UNIVERSITY OF NOTRE DAME  
UNDERGRADUATE PROGRAMS  
2008-2009

2008–09

**Bulletin of Information**  
University of Notre Dame  
Undergraduate Programs

---

Vol. 104, No. 2, August 2008

The course offerings and requirements of the University of Notre Dame are continually under examination, and revisions are expected. This *Bulletin of Information* is not a contract; it merely presents the offerings and requirements in effect at the time of publication and in no way guarantees that the offerings and requirements will remain the same. Every effort is made to provide advance information of any changes.

The text pages of this *Bulletin* were printed on recycled paper.

## Table of Contents

4	Safety Information from Notre Dame Security/Police	
4	Officers of the University	
4	Other Members of the Officer Group

## Safety Information from Notre Dame Security/Police

---

The security of all members of the campus community is of paramount concern to the University of Notre Dame. Each year the University publishes an annual report outlining security and safety information and crime statistics for campus. This brochure provides suggestions regarding crime prevention strategies and important policy information about emergency procedures, reporting of crimes, law enforcement services on campus, and information about support services for victims of sexual assault. The brochure also contains information about the University's policy on alcohol and other drugs, the SafeWalk program, and campus shuttle service.

This brochure is available by writing to:

Office of the Director  
University Security/Police  
Room 204, Hammes Mowbray Hall  
Notre Dame, IN 46556-5675

or calling the department at 574-631-8338.

### Nondiscrimination

The University of Notre Dame does not discriminate on the basis of race, color, national or ethnic origin, sex, disability, veteran status or age in the administration of any of its educational programs, admissions policies, scholarship and loan programs, athletic and other school-administered programs or in employment.

The University has designated the Director of its Office of Institutional Equity to handle all inquiries regarding its efforts to comply with and carry out its responsibilities under Title IX and under Section 504 of the Rehabilitation Act of 1973. The Title IX and Section 504 coordinator may be contacted as follows:

Director  
Office of Institutional Equity  
414 Grace Hall  
University of Notre Dame  
Notre Dame, IN 46556  
(574) 631-0444

## THE UNIVERSITY OF NOTRE DAME

## Mission Statement of the University of Notre Dame

### CONTEXT

This statement speaks of the University of Notre Dame as a place of teaching and research, of scholarship and publication, of service and community. These components flow from three characteristics of Roman Catholicism which image Jesus Christ, his Gospel, and his Spirit. A sacramental vision encounters God in the whole of creation. In and through the visible world in which we live, we come to know and experience the invisible God. In mediation the Catholic vision perceives God not only present in but also working through persons, events, and material things. There is an intelligibility and a coherence to all reality, discoverable through spirit, mind and imagination. God's grace prompts human activity to assist the world in creating justice grounded in love. God's way to us comes as communion, through the communities in which men and women live. This community includes the many theological traditions, liturgies, and spiritualities that fashion the life of the church. The emphasis on community in Catholicism explains why Notre Dame historically has fostered familial bonds in its institutional life.

A Catholic university draws its basic inspiration from Jesus Christ as the source of wisdom and from the conviction that in him all things can be brought to their completion. As a Catholic university, Notre Dame wishes to contribute to this educational mission.

### THE MISSION

The University of Notre Dame is a Catholic academic community of higher learning, animated from its origins by the Congregation of Holy Cross. The University is dedicated to the pursuit and sharing of truth for its own sake. As a Catholic university, one of its distinctive goals is to provide a forum where through free inquiry and open discussion the various lines of Catholic thought may intersect with all the forms of knowledge found in the arts, sciences, professions, and every other area of human scholarship and creativity.

The intellectual interchange essential to a university requires, and is enriched by, the presence and voices of diverse scholars and students. The Catholic identity of the University depends upon, and is nurtured by, the continuing presence of a predominant number of Catholic intellectuals. This ideal has been consistently maintained by the University leadership throughout its history. What the University asks of all its scholars and students, however, is not a particular creedal affiliation but a respect for the objectives of Notre Dame and a willingness to enter into the conversation that gives it life and character. Therefore, the University insists upon academic freedom, which makes open discussion and inquiry possible.

The University prides itself on being an environment of teaching and learning that fosters the development in its students of those disciplined habits of mind, body, and spirit that characterize educated, skilled, and free human beings. In addition, the University seeks to cultivate in its students not only an appreciation for the great achievements of human beings but also a disciplined sensibility to the poverty, injustice, and oppression that burden the lives of so many. The aim is to create a sense of human solidarity and concern for the common good that will bear fruit as learning becomes service to justice.

Notre Dame also has a responsibility to advance knowledge in a search for truth through original inquiry and publication. This responsibility engages the faculty and students in all areas of the University, but particularly in graduate and professional education and research. The University is committed to constructive and critical engagement with the whole of human culture.

The University encourages a way of living consonant with a Christian community and manifest in prayer, liturgy, and service. Residential life endeavors to develop that sense of community and of responsibility that prepares students for subsequent leadership in building a society that is at once more human and more divine.

Notre Dame's character as a Catholic academic community presupposes that no genuine search for the truth in the human or the cosmic order is alien to the life of faith. The University welcomes all areas of scholarly activity as consonant with its mission, subject to appropriate critical refinement. There is, however, a special obligation and opportunity, specifically as a *Catholic* university, to pursue the religious dimensions of all human learning. Only thus can Catholic intellectual life in all disciplines be animated and fostered and a proper community of scholarly religious discourse be established.

In all dimensions of the University, Notre Dame pursues its objectives through the formation of an authentic human community graced by the Spirit of Christ.

## The University of Notre Dame

Notre Dame is at once a Catholic university, a national symbol, and an international community of religious faith, intellectual inquiry, and devotion to the powerless. Among its conspicuous features are its academic reputation, an elaborately designed and golden-domed administration building, a famous collegiate football team, a popular shrine to the Mother of God, two fascinating lakes, a pleasantly landscaped campus, and a spirited student body surrounded by an intensely loyal community of alumni and friends who unabashedly refer to themselves as the Notre Dame "family."

The institution was founded on the site of an old Catholic missionary outpost in 1842. The founders were a small and impoverished band of French and Irish religious brothers whose leader was Rev. Edward F. Sorin, C.S.C., an impetuous, strong-willed, and apparently tireless priest. In a memoir titled *My Notre Dame*, Thomas Stritch, professor emeritus of American Studies and Notre Dame historian, wrote that Father Sorin "carved Notre Dame out of the Northern Indiana wilderness and by sheer strength of character made it go. He built and rebuilt, recruited students where he could, and gradually began the unique image Notre Dame still enjoys. In a college or university, reputation is everything. Somehow Sorin developed a favorable one for Notre Dame, one that reverberated throughout the American Catholic world, the Eastern Seaboard as well as the Midwest. Long before football was invented, Notre Dame caught the imagination of American Catholics."

Father Sorin was a member of the Congregation of Holy Cross, a then recently formed Catholic religious community that would own and administer the University from its foundation until 1967, when the University's governance was legally transferred to a predominantly lay board of trustees. The University's bylaws ensure that the Congregation will continue to exert a prominent influence on its administration. They stipulate, for example, that Notre Dame's presidents must always be chosen from among the priests of the Congregation's Indiana Province. The Congregation also ministers to the University it founded through the many Holy Cross priests serving on the University's faculty, the counselors and chaplains who live with the undergraduate students in the residence halls, and the staff of the campus ministry office.

In 1972, five years after the change in governance, a new chapter of University history began to be written as the first undergraduate women were admitted to Notre Dame. A quarter of a century later, the majority of living Notre Dame alumni have been graduated from a fully coeducational institution.

Obviously, many other aspects of the University have been changed by more than a century and a half of turbulent and unpredictable happenings in the Catholic Church and in American life and culture. Fires, outbreaks of infectious diseases, the Civil War, waves of European immigrants and refugees, Church controversies, the Great Depression, two world wars and several smaller bloodlettings, the civil rights movement, and other social convulsions in America, all have involved members of the Notre Dame family and have left deep and indelible imprints on the character and rich tradition of the institution. Rev. William Corby, C.S.C., a successor to Father Sorin, played a memorable national role as a Union chaplain at the Battle of Gettysburg; Rev. Julius Nieuwland, C.S.C., a scientist and faculty member, invented synthetic rubber; Notre Dame students were participants in a nationally publicized scuffle

## STUDENT LIFE

with a resurgent Ku Klux Klan; the University's colorful football team and something of its campus atmosphere were enshrined in American history and myth by a film featuring a memorable performance by an actor who later became a president. More recently, a second film dramatized the University's spirit and gave a new name to unheralded athletes—*Rudy*.

Most notably, Notre Dame's reputation, so zealously nurtured, sustained, and celebrated by Father Sorin and his successors, has become increasingly international in recent years because of the establishment of numerous academic and community service programs in the Holy Land, Mexico, Chile, Ireland, England, Austria, France, Italy, Spain, Australia, Japan, and other countries.

Despite these remarkable and generally welcome alterations in institutional shape and scope, Notre Dame's proud and self-conscious claim to be a Catholic university and its intent to be a great Catholic university remain unchanged from Father Sorin's day. The University boasts a core curriculum that includes required courses in theology and philosophy. In administrative and disciplinary affairs, Notre Dame holds itself responsible to the teaching of the Catholic Church, and it holds its students, faculty, and staff responsible for their own conduct, particularly in matters affecting the common good. Precisely because it is a Catholic university, it is a place where men and women from all faiths and backgrounds are to be made welcome. The staffs of the residence halls, campus ministry, the Center for Social Concerns, and the Alumni Association all continue to invite and encourage Notre Dame students, graduates, faculty, and administrators to pray together, to discuss and share their hopes, joys and sorrows, to bear with and sustain one another, and always to serve those most in need.

### Student Life

First and foremost, Notre Dame offers its students a quality education, made possible by an excellent faculty, advanced research facilities, experienced administration, and a well-developed educational philosophy. But cognizant that values, character, and leadership skills are developed as often in the context of caring relationships as in selected reading from various textbooks, the University offers more to its students—a student life rich in depth and variety, one that is nationally recognized and characteristically deep in its impact on those who share in it. To make our "definition" of the University more complete, we shall briefly describe some of the main aspects of student life. Our first consideration will be the students themselves.

**Students.** Notre Dame is one of a handful of truly national universities, with students drawn from all 50 states and more than 100 countries. One factor all the students have in common, though, is strong academic ability. In addition, an annual survey of freshmen taken by the American Council

on Education indicates that Notre Dame students, to a greater degree than their peers nationally, are confident of academic success and see themselves as having originality and leadership potential.

**The Campus.** One especially appealing aspect of life at Notre Dame is the campus itself. The University's 1,250 acres, with two lakes, extensive wooded areas, and tree-lined quadrangles, contribute to a serene park-like atmosphere that does wonders to alleviate the pressures of academic life.

The collegiate Gothic style of many of the structures, the ornate Main Building (with a golden dome), and the Basilica of the Sacred Heart and the statuary and masonry carvings that abound on campus have always been a source of delight to students and tourists alike.

**Residentiality.** Over the years no single nonacademic characteristic of Notre Dame has made a greater impression on students than the University's residential tradition. It is a tradition as old as the University itself. Our founder, Father Edward Sorin, established at Notre Dame the sort of residential ambience he had known at French universities. Nineteenth-century students slept, ate, studied, and attended classes en masse in wings of the Main Building. The regimen was strict: a prefect roused students at 6 a.m., supervised their prayer, meals, study, and recreation and returned them to bed 16 hours later.

Times have changed, as well as the discipline, but not the importance of residentiality in student life. According to a committee focusing on University priorities, "Next to its academic mission and Catholic character, residentiality is the least dispensable of Notre Dame's hallmarks."

Each of Notre Dame's 27 undergraduate residence halls has an atmosphere and character of its own. Each has its traditions and generates a feeling of loyalty and camaraderie among its inhabitants. The halls are staffed by rectors, assistant rectors, and resident assistants who endeavor to challenge, facilitate, and support students in integrating the meaning and practice of Christianity today through the development of a community that is humanizing, worshiping, and service-oriented. Consequently, the residence halls form the base of many spiritual, athletic, social, and volunteer service activities. Spirited rivalries between residence halls in various sporting and social events are common. Life in the residence halls provides the context for many relationships among students; social fraternities and sororities are thus considered unnecessary.

First-year students are required to live on campus, and the vast majority of upper-class students find it worthwhile to do the same when space is available. Approximately 80 percent of undergraduates live on campus. At the same time, a variety of off-campus housing is available in the South Bend area.

**Spiritual Life.** Notre Dame stands for the belief that all who teach, work, and study at the University

should discover, reinforce, and strengthen their convictions, values, and traditions. A mature religious or spiritual life is integral to full human development. This can be hidden, stifled, or allowed to stagnate; but it can also be challenged and encouraged to grow. In residence hall life and classroom, in liturgy and celebration, in volunteer work and athletic competition, Notre Dame people strive for a wholeness in their lives, even a holiness, as they discover who they are in these multiple arenas.

Notre Dame is a professedly Catholic place, which means—at its core—that all are welcome. Beliefs are strengthened by commitment to God, to one another, and to the human family in love and service, while at Notre Dame and throughout life.

The Office of Campus Ministry provides a series of retreats, catechetical instruction for those who wish to join the Catholic Church or find deeper understanding of religious matters, a program of preparation for marriage, and counseling in matters of personal conscience formation. Mass is celebrated daily in the Basilica of the Sacred Heart and in many of the residence hall chapels. There are frequent prayer services of many forms throughout the year, including ecumenical prayer services sponsored by Campus Ministry. Students who are not Catholic are always welcome at any of the various activities sponsored by Campus Ministry. Congregations of many faiths in South Bend also welcome students in their worship.

**Clubs and Organizations.** Notre Dame has a wealth of clubs and organizations for interested students. Interests and commitments vary widely and are reflected in the number and scope of groups.

Some clubs have an academic orientation, ranging from campus branches of national organizations, such as the American Institute of Architects, to strictly local clubs, such as the Chemistry and Finance clubs.

Other groups relate to ethnic and special-interest groups. These clubs include the Asian American Association, the Black Cultural Arts Council, the Chinese Students Association, and the Native American Students Association, to name a few.

Students who enjoy music may choose from a wide selection of choirs, bands, and ensembles. Students may audition for the renowned Notre Dame Glee Club, the Notre Dame Liturgical Choir, the Notre Dame Chorale, the Notre Dame Folk Choir, Voices of Faith Gospel Ensemble, or the Notre Dame Women's Choir. The famous Notre Dame Marching Band, the nation's oldest university marching band, is one of many choices available for musicians. Another is the concert band, which travels to a different part of the United States each spring, representing Notre Dame in concert. Other specialty groups include a jazz band and orchestra.

**Center for Social Concerns (CSC).** The Center for Social Concerns provides a wide variety of service and social action opportunities, programs, seminars,

## STUDENT LIFE

and courses. For more information, see “Center for Social Concerns,” later in this section of the *Bulletin*.

**Media.** Students with interests in journalism usually are attracted to an outlet in the various media on campus.

*The Observer*, a student newspaper serving the Notre Dame-Saint Mary’s College community, is published five times a week, offering a vital line of communication within the University, as well as the chance to keep up with the “outside world.”

The *Scholastic* is a news/general information magazine, and the oldest college publication in the country. The *Juggler*, Notre Dame’s journal of the arts, is published once a semester and features prose, poetry, photography, and illustrations. The award-winning *Dome*, the University yearbook, appears every April.

There are a number of other student publications with more specialized audiences—for example, *Notre Dame Student Business Review* and *Technical Review*, which appear periodically throughout the year and are student-produced.

WSND/FM and WVFI are the University’s student-run broadcast media. WVFI, which broadcasts over the Internet, airs mostly progressive rock and special programs, while WSND has a more classical selection (until late evening, when rock and jazz are featured).

**Annual Events.** Notre Dame students look forward to participating in several events that occur annually on campus.

Notre Dame’s theatre department presents several major productions each year, and tryouts are open to all students. The Notre Dame Student Players present less traditional theatre, providing one drama or musical each semester.

The Sophomore Literary Festival is a celebration of the literary arts. Visiting authors read from their works, expound on personal philosophy and offer student workshops. Guests in recent years have included Ken Kesey, W.P. Kinsella, Jean and Robert Hollander, and Candace Bushnell.

Students also take advantage of the nearby Lake Michigan beaches and the Michigan ski areas. Trips to Chicago are frequently organized to attend the theatre, museums, shops, or sporting events or just to spend the day sightseeing. South Bend, with a metro population of some 275,000, offers shopping, parks, sports, movies, and cultural events. The East Race Waterway is an attraction providing kayaking, tubing, and rafting.

**Athletics.** The name “Notre Dame” no longer brings thoughts of just a football powerhouse, and with good reason. Notre Dame has developed into an outstanding academic institution but at the same time has expanded its athletic excellence beyond the football field.

## INTERCOLLEGIATE

The University is committed to a well-rounded program for both men and women. The Fighting Irish athletic tradition, renowned throughout the United States, encompasses much more than football and basketball. Notre Dame boasts national contenders in many Olympic sports, including women’s soccer, baseball, men’s and women’s fencing, and hockey, all of which ranked number one in the country at some point during the past five seasons. Since 2001, Notre Dame has won national championships in women’s basketball (\*01), women’s soccer (\*04), and fencing (\*05).

The women’s intercollegiate athletic program, which has grown tremendously over the last 20 years, now includes 13 varsity sports (there are also 13 men’s sports). Notre Dame women student-athletes compete in basketball, tennis, fencing, lacrosse, swimming and diving, volleyball, softball, golf, indoor and outdoor track, cross country, soccer, and rowing.

The Notre Dame student body plays an important role in the success of the teams that represent the University. Anyone who has attended a football pep rally or seen a top-ranked basketball team upset in the Joyce Center knows why. The pride and loyalty displayed by “the greatest student body in the world” are a moving force that embodies the spirit of the Notre Dame community. Athletic contests at Notre Dame are an integral part of the social life as well as an opportunity for the athletically gifted to test their skills with the nation’s best.

*RecSports*

Housed in Rolfs Sports Recreation Center, the Office of Recreational Sports provides extensive opportunities in intramurals, club sports, instruction, special events, and fitness. Over 300 activities are offered throughout the year.

The Intramural program allows members of the student body to grab a share of the limelight while also promoting rivalries among the residence halls. For others, intramurals are a chance to stay in shape, get away from the books, or enjoy a purely recreational sport.

Club sports may be recreational or competitive and are organized by student officers with the guidance of RecSports. These clubs determine for themselves the extent of activity and competition. Currently, 25 club sports are offered.

RecSports’ instructional program offers over 20 classes, including a wide array of dance, martial art, sport, and outdoor recreation classes. Campus fun runs, a biathlon, and Late Night Olympics are among the special event offerings. And, drop-in events include ice skating, badminton, volleyball, and indoor soccer.

The Challenge U Fitness Program offers group exercise classes and conducts assessments, testing, and consulting as part of their personal training program;

and provides information through demonstrations and lectures. More than 90 classes are offered in a variety of aerobic, toning, and water exercise programs, as well as yoga and tai chi. Students are encouraged to make informed choices about their health and fitness and to utilize the numerous facilities available to them.

## FACILITIES

Notre Dame is home to some of the finest athletic facilities at any university. The 78,000-square-foot Rolfs Sports Recreation Center has a large state-of-the-art fitness room with more than 30 cardiovascular machines and a full complement of strength machines and free weights. The Rolfs also has a three-lane, 1/8 mile track; three courts for basketball, volleyball, and badminton; a rink-style court for soccer and inline hockey; and two activity rooms for dance, aerobics, and martial arts. The Rockne Memorial is legendary for its highly competitive pickup basketball games. The “Rock” contains not only two basketball courts but also has 10 handball/racquetball courts, one combination squash/handball court, a swimming pool with a spectator gallery, a smaller pool for family use, a climbing wall, a weight room, a fitness room, and two rooms for dance and group exercise.

In addition to the nine-hole Notre Dame Golf Course, the 18-hole William K. and Natalie O. Warren Golf Course opened in the spring of 2000 on the northeast edge of campus. Other outside facilities include basketball courts in several locations, 14 outdoor tennis courts, and several multipurpose playing fields.

Built in 1968, Notre Dame’s Joyce Center has been called one of the most complete sports complexes in the country. Not only is there an 11,418-seat basketball/volleyball arena but also a field house containing a two-lane track, a 2,667-seat hockey arena, boxing and weight rooms, and five volleyball courts. Elsewhere in the building are an auxiliary gym, two intramural gyms and a gym for fencing, six handball/racquetball courts, and two squash courts. The Rolfs Aquatic Center, with its Olympic-sized swimming pool, completes this complex.

The Melissa Cook Softball Stadium is the newest varsity complex on campus. The stadium opened for competition on April 13, 2008.

The Guglielmino Athletic Complex, affectionately referred to as “The Gug” (pronounced Goog) opened in the fall of 2005. The 95,840-square-foot facility houses locker rooms for both the football student-athletes and coaches’ offices, team meeting rooms, a 500-seat auditorium, athletic training, and the new 25,000-square foot Hagggar Fitness Center, used by all of Notre Dame’s 26 varsity athletic teams, with the latest in state-of-the-art strength training equipment, a 50-yard track for speed workouts, and a 45-by-18 yard Prestige Turf field for team stretching exercises and workouts.

## THE SPIRIT OF INCLUSION AT NOTRE DAME

The Loftus Sports Center houses Meyo Field. The center, which measures 614 by 210 feet, also contains practice areas for lacrosse, soccer, baseball, and softball. A six-lane indoor track circles Meyo Field, a 120-yard synthetic-turf practice field (new in 2003).

The University's Eck Pavilion, a 35,000-square-foot structure, is the place on campus for indoor tennis. Inside are six courts, coaches' offices, showers and lockers, a repair shop, a vending lounge, and an observation deck. The pavilion is used by the varsity men's and women's tennis teams.

Other facilities used by Irish athletic teams include:

- Notre Dame Stadium, with its 80,795 seats, home to Irish football since 1930.
- Alumni Field, with its 2,500 seats, home since 1990 to men's and women's soccer.
- Moose Krause Stadium, with its 5,000 seats, home to men's and women's outdoor track and men's and women's lacrosse.
- Frank Eck Stadium, with its 2,500 seats, home to Irish baseball since 1994.
- Ivy Field, with many recent improvements, home to Notre Dame softball.
- New softball stadium planned for 2008. Construction to begin in summer 2007.

**Student Government.** The unique blend of elements that gives the Notre Dame community its identity has, over a period of years, shaped the character of the student government.

The greatest influence on the student government is the system of residence halls, which not only provides students with a place to live but also serves as the principal center for social interaction on campus. Each hall has its own government, consisting of a hall president, vice president, cabinet, and judicial board, which works in cooperation with the hall staff to develop the best possible environment for its residents. As the basic unit of student government, the halls, and their needs significantly shape the campus-wide student government.

The relatively simple structure of the student government has evolved gradually in response to changing attitudes and needs of the student body. At the head of the student government is its chief executive officer, the student body president. Although the duties of the job have tended to vary with the priorities of each officeholder, in general the student body president represents the interests of the student body in all areas of life at Notre Dame.

The most representative student government groups are the Hall Presidents' Council and the Student Union Senate, both of which meet weekly to discuss the various aspects of residence and University life, and to coordinate activities among the halls and across campus.

The Campus Life Council was created by the University's Board of Trustees to allow for discussion among students, faculty, and administrators concern-

ing life on campus. The council is empowered to pass resolutions recommending student life policy changes to the administration.

The programming arm of the student senate at Notre Dame is the student government board. This board coordinates such events as lectures, plays, concerts, movies, and more. In addition, it coordinates *The Show*, a major back-to-school campus concert, and the Sophomore Literary Festival (which were previously mentioned under "Annual Events"), as well as the Collegiate Jazz Fest, Acoustic Cafe, student bands, and other student performances, professional entertainment, and special events. The Student Union Board also coordinates services such as plant and furniture sales, as well as refrigerator rentals.

**Student Conduct.** A Catholic university is a society composed of faculty and students whose primary purpose is the pursuit of Christian wisdom. The society can exist only in an atmosphere of responsibility and good order. The University seeks, therefore, to provide those conditions and opportunities best suited for educating the student.

Students registering at the University of Notre Dame agree to abide by the regulations concerning student conduct set forth in *du Lac, A Guide to Student Life*, which is distributed to each student, *du Lac* is also available on the University's website, nd.edu.

The University reserves the right to deny the privilege of enrollment to any student whose conduct or attitude is believed to be detrimental to the welfare of the institution.

**Saint Mary's College.** Because of the proximity and rich tradition common to Notre Dame and Saint Mary's, the two institutions share many activities in the area of academics as well as social events, student organizations, and community service projects. The two institutions maintain a cooperative program permitting a limited number of courses to be taken at the neighboring institution. Because of the extensive cooperation between the two, the campuses are aptly referred to as the "Notre Dame-Saint Mary's community."

## The Spirit of Inclusion at Notre Dame

"Strangers and sojourners no longer." (Ephesians 2:19)

The University of Notre Dame strives for a spirit of inclusion among the members of this community for distinct reasons articulated in our Christian tradition. We prize the uniqueness of all persons as God's creatures. We welcome all people, regardless of color, gender, religion, ethnicity, sexual orientation, social or economic class, and nationality, for example, precisely because of Christ's calling to treat others as we desire to be treated. We value gay and lesbian members of this community as we value all members of this community. We condemn harassment of any kind, and University policies proscribe it. We

consciously create an environment of mutual respect, hospitality and warmth in which none are strangers and all may flourish.

One of the essential tests of social justice within any Christian community is its abiding spirit of inclusion. Scriptural accounts of Jesus provide a constant witness of this inclusiveness. Jesus sought out and welcomed all people into the Kingdom of God—the gentile as well as the Jew, women as well as men, the poor as well as the wealthy, the slave as well as the free, the infirm as well as the healthy. The social teachings of the Catholic Church promote a society founded on justice and love, in which all persons possess inherent dignity as children of God. The individual and collective experiences of Christians have also provided strong warrants for the inclusion of all persons of good will in their communal living. Christians have found their life together enriched by the different qualities of their many members, and they have sought to increase this richness by welcoming others who bring additional gifts, talents and backgrounds to the community.

The spirit of inclusion at Notre Dame flows from our character as a community of scholarship, teaching, learning and service founded upon Jesus Christ. As the Word through whom all things were made, Christ is the source of the order of all creation and of the moral law which is written in our hearts. As the incarnate Word, Christ taught the law of love of God and sent the Holy Spirit that we might live lives of love and receive the gift of eternal life. For Notre Dame, Christ is the law by which all other laws are to be judged. As a Catholic institution of higher learning, in the governance of our common life we look to the teaching of Christ, which is proclaimed in Sacred Scripture and tradition, authoritatively interpreted by Church teaching, articulated in normative understandings of the human person, and continually deepened by the wisdom born of inquiry and experience. The rich heritage of the Catholic faith informs and transforms our search for truth and our understanding of contemporary challenges in higher education.

*This statement was adopted by the officers of the University on August 27, 1997, in conjunction with an Open Letter to the Notre Dame community.*

## ACADEMIC PROFILE

## Academic Profile

### DEGREES AND ACADEMIC PROGRAMS

The University is organized into a First Year of Studies, four undergraduate colleges, an architecture school, a graduate school of four divisions, a graduate business school, a law school, and several graduate research study centers.

All incoming freshmen spend their first year in the First Year of Studies and then move into the college or school of their choice as sophomores—College of Arts and Letters, Mendoza College of Business, College of Engineering, College of Science, or School of Architecture.

In the 2007–08 academic year, students enrolled in the College of Arts and Letters topped the undergraduate enrollment figures with 2,620. There were 1,628 business students, 1,143 science students, 796 in engineering, and 195 in architecture.

The College of Arts and Letters offers curricula leading to the degree of bachelor of fine arts in art studio or design and bachelor of arts majoring in:

Africana Studies  
 African and African American Studies  
 Africana Studies  
 American Studies  
 Anthropology  
 Art, Art History, and Design  
 Art Studio  
 Art History  
 Design  
 Classics  
 Arabic  
 Classics  
 Greek and Roman Civilization  
 East Asian Languages & Cultures  
 Chinese  
 Japanese  
 Economics  
 English  
 Film, Television, and Theatre  
 German and Russian Languages and Literatures  
 German  
 Russian  
 History  
 Mathematics (honors only)  
 Medieval Studies  
 Music  
 Philosophy  
 Philosophy/Theology (joint major)  
 Political Science  
 Program of Liberal Studies  
 Psychology  
 Romance Languages and Literatures  
 French  
 Italian  
 Romance Languages and Literatures  
 Spanish  
 Sociology  
 Theology

The Mendoza College of Business offers the degree of bachelor of business administration with majors in:

Accountancy  
 Finance  
 Information Technology Management  
 Management Consulting  
 Management Entrepreneurship  
 Marketing

The College of Engineering offers curricula leading to degrees of:

B.S. in Aerospace Engineering  
 B.S. in Chemical Engineering  
 B.S. in Civil Engineering  
 B.S. in Computer Engineering  
 B.S. in Computer Science  
 B.S. in Electrical Engineering  
 B.S. in Environmental Geosciences  
 B.S. in Mechanical Engineering

The College of Science offers the degree of bachelor of science majoring in:

Applied Physics  
 Biochemistry  
 Biological Sciences  
 Chemistry  
 Chemistry/Business  
 Chemistry/Computing  
 Environmental Sciences  
 Mathematics  
 Physics  
 Physics/Education  
 Physics in Medicine  
 Preprofessional Studies  
 Science–Business  
 Science–Computing  
 Science–Education

The School of Architecture offers the degree of bachelor of architecture (five-year program).

Supplementary majors may be taken only in conjunction with a full major. The Arts and Letters supplementary preprofessional studies major provides students with an opportunity to complete a supplementary major in health-related science. Students may take supplementary majors/minors in departments of other colleges, but their dean may specify certain modifications in their curriculum. Undergraduates may obtain bachelor degrees in combination programs with other colleges in integrated five-year programs.

The course and program requirements for degrees are determined by the various colleges and schools.

These colleges are independent of one another and provide academic instruction within the various programs and departments. The dean of each college has authority, along with the college council, to determine minimum admission standards, requirements for a major and a degree from the program, and dismissal from the college and University.

The student who wishes to transfer from one college to another college within the University must have the approval of the deans of both colleges. The accepting dean has discretion about which credits are acceptable toward the degree in the new college.

**Dual Degree.** Programs leading to dual degrees (two undergraduate degrees, such as a bachelor of arts and a bachelor of business administration, or a bachelor of arts and a bachelor of science in an engineering major) are distinct from programs in which a student receives one degree with two majors (such as a bachelor of business administration with a major in finance and a major in political science). Dual-degree programs require the permission of the deans of both colleges.

The requirements for a dual degree generally are as follows: The student completes all of the University requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a dual degree in the two colleges. (In the College of Arts and Letters, the requirement includes the College Seminar.) While the total number of hours required does depend on the two major programs, the minimum required total number of degree credits is set to be 30 degree credits beyond the college total for the college with the greater required number of degree credits.

**Academic Governance.** The major source of academic governance within the University is the Academic Council, made up of administrators, faculty, and students from each of the four colleges and chaired by University President Rev. John I. Jenkins, C.S.C. All major decisions concerning academic policy and scheduling throughout the University are made by this board.

Along with the Academic Council, each college is served by a college council representing its faculty and students. The purpose of the council is to suggest and plan academic programs and to make decisions regarding academic policy within the college. Each college also has a student advisory council whose function is to elicit student ideas and concerns regarding college policy, to formulate those ideas, and to make suggestions to the college council.

**Advising.** All first-year students enter the First Year of Studies and are assigned an advisor from its faculty. The First Year of Studies offices are located at 207 Coleman-Morse Center. Once students have chosen an upper-level college, they should contact the Office for Undergraduate Studies of the appropriate college and speak with one of the advisors: **Architecture**—110 Bond Hall; **Arts and Letters**—104 O'Shaughnessy Hall; **Business**—101 Mendoza College of Business; **Engineering**—257 Fitzpatrick Hall; **Science**—174 Hurley Hall. After a major has been declared, students are assigned a departmental advisor as well.

**Pre-Law Advising.** Students planning to attend law school may consult with the University pre-law

## UNIVERSITY REQUIREMENTS

advisor, Assistant Dean Ava Preacher, in 104 O'Shaughnessy Hall.

**The Summer Session.** Summer courses are offered by the regular University faculty to students at all levels—undergraduate, graduate, professional, and special.

In addition to meeting the needs of the academic-year students who are continuing work on their degrees, the summer session also serves teachers, industry personnel, and professional and career groups. These graduate students are provided an opportunity to work on advanced degrees, fulfill certification requirements, improve their professional position, or take enrichment courses. The summer session embraces not only the traditional seven-week period of course work but also a series of one- to two-week minicourses and workshops.

## University Requirements

Application must be made to the University registrar for a degree.

The receipt of a baccalaureate degree from the University requires the satisfactory completion of the curriculum. This includes:

University Requirements	Courses
Composition	1
*Mathematics	2
*Science	2
*History	1
*Social Science	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature	1
‡Physical Education	2
	—
	14

\* One of these requirements must be University Seminar 13180–13189.

‡ This requirement can also be fulfilled through first-year enrollment in ROTC.

- (a) Only courses marked as “Univ. Req.” in the online Schedule of Classes can be used to fulfill a University requirement. These courses can be viewed for a particular academic term by selecting the “Schedule of Classes” link within insideND or by visiting the home page of the Office of the Registrar and clicking on the “Class Search” link.
- (b) In addition to these university requirements, each college has its own requirements that must be completed. Without prior permission from the appropriate college dean, special studies and directed readings do not satisfy college requirements.
- (c) First-year students are required to complete a University seminar; composition; two semester courses in mathematics; two semester courses in science; one semester course chosen from: history, social science, philosophy, theology, fine arts; and two semester courses in physical education or in

ROTC. The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy, theology, mathematics, or science. Foreign language is not a University requirement, but it is required in the programs of the College of Arts and Letters, the College of Science, and the School of Architecture.

- (d) Satisfactory work in a major or a concentration program of study.
- (e) A minimum cumulative average of 2.000.
- (f) A minimum of 60 credits at the University and a minimum of 90 credit-hours earned through college and university courses.
- (g) The last year in residence.

Central to undergraduate education at Notre Dame is the core curriculum, a set of University required courses intended to provide every undergraduate with a common foundation in learning. Detailed rationales for each requirement can be found at [nd.edu/~coreclm](http://nd.edu/~coreclm).

**Composition.** First-Year Composition aims to better prepare students to read and write effectively. Students learn to identify an issue amid different and conflicting points of view in what they read; frame and sustain an argument that not only includes both the analysis and exposition of information, but establishes what is at stake in accepting their views; provide relevant evidence to support a given point of view; identify and analyze potential counterarguments; develop basic skills for writing a research proposal, for conducting original research (i.e., through archival research, surveys, or interviews), and for using the library’s print and electronic information resources; and learn to use and recognize conventions of language in writing academic papers.

**University Seminars.** The University Seminar is a distinctive opportunity for every first-year student to experience a small, writing-intensive seminar taught by a member of the University’s teaching and research faculty. With a class size of no more than 18, students have the opportunity to regularly engage in class discussions around a particular issue, problem, or topic in a given field of study. Students study the paradigms, content, methodology, or problems of a particular discipline while learning the conventions for academic writing within the parameters or discourse of that field. Each seminar also fulfills one of the University requirements in fine arts, literature, history, social science, philosophy, theology, mathematics, or science.

**Mathematics.** Students develop quantitative reasoning skills through the disciplined study of mathematics. Solving problems fosters deductive reasoning, while drawing conclusions from mathematical analyses promotes inductive reasoning. Students learn to convey mathematical concepts and relationships through symbols, formulas, and analytical manipulations. By modeling quantitative behavior in business, science, engineering, and the social sciences, students gain a deeper understanding

of the vital role that mathematics plays in modern society.

**Science.** Through the study of science, students learn how knowledge of the natural world is built on observation, experiment, and evidence. They develop a basic understanding of the scientific method, including an appreciation for the interplay between theory and experiment, and how an advance in one drives the other. In addition to acquiring a working knowledge of fundamental concepts and laws in a particular field of scientific study, students learn to analyze and interpret simple sets of quantitative data and to use mathematical structures to solve problems and create models. Finally, students gain an appreciation of the important interdependence between science, technology, and society.

**History.** In the study of history, students explore human beings as individuals, groups, nations, or even civilizations in an attempt to comprehend the human experience. Students come to appreciate and understand the processes of continuity and change over time, and they discover how people shaped, altered, or succumbed to their environment or how, in turn, environment channeled historical experience. Thinking critically about the connections between specific events or processes and an array of contingent phenomena, students look for causes and effects, relationships, and relevance.

**Social Science.** Students discover the diversity of societies and world cultures, the complexity of the choices facing human beings, and the potential social and political consequences of the paths people take. Through lectures, classroom experiences, or local fieldwork, students gain an understanding of the research methods, processes and procedures used to examine human behavior. From the perspective of different social science disciplines, students uncover the competing organizations and institutional opportunities for realizing one’s conceptions of justice and the good life.

**Theology.** Theology, the “science of God,” represents “faith seeking understanding.” Through the first required course, students arrive at an understanding of the distinctive nature of the discipline of theology; encounter the authoritative texts that serve to constitute the self-understanding of Christian tradition as a response to God’s self-revelation; become aware of the constitution, transmission, and interpretation of these texts within the tradition; and, develop their own skills of textual interpretation in conversation with the tradition. Through the second required course, students are introduced to the riches of the Christian theological tradition; develop their theological skills, facilitating the critical retrieval of the Christian heritage; and, come to appreciate better their rootedness in the ongoing tradition of the believing community.

**Philosophy.** Students engage in logical reflection on the fundamental problems of human existence and prepare to take their place as citizens capable of critically evaluating arguments which bear on public

## GRADUATION RATE

affairs. In the first course in philosophy, students read philosophical texts and identify the main lines of argument and counter-argument, reason about philosophical questions, and defend their own philosophical positions. In the second course in philosophy, students explore a subset of philosophical questions or authors of special interest to them. By studying seminal philosophical texts like those that have contributed to the Catholic tradition and those that have presented challenges to it, students learn to think in depth about the problems posed by a life of faith.

**Fine Arts.** Students approach works of art from critical perspectives—as viewers or listeners they apply the analytical tools needed to realize the insights and pleasures that artistic texts and works offer. Students may also create their own works of art, and in so doing gain insights as to how artists interact with their media and how creativity meshes with understanding. Through study of the fine arts, students gain an appreciation of the arts as a component of lifelong learning, and they learn how the arts speak of their societies and how societies speak through their arts.

**Literature.** Students gain an appreciation of the literariness of the texts they read by recognizing the formal, stylistic, and rhetorical practices, as well as the inter-relations among these. By identifying connotations and denotations, figures of speech and thought, and conventions of genre, students comprehend the way in which a given literary text is embedded in a particular social, cultural, literary, or intellectual context. They analyze the claims of competing interpretations of a literary text, especially with reference to the historical position or theoretical allegiances of the interpreter. Students think more critically about themselves and about their own place in culture or society.

**Physical Education.** Students will develop an appreciation of a physically active lifestyle and acquire the skills associated with particular physical activities that can be used throughout one's lifetime. Students will also learn about healthy responses to many of the major issues facing college-aged students; e.g., nutrition, exercise, stress, rest, healthy relationships, diversity, alcohol, drugs, test preparation, time management, and conflict management.

## Graduation Rate

Of the students entering a full-time, first-year, bachelor degree-seeking program in the fall of 2001, 95.1 percent graduated within six years.

The complete IPEDS Graduation Rate Survey may be found in the Office of Institutional Research.

## Grading System

<i>Letter Grade</i>	<i>Point Value</i>	<i>Description</i>	<i>Explanatory Comments</i>
A	4.000	Truly Exceptional	Work meets or exceeds the highest expectations for the course
A-	3.667	Outstanding	Superior work in <i>all</i> areas of the course
B+	3.333	Very Good	Superior work in <i>most</i> areas of the course
B	3.000	Good	Solid work across the board
B-	2.667	More than Acceptable	More than acceptable, but falls short of solid work
C+	2.333	Acceptable: Meets <i>All</i> Basic Standards	Work meets all the basic requirements and standards for the course
C	2.000	Acceptable: Meets <i>Most</i> Basic Standards	Work meets most of the basic requirements and standards in several areas
C-	1.667	Acceptable: Meets <i>Some</i> Basic Standards	While acceptable, work falls short of meeting basic standards in several areas.
D	1.000	Minimally Passing	Work just over the threshold of acceptability
F	0	Failing	Unacceptable performance
X	0		Given with the approval of the student's dean in extenuating circumstances beyond the control of the student. It reverts to "F" if not changed within 30 days after the beginning of the next semester in which the student is enrolled.

These "descriptions" and "explanatory comments" are intended to be sufficiently general to apply across the University, but obviously have to be "applied" in manners specific to each department.

<i>Letter Grade</i>	<i>Grades assigned by the registrar; i.e., not to be given by the faculty</i>
W	Discontinued with permission. To secure a "W" the student must have the authorization of the dean.
NR	Not reported. Final grade(s) not reported by the instructor because of extenuating circumstances.
F*	No final grade reported for an individual student.

<i>Letter Grade</i>	<i>Grades that may be given but are not included in the computation of the average</i>
P	(Article 19.1 of the Academic Code) Junior or senior undergraduates may file with their academic dean, during the first seven class days of the semester, the decision to take one elective course, outside the student's major department and not required by the student's program, per semester on a Pass-Fail basis. Such a filing is irrevocable and will result in conversion by the registrar of the instructor's final grade report into an entry of P ("pass") or F ("fail") on the student's record. The instructor will not be informed that the student has elected the pass-fail grading option. The registrar will interpret the final grades of "A" through "D" as "pass," and will not be computed into the student's grade point average. If a final grade of "F" is issued, it will be computed into the student's grade point average.
S	Satisfactory work (courses without semester credit hours, as well as research courses, departmental seminars or colloquia or directed studies, workshops; field education and skill courses).
U	Unsatisfactory work (courses without semester credit hours, as well as research courses, departmental seminars or colloquia or directed studies; workshops; field education and skill courses).
V	Auditor (graduate students only).

## ACADEMIC CODE OF HONOR

If, with the approval of the student's dean, an "X" grade is given in the student's graduating semester, it will revert to "F" if not changed within 30 days from the date of graduation.

If a student receives a grade of "I" in the graduating semester, it will revert to "F" if not changed within 30 days from the date of graduation.

**Honors at Graduation.** In the undergraduate colleges, a degree will be granted with highest honors (*summa cum laude*) the student's grade point average ranks among the top 5.000 percent of those students graduating from the student's college or school; for a student whose grade-point-average ranks among the top 15.000 percent of the student's college or school, a degree will be granted with high honors (*magna cum laude*); for a student whose grade-point average ranks among the top 30.000 percent of the student's college or school, a degree will be granted with honors (*cum laude*). A student who meets the requirements of more than one category of honors will be awarded only the highest honor for which that student qualifies.

**Accreditation and Academic Association.** The University of Notre Dame is a member of the North Central Association of Colleges and Secondary Schools, the National Catholic Education Association, the Association of American Colleges, the American Council on Education, the National Commission on Accrediting (not an accrediting agency), the Council of Graduate Schools in the United States, and the Midwest Conference on Graduate Study and Research, and it is fully accredited by the Indiana State Board of Education. The University is also a member of the Indiana Conference of Higher Education, the International Association of Universities, the *Catholicarum Universitatum Foederatio* (Federation of Catholic Universities) and the Institute of International Education.

## Academic Code of Honor

The University of Notre Dame is a scholarly community in which faculty and students share knowledge, ideas, and creative works. Notre Dame's Academic Code of Honor expresses our common commitment and moral responsibility to represent accurately and to credit the contributions of every individual.

The *Student Guide to the Academic Code of Honor* (nd.edu/~hnr/code) describes the standards of personal academic conduct that all Notre Dame undergraduates pledge to follow and also outlines the set of procedures by which violations of the Honor Code are reported and adjudicated.

Before matriculation, each entering student must pledge:

*As a Member of the Notre Dame community, I will not participate in or tolerate academic dishonesty.*

## Notre Dame NetID Student Policy

The University of Notre Dame NetID accounts and related services are intended for faculty, staff, and currently enrolled students. "A student must register and enroll at the dates and times announced by the registrar." (Academic Code 4.1) A student who fails to enroll by the announced date will forfeit his or her right to access his or her NetID account and related services. University computing resources supplied by way of the NetID are normally available to a student for up to 60 days after his or her graduation date. A student granted a leave of absence would normally retain access to University computing services for up to two semesters. A student who is separated from the University due to an academic suspension, academic dismissal, or withdrawal will no longer have access to University computing services, unless an extension has been approved by the dean of his or her college. A student attending Notre Dame for the summer only, with a non-degree seeking status will normally retain access to University computing service for up to 60 days after the August graduation date. A student who is separated from the University for other reasons will no longer have access to University computing services.

## Academic Regulations

Embodied within the Academic Code are policies and regulations governing the student attainment of academic credit and degrees from the University of Notre Dame. Such regulations have been enacted by the Academic Council of the University, which retains the authority and responsibility for the review and amendment of the Academic Code. The administration and interpretation of academic regulations rest with the academic officers of the University, namely, the provost, the deans, and the University registrar. The responsibility to abide by the Academic Code resides with the students, faculty, and administration. The complete Academic Code is published in *du Lac*, the University's guide to student life, as well as the *Faculty Handbook*.

## Academic Resources

**Faculty.** In 2007–08, Notre Dame's regular teaching and research faculty numbered 890 full-time and 92 part-time. Other faculty, such as administrators, professional specialists, librarians, and research fellows numbered 346 full-time and 36 part-time. Ninety-four percent of the full-time instructional faculty have terminal degrees, 85 percent of them have doctorates. Ninety-six percent of the full-time instructional faculty are lay persons.

**University Libraries.** The University library system consists of 10 libraries, which house most of the books, journals, manuscripts, and other non-book library materials available on the campus. Currently, the collections contain over 3.3 million volumes,

more than 3 million microform units, more than 14,146 electronic journal titles, and more than 26,600 audio-visual items to support the teaching and research programs. In the past year, the libraries added more than 59,950 volumes and received about 12,098 serial titles.

The Theodore M. Hesburgh Library, a 14-story structure, serves as the main library, and its collections are of primary interest to the students and faculty of the College of Arts and Letters and the College of Business Administration. The tower also contains the University Archives; the Medieval Institute Library, with the Frank M. Folsom Ambrosiana Microfilm and Photographic Collection, and the Anastos Byzantine Collection; the Mark K. Davis Drawings Collection; and the Jacques Maritain Center.

The University maintains a membership in the Center for Research Libraries, which has access to more than 4 million volumes of materials and more than 1.5 million microfilms important for research. The University Library was elected to the Association of Research Libraries in 1962.

The Business Information Center, located in the Mendoza College of Business, is an innovative, all-electronic facility supporting existing and emerging programs and research. There are currently 50 electronic databases and about 335 books and audiovisual items. This state-of-the-art facility is equipped with 32 individual workstations and two group learning areas providing handicapped access and the group areas fully equipped for instructional support, and it provides access to and instruction and assistance in the use of a broad range of bibliographic, numerical, full-text, and graphic databases in business and related disciplines.

The Kellogg/Kroc Information Center, located in Room 318 of the Hesburgh Center for International Studies, supports work in international studies.

The Art Slide Library, located in 110 O'Shaughnessy Hall, became a branch library in July 2002. Created to support the Art, Art History, and Design Department, the Art Slide Library provides photographic images for teaching, research, student slide presentations, and historical documentation. The slide collection consists of approximately 230,000 slides available to all University faculty, students, and visiting patrons. Websites have been created to support the art history courses. An in-house database facilitates access to the collection for teaching and research purposes.

The remaining six libraries were established to meet the teaching and research needs of the College of Engineering, the College of Science, and the Law School. These libraries generally contain the more recent literature, and the Hesburgh Library retains the older materials.

The Engineering Library, located on the first floor of Fitzpatrick Hall of Engineering, has a collection of 56,426 volumes and receives 134 paper journals

## ACADEMIC RESOURCES

and about 1,430 e-journals related to engineering. The facility provides database searches as well as bibliographic instruction.

The Architecture Library has a collection of more than 33,617 volumes and 95 currently received paper journals and 43 e-journals pertaining to various aspects of architecture.

The Chemistry/Physics Library, located in Room 231 of the Nieuwland Science Hall, maintains a collection of some 33,076 volumes and currently receives 91 paper journals and 550 e-journals in all fields of chemistry and physics. It can provide database searches and bibliographic instruction.

The Mathematics Library, located in the lower level of the Hayes-Healy Center, has a collection estimated at 52,250 volumes and subscribes to about 91 paper and 300 e-journals dealing with all areas of pure and applied mathematics.

The Radiation Chemistry Data Center, located in Room 105 of the Radiation Research Building, has a collection of 4,908 volumes and receives 8 journals and 24 e-journals in radiation chemistry. It serves many of the information service needs of the radiation chemical community throughout the United States and abroad.

The Kresge Law Library, although located in and administered by the Law School, is available for use by all students, faculty, and staff. It has a collection of more than 634,000 books and microform equivalents of law and law-related material and subscribes to more than 6,835 serial publications.

**Institutes, Centers, and Laboratories.** The many and diverse institutes, centers, and laboratories maintained by the University are an indication of the spectrum of scholarly interest that students are able to join in and profit from.

Institutes, centers, and specialized research laboratories at Notre Dame include the Helen Kellogg Institute for International Studies, the Joan B. Kroc Institute for International Peace Studies, the Keough Institute of Irish Studies, the Erasmus Institute, the Nanovic Institute for European Studies, the Institute for Latino Studies, the Medieval Institute, and the Radiation Laboratory. Other institutes, centers, and similar entities are the Center for Environmental Science and Technology (CEST); the Center for Advanced Scientific Computing; the Center for Astrophysics at Notre Dame University (CANDU); the Center for Applied Mathematics; the Center for Molecularly Engineered Materials; the Center for Civil and Human Rights; the Center for Continuing Education; the Center for Philosophy of Religion; the Center for Research in Business, embracing the Center for Business Communication, the Center for Ethics and Religious Values in Business, and the Center for Research in Banking; the Center for Social Concerns; the Center for the Study of Contemporary Society, which embraces the Gerontological Research Center, the Laboratory for Social Research, the Multinational

Management Program, and the Philosophic Institute; the Charles and Margaret Hall Cushwa Center for the Study of American Catholicism; the Ecumenical Institute (Jerusalem); the Energy Analysis and Diagnostics Center; the Center for Nano Science and Technology; the Environmental Research Center (UNDERC); the W.M. Keck Center for Transgene Research; the Walther Cancer Research Center; the Institute for Church Life, which embraces the Center for Pastoral Liturgy and Retreats International; the Institute for Scholarship in the Liberal Arts; the Jacques Maritain Center; the Reilly Center for Science, Technology and Values; the Urban Institute for Community and Educational Initiatives; the Thomas J. White Center for Law and Government; and the William and Katherine Devers Program in Dante Studies.

Other laboratories include the Hessert Center for Aerospace Research, the Air and Water Quality Analysis Laboratory, the Aquatic Biology Laboratory, the Biofluid Mechanics Laboratory, the Catalysis Laboratory, the Fluid Dynamics Laboratory, the Bernard J. Hank Family Environmental Research Laboratory, the LOBUND Laboratory, the Parasitology Laboratory, the Solid State Material and Devices Laboratory, the Vector Biology Laboratory, and the Zebrafish Research Facility. These research centers contain specialized facilities and equipment.

**Research.** The University receives more than \$83 million in sponsored research and sponsored program funds annually. Active programs of scholarly work occur in discipline-oriented departments in the humanities, fine arts, science, social science, engineering, law, and business areas of the University. In addition, University institutes and centers facilitate research across departmental lines.

The Office of Research is responsible for assisting faculty in various aspects of sponsored program activity and technology transfer. It reviews and transmits all formal proposals, monitors the status of proposals, negotiates contracts and grants, accepts awards for the University on behalf of faculty members, and is responsible for the administrative management of all grants, contracts, and cooperative agreements supporting research, training, service, and equipment. The Office of Research also provides guidance in seeking external sponsored program support, assistance in proposal and budget preparation, and support in all areas of electronic research administration and technology transfer.

The Office of Research Home Page is designed to assist faculty from all academic units in the identification of funding sources. Current issues related to sponsored program activity as well as proposal preparation and award management are also highlighted.

Inquiries regarding this information should be addressed to the Office of Research, 511 Main Building; [nd.edu/~research](http://nd.edu/~research).

**Snite Museum of Art.** The museum features collections that place it among the finest university art museums in the nation.

The Mesoamerican collection highlight is the comprehensive, exceptional holdings of Olmec works, the earliest Mexican collection.

The Kress Study Collection has been the foundation for developing Italian Renaissance art, which includes a rare Ghirlandaio altarpiece panel. The Baroque collection highlights works by Bloemaert, Coypel, and van Ruisdael. Selections from the Feddersen Collection of 70 notable Rembrandt van Rijn etchings are exhibited frequently; and the 18th-century collection includes such masters as Boucher, Vigee-Lebrun, Reynolds, Conca, and de Mura.

The critically acclaimed John D. Reilly Collection of Old Master to 19th-Century Drawings includes examples by Tintoretto, Tiepolo, Oudry, Fragonard, Ingres, Gericault, Millet, and Degas. The Noah and Muriel Butkin Collection of 19th-Century French Art is the foundation of one of the museum's major strengths, featuring paintings and drawings by Corot, Boudin, Couture, Courbet, and Gerome.

The Decorative and Design Arts Gallery spans the 18th through 20th centuries and exhibits early porcelains from Sevres and Meissen. Exceptional ceramics, furniture, glass, and silver pieces represent both the Arts and Crafts and Art Nouveau styles of the 19th century in addition to the Art Deco and Bauhaus modern movements. Twentieth-century-designed pieces by Wright, Stickley, and Hoffman are also on view.

The Janos Scholz Collection of 19th-Century European Photography contains some 5,500 images of persons and places taken during the first 40 years of camera use.

Native American art focuses on early 19th-century, Plains Indian-painted war records and costumes; it also features Mimbres- and Anasazi-painted ceramics from the prehistoric Southwest.

The developing American collection has 19th-century landscapes by Durand and Inness and portraits by Eakins, Sargent, and Chase. Among highlights of the West and the Southwest regions are paintings by Higgings, Ufer, Russell, and Remington.

Traditional works of African art such as textiles, masks, and sculptures are in the collection as well.

Twentieth-century styles and movements are seen in paintings by Miro, O'Keeffe, Avery, Glackens, Pearlstein, and Scully. Modern sculptures by Barlach, Zorach, Cornell, Calder, and Rickey complement the paintings and drawings.

Croatian-American sculptor Ivan Mestrovic, who taught at Notre Dame from 1955 until his death in 1962, created many works that remain on campus. Major pieces can be seen in the museum, at the Eck

## ADMISSION

Visitors' Center, and at the Basilica of the Sacred Heart.

Loan exhibitions from major museums and private collections mounted by the Snite are offered periodically in the O'Shaughnessy Galleries, as is the annual exhibition of student art by candidates for MFA and BFA degrees. Special events and programs include lectures, recitals, films, and symposia held in the 304-seat Annenberg Auditorium and in the galleries.

## Admission

This year we expect more than 14,000 students will apply for admission to Notre Dame's entering class. Most of the applicants will have the academic aptitude and preparation necessary to complete a degree program at the University. The Committee on Admissions will decide which applicants will be among the 1,985 included in the class. To understand how this is done, it is first necessary to know the procedure for applying to Notre Dame.

### ACADEMIC PREPARATION

Most applicants will have taken and successfully completed the most challenging program of studies available in their high schools. We strongly recommend a curriculum including four years each of English, mathematics, science, history, and foreign language.

All successful applicants are admitted to the First Year of Studies. However, entrance requirements differ slightly for students planning to pursue studies in science and engineering. Sixteen units are required of all students as described below.

For students intending to choose a major in the College of Arts and Letters or the Mendoza College of Business, *excluding* the arts and letters premedical/pre dental program and the combined arts-engineering program, the 16 units must be distributed as follows:

English.....	4
Algebra, advanced algebra, trigonometry, and geometry .....	3
Foreign language .....	2
History.....	2
Science.....	2
Additional English, mathematics, science, history, social studies, and language courses...3	

For students intending to major in the College of Science, the College of Engineering, the School of Architecture, the arts and letters premedical/pre dental program or the combined arts-engineering program, the distribution must be:

English.....	4
Algebra, advanced algebra, trigonometry, and geometry .....	3
Advanced mathematics (calculus or precalculus) .....	1

Foreign language .....	2
History.....	2
Chemistry .....	1
Physics .....	1
Additional English, mathematics, science, history, social studies, and language courses...2	

The unit is the credit for a year of satisfactory work in an accredited secondary school. The two language units required must be in the same language. In some cases, the Committee on Admissions waives the foreign-language requirement.

### APPLICATION PROCESS

First-year students are admitted to the University of Notre Dame for *only the fall semester* of each academic year. A student who wishes to be considered must have the following items on file: (1) a completed application, (2) an official high school transcript, (3) a letter of evaluation from a secondary school teacher and (4) an official report of scores on the Scholastic Assessment Test (SAT I) by the College Board or the Assessment by American College Testing (ACT).

**Application.** New application forms are available in August of each year. The application is your opportunity to tell us about yourself. Include any information about your personal and academic circumstances that will help us evaluate your application.

Students may apply online via our website: [admissions.nd.edu](http://admissions.nd.edu).

**High School Transcript.** Your high school must submit an official copy of your transcript, including a listing of your senior-year courses.

**Teacher's Evaluation.** Only one evaluation will be required in your application file. The form for this evaluation is included in the application packet. The teacher who knows you best, both as a student and as a person, should complete the evaluation. Please do not request letters from people who have not been involved in your educational development.

**Testing.** All applicants are required to take the SAT I or ACT. The test results are part of the evaluation process for admission. You must take one of these tests no later than January of your senior year.

The College Board code for the University of Notre Dame is 1841, and the ACT code for Notre Dame is 1252.

If you have taken other standardized tests (SAT II, AP, IB, TOEFL), please include the results with your application. We will use these scores as supplementary information, although they cannot be used in place of the SAT I or ACT.

Anyone who wishes to continue the study of French, German, or Spanish at Notre Dame should take the SAT II subject test in that language. The results will be used for placement purposes.

Students enrolled in home-school programs or in high school programs that substitute certification of competencies for grades must take three SAT II tests: science, history, and foreign language.

### DECISION AND NOTIFICATION PLANS

Students seeking admission to Notre Dame's entering class must choose to have their applications reviewed under one of two procedures.

1. **Early Action**—If you are an outstanding student with strong junior-year SAT I or ACT scores, you should consider applying for Early Action admission. You must apply by November 1 and have all supporting documents in the Office of Admissions by that date. Early Action applicants will receive a decision letter before Christmas. If admitted under Notre Dame's Early Action procedures, you are not required to withdraw your other college applications and have until May 1 to confirm your enrollment at Notre Dame. You will receive financial aid consideration under the same procedures as Regular Action applicants. The Committee on Admissions will defer decisions on some Early Action applicants until we can compare their credentials with those of the Regular Action applicants. We will mail a decision to the deferred applicants by early April. If you are denied admission under Early Action, that decision is final, and you *may not reapply* in Regular Action.

2. **Regular Action**—Most applicants choose this plan, which requires that you apply by December 31 and have all supporting documents in the Office of Admissions by that date. We will mail decision letters by early April.

#### **Early Action:**

Apply by November 1  
Decision before Christmas  
Confirm enrollment at Notre Dame by May 1

#### **Regular Action:**

Apply by December 31  
Decision by early April  
Confirm enrollment at Notre Dame by May 1

**Deposits.** If admitted, you must confirm your intention to enroll by submitting a \$500 advance payment by May 1. This enrollment deposit is not refundable.

**Waiting List.** Some applicants will be notified that they have been placed on a waiting list and will receive a final decision during the period of mid-May to mid-June. If placed on the waiting list, you should make plans to attend another institution because we cannot predict how many applicants will gain admission from the waiting list in a given year. Students admitted from the waiting list have two weeks to submit a \$500 advance payment, confirming their intention to enroll in the first-year class.

**The Campus Visit.** We welcome visits from prospective applicants. Our staff members meet with groups of students and parents to discuss admissions policies and procedures, the First Year of Studies program,

## ADMISSION

degree programs, student life, financial aid, and other topics of interest.

Appointments for weekday sessions are available from March through early December. Appointments for Saturday morning sessions are available from early September to late April. You should call our office for an appointment at least two weeks in advance of your visit. Campus tours are available following information sessions when classes are in session and on most weekdays of the summer. Be sure to call us for an appointment before you confirm any travel plans. Our telephone number is 574-631-7505. Appointments may also be made online at [admissions.nd.edu](http://admissions.nd.edu).

The Office of Admissions is closed on certain holidays and holiday weekends.

### THE SELECTION PROCESS

Notre Dame seeks to enroll intelligent, inquisitive, energetic, and compassionate students who will bring a diversity of talents and backgrounds to our campus. In selecting the class, the Committee on Admissions evaluates thoroughly each applicant's personal and academic credentials.

**Academic Achievement.** In evaluating a student's academic achievement, the Committee on Admissions considers a student's curriculum, class rank, concentration of talent in the high school, test scores, teacher evaluation, and personal statement. Most students admitted to Notre Dame have taken the most demanding courses available, rank among the top students in their schools, and have done quite well on standardized tests. We could cite the average rank and median test results of our admitted students, but a listing of such numbers is often misinterpreted. Each year, some applicants with high test scores and class rank are not admitted while some students with less impressive numbers are selected for admission based on their other outstanding academic and personal accomplishments.

**Personal Qualities.** The lifeblood of Notre Dame resides in its people: faculty, staff, and students. Each potential student's application is studied to determine what talents, skills, and interests that person might offer Notre Dame's community. We have a strong interest in people who can make unique contributions and will share their talents with us—talents as musicians, writers, technicians, tutors, athletes, artists, volunteer workers, actors, organizers, thinkers, conversationalists, poets, jugglers, or dancers. There is need in each freshman class for a variety of talents and personalities. The listing of activities, written statements, and evaluations gives us a view of the person represented by the application. It is important to present talents and intellectual interests on the application form.

**The Notre Dame Scholar.** Each year the Committee on Admissions designates a select number of the admitted students as Notre Dame Scholars. This recognition is based upon their outstanding academic

and extracurricular accomplishments throughout their high school careers. These students appear to exhibit the greatest potential for academic and social contributions within the Notre Dame community and are generally the strongest prospects from an applicant pool of more than 14,000 individuals.

All admitted applicants are considered for the Notre Dame Scholar distinction. Notre Dame Scholars will be notified of the designation in their letter of admission.

*A monetary award accompanies this distinction if the student has demonstrated substantial financial need as determined by a careful review of the Financial Aid Profile of the College Scholarship Service and the FAFSA.*

### STUDENTS WITH DISABILITIES

Each year Notre Dame admits a number of academically talented students with various disabilities. Once enrolled here, students with disabilities may use a variety of services intended to reduce the effects that a disability may have on their educational experience. Services do not lower course standards or alter essential degree requirements but instead give students an equal opportunity to demonstrate their academic abilities. Students can initiate a request for services by registering with the Office for Students with Disabilities (OSD) and providing information that documents his or her disability. Individual assistance is provided in selecting the services that will provide access to academic programs and facilities of the University.

OSD provides services to students with mobility, hearing, or visual impairments, as well as students with learning disabilities. The services that are typically used include alternative formats of textbooks, modifications in the way students take exams, and readers, note takers, and academic aides. The University maintains accessible rooms in nine residence halls for students with physical disabilities.

All Notre Dame students must supply the necessary initiative and determination to discover and utilize the available campus resources. Students with disabilities will find that a truly creative ability to solve daily problems may be as important to success as developing alternative skills through academic experience. We invite admitted applicants to visit Notre Dame and become familiar with the facilities here before making a final college choice.

For more information, contact the Office for Students with Disabilities at 574-631-7157 or 574-631-7173 (TTY).

### INTERNATIONAL STUDENTS

Notre Dame welcomes students from around the world. International students enhance the cultural and intellectual atmosphere of our community.

The admissions process for international students who are not Permanent Residents of the United

States differs slightly from the process for U.S. citizens. To complete an application, an international student must submit a *Certification of Finances*. This document is provided on our website: [admissions.nd.edu/international/index.cfm](http://admissions.nd.edu/international/index.cfm). Additionally, as English proficiency is critical to a student's academic success at the University, students who do not speak fluent English must take the Test of English as a Foreign Language (TOEFL). The Scholastic Aptitude Test (SAT I) or the American College Test (ACT) is also required for admission. Students who have difficulty locating a test center that administers the SAT or ACT should contact the American Embassy or an American school in their area.

International students wishing to apply for our limited need-based financial assistance must complete both the *Certification of Finances* and a *CSS Foreign Student Aid Application*. Based upon a review of academic credentials, financial need, and availability of scholarship resources, a student may be considered for financial assistance. Financial aid packages may include student loans, student employment, and University scholarship assistance.

To avoid potential problems with international mail, we urge students living outside the United States to apply online via our website, [admissions.nd.edu](http://admissions.nd.edu), and to submit all other application materials by courier service.

### TRANSFER ADMISSION

Some students are admitted to Notre Dame with advanced standing. If you wish to apply for admission as a transfer student, you must have obtained the equivalent of at least 27 semester hours of transferable credit, and maintained a cumulative "B" average in all courses. (The competition is such that the average GPA for admitted students is significantly higher.) The committee gives strong preference to applicants who have completed Notre Dame's first-year course requirements. Online courses, distance-learning courses, USAFI courses, and credits earned through the College Level Examination Program (CLEP) are not transferable.

To be eligible for an undergraduate degree, you must complete at least 60 credits at Notre Dame, including the senior year. Please note: Because of enrollment limitations, Notre Dame does not accept transfer applications for the Mendoza College of Business or the School of Architecture. We do not anticipate a change to this policy in the foreseeable future.

As a transfer applicant you must provide the Office of Admissions with (1) a completed application form, (2) an official transcript from each college attended along with course descriptions, (3) a final high school transcript, and (4) an official SAT I or ACT score.

If you are interested in transferring to Notre Dame, please note that we cannot guarantee on-campus housing to transfer students. Off-campus housing

## FEES AND EXPENSES

close to the University is available; students are offered campus accommodations from a waiting list if rooms become available.

You must submit your transfer application for the fall semester by April 15. The Transfer Admissions Committee will notify you of its decision between June 1 and July 1.

The deadline for the spring semester is November 1. The committee will notify you of its decision between December 1 and January 5.

Please contact us to request the appropriate application form if you are interested in applying for transfer admission. Write to:

Office of Undergraduate Admissions  
Attention: Transfer Admissions Committee  
220 Main Building  
University of Notre Dame  
Notre Dame, IN 46556-5602

Students may apply online via our website: [admissions.nd.edu](http://admissions.nd.edu).

## Fees and Expenses

In the undergraduate colleges, the University is essentially a residence school for full-time students. As many students as accommodations will allow are housed in the campus residence halls. First-year students are obliged to live on campus. Permission to live off campus must be obtained from the dean of students. The fees listed below are for the academic year 2008–09 and are subject to change according to factors operating within the economy that affect universities as well as the country as a whole.

