing their responsibility as patriarchs to the ugly underbelly of slavery, race, and sexual exploitation. Our efforts in this class will be to understand the contours of the relationships between sexual control, manliness, and racism. We will explore the daily lives of men and women who lived during the time. A variety of perspectives will constitute our sources about slavery, including those of blacks, free and enslaved, as well as planters, abolitionists, women, and yeomen.

AMST 30384. The Great Depression in the United States

(3-0-3)

This course explores the political, economic, cultural, and social history of the Great Depression and New Deal years in the United States, from the stock market crash of 1929 to the beginning of World War II in 1941.

AMST 30386. U.S. in the 1960s

(3-0-3)

Few periods in American history have been as controversial as the 1960s. Sometimes called the “Long Sixties,” it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the U.S., the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a combination of readings, videos, mini-lectures, and class discussions. Toward the second, they will be exposed to four different approaches: (1) discussing primary documents and writing a paper on some of them; (2) studying three small-scale case studies; (3) examining the large-scale phenomenon of protest; and (4) reading the memoirs of a Cabinet member, hence gaining an insider’s view of the life and activities in the White House.

AMST 30387. History of Consumerism in the Modern United States, 1880s to the Present

(3-0-3)

This course will explore the creation of contemporary consumer culture in the United States. Beginning in the late 1880s, the nature of buying, selling and consuming was fundamentally transformed in the United States. After a brief examination of the broader history of consumption, this course will explore the changes in production, marketing, retailing, and consumption from the Gilded Age to the present. Next it will trace the ways in which those changes have influenced broader cultural, institutional, and political developments throughout the twentieth century. A particular emphasis will be placed on the ways in which patterns of consumption helped define and redefine categories of race, class and gender.

AMST 30388. Slavery in the Atlantic World

(3-0-3)

This survey course explores the role of coerced African labor in the birth of the Atlantic World. What do we mean by Atlantic World? What do we mean by slavery? What varied and nuanced claims to humanity did Africans make against a dehumanizing labor system? How did sexuality and gender norms shape the experiences of slavery for men and women? Together we will examine slave autobiographies, travel diaries, and pictorial sources to address these questions. We will focus on the peoples of West Africa, Brazil, the United States and the Caribbean who were enslaved from the fifteenth to the nineteenth century.

AMST 30389. Irish-American History

(3-0-3) Griffin

Corequisite: HIST 32610

This course explores the history, politics, and culture of Irish Americans from the colonial era to the near present.

AMST 30390. U.S. During the 1960s

(3-0-3) Swartz

Few periods in American history have been as controversial as the 1960s. Sometimes called the “Long Sixties,” it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the U.S., the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a

combination of readings, videos, mini-lectures, and class discussions. Toward the second, they will be exposed to four different approaches: (1) discussing primary documents and writing a paper on some of them; (2) studying three small-scale case studies; (3) examining the large-scale phenomenon of protest; and (4) reading the memoirs of a Cabinet member, hence gaining an insider's view of the life and activities in the White House.

AMST 30391. U.S. Civil Rights History: The Chicano Movement
(3-0-3) Rodriguez

The “Chicano Movement” for Mexican American civil rights grew in tandem with the main contours of the civil rights culture that developed in the United States during the 1960s. As such, this course seeks to place the movement alongside other national movements for social change including the African American civil rights movement, labor movement, counter-culture, and the anti-war movement. It will also be attentive to related efforts to build bridges between Latino populations (mainly Puerto Ricans) in American cities. As it emerged in the 1960s, the Chicano Movement challenged and maintained the ideological orientation of past efforts for Mexican American inclusion as it borrowed from the rich mix of social and cultural movements that defined the 1960s and early 1970s. This course will explore movement centers in California and Texas as well as a growing body of research on the civil and labor rights efforts in the Great Lakes, Pacific Northwest, and other Mexican ancestry communities across the United States as well as connections to Mexico and Cuba. This course will detail the key events and leadership of the movement as well as the art, music, and cultural production of one of the most important American civil rights movements of the post World War II era.

AMST 30395. Reagan's America: The 1980s
(3-0-3)

In his campaign for re-election to the presidency in 1984, Ronald Reagan released a television commercial that began with the line, “It’s morning in America again.” The ad suggested the many ways in which President Reagan and the Republican Party were improving the economy and bringing optimism back to America. “Under the leadership of President Reagan,” the commercial concluded, “our country is prouder and stronger and better.” Reagan’s campaigns for the nation’s highest office stressed the themes of patriotism and individual responsibility, while his presidential administrations oversaw an economic agenda that privileged corporate America and wealth production and a foreign policy that justified extreme measures by citing the dangers posed by the Soviet Union and communism. The United States in the 1980s was dominated by the presidency and personality of Ronald Reagan. His aggressive economic and foreign policies influenced the major events of the decade, while his politics helped to shape the wider culture, a period often characterized as “the me decade” (and one Madonna called “a material world” in a hit song). In this course students will explore the 1980s and assess the conventional wisdom about Reagan and the decade he dominated. Were Americans too blinded by greed to confront the nation’s social problems, or was there a serious debate going on about individual conscience and social responsibility? Students will debate these and other questions as they explore several of the major themes of 1980s America: the Cold War, the Christian Right, progressivism, conservatism, popular culture, and the media. In addition to probing political speeches, congressional testimony, the Reagan diaries, pop music, and sitcoms, students will also examine some of the new books by historians, who are just now beginning to come to grips with this pivotal recent time in American history. This course satisfies the university history requirement and is open to all students.

AMST 30396. Abraham Lincoln's America, 1809–1865
(3-0-3)

This course explores the social, economic, intellectual, cultural, and political history of the early to mid-nineteenth-century United States through the prism of Abraham Lincoln’s biography. Topics may include trans-Appalachian migration and settlement, U.S.-Native American relations, race and slavery, gender and family, market developments and labor relations, formal and informal politics, the law, and the promise and limits of studying history through singular lives.

AMST 30397. Natives and Newcomers to 1815

(3-0-3) Coleman

This course explores settler and Native American relations from contact until the end of the American War of 1812.

AMST 30398. Caribbean History: From Colonization to Emancipation

(3-0-3)

”Sun, Sex & Fun” is how the global tourism industry often packages the Caribbean to its potential travelers. In this course we will unpack such simplistic representations of the region. Students will be introduced to the diverse experiences and cultures of the peoples that made up the Caribbean from colonization in the 15th century to slave emancipation in the 19th century. The four major themes that we will examine are indigenous peoples and European encounters; the laboring lives and the cultural worlds of enslaved Afro-Caribbean peoples; resistance and rebellion; abolition and emancipation. In this course we will watch films, use pictorial sources, slave narratives and diaries to capture the commonality of the experiences of the peoples of the Spanish, French, British and Dutch Caribbean.

AMST 30399. Racialization in the U.S. and Brazilian History

(3-0-3) Graham

This course will consider the processes that have caused aspects of society to be racialized, or labeled with racial meanings, symbolisms, and/or identities. The class will focus on, but will not be limited to, “black” racialization. We will examine how racialization has shaped the human experience in the largest ex-slaveholding nations of the Americas—the United States and Brazil. Our goal is to understand the ways in which not only people are racialized, but also communities, geographical regions, nations, cultural production (such as music), behavior, labor, and gender, to name a few. With these two nations as our case studies, the class will explore the dynamic nature of racialization, focusing on the impact that space and time has had on the way we identify and live race.

AMST 30401. American Congress

(3-0-3)

This class will expose the student to the practical workings of the U.S. Congress, some major theories attempting to explain those workings, and some of the methods and materials needed to do research on Congress. It will place the study of Congress in the context of democratic theory, and in particular the problem of the way in which the institution across time grapples with the problem of the common good.

AMST 30402. Race/Ethnicity and American Politics

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions—the Congress, presidency, judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

AMST 30403. Constitutional Interpretation

(3-0-3)

Prerequisite: POLS 10100 or POLS 20100 or GOVT 10100 or GOVT 20100
Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

AMST 30407. Political Participation

(3-0-3)

This course is intended to explore some of the causes of citizens' differentiated rates of political participation in American politics, as well as the impact that this has on the representational relationship between constituents and legislators. We will begin with a theoretical overview of some of the unique aspects of our representational system. Next, we will analyze the factors that influence the formation of individuals' political preferences, and their propensity to undertake various forms of political participation. Then we will turn to an analysis of the formation and uses of public opinion. Finally, the class will investigate the consequences of using institutional reforms geared toward "direct democracy" to increase political participation and/or the weight of public opinion on the legislative process.

AMST 30409. Latin American International Relations

(3-0-3)

This course examines the international relations of Latin America with an emphasis on what determines U.S. policy toward Latin America, and the policies of Latin American states toward the United States, other regions of the world, and each other. It analyzes recurring themes in U.S.-Latin American relations, including the response of the United States to dictatorships, expropriations of U.S.-owned property, and revolution. It also studies new directions and issues in Latin America's international relations, e.g., trade policy, the environment, migration, and drugs in a post-Cold War world.

AMST 30410. American Political Thought

(3-0-3) Mastrangelo

This course surveys the development of American political thought from the Colonial period to the early 20th century. We will specifically look at different theories of what constitutes America and what this means for what may be considered appropriate political behavior. This course emphasizes a careful reading of texts to discern different articulations of what may be considered the proper purview of politics in America and why. Requirements include active class participation, several short papers, and a final paper. This course assumes a basic familiarity with American government and history.

AMST 30413. Presidential Leadership

(3-0-3)

This course examines the role of the presidency in the American regime and its change over time. Particular attention will be given to expectations about presidential leadership through the course of American political history. Beginning with questions about the original design and role of the presidency, the course turns to consideration of the role of leadership styles for change and continuity in American politics. Finally, cases of presidential leadership are studied to comprehend the way leadership and political context interact.

AMST 30414. Religion and Politics

(3-0-3)

Voters hear increasing amounts of religious discourse in American political campaigns and administrations are turning to religious institutions for social service delivery. The linkages between religion and politics, however, are very complex and constitutionally delicate. This course utilizes a burgeoning body of empirical studies drawn from political science, sociology, and psychology, that address relationships among religious beliefs and organizations on the one hand, and political attitudes and actions on the other. Topics include the meaning and measurement of religiosity; linkages between religion and politics at the level of the individual, the local community of faith, and the policy maker; foundational beliefs, images of God, conceptions of human nature, and their consequences for the political order; religious values embedded in the American political system; religion and the state, as seen in selected court cases; and denominational bodies, interest groups, and religious movements in American politics. Students will be responsible for one or two exams, oral presentations, and an original research paper. Depending on class size, either a lecture-discussion or a seminar-tutorial mode of teaching will be

used. Students will read books by Wald, Benson and Williams, and several other authors, and may do directed research on NES or GSS datasets. (Also open to graduate students.)

AMST 30419. Constitutional Law

(3-0-3) Kommers

This course examines the main principles of American constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court's opinions. A background in American national government is desirable.

AMST 30420. Political Participation

(3-0-3)

This course is intended to explore some of the causes of citizens' differentiated rates of political participation in American politics, as well as the impact that this has on the representational relationship between constituents and legislators. We will begin with a theoretical overview of some of the unique aspects of our representational system. After analyzing the factors that influence the formation of individuals' political preferences, and their propensity to undertake various forms of political participation, we will focus on the historical developments and reforms that have fundamentally shaped the institutions that connect constituents to their government representatives. We will also review the uses of public opinion polls, and end the class by discussing the consequences of using institutional reforms geared toward "direct democracy" to increase political participation and/or the weight of public opinion on the legislative process.

AMST 30423. American Congress

(3-0-3)

This class will expose the student to the practical workings of the U.S. Congress, some major theories attempting to explain those workings, and some of the methods and materials needed to do research on Congress. It will place the study of Congress in the context of democratic theory, and in particular the problem of the way in which the institution across time grapples with the problem of the common good.

AMST 30425. American Voting and Elections

(3-0-3)

This course will examine voting and opinions, and the linkage between political leaders and the mass public. Possible topics include an introduction to electoral analysis; the history of recent electoral politics; the nature of political participation, especially the rationality of voting turnout and non-electoral specialization; party identification and opinions, attitudes, and ideology; social groups and cultural identities; mass media and image campaigns; and differences between presidential and congressional elections.

AMST 30426. Constitutional Law

(3-0-3)

This course examines the main principles of American constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court's opinions. A background in American national government is desirable.

AMST 30427. American Foreign Policy

(3-0-3)

The United States is the most powerful state in the world today. Its actions are important not just for U.S. citizens, but they also affect whether others go to war, whether they will win their wars, whether they receive economic aid, whether they will go broke, or whether they will starve. What determines U.S. foreign policy? What is the national interest? When do we go to war? Would you send U.S. soldiers into war? If so, into which wars and for what reasons? How do our economic policies affect others? Does trade help or hurt the U.S. economy and its citizens? We first study several theories about foreign policy. We then examine the U.S. foreign policy process, including the president, Congress, the bureaucracy, the media, and public opinion. To see how this all works, we turn to the history of U.S. foreign policy, from Washington's farewell address through the World Wars and the Cold War to the Gulf War. We then study several major issue areas, including weapons of mass destruction, trade and economics, and the environment. Finally, we develop and debate forecasts and strategies for the future.

AMST 30428. U.S. Foreign Policy

(3-0-3) Lindley

The United States is the most powerful state in the world today. Its actions are important not just for U.S. citizens, but they also affect whether others go to war, whether they will win their wars, whether they receive economic aid, whether they will go broke, or whether they will starve. What determines U.S. foreign policy? What is the national interest? When do we go to war? Would you send U.S. soldiers into war? If so, into which wars and for what reasons? How do our economic policies affect others? Does trade help or hurt the U.S. economy and its citizens? We first study several theories about foreign policy. We then examine the U.S. foreign policy process, including the president, Congress, the bureaucracy, the media, and public opinion. To see how this all works, we turn to the history of U.S. foreign policy, from Washington's farewell address through the World Wars and the Cold War to the Gulf War. We then study several major issue areas, including weapons of mass destruction, trade and economics, and the environment. Finally, we develop and debate forecasts and strategies for the future.

AMST 30429. Black Chicago Politics

(3-0-3)

This course introduces students to the vast, complex and exciting dimensions of black Chicago politics. First, institutional structures, geographic distribution and population characteristics will inform students about the sociodemographic background of the African American population in the city. Second, the course explores varying types of political expression that have developed over more than a century, including electoral politics, mass movements, and partisan politics; it will also examine the impact of the Chicago machine, and of the Washington era on the political and economic status of African Americans in the city. Third, public policy developments in housing, education and criminal justice will be discussed. Fourth, the course also compares black political standing with other racial and ethnic groups in the city. Finally, the course will introduce students to the long tradition of social science research centered on the city of Chicago.

AMST 30431. Race and Ethnicity in American Politics

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What roles do American political institutions—the Congress, presidency, judiciary, state and local governments, etc. play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

AMST 30432. American Foreign Policy in Middle East

(3-0-3)

This course provides an in-depth analysis of the causes, conduct, and consequences of American foreign policy towards the Middle East since World War II. We will look at the origins of the American foreign policy, and explore the domestic and international factors that shape the policymaking process towards this region, including the roles of several American policy institutions such as the Departments of State and Defense, the Central Intelligence Agency. We will specifically focus on the evolution of American policy towards a number of major countries in the region, including Israel, Iran, Turkey, Saudi Arabia, Egypt, and Lebanon.

AMST 30433. Latinos and the U.S. Political System

(3-0-3) Hero

This course provides a careful and critical analysis of the political status, conditions, and the political activities of the major Latino (or "Hispanic") groups in the United States—particularly, Mexican-Americans, Puerto Ricans, and Cuban-Americans. To provide a context and grounding, various theoretical perspectives are first considered, followed by discussions of the historical experiences and contemporary socioeconomic situations of the several Latino groups. Attention then turns to a number of issues concerning political attitudes, behaviors, and activities. Assessments of Latino influence upon the major local, state and national institutions of the political system—and vice versa—are next are considered. Policy areas particularly significant for Latinos are also examined. Finally, the major issues, questions, and themes considered throughout the semester are revisited and reconsidered.

AMST 30434. Public Opinion and Political Behavior

(3-0-3)

A principle tenet underlying democratic governance is the belief that public opinion or the "will of the people" should dictate governmental behavior. To the extent this belief is a realistic consideration, difficult questions remain concerning the capacity for citizens to develop reasoned opinions and how to conceptualize and measure opinion. This course explores the foundations of political and social attitudes and the methodology used to observe what people think about politics.

AMST 30436. State of American States

(3-0-3)

This course provides a critical and comprehensive examination of politics in the states of the U.S., and does so by analyzing topics from several theoretical perspectives. States are major policymakers concerning such central public policies as education, welfare, and criminal justice, among a host of others. There is tremendous variation, yet at the same time there are similarities between and among the 50 states in their political processes and governmental institutions as well as in their public policy concerns and outcomes. The focus of the course is on understanding why the states vary as they do and the consequences of that variation for such core American values as democracy and equality, and how states have different conceptualizations, or different visions or versions, of those core values.

AMST 30437. Church and State in American Constitutional Law and Politics

(3-0-3)

This course analyzes different approaches to understanding the separation of church and state, and examines how these approaches have played out in political practice and Supreme Court decisions.

AMST 30438. Environmental Politics

(3-0-3)

The first half of the course provides an overview of major American environmental policies such as regulating land use and preservation, water, air, and endangered species. The second half of the course deals more directly with issues of policy formulation, implementation and enforcement.

AMST 30440. Intelligence and National Security Decision-Making

(3-0-3)

The purpose of this class is to introduce students to the role of intelligence (collection, analysis, and covert action) in U.S. national security decision-making. The course will begin with a discussion of the evolution of U.S. national security decision-making apparatus and the intelligence community. It will then explore major issues of intelligence in U.S. history since the Second World War. Finally, it will conclude with a discussion of some of the future intelligence challenges the United States is likely to face in coming years.

AMST 30441. African American Politics: The End or a New Beginning?

(3-0-3) Pinderhughes

This course explores the core elements associated with black politics in the U.S.: the role of black institutions such as the black church, the importance of the civil rights movement in challenging barriers to black political participation, the mid 20th century legal framework created to open access to the political system, and the development of black political participation in northern cities. Competition for leadership roles and public resources from the increasing numbers of Latinos, Asians and other immigrants will also be addressed. Since the course will be taught in spring 2010 at the beginning of the second year of the Obama administration, we will also have the chance to explore the impact of the first black president on national politics, and to consider the impact of the president and his administration on African American politics itself. The course incorporates political science concepts, but the readings and other materials are accessible to students from a variety of disciplines and levels of knowledge.

AMST 30442. Original Intent and Freedom of Religion

(3-0-3)

This course is designed to help students understand the original intent behind the meaning of the First Amendment's two religion clauses: the establishment clause and the free exercise clause. It also explores the role that the intent of the founders plays in interpreting freedom of religion cases today.

AMST 30443. Domestic Sources of U.S. Foreign Policy

(3-0-3)

This course provides students with the analytical tools to understand and critically analyze the impact of domestic actors within the U.S. foreign policy decision-making process. This course examines the roles of the president, Congress, the bureaucracy, public opinion, interest groups, the media and other sources of influence on the foreign policy-making process and its outcomes. Particular emphasis is given to the study of domestic foreign policy actors through the use of case studies as a qualitative tool of political science research. This course is designed to give the student a sense of real-world involvement in American foreign policy making by means of various exercises involving active student participation, especially case memos, simulations, and case discussions. Students will be required to integrate the conceptual and theoretical material presented in class discussions and readings with the case studies presented. In addition to improving students' understanding of how domestic actors impact foreign policy choices, this course is also designed to enhance analytical thinking and problem-solving skills. Short research assignments, especially preparation for case memos, will increase students' information literacy or research skills. Because all students will be expected to participate in class discussions and debates, the course should also improve communication skills.

AMST 30446. Public Policy and Administration in the United States

(3-0-3) Arnold

This course examines political and economic origins of, and consumer consequences of, four main areas: the farm bill and commodity programs, the regulation of ag biotechnology, food safety, and global trade in foodstuffs. This is a discussion-centered course with a significant portion of the grade coming from a group project presentation.

AMST 30447. Food and Agriculture Policy

(3-0-3) Doppke

This course examines political and economic origins of, and consumer consequences of, four main areas: the farm bill and commodity programs, the regulation of ag biotechnology, food safety, and global trade in foodstuffs. This is a discussion-centered course with a significant portion of the grade coming from a group project presentation.

AMST 30448. Reinventing Government

(3-0-3) Mueller

Since World War II, many presidential candidates have campaigned on promises to make government more efficient, delivering services to individuals more cheaply, faster, and with fewer errors. We will explore the attempts made to re-invent the federal bureaucracy since the advent of the spoils system with Andrew Jackson's presidential victory in 1828. We will examine the regulatory challenges presented to the federal government by the Industrial Revolution and how the federal government responded. Finally, we will examine critically the presidential initiatives of the last quarter century to improve the national bureaucracy. This class will provide the student with the tools to understand the challenges of public administration, measure the effectiveness of various improvement initiatives, and diagnose potential maladies within the current system.

AMST 30449. Party Polarization in American Politics

(3-0-3) Baker

This course examines questions concerning party polarization in American politics. Is party polarization increasing? Does the concept of "culture wars" explain party polarization? What are the causes of party polarization in government and the electorate?

AMST 30450. Latinos and the City

(3-0-3) Duarte

This course is a critical examination of urban life and how it affects and is affected by Latinos. We will explore the salient features of social structure, experience and transformation in the American metropolis as it relates to the past and growing Latino population. This class will be geared toward viewing the city as simultaneously a social, cultural, and political economic phenomenon, with particular attention to the following concerns: a) the city as a locus of ethnic, racial, gender and class relations, interactions and conflicts; b) The growing urban population in Latin American and its effects on Latino immigration to the U.S.; and c) how Latinos have been affected by strategies of urban "revitalization" and the future of the "postmodern" city in the major metropolitan areas of the United States (i.e., Los Angeles, New York, Chicago and Miami).

AMST 30451. American Public Opinion and Voting Behavior

(3-0-3) Layman

A central tenet of democracy is that citizens exert some degree of control over the actions of government, a requirement that places responsibilities on both government office holders and citizens. In this course, we will focus on whether American citizens live up to their end of the democratic bargain both in the depth and breadth of their political opinions and in the quantity and quality of their participation in American elections. We will assess the degree to which citizens hold real opinions on political issues and how those opinions are formed, the extent to which they turn out to vote in elections and the factors determining voter turnout, the nature of voting behavior in various types of elections, the characteristics of the parties' electoral coalitions, and long-term changes in those coalitions.

AMST 30452. Constitutional Rights

(3-0-3) Munoz

This course will consist of an examination of how our rights are defined, protected, and limited by the judiciary under the Bill of Rights and Fourteenth Amendment of the Constitution. Our primary method of study will be to read, analyze, and debate landmark Supreme Court opinions.

AMST 30500. Race and Ethnicity

(3-0-3)

This course focuses on race and ethnic relations in the United States. Current cases involving racial and ethnic issues will be presented and discussed in class. Readings and materials will present three approaches to the study of majority-minority group relations; the emergence and maintenance of group dominance; and minority-group adaptations to modes of dominance, including separation, accommodation, acculturation, and assimilation. Class participation and students' experiences will be emphasized.

AMST 30507. Religion and Social Life

(3-0-3) Christiano

How does social life influence religion? How does religion influence society? What is religion's social significance in a complex society like ours? Is religion's significance declining? This course will consider these and other questions by exploring the great variety in social expressions of religion. The course examines the social bases of churches, sects, and cults, and it focuses on contemporary religion in the United States.

AMST 30509. Race and Ethnicity

(3-0-3)

This course has three objectives. First, the course will help you to think critically about issues related to race and ethnicity in American society. These issues include the meaning of race and ethnicity; the extent of racial and ethnic inequality in the U.S., the nature of racism, discrimination, and racial stereotyping; the pros and cons of affirmative action; the development of racial identity; differences between assimilation, amalgamation, and multiculturalism; and social and individual change with respect to race relations. The second objective is to foster a dialogue between you and other students about racist and ethnocentric attitudes and actions. The third objective is to encourage you to explore your own racial and ethnic identity and to understand how this identity reflects and shapes your life experiences.

AMST 30510. Polish Americans

(3-0-3)

A study of the cultural and racial pluralism of American society through the focus of the Polish-American experience; a review of the social and historical background, the immigration experience, and adaptation to the American experiment in terms of family, religion, education, work, and government.

AMST 30514. Popular Culture

(3-0-3)

The first half of the course will introduce a variety of theoretical perspectives, presented as a historical overview of popular cultural studies, both in the United States and Britain. The theories to be considered include: mass culture theory, Marxism, the Frankfurt Schools (Critical Theory), Structuralism, Semiotics, Feminism, and Post-Modernism. During this first half of the course, students will be required to write a paper in which they analyze an aspect of popular culture utilizing one or more of the theoretical perspectives. The second half of the course is devoted to a historical analysis, using the perspectives already addressed, of the social impact and meaning systems of rock 'n' roll music. The exegesis will begin with a study of African music, using recordings of chants and celebratory music, and will explore the music of American slaves, chain gangs, and spirituals, toward the goal of identifying elements exhibited by those genres that eventually evolved into rock 'n' roll. Students will be required to write a research paper on some aspect, personality, group, or historical development of rock 'n' roll. This course is not recommended for students who have taken SOC 451, as the content will overlap.

AMST 30606. Prehistory of the American Southwest

(3-0-3) Glowacki

This course introduces students to the diversity of cultures living in the American Southwest from the earliest Paleoindians (11,500 years ago) to European contact, the establishment of Spanish missions, and the Pueblo Revolt of 1680–1692. Most

of the course is devoted to learning about the complex cultural developments in the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Phoenix Basin. Class work and discussions will focus on important issues such as the adoption of agriculture, the development of villages, the transformation of ideological beliefs and political organization, the importance of migration, and the impact of warfare using information on environmental relationships, technology, and other aspects of material culture. Students will also learn about descendant populations living in the Southwest today including the Pueblo peoples (e.g., Hopi, Santa Clara, Acoma) and Tohono O'odham.

AMST 30607. Native Peoples of North America

(3-0-3)

Tremendous variation exists between the cultures of the peoples of North America, both in the past and today. This course will offer an opportunity to glimpse at this variation, which occurs in technology, social organization, economic, political, and religious systems, and in the arts. A brief introduction of the archaeological and linguistic evidence will provide information on the debate as to when and by what means people entered America and spread throughout its vast area. The course will then move on to consider the many different cultural adaptations to the various environments of North America. The comparative approach will be used to discuss the similarities and differences between specific cultures. The readings will focus upon particular groups (i.e., Eskimo, Cahuilla, Dakota, Navajo, etc.). The course will also be concerned with the cultural changes that occurred within Native American cultures during the colonial and expansion periods of Euro-American cultures. The course will end with consideration of the current issues significant to Native American cultures. Lectures, films, discussions of readings, and research will allow students a range of learning experiences. Both exams and short papers, as well as a research paper provide students with an opportunity to demonstrate their understanding of the basic information and issues.

AMST 30609. Caribbean Migrations

(3-0-3) Johnson-Roullier

What is the meaning of identity in a transnational space straddling the United States and the Caribbean? Migration, settlement and return are central to the historical experiences and the literary and aesthetic expressions of Caribbean societies. This course combines literary and anthropological perspectives to the study of novels and historical and anthropological texts in which themes of migration, immigration and transnationalism play central roles.

AMST 30612. Mestizo Stories

(2-0-2)

Mestisaje (racial-cultural blending) is a foundational paradigm for understanding Latino history, culture and politics. The course *Mestizo Stories* provides students a wide-ranging, inter-discipline introduction to the subject of *mestisaje*. Jose Vasconcelor's influential book *La Raza C6smica* (*The Cosmic Races*) will be the conceptual anchor for analysis and interpretation. The book will be augmented by films, videos, recordings and assigned readings exploring three core areas of concerns: 1) The historical origins of *mestizo/a* identity and cultural production; 2) The experience and narratives of *mestisaje* in the United States; and 3) The global implications of *mestisaje* as a transcendent social and cultural manifestation. Students are expected to be critical readers of the assigned texts, which will be primarily in English though some will be in Spanish or bi-lingual. Active participation in class discussions is also essential. Students are also expected to present a PowerPoint presentation on a selected aspect of *mestisaje* from a wide range of humanities and social science topics to be investigated. The oral-visual presentation will become the basis for a written research paper. *Mestizo Stories* will explore visual, musical, literary and performative texts of human agency, resistance and survival.

AMST 30617. Black Arts: Figuring the African Diaspora

(3-0-3)

This course offers a survey of black diasporic artistry. At the same time, it is an ongoing analysis of how these artists asked what constitutes the African diaspora, in divergent and convergent ways. The main goal of the course is to not simply

label certain artists as part of this diasporic formation, but to understand how artists reflected upon their participation in it (and, in some ways, outside of it). We will focus primarily on this conversation's development from the interwar period of the twentieth-century to the turn of the twenty-first century through poetry, prose fiction and nonfiction, film, television, and dance. From the United States, we will look at how creative intellectuals like the poet Langston Hughes, dancer and anthropologist Katherine Dunham, novelist and anthropologist Zora Neale Hurston, fiction writer and essayist Richard Wright, and journalist Alex Haley used art to understand their relationship to black peoples in the Caribbean, Europe, and Africa, along with key events impacting those different geographies. But the course will also consider how black creative intellectuals outside the United States reflected on their relationship to the diaspora. These will include Algerian philosopher Frantz Fanon, Cuban poet Nicolás Guillén, Nigerian musician Fela Kuti, and Pulitzer-Prize winning poet Derek Walcott. In exploring different conceptions of diaspora, we will encounter other themes including the idea of overlapping diasporas, black nationalism, the body, and the significance of translation to cultural solidarity and difference.

AMST 30618. Black Arts and the Diaspora

(3-0-3) Ford

This course offers a survey of black diasporic artistry. At the same time, it is an ongoing analysis of how these artists asked what constitutes the African diaspora, in divergent and convergent ways. The main goal of the course is to not simply label certain artists as part of this diasporic formation, but to understand how artists reflected upon their participation in it (and, in some ways, outside of it). We will focus primarily on this conversation's development from the interwar period of the twentieth-century to the turn of the twenty-first century through poetry, prose fiction and nonfiction, film, television, and dance. From the United States, we will look at how creative intellectuals like the poet Langston Hughes, dancer and anthropologist Katherine Dunham, novelist and anthropologist Zora Neale Hurston, fiction writer and essayist Richard Wright, and journalist Alex Haley used art to understand their relationship to black peoples in the Caribbean, Europe, and Africa, along with key events impacting those different geographies. But the course will also consider how black creative intellectuals outside the United States reflected on their relationship to the diaspora. These will include Algerian philosopher Frantz Fanon, Cuban poet Nicolás Guillén, Nigerian musician Fela Kuti, and Pulitzer-Prize winning poet Derek Walcott. In exploring different conceptions of diaspora, we will encounter other themes including the idea of overlapping diasporas, black nationalism, the body, and the significance of translation to cultural solidarity and difference.

AMST 30619. Slavery & Human Bondage

(3-0-3)

For many Americans, the history of slavery is synonymous with plantations in the Atlantic world. This course seeks to expand our view of Atlantic slavery by looking to the Ancient World, Africa, Asia and Europe in historic and contemporary contexts. This course examines slavery as a labor system and a social form intimately connected with the political economies and cultural groups within which it arose. It will also examine debates about contemporary forms of bonded labor and slavery emerging from global encounters today. By examining different types of bonded and unfree labor, such as chattel, domestic, and wage slavery, we will form an inquiry about slavery's relationship to the following: person-hood and social death, the emergence of market economies, systems of differentiation used to maintain the social condition of the enslaved, and power and violence. This course will take an interdisciplinary approach relying on archaeology, anthropology and history for our case studies in understanding this particular social form.

AMST 30620. Anthropology of Globalization

(3-0-3)

This course analyzes contemporary patterns of globalization drawing on recent ethnographies. We will briefly overview the historical antecedents of globalization, and then proceed to analyze globalization's cultural, socio-political, and economic complexity, often resulting in urbanization. In particular, we will tackle the global circulation of food, entertainment, fashion, capital, ideologies, violence, religious

practice, migrant/trafficked labor, and even of so-called "anti-globalization" movements. Examples of specific topics include youth and free trade in Latin America; cyber-politics among transnational Chinese, Eritreans, and others; McDonald's and consumerism in Moscow; and Indian cinema and global media. By locating global processes in everyday practice, we will come to understand the interconnectivity sustaining globalization, and the resulting practices of resistance. More broadly, we will appreciate on the one hand how various cultures and societies become increasingly interconnected, and on the other how people around the world appropriate large-scale processes in culturally specific ways. The course emphasizes anthropology's role as a discipline that is globally relevant and publicly engaged. Accordingly, we will focus on the discipline's methodological and theoretical contributions in the study of globalization and its inequalities, and toward a more socially just world. The course will also equip you to design and implement an original research project, and to write an ethnographic account based on such project.

AMST 30621. Prehistory of Western North America

(3-0-3) Mack

This course deals with archaeological data and cultural life of prehistoric western North Americans over the last 20,000 years, until contact with European cultures. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated and diverse cultures of the Native Americans. The course will focus on material culture, environmental relationships, and technology to explore cultural change, land-use patterns, economics, and political complexity. In addition, some understanding of the methods by which archaeology is done by scientists in North America and an introduction to historical archaeology are included.

AMST 30701. Media and the Presidency

(3-0-3)

As the brouhaha over Howard Dean's "yell" illustrates, media have come to play a key role in the coverage of presidential elections. This course examines how print and broadcast media have functioned in U.S. elections since the way we choose a president was first established. After a brief overview of changing relationships between journalists and presidential candidates in the 19th century, we will focus on elections since the 1920s, when radio first broadcast election updates. We will analyze how candidates have used radio, television, and the Internet to construct images of themselves and their platforms, and how journalists have become an active force in representing the political process. Rather than see electronic media as neutral or objective, we will assess the narrative strategies and visual and verbal codes by which media present politics to us, the voters.

AMST 30702. The Hyphenated American

(3-0-3)

This course will engage theatrical works for, by, and about hyphenated Americans (African-Americans, Asian-Americans, etc.). Students will see live theatre, theatre on video, and interviews with dramatists and performers. Reading and understanding plays and various theoretical materials on race, culture and immigration will also be vital components of the course. The course will require a large research project based on a topic of the students' choosing.

AMST 30703. History of Television

(3-0-3) Lagerwey

Television has been widely available in the United States for only half a century, yet already it has become a key means through which we understand our culture. Our course examines this vital medium from three perspectives. First, we will look at the industrial, economic and technological forces that have shaped U.S. television since its inception. These factors help explain how U.S. television adopted the format of advertiser-supported broadcast networks and why this format is changing today. Second, we will explore television's role in American social and political life: how TV has represented cultural changes in the areas of gender, class, race and ethnicity. Third, we will discuss specific narrative and visual strategies that characterize program formats. Throughout the semester we will demonstrate

how television and U.S. culture mutually influence one another, as television both constructs our view of the world and is affected by social and cultural forces within the U.S.

AMST 30802. American Art

(3-0-3) Pyne

This course examines American painting, architecture, and sculpture from Puritan culture to the end of World War I. The approach is to examine the development of American art under the impact of social and philosophical forces in each historical era. The course explores the way in which artists and architects give expression to the tensions and sensibilities of each period. Among major themes of the course are the problem of America's self-definition, the impact of religious and scientific thought on American culture, Americans' changing attitudes toward European art, and the American contribution to Modernism.