**Campus Resident Student.** The basic fee for the academic year 2008–09 ranges from \$23,337.50 to \$23,449.50 per semester. This fee entitles the student to instruction and tuition for the semester; meals in the University dining halls; a room in a residence hall\*; the use of the general library and the departmental libraries; admission to many lectures, concerts, and entertainments in Washington Hall; the use of the Rockne Memorial, the Joyce Center, the Rolfs Sports Recreation Center, the athletic fields, and the University golf course (there is a nominal fee for the use of the golf course and for the ice rink in the Joyce Center); a copy of each issue of the *Scholastic* (the news magazine of the University) and a copy of the *Dome* (the yearbook of the University) in the second semester (for seniors who have left at the end of the first semester, there will be a charge of \$5 to cover the cost of mailing the *Dome*).

*\*Rooms are available in 27 residence halls. A security deposit of \$50 is required as a room reservation guarantee and for any damages that may be caused by the campus resident student. This deposit is refundable upon graduation or departure from the University after review and approval by the Office of Student Accounts.*

**Off-Campus Student.** The tuition fee for the full-time off-campus student is \$18,170 per semester for the academic year 2008–09, which entitles the student to instruction for the semester and those things listed above under the total fee for the campus resident student. For the off-campus student requiring board and lodging at the University Health Services in time of illness, there is a daily charge.

**Part-Time Undergraduate Student.** An undergraduate degree-seeking student **must be in full-time status each semester.** Any undergraduate student who is enrolled in at least 12 credit hours is considered **full-time.** A student who believes that special circumstances may require him or her to carry fewer than 12 semester hours in any semester (including a senior in his or her last semester) must seek approval to be part-time from his or her respective college. This request and conversion, if approved, must be made before the seventh class day of a fall or spring semester. If permission is granted, the dean will notify the Office of Student Accounts of the change of status and an adjustment to tuition will be made if necessary. There will be no adjustment of tuition unless permission is given by the dean and the class schedule is changed before the seventh class day of the fall or spring semester.

### Undergraduate Fees.

- Technology Fee: \$125 per semester.
- Health Center Access Fee: \$75 per semester.
- Student Activity Fee: \$47.50 per semester.
- Observer Fee (daily student newspaper): \$6 per semester.

The above fees do not cover the cost of textbooks, stationery, etc., which is estimated at \$850 per year for the average undergraduate student.

The technology fee provides partial funding for the University's enterprise-wide technology infrastructure, which provides all students access to the Internet, e-mail, courseware, campus clusters, ResNet, and a wide array of the latest software. This fee provides for the growth in student services, such as course and degree requirements, Web Registration, and value-added Internet related capabilities.

The health center access fee provides students access to all services at the University Health Center and University Counseling Center, including 24-hour medical care and counseling/mental health assistance, alcohol and drug education programs, and health-education and wellness programs. This fee provides partial funding to address increasing student health and wellness needs, along with funding to maintain health facilities.

**Group Sickness or Accident Insurance.** To assist in financing any medical or hospital bills, a group insurance plan is available to students. Notre Dame requires all international students to have health insurance coverage.

At the beginning of the academic year, the opportunity is provided to show proof of personal health insurance coverage. In the event such proof is not

presented, the student will be automatically enrolled in the University-sponsored plan and the charge for the premium will be placed on the student's account. The last date an international student may be waived from the University Student Insurance Plan is September 15, 2008.

Information regarding the University-sponsored plan is mailed to the student's home address in July. Additional information is available in University Health Services by calling the Office of Insurance and Accounts at 574-631-6114.

The cost of the premium for the 2008–09 academic year is \$1,468.

**Payment Regulations.** All fees and required deposits are to be paid in advance of each semester. Billing will be made one month before each semester. The University does not accept credit card payments. Remittance should be made payable to the University of Notre Dame. Notre Dame students taking certain courses at Saint Mary's College that carry special fees will be billed for such charges according to Saint Mary's rates.

**Withdrawal Regulation.** Any graduate, law, graduate business\*, or undergraduate student who at any time within the school year wishes to withdraw from the University should contact the Office of the Registrar. To avoid failure in all classes for the semester and to receive any financial adjustment, the withdrawing student must obtain the appropriate clearance from the dean of his or her college and from the assistant vice president for Residence Life.

On the first day of classes, a full-tuition credit will be made. Following the first day of classes, the tuition fee is subject to a prorated adjustment/credit if the student (1) withdraws voluntarily for any reason on or before the last day for course discontinuance at the University, or (2) is suspended, dismissed or involuntarily withdrawn by the University, for any reason, on or before the last day for course discontinuance at the University, or (3) is later obliged to withdraw because of protracted illness, or (4) withdraws involuntarily at any time because of military service, provided no credit is received for the classes from which the student is forced to withdraw.

Upon return of the student forced to withdraw for military service, the University will allow him or her credit for that portion of tuition charged for the semester in which he or she withdrew and did not receive academic credit.

Room and board charges will be adjusted/credited on a prorated basis throughout the entire semester.

Students receiving University and/or Federal Title IV financial assistance who withdraw from the University within the first sixty percent (60%) of the semester are not entitled to the use or benefit of University and/or Federal Title IV funds beyond their withdraw date. Such funds shall be returned promptly to the entity that issued them, on a pro

## STUDENT FINANCIAL AID

rata basis, and will be reflected on the student's University account.

This Withdrawal Regulation may change subject to federal regulations. Examples of the application of the tuition credit calculation are available from the Office of Student Accounts upon request.

*\*Executive M.B.A. students are subject to a different Withdrawal Regulation and Tuition Credit Calculation, both of which may be obtained from the Executive M.B.A. Program.*

### Payment Plan for Budgeting Educational Expenses.

The University makes available an interest-free monthly payment plan through the TuitionPay Plan, administered by Sallie Mae, PO Box 7448, Wilkes-Barre, PA 18773-7448. This plan allows families to spread out education payments over a 10- or nine-month period rather than make two larger payments, one at the beginning of each semester.

The annual fee to enroll in the program is \$40.

That cost includes a life insurance provision called Tuition Protection Coverage, which would pay the University the remaining balance of the plan in the event that the designated bill payer should die. For more information on the TuitionPay Plan, call Sallie Mae toll-free at 877-282-5933.

## Student Financial Aid

The Office of Student Financial Services, which includes the Offices of Financial Aid, Student Accounts, and Student Employment, administers all student financial aid programs, a broad array of financial products and services, and payment plans, to assist in helping to make a Notre Dame education affordable for all families.

**Principles.** Notre Dame subscribes to the principles of student financial aid administration as endorsed by the College Scholarship Service of the College Board and the National Association of Student Financial Aid Administrators. Notre Dame, along with the hundreds of other institutions, states, and organizations that follow these principles, includes demonstrated financial need as a criterion in awarding financial aid. In addition to a student's academic and personal credentials, financial need is an essential factor in the awarding of the University's scholarship/grant programs.

Among the many myths that exist about the financial aid process, perhaps the most common is that which claims that only the low-income family is eligible for financial aid. Unfortunately, as a result, many students do not even apply for aid because it is assumed that the family income is too high. Although income is an important factor in determining a family's ability to pay for college, it is only one of the many factors considered. The size of the family, age of parents, number of family members in college, assets and liabilities, and private school costs are also considered.

Equally significant in determining need is the cost of attending an institution. The same student may have adequate family resources for attendance at a public institution but may show substantial need at a higher-cost institution, such as Notre Dame. Those families feeling the need for financial assistance are encouraged to investigate the possibilities outlined herein.

Inherent in the concept of need is the premise that the primary responsibility for financing a college education lies with the family. Notre Dame assumes that families will contribute to the student's education to the extent they are capable.

The difference between the family contribution and the student's total collegiate expenses for a given year is *financial need*. Another way of expressing this concept is outlined below:

Cost of Attendance
– Family Contribution

---

= Financial Need

**Cost of Attendance.** Expenses for college will vary from one institution to another and are subject to change from one year to the next. Estimated average expenses for first-year undergraduates at Notre Dame for the 2008–09 academic year include:

Tuition and Fees	\$36,850
Room and Board	9,830
Books	950
Personal/Transportation	1,400
<b>Total</b>	<b>\$49,030</b>

There will be variations in the above costs based on residence hall accommodations, travel costs, and personal expenses. It should be noted that, because of rising costs, annual increases in the above budget can be anticipated.

**Family Contribution.** The University assumes parents will contribute to their children's education to the extent they are capable as long as the student is enrolled as an undergraduate. Notre Dame cannot accept financial responsibility for students whose parents discontinue this support for reasons other than ability to pay. It is important to note that the *family* includes both the parents *and* the student. Students seeking financial aid will be expected to contribute toward their educational expenses. This self-help may include resources from a portion of their own assets, as well as earnings resulting from work prior to and during their enrollment at Notre Dame. In a very real sense, students who borrow also contribute to their costs from their future earnings.

Given the premise that families have the primary responsibility for paying for the cost of a student's education, Notre Dame is committed to making the University affordable by annually meeting the full demonstrated financial need of its students.

**Verification.** The federal government requires the University to verify and document certain

information provided by students and their families in relation to an application for assistance. Such documents may include copies of federal income tax returns and W-2 forms. For purposes of verification, the University currently participates in the Federal Quality Assurance Program.

**Financial Aid Application Process.** To be consistent in estimating a family's ability to pay, Notre Dame has subscribed to a nationally approved uniform method of *needs analysis*. Many institutions and other organizations involved in the administration of student financial aid programs also subscribe to this *institutional methodology*.

Because the federal government is a major provider of student aid, it has created a set of criteria to determine a student's eligibility for its programs. This information is gathered annually on the Free Application for Federal Student Aid (FAFSA). All students seeking financial aid consideration for either federal and/or non-federal student aid programs must file the FAFSA. The FAFSA is available at [fafa.ed.gov](http://fafa.ed.gov) and should be filed between January 1 and February 15 for prospective first-year students, January 1 and February 28 for continuing students, and January 1 and March 31 for prospective transfer students.

The College Scholarship Service (CSS) also provides a supplemental application known as the CSS/ Financial Aid PROFILE. This application often allows the student and family to provide additional, more comprehensive information with which the institution can make a better evaluation of the family's financial circumstances. The PROFILE (along with the appropriate fee) must be submitted to CSS by February 15 for prospective first-year students, February 28 for continuing students, and March 31 for prospective transfer students to be considered for all the financial aid programs administered by Notre Dame, including scholarship/grant programs. Students seeking *only* federal aid need to file only the FAFSA. Students applying for both federal *and* institutional aid consideration must file the FAFSA and the PROFILE, listing the University of Notre Dame as a recipient. The federal school code for identifying Notre Dame on the FAFSA is 001840. Notre Dame's CSS code for the PROFILE is 1841.

Students may complete the PROFILE at [collegeboard.com](http://collegeboard.com).

The PROFILE is made available in the fall semester of the student's high school senior year and may be filed as soon as the student and family have reasonable estimates of what family income figures for the current calendar year will be. In some cases, it may be necessary to wait until the calendar year is completed to obtain more accurate information. In either case, the PROFILE must be submitted as directed. If tax information for the previous calendar year is not yet completed, reasonable estimates may be used. Applicants for financial aid should also be prepared to submit copies of parents' and student's Federal tax returns and parents' W-2 forms for the

## STUDENT FINANCIAL AID

calendar year prior to the academic year for which financial assistance is being requested. The Financial Aid Office reserves the right to request additional documentation and/or clarification of a family's financial situation.

It should also be noted that a *prospective first-year or transfer student should not wait for an admissions decision prior to filing for financial aid*. Priority consideration will be given to students who meet the FAFSA and PROFILE filing deadlines. Additional consideration may be given to late applicants if funding permits.

Upon proper and timely submission of the FAFSA and the PROFILE, the applicant will automatically be considered for *all* forms of assistance, including University scholarships, which the Financial Aid Office administers.

**Financial Need.** Upon receipt of the FAFSA and PROFILE, the Financial Aid Office will carefully review the information in light of the applicant's individual circumstances and the funding levels of the various programs it administers. It will consider any special circumstances mentioned in the narrative section of the PROFILE or brought to its attention by the student or parents. The result of this analysis is an estimated *family contribution* figure, which is subtracted from the student expense budget to determine financial *need*.

If financial need is demonstrated, the Financial Aid Office is committed to providing financial aid resources to meet the financial need. In many cases where assistance is made available, it is done in *package* form; that is, two or more forms of assistance are combined with each other to meet the demonstrated *need*. In most cases this may include opportunities for scholarships, loans, and/or work.

Because the amount of financial aid awarded to an individual reflects the family financial situation, the University, as a matter of policy, does not publicly announce the amount of aid awarded. All information received by the Financial Aid Office is treated as confidential.

All forms of aid awarded by the University are subject to adjustment based upon additional awards received by the student in excess of the established need. Students receiving aid from the University of Notre Dame must notify the Office of Financial Aid of all other forms of educational assistance from financial aid sources other than those directly administered by the Office.

The total financial aid received by a student may not exceed the total cost of attendance.

**Renewal of Financial Aid.** It is important to note that the vast majority of financial aid programs are *not automatically* renewed from year to year. Because of changes in family circumstances, financial aid policies, funding levels, and college costs, the

PROFILE and the FAFSA must be filed *annually*. The deadline for renewal application for all forms of assistance administered by the University's Office of Financial Aid, *including scholarships*, is February 28.

**International Students.** Financial aid opportunities for international students are limited. International students should be prepared to finance, either privately or through a sponsor, the full cost of their Notre Dame education. The International Student Certification of Finances (available at [financialaid.nd.edu](http://financialaid.nd.edu)) must be submitted at the time of application for admission, illustrating, and documenting sufficient financial support to meet the projected cost of a Notre Dame undergraduate education.

Prospective first-year students wishing to be considered for limited need-based financial assistance must first complete an International Certification of Finances along with an International Student Financial Aid Application (available at [financialaid.nd.edu](http://financialaid.nd.edu)). Based upon a review of academic qualifications, financial need, and availability of student aid resources, an applicant may be considered for financial assistance, including a self-help component of a student loan and student employment along with University scholarship assistance. The Certification of Finances and the CSS International Student Financial Aid Application will be reviewed along with the student's admission application.

The Certification of Finances is kept on file for continuing international students, outlining the family's annual responsibility to meet educational expenses as a condition of continued enrollment at the University of Notre Dame and for satisfying the U.S. Immigration and Naturalization Service's regulations required for maintaining an officially authorized U.S. Student Visa status.

### FINANCIAL AID PROGRAMS

There are numerous types of financial aid opportunities for students. The process outlined above is that which the student follows for *all* aid programs administered by the Financial Aid Office of Notre Dame. Through this one process, applicants are considered automatically for *all* aid programs at the University for which they are eligible, including scholarships/grants. Students are also strongly encouraged to pursue opportunities outside the University. Information regarding some of these *outside* programs is outlined below. However, because students come to Notre Dame from all 50 states and many foreign countries, further details about state and local programs must be obtained through the student's and family's individual efforts.

Most aid programs will fall into one of three categories of assistance: scholarships/grants, student employment, or loans.

### SCHOLARSHIPS/GRANTS

Scholarship/grant assistance is a type of aid that is free of repayment obligation.

**Notre Dame Scholarships.** All students accepted for admission, who have completed the financial aid process as outlined above, are automatically considered for University scholarships. The level of University assistance is based on demonstrated financial need and academic performance and will thus vary from student to student.

Renewal of University scholarship assistance is based upon a review of students' academic performance at the University and their annually demonstrated financial need. Based on the students' admitted class level, University scholarship consideration is given for a maximum of eight semesters (10 semesters for Architecture program and Combination Five-Year Engineering Program with the College of Arts and Letters). Students electing to remain at Notre Dame to pursue a second major, second degree, or dual-degree program are not eligible for University Scholarships.

A self-help component serves as the foundation of a financial aid package prior to scholarship/grant consideration. The amount of self-help may grow annually, based on several factors, including increases in cost, annually determined financial need, and self-help limits.

Students not receiving scholarship/grant assistance may be considered in subsequent years based on financial need, academic performance, and the availability of University scholarship resources.

Students accepting University scholarships authorize Notre Dame to release confidential information to scholarship donors and Notre Dame alumni clubs by signing a Scholarship Information Release Form. In addition, students agree to write their donor(s) a letter of appreciation, upon request.

**Notre Dame Alumni Club Scholarships.** Many Notre Dame Alumni Clubs offer scholarships to students in their geographic area. Since these awards are based upon information supplied by the University's Admissions and Financial Aid offices, applicants who follow the standard admissions and financial aid procedures of the University will be considered by alumni clubs offering such awards. Some alumni clubs will require additional steps, such as the completion of a local application and/or a personal interview.

**Federal Pell Grant.** The Pell Grant is a nonrepayable grant made available by the federal government to eligible undergraduate students enrolled in a degree-granting program.

Notre Dame cooperates with the U.S. Department of Education in administering this program. Applicants must be U.S. citizens or permanent residents of the United States.

## STUDENT FINANCIAL AID

The FAFSA serves as the application for the Pell program. Eligibility is determined by the Federal Methodology formula uniformly applied to all applicants. After applying, the student will receive a Student Aid Report (SAR) from the federal government. Eligible students will be notified by the Financial Aid Office of Notre Dame. In 2008–09, the grants range from \$400 to \$4,731.

**SEO Grant.** Notre Dame participates in the Federal Supplemental Educational Opportunity Grant Program (SEO Grant). These federal grants currently range up to \$4,000 for students with exceptional financial need. The Financial Aid Office selects recipients from among the most needy applicants, in accordance with guidelines established by the U.S. Department of Education. The number and amount of these grants will depend upon the availability of funds from the federal government each year. Federal SEO Grant funds are available only to U.S. citizens or permanent residents of the United States.

**Federal Academic Competitiveness Grant (ACG).** The Federal Academic Competitiveness Grant is a need-based grant restricted to U.S. citizens who qualify for the Federal Pell grant Program. The students must complete a rigorous high school program of study (as defined by federal regulation) and be enrolled full-time. This grant is restricted to students in their freshman and sophomore years of college.

The maximum award for a freshman is up to \$750. For a second-year Academic Competitiveness Grant, the student must continue to meet the eligibility criteria defined above and must achieve a cumulative GPA from their first year at Notre Dame of at least a 3.0. The maximum award for a sophomore is up to \$1,300.

**National SMART Grant.** The National SMART Grant is a need-based grant restricted to U.S. citizens who qualify for the Federal Pell Program. The National SMART Grant of up to \$4,000 is restricted to full-time students in their junior or senior year of college who have a cumulative GPA at Notre Dame of at least a 3.0 at the end of each semester. In addition, the student must be pursuing a major in mathematics; physical, life, and computer sciences; technology; engineering; or a critical foreign language.

**State Scholarships and Grants.** Although programs vary from state to state, all applicants are encouraged to seek information about the possibility of obtaining a state scholarship/grant as a student at Notre Dame. Details regarding application processes, eligibility requirements, amounts, etc., vary from state to state. Among the states that currently award scholarship/grant assistance to Notre Dame students are Indiana, Pennsylvania, Rhode Island, and Vermont.

**Military Scholarships.** The University of Notre Dame, in cooperation with the military services, offers Army, Navy, Marine Corps, and Air Force Reserve Officers' Training Corps (ROTC) programs

for interested and qualified students. Satisfactory course completion leads to an Officer's Commission upon graduation from the University.

ROTC scholarships are available on a competitive basis for both men and women. Scholarships may be awarded to offset up to the full cost of tuition, books, and fees, plus an in-school subsistence.

Scholarships are awarded on merit and personal qualifications. Applications must be filed during the fall semester of the student's high school senior year.

Application forms and further program descriptions are available from high school counselors, military recruiting officers and ROTC departments at any participating college or university.

First-year students and upperclassmen are eligible to voluntarily enroll in the three-year ROTC college programs at Notre Dame and compete for a limited number of scholarships within the units.

For more information, see [financialaid.nd.edu/rotc](http://financialaid.nd.edu/rotc) or contact: ROTC (Army, Navy, and Marine Corps or Air Force), University of Notre Dame, Notre Dame, IN 46556.

**Other Federal Assistance Benefits.** Certain students may be eligible for special forms of federal agency benefits. Among these agencies are Americorps, the Veterans Administration, the Office of Vocational Rehabilitation, and the Bureau of Indian Affairs. Further details may be obtained through the appropriate local office of the particular agency.

**Private Scholarships.** Many private organizations provide financial assistance to Notre Dame students. Scholarship information may be obtained by contacting civic, professional, religious, and other community organizations.

The SmartStudent™ Guide to Financial Aid Information at [finaid.org](http://finaid.org) and the College Board at [collegeboard.com](http://collegeboard.com) provide scholarship search information.

Caution is advised when using fee-based scholarship search enterprises. Students also should be careful in providing confidential/personal information (e.g., credit card numbers) to such organizations.

### STUDENT EMPLOYMENT

Part-time employment opportunities, including those offered through the need-based Federal Work-Study and Paid Community Service Programs as well as other programs, are made available in an effort to assist students in meeting some of the costs related to college attendance.

Approximately 40 percent of Notre Dame undergraduates are employed on campus annually.

Many student employees average 10–12 hours of work per week. Students are paid on a biweekly basis via a direct deposit to their personal bank account. Hourly rates vary depending on the job require-

ments. The basic hourly wage for the 2008–09 academic year is \$7.05.

The Job Board, at [studentemployment.nd.edu](http://studentemployment.nd.edu), provides a comprehensive listing of jobs available to students, including community service positions (e.g., tutoring, support services, program assistants) along with on-campus jobs in areas such as the dining facilities, the many campus libraries, the computer labs, and office/clerical positions.

### LOANS

Borrowing a student loan is a matter that should be undertaken with the greatest of deliberation and with full knowledge of the significant responsibilities involved. Notre Dame borrowers have a proven record of responsible borrowing and repayment of loan obligations. To assist borrowers, the University provides an outline of their rights and responsibilities. In addition, all borrowers are advised of their loan repayment options and obligation upon leaving the University. In an effort to provide additional information regarding a borrower's rights and responsibilities, the Office of Financial Aid offers general counseling to all borrowers.

**Federal Perkins Loan.** The Federal Perkins Loan is a need-based loan made by the University. The Perkins Loan program requires that the student borrower repay, with interest, this source of financial assistance. Additional terms, subject to revision by federal law, include: zero interest while the student is enrolled in school on at least a half-time basis and during the nine-month grace period following enrollment; no origination fee or insurance fee; five percent interest rate during repayment; repayment on both principal and interest beginning nine months after the student ceases to be enrolled in school on at least a half-time basis, generally extending over a 10-year period; \$4,000 annual loan limit; and \$20,000 maximum aggregate undergraduate borrowing limit.

Applicants are automatically considered for this program as a part of the financial aid process previously outlined. As with any federally sponsored aid program, the student must be a U.S. citizen or have permanent residence in the United States.

All or part of a Federal Perkins Loan may be cancelled for borrowers who enter certain teaching areas or specified military duty.

**Federal Stafford Loan Program.** Undergraduate students are currently eligible to borrow through the Federal Stafford Loan Program. General eligibility requirements include U.S. citizenship or permanent residency in the United States, as well as enrollment on at least a half-time basis, good standing at the University, and satisfactory academic progress. Additional information may be obtained online at [financialaid.nd.edu](http://financialaid.nd.edu).

Federal Stafford Loans are generally made available to eligible Notre Dame students through one of several lenders suggested by the University. Although

## STANDARDS OF PROGRESS FOR RECIPIENTS OF FINANCIAL AID

the University provides a lender list, borrowers are free to choose any lender participating in the Federal Family Education Loan Program.

The program offers a long-term, repayable loan opportunity to assist students in meeting their educational expenses.

All first-time borrowers complete an online Stafford Master Promissory Note and Stafford Loan Entrance Counseling. The Office of Financial Aid will certify the student's enrollment, cost of education, academic standing, and the amount of other financial aid awarded.

To determine a student's eligibility for a federally *subsidized* Stafford loan, the following formula is used:

$$\frac{\text{Cost of Attendance} - (\text{Family Contribution} + \text{Financial Aid})}{\text{Federal Stafford Eligibility}}$$

= Federal Stafford Eligibility

It is possible for students from various income levels to qualify for Federal Stafford Loans. Students following the financial aid application procedures previously outlined are automatically considered for these loans.

After the Office of Financial Aid certifies the Master Promissory Note, the lender reviews the application and then forwards it to the guarantor for final review. The guarantor or the lender then notifies the student of approval of the loan. Up to 2 percent of the amount borrowed could be deducted prior to the loan being disbursed to pay for the origination and federal default fees. The applicant should complete the Master Promissory Note before June 1.

Loan proceeds are typically disbursed electronically at the beginning of each semester to the student's account at the University. One-half of the annual amount, after subtracting loan fees, is credited at that time.

For those students qualifying under terms outlined above, **the government will pay the interest to the lender for the borrower during periods of school attendance** as well as during other authorized periods of deferment. For this reason, this program is known as the **Subsidized** Federal Stafford Loan.

Federal Stafford Loans must be repaid in full with interest, except when the borrower is deceased or totally and permanently disabled. Repayment begins six months after termination of at least half-time enrollment. Repayment may generally be extended over a period of up to 10 years but could vary, depending upon the amount borrowed. Certain borrowers may also be eligible for loan consolidation options that allow for extending payment periods beyond 10 years. The interest rate is fixed. Specific repayment plans are arranged between the lending institution and student.

**Unsubsidized** Federal Stafford Loans generally involve the same provisions as those available through the subsidized program, except as noted below. Students following the financial aid application procedures previously outlined, who do not demonstrate *financial need* as defined by federal regulations, can receive consideration for the *unsubsidized* loan.

To determine a student's eligibility for an unsubsidized Stafford loan, the following formula is used:

$$\frac{\text{Cost of Attendance} - \text{Financial Aid}}{\text{Federal Unsubsidized Stafford Loan Eligibility}}$$

Federal Unsubsidized Stafford Loan Eligibility

A major difference between the provisions of the subsidized and unsubsidized Stafford Loan is that the federal government is not paying in-school interest to the lender while the student is enrolled in school. Interest may be paid monthly or quarterly by the borrower or may be added to the principal balance of the loan (capitalized).

**Private Loans.** After exhausting the opportunities available from the federal aid programs, many students will consider private loan programs as a source of funding. The terms and conditions of these programs vary, and as such, students are encouraged to review the details of the programs before selecting a private loan program. Private loans are not eligible for loan consolidation programs made available for federal student loans. Interest rates, fees (both at the time of borrowing and at repayment), credit checks, and annual and aggregate loan limits require careful evaluation by students as consumers. As always, taking on debt for any reason should be done deliberately and only for amounts needed. Additional information may be obtained from the Office of Financial Aid or its website.

Additional information may be obtained online at [financialaid.nd.edu](http://financialaid.nd.edu).

## OTHER

**Monthly Payment Plan.** The University makes available a monthly payment plan through TuitionPay Plan. This interest-free payment plan offers a family the opportunity to spread tuition payments over a 10- or nine-month period. The annual fee to enroll in the TuitionPay Plan is \$40. That cost includes a life insurance provision called Tuition Protection Coverage, which would pay the University the remaining balance of the plan in the event that the designated bill payer should die. Additional information may be obtained by contacting TuitionPay Plan toll-free at 877-282-5933.

**Federal Parent Loans (PLUS).** The Federal PLUS loan provides a borrowing option for parents of dependent undergraduate students. Based upon a parent's creditworthiness, a parent may borrow through this federally guaranteed, non-need-based

loan program. Additional terms, subject to revision by federal law, include:

- Fixed interest rate of 8.5 percent
- Up to three percent origination fee and up to 1 percent federal default fee
- Repayment on both principal and interest usually beginning within 60 days of disbursement of the funds, generally extending up to 10 years
- Opportunity for parents to borrow up to the full cost of education minus student aid
- Deferment of principle and interest. (Contact lender for details.)

The University provides borrowers with a list of suggested PLUS loan lenders. These lenders have established themselves as quality institutions based upon efficiency in loan origination, responsiveness to questions, quality of servicing, and long-term participation and commitment in the federal loan program. The basic provisions for loans offered by these lenders are consistent with all federally insured educational loans. In addition, these lenders participate in Notre Dame's electronic application and fund transfer process. This participation provides a superior service in terms of processing and delivery of funds. Although the University provides a suggested lender list, borrowers are free to choose any lender participating in the Federal Family Education Loan Program.

Further information and electronic application may be obtained online at [financialaid.nd.edu](http://financialaid.nd.edu).

## Standards of Progress for Recipients of Financial Aid

The University of Notre Dame requires all recipients of institutional financial aid to maintain academic good standing as outlined in *du Lac*. In addition, the Higher Education Act, as amended, and subsequent federal regulations require institutions to define, publish, and implement Standards of Progress for students receiving federal financial aid. Recipients of aid through the following programs are subject to these standards: Pell Grant, Supplemental Educational Opportunity Grant (SEO Grant), state grants, Stafford Loan, Perkins Loan, PLUS Loan, Federal Work-Study (FWS), Academic Competitiveness Grant (ACG), National SMART Grant, and University scholarships. The outlined Standards of Progress are established for this purpose.

*A. Academic Good Standing:* In general, students must meet the University's minimum requirements for academic good standing, as outlined in *du Lac*, to receive financial aid. Failure to maintain academic good standing will result in academic probation and probation for purposes of financial aid. Students may receive aid while in this probationary status. However, once students are declared "subject to dismissal," if they are "continued on probation," they are *not* automatically eligible for financial aid.

## RESERVE OFFICERS TRAINING CORPS PROGRAMS

*B. Academic Satisfactory Progress:* Students must earn credits at the rates prescribed to maintain eligibility for federal financial aid. The following letter grades do not result in credits earned: F, X, I, U, V, W, NR.

Full-time undergraduate students are expected to complete degree requirements in either eight or 10 semesters, depending on their academic program. The chart below outlines the *minimum* requirements for Academic Good Standing (minimum semester GPA) and for Academic Satisfactory Progress (minimum cumulative credits earned) for undergraduate recipients of financial aid. Standards for both full-time and part-time students, as well as for four-year and five-year academic programs, are shown.

Undergraduate transfer students will be evaluated based on the advanced status determined at the point of admission (number of transfer credits accepted).

The Standards of Progress are reviewed at the end of each semester for the quantitative and the qualitative aspects of the policy. Students terminated from financial aid for failure to maintain these standards must achieve all stated grade point average and cumulative credits earned requirements for their academic year level before aid can be reinstated. Students who are terminated and wish to return with aid for the following semester may use the time between semesters to accomplish readmittance, achieve the minimum cumulative credits earned requirement or complete courses for which the grade of X or I has been assigned.

The Financial Aid Office will notify students in writing when failure to maintain progress results in the loss of financial aid. Appeals of such a decision, based on mitigating circumstances, must be made in writing by the student to the Office of Financial Aid. Appeals will be evaluated, and a written decision will be forwarded to the student within three weeks of the receipt of the appeal.

## Center for Social Concerns

The Center for Social Concerns provides students with a wide array of academic opportunities for civic participation and addressing issues of injustice.

I. Social, moral, and ethical issues can be studied from a variety of perspectives through Center-initiated courses. Special attention is given to Catholic social tradition. The experiential and community-based learning courses are coordinated primarily by center staff and faculty in collaboration with various departments.

II. With the assistance of the Center for Social Concerns, students engage in multiple opportunities for direct service and other forms of extracurricular civic participation. They work to educate and mobilize themselves and others toward the creation of a more just world.

## UNDERGRADUATE STANDARDS OF PROGRESS FOR RECIPIENTS OF FINANCIAL AID

Semesters	Minimum Semester GPA	Minimum Cumulative Credits Earned Required of Full-time Students	Minimum Cumulative Credits Earned Part-time Students
1	1.7		
2	1.85	20	10
3	2.0		
4	2.0	48	24
5	2.0		
6	2.0	84	42
7	2.0		
8	2.0	120	60
9	2.0		
10	2.0	156	78
11	2.0		
12	2.0		96
13	2.0		
14	2.0		114
15	2.0		
16	2.0		132
17	2.0		
18	2.0		150
19	2.0		
20	2.0		168

*Full-time is defined as 12 hours or more; part-time is defined as 11 hours or less.*

A. The center, in collaboration with various departments across the University, offers a creative array of interdisciplinary courses that integrate community-based learning with a focus on social challenges. These include three-credit offerings in the summer (Summer Service Learning Programs) and over 20 Social Concerns Seminars (one-credit) during the academic year.

B. The Center for Social Concerns helps to facilitate more than 35 service and social action student groups that work in collaboration with local community organizations, such as the Robinson Community Learning Center and the Center for the Homeless.

C. Through the Center for Social Concerns, students participate in undergraduate research opportunities in collaboration with faculty and community coalitions such as the Lead Alliance.

D. The center works with the First Year of Studies to offer community-based learning courses, and offers senior transition initiatives to facilitate career discernment (currently 10 percent of seniors enter a year or more of full-time service or civic engagement following graduation).

E. The center provides leadership development opportunities for students engaged in social action initiatives, and cosponsors justice education events (workshops, panels, and the like) with campus partners.

**The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the College of Arts and Letters section under the Center for Social Concerns heading.**

## Reserve Officers Training Corps Programs

The University of Notre Dame offers the opportunity to combine the pursuit of an academic degree with earning an officer's commission in either the United States Army, Navy, Marine Corps, or Air Force. Students enrolled in any of the colleges of the University may participate in the Reserve Officers Training Corps (ROTC). Selection of courses in the student's academic major is independent of those selected for ROTC. First-year students enrolled in any of the three ROTC programs are exempted from the University's requirement for physical education.

## RESERVE OFFICERS TRAINING CORPS PROGRAMS

The three ROTC programs are under the campus jurisdiction of the associate provost who serves as the director of military affairs. Non-ROTC students may not enroll in ROTC courses without permission of their college deans.

The College of Arts and Letters and the College of Business Administration accept a maximum of 12 free elective credits from the 30000- and 40000-level military sciences only. Credit from the 10000- and 20000-level courses does not count toward the degree requirements and must be subtracted from the total number of degree credits listed on the transcript.

In the College of Engineering, ROTC students are permitted a maximum of six credits of upper-level air, military or naval science as substitutes for specified degree requirements determined by the department. Not more than three credits may be substituted for history or social science. All air, military or naval science credits not so substituted are not credited toward degree requirements in programs.

In the School of Architecture, ROTC students are permitted a maximum of six credits of 40000-level air, military or naval science courses as substitutes for electives within the 163 credit hours required for the bachelor of architecture degree.

The College of Science will count a maximum of six credit hours of upper-level (30000- or 40000-level) ROTC courses toward the 124-credit-hour requirements. These courses will be counted as free electives.

### MILITARY SCIENCE

#### *Chair and Professor:*

Lt. Col. Randy Crist, USA

Msg. Kurt Wood, USA

Sfc. Charles A. Lamprakes, USA

As one of the premier Army ROTC programs in the country, the department's mission is to educate, train, develop, and inspire participants to become officers and leaders of character for the U.S. Army and the nation. The program does this through a combination of classroom instruction, leadership labs, and experiential learning opportunities focused on developing the mind, body, and spirit of participants. These opportunities are designed specifically to enhance character and leadership ability in the students/cadets and to allow them to practice the essential components of leadership: influencing, acting, and improving. Participants become members of the Fightin' Irish Cadet Battalion and complete a planned and managed sequence of classroom courses

and practical exercises intended to develop each participant into what an officer must be—a leader of character, a leader with presence, and a leader of intelligence—to enable them to reach their full potential as individuals and as effective leaders of groups. The program affords students an excellent opportunity to serve and focuses on the role of Army officers in the preservation of peace and national security, with particular emphasis placed on ethical conduct and the officer's responsibility to society to lead, develop themselves and others, and achieve success. The experience culminates ideally with participants earning commissions as second lieutenants in the Active Army, Army Reserve, or Army National Guard. As an organization committed to lifelong learning, participants may elect to pursue one of the Army's numerous opportunities for follow-on postgraduate study as well.

#### **Student Awards and Prizes.**

*The Dixon Award.* A \$200 cash award presented to an outstanding senior who has displayed exceptional performance during the annual Dixon Challenge.

*American Legion Post 357 U.S. Officer's Sword.* An Army officer's sword presented annually to the battalion's cadet commander.

*Patrick Haley Award.* A wristwatch presented annually to the cadet who attains the highest academic grade point average.

*Col. William T. Brooks Award.* A pair of jump boots and a plaque given to the most outstanding student who graduated from Airborne School during the past academic year.

*Dr. Michael McKee Award.* A \$100 cash award presented each year to the outstanding member of the battalion's Drill Team and/or Honor Guard.

### **COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Department of Military Science \(ROTC—Army\)](#) heading.

### **NAVAL SCIENCE**

#### *Chair and Professor:*

Capt. D.M. Nees, USN

#### *Assistant Professors:*

Cdr. J.W. Herman, USN

Maj. D.J. Hart, USMC

Lt. W.A. Fensterer, USN

Lt. D.W. DeWalt, USN

Lt. G.J. Keigher, USN

Lt. T. Bly, USN

The mission of NROTC is to educate, train, and screen officer candidates to ensure they possess the moral, intellectual, and physical qualities for commissioning and the leadership potential to serve successfully as company grade officers in the U.S. Navy and Marine Corps. As the largest single source

of Navy and Marine Corps officers, the NROTC Scholarship Program fills a vital need in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps.

Non-NROTC students should consult with their college dean or advisor to determine if a Naval science course will count toward graduation.

**Additional NROTC Curriculum Requirements.** In addition to the Naval Science requirements outlined above, NROTC scholarship students are required to complete other specified University courses. These additional requirements are taken as a part of the student's field of study or as degree electives, depending upon the college in which enrolled. Students will be notified of such requirements prior to joining the NROTC Program.

**Student Organizations and Activities.** All NROTC students are integrated into the Midshipman Battalion organization. In addition to participation in all other University organizations and activities for which eligible, NROTC students may participate in specific NROTC organizations and activities such as the Color Guard, intramural athletic teams, the NROTC Unit newspaper and yearbook, the NROTC Drill Team, and the planning of the Naval Leadership Weekend national conference.

#### **Student Awards and Prizes.**

*The Secretary of the Navy Distinguished Graduate Award.* The annual recognition of the top graduating midshipman.

*The Edward Easby-Smith Award.* A sword is awarded to one of the top graduating Navy or Marine Option midshipmen who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

*The 1stLT. Vincent J. Naimoli, USMC ('59 Award).* A sword is awarded to one of the top graduating Navy or Marine Option midshipmen demonstrating 110 percent dedication and effort in academic achievement, student activities, and leadership.

*The George C. Strake Award.* A sword is awarded to the top graduating Navy Option midshipman for his or her dedication, leadership, esprit, and positive attitude throughout the four years at Notre Dame.

*The Colonel Brian C. Regan, USMCR Award.* A sword is awarded to the top graduating Marine Option midshipman for his or her superior leadership and esprit de corps throughout the four years at Notre Dame.

*The Captain John A. McGurty Jr., USNR, Award.* A sword is awarded to one of the top graduating Navy or Marine Option midshipmen who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

*The Chicago Navy League Award.* A sword is awarded to one of the top graduating Navy Option midship-

## OFFICE OF INTERNATIONAL STUDIES

men who exemplified the characteristics of a naval officer while filling one of the senior midshipman staff positions during the past year.

Numerous other awards are presented annually by various professional and patriotic organizations to recognize excellence in academic achievement and military aptitude.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University \(ROTC-Navy\)](#) heading.

### AEROSPACE STUDIES

*Chair and Professor:*

Col. Dennis Mitchell, USAF

*Assistant Professors:*

Lt. Col. Shaun Lowen Braue, USAF

Maj. Vincent Powell, USAF

Capt. John S. Harding, USAF

The Air Force Reserve Officer Training Corps (ROTC) is an educational program designed to give men and women the opportunity to become an Air Force officer while completing a degree. The Air Force ROTC Programs develop leadership and management skills students need to become leaders in the 21st century. In return for challenging and rewarding work, we offer the opportunity for advancement, education and training, and the sense of pride that comes from serving our country. Upon completion of the Air Force ROTC program students are commissioned as second lieutenants in the Air Force. Following commissioning there are excellent opportunities for additional education in a wide variety of academic fields.

The complete descriptions for all the courses associated with this academic program can be found on the enclosed compact disc within the [University Section under the Department of Aerospace Studies \(ROTC—Air Force\)](#) heading.

*\* Leadership Laboratory is open to students who are members of ROTC or who are eligible to pursue a commission as determined by the professor of Aerospace Studies.*

**Student Organizations and Activities.** All Air Force ROTC cadets are given opportunities to participate in a variety of extracurricular activities to develop their leadership skills. Activities associated with Air Force ROTC include the Arnold Air Society, oriented toward service to the local community, and the Drill Team, Honor Guard, and Rifle Squad, who perform at campus and community functions while developing individual drill proficiency.

### Student Awards and Prizes.

The *Notre Dame Air Force Award*, and Air Force officer's sword, are presented to the top graduating senior in Air Force ROTC.

The *Noël Dubé Award* is presented to the senior class Arnold Air Society member who has contributed the most to furthering the ideals and goals of the society within the University and local community.

The *Paul Robérge Award*, named in memory of an alumnus of the Notre Dame ROTC program, annually recognizes the top pilot candidate in the Professional Officer's course.

Other awards are sponsored by various local and national organizations to recognize excellence within the cadet corps.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University section under the Department of Aerospace Studies \(ROTC-Air Force\)](#) heading.

## Office of International Studies

The Office of International Studies, under the direction of Prof. Julia Douthwaite, assistant provost, and Kathleen Opel, director, administers over 40 programs in more than 20 countries in a variety of academic year and summer programs:

Since 1964, Notre Dame has made it possible for students to earn credits toward graduation in international study programs. Study in another tradition, direct personal experience of another language and culture and travel all broaden and deepen the liberal education of the whole person to which the University has always been committed.

Without delay in graduation, international study programs make a unique contribution to the excellence of liberal education in the undergraduate colleges and frequently have proved an asset in career development.

Qualified students from all undergraduate colleges can apply to spend a semester or a year abroad in one of our programs. Participation is normally during the junior year, but some programs are designed to accommodate sophomores as well.

Admission into most of the programs is quite competitive and students are encouraged to apply to more than one program. Participation is a privilege, not a right. Offers of admission are made in accordance with program requirements, at the discretion of the OIS staff in consultation with faculty and staff of the University. As our goal is to maximize the number of students studying off campus, participation in more than one program is unlikely. Students considering more than a single semester or academic year program should carefully review their majors and minors to ensure that such study does not delay the completion of graduation requirements. Students who have participated in or been selected for an

off-campus program may receive a lower priority in the selection process of a second program.

Participation in a summer off-campus program does not affect a student's application to a semester or yearlong program.

The Office of International Studies offers semester or yearlong programs in every continent. In Europe, students may apply to go to Angers or Paris, France; Athens, Greece; Berlin, Germany; Bologna or Rome, Italy; Dublin, Ireland; Innsbruck Austria; London, Oxford, or Cambridge, United Kingdom; Leuven, Belgium; or Toledo, Spain. Undergraduates can study in Monterrey or Puebla, Mexico; Rio de Janeiro, Bahia, or São Paulo, Brazil; or Santiago, Chile for a Latin American experience. They can participate in programs in Cairo, Egypt or Kampala, Uganda, or in Fremantle and Perth, Australia. Notre Dame also offers semester-long programs in Nagoya and Tokyo, Japan; in Shanghai, Beijing, and Hong Kong, China; and in Moscow, St. Petersburg, and Vladimir, Russia. Students can also spend a semester in Washington, D.C.

The Office of International Studies offers summer programs for all students who have completed at least one year of studies at Notre Dame in London, United Kingdom; Puebla, Mexico; Dublin, Ireland; and Toledo, Spain. We also offer several faculty-led programs. In summer 2008, they took place in Paris, France; Rome, Italy; Taipei, Taiwan; and Vienna, Austria, as well as an African Peace and Conflict Studies Program in Uganda and Rwanda. The locations of the faculty-led 2009 summer programs will vary.

Programs are also sponsored by the School of Architecture in Rome (yearlong) and by the College of Engineering in London (summer).

Students may also participate in a St. Mary's College study-abroad program, in accordance with the policy outlined on the OIS website.

Candidates for Angers, Paris, Rio de Janeiro, Bahia, São Paulo; Innsbruck, Berlin, Rome, Bologna, Beijing, Shanghai, Nagoya, Tokyo, Toledo, Monterrey, Puebla, Santiago, and Russia must demonstrate skills in the language of the country sufficient to make their period of residence and study fully profitable. These skills may be developed through intensive or other language courses in the freshman or sophomore year. Previous study of the language in high school is mandatory for some programs.

Instruction is in English in Athens, Cairo, Dublin, Jerusalem, Perth, Fremantle, London, Oxford, and Cambridge; Italian and English in Rome; Japanese and English in Nagoya and Tokyo; Chinese and English in Beijing, Shanghai, and Hong Kong; French in Angers and Paris; Spanish in Toledo, Monterrey, Puebla, and Santiago; Portuguese in Brazil; Italian in Bologna; Russian in Russia; German in Berlin; and German and English in Innsbruck.

## OFFICE OF INTERNATIONAL STUDIES

Some courses taught abroad will fulfill core University requirements such as theology, philosophy, history, fine arts, etc. Students are required to take 15 credit hours per semester in the study abroad programs.

An approved social science course in the field of anthropology, psychology, or sociology will complete a behavioral science requirement in the Mendoza College of Business.

For major credit in any department, the student must consult with the departmental advisor.

Students with compelling academic reasons for participating in non-Notre Dame programs are eligible to apply for a Leave of Absence for study in a program offered by another college or university. They may not, however, take a leave of absence to attend international programs in cities where Notre Dame offers its own programs.

Course descriptions for hundreds of courses taught in the following programs are available on the Web at [nd.edu/~ois](http://nd.edu/~ois).

## ANGERS PROGRAM

**Academic Year or Semester Program**  
Université Catholique de l'Ouest (UCO)

*Director:* Odette Menyard

The Angers program is open to sophomores and juniors in all colleges. Many Angers students decide to pursue a first or second major in French. Declared and prospective French majors must go to the Department of Romance Languages and Literatures for an advising sheet before they participate in the program.

An academic year of two semesters begins after a monthlong language-intensive summer session, the *Préstage*. Most Angers students take the bulk of courses within the *Centre International d'Etudes Françaises* (CIDEF), UCO's language institute. CIDEF students with advanced French language skills may also register for a *cours universitaire* through one of the institutes at UCO. Studio art majors may pursue course work at the *Ecole Supérieure des Beaux-Arts d'Angers*, and in a given year a limited number of business courses may be available at the *Ecole Supérieure des Sciences Commerciales d'Angers* (ESSCA), an affiliate of UCO.

Students who choose to study in Angers for the entire year will have two required courses each semester: the six-hour-per-week CIDEF language course that is appropriate to their skill level, and one of the Notre Dame-sponsored cultural options. Semester students will take their required courses during the relevant semester.

An alternate academic year track is open to a limited number of students with high levels of proficiency in French. After the monthlong *préstage*, these students matriculate directly in the UCO and take courses alongside their French student counterparts.

All instruction is in French. Students earn Notre Dame credit through UCO and its affiliates, and grades are included in the Notre Dame GPA.

## ATHENS PROGRAM

**Semester or Academic Year Program**  
College Year in Athens

Sophomores and juniors study with other international students at the College Year in Athens. Classes are taught in English and the program is organized in two curricula: Ancient Greek Civilization and East Mediterranean Area Studies. Through the Ancient Greek Civilization track, students amplify their knowledge of ancient Greece and deepen their understanding of Greece's fundamental contribution to the development of Western civilization. The East Mediterranean Area Studies curriculum focuses attention on Southeast Europe, West Asia, and the Middle East in the time period between the founding of Constantinople (330 AD) to the present. It is an area of unusual importance in geopolitics, where Europe intersects with Asia and Africa and one whose problems and complexities, rooted in the past, pique the interest of students of history, politics, and international affairs.

## BEIJING PROGRAM

**Semester or Academic Year Program**  
Peking University

Students may enroll in this intensive Chinese language program at Peking University through the Council for International Educational Exchange (CIEE). Courses are eligible for Notre Dame credit through special arrangement with CIEE. All classes are taught in Mandarin Chinese with elective area studies courses offered in English each semester. The Beijing program is strongly recommended for Chinese majors. Detailed program information is available at the Office of International Studies, 152 Hurley, or by visiting the CIEE website at [ciee.org](http://ciee.org).

## BERLIN PROGRAM

**Academic Year or Semester Program**  
Freie Universität-Berlin

The Berlin Program is part of the Consortium for German Studies (BCGS), which is run by Columbia University. This program is designed for students with two years of university-level language instruction and is, therefore, open only to juniors. This program provides in-depth study of German language, culture, and society, and the opportunity to observe first-hand the emerging impact of a reunited Berlin—now considered Germany's cultural, political, and economic center—on the rest of Europe.

The program begins with a six-week intensive language practicum, then students enroll in one course (taught by the BCGS directors) that reflects their academic interests, focusing on topics such as culture, politics, history, literature, theater, or

cinema, as well as at least two courses at Freie Universität Berlin. Freie Universität Berlin offers a wide range of courses in the humanities, social sciences, and natural sciences. All coursework will be in German.

## BOLOGNA, ITALY PROGRAM

**Academic Year Program**

Students matriculate in the University of Bologna (UniBo) through Notre Dame's association with the Bologna Consortial Studies Program (BCSP), administered by Indiana University. Two qualified Notre Dame students are guaranteed admission to the program. Other qualified students are encouraged to apply. Students must commit to an academic year in Bologna. They must be juniors at the time of participation and have completed the equivalent of four, preferably five, college-level Italian courses.

Students attend a four-week preparatory pre-session in September before beginning classes at UniBo. They earn Notre Dame credit for courses taken in Bologna, and grades are included in the Notre Dame GPA. Organized group activities complement the classroom experience.

Direct matriculation in the University of Bologna, among Italy's premier universities, coupled with living in apartments with Italian students, provides a genuine experience of Italian university life and contributes to the attainment of oral and written fluency in Italian.

## BRAZIL PROGRAMS

*Rio de Janeiro*

**Fall Semester or Academic Year Program**

Pontifícia Universidade Católica do Rio de Janeiro (PUC-Rio)

The Office of International Studies (OIS) offers this option in conjunction with Brown University. The program begins with a monthlong, intensive orientation in July. The orientation course includes instruction in the Portuguese language and Brazilian culture, with three hours of scheduled classes every day and additional lectures by various noted specialists twice a week.

During the academic semester/year, students enroll in "Portuguese for Foreigners" and three additional courses at PUC (16 semester credit hours). All courses are taught in Portuguese. Subjects available to participants include history, political science, literature, anthropology, economics, sociology, art history, and studio art.

*Salvador da Bahia*

**Semester or Academic Year Program**

Universidad Católica do Salvador (UCSal),  
Universidad Federal da Bahia

The Office of International Studies offers this option in conjunction with CIEE. The program begins with a five-week, intensive language and culture program (ILCP) held in Salvador da Bahia for the fall semes-

## OFFICE OF INTERNATIONAL STUDIES

ter and São Paulo for the spring semester. During the ILCP, students are required to take an intensive Portuguese language class and the interdisciplinary core course titled “Contemporary Brazil.” Students who are near-native speakers of Spanish may be placed in a “Portuguese for Spanish Speakers” course (offered based on enrollment).

For the remainder of the semester, students must enroll in two required courses: “Portuguese Language” and “Culture and Society: Bahia and Brazil.” The remainder of the course load (two or three courses) is drawn from a combination of CIEE courses and/or the wide range of courses offered at the host universities.

**São Paulo****Semester or Academic Year Program**

Pontificia Universidad Católica de São Paulo

This program is also offered in conjunction with CIEE. The program begins with a five-week, intensive language and culture program (ILCP) held in Salvador da Bahia for the fall semester and São Paulo for the spring semester. During the ILCP, students are required to take an intensive Portuguese language class and the interdisciplinary core course titled “Contemporary Brazil.” Students who are near-native speakers of Spanish may be placed in a “Portuguese for Spanish Speakers” course (offered based on enrollment).

For the remainder of the semester, students must enroll in two required courses: “Portuguese Language” and the CIEE core course “Brazilian Issues and Realities.” In addition to the two required CIEE courses, students choose two or three electives drawn from the wide range of courses offered at PUC for which they meet the prerequisites.

**CAIRO PROGRAM****Academic Year or Spring Only Program**

American University in Cairo

Students may enroll during their sophomore or junior year of college. Students select courses from the general course offerings of AUC and are integrated into classes with AUC degree-seeking students. Cairo is an ideal base from which to explore the rich heritage of Arab and Islamic culture. AUC also offers students opportunities and options of learning the Arabic language.

**DUBLIN PROGRAM****Semester or Academic Year Program**

University College Dublin, Trinity College Dublin  
*Director:* Kevin Whelan

The Dublin program is open to juniors in arts and letters, business, engineering, and science for a semester or a year. Students will enroll in courses in their majors at University College Dublin or Trinity College Dublin and will also take courses at Notre Dame’s Keough-Naughton Center. For course listings at the Irish universities, contact the

Office of International Studies, 152 Hurley Building, 631-5882.

Professor Whelan will offer a course in Irish History and Society. This course is mandatory for all program participants. The Notre Dame Center may also offer theology, philosophy, and fine arts courses.

**FREMANTLE PROGRAM****Semester Program**

University of Notre Dame Australia

Students in the Colleges of Business and Arts and Letters will enroll in courses at the University of Notre Dame Australia (NDA) through this program. Students enroll in five courses (15 credits) either semester in any combination depending on their major/college requirement and individual need. A list of course offerings for the fall normally is available in 152 Hurley around the end of March, and for the spring term around the end of September.

A listing of approved courses offered in previous semesters is available on our website or in the Office of International Studies, 152 Hurley. Students in the Fremantle program are required to take ANTH 34392 Australian History and Society (3 credits). In the fall term, students must also take BAUD 34120 Business in Asia, also cross-listed as ECON 34781 (3 credits).

**HONG KONG PROGRAM****Academic Year or Semester Program**

Chinese University of Hong Kong (CUHK)

The Hong Kong program is open to juniors and is particularly suited to students in arts and letters, business, engineering, or science. CUHK is a bilingual bicultural institution with local and international students and scholars. CUHK receives students from over 180 academic institutions worldwide. No Chinese language study is required, and students may choose from many courses that are taught in English or take courses taught in Chinese (if they meet the language requirement). You can choose courses from the faculty of arts, business administration, engineering, science, or social science. In addition to this, students may also take courses from the International Asian Studies Program. This program includes Chinese, Asian and international studies courses, and Chinese language courses.

**INNSBRUCK/CENTRAL EUROPEAN STUDIES PROGRAM****Academic Year Program**

University of Innsbruck

*Director and Academic Coordinator:* Gernot Guertler

Students participate in a monthlong German language intensive course in Salzburg to prepare them for study at the University of Innsbruck. Students typically enroll in courses at the university taught by instructors for the Notre Dame program.

Additionally, as German language proficiency improves, students are able to enroll in regular courses at the University of Innsbruck. The program offers courses and field trips with a focus on Central European studies.

**KAMPALA PROGRAM****Semester Program**

School for International Training

The program is designed to expose students to as many aspects of development in Uganda as possible. Students are required to enroll in all course offerings to get a better grasp of the socio-economic issues that affect development. The program combines course work with field research during which students identify topics of interest that they pursue for their final development practicum.

**LEUVEN, BELGIUM****Academic Year or Semester Program**

Katholieke Universiteit Leuven (KUL)

The program in Leuven, Belgium, is open to qualified students enrolled in the undergraduate seminary program Old College. Students may apply to spend one or two semesters in Leuven during their junior year.

Students follow courses at KUL and live at the American College of the Immaculate Conception (AC). The AC was established by bishops in the United States in 1857 to educate and train seminarians who would be future priests and bishops in the new country of the United States of America. With 150 years of experience, the AC hosts theologians from many dioceses in the United States, college seminarians, and priests and religious for sabbatical programs. Regular excursions to the Vatican and cultural trips are organized by the AC and students each year. Ministry is arranged by the formation staff of the AC and includes a placement to a nearby English-speaking parish.

**MONTERREY PROGRAM****Semester or Academic Year Program**

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM)

Students enroll in Spanish language and in Mexican and Latin American culture, art, history, sociology, and business courses for international students. Those with a high level of proficiency in Spanish are encouraged to enroll in courses in the regular departments of the university, which include business administration and engineering. Students may apply for internships in schools, banks, and other businesses in the area. Service opportunities are also available in Monterrey.

For a listing of all courses offered at the Tec, visit the Web at [studyinmexico.com.mx](http://studyinmexico.com.mx) or 152 Hurley.

## OFFICE OF INTERNATIONAL STUDIES

**MOSCOW, ST. PETERSBURG, AND VLADIMIR, RUSSIA PROGRAMS****Semester or Academic Year Programs**

Students may enroll in a Russian Language and Area Studies program through the American Council of Teachers of Russian. They may choose to study in Moscow, St. Petersburg, or Vladimir for one semester or an academic year. Students should have completed two years of Russian or the equivalent at the University level before participation. They take courses in grammar and contemporary Russian language, vocabulary, and conversation, as well as in literature, Russian and Soviet culture, history, politics, and the mass media. Course descriptions are available in the Office of International Studies, 152 Hurley, or on our website.

**NAGOYA PROGRAM****Semester or Academic Year Program**

Center for Japanese Studies, Nanzan University

The Nagoya Program is designed for Japanese language majors. Students are required to take an eight-credit Japanese course at the appropriate level each semester. Students choose their other courses in the areas of Japanese society, literature, religion, business, economics, history. Except for Japanese language classes, all courses are taught in English, and the subject matter is often placed in a larger Asian context.

**PARIS PROGRAM****Spring Semester or Academic Year Program**

Institut d'Etudes Politiques de Paris

In 1999 the University of Notre Dame began an exchange program with the Institut d'Etudes Politiques de Paris (Sciences-Po). Offered as a yearlong or a second-semester program, the Paris program is limited to students with a high level of French, an excellent grade-point average, and a major in history or a social science. Students will take courses in European economics, politics, sociology, and history, and in French language. Successful completion of a year of study results in a certificate from Sciences-Po, which is widely recognized in Europe and the United States.

**PERTH PROGRAM****Fall Semester Program**

University of Western Australia

A special program has been developed for juniors in the colleges of Engineering and Science to enroll at the University of Western Australia (UWA) during the fall semester only. The program combines course work with an intensive field research program established in conjunction with several Australian mining and engineering companies. All students should carry a minimum of 30 UWA points, which translates to about 12 to 15 Notre Dame credits. Course offerings are available on UWA's website:

handbooks.uwa.edu.au/ or on our website. Hard copies also are available in 152 Hurley.

**PUEBLA PROGRAM****Semester or Academic Year Program**

Universidad de la Americas (UIDLA)

*On-site Coordinator:* Lisette Monterroso

Notre Dame offers a premedical program in the fall semester, which includes the first semester of general physics and internships with Mexican doctors. Other students may also go mainly in the spring semester.

Courses in Spanish language and Spanish and Latin American literature have the same numbers as their equivalents at Notre Dame, and will count towards the Spanish major.

There are many courses taught in English at UDLA, but a major goal of going to Mexico is to become fluent in Spanish. If students have taken advanced Spanish at Notre Dame they may not take more than one course in English during their semester in Mexico. Students must enroll in 15 credit hours per semester.

Sample courses taken by previous participants in the Notre Dame Puebla program are listed on our website.

**ROME PROGRAM****Semester or Academic Year Program**

John Cabot University

Students from all colleges can enroll in classes at John Cabot University, an American university in Rome, which offers courses in art, business, classics, government, history, literature, philosophy, theology, and psychology. All courses are taught in English (with the exception of Italian language classes). A variety of JCU courses have been approved by Notre Dame departments for major credit; however, students must consult with their department to confirm courses for their major. All students are required to take one Italian-language course during their semester or year in Rome.

For a listing of all courses offered at John Cabot, visit the Office of International Studies at 152 Hurley Building or visit our website.

**ROME ICCS****Semester Program**

The Intercollegiate Center for Classical Studies

A select number of Notre Dame students can participate for one semester in the Intercollegiate Center for Classical Studies, a consortium of 90 colleges and universities under the management of Duke University. The ICCS provides students with an opportunity in Rome to study ancient history and archaeology. Latin and Greek language and literature, and art history. Applicants must be at least sophomores majoring in classics, classical history, or archaeology, or must be art history majors with

a strong classical background. Proficiency in Italian language is not required. Participants are chosen by members of the Notre Dame Classics Department, and acceptance into the Rome-ICCS Program is highly selective.

**SANTIAGO PROGRAM****Semester Program**

Pontificia Universidad Católica (PUC)

*Director:*

Estebon Montos

*Coordinator:*

Estela Rojo

Students take courses at the Pontificia Universidad Católica (PUC). All students enroll in "Spanish for Foreigners," "Chilean Politics and Society" (or a similar course), and three other courses.

Students interested in enrolling in the seminar "Perspectives on Poverty and Development" must submit an application to the Center for Social Concerns (CSC). This service-learning course is offered by the Universidad Alberto Hurtado, a Jesuit University in Santiago.

The fall semester runs from late July through mid-December. The spring program runs from February-mid July. A pre-semester, intensive language program is offered in February and July in Linares, a rural community outside Santiago.

**SHANGHAI PROGRAM****Semester or Academic Year Program**

East China Normal University

The Shanghai Program at East China Normal University is intended for students who wish to accelerate their acquisition of Chinese and is strongly recommended for all Chinese majors and minors. All students must take a Chinese-language course and other courses on Chinese history, culture, and politics offered in English. All courses are eligible for Notre Dame credit through special arrangement with the Council on International Educational Exchange (CIEE). Detailed program information is available at 152 Hurley, or at CIEE's website: [ciee.org/study\\_abroad](http://ciee.org/study_abroad).

**TOKYO PROGRAM****Spring Semester or Academic Year Program**

Sophia University

The Tokyo Program is open to sophomores and juniors who have completed a semester of Japanese. All students must take a Japanese-language course and can choose from a wide variety of other courses offered in English including business, economics, history, literature, philosophy, and sociology. All courses are eligible for Notre Dame credit through special arrangement with the Council on International Educational Exchange (CIEE). Detailed program information is available at 152 Hurley, or at CIEE's website: [ciee.org/study\\_abroad](http://ciee.org/study_abroad).

## OFFICE OF INTERNATIONAL STUDIES

**TOLEDO PROGRAM****Semester or Academic Year Program**

Fundacion Ortega y Gasset

The Toledo Program is open to sophomores and juniors in all majors. Students may study for a semester or academic year in Toledo and all courses are taught in Spanish. Students must take five courses through the Centro de Estudios Internacionales, Fundacion Ortega y Gasset. A philosophy course is offered in the fall only; a theology course is offered in the spring. Credit-bearing internships are available in Toledo. Students may apply for internships in several areas, including government, the arts, social service, and communications. Credit toward a major must be approved by an advisor in the major department.

Second semester and academic year students with advanced proficiency in Spanish may apply to do coursework at the Universidad Castilla La Mancha in Toledo.

**UNDERGRADUATE LONDON PROGRAM****Notre Dame London Centre***Director*

Rev. Paul Bradshaw

*Deputy Director*

Laura Holt

*Associate Director*

Cornelius O'Boyle

**Notre Dame Main Campus***Associate Directors for Recruiting*

Geraldine Meehan

Judy Hutchinson

**2008–09 Visiting U.S. Faculty**

Anthony Messina, Professor of Political Science (fall 2008)

Mir Sen, Professor of Engineering (fall 2008)

Rodney Hero, Professor of Political Science (spring 2009)

James Wittenback, Professor of Accountancy (spring 2009)

Notre Dame undergraduates from the colleges of arts and letters, business, engineering, and science may elect to spend one semester of their junior year in the London Undergraduate Program. While in London, students take classes offered by Notre Dame and British professors at Notre Dame London Centre near Trafalgar Square. Students participating in the program live as a group in residential facilities with supervision provided by the program. The semester enables students to combine serious academic study with the opportunity to live and travel in Europe.

The London Undergraduate Program operates within the Office of International Studies. We encourage students interested in London studies for the regular academic year to direct further inquiries regarding location, staff, facilities, curriculum, and requirements to the London Program at 153 Hurley Hall,

Notre Dame, IN 46556; Telephone: 574-631-7414; fax: 574-631-3978. Students should also visit our website at [nd.edu/~ois](http://nd.edu/~ois).

**Program of Studies.** In 1981, the College of Arts and Letters initiated a program for a junior semester in London, believing that the educational and cultural benefits of study with British scholars in London are particularly valuable. In 1997—its tremendous success having attracted attention from other colleges within the University—the London Program was expanded to accommodate both the demand and the curricular needs of students from all of Notre Dame's colleges. Notre Dame's British faculty is selected to be at least on par with that of the home campus, including experts whose work is internationally recognized in their fields.

All London Program courses are Notre Dame courses. Credit hours are recorded on the student's transcript, and quality points are applied to the cumulative average in the usual manner. During the semester in London, each student must carry a course load of between 15 and 17 credits, including a mandatory three credits of fine or performing arts. Most students are able to earn three to six hours of credit toward their majors and to satisfy some University-wide course requirements.

Course descriptions are available on the Undergraduate London Program website.

**UNDERGRADUATE OXFORD PROGRAM***Associate Director:*

Geraldine Meehan

The Oxford Program provides juniors in the Colleges of Science and Arts and Letters the opportunity to study at New College, Oxford for a full academic year. Application is by invitation only. New College dictates the fields in which they will accept students each year. The college also requires that candidates have an overall GPA of 3.7 at the time of application.

While there, students participate in Oxford's celebrated tutorial system: rather than taking classes, students work individually with a tutor to pursue their major courses of study in depth. Tutors are full-time faculty at Oxford. They include some of the most accomplished scholars in the world in their fields. Participating students live in New College accommodation and take their meals in the college dining hall. Detailed program information is available at the Undergraduate London and Oxford Programs office, 153 Hurley Building, 631-7414.

**UNDERGRADUATE CAMBRIDGE PROGRAM****Academic Year**

King's College, Cambridge

*Associate Director:*

Geraldine Meehan

Notre Dame students have an opportunity to spend their entire junior year studying at King's College,

Cambridge. There, in addition to classes, they will participate in Cambridge's renowned system of supervisions. Within this system, they will have an opportunity to work one-on-one with Cambridge's scholars, affording them an opportunity to develop and pursue focused academic interests. At King's College, they will live in the college and have an opportunity to eat meals there. The Cambridge Program is available to students of the colleges of arts and letters, science, and engineering, and applications are by invitation only.

**WASHINGTON PROGRAM***Executive Director :*

Thomas Kellenberg

*Campus Coordinator:*

Elizabeth LaFortune

Sophomores and juniors of any major and college are encouraged to apply to the University's only domestic off-campus program. Participants in the Notre Dame Washington Program live, study, and work in the nation's capital in either the fall or spring semester. The program seeks students who are interested in studying in a vibrant urban setting amid the high energy and excitement of national politics, policy, and the arts.

The curriculum combines course work with internships in government organizations, Congress, the not-for-profit sector, the media, and cultural organizations. Participants live and study in a historic neighborhood in northwest Washington, and close proximity to the metro provides easy access to internship sites, research facilities, and cultural opportunities. Students share well-fitted apartments in a secure building that includes classroom and study space, computers, and laundry facilities. There is no additional charge for the program beyond Notre Dame tuition and room-and-board fees.

All students earn 15 credit a semester by fulfilling a mandatory six-credit policy course, a mandatory three-credit internship, and two three-credit electives from five categories: art history, political science, American studies, history, and philosophy. The campus program coordinator assists each participant with the research and application process for all internships that are suitable to the student's interest and experience.

For more information, see our website at [nd.edu/~wp](http://nd.edu/~wp).

## PHYSICAL EDUCATION AND WELLNESS INSTRUCTION

### Physical Education and Wellness Instruction

#### *Chair of Physical Education and Wellness Instruction:*

Thomas Kelly

#### *Assistant Professor and Director of Golf Instruction:*

Noel B. O'Sullivan

#### *Associate Professional Specialist:*

Br. Louis Hurcik, C.S.C.

#### *Associate Professional Specialists:*

Michele Gelfman

Denise Goralski

Kristin Kohrt

Fran McCann

Dianne Patnaude

Diane Scherzer

Marisha Schmidt

#### *Assistant Professional Specialists:*

Nathan Piwowar

Joshua Skube

Darin Thomas

#### *Assistant Professional Specialist and Assistant Athletic Trainer:*

William F. Meyer Jr.

The objective of the physical education department is to develop skills, knowledge, greater interest and awareness of the need and benefits offered through wellness and lifetime leisure activities. It is intended that through participation in various physical activities, students contribute to and enhance their physical, mental, and social growth.

To complement and enhance physical education activities, the department offers a required course in Contemporary Topics for College Students. This course is designed to enhance understanding of various components of fitness and selected lifestyle issues that have an impact on the individual. Students will learn to formulate and implement their own fitness and wellness programs through self-testing, evaluations, exercises, and self-assessments.

The department believes that basic swimming skills are important for the student. A swim test will be administered at the beginning of the year to determine each student's ability.

Most students will be able to elect four of the following activities to complete their requirement. It is strongly recommended that activities from both the wellness and lifetime sports tracks be taken.

American Ballroom Dance  
Contemporary Topics for College Students  
Fencing  
First Aid  
Fitness for Life  
Fundamentals of Physical Activities  
Golf  
Handball  
Hiking/Orienteering

Ice Skating  
Introduction to Coaching  
Latin Ballroom Dance  
Racquet Sports  
Self-Defense  
Skiing:  
Cross Country  
Downhill  
Soccer  
Swimming:  
Lifeguard Training  
Water Safety Instructor  
Team Handball  
Tennis  
Ultimate Frisbee  
Volleyball  
Walking/Jogging  
Weight Training  
Yoga

All activities are offered at the beginning level; however, some activities are offered at an intermediate level. If the student has a physical disability and is unable to participate in activity classes, a specially designed program will be arranged.

**The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Department of Physical Education](#) heading.**

### Information Technologies

The Office of Information Technologies (OIT) supports eight public-access computer clusters campus-wide, giving students, faculty, and staff access to approximately 425 computers running Macintosh, Windows, and UNIX/LINUX operating systems.

ResNet, the residence hall Ethernet network, connects undergraduate residence halls and graduate student residences. ResNet provides a 100Mbps Ethernet jack for every student living on the Notre Dame campus. It enables students to connect their own computers directly to the campus computer network and to the Internet. Students with wireless-capable computers also can connect via Nomad, the University's wireless network that serves all University residence halls and most of the buildings on campus. All residence hall rooms have standard cable television service, with a lineup consisting of 70 channels. Digital cable TV services (HD, DVR, OnDemand) can be ordered directly from Comcast for an additional fee. A distributed cellular antenna system (DAS) in various campus locations provides excellent cellular telephone coverage for major cellular providers. The two major providers using the DAS are AT&T and Verizon.

The OIT provides all Notre Dame students with an nd.edu e-mail account, file space, and distributed printing services. Students can purchase computers, printers, software, and other peripheral devices at educational discounts at the Notre Dame Computer Store. Microsoft and Corel software offerings, for example, are currently available to the Notre Dame community for considerably less than the retail price. Shop online ([oit.nd.edu/store](http://oit.nd.edu/store)) or visit the campus store in the IT Center building for substantial savings. Students planning to purchase a computer should consult the OIT's recommended computer configurations at [oit.nd.edu/start/specs.shtml](http://oit.nd.edu/start/specs.shtml).

Information technology support services are available to students from the OIT Help Desk and from student assistants. Located in 128 DeBartolo Hall, the Help Desk's trained support technicians provide answers to user questions and guide Notre Dame computing users in diagnosing and resolving problems by phone, e-mail, and in person. For more information about the Help Desk, see [oit.nd.edu/helpdesk](http://oit.nd.edu/helpdesk). Help Desk hours are:

- Sunday 3:00 p.m. to 8:00 p.m. (telephone support only)
- Monday through Thursday 8:00 a.m. to 5:00 p.m. (telephone support until 10:00 p.m.)
- Friday 8:00 to 5:00 p.m.
- Closed Wednesday, 12:00 p.m. to 1:30 p.m., and all day Saturday

*Note: Help Desk evening and weekend hours are in effect during the academic year only*

The OIT offers free computer training classes to Notre Dame students on a wide range of Windows and Macintosh applications. For more information on training programs, see [oit.nd.edu/training](http://oit.nd.edu/training).

The Office of Information Technologies works closely with the Office of the Registrar and Academic Space Management to design, build, and support technology-enhanced learning spaces on campus. Eighty percent of the Registrar's classrooms are equipped with audiovisual systems that allow faculty and students to present information from a variety of sources. Students and faculty can also borrow small, portable devices such as cameras, audio recording devices, and microphones from the OIT facility in DeBartolo 115. These devices are available for class-related use. The OIT also facilitates videoconferencing, video streaming services, and video and audio production and postproduction services, including media duplication.

In addition to mainstream computing services, the OIT, in partnership with the Office of Research, maintains the Center for Research Computing to provide an environment and services for computationally intensive work and research. The University provides access to national supercomputing and data resource facilities via Internet2. Internet2 provides high bandwidth access to about 200 leading research universities and supercomputing centers. For more information, visit [crc.nd.edu](http://crc.nd.edu).

## HOLY CROSS SEMINARY FORMATION

An easy-to-use overview of OIT services and how to obtain them is at [oit.nd.edu](http://oit.nd.edu). Some Notre Dame colleges have their own computing resources, in addition to the shared facilities and services of the OIT, and provide similar technical assistance.

Anyone using Notre Dame computers and network resources must abide by the policies set forth in the document "Responsible Use of Information Technologies at Notre Dame." The full text of this policy is available online at [oit.nd.edu/policies/rup.shtml](http://oit.nd.edu/policies/rup.shtml).

### The Career Center

The Career Center is dedicated to the development and implementation of innovative programs and services that promote lifelong career management skills for students and alumni. By cultivating multi-faceted partnerships/networks, our staff is committed to providing the resources for students to explore diverse career opportunities. Staff members assist undergraduate and graduate students as well as alumni with career counseling, career assessment, group workshops, presentations for academic departments, career fairs, and mock interviews, in addition to other services.

We encourage students to take ownership of their career direction, and be willing to devote the time and energy necessary to conduct a successful search for jobs, internships, fellowships, and/or the identification of graduate school programs. Students have the opportunity to utilize our online databases to pursue postgraduate opportunities, sign up for interviews, and conduct career-related research 24/7.

#### Workshops, Programs, and Special Seminars.

The Career Center collaborates with the College of Arts and Letters, Mendoza College of Business, College of Engineering, College of Science, and the School of Architecture to coordinate a wide variety of career programs, services, seminars, and workshops for students throughout the year. A sample list includes:

- On-campus career fairs including *the Fall Career Expo, Engineering Industry Day, the Winter Career and Internship Fair and Diversity Reception, and the School of Architecture Career Fair*
- Off-campus career fairs and consortia events in New York City, Washington DC, Boston, Chicago, and San Francisco
- Fall "Kick-Off" Orientations
- A variety of workshops dedicated to resumé and cover-letter writing techniques, job and internship search strategies, interviewing skill development, as well as a number of informative programs geared toward students interested in careers in specific industries such as nonprofit, investment banking, the federal government, and media.

- Mock Interview Program
- Global Internship Program
- Hot Internships
- What You Can Do with a Major in \_\_\_\_\_ Series
- City Search Resources
- Get Connected Alumni Shadowing Program
- Dossier/CV Services
- Career and Professional Development Seminar Series for academic course credit
- Access to the Strong Interest Inventory and the Myers Briggs Type Indicator online self-assessment instruments (meeting with a career counselor is a prerequisite).

**Internships and Summer Jobs.** The Career Center spends a great deal of time with first year, sophomore, and junior students identifying and applying for internships and summer jobs. Students have access to numerous internship databases containing more than 10,000 employment opportunities.

For additional information, contact:

The Career Center  
248 Flanner Hall  
574-631-5200  
[careercenter.nd.edu](http://careercenter.nd.edu)

Hours:

- Monday through Friday, 8:00 a.m.–5:00 p.m.
- Walk-in hours in 248 Flanner: Monday through Friday, 1:00–4:45 p.m.
- Computer Lab, Flanner Hall First Floor: Open 24 hours a day, seven days a week

## Holy Cross Seminary Formation

The Old College undergraduate seminary program is housed in the original campus structure built in 1843 by Notre Dame's founder, Rev. Edward Sorin, C.S.C. It welcomes high school graduates with a serious interest in exploring a vocation as a priest or brother in the Congregation of Holy Cross. With nearly 30 men in formation at Notre Dame, Holy Cross is a growing, international religious community with 2,000 priests, brothers, and seminarians in 15 countries throughout the world.

Old College provides an introduction to religious life and ministry in Holy Cross through participation in daily Eucharist and prayer, service placements, spiritual direction, weekly community nights, retreats, and academic preparation, including courses in philosophy and theology. Students can select their own major and tailor the rest of their academic program according to their interests. Old Collegians take all classes with other Notre Dame students and are expected to actively participate in clubs, organizations, and other aspects of campus life. They are also encouraged to spend a semester or year abroad in one of Europe's premiere college seminaries at the Catholic University of Louvain, Belgium. Old College combines a challenging religious formation structure with a complete Notre Dame undergraduate experience.

Moreau Seminary, also located on the Notre Dame campus, is the primary formation house for the Congregation of Holy Cross in the United States. The one-year Candidate Program is a pre-novitiate year designed for those with a bachelor's degree in any field who are prepared to discern a vocation to priesthood or brotherhood within vowed religious life. Candidates typically take nine to 12 hours of

**HOLY CROSS SEMINARY FORMATION**

philosophy and/or theology credits at the University each semester and have ministry placements supervised by seminary staff. Candidates reside at Moreau Seminary with other priests, brothers, and seminarians. They discern their vocation through spiritual direction and active participation in the community life of Moreau Seminary, which is centered around the daily celebration of the Eucharist and the Liturgy of the Hours. After returning from the novitiate, newly professed seminarians begin their formal academic training in the Master of Divinity program.

Applicants to Old College and Moreau Seminary must be practicing Roman Catholics in good standing with the Church and of solid personal character, with a demonstrated commitment to apostolic ministry. Admission is selective, and personal interviews are required for acceptance into both programs. Tuition scholarship assistance is provided.

Whalen

The First Year of Studies is the college to which all entering first-year students at the University of Notre Dame are admitted. Its curriculum stresses broad engagement with the arts, sciences, and humanities. It has three major goals. The first is to lay the intellectual foundations necessary for the pursuit of advanced academic work in any of the University's undergraduate colleges. The second is to cultivate both a sense of curiosity about the universe and a passion for learning. The third is to infuse students with an appreciation for the intrinsic value of higher education and a sense of their responsibilities as stewards of knowledge created, learned, and applied.

The First Year of Studies views advising as a method of teaching and endeavors to keep student developmental patterns as well as sound teaching strategies in mind throughout the academic year. Advisors assist students as they plan their first year at Notre Dame and assist in the transition into the sophomore year. Advisors are charged with the responsibility of working with students through group advising sessions, individual meetings, and informal mentoring in the acquisition of the skills and disciplines of the mind and heart that will enable them to become rigorous and compassionate intellectuals. A first-year student may request a meeting with a member of his or her advising team, which includes a peer advisor along with a faculty advisor, at any time and for any reason. All first-year students are encouraged to take advantage of this opportunity for personal guidance and assistance.

The academic program for first-year students is determined by the University Academic Council and is constructed around a framework called the First-Year Curriculum. The First-Year Curriculum consists of five courses plus physical education or ROTC each semester. These courses are arranged to provide

two of the most important features of an academic program for first-year students: (1) a foundation in liberal education and (2) an opportunity to sample areas before declaring a college. Because of the specific requirements within the First-Year Curriculum, students gain a broad overview of academic areas. The options and electives found within the curriculum provide the students the opportunity to explore areas of academic interest open to them. Upon successful completion of the First-Year Curriculum, Notre Dame students advance from the First Year of Studies to one of the other undergraduate colleges: the College of Arts and Letters, the Mendoza College of Business, the College of Engineering, the College of Science, or the School of Architecture.

## First-Year Curriculum

The First-Year Curriculum consists of five courses plus physical education or ROTC each semester. Many of these courses satisfy University requirements as well as requirements in the student's intended major.

Descriptions and general recommendations concerning each of the courses in the First-Year Curriculum are given in the following pages. In addition, complete instructions for making course selections and detailed course descriptions are included in the *First Year of Studies Academic Guide*, which is available on both the First Year of Studies website and is mailed to all incoming students in June.

Entering students are expected to take the First-Year Curriculum of five courses per semester, along with the laboratories and tutorials that may accompany those courses, plus physical education or ROTC. The applicability of advanced placement credit earned before entering the University is determined by the University department involved. First-year advisors are available to discuss the possibility of waiving advanced credit in order to take the equivalent University course instead. Additional one-credit courses, such as Advanced Strategies for Discipline Specific Study, Introduction to the Fine Arts at Notre Dame, choir, band, or social concerns seminars may also be added to the schedule each semester. The various colleges have restrictions on how many one-credit voluntary courses may be applied to the total number of credits required for graduation from the colleges.

The first-year requirements are designed to ensure that all Notre Dame students begin their college career by learning the analytic, mathematic, and communication skills necessary for further work in their areas of greatest interest as well as to provide a foundation to a broad liberal education. Students are encouraged to select courses that will prepare

them for advanced study in their present area of interest as well as to choose elective courses that help them explore subjects they have not had an opportunity to study in high school and/or those that will deepen their knowledge in disciplines with which they are already familiar.

## First-Year Requirements

All students must complete the following in their first year:

- 1 semester of University Seminar
  - 1 semester of First-Year Composition
  - 2 semesters of mathematics
  - 2 semesters of science or language\*
  - 2 courses in physical education or ROTC
- Elective courses may be used to sample areas of study or to further general education.

*\*The science requirement should be completed by the end of the first year and must be completed by the end of the sophomore year. Foreign language is not a University requirement, but it is required in the College of Arts and Letters and the College of Science.*

## University Requirements

In addition to first-year requirements, all Notre Dame graduates must complete the following courses before graduation:

- 1 course in history\*
  - 1 course in social science\*
  - 2 courses in philosophy\*
  - 2 courses in theology\*
  - 1 course in fine arts\* or literature\*
  - 2 courses in physical education or ROTC
- College and major course requirements  
\*A University Seminar will fulfill one University requirement in one of these disciplines.

*Only courses marked as "Univ. Req." in the online Schedule of Classes can be used to fulfill a University requirement.*

## Course 1—A University Seminar/Composition

University Seminar and Composition are University requirements. Both courses, University Seminar and First-Year Composition (FYC), must be taken, one in each semester.

University Seminars are designed to foster interaction between first-year students and faculty in small settings. Currently, these courses are offered by departments within the College of Arts and Letters and will satisfy the relevant University requirement in history, literature, fine arts, social science, or the first course of the philosophy or theology

## COURSE 2—MATHEMATICS

requirement. These seminars include a significant writing component and require a minimum of 24 pages with at least one rewrite of a corrected paper. Every first-year student is required to complete one University Seminar.

### University Seminar Categories:

Fine Arts	13182:	Seminars offered by the departments of Art History; Film, Theater, and Television; and Music
History	13184:	Seminars offered by the Department of History
Literature	13186:	Seminars offered by the departments of American Studies, Arabic, Classics, East Asian Languages and Cultures, English, German and Russian Languages, Irish Language and Literature, Romance Languages, and the Program of Liberal Studies
Philosophy	13185:	Seminars offered by the Department of Philosophy
Social Sciences	13181:	Seminars offered by the departments of Anthropology, Economics, Political Science, Psychology, and Sociology
Theology	13183:	Seminars offered by the Department of Theology

First-Year Composition courses are designed to help students learn how to identify an issue amid conflicting points of view and craft an argument based on various sources of information. The courses stress the identification and analysis of potential counter arguments and aim to develop skills for writing a research proposal, for conducting original research, and for using print and electronic resources from the library. In addition to traditional First-Year Composition Courses, community based, multimedia, and advanced composition courses are offered.

### First-Year Composition Courses:

FYC 13100: First-Year Composition  
 FYC 13200: Community Based First-Year Composition  
 FYC 13300: Multimedia First-Year Composition  
 FYC 13400: Advanced First-Year Composition

### COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

First-year composition courses can be found under the [College of Arts and Letters](#) section under the [University Writing Program](#).

## Course 2—Mathematics

All Notre Dame first-year students must take two semesters of mathematics as a University requirement. Students who have credit for the first level of calculus (MATH 10250, 10350, or 10550) must fulfill the University requirement by taking a second level of calculus (MATH 10260, 10270, 10360, or 10560) or a non-calculus mathematics course.

Students in the College of Arts and Letters may fulfill their mathematics requirement by taking any two courses in mathematics. They may be calculus courses, non-calculus-based courses, or one of each. However, students may not take two beginning-level calculus courses to fulfill this requirement.

For students in the Mendoza College of Business, the required calculus sequence is MATH 10250–10260. Also acceptable are the calculus sequences required of students in the College of Engineering or the College of Science.

Students in the School of Architecture take MATH 10250 and 10270. Also acceptable are the calculus sequences required of students in the College of Engineering or the College of Science.

Students majoring in the College of Science will fulfill their University mathematics requirement through one of the following calculus sequences: MATH 10350–10360, MATH 10550–10560, MATH 10850–10860, or MATH 10450–10460. The MATH 10350–10360 and MATH 10450–10460 sequences are designed for students in programs emphasizing the life sciences, such as biological sciences and the preprofessional (premedical and other health-related) programs in either the College of Science or the College of Arts and Letters. Students planning to enter other science programs that require only two semesters of calculus also may use MATH 10350–10360 to satisfy the requirement, but they should be aware that it is not a suitable prerequisite for the upper-level courses MATH 20550 or 20580. Students planning to major in biochemistry or physics must take MATH 10550–10560.

For students in the College of Engineering, the first-year mathematics requirement is fulfilled through the calculus sequence MATH 10550–10560 or MATH 10850–10860.

The MATH 10850–10860 sequence stresses concepts and proofs. It is a more rigorous course than MATH 10550–10560 and is designed especially for students who plan to study mathematics through either the College of Science mathematics major or the College of Arts and Letters honors mathematics

major. It is also open to other students with very strong high school mathematics backgrounds.

A student who completes the MATH 10250–10260 or 10250–10270 calculus sequences and then decides to enter a science or an engineering program will have to take additional courses in mathematics, as prescribed by the administrator of the program.

### Mathematics Courses:

MATH 10110: Principles of Finite Mathematics  
 MATH 10120: Finite Mathematics  
 MATH 10130: Beginning Logic  
 MATH 10140: Elements of Statistics  
 MATH 10150: Elements of Statistics II  
 MATH 10240: Principles of Calculus  
 MATH 10250: Elements of Calculus  
 MATH 10260: Elements of Calculus II for Business  
 MATH 10270: Elementary Calculus in Action  
 MATH 10350: Calculus A  
 MATH 10360: Calculus B  
 MATH 10550: Calculus I  
 MATH 10560: Calculus II  
 MATH 10850: Honors Calculus I  
 MATH 10860: Honors Calculus II  
 MATH 20550: Calculus III

### COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

## Course 3—Science

First-year students take two semesters of a science as part of the First-Year Curriculum. The courses offered by the College of Science for first-year students are broadly grouped into two main categories, laboratory sciences and topical sciences. The laboratory sciences are intended for students who are planning to major in one of the sciences or in engineering or perhaps would prefer an in-depth discussion of a particular field of study with laboratory work. The second category, topical sciences, is designed for those first-year students who are planning to enter the College of Arts and Letters, the Mendoza College of Business, or the School of Architecture. These courses are rigorous and intellectually demanding and differ from the laboratory sciences chiefly in that they are often somewhat interdisciplinary in nature and/or that they focus on themes that may have an ethical or value-related dimension, and they do not include an associated laboratory requirement.

In determining which course to take as Course 3, students should consider the following:

1. All Notre Dame students must, as a University requirement, take two semesters of science before completion of their sophomore year. However, it is recommended that the science requirement be met in the first year. Students contemplating any of the College of Engineering or College of Science programs or preprofessional studies (premedical and other health-related fields) in the College of Arts and

## COURSE 4—UNIVERSITY REQUIREMENT OR ELECTIVE: HISTORY, SOCIAL SCIENCES, PHILOSOPHY, THEOLOGY, LITERATURE, FINE ARTS, AND LANGUAGES

Letters must take the science requirement in their first year.

2. Students planning to participate in an international study program during their sophomore year must complete the science requirement in the first year, along with the required language for international study in France or Austria (see Course 5).

3. The science course is often a prerequisite for other courses in these programs. Students planning to enter the College of Arts and Letters Preprofessional Program will also take CHEM 10171 and 10172 in their first year. Students thinking of entering any of the following programs in the College of Science are advised to take CHEM 10171 and 10172 as their science requirement in the first year: environmental sciences, science preprofessional, science collegiate sequences, biological sciences, mathematics, and physics. Mathematics and physics majors who do not have an interest in the health care professions may elect to take CHEM 10171 followed by 10122. Chemistry and biochemistry majors take CHEM 10181 and 10182. A second science course is required and discussed under Course 5 for students interested in chemistry, biochemistry, biological sciences, environmental sciences, mathematics, and physics.

4. Students planning on an engineering program are required to take CHEM 10171 and 10122 as the sequence to satisfy the requirement.

5. Prospective arts and letters or business students interested in the environmental sciences second major offered by the College of Science should take CHEM 10171 and 10172 as their science requirement.

6. Students planning on entering the Mendoza College of Business programs or the College of Arts and Letters programs, other than mathematics or preprofessional studies, may select freely from among any of the science courses offered and for which they are prepared. However, the following courses are specifically designed for the students planning to enter these programs: BIOS 10104 through 10117; CHEM 10101 through 10104; PHYS 10052, 10062, 10111, 10122, 10140, 10240, 20051, 20061.

7. Students intending to enter the School of Architecture should take PHYS 10111 first semester; PHYS 10311 is also acceptable.

8. First-year students may substitute two semesters of a foreign language in place of two semesters of science to complete their first-year course requirements. They may also substitute one semester of each, but should keep in mind that the science requirement needs to be completed by the end of the sophomore year.

### Laboratory Science Courses:

BIOS 10161: Biological Sciences I  
BIOS 10162: Biological Sciences II  
CHEM 10171: General Chemistry:  
Introduction to Chemical Principles

CHEM 10172: General Chemistry: Organic Structure and Reactivity  
CHEM 10122: General Chemistry: Biological Processes  
CHEM 10181: Introduction to Chemical Principles  
CHEM 10182: Organic Structure and Mechanism  
ENVG 10110: Physical Geology  
PHYS 10310: General Physics I  
PHYS 10320: General Physics II  
PHYS 10411: General Physics A-M Mechanics  
PHYS 10424: General Physics B-M Waves/Thermo

### Topical Sciences Courses:

BIOS 10101: Human Genetics, Evolution, and Society  
BIOS 10106: Common Human Diseases  
BIOS 10107: Ecology and Evolution  
CHEM 10101: Foundations of Chemistry  
CHEM 10102: Chemistry, Environment, and Energy  
CHEM 10103: Chemistry and Crime  
PHYS 10052: Concepts of Energy and Environment  
PHYS 10062: Science Literacy  
PHYS 10111: Principles of Physics I  
PHYS 10122: Principles of Physics II  
PHYS 10140: Descriptive Astronomy  
PHYS 10240: Elementary Cosmology  
PHYS 10262: Physical Methods in Art and Archaeology  
PHYS 20051: Energy and Society  
PHYS 20061: Nuclear Warfare

### COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

## Course 4—University Requirement or Elective: History, Social Sciences, Philosophy, Theology, Literature, Fine Arts, and Languages

Elective courses are typically selected with the idea of exploring academic interests or to satisfying University or intended college program requirements. Every Notre Dame first-year student must take at least one semester of fine art, history, literature, philosophy, social science, or theology during their first year.

Specific recommendations for electives are made for only four of the intended college programs. The College of Engineering recommends that first-year students planning on majoring in engineering take PHYS 10310 in the spring semester as their Course 4 elective, as are students intending on pursuing the combined Arts and Letters/Engineering Program. Students intending to study architecture are advised to take ARCH 11011 as their Course 4 elective in the fall semester. They will then take ARCH 11021

and ARCH 10311 in the spring semester. Students intending to study business are advised to take microeconomics, ECON 10010/10011, in either the fall or spring semester.

### University Requirement and Elective Courses

#### History:

HIST 10085: History of the Modern Middle East  
HIST 10106: Modern South Asia  
HIST 10200: Western Civilization I  
HIST 10210: Ancient Greece and Rome  
HIST 10400: Western Civilization II  
HIST 10600: U.S. History I: From Colonial America to 1877  
HIST 10605: U.S. History II: From Reconstruction to the Present  
HIST 10901: Colonial Latin America  
HIST 20110: Ancient Japan  
HIST 20750: National Security Policy in U.S. History

#### Social Sciences:

ANTH 10109: Introduction to Anthropology  
ANTH 20105: Introduction to Human Ethology  
ECON 10010: Principles of Microeconomics  
ECON 10020: Principles of Macroeconomics  
POLS 10100: American Politics  
POLS 10200: International Relations  
POLS 10400: Comparative Politics  
PSY 10000: Introductory Psychology  
SOC 10002: Understanding Societies  
SOC 10033: Introduction to Social Problems  
SOC 10722: Introduction to Social Psychology

#### Philosophy:

PHIL 10100: Introduction to Philosophy

#### Theology:

THEO 10001: Foundations of Theology: Biblical/Historical

#### Literature:

CLAS 10200: Greek and Roman Mythology  
GE 20610: The Crisis of Modernity in German Culture, 1900–33  
GE 20810: Specters, Spectators, and the Spectacular in the German Novella  
IRLL 20109: Celtic Heroic Literature  
IRLL 30210: The Irish Short Story  
MELC 10101: Introduction to Arabic Culture and Civilization

#### Fine Arts:

ARHI 20362: European Art of the Seventh-Eighteenth Centuries  
ARHI 20441: Introduction to Twentieth Century Art  
ARST 11201: Drawing I  
ARST 11301: Painting I  
ARST 11601: 3-D Foundations  
ARST 21101: Ceramics I  
ARST 21401: Photography I  
DESN 11100: 2-D Foundations  
FTT 10101: Basics of Film and Television  
FTT 10701: Introduction to Theater  
FTT 10900: Script Analysis and Dramaturgy  
FTT 20705: Performance Analysis  
MUS 10131: Introduction to Jazz  
MUS 10133: Gender, Sexuality, and Pop Media  
MUS 10150: Music of the Catholic Rite

## COURSE 5—PROGRAM REQUIREMENT OR ELECTIVE

MUS 20001: Theory I  
MUS 20002: Theory II

### *Elective for Supplementary Major or Minor:*

GSC 10001: Introduction to Gender Studies

### *Languages:*

CLGR 10001: Beginning Greek I  
CLGR 10002: Beginning Greek II  
CLGR 20003: Intermediate Greek

### **COURSE DESCRIPTIONS**

Course descriptions can be found in the respective departmental sections of the enclosed CD.

## Course 5—Program Requirement or Elective

Any of the courses listed under Course 4 may be taken as a Course 5 elective, unless the student's intended major requires him or her to take a particular course instead. These required courses will be discussed below. Most students should use this elective to explore areas of academic interest, and many students may want to consider continuing in or beginning foreign language study.

Language is required by the College of Arts and Letters and the College of Science. The languages available include Arabic, Chinese, French, German, Greek, Irish, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Students with previous background in a language who want to continue their language study must take a placement exam to determine proper placement. However, students with no previous background in a language can elect a beginning-level course. See the Credit and/or Placement by Examination section below for more information on placement in a language course. Regardless of their scores on the credit or placement examinations, students in the College of Arts and Letters must take at least one language course in residence at Notre Dame. In the College of Science, students who place higher than the intermediate level (third semester) are considered to have fulfilled the language requirement and need not take any additional courses in the language. Students contemplating an international study program that requires language study should consult with the language department regarding the appropriate language preparation. All students are encouraged to start their study of language during their first year or the beginning of their second year at the latest.

First-year students who plan to participate in an International Study Program during their sophomore year must complete both their science and foreign

language requirements during their first year. There is no opportunity to take a science course abroad, and the requirement must be satisfied by the end of the sophomore year.

Students intending to major in the College of Science's biology, biochemistry, chemistry, environmental science, mathematics, or physics program will take more than one science each semester and need to use Course 5 to take the second science. The second science course sequence for the chemistry and mathematics programs is PHYS 10310–10320; for the environmental science, biochemistry, and biology programs, it is BIOS 10161–10162; and for the physics program, it is PHYS 10411–10424.

Students receiving a 5 on the Biology AP examination or an IB (higher level) grade of 7, receive credit equivalent to BIOS 10161–10162. However, students intending on majoring in the sciences are generally encouraged to waive this credit and take the recommended biology courses in their intended major.

Students intending to major in studio art should take DESN 11100 and ARST 11201 as their fifth course, and students intending to major in Music should take MUS 20001 and 20002 plus a one-credit lesson course each semester.

Students intending to major in architecture are expected to take ARCH 11021 and 10311.

College of Engineering interns should enroll in EG 10111–10112 as their fifth course.

See the various colleges' and departments' summaries in this *Bulletin* for details on the requirements for all of these programs.

### **Program Requirement Courses Not Previously Listed:**

ARCH 10311: Analysis of Architectural Writing  
ARCH 11011: Graphics I-Drawing  
ARCH 11021: Graphics II-Drafting  
EG 10111: Introduction to Engineering Systems I  
EG 10112: Introduction to Engineering Systems II

### **COURSE DESCRIPTIONS**

Course descriptions can be found in the respective departmental sections of the enclosed CD.

## Physical Education or Reserve Officers Training Corps Program

All Notre Dame first-year students must take two semesters of physical education as a University requirement. However, first-year students who enroll and remain in an ROTC program are exempted from physical education.

Specific physical education units are chosen after arriving on campus. For more information about the

## CREDIT AND/OR PLACEMENT BY EXAMINATION

physical education courses offered, refer to the course descriptions under the Physical Education section of this *Bulletin*.

### Reserve Officers Training Corps Program (ROTC) Courses:

AS 10101: Foundations of the U.S. Air Force  
AS 10102: Foundations of the U.S. Air Force  
MSL 10101: Foundations of Officership  
MSL 10102: Basic Military Leadership  
NSCI 10101: Introduction to Naval Science  
NSCI 10102: Maritime Affairs

### COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

## Voluntary Courses

In addition to five academic courses and PE or ROTC, voluntary one- and two-credit courses are offered in the areas of the fine arts, history, music, dance, business, study skills, and theology. These courses may not be substituted for any of the six required courses. The colleges have restrictions on the number of one or two-credit courses that will be applied to the total number of credits required for graduation from the colleges.

### Voluntary Courses:

BAUG 10000: Introduction to Business  
BAUG 30209: Boardroom Insights  
BAUG 30210: Ten Years Hence Lecture Series  
FYS 10190: Advanced Strategies for Discipline-Specific Study  
FYS 10191: Competitive Strategies  
FYS 10192: Secrets of Effective Time Management  
FYS 10401: Introduction to the Fine Arts at Notre Dame  
MUS 10201: Brass Ensemble  
MUS 10203: Chamber Ensemble  
MUS 10210: Chorale  
MUS 10221: Glee Club  
MUS 10222: Collegium Musicum  
MUS 10230: Jazz Band  
MUS 10241: Wind Ensemble  
MUS 10244: Concert Band  
MUS 10245: University Band  
MUS 10247: Concert Winds  
MUS 10249: Marching Band  
MUS 10250: Symphony Orchestra  
MUS 10251: Chamber Orchestra  
MUS 10300- MUS 11340: Voice and Instrumental Lessons  
THEO 33950: Social Concerns Seminar: Appalachia  
THEO 33963: Social Concerns Seminar: The Church and Social Action—Urban Plunge  
THEO 33936: Summer Service Learning: Confronting Social Issues

### COURSE DESCRIPTIONS

Course descriptions can be found in the respective departmental sections of the enclosed CD.

## The Advanced Placement Examinations

AP Examination	AP Grade Required	No. of Credits Awarded	Notre Dame Course Typically Credited
American History	5	3	HIST 10010
Biology	5	8	BIOS 10098 and 10099
Biology	4	3	BIOS 10101
Calculus AB	3	3	MATH 10250
Calculus AB	4	4	MATH 10550
Calculus BC	3	3	MATH 10250
Calculus BC	4	8	MATH 10550 and 10560
Calculus BC (AB Subscore)	3	3	MATH 10250
Calculus BC (AB Subscore)	4	4	MATH 10550
Chemistry	5	4	CHEM 10171
Chemistry	4	3	CHEM 10101
Economics (Macroeconomics)	5	3	ECON 10020
Economics (Microeconomics)	5	3	ECON 10010
English (either exam)	4	3	FYC 13100
European History	5	3	HIST 10020
Political Science (American Politics)	5	3	POLS 10100
Political Science (Comparative)	5	3	POLS 10400
Latin (any exam)	4	6	CLLA 10001 and 10002
Latin (any exam)	3	3	CLLA 10001
Physics B	5	8	PHYS 30210 and 30220
Physics B	4	6	PHYS 10111 and 10122
Physics C (Mechanics)	5	4	PHYS 10310
Physics C (Mechanics)	4	3	PHYS 10111
Physics C (Electricity and Magnetism)	5	4	PHYS 10320
Physics C (Electricity and Magnetism)	4	3	PHYS 10122
Psychology	4	3	PSY 10000
Statistics	5	3	MATH 10140
World History	5	3	HIST 10030

## Credit and/or Placement by Examination

The First Year of Studies processes advanced credit. However, it is the other University departments and colleges in coordination with First Year of Studies, who determine exactly what advanced credit will be awarded. Students are sometimes wise to waive advanced credit and to take the class at Notre Dame instead. This is especially true for students who may wish to pursue a degree in one of the preprofessional (premedical and related health-profession) majors. It is often a good idea for them to take chemistry and biology at the University even if they have advanced credit for those courses. First Year of Studies advisors

are available to discuss these issues with students both in the summer and during the academic year.

Entering first-year students may become eligible for credit by examination in four ways: (1) through the Advanced Placement Program administered by the College Entrance Examination Board, (2) through the SAT II-Subject Tests in French, German, Italian, and Spanish, (3) through the International Baccalaureate Program administered by International Baccalaureate North America, (4) through the Notre Dame Mathematics Credit Examination Program. Students' placement may be determined through the *online* Notre Dame French, German, and Spanish placement examinations, but no credit is awarded.

## CREDIT AND/OR PLACEMENT BY EXAMINATION

**SAT II Subject Tests for French, Spanish, and German**

SAT II Subject	Advanced Placement	Credits (Courses)	Placement Level
<b>French and French with Listening</b>			
790—800	5 (lang)/4 (lit)	6 (20201—20202)	30310 or 30320
690—780	4 (lang)/3 (lit)	6 (20201—20202)	20300 or 27500
590—680	3 (lang)/2 (lit)	6 (10102—20201)	20202
490—580	2 (lang)/1 (lit)	6 (10101—10102)	20201 or 20215
480	1 (lang)	3 (10101)	10102 or 10115
<b>Spanish and Spanish with Listening</b>			
800	5 (lang)/4 (lit)	6 (20201—20202)	30310 or 30320
690—790	4 (lang)/3 (lit)	6 (20201—20202)	20220, 20237, or 27500
570—680	3 (lang)/2 (lit)	6 (10102—20201)	20202
460—560	2 (lang)/1 (lit)	6 (10101—10102)	20201 or 20215
450	1 (lang)	3 (10101)	10102 or 10115
<b>German and German with Listening</b>			
790—800	5 (lang)/4 (lit)	6 (10102—20201)	20202 or 30000+
690—780	4 (lang)/3 (lit)	6 (10101—10102)	20201
590—680	3 (lang)/2 (lit)	3 (10101)	10102

**SAT II Subject Tests for Italian**

SAT II Subject	Advanced Placement	Credits (Courses)	Placement Level
<b>Italian and Italian with Listening</b>			
790—800	5 (lang)/4 (lit)	6 (20201—20202)	30310
690—780	4 (lang)/3 (lit)	6 (10102—20201)	27500
590—680	3 (lang)/2 (lit)	6 (10101—10102)	20201 or 20215
490—580	2 (lang)/1 (lit)	3 (10101)	10102

1. *Advanced Placement Program (AP)*—Students who submit results of Advanced Placement examinations are eligible to receive placement and credit in accordance with the accompanying table.

2. *SAT-II Subject Tests (SAT II)*—Results of CEEB Advanced Placement Examinations or the SAT-II Subject Tests in French, German, Italian, or Spanish are used for course placement and credit by examination purposes in accordance with the accompanying table.

3. *International Baccalaureate Program (IB)*—Students who submit results of International Baccalaureate Higher Level examinations are eligible to receive placement and credit in accordance with the accompanying table. The University does not give credit for Subsidiary Level examinations.

4. *Notre Dame Mathematics Credit Examination Program*—First-year students may take examinations for possible course placement and credit in mathematics after they arrive on campus. The examinations will be based on college-level courses.

**Notre Dame Online French, German and Spanish Placement Examination Programs**—First-year students may take *online* examinations for placement

only. These examinations are available during the summer as well as during the academic year.

When credit is awarded, the dean of the First Year of Studies has it entered on the student's transcript, which is maintained by the registrar's office. This credit can be applied toward required or elective courses if the student's particular college program permits. If Advanced Placement, International Baccalaureate, or Notre Dame Mathematics Examination credit is not applicable in a specific college program, that credit is recorded on the student's transcript, but it represents credit in excess of graduation requirements. Placement, but not credit, for the Notre Dame *online* placement examinations is recorded in the student's official records, but not on his or her transcript.

The general guideline is that credit by examination is counted as required or elective credit if the course is required or permitted in a particular college program. Credit by examination is not counted as required or elective credit if the number of the course for which credit is awarded is lower than the initial course required in a particular college program. For example, if a student earns a 4 on the Advanced Placement Physics B test, the six credits awarded for PHYS 10111–10122 would count toward

graduation in a College of Arts and Letters, Mendoza College of Business, or School of Architecture program. The credits would not count toward graduation in a College of Engineering program since the initial physics course in this college is PHYS 10310. On the other hand, if the number of the course for which credit is awarded is higher than the initial course required in a particular college program, the credit awarded satisfies that requirement. For example, credit awarded for MATH 10550–10560 also satisfies the mathematics requirement for programs requiring MATH 10350–10360 or MATH 10250–10260.

**Language placement**—Students with no previous background in a language can elect a beginning-level course. Students with previous background in a language who want to continue their language study must take a placement exam to determine proper placement.

Students may use the results from a foreign language credit by examination (AP, SAT II, IB) for placement, as described under the Credit by Examination table. A maximum of six credits can be granted for performance on a foreign language credit by examination.

Students who have not taken a language credit by examination before entering Notre Dame, may take one at Notre Dame. All foreign language departments at Notre Dame offer placement exams. The French, German and Spanish placement exams are available *online*. Placement exams for other languages are given during the First Year Orientation Weekend in August and at least twice during the school year in time for fall and spring advance registration. Information on language placement is sent to incoming first-year students during the summer. The appropriate department and the First Year of Studies will guide students with previous instruction in their languages after reviewing their high school background and placement tests.

Regardless of their scores on credit or placement exams, students in the College of Arts and Letters must take at least one language course in residence at Notre Dame. Arts and Letters students must also complete at least one course at the intermediate or higher level that deals with texts in the original language. If placement allows, one course at Notre Dame at the intermediate or higher level may satisfy both parts of this requirement. In the College of Science, students who place higher than the intermediate level (third semester) are considered to have fulfilled the language requirement and need not take any additional courses in the language. Students contemplating an international study program that requires language study should consult with the language department regarding appropriate language preparation. All students are encouraged to start their study of language during their first year or the beginning of their second year at the latest.

## FIRST-YEAR GOALS

**International Baccalaureate—Notre Dame Credit**

International Baccalaureate Subject (Higher Level)	IB Grade Required	No. of Credits Awarded	Notre Dame Course Typically Credited
Biology	6	6	BIOS 10101 and 10107
Biology	7	8	BIOS 10098 and 10099
Chemistry	6	3	CHEM 10101
Chemistry	7	4	CHEM 10171
Economics	6	6	ECON 10010 and 10020

Psychology	6	3	PSY 10000
Social and Cultural Anthropology	6	3	ANTH 10109

## College Credit from Other Institutions

The University's other colleges and departments, in consultation with the First Year of Studies, determine whether or not college courses completed after the junior year and prior to first-year enrollment and taken at other institutions will be accepted for credit. In order to be considered for credit, these courses must have been completed on college campuses and must not have been used to satisfy high school graduation requirements or Notre Dame requirements for first-year admission. An official transcript, a course syllabus, and a copy of the published description of the course are also necessary for consideration of the course for credit. Normally, courses specified in the First-Year Curriculum may not be satisfied through transfer credit. First-year students need to resolve all college credit situations before or during their first semester at Notre Dame.

## Peer Advising Program

The Peer Advising Program in the First Year of Studies at the University of Notre Dame provides the opportunity for first-year students to engage in meaningful conversation with reliable and informed upper-class students. These interactions focus on the general adjustment of the first-year student to the university setting. Peer Advising endeavors to welcome all students to the Notre Dame community by reassuring and encouraging students as they begin university-level study; informing students about a

variety of campus resources; emphasizing the mission and initiatives of the First Year of Studies; and listening for the challenges and concerns of new students

## Learning Resource Center

In addition to individual and group advising, and peer advising, the First Year of Studies offers first-year students a large support system to assist them in making a successful transition from high school learning strategies to college-level skills. The Learning Resource Center houses the Learning Strategies Program, the Tutoring Program, and the Collaborative Learning Program. The assistance offered through these programs is supplemental and not meant to replace the student's own efforts, classroom instruction, meetings with the professor, or any other aids offered by the instructor or department. There is no additional charge or fee for any of these programs.

## Learning Strategies Program

All first-year students interested in improving their skills for success in college may participate in small group workshops or schedule individual meetings with the First Year of Studies learning strategies specialist. The Learning Strategies Program covers a variety of topics of practical value to students (e.g., time management, note taking, test preparation) and includes individual assistance with writing and reading for various academic genres.

## Tutoring Program

The First Year of Studies Tutoring Program is available to all first-year students who would like to improve on their understanding of course material. In addition to the traditional tutor-student interaction, the small size and flexible pace of these tutoring sessions encourages peer interaction and provides a conducive setting for students to ask individual questions.

## Collaborative Learning Program

The Collaborative Learning Program is also open to all first-year students. In collaborative learning sessions, students solve homework problems together while focusing on the problem-solving methods. Collaborative learning resource leaders monitor the sessions, encourage problem-solving and collaboration among group members, and answer questions when necessary.

## First-Year Goals

The First Year of Studies, its curriculum, and its support systems are all designed to encourage first-year students to work toward gaining an understanding of how the Arts, Sciences, and Humanities enable one to engage in a serious exploration of the important and complicated questions, the questions that deal with matters pertaining to God, nature, and human institutions. They are designed to help students become acquainted with the disciplines that make up these areas of intellectual inquiry and to begin to engage these questions by selecting challenging classes, attending public lectures, building collaborative relationships with peers, and by seeking opportunities to forge mentoring relationships with faculty.

# School of Architecture

*Francis and Kathleen Rooney Dean of the School of Architecture:*

**Programs of Studies.** The study of architecture has a long and distinguished history at the University of Notre Dame. Courses in architecture were taught at the University as early as 1869. Formal instruction in architecture began in 1898. The Department of Architecture, previously part of the College of Engineering, became the free-standing School of Architecture in 1994. The school offers a five-year program leading to the degree of bachelor of architecture, a two-year program leading to the degree of master of architectural design and urbanism, and a three-year program leading to the degree of master of architecture. The professional degree programs (B.Arch. and M.Arch.) are accredited by the National Architectural Accrediting Board, and the curricula conform to NAAB requirements for the professional degree in architecture.

Since the early 1990s, the school's curriculum has been based on education in traditional and classical architecture and urbanism. Instruction teaches the skills, cultivates the talents, and imparts the knowledge necessary to produce buildings that represent innovation within long-standing traditions, use nature's materials responsibly, and contribute to building livable communities. The school believes

this is best done by learning how recurring problems in designing and constructing buildings and fitting them into existing urban and rural settings have been addressed in the past and adapting those lessons to the ever-changing circumstances of the modern world.

The goals of the curriculum include developing competence in the design of individual buildings, understanding the relationship between individual buildings and their physical and cultural contexts, and recognizing the ethical dimensions of the professional practice of architecture. Architects play a primary role in shaping the built environment and have a professional responsibility to do so in a manner that contributes to the civil life of society. Their work must also help to renew and sustain the integrity of the natural world and promote social welfare.

While the primary objective of the curriculum is professional education, students have opportunities to explore fields such as business, engineering, environmental sciences, and the liberal arts through electives and building on University requirements.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the bachelor of architecture, the master of architecture, and the doctor of architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master's degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

In addition to the first professional degree of bachelor of architecture (B.Arch.), the School of Architecture offers three paths of graduate studies leading to one of two degrees. The Path A graduate course of study leads to the two-year post-professional master of architectural design and urbanism degree (MARDU), which is intended for people already holding a professional degree in architecture (B.Arch. or M.Arch.). The Path B graduate course of study leads to a two-year master of architecture (M.Arch.) professional degree, and is intended for people holding a four-year undergraduate preprofessional degree with a major in architecture. The Path C graduate course of study leads to a three-year master of architecture (M.Arch.) professional degree, and is intended for people holding undergraduate degrees in a field other than

architecture. All three graduate paths of study entail a one-year concentration in either classical architecture or urban design, and conclude with a semester-long independent design project.

Concentrations in furniture design, in historic preservation and restoration, and in practice and enterprise are also options within the first professional degree program.

Required courses for the concentration in furniture design are ARCH 41811, Beginning Furniture; ARCH 41821, Advanced Furniture Design; ARCH 57811, Special Studies in Furniture Design; ARCH 57821, Special Studies in Furniture Design 2.

The concentration in historic preservation and restoration requires four courses: Research and Documentation of Historical Buildings, History of American Architecture (1630–1915), Historic Preservation and Traditional Construction, and History and Theory of Preservation.

In addition to the professional practice course in the B.Arch. curriculum, students in the concentration in practice and enterprise take four courses from the Mendoza College of Business: Accountancy I, Principles of Management, and two other courses chosen from offerings in various aspects of business.

Concentrations are declared at the end of the third year.

Both the undergraduate and graduate programs at Notre Dame take advantage of the school's proximity to Chicago. In addition, all third-year students spend the academic year in the school's Rome Studies Center in Italy. All graduate students spend a spring semester there. Some limited scholarship aid is available for the additional expenses incurred in Rome.

The initial phase of undergraduate architectural study is devoted to acquiring basic design and technical skills and developing an understanding of architectural concepts by learning canonical forms of classical architecture and manipulating them in design problems. The sophomore year begins with paradigmatic projects and ends by solving complex and challenging building programs. The sophomore foundation is reinforced in the third year, which is spent in Rome. There, 2,500 years of building tradition provides the context for contemporary design problems. Fourth-year students return to Notre Dame, where they are reintroduced to the American context. At this stage, students are encouraged to synthesize their interpretations of the historical legacy in the context of American urban centers and small cities. They are also challenged by projects that require them to engage architectural problems outside their normal Western focus. The undergraduate program culminates with a thesis design project completed in the fifth year of study.

The Center for Building Communities was begun in 2006. With financial support through a gift from Champion Builders, studios explore the use of contemporary modular wood and steel construction in traditional urbanism.

In addition to studio instruction, students complete course work in structural, mechanical, and environmental systems and architectural history. History and theory courses in the School of Architecture include a two-semester survey of the history of architecture from the earliest times to the present and specialized upper-level course work in selected topics involving the history and theory of architecture.

Students are in contact with practicing professionals through collaboration between the School of Architecture and the South Bend Downtown Design Center, as well as the Northern Indiana Chapter of the American Institute of Architects. The School of Architecture has an active chapter of the American Institute of Architecture Students.

**Facilities.** The School of Architecture is located in Bond Hall of Architecture. This building, the former University Library, was thoroughly rebuilt from 1995 through 1996. The 60,000-square-foot building contains classrooms, an auditorium, library, computer lab, and studios that are both functional and designed in accord with the historical limestone structure. The Rome Studies Center is in the heart of Rome's historic center.

**Richard H. Driehaus Prize in Classical Architecture** Richard H. Driehaus, the founder and chairman of Driehaus Capital Management in Chicago, initiated the Richard H. Driehaus Prize in Classical Architecture to honor a major contributor in the field of traditional and classical architecture or historic preservation. In 2004, he initiated the Henry Hope Reed prize to recognize outstanding contributions to the welfare of the traditional city and its architecture. He established the prizes through the University of Notre Dame's School of Architecture because of its reputation as a national leader in incorporating the ideals of traditional and classical architecture into the task of modern urban development.

#### First Year

First-year students intending to major in architecture take the following courses:

<i>Course</i>	<i>First Semester Credits</i>	<i>Second Semester Credits</i>
Composition/ University Seminar	3	3
MATH 10250 and 10270	3	3
PHYS 10111 and 10122 or PHYS 10111 and Science Elective	3	3
History or Social Science	3	—
ARCH 11011. Graphics I: Drawing	3	—
ARCH 11021. Graphics II: Drafting	—	3
ARCH 10311. Architectural Writings	—	4
Physical Education	—	—
	15	16

The courses listed below indicate the normal sequence for sophomore, junior, senior, and fifth years majoring in architecture.

<b>Sophomore Year</b>		
<i>First Semester</i>		
ARCH 21111. Design I	6	
ARCH 20411. Building Technology I	3	
ARCH 20211. Architectural History I	3	
ROIT 10105. Beginning Italian I Theology or Philosophy	3	3
	18	
<i>Second Semester</i>		
ARCH 21121. Design II	6	
ARCH 20221. Architectural History II	3	
ARCH 20511. Structural Mechanics for Architects	3	
ROIT 10106. Beginning Italian II Theology or Philosophy	3	3
	18	
<b>Junior Year (Rome Studies Program)</b>		
<i>First Semester</i>		
ARCH 34112. Design III	6	
ARCH 34312. Architectural History III	3	
ARCH 34212. Roman Urbanism and Architecture I	3	
ARCH 34012. Graphics III: Freehand Drawing	3	3
	15	
<i>Second Semester</i>		
ARCH 34122. Design IV	6	
ARCH 34322. Architectural History IV	3	
ARCH 34222. Roman Urbanism and Architecture II	3	
ARCH 34022. Graphics IV: Watercolor	3	3
	15	

#### Senior Year

<i>First Semester</i>	
ARCH 40411. Environmental Systems I	3
ARCH 41111. Design V	6
ARCH 41011. Graphics V: Computers	3
ARCH 40511. Structural Design for Architects Theology or Philosophy	3
	18
<i>Second Semester</i>	
ARCH 41121. Design VI	6
ARCH 40421. Building Technology II	3
ARCH 40521. Applied Structural Systems Theology or Philosophy	3
Social Science or History	3
	18

#### Fifth Year

<i>First Semester</i>	
ARCH 51111. Design VII	6
ARCH 50419. Environmental Systems II Elective	3
Elective	3
	15
<i>Second Semester</i>	
ARCH 51121. Design VIII (Thesis)	6
ARCH 50711. Professional Practice Elective	3
Elective	3
	15

Total for five years: 163 semester hours.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [School of Architecture](#) section.

## Student Awards and Prizes

*Henry Adams Medal and Certificate.* This American Institute of Architecture (AIA) award honors the graduating architecture student who has the highest grade-point average for the complete course of study.

*Henry Adams Certificate.* This AIA award is given to the graduating architecture student with the second-highest grade-point average for the complete course of study.

*Tau Sigma Delta Bronze Medal Winner.* The Tau Sigma Delta medal is awarded to a graduating student selected by his or her peers in recognition of design excellence.

*Andrew F. Kervick Award for Design and Drawing.* Founded by Prof. Francis W. Kervick, former head of the School of Architecture in memory of his father, this award, selected by the fourth and fifth-year

faculty, honors the student whose work in freehand drawing in the fourth or fifth year has been of the highest merit.

*Alpha Rho Chi.* Selected by faculty, the Alpha Rho Chi Medal goes to the graduating student who has shown ability for leadership and has performed willing service for the School.

*Ralph Thomas Sollitt Award.* Founded in 1931 by Ralph Sollitt and Sons Construction Co., this award, selected by the fifth-year thesis jury, is given to the student who submits the best design as a solution to the thesis architecture problem.

*Ferguson and Shamamian Undergraduate Prize.* Selected by the fifth-year thesis jury, the Ferguson & Shamamian Architects Undergraduate Prize is awarded to a fifth-year student for excellence in classical design exhibited in thesis.

*The Association of Licensed Architects Student Merit Award.* Selected by the fifth-year faculty, the ALA Student Merit Award goes to a graduating student recognized for exemplary achievements throughout the scholastic year.

*Dean's Award for Design Excellence in Architecture.* Selected by the fifth-year thesis jurors and the dean, this award goes to overall excellence in a fifth-year thesis project.

*Rome, Paris, Athens Prize.* Selected by the fifth-year thesis faculty and the dean, this award is for the scope of exploration and the quality of individual buildings that successfully unite architecture and urban design.

*The Noel Blank Design Awards.* Founded by Leon W. Blank in memory of his brother, Noel, this high honor goes to the top four thesis projects as selected by the fifth-year thesis jurors.

*Gertrude S. Sollitt Prize for Architectural Structure.* Founded in 1931 by Ralph Sollitt and Sons Construction Co., this award, selected by the School's faculty, goes to the student who submits the best work as a solution to a special problem in structure assigned in the scholastic year.

*The St. Joseph Award in Furniture.* Selected by the furniture design professor for excellence in furniture design and construction.

*Norman A. Crowe Award.* Given to a graduating student for their contributions to the idea of sustainability with respect to architecture and urbanism. Selected by the dean and faculty.

*Nellie Wynn Kervick Award for Design and Drawing.* Founded by Prof. Francis W. Kervick, former head of the School of Architecture in memory of his mother, this award, selected by the Rome Studies faculty, honors the student whose work in freehand drawing in the third year of study has been of the highest merit.

*Alice Wesoloski Scholarship.* For her decades of service to the School of Architecture, this award was

established in honor of Ms. Wesoloski. Selected by the faculty and the Office of Financial Aid to provide tuition assistance to a student of particular ability, character and need.

*James E. Childs and Associates Scholarship.* Selected by the faculty and the Office of Financial Aid to provide tuition assistance to minority students of particular ability and need.

*David M. Schwarz/Architectural Services, Inc. Internship and Traveling Fellowship Award.* A two-month paid internship for a fourth-year student with David M. Schwarz/ Architectural Services, Inc. and a one-month travel fellowship involving independent research and study.

*Ray Stuermer Memorial Award for Excellence in Design.* Given in memory of former Professor Ray Stuermer, this award, selected by faculty, is given on the basis of design work through the fourth year for overall improvement and design excellence.

*Frank Montana Rome Scholarship Award.* Recipients are selected by the dean, second-year design faculty and the office of financial aid. The Montana scholarships were endowed by Prof. Frank Montana, chair of the Department of Architecture for 25 years and founder of the Rome program. The scholarships are for tuition assistance in connection with the Notre Dame Rome Studies Program.

## Student Organizations

*AIAS, Student Chapter of the American Institute of Architects.* Students begin to engage in the professional activities of the national AIAS by attending meetings and conventions and structuring activities within the School of Architecture. The AIAS sponsors educational, professional, and social events in the school.

*Student Association for Women in Architecture.* The Student Association for Women in Architecture is designed to encourage gender equality and diversity throughout the School of Architecture, the architecture profession, and our communities by providing a more diverse educational experience. Through collaboration with the American Institute of Architecture Students and the Students for New Urbanism we look forward to holding discussion groups with students and faculty, hosting guest lecturers and exhibits, creating community outreach programs where architecture students educate local youth about the architecture school and the architectural profession, and supporting our local community through service projects.

*Students for New Urbanism.* Students for New Urbanism-Notre Dame (SNU-ND) is a community of students from all majors that present, explore, discuss, and apply the ideals of New Urbanism and other "good urbanism" theories. Ideas especially focus on walkable neighborhoods, public transportation, affordable housing, new technology, sustainable architecture, and community participation in the context of creating healthy communities. SNU-ND looks at the vitality of urban places and how to

maintain and design great urban environments. SNU-ND is composed of three main parts: Education (to teach others and our selves about urban design); Service (to help the communities in our area and be a part of the urban design process) and Connection (act as a facilitator between professionals and students among many disciplines that participate in the planning process).

*Tau Sigma Delta.* In 1961 the Sigma Chapter of Tau Sigma Delta, the national architectural honor society, was established at Notre Dame. The constitution of Tau Sigma Delta stresses as its sole function the encouragement of high scholastic standing. Election to membership is limited to the top 20 percent of the students in the School of Architecture who have completed 60 percent of their requirements for the professional degree.

# College of Arts and Letters

The College of Arts and Letters is the oldest, and traditionally the largest, of the four undergraduate colleges of the University of Notre Dame. It houses 17 departments and several programs through which students at both undergraduate and graduate levels pursue the study of the fine arts, the humanities and the social sciences.

**Liberal Education.** The College of Arts and Letters provides a contemporary version of a traditional liberal arts educational program. In the college, students have the opportunity to understand themselves as heirs of a rich intellectual and spiritual tradition and as members of a complex national and international society. The faculty of the college are committed to the life of the mind, to the critical and constructive engagement with the whole of human experience. On the basis of a firm yet broad foundation, graduates of the college are equipped for a lifetime of learning in an ever-changing world. The overall curriculum and the specific major programs encourage students to approach issues reflectively, to analyze them carefully and to express their reasoned conclusions with clarity.

The intellectual quest conducted in the College of Arts and Letters takes place in an explicitly Catholic environment. Here ultimate questions of the meaning and value of human life before God are welcome, and efforts to deal with such questions utilize the immense resources of the Catholic tradition. Inquiry and faith are seen not as opposing forces but as complementary elements of the fully human pursuit of truth.

**Organization.** The college's administrative center is the Office for Undergraduate Studies, located in 104 O'Shaughnessy Hall. All undergraduates in arts and letters are invited to consult with the assistant deans regarding questions about their academic progress, educational and career goals, and any other concerns of an academic or administrative nature. Pre-law, pre-med, and pre-graduate school advising are available in this office. In particular, sophomores in the college who have not yet declared a major should begin their pursuit for academic advising in this office.

Because education is not limited to the classroom, the college also sponsors or helps to subsidize events which are intended to enrich the undergraduate experience and facilitate faculty-student interaction both on and off campus.

**Curricula and Degrees.** The College of Arts and Letters offers curricula leading to the degree of bachelor of fine arts in Art (Studio and Design) and of bachelor of arts in:

Africana Studies  
American Studies  
Anthropology

## Art:

Art History  
Design  
Studio

## Classics:

Arabic  
Greek and Roman Civilization

## East Asian Languages & Cultures:

Chinese  
Japanese

## Economics

## English

## Film, Television, and Theatre

## German and Russian Languages and Literatures:

German  
Russian

## History

## Mathematics (honors only)

## Medieval Studies

## Music

## Philosophy

## Philosophy/Theology (joint major)

## Political Science

## Program of Liberal Studies

## Psychology

## Romance Languages and Literatures:

French and Francophone Studies  
Italian  
Romance Languages and Literatures  
Spanish

## Sociology

## Theology

The college also offers supplementary majors, but not stand-alone first or degree-yielding majors, in:

## Arts and Letters Preprofessional Studies (ALPP)

## Africana Studies (24 hours)

## Art History (24 hours)

## Asian Studies (24 hours)

## Chinese (24 hours)

## Classics (24 hours)

## Computer Applications (CAPP) (24 hours)

## French (24 hours)

## Gender Studies (24 hours)

## German (24 hours)

## Greek and Roman Civilization (24 hours)

## Italian (24 hours)

## Japanese (24 hours)

## Latino Studies (24 hours)

## Medieval Studies (24 hours)

## Peace Studies (24 hours)

## Philosophy (24 hours)

## Russian (24 hours)

## Spanish (24 hours)

## Theology (25 hours)

**Admission Policies.** Admission to the College of Arts and Letters takes place at the end of the first year. The student body of the College of Arts and Letters thus comprises sophomores, juniors and seniors.

The prerequisite for admission of sophomores into the College of Arts and Letters is good standing at the end of the student's first year.

The student must have completed at least 24 credit hours and must have satisfied all of the specified course requirements of the First Year of Studies Program: University Seminar; Composition; two semester courses in mathematics; two semester courses in natural science; one semester course chosen from history, social science, philosophy, theology, literature or fine arts; and two semester courses in physical education or in ROTC. (The University seminar will satisfy the relevant requirement in fine arts, literature, history, social science, philosophy or theology.) A student who does not meet all of these conditions is retained in the First Year of Studies until all of the conditions are met. The deficiencies must be removed at the Notre Dame Summer Session or in the student's third semester at Notre Dame.

## Description of General College Requirements.

Every student graduating from the College of Arts and Letters must have a minimum of 120 credit hours and must have fulfilled all University, college and major requirements. Unless special permission has been obtained in advance from the Office for Undergraduate Studies, special studies and directed readings courses do not satisfy university or college requirements.

University Requirements	Courses
Composition	1
Mathematics	2
Natural Science	2
*History	1
*Social Science	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature (Physical Education)	2
	<hr/>
	14

*\* One of these requirements must be a University Seminar.*

Arts and Letters Requirements	Courses
College Seminar	1
Language	1-3
+History/Social Science	1
*Literature or Fine Arts (whichever is not taken above)	1
Major	8-12

*+ In addition to the University requirement of one history and one social science course, the college requires a third course, which can be either history or social science.*

*\* The arts and letters student is required to complete one fine arts and one literature course.*

## STUDENT AWARDS AND PRIZES

University requirements are described under “University Requirements,” in the front section of this *Bulletin*.

**Course Load.** The normal course load in the College of Arts and Letters is five courses. The maximum number of credit hours per semester is 17. Overloads for juniors and seniors are allowed only with the permission of the deans in the Office for Undergraduate Studies and only during the designated days of the enrollment period.

**Writing Requirement.** Students in arts and letters are required to complete one course in their major at the 30xxx or 40xxx level designated as a writing-intensive course. This course may satisfy other distributional requirements within the major. Writing intensive courses require the student to work closely with a professor throughout the semester on a significant written project.

**Activity and Experiential Learning Courses.** Three elective credits of the required 120 hours can be derived/obtained from the following activity courses:

Band (Marching and Concert)  
Orchestra  
Chorale  
Glee Club  
Liturgical Choir  
Folk Choir  
Music Lessons and Ensembles  
Ballet  
Debate  
Social Concerns Seminars

Exceptions will be made for music majors. If students complete more than three of these courses, these will appear on a student’s transcript, but the extra credits will be subtracted from the student’s total number of hours at the time the graduation check is made; hence, these will not count toward the 120 hours needed to graduate.

**Pass-Fail.** With permission from the academic dean, juniors and seniors may take one non-major, non-required elective course each semester on a pass-fail grading basis. These declarations must be made during the enrollment period of each semester, and once made, these declarations are irreversible.

**Arts and Letters Degree Credit.** Students may not count both examination and degree credit for the same course toward graduation hours. For example, a student who has advanced placement credit for ROSP 20201 may not take ROSP 20201 and count both toward the 120 hours required in arts and letters. Students also may not count for degree credit both of two equivalent courses taught at Notre Dame. For example, THEO 10001 and 20001 are considered to be equivalent courses, as are PHIL 10101 and 20201, and ECON 10015 and 20015. Students should take only one of each pair but not both. In cases where students have double credit for the same course, the credits for only one course will be counted toward the student’s degree credit, despite the fact that credits for both will appear on

the student’s transcript. A list of equivalent math and science courses can be found at the end of the College of Science section of the *Bulletin*. The same rules about double credit apply to them.

No courses in logic will satisfy the University philosophy requirement for students in arts and letters. After matriculation into the college, it is the expectation that arts and letters students will complete any outstanding math or science requirements at Notre Dame.

**ROTC.** First-year students enrolled in any of the three ROTC programs are exempted from the University’s physical education requirement. Credits received for 10xxx- and 20xxx-level ROTC courses do not count toward a student’s 120 credit hours, despite the fact that they appear on the transcript. They will be manually subtracted from the student’s total number of hours appearing thereon. The College of Arts and Letters accepts a maximum of 12 free elective credits only for ROTC students from the 30xxx- and 40xxx-level military sciences only. Non-ROTC students may not take ROTC courses for credit toward graduation except by special permission obtained in advance of registering for the course from the deans in the Office for Undergraduate Studies. If a non-ROTC student registers in ROTC classes without first acquiring permission, these credits will appear on the student’s transcript, but the credits will be subtracted manually from the student’s total hours at the time the graduation check is made.

**Dual Degree.** Programs leading to dual degrees (two undergraduate degrees, such as a bachelor of arts and a bachelor of business administration) are distinct from programs in which a student receives one degree with two majors (such as a bachelor of business administration with a major in finance and a major in political science). All dual-degree programs require the permission of the deans of both colleges. There are additional requirements which usually result in the need for a fifth year. All dual-degree students in the college, without exception, are required to take the Arts and Letters College Seminar (CSEM). Students wishing to pursue a dual degree must declare before the second semester of their senior year.

The requirements for a dual degree generally are as follows: The student completes all of the University requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a dual degree in two colleges. While the total number of hours required depends on the two major programs, the minimum required total number of degree credits must be 30 degree credits beyond the college total for the college with the greater number of degree credits.

**International Studies.** In light of the expansion of Notre Dame’s international study programs, the Provost’s Office has asked that students be encouraged to participate in University programs whenever

possible. Limited exceptions, however, will be made for students whose academic or programmatic needs cannot be met through existing Notre Dame programs. These exceptions will be made on an individual basis after extensive consultation among the students, their faculty advisors, and the deans.

## Student Awards and Prizes

### COLLEGIATE AWARD IN MODERN AND CLASSICAL LANGUAGES

*The Robert D. Nuner Modern and Classical Language Award*—presented to the graduating senior in the College of Arts and Letters with a first or second major in any classical or modern foreign language, who has earned the highest cumulative grade point average.

### AMERICAN STUDIES

*James E. Murphy Award for Excellence in Journalism*—open to graduating American Studies majors or non-majors with an interdisciplinary minor in Journalism, Ethics and Democracy.

*Paul Neville Award for Journalism*—awarded to a senior in American Studies for excellence in journalism.