AMST 38182. Capital Crimes: Money, Literature, and American Culture

(3-0-3)

At a meeting in 2003, R. Allen Stanford, accused multibillion-dollar Ponzi embezzler and president of Stanford International Bank, is said to have taken a "blood-oath" with the chief regulator of his Antiguan bank. When news of this oath broke in the fall of 2009 Stanford joined Bernard Madoff in the league of the most undignified "gentlemen" in American culture. Like Madoff, Stanford had committed a "capital crime" which robbed many and riveted the nation's attention. Like Stanford and many another "capital" criminals (Al Capone comes to mind), until his arrest Madoff enjoyed the welcome of society's elite and was generally regarded as a celebrity. "Capital Crimes" is thus about American culture's love affair with money. The course begins with Mark Twain's blistering satire *The Gilded Age* and moves through the current economic crises, which some critics like Paul Krugman and Kevin Phillips have referred to as coming at the tail end of America's second Gilded Age. Twain's satire was aptly called "A Tale of Today." In looking over the time between the two Gilded Ages, this course will try to construct a coherent account of the uneasy relationship between the period's major literary figures and its political and mercantile elite. We'll see if and how writers and artists who set themselves up as the voices of culture often share much in common with political and business leaders—both a Ponzi scheme and a political campaign are after all "fictions in progress" which require an audience and a fairly complete willing suspension of disbelief. In looking over material drawn from literature, film, television, news media, politics, and academia we'll try to measure the personal and cultural benefits and consequences associated with American culture's embrace of money, its hagiographic celebration of the CEO, its adoration of celebrity culture, and its elevation of the market as an idol.

AMST 40100. Writing Non-Fiction

(5-0-3)

The techniques of nonfiction writing from the basic journalistic news story to the magazine feature to the personal essay. Students will complete a wide range of assignments and also discuss examples of various kinds of nonfiction prose.

AMST 40200. African-American Literature

(3-0-3)

A historical and thematic account of the rise and achievement of African-American authors over several centuries.

AMST 40201. American War Literature

(3-0-3)

American War Literature is multifaceted, highly charged with personal agonies and national interrogations. Viewed as a broad field, these texts offer opportunities for diverse research into national ideology, the views and interpretations of the enemy, the accounts of interior conflicts, and the historical moments that shape these tales. How should we read works that contemplate collective and individual violence? What kinds of analysis and historical recovery bring us to points of understanding and meaning? Our panoramic explorations will include the canonically familiar such as Mary Rowlandson's captivity narrative, the Civil War poetry of Whitman and Melville, and *The Red Badge Of Courage* by Stephen Crane; the

more recent such as Kurt Vonnegut's *Slaughterhouse-Five*, and Tim O'Brien's *The Things They Carried*; and the ongoing such as writings from the wars in Iraq. Our texts will serve as entry points for aesthetic, historical, and theoretical studies aimed at illuminating the functions and values of war writing in the United States. This course will require several short papers, a long final essay, and active student participation.

AMST 40203. African-American Poetry and Poetics

(3-0-3)

An examination of poetry and poetics by black Americans from the beginnings to the present. Formal attention concerning the aesthetics of poetry is considered within their historical and intellectual contexts. Poets include Phillis Wheatley, Paul Laurence Dunbar, Claude McKay, Langston Hughes, Robert Hayden, Gwendolyn Brooks, LeRoi Jones, Audre Lorde, Michael Harper, Yusef Komunyakaa, and Rita Dove.

AMST 40204. Shakespeare & Melville

(3-0-3)

Using concepts of tragedy as a linking principle, this course reads several Shakespearean plays and then *Moby Dick*, noting Shakespeare's influence on the American novelist.

AMST 40205. American Film

(3-0-3) Krier

A look at what makes a film American. The course will be structured by pairing films from the "classic" period with films from the more recent past in order to highlight essential features, particularly genre characteristics, the work of directors, and the performance of "stars." Possible films: *It Happened One Night*, *French Kiss*, *The Lady Eve*, *Double Indemnity*, *Body Heat*, *Basic Instinct*, *Zero Effect*, *Shane*, *Unforgiven*, *The Man Who Shot Liberty Valance*, *Die Hard*, *The Godfather*, *Bound*, *Silence of the Lambs*, *Crimes and Misdemeanors*, *Don Juan de Marco*, *Moulin Rouge*, *Crash*, *The Hours*, *The Maltese Falcon* and others.

AMST 40206. Constituting Americans

(3-0-3)

This course will explore life writings and issues of self-representation in the African-American expressive cultural tradition from 1850 to 1905. This course is concerned with the concept of citizenship, its implied universalism, and the necessity of critiquing this universalism that maintains a unified notion of democracy.

AMST 40207. The City in American Literature

(3-0-3)

An exploration of the connections between literary representations of the city and social identity in a variety of American literary texts from the 1890s to the present.

AMST 40208. Mark Twain

(3-0-3) Werge

A study of Twain's life and writings in light of the history of ideas and the literary, political, philosophical, and religious currents of 19th-century American culture. We will also consider such figures as Harte, Stowe, Douglass, and Lincoln, who illuminate Twain's style and social and moral preoccupations as well as compelling questions centering on the nature of an American identity. Special concerns: Twain's place in the tensions between conventional literary forms and the emerging American vernacular; his vision and critique of American democracy, slavery, "exceptionalism," and later geopolitical expansionism; his medievalism, including *Joan of Arc*, and larger interpretations of history; his treatment of women, individualism, and the family; and the later Gnosticism of #44, *The Mysterious Stranger*. We will also address the current (and perennial) discussions of unity and pluralism in American culture, as in Garry Wills's delineation of an underlying American identity in *Under God* and Arthur Schlesinger Jr.'s fear of "balkanization" in *The Disuniting of America*. Readings: selected shorter works, including *Diary of Adam and Eve*; *Innocents Abroad*; *Life on the Mississippi*; *Tom Sawyer*; *Huckleberry Finn*; *A Connecticut Yankee*; *Pudd'nhead Wilson*; #44, *The Mysterious Stranger*; and selections from the *Autobiography*.

AMST 40217. Literature and Democracy in the 19th-Century United States

(3-0-3)

A survey of 19th Century American literature, emphasizing the efforts of American writers to identify and define “democracy” and the “democratic citizen.”

AMST 40220. Poetry and Painting in Manhattan 1950–1965

(3-0-3)

This course approaches the poetry and painting of Manhattan during its rise to international pre-eminence as an artistic center through the work and friendships of Frank O’Hara (1926–1966), poet and curator at the Museum of Modern Art. It introduces the New York School of poetry, referring to visual art from de Kooning to Warhol and with side-glances at film, photography, music and dance. The course will develop primarily through reading poems, although students will be directed to the critical and historical context. Readings will draw on *The Collected Poems of Frank O’Hara* (ed. Donald Allen); John Ashbery, *The Mooring of Starting Out*; Ted Berrigan, *The Sonnets*; and a course pack. Course requirements are written analyses of poems (every two weeks), a final exam, and a 5–7 page paper.

AMST 40221. Great American Novels

(3-0-3)

Close readings of selected classic American novels.

AMST 40222. Class, Labor, and Narrative

(3-0-3) Sayers

An exploration of short stories and novels depicting the “working stiff” in the U.S. from 1920 to the present. Our reading list will include many of the usual suspects (James Farrell, John Steinbeck, Richard Wright, Nora Zeale Hurston, William Saroyan, Langston Hughes, Grace Paley, Tillie Olsen, and Raymond Carver); writers not usually associated with labor (Jean Toomer, Gertrude Stein, and Donald Barthelme); and contemporary writers (Sherman Alexie, Sandra Cisneros, Aleksandar Hemon, Edwidge Danticat, Juno Díaz, Gish Jen, and George Saunders). We’ll question the representation of labor, laborers, and class differences, and we’ll also pose aesthetic questions: What narrative forms most provocatively explore particular kinds of work? What work do experimental texts perform that more conventional narratives cannot (and vice versa)? Many of the theorists we’ll rely on for insights about workers, class, and writing (Tillie Olsen, James Agee, and Barbara Ehrenreich) make good use of narrative themselves, and will help us contemplate how writing about labor can also reflect the labor of writing. Short response papers, group presentation, midterm, and a final project.

AMST 40223. American War Literature

(3-0-3)

Beginning with Mary Rowlandson’s captivity narrative and ending with Tim O’Brien’s *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

AMST 40224. Tragedy: Shakespeare and Melville

(3-0-3) Staud

Using concepts of tragedy as a linking principle, this course reads several Shakespearean plays and then *Moby-Dick*, noting Shakespeare’s influence on the American novelist.

AMST 40225. Our America: Exploring the Hyphen in African-American Literature

(3-0-3)

Close readings of various 20th-century African-American literatures, with foci on how black subjectivity is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

AMST 40226. Strains in 20th Century American Fiction

(3-0-3)

Beginning with F. Scott Fitzgerald’s *Jazz Age* and ending with Toni Morrison’s *Jazz*, a study of thematic commonalities and dissonances in selected 20th Century American novels.

AMST 40227. Latino/a Poetry

(3-0-3)

A study of prominent contemporary Latino/a poets whose work has enriched and diversified the canon of American poetry in the last 20 years.

AMST 40228. American Literature and Visual Culture

(3-0-3)

From early national fiction and portraiture to American modernist poetry and painting, an exploration of the relationships between American literature and the visual arts.

AMST 40229. African-American Poetry

(3-0-3)

Close readings of selected contemporary African-American poets.

AMST 40230. Grand Collage: California Poetry, Arts and Culture at Mid-Century

(3-0-3)

An exploration of the ways that poetry took a leading role among the arts in California, creating a California culture that through the Beats and the Hippies became a national and international phenomenon.

AMST 40231. American Novel

(3-0-3)

A survey of selected 19th and 20th Century American novels.

AMST 40232. Early American Literature

(3-0-3)

Close readings of selected 17th and 18th American literature.

AMST 40233. Our America: African-American Literature

(3-0-3)

Close readings of selected classic American novels.

AMST 40237. Literature across the Americas

(3-0-3)

National borders mark our Americas today, but for the first European explorers the landscapes of their “new world” were uncharted and unbounded. The newly encountered land seemed to invite utopian dreams even as it became the arena for genocidal violence. It also invited the act of writing as one mode of inscribing narratives of order and cultural continuity, texts that today retain their power to convey scenes of intense emotional and existential crisis. To reconsider these moments of violence and possibility, we will approach early American literature intra-hemispherically, primarily in English and English translation, although bilingual students participating in the Language Across the Curriculum Program will read selected texts in Spanish. We will read comparatively in order to ask trans-American questions. For example, what do we learn when we juxtapose Cortés’ invasion of the Mexican empire to King Philip’s war in the New England colonies? What comparisons arise between the poetry of Anne Bradstreet and Sor Juana Inés de La Cruz; between the captivity adventures of Cabeza de Vaca and Mary Rowlandson? How have native nations across the Americas written or spoken the loss of worlds? How have revolutionaries imagined new ones in Latin America and in the United States? At what point do separate histories and literatures reveal commonality and when and how do they point to distinctions? Perhaps most crucially, how might such cross-cultural readings intimate a new dissolution, or re-alignment, of national boundaries in the American hemisphere? The authors and subjects noted above will serve as key markers, but we will also read primary works by William Bradford, Gaspar Pérez de Villagrà, El Inca Garcilaso de la Vega, Sarah Kemble Knight, William Apress, and others as we reconsider the

literatures and histories of the Americas in a cross-national paradigm. Students will be expected to write three short papers, take a mid-term and final exam, and develop a group project.

AMST 40238. Class, Labor, and Narrative

(3-0-3)

This course explores the works of selected American writers addressing class and labor.

AMST 40239. American Novel

(3-0-3)

A survey of selected 19th and 20th century American novels.

AMST 40241. Latino/a Literature and Visual Culture

(3-0-3)

In this course, students will study traditional, folkloric, biographic, and religious texts alongside contemporary Latino/a visual and literary texts that offer new versions of old tales. In thinking about how texts exist in relation to other texts, students will consider the “newness” and “Latino/a-ness” of Latino/a literature as well as its emergence amidst the social, cultural, artistic, and political shifts in the latter half of the twentieth century.

AMST 40243. 20th Century American Novel

(3-0-3)

This course is a close analysis of 20th century American novels.

AMST 40244. Our America: African-American Literature

(3-0-3)

Close readings of various 20th century African-American literatures, with foci on how black subjectivity is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

AMST 40245. African American Poetry and Poetics

(3-0-3)

An examination of poetry and poetics by black Americans from the beginnings to the present.

AMST 40249. American Literature in the World

(3-0-3)

In this course we will consider the place of American literature in global society. Our readings will span from the puritans through the present, and we will focus our interpretations around the theme of conversation.

AMST 40250. Literatures of Immigration

(3-0-3)

Close reading of recent literature that explores the immigration between Mexico, Latin America, and the United States.

AMST 40251. American Women Writers

(3-0-3)

A survey of American women writers from Chopin to the present.

AMST 40252. New African-American Poetry

(3-0-3)

This course is designed as an exploration and showcase of African American poetry and poetics, as seen through the poetry and essays of the post-civil rights/ black arts movement generation of poets. Although this course will also examine the historical elements of the African-American voice, the main focus of our reading and discussions will concentrate on the different and various facets of present day African-American poetry. While some of the writers we encounter during the semester may be known to many—Elizabeth Alexander, Terrance Hayes, Harryette Mullen—many more will prove to be poets with only first or second books under their belts. Through their pages, we will attempt to trace the path their poetry

leads: What is their sense of voice? What obligations (if any) do they feel with the writing that’s come before them? What new territories do they claim? It is hoped that the student will come away with a deeper understanding of what elements and issues define the 21st African American poetic voice.

AMST 40253. American Culture as Collage

(3-0-3) Fredman

One of the exciting aspects of American culture is that we make it up as we go along: there is no historical or traditional or divine template that we all agree to follow. Without a template, American artists and thinkers have often resorted to a “kitchen-sink” approach to representing American culture, which begs the question of how to create a form to contain all the marvelous odds and ends. We will trace this urge to capture American culture through the form of a collage in R. W. Emerson’s essays, H. D. Thoreau’s *Walden*, T.S. Eliot’s *The Waste Land*, Gertrude Stein’s *Tender Buttons*, Ezra Pound’s *Cantos*, Harry Smith’s *Anthology of American Folk Music*, Charles Reznikoff’s *Testimony*, Langston Hughes’ *Montage of a Dream Deferred*, Assemblage art of the fifties and sixties, Charles Olson’s *Maximus Poems*, and *A New Literary History of America*.

AMST 40302. United States 1900–1945

(3-0-3)

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. The principal topics to be investigated will be the Progressive Period legislation of Presidents Theodore Roosevelt, William Taft, and Woodrow Wilson, the causes and effects of World War I, the cultural developments of the 1920s, the causes of the Wall Street crash and Great Depression, the New Deal legislation of President Franklin Roosevelt, the diplomacy of the interwar period, and the home front during World War II.

AMST 40303. Women in the U.S. South

(3-0-3)

This course introduces students to the historical study of women in the United States south. It will cover topics such as women in slavery, the transition freedom, race relations, and social movements. Through student-centered discussions, presentations, and a variety of different writing assignments, students will analyze how race, class, and gender structured the experiences of women in southern society. At the end of the semester students will be prepared to pursue more advanced research in the field of women’s history. All are welcome.

AMST 40307. Sex, Sexuality, and Gender in the United States to 1890

(3-0-3)

Corequisite: HIST 32706

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions’ attitudes toward sexuality (the Puritans were not anti-sex!), how different cultures’ views of sex shaped relations between colonists and Indians, why sex was an important factor in establishing laws about slavery in Virginia, birth control and abortion practices, changing patterns of courtship, men who loved men and women who loved women, and why the average number of children in American families fell by 50 percent between 1790 and 1890.

AMST 40323. American Indian History

(3-0-3)

This course examines the complicated history of American Indian relations with the British North American colonies and the United States. Beginning with a brief survey of American Indian cultures, we will focus on relations along the moving frontier between the two peoples. Topics include mutual adaptation and exchange, invasion and resistance, environment and economics, and racism and ethnic identity. Covering almost half a millennium, the course will give roughly equal time

to the four centuries that followed the first serious attempt at British colonization (1585). Almost two-thirds of the course will, therefore, deal with peoples east of the Mississippi River in the years before 1838.

AMST 40324. U.S. and the Vietnam War

(3-0-3)

This course examines the participation of the United States in its “longest war”—the conflict in Vietnam. The course is taught primarily from an American as opposed to a Vietnamese perspective. Broad topics to be covered include Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–1975: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture *and* a discussion course—attendance at *both* is required. Approximately six books will be assigned.

AMST 40326. African-American Resistance

(3-0-3) Pierce

An exploration of a series of cases of African-American resistance throughout U.S. history.

AMST 40327. Crime, Heredity, and Insanity in American History

(3-0-3)

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

AMST 40328. The History of Sport and the Cold War

(3-0-3) Soares

This course will explore the ways that sport reflected the political, ideological, social, economic and military struggle known as the Cold War. Sport permitted opportunities to defeat hated rivals or to develop competition more peacefully. It reflected the internal politics and societies in nations, and also illuminated relations among allies. Using a variety of readings, media accounts and film clips, this course will look at a number of crucial teams, athletes and events from the Cold War, including the 1980 U.S. Olympic hockey team, the controversial 1972 Olympic basketball final, “ping pong diplomacy,” Olympic boycotts, Martina Navratilova and other Eastern European tennis stars, East German figure skater Katarina Witt, Romanian gymnast Nadia Comaneci, the ferocious Soviet-Czechoslovakian hockey rivalry following the Soviet invasion of 1968, and more.

AMST 40400. Constitutional Law

(3-0-3)

This course examines the main principles of American constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the court’s opinions. A background in American national government is desirable.

AMST 40412. Schools and Democracy

(3-0-3)

Education sits high on the public policy agenda. We are living in an era of innovations in education policy, with heated discussion surrounding issues such

as vouchers, charter schools, and the No Child Left Behind Act. This course introduces students to the arguments for and against these and other educational innovations, and does so through the lens of how schools affect the civic health of the nation. Often forgotten amidst debates over school choice and standardized testing is the fact that America’s schools have a civic mandate to teach young people how to be engaged citizens. Students in this course will grapple with the civic implications of America’s educational landscape, and have an opportunity to propose ways to improve the civic education provided to young people.

AMST 40413. Race and the Constitution

(3-0-3)

This course will cover the decisions of the Supreme Court in the area of race relations, from the 19th-century problem of fugitive slaves to current problems involving school desegregation, affirmative action and private acts of race discrimination. Class will focus not only on court cases but also on the broader constitutional and philosophical implications.

AMST 40414. Diplomacy of American Foreign Policy

(3-0-3)

The United States emerged from World War II in a new peacetime role as a superpower. We had to discover for ourselves how to combine diplomacy and military power in a manner consistent with our democratic principles. While the policy choices were stark in the days of the Cold War, they have become more complex in recent years. Presented by a career diplomat who headed U.S. overseas missions in four countries, the course emphasizes case studies and the practical problems that have confronted U.S. leaders from the end of World War II to the present. The issues treated will illustrate the height of tensions in the Cold War, the emergence of detente and deterrence, and the challenges of the global agenda after the end of the Cold War. The course aims to help the student understand current foreign policy issues, which will be discussed briefly in class. A research paper (10 pages), a midterm exam, and a final exam are required.

AMST 40416. Constitutional Interpretation

(3-0-3) Barber

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

AMST 40418. Development of American Political Institution

(3-0-3)

The U.S. Constitution has remained essentially intact since 1787, yet contemporary political institutions and practices would hardly be recognizable to a citizen of the 19th century. Thus, the history of our political institutions is one of change and reform, as well as stability and persistence. This course will focus on the development of the U.S. political system from the late 18th to the early 20th century. Of particular interest will be the evolution of the legislative, executive, and electoral institutions.

AMST 40419. Civil Liberties

(3-0-3) Barber

Most courses in constitutional law narrate the Supreme Court’s evolving positions on constitutional rights and institutions. This course starts not with the Supreme Court but with the *Federalist Papers*, from which it develops a general theory of the social and economic goals or ends of constitutional government in America. It then uses this theory as a framework for assessing the Supreme Court’s position on property rights, race relations, personal privacy, and the place of religion in American life. This exercise can yield results that make for lively class discussion, not only about the Court, but also about the adequacy of the Constitution itself. Grades will be based on a midterm and a final exam, with a paper option in lieu of the final.

AMST 40420. Black Politics in Multiracial America

(3-0-3)

This course undertakes a broad examination of black politics in multiracial America. Racial issues have provoked crises in American politics; changes in racial status have prompted American political institutions to operate in distinctive ways. The course examines the interface of black politics with and within the American political system. How successful have blacks been as they attempted to penetrate the electoral system in the post civil rights era. What conflicts and controversies have arisen as African Americans have sought to integrate the American system of power. Now that the laws have been changed to permit limited integration, should African Americans integrate politically, that is should they attempt to deracialize their political appeals and strategy, with an effort to crossover politically; are some approaches such as those of President Barack Obama not “black” enough? What internal political challenges do African Americans face; some such as the increasing importance of class and socioeconomic factors, as well as gender and sexuality may reshape the definition of the black community Finally how stable will the past patterns and political organizations and institutions of African American politics be, as America and American politics becomes increasingly multiracial?

AMST 40421. American Political Parties

(3-0-3) Wolbrecht

Political parties play many vital roles in American politics. They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices—candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, how they have changed over time—have consequences for the working of the American political system.

AMST 40423. Immigration, Political Rights, and Citizenship

(3-0-3) Esguevillas Ruiz

Citizenship is a pressing question for nation-states in the era of globalization. Whereas previous research on citizenship focused narrowly on the process of legal status, new studies are illuminating the actual practice of citizenship. As individuals’ lives increasingly span national boundaries, states are debating the rights of people who claim to belong in more than one country. What are and what should be the extent of immigrants’ economic rights? What about their legal rights, political rights and cultural rights? The European Union and the United States confront similar challenges of integrating immigrants. The immigration debate that peaked in the United States with the end of the national Quota Act in 1965 surged again at the turn of the millennium, while the Parliament and the Council of the European Union in 2008 adopted the directive of “Return of Illegal Immigrants”, marking a new milestone in Europe’s internal immigration debate.

AMST 40500. Ethnicity in America

(3-0-3)

A study of the ethnic and racial formation of American society and cultural pluralism; a review of the theory and history of ethnicity, its policy implications for family, education, economics, religion, government, and international relations; and in-depth study of one ethnic group of choice.

AMST 40501. Theorizing Popular Culture

(3-0-3)

The first half of the course is designed to introduce a variety of theoretical perspectives to the students. We develop a historical overview of popular cultural theory and the several iterations it has taken, to include mass culture theory, Marxism, the Frankfurt Schools, Structuralism, Semiotics, Feminism, and Post-Modernism. During the first section of the course, students will be required to write a paper using one of the theories to analyze a popular culture phenomenon of the instructor’s choice. The second half of the semester is devoted to a historical analysis of the social impact and meaning of rock ‘n’ roll. I begin with a demonstration of

African music, using recordings of early chants and celebratory music, and then give the class some example of known slave songs, indicating the presence, as early as 1750, of elements that eventually became R & B, then rock ‘n’ roll. This course is not recommended for students who have taken SOC 34151, as the content will overlap.

AMST 40511. Aesthetics of Latino Culture

(3-0-3) Cardenas

This course will analyze the philosophy and principles underlying the social and political aspects of Latino art. We will approach this by examining a range of topics, including Chicano and Puerto Rican poster art, muralism, Latina aesthetics, and border art. The readings will enable us to survey a number of important exhibitions of Latino art and to explore new possibilities for exhibition and representation. We will examine descriptive material and critical writings concerning issues pertaining to the representation and interpretation of Latino culture and art as well as how these questions surface in a national museum context.

AMST 40513. Theorizing Popular Culture

(3-0-3)

The first third of the course will introduce a variety of theoretical perspectives, presented as a historical overview of popular culture studies, both in the United States and Britain. The theories to be considered are similar to those of SOC 34151, although somewhat more time and effort will be spent with theories associated with post-modernism. Next, students will use a specifically post-modern, deconstructive approach as they examine the meaning systems and messages present in the animated films produced by Disney since 1989, e.g., *The Little Mermaid*, *Aladdin*, *The Lion King*, *The Hunchback of Notre Dame*, and *Mulan*. Students will prepare an analytical paper in which they apply a theory from the course to another of the movies in the Disney *oeuvre*. Finally, the course will address the social history of rock ‘n’ roll, as noted above. In this section, however, we shall also explore the comparisons of meanings and values, whether in common or in conflict, of both Disney films and rock ‘n’ roll music. To complete this section, students will write a research paper in which they examine some aspect of the American rock revolution. This course is not open to students who have taken SOC 34151, as the content will overlap substantially.

AMST 40514. Ethnicity in American Society

(3-0-3)

A study of the dynamic process of formation and development of the society of the United States and its cultural, religious, and racial pluralism; a review of the history and theory of interethnic relations, and their manifestation in the basic institutions of family, education, religion, economics, and government.

AMST 40518. Materializations of America

(3-0-3)

Industrialization in the twentieth-century resulted in a megatechnic America problematically related to materialism and to earlier visions of the New World. The course will consider a variety of materializations of America.

AMST 40601. American Political Parties

(3-0-3)

Political parties play many vital roles in American politics. They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices—candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, how they have changed over time—have consequences for the working of the American political system.

AMST 40602. Native Americans Fact/Fiction

(3-0-3)

This course focuses on our images of Native Americans and how popular and scientific writing and film may have shaped these images. The course uses books and film displaying Indian stereotypes and compares them to ethnographic studies, which reveal more realistically the diversity of Native American culture.

AMST 40609. Native Americans in Fact and Fiction

(3-0-3)

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30104 or ANTH 30102 or ANTH 30103 or ANTH 30101 or ANTH 13181 or ANTH 20105

This course focuses on images of Native Americans and how these images may have been shaped by popular and scientific writing, fine art, advertisement, and film. Using an anthropological perspective, the student reads fictitious and factual accounts of Native Americans and their cultures, both past and present, allowing them to build a more accurate image of Native Americans. The course uses books and film to broaden the understanding of Indian stereotypes, and the student will compare them to ethnographic studies that use a scientific approach to Native American beliefs, life styles, and material culture. Some of the literature will be from Native American authors and the art from contemporary Native American artists. Together the readings, artworks, and films will also reveal the great diversity of both people and ideas that all too often are lumped under one category which we label “Native American.” Writing intensive course for the College of Arts and Letters.

AMST 40611. Prehistory of the American Southwest

(3-0-3)

This course introduces students to the diversity of cultures living in the American Southwest from the earliest Paleoindians (11,500 years ago) to European contact, the establishment of Spanish Missions, and the Pueblo Revolt of 1680–1692. Most of the course is devoted to learning about the complex cultural developments in the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Phoenix Basin. Class work and discussions will focus on important issues such as the adoption of agriculture, the development of villages, the transformation of ideological beliefs and political organization, the importance of migration, and the impact of warfare using information on environmental relationships, technology, and other aspects of material culture. Students will also learn about descendant populations living in the Southwest today including the Pueblo peoples (e.g., Hopi, Santa Clara, Acoma) and Tohono O’odham.

AMST 40701. Sinatra

(3-0-3) Wojcik

Corequisite: AMST 41701

This course examines the career and image of Frank Sinatra. As an entertainer who worked in numerous media—radio, the music industry, television, cinema, and live performance—Sinatra provides a lens through which to examine American 20th century media. Moreover, as an iconic figure, Sinatra enables an explanation of masculinity, American identity, ethnic identity, race, liberalism, and more. Sinatra will be paired with various other performers, especially Bing Crosby, Dean Martin, and Gene Kelly, to consider his star image comparatively. Sinatra will be situated within discourses on Italian immigration, urbanism, the Depression, prohibition and war. Students will listen to Sinatra music and radio programs, watch Sinatra films and TV shows, and read a wide range of materials—including contemporary accounts of Sinatra performances, analyses of his career and meaning, essays and articles about the star system, recording technology, film genre, acting styles, the mob, and more. Throughout, we will consider what model of American masculinity Sinatra embodies, ranging from early concerns that his female fans and lack of military service rendered him effeminate to his image as family man, and later incarnation as playboy. We will consider what Sinatra means today through an analyses of his entertainment heirs, like George Clooney; parodies, like Joe Piscopo’s; the use of his music in film soundtracks and advertising; and in performances like the Twyla Thorpe “Come Fly With Me.” This is an

undergraduate course. Graduate students who take it will have additional readings and meetings, and they will have different written assignments. All students should be able to attend the lab, which will consist of film screenings.

AMST 40801. Christian Repertoires and Worship Traditions in the U.S.A. from the Pilgrims to the Present

(3-0-3) Fassler

This course is an MA level course in Theology; undergraduates require department permission. The first half of the course is dedicated to a history of Christian music in the U.S.A., outlining the major worship traditions and the great variety of vocal, choral, and instrumental repertoires that functioned within them. Study will be of primary resources, from facsimiles of the Bay Psalm book and wall paintings on missionary churches in California to field recordings of the Georgia Sea Island Singers, and Gospel, quartet, sung sermons and testimonies found in the extraordinary collection *Good-Bye Babylon*, to anthems, sacred songs, and organ works by American composers. The second part of the course introduces various contemporary Christian repertoires and the ways in which they both extend and break with the streams of liturgical understanding studied in the first half of the course. There will be attention to the mega-churches, to contemporary monastic communities, and to the Copts and other immigrant communities newly arrived during the second half of the twentieth century. A documentary film in progress, *Where the Hudson Meets the Nile: Teaching Chant at St. Mark’s Coptic Orthodox Church*, will offer material for discussion. The ways in which sacred music in the context of worship serves as sung theology in Christian practices, and music’s role in helping congregations to understand and form their own identities will be emphasized. Students will conduct intensive studies of local communities of song, both from within and from without their own traditions, and prepare either a treatment for a short documentary film about the community studied, or a musician’s or minister/priest’s case study of how to work as a leader within that particular community. Toward the end there will be a class project on shape-note singing, its history and its contemporary revival, with study of local communities of song in Northern Indiana. We end with reflection upon the ways in which traditional repertoires are being reconsidered as many Christian groups rethink their practices taking either “preservation” or “updating” actions, or some combination of both. The textbook, Steven Marini’s, *Sacred Song in America: Religion, Music, and Public Culture* (UI Press, 2003) provides historical background for several digital resources focusing on contemporary practice, including the documentary directed by Margot Fassler, *Joyful Noise: Singing Psalms in Community* and her (with J.C. Richard) *You can’t Sing it for Them: Music Ministry at Messiah Baptist Church*, streamed audio databases such as Smithsonian Global Sound, and American Music, or the wonderful Folkstreams.net, which features many ethnographic studies of American sacred music and a variety of contemporary musicians.

AMST 41701. Sinatra Lab

(0-2-0)

Corequisite: AMST 40701

Certain films will be viewed for further discussion in class.

AMST 43100. Immigration, Ethnicity, and Race in the United States, 1840s to the Present

(3-0-3)

Examining monographs, novels, film, photography, poetry, government records, and court cases, we will explore a variety of immigrant groups and time periods, from the Irish of the mid-19th century to Jamaicans, Mexicans, and the Vietnamese today. We will focus on questions of identity—how immigrants have come to understand themselves racially and ethnically over time—and questions of power—where immigrants have been located within America’s developing racial order and what difference this has made in their everyday lives, their jobs, homes, families, and opportunities. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43102. Confronting Homelessness in American Culture and Society

(3-0-3) Giamo

The purpose of this seminar is to examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw upon insights from history, literature, documentary film and photography, and the social sciences. We will focus on the degree of permanence and change in our approach to both traditional and modern forms of the social problem. There will be an experiential component to the seminar as well. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43103. Race, Gender, and Women of Color

(3-0-3)

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the U.S. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies? The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43109. Material America: Creating, Collecting, Consuming

(3-0-3)

A seminar exploring how historians, archaeologists, art historians, folklorists, geographers, and cultural anthropologists use material culture as important evidence in interpreting the American historical and contemporary experience. Research fieldwork in area museums and historical agencies such as the Snite Museum, the Northern Indiana Center For History, National Studebaker Museum, and Copshaholm/Oliver Mansion will be part of the seminar. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43123. Jack Kerouac, the Beats, and Dylan

(3-0-3) Giamo

This seminar will re-examine Kerouac and his prose in relation to Beat subculture and the larger context of post-World War II American society. Although the work of other Beat writers, such as William S. Burroughs, Allen Ginsberg, and Gary Snyder will be considered, the primary focus will be on Kerouac. Moreover, the seminar will question the cultural codification of Kerouac as “King of the Beats” and advance the notion that he was a prose artist on a spiritual quest. Or, as Ginsberg aptly put it, an “American lonely Prose Trumpeter of drunken Buddha Sacred Heart.” The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43125. Writing and Editing

(3-0-3)

This course takes students beyond the basics of reporting the news to work on longer journalistic projects and the editing process involved in completing more extended features and pieces of analysis. Students will review assignments completed for the class and act as editors to make suggestions for improving individual efforts. Several projects will make up the principal work of the semester.

AMST 43128. Literature and the Creation of Consumer Culture in America

(3-0-3) Meissner

This course traces the social changes that accompanied America’s movement from early retailing to a full-blown consumer culture. Beginning with representations from the latter part of the nineteenth century, particularly of the development of Chicago as a mail order capital of the world, and moving into the present through an examination of television shopping networks, this course will use material from a variety of perspectives and disciplines to examine what became a wholesale transformation of American life. In attempting to trace the trajectory of change from a country often identified by its rural isolation to a country of relentless publicity, from the farm to Paris Hilton, (who returned to *The Simple Life*), we will look at a series of linkages each of which played a specific and contributory role in the cultural shift toward a fully saturated consumerism. For instance, the early mail order catalogue empires of Aaron Montgomery Ward and Richard Warren Sears depended on the capacity of the railroad and postal service to transport their goods from shopping catalogues to country kitchens, goods which went beyond kitchen utensils, clothes, ornaments and shoes to include assembly-ready homes. South Bend has several Sears and Roebuck homes, and part of our class time will be spent in looking at these houses in the context of the course themes. All of our discussion will take place against the backdrop of a larger question about the democratization of desire, about whiter American culture became more or less democratic after the introduction of the mail order catalogue. Thus the linkage between the catalogue, the home shopping network, and the notion that freedom to desire goods is a measure of democratic freedom. Of course, the possibilities for manipulation and control are also limitless. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43129. Images of Women in American Cinema

(3-0-3)

In viewing any film, we must ask ourselves what the filmmakers want us to think. To answer that question for a specific genre, we will be studying portrayals of 20th century women in film and how these images have evolved in reaction to, and as a backlash against, the modern feminist movement. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43135. Women and Work in Early America

(3-0-3)

This course will introduce students to a broad view of early American social history that foregrounds the gendered aspects of work in early America—defined loosely as the period from colonial settlement to 1820. On one level, this approach allows for the recovery of women and girls’ contributions to the formal and informal economies of pre-Industrial early America, including their work activities within the household. This perspective is especially crucial to the examination of white, Indian and African servitude and/or slavery, since gender ideologies dictated the work experiences of large race- and class-defined segments of the population. Yet cultural retention also played a part and this course will invite students to investigate the impact of derivative work practices (for example examining African women’s dominance of market activities in the New World through the lens of West African work practices). Further, while the course title emphasizes women’s experiences, the class and race implications of male work practices in early America will be similarly illuminated by a gender studies approach. Thus, an overarching purpose of the course will be to highlight the fluid and instable conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to European versus non-European, free versus enslaved, and public versus private spheres. This course fulfills the humanities requirement and the diversity requirement for second majors. The senior seminar is designed to be a capstone experience for American Studies

majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43137. The Meaning of Things

(3-0-3)

The Meaning of Things asks how objects as diverse as a ND class ring, a pair of jeans, a lava lamp or an iPod acquire meaning and value. This seminar will introduce students to a range of practices relating to consumption in American history. We will investigate the gendered aspects of production, marketing, buying and using goods as these impact not only on gender, but also on the construction of a range of identities. This will lay the foundation for students to write substantive individual research papers on a “thing” of their choice. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43139. Between Nature and Culture: the Transformation of American Culture

(3-0-3)

All her life Edith Wharton sat on the edge of change. All her life she had one foot in the past and one firmly in the present. Her vision looked ahead to America's transnational and cosmopolitan future as much as it found comforts and recognitions in the country's more provincial past. In her autobiography *A Backward Glance* (1934), Wharton suggested that the “small society into which [she] was born was ‘good’ in the most prosaic sense of the term, and its only interest, for the generality of readers, lies in the fact of its total extinction, and for the imaginative few, in the recognition of the moral treasures that went with it.” A rather ambiguous statement to be sure. Wharton's elegiac lament for the past is always conflicted, both in her fiction and in how she lived her own life—like her friend Henry James and a number of her other acquaintances—Wharton became one of those transnational, cosmopolitan, America expatriates who helped shape twentieth-century America. She sat in the midst of a broad and influential group of cultural and intellectual figures whose works addressed, contested, fomented, resisted, and embraced the sweeping social changes America underwent in the period following the conclusion of the Civil War and leading up to the onset of World War I. Topics for discussion will include the idea of cosmopolitanism; constructions of citizenship, of race, of nation; the notion of home and exile; emerging transnationalism both individual and national; and political imperialism. This is not a course on Edith Wharton, but an investigation that will use Wharton's writings as a medium through which we will examine some of those cultural changes that revolutionized modern America and changed the world. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43140. Post-9/11 American Fiction and Culture

(3-0-3)

In speaking of the after-effects of the first World War, the American novelist Henry James said: “The war has used up words; they have weakened, they have deteriorated like motor car tires; they have, like millions of other things, been more overstrained and knocked about and voided of the happy semblance during the last six months than in all the long ages before, and we are now confronted with a depreciation of all our terms, or, otherwise speaking, with a loss of expression through increase of limpness, that may well make us wonder what ghosts will be left to walk.” Writers such as Don DeLillo, Cormac McCarthy, and Phillip Roth, the authors of the 9/11 Commission Report, film makers, politicians and intellectuals have all portrayed the post-9/11 world in language similar to James's post-apocalyptic vision. This course looks at contemporary American culture and society and asks whether or not there is a definable post-9/11 narrative and aesthetic. We'll address the ways in which the world has changed since 9/11 and

how those changes have impacted daily life, local communities, the national consciousness, and global affairs. Discussion of these changes will be situated in our examination of major, post-9/11 novels, works of art, film and other media, formal governmental publication and policies, and religious writings. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43141. Oral History I: Memory & Truth

(3—3)

This is the first of a two-semester senior seminar in oral history theory and methods. By surveying the current field, students will learn how oral history is uniquely suited to both contribute to historical knowledge and challenge dominant narratives. The final project will prepare students to engage in collecting oral histories during the spring semester if they register in Oral History 2: Practicum. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43142. Death in America

(3-0-3)

This senior seminar will focus on changing understandings of death, dying, and mourning in America. Until recently, the United States was often characterized as a death-denying society, and death itself relegated to the institutional, private, setting of the hospital. Contemporary debates about abortion, euthanasia, gun control, organ transplantation, and stem cell research, as well as popular interests in “good death,” the afterlife, bereavement therapy, funeral pre-planning, and cyber memorials suggest new concepts of death and dying. Examining different visual and material cultures—including memorials, roadside shrines, cemeteries, obituaries, TV shows like *CSI*, online tributes, and death-related rituals—this seminar considers how, and why, death has been “reclaimed” in contemporary America. Field trips and guest lecturers included. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43143. American Travels

(3-0-3)

What does it mean to travel or to call oneself a traveler? This and several other deceptively simple questions will frame this senior seminar: What do we want when we travel? What is travel's significance to American cultures, places, and identities? Rather than a traditional history of American travel, this course will challenge students to explore travel's power to transform landscapes, cultures, and practices. We will consider, for example, the invention of Las Vegas in the 1950s and the fact that we can now visit “Paris” in the Nevada desert; similarly, we will explore what it means to visit “Main Street USA” at a giant theme park in suburban Paris. From destinations such as beaches to ski slopes to urban centers, this course will also explore the intimacies between travel and various modes of identity—including race, class, gender, sexuality, and nation. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43144. Fieldwork and Nonfiction

(3-0-3)

Participants in this seminar will define, design, and carry out a project of field research and will engage in extensive discussions of their work in progress, including ethnographic method, ethical concerns, and the craft of nonfiction. The senior seminar is designed to be a capstone experience for American Studies majors.

Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43145. Explornography

(3-0-3)

In 1998, New York Times reporter John Tierney coined the word “explornography” to explain the phenomenal increase in demand for adventure literature, outdoor gear sales, *Crocodile Hunter* and survival-type television shows, and exploration oriented trips and vacations. Explornography, Tierney said, was “the vicarious thrill of exploring when there is nothing left to explore.” This course takes Tierney at his word. We’ll read a number of modern and classic explorer accounts of successful and failed expeditions. We’ll ask what those expeditions meant in their time and what they mean in ours. We’ll ask what modern versions of the traditional explorer expedition can mean in a world that is thoroughly mapped, covered by GPS technology, and always accessibly by cell and satellite phone service, and filled with X-Box, Halo, and other video gaming thrills. We’ll ask why there’s been such an explosion of interest in explorer, adventure and survival experience, and why in a modern, commodity-saturated culture the consumer has turned to explornography for vicarious thrills and adventure. We’ll look at how explornography has been commodified, marketed, and sold. We’ll distinguish between hard-core and soft-core explornography, between those who watch and those who do, and between experiences which build the self and those that do little more than serve the narcissistic ego. And finally, we’ll ask what’s next, or whether explornography is indeed the final frontier. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43146. Memorial Mania: History, Memory, and Contemporary American Culture

(3-0-3)

Focusing on the great variety—and great numbers—of memorials erected in recent decades, this seminar explores how cultural memory is created and what it has come to mean in terms of national identity in modern and contemporary America. The definition of “memorial” is purposely broad: from statues and monuments to parks, public squares, cemeteries, public ceremonies, and moments of silence. Memorials can be permanent or temporary, such as roadside shrines. Understandings of “memory” are also broad, ranging from subjects of local and civic memory to those of national and/or collective memory, and including popular interests in autobiography, memoirs, and family genealogy. Understandings of “America” are similarly wide-ranging, often conflicted, and always in flux. Recognizing the broad definitions of the key terms memorial, memory, and America, this seminar considers the following: What does memory mean in America today, and in American memorial culture? What is driving the urgency to memorialize, and who and what, in fact, is being remembered? Who and what are memorable in American history, and in terms of American national identity? Potential subjects are vast and include war memorials, Holocaust memorials, presidential commemoration, memorials erected at sites of tragedy and trauma (Oklahoma City, World Trade Center, Columbine), ritualistic memorial practices (such as pilgrimage and gift-giving), issues of public response, different styles of memorials and monuments (figurative vs. abstract memorials), and the role of the National Park Service, the nation’s primary “keeper” of historical and cultural memory. Course readings will include selections by contemporary historians, art historians, and theorists engaged in issues of memory, history, and material/visual culture, as well as films. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of 20–25 pages (or equivalent) based on primary source research.

AMST 43149. American Places and Space

(3-0-3) Coleman

Where do you spend your time? Spring break trips; family vacations; summer jobs; studying in your dorm; going to the football game; all of these activities help define you and your position in society—they also define the world around you. This senior seminar will examine how American identity, society, politics, and culture are connected to physical places and the environment. How does our relationship to the environment reflect our class, gender, and racial identity? How do we relate with each other spatially? We will examine how physical spaces acquire meaning, how people move through those places, and how landscapes work as texts. We will use approaches from environmental history, cultural geography, and landscape studies to look at a variety of American places including cities, tourist sites, suburbs, industrial sites, and “nature.” Small projects on Notre Dame’s campus and students’ hometowns will build to a larger research project based on each students’ area of interest. The senior seminar is designed to be a capstone experience for American Studies majors. Readings and assignments will explore course themes in the context of American Studies as a field. Requirements will include seminar-style discussions of course readings and a final project of approximately 20 pages (or equivalent) based on primary source research.

AMST 45900. Publishing Internship

(3-0-3)

Apprentice training with *Notre Dame Magazine*.

AMST 45901. Community Service Internship

(3-0-3)

Apprentice training with community social service organizations. Satisfactory/unsatisfactory credit only.

AMST 45902. Historical Research Internship

(3-0-3)

Apprentice training in archives or museums or historical preservation with local organizations. Satisfactory/unsatisfactory credit only.

AMST 45903. News Internship

(3-0-3)

Apprentice training with newspapers. Satisfactory/unsatisfactory credit only.

AMST 45905. News Internship

(3-0-3)

Apprentice training with newspapers. Satisfactory/unsatisfactory credit only.

AMST 46920. Directed Readings

(3-0-3)

Directed readings taught by individual faculty members. Permission required.

AMST 47909. Senior Thesis Capstone

(3-0-3)

The Senior Thesis Capstone provides a “culminating experience” for American Studies majors who are writing a senior thesis. It is only offered during fall semesters and should be followed in the spring by 3 credit hours of AMST 47910 Senior Honors, independent writing with the thesis advisor. This course encourages students to think about how their coursework fits together as a whole and gives them an opportunity to put what they’ve learned as American Studies majors into practice through the development of a senior thesis. In this course students will be expected to demonstrate significant progress towards their senior thesis, a year-long experience developed with a faculty advisor that aspires to make an original contribution to the field. Class readings and discussions will address current issues and themes in the field of American Studies as well as how student theses will develop, support, or revise those themes. During the semester students will work on refining a topic and developing a supporting bibliography, conducting a significant amount of primary source research (whether in libraries or in the field), situating their research among relevant secondary sources, writing a prospectus to guide further research and writing in the spring, and planning the project’s final form (paper, exhibit, documentary, etc.). Specific expectations for

each project/student will be developed in consultation with the course instructor and the student's thesis advisor. It is expected that each student meet at least twice with their thesis advisor during the semester when developing their prospectus and bibliography. Both the capstone instructor and students' thesis advisor will evaluate final prospectuses and research. This course will be graded on a satisfactory/unsatisfactory basis.

AMST 47910. Thesis Writing

(3-0-3)

This course is a 3 credit hour independent writing course for students working on a senior thesis. It follows the Senior Thesis Capstone course and is taken in the spring semester with the student's primary thesis advisor. During the semester students complete their research, refine their project's argument and form, and develop a final draft of their thesis. The advisor meets regularly with their thesis students throughout the semester to evaluate each student's progress and review preliminary drafts. Students are expected to finish their final thesis by the first week of April, and to present their thesis at the American Studies Celebration of Undergraduate Research in late April. Final theses will be evaluated by the student's primary advisor as well as their secondary advisor. The student's course grade is based on these two evaluations (which will be given equal weight) as well as their presentation and the progress they demonstrated throughout the semester.

AMST 47930. Special Studies: Reading and Research

(V-0-V)

Special Studies offers students the opportunity to pursue an independent, semester-long research project under the direction of a faculty member. The subject matter of special studies must not be duplicated in the regular curriculum.

Gallivan Program in Journalism, Ethics, and Democracy

JED 30100. Fundamentals of Journalism

(3-0-3) Ciccone

What is news? What are the most effective ways of presenting news to the public? What ethical decisions are involved in gathering and reporting news? These are a few of the questions addressed in this class.

JED 30101. Broadcast Journalism

(3-0-3) Sieber

Prerequisite: JED 30100

Four major topics are covered: (1) writing for broadcast: emphasis on developing the student's understanding of grammar and style in the construction of effective news stories; (2) newsroom structure: understanding who does what in today's broadcast newsroom and how economics affects the flow of information; (3) journalism ethics: analysis of personal values, ethical principles, and journalistic duties that influence newsroom decisions; and (4) legal considerations in news gathering with special attention paid to libel laws and invasion of privacy.

JED 30102. News in American Life

(3-0-3) Storin

Prerequisite: JED 30100

This course seeks to promote an understanding of modern media by examining the goals and motivations of newsmakers, the power of instant information, the future of news delivery and an examination of how the traditional principles of fairness, privacy and ethics are treated. Students will read several books and newspaper articles dealing with the history and the business of the media, and will use daily newspapers throughout the course.

JED 30105. The Craft of Journalism

(3-0-3) Schmuhl

This class focuses on how print and broadcast journalists work—how they think and act as well as the ethical dilemmas they face in delivering news, analysis, and commentary. We also consider the effects journalism has on the public and the role journalism plays in a self-governing society. Some sessions are devoted to presentations by visiting correspondents, editors and producers, explaining their approaches to specific stories and circumstances. In addition, students discuss issues and questions raised in numerous readings, and a major research paper on a contemporary journalistic subject is required.

JED 30106. Witnessing the Sixties

(3-0-3)

Prerequisite: AMST 30100

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the sixties, on the one hand, and on the other to explore the various journalistic representations of events, movements, and transformation. Much that was written during the period was ephemeral. There are, however, certain lasting accounts of the sixties by authors who command respect today, writers whose new publications or publications about them get front-page reviews in the *New York Times Book Review* section. We will focus on the manner in which each writer witnessed the sixties as well as the unique interaction between personal expression, social event, and cultural meaning. We will focus on fresh styles of writing, such as the new journalism popularized by Tom Wolfe, as well as writing that is aimed toward protest, resistance, dislocation, solipsism, and reportage. Major topics for consideration include the counterculture and the movement—a combination of civil rights and anti-war protest. These topics will sharpen our interest in social history, cultural change, politics, foreign affairs, music, literature, documentary film.

JED 30107. Media Ethics

(3-0-3) Storin

This course will examine the ethical challenges that newsroom managers face as well as the issues that reporters in the field must tackle on a daily basis. Much of the course will deal with case studies of actual ethical dilemmas at major news organizations. Also, students will be asked to seek out and bring to class issues dealing with the full range of media from network news to Internet blogs. The course endeavors to teach both the aspiring professional journalist and the non-professional news consumer how to evaluate what they see and read. Taught by the former editor-in-chief of *The Boston Globe*.

JED 30108. Advanced Reporting

(3-0-3) Colwell

This is an advanced course in journalistic reporting and writing devoted to learning how to prepare, in a professional manner, in-depth articles on issues and events of community interest for Notre Dame and this area. Emphasis will be on the techniques, ethics, and responsibilities of conducting interviews and research, and crafting pieces for newspapers and other publications. Open to American Studies majors and Journalism, Ethics, and Democracy minors by permission. Other applicants must submit writing samples for review.

JED 30109. Multimedia Journalism

(3-0-3) Schmuhl

The 21st century journalist needs to be comfortable with what is called “writing across the media” and can no longer be selective about which form of communication to build a career around. In many newsrooms, print journalists are now expected to perform on radio or in front of TV cameras, while the bylines of electronic journalists are turning up in newspapers and magazines. Such media convergence is already more the norm than the exception. On top of that, the Internet has become a major medium in its own right, encompassing different styles of communication. While the focus of this course will be on writing, it will expose students to a variety of media in an effort to prepare them for the reality of modern communications careers.

JED 30112. Persuasion, Commentary and Criticism

(3-0-3) Colwell

Prerequisite: JED 30100

This course will consider the roles of persuasion, commentary, and criticism in contemporary American culture and will explore the techniques of these forms of expression. Students will prepare and discuss their own writing assignments, including opinion columns, editorials, and critical reviews of performances or books. Ethics and responsibilities in contemporary American journalism in expression of opinions also will be explored. Assignments will serve as the examinations in this course, which is taught by a political columnist for the *South Bend Tribune* who also serves as host of public affairs programs on WNIT-TV, Public Broadcasting. Open to American Studies majors and Journalism, Ethics, and Democracy minors by permission. Other applicants must submit writing samples for review.

JED 30116. Media and the Presidency

(3-0-3)

Prerequisite: JED 30100

As the brouhaha over Howard Dean’s “yell” illustrates, media have come to play a key role in the coverage of presidential elections. This course examines how print and broadcast media have functioned in U.S. elections since the way we choose a president was first established. After a brief overview of changing relationships between journalists and presidential candidates in the 19th century, we will focus on elections since the 1920s, when radio first broadcast election updates. We will analyze how candidates have used radio, television, and the Internet to construct images of themselves and their platforms, and how journalists have become an active force in representing the political process. Rather than see electronic media as neutral or objective, we will assess the narrative strategies and visual and verbal codes by which media present politics to us, the voters.

JED 30117. Magazine Writing in America

(3-0-3)

Prerequisite: JED 30100

This course will examine various forms of magazine journalism, from the direct presentation of information to narrative journalism to the art of the first-person essay. The class, requiring students to complete a variety of written assignments while performing in a workshop setting, will emphasize those storytelling techniques essential to writing for publication.

JED 30177. Magazine Writing in America

(3-0-3) Temple

This course will examine various forms of magazine journalism, from the direct presentation of information to narrative journalism to the art of the first-person essay. The class, requiring students to complete a variety of written assignments while performing in a workshop setting, will emphasize those storytelling techniques essential to writing for publication.

JED 40111. Advanced Newsgathering and Visual Storytelling

(3-0-3) Sieber

Prerequisite: JED 30100

This hands-on course requires students to research, shoot, write, and edit *packaged* stories for television and other visual media, building on skills taught in Broadcast Journalism (FTT 30462) which serves as a prerequisite. Class time is used for instruction and critique. The bulk of the student’s time commitment for this course is in the field, producing well written, accurate, balanced and visually compelling stories with feedback from the instructor. Each student will complete a minimum of six fully edited stories for selective use on NDTV News.

JED 40301. News Internship

(3-0-3)

Apprentice training with newspapers. Satisfactory/unsatisfactory credit only.

Anthropology

ANTH 10109. Introduction to Anthropology

(3-0-3) Gaffney; Oka; McKenna

This course deals with the nature of anthropology as a broad and diverse area of study. The anthropological study of humankind will be approached from the perspectives of physical anthropology; prehistory and archaeology; and linguistic anthropology and socio-cultural anthropology. The diversity of humankind will be explored in all its aspects from times past to the present.

ANTH 10195. Introduction to Anthropology Honors

(3-0-3)

Prerequisite: ALHN 13950

Human beings may be classified as one species among many in biological terms, although a strict physical determination marks only the starting point for a broad inquiry into what we mean by human nature. Anthropology moves forward from this beginning to explore, in theory and by empirical investigation, the particular forms of cultural expression that characterize the development of human societies and account for their richness and their remarkable variety. This course examines the fundamental elements of this fascinating social science. It addresses the sometimes-controversial evidence related to such questions as evolution and genetics, as well as issues of ecological adaptation and the emergence of complex societies. It looks into language and other symbolic systems as central components of distinctively human behavior. It concentrates with special emphasis on the vast domain of social and cultural life, drawing upon many ethnographic examples from near and far, to illustrate how anthropologists seek to study all dimensions of human experience, from kinship to kingship and from cyborgs to shamans. Seminar format.

ANTH 13181. Social Science University Seminar

(3-0-3) Chesson; Glowacki; Nordstrom

Anthropology, the holistic study of humans and their societies and cultures, is the focus of this seminar course. Through discussion and analysis of a variety of anthropology texts, this seminar course aims to develop writing skills among first-year students while exposing them to some central problems and issues within anthropology. Adopting an approach that reflects the four-field character of anthropology, the seminar will encourage students to explore topics such as: (1) anthropology as a way of knowing; (2) anthropology as an encounter with, and effort to explain, human diversity; (3) anthropology as a discipline that uniquely contributes to our understanding of the symbolic dimensions of human behavior and communication; (4) anthropology as a discipline that uniquely contributes to our understanding of human strategies for subsistence and survival; and (5) anthropology as a discipline that uniquely contributes to our understanding of human biological and cultural origins.

ANTH 20105. Introduction to Human Ethology

(3-0-3) McKenna

Human ethology studies various aspects of human development, not just within our own culture, but also across diverse cultures. This science is most unique because it looks at both evolutionary processes and the behavior of monkeys and apes to more holistically understand contemporary human behavior. For example, using cross-cultural and cross-species data, this course conducts an exploration of the cultural and evolutionary origins of language, non-verbal communication, laughter, sleep, deception, morality, infant behavior, parenting, human aggression, sexual behavior, gender development, and human courtship rituals.

ANTH 20109. Introduction to Anthropology

(11.5-0-3)

An introduction to one of the most exciting of the social sciences. Anthropology helps answer some of the most basic questions about us and others: How and why did humans evolve? How did human culture develop, and why does there appear to be so many differences between cultures? How did human communication come about? Is language understood only in terms of words? How does it affect our ability to perceive the “real” world? Why are there so many different cultures?

Are human behavior and human nature best explained by reference to genes, race, adaptation to environment, or to the symbolic nature of culture itself? Exploring the answers to these questions offers students a fascinating opportunity to learn more about their own as well as other cultures. Regardless of whether the student's major is science, engineering, business or the liberal arts, Anthropology 20109 is an elective of significance to a liberal education.

ANTH 20111. Anthropology of Human Sexuality

(3-0-3) Fuentes

Sexuality is a complex and multi-faceted suite of biological and cultural/behavioral components. It is an important part of the human existence, especially in modern day North American society. This course seeks to examine human sexuality in an anthropological context. We will review sexuality in an evolutionary perspective via a comparison of nonhuman primate sexual behavior and the theoretical constructs surrounding adaptive explanations for human sexuality. The physiology of sex and the development of the reproductive tract will also be covered. The remainder of the course will consist of the evaluation of data sets regarding aspects of human sexual practice, sexual preference, mate choice, gendered sexuality, and related issues of human sexuality.

ANTH 20320. Introduction to International Development Studies

(3-0-3) Oka

This course will serve as an introduction to the field of international development, with particular focus on the various disciplines that have contributed to and shaped the development discourse over the past eight decades. Readings and lectures will draw from economics, political science, sociology, anthropology, environmental and technological sciences, public health and epidemiology, area studies, ethnic studies, and gender studies. A large component of this course will focus on in-class discussions and presentations that engage the broader debates within development studies to critically evaluate the development discourse/process, as well as understand emerging critiques of international development. Required course work will include group or individual student projects that critically investigate ongoing development issues and propose engaged solutions that include restoration and social justice and human dignity.

ANTH 20325. Business, Economics and Culture

(3-0-3)

Economic, political and cultural interactions between geographically distant groups have been intensifying over the past century and the 21st century is being seen as the Global century. In this rapidly changing world, it is becoming increasingly important to understand the role of cultural (religious, ethnic and political/socio-economic) factors in determining and shaping interactions. In this course, we will use an ethnographic-focused approach to explore the impact of cultural variations on many issues that have arisen or will potentially arise in the course of contemporary global economic interactions. These include the relationships between reciprocity, redistribution and market behaviors; cultural differences in business strategies; relationship building and formation of partnerships; marketing techniques; consumer behavior; and political and environmental situations. We will also look at the impact of business interaction on regional and local economies in Asia (India), Africa (Kenya and the Sudan) and Latin America (Mexico and Guatemala). Course work will include discussions based on readings, documentaries, an individual ethnographic project and report, and a final paper on the application of cultural factors for global interactions.

ANTH 20360. Societies and Cultures of Latin America

(3-0-3)

This course is a broad introduction to the societies and cultures of Latin America. We will cover the history of the region—from the colonial past, independence movements and revolutions, post colonialism and race relations—as well as the current events, trends, and cultures that have been shaped by this history. The latter will include important present-day issues such as power relations and class, violence and politics, secular and religious ideologies, family and gender relations, migration and transnationalism, ethnic relations, art and literature,

and globalization and change. I expect students to understand and appreciate the diversity of cultures in Latin America as well as to explore how the current societies and events have been shaped by the unique histories of the region. Students who have completed the Notre Dame language requirements in Spanish are eligible to register for an additional 1-credit discussion section as part of the Languages Across the Curriculum (LAC) initiative in the College of Arts and Letters, ANTH 22360.

ANTH 20370. Witchcraft and Magic in the Contemporary World
(3-0-3)

Witchcraft and the ritualistic use of magic for shaping the future and controlling the present have been a part of human development from the earliest times. The advent of science and technology has only modified or altered the role and significance of witchcraft in contemporary societies, as witchcraft and magic services and their providers have gone online. Anthropological studies on witchcraft in contemporary societies have pointed out the relationship between the development of witchcraft and the prevailing economy, politics, public health, culture and the environment. This course will explore the role and evolution of witchcraft in modern societies of Africa, Asia, and Latin America. Through assigned readings, in-class discussions, movies, documentaries, and ethnographic projects, we will seek to understand why witchcraft and magic and associated beliefs are universal phenomena in human societies and how these practices themselves adapt to the changing world.

ANTH 20390. Societies and Cultures of Africa
(3-0-3)

Sub-Saharan Africa is a geographically massive territory distinguished by a tremendous diversity of cultures, customs, languages, histories, identities, and experiences. In this course, we explore this wealth of diversity, alongside a survey of some of the broad historical and contemporary trends and movements that have characterized the subcontinent. A brief introduction to African geography is followed by an overview of African history in the pre-colonial, colonial, and post-colonial eras. The remainder of the course is devoted to the study of present-day Africa, including readings on social organization, religion, music, art, popular culture, politics, economics, as well as on the contemporary crises and challenges of warfare, poverty, and HIV/AIDS and other diseases. Readings will include historical, ethnographic, literary, and autobiographical texts, and will be supplemented by a number of African-directed films.

ANTH 20503. Archaeology: Myths & Facts
(3-0-3)

The general public views archaeologists in a highly stereotyped manner. This course explores the public's perception of what archaeologists do and why they do it, and seeks to better understand the broader goals and contributions of the study of archaeology. We will explore this question through a range of media, including how the public and media stereotype archaeological research through films and novels, such as Indiana Jones. We will also examine the development of alternative/pseudoscientific explanations for ancient phenomena (for instance, the construction of the Egyptian pyramids, the destruction of Atlantis, and the use of the Nasca lines by aliens). Finally, students will investigate the modern social context of conducting archaeology today: how can archaeology help us to understand the world in which we live? We will draw on case studies from throughout the world, including examples from North America, Europe, Australia, and the Middle East.

ANTH 20510. Origins of Human Civilization
(3-0-3)

This course is an introduction to archaeology and to world prehistory. It will provide students with a basic understanding of what archaeology is, how it is done, and what it has produced. Fundamental principles of archaeological theory and practice will be illustrated by examples from throughout the world in order to introduce important themes such as the origins of food production, the rise of cultural complexity, the peopling of the world, and the development of technol-

ogy. The course covers cultural evolution from the invention of the first stone tools through the rise of ancient civilizations such as those of the Maya, Incas, Egyptians, and Near East.

ANTH 20550. Archaeology of Israel, Palestine, and Jordan
(3-0-3)

Prerequisite: ALHN 13950

This course introduces students to the rich prehistoric and early historic archaeology of the southern Levant, the region encompassing modern Israel, Palestine, and Jordan. The course will explore the archaeology of the region chronologically, and topics will include the origins of agriculture, the emergence of towns and cities, international seafaring and exchange, the Philistines and Sea Peoples, and the influence of neighboring empires.

ANTH 22360. Societies and Cultures of Latin America Discussion (LAC)
(1-0-1)

Corequisite: ANTH 20360

Students who are enrolled in ANTH 20360 and have completed the Notre Dame language requirements in Spanish are eligible to register for this additional 1-credit discussion section as part of the Languages Across the Curriculum (LAC) initiative in the College of Arts and Letters. Students will carry out additional reading in Spanish (approximately 10 to 15 pages a week) and meet once a week with the professor in a Spanish-language discussion. There will be additional brief writing assignments.

ANTH 30001. Mesoamerican Art: Olmec and Their Legacy
(3-0-3)

This course will introduce the student to the Mesoamerican worldview by tracing the origins of Mexican art, religion, and culture from the development of the Olmec civilization up to Aztec times. Examination of the iconography and function of art objects through slide lectures as well as hands-on, in-depth study of individual pieces of sculpture. A good visual memory is helpful.

ANTH 30101. Fundamentals of Biological Anthropology
(3-0-3) Benn Torres

This course approaches human evolution from a theoretical point of view that combines both biological and cultural processes into a cohesive bio-cultural model. It begins by tracing the development of modern evolutionary theory and the place of evolutionary studies in anthropology, especially in the sub-field of bioanthropology. These concepts provide the framework for understanding the many lines of evidence that anthropologists use to explore and explain human evolution. These include studies of our primate relatives through the intricacies of the fossil record, to archaeological evidence for the invention of material culture from the simplest stone tools to the complex cultural world that we live in today. Modern human variation can only be explained as the result of evolutionary forces acting on the complex interplay of biology and culture over millions of years. We continue to be affected by these forces, and this course not only provides information about where we came from, it also provides the scientific backgrounds to help us understand where we might be going as our species continues to evolve.

ANTH 30102. Fundamentals of Archaeology
(3-0-3) Kuijt; Schurr

This course is an introduction to the methods, goals, and theoretical concepts of archaeology, with a primary focus on anthropological archaeology practiced in the Middle East, North America, and Europe. The field of archaeology is broadly concerned with material culture (at times combined with textual information) that can be employed to generate interpretations about past human societies. The challenge of this social science is to interpret past societies and anthropological behavior using the fragmentary, but nonetheless rich and complex, database of the archaeological record. Lecture topics will include the methods and goals of archaeological excavation; analytical techniques employed in material studies; and the problems and challenges in the interpretation of past human behavior. Case

studies of survey, excavation, and analytical techniques will focus on recent or on-going investigations of archaeological sites in North America, Central America, Europe, Africa, and the Middle East.

ANTH 30103. Fundamentals of Social and Cultural Anthropology

(3-0-3) Botten; Smith-Oka

This course introduces students to the field of social-cultural anthropology. Cultural anthropologists are primarily interested in exploring issues of human cultural diversity across cultures and through time. This course will explore key theoretical, topical, and ethical issues of interest to cultural anthropologists. We will examine diverse ways in which people around the globe have constructed social organizations (such as kinship, and political and economic systems) and cultural identities (such as gender, ethnicity, nationality, race, and class) and we will consider the impact of increasing globalization on such processes. Throughout the course we will consider how different anthropologists go about their work as they engage in research and as they represent others through the writing of ethnographies.

ANTH 30104. Fundamentals of Linguistic Anthropology

(3-0-3) Blum

Language is fully embedded in human culture and society. It has both meaning and efficacy; that is, it both means things and does things. Our goal in this course is to become aware of some of the ways language functions in social life, often below the level of awareness of its users. Students will engage in a number of practical exercises that demonstrate some of the more astonishing features of language all around us. Topics include the nature of language, including language origins, nonverbal communication, and electronic communication; language, culture, and thought (linguistic relativity); speech acts and what we do with words; conversational analysis; language and identity (class, race, gender); and language in the world (multilingualism, language endangerment and revitalization, language and education).

ANTH 30130. Biocultural Anthropology: Human Nature and Culture

(3-0-3)

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30101 or ANTH 30103

This course will present the theoretical and empirical bases of biocultural anthropology, the integration of biological and cultural anthropology. Dichotomies such as nature versus nurture and mind versus body will be reconsidered in a biocultural perspective.

ANTH 30140. Primatology: Ecological, Evolutionary, and Conceptual Insights into the Human Species

(3-0-3)

This course will examine not only the diversity of nonhuman primate species, including their behavior, ecological context, and evolution, but also the importance and implication of primatology's role in understanding our own species. Primates live in communities with other species. Therefore, they must be considered as part of a broader ecological system that includes both animal and plant species. We will explore the various interactions that primates have with these other species and the various roles that they play in the larger ecological community. Using the comparative approach, this course will demonstrate that many facets of human evolution are basically elaborations (albeit nuanced) of general trends in primate evolution. In addition, despite the fact that nearly half of all known primate species are threatened with the possibility of extinction, our genetic next-of-kin are routinely displaced from their habitats, hunted for meat, captured for trade, housed in zoos, made to perform for our entertainment, and used as subjects in biomedical testing. We will examine the general pattern of processes related to impending extinction crisis, and discuss the specific conservation strategies and tactics, including the impacts (both positive and negative) of primate field research, eco-tourism, and ex-situ approaches such as captive breeding programs. Finally, students will examine critically the notion that successful understanding of what it means to be human is only possible through knowing

what it means to be nonhuman. This very endeavor, however, will be shaped by how we proceed, how we perceive our place in nature, and how we will treat the subjects of our inquiries.

ANTH 30160. Anthropology of Race

(3-0-3)

Prerequisite: ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104
While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle what race is and what it is not from an anthropological perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

ANTH 30170. Introduction to Anthropological Genetics

(3-0-3)

In this course, students will explore central questions within biological anthropology from a genetic perspective. The class will cover basic principles of molecular and population genetics. Additionally, students will learn how molecular and population genetics are applied to anthropological issues. Topics to be covered include human origins, peopling of world, and human genetic diversity and disease.

ANTH 30190. Infancy: Evolution, History and Development

(3-0-3) McKenna

Explores aspects of infant biology and socio-emotional development in relationship to western childcare practices and parenting. Western pediatric approaches to infancy and parenting are evaluated in light of western cultural history and cross-cultural, human evolutionary and developmental data. A variety of mammals are included as a comparative background to explore the relationships between infant physiology, mental and physical health and contemporary infant care giving concepts.

ANTH 30320. Native Peoples of North America

(3-0-3) Mack

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30103 or ANTH 30104
This course offers a survey of the major groups with an emphasis on their forms of social organization: their political and economic patterns; and their technological, religious, and artistic realms. Beginning with archaeological and linguistic evidence that traces the process by which the American Indians came to occupy the continent, the presentation of material will then follow the classical "culture area" paradigm. This overview recognizes a set of 11 basic divisions such as Eastern Woodlands, the Great Plains, and the Northwest Coast.

ANTH 30325. People, Environment and Justice

(3-0-3) Smith

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

What is our environment? What is our role within our surroundings? How do our actions affect ecological landscapes and people's livelihoods across the globe? How does our reliance of fossil fuels lead to catastrophes such as Hurricane Katrina? What—if anything—does it mean to be "green?" This course will address these and other questions through the use of critically applied anthropology. We will explore the interaction of local peoples and cultures with natural and man-made ecosystems. We will focus equally on traditional environmental knowledge held by small-scale communities as on the usage of the environment by the industrial world. This course will focus on theory and major environmental questions, problems, and possible solutions illustrated by various case studies from different parts of the world. Topics to be discussed include intellectual property rights; poverty and environmental health and justice; economic development, health and emerg-

ing disease; and ethno- and eco-tourism. Through readings, films, discussions, and independent research students will be able to critically understand the complexity surrounding humans' place within the environment.

ANTH 30330. Religion, Myth and Magic

(3-0-3) Gaffney

The study of religious beliefs and practices in tribal and peasant societies emphasizing myths, ritual, symbolism, and magic as ways of explaining man's place in the universe. Concepts of purity and pollution, the sacred and the profane, and types of ritual specialists and their relation to social structure will also be examined.