*Hugh A. O’Donnell Award in American Studies*—awarded to a senior in American Studies for superior academic achievement.

*Prof. James Withey Award*—awarded to a senior in American Studies for notable achievement in writing.

### ANTHROPOLOGY

*The Peter Brown Professional Achievement Award*—awarded to the anthropology student with outstanding performance in the tasks of a professional academic in one or more of the following areas: publication, presentation at professional meetings, grants, and fellowships.

*The Robert DaMatta Excellence in Anthropology Award*—awarded to all students who achieve a 4.0 grade-point-average in the anthropology major.

*The Paul Farmer Service Award*—awarded to the student who has used his/her anthropological training for public service.

*The David Huffman Scholar/Athlete Award in Anthropology*—awarded to the student with outstanding performance in the major and in athletics.

*The Irwin Press Prize in Medical Anthropology*—awarded for the best paper in medical anthropology.

*The Reverend Raymond W. Murray, C.S.C., Award in Anthropology*—awarded to an outstanding senior majoring in anthropology.

## STUDENT AWARDS AND PRIZES

*The Julian Samora Award*—awarded to an outstanding senior majoring in anthropology.

**ART, ART HISTORY, AND DESIGN**

*The Walter Beardsley Award*—awarded for excellence in the M.F.A./B.F.A. show.

*Grief Art Awards*—awarded to outstanding senior B.F.A. students to defray the cost of their thesis exhibitions.

*Emil Jacques Medals for Work in the Fine Arts*—The department awards a gold and a silver medal for excellence in studio art to undergraduates pursuing a B.F.A..

*Mabel L. Mountain Memorial Art Award*—awarded for excellence in studio art.

*The Radwan and Allan Riley Prize in Design*—awarded to a senior design major for excellence in his or her respective field.

*The Radwan and Allan Riley Prize in Studio Art*—awarded to a senior studio art major for excellence in his or her respective field.

*The Radwan and Allan Riley Prize in Art History and Criticism*—awarded for the best essay in art history or criticism submitted by an undergraduate or graduate student.

*Eugene M. Riley Prize in Photography*—awarded to an undergraduate or graduate photography major for excellence in photography.

*Judith A. Wrappé Memorial Award*—awarded to an outstanding junior studio/design major. It is presented at the beginning of the student's senior year of study.

**ARTS AND LETTERS PREPROFESSIONAL**

*The Dr. Robert Joseph Barnet Award*—presented to an outstanding Arts and Letters preprofessional senior who has demonstrated, in addition to excellent character, superior academic achievement across the arts and sciences.

*The Dr. John E. Burke Award*—presented to an outstanding Arts and Letter preprofessional senior who has demonstrated, in addition to excellent academic achievement, outstanding leadership qualities through service within and/or beyond the Notre Dame community.

**ASIAN STUDIES**

*Center for Asian Studies Undergraduate Essay Award*—awarded to the student with the best undergraduate essay in Asian Studies.

**CLASSICS**

*Departmental Award in Greek, Latin, or Arabic*—awarded when merited to a graduating senior for excellence in study of Greek, Latin or Arabic.

*The Helen Hritzu and Jewell Erickson Award*—for excellence in Classics/Arabic Studies.

**EAST ASIAN LANGUAGES & CULTURES**

*Departmental Awards in Chinese and Japanese*—awards given when merited to graduating seniors for excellence in Chinese and Japanese language studies.

*The Liu Family Distinguished Achievement Award in Asian Studies*—for excellence in Asian Studies.

**ECONOMICS**

*The John Joyce Award on the American Worker*—The award is given as merited to the best undergraduate short story or poem on the "American Worker," by the Higgins Labor Research Center and the Economics Department. (There is also a graduate award for the best graduate essay).

*John Harold Sheehan Prize Essay Award*—given to the senior economics major who has written the best senior honors essay in economics.

*The Weber Award*—awarded to the senior economics major who has achieved the highest academic average.

**ENGLISH**

*The Billy Maich Academy of American Poets Award*—awarded to the undergraduate or graduate student submitting the best collection of original poetry.

*Eleanor Meehan Medal for Literary Merit*—presented to the English major who submits the best original critical essay written for an English course.

*The Ernest Sandeen Poetry Award*—awarded to the best original poetry submitted by an undergraduate.

*The Richard T. Sullivan Award for Fiction Writing*—awarded to the undergraduate who submits the best original fiction manuscript.

**FILM, TELEVISION, AND THEATRE**

*The Reginald Bain Award*—awarded to a Notre Dame student who produced remarkable theatre projects from any area of theatre during the academic year.

*Catherine Hicks Award*—This award was established by Catherine Hicks (B.A. '74, Saint Mary's) of Los Angeles and goes to the outstanding graduating senior in theatre.

*Joseph P. O'Toole Jr. Award*—The award was established by Joseph P. O'Toole Jr. (B.A., 1948) of San Jose, California, and goes to the outstanding graduating senior in film and television.

*The Award in Television Studies*—awarded to the student(s) judged to have produced the most outstanding senior thesis.

**GENDER STUDIES**

*The David and Shari Boehmen Internship Awards*—awarded for outstanding summer internships won by Gender Studies students.

*Gender Studies Outstanding Essay Award*—awarded to the best undergraduate essay.

*Gender Studies Thesis Award*—awarded to the student(s) judged to have produced the most outstanding senior thesis.

**GERMAN AND RUSSIAN LANGUAGES AND LITERATURES**

*The Rev. Lawrence G. Broestl, C.S.C., Award*—presented to the graduating senior with the best academic achievement in German.

*Delta Phi Alpha German Honor Society Award*—awarded to a graduating senior for outstanding achievement in the study of German language and literature.

*Jeffrey Engelmeier Award*—presented to the outstanding student of German whose leadership and contribution to the life of the department are especially conspicuous.

*The Russian Language and Literature Award*—presented to the graduating senior with the best academic achievement in Russian.

*The Lauren B. Thomas Scholarship*—Awarded by the Russian faculty to an outstanding Russian major who exhibits financial need.

**HISTORY**

*The Monsignor Francis A. O'Brien Prize*—presented to the senior who has achieved distinction with the best essay in history.

*The O'Connell Award*—an annual award for the best sophomore or junior essay in history.

*The O'Hagan Award*—awarded to the undergraduate who has submitted the best original essay on a phase of Irish history.

*The Senior Thesis Prize*—awarded for the best history thesis by a senior history major.

**IRISH LANGUAGES AND LITERATURE**

*The Brother Simeon Prize for Distinction in Irish*—for excellence in Irish language and literature.

**IRISH STUDIES**

*The Donald and Marilyn Keough Award*—for excellence in Irish Studies.

**LATIN AMERICAN STUDIES**

*The Rev. John Considine, MM Award*—awarded for outstanding student contributions to the study of, or service to, the Catholic Church in Latin America.

## SERVICE AWARDS

*John J. Kennedy Prize for Latin American Studies*—awarded to the senior who has written an outstanding essay on Latin America. (Occasionally there is a runner-up award).

*The George Monteiro Prize*—awarded to the senior who has written an outstanding essay in Portuguese.

### MEDIEVAL STUDIES

*Michel Prize in Medieval Studies*—given to a graduating senior who has written the best essay on a medieval subject.

### MUSIC

*Department of Music Senior Award*—awarded to an outstanding senior in the Music Department.

### PHILOSOPHY

*The Dockweiler Medal for Philosophy*—presented to the senior submitting the best essay on a philosophical subject.

*The John A. Oesterle Award in Philosophy*—awards given when merited to graduating philosophy majors for excellence in philosophy.

### POLITICAL SCIENCE

*Paul Bartholomew Essay Prize*—awarded to the senior major submitting the best senior honors essay in the fields of American politics or political theory.

*The Helen Kellogg Prize*—for the best senior thesis in the field of comparative politics.

*The Stephen Kertesz Prize*—awarded to a senior major submitting the best senior honors essay in the field of international relations or comparative politics.

*The Program for American Democracy Award*—awarded to the student who submits the best senior honors thesis in the field of American politics.

### PROGRAM OF LIBERAL STUDIES

*The Otto A. Bird Award*—awarded to the senior in the Program of Liberal Studies who has written the best senior essay.

*The Edward J. Cronin Award*—awarded annually to a student in the Program of Liberal Studies for excellence in writing in regular course work.

*The Willis D. Nutting Award*—given to the senior major who has contributed most to the education of fellow students.

### PSYCHOLOGY

*The John F. Santos Award for Distinctive Achievement in Psychology*—to a senior psychology major in recognition of outstanding achievement in research, academic performance, and student-life activities.

*Senior Recognition Award in Psychology*—given in recognition of outstanding achievement in research,

academic performance, and student-life activities, while pursuing a major course of study in psychology.

### ROMANCE LANGUAGES AND LITERATURES

*Walter Langford Awards for Excellence in Spanish Literature and Excellence in French Literature*—two awards—to the graduating senior majors in French and Spanish literature whose work was deemed most outstanding by the Romance languages and literatures faculty.

*The Joseph Italo Bosco Senior Award*—awarded to a graduating senior for excellence in Italian Studies.

### SOCIOLOGY

*The Margaret Eisch Memorial Prize in Sociology*—awarded to an outstanding graduating senior majoring in sociology.

*The Sociology Major Essay Award*—presented to the senior sociology major who has written the best essay.

### THEOLOGY

*The Gertrude Austin Marti Award in Theology*—presented to a graduating senior who has evidenced qualities of personal character and academic achievement in theological studies.

*The Rev. Joseph H. Cavanaugh, C.S.C., Award*—awarded to the senior who has evidenced high qualities of personal character and academic achievement, particularly in theological studies.

## Service Awards

### AMERICAN STUDIES

*J. Simnot Meyers Award*—awarded to a senior in American Studies for outstanding service to the academic community.

### ANTHROPOLOGY

*The Department of Anthropology Service Award*—awarded to the student who has contributed the most to the department's sense of community.

### ECONOMICS

*Lawrence J. Lewis Award*—awarded to the senior in the Department of Economics who has best distinguished himself or herself in community service.

### MUSIC

*Band Vice President Prize*—annual award to the elected vice president of the band.

*Terry Baum Secretary Prize*—awarded to the secretary of the band and presented by the University of Notre Dame.

*Halland President's Prize*—annual award for the outgoing president of the band.

*Thomas J. Kirschner Band Treasurer Prize*—annual award to the elected band treasurer.

*The Kobak Memorial Scholarship*—for outstanding instrument achievement for band.

*Robert F. O'Brien Award*—for outstanding service and dedication to the band.

*Outstanding Band Member*—for loyalty, dedication, and leadership.

*Outstanding Marching Band Award*—awarded for dedication, ability, and leadership during marching band season.

*The Daniel H. Pektke Memorial Award*—presented to two underclassmen in the Notre Dame Glee Club in recognition of musical leadership, exemplary personal character and overall contribution to the success of the group.

*Gerald J. Smith Memorial Award*—awarded for citizenship and loyalty to band.

*Social Chairperson Award*—plaque given annually to the social chairperson in appreciation for dedication and service to the Notre Dame bands.

### PEACE STUDIES

*The Peter Yarrow Award in Peace Studies*—awarded to an outstanding student in Peace Studies with a commitment to justice and service work.

### POLITICAL SCIENCE

*George Brinkley Service Award*—awarded to the student who best exemplifies the Political Science Department's ideal of public service through service to the department, the University, or the wider community.

### ROMANCE LANGUAGES AND LITERATURES

*Carlos Aballi Award in Hispanic Cultural Awareness*—given to a graduating Hispanic student who has taken Spanish at Notre Dame and has been active in promoting Hispanic cultural awareness at Notre Dame.

*The Mara Fox Award for Service to the Hispanic Community*—awarded to a graduating senior who has performed outstanding service benefiting the Hispanic community.

*William Richardson Award in Hispanic Culture for an African American Student*—given to a graduating African American student who has shown an unusually strong interest in Hispanic culture through his or her active participation in campus and/or community projects or activities.

*José Tito Sigüenza Award for Service to Hispanic Youth*—awarded to the senior who has studied Spanish at Notre Dame and contributed outstanding service to Hispanic youth.

## SPECIAL ARTS AND LETTERS REQUIREMENTS

## Special Arts and Letters Requirements

**Language Requirement.** Students in arts and letters are required to reach intermediate proficiency in a foreign language, but “intermediate proficiency” is defined differently in each of the languages, depending on the complexity of the language itself and the intensity of the course. Students without Advanced Placement or SAT II credit, but who come with some background in the language they elect will be placed by examinations given during first-year orientation and prior to spring preregistration.

Departmental placement exams will not be credit-bearing. Students may receive up to eight hours of credit based on their scores on the AP and SAT II tests. If, for some reason, more than eight hours of credit appear on the transcript, the credits beyond eight will be non-counted and will be manually subtracted from the total number of degree credits counting for graduation. Regardless of the scores on these exams, it is impossible for a student to test out of the language requirement in the College of Arts and Letters. Every student in arts and letters must take at least one course at the appropriate level that deals with texts in the original language. For the specific details of a given language offering or program, check with the relevant department.

**College Seminar.** The College Seminar is a unique one-semester course experience shared by all students majoring in the College of Arts and Letters. Typically taken in the sophomore year, the course offers students an introduction to the diversity and distinctive focus of arts and letters at the University of Notre Dame. Specific sections of the College Seminar vary in their topics and texts, but all feature an interdisciplinary approach, commitment to engaging important questions, employment of major works, and emphasis on the development of oral skills. Every College Seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the college: the arts, humanities, and social sciences. All students in arts and letters are required to take College Seminar with the exception of PLS majors or students who complete through the sophomore year of the PLS program.

For descriptions of the University and other colleges' requirements, see “University Requirements” in the front section of this *Bulletin*.

## Arts and Letters Programs

The programs offered by the College of Arts and Letters include majors, supplementary majors, and minors, which may be either departmental or interdisciplinary. Every student in the college must complete one major sequence. Supplementary majors and minors are optional and may be taken to supplement or enhance a student's major but do not lead to graduation in and of themselves.

## Double-Counting

One course may be double-counted one time to fulfill a second major, supplementary major, or minor requirement and a University or college requirement. No course may be double-counted between majors and/or minors or between a first major and University or college requirements. University Seminar, by definition, fulfills a University or college requirement and is not considered a double count under this rule.

## Majors

A major sequence is a carefully chosen combination of courses from an individual department or program that stands alone in qualifying students for an undergraduate degree. It usually consists of between eight and 12 courses. In contrast to the University and college requirements that provide students with broad exposure to a variety of the liberal arts and sciences, the major affords the student an opportunity to gain more specialized knowledge of a particular field or discipline.

The major in liberal arts programs is normally chosen during the sophomore year and is completed during the junior and senior years. Each spring before preregistration, the college holds a series of programs and meetings to inform the students about the various majors so that they may make intelligent choices. Students pursue their majors under the direction of the departmental or program chair and its advising staff.

Supplementary majors are those that cannot stand alone in qualifying a student for an undergraduate degree but must be taken in conjunction with a primary major. They include both interdisciplinary and departmental offerings:

Africana Studies (24 hours)  
 Arts and Letters Preprofessional Studies (ALPP) (49 hours)  
 Art History (24 hours)  
 Asian Studies (24 hours)  
 Chinese (24 hours)  
 Classics (24 hours)  
 Computer Applications (CAPP) (24 hours)  
 French (24 hours)  
 Gender Studies (24 hours)  
 German (24 hours)  
 Greek and Roman Civilization (24 hours)  
 History (24 hours)  
 Italian (24 hours)  
 Japanese (24 hours)  
 Latino Studies (24 hours)  
 Medieval Studies (24 hours)  
 Peace Studies (24 hours)  
 Philosophy (24 hours)  
 Russian (24 hours)  
 Spanish (24 hours)  
 Theology (25 hours)

**Self-Designed Majors.** A program for a special self-designed major was approved by the college council during the 1994–95 year. The self-designed major involves substantive integration of the subject matter in ways that cannot be undertaken within any existing major, minor, area studies, or concentration program.

### The Process:

- Interested students, in consultation with three faculty sponsors from at least two departments, should present a detailed written proposal of their major (which has been signed by their faculty sponsors) to the Undergraduate Studies Advisory Committee no later than the Friday before the midsemester break of each semester up to the second semester of the sophomore year. One of the faculty sponsors should be identified as the chair of the supervising committee.

- Approval of the special major will be granted by the dean, on the recommendation of the Undergraduate Studies Advisory Committee. The committee will review the proposals and communicate their recommendations to the students before the preregistration period begins. As it deliberates, the committee may ask for additional information from the student, faculty sponsors and other colleagues in related areas to assist in further refining and rewriting the original proposal. It is the expectation that the on-campus portions of the major will rely heavily on existing courses.

- Special majors must culminate in a capstone essay or where appropriate, other work, which will be evaluated by more than one faculty member. (In most cases, it is assumed that the faculty evaluators will be the faculty sponsors). A detailed proposal of the capstone project must be submitted to the faculty sponsors by November 1 of the senior year. It is expected that a capstone essay will consist of between 30 and 50 pages (7,500–15,000 words).

- Changes in an individual program need the approval of the chair of the supervising committee and the dean. If students discover midstream that they are unable to complete the special major, it may be “dropped,” but they must then complete one of the traditional departmental majors. Retroactive proposals will not be considered. Thus, these programs should be well under way by the middle of the junior year.

- Administration of special majors will take place through the Office for Undergraduate Studies in a manner similar to that of the ALPP program; i.e., students will pick up their PINs in 104 O'Shaughnessy.

- The college council will periodically review the special major program.

## AFRICANA STUDIES

## Minors

Minors are five-course sequences that can either be departmental or interdisciplinary. The college has three categories of minors: Departmental, Interdisciplinary, and Area Studies.

### Departmental:

Africana Studies  
 Anthropology  
 Art History  
 Classical Literature  
 East Asian Languages & Cultures:  
   Chinese  
   Japanese  
 French and Francophone Studies  
 German  
 Greek  
 Greek and Roman Civilization  
 Irish Language and Literature  
 Italian  
 Japanese  
 Latin  
 Music  
 Portuguese and Brazilian Studies  
 Russian  
 Theology

For details, see the departmental descriptions in the section “Programs of Study.”

### Interdisciplinary:

Catholic Social Tradition  
 Education, Schooling, and Society  
 Gender Studies  
 Hesburgh Program in Public Service  
 Journalism, Ethics, and Democracy  
 Latino Studies  
 Liturgical Music Ministry  
 Medieval Studies  
 Peace Studies  
 Philosophy and Literature  
 Philosophy, Politics, and Economics  
 Philosophy Within the Catholic Tradition  
 Poverty Studies  
 Religion and Literature  
 Science, Technology, and Values  
 Technology, Business, and Society

### Area Studies:

African  
 Asian  
 European  
 Irish  
 Latin American  
 Mediterranean/Middle Eastern  
 Russian and Eastern European

## Electives

In addition to the University and college requirements and the major requirements, the balance of a student’s usual five-course-per-semester program consists of elective courses, which can be drawn from the offerings of any department or college that are open to non-majors who have met the necessary prerequisites.

## Africana Studies

### Chair:

TBA

### Joint Faculty:

Daren Davis, Professor, Department of Political Science  
 Hugh R. Page Jr., Dean, First Year of Studies;  
 Walter Associate Professor of Theology,  
 Department of Theology  
 Richard B. Pierce, John Cardinal O’Hara,  
 C.S.C., Associate Professor of History  
 Dianne Pinderhughes, Professor, Department of  
 Africana Studies and Political Science  
 Donald B. Pope-Davis, Vice President and  
 Associate Provost; Professor of Psychology,  
 Department of Psychology; Director of McNair  
 Scholars Program

### Affiliated Faculty:

Heidi Ardizzone, Assistant Professor,  
 Department of American Studies  
 Darren Davis, Professor, Department of Political  
 Science  
 Cornelius Eady, Associate Professor, Department  
 of English  
 Mark Hauser, Assistant Professor, Department of  
 Africana Studies  
 Antonette K. Irving, Assistant Professor,  
 Department of English  
 Cyrainna Johnson-Roullier, Associate Professor,  
 Department of English  
 Paulinus Odozor, Associate Professor,  
 Department of Theology  
 Hugh R. Page Jr., Associate Professor,  
 Department of Theology  
 Dianne Pinderhughes, Professor, Department of  
 Africana Studies and Political Studies  
 Gina V. Shropshire, Assistant Professional  
 Specialist, Mendoza College of Business  
 Ivy Wilson, Assistant Professor, Department of  
 English

### Adjunct Faculty

Jaquetta Page, Adjunct Visiting Professor,  
 Department of Africana Studies

The Department of Africana Studies at the University of Notre Dame is dedicated to the holistic and integrative study of people of African descent in the Americas and the global diaspora. Building on the legacy of the former African and African American Studies Program (1967–2005), the department emphasizes a cross-regional, cross-cultural perspective, a comparative analysis of and between different diasporan groups and the national and global contexts they inhabit. This multidisciplinary department seeks to explore the history, society, politics, economic development, philosophical, theological and theoretical perspectives, literature, arts, religions, and cultures of the peoples of Africa and the African diaspora. Its comparative and relational *foci* highlight the connections between culture, race, gender, class, nationality, and other categories of identity and experience.

The Department of Africana Studies aspires to become a center for academic and community activity, an innovative centerpiece for the University of Notre Dame, and an inventive leader in the national fields of African American, African diasporan, and African Studies. Undergraduates draw on a range of academic and community activities designed to stimulate intellectual inquiry, excellence in scholarship, and creative engagement. At the same time, the department serves as an important resource for graduate students, faculty, and staff across the University. Moreover, the department provides a paradigm for integrating the intellectual and spiritual missions of the University of Notre Dame through such programs as the *Erskine Peters Fellowship Program*, the *Institute for the Study of Religion and Culture in Africa and the African Diaspora*, the *Urban Research and Development Initiative*, and the *Communias Initiative*.

**Program of Studies.** Its pedagogical commitment is twofold: (1) to create a disciplined and rigorous intellectual environment within the study of the histories, literatures, languages, and cultures of African and Afrodiasporan peoples; and (2) to foster an appreciation of the richness, diversity, and complexity of the African American experience—particularly when it is viewed within national and global contexts.

The department seeks to create opportunities for dialogue, reflection, and social engagement within and beyond the classroom. Upon completion of all requirements, students will have received both a solid introduction to the discipline of Africana Studies and an appreciation of how it interfaces with other areas in the humanities, arts, social sciences, and theological disciplines. Critical inquiry and service learning are essential components of this studies program.

Africana Studies degree options for Notre Dame undergraduates consist of a supplementary major (24 credit hours of required course work, including a “capstone” experience consisting of a senior project or thesis) and an interdisciplinary minor (15 credit hours of required course work, with a subspecialty in literature, history, or social science).

### Major

Core Seminars 1–4 (12 credit hours)  
 Electives—Humanities, literature, social science, theology, or arts (12 credit hours)  
 Senior Capstone Experience—Methods course and supervised thesis (6 credit hours)

### Supplemental Major

Core Seminars 1–4 (12 credit hours)  
 Electives—Humanities, literature, social science, theology, or arts (6 credit hours)  
 Senior Capstone Experience—Methods course and supervised thesis (6 credit hours)

## AMERICAN STUDIES

**Minor**

Core Seminars 1–4 (12 credit hours)

Electives—Humanities, literature, social science, theology, or arts (3 credit hours) or Senior Capstone Experience—Methods course (3 credit hours)

**COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Africana Studies](#) heading.

*Concurrent Professor:*

Don Wycliff

*Adjunct Professors:*

Dick Ciccone, Matthew Storin

*Adjunct Associate Professor:*

Jack Colwell

*Administrative Assistant:*

Jolene Bilinski

**The Discipline.** Since its inception in the late 1930s, the discipline of American Studies has aimed to foster new understandings of America and its multiple peoples and cultures in a rapidly changing world. Its focus on the historical and intellectual underpinnings of the cultures, societies, religions, and politics of colonial America and the United States has continually returned to one central question: What does it mean to be an American? As the answers to this question have changed in response to demographic, economic, and political transformations, the discipline of American Studies has continually re-examined its methods and central questions. Shifting from an earlier emphasis on American uniqueness, or exceptionalism, American Studies has been for the past several decades the academic discipline most creatively and rigorously engaged in analyzing the complex and multi-layered expressions of American pluralism and diversity.

**Program of Studies.** American Studies offers interdisciplinary perspectives on American cultures and societies, American identities, and American political cultures and institutions. The curriculum introduces students to the major ideas and methods of the discipline, hones critical understandings of these methods in advanced courses, and ends with senior level seminars aimed at the highest level of research. To add stature and credibility to the major, a 6-credit Honors Track is offered, allowing exceptional students the opportunity to sharpen their critical abilities and improve their research techniques with an Honors Thesis.

Students are introduced to the themes and issues dominant in American Studies (AMST) in Introduction to American Studies, a 20000-level course taken at the sophomore level and intended as a gateway to the major. This required course, which explores key concepts, texts, and methods in American Studies and familiarizes students with the discipline's working vocabulary and practices,

is offered in both the fall and spring semesters, and must be taken before students can take AMST courses at the 30000 and 40000 levels. It may be taken concurrently with a 30000-level course in AMST, pending approval of a faculty advisor in American Studies.

The introductory course is followed by five different 30000-level courses in AMST, each of which continues to explore concepts, texts, and methods particular to the discipline of American Studies. These classes are divided into three different tracks: (1) American Cultures and Societies, (2) American Identities, and (3) American Political Cultures and Institutions. Students are required to take at least one 30000-level course in each one of these areas, and faculty advisors will help determine the particular track that courses fit. (In some cases, a course will fit more than one track). The three tracks are oriented toward the following questions and issues:

1. American Cultures and Societies  
How does the production, distribution, and consumption of expressive practices and forms—including novels, comic books, paintings, toys, ideas, movies, television programs, songs, and other artifacts from both elite and popular culture—reflect the diversity of American experience?
2. American Identities  
How has the United States' historic experience as a nation of people of diverse ethnic, racial, sexual, religious, and other identities shaped the varied processes by which Americans forge individual and group identities and claim rights to citizenship, and in turn transform the nation's collective identity?
3. American Political Cultures and Institutions  
How are governmental, economic, and civic institutions embedded within cultural frameworks, and how do they mediate relationships and contending claims among groups and individuals in the United States? Note: All journalism courses, including those that primarily focus on techniques, are placed in this track area.

In addition, AMST majors are required to take three OUTSIDE COURSES that are similarly oriented to the three tracks in the AMST major: (1) American Cultures and Societies; (2) American Identities; and (3) American Political Cultures and Institutions. Students are required to take one course in each of the three tracks. Specific outside courses that are included in these tracks, which are offered in a wide variety of departments and programs at the University of Notre Dame, will be found on lists regularly maintained in the AMST office. As with all courses, students must consult with their faculty advisors about registering for these courses, and once their advisor approves their course selections, the AMST administrative assistant will help students register for courses.

Finally, AMST majors complete their coursework with the Senior Seminar in American Studies, a required 40000-level course which serves as a capstone to the major.

## ANTHROPOLOGY

**Internships.** American Studies Internships provide opportunities for practical work experience under the supervision of a professional. Students spend nine to twelve unpaid, supervised hours per week on the job, the hours to be arranged between the student and the “employer.” Students much arrange their academic schedules to allow large chunks of time for their internship experience, such as entire days or half-days.

**American Studies Major Requirements:** Students must complete the general requirements of the College of Arts and Letters and 30 credit hours in American Studies, with at least seven courses taken in AMST and three courses taken in outside departments that fit within the required AMST tracks:

Major Requirements (course level)	Credits
Introduction to American Studies (20000)	3
5 Upper-Level AMST Courses (30000)	15
Senior Seminar in AMST (40000)	3
3 Outside Courses (30000 or 40000)	9
Total:	30

**American Studies Honors Program:** Majors with a GPA of 3.7 or above in American Studies courses and who wish to undertake a more intensive and extensive program of study in the major are invited to apply to the American Studies Honors Program. The application is a two stage process beginning with an initial letter of intent. In stage one, the department will extend a notification of invitation to all sophomore students by the first week of March. Interested students who meet the Program's GPA requirement of 3.7, or who have a reference from an American Studies faculty member are encouraged to submit a letter of intent which will include the following: a statement of interest in joining the Honors Program, the name of an American Studies faculty member who can serve as a reference, and a paragraph that suggests or describes in brief a possible thesis topic. The letter of intent is due by the end of April. Stage two of the process involves a more formal application and is due by April 15 of the student's junior year. The completed application will include the following: a two-page statement of purpose describing the proposed research and thesis project, a one-page initial bibliography of primary and secondary sources, a C.V. (resumé), a critical writing sample from an American Studies class, the names of two American Studies faculty members who have agreed to serve as references, and an unofficial transcript. While the department encourages students to sign up for the Honors Program by the end of their sophomore year, juniors who missed the stage one process of the application but discover a strong interest in writing an honors thesis are encouraged to complete the stage two formal application.

Honors students will be required to take 36 credits in the major, rather than the usual 30. The thesis project, which is conducted during the student's senior year consists of 6 credit hours (3 for the

independent research seminar and 3 for the thesis). Honors students are expected to fulfill all the requirements for the major. Failure to maintain a satisfactory GPA, to attend the Ccolloquium, or to produce a thesis will result in dismissal from the Honors Program.

In the junior year, students will be asked to participate in a zero-credit Honors Colloquium, in which they will be introduced to the American Studies and other affiliated faculty, a range of American Studies research areas. Students will also be required to participate in the ongoing American Studies colloquia series.

In the senior year, honors students will continue to participate in the American Studies colloquia series and will be encouraged to choose classes from a range of capstone courses offered within the department and its cognate fields. Seniors will also take a 6-credit Honors Thesis course that will consist of a 3-credit independent study with a faculty advisor in the fall semester, and a 3-credit thesis writing course in the spring.

The main focus of the Honors Program is the Honors Thesis, an intensive critical study (of approximately 40-plus pages) that students write during their senior year under the direction of an American Studies faculty advisor of their selection. The research project may be one of the following: scholarly paper; narrative nonfiction essay; journalistic article (or series of articles exploring a related topic); museum exhibition accompanied by a written paper of at least 15 pages. Topics that do not necessarily fit into these areas may be proposed to the Honors Program Committee. The Senior Honors Thesis project is generally supervised by a teaching and research faculty member from American Studies. Occasionally, a faculty member from a designated American Studies cognate department may direct a thesis project. The Honors Thesis Project must have a committee that includes a designated director and at least one additional reader. The director assigns the final grade with the agreement of the committee. The final grade is a compilation of the entire Honors project and not just a reflection of the finished thesis.

The Honors Program timetable is as follows:

#### Sophomore year

Invitations sent to students near end of year  
Stage one application/letters of intent reviewed, notifications sent by early summer

#### Junior year

Honors colloquium—both semesters  
Stage two, formal applications submitted by April 15. Applications reviewed, notifications sent by end of semester

#### Senior year

Honors colloquium—both semesters  
Independent study with advisor—fall semester  
Thesis writing course—spring semester  
Thesis due—late spring  
Public presentation of thesis—late spring

## Anthropology

#### Chair:

Mark R. Schurr

#### Edmund P. Joyce Professors of Anthropology:

Roberto A. DaMatta (emeritus); James J. McKenna

#### John Cardinal O'Hara, C.S.C., Assistant Professor of Anthropology:

Donna Glowacki

#### Professors:

Leo A. Despres (emeritus); Agustín Fuentes; Carolyn Nordstrom; Carl W. O'Neill (emeritus); Irwin Press (emeritus); Lawrence Sullivan (concurrent)

#### Associate Professors:

James O. Bellis (emeritus); Susan D. Blum; Douglas E. Bradley (concurrent); Meredith S. Chesson; Rev. Patrick D. Gaffney, C.S.C.; Ian Kuijt; Joanne M. Mack (concurrent); Cynthia Mahmood; Kenneth E. Moore (emeritus); Mark R. Schurr; Susan G. Sheridan

#### Assistant Professors:

Maurizio Albahari; Jada Benn-Torres; Daniel H. Lende; Vania Smith-Oka

#### Director of Undergraduate Studies

Deborah L. Rotman

#### Adjunct Associate Professor:

Robert Wolosin

#### Adjunct Assistant Professor:

Rahul Oka

**Program of Studies.** The undergraduate program in anthropology is designed to provide each student with a broad, holistic, integrated and species-wide perspective on contemporary human behavior. Anthropology may be the only major that provides significant intellectual and professional links with the humanities and other social science fields, while also providing separate bridges into both the natural sciences and the field of business. In so doing the anthropology major prepares students for successful entry into any number of fields and disciplines and their appropriate professional graduate schools including medical schools, public health, and law. Human evolutionary models, critical comparative analysis, ethnographic methods, and a variety of developmental approaches are taught and applied in our classes to such diverse topics and research areas as: health; illness; addiction; human communication (verbal and non-verbal); human origins; the nature of social groups; the family; worldwide political and socio-economic systems; religion; warfare; infancy and childhood; non-human primate ecology and behavior; archaeology, prehistory, and ethnology; sexuality; museum studies; evolutionary medicine; transnationalism; sex and gender; and medical anthropology. Geographic specialities of the faculty include China, Southeast Asia, North America, Latin America, Russia, Italy, Ireland, Egypt, Central and Southern Africa, and the Middle East.

In moving toward our goal to achieve national prominence as one of the top undergraduate

## ANTHROPOLOGY

research and teaching departments in the nation, our faculty stress the importance of innovative and significant undergraduate research. We aim to provide as many majors as is possible with hands-on research experiences both in the field and laboratory. Two Smithsonian and two Chicago Field Museum summer research internships created by the department are available to majors. The department also administers a summer research experience at the Touching Tiny Lives Safe Home in Lesotho, Southern Africa. It is common that, throughout the school year and summer the faculty pair up with students to conceptualize and work together on research projects both here and abroad. Often this collaborative research leads to joint publications. Our undergraduate students receive many undergraduate research awards from the University and regularly attend national professional meetings and stand alongside graduate students and professors from around the nation to present the results of their research. Our anthropology minors also participate to a high degree.

Aside from its applicability and relevance across different disciplines, professions, and careers, one of the truly unique aspects of anthropology is that it changes in a most profound and insightful way the manner in which our students experience and come to interpret their own lives. The subject of anthropology is, of course, humankind as viewed not through a local lens limited by the biases or world view of one's own culture, but by a view that attempts to reconcile and understand the intersecting and sometimes conflicting, yet, often logical alternative ways by which our fellow human beings live and think.

Perhaps it is the result of this very personal encounter, experienced alongside exposure to the very best scholarship, that permits our anthropology students to connect so easily and successfully with the diverse professional communities. This relative fluidity by which our graduates make the transition into so many diverse fields, the knowledge and skills gained by studying anthropology, in addition to providing keen insights into others, enriches one's understanding of one's self. In this way anthropology maximizes the chances of personal achievement and self-fulfillment, and proves a surprisingly powerful beginning point for just about any career.

**Writing-Intensive Requirements:** All courses taught in the department include writing components, which are both informal and formal and vary by course level. These assignments may include response papers, journals, in-class writing, analyses, field research, or research papers. Courses offered in anthropology develop both critical thinking skills and global awareness through written and other assignments. Every major is required to take an advanced theory seminar (ANTH 40400, Perspectives in Anthropological Analysis) where they develop analytical and synthetic skills through

intensive writing assignments combined with class discussion.

### PROGRAMS

For the classes of 2009 and 2010:

1. **The Major.** There are no prerequisites to the major. **The major requires 27 credits, nine of which must be in the sequence of fundamentals, including ANTH 30101 (Fundamentals of Biological Anthropology), ANTH 30102 (Fundamentals of Archaeology), ANTH 30103 (Fundamentals of Social and Cultural Anthropology), and ANTH 30104 (Fundamentals of Linguistic Anthropology).** In addition, majors must take ANTH 40400 (Perspectives in Anthropological Analysis), one methods course (3 credits), and 12 credits of electives. **At least six credits of the electives must be at the 40xxx level.** It is recommended that students take the fundamentals by the end of their sophomore year, whereas ANTH 40400 is usually taken as a junior or senior.

2. **The Honors Track.** The honors track requires 33 credits. In addition to the above program, the honors student will take one additional methods course (3 credits) and one additional 40xxx-level course (3 credits) taken in the senior year, which satisfies the honors experience.

3. **The Minor.** The minor requires 15 credit hours. There are no prerequisites. Students must take three of the four fundamentals, ANTH 30101, 30102, 30103, and 30104. In addition, students must take six credits of electives.

Courses taken for pass-fail credit will not satisfy requirements for the major, the honors track, or the minor.

For the classes of 2011 and beyond:

1. **The Major.** There are no prerequisites to the major. **The major requires 30 credits, nine of which must be in the sequence of fundamentals, including ANTH 30101 (Fundamentals of Biological Anthropology), ANTH 30102 (Fundamentals of Archaeology), ANTH 30103 (Fundamentals of Social and Cultural Anthropology), and ANTH 30104 (Fundamentals of Linguistic Anthropology).** In addition, majors must take ANTH 40400 (Perspectives in Anthropological Analysis), one methods course (3 credits), and 15 credits of electives. **At least six credits of the electives must be at the 40xxx level.** It is recommended that students take the fundamentals by the end of their sophomore year, whereas ANTH 40400 is usually taken as a junior or senior.

2. **The Honors Track.** The honors track requires 36 credits. In addition to the above program, the honors student will take one additional methods course (3 credits) and one additional 40xxx-level course (3 credits) taken in the senior year, which satisfies the honors experience.

3. **The Minor.** The minor requires 15 credit hours. There are no prerequisites. Students must take three of the four fundamentals, ANTH 30101, 30102, 30103, and 30104. In addition, students must take six credits of electives.

Courses taken for pass-fail credit will not satisfy requirements for the major, the honors track, or the minor.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Anthropology](#) heading.

Courses in which graduate students may enroll and for which graduate credit may be obtained are at the 40000 level. Special requirements are made of graduate students who enroll in these courses.

## ART, ART HISTORY, AND DESIGN

## Art, Art History, and Design

### Chair:

Charles E. Barber

### Professors:

Charles E. Barber; Rev. Austin I. Collins, C.S.C.; Dennis P. Doordan; William J. Kremer; Kathleen A. Pyne; Charles M. Rosenberg; Maria C. Tomasula

### Associate Professors:

Robert R. Coleman; Jean A. Dibble; Paul A. Down; Rev. James F. Flanigan, C.S.C.; Richard L. Gray; Martina A. Lopez; Rev. Martin Lam Nguyen, C.S.C.; Robin F. Rhodes; Robert P. Sedlack

### Assistant Professors:

Nyame O. Brown; Danielle Joyner; Terri Weissman

### Associate Professional Specialists:

Ann-Marie Conrado; John F. Sherman

### Concurrent Assistant Professors:

Douglas E. Bradley; Stephen R. Moriarty

**The Department.** The Department of Art, Art History, and Design at the University of Notre Dame, as part of the College of Arts and Letters, is dedicated to the liberal education of the whole person. The art and design student, guided by an active faculty, can expect to become critically aware of the rich artistic past and challenged to become a thoughtful maker of contemporary visual expression. The art history student, under the tutelage of an expert faculty, will achieve a broad and evaluative knowledge of the art of the Western world. An active lecture and visiting artist series and the extensive collections of the Snite Museum of Art strengthen and broaden the work in the classroom and studio. The South Bend and Chicago areas provide additional cultural activities and experiences.

The department has 13 visual art and design and seven art history faculty. The student may pursue one of three degrees at the undergraduate level: the bachelor of arts (B.A.) in studio art and design or a B.A. in art history, or the bachelor of fine arts (B.F.A.) in studio art and design. Studio concentrations are offered in ceramics, design, painting, photography, printmaking and sculpture. The size of the department enables the serious student to receive a solid foundation and, through personal contact with the faculty, to develop a creative individual direction in a discipline. The department is further enriched by an active graduate program offering the M.F.A. degree in studio art and design and the M.A. degree in art history.

The art history classrooms and the art image library are housed on the first floor of O'Shaughnessy Hall. Offices for the art history faculty are in Decio Faculty Hall. The departmental office is in Riley Hall, as are the art and design faculty studios. Riley Hall also houses all the visual arts activities in well-equipped studios that are always available for student

use. Skilled technical staff and support facilities are available as appropriate for each medium that is offered.

**Writing-Intensive Requirement:** The Department of Art, Art History, and Design fulfills the College of Arts and Letters writing-intensive requirement by requiring all majors in each of the three departmental areas (ARST, DESN, and ARHI) to enroll in at least one upper-level (3xxxx or 4xxxx) art history course. All upper-level ARHI courses include a writing component that satisfies the College of Arts and Letters writing-intensive requirement.

### THE STUDIO ART AND DESIGN MAJOR

#### Bachelor of Arts Degree in Studio Art and Design

The bachelor of arts degree program in art and design is defined as a general liberal arts degree. The B.A. degree is ideal for the student who desires a liberal education with a strong emphasis in art. Students enrolling in the B.A. degree program are required to complete a five-course core curriculum during their first three semesters. These courses are Drawing I, 2-D Foundations, 3-D Foundations, one course treating material from before 1600 taught by a regular full-time art historian in the department, and one course that treats material from after 1600 taught by a regular full-time art historian in the department. Students are not required to select a major concentration for the B.A. degree, but some focus of study is encouraged. The B.A. degree consists of 36 hours in art and design, of which 27 are in studio and nine in art history.

#### Bachelor of Fine Arts Degree in Studio Art and Design

The bachelor of fine arts degree program in art and design is intended for the student who wishes to pursue a professional career in the visual arts. The program is organized into a four-year sequence of study that provides a solid understanding of art and art history. The student has an opportunity to explore a variety of curricular options and then chooses an intensive and professional major concentration. In addition to a primary concentration, B.F.A. students are encouraged to select a secondary area of interest to broaden their thinking and to enrich their creative study. B.F.A. candidates share a close working relationship with the department's faculty who are active professional artists and designers. Intensive studio work is complemented by an academic education with strong art history and liberal arts component. The B.F.A. degree consists of 66 credit hours in art, of which 54 are in studio and 12 in art history.

#### B.F.A. Freshman and Sophomore Years

Students beginning in the program are required to complete a seven-course studio core curriculum during their first two years. Five of these courses are mandated: Drawing I, Figure Drawing, 2-D

Foundations, 3-D Foundations and Photography I. The remaining two studio courses are optional, based on the student's interest. This intensive curriculum establishes a base for the studio practices and principles for all visual art expression. At the end of the fourth semester, students who have earned a minimum 3.25 grade point average in their studio courses will be accepted as candidates for the B.F.A. degree. Students who do not qualify are eligible for the B.A. degree. B.F.A. candidates are waived from the second history/social science requirement and the University fine arts requirement.

#### B.F.A. Junior and Senior Years

Students accepted into the B.F.A. program begin a two-year primary concentration in one of the following studio areas: ceramics, graphic design, industrial design, painting, photography, printmaking, or sculpture. The concentration requires 15 hours of study in a major concentration area during the last four semesters. Teaching in the major is highly individualized and stresses the creative development and preparation of the student for the professional world. In addition to pursuing a concentration, all B.F.A. majors must enroll in the B.F.A. Seminar and the Senior Thesis Course. The culmination of the B.F.A. degree is the completion of a senior thesis. This two-semester senior project, directed by a faculty member, will be exhibited and approved by the faculty as a requirement for graduation.

### STUDIO ART AND DESIGN CONCENTRATIONS

#### Ceramics Concentration

Ceramics is a concentration emphasizing clay and glaze as the primary vehicles for expression. Traditional pottery, vessel making, and sculpture may be addressed through a variety of processes that include hand-building, throwing, and casting. Students are encouraged to develop technical skills and a direction of their own choosing. In addition to traditional ceramic materials and processes, students will be encouraged to study and utilize other sculptural media, as well as become familiar with contemporary and historical source material that will inform their own directions in ceramics.

#### Design Concentration

Design is the order of form and the control of function. It is what designers do. Humans are conditioned to assess and select commodities on the basis of appearance and textural input, accepting or rejecting information and material goods according to subtle visual cues. The power of seduction resulting from skillfully manipulated design can do more than attract interest or manipulate perception. It can enable people. Good design and careful planning can promote understanding, simplify use, improve safety, instill confidence, add value, and salvage faltering economies. Undergraduate design education begins at Notre Dame with the utilization of campus facilities through a liberal arts curriculum. This social, philosophical, critical, ethical, and historical experience helps build a foundation of cultural

## ART, ART HISTORY, AND DESIGN

understanding that naturally informs the creative and problem-solving methods required by designers.

Responsible designers aspire to conceive objects with a sensitivity for human need, human aspiration, and the functional requirements for both implementing and producing made objects. At its best, design serves a community that includes industry, marketing, consumer, and the environment.

Design has been part of the curriculum at the University of Notre Dame since the early 1950s. Here design students share the advantages of a campus that is rich in contemporary technology and still retains a deep appreciation for a heritage of traditional human values and wisdom. Technically advanced lecture rooms and digital labs support all student design activities. An on site 18-station Mac Lab, a 10-station Surface Modeling PC Lab, a high performance Digital Imaging Studio, and wireless access are all supported by the vast network of software access and services from Notre Dame's Office of Information Technologies. Two model fabrication shops allow pattern making activities leading to "on site" processing that ranges from plastic molding to foundry casting. Intermediate- and advanced-level undergraduate students share an energized design community with defined studio space located in close proximity to all studio fine arts, art history, and exhibition galleries.

### Graphic Design

At its most basic level, graphic design is a creative process that combines the visual arts and technology to communicate ideas. It begins with a message that, in the hands of a talented graphic designer, is transformed into visual communication that transcends mere words and pictures. By controlling color, type, movement, symbols, and images, the graphic designer creates and manages the production of visuals designed to inform and persuade a specific audience. By combining aesthetic judgment with project management skills, graphic designers develop visual solutions and communications strategies. The professional designer works with writers, editors, illustrators, photographers, code writers, and printers to complete compelling designs that effectively communicate a message.

At Notre Dame, the undergraduate graphic design curriculum begins with a foundation in the liberal arts. Such a basis is a design student's best path to meet and solve the varied communication challenges inherent in today's complex world. Because a design solution may emerge from the humanities, an algorithm, or a scientific discovery, the curriculum provides a student with the opportunity to be firmly grounded in the fundamentals of design and the visual arts, while also taking courses in science, math, history, philosophy, and theology. As students progress through the tiered design program, they develop as a designer, as an intellectual, and as a moral person, prepared to address the social, ethical,

and political circumstances influenced by the design profession.

At its core, the Notre Dame graphic design program asserts that the designer can make a difference not only in the strategic plan of a business but also in the world. During their time on campus, students develop projects that aspire to positively influence the lives of culturally diverse people, critique the ethical dimensions of contemporary culture, and give visual form to complex social issues. As design professionals, Notre Dame graduates will be responsible for the future of our visual culture.

### Industrial Design

Industrial designers give form to virtually all mass-manufactured products in our culture. They seek opportunity and advantage through identifying and solving problems. Their creative contributions impact the utility, appearance, and value of our tools and environment. Their most innovative solutions lie at an intersection of what is knowable and what is possible.

The industrial design profession demands excellent organizational skills, an awareness of visual and tactile aesthetics, human behavior, human proportion, material, process, and the responsible appropriation of resource, during and after use. Designers express conceptual proposals through a combination of well-developed drawing, physical modeling, computer modeling, writing, and verbal skills. Designers best serve the consumer through sensitive and innovative collaboration with art, science, engineering, anthropology, marketing, manufacturing, and ecology. Properly implemented, industrial design affords greater benefit, safety, and economy to all participants and recipients impacted by the product development cycle.

All students access local Mac and PC computer support from a campus server, a local wireless network, projection-equipped classrooms, and input/output facilities that include on-site multiple (high-quality) large and intermediate size format printing. Basic shop facilities are complemented by access to rapid prototyping, available in the College of Engineering. Notre Dame's Industrial Design Program (NDID) is accredited by the National Association of Schools of Art and Design (NASAD) and maintains student chapter affiliation with the Industrial Designers Society of America (IDSA). NDID interacts with regional, national, and international corporate design and consulting offices in the form of annual conferences, sponsored projects, field trips, and internships.

### Painting Concentration

Painting, with its many traditions, is a medium put to an extraordinary diversity of contemporary uses. Capable of representing everything from the material to the intangible, painting continues to be a means for artists of vastly different interests to address their subjects in highly individual ways. The painting concentration at Notre Dame fosters the aesthetic,

critical, and technical development of each student through a program of course work, independent study, and regular critiques. Emphasis is placed on being well-versed in contemporary critical issues, on articulating individual themes, and on developing the technical means to give visual form to thematic concerns.

### Photography Concentration

Photographs mediate our involvement with the physical world, taking place at the intersection between art, culture, and our own individual perceptions. The concentration in photography is committed to educating artists in a world where photographic imagery and new media representations pervade our everyday experience. From foundation work through graduate studies, courses are designed to inform students about photographic traditions while engaging them in issues and methodologies of contemporary art. The photography program seeks to facilitate growth and development of the art student through a range of courses dealing with aesthetic, historical, and critical concerns. Students have the opportunity to develop the necessary technical skills needed for professional work. The curriculum incorporates digital imaging technologies that have expanded and redefined our understanding of photographic practice.

### Printmaking Concentration

The printmaking concentration emphasizes a manner of thinking and the making of images that the print media will allow and will encourage. As the student becomes familiar with the various matrixes, techniques, and technologies of photolithography, intaglio, relief, screenprint, papermaking, and the making of books, the methods of developing images and ideas are taught concurrently. Exploration and experimentation in all of the print media are encouraged, including digital art and all other forms of reproducing an image. The courses are designed to progressively develop skill, creativity, personal imagery, and knowledge of relevant current issues. Advanced students work on a professional level by creating a cohesive body of work.

### Sculpture Concentration

Sculpture today encompasses diverse materials and contexts for the expression of ideas in space. Within this broad description, students are encouraged to develop the technical skills that will help them expand their ideas into thoughtful individual expression. We embrace a breadth of vision and experience which will challenge the student to investigate and respond to contemporary issues through problem-solving. A full range of traditional and non-traditional media are available in specific courses and through individual mentoring. By blending required and elective courses and independent study, students can experience a curriculum that responds to their particular needs and direction.

## CLASSICS

## THE ART HISTORY MAJOR

Notre Dame's art history major is designed to equip our students with a broad overview of the development of Western art and to provide them with an in-depth knowledge of particular periods, problems, and research methods. The diversity and scholarly strength of our faculty and the research facilities of the Hesburgh Library, including the Medieval Institute, are supplemented by the rich resource of the Snite Museum of Art. With a permanent collection of over 21,000 works, the Snite Museum not only gives our students an invaluable firsthand acquaintance with important examples from all periods and many cultures—including distinguished collections of old master drawings, 19th- and early-20th-century photographs, and Pre-Columbian art—but also provides a wide range of opportunities for our students to gain practical museum experience in both volunteer and paid positions.

The University of Notre Dame offers a 33-hour Honors Program, a 30-hour first major, a 24-credit-hour supplementary major in art history, and a 15-hour minor. These degrees are intended not only for students who are already intent upon pursuing a career in an art museum or gallery or as a college or university professor, but also for those individuals who simply wish to learn more about Western civilization through the examination of some of its most beautiful, provocative, and informative objects.

Art history first majors are required to take the Theories of Art seminars. In addition, the department offers courses in four areas of Western art: ancient, medieval, Renaissance and baroque, and modern (19th and 20th centuries). An art history major must take at least one course in each of these areas. It is strongly recommended that the four-course distribution requirement be fulfilled with 20xxx or 30xxx level introductory courses taught by regular art history faculty on campus. Students must also have taken a minimum of two seminars in addition to Theories of Art. The Theories of Art seminar should be taken in either the junior or senior year.

## Art History Honors

First majors with a grade-point average of 3.667 or above in art history courses may petition the faculty for permission to enter the Art History Honors Program. This request must be made by the 10th week of the spring semester of the student's junior year. The honors program will normally consist of 33 hours, as compared to 30 hours in the regular first major. Students who enter the honors program must enroll for six hours of Honors Thesis credit, taking three hours in the fall semester of their senior year and three hours in the spring semester of their senior year. Students who earn an A- or better on their Honors Thesis will be entitled to Honors in Art History.

Students wishing to complete a second major in art history should take one course in each of the four

departmental areas, an art history seminar, and three electives in art history. It is strongly recommended that the four-course distribution requirement be fulfilled with 20xxx- or 30xxx-level introductory courses taught by regular art history faculty on campus.

Students wishing to minor in art history can do so by taking five art history courses (15 credit hours total). At least one of these courses must treat material prior to 1600, and at least one must treat material from 1600 to the present.

Courses taken for the second major or the minor cannot be counted in more than one university program.

Over the last 10 years, our undergraduate majors have presented scholarly papers at conferences throughout the Midwest; held prestigious summer internships in museums in New York, Washington, Chicago, and Baltimore; found employment in galleries and museums; and pursued graduate work at Columbia, Berkeley, Cornell University, Yale University, the University of North Carolina-Chapel Hill, the University of Virginia, the University of Texas, and the University of Michigan, among other institutions.

## COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Art, Art History, and Design](#) heading.

## Classics

## Chair:

Elizabeth F. Mazurek

*Eli J. and Helen Shaheen Professor of Classics:*

Keith R. Bradley

*Rev. Theodore M. Hesburgh, C.S.C., Professor of Arts and Letters:*

Sabine G. MacCormack

## Professors:

Joseph P. Amar (Arabic); Daniel J. Sheerin (emeritus)

## Associate Professors:

Asma Afsaruddin (Arabic); W. Martin Bloomer;

Elizabeth Forbis Mazurek; Li Guo (Arabic);

Brian A. Krostenko; David J. Ladouceur;

Hildegund Mueller; Catherine M. Schlegel

## Concurrent Associate Professors:

Blake Leyerle; David O'Connor; Robin Rhodes

## Assistant Professors:

Christopher Baron; Isabelle Torrance

## Visiting Instructor:

Aram Shahin (Arabic)

## Assistant Professional Specialists:

Tadeusz Mazurek; Abdul-Massih Saadi (Arabic)

**The department.** The Department of Classics offers courses in the languages, literatures, archaeology, history, religions, and civilization of the ancient world. Cooperation with other departments of the college makes available to Classics students additional courses in the art, philosophy, and political theory of antiquity. Visit us online at [classics.nd.edu](http://classics.nd.edu).

The department also provides the administrative home for the programs in the languages and cultures of the Middle East.

## MAJORS IN CLASSICS

Classics majors encounter at their sources the perennial cultures of Greece and Rome, cultures that continue to exercise a profound influence on Euro-American civilization. Classical training imparts enhanced skills in close reading and analysis of literary and rhetorical forms, as well as repeated experience of the integration of literature, history and ancillary studies. Thus, a major in Classics provides the archetypal humanistic education and an ideal preparation for entry into any of the professions that require mastery of language, close analysis of documents and integration of multiple details.

The lower-level courses equip the student with rudimentary knowledge of languages and with a conspectus of ancient history and culture. Advanced courses in Latin and Greek literature and Ancient Civilization provide opportunities for more focused and detailed study and are conducted in a seminar format with emphasis on research and writing.

In addition to the other University requirements, students majoring in Classics will, under normal circumstances, complete at least 10 courses in one of two areas of concentration: Classics or Greek and Roman Civilization.

## CLASSICS

**Classics Major**

5 courses in Greek or Latin language/literature: 20003 and above*	15
2 courses in non-primary language (Greek or Latin)	6
1 course in Greek or Roman History	3
2 Classics courses in English	6
	<hr/> 30

\*Students will typically choose one of the two classical languages, ancient Greek or Latin, in which to fulfill the language requirement at the advanced level. They will be required to take at least two semesters in the other language at the appropriate level. If students have sufficient background in both languages, it should be possible for them to complete the requirements of the major through a combination of intermediate and advanced courses in both languages, as long as the total number of language courses equals seven (21 credit hours) for the first major and five (15 credit hours) for the supplementary major.

Supplementary majors in Classics will be exempt from the two courses in the second classical language.

**Greek and Roman Civilization Major**

The History of Ancient Greece	3
The History of Ancient Rome	3
Greek Literature and Culture	3
Roman Literature and Culture	3
Six Classics courses in English or Greek and Latin language offerings*	18
	<hr/> 30

\*Students will be strongly encouraged, but not required, to include some language study in their six elective courses.

Supplementary majors in Greek and Roman Civilization will be required to take four elective CLAS courses in translation or Greek and Latin offerings.

**MINORS IN CLASSICS**

Minors provide students majoring in other areas with structure and certification for a variety of approaches to the study of Greek and Latin language, literature, and civilization.

**Latin Minor**

The Latin Minor provides a solid grounding in the philological and literary study of Latin texts of the classical period, or, for those who prefer, of Christian Latin literature. It consists ordinarily of five courses (15 hours) in Latin: (1) Intermediate Latin or its equivalent; (2) Reading and Writing Latin Prose; (3–5) three courses to be chosen from Latin courses at the 30xxx/40xxx level. Students interested in later Latin texts are directed to the joint offerings of the department and the Medieval Institute.

**Greek Minor**

The Greek Minor provides a solid grounding in the philological and literary study of Greek texts of the classical and Hellenistic periods. It consists ordinarily of five courses (15 hours) in Greek: (1) Intermediate Greek, or equivalent; (2) Reading and Writing Greek Prose; (3–5) three courses to be chosen from Greek courses at the 30xxx/40xxx level.

**Classical Civilization Minor**

The Classical Civilization Minor provides a broadly based orientation to the history and civilization of the classical world. It consists of five courses, three of which are required: The History of Ancient Greece, The History of Ancient Rome, and Greek and Roman mythology. The remaining two courses may be chosen, with departmental approval, either from CLAS courses, whether offered by the department or cross-listed by other programs, or from Greek and Latin language courses above the introductory level.

**Classical Literature (in Translation) Minor**

The Classical Literature in Translation Minor provides a broad experience of Greek and Latin literature studied in English translation. It consists of five courses, three of which are required: Greek Literature and Culture, Latin Literature and Culture, and either Greek and Roman Mythology or Classical Epic or Greek Tragedy. The remaining two courses may be chosen, with departmental approval, either from CLAS courses, whether offered by the department or cross-listed by other programs, or from Greek and Latin courses above the introductory level.

**PROGRAM IN SEMITIC LANGUAGES**

The program in Arabic offers a full range of courses in Modern Standard Arabic, and is geared toward proficiency in speaking, reading, and writing. Courses in Middle East history, culture, and religion complement the language component and give students the opportunity for a broad-based and comprehensive understanding of the Arab world.

**MAJOR IN ARABIC**

A total of 30 credit hours distributed in the following areas:

6 courses in Arabic	18
1 course in literature, taught by the Arabic faculty	3
1 course in Middle East history	3
1 course in Islam	3
1 elective, subject to departmental approval	3

**MINOR IN MEDITERRANEAN/MIDDLE EAST STUDIES**

Joseph P. Amar, director

An interdisciplinary focus defines this broad-based program that encourages a multidimensional approach to the Mediterranean world. This is achieved through a wide variety of courses and activities offered by departments that study southern Europe, North Africa, or the Middle East.

While language courses may serve as a component of the minor, students are offered opportunities to view the region in its full historical, cultural, and political context. In this way, students are given the opportunity to assemble a course of studies that best reflects their own interests.

Typical areas of focus might include the rich culture that developed in southern Spain as a result of the Christian, Muslim, and Jewish interactions there; the impact of the French language and culture on North Africa and the Middle East; or the contemporary Israeli-Palestinian conflict.

**Requirements:** (1) four courses of the student's choice that relate to the region of southern Europe, North Africa, or the Middle East; (2) a final research thesis that integrates course work and other activities related to the student's particular area of focus. For information regarding applicable courses in a given semester, contact Prof. Joseph P. Amar, the Department of Classics, 631-6276.

**SYRIAC STUDIES**

Syriac is a form of Aramaic that was the literary language of Jews and pagans in western Asia before expanding to become the common dialect of Aramaic-speaking Christians throughout the region. Early literature in Syriac preserves sustained evidence of the distinctive character of Aramaic-speaking Christianity that is largely unhellenized and that reflects the linguistic and cultural milieu of first-century Palestine.

Syriac literary culture reveals mutual and parallel dynamics in the development of Syriac Christianity and the emergence of Rabbinic Judaism. The study of Syriac is likewise of pivotal importance to an understanding of the thought-world of the pre-Islamic Middle East, the established Christian and Arab populations of the region, and the emergence of Islam in the seventh century.

Syriac language courses are offered in the summer. Consult the *Bulletin of Information, Summer Session* or online at [classics.nd.edu](http://classics.nd.edu).

**COURSE DESCRIPTIONS**

Current course descriptions are available online at [classics.nd.edu](http://classics.nd.edu). The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Classics](#) heading.

## East Asian Languages & Cultures

### *Chair:*

Dian H. Murray

### *Research Professor:*

Robert M. Gimello

### *Professor:*

Dian H. Murray

### *Visiting Professor:*

Seung-Gook Yang

### *Associate Professors:*

Michael C. Brownstein; Liangyan Ge; Lionel M.

Jensen; Sylvia Li-Chun Lin; Xiaoshan Yang

### *Assistant Professor:*

### *Visiting Assistant Professional Specialist:*

Yi He

**Mission Statement:** The peoples of East Asia comprise one quarter of the world's population and account for a similar proportion of the world's production and consumption. This, along with the contemporary fusion of Asia and the West politically and economically, makes knowledge of the diverse languages and cultures of East Asia vital to an understanding of our global community and indispensable for the preparation of careers in the Pacific Rim. The Department of East Asian Languages & Cultures provides the resources and instruction necessary for success in these areas. The department is dedicated to providing rigorous language training in Chinese and Japanese, as well as courses taught in English on Chinese and Japanese philosophy, religion, literature, and culture. Complementary courses in other disciplines are listed in this *Bulletin* under departments such as history, philosophy, theology, political science, economics, and anthropology.

Completion of First-Year Chinese, Korean, or Japanese (10 credits) will satisfy the language requirement for both the College of Arts and Letters and the College of Science. Although the College of Business does not have a language requirement, it strongly supports integration of language courses into its curriculum and encourages students to participate in the International Study Programs (See "International Study Programs" under Mendoza College of Business).

**Placement and Language Requirement.** Students who wish to enroll in a Chinese, Korean, or Japanese language course beyond the 10111 or 10112 level must take a placement examination administered by the Department. Students testing out of 10xxx-level language courses must complete at least one course at the 20xxx level or higher to satisfy the language requirement.

### PROGRAM IN CHINESE

The program in Chinese offers language classes in Mandarin Chinese at the beginning, first-, second-, third-, and fourth- and advanced-year levels, as well as courses in English on classical and modern Chinese literature and culture. Qualified students also have the opportunity to attend East China Normal University in Shanghai, and Peking University in Beijing, People's Republic of China.

The Chinese program offers first and supplementary majors and a minor.

**Basic requirements:** For the major, students must complete 30 credit hours, including third-year Chinese. For the supplementary major, students must complete 24 credit hours, including third-year Chinese. For the minor, students must complete 15 credit hours, including two semesters of language classes beyond the first-year. 10xxx-level language courses and University seminars on China-related topics do not count toward the major, supplementary major, or minor.

**Other requirements:** In addition to the language course requirements described above, all majors and minors must take one course in Chinese literature, which must be taught by a departmental faculty member. Remaining credit hours may be satisfied by taking additional Chinese language and literature courses, or other East Asia-related courses approved by the academic advisor.

### THE HONORS TRACK IN CHINESE

Majors in Chinese are strongly encouraged to pursue the honors track. Those who are interested must meet the following criteria:

1. Fulfillment of all the requirements for a first major of 30 credit hours in either Chinese or Japanese;
2. A cumulative GPA of at least 3.6 or permission from the department chair.

**Program Requirements:** In addition to the 30 hours required for a major, the honors track requires the completion of a senior honors thesis of at least 30 pages that demonstrates the student's originality and ability to do research in the target field. For this endeavor, the student will receive 3 hours of graded credit. This means to graduate with departmental honors, the student must earn 33 hours of credit in the major.

Based on past experience, it is our expectation that honors projects will emerge from previous coursework where close interaction between faculty and students has planted the seeds for a larger project; from the student's leadership role in the cultural and intellectual life of the department; or as a follow-up to experiences begun during the student's study-abroad program.

### PROGRAM IN JAPANESE

The program in Japanese offers language classes in modern Japanese at the beginning, intermediate and advanced levels, as well as courses in English on classical and modern Japanese literature and culture. Qualified students also have the opportunity to attend Nanzan University in Nagoya, and Sophia University in Tokyo, Japan.

The Japanese program offers first and supplementary majors and a minor.

**Basic requirements:** For the major, students must complete 30 credit hours, including two semesters of advanced Japanese. For the supplementary major, students must complete 24 credit hours, including third-year Japanese. For the minor, students must complete 15 credit hours, including two semesters of language classes beyond the first year. 10xxx-level language courses and University seminars on Japan-related topics do not count toward the major, supplementary major, or minor.

**Other requirements:** In addition to the language course requirements described above, all majors and minors must take one course in Japanese literature, which must be taught by a departmental faculty member. Remaining credit hours may be satisfied by taking additional Japanese language and literature courses, or other East Asia-related courses approved by the academic advisor.

### THE HONORS TRACK IN JAPANESE

Majors in Japanese are strongly encouraged to pursue the honors track. Those who are interested must meet the following criteria:

1. Fulfillment of all the requirements for a first major of 30 credit hours in either Chinese or Japanese;
2. A cumulative GPA of at least 3.6 or permission from the department chair.

**Program Requirements:** In addition to the 30 hours required for a major, the honors track requires the completion of a senior honors thesis of at least 30 pages that demonstrates the student's originality and ability to do research in the target field. For this endeavor, the student will receive 3 hours of graded credit. This means to graduate with departmental honors, the student must earn 33 hours of credit in the major.

Based on past experience, it is our expectation that honors projects will emerge from previous coursework where close interaction between faculty and students has planted the seeds for a larger project; from the student's leadership role in the cultural and intellectual life of the department; or as a follow-up to experiences begun during the student's study-abroad program.

## ECONOMICS

## PROGRAM IN KOREAN

The University offers two years of Korean language instruction and a number of courses relating to Korean culture. Students who finish the sequence at Notre Dame are encouraged to continue their language study abroad.

## ASIAN STUDIES MINOR

See "Area Studies Minors," later in this section of the *Bulletin*. This minor provides opportunities for students to develop an interdisciplinary understanding of Asia.

## EAST ASIAN LANGUAGES &amp; CULTURES STUDY-ABROAD PROGRAMS

Students have opportunities to study abroad for either a semester or a year in the People's Republic of China and Japan at the following locations:

**Beijing, China:** The program at Peking University affords students an opportunity to improve their fluency in spoken and written Mandarin Chinese through intensive training. Participants must have completed at least two semesters of college-level Mandarin or the equivalent.

**Shanghai, China:** The program at East China Normal University is generally designed for a semester (but it may be extended) that affords students courses in Chinese language, literature, and culture.

**Nagoya, Japan:** The program at the Catholic Nanzan University offers mandatory courses in intensive Japanese, as well as related courses in literature, religion, business, economics, history, art, and politics. The program is designed for sophomores who have taken a minimum of first-year, intensive Japanese (at the University of Notre Dame) or its equivalent.

**Tokyo, Japan:** The program at the Catholic Sophia University enables language majors to focus on their language courses while, at the same time, affording a wide-ranging selection of English-language offerings in Asian Studies, international business, economics, history, political science, art history, literature, religion, philosophy, anthropology, and sociology. Sophomores and juniors may participate.

## COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of East Asian Languages & Cultures](#) heading.

## Economics

*Director of Undergraduate Studies*

Frank J. Bonello

*Director of Undergraduate Advising*

William H. Leahy

## DEPARTMENT OF ECONOMICS AND ECONOMETRICS

*Chair:*

Richard A. Jensen

*DeCrane Professor of International Economics:*

Nelson C. Mark

*Gilbert F. Schaffer Professor of Economics:*

Christopher J. Waller

*Keough-Hesburgh Professor:*

William Evans

*Professors:*

William Evans; Thomas Gresik; Richard A. Jensen; Nelson C. Mark; Christopher J. Waller

*Associate Professors:*

Byung-Joo Lee; Michael Pries; Kali P. Rath

*Assistant Professor:*

Kasey Buckles; Kirk Doran; Daniel Hungerman; Steven Lugaue; James X. Sullivan; Abigail Wozniak

## DEPARTMENT OF ECONOMICS AND POLICY STUDIES

*Chair:*

Jennifer L. Warlick

*Carl E. Koch Professor of Economics:*

Philip Mirowski

*Professors:*

Rev. Ernest J. Bartell, C.S.C. (emeritus); Charles Craypo (emeritus); Amitava K. Dutt; Kwan S. Kim; William H. Leahy; Philip Mirowski; Jaime Ros; David F. Ruccio; Roger S. Skurski (emeritus); Thomas R. Swartz (emeritus); Charles K. Wilber (emeritus)

*Associate Professors:*

David M. Betson; Frank J. Bonello; Gregory Curme (emeritus); James J. Rakowski; Jennifer L. Warlick; Martin H. Wolfson

*Concurrent Associate Professor:*

Mary Beckman

**Program of Studies.** The undergraduate major in economics within the College of Arts and Letters is jointly administered by the Department of Economics and Econometrics and the Department of Economics and Policy Studies. The major is designed to make a unique contribution to the student's liberal education. The program provides students with the insights of scientific analysis and social perspective to deepen their understanding of the complex economic forces at work in society. Such an understanding is an essential ingredient in the intellectual development of an educated person. The program is also designed to prepare the student

for a variety of options after graduation, including graduate programs in economics and public policy, law school, and managerial positions in business and finance.

## Requirements for the Economics Major

## (i) Total Course Requirement

Students must complete the two-semester Principles of Economics sequence (10010/10011/20010/20011 and 10020/20020 or equivalent). Beyond the Principles courses, the major requires a minimum of eight additional courses (24 credits) in economics at the junior/senior level (numbered 3xxxx or 4xxxx).

## (ii) Math Requirement

A course in Calculus II (Math 10260 or equivalent) is a prerequisite for both of the intermediate theory courses. (See core requirement below). Simultaneous enrollment in Calculus II is permitted but not recommended.

**Recommendation:** It is strongly recommended that students, especially prospective economics majors, who have not had a course in Calculus I (Math 10250 or equivalent) enroll in the Calculus course during their first year of study.

## (iii) Core Requirement

Students must include the following four courses among their minimum of eight courses in economics beyond the Principles courses:

- 30010. Intermediate Economic Theory-Micro
- 30020. Intermediate Economic Theory-Macro
- 30330. Statistics for Economists
- 30331. Econometrics

## (iv) Advanced Course Requirement

Students must include a minimum of two courses (6 credits) at the senior level (numbered 4xxxx) that have either of the intermediate theory courses (30010, 30020) and/or Econometrics (30331) as a prerequisite.

## (v) Writing-Intensive Requirement

In completing the minimum of 24 credits at the junior/senior 3xxxx/4xxxx level, the student must fulfill a writing-intensive requirement. This requirement can be satisfied in one of the following three ways: by taking a junior or senior 3xxxx/4xxxx-level economics seminar course; by taking a three-credit special studies course consistent with the college's writing-intensive guidelines under the direction of an economics faculty member; or by writing a senior

## ENGLISH

honors essay under the direction of an economics faculty member.

Departmental advisors will assist students in designing a program of study that meets their educational and career goals. Students are also encouraged to pursue related courses in other departments of the College of Arts and Letters, the Mendoza College of Business, and the College of Science. Materials relating to professional work or graduate study in economics, law, business, public policy, and foreign service are available from the director of undergraduate studies.

### Undergraduate Economics Honors Program

#### Entry Gate.

To be eligible for admission to the Undergraduate Economics Honors Program, the student must:

(i) Complete Intermediate Economic Theory–Micro (ECON 30010), Intermediate Economic Theory–Macro (ECON 30020), and Econometrics (ECON 30331) with minimum grade point average in these courses of A- (3.667),

or

(ii) Have a minimum cumulative GPA of 3.4 and minimum GPA of A- (3.667) in Principles of Microeconomics (ECON 10010/10011/20010/20011), Principles of Macroeconomics (ECON 10020/20020), Intermediate Economic Theory–Micro (ECON 30010), Intermediate Economic Theory–Macro (ECON 30020), Statistics for Economists (ECON 30330), and Econometrics (ECON 30331).

To apply for admission, the student must complete an application form, available from the director of undergraduate studies in Economics, between the end of the sophomore year and the end of the junior year. The application will include: (1) a paragraph explaining why the student wishes to enroll in the honors program, and (2) a signature by a member of the economics faculty who endorses this student's application. The application will be returned to the director of undergraduate studies in Economics who will make recommendations for admissions to the Economics Working Committee, which is responsible for final decisions.

#### Enriching Experience.

The Undergraduate Economics Honors Program requires that the student complete an enriching experience. The following qualify as an enriching experience:

(i) Completion with a grade B+ or higher of an “advanced methods” course, defined as a 4xxxx-level course in which students are required to apply the methods of modern economic research. A list of these courses is available from the director of undergraduate studies.

(ii) Completion with a grade of B or higher of a course in the core of the graduate program in economics.

(iii) Completion of some substantive out-of-classroom activity directly related to the study of economics, such as presentation of the student's own original research at an external conference, an undergraduate research assistantship, an internship, or community service.

All of these activities need to be pre-approved. Students who want pre-approval for a specific activity should submit a written request with other supporting materials to the director of undergraduate studies in Economics who will make recommendations to the Economics Working Committee, which is responsible for final decisions. The director of undergraduate studies will notify applicants of the committee's decision.

#### Capstone experience.

The capstone experience represents the final requirement for the Undergraduate Economics Honors Program. This experience involves three elements:

(i) Completion of a one-credit honors seminar (ECON 47961) in each semester of the senior year. The seminar not only provides instructional support for these students, but also requires each student to present progress reports to their peers at regular intervals. These seminar credits do not count as hours toward the major (i.e., do not substitute for 3xxxx- or 4xxxx-level elective economics courses) and are graded on a Satisfactory/Unsatisfactory basis. These seminars are open to juniors in the honors program who want advanced insight to what the honors essay entails.

(ii) Completion of a six-credit senior honors essay (with a grade of B+ or higher). The essay is directed by an economics faculty member and represents a significant research effort. The writing of the essay is accomplished over the two semesters of the student's senior year with three credits awarded each semester (ECON 47960). These credits can be counted as economics electives toward the major and can be used to satisfy the major's writing-intensive requirement. The results of the essay must be presented at an economics seminar open to the public during the end of the second semester of each academic year.

(iii) Participation in all College of Arts and Letters events for departmental honors students.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section after the [Economics](#) headings.

#### Instructor:

Sarah Micklem

#### Teaching Scholars (Post-Doctoral Fellows):

S. Brooke Cameron; Juliann Ulin

**Program of Studies.** English majors spend their time in small classes, reading, analyzing, and discussing canonical and lesser-known literary works, studying issues of literacy and rhetoric, investigating the symbolic systems that shape cultural meaning, and crafting their own original poetry and prose.

## FILM, TELEVISION, AND THEATRE

Nearly every majors-level English course is writing-intensive. Individual students determine the course of their own study in close consultation with a faculty advisor.

The major requirements include a minimum of 10 courses (30 credit hours) in addition to the literature courses required of all students in the College of Arts and Letters. The major begins with a one-semester introductory to literary studies course, ENGL 30101, which is also the major's officially designated writing-intensive course. The introductory course is buttressed by three broad literary history courses that provide an overview of literary traditions from the medieval period to the present. The capstone experience of the major is a research seminar in which the student completes an original and substantial research project. These required courses make up half of the 10-course major; the other five elective courses (15 credit hours at the 30xxx or 40xxx level) are chosen by the individual student. Electives include courses in the several periods of British, Irish, and U.S. literature from their origins to the present, in literatures of the Americas, in certain aspects of classical and European literature, and in other literatures written in English; in the genres of literature; in major authors; in literacy and rhetoric; in literary theory and the history of criticism; and in expository and creative writing.

English majors enjoy an atmosphere of small classes and immediate contact with the department's regular teaching and research faculty. All courses taught in the department, not just those designated as writing courses, contain significant writing components. Beyond the classroom, the English Department offers all its majors a wide array of events throughout the year, including readings of poetry and prose, scholarly lectures on literary and cultural topics, and more social activities.

English majors choose careers in any field valuing the ability to read, write, and analyze with intelligence and subtlety. Some go on to graduate study in literature leading to careers in academia; others choose professions such as law, education, medicine, publishing, business, social work, professional writing, library science, journalism, and public relations. An increasing number of English majors go into service projects and programs like Teach for America.

**Honors Concentration.** In the English Honors Concentration, select majors create programs tailored to their own particular interest. A faculty mentor guides each of these students through this intensive experience. The English Honors Concentration is particularly beneficial to students wishing to pursue graduate studies in English. The concentration experience is completed with the writing of an Honors Thesis, which can be both research and scholarly work or original creative writing.

**Eligibility.** At the end of their sophomore year, students are invited to apply to the Honors Concentration after being identified in one of two ways: achieving a GPA of at least 3.78 or higher in

three or more English classes, or faculty nomination. Invited students declare their interest in the Honors Concentration by completing a Statement of Purpose, a 300-word statement describing what the student intends to focus on during the time in the Honors Concentration.

**Requirements.** The requirements for the Honors Concentration are slightly different from the prior listing of English major requirements. In addition to ENGL 30101 and the three literary history courses, a student takes two electives in his or her area of interest; the remaining three electives are taken in consultation with the faculty mentor. In the fall of senior year, the student enrolls in a graduate-level literature course in the area of interest; in the spring of senior year, the student enrolls in ENGL 52999, Honors Thesis, which replaces the seminar required of English majors, to complete the writing of the thesis.

**Graduate Courses.** With permission from the department and the instructor, undergraduate majors may take one 90xxx graduate course in place of the research seminar.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of English](#) heading.

## Film, Television, and Theatre

C. Ken Cole; William Donaruma; Theodore E. Mandell

### Assistant Professional Specialist:

Karen Heisler (visiting)

### Instructor:

Gary Sieber (adjunct)

**The Department.** The Department of Film, Television, and Theatre curriculum includes study of the arts of theatre and performance, film and video, and television. Our goal is to provide students with intellectual and intuitive resources for analysis and production of these performing and media arts. We seek both to encourage and inspire intellectual discipline and curiosity as well as to discover and nurture student creativity. We offer, therefore, both a scholarly and creative context for education of the general liberal arts student at Notre Dame as well as the individual seeking an intensive preparation for advanced study in these fields. In an interdisciplinary spirit of collaboration, students in this department investigate film, television, and theatre (and occasionally other media) as complex cultural phenomena to develop skills in analysis, evaluation, and theory formation as well as to engage in creative production.

Students graduating from this department have numerous postgraduate choices. Many of our graduates seek careers in law, medicine, business, education, public service, or other professions. Others will pursue careers in theatre, film, or

## FILM, TELEVISION, AND THEATRE

television. However, we are not a professional training program. Rather, we seek to provide the creative and technological tools for student scholar/artists to build a basis for advanced study and professional careers in the arts should they so desire. It is our hope that those whose work and determination lead them to seek careers in these fields will be challenged and assisted by their liberal arts curriculum. Our courses provide tools to understand the analytical, technical and imaginative processes of the field, whether pursued as future work, study, or as an enhancement of intellectual life.

All 40xxx-level critical studies electives in film and television, and selected theatre electives, will fulfill the writing-intensive requirement.

Many FTT courses fulfill the University fine arts requirement.

For more information and up-to-date listings of courses and FTT events, visit the Web at [nd.edu/-ftt](http://nd.edu/-ftt).

**Program of Studies.** Students interested in the major are encouraged to visit the departmental office (230 Marie P. DeBartolo Performing Arts Center) for information about the programs and department faculty. You also may visit our website at [nd.edu/-ftt](http://nd.edu/-ftt).

Step-by-step instructions for becoming a major are available on our website. All students declaring a major first must obtain the signature of the director of undergraduate studies and a departmental faculty advisor will be assigned, with whom the student will consult to prepare a plan of study reflecting their educational interests and goals. Students may elect to major in the department as either a first or second major in accordance with college guidelines.

Normally, students concentrate in either film, television or in theatre. At least 30 credit hours are needed to complete the major. The film concentration requires at least one elective on an international subject and at least three upper-level courses. The television concentration requires seven electives, three at the 40xxx level.

(A major combining courses from different concentrations is possible with approval of the director of undergraduate studies.)

The Department of Film, Television, and Theatre participates in several international programs by cross-listing courses and sponsoring internships. For more information, see the *Bulletin* descriptions for the international programs.

Several courses are offered in the summer session, including FTT 20102 and FTT 20706. See the *Summer Session Bulletin* for availability and further information.

### Film Concentration

30 credit hours

4 required core courses:

- Basics of Film and Television
- History of Film I
- History of Film II
- Film and Television Theory

6 electives (3 at the 40xxx level and 1 international elective)

#### General Electives

- Introduction to Film and Video Production
- Writing for Screen and Stage I and II
- The Art and Science of Film Production
- Film and Digital Culture
- History of Documentary Film
- Topics in Media Theory, History, and Research: Film and Popular Music

#### International Electives (30xxx and 40xxx Level)

- Italian National Cinema
- Comedy Italian Style
- French Cinema
- New Iranian Cinema
- Irish Cinema and Culture
- Australian Cinema
- Hong Kong: Action Cinema in a Global Context

#### Upper-level Electives

- Shakespeare and Film
- Intermediate Film Production
- Advanced Film Production
- Advanced Digital Video Production
- Sex and Gender in Cinema
- Walt Disney in Film and Culture
- Contemporary Hollywood
- Postmodern Narrative

### Television Studies Concentration

30 credit hours

3 required core courses:

- Basics of Film and Television
- History of Television
- Film and Television Theory

7 electives (3 at the 40xxx level)

- Introduction to New Media
- Broadcast Journalism
- History of Film II
- Writing for Screen and Stage I and II
- Introduction to Film and Video Production
- Film and Digital Culture
- Topics in Media Theory, History, and Research
- Broadcasting and Cable
- Sports Journalism
- Entertainment and Arts Law
- Media Ethics
- Media and the Presidency
- Media Stardom and Celebrity Culture
- Advanced Digital Video Production
- Contemporary Hollywood
- Media Culture
- Media Internships

Special Studies

Issues in Film and Media

### Theatre Concentration

30 credit hours

4 required core courses:

- Theatrical Production
- Theatre, History, and Society
- Script Analysis and Dramaturgy
- Performance Analysis

#### Group A

- Performance Studies
- Performance Art: History, Theory, and Practice
- Shakespeare in Performance
- Early English Theatre
- Shakespeare and Film
- History of Theatre before 1700
- Dramatic Literature before 1900
- Dramatic Literature after 1900

#### Group B

- Stage Management
- History of Costume
- Scene Design and Methodology
- Lighting Design and Methodology
- Costume Design and Methodology
- CAD for the Stage

#### Group C

- Acting Process
- Writing for Stage and Screen I
- Make-Up for the Stage
- Voice and Movement
- Directing Process
- Writing for Stage and Screen II
- Audition Seminar
- Acting Shakespeare

Other electives include:

- Introduction to Theatre
- Theatre Production Workshop
- Entertainment and Arts Law
- Theatre Internship
- Practicum
- Special Studies

#### Complementary Nature of Departmental

**Concentrations.** There is a strong creative and scholarly relationship in the mix of courses and activities of the department of which students should be aware. The concentrations offered by this department can provide many complementary areas of creative and technical study for students involved in film and television production, as well as overlapping historical, theoretical and critical concerns. Similarly, those concentrating in theatre are urged to avail themselves of the many opportunities for production experience

## GERMAN AND RUSSIAN LANGUAGES AND LITERATURES

and critical, cultural and theoretical studies offered by the theatre faculty.

**Cocurricular Activities.** The department encourages non-majors to elect courses, participate as audience in our extensive film and theatre series, and involve themselves in film, television, and theatre production as a means of informing and complementing their liberal arts education at Notre Dame. Occasional guest artists and lecturers are also sponsored by the department. Information on all department-sponsored activities is available in the department office and on the department's website.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Film, Television, and Theatre](#) heading.

## German and Russian Languages and Literatures

### Chair:

Robert Norton  
*Rev. Edmund P. Joyce, C.S.C., Professor of German Language and Literature:*

Mark W. Roche  
*Paul G. Kimball Professor of Arts and Letters:*  
 Vittorio Hösle

### Professors:

Vittorio Hösle; Randolph J. Klawiter (emeritus); Klaus Lanzinger (emeritus); Thomas G. Marullo; Robert E. Norton; Vera B. Profit; Mark W. Roche; Konrad Schaum (emeritus)

### Associate Professors:

David W. Gasperetti; Alyssa W. Gillespie; Albert K. Wimmer

### Assistant Professors:

Tobias Boes; Anita R. McChesney

### Associate Professional Specialists:

Denise M. Della Rossa; Jan Lüder Hagens; Hannelore Weber

**Program of Studies.** The study of German and Russian languages and literatures provides educational opportunities relevant to an increasingly interdependent world. The acquisition of foreign language skills in general is an important component of liberal education because it enhances students' powers of communication and serves to introduce them to enduring cultural achievements of other peoples. In this sense, the study of German and Russian widens students' intellectual horizons, stimulates the understanding of several significant cultural traditions and allows the examination of these traditions in a more sophisticated and cosmopolitan manner.

The goal of all levels of language courses are oral and reading competence and linguistic and stylistic mastery. Courses in advanced German or Russian language, literature, culture and civilization expose the student to a wealth of literary, cultural and humanistic traditions as well as facilitate a better understanding of the rich national cultures of the German- and Russian-speaking countries.

**The Department.** The Department of German and Russian Languages and Literatures offers instruction in German and Russian at all levels of competence, from beginning language courses at the 10xxx level to literature and civilization courses on the 30xxx and 40xxx levels.

### THE GERMAN PROGRAM

*Director of Undergraduate Studies:*

Albert K. Wimmer

**Requirements: First Major, Supplementary Major, and Minor**

Majors must select at least one course each from clusters A and B (in that order; see Schematic Organization of the German Program below) before taking courses from Cluster C and should take at least one course from Cluster C before proceeding to courses from Cluster D. Courses from Cluster D are intended to serve as culminating (senior-year) courses. For first majors, at least four of these courses must be taken at the home campus; for supplementary majors, three courses must be taken at the home campus.

#### First Major

1. Successful completion of 10 courses (30 credit hours) above the three-semester language requirement (i.e., beyond 20201).
2. Of these 10 courses, seven must be taught in German. Four of the upper-division courses must be taken at the home institution from departmental offerings, two at the 30xxx level, and two at the 40xxx level.

#### Supplementary Major

1. Successful completion of eight courses (24 credit hours) above the three-semester language requirement (i.e., beyond 20201).
2. Of these eight courses, six must be taught in German; three of the latter must be upper division courses taken at the home institution from departmental offerings, two at the 30xxx level, and one at the 40xxx level.

#### Minor (only for non-Innsbruck students)

Minors may take any combination of courses in Clusters A, B, and C (see Schematic Organization of the German Program below). The culminating course for the minor may be (but does not have to be) from Cluster D.

Minors are expected to successfully complete five courses (15 credit hours) at the 20201 level or above, only one of which may be taught in English.

A year of study abroad in Innsbruck, Austria, is an incomparable opportunity to improve language skills and strengthen cultural understanding. Majors and supplementary majors are therefore strongly encouraged to participate in this program during their sophomore or junior year. For further information, see "International Study Programs" in the front section of this *Bulletin*. Additionally, students may study in Berlin, Germany, for one or two semesters. A summer semester program is offered in Vienna, Austria.

#### Senior Thesis

German first majors who wish to graduate with honors may write a Senior Thesis. For those German majors who elect to write a thesis, several

## GERMAN AND RUSSIAN LANGUAGES AND LITERATURES

requirements must be met: (1) The student must have a GPA of 3.5 or higher in the major, (2) the thesis must be at least 30 pages long, and (3) the thesis must be written in German.

The student writing a thesis enrolls in GE 48499 and receives one course credit (three credit hours) for the course, which, however, does not count toward the 30-credit-hour requirement for the first major. Although the thesis is graded by the advisor (to receive honors, the thesis must receive a grade of B+), the entire department reads the thesis, acting as an advisory body to the advisor. The thesis is due the week after spring break, and the student is strongly advised to begin thinking about it and start conferring with the advisor before the October break of the fall term.

#### **SCHEMATIC ORGANIZATION OF THE GERMAN PROGRAM**

##### **•CLUSTER A (Conversation/Composition/Reading)**

Prerequisite for this cluster is 20202 or the equivalent.

##### **30102. ABCs of Speaking, Reading, and Writing about Literature**

Offered in the fall semester in odd-numbered years.

##### **30103. Advanced Conversation**

Offered every spring semester.

##### **30105. Stylistics and Composition**

Offered in the fall semester in even-numbered years.

##### **•CLUSTER B (Introduction to Culture and Literature)**

Prerequisite for this cluster is at least one course from Cluster A.

##### **30107. German Cultural History (Kulturgeschichte)**

Offered every spring semester.

##### **30108. Survey of German-language Literature (Literature von gestern und heute)**

Offered every fall semester.

##### **•CLUSTER C (30xxx-level Literature, Culture, Linguistics, and Professional German)**

A variety of courses offered as dictated by student needs and faculty specialization.

##### **•CLUSTER D (40xxx-level Literature, Culture, and Linguistics)**

A variety of courses offered as dictated by student needs and faculty specialization.

### **THE RUSSIAN PROGRAM**

*Director of Undergraduate Studies:*

David Gasperetti

#### **The Major in Russian**

Majors in Russian must complete 10 courses (30 credit hours) beyond the three-semester language requirement, including at least five courses taught by departmental faculty. Courses to be taken in residence at Notre Dame will normally include Advanced Russian I and II and must include three courses on Russian literature and/or culture, two at the 30000 level and one at the 40000 level. With the permission of the director of undergraduate studies, one course on a Russian subject in another discipline, such as anthropology, history, or political science, may be counted toward the Russian major.

#### **The Supplementary Major in Russian**

Supplementary majors in Russian must complete eight courses (24 credit hours) beyond the three-semester language requirement, including at least four courses taught by departmental faculty. Courses to be taken in residence at Notre Dame will normally include Advanced Russian I and II and must include two courses on Russian literature and/or culture, one at the 30000 level and one at the 40000 level. With the permission of the director of undergraduate studies, one course on a Russian subject in another discipline, such as anthropology, history, or political science, may be counted toward the Russian supplementary major.

#### **The Minor in Russian**

The Russian minor consists of five courses (15 credits) at the 20000 level and above, including at least three courses taught by departmental faculty. Courses to be taken in residence at Notre Dame will normally include Advanced Russian I and II and must include one course on Russian literature and/or culture from departmental offerings at either the 30000 or the 40000 level. With the permission of the director of undergraduate studies, one course on a Russian subject in another discipline, such as anthropology, history, or political science, may be counted toward the Russian minor.

#### **The Minor in Russian and East European Studies**

For a minor in Russian and East European Studies, students must have (1) at least three semesters (or the equivalent) of college-level Russian or another approved Central or East European language (German will be accepted in certain cases); (2) four additional courses (12 credits) in Russian and East European area studies, taken in residence at Notre Dame and distributed over at least three departments (no more than one of these courses may be a language course, chosen from Intermediate Russian II, Advanced Russian I or II, or the equivalent); (3) a senior thesis directed by a member of the Russian and East European Studies faculty (students will receive 1.5 credits in the fall semester for preparation of the thesis and 1.5 credits in the spring semester for writing the thesis); (4) three 1-credit courses (graded pass-fail) chosen from language across the

curriculum tutorials and/or cultural enrichment offerings in Russian and East European Studies. For a list of Russian and East European Studies courses fulfilling the minor requirements see the complete description under Area Studies Minors.

#### **Study Abroad**

Our students are encouraged to experience firsthand the excitement of being immersed in Russian culture through participation in a study program in Russia. Programs are available during the summer (five to eight weeks) or for an entire semester or academic year. Credits earned for course work taken in approved programs may be applied toward the Russian major or minor at Notre Dame. Grants are available on a competitive basis for summer language study through the Office of International Studies.

#### **Senior Thesis/Honors Track**

Russian majors are admitted into the honors track by invitation. To receive honors, a student must (1) complete all requirements for the major; (2) maintain a GPA of at least 3.5 in the major; and (3) receive a grade of A- or higher for a substantial honors thesis written in English. Closely supervised by one of the Russian faculty in the Department of German and Russian Languages and Literatures, the Russian honors thesis is to be the product of a three-credit honors track directed readings course taken in the senior year. The student will receive 1.5 credits in the fall semester for preparation of the thesis and 1.5 credits in the spring semester for writing the thesis. For more information, see [nd.edu/~grl/](http://nd.edu/~grl/).

#### **Writing-Intensive Courses**

All 30xxx- and 40xxx-level literature courses in German or Russian are writing-intensive. Majors in German or Russian who take upper-level literature courses fulfill the writing-intensive requirement of the College of Arts and Letters.

#### **Placement and Language Requirement**

At the beginning of each semester, placement tests in German and Russian will be administered that will allow students either to test out of one or two semesters of the language requirement or enroll in a course commensurate with their language proficiency. The placement test is mandatory for students who had German or Russian in high school.

Students testing out of three semesters must complete an additional course at the 20xxx level or higher before testing out of the language requirement. This includes students who have taken an AP or SAT II exam.

### **COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of German and Russian Languages and Literatures](#) heading.

## HISTORY

### History

#### Chair:

John T. McGreevy

#### Director of Graduate Studies:

Christopher S. Hamlin

#### Robert M. Conway Director of the Medieval Institute:

Thomas Noble

#### John M. Regan Jr. Director of the Joan B. Kroc Institute for International Peace Studies:

R. Scott Appleby

#### Professors:

R. Scott Appleby (on leave fall 2008); Rev. Thomas Blantz, C.S.C.; Olivia Remie Constable; Patrick Griffin; Christopher S. Hamlin; Thomas A. Kselman (on leave 2008–09); Sabine G. MacCormack (joint with Classics) (on leave 2008–09); John T. McGreevy; Rev. Wilson D. Miscamble, C.S.C. (on leave 2008–09); Dian H. Murray; Thomas Noble; Mark Noll; Thomas P. Slaughter; James Smyth; James Turner; John H. Van Engen (on leave 2008–09)

#### Professors Emeritus:

Robert E. Burns; Michael Crowe (concurrent); Vincent P. De Santis; Jay P. Dolan; J. Philip Gleason; Rev. Robert L. Kerby; George Marsden; Walter Nugent; Rev. Marvin R. O'Connell; Thomas Schlereth (concurrent); Andrzej Walicki; J. Robert Wegs

#### Associate Professors:

Ted Beatty; Gail Bederman (on leave spring 2009); Jon Coleman; Karen Graubart; Brad Gregory; Semion Lyandres (on leave 2008–09); Alexander Martin (on leave 2008–09); Richard Pierce; Linda Przybyszewski; Rev. Robert Sullivan; Julia Adeney Thomas (on leave spring 2009)

#### Assistant Professors:

Asher Kaufman (on leave spring 2009); Mikolaj Kunicki; Margaret Meserve; Jaime Pensado; Marc Rodriguez; Jayanta Sengupta

#### Associate Professional Specialist:

Daniel A. Graff

#### Concurrent Faculty:

Heidi Ardizzone (American Studies); Keith R. Bradley (Classics); Steven Brady (First Year of Studies); Kathleen Sprows Cummings (American Studies and Cushwa Center); Robert Goulding (Program of Liberal Studies); Lionel Jensen (East Asian Languages & Cultures); Kelly Jordan (ROTC); Phillip Sloan (Program of Liberal Studies); Thomas A. Stapleford (History and Philosophy of Science); Kevin Whelan (Keough Institute for Irish Studies)

#### Visiting Associate Professor:

Rev. Kevin Spicer, C.S.C.

#### Visiting Assistant Professors:

Rory Rapple; John Soares

#### Edward Sorin Postdoctoral Teaching Fellows:

Michael DeGruccio; Timothy Gloege; Andrew Orr; David Swartz

#### Graduate Teaching Fellows:

Martin Beisswenger

#### Erskine A. Peters Dissertation Fellows:

Denise Challenger; Shana Redmond

#### Instructors:

Sean Brennan (summer 2008); Melinda Grimsley-Smith (summer 2008); Stephen Molvarec (summer 2008); Eric Schuler (spring 2009)

#### Program of Studies.

1. The Department of History offers courses for undergraduates designed to expose them to life in the past as it was experienced and understood in the Americas, Europe, Asia, Africa, and Australia. Courses offered consist of lectures and seminars that require students to develop both a critical appreciation of primary and secondary texts and skills in historical thinking and writing.
2. For the classes of 2009 and 2010, students majoring in history have two options. **The standard major option consists of 10 three-credit upper-level history courses (beginning with a 3 or higher)**, beginning with an exciting introductory seminar (HIST 33000—History Workshop), which plunges students into the work of writing history from the moment they join the major through intensive interpretation of primary source documents. To encourage breadth of historical knowledge, standard majors also take a variety of courses emphasizing different chronological periods and geographical areas. More specifically, they must take one course from four of six primary fields: Africa/Asia/Middle East; Ancient/Medieval Europe (to 1500); Modern Europe (from 1500); United States; Latin America; Special (for courses focusing on other geographical areas or courses primarily comparative or global in approach). In addition, to encourage depth in a particular field of interest,

standard majors also declare a concentration consisting of three courses. (These concentrations must be approved by the major's advisor by the beginning of the senior year.) Standard majors also take an elective in any field they choose. To complete their course work, standard majors take a departmental seminar (HIST 43xxx), which offers the opportunity to conduct primary research and produce a substantial paper.

3. **The second option is a supplementary major, consisting of eight three-credit upper-level history courses (beginning with a 3 or higher).** The supplementary major is designed for those majoring in other departments but also interested in pursuing a program of study in history. To encourage breadth of historical knowledge, supplementary majors take a variety of courses emphasizing different chronological periods and geographical areas. More specifically, they must take one course from four of six primary fields: Africa/Asia/Middle East; Ancient/Medieval Europe (to 1500); Modern Europe (from 1500); United States; Latin America; Special (for courses focusing on other geographical areas or courses primarily comparative or global in approach). In addition, supplementary majors take three electives. To complete their course work, supplementary majors will take a departmental seminar (HIST 43xxx), which offers the opportunity to conduct primary research and produce a substantial paper.

**Beginning with the class of 2011, only the standard, 10-course major is available.**

4. Students pursuing either major option above may count up to two lower-level courses toward the major program (courses beginning with a 1 or a 2). All others must be "major-level" courses that begin with a 3 or higher. These lower-level courses may be counted toward breadth requirements, electives, or concentration area courses.
5. All standard and supplementary majors must take at least one *writing-intensive course* in the form of the departmental seminar (HIST 43xxx). In addition to prioritizing research in primary sources, these courses also emphasize writing as a process, with students encouraged to perform continual revisions and share their writing with their peers.

**History Honors Program.** The History Department offers a special program of study, the History Honors Program, for the most talented and motivated history majors. Students are invited to apply in the fall semester of the junior year; the program begins in the spring of the junior year. A student in the History Honors Program will take 11 three-credit history courses to satisfy both the Honors Program and standard history major requirements. In addition to taking the introductory gateway course (HIST 33000, History Workshop) and a variety of courses emphasizing geographical and chronological breadth, the student will also take two special honors seminars. Instead of completing a departmental seminar, the student will research and write a

## MATHEMATICS

yearlong senior thesis, receiving three credits in each semester of the senior year. Each history honors student will select an area of concentration tailored to his or her thesis topic and will take two additional courses in this field to complete the program.

In the spring of the junior year, the student will enroll in an Honors Program Methodology Seminar (HIST 53001), designed to introduce the student to the various methods historians utilize to analyze and write about the past. [Students admitted to the Honors Program, but studying abroad during the spring semester junior year, will be exempt from HIST 53001. They must, however, register a thesis topic and advisor with the director of Undergraduate Studies by the end of that semester.] In the fall of the senior year, the student will enroll in the Honors Program Historiography Colloquium (HIST 53002), intended to introduce the student to basic issues of critical interpretation and historiography through a specific field. In the fall and spring of the senior year, the student will work on a thesis (40 to 80 pages) under the supervision of a specific faculty member. The student will register for HIST 58003 (three senior thesis credits) each semester of the senior year.

**Phi Theta Alpha.** Students who have completed at least four major-level courses in history, earning a grade point average of 3.5 or above, and whose cumulative grade point average is at least 3.2, are eligible for the Notre Dame chapter of Phi Alpha Theta, a national history honor society. The History Department initiates new members once per year.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of History](#) heading.

### Assistant Professors:

Katrina D. Barron; Nero Budar; Zhiliang Xu; Yongtao Zhang

**Program of Studies.** Students in the College of Arts and Letters may pursue a major in mathematics with a concentration in honors. (Note that this program should not be confused with the Arts and Letters/Science Honors program and that several concentrations, including Honors, are available with a major in mathematics in the College of Science.) The mathematics major in arts and letters aims to give the student a thorough liberal intellectual discipline and to furnish an adequate background for

other fields of study. At the same time it prepares the student for graduate work in mathematics, and many of those who have taken the program have entered graduate schools in that field. Others have entered philosophy, medicine, law, economics and industrial management.

Students intending to follow this major in the College of Arts and Letters must declare their intention to the advisor indicated by the mathematics department and the dean of arts and letters at advance registration in the spring of their freshman year. Students must have completed or be completing satisfactory work in MATH 10850 and 10860. The program of their studies is subject in its entirety to approval by the advisor.

Students whose first major is in the College of Arts and Letters may also pursue a second major in mathematics. See "Mathematics as a Second Major" in the College of Science section of this *Bulletin*.

## THE PROGRAM OF COURSES

### First Year

#### First Semester

English	3
History or Social Science	3
MATH 10850. Honors Calculus I	4
Natural Science	3
Language: (French, German or Russian recommended)	3
Physical Education	—
	16

#### Second Semester

Language: French, German or Russian	3
University Seminar	3
MATH 10860. Honors Calculus II	4
Natural Science	3
Electives	3
Physical Education	—
	16

### Sophomore Year

#### First Semester

Core Course	3
Language: French, German or Russian	3
Fine Arts Elective	3
MATH 20810. Honors Algebra I	3
MATH 20850. Honors Calculus III	4
	16

#### Second Semester

Introduction to Philosophy	3
Core Course	3
Theology	3
MATH 20820. Honors Algebra II	3
MATH 20860. Honors Calculus IV	4
	16

## MEDIEVAL STUDIES

### Junior Year

<i>First Semester</i>	
Theology	3
MATH 30810. Honors Algebra III	3
MATH 30850. Honors Analysis I	3
Elective	5
History or Social Science	3
17	

### *Second Semester*

Philosophy	3
MATH 30820. Honors Algebra IV	3
MATH 30860. Honors Analysis II	3
English/American Literature	3
Elective	3
15	

### Senior Year

<i>First Semester</i>	
Mathematics Electives	6
Electives	9
15	

### *Second Semester*

Mathematics Electives	6
Electives	9
15	

(At least six credits of mathematics electives must be at the 40xxx level.)

### The Senior Thesis for Mathematics Majors

Students in the mathematics program have the option of writing a thesis on a subject in mathematics, or in an interdisciplinary area connected to mathematics. Such a thesis is strongly encouraged for math honors students and required of students in the SUMR program. This project is intended to give the student a better sense of how mathematics is done and used, and to develop in the student the habit of learning mathematics and its applications in an independent setting. In most cases, this work would be expected to be expository, but based on advanced-level readings. It should represent an effort that goes beyond what is found in an undergraduate course. It is especially desirable for a student to present a somewhat novel approach to an established subject, or to explore one of the many interesting connections that mathematics has with other disciplines.

During the second semester of the junior year and the first semester of the senior year, the student will work closely with a faculty advisor on a program of readings in preparation for the thesis, receiving 1 credit for each of these two semesters of work, under MATH 48800.

The thesis is to be crafted during the second semester of the senior year. The thesis must be submitted to the director of undergraduate studies by April 15 of the senior year. If the thesis is approved, the student

will receive 1 credit under MATH 48900 and the citation of "Graduation with Senior Thesis" will appear on the transcript.

Students interested in writing a senior thesis should contact the director of undergraduate studies in the Department of Mathematics.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Mathematics](#) heading.

## Medieval Studies

*Robert M. Conway* Director of the Medieval Institute:  
Thomas F.X. Noble (History)

Keys (Political Science); Brian Krostenko (Classics: Latin); Blake Leyerle (Theology); Sabine MacCormack (Classics: Latin; History); Julia Marvin (Liberal Studies); Ralph M. McNerney (Philosophy); Margaret Meserve (History); Christian R. Moevs (Romance Languages: Italian); Hildegund Müller (Classics: Latin); David O'Connor (Philosophy); Mark C. Pilkinton (Theatre); Jean Porter (Theology); Gretchen Reydam-Schils (Liberal Studies; Philosophy); Gabriel Said Reynolds (Theology); Robert E. Rodes (Law); John Roos (Political Science); Charles M. Rosenberg (Art History); Dayle Seidenspinner-Núñez (Romance Languages: Spanish); Susan Guise Sheridan (Anthropology); Rabbi Michael A. Signer (Theology); Marina Smyth (Librarian); John Van Engen (History); Joseph P. Wawrykow (Theology); Albert K. Wimmer (German); Robin Darling Young (Theology); Katherine Zieman (English)

**Program of Studies.** The Medieval Institute is one of Notre Dame's oldest and most renowned centers of learning. Begun in 1946, it was envisaged from its inception to be a premier locus for the study of

## MUSIC

the European Middle Ages. Over the decades its scope has broadened to where it now covers Islamic, Jewish, Byzantine, and Western Christian Studies in an interdisciplinary scheme. The academic strength and stature of the institute are due not only to its faculty, students, and library, but also to its fidelity to the original liberal arts ideal.

Medieval Studies prepares students to enter graduate school, law school, medical school, or various careers including business, government, education, publishing, ministry, curatorship, and research. With an emphasis on close reading, precise textual analysis, careful writing, and vigorous discussion, the program fosters critical thinking, communication skills, historical awareness, cultural appreciation, and human understanding.

Far from being the “dark ages,” medieval civilization witnessed the dawn of many of today’s institutions including universities, hospitals, legal and economic systems, religious communities and doctrine, architecture, engineering, science, art, and literature. Modern society is indebted to the Middle Ages not only for its inheritance, but also for its relevance.

The Medieval Studies program offers four tracks, draws from 11 disciplines, and is tailored to each student’s personal and professional goals. Anthropology; Art, Art History, and Design; Classics; English; German and Russian Languages and Literatures; History; Music; Philosophy; Political Science; Romance Languages and Literatures; and Theology are the contributing departments. From these, students are encouraged to build a unique program of study, in consultation with a faculty advisor, around an area of concentration that captures an interest, prepares for a field, or contributes to an academic pursuit.

Students interested in Medieval Studies may elect one of the following four options:

1. Major in Medieval Studies
2. Honors Major in Medieval Studies
3. Supplementary Major in Medieval Studies
4. Minor in Medieval Studies

All three major tracks include two common components. Each student’s curriculum is built around a concentration chosen by the individual (from the 11 participating departments), in conjunction with a faculty advisor. The concentration requires a minimum of four interrelated courses reflecting an intellectual and curricular coherence. The Medieval Studies Advanced Seminar (MI 43001) (3 credits) is the second common element in each of the major tracks. Students in the seminar are expected to read widely and discuss vigorously a set of sources that present a particular issue from several points of view. In addition, they are also expected to write a substantial research paper. The goal of the seminar

is to engage students in thinking critically and knowledgeably across the boundaries of traditional disciplines while maintaining a focus on a particular time, place, or issue.

The three major tracks and the minor track also have an introductory required course (3 credits), MI 20001, The World of the Middle Ages.

Following are brief outlines of the basic requirements for the three major tracks and the minor track. Further details can be obtained from the director of undergraduate studies in the Medieval Institute.

#### Medieval Studies Major (30 credits)

- The World of the Middle Ages course
- Four courses drawn from two or more departments representing a concentration
- Four electives in Medieval Studies drawn from at least two departments
- MI 43001, The Medieval Studies Advanced Seminar

#### Medieval Studies Honors Major (36 credits)

- Same requirements as major in Medieval Studies (see above)
- EXCEPT one intermediate Latin course and one advanced Latin course are required in lieu of two medieval electives
- PLUS an honors thesis for 6 credits

#### Medieval Studies Supp. Major (24 credits)

- The World of the Middle Ages course
- Four courses drawn from two or more departments representing a concentration
- Two electives in Medieval Studies
- One additional elective in Medieval Studies  
OR  
MI 43001, The Medieval Studies Advanced Seminar (if available)

#### Medieval Studies Interdiscip. Minor (15 credits)

- The World of the Middle Ages course
- Three electives in Medieval Studies drawn from at least two departments
- One additional elective in Medieval Studies  
OR  
MI 43001, The Medieval Studies Advanced Seminar (if available)

### COURSE DESCRIPTIONS

The complete descriptions for some courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Medieval Institute](#) heading.

## Music

#### Chair:

Louis MacKenzie

#### J.W. Van Gorkom Professor of Music:

Susan L. Youens

#### Professors:

Alexander Blachly; Calvin M. Bower (emeritus); William Cerny (emeritus); Craig J. Cramer; Kenneth W. Dye; Ethan T. Haimo; Eugene J. Leahy (emeritus); Georgine Resick

#### Associate Professors:

John Blacklow; Karen L. Buranskas; Mary E. Frandsen; Paul G. Johnson; Rev. Patrick Maloney, C.S.C. (emeritus); Carolyn R. Plummer; Peter H. Smith

#### Assistant Professor:

James S. Phillips (emeritus)

#### Artist in Residence in Piano:

Daniel Schlosberg

#### Visiting Assistant Professor:

Stephanie Ng

#### Professional Specialist

Mark Beudert

#### Associate Professional Specialists:

Lawrence H. Dwyer; Daniel C. Stowe

#### Visiting Assistant Professional Specialist

Stephen Lancaster

#### Adjunct Faculty:

John Apeitos; Darlene Catello; Darrel Tidaback

#### Band Staff:

Matthew Merten; Emmett O’Leary; Sam Sanchez; Alison Thigpen

**Program of Studies.** The Department of Music offers students a variety of musical experiences in accordance with its two objectives: (1) to provide all students, regardless of their major, knowledge and training in music through introductory, historical and theoretical courses, through participation in large and small ensembles and through applied instrumental or vocal study; and (2) to provide intensive curriculum and training for the student who chooses music as a major. Students majoring in music will choose a concentration in Theory and History, or in Performance. Each concentration offers an honors option for students intending to pursue professional study in the field after graduation. These students should also continue to study at least one non-native language beyond the college’s language requirement. All the concentrations have requirements beyond the course work. These may include recitals, ensembles, juries, and so forth.

Students considering these programs should contact the department as early as possible, preferably in the first year of study. This is especially important if studying abroad is anticipated.

**Advising.** Each major will be assigned a faculty advisor who must be consulted in person to discuss the program of study before a student may register for classes.

## MUSIC

**Lessons.** Music majors in the Performance concentration qualify for a 100 percent discount on weekly one-hour applied music lessons on their primary instrument, and a 50 percent discount on a secondary instrument. Students in the Theory and History concentration qualify for a 50 percent discount on lessons on a primary instrument and no discount for lessons on a secondary instrument. Applied music lessons are also available for nonmajors for a fee. Lessons may count as “activity” elective credits. (The College of Arts and Letters accepts up to three activity credits toward graduation.) The fee is charged to the students’ accounts, and no refunds are made after the first lesson.

**Interdisciplinary Minor in Liturgical Music.** This 18-credit minor consists of three 3-credit courses in theology and two 3-credit courses in music, plus three credits of music lessons or approved ensembles, to be selected in consultation with the student’s music advisor. Contact the director of undergraduate studies in the Department of Theology.

**Master of Sacred Music degree.** The M.S.M. degree is a graduate program administered jointly by music and theology. For information, contact the director of graduate studies in the Department of Theology.

### HISTORY/THEORY

The requirements for a 33-credit major with a concentration in theory and history are:

Class	Credits
Harmony and Voice Leading (Theory I) (Prerequisite course; 3 credits count as University elective)	0
Advanced Harmony and Voice Leading (Theory II)	3
Chromatic Harmony (Theory III)	3
Twentieth-Century Music: Structure and Style (Theory/History IV)	3
Musicianship I, II III	3
History I–III	9
Four 3-credit courses in history and theory, 30xxx level and above	12
<b>Music Total</b>	<b>33</b>
Collegiate/University Requirements and Electives	87
<b>Total</b>	<b>120</b>
Honors in Music (optional) (One additional upper-level 3-credit course in music and a senior project, to be determined with advisor)	6

Students who have had previous music education may place out of the prerequisites, Harmony and Voice Leading (Theory I) and Musicianship Labs, by examination.

Students with a music GPA of 3.7 or higher may be invited to participate in the honors program at the end of their sophomore year.

Applied lessons and ensembles are encouraged, but not required. Students intending to continue the study of music after graduation should maintain a rigorous program of lessons and applied music.

### PERFORMANCE

Students who wish to major in performance must have had a minimum of four years of instruction on their instrument prior to their enrollment at Notre Dame.

The requirements for a 36-credit major with a concentration in performance are:

Class	Credits
Studio Lessons (1 credit each for 2 semesters) (Prerequisite course; 2 credits count as an “activity” elective)	0
Harmony and Voice Leading (Theory I) (Prerequisite course; 3 credits count as University elective)	0
Advanced Harmony and Voice Leading (Theory II)	3
Chromatic Harmony (Theory III)	3
Twentieth-Century Music: Structure and Style (Theory/History IV)	3
History I–III	9
One 3-credit upper-level music course	3
Three additional elective credits in music	3
Advanced Performance Studio (2 credits per semester)	12
<b>Total Music</b>	<b>36</b>
Collegiate/University Requirements and Electives	84
<b>Total</b>	<b>120</b>
Honors in Music (optional)	6

(One additional upper-level 3-credit course in music and/or additional credits of Advanced Performance Studio, and an additional recital.)

Students with a music GPA of 3.7 or higher may be invited to participate in the honors program at the end of their sophomore year.

In order to continue to go forward in the performance program, students must be approved by faculty. In the spring semester of the freshman and sophomore years, all performance majors must participate in juries. Afterwards, the faculty will assess the level of their performance to determine if they are qualified to continue in the program. Students who demonstrate a high level of achievement in the sophomore juries will be candidates for the honors program.

Students in the performance concentrate may take proficiency exams to pass out of one or more of the musicianship courses; however, if they do not

pass the proficiencies, they are expected to take Musicianship I–III. (These can be taken as electives or count toward the overload.)

Performance concentrators must present a senior recital. (Honors majors must present an additional recital.)

Voice majors who are enrolled in colleges other than Arts and Letters must fulfill the Arts and Letters language requirement—three semesters in one language or the equivalent.

Participation in Applied Music (e.g., chamber music class, large ensembles, chorale, opera, etc.) is required each semester. (No credit toward the major, but may be applied toward graduation as “activity” credits.)

Students who have had previous music education may place out of the prerequisite studio lessons, and out of Harmony and Voice Leading (Theory I), by examination.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Music](#) heading.

## PHILOSOPHY

## Philosophy

### Chair:

Stephen Dumont

### Professional Specialists:

Anastasia Gutting; Montey G. Holloway; Alven Neiman

**Program of Studies.** There are two ways to major in philosophy: Regular philosophy majors are required to take eight courses in philosophy beyond the general two-course University requirement. Three specific courses must be included among the eight: a two-semester sequence of courses in the history of philosophy, Ancient and Medieval Philosophy (PHIL 30301) and Modern Philosophy (PHIL 30302), and a course in formal logic (PHIL 30313

or, for qualified students, PHIL 83901. The logic requirement can also be fulfilled by MATH 10130, though this course does not count toward the eight courses required for the major). In addition, regular majors must take at least two courses at the 40xxx level and three electives at either the 30xxx level or 40xxx level. (In special cases, one of the electives may be taken at the 20xxx level.) Students in the Arts and Letters Preprofessional Program or the Arts and Letters Engineering Program who take the regular major in philosophy are required to take seven rather than eight philosophy courses beyond the two-course University requirement but otherwise must fulfill all other requirements for the major.

**Honors philosophy majors are required to take 10 courses in philosophy beyond the general two-course University requirement.** In addition to the courses taken to satisfy the regular major requirements, honors majors must take one additional 40xxx-level seminar and write a senior thesis (PHIL 48499) in the fall semester of the senior year. The senior thesis will count as a regular three-hour course and should be planned with the director of undergraduate studies during the semester prior to its writing. The honors major is intended primarily for students planning postgraduate study, and a minimum grade point average of 3.5 is expected for entry, though exceptions are possible. To graduate with the honors major, students normally must have a 3.5 GPA in majors courses. Students in the Arts and Letters Preprofessional Program or the Arts and Letters Engineering Program who take the honors major in philosophy are required to take nine rather than 10 philosophy courses beyond the two-course University requirement but otherwise must fulfill all other requirements for the major.

**Students majoring in other departments may complete a supplementary major in philosophy by taking six courses beyond the two-course University requirement.** These six courses must include the history of philosophy sequence (PHIL 30301 and 30302) and two additional courses at the 30xxx level or higher, selected in consultation with one of the philosophy department's faculty advisors. Students in the Program of Liberal Studies may complete the supplementary major with five rather than six courses beyond the University two-course requirement but otherwise must fulfill all other requirements for the second major. Philosophy also contributes to a number of interdepartmental concentrations in the College of Arts and Letters. Details can be found in the Arts and Letters section of the *Bulletin* on Interdisciplinary Minors within the college.

All 40xxx-level philosophy courses are writing-intensive requiring at least 20 pages of written work that may take various forms: reflections on readings, class presentations, or shorter or longer research papers. Students planning to go on to graduate studies in philosophy or related disciplines typically write a senior thesis as well.

## PHILOSOPHY AND THEOLOGY JOINT MAJOR

### Director:

David Fagerberg, Theology

### Faculty:

Additional faculty for the joint major are drawn from the departments of philosophy and theology.

**Program of Studies.** The joint major is intended for undergraduates who are intrigued by philosophical and theological ideas and who have an equal commitment to both disciplines. It seeks to equip such students to handle theology and philosophy adeptly. The major is structured, providing undergraduates with a suitable introduction to the study of both disciplines, but also flexible, granting students considerable scope for the pursuit of their own interests.

The joint major offers the opportunity for an informed investigation of religious and philosophical ideas and should appeal especially to those who intend to pursue graduate work in philosophy or theology.

The joint major incorporates the University requirements in the two departments and most of the formal requirements of the first majors in theology and philosophy. Students in the joint major will take the two-semester sequence in Christian Traditions and an upper-level course in Scripture. The joint major, however, does not require the one-credit proseminar in theology.

Other formal requirements are peculiar to the joint major. Students will study a classical language for two semesters. (For practical as well as pedagogical reasons, this will normally be Greek.) Majors will also be expected to take the joint seminar offered each spring. Each seminar, led by a theologian and a philosopher, will examine an issue in which the differing approaches of philosophy and theology may prove fruitful. The topic and instructors will change from year to year. Finally, each major will submit a senior thesis prepared under the direction of two advisors, drawn from each department. At the option of the directors, this thesis may be presented and discussed in an informal colloquium consisting of the other students in the joint major.

The remaining courses in the joint major will be at the discretion of the student. Normally taken at the 40xxx level, there should be an equal distribution in the electives between theology and philosophy. However, students who wish may devote up to six hours within the joint major to additional language work. These hours may add to the classical language previously studied, or used to begin another language of significance for philosophical and theological work.

The joint major differs from a first major in one discipline and a supplementary major in the other in that the latter requires 55 credit hours, whereas the joint major requires 60. Furthermore, the joint

## POLITICAL SCIENCE

major calls for language instruction beyond what the University requires for all undergraduates. Finally, the joint seminars should prove especially challenging, inviting students to explore important topics in an interdisciplinary way. These features should make the joint major particularly attractive to students preparing for advanced study.

**Requirements in Philosophy:**

PHIL 10101 or 20201, and 20xxx-level course (University-required courses; a higher-level course may be substituted for the latter).

PHIL 30301 and 30302. History of Philosophy I and II.

PHIL 30313. Formal Logic.

**Requirements in Theology:**

THEO 10001 or 13183 or 2001 or 2002, and 20xxx-level course (University-required courses).

THEO 40201 and 40202. Christian Traditions I and II.

THEO 40101 or 40108. Upper-division scripture course.

Plus:

Classical language (normally Greek)—two semesters.

Joint seminar(s).

Senior thesis.

18 credit hours of electives (up to six of these may be additional hours in language study).

**COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Philosophy](#) heading.

**Program of Studies.** The political science major combines breadth and depth, helping students develop a general foundation for the study of politics and offering opportunities to explore particular areas of interest. Courses give students both a strong knowledge base and facility with the tools of political analysis. The department offers a substantial number of courses in all four fields of the discipline—American politics, international relations, comparative politics, and political theory—covering a range of topics and analytical perspectives. The major can prepare students for a wide variety of vocations. After graduation, many students go to law school or graduate school, or work for service organizations, government, or business.

**Requirements.** The major requires a minimum of 10 courses:

- four breadth requirements, consisting of a course in each of the four fields of political science: American politics, international relations, comparative politics, and political theory. Two of these must be introductory courses. The other two can be introductory courses or intermediate-level courses.
- four intermediate-level courses: students may specialize in one field or take courses in a combination of fields that suits their interests.
- a junior seminar and a senior seminar
- one of the 10 courses must be a methodologically focused course.

**Honors Track.** Students may graduate with departmental honors if they:

- graduate with a cumulative and major grade point average of 3.55 or above.
- complete a senior thesis with a grade of B+ or higher.
- replace one of the four intermediate-level course with an advanced course, such as an additional writing seminar, a graduate course, or the research design course.

Starting with the class of 2010, students should consult a departmental advisor regarding the new honors track.

**Senior Thesis.** Students with a grade point average of 3.5 or above are encouraged to write a senior thesis. This two-semester project involves working closely

## POLITICAL SCIENCE

with a faculty supervisor, and offers the opportunity to explore more deeply and independently a research project of the student's choice.

**Pi Sigma Alpha.** Students who have taken a minimum of four political science courses, with a grade no lower than a B in their political science courses, and who are on the Dean's List are eligible to join Notre Dame's chapter of Pi Sigma Alpha, the national honor society for political science majors.

**WRITING SEMINARS**

Two writing intensive seminars are required for the political science major. The seminars give students the opportunity to work in a seminar setting, to explore a topic more deeply, and to gain experience writing in their field. Topics vary from semester to semester.

**JUNIOR SEMINARS****POLS 43001. Junior Writing Seminar**

The department offers political science majors the opportunity to take a writing seminar in their junior year, including some writing seminars exclusively for juniors. Recent topics have included:

*Civil Liberties and Civil Rights*

How do courts decide cases involving civil liberties and civil rights? What rationales support the different interpretations of constitutional rights? How has the doctrine of incorporation affected our understanding of constitutional rights? Why is the concept of neutrality so important in current jurisprudence? How do courts balance formal assumptions and attention to particular situations? The purpose of this seminar is to help answer these and other basic questions about the law and politics of constitutional rights, including freedom of expression, due process, and equal protection.

*The Presidency and War*

Do presidents legitimately possess war power? A political scientist from Mars, observing presidents since 1945 might conclude that there is a presidential war power. But does the Constitution vest in the president the power to decide on war? Through readings, discussion, and research papers, the seminar will examine controversies and claims over presidents' decisions to initiate war, and their implications for constitutional checks and balances,

for presidential effects on institutions and policies, and, finally, for presidential leadership in other contexts, such as domestic crises.

*European Politics*

In this course on European politics, we will examine the literature on three major issues: regional integration, origins of modern political authority, and industrial political economy. We will seek to understand the origin, current functioning, and possible futures for key European institutions, including the EU, nation-states, social provision, unions, and political parties. Readings on the European Union, monetary politics, Germany, France, and Spain will be drawn from both scholarly sources and contemporary analyses of political events.

**POLS 53001. Senior Writing Seminar**

(3-0-3)

Specific topics and titles vary. Recent offerings have included:

*Religion and the Constitution*

The seminar centers on constitutional cases and other materials relating to the role of religion in American life and society. Students will be asked to write short papers and report on selected constitutional cases related to the First Amendment's religion clauses. These cases and reports will constitute the seminar's main focus. The emphasis is on dialogue and discussion, underscoring the critical importance of the fine art of conversation. Students who have taken American Constitutional Law are especially invited to take the seminar.

*Causes of War*

Why do groups of people systematically kill other groups of people? War is perverse, tragic, and compelling. War's causes must be studied to prevent it when possible and to prepare for it when necessary. This course examines the causes of interstate and intrastate/ethnic war. The central theme and question of the course is assessing the extent to which wars are caused by accidents, misperceptions, and miscalculations. If misperceptions and miscalculations are prime drivers of war, then many policy prescriptions seem to offer the hope of reducing the frequency of war. On the other hand, if the cause of war is more often deliberately aggressive states, groups, and leaders, then must we place our hopes in deterrence alone? We will see as we examine a number of case studies including WWI, WWII, Vietnam, the Gulf War, Rwanda, the former Yugoslavia, and those you research for your papers. We may also cover terrorism, Iraq, Korea, and India-Pakistan, depending on how things unfold.

*U.S. Strategy*

This course explores the key issues of national security policy that the United States is likely to grapple with in the next decade. We will examine core U.S. interests, threats to these interests, and policies for minimizing the danger posed by these threats. Topics include the war on terrorism; prospects for peace and conflict in Europe, the Middle East, and Asia and the U.S. role in maintaining stability in those

## PROGRAM OF LIBERAL STUDIES

regions; sources of and policies for dealing with ethnic and civil conflicts; roles and requirements for U.S. conventional forces; U.S. nuclear strategy and force requirements; national missile defense; and the dangers posed by the proliferation of weapons of mass destruction and policies for dealing with these dangers. The course will provide background on the challenges the United States faced during the previous century and the policies it pursued to meet them; and will assess fundamental revisions that are required in the 21st century. While primarily concerned with contemporary strategy questions, the course will explore theoretical issues that provide the foundation for U.S. security policy.

**Current Issues of Globalization**

From McDonalds to the International Space Station to deforestation in Brazil, almost any topical issue can be tied into the globalization debate. Students in this class will first explore theoretically the definition of globalization in its political, economic, and social forms. As a counterpoint to current interpretation of globalization and its effects, a number of readings will cover arguably a greater period of international integration—the late 19th century. The latter part of the course will return to more current globalization issues—in particular issues of state sovereignty, the IMF and World Bank, the WTO, immigration, and the environment.

**Political Philosophy and the American Founders**

This seminar will explore the relations between developments in political philosophy in the 17th and 18th centuries and the thought and deeds of the American founders. Three founders of central importance will be considered: Thomas Jefferson, James Madison, and Alexander Hamilton. They will be treated in connection with the philosophies of Locke, the Scottish moral sense school, Montesquieu, and Hume.

**Other Courses**

POLS 35901. Internship  
 POLS 40800. Research Design and Methods  
 POLS 40810. Quantitative Political Analysis  
 POLS 46902. Directed Readings  
 POLS 47905. Research Apprenticeship  
 POLS 58901. Senior Thesis

**GRADUATE COURSES**

Many graduate courses are open to qualified undergraduates by permission.

**COURSE DESCRIPTIONS**

Krista Duttenhaver

**Program of Studies.** The Program of Liberal Studies, Notre Dame's Great Books program, offers an integrated three-year sequence of studies leading to the bachelor of arts degree. Students enter the program at the end of the First Year of Studies.

Fundamental to the program is a conception of a liberal arts education that aims to avoid the separation of the humanities into isolated disciplines. The program seeks to provide a unified undergraduate education in all of the liberal arts, including music and the natural sciences. For this reason, the program is not to be equated with a "general humanities" educational program. The study of literature, philosophy, natural and social science, theology, history, and the fine arts will take place within a larger unifying conception of the liberal arts that cuts across many of the disciplinary boundaries suggested by these terms. Because the goal of the program is to provide more than an introduction to various subject matters, none of the tutorials or seminars stands alone in the program. The curriculum grows organically over the three years, with each course presuming all of its predecessors.

Although the program provides education in the liberal arts, it also considers the liberal arts in themselves as insufficient for a complete education. The liberal arts are the critical tools of learning, but they are also to be related to the larger search for genuine understanding and philosophic wisdom. Philosophy, which explores the basic questions of epistemology, ethics, and politics, is also related to the claims of the Christian tradition. The program maintains specific tutorials in the various disciplines to enable the relationships among them to develop systematically and also to foster a concern with what unifies or transcends them.

The normal method of instruction in the program is through the reading and discussion of primary texts. The student is asked to take an active role in the learning process. Particularly in the seminar, the authors of the great books are considered to be the primary teachers.

The program requires writing throughout the curriculum, especially in the tutorial classes. In the final semester, all students are required to write a senior essay, usually involving extensive research, under the direction of a faculty advisor. The senior essay offers students a particularly intensive writing experience and an opportunity to investigate in depth a specialized topic of interest.

Despite the program's 66-credit curriculum, program students may carry second majors, supplementary majors, minors, and concentrations, and they may participate in international study programs.

Students normally declare a PLS major by the beginning of April of the first year. Declaration of major forms are available by early March in the department office (215 O'Shaughnessy) and website (pls.nd.edu). Students interested in entering the program are urged to complete the University science and mathematics requirements in the first year. Students may join the program after the beginning of the sophomore year, although this requires one to make up one or more courses.

**Program of Studies.** Psychology is the scientific study of the behavior of organisms with a primary focus on human behavior. It is concerned with the biological and environmental determinants of behavior as reflected in the study of physiological, sensory, perceptual, cognitive, motivational, learning, developmental, aging, and social processes. The undergraduate program seeks a balance between exposure to basic psychological principles and theories and their extension to the applied areas such as child education, counseling, mental retardation, and behavioral deviancy.

The undergraduate courses are intended to meet the needs of students who plan to (1) major in psychology and later attend graduate school in psychology or affiliated fields, (2) major in psychology as part of a general cultural program, (3) obtain training in psychology as a special supplement to their major interest or (4) use psychology to satisfy social science requirements or electives.

One of the department's main features is an emphasis on opportunities for close faculty-student involvement in research projects at the undergraduate level. The research specialties in which majors may become involved range from basic research in such areas as psychophysics, human and animal learning, child development, aging, and psycholinguistics, to applied research in a community setting. Students planning to

do graduate work in psychology will plan their program in close coordination with their faculty advisors.

**Undergraduate major.** The psychology major requires a minimum of seven three-credit courses, two four-credit courses (30100 and 30160) and one one-credit course (20010), and, therefore, a minimum of 30 credit hours.

The specific requirements comprising the minimum 30 credit hours are as follows. All majors are required to take three credits of PSY 10xxx, Introductory Psychology (for freshmen), or PSY 20xxx or 20001, Introductory Psychology (for upper-class students) as a prerequisite for the content psychology courses. In addition, all psychology majors are required to take PSY 30100, Experimental Psychology I: Statistics (four credits), and PSY 30160, Experimental Psychology II: Research Methods (four credits). Majors then have a choice in that they are required to complete two of the following five courses in the Social and Developmental Processes (CLASS A): PSY 30200, Developmental Psychology; PSY 30600, Social Psychology; PSY 30300, Personality; and PSY 30310, Abnormal Psychology; and PSY 30340, Cross-Cultural Psychology. Similarly, majors are required to complete two of the following five courses in the Biological and Learning Processes (CLASS B): PSY 30500, Physiological Psychology; PSY 30430, Learning and Memory; PSY 30440, Sensation and Perception; PSY 30400, Cognitive Psychology; and PSY 30510, Behavioral Genetics. In their senior year each major must take two content courses at the 40xxx level, which are small, in-depth discussion-oriented seminars generally in the instructor's specific area of expertise. All 40xxx-level seminars are designated writing-intensive courses, satisfying the College of Arts and Letters writing requirement. (See the introductory portion of the Arts and Letters section.) PSY 47900, Special Studies, cannot be used to satisfy the 40xxx-level major requirement. Finally, in the semester following their declaration of a major in psychology, new majors are expected to participate in a one-credit-hour seminar called PSY 37900, Psychology: Science, Practice, Policy, which provides an introduction to the department and the faculty.

**Note:** PSY 37900 or PSY 47900, Special Studies cannot be used to satisfy any of the 30xxx-level or 40xxx-level courses. However, these credits are strongly recommended for any students intent on pursuing a graduate career in psychology. In addition, even though Introductory Psychology (PSY 10xxx, PSY 20xxx, or PSY 20001) is a prerequisite for the content area courses, it does not fulfill any of the 30-credit-hour requirements for the major.

**COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Psychology](#) heading.

## ROMANCE LANGUAGES AND LITERATURES

## Romance Languages and Literatures

### Chair:

Theodore J. Cachey

### Director of Graduate Studies:

John P. Welle

### Assistant Chair and Director of Undergraduate Studies:

Shauna Williams

### Professors:

José Anadón; Maureen Boulton; Theodore J. Cachey; Bernard Doering (emeritus); Julia V. Douthwaite (Assistant Provost, Campus International Development); Kristine Ibsen; Carlos Jerez Farrán; Dayle Seidenspinner-Núñez (Associate Dean, Arts and Letters); John P. Welle

### Associate Professors:

Thomas Anderson; Paul F. Bosco (emeritus); JoAnn DellaNeve; Ben Heller; Encarnación Juárez-Almendros; Louis MacKenzie; Christian R. Moevs; María Rosa Olivera Williams; Catherine Perry; Alain Toumayan

### Assistant Professors:

Samuel Amago; Vittoria Bosco (emerita); Patricio Boyer; Isabel Ferreira Gould; Marisel Moreno; Alison Rice; Juan Vitulli

### Associate Professional Specialists and Concurrent

#### Lecturers:

Geraldine Ameriks, Marie-Christine Escoda-Risto; Janet Fisher-McPeak; Patrick I. Martin; Paul McDowell; Shauna Williams

### Assistant Professional Specialists and Concurrent

#### Lecturers:

María Coloma; Giovanna Lenzi-Sandusky; Elena Mangione-Lora; Ivis Menes; Odette Menyard; Karolina Serafin; Sandra Teixeira; Andrea Topash Ríos; Patrick Vivirito

### Visiting Assistant Professional Specialists and

#### Concurrent Lecturers:

Alessia Blad; Johara Sonza

**Program of Studies.** The Romance languages derive from Vulgar Latin spoken throughout the Roman Empire. A major course of study is offered in French, Italian, and Spanish. The study of foreign languages, literatures, and cultures provides educational opportunities relevant to an increasingly interdependent world. A crucial component of a liberal education, the acquisition of foreign-language skills enhances our powers of communication and serves to introduce us to the enduring cultural achievements of other peoples. Moreover, the study of a foreign language broadens our mental horizons, encourages us to think and act more globally, and stimulates our understanding of the traditions of other nations. Elementary and intermediate courses develop the students' ability to understand, speak, read, and write a foreign language with facility and confidence.