ANTH 30390. European Cultures and Societies

(3-0-3) Albahari

This course offers an ethnographically grounded understanding of contemporary European cultures and societies. We start by presenting a brief history of the idea of Europe. Then, we define its geographical focus: where are the boundaries of Europe? Are Israel and Turkey part of Europe? Who gets to decide? Are there European Muslims? We will then read recent works focusing on selected regions and on diverse urban populations. We will explore and discuss socio-cultural facets of European everyday life; trends and challenges in technology, the environment, popular culture, demography, and politics; and the diversity of urban/rural, north/south, and more generally intra-European ways of life. The course will be of interest to students of contemporary global issues, and in particular to students who intend to spend a semester in Europe; are back from the field; or intend to write a related senior thesis.

ANTH 30395. Russian Realms: Societies/Cultures of Eastern Europe and Beyond

(3-0-3)

This course explores the social structures, the historical contexts, and the symbolic universes of the peoples who either identify themselves as Russian or whose way of life has come to be deeply affected by the Russian tradition.

ANTH 30550. Buried Cities and Lost Worlds: Archaeology of Cultural Collapse

(3-0-3)

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30102

How and why do complex societies collapse? Is collapse a "natural" phase in the life of a society and, thus, inevitable? Is it the result of some social malaise and, thus, can it be (or could it have been) avoided? The class explores some of the important political, economic, and environmental dimensions of the emergence and eventual collapse of complex societies. Combining archaeological case studies (the Classic Maya of Mesoamerica, Pueblo cultures of the American Southwest, Bronze Age city states of Mesopotamia, and Neolithic agricultural towns of the Near East) with anthropological theory of the emergence of social differentiation, and the mechanisms of societal collapse, this class explores contemporary debates of processes by which, and reasons for, the emergence and disappearance of complex societies in the past. While the geographical focus will be worldwide, the class considers topical issues that illustrate a range of methodological and theoretical approaches to understanding social organizations and cultural collapse.

ANTH 30580. The Forager/Farmer Transition

(3-0-3) Kuijt

Prerequisite: ANTH 30102 or ANTH 30101

This course explores the transition from hunting and gathering ways of life to agricultural societies and systems of food production in the Old and New Worlds and the origins of food production in diverse areas as a long-term social, conceptual, and economic process.

ANTH 30590. Prehistory of Eastern North America

(3-0-3)

This course traces the development of a Native American culture from its earliest beginnings in North America to the time of European contact. Topics include mound builders, agriculture, development of sophisticated societies, and why historic Native American tribes were so diverse.

ANTH 30591. Prehistory of Western North America

(3-0-3) Mack

Prerequisite: ANTH 10109 or ANTH 20501 or ANTH 30101 or ANTH 30102 or ANTH 30103

This course deals with archaeological data and cultural life of prehistoric western North Americans over the last 20,000 years, until contact with European cultures. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated and diverse cultures of the Native Americans. The course will focus on material culture, environmental relationships, and technology to explore cultural change, land-use patterns, economics, and political complexity. In addition, some understanding of the methods by which archaeology is done by scientists in North America and an introduction to historical archaeology are included.

ANTH 30592. Prehistory of the American Southwest

(3-0-3) Glowacki

This course introduces students to the diversity of cultures living in the American Southwest from the earliest Paleo-Indians (11,500 years ago) to European contact, the establishment of Spanish Missions, and the Pueblo Revolt of 1680–1692. Most of the course is devoted to learning about the complex cultural developments in the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Phoenix Basin. Class work and discussions will focus on important issues such as the adoption of agriculture, the development of villages, the transformation of ideological beliefs and political organization, the importance of migration, and the impact of warfare using information on environmental relationships, technology, and other aspects of material culture. Students will also learn about descendant populations living in the Southwest today including the Pueblo peoples (e.g., Hopi, Santa Clara, Acoma) and Tohono O'odham.

ANTH 30610. Kinship and Comparative Social Organization

(3-0-3) Rotman

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30101 or ANTH 30103 or ANTH 30104

The course uses a broad cross-cultural comparative perspective to identify and analyze the major forms of human social organization. Emphasis is on kinship terminology, descent, marriage, residence units, economic exchange, political structure, and social inequality, among other topics.

ANTH 33100. Career Skills Pro Seminar

(3-0-3)

The goal of this pro seminar is to engage students in their own professional development, be it either towards traditional academic career or some other applied career. There are two key components to this course: individual projects and group projects of their own choosing. Individual projects center on technical development (such as the use of PowerPoint and graphics programs), and the development of other professional skills. This includes practical skills such as creating resumes, applying for employment, writing statements of purpose for graduate school or some other professional organization, writing abstracts for professional meetings and writing grant applications. Group projects vary with the interest of class members, but can include attending professional meetings, presenting group papers and organizing departmental or university events. This might include organizing speakers and international visits.

ANTH 33300. Social Concerns Seminar: Intro to Community-Based Participatory Research Methods

(1-0-1)

This interdisciplinary seminar focuses on the ways in which researchers and community members collaborate to conduct research that leads to community change and improvement in the quality of community life. The purpose of this seminar is to introduce students to community-based participatory research as a means to examine community challenges through quantitative and qualitative research methods. The seminar is offered through the collaboration of the Center for Social Concerns and the Department of Anthropology.

ANTH 35110. Primate Behavior and Ecology

(3-0-3) Fuentes

This course will give students an understanding of primate social systems and the factors that influence their maintenance and evolution. The course will begin with a brief overview of primate natural history (taxonomy of major primate groups and primate evolution). The remainder of the course will use various primate examples to explore the core topics of primate behavior and ecology, including diet and nutrition, predation, social structure, kinship, mating behavior, social dominance, and cognition. Students will also have the opportunity to learn some of the basic data collection techniques used when studying non-human primate behavior.

ANTH 35210. Health, Healing, and Culture

(3-0-3) Lende

This course provides an introduction to the field of medical anthropology. Medical anthropology examines beliefs, practices, and experiences of illness, health, and healing from a cross-cultural perspective to show that illness, health, medicine, and the body are shaped by social relationships and cultural values from the local level of the family and community to the global level of international development and transnational capitalism. This course will consider the ways in which medical anthropology has historically been influenced by debates within the discipline of anthropology as well as by broader social and political movements. Particular emphasis will be placed on the importance of viewing biomedicine as one among many culturally constructed systems of medicine. Some of the key issues which we will explore are medical pluralism and therapeutic choice; biocultural studies; medicalization; the political economy of health and disease; the anthropology of the body; the role of medicine and disease in colonialism and postcolonial movements; and applied medical anthropology.

ANTH 35250. Cultural Aspects of Clinical Medicine

(3-1-4) Wolosin

This course focuses on social science approaches to sickness and healing. The medical encounter is examined from anthropological perspectives. The course emphasizes the difficulties traditional biomedicine has in addressing patients' expectations for care. Students serve an internship as patient ombudsman in a local hospital emergency room four hours per week. Students **MUST** have access to transportation to participate in the ER internships. *Students are required to sign a waiver, to present evidence of immunizations, and to receive a TB skin test.*

ANTH 35340. Anthropology of Globalization

(3-0-3)

Prerequisite: ANTH 13181 or ANTH 10109 or ANTH 10195 or ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

This course analyzes contemporary patterns of globalization drawing on recent ethnographies. We will briefly overview the historical antecedents of globalization, and then proceed to analyze globalization's cultural, socio-political, and economic complexity, often resulting in urbanization. In particular, we will tackle the global circulation of food, entertainment, fashion, capital, ideologies, violence, religious practice, migrant/trafficked labor, and so-called "anti-globalization" movements. Examples of specific topics include youth and free trade in Latin America; cyber-politics among transnational Chinese, Eritreans, and others; McDonald's and consumerism in Moscow; Indian cinema and global media; outsourcing; and the labor market. By locating global processes in everyday practice, including in our own communities, we will come to understand the interconnectivity sustaining globalization, and the resulting practices of resistance. More broadly, we will appreciate on the one hand how various cultures and societies become increasingly interconnected, and on the other how people around the world appropriate large-scale processes in culturally specific ways. The course emphasizes anthropology's role as a discipline that is globally relevant and publicly "engaged." Accordingly, we will focus on the discipline's methodological and theoretical contributions in the study of globalization and its inequalities, and toward a more socially just world. The course will enable you to participate in community-based-learning, orienting and equipping you to design and implement an original research project, and to write an ethnographic account based on such project.

ANTH 35350. Anthropology of Africa

(3-0-3) Oka

Africa is known as the cradle of humanity and has the longest record of "human" activity of any continent. Yet it is also the least understood in terms of its past. The discipline of anthropology has the primary field of study used to understand the development of societies and cultures of Africa. In this course, students will learn and critically apply techniques drawn from biological anthropology, archaeology, ethnography, history and linguistic anthropology for understanding the evolution of human societies within Africa, and the inter-connections between Africa and the rest of the world from the earliest times to the present era. Topics covered in the readings, lectures, practical laboratory work, and assignments will include the beginnings of cultural development (tool-making and social networks), the interactive development of agriculture, pastoralism and foraging, the rise of social complexity, urbanism and states within Africa, colonialism, and post-colonial African states.

ANTH 35360. Immigration in Global Perspective

(3-0-3) Albahari

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How is immigration related to urban "immigrant riots?" And what can anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the U.S., Europe, Australia, and Japan will enable us to appreciate both global and U.S. distinctive trends. Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class, the mass media, border enforcement, racism, the economy, territory and identity formation, and religion.

ANTH 35370. New Media

(3-0-3) Blum

This course examines the ways people interact with digital and new media both for communication and for entertainment. Using anthropological concepts, we look into such phenomena as cell phones (for talk and text), Facebook and other social networking sites, music downloading and issues of intellectual property and creativity, e-mail, the Internet, wikis, YouTube, Twitter, censorship and political mobilization, and more. There will be class projects, group projects, blogs, and other new forms of writing, along with more traditional ways of presenting knowledge and thought.

ANTH 35500. Archaeological Ethics and Law

(3-0-3)

This class explores the ethical, legal, and practical dimensions of modern archaeology through a consideration of the following topics: archaeology as a profession; archaeological ethics; the relationship between archaeology and others (the public, ethnic groups, avocational archaeologists, collectors, etc.); international and national approaches to archaeological heritage management; the antiquities market; maritime law, underwater archaeology, and treasure hunting; cultural resource management in the United States; and archaeological education.

ANTH 35510. Museum Internship: Northern Indiana Center for History

(V-V-V)

A museum internship is available to anthropology majors and minors at the Northern Indiana Center for History (NICH), South Bend, Indiana. This internship will teach students about the array of documentary and other resources that archives curate, including issues of acquisition, conservation, proper care and handling, systems of organization and management, etc. The facility's association with an historic museum will also familiarize students with the varied constituencies served by NICH, gain experience with public education and outreach, and develop other valuable skills. The intern will work with the archivist to prepare digital versions and transcriptions of early historic records, especially those pertaining to

the fur trade and the founding of South Bend. Interns will also observe and learn about the operation of an archive and a historical museum. They will also have the opportunity to conduct their own research project in conjunction with the archival work. The internship is unpaid and can be taken during either semester of the academic year. Grading will be S/U with variable credit (from 1 to 3 credits; interns are expected to commit at least 3 hours for every hour of credit given). The interns' work at the NICH will be supervised by the Mr. Scott Shuler, Archivist and a course grade will be assigned by the supervising Notre Dame professor after consultation with the archivist. Interns must provide their own transportation.

ANTH 35550. Historical Archaeology of Irish America

(0-28-3) Rotman

Four weeks of practical instruction in the methods and theory of archaeological survey, excavation and laboratory analysis. Students learn field techniques and apply them to investigations of both prehistoric and historic archaeological materials by working with artifacts collected during the field course. There are no prerequisites for this course, but prior exposure to an introductory course in anthropology or archaeology is helpful. In addition to tuition, this course requires payment of a laboratory/transportation fee. Includes a week-long cultural study in Ireland. For application please email Dr. Rotman at: <mailto:drotman@nd.edu>

ANTH 35582. Archaeology of Ireland

(3-0-3) Kuijt

Prerequisite: ANTH 30102

This course examines the cultural and historical trajectory of the archaeology of Ireland through a series of richly illustrated lectures, organized chronologically, that trace cultural, social, and technological developments from the Neolithic through the Viking period. Integrated with this lecture series, and running concurrently on alternate days, will be a series of seminar and discussion classes focused upon a number of anthropological and archaeological issues related to each of these periods of time. This includes the emergence of the unique systems of communities, and the development of systems of metallurgy in the Iron Age. Other classes will touch upon the topics of regionalism, identity and contact at different periods of time; mortuary practices and ritual; and discussion of village life in ring forts during the Bronze Age.

ANTH 35588. Archaeology Field School

(3-0-3) Schurr

Three weeks of practical instruction in the methods and theory of archaeological survey, excavation and laboratory analysis. Students learn field techniques and apply them to investigations of both prehistoric and historic archaeological materials by working with artifacts collected during the field course. In addition to the basic archaeological techniques the class will introduce modern remote sensing methods, including lessons on how to use a total station (laser transit) and equipment for magnetic and resistivity surveys. Student teams will learn how to operate the geophysical survey instruments and will use the instruments to conduct geomagnetic and soil resistivity surveys of a portion of the archaeological features present, and the field school excavations will be designed to evaluate their theories. There are no prerequisites for this course, but prior exposure to an introductory course in anthropology or archaeology is helpful. In addition to tuition, this course requires payment of a laboratory/transportation fee.

ANTH 40016. Folklore, Literature, and Irish National Culture

(3-0-3) Gillan

The ideological character of the 19th century concept of folklore allowed it to transcend the social category of peasants from whom it was largely recorded. This course will look at the role of folklore in the building of an Irish national culture from the time of the Gaelic Revival. Programmatic texts in Irish and in English by Douglas Hyde, first president of the Gaelic League, and by Séamus Delargy, director of the Irish Folklore Commission, will be discussed. It will also look at a later polemical text of the Gaelic writer Máirtín Ó Cadhain directed at what he perceived as the essentialism of Irish folklorists.

ANTH 40084. Structural Violence: The Underbelly of Conflict

(3-0-3) Bolten

In this course we will examine the "violence of everyday life" experienced by people both inside and outside of active war zones, and investigate how taken-for-granted structures such as bureaucracy, security, nation, color and creed (to name only a few) constrain and damage peoples' lives, causing suffering and stress, and often leading to radicalism and violence. How do physical walls perpetrate and perpetuate violence? Why does resource richness cause poverty and war? What is the lived experience of systematic inequality? When does everyday hopelessness become explosive violence? Students will examine how violence is both culturally mediated and understood, and will learn to recognize the symptoms and anticipate the consequences of oppression, neglect, and resistance around the world.

ANTH 40110. Humans as Subjects

(3-0-3) Benn Torres

Prerequisite: ANTH 30101

Advances made in our understanding of evolution, biology, and medicine have influenced the way that biological anthropologists conduct research. Furthermore, as studied communities become more aware and involved in the research done with them, ethical, legal, and social issues are now more present within an anthropologist's research agenda. Throughout this seminar, students will explore the challenges surrounding the use of humans as subjects in biological anthropology.

ANTH 40140. Forensic Anthropology

(3-0-3) Sheridan

Prerequisite: ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

Death has become a burgeoning business for television and cable networks, publishing houses and entrepreneurs. While some purport an increased scientific sophistication among the viewing public as a result, most recognize that unrealistic expectations for instant answers and seemingly omnipotent investigators often nullify any benefits. Therefore, students will be introduced to basic procedures employed by forensic anthropologists during the recovery and analysis of human remains. They will learn how biological anthropologists apply expertise in human osteology, skeletal variation and plasticity, pathology, archaeological recovery of evidence, and medicolegal issues of chain-of-custody, courtroom testimony, and human rights policy. While the course will focus on anthropological contributions to the forensic sciences, the importance of a multidisciplinary approach will be emphasized through a survey of allied fields. Students will develop analytical skills through the application of anthropological theory and methods, understand the scientific method through research requirements and in-depth case studies, improve collaborative skills with group projects, increase cross-cultural awareness by studying how social problems and social movements affect minority groups, and explore the possibility that forensic science might indeed be shaped by "opinion." Professional ethics will be discussed, students will engage in structured debates, and will be expected to complete a group research project.

ANTH 40319. Anthropology of Multiculturalisms

(3-0-3)

Prerequisite: ANTH 30104 or ANTH 30103

This course explores the economic, state, and national conditions of multiculturalism as a social relation and semiotic form. Seminal questions include the issues of difference deployed in debates over multiculturalism and anthropology's location in them as a study of human diversity.

ANTH 40333. Gender and Violence

(3-0-3) Mahmood

Prerequisite: ANTH 30103

This seminar interrogates the intersections among male, female, violence, and nonviolence. How is gender related to war and peace across cultures? We explore the biological, psychological, ritual, spiritual, social, political, and military entanglements of sex, gender and aggression in this course. We examine the lived realities of women and men in zones of conflict as both survivors and perpetrators of violence, and consider the potential of each as peace builders.

ANTH 40340. Native Americans in Fact and Fiction

(3-0-3)

Prerequisite: (ANTH 10109 or ANTH 10195 or ANTH 30104 or ANTH 30102 or ANTH 30101 or ANTH 30103 or ANTH 13181) and ALHN 13950

This course focuses on images of Native Americans and how popular and scientific writing, fine art, advertisement, and film may have shaped these images. Using an anthropological perspective, the student reads fictitious and factual accounts of Native Americans and their cultures, both past and present, allowing them to build a more accurate image of Native Americans. The course uses books and film to broaden the understanding of Indian stereotypes, and the student will compare them to ethnographic studies that use a scientific approach to Native American beliefs, life styles, and material culture. Some of the literature will be from Native American authors and the art from contemporary Native American artists. Together the readings, artworks, and films will also reveal the great diversity of both people and ideas that all too often are lumped under one category which we label "Native American." Writing intensive course for the College of Arts and Letters.

ANTH 40355. Race, Ethnicity, and Power

(3-0-3)

Prerequisite: ANTH 10109 or ANTH 30104 or ANTH 30102 or ANTH 30103 or ANTH 30101

This course explores race and ethnicity as biological, social, legal, and cultural constructs and lived experiences. Its underlying objective is to understand how relations of power affect racial and ethnic affiliations, categorizations, and experiences. Rather than merely learning a collection of facts on specific racial and ethnic groups, we will examine race and ethnicity as they intersect with dynamics of social class, gender, mass media representation, racism, immigration, and everyday life in urban settings. We will focus on the diversity of U.S. recent, real life experiences—from problems of inequality to the flourishing of "ethnic" food and music—but also look at postcolonial and European locales. This will enable us to compare racial and ethnic understandings, practices, and identities across geopolitical settings, and in global and transnational context.

ANTH 40400. Perspectives in Anthropological Analysis

(3-0-3) Albahari; Blum

Prerequisite: ANTH 30103 or ANTH 30104

Anthropology attempts to make sense of an infinitely complicated world by organizing its observations, inquiries, and explanations. Some of these are grand, while others are modest. Still, all anthropological work involves some kind of analysis. All analysis stems from a view of what is basic and of what is related most centrally. This course introduces the most powerful analytic perspectives in the four subdisciplines of anthropology, preparing students to encounter and situate anthropological works of all sorts. The seminar format encourages student involvement, not only in reading and writing but also in discussion and analysis of the works under consideration. Written and spoken assignments will permit students to try their hand at a wide range of anthropological practice. Required of all Anthropology majors.

ANTH 40805. Humans and the Global Environment: Coevolution or Mutual Destruction?

(3-0-3) Hellmann; Schurr

All human populations, from the simplest to the most complex, interact with their natural environment. Humans alter the environment, and are in turn altered by it through biological or cultural adaptations. Global environmental changes helped to create and shape our species and modern industrial societies are capable of altering the environment on scales that have never been seen before, creating many questions about the future of human-environmental coexistence. This course explores the ways that humans are altering the global environment and the ways that global environmental changes alter humans in return. Four major topics are examined: global climate change, alterations of global nutrient cycles, biodiversity and habitat loss, and ecosystem reconstruction. Students will complete the course with an understanding of the metrics and physical science associated with each type of change, their ecological implications, and the ways in which environmental

changes continually reshape human biology and culture. This course is for graduate students and upper-division undergraduates. This course meets a core requirement for GLOBES students.

ANTH 40808. GLOBES: Global Linkages of Biology, the Environment, and Society

(3-0-3) Hollocher; Fuentes

The GLOBES (Global Linkages of Biology, the Environment, and Society) series of courses offered each semester reflect various areas of life science relevant to multiple disciplines. Students should expect to have a different topic offered every semester under the GLOBES heading.

ANTH 40810. Human Diversity

(3-0-3)

Prerequisite: ANTH 30101

Issues concerning the nature of human diversity (race, intelligence, sex, gender, etc.) are a continuing source of social and scientific debate. This course is designed to present the issues and methods used by physical anthropologists to study both the biological basis of human differences, as well as the ongoing process of human adaptation and evolution in response to climate, nutrition, and disease. Integration of the social, biological, and medical sciences will be employed to investigate modern human variation.

ANTH 40815. Advanced Perspectives on Human Evolution

(3-0-3) Fuentes

Prerequisite: ANTH 30101

This course takes an in-depth integrative approach to issues in human evolution. Beginning with an overview of current innovation and discourse in evolutionary theory we will move on to tackle various topical issues related to human evolutionary history and its relevance to being human today. Focal points of discussion will include in-depth analyses of fossil hominin species and their ecologies, a detailed assessment of nonhuman primate behavior as used in modeling the patterns and contexts of human behavior, a review and analyses of current debate surrounding the origin of modern humans, and current topics in the field of human evolution and paleoanthropological theory. Students will be required to produce a focused research paper and be involved in course presentations and discussions. Readings will be drawn from relevant fields including biology, anthropology, ecology, and occasionally philosophy.

ANTH 40825. Gender and Health

(3-0-3)

Prerequisite: ANTH 30103

This course looks at the intersection of gender, health policy, and health care organization around the world. Some of the issues to be discussed include medicalization of the female body; critical medical anthropology; the politics of reproduction; social production of illness and healing; politics, poverty, and health; national and international health; and development policies.

ANTH 40830. Transnational Societies and Cultures

(3-0-3)

This course analyzes how cultural identities and behaviors are formed in the context of global systems. Through specific case studies, students will explore how different social groups construct their cultures in interaction with other cultures, and how, in so doing, these groups are both responding to and shaping global agendas. Focusing on linkages between local and international systems, this course will investigate issues such as the globalization of western media (especially cable TV, films, Internet); the rise of transnational corporations and their effects on indigenous economies; the anthropology of development; population displacement (e.g., refugee populations, migrant workers, and other deterritorialized communities); tourism and ecotourism and their effects on local populations; the growth of transnational social movements; the economics of the environment in global contexts; and the effects of "free trade" and structural adjustment policies in the Third World. This course will expose students to different theories of

globalization, transnationalism, and modernity, and will discuss why the study of regional, national and international linkages has become a critical component of contemporary anthropological research.

ANTH 40840. Person, Self, and Body

(3-0-3)

How is “person” different from “self?” What do these have to do with the body? In anthropological usage, the “person” is often regarded as public and the “self” as private, though we will explore this distinction in a variety of settings. The body seems straightforward enough, but anthropologists and other scholars have shown in recent decades that it is conceived of differently in different places. Some cultures see the self at the control tower operating the body; some see the self as the body. In some societies, people in social groups regard themselves as sharing bodily substance (as in southern India). In some societies a single physical ideal shapes people’s perception of themselves (as in the U.S.), with many finding themselves falling short. In every society, there are norms that shape notions of the life cycle, thought and feeling, gender, sexuality, ethnicity, social class, power, morality, health and illness, and nation, and these intersect in fascinating ways with how people are seen both as individuals and as members of their social groups. We will read contemporary and classical theoretical works as well as ethnographic accounts of persons, selves, and bodies. Students will do projects of their own design, incorporating ideas from course material.

ANTH 40855. Cultural Difference and Social Change

(3-0-3) Smith-Oka

Research or service in the developing world can generate questions about our own role as “the elite” and “privileged” in contexts where our very presence marks us as “outsiders.” In such situations we frequently grapple with balancing our research objectivity with the oftentimes-stark realities we have witnessed and experienced. This course is designed especially for students returning from service projects or study abroad programs in the developing world to help make sense of these experiences. This process will be achieved through additional scholarly research (frequently self-directed) to better understand the sites that the students visited during their overseas projects, orienting them in relation to broader global, regional, and national patterns; the eventual outcome will be the analysis of each student’s data that is framed by the larger context. Course readings will cover such topics as world systems theory, globalization, development, NGOs, various understandings of “human rights,” applied anthropology, activism, and the relation between cultural relativism and service. Through discussions, readings, presentations, and writing students will develop an analysis based on their overseas experience, and will focus on the site where they worked, a problem that they observed in cross-cultural perspective, and an examination of strategies for redressing this sort of problem. The overall goal of the course will be for students to gain an understanding of how social science analysis might help to understand and confront problems in cross-cultural contexts. Students can only enroll with the permission of the instructor.

ANTH 40860. Genocide, Witness, and Memory

(3-0-3) Mahmood

How are episodes of mass killing experienced, survived, and remembered? In this course we consider political, social and cultural trauma as expressed in memoir, documentary, fiction, and academic text. Witness as an ethical stance is examined; the role of memory in shaping morality is questioned. (Does “Never Again” actually work?) We also look at the perpetrators of genocidal killing: who are they? What prompts their actions? Moreover are any of us incapable of this kind of violence?

ANTH 40870. Indian Ocean: Trade and Interaction

(3-0-3)

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30102 or ANTH 30103
This course offers an multi-disciplinary approach to studying one of the oldest forums for inter-continental trade and interactions: the Indian Ocean. This geographical entity has linked peoples of Africa, Europe and Asia through the exchange of technology, ideas, goods and peoples from the dawn of the first

systematic inter-continental trade between the Bronze Age polities of Egypt, Mesopotamia and India-Pakistan, ca. 4th millennium B.C. to the present era. The class has two objectives: a) to understand the nature of trade and exchange mechanisms in the Indian Ocean world from both temporal and spatial perspectives, and b) to underscore the interdependency between trade/exchange and political-economy, climate, society and history. The required readings include works from various disciplines, including economics, history, political sciences, and geography as well as archaeology and cultural anthropology. Students will be encouraged to add to the broader understanding of Indian Ocean trade provided by the course by undertaking comparative research projects that examine two periods, two areas or two processes within this larger interactional complex.

ANTH 40885. Environmental Archaeology

(3-0-3) Glowacki

Environments and human use of them have both changed dramatically over time. This course explores the relationships between past societies and the ecosystems they inhabited and constructed. It will show how archaeologists investigate the relations between past societies and their environments using concepts from settlement archaeology, human geography, and paleoecology (the study of ancient ecosystems). We will review theories and techniques used in environmental archaeology and will learn about new approaches for the study of prehistoric human ecology. Modern data processing techniques such as geographical information systems, data base software, spatial statistics, and computer-aided mapping programs will be introduced, along with new theoretical approaches that attempt to decode the social meanings of built environments. The materials will be presented through a mixture of lectures, demonstrations, and assignments designed to introduce you to the basic concepts and techniques presented in the course. The term paper will explore some aspects of environmental archaeology of interest to the student.

ANTH 40890. Archaeology of Death

(3-0-3) Schurr

Our species is unique because it is the only species that deliberately buries its dead. Mortuary analysis (the study of burial patterns) is a powerful approach that archaeologists use for the study of prehistoric social organization and ideology. This course explores the significance of prehistoric human mortuary behavior, from the first evidence of deliberate burial by Neanderthals as an indicator of the evolution of symbolic thought, to the analysis of the sometimes spectacular burial patterns found in complex societies such as ancient Egypt and Megalithic Europe. We will also examine the theoretical and practical aspects of the archaeology of death, including the applications of various techniques ranging from statistics to ethnography, and the legal and ethical issues associated with the excavation and scientific study of human remains.

ANTH 40894. Anthropology of Death

(3-0-3) Rotman

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

Death is a universal human experience; yet how individuals, families, and communities understand death varies through time and across space. In this course, we will examine how death is treated or has been treated cross-culturally. Among the topics to be covered will be conceptualizations of death; the dynamic relationship between the deceased and the community of the living; material manifestations of status, class, gender, ethnicity, and other social relations as reflected in funerary treatment; symbolic dimensions of dead bodies and mortuary ritual; ancestors and kinship; emotions, mourning, and commemoration; and ritual violence, such as cannibalism and sacrifice.

ANTH 40895. The World at 1200

(3-0-3) Glowacki

The 12th and 13th centuries were a dynamic period in world history as civilizations across the globe experienced significant growth, reorganization, and even collapse. Trade, wars, missionary work, and exploration fostered extensive and far-reaching interactions among neighboring and more distant cultures. Genghis Khan, the Crusades, the Khmer Empire, the end of the Toltec Empire, and the

peak of the ancestral Pueblo occupation of the Mesa Verde cliff dwellings are but a few of the forces and civilizations shaping the world at A.D. 1200. Traditionally, these civilizations and events are studied diachronically and in relative isolation from contemporaneous global developments. This course departs from tradition and adopts a synchronic analysis of the dramatic changes experienced across the globe during the twelfth and thirteenth centuries. By examining these cultural shifts in light of simultaneous transitions in other areas of the world, new questions and answers can be generated concerning the activities and processes that shape people's lives in past and present civilizations.

ANTH 45105. Advanced Human Ethology

(3-0-3) McKenna

Prerequisite: ANTH 20105

This class is intended for students who completed Human Ethology, a prerequisite for enrollment. It provides the opportunity to discuss the material and topics presented in the lecture course and will culminate with each student choosing a research topic and presenting it in the form of PowerPoint to the class. A second requirement in addition to weekly readings, discussion and or reviews of many articles read previously will be the completion of a significant observational study of some aspect of human behavior covered by class material. The topics to be investigated include but are not limited to the evolutionary and cultural perspectives on human aggression, sleep, laughter, grief, sex differences in behavior, institutional sports, play, parenting, infant care practices, and communication (especially non-verbal). The class fulfills a methods requirement for the anthropology major.

ANTH 45200. Evolutionary Medicine

(3-0-3) McKenna

This course will reconceptualize a variety of human diseases, syndromes and disorders from the standpoint of evolution, in the modern cultural context. The evolution of infectious diseases will be considered, especially the evolution of HIV and the role of antibiotics in promoting antibiotic-resistant strains of bacteria. Menopause, women's reproductive cancers, allergy, pediatric topics (colic, physiologic jaundice, sleep problems, SIDS), breast feeding, obstetrics, geriatric medicine, structural and genetic abnormalities, psychiatric disorders, psychological health, eating disorders, nutrition, obesity, myopia, emotional disorders, touch therapy and massage will be examined in the context of this exciting and emerging new field. Four-person teams of students will explore one area of evolutionary medicine and present a joint poster session as his or her final project.

ANTH 45308. Native North American Art

(3-0-3) Mack

Prerequisite: ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

Traditional Native North American art will be studied through form, technique, and context, as well as the perception of this art as exemplified through changing content, technique, and context. Students will work with the collections in the Snite Museum of Art.

ANTH 45390. Ethnographic Method and Writing for Change

(3-0-3) Mahmood

Prerequisite: ANTH 30103 or ANTH 30104

The notion that a written text can itself be a "site of resistance," a location where political commitment and rigorous scholarship intersect, undergirds this course on ethnographic method. We study the construction and interpretation of field notes, subjectivity and objectivity in research, ethical issues in fieldwork, feminist and postcolonial critiques of ethnographic practice, "voice" and oral history, and aspects of ethnographic inquiry that impact on change processes. Students engage in field projects in the local community and produce experimental ethnographic text as a central part of coursework. We also examine the writing process, rhetorical style, the responsibilities of the author, and polyvocality and inclusivity. Ethnography as a nexus of theory and practice, of scholarship and action, emerges from our work in the course.

ANTH 45510. Historical Archaeology

(3-0-3) Rotman

Prerequisite: ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104 or ANTH 10109 or ANTH 10195

This course examines the methodological and theoretical foundations for the archaeology of European colonization and the post-colonial material world. Course materials focus on material life and the diversity of sociocultural experiences in North America since 1492. The class examines how historical archaeologists have interpreted life in the world of global capitalism and colonization over the last half millennium and how archaeological insights can be used to understand and critique our own world. The distinctive analytical techniques of historical archaeology will be studied, including documentary research, artifact analysis methods, and field excavation techniques. The course will probe the interdisciplinary nature of historical archaeology, assess the social significance of archaeological knowledge, and scrutinize cultural, class, and gendered influences on archaeological interpretation.

ANTH 45520. Gender and Archaeology

(3-0-3) Chesson

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

In this course, students will explore the potential for studying and reconstructing a prehistory of people through archaeology. We will consider the historical and theoretical foundations of creating an engendered past, the methodological and practical aspects of "doing" engendered archaeology, and the intersection between political feminism, archaeological knowledge production, and the politics of an engendered archaeology. Topics for consideration include feminist perspectives on science, anthropology, and archaeology; concepts of gender in prehistory and the present; women's and men's relations to craft production, state formation, and space; and the complex relationship between feminism, archaeology, and the politics of women and men in archaeology and the archaeological past. Under the broad theoretical, political and historical umbrella of feminism, archaeologists today are negotiating their own paths toward an engendered past from multiple directions, and this course will explore the diversity of these approaches toward creating a prehistory of people.

ANTH 45810. Molecular Methods in Anthropology

(3-1-4)

Prerequisite: ANTH 30101

In this laboratory-based course, students will use their own DNA to learn various molecular methodologies, such as PCR, RFLP analysis, and DNA sequencing. In addition to learning how to complete several laboratory protocols, students will also learn data analysis and how to prepare a scientific publication.

ANTH 45817. Human Osteology

(3-1-4) Sheridan

Prerequisite: ANTH 30101

This is a lab-intensive course that explores the methods used in physical anthropology for studying individual human skeletal remains, as well as those employed to establish biocultural connections at the population level. Forensic techniques utilized in individual identification will be developed in the first third of the course.

ANTH 45818. NSF-REU Biocultural Research Program

(V-0-V) Sheridan

Prerequisite: ANTH 30101

This hands-on research course will engage students in an experiential learning environment that immerses them in anthropological method and theory. Using the large Byzantine St. Stephen's skeletal collection from Jerusalem as the cornerstone, historical and archaeological information will be synthesized in a biocultural reconstruction of ancient monastic life. Students will conduct original research, share in an active field trip program, and participate in a lecture program delivered by top scholars in the fields of biological anthropology, classics, and Near Eastern studies. Students will develop a suite of methodological skills in the

natural and social sciences, explore artifacts and life ways of the study population, delve into the pertinent literature using several world-class libraries, develop skills for collaborative research, and discover the importance of a holistic approach to a fuller understanding of life in the past.

ANTH 45820. Researching Disease: Methods in Medical Anthropology

(3-0-3) Lende

Prerequisite: ANTH 30103

This class will provide extensive classroom and hands-on training in research methods for medical anthropology. It will place slightly greater emphasis on qualitative methods, such as participant observation and interviewing, but will provide an overview of quantitative methods, including building surveys and some basic statistical analysis. Students will learn by doing, conducting original research on contemporary health issues in the local community such as HIV/AIDS and substance abuse.

ANTH 45826. Anthropology of Reproduction

(3-0-3)

Prerequisite: ANTH 30101 or (ANTH 30102) or (ANTH 30103) or (ANTH 30104)

In this course we will examine a variety of issues related to reproduction. We will concentrate on anthropological studies related primarily to reproductive health throughout the life cycle, such as sexuality, pregnancy and childbirth, midwifery, reproductive freedom, and the politics of the nation-state as they affect women's (and men's) reproductive lives. We will use ethnographic readings and examples from around the world to illustrate our discussions and gain an understanding of the complex intertwining of local and global politics regarding reproductive experiences and choices. An integral part of the course will be an ethnographic research project wherein you will apply anthropological theories and methods.

ANTH 45831. Native North American Art

(3-0-3)

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 13181 or ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

Native North American art existed for thousands of years and continues to be created today. Its original context was often sacred (both public and private) and/or political or decorative. Contact with Western Europeans and their art traditions along with the art traditions of Africans, Asians and South Americans beginning about A.D. 1600 and thereafter modified form, technique, and context of Native North American art. However, traditional form, techniques, and context continued through the centuries since 1600. The perception of this art also changed. Most frequently, until into the 20th century, the art of Native North Americans was viewed as craft by non-native North Americans and Europeans, but during the 20th century that view was modified. Native American artists also began to view their own art differently. This change occurred among artists working in traditional mediums as well as those producing art using non-traditional mediums. The collections of Native North American art curated at the Snite Museum exemplify the changing content, techniques, and contexts of this art. This course will allow students to work with our collections under direct supervision. The use of our collections will permit students to observe some of the changes in art which have occurred in the last hundred and fifty years. The students' final projects will include a visual presentation of a particular change in material, context, or technique, which they have determined through research and direct examination of selected pieces from our collections. For this reason the course will be limited to 15 students and will be sometimes held in the Snite Museum, during hours when the museum is not usually open to the public. The culminating activity will be to create a small exhibit that will be displayed at the Snite opening sometime at the end of the semester.

ANTH 45832. Anthropology of War & Peace

(3-0-3) Nordstrom

Prerequisite: ANTH 30103 AND (ANTH 30101 or ANTH 30102 or ANTH 30104)

This class will explore the human capacity for war and for peace. The course will explore the many forms of war, from tribal conflicts through guerrilla warfare to conventional and nuclear war. It will also study societies without war, the place of war and peace in human society, whether violence is inherent in human nature or learned, and what the future of war and peace is likely to be on our planet.

ANTH 45833. Global Crime and Corruption

(3-0-3) Nordstrom

Prerequisite: ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

As the world of the 21st century globalizes, so too does crime. Millions of people and trillions of dollars circulate in illicit economies worldwide. This represents power blocks larger and more powerful than many of the world's countries. This class will look at what constitutes the illegal today who is engaged in crime and corruption, and what kinds of economic, political and social powers they wield. It will also look at the societies and cultures of "out-laws". For example, internationalization has influenced crime in much the same ways that it has multinationals and nongovernmental organizations: criminal networks now span continents, forge trade agreements and hone foreign policies with other criminal organizations, and set up sophisticated systems of information, exchange, and control. Anthropology—with its studies of cultures—provides a dynamic approach to the illegal: what customs inform law abiders and criminals, what values guide their actions, what behaviors shape their worlds? The course will explore the many kinds and levels of criminality and corruption: how do we consider the differences (or similarities) among, for example, drug and arms smugglers, white collar corruption, gem runners or modern day slavers, and governmental or multinational corporate crime? What impact does each have on our world and in our lives? What solutions exist? Class is interactive in nature, and in addition to the normal reading and writing, students will do an anthropological class project on a topic of their choice concerning global crime and corruption.

ANTH 45837. Anthropology for the 21st Century

(3-0-3) Nordstrom

Prerequisite: ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

Anthropology enters a 21st century filled with far-reaching possibilities and dangerous new problems. To meet these challenges, to stay relevant, and to offer new understandings and solutions, anthropology needs to both assess its classic approaches and develop new innovative ones. Globalization. New forms of political and economic power and poverty. Changing patterns and crises of health, environment, and development. Violence, and novel ways of belonging. Transformations in our very sense of identity (from gender through belief to ethnicity), and perhaps our thinking, our epistemes. Sheer complexity. Theoretical breakthroughs. Schepher-Hughes calls for an engaged anthropology; Paul Farmer for a meaningful one. Bourgois delves into the raw realities of life with dignity, and Mbembe into emerging values of self and society. Das calls for vibrant theory—one that senses as well as has sense, and Rabinow and Marcus for an anthropology of the contemporary—how do we as anthropologists best meet the changing terrains of self and world unfolding today?

ANTH 45838. Ethnography of Notre Dame

(3-0-3) Nordstrom

The ultimate goal of this course is for students, together, to produce a book on the culture and student life of Notre Dame. In doing this project, students will learn all the core skills of a practicing anthropologist: ethnography/research, analysis, exploration of theory, professional writing, and the production of a polished work of anthropology worthy of being in a library. This work will be done as a group—while each student will be responsible for developing a particular topic for the book, the class as a whole will decide how the book should be developed and produced.

ANTH 45842. Doing Things with Words

(3-0-3) Blum

Prerequisite: ANTH 30104) or (ANTH 30103

This course looks at some of the ways humans do things with words. Topics include religious language; silence; politeness and sincerity; truth, deception, lying, and cheating; linguistic variety, identity, and stereotypes; moral evaluations made of language; and language used for power and solidarity.

ANTH 45850. Archaeology of Everyday Life

(3-0-3) Chesson

While archaeology is most famous for investigating the temples and tombs of “lost civilizations,” the vast majority of the archaeological record encompasses the material traces of ordinary people in their everyday lives. In this course, students will explore the archaeological remains of peoples’ houses, daily tasks, deaths, jobs, communities, and religions. We will pay particular attention to how archaeologists reconstruct the social, economic, ritual, and political fabric of daily life in the archaeological past, and thus will be drawing on anthropological frameworks for understanding issues of identity, gender, sexuality, race, mortuary practices, constructing communities, and social differentiation.

ANTH 45851. Space, Place and Landscape

(3-0-3) Rotman

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

In this course, we will explore human relationships to the built environment and the complex ways in which people consciously and unconsciously shape the world around them. Cultural landscapes are not empty spaces, but rather places we imbue with meaning and significance. We are particularly interested in the ways in which the built environment has worked as an agent of cultural power, as well as how social relations (notably class, gender, and ethnicity) have been codified and reproduced through landscapes. We will examine how people perceive, experience, and contextualize social spaces at the intersection of symbolic processes, senses of place, memory, and identity formation as well as how these change through time and across space. As an interdisciplinary endeavor, we will draw from history, geography, art, environmental science, architecture, landscape studies, anthropology, and urban planning, among other disciplines. Students will undertake a significant original research project that investigates the human experience through space, place, and landscape.

ANTH 45854. Museum Anthropology: An Introduction

(3-0-3) Mack

Prerequisite: ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

An introduction to the history, philosophy, and professional practices of museums. It includes an examination of the ethical and practical issues of museum work, including current controversies, through readings, discussions, and hands-on experience. Emphasis is on the role of anthropologists in museums and the exhibition of non-Western European art in museums, which focus on art, ethnography, or history. Students will work individually and collaboratively on projects, including an exhibition for display within the anthropology department.

ANTH 45855. Archaeology and Material Culture

(3-0-3)

Prerequisite: ANTH 30101 or ANTH 30102 or ANTH 30103

This will be an archaeology lab class that will provide an activity-based setting to explore the meanings and interpretations of archaeological artifacts. It will provide an in-depth introduction to basic laboratory methods for the organization, curation, and analysis of artifacts such as pottery, stone tools, metals, soil samples, and floral and faunal remains. Lab exercises will introduce course concepts that students will use to analyze a small collection of artifacts from an archaeological site.

ANTH 45856. Pottery in Archaeology

(3-0-3) Chesson

Prerequisite: ANTH 10109 or ANTH 10195 or ANTH 30101 or ANTH 30102 or ANTH 30103 or ANTH 30104

In many archaeological sites, pottery is the most common type of artifact recovered. The analysis and interpretation of ceramic remains allow archaeologists to accomplish several goals: establish a chronological sequence, track interaction between different areas, and suggest what types of activities people may have conducted at the site. This course will focus on the ways that archaeologists bridge the gap between the analysis and the interpretation of ceramic data.

ANTH 45857. Archaeological Materials Analysis: Lithic Technology

(1-3-4) Kuijt

Prehistoric stone tools represent the oldest form of human technology. Much of human prehistory worldwide and throughout ancient times is decipherable primarily through stone tools. Experimental replication of stone technologies is viewed as an essential method to understanding past technologies. Organized as a series of practical laboratory exercises, in this class we deal with a broad survey of the fundamental concepts of stone tool technology, including mechanical properties of tool stone, stone heat treatment, prehistoric quarrying and mining strategies, and elementary concepts of flaking stone. Students gain familiarity with these topics in a laboratory context by participating in flint knapping practice and working intensively with several archaeological collections. In addition to the laboratory exercises, students will present the results of a team project based on hands-on manufacture of tools, or analysis of materials from archaeological collections.

ANTH 45860. Food and Culture

(3-0-3) Blum

Prerequisite: ANTH 30103 or ANTH 10109 or ANTH 10195

All humans eat, but the variations in what, how, and why we eat are dazzling.

This course examines the many roles that food played in a variety of cultures. We consider food choices and taboos, religious and symbolic meanings of food, dining and social interactions, obesity and thinness, and the political and industrial issues of fast food and the slow food movement. There will be practical and field studies associated with the course.

ANTH 45862. Anthropology of Emotion

(3-0-3)

Prerequisite: ANTH 30103 or ANTH 30104

Do people within different cultural and historical contexts “feel” in the same ways? Are the emotions we recognize universal, or are they learned? How has language shaped the way we define and think about emotions, and what role do these ideas play in shaping our thinking about personhood and gender, our perceptions of the body, and our experiences of health and illness? This course addresses these questions by surveying the most important anthropological, historical, and psychological approaches to the study of emotion. We will also think about affect as that quality or state which exceeds or escapes being captured by categories, including nameable “emotions,” and which can never quite be completely controlled. The course will conclude with specific ethnographic and historical case studies, including examinations of love, anger, jealousy, sympathy, and shame. Course requirements include active class participation, several short exercises in methods, presentations, a midterm exam, and a final research paper on a course-related topic of each student’s choice.

ANTH 45865. Anthropology of Childhood and Education

(3-0-3)

Prerequisite: ANTH 30103 or ANTH 30104

Concepts of human growth vary extraordinarily across time and space. When children become full-fledged persons, when they can reason, when or whether they should be independent from their parents, and how all this happens are variable and illuminating. Education—either formal or informal—reflects and also consti-

tutes a society's view of childhood. This course provides a selective cross-cultural survey of childhood and education, looking at stages from pregnancy and infancy to late adolescence. Students will devise and conduct projects of their own.

ANTH 45870. Terrorism

(3-0-3)

Prerequisite: ANTH 30103

Looking at terrorism through the anthropological lens means studying violent actors close up and face-to-face. It also means exploring the culture of counter-terrorism, with its own discourse, belief system, and rituals. This course questions basic assumptions of the "war on terror" using ethnographic literature to challenge conceptions and policies on terrorism today. Is "terrorism" in fact a definable term? How can we use the experience-near methods of anthropology to study people cognitively and politically placed as irretrievably distant? Differences among terrorism, crime, and revolution are explored through examination of specific cases. Building peace in a climate of violence is the ultimate aim of our study.

ANTH 45875. Anthropology of Poverty

(3-0-3) Oka

What is poverty? What does it mean to be poor, destitute and powerless? Does poverty in the developed world refer to the same conditions and factors that determine poverty in developing and undeveloped countries? What does genteel poverty mean? Does the ability to possess material goods and to consume indicate lack of poverty? What is the cycle of poverty? Can one break out of it? This course will address these and other questions on poverty through anthropological analysis. The course is divided into two parts: a) poverty in the pre-industrial era, and b) poverty in contemporary societies. Topics covered in the first part include the beginnings of poverty and social inequality in the earliest complex urban societies of the Middle East, Africa and South Asia, urbanism, production, distribution and poverty in various time periods including classical Greece and Rome, the Middle Ages and the Early Modern Era, and slavery, colonialism and poverty. The second part will address issues such as the relationship between industrialism, colonialism and poverty in 19th and 20th centuries, instituted poverty in post-colonial and post-industrial societies, and global manifestations of poverty in the 21st century. The course materials include readings from anthropology (archaeology, cultural anthropology, and biological anthropology), history, economics, theology, political science, as well as documentaries and films.

ANTH 46100. Directed Readings in Biological Anthropology

(V-0-V)

Intensive independent readings on a special problem area in biological anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46200. Directed Readings in Medical Anthropology

(V-V-V)

Intensive independent readings on a special problem area in medical anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46300. Directed Readings in Sociocultural Anthropology

(V-0-V)

Intensive independent readings on a special problem area in sociocultural anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46400. Directed Readings in Linguistic Anthropology

(V-V-V)

Intensive independent readings on a special problem area in linguistic anthropology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 46500. Directed Readings in Archaeology

(V-0-V)

Intensive independent readings on a special problem area in archaeology about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48100. Directed Research in Biological Anthropology

(V-0-V)

Intensive independent research on a special problem area in biological anthropology, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48110. Directed Research in Bioarchaeology

(V-0-V)

Intensive independent research on a special problem area in biological anthropology and/or archaeology, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48120. Directed Research in the Sleep Lab

(V-0-V)

Intensive independent research at the Mother-Baby Behavioral Sleep Laboratory, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48200. Directed Research in Medical Anthropology

(V-V-V)

Intensive independent research on a special problem area in medical anthropology, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48300. Directed Research in Socio-cultural Anthropology

(V-0-V)

Intensive independent research on a special problem area in socio-cultural anthropology, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48310. Directed Research in Visual Anthropology

(V-V-V)

Intensive independent research on a special problem area in visual anthropology, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper or produce a video.

ANTH 48400. Directed Research in Linguistic Anthropology

(V-V-V)

Intensive independent research on a special problem area in linguistic anthropology, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48500. Directed Research in Archaeology

(V-0-V)

Intensive independent research on a special problem area in archaeology, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

ANTH 48900. Anthropology Senior Thesis

(3-0-3)

This course provides the student with the opportunity for independent study and the development of skills in research and writing. The effort is the student's own, from the choosing of a topic to the conclusion presented in the final paper. A thesis director is chosen to guide the student and provide assistance.

ANTH 56100. Directed Readings in Biological Anthropology

(V-V-V)

Intensive independent readings on a special problem area in biological anthropology, about which the student will be expected to produce a detailed annotated bibliography and write a scholarly paper.

Art, Art History, and Design

ARHI 13182. Fine Arts University Seminar

(3-0-3)

University seminars will address a variety of topics in the history of art depending on the interests of the professor. These courses require several short papers as well as a final written exercise appropriate to the material.

ARHI 20100. Introduction to Ancient Greece, Rome, Egypt

(3-0-3)

This course will examine the origins of western art and architecture, beginning with a brief look at the Bronze Age cultures of the Near East and Egypt, then focusing in detail on Greece and Rome, from the Minoan and Mycenaean world of the second millennium B.C.E. to the rule of the Roman emperor Constantine in the fourth century C.E. Among the monuments to be considered are ziggurats, palaces, and the luxuriously furnished royal graves of Mesopotamia; the pyramids at Giza in Egypt and their funerary sculpture; the immense processional temple of Amon at Luxor; the Bronze Age palaces of Minos on Crete—the home of the monstrous Minotaur—and Agamemnon at Aycanae, with their colorful frescoes and processional approaches; the great funerary pots of early Athens and the subsequent traditions of red and black figure vase painting; architectural and freestanding sculpture of the Archaic and Classical periods; the Periclean Acropolis in Athens, with its monumental gateway and shining centerpiece, the Parthenon; and finally, among the cultural riches of Rome, the painted houses and villas of Pompeii; the tradition of republican and Imperial portraiture; the Imperial fora; the exquisitely carved Altar of Peace of Augustus; the Colosseum; and the Pantheon of the Philhellene Emperor Hadrian.

ARHI 20200. Introduction to Medieval Art

(3-0-3) Joyner

The ten centuries designated as the Middle Ages span regions of land that are as diverse as the many cultures that existed during this millennium. From Late Antique Rome to Anglo-Norman England, and from Mozarabic Spain to the Kingdom of Bohemia, these thriving and evolving cultures bestowed upon western culture a tremendous visual legacy. This class will introduce students to the exciting wealth of monuments, objects, and images that survive from the Middle Ages, as well as to current scholarly debates on this material.

ARHI 20250. Introduction to Early Christian and Byzantine Art

(3-0-3) Barber

This course will introduce students to the visual arts of the period ca. A.D. 200 to ca. A.D. 1600. Our work will take us from the first fashioning of an identifiable Christian art through to the remarkable poetics of Late Byzantine painting. In so doing, the student will be introduced to the full array of issues that arise around the question of there being a Christian art. Working from individual objects and texts, we will construct a variety of narratives that will reveal a vital, complex, and rich culture that, in a continuing tradition, has done so much to shape the visual imagination of Christianity.

ARHI 20260. Art of the Medieval Codex

(3-0-3) Joyner

In classical times text and image were applied to papyri and scrolls, in the mid-15th century movable type and woodcuts printed text and images into paper books. During the intervening millennium text and images were written, drawn, and painted by multiple hands onto the bound parchment of medieval codices. As an introduction to the study of medieval manuscripts, this class will begin with an overview of codicological methods and then move through a series of thematic questions as they relate to specific manuscripts made in western Europe between the 5th and 15th centuries. We will consider production methods, text-image relationships, issues of patronage and use, and many other questions as we examine the central role manuscripts played in the evolution of medieval European culture.

ARHI 20300. Introduction to Renaissance Art

(3-0-3)

This course will survey the major trends in the art of Italy and northern Europe from roughly 1300 to 1575. It will concentrate on such major figures as Giotto, Donatello, Masaccio, Botticelli, Raphael, Michelangelo, and Titian in Italy, and the Limbourg Brothers, Jan van Eyck, Rogier van der Weyden, Hieronymus Bosch, Albrecht Durer, Mathias Grunewald, and Pieter Brueghel in the north. It will consider such themes as artistic production and technique, public and private spirituality, naturalism, narrative, and the changing status of the artist.

ARHI 20310. Survey of Italian Renaissance Art

(3-0-3)

Open to all students. This course will examine the painting, sculpture, and architecture produced in Italy from the very end of the 12th through the beginning of the 16th century, from Giotto's Franciscan spirituality to Michelangelo's heroic vision of man and God. A wide variety of questions will be considered in the context of this chronological survey, including changing conventions of representation, the social function of art, and the impact of the Renaissance ideology of individual achievement on the production of art and the role of the artist.

ARHI 20362. European Art and Architecture of the Seventeenth and Eighteenth Centuries

(1-0-3)

This course will survey major stylistic trends in 17th- and 18th-century painting, sculpture, and architecture in Italy, Spain, France, the Low Countries, England, and Germany. The course will begin with the art of the Counter-Reformation in Italy and will end with the Age of the Enlightenment, encompassing the reigns of Pope Urban VIII to the death of Louis XVI. Stylistic trends such as the Baroque, Rococo, and the origins of Neoclassicism will be discussed through the works of such diverse artistic personalities as Bernini, Caravaggio, Gentileschi, Velasquez, Poussin, Rembrandt, Rubens, Wren, Hogarth, Reynolds, Watteau, Boucher, Fragonard, Robert Adam, Neumann, Tiepolo, and Zimmermann. Discussion will also focus on the impact on art and artists by religious orders, emerging modern European states, capitalism, and global expansionism.

ARHI 20420. Nineteenth-Century European Art and Architecture

(3-0-3)

This course will survey the major monuments of painting, sculpture, and architecture that were produced in the dynamic 100 years following the French Revolution. We will investigate how artists and architects envisioned a new modern society, at the same time that the old social structures and supports crumbled around them. We also will consider how new materials and experimental techniques contributed to ways of representing the experience of modern life.

ARHI 20440. Introduction to Twentieth Century Art

(3-0-3)

This course provides an introduction to art, aesthetic philosophy, art criticism, and cultural politics from 1900 to the present. European and American art are the primary focus. Rather than a mere chronological survey of artistic movements, the course addresses a range of conceptual problems to engage students in different modern methods (Marxist, psychoanalytic, formal, feminist and so forth) for interpreting art and its history. Painting, sculpture, photography, video, and graphic design are among the media analyzed. Among the artists studied are Henri Matisse, Pablo Picasso, Georgia O'Keeffe, Alexander Rodchenko, Max Ernst, Jackson Pollock, Andy Warhol, Judy Chicago, Cindy Sherman, and others. Lectures, class discussions of assigned readings, and museum visits are key components of the course.

ARHI 20441. Twentieth-Century Art I: 1900–55

(3-0-3)

This course will introduce students to major developments in 20th-century art, primarily in Europe and the United States. Emphasis will be placed on modernist and avant-garde practices and their relevance for art up to the present. The first half of the course will trace Modernism's unfolding in the avant-garde practices of the late- 19th and early 20th centuries, ending with Modernism's eventual

destruction in the authoritarian politics of the thirties, of World War II and the Holocaust. The second half of the course will address art production after this chasm: the neo-avant-gardes in Europe and the United States will be considered in their attempts to construct continuity and repetitions of the heroic modernist legacies of the past. Among the movements analyzed: Cubism, Dada and Surrealism, Russian Constructivism, Abstract Expressionism, Pop Art, Minimalism, and Conceptual Art.

ARHI 20500. Introduction to Art and Catholicism

(3-0-3)

This undergraduate lecture/discussion course will give students the opportunity to analyze and discuss the history of Catholic doctrine as it pertains to the visual arts. From the Council of Elvira in A.D. 306 to John Paul II's *Letter to Artists* of 1999, Catholicism has engaged with and debated the role of the arts as a legitimate vehicle for spiritual experience and theological knowledge. In this course, we will examine the changing, complex, and various ideas that have been brought to the question of the function of art in the Church. It will become clear that Catholic attitudes to the arts have been subject to a range of influences that have helped shape a still fluid and potential relationship between Catholicism and art. Among other topics we will examine the accommodation of traditional pagan practices in Late Antiquity; the impact of Byzantine and Carolingian theological discourse on the arts; Mendicant thought and practice regarding the arts; lay piety in the later middle ages; issues raised by the Reformation; the Council of Trent, and the Counter-Reformation; the implications of Modernism; neo-Thomist aesthetics; and the aftermath of Vatican II. In all instances, the course will be shaped by the discussions of primary readings (in translation when necessary) that will set these texts in a context that is social, intellectual, theological, and cultural. Each reading will then lead to an examination of the artistic environment that preceded and succeeded the ideas shaped by these texts. It is expected that students will leave this course with a rich knowledge of the central ideas and works of art that have come to shape the continuing dialogue between Catholicism and art.

ARHI 30101. Hellenistic and Roman Art and Architecture

(3-0-3)

This course explores the architecture, urban planning, sculpture, and painting of Hellenistic Greece and Rome, from the time of Alexander the Great in the fourth century B.C.E. to the reign of the Roman emperor Constantine in the fourth century C.E. The art and architecture of Greece and Rome will be analyzed as expressions of their culture and time and as tools for understanding these cultures more completely. A variety of themes will be addressed, including changing conceptions of monumentality in art and architecture; imperial propaganda in art, architecture, and religion; technology as inspiration for new conceptions of art and architecture; the contrasting natures of Greek and Roman art and culture; the influence of Greek culture on Rome; and the nature and significance of the ever-changing mixture of Greek and native Italic elements in Roman art and architecture.

ARHI 30120. Greek Art and Architecture

(3-0-3) Rhodes

This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period, from the eighth through the second centuries B.C., with some consideration of prehistoric Greek forebears of the Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes towards the gods, human achievement, and the relationship between the divine and the human.

ARHI 30130. Etruscan and Roman Art and Architecture

(3-0-3)

Open to all students. Roman art of the Republic and Empire is one focus of this course, but other early cultures of the Italian peninsula and their rich artistic production are also considered. In particular, the arts of the Villanovans and the Etruscans are examined and evaluated as both unique expressions of discrete cultures and as ancestors of and influences on Rome. The origins and development

of monumental architecture, painting, portraiture, and historical relief sculpture are isolated and traced from the early first millennium B.C. through the early fourth century of the modern era.

ARHI 30131. Archaeology of Pompeii and Herculaneum: Daily Life in the Ancient Roman World

(3-0-3) Hernandez

The eruption of Mount Vesuvius in A.D. 79 buried two thriving Roman cities, Pompeii and Herculaneum, in a prison of volcanic stone. The rediscovery of the cities in modern times has revealed graphic scenes of the final days and an unparalleled glimpse of life in the ancient Roman world. The course examines the history of excavations and the material record. Topics to be discussed include public life (forum, temples, baths, inns, taverns), domestic life (homes, villas), entertainment (amphitheater), art (wall paintings, mosaics, sculpture), writings (ancient literary sources, epigraphy, graffiti), the afterlife (tombs), urban design, civil engineering, the economy, and themes related to Roman society (family, slavery, religion, government, traditions, diet).

ARHI 30202. The Contest of Word and Image in Early Medieval Art

(3-0-3)

This course will introduce students to the architecture of the Middle Ages (ca. 300–1400). This introductory course will begin with early Christian architecture and culminates in the great Gothic Cathedrals of northern Europe. Students will not only be invited to consider the development of the architectural forms of the church building, but will also be able to consider the degree to which the changing nature of the church building reflects broader issues in the history of Christianity in the Middle Ages.

ARHI 30213. Art into History: Byzantine

(3-0-3)

Byzantine art has often been opposed to the traditions of Western naturalism, and as such has been an undervalued or little known adjunct to the story of Medieval art. In order to develop a more sophisticated understanding of this material, we will examine the art produced in Byzantium in the period from the 9th to the 12th century, a period that marks the high point of Byzantine artistic production and influence. Stress will be placed upon the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear upon our various analyses of material from all media. How we as art historians, can write the history of this rich culture will be a central issue in this course.

ARHI 30220. Kingdom, Empire and Devotion: Art in Anglo-Saxon and Ottonian Europe

(3-0-3)

Although the Anglo-Saxon Kingdom and Ottonian Empire overlap in time during the 10th and 11th centuries, the images and objects produced by both cultures manifest the different political, social, and religious identities being deliberately constructed. By the mid-11th century, the Normans had invaded England, the Salian emperors had succeeded the Ottonians, and European art is more cohesively and problematically labeled as Romanesque. This class will examine Anglo-Saxon and Ottonian art as individual visual traditions. We will explore various cultural, political, and religious issues as they are worked through and revealed in the images and objects that survive from these regions.

ARHI 30240. Romanesque Art

(3-0-3)

This course examines sculpture, architecture, manuscript illumination, and mural painting along with the arts produced for church and court treasuries in western Europe during the 11th and 12th centuries. Pilgrimage to the holy shrines, the veneration of saints, and crusades to Jerusalem are among the issues discussed in relation to the arts. Monastic and ecclesiastical reform, heresy, and renewed interest in antiquity are also considered.

ARHI 30250. Gothic Art and Architecture

(3-0-3) Joyner

The first monument definitively labeled as “Gothic” is the Abbey church at St. Denis, yet no correlating monument or object exists to mark the finale of Gothic art. The term “Gothic” carries a wide range of connotations and it is applied to European art and architecture from the mid-12th century to roughly the 15th century. In examining the architecture, sculpture, manuscripts, metalwork, wall-paintings and textiles from these centuries, this class will compare the implications historically ascribed to “Gothic” with the ideas promoted by the cultures and individuals actually creating these objects. Although the focus of this course will be France, comparative material from Germany, England, Austria, and Italy will be included.

ARHI 30311. Fifteenth-Century Italian Art

(3-0-3) Rosenberg

This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and audience, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

ARHI 30312. Venetian and Northern Italian Renaissance Art

(3-0-3) Coleman

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan and Parma also provide insight into the traditions of the local schools and their patronage.

ARHI 30313. Art of the High Renaissance in Florence and Rome

(3-0-3)

Leonardo, Michelangelo, Bramante, and Raphael provide the basis for a study of one of the most impressive periods of artistic activity in Italy—the High Renaissance in Florence and Rome. It was Leonardo da Vinci’s revolutionary example that imposed extraordinary artistic and intellectual changes on an entire generation of painters, sculptors, and architects. Ludovico Sforza, Duke of Milan, the new Republic of Florence, and the imperial papacy of Julius II recognized that the genius of Leonardo, Bramante, Michelangelo, Raphael, and others, could be brought into the service of the State. Under Julius, the Papal State became the supreme state in Italy, and for the first time in centuries, the papacy ranked as a great European power. With the ceiling of the Sistine Chapel, St. Peter’s (redesigned on a colossal scale by Bramante), the Vatican Palace (its city facade and Belvedere by Bramante, and papal apartments decorated by Raphael), and the Papal tomb (designed by Michelangelo), Rome, for the first time since the time of the Caesars, became the center of Western art.

ARHI 30320. Northern Renaissance Art

(3-0-3)

This course traces the development of painting in northern Europe (France, Germany, and Flanders) from approximately 1300 to 1500. Special attention is given to the art of Jan Van Eyck, Rogier van der Weyden, Heironymous Bosch, and Albrecht Dürer. Through the consideration of the history of manuscript and oil painting and the graphic media, students will be introduced to the special wedding of nature, art, and spirituality that defines the achievement of the Northern Renaissance.

ARHI 30340. Survey of Baroque Art

(3-0-3)

This course will examine the art of Europe during the 17th century. The first third of the semester will be devoted to the work of Counter-Reformation Italy and the work of individual artists such as Caravaggio and Gian Lorenzo Bernini. The

second third of the term will focus on Spanish painting, particularly the work of Francisco Zurbaran and Diego Velazquez. The final section of the course will consider painting in the Low Countries looking at the art of Rubens, Rembrandt, Vermeer, and others. Among the issues that will be addressed are art and spirituality, shifting modes of patronage, art and politics, and definitions of gender.

ARHI 30350. Survey of Italian Baroque Art: From Caravaggio to Guarini

(3-0-3) Coleman

This course surveys Italian painting, sculpture, and architecture of the 17th and 18th centuries, a period that also witnessed the foundation and suppression of the Jesuit Order, the Counter-Reformation, absolute monarchy, and democratic nations. Thus, the course begins with the “new Rome” of Pope Sixtus V, which attracted pilgrims and artists from all over Europe, and ends with the early years of the Enlightenment. From northern Italy came Caravaggio and the Carracci, artists who were responsible for creating a new style based upon High Renaissance principles and a new kind of naturalism derived from the study of life. There was Bernini, whose architectural and sculptural monuments almost single-handedly gave Rome its Baroque character. Other artists and architects of this era under discussion include such diverse personalities as Borromini, Guarini, Algardi, Artemisia Gentileschi, and the great ceiling painters Pietro da Cortona, Baciccio, Pozzo, and Tiepolo.

ARHI 30360. The Age of Rembrandt: Northern Baroque Painting

(3-0-3)

Epitomized by the self-conscious art of Rembrandt, northern Baroque painting and printmaking not only became a domestic commodity sold in a more modern-looking marketplace, it also continued to serve its traditional political, moral, and spiritual functions. This course will concentrate on paintings and prints produced in Flanders, Spain, and the Dutch Republics during the 17th century, an era of extraordinary invention. The work of artists such as Rubens, van Dyck, Velazquez, Zurbaran, Leyster, Hals, and Rembrandt will be considered in the context of a number of interrelated themes including the business of art, the status of the artist, art in service of the state, the rise of genre, gender stereotypes, allegory, and art and religion and spirituality.

ARHI 30417. English Art and Society

(3-0-3)

This course focuses on the dynamic between art and society in the period in which the Industrial Revolution shaped the face of modern Britain. We will examine paintings and architectural monuments that register the devastating human consequences of modernization during this one hundred-year period. As we survey the response of British society to the forces of industrialization, our themes will be the worship of science and progress; the Romantic discovery of nature, the imagination, and the exotic; images of the rural and urban poor; the new constructions of masculinity and femininity; and the return to the Middle Ages for sources of national identity and social reform. The principal artists discussed will be Joseph Wright of Derby, William Blake, John Constable, Joseph Mallord William Turner, Edwin Landseer, the Pre-Raphaelites, and William Morris.

ARHI 30420. Nineteenth-Century European Painting

(3-0-3) Pyne

Corequisite: GSC 27999

This survey of 19th-century painting treats the major figures of the period within the context of the social, political, and intellectual ferment that shaped the culture—primarily, the political revolutions and the rise of industrial capitalism and the middle class in France, England, and Germany. Among the artistic movements discussed are neoclassicism, romanticism, realism, pre-Raphaelitism, impressionism, and symbolism. The major themes of the course address the relationships between tradition and innovation, and between gender, sexuality, and representation, as well as the meanings of the terms “modern,” “avant-garde,” and “modernism.”

ARHI 30441. Twentieth-Century Art I: 1900-55

(3-0-3)

This course focuses on early 20th-century art and cultural politics in Europe, Russia, and the United States. In the early modern period, many of the most ambitious and innovative artists strove to destroy old models of art, often replacing them with models that advocate revolutionary forms for a new, imaginary society. At other times, artists have employed art to undermine accepted norms of bourgeois culture and to liberate art and experience from convention. These are themes addressed in this course, along with the contradictory reality in which the art arose: an era defined by massive wars, racist ideologies, and violent suppressions. Among the selected artists analyzed are Pablo Picasso, Henri Matisse, Piet Mondrian, Marcel Duchamp, Hannah Hoch, Lyubov Popova, Salvador Dali, Walter Gropius, Diego Rivera, and Jackson Pollock.

ARHI 30480. Topics in Contemporary Art: Art Now

(3-0-3)

This course will examine contemporary artistic developments in order to begin to address the multi-faceted, international field that is contemporary art. Focused on a series of case studies that stretch across the diverse media used today—digital film, installation, painting, photography, video, and sculpture—this course will address those themes that gained currency as the driving forces of modernism waned, such as aesthetic activism, pastiche, simulation, the return of the ready-made, and the reinterpretation of genre. Special attention will be paid to the way that new formats and media change the scope, audience, and reception of art now.

ARHI 30481. Art After Video

(3-0-3) Gopinath

The introduction of video as an artistic medium in the late 1960s revolutionized the ways in which artists could address their audience. It also brought a newly literal dimension to artists' relationship with their own projected images. Much of the early literature in artists' video references its self-reflexive element: the "feedback loop" that was initially intrinsic to the medium itself. This course examines video art as it expands from these beginnings. The objects of its inquiry are not strictly bounded by definitions of medium; rather, this course will consider video in addition to other durational media, such as TV and film, which were influenced by artists' video practices. Artists working in video posed a series of thought-provoking questions in the medium's first decades: what is the relationship between performance and document? How is the mediated nature of video inflected by the art market's emphasis on luxury commodities? How do the qualities of a medium affect its content in a postmodernist period? This course will address such questions by drawing upon aesthetic theories of temporality, site-specificity, identity, performance, and institutional critique—as well as by screening numerous artists' videos dating from 1967 until recent times. It has a substantial reading and writing component.

ARHI 30550. History of Photography

(3-0-3)

Open to all students. This course deals with the development and use of photography as an artistic medium from the time of its invention in the mid-19th century up to the present moment. Besides viewing slides, the student will be able to view a large number of original photographs from the Snite Museum of Art.

ARHI 30551. History and Photography

(3-0-3)

Both history and photography were practices invented and developed in the 19th century, and they share a capacity to illuminate events in the past. Both history and photography can depict human suffering and point to political practices that might alleviate that suffering. Both must grapple with the nature of time. Both, in odd ways, transcend, but also cement, the finality of death. Both promise a form of truthfulness which they do not always achieve. Given these similarities, it is no wonder that so many writers have considered them together. When compared, however, the distinctive qualities of each often come to the fore. By reading about photography and history and by looking at images, students in this course will explore the limits and possibilities of each modern pursuit.