Upper-division courses present a wealth of literary, historical, and cultural traditions and emphasize the nature and development of national cultures. Many courses focus on the literature and culture of certain historical periods. Others trace the development of

literary genres or examine a theme across periods and genres. And still others inculcate the critical and analytical skills necessary for an informed interpretation of foreign language texts. Participation in Notre Dame's international study programs in Brazil, Chile, France, Italy, Mexico, and Spain (see the International Study Programs section of this *Bulletin*) is highly recommended although not required to pursue a major in Romance languages and literatures. Majors and supplementary majors in French, Italian, and Spanish must complete 50 percent of their credit hours in the major in residency at Notre Dame and meet the following program requirements.

### PROGRAM IN FRENCH AND FRANCOPHONE STUDIES

#### The Major in French and Francophone Studies

The requirements for a major in French and Francophone Studies consist of successful completion of 30 credit hours or 10 courses above ROFR 20201. Of these 10 courses, no more than three may be at the 20xxx level (20202 and above), six must be in literature/culture studies, and at least half must be taken in residence at Notre Dame. Required among these 10 courses are ROFR 30310 (Textual Analysis), ROFR 30710 and ROFR 30720 (French Literary Surveys I and II), at least two courses at the 40xxx level, and the Senior Seminar (ROFR 53000). ROFR 30310 (Textual Analysis) is the recommended prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this *Bulletin* for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credits satisfy the language requirement only and may not be applied to the major.

#### The Supplementary Major in French and Francophone Studies

The requirements for a supplementary major in French and Francophone Studies consist of successful completion of 24 credit hours or eight courses above ROFR 20201. Of these eight courses, no more than three may be at the 20xxx level (20202 and above), six must be in literature/culture studies, and at least half must be taken in residence at Notre Dame. Required among these eight courses are ROFR 30310 (Textual Analysis), ROFR 30710 and ROFR 30720 (French Literary Surveys I and II), and at least two courses at the 40xxx level or above, one of which may be the Senior Seminar (ROFR 53000). ROFR 30310 (Textual Analysis) is the recommended

prerequisite for the survey courses (ROFR 30710 and ROFR 30720) and must be completed by the end of junior year. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the required courses ROFR 30310, ROFR 30710, and/or ROFR 30720 (see the Angers pages in this *Bulletin* for a description of those courses and their equivalencies at Notre Dame). Any other substitution will require the approval of the Undergraduate Coordinator in French. ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credits satisfy the language requirement only and may not be applied to the major.

#### The Minor in French and Francophone Studies

The requirements for a minor in French and Francophone Studies consist of successful completion of 15 credit hours or five courses, taught in French, above ROFR 20215. Of these five courses, no more than two may be at the 20xxx level (20300 and above). Required among these five courses are: ROFR 30710 or ROFR 30720 (Survey of French Literature I or II) and one 40xxx-level course in literature or culture from a period not covered by the survey taken (i.e., ROFR 30710 and one 40xxx-level course covering a period after the 17th century, or ROFR 30720 and one 40xxx-level course covering a period before the 18th century). This 40xxx-level course and at least one other course must be taken in residence at Notre Dame. The requirement of ROFR 30720 (French Literary Survey II) may be waived if students take both ROFR 373AF and ROFR 374AF in Angers—that is, two advanced courses on 19th- and 20th-century French literature. Preapproved courses at the Université Catholique de l'Ouest in Angers (IALH 1.1, 1.2, 4.2, and 6.1) may also fulfill the requirement of ROFR 30710 or ROFR 30720 (see the Angers pages in this *Bulletin* for a description of those courses and their equivalencies at Notre Dame). ROFR 30320 (Advanced Grammar and Writing) is strongly encouraged. AP credits satisfy the language requirement only and may not be applied to the minor.

#### The Honors Track in French

The honors track major consists of 33 credits or 11 courses. In addition to the general requirements for the major, honors track students must complete an 11th course at the graduate level with a grade of A- or higher, in which they will write a substantive research paper that constitutes the honors thesis. By invitation only, highly motivated students may consider the option of taking a semester-long directed reading tutorial as the 11th course, completing an honors thesis under faculty direction.

French majors are admitted to the honors track by invitation, although qualified students may petition for admission in the second semester of their junior year. To be eligible for the honors track, students

## ROMANCE LANGUAGES AND LITERATURES

must be first majors with a minimum GPA of 3.7 in French and have completed at least seven courses toward the major by the end of their junior year. They must also receive the written support of a professor in at least one of the required literature courses (ROFR 30310, ROFR 30710, or ROFR 30720). For full consideration, students should contact the assistant chair of the Department of Romance Languages and Literatures no later than March 15 of their junior year; applications from eligible seniors will be accepted through October 1.

### Combined B.A./M.A. Program in French

The Department of Romance Languages and Literatures offers its majors in French the opportunity to participate in its graduate program through a combination B.A./M.A. degree in French. This program requires students to take 30 credit hours during the normal four-year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, take the qualifying exam given to all first-year graduate students, and apply to the Graduate School for admission during the Spring semester. B.A./M.A. students are eligible for a teaching fellowship during their fifth year that includes a tuition waiver and a generous teaching stipend. Well qualified students who are interested in this program should contact the director of Graduate Studies and/or the graduate coordinator in French at the beginning of their junior year.

### PROGRAM IN ITALIAN LITERATURE AND CULTURE

The undergraduate program in Italian offers a Major, a supplementary major, and an honors track major in each of two possible concentrations: (1) Italian literature and culture; (2) Italian Studies. In addition, the program also offers (3) a minor in Italian, and (4) a combined B.A./M.A. in Italian.

#### (1) *Literature and Culture Concentration*

##### The Major in Italian: Literature and Culture Concentration

The major in Italian with a concentration in literature and culture requires 30 credits or 10 courses at the 20xxx level or above, including no more than two 20xxx-level courses (ROIT 20215 counts as two courses for the major), ROIT 30711 (Medieval-Renaissance Italian Literature and Culture), ROIT 30721 (Modern Italian Literature and Culture), ROIT 53000 (Italian Seminar), and a minimum of five elective ROIT courses in Italian literature or culture at the 30xxx or 40xxx level or above. ROIT 30310 (Textual Analysis/Advanced Grammar Review) is recommended for all majors. A maximum of two of these elective ROIT courses may be conducted in English or with texts in translation, or may be substituted by courses on Italian subjects originating in other disciplines or departments

(for example, architecture, art history, music, or history). Equivalent Italian language, literature, or culture courses from foreign study programs or other universities may be substituted for any of the courses by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

##### The Supplementary Major in Italian: Literature and Culture Concentration

Supplementary majors in Italian with a concentration in literature and culture are expected to demonstrate competency in the language and to complete 24 credits or eight courses at the 20xxx level or above, including no more than two 20xxx-level courses (ROIT 20215 counts as two courses for the supplementary major), ROIT 30711 (Medieval-Renaissance Italian Literature and Culture), ROIT 30721 (Modern Italian Literature and Culture), ROIT 53000 (Italian Seminar), and a minimum of three elective ROIT courses in Italian literature or culture at the 30xxx or 40xxx level or above. ROIT 30310 (Textual Analysis/Advanced Grammar Review) is recommended for all supplementary majors. A maximum of two of these elective ROIT courses may be conducted in English or with texts in translation, or may be substituted by courses on Italian subjects originating in other disciplines or departments (for example, architecture, art history, music, or history). Equivalent Italian language, literature, or culture courses from foreign study programs or other universities may be substituted for any of the courses by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

##### The Honors Track Major in Italian: Literature and Culture Concentration

The honors track major in Italian with a concentration in literature and culture consists of 33 credits or 11 courses, including all the requirements for the major, a GPA in the major of at least 3.7, plus a substantial final essay, to be written in Italian for a graduate course or for ROIT 58000, Honors Thesis Direction, which will constitute the 11th course. Majors are admitted to the honors track by invitation, but qualified students may petition their adviser for admission in the second semester of their junior year. No students will be accepted to the honors track after October 1 of their senior year.

#### (2) *Italian Studies Concentration*

##### The Major in Italian: Italian Studies Concentration

The major in Italian with a concentration in Italian Studies requires 30 credits or 10 courses at the 20000 level or above, to be chosen as follows: Five courses must be ROIT courses in Italian language, literature, and culture and taught in Italian, including at least one of ROIT 30711 (Medieval-Renaissance Italian Literature and Culture) or ROIT 30721 (Modern Italian Literature and Culture), and one course at the 40000 level or above; ROIT 41590 (Italian Theatre Workshop) does not count toward this major. No

more than two of these five courses may be at the 20000 level (ROIT 20215 counts as two courses for the major). The other five courses must be on Italian subjects or strictly relevant to Italian culture, but must originate in at least one and no more than three disciplines or departments other than ROIT, such as history, art history, classics, FTT, music, or political science (the courses may of course be cross-listed with ROIT). Four of these five courses must be at the 30000 level or above, and include at least one course at the 40000 level or above; no more than one of the five may be at the 20000 level. In order to create a coherent program when selecting these courses, the student will form a committee of one or more faculty advisers, including at least one from ROIT, and must declare the major not later than their junior year. Equivalent courses from foreign study programs or other universities may be substituted by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

##### The Supplementary Major in Italian: Italian Studies Concentration

The supplementary major in Italian with a concentration in Italian Studies requires 24 credits or eight courses at the 20000 level or above, to be chosen as follows: Four courses must be ROIT courses in Italian language, literature, and culture and taught in Italian, including no more than two courses at the 20000 level; ROIT 41590, Italian Theatre Workshop, does not count toward this supplementary major. The other four courses must be on Italian subjects or strictly relevant to Italian culture, but must originate in at least one discipline or department other than ROIT, such as history, art history, classics, FTT, music, or political science (the courses may of course be cross-listed with ROIT). Three of these four courses must be at the 30000 level or above; no more than one may be at the 20000 level. In order to create a coherent program when selecting these courses, the student will form a committee of one or more faculty advisers, including at least one from ROIT, not later than the first semester of their senior year. Equivalent courses from foreign study programs or other universities may be substituted by permission. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

##### The Honors Track Major in Italian: Italian Studies Concentration

The honors track major with a concentration in Italian Studies consists of 33 credits or 11 courses, including all the requirements for the major in Italian with a concentration in Italian Studies, a GPA in the major of at least 3.7, plus a substantial final essay, to be written for a graduate course or for ROIT 58000, Honors Thesis Direction, which will constitute the 11th course. The course or topic will be selected in consultation with the student's advisory committee for the major. Majors are admitted to the honors track by invitation, but qualified students may petition their adviser for admission in the second semester of their junior year. No students

## ROMANCE LANGUAGES AND LITERATURES

will be accepted to the honors track after October 1 of their senior year.

### (3) *The Minor in Italian*

The minor in Italian comprises 15 credits or five courses at the 20xxx level or above, including at least three courses at the 30xxx or 40xxx level. Three of the five courses must be ROIT courses in Italian language, literature, and culture, and taught in Italian; the fourth and fifth courses may be on Italian literature and culture taught in English or with texts in translation, or may be courses on Italian subjects originating in other disciplines or departments (for example, art history, architecture, or history). Courses from foreign study programs or other universities may be substituted by permission, but at least two courses for the Italian minor must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

### (4) *The Combined B.A./M.A. Program in Italian (Literature and Culture Concentration)*

The Department of Romance Languages and Literatures offers its majors in Italian with a concentration in literature and culture the opportunity to participate in its graduate program through a combination B.A./M.A. degree in Italian. This accelerated program requires students to take 30 credit hours at the 20xxx level or above during the normal four year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, the qualifying oral exam given to all first-year graduate students, and apply to the Graduate School for admission during the spring semester. B.A./M.A. students are eligible for a teaching fellowship during their fifth year that includes a tuition waiver and a generous teaching stipend. Students should have a strong academic record and substantial progress toward their Italian major completed by the second semester of their junior year. It is imperative that students interested in this program contact the director of Graduate Studies and/or the graduate coordinator in Italian at during their junior year, before registering for the first semester of their senior year.

## PROGRAM IN IBERIAN AND LATIN AMERICAN STUDIES

All majors in Spanish are required to take a core sequence consisting of ROSP 30310 (Textual Analysis) and one course in each of the following areas of Spanish and Spanish American Literature: ROSP 30710 (Early Peninsular), ROSP 30720 (Modern Peninsular), ROSP 30810 (Early Spanish American) and ROSP 30820 (Modern Spanish American). These courses may be substituted with equivalent senior-level courses with departmental approval. AP credit may not be applied toward the major.

### The Major in Spanish

The major in Spanish requires 30 credits or 10 courses 20202 and above, including the required core sequence described above or equivalents, two senior-level courses, and the Senior Seminar. Equivalent courses from international study programs or other universities may be substituted with departmental approval. Fifty percent of the credits for the major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

### The Supplementary Major in Spanish

Supplementary majors in Spanish are required to complete 24 hours or eight courses 20202 and above, including the required core sequence described above or equivalents and one senior-level course. Equivalent courses from international study programs or other universities may be substituted with departmental approval. Fifty percent of the credits for the supplementary major must be taken in residence at Notre Dame. AP credit may not be applied toward the major.

### Minor in Portuguese

The minor in Portuguese and Brazilian Studies consists of 15 credits, five courses, 3 credits each. Prerequisites are ROPO 10101 and 10102, or 10103 and 10104, or 10105 and 10106. Requirements include five courses in Portuguese language and Luso-Brazilian literature beyond the prerequisites, ROPO 20201 and 20202, and three additional courses at the 30xxx/40xxx level. Three of the five courses must be in Portuguese language and/or Luso-Brazilian literature, film, and culture taught in Portuguese; the fourth and fifth courses may be on Luso-Brazilian literature, film, and culture taught in English; and the fourth and fifth courses may be on a Portuguese or Brazilian subject in another discipline (for example, anthropology, history, Latin American Studies, FTT, political science, Romance languages and literatures, theology, etc.). Courses from foreign study programs or other universities may be substituted by permission, but at least three courses for the Portuguese minor must be taken in residence at Notre Dame. AP credit may not be applied toward the minor.

### Interdisciplinary Minors

Spanish majors are encouraged to pursue allied courses offered through area studies and other interdisciplinary minors. Spanish courses offer a particularly appropriate complement to the Latin American Studies, Latino Studies, and European Studies programs. See the section on Interdisciplinary Minors in this *Bulletin* for more details. Majors may also apply one senior-level ROPO course in Luso-Brazilian culture and literature toward their elective credits.

### The Honors Track in Spanish

The honors track major consists of 33 credits or 11 courses. In addition to the general requirements for the major, honors track students must complete an 11th course at the graduate level with a grade of

A- or higher, in which they will write a substantive research paper that constitutes the honors thesis. By invitation only, highly motivated students may consider the option of taking a semester-long directed reading tutorial as the 11th course, completing an honors thesis under faculty direction.

Spanish majors are admitted to the honors track by invitation, although qualified students may petition for admission in the second semester of their junior year. To be eligible for the honors track, students must be first majors with a minimum GPA of 3.7 and at least seven courses toward the major. For full consideration, students should contact the coordinator of undergraduate studies no later than March 15 of their junior year; applications from eligible seniors will be accepted through October 1.

### The Combined B.A./M.A. Program in Spanish

The Department of Romance Languages and Literatures offers its majors in Spanish the opportunity to participate in its graduate program through a combination B.A./M.A. degree in Spanish. This accelerated program requires students to take 30 credit hours 20202 and above during the normal four-year undergraduate period, followed by a total of 30 credit hours of graduate courses taken during the fourth and fifth years of residence. Six credit hours can be counted toward both the undergraduate and graduate degrees. During their senior year, participants in this program take two graduate courses, the qualifying oral exam given to all first-year graduate students, and apply to the Graduate School for admission during the spring semester. During their fifth year, B.A./M.A. students are eligible for a teaching fellowship, which includes a tuition waiver and a generous teaching stipend. Students should have a strong academic record and should have made substantial progress toward their Spanish major by the second semester of their junior year. It is imperative that students interested in this program contact the director of Graduate Studies and/or the graduate coordinator in Spanish at the beginning of their junior year.

## MAJOR IN ROMANCE LANGUAGES AND LITERATURES

The undergraduate major in Romance Languages and Literatures is designed for qualified students who wish to major in two programs (French, Italian, or Spanish). Cross-cultural in focus, the major recognizes the importance of studying the correspondences and differences among various Romance literatures and cultures and of reexamining traditional disciplinary boundaries. The requirements for a major in Romance languages and literatures include competency in two languages and successful completion of 36 credit hours or 12 courses, which must be distributed equally between the two respective language programs as follows:

(1) Two survey courses in each language and literature program (French or Italian); Spanish requires either four survey courses (two in peninsular and two

## SOCIOLOGY

in Latin American) or a combination of two survey courses in one area and two senior-level courses in the other area;

(2) Textual Analysis in one program;

(3) Two 40xxx-level courses in each program (if the survey requirement in Spanish is fulfilled with two senior-level courses, these courses may count for the senior-level requirement in Spanish);

(4) One senior seminar in one program;

(5) Two elective courses in the department (any exception requires permission).

### Placement in Language Courses

For French and Spanish, there is an online placement exam for students who have not already demonstrated language proficiency through national standardized testing, such as the AP or Achievement tests. Students with previous experience are required to take one of these tests before enrolling in their first course in those languages. For Italian or Portuguese placement, please contact the department. The normal prerequisite for a 30xxx-level course is at least one 20xxx-level course or permission of the instructor. The normal prerequisite for a 40xxx-level course is at least one 30xxx-level course or permission of the instructor.

### Policy Regarding Romance Language Placement Examination

The placement examination is designed to place each student at an appropriate level within a language sequence. Obtain placement examination information from the Department of Romance Languages and Literatures.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Romance Languages and Literatures](#) heading.

## Sociology

### Chair:

### Associate Professional Specialist:

Curt Sobolewski

### Assistant Professional Specialist:

Ann R. Power

**Program of Studies.** The Department of Sociology has a national reputation and its scope of interest is worldwide. Yet it also is intensely concerned with the U.S. cultural and social experience and its problems.

The requirements for a sociology major reflect a program that offers both structure and flexibility. The program is designed to acquaint the student with the core of the discipline and with areas of specialization which can be studied in some depth.

Sociology deals with human interaction on the group level wherever it may occur: in family and business, law and politics, medicine and religion, and a host of other settings. What can you do with a sociology degree? Notre Dame's survey of alumni who majored in sociology revealed that they are employed as university professors, corporation executives, real estate agents, insurance agents, consultants, politicians, medical administrators, teachers, social workers, business managers, religious ministers, and many other occupations.

The requirements for the sociology major are as follows.

(a) Students must take a minimum of 31 credit hours (usually 10 courses and the proseminar—one credit) offered by the department. Students are urged to start their major as early as possible but can declare a major or change majors at any time as long as they are able to fulfill the requirements.

(b) Central to the requirements for the major are the following four courses:

SOC 30900. Foundations of Sociological Theory  
SOC 30902. Methods of Social Research  
SOC 30903. Statistics for Social Research  
SOC 33090. Proseminar (1 credit)

The above required courses should be taken as soon as possible, especially before taking any 40xxx-level courses.

(c) Each major must take a minimum of three 40xxx-level lecture or seminar courses. Internships (SOC 45xxx) and Directed Readings in Sociology (SOC 46xxx) do not fulfill this requirement.

(d) Each major must also acquire at least 12 credits of sociology elective courses, usually consisting of four 3-credit courses. These courses may be at any level, 10xxx–40xxx.

The department prides itself on its program of close personal advising, in which each major can build a program of courses with the help of a faculty advisor and undergraduate director. Advisors willingly give much time to aid students in planning their course schedules and careers. Each major is assigned to a faculty advisor whose own academic interests dovetail with those of the student. Each student, working closely with a faculty advisor, can map out a personalized program of study that will satisfy the department's requirements for the major and simultaneously accommodate the student's academic interests and career aspirations.

The sociology major can be pursued along with another major. Many of our students combine sociology with a major in business, economics, political science, preprofessional, psychology, theology, etc. It is important to note that students in the Mendoza College of Business who wish to major in sociology in addition to their business major do not have to meet all the other requirements of the College of Arts and Letters.

Of particular interest to students in recent years have been the Gender Studies Program; the program of the International Institute for Peace Studies; the Computer Applications Program; the Hesburgh Program in Public Service; and Education, Schooling, and Society. All of the above are readily combined with a sociology major.

The department has an active Epsilon Chapter of Alpha Kappa Delta, the international sociology honor society. Students interested in the various

## SOCIOLOGY

phases of the program are encouraged to contact the director of undergraduate studies (Room 823 Flanner Hall) at any time.

The department also encourages students to join the University of Notre Dame Sociology Club. The purpose of this club is to enrich the sociology major. This student organization sponsors activities oriented to careers in sociology and sociology-oriented topics, to becoming professionally active while in college, and to student interests in society, as well as to purely social activities.

**Sociology Undergraduate Honors Track.** The Sociology Department offers an honors track to students who excel in their sociological studies. Students must have taken at least one introductory course in sociology and be recommended by a faculty member. Interested students may also initiate the process by contacting the director of undergraduate studies. Identified students will receive a letter of invitation from the director of undergraduate studies to participate in the program. In addition to the usual requirements of the sociology major, students in the honors track are required to take at least one graduate-level course in sociology once they have completed the required 30xxx-level courses. When appropriate, a student may be given permission to take the graduate-level statistics sequence rather than beginning with the undergraduate statistics course (SOC 30903). In their senior year, students in the sociology honors track are required to enroll in the Sociology Capstone Project (SOC 48009) for at least one semester and, under faculty mentors, carry out independent research projects. Students will complete a senior honors thesis based on this research and submit their manuscripts to *Sociological Voices* or another journal for publication. Participants are also expected to attend at least one regional sociology conference during their junior or senior year. Continuation in the program is subject to periodic review.

**Writing in Sociology.** The College of Arts and Letters is proud of the level of writing its undergraduates achieve. One way in which the college supports students' writing development is by requiring each department to offer at least one writing-intensive course. SOC 30900, Foundations of Sociological Theory, is the Sociology Department's writing-intensive course. There, students reflect on the quality of their own and others' writing and learn to articulate a sociological perspective in writing. Instructors in this course may spend more time doing textual analyses, going over students' writing, holding in-class writing workshops, and giving opportunities to do re-writes than in other courses. The department's 43xxx-level courses also demand high-level writing within a sociological perspective. In addition, students may opt to develop their research and writing skills by enrolling in the department's Capstone Project, where they carry out independent research and write an honors thesis. Also, any sociology major may submit a

paper to *Sociological Voices*, a journal of research by undergraduates at Notre Dame founded and run by the Sociology Department, to be considered for publication.

**Course Listings by Area of Research Focus.** The following is a list of courses offered by the Sociology Department, organized by research focus. Students are encouraged (but not required) to choose at least one area of concentration in the major in order to deepen their knowledge of that area. Students are also encouraged to pursue research opportunities within their area of concentration.

### GENERAL INTRODUCTIONS TO SOCIOLOGY

10002. Understanding Society  
10033. Introduction to Social Problems  
12002. Understanding Society Tutorial  
20002. Understanding Society  
20033. Introduction to Social Problems

### REQUIRED COURSES FOR SOCIOLOGY MAJORS

30900. Foundations of Social Theory  
30902. Methods of Social Research  
30903. Statistics for Social Research  
33090. Sociology Proseminar

### INDIVIDUAL WORK WITH FACULTY/ SUPERVISOR

37099. Special Studies in Sociology  
45000. Sociology Internship  
46000. Directed Readings in Sociology  
48000. Directed Research in Sociology  
48001. Community-Based Research  
48009. Sociology Honors Capstone Project

### CLASS, GENDER, RACE, ETHNICITY

20810. Gender Roles and Violence in Society  
20838. Social Inequality  
30806. Race and Ethnicity  
30846. Today's Gender Roles  
43839. Unequal America

### CRIMINOLOGY, DEVIANCE, AND SOCIAL CONTROL

20732. Introduction to Criminology  
20740. Sociology of Terrorism  
30743. Sociology of Deviance  
40743. Deviant Behavior  
43730. Crime and Deviance in Ideological Perspectives  
43732. Controversies and Crises in Modern Criminology  
43752. Theoretical Criminology  
48701. Research on Moral Decision Making in Group Settings

### CULTURE

20100. Introduction to Cultural Sociology  
20101. Sociology of Sexual Behavior  
20720. Social Psychology  
30109. Sociology of Culture  
30151. Popular Culture  
43113. Cultural Sociology  
43171. Materializations of America

### DEMOGRAPHY

43402. Population Dynamics

### ECONOMICS

20501. Globalization and Social Movements  
20502. Today's Organizations  
20533. Responding to World Crisis

30514. Social Movements  
30564. Global Sociology  
30567. Chile in Comparative Perspective  
43524. Employment in a Changing Economy  
43553. Building Democratic Institutions  
43558. Comparing European Societies  
43563. Nationalism and Globalization  
43590. Sociology of Economic Life  
48501. Analysis of Collective Contention I  
48502. Advanced Analysis of Collective Contention II

### EDUCATION

20228. Social Inequality and American Education  
30237. Sociology of Teaching  
43240. Research on School Effects

### FAMILY

20342. Marriage and Family  
43333. Sociology of Divorce and Remarriage  
43342. Family Development  
43345. World Families and Gender  
43346. Family Problem Solving  
43377. Families and Their Interrelationships with Gender

### LATINO STUDIES

20479. Introduction to Latinos in American Society  
43162. The Aesthetics of Latino Cultural Expression  
43404. International Migration: Mexico and the United States  
43473. Latinos in American Society  
43479. International Migration and Human Rights

### RELIGION

30672. Religion and Social Life  
30675. Religion, Modernity, Secularization, Religious Persistence  
43662. Religion and American Society

### SOCIAL PSYCHOLOGY

10722. Introduction to Social Psychology  
20722. Introduction to Social Psychology  
33001. Society, Self, and Catholic Social Tradition  
43719. Self, Society, and the Environment  
43774. Society and Identity

### SUMMER ONLY

30019. Sociology of Sport  
43849. Sociology of Masculinity

### THEORY/METHODOLOGY

23901. Power and Identities  
33904. Workshop: Professional Writing and Publishing in Sociology  
43948. Sociology of the Body

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Sociology](#) heading.

**Graduate Courses.** Senior majors may take any 60000-level graduate course with the permission of the instructor.

## THEOLOGY

## Theology

*Chair:*

John C. Cavadini

*Associate Professional Specialists:*

Rev. Michael E. Connors, C.S.C.; Matthew C. Zyniewicz

**THE THEOLOGY PROGRAM  
UNIVERSITY OF NOTRE DAME**

At the University of Notre Dame, the study of theology is carried out in the spirit of the classic formulation of theology as "Faith seeking understanding." The Theology Department dedicates itself to critical reflection on the historic faith of Catholic Christianity in service to our students, to the larger church, to the world of the academy, and for the general public.

**Why major in theology?**

Some students study theology to prepare for a career in high school teaching or religious ministry. Others plan to proceed to graduate work in theology or religious studies in anticipation of a university career. Most students, however, major in theology simply because they find the study fascinating and rewarding. As an inherently interdisciplinary field, theology is an ideal liberal arts major. Through close study of influential theological and religious texts, rituals, and artifacts, students learn about their own faith and our common culture.

Many other students elect theology as a secondary major whose focus on the central questions of human existence complements and extends their commitment to their first major in science, engineering, business, architecture, or in another discipline within the College of Arts and Letters. Professional schools increasingly appreciate how such diverse and balanced preparation enhances a candidate's profile.

The Department of Theology welcomes students pursuing these varied interests and goals. Students work with faculty mentors who are renowned leaders both in teaching and research, and have the opportunity to explore a wide range of subjects, including the history of Christian thought and practice, scripture, spirituality, systematic theology, liturgy, ethics, Judaism and the eastern religions. The smaller class size of most upper-division courses creates a conducive environment for the creative exploration of ideas.

**What are the requirements for the theology major?**

Beyond the six theology credits required of every Notre Dame student, primary majors take 25 hours; supplementary majors take 19 hours. Each of these

majors combines formally required courses and electives. To count in the major, a course must be 3 credits and graded. The two University requirements (6 credits) are generally prerequisite for upper-level courses, but see department for specific details.

The formally required courses for the primary and supplementary major are identical, and total 10 credit hours: the two-semester sequence in the history of Christian thought; an upper-division scripture course; and the one-credit hour proseminar offered each spring, which introduces students to the variety of topics and approaches covered in the study of theology. All courses in the theology major, primary or supplementary, must be 3-credit courses and graded (with the exception of the proseminar).

**SUMMARY OF THE PRIMARY MAJOR:**

First University requirement: THEO 10001 (first-year) or 20001 (sophomore, junior, senior) or 13183 (University seminar) or 20002 (honors).

Second University requirement: a THEO course listed between 20101 and 29999.

THEO 40201 and 40202—Christian Traditions I and II

THEO 40101 or 40108—Hebrew Scriptures or New Testament

Electives (15 hours at the upper level)

THEO 43001—Proseminar (1 credit)

Including the University requirements, the primary major thus consists of 31 credit hours.

**SUMMARY OF THE SUPPLEMENTARY MAJOR:**

First University requirement: THEO 10001 (first-year) or 20001 (sophomore, junior, senior) or 13183 (University seminar) or 20002 (honors).

Second University requirement: a THEO course listed between 20101 and 29999.

THEO 40201 and 40202—Christian Traditions I and II

THEO 40101 or 40108—Hebrew Scriptures or New Testament

Electives (9 hours at the upper level)

THEO 43001—Proseminar (1 credit)

Including the University requirements, the supplementary major thus consists of 25 credit hours.

**What other programs are offered?***The Theology Honors Program*

The Theology Department offers a special program for particularly gifted undergraduate majors who seek a deeper, more sustained experience in the major through the completion of a thesis project. Each spring semester, the junior class of theology majors will be invited to apply; those selected will be assigned a thesis director from among the faculty of the department. A minimum grade point average of

## THEOLOGY

3.7 within the major is normally expected. Seniors in the Honors Program will enroll in a one-credit Honors Colloquium as well as a one-credit honors research course in the fall semester, and a three-credit Honors Thesis Writing course in the spring semester, culminating in the submission of a 50-page thesis. The Honors Program will normally consist of 36 hours, as compared to 31 hours in the regular primary major. To receive the honors designation on their transcript, students must earn an A- or higher grade on their thesis. A full description of the Theology Honors Program is available on the departmental website (see below for address).

### *The Minor in Theology*

The minor is recognized by the University on the student's transcript. To fulfill requirements for a minor, a student must take 12 credit hours beyond the required 6 hours (for a total of 18 hours). The additional 12 hours must be composed of 3-credit graded courses, which can be taken at the 20xxx, 30xxx, or 40xxx level. The minor in theology is accepted by many parochial schools as adequate preparation for secondary school teaching.

### Contact information

You may reach Prof. David Fagerberg, the director of undergraduate studies in Theology, through Dorothy Anderson at the departmental office:

(574) 631-7811  
 Anderson.6@nd.edu  
 nd.edu/-theo/undergrad/undergraduate.html  
 Department of Theology  
 130 Malloy Hall  
 University of Notre Dame  
 Notre Dame, IN 46556-5601

### WRITING-INTENSIVE REQUIREMENT

THEO 40101 Hebrew Scriptures and 40108 New Testament have been designated writing-intensive courses by the Department of Theology. All majors are required to take one of these courses in fulfillment both of their upper-level scripture requirement within the major and of the College of Arts and Letters' writing-intensive requirement. Students will be expected to work closely with the professor throughout the semester on a significant written project, although specific writing assignments will be designed by the faculty member teaching the course.

### PHILOSOPHY AND THEOLOGY JOINT MAJOR

#### *Director:*

David Fagerberg, Theology

#### *Faculty:*

Additional faculty for the joint major are drawn from the Departments of Philosophy and Theology.

**Program of Studies.** The joint major is intended for undergraduates who are intrigued by philosophical and theological ideas and who have an equal commitment to both disciplines. It seeks to equip such students to handle theology and philosophy adeptly. The major is structured, providing undergraduates

with a suitable introduction to the study of both disciplines, but also flexible, granting students considerable scope for the pursuit of their own interests.

The joint major offers the opportunity for an informed investigation of religious and philosophical ideas and should appeal especially to those who intend to pursue graduate work in philosophy or theology.

The joint major incorporates the University requirements in the two departments and most of the formal requirements of the first majors in theology and philosophy. Students in the joint major will take the two-semester sequence in Christian Traditions and an upper-level course in Scripture. The joint major, however, does not require the one-credit proseminar in theology.

Other formal requirements are peculiar to the joint major. Students will study a classical language for two semesters. (For practical as well as pedagogical reasons, this will normally be Greek or Latin.) Majors will also be expected to take the joint seminar offered each spring. Each seminar, led by a theologian and a philosopher, will examine an issue in which the differing approaches of philosophy and theology may prove fruitful. The topic and instructors will change from year to year. Finally, each major will submit a senior thesis prepared under the direction of two advisors, drawn from each department. At the option of the directors, this thesis may be presented and discussed in an informal colloquium consisting of the other students in the joint major.

The remaining courses in the joint major will be at the discretion of the student. Normally taken at the 40xxx level, there should be an equal distribution in the electives between theology and philosophy. However, students may devote up to six hours within the joint major to additional language work. These hours may add to the classical language previously studied, or used to begin another language of significance for philosophical and theological work.

The joint major differs from a first major in one discipline and a supplementary major in the other in that the latter requires 55 credit hours, whereas the joint major requires 60. Furthermore, the joint major calls for language instruction beyond what the University requires for all undergraduates. Finally, the joint seminars should prove especially challenging, inviting students to explore important topics in an interdisciplinary way. These features should make the joint major particularly attractive to students preparing for advanced study.

#### Requirements in Philosophy:

PHIL 10101 or 20201, and 20xxx-level course (University-required courses; a higher-level course may be substituted for the latter).

PHIL 30301 and 30302. History of Philosophy I and II.

PHIL 30313. Formal Logic.

#### Requirements in Theology:

THEO 10001 or 20001 and 20xxx-level course (University-required courses).

THEO 40201 and 40202. Christian Traditions I and II.

THEO 40101 or 40108. Upper-division scripture course.

Plus:

Classical language (normally Greek)—two semesters.

Joint seminar.

Senior thesis.

18 credit hours of electives (up to six of these may be additional hours in language study).

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Theology](#) heading.

## SUPPLEMENTARY MAJORS, MINORS, AND SPECIAL PROGRAMS

### Supplementary Majors, Minors, and Special Programs

A supplementary major is one that cannot stand alone in qualifying a student for an undergraduate degree but must be taken in conjunction with a primary major. Several departments offer both majors and supplementary majors. They have been described above. Included below are interdisciplinary nondepartmental supplementary majors and minors.

#### CENTER FOR ASIAN STUDIES

##### Director:

Susan D. Blum, Associate Professor, Department of Anthropology

The program in Asian Studies introduces students to the complexity of the continent of Asia. Students select courses in a wide variety of fields, such as anthropology, East Asian languages and cultures, economics, film, television, and theatre, history, political science, and psychology. The Center for Asian Studies also provides enriching activities such as lectures, films, gatherings, and grant opportunities to students interested in Asia.

Students with the supplementary major or the minor in Asian Studies will be very desirable employees of international business or accounting firms, nongovernmental organizations, and service organizations. They will be well prepared for graduate school in a discipline, or for professional school such as law or business. The supplementary major and the minor in Asian Studies provide recognition of students' training in this significant region of the world.

#### THE SUPPLEMENTARY MAJOR IN ASIAN STUDIES

The supplementary major in Asian Studies emphasizes the study of Asia as an integral part of the world today. Students study both its history and current aspects of culture, society, politics, literature, language, religion, etc. Required classes stress an interdisciplinary perspective through cross-listed classes found throughout Notre Dame.

Through the interdisciplinary nature of the major, classes draw from a broad range of topics, enabling the student to come away with a holistic and comprehensive study of Asia, including both humanistic and social scientific approaches to study.

Finally, the program culminates in the senior year with a capstone essay on a student-chosen topic and advised by a faculty member. The curriculum requires 26 credit hours in addition to one year of language study.

##### Requirements for the Supplementary Major:

Prerequisite: One year of study of an Asian language (9–10 credit hours)

Asia-related courses from each of the following disciplines: (Total of 23 credit hours)

At least one semester of an Asian language beyond the first year (3–5 credit hours)

One social science (anthropology, economics, political science, psychology, or sociology) (3 credit hours)

One humanities (theology, philosophy, or English) (3 credit hours)

One history: one class in ancient, early, or modern history (3 credit hours)

One literature (3 credit hours)

Two general electives (fine arts highly recommended) (6 credit hours)

Capstone project during the senior year (3 credit hours)

#### GENDER STUDIES SUPPLEMENTARY MAJOR AND MINOR

##### Director:

Eileen Botting

##### Program Coordinator:

Linnie Caye

**Objectives.** Gender Studies is an interdisciplinary academic program in the College of Arts and Letters at Notre Dame. Gender Studies analyzes the significance of gender—and the cognate subjects of sex, sexuality, race, ethnicity, class, religion, and nationality—in all areas of human life, especially in the social formation of human identities, practices, and institutions. Gender Studies gives scholars the methodological and theoretical tools to analyze gender and its cognates in their chosen disciplines in the arts, humanities, social sciences, and natural sciences. Gender Studies also provides its students and alumni with an intellectual framework in which the analysis of gender and its cognates can be creatively and critically applied to their personal, familial, professional, and civic roles. In the context of the Catholic identity of Notre Dame, Gender Studies facilitates the study of the intersection of gender and religion in the shaping of ethics, culture, and politics. Alongside our diverse array of courses drawn from across the University, our summer internship and academic-credit internship programs emphasize the holistic and practical life applications of a Gender Studies education at Notre Dame.

**Course Requirements.** Students in the supplementary major are required to complete 24 credit hours distributed as follows: GSC 10001/20001 Introduction to Gender Studies (3 credits); GSC 10002/20002 Introduction to Feminist and Gender

Theory (3 credits); one Gender Studies “diversity” course (3 credits); one Gender Studies “humanities” course (3 credits); one Gender Studies “social science” course (3 credits); GSC 45001 Gender Studies Senior Internship or GSC 48001 Gender Studies Senior Thesis (three credits); plus two other Gender Studies courses (6 credits).

Students in the minor are required to complete 15 credit hours distributed as follows: one introductory Gender Studies course, either GSC 10001/20001 Introduction to Gender Studies, or GSC 10002/20002 Introduction to Feminist and Gender Theory (3 credits), plus four other Gender Studies courses (12 credits).

#### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Gender Studies](#) heading.

#### ARTS AND LETTERS/SCIENCE HONORS PROGRAM

In the fall semester of 1983, the University inaugurated an honors program for a small number of outstanding students in the College of Arts and Letters and the College of Science. A limited number of students with academic intents for each college are identified for this program at the time of admission. Although selection criteria include the promise of outstanding academic performance as demonstrated by standardized test scores and high school performance, the program is looking for more than mere academic ability. It hopes to identify students with a deep intellectual curiosity.

The program offers honors sections to fulfill most of the University and college requirements in the students' freshman and sophomore years. At present, there is the yearlong Honors Seminar (satisfying the writing and literature requirements), Honors Calculus, Honors Philosophy, Honors Theology, Honors Biology, Honors Physics, and an array of Honors Social Science courses. Since these courses are restricted to honors students, they are smaller than non-honors sections and are usually taught in a seminar format. The instructors for honors sections are chosen from the most outstanding faculty in each college. After the first year, students' academic work will be mainly centered in their major field (or fields) of study, but two or more honors electives are also taken during these years. In the fall of the senior year, there is an “Honors Thesis/Research Seminar,” which is followed by the “moral problems seminar” in the spring. The fall seminar is intended to be a spur to the students' capstone project, whereas the spring seminar brings the honors students from diverse majors back together for some concluding topical discussions. All honors students will also be expected to complete a special six-hour senior research honors project in their major field of study.

## SUPPLEMENTARY MAJORS, MINORS, AND SPECIAL PROGRAMS

In science, this is the culmination of a research project that is begun earlier, and in arts and letters, it is a two-semester project culminating in a thesis. Those writing senior theses work individually under the direction of a faculty advisor of their choosing in their major field. Funds are available for research projects during summers either at Notre Dame or other universities.

In addition to the more narrowly academic features of the honors program, students will be offered various opportunities for broadening personal, cultural and spiritual growth. Regular colloquia, informal discussions and cultural excursions are available.

Further information on the structure and content of the honors program or on the criteria for admission may be obtained by contacting Prof. Alex Hahn or Prof. Cornelius Delaney, 323 O'Shaughnessy Hall, Notre Dame, IN 46556, 574-631-5398.

### ARTS AND LETTERS PREPROFESSIONAL STUDIES

#### Advisor:

Jennifer Ely Nemecek  
Assistant Dean  
College of Arts and Letters

Arts and Letters Preprofessional Program students are required to complete an arts and letters primary major in addition to the preprofessional supplementary major. The ALPP program provides students who intend to pursue a career in health science with an opportunity to complete a major in the College of Arts and Letters while building a firm foundation in the basics of science. Most students elect the ALPP program because they wish to go on to medical or dental school; however, there are students who intend to pursue other health-related careers or simply prefer the integration of science classes into the arts and letters curriculum. Medical schools encourage prospective applicants to seek a broad, liberal arts education, which enables them to develop skills that will be useful throughout life. The ALPP program provides students with all of the necessary prerequisites to prepare for the Medical or Dental College Admissions Test.

The use of Advanced Placement (AP) to fulfill science course work is strongly discouraged. As a rule, a student may use no more than eight credits' worth of AP toward the ALPP major or 24 credits of transfer credits for transfer students.

Since students should aim to take the Medical/Dental College Admissions Tests in the spring semester of the junior year, students should have completed the following courses by that time: MATH 10350-10360, BIOS 20201-20202 and lab, CHEM 10171-10172 and lab, CHEM 20273-20274 and lab, and PHYS 30210-30220 and lab. Students must also take three upper-level science electives (nine credits) to complete the ALPP program. The following electives are recommended to provide the student with the background

necessary for admission to most medical and dental schools: Genetics (BIOS 20303), Biochemistry (CHEM 40420), Physiology (BIOS 30344 or BIOS 40421), Cell Biology (BIOS 30341), or Microbiology (BIOS 40401). Biochemistry (CHEM 40420) and Physiology (BIOS 33044 or BIOS 40421) are strongly recommended. CHEM 20204, MATH 20340, and PHYS 20140 do not count toward the first three upper-level science electives.

All curricular advising in reference to the ALPP major is conducted by the ALPP advisor in 104 O'Shaughnessy. The sequencing of courses taken throughout the sophomore, junior and senior years is worked out by the student in consultation with the ALPP advisor and the student's departmental advisor so that the best schedule for each individual is arranged. One possible sequence is the following.

### THE PROGRAM OF COURSES

#### First Year

<i>First Semester</i>	
FYC 13100. Composition	3
MATH 10350. Calculus	4
CHEM 10171 and lab. Chemical Principles	4
Foreign Language	3
First Philosophy/First Theology	3

Technology and Society	The Internet and Society; Information Security	1	1
Total Courses (hours)		8 (24)	5 (15)

information technology as a supplement to their primary majors and as a springboard for further professional education or a career in a technology-related field. Technology, Business, and Society (TBS) is a complementary skills program, which is very similar to a minor. Both programs serve as a window in the College of Arts and Letters to the worlds of technology and business.

CAPP, established in the '70s, been a highly successful programs for arts and letters students. In terms of post-graduate job placements, the CAPP experience has been very attractive to employers, which has enabled students to be competitive in the job market. Even more important, however, has been the impact of CAPP on the lives of our majors as they move on to further education or directly into their careers. CAPP graduates commonly report that the experiences and skills they gained from the program have been extremely beneficial in the years since their graduation. TBS is a relatively new program, but student feedback so far has been very positive.

Both CAPP and TBS have three important educational goals for students. One is to provide students with sufficient knowledge of and exposure to technology that they understand the important role it plays in both personal and professional domains. As part of this understanding, students acquire a certain minimum proficiency with computing and information technology systems in two ways: By becoming acquainted the "languages" of technology used to develop technology-based systems; and by

getting practice in the application of such systems to solve important problems or create functional tools.

A second goal of CAPP and TBS is to sensitize students to the ethical issues raised by contemporary uses of computing and information technology. In this goal we follow the recommendations of a recent national steering committee of computing and technology professionals who saw such learning as integral to the undergraduate educational experience. Students, therefore, take one required course from among several options in this curriculum area.

Finally, CAPP and TBS aim to increase awareness of the important and pervasive ways in which technology affects both personal and professional domains within today's society. A new relatively new curriculum category, Technology and Society, offers courses through which students become more aware of the broader influence and impact of technology on their lives.

Also relatively new to the CAPP and TBS curricula is a foundational course in business knowledge. This course, taught by an experienced business professional, gives students an overview of the concepts and terminology critical to success in the business world. For CAPP, this course is an elective; for TBS, it is required.

## COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Computer Applications](#) heading.

## DUAL-DEGREE PROGRAM WITH THE COLLEGE OF ENGINEERING

## Advisors:

Cathy Pieronek  
Director of Academic Affairs  
College of Engineering

Ava Preacher  
Assistant Dean  
College of Arts and Letters

**Program of Studies.** The dual-degree, five-year program between the College of Arts and Letters and the College of Engineering enables the student to acquire degrees from both colleges—the bachelor of arts from the College of Arts and Letters and the bachelor of science degree in a chosen program from the College of Engineering.

This combination program, instituted in 1952, offers students the advantages of both a liberal and a technical education. The student completing one of these combination programs has a background in the humanities and social sciences as well as a degree from one of the programs offered by the College of Engineering. Because it is a demanding program, only students who have both the aptitude and motivation necessary for the five-year program should apply. Advisors for the program are available for consultation about the advisability of entering the program and about meeting the particular needs of each student already pursuing this program. Qualified students are eligible to receive modest scholarship support from the John J. Reilly Endowed Scholarship Program during their fifth year of study.

The decision to enter the program ordinarily should be made prior to beginning the sophomore year, although students can also enter the program at a later stage. There are three sets of requirements that must be met by the program: University requirements, College of Arts and Letters requirements, and requirements of the College of Engineering, as the following table indicates.

\*The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy.

\*The University degree requirement is one course in literature or fine arts. The College of Arts and Letters requires a minimum of one course in each subject area, plus one additional course in history or social science.

\*\*Two courses in the intermediate or advanced series complete the requirement. Beginning or elementary series require three semesters' work to fulfill the language requirement.

†Courses specified by the student's major engineering department. Minimum total for the five-year program to fulfill degree requirements in both colleges is 168 to 177 credit hours.

‡Courses necessary to fulfill the requirements for a major in the student's major arts and letters department.

†††Chemical engineering intents take CHEM 10172 in place of CHEM 10122.

## EDUCATION

### Elementary Education

The Notre Dame student taking elementary education at Saint Mary's College must also complete a Notre Dame major along with the University and appropriate college requirements. Those interested in the elementary education program are encouraged to take the prerequisite course, EDU 201, at Saint Mary's in the second semester of their first year of studies. With appropriate planning, and possibly summer-school course work, both the Notre Dame major and elementary teaching certification can be completed in four years.

### Secondary Education

(including middle school)  
The following Notre Dame majors have been approved for secondary education licensing through the Education Department at Saint Mary's College:

*In the College of Science:* biology, chemistry, mathematics, physics.

*In the College of Arts and Letters:* English, languages (French, Spanish, Latin), art, music, social studies (history and political science). Students interested in a secondary license in social studies must also complete additional course work in political science or history (depending on the major) and in one other area: either economics, sociology, or psychology.

*In the College of Business:* business education.

Notre Dame undergraduates interested in one of the professional teacher education programs should apply to the department the first semester of the sophomore year, but in some cases may start as late as the first semester of the junior year.

## INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

Students in the College of Arts and Letters, contact education advisor Dr. Vicki Toumayan at 574-631-8636 for more information and help with planning. Students in the College of Science, contact Dr. Kathleen Cannon at 574-631-5812.

### Interdisciplinary Minors within the College

During the junior and senior years, students may elect to complete one or more interdepartmental minors in addition to the departmental major sequence. Composed of 15 hours of class work chosen from at least two departments, these minors encourage students to think from an interdisciplinary perspective about a given issue or topic. Requirements for completion are determined by the faculty director in consultation with the relevant college committee. Current offerings include Catholic Social Tradition; Education, Schooling, and Society; Gender Studies; Hesburgh Program in Public Service; Journalism, Ethics, and Democracy; Latino Studies; Medieval Studies; Peace Studies; Philosophy and Literature; Philosophy, Politics, and Economics; Philosophy Within the Catholic Tradition; Religion and Literature; and Science, Technology, and Values. These were formerly called concentrations and are described in detail below.

#### CATHOLIC SOCIAL TRADITION

##### *Director:*

Todd David Whitmore

##### *Executive Committee:*

R. Scott Appleby (history); Michael Baxter, C.S.C. (theology); Jay Dolan (history); Rev. Patrick Gaffney, C.S.C. (anthropology); Maura A. Ryan (theology); Robert Sullivan (history); Paul Weithman (philosophy); Charles Wilbur (economics)

The Minor in Catholic Social Tradition is an interdisciplinary program that serves as a resource for Notre Dame undergraduates to learn Catholicism's social tradition.

Catholicism offers a long-standing and profound tradition of thought and teaching that addresses, from a normative standpoint, the full range of social spheres. It does so through a constellation of concepts that, taken as a whole, give articulation to a coherent yet variegated vision of the good society. Such concepts include those of solidarity, the common good, the just wage, human rights, the free economy, subsidiarity, and the option for the poor.

Sources for the tradition go back as far as the Bible and develop even in the early church fathers. Medieval writings on topics such as usury and the origins and proper exercise of kingship bring an unprecedented level of detail to Christian analysis of the just society. Pope Leo XIII inaugurates Catholicism's effort to bring its social tradition to bear on industrial society in his 1891 encyclical, *Rerum Novarum* (The Condition of Labor). Since then, popes have drawn upon *Rerum Novarum* and the social tradition to broaden and develop Leo's set of concerns in encyclicals often titled—as with Pius XII's *Quadragesimo Anno*, Paul VI's *Octogesima*

*Adveniens*, and John Paul II's 1991 *Centesimus Annus*—in accordance with their relationship to the earlier document. In doing so, the popes and the Second Vatican Council have addressed issues ranging across all spheres of social life from the family to the state to the church. The U.S. bishops have made sophisticated application of these teachings to the specific circumstances of the United States.

Unfortunately, many Catholics are unaware of this tradition. Pope John Paul II writes, "It must be asked how many Christians really know and put into practice the principles of the church's social doctrine." The U.S. bishops concur. While "Catholic social teaching is a central and essential element of our faith," it is still the case that "our social heritage is unknown by many Catholics." At the same time, graduates of Notre Dame move on to assume leadership positions, often quite advanced ones, in a broad spectrum of social spheres, including in politics, law, business, education, the media, and the military. (For example: national security advisor, president of Panama, attorney general of California, CEO of Mobil Corporation, president of the Chicago Mercantile Exchange, presidents of nine universities other than Notre Dame, executive producer of *Nightline*, and secretary of the Air Force.) The Program in Catholic Social Tradition serves as a resource for Notre Dame undergraduates to learn the tradition so that it can inform life both before and after graduation.

The Minor in Catholic Social Tradition involves 15 credit hours of course work, including a core course (3 credits), three electives (each three credits), and three one-credit colloquia/social concerns seminars. The core course will have three components:

1. The close reading of classic texts of the Catholic Social Tradition, particularly but not exclusively the papal and conciliar documents from Pope Leo XIII's *Rerum Novarum* to John Paul II's *Centesimus Annus*. Other texts will include source documents (e.g., writings by Thomas Aquinas and Augustine) and contemporary appropriations (e.g., writings by liberation theologians and neoconservatives).
2. Immersion in professional context. Each student will find a placement in a location similar to that student's anticipated profession. The student is to observe, interview and, to the extent possible, participate in the life of the setting. For instance, the students can observe a law or architectural firm or a medical practice. Here, the student will keep an ongoing journal as a "pastoral ethnography" of the setting (an interpretation of the practice in the setting in light of the Catholic social tradition).
3. Final project: Students are to articulate or construct a setting in their anticipated profession in light of the Catholic social tradition (e.g., imagine and construct what a law firm/health clinic/ad agency would look like if it practiced in light of the Catholic social tradition).

## INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

The electives will be chosen by the student in consultation with the director from among courses offered in the University. The one-credit courses will be devoted to the critical reading and discussion of one or two major works each semester. Social concerns seminars are one-credit courses lodged first within the Department of Theology and often cross-listed with other departments.

E-mail: Whitmore.1@nd.edu

### **COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Catholic Social Tradition](#) heading.

### **EDUCATION, SCHOOLING, AND SOCIETY**

The primary goal of this interdisciplinary minor is to serve students who want to understand learning and education as complex and challenging aspects of human and societal experience. Education is one of the central and shared experiences of people in contemporary societies in the United States and around the world. It is both an end in itself and a means to many personal, professional, and spiritual goals. Thus, understanding its history and traditions, analyzing its processes, and critiquing its goals are of great importance to all of us.

Most societies rely on education to work fundamental changes in students and in society. We will use the tools and resources of a liberal arts perspective to help students reflect on, understand, and influence the role of education in society. In addition, the program will provide a rich body of resources for students who may want to pursue careers in education after graduation, including certification to teach, or research and teaching careers at the university level.

Normally, students apply for admission to the minor late in their freshman year or early in their sophomore year, and this is ideal. Students can be admitted through the first semester of their junior year, assuming that they can meet requirements in the remaining semesters. Students should be in good academic standing and demonstrate a strong interest in issues related to the causes and consequences of learning, schooling, and educational policy.

The minor in Education, Schooling and Society involves 15 hours of course work. The introductory course in the program is ESS 33600. This course must be completed by the second semester of the junior year. At the middle level of the program, students will select one course from a set of approved courses that are focused exclusively on educational issues and two courses from a set of approved courses that include education as one of several course foci. Students participate in the capstone course, ESS 43640, the Senior Research Seminar, in the fall

semester of their senior year. As a capstone, this class provides students with an opportunity to build upon and extend the work they have completed in fulfilling the requirements for the minor. Students will design and execute an original research project and write a paper of at least 25 pages. This research will be guided by a writing-intensive process (i.e., drafts, revisions, peer review when appropriate, and individual consultations between the professor and students).

The faculty work closely with students on postgraduate planning, including employment, graduate or professional school, or service opportunities.

### **GENDER STUDIES MINOR**

**Director:**  
Eileen Botting  
**Program Coordinator:**  
Linnie Caye

**Objectives.** Gender Studies is an interdisciplinary academic program in the College of Arts and Letters at Notre Dame. Gender Studies analyzes the significance of gender—and the cognate subjects of sex, sexuality, race, ethnicity, class, religion, and nationality—in all areas of human life, especially in the social formation of human identities, practices, and institutions. Gender Studies gives scholars the methodological and theoretical tools to analyze gender and its cognates in their chosen disciplines in the arts, humanities, social sciences, and natural sciences. Gender Studies also provides it students and alumni with an intellectual framework in which the analysis of gender and its cognates can be creatively and critically applied to their personal, familial, professional, and civic roles. In the context of the Catholic identity of Notre Dame, Gender Studies facilitates the study of the intersection of gender and religion in the shaping of ethics, culture, and politics. Alongside our diverse array of courses drawn from across the University, our summer internship and academic-credit internship programs emphasize the holistic and practical life applications of a Gender Studies education at Notre Dame.

**Requirements.** Students in the minor are required to complete 15 credit hours, distributed as follows: one introductory Gender Studies course, either Introduction to Gender Studies GSC 10001/20001 or Introduction to Feminist and Gender Theory

GSC 10002/20002 (3 credits), plus four other Gender Studies courses (12 credits).

### **HESBURGH PROGRAM IN PUBLIC SERVICE**

**Director:**  
Martine De Ridder

The health of American society is closely related to good public policy, competent, ethical public service, and leadership. Thus, awareness of public policy and public service is not only the foundation for public-sector careers, but it is also a necessity for those who will exercise leadership roles in the nonprofit sector or in the private sector and seek to be knowledgeable citizens.

The Hesburgh Program in Public Service prepares Notre Dame students for a life of active and effective citizenship as well as for the possibility of careers in public service. The program honors the principled, dedicated leadership and public service of Notre Dame's President Emeritus, Rev. Theodore Hesburgh, C.S.C.

The Hesburgh Program offers an interdisciplinary curriculum in public policy designed to inform students about the dimensions of policy making, public administration and policy evaluation, and to develop skills in research, sensitivity to ethical issues, and appreciation for the character and limits of constitutional democracy.

First-year students and sophomores of all colleges are invited to apply to the interdisciplinary minor, as well as first semester junior transfers. To be admitted, students will need to be in good academic standing and demonstrate a strong interest in public policy and public service. An introduction to American politics (POLS 10100, 20100, or equivalent) and an introduction to economics (ECON 10011, 20011, or equivalent) are prerequisites to the Hesburgh Program course of study. At the time of admission, students should have completed or be in the process of completing these requirements.

The public policy minor involves 15 hours of course work. The "gateway" course to the program is HESB 20010, Introduction to Public Policy, normally taken in the second semester of the sophomore year. As sophomores and juniors, Hesburgh minors choose three electives drawn from each of three categories of courses approved by the program. These are research skills, values, and institutions and processes. During the senior year, students who have been on a summer internship will register for the research seminar, HESB 43020, that builds on their field experience. Other students will take one of several senior-level policy seminars identified by the program each semester.

The Hesburgh Program offers students the opportunity for summer internships in public policy contexts through the Gary Lyman Internships in Public Service. In the fall of their junior year, Hesburgh students may apply for the Lyman Internship. Up to 20 students are selected in a competitive process.

## INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

Students selected as Lyman interns are aided by the program's director in securing appropriate internships in Washington, D.C., or their home state. Lyman interns receive financial help to defray their cost of living while interning.

During the course of the academic year, the Hesburgh Program sponsors student public-policy-related forums and activities and campus visits to Notre Dame by public figures. They give public addresses, teach in the classroom and are available for conversations with students and faculty. The staff works closely with students on postgraduate planning, including employment, professional schools such as law and public policy and academic graduate programs.

Many of our courses are offered through cross-listings with various arts and letters departments such as American Studies, Anthropology, Computer Applications, Economics and Policy Studies, History, Philosophy, Psychology, Political Science, Sociology, and Theology.

For more information, visit our website at [nd.edu/~hesprg/](http://nd.edu/~hesprg/).

### JOHN W. GALLIVAN PROGRAM IN JOURNALISM, ETHICS, AND DEMOCRACY

#### Director:

Robert Schmuhl

The John W. Gallivan Program in Journalism, Ethics, and Democracy offers several courses for students interested in careers in print and broadcast journalism. Begun in 1997 with a grant from the John S. and James L. Knight Foundation and now endowed by the family of John W. Gallivan, this minor combines professional training in journalistic skills along with examination of philosophical concerns related to the practice of journalism. For example, what ethical issues arise in preparing a particular story? Or what role does—and should—journalism play in a self-governing society?

The journalism minor requires completion of 15 hours in addition to a student's major requirements and a news-related internship during either the summer or the academic year. Fundamentals of Journalism is the first, or gateway, class for students participating in the program. Other courses that count for the concentration include *The Craft of Journalism*; *Advanced Reporting*; *Multimedia Journalism*; *Writing for Publication*; *Persuasion, Commentary, and Criticism*; *Broadcast Journalism*; *Media Ethics*; *Media Criticism*; and *News in American Life*. In addition, new courses are currently being developed. No more than two courses beyond *Fundamentals of Journalism* concentrating on journalistic techniques will count for the required 15 hours.

The director of the program is Robert Schmuhl, the Walter H. Annenberg-Edmund P. Joyce Professor of American Studies and Journalism. An advisory committee of Notre Dame graduates in journalism helps guide the program. Members include Tom Bettag, former senior executive producer, *ABC News Nightline*; Sarah Childress, Africa correspondent, *The Wall Street Journal*; Bill Dwyre, sports columnist, *The Los Angeles Times*; John W. Gallivan, former chairman of the board of the Kearns-Tribune Corporation and publisher emeritus of the *Salt Lake Tribune*; Monica Yant Kinney, metro columnist, *The Philadelphia Inquirer*; John McMeel, chairman and president, Andrews McMeel Universal; Bill Mitchell, editor of Poynter Online, Poynter Institute for Media Studies; Anne Thompson, chief environmental correspondent, *NBC News*; and Kelley Tuthill, reporter, WCVB-TV, Boston.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Gallivan Program in Journalism, Ethics, and Democracy](#) heading.

### LATINO STUDIES

#### Director and Assistant Provost:

Gilberto Cárdenas

Julian Samora Chair in Latino Studies

**Program of Studies.** The College of Arts and Letters offers a minor and a supplementary major in Latino Studies in conjunction with any undergraduate major from any college at the University.

Latino Studies centers around the study, analysis, and understanding of the varied experiences of the Latino population in the United States. Its scope is broad and it strives to incorporate various disciplines in its approach.

The Latino presence is deeply rooted in American history. In the latter half of the 19th century the numbers of Latinos in the United States grew exponentially—in the aftermath of the Mexican American War (1848), with the expansion of the American Southwest and the inclusion within U.S. borders of what had previously been Mexican territory, and the Cuban Spanish American War (1898), with the annexation of Puerto Rico. During the next century Mexicans crossed the border and Puerto Ricans traveled to the mainland to find work and, in many cases, to make their homes. The 20th century also saw waves of immigration from Cuba, the Dominican Republic, and Central and South America, a trend that continues today as the U.S. Latino population becomes increasingly diverse.

Students who pursue the minor in Latino Studies will have the opportunity to be at the forefront of the study of one of the 21st century's most significant demographic changes in the United States.

The Institute for Latino Studies is committed to scholarship that will promote critical thinking about such issues as spirituality, social action, language, race, ethnicity, class, assimilation/acculturation paradigms, and indigenous traditions, to name a few. Literary and visual arts, which often function as vehicles for social change and creative empowerment, constitute another focus of our curriculum. Overall, Latino Studies aims to strike a balance among the social sciences, humanities, and arts in its teaching, research, and service.

As the Latino diaspora evolves, so does the field of Latino Studies. Latino Studies recognizes the value of a comparative, cross-border perspective for arriving at an in-depth understanding of Latinos' historical roots and multi-ethnic heritages. It promotes research and analyses of new issues such as emerging transnational communities, changing immigration patterns, remittances, and cultural flows between Latinos in the United States and the Caribbean and South and Central America. While the emphasis is on domestic Latino communities, the discipline's focus inevitably becomes internationalized when we consider globalization, immigration, and border issues.

## INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

In addition to the teaching program, Latino minor students are exposed to the institute's research and community outreach components. In summary, students will be able to take advantage of the resources of ILS, which also include two specialized units that conduct pioneering programs in Latino theology and spirituality.

As an interdisciplinary program, the minor in Latino Studies will complement and provide a broader cultural and social background to students in the various departments and colleges at the University. The minor is open to all undergraduate majors. Participants in the program will be prepared to work in a myriad of professional settings and to serve an increasingly diverse society.

**Minor in Latino Studies Curriculum.** The minor in Latino Studies consists of 15 credit hours, including a required gateway course (3 credits), practicum course (3 credits), and nine credit hours of elective course work. Although there is no language requirement for the minor, students are encouraged to study and acquire fluency in the Spanish language. **All Latino Studies courses are open to all students.**

### *Practicum Course*

(3 credit hours, required for Latino Studies minor)  
In this course, usually taken during their senior year, students will complete a practicum that will include directed research/reading on an Institute project, class discussion, and experiential work in the Latino community. Students will have the option of choosing and designing a project, regardless of their major, in keeping with their interests. They will carry out the project under the direction of a faculty mentor starting in the fall semester. A written report and a class presentation will complete this academic experience. Methods and analytical frameworks will vary depending on the student and faculty advisors.

### *Elective Courses*

(9 elective credit hours)

Students must take two out of three courses at the 30xxx–40xxx level unless they receive special permission from their faculty advisor. In addition, students must choose their electives from within at least two major subjects in Latino Studies, e.g., health, business, social science, theology, political science, literature, and visual arts, except for the following two cases.

Students who are pursuing Spanish language proficiency (not minor or major) may replace one elective (three credit hours) with a 20xxx-level Spanish course. Students may also replace one elective (three credit hours) from a field comparable to Latino Studies (e.g., Gender Studies, Latin American Studies, or African American Studies) as long as at least one-fourth of the course content includes Latino Studies. A list of appropriate courses will always be available for students.

**Supplementary Major in Latino Studies.** The supplementary major in Latino Studies consists of 24 credit hours, including the completion of the

gateway course ILS 20701 (3 credits), senior seminar (3 credits), 12 credit hours of six Latino Studies course work, and six 6 credit hours of open electives.

Three of six open elective credit hours must be chosen from Latino Studies courses. The three remaining credit hours may be a Spanish language course. This open elective will give students the opportunity to further develop their Spanish language skills (non-Spanish majors only) or, with the approval of the faculty advisor in Latino Studies, they may elect a course from a field comparable to Latino Studies (e.g., Gender Studies, Latin American Studies, or Africana Studies).

Although there is no Spanish language requirement, all Latino Studies majors will be strongly encouraged to learn to speak, read, and write Spanish or strengthen their Spanish language skills as well as to participate in study abroad programs in Spanish-speaking countries.

### *Introductory 'Gateway' Course*

ILS 20701—3 credit hours, required for Latino Studies minor and major; open to all Notre Dame students

### *Senior Seminar in Latino Studies*

(3 credit hours; required for Latino Studies supplementary major)

The senior seminar is a capstone course for the supplementary major in Latino Studies. The centerpiece of the course is a seminar paper that students research and write on a subject and discipline of their choice or possibly a topic among the institute's research projects. The course will include directed, independent study and research with a Latino Studies faculty member resulting in a substantial and original research paper of 15 to 20 pages. The students will participate in an annual symposium where they will present their work.

### *Required Courses*

(12 credit hours of 30xxx–40xxx level Latino Studies courses)

These required courses must be distributed in four major components: history, literature, social science, and theology courses.

### *Open Elective Courses*

(6 credit hours)

The remaining six credit hours are considered open electives. Three credit hours must be taken from Latino Studies courses. The three remaining credit hours may be in Spanish (non-Spanish majors only) or, with the approval of the faculty advisor in Latino Studies, students may elect a course from a field comparable to Latino Studies (e.g., Gender Studies, Latin American Studies, or Africana Studies).