ARHI 30555. History of Photography: The Nineteenth Century

(3-0-3) Moriarty

This course deals with the development and use of photography as an artistic medium from time of its invention in the mid-19th century up to the present moment. Besides viewing slides, the student will be able to view a large number of original photographs from the Snite Museum of Art. Regular visits to view original images from each period will take advantage of the Snite Museum's extensive holdings of photographs from the various periods studied.

ARHI 30560. History and Theory of Twentieth Century Photography

(3-0-3)

This course seeks to introduce students to the difficulties of writing the history and criticism of photography as a separate discipline that operates simultaneously outside and inside the history of modernism: since photographic practices are defined by an extraordinary diversity of social functions and institutions (e.g. fashion and political documentary, advertisement, and avant-garde art), the impossibility of such a cohesive approach clearly poses a central methodological problem. This condition has been confronted by photographers, artists, and photography historians and critics with a wide range of responses.

ARHI 30565. Visualizing America: Survey of American Art and Culture

(3-0-3)

This course examines American visual and material cultures from the pre-colonial era to the present day. Providing a broad, historical account and considering a variety of media from paintings and sculptures to quilts, photographs, world's fairs, and fashion styles, this survey explores American art within the context of cultural, social, economic, political, and philosophical developments. In particular, it considers the role that American art has played in the formation of national identity and understandings of class, race, gender, and ethnicity.

ARHI 30801. Mesoamerican Art: Olmec and Their Legacy

(3-0-3)

The Olmec civilization was the mother culture of Mesoamerica, beginning in 1500 B.C. This course will introduce the student to the Mesoamerican worldview by tracing the origins of Mexican art, religion and culture from the development of the Olmec civilization up to Aztec times.

ARHI 30831. Images of Mexico: A Photographic Journey

(3-0-3)

This course on Mexican photography is taught from the lens of Mexican documentary photographer Antonio Turok. We will explore key themes and struggles in Mexican society and culture through the visual legacy of Mexico's photographers, domestic and foreign, past and present. The primary goal of the course is to analyze photography as a means of understanding Mexico's complex diversity of peoples, landscapes and history. The goal of the course is not only to motivate students to learn about Mexican photography but also to analyze the political, social, economic, cultural and religious contexts informing the work in order to formulate a broader understanding of Mexico and Mexicans. Among the questions we will be asking in our exploration of the photography of Mexico are what motivated the photographer to create the images, and how did the photographer shape the images to become visual symbols? Materials for the course include the visual legacies of photographers, photographic criticism and recorded interviews with the photographers talking about their work.

ARHI 33312. Venetian and Northern Italian Renaissance Art

(3-0-3)

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan, and Parma also provide insight into the traditions of the local schools and their patronage.

ARHI 40120. Greek Art and Architecture

(3-0-3)

This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period, from the eighth through the second centuries B.C., with some consideration of the prehistoric Greek forebears of the Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes towards the gods, human achievement, and the relationship between the divine and the human.

ARHI 40121. Greek Architecture

(3-0-3)

Open to all students. In this course the development of Greek monumental architecture, and the major problems that define it, will be traced from the eighth to the second centuries B.C., from the late Geometric through the Archaic, Classical, and Hellenistic periods. Among themes to be examined are the relationship between landscape and religious architecture, the humanization of temple divinities, the architectural expression of religious tradition and specific history, architectural procession and hieratic direction, emblem and narration in architectural sculpture, symbolism and allusion through architectural order, religious revival and archaism, and the breaking of architectural and religious canon.

ARHI 40150. The Topography of Ancient Rome

(0-6-3) Hernandez

The course examines in detail the buildings and monuments of ancient Rome from the Archaic Period to the beginning of Late Antiquity (8th century B.C. to 4th century A.D.). The primary aim of the course is to consider the problems related to the identification, reconstruction, chronology, and scholarly interpretation(s) of Rome's ancient structures. Students will investigate the history of excavations in Rome; analyze ancient literary sources; evaluate ancient art and architecture; and examine epigraphic, numismatic, and other material evidence related to Rome's ancient physical makeup. This close examination of the city of ancient Rome in its historical context also explores how urban organization, civic infrastructure, public monuments, and domestic buildings reflect the social, political, and religious outlook of Roman society.

ARHI 40255. The World at 1200

(3-0-3)

Our species is unique because it is the only species that deliberately buries its dead. Mortuary analysis (the study of burial patterns) is a powerful approach that archaeologists use for the study of prehistoric social organization and ideology. This course explores the significance of prehistoric human mortuary behavior, from the first evidence of deliberate burial by Neanderthals as an indicator of the evolution of symbolic thought, to the analysis of the sometimes spectacular burial patterns found in complex societies such as ancient Egypt and Megalithic Europe. We will also examine the theoretical and practical aspects of the archaeology of death, including the applications of various techniques ranging from statistics to ethnography, and the legal and ethical issues associated with the excavation and scientific study of human remains.

ARHI 40311. Fifteenth-Century Italian Art

(3-0-3)

Open to all students. This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and audience, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

ARHI 40312. Venetian and Northern Italian Renaissance Art

(3-0-3)

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art

produced in important provincial and urban centers such as Brescia, Cremona, Milan, Parma, Varallo, and Vercelli also provide insight into the traditions of the local schools and their patronage.

ARHI 40313. High Renaissance in Rome and Florence

(3-0-3)

This course will focus on the major artistic developments in Rome and Florence from 1480 to 1520. We will begin with the revolutionary works of Leonardo da Vinci in Florence and Milan, and will return to Florence to witness the emerging geniuses of Michelangelo and Raphael. In Rome during the pontificates of Julius II and Leo X, Bramante, Michelangelo and Raphael will reach full maturity with their papal projects as in the radical new design for St. Peter's, Pope Julius' Tomb, the fresco and tapestry decorations for the Sistine Chapel, and the frescoes in the papal apartments in the Vatican Palace. Additional discussion will be devoted to the artistic achievements of such artists as Andrea del Sarto, Luca Signorelli, Andrea and Jacopo Sansovino, and Sebastiano del Piombo.

ARHI 40320. Northern Renaissance Art

(3-0-3) Rosenberg

This course traces the development of painting in Northern Europe (France, Germany, and Flanders) from approximately 1300 to 1500. Special attention is given to the art of Jan Van Eyck, Rogier van der Weyden, Heironymous Bosch, and Albrecht Durer. Through the consideration of the history of manuscript and oil painting and the graphic media, students will be introduced to the special wedding of nature, art, and spirituality that defines the achievement of the Northern Renaissance.

ARHI 40360. Age of Rembrandt: North Baroque

(3-0-3)

Open to all students. Epitomized by the self-conscious art of Rembrandt, Northern Baroque painting and printmaking not only became a domestic commodity sold in a more modern-looking marketplace, it also continued to serve its traditional political, moral and spiritual functions. This course will concentrate on paintings and prints produced in Flanders, Spain, and the Dutch Republics during the 17th century, an era of extraordinary invention. The work of artists such as Rubens, van Dyck, Velázquez, Zurbarán, Leyster, Hals, and Rembrandt will be considered in the context of a number of interrelated themes, including the business of art, the status of the artist, art in service of the state, the rise of genre, gender stereotypes, allegory, and art, religion, and spirituality.

ARHI 40361. Eighteenth-Century European Art

(3-0-3)

Profound and universal inquiry into all aspects of knowledge marked the history of the century of Enlightenment and the Grand Tour. The rise of the collective idea of nature, the study and instrumentality of the antique, the foundations of religion, the state, morality and reason, the relationship of the arts to the state, and the philosophy of aesthetic were all critically analyzed and questioned. This course investigates various stylistic trends in 18th-century art in Italy, France, and England, with a focus on the institutionalization of art through the academies. Discussion also centers on classical art theory and its relationship to the academies in light of the social, political, and religious climate of the period. We will also consider the aesthetical, art historical, and social consequences of the writings of Kant, Burke, and Winckelmann. The course begins with the late baroque paintings of Carlo Maratti and his followers, and then moves to subsequent stylistic trends as neoclassicism, Egyptian revival, and the rococo. Attention is also given to the vedute painters, and such diverse personalities as Piranesi, Mengs, Kauffmann, Tiepolo, Watteau, and Chardin.

ARHI 40416. American Art

(3-0-3) Pyne

This course examines American painting, architecture, and sculpture from Puritan culture to World War I. The approach is to examine the development of American art under the impact of social and philosophical forces in each historical era. The course explores the way in which artists and architects give expression to the tensions and sensibilities of each period. Among major themes of the course are the

problem of America's self-definition, the impact of religious and scientific thought on American culture, Americans' changing attitudes toward European art, and the American contribution to Modernism.

ARHI 40418. American West

(0-6-3) Coleman

The American West is a region characterized at once by its physical setting, the historical processes that have occurred there, and the set of meanings American culture has ascribed to the region. It is home to a highly diverse set of peoples that have been interacting with one another for centuries. It is described by physical and political boundaries (the Mississippi River, the Pacific Ocean, and borders with Canada and Mexico), economic development (extractive industry, and tourism), and by imaginative constructs (the "frontier," the "Wild West," and the mythic characters inhabiting such places). This semester we will use a variety of approaches to explore the American West from the mid-19th century through the late 20th century. We will focus on two specific themes: 1) the political, economic, social, and environmental relationships that have shaped the region; and 2) the cultural meanings and mythic representations people have attached to it. The Mythic West, far from separate and distinct, has always been intimately connected to "real" western people, places, resources, and politics. We will study how the American West and its images have developed together, often in tension with one another, and how they have created the West that we know today.

ARHI 40470. Architecture of the Twentieth Century

(3-0-3)

This course is a survey of the significant themes, movements, buildings, and architects in 20th-century architecture. Rather than validate a single design ideology such as Modernism, Postmodernism, or Classicism, this account portrays the history of architecture as the manifestation—in design terms—of a continuing debate concerning what constitutes an appropriate architecture for this century. Topics include developments in building technologies, attempts to integrate political and architectural ideologies, the evolution of design theories, modern urbanism, and important building types in modern architecture such as factories, skyscrapers, and housing. Class format consists of lecture and discussion with assigned readings, one midterm exam, a final exam, and one written assignment.

ARHI 40490. Architecture Now: Trends in Contemporary Architecture

(3-0-3)

This is a survey of contemporary trends in global architecture with a focus on recent developments in design theory and building technologies. The course will examine a broad spectrum of architecture produced in the past decade.

ARHI 40580. History of Design: Form, Values, and Technology

(3-0-3)

This course will provide a historical perspective on the development of industrial, product, and graphic design in the 19th and 20th centuries. More than the aesthetic styling of products, design mediates the intersection of technology and cultural values in the modern era. The role of the modern designer as both a facilitator and a critic of industrial technology will be examined.

ARHI 40850. Native North American Art

(3-0-3) Mack

Native North American art existed for thousands of years and continues to be created today. Its original context was often sacred (both public and private) and/or political or decorative. Contact with Western Europeans and their art traditions along with the art traditions of Africans, Asians and South Americans beginning about A.D. 1600 and thereafter modified form, technique, and context of Native North American art. However, traditional form, techniques, and context continued through the centuries since 1600.

ARHI 43105. Seminar: Topics in Ancient Art

(3-0-3) Rhodes

Topics course on special areas of Greek and/or Roman art.

ARHI 43122. Seminar in Greek and/or Roman Art

(3-0-3)

Seminar on specific subjects in Greek and/or Roman art.

ARHI 43123. Athenian Acropolis in Context

(3-0-3)

Permission required. The monumental elaboration of the Athenian Acropolis did not begin with Pericles and Pheidias in the mid-5th century B.C. Greek monumental art and architecture were spawned in the context of religion, and by the early Archaic period, the Acropolis was the center of Athenian religion; almost immediately, religious awe and piety were expressed in the form of impressive free-standing sculptural dedications and in large and meticulously wrought stone buildings, elaborately decorated with carved and painted designs and, most impressively, with figural relief sculpture. The monuments of the Athenian Acropolis must be understood first in this context—as the embodiment of religious concepts—and then in the context of Greek art and culture as a whole. An ultimate goal of the seminar will be to arrive at an understanding of the evolving meaning of the Greek Temple and monumental form, and how they find unique expression in the 5th century Acropolis building program of Pericles. Among the themes that will be treated to one degree or another are the relationship between landscape and religious architecture, the humanization of temple divinities, the monumental expression of religious tradition and specific history, architectural procession and hieratic direction, emblem and narration in architectural sculpture, symbolism and allusion through architectural order, religious revival and archaism, and the breaking of architectural and religious canon. Taken together, they constitute the specific architectural narrative of the Periclean Acropolis.

ARHI 43200. Seminar: Topics in Early Christian and Byzantine Art

(3-0-3)

Topics course in special areas of early Christian and Byzantine art.

ARHI 43205. Seminar: Topics in Medieval Art

(3-0-3)

The topic and format of this course will vary from year to year.

ARHI 43305. Seminar: Topics in Renaissance Art

(3-0-3) Coleman

Topics course on special areas of Renaissance art.

ARHI 43312. Seminar: Venetian and Northern Italian Art

(3-0-3)

Seminar on specific subjects in Venetian and Northern Italian Renaissance Art.

ARHI 43314. Seminar: Mannerism/Painting and Sculpture

(3-0-3)

This course will explore the artistic trends in Italy after the High Renaissance (ca. 1520) and before the Baroque (ca. 1580), and will begin with definitions of terminology and a brief historiographic survey. Our attention will then turn to the Roman art of Raphael's heirs, Giulio Romano, Perino del Vaga, and Polidoro da Caravaggio, and the emerging Tuscan painters Pontormo, Rosso Fiorentino, and Domenico Beccafumi. We will also investigate the dispersal of the Roman school: Giulio Romano to the Gonzaga course in Mantua in 1524, and following the Sack of Rome by imperial troops in 1527, other maniera artists to Genoa, Bologna, Parma, and as far as the French royal chateau at Fontainebleau. Rome consequently experienced a revival at the end of the reign of Clement VII, and under the pontificate of Paul III, notably the arts, politics, and theology flourished. This period may be marked by such diverse works as Michelangelo's monumental *Last Judgment* (1536–41) and his frescoes (1542–45) in the Pauline Chapel, Vatican Palace, the decorations (1536–51) by various mannerist artists in San Giovanni Decollato, Perino's elegant frescoes in the Sala Paolina (1545–47), Castel Sant' Angelo, Giorgio Vasari's fantastic murals in the Palazzo Cancellaria (1546), and Francesco Salviati beautiful, secular frescoes in the Palazzo Ricci-Sacchetti (ca. 1553–54). Attention will also be given to the art of the Counter-Reformation in

Rome, and to painting and sculpture by Bronzino, Salviati, Cellini, Bandinelli, Vasari, Giambologna, and others at the Florentine courts of Dukes Cosimo I and Francesco I.

ARHI 43315. Seminar: Courts of Renaissance Italy

(3-0-3)

Seminar on specific subjects in Renaissance art.

ARHI 43340. Seminar: Topics in Baroque Art

(3-0-3) Coleman

Topics course on special areas of Baroque art.

ARHI 43341. Seminar in Italian Drawings

(3-0-3)

This seminar is devoted to the study of Italian Renaissance and Baroque drawings in The Snite Museum of Art. The course will introduce the student to the world of special collections where particular care is given to the conservation of works on paper, and where instruction is given in the appropriate ways to study drawings. We will examine papers of different colors, trace the origin and manufacture of paper by means of watermarks, and recognize different types of inks and chalks in order to appreciate the role which the physical object plays in understanding it as an historical and aesthetic work of art. Discussion will also center on the purpose and types of drawings. In fact, the acknowledgment of drawing as fundamental to the creative process, and appreciation of its status as an independent aesthetic endeavor, have their origins in the Italian Renaissance. By the 17th century, drawings of all types had come to be fully appreciated and collected by artists and connoisseurs alike. Each student will be required to research one or two drawings in the Snite collection, and the seminar will conclude with an exhibition (with accompanying catalogue) in The Snite Museum.

ARHI 43351. Seminar: Rome in the Age of Bernini

(3-0-3)

Permission required. Seminar on specific subjects in Baroque art.

ARHI 43404. Seminar: Narratives of Modern Art

(3-0-3)

Permission required. Seminar on specific subjects in 19th-century and 20th-century art.

ARHI 43405. Seminar: Topics in Modern Art

(3-0-3) Gopinath, Pyne This is a topics course on special areas of modern art. The specific areas of study vary from section to section and from semester to semester.

ARHI 43416. Seminar: Topics in American Art

(3-0-3)

Topic courses on special areas of American art.

ARHI 43420. Memorial Mania: History, Memory, and Contemporary American Culture

(3-0-3)

Focusing on the great variety—and great numbers—of memorials erected in recent decades, this seminar explores how cultural memory is created and what it has come to mean in terms of national identity in modern and contemporary America. The definition of “memorial” is purposely broad: from statues and monuments to parks, public squares, cemeteries, public ceremonies, and moments of silence. Memorials can be permanent or temporary—such as roadside shrines. Understandings of “memory” are also broad, ranging from subjects of local and civic memory to those of national and/or collective memory, and including popular interests in autobiography, memoirs, and family genealogy. Understandings of “America” are similarly wide-ranging, often conflicted, and always in flux. Recognizing the broad definitions of the key terms “memorial,” “memory,” and “America,” this seminar considers the following: What does memory mean in America today, and in American memorial culture? What is driving the urgency to “memorialize,” and in fact who and what is being remembered? Who and what are memorable in American history, and in terms of American national identity?

Potential subjects are vast and include war memorials, Holocaust memorials, presidential commemoration, memorials erected at sites of tragedy and trauma (Oklahoma City, World Trade Center, Columbine), ritualistic memorial practices (such as pilgrimage and gift-giving), issues of public response, different styles of memorials and monuments (figurative v. abstract memorials), and the role of the National Park Service, the nation’s primary “keeper” of historical and cultural memory. Course readings will include selections by contemporary historians, art historians, and theorists engaged in issues of memory, history, and material/visual culture, as well as films.

ARHI 43480. Seminar: Topics in Contemporary Art

(3-0-3)

Topic courses on special areas of Contemporary Art.

ARHI 43512. Seminar: Museums and Collecting

(3-0-3)

This seminar will focus on the history of collecting and the origins and nature of the modern museum. In the course of our discussions we will address a number of issues including why do people collect, who is the museum’s audience, what role does authenticity play in the philosophy of collecting and display, are museums bound by rules of public decorum, what impact has the Internet had on art museums and their audiences, and what are the museum’s rights and obligations in matters of cultural patrimony.

ARHI 43576. Theories of Art

(3-0-3) Pyne

Required of all art history majors. This seminar is a survey of the historiography of art history with special attention paid to the various types of methodology that have been applied to the analysis of art. Special attention is given to 19th-century and 20th-century art historical methods, including connoisseurship, biography, iconology, psychoanalysis, semiotic, and feminist approaches.

ARHI 45310. Art History Internship

(V-V-V)

This course provides an opportunity for the art history student to earn credit through an internship with a museum, a gallery, or an auction house.

ARHI 46572. Directed Readings

(V-0-V)

Permission required. Specialized reading related to the student’s area of study.

ARHI 47171. Special Studies—Ancient Art History

(V-0-V)

Independent study in ancient art history under the direction of an individual faculty member.

ARHI 47271. Special Studies—Medieval Art History

(V-0-V)

Independent study in medieval art history under the direction of an individual faculty member.

ARHI 47272. Special Studies: Early Christian and Byzantine Art

(V-0-V)

Independent study in early Christian and Byzantine art history under the direction of an individual faculty member.

ARHI 47371. Special Studies—Renaissance/Baroque

(V-0-V)

Independent study in Renaissance/Baroque art history under the direction of an individual faculty member.

ARHI 47372. Special Studies—Renaissance/Baroque

(V-0-V)

Independent study in Renaissance or Baroque art history under the direction of an individual faculty member.

ARHI 47431. Special Studies—Nineteenth Century

(V-0-V)

Independent study in 19th century art history under the direction of an individual faculty member.

ARHI 47471. Special Studies—Modern Art History

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

ARHI 47472. Special Studies—Modern

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

ARHI 47473. Special Studies—Modern

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

ARHI 47571. Special Studies

(V-0-V)

Permission required. Independent study in art history under the direction of an individual faculty member.

ARHI 48573. Honors Thesis Direction

(V-0-V)

The honors thesis, normally between 20 and 30 pages in length, is done under the direction of one of the regular art history faculty, who serves as an advisor. It is expected to demonstrate the student's ability to treat an important historical topic in a manner that shows his or her writing skills and methodological training. It is expected that the thesis will be suitable for submission as a writing sample for those students intending to apply to art history graduate programs.

ARHI 60481. Art After Video

(3-0-3) Gopinath

The introduction of video as an artistic medium in the late 1960s revolutionized the ways in which artists could address their audience. It also brought a newly literal dimension to artists' relationship with their own projected images. Much of the early literature in artists' video references its self-reflexive element: the "feedback loop" that was initially intrinsic to the medium itself. This course examines video art as it expands from these beginnings. The objects of its inquiry are not strictly bounded by definitions of medium; rather, this course will consider video in addition to other durational media, such as TV and film, which were influenced by artists' video practices. Artists working in video posed a series of thought-provoking questions in the medium's first decades: what is the relationship between performance and document? How is the mediated nature of video inflected by the art market's emphasis on luxury commodities? How do the qualities of a medium affect its content in a postmodernist period? This course will address such questions by drawing upon aesthetic theories of temporality, site-specificity, identity, performance, and institutional critique—as well as by screening numerous artists' videos dating from 1967 until recent times. It has a substantial reading and writing component.

ARST 11201. Drawing I

(3-0-3)

This course deals with form depiction in its many aspects and modes and is intended for beginning students as well as advanced students who need additional experience in drawing. Lab fee.

ARST 11301. Painting I

(0-6-3)

Open to all students. This course is an introduction to oil painting techniques and to stretcher and canvas preparation. The emphasis is on finding a personal direction. Lab fee.

ARST 11601. 3-D Foundations

(0-6-3)

This required core course for all art majors introduces the student to three-dimensional art by producing sculptures (both figurative and abstract) in a variety of media. Contemporary movements in sculpture are examined through slide lectures and attendance at visiting artist lectures and visits to exhibitions. Materials fee.

ARST 21101. Ceramics I

(0-6-3)

This course examines basic techniques of wheel-thrown and hand-built clay structures for sculpture and pottery.

ARST 21301. Painting I

(0-6-3)

This course is an introduction to oil painting techniques and to stretcher and canvas preparation. The emphasis is on finding a personal direction.

ARST 21303. Watercolor I

(0-6-3)

Open to all students. This course is an introduction to the watercolor medium and deals with a variety of methods, materials, and techniques (both realistic and abstract) with special emphasis on color and composition. Lab fee.

ARST 21401. Photography I

(0-6-3)

BA Core Option/BFA Core. This course is an introduction to the theory and practice of still photography. It is designed for all students interested in developing their photographic skills and serves as the entry-level sequence for the photo major in studio art. The course will focus on the use of digital cameras, film scanning and high quality inkjet printing. Presentations cover historical and contemporary approaches to the medium. Creative assignments encourage students to begin discovering their individual strengths and interests in the medium. A digital SLR with manual focus and exposure controls or an optional 35mm film camera is required. Film will be scanned and converted to digital files. Software is taught on the Apple platform. Lab fee.

ARST 21501. Silkscreen I

(0-6-3)

This course is an introduction to stencil processes and printing. Hand-drawn and photographic stencil-making techniques are explored. Mono-printing and discovery of unique aspects of serigraphy are encouraged. Emphasis is on exploration of color and development of student's ideas and methodologies. Lab fee.

ARST 21503. Etching I

(0-6-3)

Open to all students. This basic studio class introduces techniques of intaglio (etching). Students learn basic platemaking and printing techniques while learning to incorporate their own drawing skills and points of view. Historical and contemporary prints are reviewed. Emphasis is on development of the student's own ideas and methodology. Lab fee.

ARST 21505. Artists Books and Papermaking

(0-6-3)

This introductory course explores the making of artists' books and papermaking. Students learn basic bookbinding techniques for books and printing techniques for postcards and posters. They also learn how to make hand-made papers. Part of the focus is on historical books, as well as on what contemporary artists are doing with books.

ARST 21507. Relief and Collography

(0-6-3)

This course investigates various relief methods of printmaking, including linocut, woodcut, and collograph. Emphasis is on experimentation and combining media.

ARST 21508. Experimental Printmaking

(0-6-3)

MATERIALS FEE. This course examines the many ways to make prints without using a press, from potato prints and relief to digital transfers. It is designed to introduce the student to methods of constructing prints ranging from traditional forms to layering media to collage and beyond. It is a course that encourages creativity and teaches students to make unique images on paper.

ARST 21509. Print Business and Photogravure

(0-6-3)

This course is concerned with learning the business of the contract printing for photogravure prints. These prints look exactly like photographs, but are printed onto soft printmaking papers. The class will invite a photographer to produce a suite of six black-and-white photographic prints that the class will convert into photogravure prints. The class will learn the business of production, including costs, while engaging in the scheduling, platemaking, printing, packaging, and sales of a suite of photogravures.

ARST 21510. Lithography

(0-6-3)

This is an introduction to planographic print techniques including drawing, painting, photographic, and transfer on stone and metal plate. Basic black and white and color printing techniques are practiced. Contemporary and historical prints are reviewed. Emphasis is on development of the student's own ideas and methodology.

ARST 21512. Photolithography

(0-6-3)

Photolithography is a method of printmaking utilizing a metal plate that is photosensitive. Hand-drawn and computer-generated images as well as traditional photographs are used to create prints that reflect an individual's creativity. Emphasis is placed on the student developing his or her own vision and its expression. Lab fee.

ARST 21602. Wood Sculpture

(0-6-3)

Open to all students. This course uses wood as a primary medium. Emphasis is placed on individual concept and design. Students learn the use of hand and power tools as well as techniques of joining, laminating, fabricating, and carving. Lab fee.

ARST 21603. Metal Foundry

(0-6-3)

Open to all students. The course focuses on work in cast aluminum and cast bronze sculptures. Students learn basic welding techniques using oxygen and acetylene, arc and heliarc welding. Mold making, work in wax, and metal finishing techniques are also explored. Lab fee.

ARST 21604. Metal Sculpture I

(0-6-3)

Open to all students. Metal is the medium of choice in this course designed to explore three-dimensional design with a variety of projects grounded in historical precedents. Students become familiar with as many metalworking techniques as time and safety allow, such as gas and arc welding, basic forge work, and several methods of piercing, cutting and alternative joinery. Lab fee.

ARST 21606. Figure Sculpture

(0-6-3)

Open to all students. This course concentrates on modeling from the figure. Work is predominantly in clay, but mold making and casting techniques are also explored. Lab fee.

ARST 31102. Ceramics II

(0-6-3)

Prerequisite: ARST 21101

This course explores advanced processes in clay for pottery and sculpture as well as techniques of glazing. Lab fee.

ARST 31202. Figure Drawing

(0-6-3)

Open to all students. The emphasis is on drawing in all its aspects: materials, methods, techniques, composition, design, and personal expression. The human figure is the subject matter. While anatomy is studied, the course is not an anatomy class. Male and female models, clothed and nude, are used. Lab fee.

ARST 31302. Painting II

(0-6-3)

Prerequisite: ARST 11301

This course extends and develops the skills and concepts initiated in Painting I. Students are engaged in projects that allow them to hone their technical skills while they define and develop their individual concerns as well as the formal means through which to communicate those concerns. Lab fee.

ARST 31315. Scene Design

(3-0-3)

This is a beginner's course in basic scenic design techniques and hand drafting for the stage. This course will take the student through the process of design, from how to read a script to research, presentation, rendering, basic drafting and, if time allows, model building. No previous experience necessary. Offered fall only. Materials fee TBA.

ARST 31316. Scenic Painting

(3-0-3)

An introduction to the tools and techniques used in painted and textured scenery for the stage and screen. Students will learn and apply the variety of methods used in creating a wide range of painted effects, from the basic wood treatments to the advanced marbling and faux finishes. Outside of class painting time will be required.

ARST 31402. Alternative Photography

(0-6-3)

Prerequisite: ARST 31405

Students are introduced to a variety of photographic possibilities outside traditional black and white printing. Projects include building pinhole cameras, working with 4x5 film, non-silver processes and digital possibilities. Projects encourage students to continue defining their own areas of interest and to locate their own concerns within the broad range of photographic issues. A 35mm camera or digital SLR with manual focus and exposure controls is required. Offered periodically.

ARST 31403. Moving Media

(0-6-3)

Prerequisite: ARST 21401

Materials fee. Moving Media is a term that describes lens-based practices used in the creation of still and moving images by artists, photographers, designers and those working in visual communications. This is an introduction to making and thinking critically about time-based imagery, brought about in part by a new generation of image capture technologies. Students will work with photographs, electronic images, video footage, and recorded sound to create new works that blur the boundaries of photography and video. Assignments will explore a variety of visual possibilities including non-traditional narratives, sound-works, and conceptual constructions. Students will be responsible for producing several assigned projects and a creating an independent final project. Final projects will be screened at the end of the semester.

ARST 31405. Photography II: Digital Workshop

(0-6-3)

Prerequisite: ARST 21401

This is a level II course in the photography sequence and builds upon the experiences gained in Photography I. Color image making will be emphasized along with moving media projects and digital image constructions. Presentations, assignments and critiques are designed to help students continue defining their artistic voice, areas of creative interest and technical expertise. A digital SLR with manual focus and exposure controls or an optional 35mm film camera is required. Software is taught on the Apple platform. Lab fee.

ARST 31415. Introduction to Film and Video Production

(4-0-4)

Prerequisite: FTT 10101 or FTT 20101

An introductory course in the fundamentals of shooting, editing, and writing for film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. The course requires significant amounts of shooting and editing outside class. Students produce short video projects using digital video and Super 8mm film cameras, and edit digitally on computer workstations. The principles of three-camera studio production are also covered.

ARST 31421. Performance Art: History, Theory and Practice

(3-0-3)

Performance art is anti-art. Performance art is art that contradicts tradition—that aims to shock. This class will equip the student with an overview of its offenses. Class content may include Dada's early 20th-century assaults on the audience; absurdist experimental performance works by Yoko Ono, Lygia Clark, John Cage, and Nam June Paik from the 1960s; performance art addressing racism by Adrian Piper and William Pope L. from the 1980s; current performance works by Internet artists and others. Discussions will focus on the aesthetics and politics of marginality. In other words: why shock? Why experiment? Is there any market for such work today? We will also look at critical and theoretical texts about performance, modernism, and the avant-garde, and consider their relation to the works themselves. These may include manifestos by performers and artists; debates about the autonomy of art; poststructuralist writings on art and aesthetics; theories of performativity. Finally, students will be expected to create one or more performance art pieces themselves. Students should expect to be asked to participate in other students' pieces as well as in their own.

ARST 31502. Poster Shop

(0-6-3)

Students will create posters and broadsides using relief, silkscreen and inkjet printing. These media offer powerful imaging techniques that range from hand-drawn/cut stencils to digital impressions. A variety of surfaces and applications will be explored. Art historical sources such as propaganda and political posters, concert promotions and urban graphics will propel creative projects. Materials fee.

ARST 31606. Sculpture II

(0-6-3)

Prerequisite: ARST 11601 or ARST 21602 or ARST 21603 or ARST 21604

This course is designed for independent research. Sculptural projects will be self-directed with group critiques.

ARST 41103. Ceramics—Studio

(0-6-V)

This advanced course is for students pursuing an individual direction in ceramics. Emphasis is on individual concepts and techniques.

ARST 41203. Figure Drawing, Multilevel

(0-6-3)

Prerequisite: ARST 11201

The emphasis is on drawing in all its aspects: materials, methods, techniques, composition, design, and personal expression. The human figure is the subject matter. While anatomy is studied, the course is not an anatomy class. Male and female models, clothed and nude, are used. Lab fee.

ARST 41304. Watercolor, Multilevel

(3-0-3)

Prerequisite: ARST 21303

This course is a continuation of the watercolor medium and deals with a variety of methods, materials, and techniques (both realistic and abstract) with special emphasis on color and composition.

ARST 41305. Painting Studio

(0-6-V)

This course is devoted to defining personal painting directions (oil/acrylic). Students gain experience in criticism and in exhibition techniques.

ARST 41307. Painting, Multilevel

(0-6-3)

Prerequisite: ARST 11301 or ARST 21301 or ARST 31302

This course extends and develops the skills and concepts initiated in Painting I and II. Students are engaged in projects that allow them to hone their technical skills while they define and develop their individual concerns as well as the formal means through which to communicate those concerns. Lab fee.

ARST 41402. Alternative Processes

(0-6-3)

Prerequisite: ARST 21401

Students are introduced to a variety of photographic manipulations outside traditional black and white printing. Projects include building pinhole cameras, working with 4x5 film, non-silver processes and digital possibilities. Projects encourage students to continue defining their own areas of interest and to locate their own concerns within the broad range of photographic issues. Cameras are available for check out. Lab fee.

ARST 41403. Advanced Digital Photography

(0-6-3)

Prerequisite: ARST 31405 or ARST 41407

This course uses computers for creative image making. Students are introduced to the practices and procedures of digital imaging with an emphasis on exploring their own personal work.

ARST 41407. Studio Photography

(0-6-3)

Prerequisite: ARST 21401

Introduction to the tools, methods and artistic possibilities in studio photography. Assignments include both creative thinking and technical skill building. Demonstrations include artificial lighting techniques, studio flash, digital capture, use of medium- and large-format cameras, set building, and working collaboratively on a large group project. Work is done primarily using digital tools. The course serves as an introduction to professional studio work or development of a personal portfolio of creative images. Offered fall semester. Lab fee.

ARST 41408. The Photographic Portrait

(0-6-3)

Prerequisite: ARST 31405

The representation of human identity has been one of the most significant and sustaining subjects within the history of images. This course examines the various styles and thematic approaches to the photographic portrait from historical practice to contemporary and conceptual artworks. Students complete work in the studio or on location. Thematic assignments and personal and independent projects may be done in any format or photographic medium. Emphasis is on producing a final portfolio of creative images. Offered spring semester.

ARST 41416. Intermediate Film Production

(3-0-3)

Prerequisite: FTT 30410

This film production course will focus on 16mm black-and-white silent narrative filmmaking. We will explore the technical use and aesthetic application of the film camera and related equipment as well as the development of the short film

narrative script. Students will shoot a short film lighting and composition exercise and in-class film test, and ultimately produce, shoot, and edit one four- to six-minute, 16mm black-and-white film in teams of two. The projects will be edited digitally, but there will be NO effects, fades, dissolves, titles, or sound. The filmmaking process requires a lot of field work on locations and transporting heavy equipment. In addition to the projects there will be a midterm and a few papers required. Materials fee required.

ARST 41417. Advanced Technical Production

(3-0-3)

Prerequisite: FTT 40410 or FTT 20002

Advanced coursework in the tools, materials and processes used in the creation of theatrical scenery. Topics may include (but are not limited to) scenic welding, advanced rigging techniques, electronic controls, pneumatics, hydraulics, structural design for the stage, CAD, and other state-of-the-art technologies.

ARST 41418. Professional Video Production

(4-0-4)

PA course for the advanced production student interested in the techniques and technology of the broadcast video industry, utilizing the following post-production software: Avid Media Composer, Adobe After Effects, LightWave 3D, and Digidesign ProTools. Students produce projects using BetacamSP and DV video equipment while learning the basics of non-linear editing, digital audio sweetening, 2-D compositing and 3-D animation techniques.

ARST 41506. Advanced Printmaking and Books

(0-6-3)

Prerequisite: ARST 21501 or ARST 21503 or ARST 21505 or ARST 21507 or ARST 21509

This course offers advanced experience in making artist's books, lithography, photolithography, etching, silkscreen, and relief. Emphasis is on developing personal work and imagery. Lab fee.