The following represents a sample list of courses offered in previous terms and in spring 2008:

IILS 20701. Introduction to Latinos in American Society  
ILS 20702. Topics on Race in the Americas  
ILS 20800. U.S. Latino Spirituality  
ILS 20900. Spanish for Heritage Speakers

ILS 30xxx. Chicanas in the Visual Arts  
ILS 30101. Caribbean Diaspora  
ILS 30201. Latinos: Wealth, Inequality, and Asset-Building Policies  
ILS 30300. Latino History  
ILS 30302. Latino/Latina American Literature  
ILS 30304. Border Crossings: Mexican and Canadian Literature  
ILS 30306. Women in the Americas  
ILS 30307. Icons and Action Figures in Latino/Latina Literature  
ILS 30308. Latino Poetry  
ILS 30309. The American Intersections of Latino/a Writing  
ILS 30310. Contemporary Latino/a Caribbean Literature  
ILS 30401. Mexican-American History  
ILS 30703. Migration, Race, and Ethnicity in Twenty-First-Century America  
ILS 30706. Toward Equity and Excellence in Education: A Review of Pedagogical and Policy Approaches from 1950 to Present  
ILS 30900. Nations in Motion: Latino/Latina Literature in the United States  
ILS 35801. Hispanic Leadership Intern Program  
ILS 40101. Mexican Migration and Transnationalism in South Bend  
ILS 40101. Race, Ethnicity, and Power  
ILS 40232. Latin Film: Culture, God, and Redemption  
ILS 40301. The Politics of Memory in Contemporary Latino/Latina Literature  
ILS 40304. Latino Literature and Visual Culture  
ILS 40406. Latinos and Christianity  
ILS 40600. Latino Psychology  
ILS 40700. International Migration: Mexican and U.S. II  
ILS 40706. Latinos in American Society  
ILS 40707. International Migration and Human Rights  
ILS 40710. Aesthetics of Latino Cultural Expression  
ILS 40712. Legacy of Exile: Cubans in the United States  
ILS 40713. Latino Economic Development: Research and Policy  
ILS 40714. Social Demography of the U.S. Latino Population  
ILS 40716. Latino Religion and Public Life: Exploring the Social Impact of the Latino Church  
ILS 40801. Theology and Popular Piety in U.S. Catholicism  
ILS 40802. Culture, Religion, and Evangelization  
ILS 40804. Latino Film: Culture, God, and Redemption  
ILS 40900. New Readings in Modern Caribbean Literature  
ILS 40901. Cuban Literature

## **COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Institute for Latino Studies](#) heading.

## INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

### LITURGICAL MUSIC MINISTRY

This 18-credit minor consists of three 3-credit courses in theology and two 3-credit courses in music, plus 3 credits of music lessons or approved ensembles, to be selected in consultation with the student's music advisor. Contact the director of undergraduate studies in the Department of Theology.

### MEDIEVAL STUDIES

The Minor in Medieval Studies allows students who are committed to other programs of study to pursue interests in the culture of the Middle Ages and to cross the limits of individual disciplines as a means of understanding the changing social, economic, legal, intellectual, and artistic systems of medieval society.

Students may declare their intention to undertake a minor in Medieval Studies to the director of undergraduate studies at any time before the end of their third year. The undergraduate director will then act as their minor advisor and help them select a set of courses that form a coherent program of study, often in conjunction with their major if possible. Students are required to take five courses, including the introductory course, *The World of the Middle Ages*, and three or four electives in Medieval Studies drawn from at least two of the 11 affiliated departments: (Anthropology; Art, Art History, and Design; Classics; English; German and Russian Languages and Literatures; History; Music; Philosophy; Political Science; Romance Languages and Literatures; and Theology). The Medieval Studies Advanced Seminar (3 credits) is recommended as one of the five courses, in lieu of a medieval elective, on a space-available basis. Courses counted toward a student's major may not be used for the minor.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Medieval Institute](#) heading.

### PEACE STUDIES

*Director of Academic Programs:*  
Jaleh Dashti-Gibson

**Program of Studies.** Peace Studies is defined as the interdisciplinary examination of the conditions that make for peace. It also investigates the obstacles to the realization of these conditions, drawing on theories and methods from diverse disciplines to focus on what makes for the development of a just and peaceful world order. Peace Studies relates scholarship to practice and challenges those who engage in it to develop new ways of thinking and acting in the world.

Notre Dame's Peace Studies program divides its curriculum of courses into three related but distinct areas:

**Area A:** The role of international norms, institutions, and states in a peaceful world order. An exploration of ways of making governmental and intergovernmental institutions more effective and representative, and of strengthening governmental compliance with fundamental norms of peace and human rights.

**Area B:** The impact of religious, philosophical, and cultural influences on peace. The study of the ethics of the use of force, theological and philosophical visions of global justice, the ways in which the world religious traditions foment violence or encourage peace, the practice of nonviolence, and the linguistic, literary, and historical dimensions of cultures of peace.

**Area C:** The promotion of social, economic, and environmental justice. The study of social change, with specific attention to the role of nongovernmental organizations, commercial enterprises, and states in fostering sustainable economic development, respect for human rights, conflict resolution and nonviolent conflict transformation, support of gender and family issues, and protection of the environment.

In both the supplementary major (24 credit hours of required course work) and in the minor (15 credit hours of required course work), students will complete an introduction course, explore the three key areas of Peace Studies, and participate in a writing-intensive integrative senior seminar.

#### *The Supplementary Major*

The supplementary major in Peace Studies requires completion of the introductory course in Peace Studies (three credit hours), one course in each of the three areas of study (nine credit hours), three elective courses in Peace Studies (nine credit hours), and the writing-intensive senior seminar (three credit hours). The program for a supplementary major in Peace Studies follows.

IIPS 30101 Introduction to Peace Studies

Area A one course from list

Area B one course from list

Area C one course from list

[elective]

[elective]

[elective]

IIPS 43101 Senior Seminar

#### *The Minor*

The minor in Peace Studies requires completion of the introductory course in Peace Studies (three credit hours), one course in each of the three areas of study (nine credit hours), and the writing-intensive senior seminar (three credit hours). The program for a minor in peace Studies follows.

IIPS 30101 Introduction to Peace Studies

Area A one course from list

Area B one course from list

Area C one course from list  
IIPS 43101 Senior Seminar

For Peace Studies undergraduate courses, the THIRD digit in the IIPS course number indicates the following:

If it is 1, the course is REQUIRED.

If it is 2 or 3, the course is an IIPS elective.

If it is 4 or 5, the course is Area A.

If it is 6 or 7, the course is Area B.

If it is 8 or 9, the course is Area C.

Electives for the supplementary major may be taken from IIPS electives or any course from Areas A, B, or C.

An alphabetical list of courses by area is available on the Kroc Institute website: [kroc.nd.edu/programs/undergraduate/index.shtml](http://kroc.nd.edu/programs/undergraduate/index.shtml).

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [University](#) section under the [Institute for International Peace Studies](#) heading.

**Information on Peace Studies.** Peace Studies at Notre Dame is centered in the Joan B. Kroc Institute for International Peace Studies (in the Hesburgh Center for International Studies). Information on courses available each semester, faculty fellows in Peace Studies, and ongoing activities in Peace Studies can be found on the institute's website, [kroc.nd.edu](http://kroc.nd.edu).

### PHILOSOPHY AND LITERATURE

The minor in philosophy and literature is designed for students who want to pursue an interdisciplinary course of studies that focuses on the intersections between literature and philosophy. Majors from any literature department or from philosophy are eligible for the concentration.

Literature and philosophy have always shared many of their concerns, and the minor is designed to explore this common ground and to establish an interdepartmental forum for both formal study and informal contacts. The minor should also be excellent preparation for students interested in graduate studies.

The curriculum of the minor in philosophy and literature consists of 15 credit hours, distributed as follows:

- A core course: "Studies in Literature and Philosophy," taken with the permission of the director of the P/L Minor and cross-listed in English and philosophy, and/or the department in which it originates. This course is to be taken in the first semester of the minor (spring of the sophomore or junior years). This gateway course is an intensive seminar and will help students and faculty from the various disciplines to speak a common language. Four credit hours.

## INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

- At least two one-credit colloquia in the semesters following the core seminar. The colloquia will be devoted to the critical reading and discussion of one or two major works each semester. The colloquia will build on the esprit de corps and intellectual common ground established in the core course.
- Three three-credit courses approved by the minor committee, at least two in the disciplines in which the student is not a major. This part of the curriculum will require written approval of the director of P/L.

Students are encouraged, though not required, to write a senior essay (in the department in which they are majoring) that in some way reflects the interdisciplinary concerns developed in P/L.

For further information, students should contact Prof. Alain Toumayan, Department of Romance Languages, Alain.P.Toumayan.2@nd.edu.

### PHILOSOPHY, POLITICS, AND ECONOMICS

The Minor in Philosophy, Politics, and Economics (PPE) is designed for students and faculty with serious interests at the intersection of political theory, political philosophy and economic theory. The minor integrates these three fields, and through seminars and colloquia strives to create an intellectual community among students and faculty that goes beyond formal course work. To be eligible for PPE, students normally must major in either philosophy, political science, economics, or the Program of Liberal Studies (who for PPE requirements are treated as philosophy students). The Justice Seminar, the gateway course into the minor, is always offered in the fall semester; applications for the Justice Seminar are taken in the middle of the preceding spring term.

The PPE faculty committee consists of Paul Weithman (philosophy), Mary Keys (political science), John Roos (political science), Philip Mirowski (economics), Jennifer Warlick (economics), James Sullivan (economics), Dan Philpott (political science), and Alexandra Guisinger (political science). Committee members also serve as advisors for PPE students.

The PPE curriculum consists of 15 credit hours, usually distributed over four semesters, as follows:

- The Justice Seminar (cross-listed as POLS 43640, ECON 33250, and PHIL 43404), an intensive three-credit seminar that is the gateway course into the minor, taken in the fall semester of sophomore or junior year. Three credit hours.
- Three one-credit PPE Colloquia, each usually devoted to the critical reading and discussion of one or two major works, normally taken in the three semesters following the Justice Seminar. Three credit hours.
- Three approved three-credit courses from the two fields outside the student's first major, with at least

one course in both non-major fields. Nine credit hours.

Total credit hours: 15.

PPE students are also encouraged (but not required) to write a senior thesis in their major field that reflects the interdisciplinary focus of the minor.

Contact: PPE director John Roos, Department of Political Science, roos.1@nd.edu.

### PHILOSOPHY WITHIN THE CATHOLIC TRADITION

*Director:*  
Alasdair MacIntyre

This minor is only open to undergraduates who are majors in either philosophy or theology and who wish to add to their knowledge of philosophy and theology an understanding of what the distinctively Catholic tradition in philosophy is. It is unlike most interdisciplinary minors in being restricted in this way; work in this minor presupposes a background of some significant work in either philosophy or theology. A central task assigned to philosophy within the Catholic tradition has been that of understanding the relationship of theology to the secular disciplines, so that the relevance both of theology to these disciplines and of those disciplines to theology becomes clear. In this minor, political science will be the secular discipline whose relationship with theology provides a subject for philosophical enquiry.

The Catholic philosophical tradition is one of debate and constructive disagreement and the philosophers whom it will be possible to study in satisfying the requirements for this minor will include thinkers of very different standpoints: Augustine, Anselm, Aquinas, Pascal, Arnauld, Newman, Edith Stein and others. Because these thinkers have in common an allegiance to the Catholic faith, they agree in rejecting philosophical positions incompatible with that faith. But they also disagree with each other and in both cases what matters is the quality of their philosophical arguments.

The requirements of the minor are satisfied by taking 15 credit hours, beginning with Philosophy 30326, cross-listed as THEO 30802, God, Philosophy and Universities. Students have to take two appropriate courses in political science and one course on a major Catholic philosopher or set of Catholic philosophers, either in the Theology Department or in the Philosophy Department. No course can count both as satisfying one of the requirements for the student's major and as satisfying one of the requirements of this minor. All students are required to take a capstone seminar in which the question of what part philosophy can play in the integration of the secular disciplines with theology will be addressed through discussion of texts and arguments encountered in earlier courses. Lists of philosophy, theology, and political science courses that will satisfy the requirements of the minor will be available each semester from the director. For further information,

please contact the director, Prof. Alasdair MacIntyre, Flanner 1042.

The Poverty Studies Interdisciplinary Minor (PSIM) contributes to Notre Dame's mission by requiring its students to examine poverty, social injustice, and oppression from the perspectives of the social sciences, the humanities, and law.

PSIM explicitly recognizes the interlocking nature of the causes of poverty and the problems of low-income families and individuals, and provides a framework that assists students in making the links between the contributions of the social sciences, humanities, and the law. It also helps student contextualize their personal interactions with low-income populations and the institutions that serve them, and make the connections between classroom lessons and real-world experiences.

PSIM features a gateway course that introduces students to the nature, causes, and consequences of poverty. PSIM is an appropriate supplement to every major at the University because it is designed to help students understand how their future civic and political activity and professional work—in almost any area—will invariably impinge on disadvantaged persons and communities. Once students finish the

## INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

gateway course, they move on to three experiential learning credits and three elective courses. The final requirement is a capstone seminar or a special research project.

**Requirements.** An interdisciplinary minor in Poverty Studies consists of 16 or 1 credit hours, including a required gateway course (3 credits); three or four credits of experiential learning, depending on the option chosen (service learning, community-based research, or immersion); six credit hours of elective coursework selected from a list of courses approved by the director on the advice of the affiliated faculty; and a 3-hour senior capstone seminar or special studies/senior thesis.

**Gateway course (3 credits).** PS 10000/20000. The gateway course introduces students to academic research about the nature, causes, and consequences of poverty. Throughout, the readings and lectures reveal the collaboration across the various disciplines, enhances our understanding of what it means to be poor and of the array of interlocking problems that lead to poverty, and guides the formulation of policies to prevent and alleviate poverty. Although the emphasis is on the poor citizens of the United States, the lessons (such as the methodology for measuring poverty) cross cultural boundaries and have relevance for poverty in other parts of the world, including the developing nations.

**Experiential learning (3 credits).** The experiential learning requirement is designed to get students into the field where the concepts discussed in classrooms come to life and disciplinary boundaries are challenged. Experiential learning enhances a student's understanding of poverty and prepare students for the final capstone experience, whether it is the capstone seminar or an independent research project. The experiential learning requirement may be satisfied by satisfactorily completing one of the following options:

- three designed 1-credit Center for Social Concerns seminars; or
- three 1-credit semester-long internships (approximately XX hours per semester) with community agencies and organizations serving the poor, or
- one approved 3-credit community-based learning research course.

**Three 1-credit seminars offered by the Center for Social Concerns.** Participating in CSC seminars is a well-established tradition among Notre Dame students. PSIM students may satisfy the experiential learning requirements by bundling three Center for Social Concerns 1-credit experiential learning seminars with PS 300001. When choosing this option, students must take the Urban Plunge (THEO 33963/CSC 33963), the Appalachia Seminar (THEO 33950/CSC 33950), and one of the following:

- Border Issues (THEO 33966/ILS 30804 01/CSC 33966)

- Children and Poverty Seminar (PSY 23090/CSC 23090)
- Environmental Justice and Human Rights (AFAM 33601/CSC 33976)
- Holy Cross Mission in Hispanic Ministry (THEO 33969E/ILS 30803/CSC 33969#0)
- Lives in the Balance: Youth, Violence, and Society Seminar (CSC 33980)
- Migrant Seminar (THEO 33967/CSC 33967)

**Three 1-credit semester-long internships.** Each semester, many Notre Dame students engage in 1-credit internships with community agencies and organizations working to improve the well-being of low-income individuals and families. Three semesters of internship with the same or different agencies satisfy this requirement.

**One 3-credit community-based research course/project.** This requirement may be fulfilled during the academic year satisfactorily by completing a regularly scheduled course with a community-based research component, or by participating in a summer service-learning project sponsored by the Center for Social Concerns, or by completing a Shepherd Program summer internship enhanced by the addition of an academic component similar to CSC's summer service-learning courses.

**Electives (6 credits).** Two 3xxx- or 4xxx-level courses from the list of approved Poverty Studies minor electives.

**Capstone Experiences (3 credits).** As the final step in the PSIM, students may choose either to enroll in the capstone seminar or to undertake a 3-credit special studies project directed by one of the affiliated faculty.

**Capstone Seminar (3 credits).** PS 40000. The capstone seminar is topic-oriented drawing on literature from multiple disciplines. The students will be from different major and will share the perspectives of their major disciplines as well as their varied experiences in the field, thus ensuring the interdisciplinary nature of the inquiry. Experts with diverse perspectives and professional experiences will join the seminar as special guests.

**Special studies capstone option (3 credits) PS 40001.** Students may also opt for an intense research or other intellectual experience by enrolling in special studies with one of the minor's affiliated faculty. In this case, the students will produce a project (manuscript, work of art, composition, poster board display of research results, etc.) that can be displayed, and will present this project to the members of PSIM at a special colloquium held in the spring semester of each academic year.

## RELIGION AND LITERATURE

*Director:*

Jesse M. Lander

The interdisciplinary minor in Religion and Literature offers an intellectually rigorous and scholarly approach to formalized study of the interrelations between "religion" and "literature" broadly construed. The minor will draw on the rich resources Notre Dame offers, including the faculty and intellectual traditions of Theology and the various literature departments that exist at Notre Dame. The minor's focus is both broad and refined. Its breadth offers students the opportunity to investigate the interanimating and cross-disciplinary influences of "religion" and "literature." As broad coverage inevitably leads to sharpened questions, students will enjoy the freedom to pursue a specific interest through a refined senior thesis.

The minor enjoys a special consultative and working relationship with many of the university's already identified centers of excellence, capitalizing on both their long-term faculty and other resource expertise as well as making full use of their visiting fellows, special seminars, and general lecture programs. To this end, students who choose the Religion and Literature concentration have extensive and first-rate scholarly resources available to support their own intellectual development.

### *Curricular Requirements*

Normally, students apply for admission to the minor late in their freshman year or early in their sophomore year. The minor requires students to complete 15 credit hours of approved course work; of these no more than three, and in special cases six credit hours at the 20xxx or sophomore level will be accepted toward fulfillment of the concentration's requirements. The balance of the course work must be completed through course work at the senior (30xxx–40xxx) level. Of the overall 15-hour requirement, three credit hours will be awarded for completion of the senior thesis. It is intended that students will, in effect, do a thesis inspired by issues which have arisen in their course work for the minor.

One entry-level "gateway" course will be required of each student desiring a minor concentration in Religion and Literature. Several courses will serve this function, and students must take one of them to complete the minor. Ideally, the student will complete the required class early in his or her course of study.

In addition to the gateway course and senior thesis, students will be required to complete three three-credit courses approved by the Religion and Literature committee, at least two in a discipline other than the student's major.

To promote intellectual cohesiveness within the minor, participating students will be required to take part in a series of seminars and talks organized by the Religion and Literature committee. These events will be structured to take advantage of offerings

## INTERDISCIPLINARY MINORS WITHIN THE COLLEGE

by Notre Dame faculty members or lectures by visiting scholars whose topics relate to the program's focus. The seminar or lecture presentations will serve to function as either a point of departure or a concluding event in a short, focused study which will include some preparatory reading of material salient to the presentation.

Person to see: Prof. Jesse M. Lander, Decio 203.

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Religion and Literature](#) heading.

### SCIENCE, TECHNOLOGY, AND VALUES

#### Director:

Gregory L. Macklem

#### Affiliated faculty:

#### Chairholders:

Michael J. Crowe, Program of Liberal Studies and History (concurrent); Rev. John J. Cavanaugh I Chair (emeritus)  
Kristin Shrader-Frechette, Philosophy and Biology; O'Neill Family Chair

#### Professors:

Michael DePaul, Philosophy  
Christopher Fox, English  
Don Howard, Philosophy  
David Ladouceur, Classics  
Edward Manier, Philosophy  
Dian Murray, History  
Thomas Schlereth, American Studies  
Phillip Sloan, Program of Liberal Studies and History (concurrent)  
James Sterba, Philosophy  
Andrew Weigert, Sociology

#### Associate Professors:

Matthew Ashley, theology  
Dennis Doordan, Architecture  
Janet Kourany, Philosophy  
Gerald Mckenny, Theology  
Vaughn Mckim, Philosophy  
William Ramsey, Philosophy  
Maura Ryan, Theology  
David Solomon, Philosophy  
Leopold Stubenberg, Philosophy  
Robert Wolosin, Anthropology (adjunct)

#### Assistant Professor:

Katherine Brading, Philosophy

Science and technology are pivotal forces in modern society and play key roles in shaping cultural sensibilities in the modern world. Indeed, our technologies are reflected in our institutions, our work, our expectations, even in our moral problems. Science, Technology, and Values (STV) is an interdisciplinary minor within which faculty and students from a variety of disciplines and different colleges can reflectively explore the nature of science

and technology as human enterprises, interacting in complex ways with our values and social institutions.

-The program helps sponsor a wide range of cross-listed courses taught by faculty representing the humanities, the social sciences and the natural sciences. Students electing an STV minor can focus their work on areas of particular interest, such as science, technology and public policy; ethics, ecology and environment; medical ethics; ethical issues in science and technology; humanistic and social aspects of medicine; science and technology as cultural phenomena; history and philosophy of technology.

Students electing a minor in STV must take at least five courses (15 hours) from among those offered under the sponsorship of the STV program. These must include the core course (STV 20556). Students are urged to satisfy this requirement early in the program. At least one course also must be taken from each of clusters one, two, and three below, and either one additional course from these clusters, or from the elective list in Cluster Four. Nearly all STV courses are cross-listed.

### CORE COURSE

20555. Science and Technology in Phil Perspective  
20556. Perspectives in Science and Technology  
20556. Science, Technology and Society

### Cluster One: Human Dimensions of Science and Technology

20103. Death and Dying  
20115. Gender, Politics, and Evolution  
20120. Alcohol and Drugs  
20124. Memoirs of Madness  
20125. Philosophy and Science Fiction  
20134. The Technological American  
20139. Minds, Brains, and Persons  
20142. Architectural History II  
20146. History of Communications Technologies  
20149. Environmental Philosophy  
20152. Visual America II  
20154. Modern Physics and Moral Responsibility  
20163. Science and Religion  
20179. Science and Theology  
30106. History of Economic Modern Thought  
30110. Health, Healing, and Culture  
30113. Classical Origins of Medical Terminology  
30132 Environmental History  
30142. History of Ancient Medicine  
30146. History of Communication Technologies  
30152. History of Western Medicine  
30153. History of Psychiatry  
30154. Gender and Science  
30155. History of Photography to WWII  
30157. Introduction to the Philosophy of Biology  
34162. History of Science and Technology in Britain (taught in London only)

30175. Environmental History  
30181. Science and Medicine in the Islamic World  
30189. Philosophical Issues in Physics  
33195. Technology and Social Change  
40113. Computer as Social Phenomenon  
40118. Witchcraft and Occult 1400-1700.  
40119. Monsters, Cyborgs, and Other Created Bodies  
40126. Philosophy of Cognitive Science  
40130. Crime, heredity, Insanity in the U.S.  
40135. Philosophy of Science  
40140. Science and Social Values  
40144. Religion and Science  
40147. History/Design: Form, Values, and Technology  
40151. Psychology and Medicine  
40152. History of Medicine to 1700.  
40153. Visits to Bedlam  
40154. Cultural Aspects of Clinical Medicine  
40155. Christ and Prometheus: Evaluation/Technology  
40157. Philosophy of Biology  
40166. History of Modern Astronomy  
40167. Global Food Systems  
40172. History of Chinese Medicine  
40174. Philosophy and Psychiatry  
40181. Philosophy of Human Biology  
40186. Medicine in Modern History  
40187. Technology in History  
40194. Building America  
43134. Addiction, Science, and Values  
43136. Nature in America  
43169. Darwinian Revolution  
43171. History and Conceptual Foundations of Space/Time

### Cluster Two: Science, Technology, and Ethics

20216. Biomedical Ethics and Public Health Risk  
20221. Biomedical Ethics  
20245. Medical Ethics  
20247. Environmental Ethics  
20248. Modern Science and Human Values  
20258. Philosophy of Technology  
20260. Theology, Ethics, and the Environment  
20282. Health Care Ethics in the 21st Century  
30201. Introduction to Clinical Ethics  
40175. Ethical and Professional Issues in Computer Science and Engineering  
40216. Biomedical Ethics and Public Health Risk  
43243. Ethics and Science  
43283. Ethics and Risk

### Cluster Three: Science, Technology, and Public Policy

20304. Energy and Society  
20306. Environmental Chemistry  
30311. Introduction to the American Health Care System  
30382. Technology of War and Peace  
33370. Economics of Science  
34366. Medical Practice and Policy UK

## AREA STUDIES MINORS

(Taught in London)  
 40319. Self, Society, and Environment  
 40357. Computers, Ethics, and Public Policy  
 43328. Science Policy and Politics  
 43363. Spy Culture: Surveillance, Privacy, and Society  
 43364. Technology, Privacy and Civil Liberties  
 43396. Environmental Justice

### **Cluster Four: Optional Electives**

20419. Brief History of Time/Space/Motion  
 20421. Writing Speculative Fiction  
 20431. Philosophy and Cosmology: A Revolution  
 20435. Ethics of Energy Conservation  
 20441. Environmental Studies  
 20452. Ethics, Ecology, Economics and Energy  
 20461. Nuclear Warfare  
 30445. Technologies and Shaping of America  
 30476. Place, Environment, and Society in Australia and Melanesia  
 40401. The Future of Energy  
 40402. Wireless Communications: The Technology and Impact of 24/7 Connectivity  
 40403. Nanotechnology: Opportunities and Challenges  
 40424. Technology and Development in History  
 40498. Energy and Climate  
 43400. Science, Technology, and Values in Contemporary Society  
 43409. Evolutionary Psychology and the Sacred  
 43414. Abortion, Euthanasia, and Capital Punishment  
 43445. The Internet—Interpretations  
 43470. Molecular Revolution  
 46497. Directed Readings

Because individuals attracted to the STV minor have diverse interests and differing academic backgrounds, the program advisor works closely with each student to help select courses that will complement the student's major program or be most relevant to particular career aspirations.

Contact Gregory L. Macklem, STV Program office, 309 O'Shaughnessy Hall. Web address: [nd.edu/~stv](http://nd.edu/~stv).

### **COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Science, Technology, and Values](#) heading.

## Area Studies Minors

**Program of Studies.** The College of Arts and Letters offers its students the opportunity to pursue an interdisciplinary sequence of area studies minor that may supplement the major. Currently, there are minors in African Studies, Asian Studies, Irish Studies, Latin American Studies, Mediterranean/Middle East Studies, Russian and East European Studies and West European Studies.

The purpose of these minors is to assemble the courses dealing with the language, literature, history, politics, anthropology, philosophy, sociology and economics of each area. In this way a meaningful course structure is available to students who wish to concentrate their scholarly interest upon a cultural or geographical area as well as upon an interdisciplinary approach. Such programs can be especially useful to students who plan a career in international business, international organizations or government service or who intend to do graduate work in one of these areas.

The student who wishes to complete one of the area studies minors is required to take at least four area studies courses (12 hours) distributed over three different departments. These courses must be taken in addition to those required for the major. The student must also take courses in a language of the area being studied (Russian or an East European language for the Russian Studies program; Spanish or Portuguese for the Latin American Studies program; French, German or Italian for the West European Studies program; a Mediterranean language for the Mediterranean/Middle East Studies program; Irish for the Irish Studies program; and Japanese, Korean, or Chinese for the Asian Studies program). In most cases the required number of courses will be equivalent to those required to satisfy the arts and letters language requirement, but students should check with program directors for the specific requirements of a given area. While not required to take additional language instruction for the African Studies program, students who plan to continue their African interest at the graduate level are encouraged to develop a competency in Swahili, French, Portuguese, or Arabic. In the senior year, each student must submit a satisfactory essay based upon research that combines the major discipline with the area studies curriculum.

Students interested in an area studies minor should consult the director (listed below).

### **ASIAN STUDIES**

*Director:*

Susan Blum

The program in Asian Studies introduces students to the complexity of the continent of Asia. They select courses in a wide variety of fields, such as anthropology, East Asian languages and cultures, economics, film, television, and theatre, history, political science, and psychology. The Center for Asian Studies also

provides enriching activities such as lectures, films, gatherings, and grant opportunities to students interested in Asia.

Students with the supplementary major or the minor in Asian Studies will be very desirable employees of international business or accounting firms, nongovernmental organizations, and service organizations. They will be well prepared for graduate school in a discipline, or for professional school such as law or business. The supplementary major and the minor in Asian Studies provide recognition of students' training in this significant region of the world.

### **THE MINOR IN ASIAN STUDIES**

Students who are contemplating graduate study in a particular area of the world or a career in international business or government—or those who are merely curious—are well served by the Minor in Asian Studies. It provides a well-rounded introduction to the world's most populous continent. The Minor in Asian Studies is a very appropriate accompaniment to majors in anthropology, East Asian languages and cultures, history, political science, economics, or other arts and letters departments. It is also suitable for students in the Mendoza College of Business.

This interdisciplinary minor requires four courses in Asian Studies (12 credit hours) from at least three different departments and at least one full year of a relevant Asian language. In the senior year, students write a capstone project under the direction of a faculty member affiliated with the center and overseen by the director of the Center for Asian Studies.

Students should meet with the director of the Center for Asian Studies as early as possible in their academic career in order to plan their courses wisely. They should also meet with the director each semester to select approved courses.

### **Requirements for the Minor:**

Prerequisite: One year relevant Asian language (9–10 credit hours)

- Four Asian Studies courses, from at least three different departments (12 credit hours)
- Capstone project during the senior year (3 credit hours)

### **COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Center for Asian Studies](#) heading.

## AREA STUDIES MINORS

### THE MINOR IN EUROPEAN STUDIES

*Director:*

A. James McAdams

#### The Institute

Stretching from the Atlantic Ocean to the Ural Mountains, Europe plays a critical role in global affairs. The ongoing expansion of the European Union is helping to unite many countries and people in a traditionally diverse region. As future leaders, Notre Dame students need to know about European history, politics and culture in order to succeed in the contemporary world.

The Nanovic Institute for European Studies is dedicated to enriching students' academic experience by bringing Europe to Notre Dame, by supporting teaching and scholarship, and by cultivating global perspectives. Through research grants, symposia, lectures, and cultural events, the institute provides an interdisciplinary home for both students and faculty to explore the evolving ideas, identities, institutions that shape Europe today.

#### The Minor

Administered by the Nanovic Institute, the Minor in European Studies (MES) allows students to explore topics of interest and relevance in the field of European Studies. Through both coursework and independent study, students will examine the politics, history, and culture of Europe.

The program has three component requirements:

- completion of four upper-division courses in approved areas of European Studies
- one semester of European language study beyond the College of Arts and Letters requirement
- a capstone thesis essay on a topic within European Studies, to be completed during the senior year

Students wishing to study in Europe or to pursue careers in international business or international affairs will find this minor both rewarding and relevant.

#### Other Undergraduate Support

The Nanovic Institute also administers several undergraduate grant programs. European Studies minors and other undergraduates wishing to travel to Europe to conduct research, carry out internships, pursue advanced language study or to complete other academic initiatives with implications for contemporary Europe are encouraged to apply for support.

For more information, interested students should consult the institute's website at [nanovic.nd.edu](http://nanovic.nd.edu).

### IRISH STUDIES

*Director:*

Christopher Fox

The Keough-Naughton Institute for Irish Studies provides students with a unique opportunity to explore Ireland's extraordinary tradition in literature (in both the English and Irish languages) and distinctive historical development, including its influence on the history of the United States. The Irish Studies faculty includes leaders in several fields, including English, history, film, anthropology, and Irish language and literature. The Irish Studies Program also organizes a calendar of intellectual and cultural activities in which undergraduates are encouraged to participate; visitors to campus have included Seamus Heaney and John Hume, both Nobel Prize winners, and other leading Irish writers and public figures.

#### Minor

The core of the program is a minor in Irish Studies. The minor helps students develop their understanding of Irish society, culture, and politics through both course work and firsthand experience of Ireland. To qualify for the minor, students must (a) demonstrate proficiency in Irish language (by taking IRST 10101, 10102, and 20103); (b) complete four three-credit Irish Studies courses (mainly in the fields of history; English; Irish language and literature; sociology; politics; film, television, and theater; or anthropology), and (c) write a capstone essay in their senior year that links the minor with their major. Qualifying courses are listed in the *Schedule of Classes* under IRST; the list is available each semester from 422 Flanner Hall.

#### Dublin Program

The home of the Dublin program is the Keough-Naughton Notre Dame Centre in O'Connell House in the historic heart of Ireland's capital. Each semester, some 35 Notre Dame students enroll for courses in the Centre and at Trinity College Dublin, University College Dublin, and the National College of Art and Design. The program includes several field trips and a variety of social and cultural activities. Students taking the Minor in Irish Studies have a distinct advantage when applying for this highly competitive program.

#### Irish Internships

The Keough-Naughton Institute for Irish Studies annually awards Keough Irish Internships, which place undergraduates in internship positions in Dublin relating to Irish politics and commerce, culture, and society. In the past, students have been placed in the Irish parliament, government departments, the Irish Film Centre, and various social service organizations. The Internships last for a period of seven weeks. Two Internships are reserved for students taking the Minor in Irish Studies.

For further information, students should consult Prof. Christopher Fox, director; telephone 631-3555.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Keough-Naughton Institute for Irish Studies](#) heading.

### DEPARTMENT OF IRISH LANGUAGE AND LITERATURE

The only one of its kind in North America, the Department of Irish Language and Literature gives undergraduates the opportunity to complete a minor in Irish language and literature. The minor teaches students Irish, the indigenous language of Ireland and the voice of the oldest vernacular literature in Europe. It also allows them to engage Irish culture in its native language.

Officially launched on October 1, 2004, by His Excellency Noel Fahey, Irish Ambassador to the United States of America, the Department of Irish Language and Literature recognizes Notre Dame's commitment to the Irish language and the centrality of Irish to the academic discipline of Irish Studies.

Students pursuing a minor in Irish language and literature are required to complete the following courses:

1. Demonstrate advanced proficiency in the Irish language (by passing Intermediate Irish and Advanced Irish Translation IRL/IRST 20201 and IRL 20203).
2. Complete three literature courses offered by the Department of Irish Language and Literature.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Irish Language and Literature](#) heading.

### LATIN AMERICAN STUDIES PROGRAM

*Director:*

Edward Beatty

This program promotes opportunities for students to deepen their understanding of the region through a variety of courses, campus activities, internships, and firsthand overseas learning experiences. Through the Kellogg Institute, the program offers a calendar of cultural events, summer research and internship grants, current affairs panels and regular talks on Latin America by Notre Dame faculty and visiting lecturers. In addition, the institute brings several visiting fellows each semester who are from Latin America or who specialize in the region; these fellows visit classes and meet with students.

The core of the program is a minor in Latin American Studies. The minor aims to give students

## AREA STUDIES MINORS

well-rounded training that complements their major area of study and to make this training easily recognized on a graduating student's transcript. To qualify for the minor, students must demonstrate proficiency in Spanish or Portuguese (through two courses at the University or advanced placement), and complete five courses on Latin America that are distributed across at least three departments, with the option of writing a senior essay.

Qualifying courses are listed each semester in the Schedule of Classes under LAST. They include courses such as Contemporary Latin American History, Economic Development of Latin America, Latin American Politics, Liberation Theology, Sociology of Development, and Spanish-American and Brazilian Literature. The program offers the John J. Kennedy Prize annually for an outstanding senior essay dealing with a Latin American topic. The summer research grants are offered through Kellogg to students after their junior year to encourage undergraduates to undertake original research on international subjects. The summer internships aim to provide undergraduates real-world experience in dealing with Latin American issues. The summer fellowships offer freshmen and sophomores the opportunity to engage in initial exploratory projects in Latin America. For more complete information about courses that qualify each semester for the minor degree, the calendar of events or the summer research and internship competitions, please consult the LASP Web page at [kellogg.nd.edu/students/lasp](http://kellogg.nd.edu/students/lasp), or call Holly Rivers, assistant director, at 631-6023.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Arts and Letters](#) section under the [Department of Latin American Studies](#) heading.

### RUSSIAN AND EAST EUROPEAN STUDIES

#### Directors:

Alyssa Gillespie and Semion Lyandres

The interdisciplinary minor in Russian and East European Studies enables students to enrich their understanding of this rapidly changing and strategically important region of the world through a robust offering of courses in language, literature, history, politics, art, anthropology, film, music, and economics, while also encouraging firsthand experience of the area through study abroad during a summer or semester. Throughout the academic year, the Program in Russian and East European Studies sponsors a full slate of cultural activities—including film series and visits to musical events and art exhibits—that allow students to expand their knowledge of the region beyond the scope of their coursework. In addition, the Russian and East European Studies lecture series brings nationally and internationally renowned scholars to campus to share their latest research in fields pertinent to the minor;

these lectures are tailored to the undergraduate audience and often tie in closely with courses currently being taught or program-sponsored cultural events. Russian and East European Studies cooperates closely with the Department of German and Russian and other participating departments to sponsor a monthly Russian language table and a variety of social gatherings.

#### Minor

The core of the program is a minor in Russian and East European Studies. The minor offers students interdisciplinary training that builds upon their foreign language study and complements their major field. Completion of the minor requires the following: (1) at least three semesters (or the equivalent) of college-level Russian or another approved Central or East European language (German will be accepted in certain cases); (2) four additional courses (12 credits) in Russian and East European area studies, taken in residence at Notre Dame and distributed over at least three departments (no more than one of these courses may be a language course, chosen from Intermediate Russian II, Advanced Russian I or II, or the equivalent); (3) a senior thesis directed by a member of the Russian and East European Studies faculty (students will receive 1.5 credits in the fall semester for preparation of the thesis and 1.5 credits in the spring semester for writing the thesis); (4) three 1-credit courses (graded pass-fail) chosen from language across the curriculum tutorials and/or cultural enrichment offerings in Russian and East European Studies.

### COURSES IN RUSSIAN AND EAST EUROPEAN STUDIES

# Mendoza College of Business

The Mendoza College of Business, an accredited member of AACSB—The International Association for Management Education—was established in 1921.

As a constituent unit of Notre Dame, the Mendoza College of Business constantly strives to realize the general objectives of a Catholic university. In a special sense Notre Dame seeks to inspire a search for learning in the professional sphere of business and cultural areas so business graduates are prepared to assume the obligations of Christians in business.

The undergraduate student body of the college is made up of sophomores, juniors, and seniors. Students who successfully complete the First Year of Studies are eligible for admission to the college at the beginning of the sophomore year.

The dean of the college has responsibility for admission following the First Year of Studies, as well as the registration, rating, probation, academic dismissal, and graduation of students with a Bachelor of Business Administration (B.B.A.) degree.

## Programs of Study

Notre Dame has always recognized that education, to be effective, must be dynamic. It should be modified continually to meet the changing needs of the students and society. The primary purpose of revisions in the educational program is to continue the regular improvements the Mendoza College of Business has been making since its establishment in 1921.

An examination of the requirements of business led to the conclusions that the business world has a growing need for competent business administrators and that Notre Dame has a responsibility to help develop young people capable of assuming important administrative positions.

The business world has always required people with initiative, a willingness to take risks and the stamina to live in a competitive world. The competitive demands for new and better products in larger quantities at lower costs produce business operations which are extensive and involve a large number of highly specialized people. The administrator, whose job it is to put the work of many specialized people together into a smooth-working whole, has traditionally developed administrative skills by rather accidental means: by knowing instinctively, by learning from experience or by building upon some specialized body of knowledge and skill. Colleges have participated principally by furnishing the

specialized bodies of knowledge supplemented with liberal arts courses.

The professional purpose of the business program is to focus attention directly on the skills and knowledge required by the business administrator and to help students acquire knowledge and develop those skills in a systematic way.

This work is especially appropriate at Notre Dame. The responsibility of business to its employees, customers, suppliers, owners, and the public is being recognized and studied with growing intensity in many quarters. This responsibility raises ethical issues to which Notre Dame and its graduates should respond in a sound and practical way. The continuing attempt to improve the practical application of ethical principles to competent performance in administrative jobs is a prime concern of the Mendoza College of Business.

**Objectives.** In light of the responsibility of the Mendoza College of Business for guiding students toward a liberal education in the Christian tradition and toward future responsibilities as business administrators, the following general framework has been formulated:

As a division of the University of Notre Dame, the Mendoza College of Business has the obligation to teach its students so that upon graduation they may have the knowledge of those ultimate principles whereby all things are capable of being organized into an intelligible whole.

**Educational Objectives.** The educational objective of the undergraduate program in the Mendoza College of Business is to assist and guide students in preparation for lifelong learning, for effective citizenship and for professional careers as competent and ethical participants in business, government, and other complex organizations. This is accomplished by educating students in the professional area of business while remaining true to the scholarly, liberalizing, and Catholic mission of the college and the University.

Within this general framework, the specific objectives of the undergraduate program of the Mendoza College of Business include the following:

1. *Providing* students with the foundation for a sound liberal education, including an appreciation for scholarship, creativity and innovation, and ethical behavior.
2. *Fostering* in students a recognition of the importance of administration, management, and entrepreneurship as professions and a recognition of

the responsibility to manage organizational affairs and resources in a manner that will contribute to both organizational and societal goals.

3. *Inspiring* students to be leaders in their profession and developing the capabilities necessary for this responsibility, namely:

(a) broad knowledge of the structure, interrelationships, and problems of a rapidly changing global society;

(b) competence in analyzing and evaluating business problems, and in communication and other interpersonal skills;

(c) comprehensive understanding of the administrative function, the complexity of business and other enterprises, and the tools of management; and

(d) skill in using knowledge to develop creative responses to opportunities and threats faced by organizations and by society.

4. *Facilitating* the integration of the students' professional expertise with Notre Dame's sense of values.

**The Program.** The educational activities of a university and a college are broader than the mere teaching of courses. Nevertheless, one of the main expressions of an educational plan is its program of instruction. Several features of the program itself and certain fundamental concepts on which it is based deserve special comment.

The college recognizes four distinguishable but inter-related types of education to which future business leaders should be exposed: (1) study in the fields traditionally called liberal; (2) a basic understanding of the operation of a business enterprise; (3) an understanding of the economic and legal climate or atmosphere in which business functions and of which business is a part; (4) a professional concentration in a major for the student's in-depth educational pursuit, which will also provide some preparation for future employment.

The curriculum of the three-year business program combined with that of the First Year of Studies requires approximately one-half of the instruction to be in traditional liberal arts areas. The faculties of the College of Arts and Letters and the College of Science provide the instruction for the liberal arts courses.

Upon entering the Mendoza College of Business at the beginning of the sophomore year, the student registers for a program which introduces the basic tools of business and the functions of accounting,

## CURRICULUM FOR THE DEGREE OF BACHELOR OF BUSINESS ADMINISTRATION

information systems, financial management, management, business statistics, marketing, and business law.

In the junior and senior years the student continues his or her studies using the analytical tools developed in the sophomore year. The student enters into a consideration of the operation of the business firm and the economic and legal climate of business. The examination of the economic climate in which business must operate is concerned with the fundamentals of money and banking, the role of the federal government in terms of its fiscal and monetary policies, and the concepts of national income accounting that afford a basis for measuring and forecasting economic change. A student gives emphasis to his or her major and may either add to minimum major requirements or elect other course areas for study.

## Curriculum for the Degree of Bachelor of Business Administration

The college stands ready to accept all applicants who have successfully completed the course requirements of the First Year of Studies at Notre Dame. Ordinarily, this will represent a minimum of 30 credits of work (exclusive of laboratories and ROTC) consisting of the following credits:

<i>University Requirements</i>	<i>Courses</i>
Composition	1
*Mathematics	2
*Science	2
*History	1
*Social Science (Principles of Microeconomics)	1
*Theology	2
*Philosophy	2
*Fine Arts or Literature	1
**Physical Education	2
	14

\* One of these requirements must be University Seminar 13180–13189.

\*\*This requirement can also be fulfilled through first-year enrollment in ROTC.

Only courses marked as “Univ. Req.” in the online Schedule of Classes can be used to fulfill a University requirement. These courses can be viewed for a particular academic term by selecting the “Schedule of Classes” link within *insideND* or by visiting the home page of the Office of the Registrar and clicking on the “Class Search” link.

First-year students are required to complete a University seminar; composition; two semester courses in mathematics; two semester courses in science; one semester course chosen from history, social science, philosophy, theology, or fine arts; and two semester courses in physical education or in ROTC. The University seminar will satisfy the relevant requirement in fine arts, literature, history,

social science, philosophy, theology, mathematics, or science.

During the sophomore year, a student ordinarily will complete the following credits:

6 in *Principles of Accountancy I and II*  
 3 in *Corporate Financial Management/Corporate Finance Essentials*  
 3 in *Introduction to Marketing*  
 3 in *Principles of Management*  
 3 in *Business Law*  
 3 in *Statistics in Business*  
 3 in *IT Management Applications*  
 3 in *Theology or Philosophy*  
 3 in a nonbusiness elective  
 1 in *Ethics*

The sequence and order of completion of courses will vary according to the availability of courses.

The B.B.A. degree requires a total of 126 credits. Of these credits, a student has up to 14 free elective credits and 18 credits in non-business elective courses. Consequently, a student has considerable flexibility in selecting courses that meet his or her particular academic and career plans. Majors are available in accountancy, finance, marketing, management consulting, management entrepreneurship, and information technology management. Second majors or concentrations in subject areas outside the college are encouraged. Students should refer to specific departments for opportunities and requirements. Dual-degree programs have much more extensive requirements, which usually result in the need for a fifth year. (156 credit hour minimum, total number depending on program.) Entry into these programs requires the permission of the deans of both colleges. Interested students should contact the assistant dean's office for specific information.

A graduate from the college will have accumulated credits in the following areas, which include freshman- and sophomore-year credits:

3 in *Composition*  
 6 in *Mathematics*  
 6 in *Science*  
 3 in *History\**  
 6 in *Behavioral Science\**  
 3 in *Literature\* or Fine Arts\**  
 6 in *Philosophy\**  
 6 in *Theology\**  
 3 in *Principles of Microeconomics (Social Science)*  
 6 in *Accountancy I and II*  
 3 in *Finance*  
 3 in *Marketing*  
 3 in *Management*  
 3 in *Statistics in Business*  
 3 in *IT Management Applications*  
 3 in *Business Law*  
 1 in *Ethics*  
 3 in *Macroeconomic Analysis*  
 3 in *Managerial Economics*  
 1.5 in *Strategic Management*  
 1.5 in *Introduction to Process Analytics*

3 in *Futures Issues*  
 1.5 in *Integrative Course\*\**  
 18–21 in major  
 18 in nonbusiness electives  
 10.5–14 in free electives  
 2 semesters of physical education or ROTC

\* One of these three-credit requirements must be a University Seminar course.

\*\* The integrative course may be fulfilled by an approved course in the student's major, releasing 1.5 credits to elective status.

General administration of the undergraduate program is accomplished in the Office of the Assistant Dean for Administration, Room 101 Mendoza College of Business, which is also the repository for B.B.A. student records. Advisors are available in this office to counsel students and answer questions concerning university and college requirements/policies. Faculty mentoring for juniors and seniors is available from their respective major departments; however, Room 101 advisors will continue to provide general advice on college and University issues. The department offices of the college, i.e. accountancy, finance, management, and marketing, are located in Room 102 of the Mendoza College of Business.

Normal semester course load for sophomores is 15–16 hours; for juniors, 18–19 hours; and for seniors, 15–19 hours. The minimum semester course load for all students is 12 hours. Normally, a grade point average of 3.4 or higher for the previous semester is required to obtain permission to carry an overload. Interested students should contact the assistant dean's office for specific information.

With permission from the academic dean, juniors and seniors who register for and maintain a minimum of 12 credit hours may elect one course per semester under the pass-fail option. Only free elective and non-business elective courses may be taken pass-fail. No business or required courses may be taken pass-fail even though taken as a free elective. The selection of a course as pass-fail must be made during the first week of the semester and is irrevocable. Note: to be eligible for Dean's List status, a student must have a minimum of 12 graded credits for the semester.

Students may elect to fill free elective or non-B.A. elective requirements with 1-, 1.5-, or 2-credit-hour courses, AP credit, or Credit by Exam. However, a minimum of 18 of the free or non-B.A. elective credits must be filled with standard 3- to 6-credit courses or graded 1.5-credit courses.

The college accepts a maximum of six credits through AP and/or credit by exam in any one language toward degree-seeking credits.

To be eligible for the B.B.A. degree, students must complete a minimum of 63 credits at Notre Dame, including their senior year.

## STUDENT ORGANIZATIONS AND ACTIVITIES

Directed readings or special studies are not part of a standard curriculum for students in the Mendoza College of Business and cannot duplicate or substitute for an existing course. Directed readings or special studies are rare exceptions to established coursework, designed to support an area of research or study that is of mutual interest to a faculty member and a student. These courses contain advanced objectives beyond those covered in regularly scheduled courses—not introductory material or material taken from the popular literature that should more properly be considered “self-improvement” than academic in nature. Unless special permission has been obtained from the Mendoza College of Business Office of Undergraduate Administration, a directed reading special studies course will not satisfy a University, college, or major requirement. Directed readings or special studies outside of a student’s major in business may count as a free elective or non-B.A. elective credit only. A student may register for no more than three credit hours of directed readings or special studies in any given semester. No more than a maximum of nine directed readings or special studies credit hours may be applied toward the 126-credit-hour B.B.A. degree requirements.

## International Study Programs

Students from any of the majors in the Mendoza College of Business may participate in international study programs.

For more than a decade, Notre Dame has made it possible for students to earn credits toward graduation in international study programs. Travel, direct personal experience of another language and culture, and study in another tradition all broaden and deepen the liberal education of the whole person, to which the University has always been committed.

Qualified undergraduates can spend all or part of their sophomore or junior year in such places as Angers, France; Innsbruck, Austria; Dublin, Ireland; London, England; Fremantle, Australia; Monterrey and Puebla, Mexico; Nagoya, Japan; Santiago, Chile; Shanghai, China; Toledo, Spain; and Athens, Greece.

International study programs make a unique contribution to the excellence of liberal education in the undergraduate colleges and frequently have proven a real asset in career development.

For further information and advice on international study, students of the Mendoza College of Business may contact the assistant dean, Room 101 Mendoza College of Business, and/or the director of the International Study Programs, 152 Hurley.

## Student Awards and Prizes

*The Hamilton Awards.* Founded by Robert L. Hamilton ’34, Racine, Wis., these awards are given to the outstanding senior in each of the four departments of the college.

*The Dean’s Award.* This award is given to the graduate whose leadership has contributed most significantly to the progress of the college.

*The Herman Crown Award for Outstanding Achievement in Finance.* An annual award made by the Department of Finance in memory of the late Herman Crown and given to the senior finance major with the highest overall grade point average.

*Raymond P. Kent Award.* An annual award given to a senior finance major for outstanding performance in finance classes.

*Paul F. Conway Award.* An annual award given to a senior in the Department of Finance who embodies the characteristics that define our tradition of excellence: a person of keen intellect who enriches the ideals of Notre Dame.

*LeClair Eells Award.* An annual award given to a senior finance major for outstanding leadership.

*Wall Street Journal Award.* Given to a senior in the Department of Finance for rendering outstanding service to the department.

*Paul D. Gilbert Award for Leadership.* An annual award given to a marketing senior for overall leadership in extracurricular departmental activities. The recipient is selected by the faculty of the Department of Marketing. The award is named for the late Paul D. Gilbert, a local business executive, civic leader, and longtime friend of the department.

*Wesley C. Bender Award for Outstanding Performance in Marketing.* An annual award given to the senior marketing major with the highest grade point average in marketing courses. The award is named for the first chairman of the Department of Marketing, Wesley C. Bender.

*John R. Malone Award.* An annual award given to the junior marketing major with the highest overall grade point average.

*Robert M. Satterfield Award.* Given to a marketing student for bringing enthusiasm, integrity, and a spirit of teamwork to the classroom.

*David A. Appel Award.* Given to a marketing student for exemplary service contributions.

*Tara K. Deutsch Award.* An annual award given to an accounting senior who has shown exemplary social consciousness and devotion to efforts to give hope to the less fortunate.

*Accountancy Chairman Award.* An annual award provided to an accounting senior who demonstrates

outstanding service to the Department of Accountancy.

*Accountancy Excellence Awards.* Given annually to 20 sophomores who declare accountancy as their major and have demonstrated outstanding economic achievement. The awards are funded by annual gifts from Deloitte & Touche, Ernst & Young, KPMG, and PricewaterhouseCoopers.

*Peter Brady Award.* Established to honor past faculty member Peter Brady, this award is given in recognition of outstanding economic performance to a senior who is entering Notre Dame’s Master of Science in Accountancy program.

*Elmer Layden Awards.* Given annually to graduating accounting seniors in recognition of academic achievement. The awards are funded by the Elmer Layden Jr. Endowed Fund.

*Brother Cyprian Awards.* Given annually to graduating accounting seniors in recognition of academic achievement. The awards are granted in honor of Holy Cross Brother Cyprian O’Hare (“Brother Zip”), who helped to launch Notre Dame’s accountancy education program in 1895 and later served as department chair.

*James Dincolo Awards.* Given annually to graduating accounting seniors in recognition of academic achievement. The awards honor former accountancy professor James Dincolo and are funded by an endowment in his name.

*The Indiana Certified Public Accountants Society Award.* Founded in 1950 by the board of directors of the Indiana Association of Certified Public Accountants, this annual award provides a plaque to an outstanding senior in accountancy.

*The Management Award.* Given to the outstanding ITM senior in the Department of Management.

*The Justin Harris Brumbaugh Memorial Award.* Given annually to the graduating ITM major who has excelled academically and has been selected by the graduating seniors as best representing the unique and enduring spirit of Notre Dame.

## Student Organizations and Activities

Students’ academic organizations are supported and encouraged by the administration and the faculty. These associations are actively managed by student officers. Members of the faculty serve in advisory capacities.

**The League of Black Business Students.** The League of Black Business Students was organized in 1976. The general purposes of the league are to establish and maintain a rapport with the administration, faculty, and various business administration clubs of the Notre Dame community, establish an orientation program, plan business forums, provide study sessions, and create business administration internships.

## STUDENT ORGANIZATIONS AND ACTIVITIES

### Honorary Societies.

**Beta Gamma Sigma.** Notre Dame shares, with selected colleges of business nationwide, this honorary society's stated purposes of encouraging scholarship and achievement among business administration majors. It promotes education in business administration and fosters integrity in the conduct of business. Undergraduate membership in this organization is restricted to the upper 10 percent or less of the senior class and the upper 5 percent or less of the junior class for all full-time students. Faculty membership is limited to those with tenure in the Mendoza College of Business at Notre Dame.

**Beta Alpha Psi.** Accountancy majors who have demonstrated outstanding scholastic ability and the personal characteristics requisite to professional status are eligible for membership in the Beta Sigma chapter of Beta Alpha Psi, the national professional and honorary accounting fraternity. The purposes of this fraternity are to encourage and foster the ideal of service as the basis of the accounting profession; to promote the study of accountancy and its highest ethical standards; to act as a medium between professional persons, instructors, students and others who are interested in the development of the study or profession of accountancy; to develop high moral, scholastic, and professional attainments in its members; and to encourage cordial interaction among its members and the profession generally.

**Advisory Council Investment Fund.** Through the generosity of William R. Daley, a former member to the college's Advisory Council, undergraduate students are able to learn the principles of investment and portfolio management firsthand. The investment policy of this fund is determined by the students under the guidance of a faculty advisor. Annual reports are submitted to the dean and to the University's investment officer.

**Finance Club.** The goal of the Notre Dame Finance Club is to enhance its members' knowledge of the financial world. The club achieves this goal through providing professional speakers, company information sessions, and the annual Fall Break trip to Chicago and New York. These events provide the members with exposure to the diverse careers within the financial industry. In addition, the exposure allows club members a unique networking opportunity, which may lead to career opportunities for internships or full-time employment after graduation.

### Notre Dame Accounting Association (NDAA).

The Notre Dame Accounting Association exists to provide junior and senior accountancy majors and sophomore business majors who are considering accountancy as a major, an organization which provides support, employment contacts, social gatherings and events, and a unifying bond in the form of membership. Sophomores, juniors, and seniors majoring in, or intending to major in, accountancy are eligible for membership. For more information, please visit [nd.edu/~ndaa](http://nd.edu/~ndaa).

**Marketing Club.** The Marketing Club provides an opportunity for junior and senior marketing majors to learn about the field of marketing. Business executives who are active in the marketing profession are invited to speak to members several times during the year. These businesspeople address the club on a variety of marketing, selling, and advertising topics. The Marketing Club is also very active in promoting the students for permanent positions or internships via a career night held each fall.

**Notre Dame Information Technology Management Club (NDITM).** The purpose of this club is to provide a forum for all students interested in the field of information technology management, particularly ITM majors, to exchange ideas and to more fully develop their skills and cover potentials in this dynamic field of study. The NDITM club goals are accomplished through activities that foster greater interaction among students, faculty, and corporate recruiters. These activities include inviting guest lectures, computer skill seminars, tutoring sophomores and juniors, social gatherings, and sports events.

**Student International Business Council (SIBC).** As one of the largest student organizations on campus, the SIBC is committed to its vision of establishing peace through commerce while educating its members and providing them an avenue to develop vital business and interpersonal skills with an international focus. The council is organized into various divisions representing all majors and concentrations within the Mendoza College of Business. Members are actively a part of projects which strive to offer unmatched, hands-on experience in everything from simulating the structure and debates of the European Central Bank and forming an in-depth fundamental and technical financial analysis of an international company, to managing the council's marketing needs and developing and maintaining our own website.

The council is also dedicated to bettering international relations by means of socially-conscious activities. One of note is the Haiti Bednet project that receives funding from both the SIBC and the W.K. Kellogg Foundation.

Within a given year, members travel to all corners of the globe. Each year, the SIBC grants around 40 students the chance to work as interns and teachers in a rapidly growing number of foreign countries—giving members the real-world experience that is highly desired in the current job market.

**Management Club.** The purpose of the Management Club is to involve students in activities that will take them beyond the classroom into the world of industry, labor, and government. Students obtain experience in managerial decision-making by exposure to real-life situations in which they can examine theory and principles in practice.

The Management Club schedules business professionals, labor leaders, and government officials to address its members; sponsors field trips to large

industrial centers; and conducts an annual management workshop on important current issues facing management led by professional men and women. Members also develop organizational and administrative skills by participating in such endeavors as the operation of a Mardi Gras booth to raise funds for charity. As a social function, the club has smokers that allow students and faculty to meet and exchange views on an informal level.

**Entrepreneurs Club.** The Entrepreneurs Club provides assistance and opportunities for creative students of all majors interested in launching their own companies. One such opportunity is the Student Business Incubator—a competition in which student teams run their own on-campus businesses for 10 weeks and can choose to keep or donate the profits. The club also brings to campus a number of prestigious entrepreneurial speakers and hosts Entrepreneur Networking Dinners to bring together students, faculty members, and entrepreneurs in an intimate setting. Beyond its campus activities, the Entrepreneurs Club publishes a resume book to help members obtain summer internships and travels to national conferences to learn, network, and compete.

**Undergraduate Women in Business Association.** The Undergraduate Women in Business Association of Notre Dame is committed to the development of women's roles as students of business and as leaders in business-related fields. UWIB works to provide undergraduate women with the support and resources that will better prepare them for careers in business and achieving a work-life balance.

## FINANCE

## Accountancy

*PricewaterhouseCoopers Faculty Fellow and Chair*

H. Fred Mittelstaedt

*KPMG Professor of Accountancy:*

Thomas F. Schaefer

*Notre Dame Alumni Professor of Accountancy:*

Peter D. Easton

*Vincent and Rose Lizzadro Professor of Accountancy:*

Thomas J. Frecka

*Deloitte and Touche Professor of Accountancy*

David N. Ricchiute

*Professors:*

Kenneth W. Milani; Michael H. Morris; William D. Nichols; Ramachandran Ramanan; James L. Wittenbach

*Associate Professors:*

Chao-Shin Liu; Jeffrey S. Miller; Kevin M. Misiewicz; Juan M. Rivera; James A. Seida; Thomas L. Stober; Sandra Vera-Muñoz

*Assistant Professors:*

Brad Badertscher; Jeffrey Burks

*Professional Specialists:*

James Fuehrmeyer; Edward F. Hums; Brian Levey; Tonia Murphy; James O'Brien; Janet O'Tousa; William Schmuhl

**Program Objectives.** The Department of Accountancy provides outstanding accounting educational experiences for its students by (a) complementing and supporting the tradition of liberal arts/general education at Notre Dame, (b) adhering to the objectives of the undergraduate program of the Mendoza College of Business, and (c) developing and continuously improving an innovative accounting curriculum for successful careers as accounting professionals. The curriculum focuses on critical thinking, research, technology, ethics, global issues, teamwork, and communication.

The department provides students with information about career options in accounting as well as career options that utilize accounting knowledge as an integral part, so that those with the background, interest, and motivation will choose to major in or take significant course work in accounting. The department also supports the activities of the Notre Dame Career Center while providing recruiting guidelines and assisting with the placement of students for the twofold purposes of (a) maintaining an outstanding record for placing a high percentage of graduates with national and regional accounting firms, industrial, service, and not-for-profit organizations; and (b) supporting student desires to pursue other postgraduate options, including volunteer work, military service, and graduate education.

**Program of Studies.** The accounting sequence begins with Accountancy I and II (ACCT 20100 and 20200). These courses, normally taken in the sophomore year and required of all business students,

are designed to provide a broad introduction to the accounting function, the profession of accountancy and the role of accounting in society. Accountancy students must also complete FIN 20150, Corporate Financial Management, with a grade of C or above.

Students choosing an accountancy major must complete the following Department of Accountancy requirements.

ACCT 30110. Accounting Measurement and Disclosure I

ACCT 30210. Accounting Measurement and Disclosure II

ACCT 30210. Accounting for Decision Making and Control

ACCT 30280. Decision Processes in Accounting

ACCT 40510. Audit and Assurance Services

ACCT 40610. Federal Taxation

**The 150-Hour Rule for CPA Certification.** A popular career choice for many accountancy majors is to become Certified Public Accountants. In addition to offering traditional services, CPAs are increasingly sought as business and systems advisors to solve diverse and unstructured problems. The 150-hour rule aims to provide students with the necessary background to meet these challenges.

The 150-hour rule is an educational requirement governed by state-specific rules. The rules vary across states, and students are encouraged to visit the department office (102 Mendoza College of Business) or consult the National Association of State Boards of Accounting (NASBA) website ([nasba.org](http://nasba.org)) for information about their home state's requirements.

The Notre Dame Accountancy Department offers a one-year master of science degree program that not only helps our students meet the 150-hour rule, but also provides an excellent course of study to prepare for a variety of business-related career choices. Its website is [nd.edu/~msacct](http://nd.edu/~msacct).

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Accountancy](#) heading.

## Finance

*Chair:*

Richard R. Mendenhall

*Kenneth R. Meyer Chair in Global Investment*

*Management:*

Roger D. Huang

*C.R. Smith Professor of Finance*

Timothy J. Loughran

*Bernard J. Hank Professor of Business Administration:*

Frank K. Reilly

*John W. and Maude Clarke Professor of Finance:*

Paul H. Schultz

*Notre Dame Professor of Finance:*

John F. Affleck-Graves

*Professors:*

Robert Battalio; Jeffrey H. Bergstrand; Thomas Cosimano; Barry P. Keating; Bill D. McDonald; Richard G. Sheehan

*Associate Professors:*

Shane Corwin; John A. Halloran; Michael L. Hemler; Howard P. Lanser; Katherine Spiess

*Assistant Professors:*

Andriy Bodnaruk; Matthew Cain; Zhi Da; Pengjie Gao; Sophie Shive; Hayong Yun

*Professional Specialists:*

Carl Ackermann; Kristen Collett-Schmitt; Margaret Forster; Jeffrey Hart; David Hutchison; Jerry Langley; James Leady; Kevin Scanlon; John Stiver

*Emeriti Faculty:*

Paul F. Conway; Lee A. Tavis; Edward R. Trubac

**Program of Studies.** The department offers courses with the dual objective of (1) providing a broad foundation so that students can pursue further study at the graduate level and (2) equipping students with the broad base of knowledge and skills necessary for entry into the financial world. The major in finance consists of six courses offered by the department and one additional course offered by the Department of Accountancy, ACCT 30100 Corporate Financial Reporting (in addition to the courses required of all candidates for the degree of bachelor of business administration), which affords students flexibility in their career choice. The six courses are FIN 30600 Investment Theory, FIN 30400 Advanced Corporate Finance, and four 40000-level finance electives chosen from among the other advanced courses offered by the department.

All students enrolled in the Mendoza College of Business are required to take a business-finance course during their sophomore year. Finance majors must complete FIN 20150 Corporate Financial Management with a grade of C or higher. This course cannot be repeated for a higher grade. This course is concerned with internal financial management of business firms. In addition, all business administration students are required to complete two courses in business economics: Managerial Economics and Macroeconomic Analysis. The aim of these courses is to provide students with an

## MANAGEMENT

understanding of the economic environment within which business enterprises operate.

The advanced courses the department offers are designed to equip students with the knowledge which will enable them to make a good start and to progress in whatever area of business they choose upon graduation. The subject matter of these courses—investments, financial management, financial institutions, business economics, and international finance—is of fundamental importance. Graduates of the department are currently pursuing successful careers in many areas of business.

Students who intend to take the examinations leading to the Chartered Financial Analyst (CFA) designation should structure their programs with that objective in mind. BALW 20150 and ACCT 40710 should be included in their program along with appropriate courses in accounting and investments.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Finance](#) heading.

## Management

*Chair and Joe and Jane Giovanini Professor of Management:*

Robert D. Bretz

*David Gallo Professor of Ethics:*

Robert Audi

*Edward Frederick Sorin Society Professor of Management:*

Edward J. Conlon

*Howard J. and Geraldine F. Korth Professor of Strategic Management:*

John G. Keane

*Franklin D. Schurz Professor of Management:*

Robert P. Vecchio

*Martin J. Gillen Dean and Ray and Milann Siegfried Professor of Management:*

Carolyn Y. Woo

*Professors:*

Salvatore J. Bella (emeritus); Thomas P. Bergin (emeritus); J. Michael Crant; David B. Hartvigsen; Leroy J. Krajewski (emeritus); Khalil F. Matta; William P. Sexton; Ann E. Tenbrunsel

*Associate Professors:*

Viva O. Bartkus; Matthew C. Bloom; Yu-Chi Chang; Byung T. Cho (emeritus); James H. Davis; Sarvanan Deveraj; William F. Eagan (emeritus); Robert F. Easley; Nasir Ghiaseddin; Vincent R. Raymond (emeritus); C. Joseph Sequin (emeritus); Jerry C. Wei; Oliver F. Williams, C.S.C.

*Assistant Professors:*

Corey Angst; Emily Block; John D'Arcy; Diana Jimeno-Ingrum; Kenneth Kelley; Michael Mannor; Carolyn Queenan; Daewon Sun; Charles A. Wood; Xuying Zhao

*Professional Specialist:*

Jeffrey Bernel; John Michel; James S. O'Rourke IV; Gerard Pannekoek

*Associate Professional Specialist:*

Roya Ghiaseddin

*Assistant Professional Specialist:*

Sandra Collins; Robert Lewandowski

**Programs of Study.** The Department of Management offers an integrated program of study with opportunities for specialization in three areas: information technology management, consulting, or entrepreneurship. All management majors are required to complete general coursework on the management of information, people, and work processes. They must then select a track that prepares them for careers in the management of information technology, consulting and problem solving, or entrepreneurship and family business.