ARST 41608. Sculpture Studio

(0-6-3)

Prerequisite: ARST 11601

This advanced sculpture course offers serious students an opportunity to pursue a sculptural direction and to carry that direction to a professional level of competence. It also develops the student's awareness of definitions and criticism of sculpture. The work may be done in any three-dimensional medium.

ARST 43406. Contemporary Issues in the Photographic Arts

(0-6-3) Gray

Prerequisite: ARST 21401 or ARST 31405

A combined image-making/ seminar course for students who have completed three or more photography courses. Presentations, readings and discussions focus on contemporary artistic practice. Students develop one or more independent creative projects during the semester. Course can include visiting artists, gallery visits and student presentations. Offered periodically. Lab fee.

ARST 43702. BFA Seminar

(2-0-2) Collins

BFA majors only. Required of all BFA studio and design majors. This course is designed to broaden the context of the student's chosen major in the department by introducing the student to alternative and integrated points of view from all areas of study that are represented by the studio and design field. This course will help first semester senior BFA majors to orient toward their chosen direction and project for the BFA thesis. Critical writing and directed readings will be assigned throughout the semester. Slide lectures, visiting artist interviews, gallery visits, student presentations, portfolio preparation, and graduate school application procedures will supplement the course.

ARST 47171. Special Studies—Ceramics

(0-V-V)

Independent study in ceramics: research or creative projects.

ARST 47271. Special Studies—Painting/Drawing

(0-V-V)

Independent study in painting/drawing under the direction of an individual faculty member.

ARST 47272. Special Studies—Painting/Drawing

(0-V-V)

Independent study in painting/drawing under the direction of an individual faculty member.

ARST 47273. Special Studies—Painting/Drawing

(0-V-V)

Independent study in painting/drawing under the direction of an individual faculty member.

ARST 47274. Special Studies—Painting/Drawing

(V-V-V)

Independent study in painting/drawing under the direction of an individual faculty member.

ARST 47471. Special Studies—Photography

(0-V-V)

Independent study in photography: research or creative projects. Open to upper level students with permission of the instructor.

ARST 47472. Special Studies—Photography

(V-0-V)

Independent study in photography under the direction of an individual faculty member.

ARST 47571. Special Studies—Printmaking

(0-3-3)

Independent study in printmaking: research or creative projects.

ARST 47671. Special Studies—Sculpture

(0-V-V)

Independent study in sculpture: research or creative projects.

ARST 47672. Special Studies—Sculpture

(0-V-V)

Independent study in sculpture under the direction of an individual faculty member.

ARST 47771. Special Studies

(V-0-V)

Independent study in art studio: research or creative projects.

ARST 48103. BFA Thesis—Ceramics

(0-V-V)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The student signs up with a faculty member working in ceramics, who serves as an advisor for the thesis project.

ARST 48203. BFA Thesis—Painting/Drawing

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester,

supports the thesis project. The thesis project culminates in the second senior semester with a BFA thesis exhibition. The student signs up with a faculty member working in painting or drawing, who serves as an advisor for the thesis project.

ARST 48204. BFA Thesis—Painting/Drawing

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

ARST 48205. BFA Thesis—Painting/Drawing

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

ARST 48305. BFA Thesis—ARST

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

ARST 48403. BFA Thesis—Photography

(0-V-V)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in photography, who serves as an advisor for the thesis project.

ARST 48404. BFA Thesis—Photography

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

ARST 48503. BFA Thesis—Printmaking

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in printmaking, who serves as an advisor for the thesis project.

ARST 48603. BFA Thesis—Sculpture

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in sculpture, who serves as an advisor for the thesis project.

ARST 48703. BFA Thesis

(3-0-3)

The BFA thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

DESN 11100. 2-D Foundations

(0-6-3)

This course deals with fundamentals of two-dimensional design and is intended for students entering studio practice for the first time. The course is also open to more advanced students who wish to increase their knowledge of the elements and principles of design. The course is project-oriented. Studio practice in the basic principles of design employing color theory, form, and space organization, as well as materials and processes used in the design process, are emphasized. Lab fee.

DESN 21101. Graphic Design I

(0-6-3)

Prerequisite: DESN 11100

Corequisite: DESN 32107

This introductory course explores the origins, concepts and processes affecting traditional and contemporary graphic design. Laboratory activities introduce and implement computer and print technology for the creation of original design projects.

DESN 21200. Visual Dialogue: Drawing for Design

(0-6-3)

This cross-disciplinary course in rapid sketching and rendering technique serves studio art, design, and architecture. The course is intended for students entering studio practice for the first time as well as for advanced students who wish to deepen their visualization and illustration skills. Materials fee.

DESN 21201. Product Design I

(0-6-3)

Prerequisite: DESN 21200 (may be taken concurrently) and ARST 11601

This foundation 3-D design studio begins as a natural extension of Basic Design. Students are encouraged to think and work in three-dimensional media. A series of fundamental design problems are assigned during the course of the semester.

Emphasis is placed on the transformation of imagination from mind to paper to model. Computer-aided design (CAD) is also introduced into assignments. Lab fee.

DESN 30104. Building the Modern Web

(3-0-3) Smith

Building the Modern Web is designed to cut through the technology involved in the website creation process and get to the core meaning and goals of a web project. Technological concepts will be covered, but in no real depth. Instead, you will be instructed on how certain technologies, languages, and concepts add pieces to the puzzle of a modern web site, and how you can have a knowledgeable part in every step. It is suggested that this class be taken concurrently with Graphic Design II or after Graphic Design II has been completed.

DESN 30105. Applied Multimedia Technology

(3-0-3)

The goal of this course is to explore the use of multimedia in communicating information and solving problems. Using Adobe Flash and other tools, students create interactive multimedia applications that incorporate text, animation, images, sound, and video. They also learn how to evaluate the aesthetics, functionality, and usability of a web site. Finally, the course equips students with strategies for enhancing their skills after the semester ends. It is suggested that this class be taken concurrently with Graphic Design II or after Graphic Design II has been completed.

DESN 30550. JavaScript

(3-0-3) Nunemaker

JavaScript is a forgiving and wonderfully simple, yet powerful programming language. It was designed to be easy for non-programmers to use and is now an essential part of the web, powering rich interactions in sites like Facebook, Gmail and MobileMe.

DESN 31203. Product Design Research Project

(0-6-3)

Prerequisite: DESN 21201 and DESN 31205 (may be taken concurrently)

This advanced level studio is directed toward the product design student who is preparing to enter either graduate school or professional practice. Fulfillment of this studio requires the completion of one research and design project. In addition, portfolios and resumes are prepared. Emphasis is placed on knowledge, analytical skills, logic, creativity, and excellence in visual communication.

DESN 31204. Product Design Research Project

(0-6-3)

Prerequisite: DESN 21200 or DESN 21201

This advanced level studio is directed toward the product design student who is preparing to enter either graduate school or professional practice. Fulfillment of this studio requires the completion of one research and design project. In addition, portfolios and resumes are prepared. Emphasis is placed on knowledge, analytical skills, logic, creativity, and excellence in visual communication.

DESN 31205. Digital 3-D

(0-6-3)

Prerequisite: DESN 21201

This course introduces students to Alias Wavefront software, a powerful conceptual tool for modeling and animating complex objects. In this digital exploration, computer technology will be used to generate, modify, and present design ideas. Lab fee.

DESN 31206. Advanced Form and Model Making

(0-6-3)

Prerequisite: DESN 21201

This three-credit studio course will expand and refine student experience in hands-on model building techniques that begin with sketches and control drawings. Primary activities will focus on rapid soft-model construction techniques and conclude with refined show-model construction, surface development, applications

of final finish, and display. The course is aimed at serving the model-making needs of product designers and industrial design BFAs. Advanced junior and senior industrial design students will find this course useful in building and refining portfolio content. Finished model photo documentation and gallery display methods will be introduced, serving the installation needs of design BFA seniors and students engaged in presentation to industry sponsors.

DESN 31208. Furniture Design I

(0-6-3)

This course is an introduction to furniture design encompassing the study of modern designers and contemporary design issues. A series of furniture design problems are assigned that serve as focus for investigations into contemporary and non-traditional applications of design principles. Full-scale furniture is produced for each project. Lab fee.

DESN 31209. Digital Sketch to Solids

(0-6-3)

Prerequisite: DESN 21200 and DESN 31205

MATERIALS FEE. This course is an introduction to various digital design techniques and workflows used by industrial designers. Students will explore design processes integrating digital tablet sketching and computer-aided design (CAD) in order to develop and effectively communicate design concepts. The course is aimed at students seeking to expand their 3-D visualization skills into a digital medium. Software introduced will include Autodesk Sketchbook Pro and SolidWorks 3D.

DESN 31316. Theatrical Production

(3-0-3)

A practical introduction to techniques, processes, and materials. The student will explore traditional and modern stagecraft methods: carpentry, rigging, basic scenic painting as well as basic technical drafting, design ideas, equipment use, safety, material handling, and problem solving. Students will gain practical experience participating on realized projects and productions.

DESN 32107. Adobe CS3 Design Tutorial

(0-2-1)

Corequisite: DESN 21101

This one-credit course will focus on Adobe Creative Suite 3 (CS3) software. The class will meet one evening per week throughout the course of the semester. Programs and topics to be covered will be Adobe Photoshop, InDesign, Adobe Illustrator, proper file preparation, and font access and usage.

DESN 40655. Technical Concepts of Visual Effects

(0-3-3) Bualuan

Prerequisite: DESN 31205

This class seeks to introduce students to some basic concepts of computer-generated imagery as it is used in the field of visual effects, and to delve into some of the technical underpinnings of the field. While some focus will rely on artistic critique and evaluation, most of the emphasis of the class will be placed on understanding fundamental concepts of 3-D modeling, texturing, lighting, rendering, and compositing. Those who excel in the visual effects industry are those who have a strong aesthetic sense coupled with a solid understanding of what the software being used is doing "under the hood." This class, therefore, will seek to stress both aspects of the industry. From a methodology standpoint, the class will consist of lectures, several projects that will be worked on both in-class and out of class, an on-site photo shoot, and extensive open discussion. The nature of the material combined with the fact that this is the first execution of the class will mean that a significant degree of flexibility will need to be incorporated into the class structure.

DESN 41102. Graphic Design II

(0-6-3)

Prerequisite: DESN 21101

This advanced course in visual communication is for students interested in the art of typography, its history, and the use of type as a critical element in the world of graphic design. Lab fee.

DESN 41103. Graphic Design III

(0-6-3)

Prerequisite: DESN 41102

This advanced course in visual communication is for students who intend to pursue the field of graphic design after graduation. The class will help prepare students both technically and creatively for professional practice by focusing on research-based projects. Lab fee.

DESN 41104. Graphic Design IV

(0-6-3)

Prerequisite: DESN 41103

This senior-level, research-based course will explore the contemporary practice of professional design through client-based projects created in both print and multimedia forms.

DESN 41105. Multimedia Web Design

(0-6-3)

Prerequisite: DESN 21101

This advanced digital image-making course gives the studio or design major the opportunity to pursue research and development in an advanced area of technology. In some semesters, a topic is announced as a focus for the course such as PostScript programming or hypermedia design.

DESN 41106. Web Page Design

(0-3-3)

This course will cover the design considerations for the Internet including techniques of graphic production and web page efficiency. Design with Adobe Dreamweaver, Flash, and the use and creation of style sheets will be also be covered. Experience with Macintosh graphics programs needed. Work outside of class is expected.

DESN 41107. Web Development with CSS

(0-6-3)

Learn the techniques used by today's top professionals to construct web pages with XHTML and CSS. At the end of this class, you will be able to take a graphical representation of a web page, and construct it to work in all modern browsers using valid, semantic markup and presentation.

DESN 41109. Advanced Web Design

(0-6-3)

Prerequisite: DESN 41102 (may be taken concurrently)

Permission of instructor required. Please contact by email at <mailto:cprebys@nd.edu>. This course is for students interested in building upon their existing web design skill through professional, team-based assignments and discussion. The class will serve as a learning experience based in a professional practice environment and will complement the underlying spirit of the design program's focus on addressing socially concerned design challenges.

DESN 41209. Furniture Design Studio

(0-V-V)

Prerequisite: DESN 31208

This course offers advanced students an opportunity to develop a personal direction, using wood as a material of expression. Lab fee.

DESN 41301. Multimedia Motion Graphics

(0-3-3)

Prerequisite: DESN 21101

This advanced multimedia course will give the studio, design or CAPP major an introduction to the design of motion graphics. Students will develop short information movies, movie trailers, or movie opening sequences. The course will use Apple's Motion software and cover basic DVD and QuickTime movie development. Skill with various graphics software is useful, with expertise in Adobe Photoshop being very important.

DESN 41419. CAD for the Stage

(0-3-3)

The study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design and progress to 2D and then 3D design techniques. A basic understanding of computer systems is necessary, and significant computer work is required outside class.

DESN 41420. Advanced Technical Production

(0-3-3)

Advanced coursework in the tools, materials and processes used in the creation of theatrical scenery. Topics may include (but are not limited to) scenic welding, advanced rigging techniques, electronic controls, pneumatics, hydraulics, structural design for the stage, CAD, and other state-of-the-art technologies. Laboratory required.

DESN 43200. Designing an Environment for Design

(V-0-V)

Students in this course will gather and process data and considered needs in order to produce a detailed proposal for a cross-disciplinary research environment that will be established within the new Engineering Learning Center in the Stinson-Remick Engineering Building. The resulting environment will be conceived through collaborative research conducted by marketing, engineering, and design. Team-driven output during the course will result in a facility layout that considers technology requirements, furnishings, and an implementation plan capable of supporting and enhancing future university activities. The environment's purpose will foster meaningful innovation and problem solving through heightened academic unity between the colleges. The course undertaking will also serve as a preliminary test of Notre Dame's collaborative potentials, combining teaching resources from the College of Engineering, Mendoza College of Business and the Industrial Design Program in the College of Arts and Letters. The vision of this course enterprise focuses on the belief that collaborative discourse between university colleges will lead to increased understanding, heightened achievement, and global recognition that exceeds the potential of a single unit within the university. Students admitted to this course will be limited to a hand-selected group of nine graduate and/or senior level candidates from the represented programs. (College of Engineering, College of Business, College of Arts and Letters) Selections will be made on the basis of individual past academic history and balance of proficiencies required for course duties.

DESN 45310. Design Internship

(V-0-V)

Permission required. This course provides an opportunity for the design student to earn credit at an approved design office.

DESN 47171. Special Studies—Graphic Design

(V-0-V)

Independent study in graphic design: research or creative projects.

DESN 47172. Special Studies—Graphic Design

(0-V-V)

Independent study in product design under the direction of an individual faculty member.

DESN 47173. Special Studies—Graphic Design

(0-V-V)

Independent study in design: research or creative projects. Open to upper level/graduate students with permission of the instructor.

DESN 47271. Special Studies—Product Design

(V-0-V)

Independent study in product design: research or creative projects.

DESN 47272. Special Studies—Product Design

(0-V-V)

Independent study in product design under the direction of an individual faculty member.

DESN 47311. Special Studies in Design and Presentation—Taiwan

(0-3-3)

Research project involving design and language skills based on independent summer research in Taiwan, to develop an architectural/design project, and create a bilingual website for presentation.

DESN 47371. Special Studies

(V-0-V)

Permission required. Independent study in design.

DESN 48103. BFA Thesis—Graphic Design

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

DESN 48104. BFA Thesis—Graphic Design

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

DESN 48105. BFA Thesis—Graphic Design

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

DESN 48203. BFA Thesis—Product Design

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

DESN 48204. BFA Thesis—Product Design

(0-V-V)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

DESN 48303. BFA Thesis

(3-0-3)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

DESN 48305. BFA Thesis—DESN

(0-3-3)

The BFA Thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The BFA Thesis is a personal visual statement that is the culmination of a student's collective development within the department. The BFA Thesis can be the extension of an ongoing body of work or a defining project. A written statement defining the project, which is due at the end of the first senior semester, supports the thesis project. The thesis project culminates in the second senior semester with a BFA Thesis Exhibition. The BFA Thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

Center for Asian Studies

ASIA 20100. The Riddle of Korean Mythology

(3-0-3) Cho

This course aims to provide basic understanding of modern Korean literature and drama. In this class, we will first briefly survey the history of Korean literature from 2000 years ago, till now. Then we will select a few important literary texts to read. Through this lecture, students will be able to understand the various forms and contents, and important themes of Korean literature, through which deeper understanding of the lives and thoughts of the Korean people will be possible. Also, students will watch Korean TV dramas, popular in Korea and abroad, and through it have a chance to see and understand various aspects of Korean life. Through this introductory course, students will be prepared for a more in-depth study of Korean literature and culture.

ASIA 20101. Introduction to Chinese Civilization and Culture

(3-0-3)

Prerequisite: EALC 10112

This is a survey course that introduces the students with little or no knowledge of the Chinese language or culture to the major aspects of Chinese cultural tradition from the dawn of its civilization to the present time. Readings (in English translation) include traditional Chinese historical, philosophical, political, religious and literary texts as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to approach the Chinese texts from a comparative perspective. This course will use a combination of lectures, discussion and presentation by students. Movie documentaries will also be used from time to time. Reading assignments should be done before the lectures and in the sequence as they are given in the course schedule for each class so that the students may be ready for discussion in class. Whereas their amount and level of difficulty vary, the texts always demand careful and thoughtful reading.

ASIA 20102. Culture, Media, and Entertainment in China Today

(3-0-3)

This course is designed to provide students with an introduction to aspects of contemporary Chinese culture, media, and entertainment. The class focuses on the development of China's media and entertainment industries, including the online industry, the music industry, advertising, television, and the film industry. Students will learn to critically analyze authentic cultural products, study their cultural and literary dimensions, and discuss how culture affects the political and economic aspects of these industries. This class aims to be interdisciplinary and is designed to accommodate students from a large range of academic interests, including business, marketing, political science, economics, communication, media studies, music, sociology, literature, film, cultural studies, and Asian studies. No prior knowledge of China or the Chinese language is required.

ASIA 20105. Introduction to Korea and Korean Culture

(3-0-3)

This introductory course is designed for students without extensive prior knowledge of Korea or Korean culture. Diverse aspects of Korea such as natural environment, history, religion, family relations, thought, literature and arts will be surveyed. Through this course, students will gain a greater appreciation and knowledge of Korean culture and literature, allowing them to engage in more advanced, in-depth study in subsequent semesters. The contemporary culture of Korea will be an important focus of the course, enriching students' understanding of Korean society and culture today.

ASIA 20106. Intro to Modern South Asia

(3-0-3)

More than one-fifth of the world's population lives in South Asia, a region comprised of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan and the Maldives. This introductory course will provide a survey of issues and events in South Asian history from the establishment of British East India Company rule in 1757 to the decolonization of South Asia in 1947. The course will explore the following themes: the rise of a trading company,

the East India Company, and its transition into a colonial power; the emergence of a colonial economy; colonial production of knowledge; nineteenth- and twentieth-century cultural, religious and political movements and formations of new identities; the emergence of elite and popular nationalisms; independence; and the partition of the subcontinent.

ASIA 20107. Understanding Korean Culture: Yesterday and Today

(3-0-3)

This course aims to help students to understand Korean society and culture. Starting from its unique historical background, students will explore and discuss various aspects of Korea such as religion, thoughts, literature, politics, arts, life styles and pop culture ("Korean Wave") throughout the course. The in-depth examination of traditional features will guide students to extensive understanding of contemporary phenomena in Korea. Lecture-based teaching format will be enriched by a variety of supplementary channels such as movies, documentaries, and invited speakers in the field.

ASIA 20146. Music and Globalization in Asia

(3-0-3) Ng

This course explores musical production in India and China, the "new cultural cores" that are gradually replacing the U.S.A. and Western Europe in cultural influence in Asia and the Asian diaspora. Taking into account these countries' colonial and semi-colonial histories, their political and economic development, and the increasing transnational movement of their citizens, this course charts the development of commercially successful music from these countries—bhangra; Bollywood; Chinese pop; and fusion music popularized by bands like Twelve Girl Band and composers like Tan Dun in films like *Crouching Tiger, Hidden Dragon*—that have not only captured Asia but the West as well, and shaped the imagination of what Indian-ness and Chinese-ness are, both to the Chinese/Indians and non-Chinese/Indians. In addition, this course examines Filipino entertainers, a group of musicians who provide live entertainment of a transnational capacity throughout Asia. They represent important channels for the dissemination of Indian and Chinese popular music in that region. Globalization and cosmopolitanism theories will be discussed in this course.

ASIA 20148. Music and World Religions

(3-0-3)

Through this ethnomusicology course students will learn the roles music occupies in world religions. More than a world music course, we will examine the creative expression of the divine through the universal language of organized sound as music, as music plays a major role in the practice of most religions worldwide. This study involves all the major continents, highlighting new perspectives as to the confluence between religious culture and musical expression. Knowledge of music beneficial but not required, just open ears and minds to the diverse ontological understandings comprising various worldviews.

ASIA 20206. Modern Korean Literature and Drama in Translation

(3-0-3)

This course aims to provide basic understanding of modern Korean literature and drama. In this class, we will first briefly survey the history of Korean literature from 2000 years ago, till now. Then we will select a few important literary texts to read. Through this lecture, students will be able to understand the various forms and contents, and important themes of Korean literature, through which deeper understanding of the lives and thoughts of the Korean people will be possible. Also, students will watch Korean TV dramas, popular in Korea and abroad, and through it have a chance to see and understand various aspects of Korean life. Through this introductory course, students will be prepared for a more in-depth study of Korean literature and culture.

ASIA 20301. Chinese Society and Culture

(3-0-3)

This course introduces students to the complexities of contemporary Chinese society in the context of the past. Topics covered include food, family and gender,

political activity, ethnicity and identity, urban and rural life, work and unemployment, economic complexity, multilingualism, arts, religion, medicine and the body, and literature.

ASIA 20304. Societies and Cultures of South Asia

(3-0-3)

This course provides a broad introduction to societies and cultures of South Asia (including India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, and the Maldives). Emphasis will be on the Indian subcontinent.

ASIA 20325. Business, Economics and Culture

(3-0-3)

Economic, political and cultural interactions between geographically distant groups have been intensifying over the past century and the 21st century is being seen as the Global Century. In this rapidly changing world, it is becoming increasingly important to understand the role of cultural (religious, ethnic and political/socio-economic) factors in determining and shaping interactions. In this course, we will use an ethnographic focused approach to explore the impact of cultural variations on many issues that have arisen or will potentially arise in the course of contemporary global economic interactions. These include the relationships between reciprocity, redistribution and market behaviors, cultural differences in business strategies, relationship building and formation of partnerships, marketing techniques, consumer behavior, and political and environmental situations. We will also look at the impact of business interaction on regional and local economies in Asia (India), Africa (Kenya and the Sudan) and Latin America (Mexico and Guatemala). Course work will include discussions based on readings, documentaries, an individual ethnographic project and report, and a final paper on the application of cultural factors for global interactions.

ASIA 20825. World Religions and Catholicism in Dialogue

(3-0-3) Gorski

A theological exploration of Hinduism, Buddhism, Taoism, Judaism, Islam and the relationship of Christianity to those religions. The goal of this exploration is specifically: 1) to set forth the essential characteristics of the world's great religions; 2) to disengage the essential differences between Christianity and the other world religions; 3) to identify the distinctiveness of Catholicism within the family of Christian traditions; and 4) to examine historically and systematically the Christian theological appraisal of other world religions. The ultimate goal of this course is to enable the students to gain a deeper understanding of Christianity by "passing over" into and experiencing as well as appraising the different major religious traditions of the world. To enhance the learning experience, the course will make abundant use of films. The students are required to attend class regularly and punctually. Indeed, strong emphasis is placed on the requirement to attend class faithfully. Students are allowed but one single absence during the semester.

ASIA 20828. Christianity and World Religions

(3-0-3) Malkovsky

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate Mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply in the spirituality of other traditions. By course end we ought to have a greater understanding of what is essential to Christian faith and practice as well as a greater appreciation of the spiritual paths of others. Requirements: Short papers, midterm exam, and final exam.

ASIA 20888. Survey of Pan-Asian Cinema

(3-0-3) Magnan-Park

Corequisite: ASIA 21888

Historically, Asia represented massiveness in terms of area, population, and resources. In our present century, Asia will come to represent massiveness in

economic, technological, and military terms. Given the prominence of Asia as an integrated continent with renewed global significance, knowledge of this continent, its history, its people, its cultures, and its aspirations for the future become important to better understand the world we live in. This course is designed to provide insights into Asia by means of its cinema. The course is designed around weekly lectures, linked to a representative film, and augmented with discussions that integrate the critical readings with the films. We will cover a wide range of Asian nations and subjects ranging from popular commercial box office hits to critically acclaimed artistic masterpieces created by Asian filmmakers to highlight Asian experiences. Some of the national genres that we will address include Bollywood masala films, Japanese anime, Hong Kong martial arts, and Korean hallyu (culture wave). Prior knowledge of Asia and/or the cinema is not required. All films will be screened in their original languages with English subtitles. The course is designed to introduce students to Asia on a broad scale.

ASIA 21888. Survey of Pan-Asian Cinema—Lab

(0-0-0)

Corequisite: ASIA 20888

Certain films will be viewed for further discussion in class.

ASIA 23101. Chinese Literary Traditions

(3-0-3) Yang

A survey course introducing students to the major themes and genres of Chinese literature through selected readings of representative texts.

ASIA 23301. Masterpieces of Classical Japanese Literature

(3-0-3) Brownstein

This course is a survey of Japanese poetry, fiction and drama from the earliest times through the 20th century. All texts are in English and no special knowledge of Japan or Japanese is required. The course is divided into four units. We will begin with the development of court poetry (waka) as found in the Manyōshū (*Collection of Ten Thousand Leaves*) and the first *Imperial Anthologies*, followed by episodes from the *Tales of Ise*, and selected chapters from Murasaki Shikibu's masterpiece of courtly love, *The Tale of Genji* (ca. A.D. 1000). In addition to social and historical factors influencing the development of a courtly aesthetic, we will also consider the influential role played by Buddhism and Chinese literature. In the second unit we will look at how Japanese literature developed under the patronage of the samurai aristocracy during Japan's "medieval" period (12–16th centuries) with readings of Noh plays, linked verse (renga) and philosophical essays such as *An Account of My Hut* and *Essays in Idleness*. For the third unit, we move to the early modern period with the haiku poetry of Bashō, short stories by Saikaku (*Five Women Who Loved Love*), and *The Love Suicides at Amijima*, a play by Chikamatsu Monzaemon. For the last unit, we will read a selection of modern stories and plays.

ASIA 27463. Anti-Social Behaviors in Modern Chinese Fiction

(3-0-3)

Chinese society is often characterized as highly conformative and lacking in individuality. Is this true? What kind of behaviors then would be considered antisocial, and what are their moral, social, and political consequences? In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as antisocial, unconventional, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications. For instance, are these behaviors justified? Are different standards applied to women? What are the temporal and spatial factors in people's conception of an antisocial behavior? To what extent are these behaviors culturally determined? No prior knowledge of the Chinese languages or China is required.

ASIA 30011. Asian American Literature

(3-0-3)

This course will explore the development of Asian American Literature from the 1800s to the present, focusing on writers of Chinese, Filipino, Indian, Hmong, Japanese and Korean descent. Discussions will focus on questions of race/ethnicity, identity/representation, nation and exile. Primary texts, including novels, short fiction, poetry, theory and film will be supplemented by critical articles. Some

works to be discussed will include Carlos Bulosan's *America Is In the Heart*, Jessica Hagedorn's *Dogeaters*, Maxine Hong Kingston's *The Woman Warrior*, Faye Ng's *Bone*, John Okada's *No-No Boy*, in addition to other texts.

ASIA 30101. Chinese Ways of Thought

(3-0-3) Jensen

This lecture and discussion course on the religion, philosophy, and intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, Confucianism and Neo-Confucianism, and the later religious accommodation of Christianity and Islam.

ASIA 30106. Modern South Asia

(3-0-3)

Home to over a billion people, just over 23% of humanity, the South Asian subcontinent is a fascinating laboratory in which to analyze the unfolding of such themes in modern history as colonialism, nationalism, partition, decolonization, post-colonial democracies, the modern state, economic development, center-region problems and relations between Asia and the West. The course will consider critical themes in social, political, economic, and cultural history, which will include imperialism, capitalism, nationalism, religious politics, regionalism, ethnicity, globalization, diaspora, ecology, social inequality, and gender, development, and democracy. It will not only provide a lively historical narrative told through lectures based on scholarly research and primary texts, but will also seek to embellish this narrative with the perception and articulation of vision and sound, as well as with readings from representative genres of South Asian literature.

ASIA 30107. Debating Empire: Themes from Modern South Asian History

(3-0-3)

This course introduces undergraduates to contentious themes in the history of British Empire in South Asia through a close examination of historiography. By focusing on the centrality of colonialism in instituting change and fundamentally transforming South Asian society, the course traces the emergence of dominant schools of South Asian (particularly Indian) historiography. Historical approaches to be examined include imperial and colonial historical writing, the Cambridge School, several forms of nationalist historiography (including secular and religious), Marxist perspectives, and the more recent Subaltern Studies collective, as well as critiques of these. Topics of analysis will include: 1) de-industrialization and the colonial economy; 2) agriculture and the idea of private property; 3) the 1857 rebellion or Sepoy Mutiny; 4) continuity and change in eighteenth century India; 5) colonialism and its impact upon knowledge production; 6) gender and colonial law; 7) the construction of religious identities and communal violence in colonial India; 8) capitalist development or socialist planning; 9) affirmative action; and 10) environment and development. These debatable themes in South Asian history have generated an enormous corpus of literature, enabling us to problematize the relationship of the historian to "facts" by drawing attention to the ways in which diverse positions and perspectives privilege different categories, actors and modes of analysis. The course also looks at the role of history within the development of colonial governance and the rise of nationalist movements, and examines the relationship of different segments of the population to history and to the nation.

ASIA 30109. Chinese Literature and Religion

(3-0-3) Yang

This course examines interfaces of religion and literature in the Chinese tradition. Students are introduced to the essential teachings of Daoism, Buddhism, and Confucianism and ways in which such teachings are represented or reflected in literary works, including poetry, prose essays, and fiction.

ASIA 30110. Ancient Japan

(3-0-3) Thomas

This course provides training in understanding and engaging history as a series of wide-ranging debates. The class will examine three issues: first, the politically

charged question of Japan's origins in myth and archeology; second, the question of whether the forces of Chinese culture or nature as disease and environmental degradation defined the Yamato state from the sixth to the ninth century; and, third, whether Heian court power until about 1200 rested on economic, political, military, judicial, or aesthetic grounds. The second purpose of the course, the development of the disciplined imagination necessary to enter another culture and another time, relies on the reading of primary texts in translation. There will be three tests and several classroom assignments.

ASIA 30115. Japan's Imperial House

(3-0-3)

Japan boasts the longest, unbroken imperial line extant today, but what does this continuity really mean? This course looks at Japan's emperors and empresses from antiquity to the present, raising questions about the nature of power, the idea of good government, gender, divinity, war responsibility, and the liberty of the family now called upon to symbolize a purportedly democratic nation. Although most of the course will focus on modern emperors, it begins with Japan's earliest political structures in order to ask such questions as: Was the Imperial House an indigenous idea or was it an imitation of Chinese ideas of power? Why were there so many powerful women leaders in ancient Japan and why did Japan stop having empresses on the throne? What is the relationship between the imperial house and the various religions of Japan? The course will then consider the medieval and Tokugawa periods asking why powerful samurai failed to overthrow the militarily impotent emperors. Finally, the course will turn to the modern period, beginning in the middle of the 19th century with the elevation of the Meiji Emperor to unprecedented prominence. Why was the ancient imperial house used to modernize Japan? Even though the sex of emperors has been male for centuries, why were ancient emperors female and why is the imperial gender (and Japan as a whole) in the modern period often regarded as female? Was Hirohito guilty of fomenting war? What is the function of the Imperial House today? This course sweeps through myth and 1500 years of Japanese history, tracing the permutations, continuities, and discontinuities of the imperial line.

ASIA 30120. Modern Japan

(3-0-3)

This introduction to modern Japanese history focuses on political, social, economic, and military affairs in Japan from around 1600 to the early post-WWII period. It considers such paradoxes as samurai bureaucrats, entrepreneurial peasants, upper-class revolutionaries, and Asian fascists. The course has two purposes: 1) to provide a chronological and structural framework for understanding the debates over modern Japanese history, and 2) to develop the skill of reading texts analytically to discover the argument being made. The assumption operating both in the selection of readings and in the lectures is that Japanese history, as with all histories, is the site of controversy. Our efforts at this introductory level will be dedicated to understanding the contours of some of the most important of these controversies and judging, as far as possible, the evidence brought to bear in them.

ASIA 30125. Japan Through the Camera Lens

(3-0-3)

Japanese culture embraced the camera almost as soon as it was invented in Europe. Even while the Japanese government rigorously controlled contact with outside nations, this new device for recording and exploring the world entered a Japanese port and was put to use by Japanese and, eventually, by foreigners to document Japan's opening to the West, its military adventures, its transformation into an industrial and consumer society, and its erotic longing. This course uses photography and film and writing about art and politics as a way of exploring key issues in Japanese society.

ASIA 30141. History of Chinese Medicine

(3-0-3) Murray

In light of the contemporary currency of certain Chinese practices in the field of alternative medicine, this course will explore the phenomenon of Chinese traditional medicine in both its historical and contemporary settings. The first unit, Medicine in Ancient China, will explore the earliest medical ideas of the Chinese

and will demonstrate how the state's political unification gave rise to a correlative cosmology that not only included Heaven and Earth, but also human beings as integral elements of an organic cosmos. The second unit will explore the influences and contributions of Taoism (Daoism) and Buddhism to Chinese medicine and will explore what it meant to be both physicians and patients in late imperial China. The third unit will focus on medicine in contemporary China and will feature the experiences of Elisabeth Hsu, a student of Chinese medical anthropology who, as a part of her doctoral research, enrolled as a student in Yunnan Traditional Chinese Medical College between September 1988 and December 1989. We will conclude the course with a brief examination of the influence of Chinese medicine on the contemporary world.

ASIA 30150. Modern China

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of the Qing dynasty) to the present. It will highlight China's evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–1949, back to a period of strength under the Communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

ASIA 30170. South Asia Before Europe

(3-0-3) Sengupta

This course covers the history of the South Asian subcontinent from the beginning of the historical period to about 1700. During this period, the region witnessed the formation of regional states, the rise and fall of strong empires, the evolution of increasingly complex forms of caste and kinship ties, multiple religious traditions including Hinduism, Buddhism and Islam, and the coexistence of different economic organizations ranging from hunting and food-gathering to sophisticated urban communities. Discussion will focus on the transformation of local kinship ties into regional kingdoms and empires, the evolution of religion and the legacy of the expansion of Islam and the consequent rise of Turkish, Afghan and Mughal empires in the area. The main purpose of the course is to introduce students to South Asian civilization in a global context, with special emphasis on the wider linkages of transnational and world history. Finally, there will be a discussion of how interpretations of the South Asian past resonate in the region's modern politics. Besides learning about India this course will provide transferable skills about analyzing primary resources, seminar presentation and effective ways of using Internet resources.

ASIA 30189. South Asia: Colonialism and Nationalism

(3-0-3) Sengupta

This course will examine the colonial encounter in the Indian subcontinent, i.e. the period of the advent, establishment, and collapse of British colonial power during the period roughly between 1750 and 1950. It will explore the nature of this encounter and its impact on the subcontinent, particularly the emergence of modern nationalisms and the making of the modern South Asian nation-states of India and Pakistan. Recent scholarship on British colonialism and Indian nationalism has been rich and diverse, examining areas ranging from the nature of "anti-colonial" nationalism to the impact on the economy, on state practices, social structures such as caste, peasant resistance, gender relations and modern history-writing itself. One of the objectives of the course is to introduce students to some of the major historical debates in South Asian history through the concepts of "nationalism", "colonialism" and "modernity." Another is to think about the ways in which this encounter has been represented in different kinds of texts ranging from scholarly texts to fiction and films.

ASIA 30280. International Relations in East Asia

(3-0-3) Moody

This course explores the interactions of the states and societies in the East Asian region, focusing mainly on the relationships of China and Japan, their interactions with each other and with the outside-Asian powers, the United States, and Russia

(Soviet Union). The first set of class discussions examines the China-centered system in East Asia prior to the intrusion of the new world system carried by Western imperialism. The course then turns to a discussion of this western impact: the colonization of most of the Southeast Asian societies; the reduction of China to a "semi-colony" and the subsequent process of revolution, both nationalist and communist, in that country; Japan's turn to "defensive modernization" and its own imperialism to ward off the West and claim status as a great power on a par with the Western countries.

ASIA 30301. Human Rights in the Age of Terrorism: The View from South Asia

(3-0-3)

This course will look at human rights and its continued relevance in the age of terrorism. Recent developments have shown the need for states to protect themselves and their populations from acts of terror while at the same time maintaining respect for human rights and the rule of law. This course examines how to uphold that balance and draws from the experience of Pakistan's involvement in the global fight against terror. It examines both the misuse of prevention of terrorism laws as well as the minimum safeguards and remedies that must be guaranteed and provided if human rights are not to become the first casualty in the war on terror. There is no exam. Grades based 75% on research paper; 25% on class participation. Students are expected to have done readings before the class.

ASIA 30302. Culture and Conflict in the Pacific

(3-0-3)

In recent years, many Pacific societies have been unsettled by conflict, military coups, crises of law and order, struggles for land rights, and battles over nuclear testing. This course introduces students to the diverse cultures of the Pacific by examining some of these contemporary conflicts in historical perspective. Topics of particular interest are indigenous rights, relations between indigenous people and migrants, and the role of outside powers in Pacific Island states. In addition to examining the indigenous cultures of the Pacific, we will compare and contrast societies in which indigenous islanders are disenfranchised minorities (as in Hawaii, New Zealand, and Australia) and those societies in which they are the dominant majority (as they are in Fiji and Solomon Islands).

ASIA 30305. Immigration in Comparative Perspective

(3-0-3)

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How is immigration related to urban "immigrant riots"? And what can anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the U.S., Europe, Australia, and Japan will enable us to appreciate both global and U.S. distinctive trends. Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class; the mass media; border enforcement; racism; the economy; territory and identity formation, and religion.

ASIA 30376. Place, Environment, and Society in Australia and Melanesia

(3-0-3)

Aboriginal Australian and Melanesian approaches to place have long intrigued and puzzled outsiders, challenging commonly-held assumptions about the division between nature and culture or between human societies and their physical environments. This course introduces students to some of these exotic approaches to place and encourages them to see their own environment in a new way. It also considers how indigenous Melanesian and Australian conceptualizations of place are being transformed through engagement with a global capitalist economy and in the context of modern nation states. How do notions of place change when land becomes a commodity? How are shifting connections to place transformed into legal ownership? What happens when kin networks are divided by national boundaries? Students will read several ethnographic monographs that convey a

holistic sense of social life in particular locales. Topics that may be of particular interest include mythic and ritual relationships to the land, connections between language, place, and cultural identity, the ways that modern states enforce geographic boundaries, legal battles for land rights, and the relationship between global environmentalism and indigenous people.

ASIA 30463. Comparative Economy of India and China

(3-0-3)

This course compares India and China's different paths to political development in light of their history, institutions, and relations with the West.

ASIA 30465. Chinese Politics

(3-0-3) Moody

Study of the contemporary Chinese political system and process in the light of Chinese history and culture. Some of the topics treated include: the traditional political order; the revolutionary movements; the rise of communism; Maoism and the rejection of Maoism; the political structure; leadership, personalities, and power struggles; economic policy; social policy and movements; problems of corruption and instability; prospects for democratic development. There will be some attention to Taiwan and to Hong Kong as special Chinese societies.

ASIA 30467. Introduction to South Asian Politics

(3-0-3)

This course will present an overview of the politics of modern South Asia focusing on Afghanistan, Bangladesh, India and Pakistan. We will begin by studying the impact of the British colonial experience, the rise of nationalism and the emergence of independent nation states. To develop a broad understanding of the political and economic experience of the region we will spend time analyzing the four countries individually before moving on to explore four important themes in political science: First, regime choice and regime survival in the four countries. Second, the role of women in the development experience. Third, identity politics and the emergence of violent domestic and international movements. Fourth, international relations focusing on the role of three key actors—the U.S., China and the Middle East in regional politics.

ASIA 30476. Political Movements in Asia

(3-0-3)

This course analyzes a wide range of political movements including nationalist and revolutionary movements, guerrilla insurgencies, terrorist organizations, democracy movements, and peace movements. The regional scope covers East Asia, Southeast Asia, and South Asia. To understand various movements, we will study global trends, human rights values, cultural differences, religious doctrines, historical legacies, state-society relations, leadership skills, mobilization strategies, and violent vs. nonviolent trajectories. In addition to analytical readings, we will also watch a series of documentaries and read a number of prominent (auto) biographies.

ASIA 30608. The Worlds of Buddhism

(3-0-3)

A thematic introduction to the pan-Asian (i.e., South, Southeast, and Central Asian as well as East Asian) Buddhist tradition exploring the fundamentals of Buddhist doctrine and practice while also sampling major themes in the religion's social, cultural, and material history. Among the particular topics to be covered are: the life of the Buddha (history & hagiography), the "Four Noble Truths" (the essentials of the Buddhist "creed"), the Buddhist canon (the nature and scope of Buddhist scripture), Buddhist cosmology (Buddhist conceptions of the formation and structure of the universe, i.e., of time and space), Buddhist monasticism, meditation and the Buddhist contemplative life, Buddhist ethics, the ritual lives of Buddhists, Buddhism and politics, Buddhist "family values," Buddhism and the arts, etc.

ASIA 30609. Buddhism in China

(3-0-3) Gimello

Buddhism is the only one of the major religions traditionally regarded as Chinese that did not originate in China. China is arguably the Asian civilization in which

Buddhism underwent its most extensive development and its most thoroughgoing transformations. This course is designed to be a thematic and historical overview of the development of Buddhist thought and practice in China with special emphasis on the process of mutual influence by which Buddhism, without ceasing to be Buddhist, became also a Chinese religion while China, without abandoning its indigenous religious heritage, became also a Buddhist culture. As such the course will serve a threefold purpose: it will introduce students to fundamental Buddhist beliefs and values as they took shape in China; it will acquaint them with essential elements of Chinese civilization attributable to Buddhism's presence; and it will provide an opportunity to study what may well be world history's most remarkable instance of successful cross-cultural religious communication.

ASIA 30611. Buddhist Meditation Traditions

(3-0-3) Gimello

Relying chiefly on English translations of primary, mostly east Asian canonical sources, this course will examine varieties of Buddhist meditation practice while posing theoretical questions about the nature of meditation as a form of religious life; its ethical implications; its relations with other elements of Buddhism like doctrine, ritual, art institutions; etc.—all considered against the background of theological and philosophical concern with the role of contemplative experience in the religious life.

ASIA 30612. Buddhism in Practice

(3-0-3)

An introduction to Buddhism in East Asia (principally China, but also Japan, Korea and Vietnam) with emphasis less on what Buddhists think or believe and more on what they actually do in their public as well as private lives—e.g., the rituals they perform; their disciplines of self-cultivation; the institutions they establish; the ethical, political and economic decisions they make.

ASIA 31105. Masters of Contemporary Chinese Cinema—Lab

(0-2-0)

Corequisite: ASIA 33105

This introductory film course showcases master directors and major films from China, Hong Kong and Taiwan. Students will learn to appreciate Chinese cinema both for its content and techniques, while familiarizing themselves with social and political changes under which these films were produced in Greater China. We will examine cinematic accomplishments by master directors and analyze how they recreate for the audience different Chinese societies on the screen. This course is taught in English. No prior knowledge of Chinese is required.

ASIA 31316. Introduction to Japanese Pop Culture Lab

(0-0-0)

Corequisite: ASIA 33316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity to the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? Knowledge of Japanese is not required.

ASIA 33101. Heroism and Eroticism in Chinese Fiction

(3-0-3) Ge

In this course we will read works in Chinese fiction from the late imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which

coincided with a general trend of domestication in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation, and no prior knowledge of China or the Chinese language is required.

ASIA 33103. 20th-Century Chinese Literature

(3-0-3)

In this course we will read English translations of works in twentieth-century Chinese literature, especially short stories and plays written from the May 4th Movement in 1919 to the beginning of the Reform in the early eighties. We will discuss the literary expressions of China's weal and woe in modern times and of the Chinese people's frustrations and aspirations when their country was experiencing unprecedented social changes. No prior knowledge of the Chinese language or Chinese culture is required for taking the course.

ASIA 33105. Masters of Contemporary Chinese Cinema

(3-0-3) Lin

Corequisite: ASIA 31105

This introductory film course showcases master directors and major films from China, Hong Kong and Taiwan. Students will learn to appreciate Chinese cinema both for its content and techniques, while familiarizing themselves with social and political changes under which these films were produced in Greater China. We will examine cinematic accomplishments by master directors and analyze how they recreate for the audience different Chinese societies on the screen. This course is taught in English. No prior knowledge of Chinese is required.

ASIA 33108. Anti-Social Behaviors in Modern Chinese Fiction

(3-0-3) Lin

Chinese society is often characterized as highly conformative and lacking in individuality. Is this true? What kind of behaviors then would be considered antisocial, and what are their moral, social, and political consequences? In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as antisocial, anticonventional, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications. For instance, are these behaviors justified? Are different standards applied to women? What are the temporal and spatial factors in people's conception of an antisocial behavior? To what extent are these behaviors culturally determined? No prior knowledge of the Chinese languages or China is required.

ASIA 33110. New Chinese Cinema

(3-0-3)

This class explores "underground" films produced in mainland China since the 1980s. Many films that were produced illegally or banned in China have garnered awards in prestigious international film festivals—Cannes, Berlin, Venice, Toronto, Tribeca (and the list runs on). How and in what ways were the films subversive? What is the role of China as a nation and state in the production of film today and in the past? How do these films play to the international film festival circuit and international market? Is commercialization bringing about less government control of film and other media in China? The class will view both feature films and documentaries, including those unavailable in the U.S. (but all with English subtitles). No prior knowledge of Chinese language, culture, or history is required.

ASIA 33111. Chinese Literary Dreams and Dream in the Red Chamber

(3-0-3) Ge

Dreams have long been objects of fascination for people in all cultures, including the Chinese. Focusing on the eighteenth-century Chinese master-work *Dream of the Red Chamber*, this course examines the literary functions of dreams in the Chinese context. Dreams will be discussed as a catalyst in the process of fiction making, serving as a master trope for the complementary oppositions between truth and falsehood, between history and literature, between reality and fictionality, and between the sublunary and the supernatural. The goal of the course is to familiarize students with a novel that is generally considered the pinnacle of Chinese fictional literature and with some of the cultural convictions that

underscore Chinese literary dreams. The primary text of the course is the 5-volume English translation of *Dream of the Red Chamber*. Supplementary readings include scholarship on the novel and modern theories on dream and the unconscious. Prior knowledge in Chinese language and culture not required.

ASIA 33112. Readings in Chinese Drama

(3-0-3) Ge

This course studies a number of works in Chinese dramatic traditions from the premodern times up to the twentieth century. While attention will be paid to Chinese theater as performing art, the plays selected for this course will be studied primarily as literary texts. The purpose of the course is to familiarize students with some of the most outstanding formulations in Chinese drama and their underpinning cultural meanings. All readings are in English translations, and no prior knowledge of Chinese culture or language is required.

ASIA 33155. Multi-Cultural China

(3-0-3) Lin

This course showcases the multifaceted aspects of China not only in the ethnic sense but also in the political sense. We will read literary works by writers of different ethnic backgrounds (e.g., Han, Tibetan, the Atayal tribe from Taiwan) and geographical origins (the PRC, Taiwan and Hong Kong). The objective of this course is to help students to gain a deeper understanding of the notion of Greater China and the concept of "Chineseness." Through analyzing works by different ethnic writers, we will learn to appreciate the diversity of Chinese culture that is often overshadowed by a misconception about Chinese homogeneity. Likewise, fictional creation by writers from the three regions will give us a broader knowledge of Chinese culture that is constantly threatened by a political need for unity. This course is taught in English and no prior knowledge of the Chinese languages is required.

ASIA 33240. Political Economy of Development

(3-0-3)

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include; rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, failed state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

ASIA 33301. Love and Death in Classical Japanese Drama

(3-0-3) Brownstein

Love, death and revenge were major themes in Noh, Kabuki, and Bunraku, the three main forms of traditional Japanese drama. During the first weeks of this course, we will read plays from the Noh theater, which evolved out of a variety of performing arts and reached maturity in the fifteenth century under the patronage of the samurai aristocracy. In an effort to create an atmosphere of mystery and beauty, the plays transformed episodes from folk tales, courtly romances, and military epics into highly stylized dance-dramas imbued with the austere aesthetic of Zen Buddhism. In the play *Atsumori*, for example, we witness a confrontation between the ghost of Taira Atsumori, a young warrior, and Kumagao no Jiro Naozane, the man who killed him in battle. In another play, *Dojoji*, a young woman turns into a giant serpent to kill the man who deceived her.

ASIA 33302. Human Rights Environment and Development in South Asia

(3-0-3)

The course, with the help of real world cases, will identify that the issues of development, human rights, and the protection of the environment are of

great importance to all of human society. They assume critical importance in South Asian countries where the issues are intricately linked to complex socio-political and economic factors. At first glance, development would appear to be instrumental, the prime vehicle for promoting the realization of human rights, in particular economic rights such as the right to an adequate standard of living, the right to work, the right to social security, right to education, the right to food and to the right to housing. Environmental preservation and rehabilitation also should be achieved through development. It is a sad fact however, that the development projects in the South Asian countries have overtaken poverty as the single largest cause of human rights violations and environmental degradation. Many development projects that should have brought well-being to local populations have, in fact, brought violations of human rights and environmental degradation.

ASIA 33309. Japanese Literature in the 1990s
(3-0-3)

Japanese Literature in the 1990s looks at the Japanese literary boom of the '90s as a literary project of re-remembering the past and intervening in the present. In the last decade and a half, Japan has undergone a transformation from the economic miracle of the '60s and '70s to economic recession, and with the recession, many of the values that helped to sustain high economic growth have come to be questioned: strict gender differentiation, dedication to the company for men and to the home for women, frugality, sacrifice of the personal for the social, emphasis on high growth policies at the risk of the environment, a resurgence in narratives of national homogeneity, etc. In this course, we will look at work by Japanese writers from the beginning of the recession until today, thinking about the way that writers are problematizing previous homogenous notions of gender, ethnicity and race; raising questions about the costs of high economic growth on society's subalterns; rethinking the emblem of that growth, the salary man, who has lately become a favorite butt of dissatisfaction; rethinking the as-of-yet unresolved significance of an ambitious and often cruel imperialist war on the Asian mainland; and finally, we will think about the significance of globalization and nationalism in Japanese literature.

ASIA 33310. The Japanese Empire and Literature
(3-0-3)

Japan emerged on the global stage as an imperialist power with the defeat of China in 1895 (over Korea) and the defeat of Russia in 1905 (again, over Korea). By the end of the First World War, the "Japanese Empire" included Taiwan, Korea, the south Pacific islands called Nan-yang, and the southern half of Sakhalin, not to mention the late 19th-century acquisitions Okinawa and Hokkaido. Hardly a static referent from 1895 until its dismantling upon defeat in 1945, the "Japanese Empire" must have meant something terribly different, depending on whether you were a Japanese national or colonial subject; a man or a woman; in the military or a man of letters; a domestic worker or colonial settler; businessman or maid. Even within the Japanese archipelago—indeed, even at the height of government censorship on cultural production in the early to mid '40s—the meaning of the "Japanese Empire" was a site of cultural contestation. This class looks at the literary and artistic production—fiction, memoirs, poetry, film, visual arts, and drama of the 50 year rise and fall of the Japanese Empire. A current of this class deals with the inter-Asian, Bolshevik-inspired organizations that looked to Japanese radicals, with no little irony, for solidarity in the fight against Japanese imperialism.

ASIA 33311. Reading the Japanese Woman in Literature
(3-0-3)

The Japanese woman is a favorite site of fantasy and anxiety, both in Japan and abroad. From the famously demure Madame Chrysanthemum of Pierre Loti's late 20th-century novel to the sassy Modern Girl of the roaring '20s to contemporary busy battlin' babes, the Japanese Woman has been available as a site of cultural imagination, and those images often tell us less about real Japanese women than they do about the dreams and nightmares of those doing the imagining. This class focuses on important works that variously glorify, orientalize, and/or trouble the idea of the Japanese woman in literature—both in Japan and in the West—over the past centuries. Readings will also include theoretical, historical, anthropological, sociological and popular sources.

ASIA 33312. Labor and Literature in Modern Japan
(3-0-3)

The modernization project begun in the late 19th century relied on new and changing labor relations and roles in order to transform Japan into a modern nation-state in a short fifty years. Central to the way men and women relate to their society, labor consequently figured prominently albeit quite differently in the literature of the early 20th century elite as well as in the labor-conscious literature that emerged in the '20s and '30s. With labor as the organizing principle, then, we'll think about the intersections of gender/sex, class, and subjectivity; theories of the transformation from a feudal society to a modern one; a "bourgeois" and a "proletarian" class ethos; politically engendered proletarian literature; the significance of agrarian versus urban labor; Marxist/Socialist critiques of the exploitation of labor by capital; the relationship of nation-state to empire to labor; and the place of literature and its relationship to labor in Japan.

ASIA 33313. Japanese Literature in the 1990s: Lost and Found in Contemporary Japan
(3-0-3)

The bursting of the high growth "economic bubble" in Japan in 1991 revealed that some of the costs of high economic growth—such as socially prescribed gender differentiation which urged dedication to the company for men and to the home for women, tremendous pressure put on children to achieve academically at ever younger ages, and emphasis on high growth policies at the risk of the environment—were simply too great to bear unreflectingly anymore. The '90s, then, knows itself as a "lost" decade, a decade in which an American, Alex Kerr, won a prestigious literary prize for his non-fictional *Lost Japan* (originally written in Japanese); a decade in which international best-seller Murakami Haruki continuously rejects the tenets of the past decades—family and company—for a fluffy lyricism of loneliness; a decade in which the resurgence of millenarian cults captivated readers and writers; a decade featuring apocalyptic animation and adult comics; a decade well suited to the noir detective novel, with its seamy underside and lack of redemption; a decade in which even the awarding of the Nobel Prize for Literature to Oe Kenzabur in 1994 served ironically to question whether Japan has lost its tradition of high literature. As the "lost" narratives of multiply, however, so too do the "found" narratives, whether they take the forms of neo-nationalism, personal memoir, post-national globalism, estheticized alienation, or other. As the most salient features of the '90s continue, this class is also about the way that the present knows the past.

ASIA 33314. Cruel Stories of Youth: Children and Teens in Japanese Film
(3-0-3)

From the wide-eyed children of anime to the crazy street fashions of Harajuku, images of kids and teens in Japanese popular culture are now distributed and consumed around the world. How then are those young audiences depicted and addressed within Japanese popular culture? What aspects of childhood or teen identity are repeated across generations? In order to answer these questions, we will look at Japanese films, including animation, from across the 20th century, that represent children and teens from a variety of perspectives, from the celebration of innocence to the threat of juvenile delinquency. In addition to analyzing representations of children and teens, students will also gain familiarity with Japanese film history and genres, and develop the critical vocabulary of film analysis. Films will include *I Was Born But*, *Crazed Fruit*, *A Cruel Story of Youth*, *Battle Royale*, *All About Lily Chou Chou*, *Nobody Knows*, *Grave of the Fireflies*, and *Akira*. All films will be subtitled. There will also be secondary readings in cultural studies and film studies, relating to the films we watch in class. Assignments will include an oral presentation, several short writing assignments, a film viewing journal, and a longer paper.

ASIA 33315. Men and Women in Modern Japanese Literature
(3-0-3)

In 20th-century Japan, as old roles such as samurai and geisha waned, both men and women had to re-define the characteristics and meaning of masculinity and femininity. This course will look at constructions of gender in modern Japanese

literature by both female and male authors. As we discuss both normative and deviant depictions of male and female roles, some topics we will address include: men and women at work and at war, marriage and family life, homosociality and homosexuality. Students will also gain familiarity with some of the major authors, genres, and literary movements of modern Japanese literature. Texts will include *Kokoro* by Natsume Soseki, *Confessions of a Mask* by Mishima Yukio, *Diary of a Vagabond* by Hayashi Fumiko, and short stories by Higuchi Ichiyo, Kono Taeko, and Oe Kenzaburo. This course is taught in English and no knowledge of the Japanese language is required.

ASIA 33316. Introduction to Japanese Pop Culture

(3-0-3)

Corequisite: ASIA 31316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasize the theoretical distinctions between those media. Rather than following a chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What role did foreign influences, most importantly, American pop culture play? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? This course is taught in English and no knowledge of the Japanese language is required.

ASIA 33317. The Samurai in Classical Japanese Literature

(3-0-3) Brownstein

The sword-wielding Samurai warrior is perhaps the most familiar icon of pre-modern Japan, one that continues to influence how Japanese think of themselves (and how others think of them) even in modern times. Who were the Samurai? How did they see themselves? How did other members of Japanese society see them? How did the role (and the image) of the Samurai change over time? To answer these questions, we will explore at the way Samurai were depicted in historical chronicles, fiction and drama, primarily from the 13th century through the 18th centuries. All readings will be English translation and no previous knowledge of Japan is required.

ASIA 35340. Anthropology of Globalization

(3-0-3)

This course analyzes contemporary patterns of globalization drawing on recent ethnographies. We will briefly overview the historical antecedents of globalization, and then proceed to analyze globalization's cultural, socio-political, and economic complexity, often resulting in urbanization. In particular, we will tackle the global circulation of food, entertainment, fashion, capital, ideologies, violence, religious practice, migrant/trafficked labor, and even of so-called "anti-globalization" movements. Examples of specific topics include youth and free trade in Latin America; cyber-politics among transnational Chinese, Eritreans, and others; McDonald's and consumerism in Moscow; Indian cinema and global media. By locating global processes in everyday practice, we will come to understand the interconnectivity sustaining globalization, and the resulting practices of resistance. More broadly, we will appreciate on the one hand how various cultures and societies become increasingly interconnected, and on the other how people around the world appropriate large-scale processes in culturally specific ways. The course emphasizes anthropology's role as a discipline that is globally relevant and publicly engaged. Accordingly, we will focus on the discipline's methodological and theoretical contributions in the study of globalization and its inequalities, and toward a more socially just world. The course will also equip you to design and implement an original research project, and to write an ethnographic account based on such project.

ASIA 35360. Immigration in Global Perspective

(3-0-3)

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How

is immigration related to urban "immigrant riots"? And what can anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the U.S., Europe, Australia, and Japan will enable us to appreciate both global and U.S. distinctive trends. Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class; the mass media; border enforcement; racism; the economy; territory and identity formation, and religion.

ASIA 40123. American Occupation of Japan

(3-0-3)

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The "Basic Initial Post-Surrender Directive" charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort, namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The Big Question—one that we will return to again and again in our discussions—is what is democracy and how is it created and sustained?

ASIA 40180. Gandhi's India

(3-0-3)

The dominant figure in India's nationalist movement for nearly thirty years, M.K. "Mahatma" Gandhi has also been the twentieth century's most famous pacifist, and a figure of inspiration for peace and civil rights movements throughout the world. This course offers an examination of Gandhi and the nature of his unconventional and often controversial politics. It charts Gandhi's career against the background of events in London, South Africa and India, and examines the evolution and practical application of his ideas and techniques of non-violent resistance, and his attitudes toward the economy, society and state. Gandhi's influence on Indian politics and society is critically assessed and his reputation as the "apostle of non-violent revolution" examined in the light of developments since his death in 1948. Some of the questions that will be discussed are: how far did the distinctive character of Gandhian politics derive from his absolute commitment to India's nationalist struggle? Was his success due to the force and originality of his political ideas and his advocacy of nonviolent action? Can his achievements be explained by political wiliness and pragmatism, or by willingness to embark on new experiments with the truth? Though helpful, a prior knowledge of Indian history is not required for this course.

ASIA 40185. History from Below: Colonialism, Nationalism, and Subalterns

(3-0-3)

This course introduces advanced undergraduates and graduate students to methods of doing and writing history that intervene within dominant historical narratives and frameworks by redefining historians' relationships with sources and the questions asked of them. The Subaltern Studies collective that emerged from South Asia in the 1980s and 1990s is now recognized as one of the more important historical interventions in recent years. Subaltern Studies' historiographic writing has questioned dominant nationalist narratives by arguing that they represent only the history of elites. The objective of the course is to draw attention to differing understandings of colonialism and nationalism by laying out the perspectives of "subalterns"—untouchables, tribals, peasants, workers, women and other marginalized groups. In addition subaltern perspective would also be extended to studying themes like democracy, politics, modernity, development, cities, environment, films and television in South Asia. The interventions by the Subaltern Studies collective will be situated in relationship to developments in European historiography, with special attention to the unique departures of this new school. Debates within and critiques of the collective's approach will also be examined. A background in South Asian history or culture is not a prerequisite.

ASIA 40241. Hong Kong Action Cinema

(3-0-3)

Corequisite: ASIA 41241

This course addresses the global significance of the gong fu vague [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supercedes Hollywood's dominance in the genre? Is this purely a Chinese phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic & economic significance within a larger framework or must they be critically dismissed outright? What does it mean that "everybody was kung fu fighting" and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English.

ASIA 40242. Contemporary Korean Cinema

(3-0-3)

Corequisite: ASIA 41242

This course provides a historical, cultural, and aesthetic appraisal of South Korean cinema as it evolved from a Korean-centric film industry to a globally engaged film industry as evidenced by the current hallyu ("Korea fever") phenomenon. Aspects of cultural continuity as well as cultural transformations and the forces that are involved in this dynamic cultural arena will be addressed. Some of the films under analysis will include Obaltan: *Aimless Bullet*, *Sopyonje*, *Peppermint Candy*, *Shiri*, *Bungee Jumping of Their Own*, *My Sassy Girl*, and *JSA*. No knowledge of Korean is required.

ASIA 40426. Asian Americans Writing Sexuality

(2.5-0-3)

This course will introduce students to major works of Asian American literature while exploring issues of sexuality and gender in this body of literature. We will focus on race/ethnicity, authenticity, and representation as contested sites in Asian American literature and how these contested sites produce inter/intracultural tensions about the Asian body as it is viewed from within Asian American literature and from without. Primary texts will include novels, short fiction, poetry, film, drama, the graphic novel, and critical essays.

ASIA 40606. History of Modern China

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of Qing dynasty) to the present. It will highlight China's evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–49, back to a period of strength under the Communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

ASIA 40710. International Trade

(3-0-3)

The objective of this course is to provide the students with the basics of theory, institution, and practices of global trade and investment, with special references to economic integration at the regional and global levels. By mastering the basic concepts and analytical skills, you will gain a better understanding of complex economic relations in today's global economy. The course at the same time emphasizes the application of basic theories and tools you have learned in analyzing contemporary issues. The level of the course is designed to be accessible to the students with a background in microeconomic theory at an intermediate level. Some classes (as such occasions call for) will begin with a discussion of

current developments in global economic relations. You are urged to have access to *The Wall Street Journal* and/or other international news media (such as *The New York Times*, *Economists*, *Business Week*, the World Bank's *World Development Report*, or even listening to NPR) as lectures attempt to link theories to events out in the world. The assigned textbook is largely to complement and supplement lectures. Given the time constraint, lectures will focus on a broad, analytical overview of policy-related global issues. Detailed points and other issues are left behind for you to read the relevant textbook chapters and reference readings.

ASIA 40843. U.S. and the Vietnam War

(3-0-3)

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an American as opposed to a Vietnamese perspective. Broad topics to be covered include: Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–1975: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture and a discussion course. Attendance at **both** is required. Approximately six books will be assigned.

ASIA 40853. The United States and the Vietnam War

(3-0-3)

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an American as opposed to a Vietnamese perspective. Broad topics to be covered include: Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–75: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture and a discussion course.

ASIA 40860. Genocide, Witness and Memory

(3-0-3)

How are episodes of mass killing experienced, survived, and remembered? In this course we consider political, social and cultural trauma as expressed in memoir, documentary, fiction, and academic text. Witness as an ethical stance is examined; the role of memory in shaping morality is questioned. (Does "Never Again" actually work?) We also look at the perpetrators of genocidal killing: who are they? What prompts their actions? Moreover: are any of us incapable of this kind of violence?

ASIA 40870. Indian Ocean: Trade and Interaction

(3-0-3)

This course offers a multi-disciplinary approach to studying one of the oldest forums for inter-continental trade and interactions: The Indian Ocean. This geographical entity has linked peoples of Africa, Europe and Asia through the exchange of technology, ideas, goods and peoples from the dawn of the first systematic inter-continental trade between the Bronze Age polities of Egypt, Mesopotamia and India-Pakistan, ca. 4th millennium B.C. to the present era. The class has two objectives: a) to understand the nature of trade and exchange mechanisms in the Indian Ocean world from both temporal and spatial perspectives and, b) to underscore the interdependency between trade/exchange and political-economy, climate, society and history. The required readings include works from various disciplines, including economics, history, political sciences, and geography as well as archaeology and cultural anthropology. Students will be encouraged to add to the broader understanding of Indian Ocean trade provided by the course by undertaking comparative research projects that examine two periods, two areas or two processes within this larger interactional complex.

ASIA 40875. Archaeology of South Asia

(3-0-3)

This course will survey the rich and varied past of South Asian societies and cultures including those of India, Pakistan, Afghanistan, Nepal, Bangladesh and Sri Lanka from an archaeological perspective. The topics surveyed and discussed through lectures, readings, films and group projects will include the rise and fall of the Bronze Age Civilizations of South Asia, the emergence of Buddhism, and

the invasion of Alexander the Great during the Imperial period in the 4th century B.C. This course will also cover recent archaeological efforts to understand the historical period in South Asia, from the Indo-Roman trade to the rise and decline of the Mogul (Mughal) Empire.

ASIA 41201. Hong Kong Cinema

(0-1-0)

Corequisite: ASIA 40241

Certain films will be viewed for further discussion in class.

ASIA 41241. Hong Kong Action Cinema in a Global Context—LAB

(0-2-0)

Corequisite: ASIA 40241

This is a laboratory in addition to Course 40241, which addresses the global significance of the gong fu vague [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supercedes Hollywood's dominance in the genre? Is this purely a Chinese phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic & economic significance within a larger framework or must they be critically dismissed outright? What does it mean that "everybody was kung fu fighting" and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English.

ASIA 41242. Contemporary Korean Cinema

(0-2-0)

Corequisite: ASIA 40242

This course provides a historical, cultural, and aesthetic appraisal of South Korean cinema as it evolved from a Korean-centric film industry to a globally engaged film industry as evidenced by the current hallyu ("Korea fever") phenomenon. Aspects of cultural continuity as well as cultural transformations and the forces that are involved in this dynamic cultural arena will be addressed. Some of the films under analysis will include Obaltan: *Aimless Bullet*, *Sopyonje*, *Peppermint Candy*, *Shiri*, *Bungee Jumping of Their Own*, *My Sassy Girl*, and *JSA*. No knowledge of Korean is required.

ASIA 47498. Independent Studies for Capstone Project

(V-0-V)

This is an Independent course working directly under Professor Agustin Fuentes to fulfill a capstone project.

ASIA 53001. Senior Seminar: Chinese Political Thought

(3-0-3)

Readings in translation from the works of major classical Chinese thinkers and schools, and completion of several short discussion/research/analytic essays based on those works, with the aim of understanding Chinese political thinking in its own context, for the general insights it may give into live and politics, and in comparison with other traditions of political thought, especially the classical and modern west.

Computer Applications

CAPP 20505. Introduction to Computer Systems

(3-0-3) Berzai

As an introduction to information processing, this is a literacy course that explains computer systems, including hardware, software, systems analysis, and other related topics. The class learns some computer programming, logic, design, and documentation using the BASIC language. The students also work on teams to learn some phase of the IS environment, learn multimedia software, and make presentations to the class.

CAPP 20506. Introduction to Computer Systems

(3-0-3) Berzai

As an introduction to information processing, this is a literacy course that explains computer systems including hardware, software, systems analysis, and other related topics. The class learns some computer programming, logic, design, and documentation using the BASIC language. The students also work on teams to learn some phase of the IS environment, learn multimedia software, and make presentations to the class. First year students only.

CAPP 23507. La Telenovela: Historia, el Significado Cultural y Produccion Estudiantil

(3-0-3) Barry

Prerequisite: ROSP 20202

The goal of this course is to facilitate student exploration of the genre of the telenovela. Students will sharpen oral and written language skills through exposure to authentic telenovelas from Latin America, reading of authentic texts, and through the creation and production of their own telenovela. They will hone their oral and written proficiency and learn the idiosyncrasies of Hispanic culture as they write, direct, act in, tape, and edit a telenovela. During this process students will also learn and apply basic videography and non-linear video and audio editing techniques.

CAPP 30310. Introduction to C++ Programming

(3-0-3)

With today's Information Technology stressing the object-oriented paradigm and code reuse, there is a strong demand for programming in C++ and (C#) to solve real world application challenges. In addition to addressing the basic procedural programming concepts and their application, the use of existing code and classes will allow students to develop marketable skills for entry into the work force. In addition to extensive hands-on learning exercises, students will have the opportunity to choose projects that best apply to their interests and/or their first major field of study.

CAPP 30320. Research Methods in Computer Programming

(3-0-3)

Scheme is a modern programming language that is both powerful and easy to learn. Scheme teaches many important programming ideas and, with a knowledge of Scheme, students can readily learn other languages like C++ and Java. The Scheme course will be a beginning course and will not require programming experience. The course will emphasize problem-solving skills and it will demonstrate how data drives program development.

CAPP 30340. Artificial Intelligence

(3-0-3) Sepeta

Artificial Intelligence is the subject of trying to create human intelligence in machines (computers). In this endeavor we come to better understand the nature of intelligence and the moral and ethical ramifications of mechanizing intelligence; and, simultaneously we discover clever and ingenious uses of the computer which enrich all of computer science. Topics covered include the history of AI, programming languages for AI, state space search, games, knowledge representation and reasoning, planning, neural networks, and program evolution. The course requirements include two papers (2–4 pages each) a presentation, two tests, and a final examination.

CAPP 30350. Visual Basic Programming

(3-0-3) Irmiger

Prerequisite: or CAPP 20506

The course will investigate object-oriented data processing concepts using Microsoft's Visual Basic Programming Language. Terminology and technique will be combined to explore the object-oriented paradigm. Object-oriented will be compared to traditional procedural paradigms wherever appropriate.

CAPP 30400. Programming and Application Development

(3-0-3) Villano