### Management Department Core Requirements

MGT 30220. Management Communication	1.5 hrs.
MGT 30660. Strategic IT Applications	1.5 hrs.
MGT 40420. Innovation and Design	3.0 hrs.
MGT 40490. Business Problem Solving	3.0 hrs.
MGT 40700. Project Management	1.5 hrs.
MGT 40750. Spreadsheet Decision Modeling	1.5 hrs.

## INFORMATION TECHNOLOGY MANAGEMENT MAJOR

The ITM program is designed to prepare students to become leaders in the use of information technology for the benefit of organizations and society. This program of study focuses on educating students about the development and use of information systems as decision-making and problem-solving tools. The program also is intended to develop an understanding of the managerial issues encountered in the introduction or operation of IT solutions in organizations, particularly, how these tools can be used to gain a competitive edge and to re-engineer an organization.

### ITM Major Required Courses

In addition to the core courses listed above, all ITM majors must take the following three courses, and are eligible to take the elective courses that follow:

MGTI 30610. Application Development	3.0 hrs.
MGTI 30630. System Analysis and Design	3.0 hrs.
MGTI 30640. Networking and Security	3.0 hrs.

### ITM Elective Courses

MGTI 30620. Business Intelligence Systems	3.0 hrs.
MGTI 40612. Advanced Programming	3.0 hrs.
MGTI 40660. Web Development	3.0 hrs.
MGTI 40670. Technology Risk Management	3.0 hrs.
MGTI 40690. ITM Capstone Project	3.0 hrs.

## CONSULTING MAJOR

The consulting program prepares students to manage people and processes within both large and small organizations or to advise organizations on those management issues. A particular emphasis is placed on managing within organizations facing the challenges of rapid change and increased competition. The major is designed to provide sufficient flexibility for students to prepare for several career paths by preparing students to think systematically about the processes through which organizations achieve excellence.

### Consulting Major Required Courses

In addition to the core courses listed above, all consulting majors must take the following three courses:

MGTC 30300. Management Competencies	3.0 hrs.
<i>or</i>	
MGTC 30450. HR Issues in High-Performance Organizations	
MGTC 30460. International Management	3.0 hrs.
MGTC 40410. Leadership and Motivation	3.0 hrs.

## ENTREPRENEURSHIP MAJOR

The entrepreneurship program prepares student to conceive, develop and launch new ventures and to turn innovative ideas into products that can be brought to market. Emphasis is placed on the financial, legal, and marketing aspects of start-up businesses. The program culminates with a juried

## MARKETING

business plan competition for financial backing and start-up funding support.

#### Entrepreneurship Major Required Courses

In addition to the core courses listed above, all entrepreneurship majors must take the following four courses:

MGTE 30500. Introduction to Entrepreneurship	3.0 hrs.
MGTE 30510. Go to Market	1.5 hrs.
MGTE 30520. Funding New Ventures	1.5 hrs.
MGTE 40590. Entrepreneurship and Business Planning	3.0 hrs.

#### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Management](#) heading.

## Marketing

#### Chair:

John F. Sherry Jr.

*Aloysius and Eleanor Nathe Professor of Marketing Strategy:*

William L. Wilkie

*John T. Ryan Jr. Chair in Business Ethics and Professor of International Ethics*

Georges Enderle

*Ray W. and Kenneth G. Herrick Professor of Marketing:*

John F. Sherry Jr.

#### Professors:

Joseph P. Guiltinan; John J. Kennedy; Patrick E. Murphy; Joel E. Urbany

#### Associate Professors:

John F. Gaski; Elizabeth S. Moore; John A. Weber

#### Assistant Professors:

Kevin D. Bradford; Tonya W. Bradford; Debra M. Desrochers; Timothy J. Gilbride; Joan M. Phillips; Constance E. Porter

**Program of Studies.** Students completing a degree in marketing at Notre Dame should: (1) understand the decision-making processes of buyers and sellers in a market; (2) know how to apply behavioral models and quantitative tools to the analysis of marketing issues; (3) be able to develop informed marketing and organizational strategies; (4) be effective in working in a team environment; and (5) recognize the ethical and social responsibilities of marketing practitioners.

In accordance with these objectives, all students in the Mendoza College of Business take Introduction to Marketing in their sophomore year. Students choosing marketing for their professional major are required to take Quantitative Analysis for Marketing Decision Making, Consumer and Industrial Buyer Behavior, Marketing Research, Strategic Marketing, and two marketing electives.

The Marketing Research and Consumer and Industrial Buyer Behavior courses, taken in the junior year, develop a foundation in the tools and concepts germane to marketing decision making. Quantitative Analysis for Marketing Decision Making, also taken in the junior year, provides an opportunity to learn quantitative methods used in industry and apply them to real-world marketing problems. During the senior year, students take Strategic Marketing, an advanced marketing strategy course that integrates marketing concepts and the other business functions through projects and simulations.

These courses are supplemented by the extracurricular activities of the Marketing Club.

All courses in the department focus on the performance of the marketing process but do not restrict it to a particular situation. Thus, the student majoring in marketing is prepared for a wide range

of opportunities in business and nonbusiness organizations, including professional sales, customer service, product or brand management, advertising, public relations, market research, retail merchandising, and electronic commerce. Marketing majors are being employed by an increasing number of firms specializing in areas such as consulting, retailing, and other service businesses that have traditionally underestimated the importance of this function. Additionally, nonbusiness and nonprofit organizations (hospitals, educational institutions, charitable organizations) are discovering the critical importance of marketing in their operations and are seeking well-trained graduates.

#### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Department of Marketing](#) heading.

## NONDEPARTMENTAL COURSES

## Nondepartmental Courses

---

*Director:*

Samuel S. Gaglio

Assistant Dean, Mendoza College of Business

Many courses in the college are designed to cross departmental lines and provide basic tools during the sophomore and junior years or to foster the integration of various disciplines during the junior and senior years. These courses are open to all business students with appropriate prerequisites.

### ***COURSE DESCRIPTIONS***

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [Mendoza College of Business](#) section under the [Business \(Nondepartmental\)](#) heading.

## Collegiate Sequence in International Business

---

The Collegiate Sequence in International Business is a series of courses designed to give the undergraduate business student a broad exposure to the global nature of the world of business. It is open to all students in the Mendoza College of Business. The program is not an official major, second major, or minor, but participation in the program will be acknowledged with a certificate upon completion at graduation. Students in the program are responsible for the search and selection of appropriate courses. Students in the program do not have priority over other students in registration for international courses.

The program is designed to be a cross-disciplinary sequence of courses in the Mendoza College of Business and the College of Arts and Letters. Students in the program are required to complete five courses. **At least two courses must be selected from contemporary international business courses, and up to three courses must be selected from contemporary international liberal arts courses.** An international economics course may be submitted for one of the two international business courses. One advanced course in a foreign language may be counted as an international liberal arts course for the international collegiate sequence.

With the consent of the Program Coordinator, courses taught at Saint Mary's College, courses taught in the ND International Programs, and selected courses transferred from other institutions may qualify for the certificate.

Students may not take courses in the International Sequence on a Pass/Fail basis. Courses may "double count"—e.g., a course in international finance would count as a business course in the international sequence and would also serve as one of the finance major course requirements for graduation.

Students must announce their intention to complete the program and meet with the program coordinator no later than the end of their junior year and again during their senior year.

For more information, contact the program coordinator:

Assistant Dean Sam Gaglio

# College of Engineering

The College of Engineering was established as a distinct unit of the University in 1897, although a program in civil engineering was offered in 1873. The college comprises five departments, including aerospace and mechanical engineering, chemical and biomolecular engineering, civil engineering and geological sciences, computer science and engineering, and electrical engineering.

Since its inception, the College of Engineering has regarded the primary purpose of all higher education as the development of the intellect, discriminatory power, and judgment in all students to enable them to arrive at sound decisions in their personal lives and in the professional lives they will pursue after graduation. The programs of studies offered in the various departments of the college are, therefore, constructed to give the student a good knowledge of the basic sciences and of engineering principles, and to prepare the student for the manifold duties of an educated professional and for the cultural life of an educated person. Classroom instruction is amplified by laboratory work and design experiences that give the student insight into the application of principles to practical problems. Detailed information about the College of Engineering and its many programs can be found at [nd.edu/~engineer](http://nd.edu/~engineer).

**Mission Statement.** To nurture the intellectual growth of our students and to serve humanity through the creation, application, and dissemination of knowledge relevant to technology.

The College Vision Statement.

- To provide *preeminent education experiences* that are stimulating, responsive to the needs of the 21st century, and prepare our students for leadership in their profession and society.
- To conduct *world-class research* that addresses *critical needs of society*.
- To gain *national recognition* as a first-tier college of engineering.
- To contribute to the *Catholic character* of the University.

**Accreditation and Academic Association.** The College of Engineering is a member of the American Society for Engineering Education, and all engineering curricula are accredited by the Engineering Accreditation Commission of ABET, Inc.

**Registration of Engineers.** Registration of engineers is required for many fields of practice. Recent graduates need not acquire registration immediately upon graduation, but they benefit by applying early for the required state examination. Graduating from accredited programs such as those offered by Notre Dame facilitates registration as a professional engineer.

**Registration of Geoscientists.** Registration is required for geoscientists to practice in many states. The degree in environmental geosciences offered by the Department of Civil Engineering and Geological Sciences provides the necessary academic background for graduates to successfully complete registration as a professional geoscientist.

## Programs and Degrees

The College of Engineering offers curricula leading to the undergraduate degrees listed below:

B.S. in aerospace engineering  
B.S. in chemical engineering  
B.S. in civil engineering  
B.S. in computer engineering  
B.S. in computer science  
B.S. in electrical engineering  
B.S. in environmental geosciences  
B.S. in mechanical engineering

To complete all degree requirements, the student must take and pass all of the courses specified in the *Bulletin* for the given degree and must earn the total minimum number of course credit hours specified for the degree.

To obtain two undergraduate degrees from the College of Engineering, a student must successfully carry out an approved program of courses totaling no less than 157 credit hours, depending on the program. These must include all of the courses specified in the *Bulletin* for each degree.

The college offers advanced degrees in the following areas:

M.S. in aerospace engineering  
M.S. in bioengineering  
M.S. in chemical engineering  
M.S. in civil engineering  
M.S. in computer science and engineering  
M.S. in electrical engineering  
M.S. in environmental engineering (through CEGEOS)  
M.S. in geological sciences (through CEGEOS)  
M.S. in mechanical engineering  
Ph.D. in aerospace and mechanical engineering  
Ph.D. in bioengineering  
Ph.D. in chemical engineering  
Ph.D. in civil engineering and geological sciences  
Ph.D. in computer science and engineering  
Ph.D. in electrical engineering

The Department of Aerospace and Mechanical Engineering also offers a master of engineering (M.E.) in mechanical engineering.

The details of the programs and the engineering courses offered at the graduate level are in the Graduate School *Bulletin of Information*.

**Engineering Common Core.** All engineering curricula consist of each of the following:

**Arts and Letters Core:** 24 credit hours. Composition (one course), University Seminar\* (one course), history (one course), social science (one course), fine arts or literature (one course), philosophy (two courses) and theology (two courses).

*\*The University Seminar may be selected from an appropriate history, social science, fine arts, literature course, or the first course in theology or philosophy, and will satisfy the respective requirement.*

**Basic Science Core:** 36 credit hours. MATH 10550 Calculus I; MATH 10560 Calculus II; MATH 20550 Calculus III, MATH 20580 Introduction to Linear Algebra and Differential Equations; CHEM 10171 General Chemistry: Fundamental Principles; CHEM 10122 General Chemistry: Biological Processes; PHYS 10310 General Physics I; PHYS 10320 General Physics II; EG 10111, 10112 Introduction to Engineering Systems I and II

**First Year of Studies.** The beginning college student who has been accepted as a first-year student enters the Notre Dame First Year of Studies for one academic year of basic collegiate studies before entering a department within the college. In the spring of the first year of studies, with three-fourths of an academic year of actual experience at Notre Dame and with the benefit of counsel and advice received from the appropriate officials and University faculty, the first-year student will make a decision as to the department and college in which the student chooses to major. If the student is scholastically sound for the given choice, approval will be given.

A first-year student intending to major in any of the College of Engineering programs should complete the following courses by the end of the first year:

<i>First Semester</i>	
Composition or University Seminar+	3
MATH 10550. Calculus I	4
CHEM 10171. General Chemistry: Fundamental Principles*	4
Arts and Letters course†	3
EG 10111. Introduction to Engineering Systems I#	3
Physical Education	—

## PROGRAMS AND DEGREES

*Second Semester*

University Seminar+ or Composition	3
MATH 10560. Calculus II	4
CHEM 10122. General Chemistry: Biological Processes*	3
PHYS 10310. General Physics I	4
EG 10112. Introduction to Engineering Systems II#	3
Physical Education	—
	17

+ *The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy, and will satisfy the respective requirement.*

\* *All majors will accept CHEM 10171/10122 or CHEM 10171/10172 or CHEM 10181/10182 as satisfying the two-course chemistry requirement.*

† *See Arts and Letters Core above.*

# *While EG 10111–10112 is acceptable for the environmental geosciences degree, it is not required and the sequence ENVG 10110–10100 may be substituted.*

**General Requirements.** The University of Notre Dame reserves the right to change at any time regulations included in its *Bulletins* with respect to admission to the University, continuance therein and graduation therefrom. Every effort is made to give advance information of such changes.

The number of credit hours carried by the undergraduate student in the College of Engineering may not exceed 19 hours without permission, granted at the discretion of the director of academic affairs.

An upper-class student who desires to transfer from engineering to another college of the University or from one department of the college to another department must obtain the specified approvals.

**Engineering Honors Program.** The College of Engineering has developed an honors program for those students whose achievements have identified them as among the best of entering high school students. This program provides special opportunities for engineering and scientific research, cultural enrichment, and social leadership over and above what is already available to all. Admission to the program is by invitation and commences in the First Year of Studies with a special yearlong seminar that satisfies two University core requirements. Each student in this program will be guided by a faculty member who functions as the student's research advisor and mentor, and students and faculty meet regularly in both formal and informal settings. To graduate with recognition as an honor student, each student must, at a minimum, participate all four years and complete a research thesis in the student's major field in the senior year.

**International Study Opportunities.** The University strongly supports study abroad and has encouraged the programs in the College of Engineering to participate. At present, there are academic-year opportunities for juniors in Dublin, Ireland;

London, England; Perth, Australia; Monterrey, Mexico; Karlsruhe, Germany; Cairo, Egypt; and Santiago, Chile. The programs in Mexico and Chile require the student to be fluent in Spanish, and the program in Germany requires the student to be fluent in German. In each location, students must take at least two technical courses to remain on track for graduation. Programs vary by semester, and not all locations are appropriate for every program in the college. Students should contact an advisor in their department to work out any details.

The college currently offers three summer programs for engineering undergraduates who have completed at least the first-year engineering curriculum, in London, England; Alcoy, Spain; and Puebla, Mexico.

Admission to all programs is competitive and requires demonstration of satisfactory academic performance.

**ROTC Programs.** ROTC students who complete their programs may use a maximum of six credits of upper-level air, military, or naval science as substitutes for specified degree requirements determined by each department. Three of these credits may substitute for either a history or social science requirement; three may substitute for a technical elective at the discretion of each major program. No other air, military or naval science credits not so substituted may be credited toward degree requirements in programs in the College of Engineering.

**Humanities in the Curriculum.** Students enrolled in the College of Engineering must satisfy all University degree requirements, including composition (three credits), University Seminar\* (three credits), history (three credits), social science (three credits), fine arts or literature (three credits), philosophy (six credits) and theology (six credits).

For specific information on course offerings to satisfy these requirements, students must consult the online course registration system.

\**The University Seminar may be selected from an appropriate history, social science, fine arts, or literature course, or the first course in theology or philosophy, and will satisfy the respective requirement.*

**Engineering Business Practice.** The college recognizes the importance of providing its graduates with opportunities to learn how engineers function in the world of business and offers a multi-course sequence (EG 40421/40422) that provides education in this area. Students in all departments of the college may take the courses to satisfy technical elective requirements. The courses increase the effectiveness of engineering graduates by developing an understanding of the dynamics of business operations. They include issues related to ethics, leadership, and business practices such as marketing, management, finance, and human resources, and they examine the professional and leadership characteristics of modern industrial leaders. In the second course,

students develop a business plan and execute it using a computer simulation program.

**Combination Five-Year Programs with the College of Arts and Letters.** The college also recognizes the benefits of a broad background in cultural, social, and technical subjects and, in 1952, in cooperation with the College of Arts and Letters of the University, instituted a five-year program that combines the liberal arts program with the requirements of the various engineering programs. Students who complete this combination program will earn two degrees: the degree of bachelor of arts and the degree of bachelor of science in the professional course pursued. Dual-degree students are eligible to join the Reilly Program in Engineering and Arts and Letters described at [nd.edu/~reilly/academic\\_programs.html](http://nd.edu/~reilly/academic_programs.html).

Students pursuing this program must have strong scholastic ability and be acceptable to both the dean of the College of Arts and Letters and the dean of the College of Engineering. Choice of the program should be indicated by the end of the sophomore year, but choice of a particular field in Arts and Letters may be deferred until the end of the second year.

The general sequence of courses in the five-year engineering-liberal arts program is found under "Dual Degree Programs" later in this section of the *Bulletin*.

**Combination Five-Year Program with the Mendoza College of Business.** To address the needs of engineering students who wish to integrate management and engineering, the College of Engineering and the Mendoza College of Business have established a program in which a student may earn the bachelor of science degree from the College of Engineering and the master of business administration in five years with some additional summer work.

The program is structured so that a student who has completed the first three years of the bachelor's degree program, if accepted through a competitive admissions process, completes the master of business administration and the bachelor of science in engineering.

Students who wish to pursue this program should have a superior scholastic record in their undergraduate program and must apply to and be accepted by the M.B.A. program during their third year in the College of Engineering.

The general sequence of courses in the five-year engineering-M.B.A. program may be found under "Dual Degree Programs" later in this section of the *Bulletin*.

**Combination Five-Year Programs with Other Schools.** The highly desirable objective to infuse more liberal arts work into the education of engineering students has been met in another way.

The University of Notre Dame has entered into agreements with Bethel College, Mishawaka, Ind.;

## DEPARTMENTAL AWARDS

Saint Mary's College, Notre Dame, Ind.; St. Anselm College, Manchester, N.H.; University of St. Thomas, St. Paul, Minn.; Carroll College, Helena, Mont.; Stonehill College, North Easton, Mass.; the University of St. Thomas, Houston, Tex.; and Elon University, Elon, N.C., whereby the liberal arts part of a combination five-year program is given by these respective colleges and the engineering part by Notre Dame. In these cooperative programs, the student spends three years at a college of first choice and two years at Notre Dame. After completion of the five-year program, the student receives a bachelor of arts degree from the first college and a bachelor of science in engineering degree from Notre Dame.

In addition, students at Saint Mary's College may elect to earn a B.S. in biology, chemistry, or mathematics from Saint Mary's while simultaneously earning a B.S. in a related engineering program at Notre Dame. This program also requires five years of study, with only the fifth year at Notre Dame to satisfy residency requirements.

The sequence of courses is essentially the same as in the Notre Dame engineering-liberal arts program; however, no attempt has been made to set up a rigid pattern, and each participating institution has complete freedom concerning the choice and arrangement of courses, provided that the coverage in the areas of mathematics, physics, chemistry, computing, introductory engineering, theology, philosophy, history, social science, and literature or fine arts is appropriate. It is expected that students will complete the equivalent of the first two years of the desired College of Engineering program before applying for transfer.

Students must complete at least 60 course hours at Notre Dame, and must spend the final year of study at Notre Dame to satisfy residency requirements.

Details of these programs may be obtained by writing to the institutions concerned or to the College of Engineering.

**Graduate Programs in Engineering.\*** The Graduate School of the University of Notre Dame comprises four divisions: humanities, social science, science, and engineering. The division of engineering of the Graduate School was organized in 1946 with power to grant advanced degrees in the departments of aerospace and mechanical engineering, chemical and biomolecular engineering, civil engineering and geological sciences, computer science and engineering, and electrical engineering. The general conduct of graduate work is under the jurisdiction of the Graduate Council of the University, the members of which serve as specified in the Academic Articles. Director of the program in the engineering division is the dean of the College of Engineering.

\* Reference should be made to the *Graduate School Bulletin of Information for details of these programs and to the Web at [nd.edu/~engineer/prospects/prospects.htm](http://nd.edu/~engineer/prospects/prospects.htm).*

**The Scope of the Graduate Program.** Extensive graduate work in engineering takes place in the College of Engineering and encompasses all of its programs. The level of research in industry and in governmental institutions has increased, and the demand for engineers with graduate degrees has made it desirable to include graduate work in the engineering curriculum. Both undergraduate and graduate students benefit from the advanced technological ideas being studied and developed.

**Facilities for Graduate Work.** All departments of the college have laboratories, equipment, and study rooms for graduate students. General facilities available include a high-performance computing facility, the University library and its special collections, the research libraries in science and engineering, and the various research laboratories.

## College Awards and Prizes

### COLLEGE OF ENGINEERING AWARDS

*The Rev. Thomas A. Steiner Prize.* From a fund established in 1948 by former students of Rev. Thomas A. Steiner, C.S.C., former dean of the College of Engineering, a cash award is made to seniors in the college who have been selected for their all-around excellence as students.

*The Reilly Scholar Designation.* The designation of Reilly Scholar is given annually to those fifth-year seniors enrolled in the dual Engineering/Arts and Letters program who have excelled academically and otherwise during their first four years as students. A cash award is made from a fund established by Jack Reilly to encourage such interdisciplinary studies.

*The Americo Darin Prize.* From a fund set up by the Darin family in their father's name, a cash award is made to several engineering juniors who have demonstrated exceptional and steady improvement over their first four semesters at Notre Dame.

## Departmental Awards

### AEROSPACE AND MECHANICAL ENGINEERING

*Patrick J. Deviny Award.* Presented each year to a junior aerospace student who has displayed the most diligence and persistence in the pursuit of undergraduate studies in aerospace engineering.

*Vincent P. Goddard Design Award.* Presented each year to a senior in aerospace engineering for outstanding performance in the aerospace design course.

*Sigma Gamma Tau Honor Award.* Presented each year to a member of the Notre Dame chapter in recognition of outstanding academic performance and demonstrated professional potential.

*The Aero Propulsion Award.* Presented each year to a senior in aerospace engineering for outstanding

performance in the Gas Turbine and Propulsion class.

*The Zahm Prize for Aeronautical Engineering* was founded in 1946 by Dr. Albert J. Zahm, distinguished pioneer in aeronautics and at one time professor of physics at the University of Notre Dame. The award is made to the senior aerospace engineering student who, in the estimation of the faculty of the program, has achieved the most distinguished record in professional subjects.

*Jerome L. Novotny Design Award.* Presented each year to a junior in mechanical engineering for the best design in the junior heat transfer course.

*The Rockwell Automation Power Systems Design Award.* Presented each year to seniors in mechanical engineering for the best design in the senior mechanical engineering design course.

### CHEMICAL AND BIOMOLECULAR ENGINEERING

*AIChE Scholarship Award.* Presented to the junior chemical engineering student who has the highest scholastic average during the first two years of study.

*American Institute of Chemists Award.* Presented to an outstanding senior in the Department of Chemical and Biomolecular Engineering.

*Chemical Engineering Alumni Award.* Presented to one or more seniors who have an outstanding combination of scholarship and extracurricular activities.

*Chemical Engineering Faculty Award.* Presented to the senior with the highest scholastic average after seven semesters of study.

*Chemical Engineering Research Award.* Presented to one or more undergraduate students who have performed outstanding undergraduate research.

### CIVIL ENGINEERING AND GEOLOGICAL SCIENCES

*The American Society of Civil Engineers.* The Indiana section each year presents an award to the two senior students most active in the student chapter of ASCE.

*Leroy D. Graves Academic Improvement Award.* Presented to a senior civil engineering student for significant development in academic performance.

*The Sydney Kelsey Outstanding Scholar Award.* Presented to a senior civil engineering student for excellence and creativity in academics.

*The Kenneth R. Lauer Award.* Presented to a senior civil engineering student for leadership, integrity, and service to fellow students and community as determined by that student's classmates.

*James A. McCarthy Scholarship in Civil Engineering.* Presented to a junior civil engineering student for outstanding academic and professional excellence.

## STUDENT ORGANIZATIONS AND ACTIVITIES

*The Walter L. Shilts Award for Undergraduate Achievement.* Presented to a senior civil engineering student who has best fulfilled his or her potential as a student through hard work and dedication to obtaining the best possible education.

*The Rev. Alexander Kirsch, C.S.C., Award.* To the senior receiving a degree in geological sciences who has evidenced high qualities of personal character, scholarship, and leadership.

*Dr. Raymond C. Gutschick Award.* To the graduating senior who has demonstrated the most promise in geological research as evidenced by a successful research project.

## COMPUTER SCIENCE AND ENGINEERING

*Outstanding Computer Engineering Award.* To the graduating senior in computer engineering who has evidenced high qualities of personal character, scholarship, and leadership.

*Outstanding Computer Science Award.* To the graduating senior in computer science who has evidenced high qualities of personal character, scholarship, and leadership.

## ELECTRICAL ENGINEERING

*The Basil R. Myers Award.* For achievement in electrical engineering, recalling circuit theory, the English language, and St. George Day at Notre Dame.

*The James L. Massey Award.* For achievement in electrical engineering, recalling communication theory, undergraduate teaching, and the Binary Examination.

*The Arthur J. Quigley Award.* For achievement in electrical engineering, recalling electronics, service to our neighbor, and the little man in the circuit.

*The Laurence F. Stauder Award.* For achievement in electrical engineering, recalling electrical power, the IEEE Student Branch, and the Notre Dame alumni.

*The IEC William L. Everitt Award.* For achievement in electrical engineering, computer engineering, or computer science, with an interest in the area of communications.

## Student Organizations and Activities

### THE NOTRE DAME TECHNICAL REVIEW

Since 1949, the students of the College of Engineering have been publishing the *Notre Dame Technical Review*. It provides the opportunity for creative writing and for the management of a technical periodical.

## HONOR SOCIETIES

### TAU BETA PI

In 1960, the Indiana Gamma Chapter of Tau Beta Pi was installed at Notre Dame to foster a spirit of liberal culture in the engineering college and to recognize those who have conferred honor upon Notre Dame by distinguished scholarship and exemplary character as undergraduates in engineering or by their attainment as alumni in the field of engineering. Seniors in the top fifth of their class and juniors in the top eighth of their class are eligible for election under rigid standards of scholarship, character, leadership, and service.

### ETA KAPPA NU

In 1962, the Delta Sigma Chapter of Eta Kappa Nu, the national honor society for electrical engineers, was installed at Notre Dame. Juniors, seniors, and alumni are elected to membership on the basis of scholastic attainment, leadership, and quality of character.

### PI TAU SIGMA

In 1963, the Sigma Beta Chapter of Pi Tau Sigma, the national honor society for mechanical engineers, was installed at Notre Dame. Juniors, seniors, and alumni are elected to membership on the basis of scholastic attainment, leadership, quality of character, and a demonstration of probable future success in engineering.

### CHI EPSILON

In 1966, the Notre Dame Chapter of Chi Epsilon, the national honor society for civil engineers, was installed at Notre Dame. Chi Epsilon recognizes those civil engineering students, faculty, and alumni who have displayed superior qualities in scholarship, character, practicality, and sociability during their professional careers.

### SIGMA GAMMA TAU

In 1981, the Notre Dame Chapter of Sigma Gamma Tau, the national honor society for aerospace engineering was installed. This organization recognizes and honors those individuals in the field of aeronautics and astronautics who have distinguished themselves through scholarship, integrity, service, and outstanding achievement. Senior students who rank in the top third of their aerospace engineering class are eligible for admission.

### UPSILON PI EPSILON

In 2004, the Notre Dame chapter of Upsilon Pi Epsilon, which recognizes the academic excellence of students in the computing and information disciplines, was installed at Notre Dame. Outstanding juniors, seniors, and graduate students from the Department of Computer Science and Engineering are honored each year with induction.

## PROFESSIONAL SOCIETIES

The several departments of the college actively support student chapters of their respective professional societies; these are:

American Institute of Aeronautics and Astronautics (AIAA)  
 American Institute of Chemical Engineers (AIChE)  
 American Society of Civil Engineers (ASCE)  
 American Society of Mechanical Engineers (ASME)  
 Association of Computer Machinery (ACM)  
 Institute of Electrical and Electronic Engineers (IEEE)  
 National Society of Black Engineers (NSBE)  
 Society of Hispanic Professional Engineers (SPHE)  
 Society of Women Engineers (SWE)

The Joint Engineering Council (JEC), a student organization with representation from the student chapters of these professional and honor societies, coordinates the activities of all engineering organizations and encourages the pursuit of a professional attitude in the student body of the College of Engineering. The JEC sponsors activities of general interest to the engineering student body.

## AEROSPACE AND MECHANICAL ENGINEERING

## Aerospace and Mechanical Engineering

### Chair:

John E. Renaud

*H. Clifford and Evelyn A. Brosey Professor of Mechanical Engineering:*

Frank P. Incropera

*Viola D. Hank Professor of Mechanical Engineering:*

Hafiz M. Atassi

*Clark Professor:*

Thomas C. Corke

### Professors:

Stephen M. Batill; Raymond M. Brach (emeritus); Patrick F. Dunn; Nai-Chien Huang (emeritus); Edward W. Jerger (emeritus); Eric J. Jumper; Francis M. Kobayashi (emeritus); Stuart T. McComas (emeritus); Thomas J. Mueller (emeritus); Victor W. Nee (emeritus); Robert C. Nelson; Timothy C. Ovaert; Samuel Paolucci; Joseph M. Powers; Francis H. Raven (emeritus); John E. Renaud; Mihir Sen; Steven B. Skaar; Albin A. Szewczyk (emeritus); Flint O. Thomas; Kwang-tzu Yang (emeritus)

### Associate Professors:

Edmundo Corona; J. William Goodwine Jr.; Robert A. Howland; John W. Lucey (emeritus); Scott C. Morris; Glen L. Niebur; Ryan K. Roeder; Steven R. Schmid; James P. Schmiedeler; Michael M. Stanisic; Meng Wang

### Assistant Professors:

James E. Houghton (emeritus); David B. Go; Philippe Sucusky; Vikas Tomar; Diane Wagner

### Associate Professional Specialist:

Rodney L. McClain; John Ott; Richard B. Strebinger

**Program of Studies.** The Department of Aerospace and Mechanical Engineering offers programs of study that lead to degrees of bachelor of science and master of science in aerospace engineering and mechanical engineering, respectively; master of engineering for mechanical engineers; and doctor of philosophy.

**Program in Aerospace Engineering.** This program is accredited by the Engineering Accreditation Commission of ABET, Inc. The aerospace program is designed to prepare those students interested in the design and operation of aircraft and space vehicles for entrance into a professional career. The curriculum, based on a solid foundation in mathematics, physics, chemistry and the engineering sciences, places emphasis on such basic aerospace disciplines as aerodynamics and fluid mechanics, orbital mechanics, and solid and structural mechanics, as well as such integrating disciplines as design, experimental methods and systems analysis. Technical specializations in the junior and senior year enable students to emphasize specific technical areas, including design and manufacturing, thermal and fluid sciences, bioengineering, solid mechanics, materials, control and mechanical systems and computational engineering.

The aerospace engineering program uses laboratories in Fitzpatrick Hall of Engineering and in the Hessert Laboratory for Aerospace Research. The Hessert laboratories contain superior facilities for instruction and research.

Students are encouraged to participate in the activities of the student chapter of the American Institute of Aeronautics and Astronautics and to enter the national student paper competition conducted by the parent institute. Outstanding achievement in the aerospace program is recognized by membership in Sigma Gamma Tau, the national aerospace honor society.

Further details about the standard aerospace program, the London Program and electives can be found on the Web at [ame.nd.edu](http://ame.nd.edu). These details include the program of study requirements for graduating classes prior to the Class of 2009; the program below pertains only to the Class of 2009 and beyond.

**Aerospace Engineering Educational Objectives and Learning Outcomes.** The Engineering Accreditation Commission of ABET, Inc., encourages the explicit statement of the Educational Objectives and Learning Outcomes for all engineering programs. Publication of the objectives and desired outcomes, as well as efforts to determine if these are being achieved, are part of the process of continuous improvement in engineering education.

**Educational Objectives.** The Department of Aerospace and Mechanical Engineering has established the following Educational Objectives that are consistent with the mission of the University and College of Engineering. These objectives have been developed in collaboration with faculty, students, and industry representatives. Educational objectives are "broad statements that describe the *career and professional accomplishments* that the program is *preparing the graduates to achieve.*" These are usually recognized as accomplishments in the *first few years after graduation.*

The aerospace engineering program at Notre Dame appreciates the diverse set of individual goals to which our students aspire, so it has expressed the Educational Objectives in two forms. For *all graduates* of the program:

- Secure a position consistent with their personal aspirations and qualifications
- Assume a technical or managerial leadership role with their organization
- Participate as a volunteer with at least one professional or social service organization

In addition, depending on the career path selected, graduates would be prepared to achieve one or more of the following:

- Be recognized as the key technical specialist within their organization for a particular professional specialty
- Receive a graduate or professional degree

- Start their own company
- Be granted a patent

**Learning Outcomes.** To achieve these Educational Objectives, the curriculum is designed to provide the following Learning Outcomes that describe *what students are expected to know or be able to do by the time of graduation.*

**First Principles and Problem Solving:** Graduates understand fundamental scientific first principles of engineering and can apply them to the solution of problems or systems by way of analytical and numerical treatment.

**Engineering Skills and Professional Practice:** Graduates understand the essential role of experimentation in engineering, and they are able to compare and gain insight from a combination of analytical, numerical, and experimental results. They are able to use modern engineering software tools, including CAD, and are capable of programming digital computers

**Design:** Graduates have a pragmatic understanding of design and the engineering design process and are able to contribute in various ways to the design of a product, system, or process.

**Communication:** Graduates are able to communicate well, both orally and in writing, and function effectively in multidisciplinary groups, both in leadership and support roles.

**Professional Responsibility:** Graduates are familiar with the responsibilities of professional practice, the roles that aerospace engineers play in society, the kinds of issues they deal with, and their influence in society.

### First Year of Studies

First-year students intending to major in aerospace engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

### Sophomore Year

#### First Semester

MATH 20550. Calculus III	3.5
PHYS 10320. General Physics II	4
AME 20221. Mechanics I	3
AME 20211. Introduction to Aeronautics	3
AME 20214. Introduction to Engineering Computing	1
Arts and Letters course*	3
	<hr/>
	17.5

#### Second Semester

MATH 20580. Introduction to Linear Algebra and Differential Equations	3.5
AME 20222. Mechanics II	3
AME 20241. Solid Mechanics	4
AME 20231. Thermodynamics	3
AME 20213. Measurements and Data Analysis or AME 30361. Computer Aided Design and Manufacturing	3
	<hr/>
	16.5

## AEROSPACE AND MECHANICAL ENGINEERING

## Junior Year

## First Semester

AME 30314. Differential Equations, Vibrations and Controls I	3
AME 20213. Measurements and Data Analysis or AME 30361. Computer Aided Design and Manufacturing	3
AME 30341. Aerospace Structures	3
AME 30331. Fluid Mechanics	3
Arts and Letters course+	3
	15

## Second Semester

AME 30315. Differential Equations, Vibrations and Controls II	3
AME 30333. Aerodynamics Laboratory	4
AME 30332. Compressible Aerodynamics	3
AME 30334. Heat Transfer	3
Arts and Letters course+	3
	16

## Senior Year

## First Semester

AME 40461. Flight Mechanics and Introduction to Design	3
AME 40451. Aerospace Dynamics	3
AME 40431. Gas Turbines and Propulsion	3
Technical Specialization*	3
Arts and Letters course+	3
	15

## Second Semester

AME 30381. Orbital and Space Dynamics	3
AME 40462. Aerospace Design	4
Technical Specialization/Prof. Development	3
Technical Specialization	3
Arts and Letters course+	3
	16

Total for the four years: 130 semester hours.

\*A list of approved technical specialization and professional development courses is available on the department website.

+ See "Arts and Letters Core" on the first page of the College of Engineering section.

The most current information for the degree program course requirements is available on the department website: (ame.nd.edu).

**The Program in Mechanical Engineering.** This program is accredited by the Engineering Accreditation Commission of ABET, Inc. The department offers a well-rounded program at the bachelor's level. The curriculum is built on a sound foundation in mathematics, physics, chemistry and the engineering sciences. In the undergraduate curriculum the student may obtain, by suitable selection of elective courses, a program suited to enable him or her to specialize in a given sequence or to prepare as a generalist. Elective course sequences are available in aerospace, design and manufacturing, thermal and fluid sciences, bioengineering, solid mechanics,

materials, control and mechanical systems, and computational engineering.

To prepare for today's changing technological world, the program requires use of a computer in many of its courses.

Finally, for professional growth during formative years as engineers in training, students are encouraged to participate in the activities of the student chapter of the American Society of Mechanical Engineers. Outstanding achievement in the mechanical engineering program is recognized by membership in Pi Tau Sigma, the national mechanical engineering honor society.

Further details about the mechanical engineering program, the London Program and electives can be found on the Web at ame.nd.edu. These details include the program of study requirements for graduating classes prior to the Class of 2009; the program below pertains only to the Class of 2009 and beyond.

**Mechanical Engineering Educational Objectives and Learning Outcomes.**

The Engineering Accreditation Commission of ABET, Inc., encourages the explicit statement of the Educational Objectives and Learning Outcomes for all engineering programs. Publication of the objectives and desired outcomes, as well as efforts to determine if these are being achieved, are part of the process of continuous improvement in engineering education.

**Educational Objectives.** The Department of Aerospace and Mechanical Engineering has established the following Educational Objectives that are consistent with the mission of the University and College of Engineering. ## COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Aerospace and Mechanical Engineering](#) heading.

A number of introductory graduate-level courses, described in the *Graduate School Bulletin of Information* and on the department website, are open to advanced undergraduates, with the permission of the department chair, to satisfy upper-level electives.

## Chemical and Biomolecular Engineering

## Chair:

Mark J. McCready

*Schmitt Professor of Chemical Engineering*

Paul W. Bohn

*Bayer Professor of Chemical Engineering;*

Hsueh-Chia Chang

*Keating-Crawford Professor of Chemical Engineering;*

Joan F. Brennecke

## Professors:

Jeffrey C. Kantor; David T. Leighton Jr.; Edward J. Maginn; Mark J. McCready; Paul J. McGinn; Mark A. Stadtherr; William C. Strieder; Eduardo E. Wolf

## Associate Professors:

Davide A. Hill; William F. Schneider

## Assistant Professor:

Basar Z. Bilgicer; Y. Elaine Zhu

## Professional Specialist:

Salma R. Saddawi

**Program of Studies.** The Department of Chemical and Biomolecular Engineering offers programs of study leading to the degrees of bachelor of science in chemical engineering, master of science in chemical engineering, and doctor of philosophy. The program leading to the bachelor of science degree is accredited by the Engineering Accreditation Commission of ABET, Inc.

The traditional role for chemical engineers of providing the principal technical guidance for the chemical and petroleum industries has been greatly augmented in recent years. Chemical engineers now direct the advancement and utilization of technology for the food processing and consumer products industries and are playing increasing roles in the manufacture of the highest density computer chips and in the invention of advanced drug delivery systems. In addition to creating remediation strategies, chemical engineers contribute to the prevention of deleterious impact of society on the environment by the development of new "green" process technologies that eliminate the use of dangerous solvents. They are the leaders in the field of "sustainability" which is the implementation of energy sources and raw material supplies that can sustain humankind indefinitely. In all of these areas, complex processes involving chemical changes of matter occur and, as such, sound training in chemistry, physics, mathematics, and allied applied sciences are prerequisites to resolving the challenges posed by these complex systems.

The undergraduate program at Notre Dame is notable for its combination of a strong fundamental focus in chemical engineering courses with a broad humanities and science education provided in courses other than chemical engineering. The science and humanities courses prepare students both for study of chemical engineering and to understand the complex scientific, social, and moral issues of the world today. Our intention in emphasizing

fundamentals is to develop students' intellect and to equip them with enduring knowledge in chemical engineering and related fields. Thus, our undergraduate chemical engineering curriculum provides students with not only a preparation for a career as chemical engineer, but for a lifetime of learning and a lifelong career in areas that may include law, medicine, or business.

## University of Notre Dame Undergraduate Program

**Goals:** Students who have graduated in Chemical Engineering at Notre Dame have pursued, successfully, a wide range of career paths. The faculty believes that this has resulted from the interests of students who enter our program and is facilitated by our emphasis on fundamental aspects of chemical engineering. Thus consistent with the mission of the University, the Department of Chemical and Biomolecular Engineering program seeks to develop students who:

1. Pursue knowledge and commensurate understanding and critically evaluate the consequences of these.
2. Communicate clearly and effectively.
3. Demonstrate proficiency in the art and science of chemical engineering with a strong understanding of the fundamental principles of pure and engineering sciences on which chemical engineering practice is based.
4. Appreciate their social and moral responsibilities both within their careers in engineering and through service in their communities.
5. Understand how chemical engineering connects with other major disciplines to produce the goods and services needed by society.

Within the chemical engineering degree program, students can use their electives to construct course sequences in materials, environmental chemical engineering and biomolecular engineering. A suggested course sequence for students interested in going to medical school is also available.

More than one-third of the chemical engineering undergraduates participate in research activities with faculty and graduate students at some time in their careers in such areas as advanced materials, ionic liquids as environmentally benign solvents, biomaterials, microfluidic devices, catalysis, fuel cells, and drug delivery techniques.

Further details about the chemical engineering program may be found on the Web at [nd.edu/~chegdept](http://nd.edu/~chegdept). These details include the program of study requirements for graduating classes prior to the Class of 2007. The program below pertains only to the classes of 2007 to 2010. Students in the Class of 2011 and beyond will follow a new sequence of chemistry classes in place of the first-year general chemistry courses and the second-year organic chemistry courses: CHEM 10171, 10172, 20273, 20274.

## CIVIL ENGINEERING AND GEOLOGICAL SCIENCES

**FIRST YEAR OF STUDIES**

First-year students intending to major in chemical engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

**Sophomore Year***First Semester*

MATH 20550. Calculus III	3.5

\* All electives are selected from a list available in the department office or found on the department website.

\* See "Arts and Letters Core" on the first page of the College of Engineering section.

Total for the four years: 132 semester hours.

**COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Chemical and Biomolecular Engineering](#) heading.

The following graduate courses, described in the *Graduate School Bulletin of Information*, are also open to advanced undergraduates.

60542. Mathematical Methods Engineering I
50510. Advanced Chemical Engineering Thermodynamics
30355. Transport Phenomena I
40445. Advanced Chemical Reaction Engineering

**Civil Engineering and Geological Sciences***Massman Chair:*

Peter C. Burns

*Robert M. Moran Professor of Civil Engineering:*

Ahsan Kareem

*Professors:*

Peter C. Burns; Jeremy B. Fein; Robert L. Irvine (emeritus); Sydney Kelsey (emeritus); Kenneth R. Lauer (emeritus); Patricia A. Maurice; Clive R. Neal; Stephen E. Silliman; James I. Taylor (emeritus); Joannes J.A. Westerink

*Associate Professors:*

Lloyd H. Ketchum Jr. (emeritus); David J. Kirkner; Yahya C. Kurama; Jerry J. Marley (emeritus); J. Keith Rigby Jr.; Rev. James A. Rigert, C.S.C. (emeritus); Jeffrey W. Talley

*Assistant Professors:*

Andrew Kennedy; Kapil Khandelwal; Tracy L. Kijewski-Correa; Robert Nerenberg; Susan E.H. Sakimoto; Joshua ShROUT; Alexandros Taflanidis

*Assistant Professional Specialist:*

David Devine

**Vision and Mission.** The Department of Civil Engineering and Geological Sciences (CE/GEOS) aspires to be preeminent nationwide in our selected research and educational focus areas, to be ranked in the top quartile of civil engineering and environmental geoscience programs in the United States, to have global reach and impact in education and research, and to promote positive contributions to society in the Catholic tradition. CE/GEOS strives to provide a stimulating and unique interdisciplinary environment for learning and research by blending traditional disciplines of engineering and science. CE/GEOS offers outstanding educational programs for those aspiring to contribute as leaders in the fields of Civil Engineering, Environmental Engineering, and Environmental Geosciences. CE/GEOS's educational objective is to provide students with the knowledge, skills, vision and ethical basis to contribute as leaders in design, construction and protection of our civil infrastructure, and understanding, management and remediation of the environment.

**Program of Studies.** The Department of Civil Engineering and Geological Sciences offers programs of study leading to the degrees bachelor of science in civil engineering, bachelor of science in environmental geosciences, master of science in civil engineering, master of science in geological sciences, master of science in environmental engineering, master of science in bioengineering, and doctor of philosophy.

**Program in Civil Engineering.** This program is accredited by the Engineering Accreditation Commission of ABET, Inc. The department presents a well-rounded program for the bachelor's degree with the first two years devoted primarily to the basic principles of science and engineering. The third and fourth years are devoted to courses in the

## CIVIL ENGINEERING AND GEOLOGICAL SCIENCES

basic areas of civil engineering—structural analysis and design, hydraulics and hydrology, water supply and wastewater disposal, materials of construction, geotechnical engineering, and transportation engineering. A student may emphasize a particular area of interest by selecting either the environmental engineering and hydrology sequence or the structures sequence and by the careful use of elective courses. Civil engineering electives in the senior year may be regular courses or individualized directed study or research courses.

Most courses in the program are prescribed for all civil engineering students so that each student receives a firm foundation in the many basic disciplines comprising the broad field of civil engineering. This is especially desirable, for often in the course of professional development the civil engineer is asked to coordinate the planning, design, and construction of highly complex systems and must utilize many or all of these disciplines.

The department has excellent facilities for research available to both graduate and undergraduate students. These facilities include a structural dynamics/structural control laboratory; a materials testing and structural research laboratory; a groundwater hydrology field laboratory; and a number of analytical laboratories for water, wastewater and hazardous waste treatment.

The professional aspects of civil engineering are emphasized and promoted by the activities of a student chapter of the American Society of Civil Engineers, in which all students of the department are eligible to participate.

Further details about the civil engineering and environmental geosciences programs may be found on the Web at [nd.edu/~cegeos](http://nd.edu/~cegeos).

**First Year of Studies.** First-year students intending to major in civil engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

**Sophomore Year***First Semester*

CE 40340. Wastewater Disp. (Opt B)**	(4)
Civil Engineering elective	3
Technical elective	3
Arts and Letters course*	3
	<hr/>
	16
Total degree required credits	129

\*See "Arts and Letters Core" on the first page of the College of Engineering section.

\*\*Note: Beginning in the spring semester of the junior year the student chooses to follow option A, the structural engineering track or option B, the environmental engineering and hydrology track. Each track is defined by the three specialization courses shown. Note that, by an appropriate choice of electives, a student may complete both tracks.

The following graduate courses\*, described in the *Graduate School Bulletin of Information*, are also open to advanced undergraduates with permission of the department chair.

60130. Finite Elements in Engineering
60210. Advanced Geostatistics
60250. Advanced Structural Dynamics
60330. Environmental Biotechnology
60346. Design of Biological Waste Treatment Systems
60450. Advanced Hydraulics
70290. Behavior and Design of Earthquake-Resistant Structures

\* Courses having a 40000/60000 option will require additional work at the 60000 level, i.e., semester project or paper.

**ENVIRONMENTAL GEOSCIENCES**

This degree is administered by the College of Engineering.

**Program in Environmental Geosciences.** The Environmental Geosciences program at Notre Dame was founded by the Department of Civil Engineering and Geological Sciences to provide students with a quantitative preparation for professional careers or continued higher education in the disciplines of earth and environmental science. The program provides a foundation in the physical sciences, with emphasis on processes that occur near or at the surface of the Earth, and the impact of human activity on such processes. Students explore the geochemical, mineralogical, and hydrological properties of Earth's crust, and develop an understanding of the interplay of natural processes such as mineral-water-rock-bacteria interactions, with anthropogenic issues such as transport of toxic heavy metals and safe disposal of nuclear waste.

The environmental geosciences program combines classroom, laboratory, and field studies. Students are encouraged to participate in a semester study abroad, such as the Australia program (during the fall semester, junior year), which provides additional opportunity for field-based studies. All students are encouraged to conduct independent research under faculty supervision during their senior year.

An undergraduate major in environmental geosciences prepares a student for graduate study (M.S., Ph.D.) in many aspects of geology and environmental sciences, as well as for admission to a variety of professional schools. In addition, this program meets the criteria for graduates to become state-registered geologists in those states requiring such certification. Graduates with a B.S. degree may enter careers in diverse areas such as the National Park Service, industry, environmental consulting, and government research laboratories. An environmental geosciences degree is also ideal background for those planning to teach in secondary schools at all levels. Further details can be found at [nd.edu/~envgeo](http://nd.edu/~envgeo).

The flexibility of our undergraduate program allows engineering and science students to major in the environmental geosciences. Below you will find an example of the curriculum that can be followed by a student who commits to the College of Engineering. This is followed by an example of how a student committed to the College of Science may also take advantage of this major.

## CIVIL ENGINEERING AND GEOLOGICAL SCIENCES

SUMMARY OF REQUIREMENTS FOR GRADUATION FOR ENVIRONMENTAL GEOSCIENCES MAJOR	
	Credits*
Environmental Geosciences	44 (47)
Chemistry	7

SUMMARY OF THE REQUIREMENTS FOR A MINOR IN ENVIRONMENTAL GEOSCIENCES			
	Credits		Credits
ENVG /SC 20110: Physical Geology	4	<i>Two of:</i>	
ENVG /SC 20120: Historical Geology	4	ENVG 40100: Geophysics	3
ENVG /SC 20200: Mineralogy and Optical Mineralogy	4	ENVG 40310: Environmental Impact of Resource Utilization	3
ENVG 45200: Field Trip	1	ENVG 40340: Water-Rock Interaction	3
<i>Subtotal:</i>	13	ENVG /SC 40380: Paleontology	3
<i>One of:</i>		ENVG 40360: Geomicrobiology	3
ENVG 20210: Igneous and Metamorphic Petrology	4	ENVG /SC 40300: Geochemistry	3
ENVG 30400: Structural Geology	4	<i>Subtotal:</i>	6
ENVG /SC 30230: Sedimentation and Stratigraphy	4		
<i>Subtotal:</i>	4	<i>Total Credit Hours:</i>	23

## COMPUTER SCIENCE AND ENGINEERING

## Sophomore Year

## First Semester

Arts and Letters course <sup>3</sup>	3
ENVG 20200. Mineralogy and Optical Min.	4
PHYS 10320. Physics II	4
MATH 22550. Calculus III	3.5
	14.5

From the spring semester, sophomore year, the curriculum is the same as that listed above for engineering students, except a technical elective is taken in place of an arts and letters course during the fall semester, senior year. The total number of semester credit hours is the same.

## Minor in Environmental Geosciences

A minor in environmental geosciences requires the completion of 23 credit hours in geological sciences as follows.

ENVG 20110. Physical Geology + lab	4
ENVG 20120. Historical Geology	4
ENVG 20200. Mineralogy	4
ENVG 45200. Field Trip	1
<b>Total</b>	<b>13</b>

## One of:

ENVG 20210. Ig. and Met. Petrology	4
ENVG 30400. Str. Geology and Rock Mech.	4
ENVG 30230. Sediment. and Stratigraphy	4
<b>Total</b>	<b>4</b>

## Two of:

ENVG 30300. Surficial Proc. Surf. Hydrol.	3
ENVG 40300. Geochemistry	3
ENVG 40310. Env. Imp. Res. Utilization	3
ENVG /SC 40380. Paleontology	3
ENVG 40340. Water-Rock Interaction	3
ENVG 40360. Geomicrobiology	3
<b>Total</b>	<b>6</b>

Total for the Minor: 23 semester hours.

## Notes:

1. EG 10111 and EG 10112 are accepted but not required for the environmental geosciences degree.

2. Under special circumstances, MATH 10240 maybe an acceptable substitute for MATH 10550, and the sequence MATH 10350-10360 may be considered as an acceptable substitute for MATH 10550-10560.

3. University requirements include:

FYC	3 hours
Theology	6 hours
*Philosophy	6 hours
*History	3 hours
*Social Science	3 hours
*Fine Arts or Literature	3 hours
*one of these must be a University Seminar.	

4. Technical electives are typically junior and senior level courses in science or engineering that have been approved by the chair of Civil Engineering and Geological Sciences. Students must ensure they have met

prerequisite requirements for technical elective courses. Courses that may be used as technical electives include:

ENVG 40380. Paleontology
ENVG 48600. Undergraduate Research
CHEM 20223. Elem. Organic Chem. I
CHEM 20224. Elem. Organic Chem. II
CHEM 20247. Organic Chemistry + Lab
CHEM 20248. Organic Chemistry + Lab
CHEM 20243. Inorganic Chemistry
CHEM 30321. Physical Chemistry
CHEM 30322. Physical Chemistry II
CHEM 30333. Analytical Chemistry + Lab
CHEM 30341. Fundamentals of Biochemistry
CHEM 40420. Principles of Biochemistry
BIOS 10107. Biological Sciences I
BIOS 10108. Biological Sciences II
BIOS 20201. General Biology I
BIOS 20202. General Biology II
BIOS 30401. Principles of Microbiology
AME 20221. Mechanics I
AME 20222. Mechanics II
AME 30331. Fluid Mechanics
CE 40450. Hydraulics
CE 40340. Waste Treatment
MATH 30650. Differential Equations

The following graduate courses, described in the Graduate School Bulletin of Information, are also open to advanced undergraduates with permission:

ENVG 60300. Geochemistry
ENVG 60310. Surficial Processes
ENVG 60340. Water-Rock Interactions
ENVG 60370. Environmental and Technological Aspects of Minerals
ENVG 60380. Environmental Isotope Chemistry
ENVG 60400. Surface and Subsurface Geophysics
ENVG 60410. Geodynamics
ENVG 60500. ICP Analytical Techniques
ENVG 60560. Geomicrobiology

## COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Civil Engineering and Geological Sciences](#) heading.

## Computer Science and Engineering

Schubmehl/Prein Professor and Department Chair of Computer Science and Engineering:

Kevin W. Bowyer

Ted H. McCourtney Professor of Computer Science and Engineering:

Peter M. Kogge

Professors:

Steven C. Bass (emeritus); Danny Z. Chen; Patrick Flynn; Eugene W. Henry (emeritus); X. Sharon Hu; John J. Uhran Jr. (emeritus)

Associate Professors:

Jay B. Brockman; Jesús A. Izaguirre

Assistant Professors:

Marina Blanton; Surendar Chandra; Amitabh Chaudhary; Nitesh Chawla; Scott Emrich; Michael Niemier; Christian Poellabauer; Aaron Striegel; Douglas Thain

Research Professor:

Gregory R. Madey

Assistant Research Professor:

Christopher Sweet; Chas Wang; Bo Zhou

Associate Professional Specialist:

Ramzi K. Bualuan; J. Curt Freeland

**Program of Studies.** The Department of Computer Science and Engineering offers programs of study that lead to the degrees of bachelor of science in computer science and bachelor of science in computer engineering. The program in computer engineering is accredited by the Engineering Accreditation Commission of ABET, Inc. The department also offers programs that lead to a master of science in computer science and engineering, and a Ph.D..

**Educational Goals.** The goals of the programs in computer science and computer engineering are (1) to prepare all students for careers in the public or private sector; (2) to prepare outstanding students for graduate study; (3) to develop lifelong learning skills in all students; (4) to provide comprehensive education in computer science, including theoretical foundations, software and hardware systems, and applications; and (5) to ensure significant design experience including working in teams.

**Program Outcomes.** At the time of completion of the undergraduate program, all graduates should possess (1) the ability to specify, design, test, and document software; (2) an understanding of current computer software and hardware technology; (3) an understanding of science, engineering, and mathematics; (4) a comprehensive general education; (5) the ability to continue learning in response to professional needs as well as personal desire for self-improvement; and (6) an understanding of personal and professional responsibility to society.

## COMPUTER SCIENCE AND ENGINEERING

**Programs.** Programs in the Department of Computer Science and Engineering follow the four-year curricula listed below. These include required and elective courses in the basic, pure, and applied sciences, as well as the humanities, electrical engineering, computer science, and computer engineering. Emphasis is on developing a mastery of the key principles underlying the organization, operation, and application of modern computers to real problems, with a solid grounding in math and science to permit a quantitative analysis of such solutions. In addition, central to both programs is the development of the ability to function, both independently and in multidisciplinary teams, and to be prepared for continued change in future computing technology and what effects it will have on all aspects of society. Opportunities for specialization in several professional computer disciplines are available. Students are individually assisted and advised in their choices of elective courses.

Department facilities include a laboratory to support instruction in System Administration and Network Management courses, and research facilities in distributive computing and computational techniques that are used by undergraduates as well. Moreover, the department uses UNIX workstations, which support modern computer-aided design tools for the design of computer systems and integrated circuits (VLSI) in many courses. Also available is a laboratory for the fabrication of integrated circuits designed by students in the “bits-to-chips” program.

Further information about computer science and computer engineering programs may be found on the Web at [cse.nd.edu](http://cse.nd.edu).

## PROGRAM IN COMPUTER ENGINEERING

The Program in Computer Engineering focuses on understanding the basic nature of the electronic devices that go into the creation of modern computers and on the detailed architecture and organization of such systems, both within the central processing unit and in how larger systems are assembled. Modern design tools and techniques are introduced very early in the program and used throughout to design, analyze, and prototype real digital computing systems. All computer engineering students are required to enroll in at least one of a prescribed set of design courses before graduation.

## PROGRAM IN COMPUTER SCIENCE

The Program in Computer Science focuses on the application of computers to real problems, especially in the design, development, and use of software. The program is designed to foster an understanding of the key properties of algorithms (the mathematical statements of how problems are to be solved), and how to recognize and design good algorithms to solve real problems in efficient fashions. The program also includes developing the ability to engineer large, efficient, portable, and scalable pieces of software that implement good algorithms in ways that are

useful to the end users, and to do so in ways that use modern software development tools and techniques.

## FIRST YEAR OF STUDIES

First-year students intending to major in computer engineering or in computer science when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

\* See “Arts and Letters Core” on the first page of the College of Engineering section.

\* These courses must be selected from a list approved by the department. For computer engineering, at least one must be a designated design course.

## COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Computer Science and Engineering](#) heading.

## ELECTRICAL ENGINEERING

## Electrical Engineering

### Chair:

Thomas E. Fuja

*H.C. and E.A. Brosey Professor of Electrical Engineering:*

Panagiotis J. Antsaklis

*Leonard Bettex Chair of Electrical Engineering in Communications:*

Daniel J. Costello Jr. (emeritus)

*Frank M. Freimann Professor of Electrical Engineering:*  
Craig Lent

*Frank M. Freimann Professor of Electrical Engineering:*  
Ruey-wen Liu (emeritus)

*Frank M. Freimann Professor of Electrical Engineering:*  
James L. Merz

*Frank M. Freimann Professor of Engineering:*  
Anthony N. Michel (emeritus)

*Frank M. Freimann Professor of Electrical Engineering:*  
Wolfgang Porod

*Frank M. Freimann Professor of Electrical Engineering:*  
Michael K. Sain

### Professors:

Peter H. Bauer; Gary H. Bernstein; William B. Berry (emeritus); Oliver M. Collins; Patrick J. Fay; Thomas E. Fuja; Eugene W. Henry (emeritus); Yih-Fang Huang; Joseph C. Hogan (emeritus); Michael D. Lemmon; Christine M. Mazier; Alan C. Seabaugh; Gregory L. Snider; Robert L. Stevenson; John J. Uhran Jr. (emeritus)

### Associate Professors:

Martin Haenggi; Douglas C. Hall; Thomas H. Kosel; J. Nicholas Laneman; Ken D. Sauer

### Assistant Professors:

Vijay Gupta; Debdeep Jena; John B. Kenney (adjunct); Huili (Grace) Xing

### Research Professors:

Alexander Mintairov; Alexei Orlov

### Professional Specialist:

R. Michael Schafer

### Concurrent Faculty:

Kevin Bowyer; Jay Brockman; Patrick Flynn; Sharon Hu

**Statement of Goals and Objectives.** The goals of the Department of Electrical Engineering's academic programs are to provide quality education and to foster leading-edge research as a means of training highly qualified engineers and leaders of tomorrow, in keeping with the mission of the University of Notre Dame. The educational objectives through which these goals are met are:

- A thorough foundation for each graduate in basic scientific and mathematical knowledge, and in skills appropriate for practice in the field of electrical engineering immediately after graduation and well into the future.
- Preparation of electrical engineering students for graduate and professional degree programs.
- Breadth in education preparing graduates for adaptation to varied career paths and changing professional landscapes.

**Program of Studies.** The Department of Electrical Engineering offers programs of study that lead to the degrees of bachelor of science and master of science in electrical engineering and doctor of philosophy. The program leading to the bachelor of science degree is accredited by the Engineering Accreditation Commission of ABET, Inc.

**Program in Electrical Engineering.** The four-year curriculum, listed below, includes required and elective courses in the pure and applied sciences, the humanities, and electrical engineering. Emphasis is on the mastery of fundamental principles, with added depth and provision for specialization in the major professional areas of communications, control systems, electronic circuits, design and analysis, microelectronics and integrated circuits, fabrication, photonics, and signal image processing. Students are individually assisted and advised in their choices of elective courses. Departmental facilities include laboratories for electronics, circuits, electrophysics, control systems, communications, integrated circuit fabrication, photonics, microwave circuit/device characterization, and digital signal/image processing. State-of-the-art computers are available for use in all classes.

Further details about the electrical engineering program may be found on the Web at ee.nd.edu.

### FIRST YEAR OF STUDIES

First-year students intending to major in electrical engineering when they become sophomores will find first-year course requirements on the first page of the College of Engineering section.

Technical Elective†	3
Arts and Letters course+	3
	15

Total for four years: 129.5 semester hours.

\* At least one electrical engineering elective must be chosen from EE 30342, 40446, 40455, 40458, and 40468.

† See "Arts and Letters Core" on the first page of the College of Engineering section or the Electrical Engineering website.

‡ The engineering science and technical elective course lists may be found on the Electrical Engineering website.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Department of Electrical Engineering](#) heading.

The following graduate courses, described in the *Graduate School Bulletin of Information*, are also open to advanced undergraduates with permission of the department chair.

60550. Linear Systems
60551. Mathematical Programming
60553. Advanced Digital Communications
60554. Computer Communication Networks
60555. Multivariable Control Systems
60556. Fundamentals of Semiconductor Physics
60558. Microwave Circuit Design and Meas.
60561. Multi-Dimensional Signal Processing
60563. Random Vectors, Detection and Estimation
60566. Solid State Devices
60568. Photonics
60573. Random Processes, Detection and Estimation
60576. Microelectronic Materials
60580. Nonlinear Control Systems
60581. Digital Image Processing

## INTERDEPARTMENTAL ENGINEERING

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Engineering](#) section under the [Engineering \(Nondepartmental\)](#) heading.

## Dual Degree Programs

### DUAL DEGREE PROGRAM WITH THE COLLEGE OF ARTS AND LETTERS

#### Coordinators:

Cathy Pieronek  
 Director of Academic Affairs  
 College of Engineering  
 Ava Preacher  
 Assistant Dean  
 College of Arts and Letters

**Program of Studies.** The dual degree five-year program between the College of Arts and Letters and the College of Engineering enables the student to acquire degrees from both colleges—the bachelor of arts from the College of Arts and Letters and the bachelor of science degree in a chosen program of the College of Engineering.

This combination program, instituted in 1952, offers students the advantages of both a liberal and a technical education. The student completing one of these combination programs has a background in the humanities and social sciences as well as a degree from one of the programs offered by the College of Engineering. Advisors for the program are available for consultation about the advisability of entering the program and about meeting the particular needs of each student pursuing this program. Qualified students are eligible to receive modest scholarship support from the John J. Reilly Endowed Scholarship program during their third, fourth, and fifth years of study.

The decision to enter the program ideally should be made prior to beginning the sophomore year, although students can also enter the program at a later stage. Three sets of requirements must be met by students in the program: University requirements, Arts and Letters requirements and Engineering requirements, as the following table indicates.

#### University Requirements

Philosophy	6
Theology	6

\* The University Seminar may be selected from an appropriate history, social science, fine arts or literature course, or the first course in theology or philosophy.

\* The University degree requirement is one course in literature or fine arts. The College of Arts and Letters requires a minimum of one course in each subject area, plus one additional course in history or social science.

\*\* Two courses in the intermediate or advanced series complete the requirement. Beginning or elementary series require three semesters' work to fulfill the language requirement.

† Courses specified by the student's major engineering department. Minimum total for the five-year program to fulfill degree requirements in both colleges is 168 to 177 credit hours.

‡ Courses necessary to fulfill the requirements for a major in the student's major arts and letters department.

### DUAL DEGREE PROGRAM WITH THE MENDOZA COLLEGE OF BUSINESS

#### Coordinators:

Mary Goss  
Director of Admissions  
Master of Business Administration Program  
Cathy Pieronek  
Director of Academic Affairs  
College of Engineering

**Program of Studies.** The dual degree five-year program between the Mendoza College of Business and the College of Engineering enables the student to earn the bachelor of science in a chosen field of the College of Engineering and the master of business administration.

This program, instituted in 1991, offers students the opportunity to better integrate study in engineering and in management. The student completing this program has a background in the management sciences, as well as the first professional degree in one of the fields of engineering. Because it is a demanding program, only those students of superior scholastic ability, who have both the aptitude and motivation necessary for the combined graduate and undergraduate program, should apply. Advisors for the program are available for consultation about the advisability of applying for the program and about meeting the particular needs of each student pursuing this program.

This program is open only to those currently enrolled Notre Dame students who have completed three years of a degree program in the College of Engineering. Students interested in the M.B.A./engineering program should apply to the M.B.A. program during their junior year. To facilitate the application process, students should take the Graduate Management Admission Test (GMAT) by December of their junior year.

An applicant who is not admitted to the dual degree engineering/M.B.A. program continues in the undergraduate engineering program and completes his or her undergraduate engineering program in the usual four-year time frame.

As a general rule, it is expected that a student accepted to this program will take two courses required for the undergraduate engineering degree during the summer session following the junior year. The following schedule of classes is an example of how a program might be accomplished.

Students in the five-year engineering/M.B.A. program are also required to:

- (1) Complete a minimum of 48 M.B.A. credit hours and maintain a GPA of at least 3.0 to successfully complete the program.
- (2) Take all M.B.A. courses in their fourth year.

(3) Maintain full-time student status (minimum course load of 12 credit hours per semester).

*The M.B.A. curriculum divides each semester into two modules. In addition to the M.B.A. courses noted below, students are expected to take three credits in engineering undergraduate courses in the fall semester of their senior year and six credits in engineering undergraduate courses in each of the subsequent three semesters.*

**First Year, Sophomore Year, Junior Year:**  
As outlined for individual engineering degree programs in this *Bulletin*. 98–104 credit hours.

<b>Summer Session Following Junior Year:</b>	
Arts and Letters course*	3
Arts and Letters course*	3
Math Review Workshop*	0
Accounting Review Workshop*	0

<b>Senior Year</b>	
<i>First Semester, Module 1:</i>	
ACCT 60100, Financial Accounting	2
MBET 60340, Conceptual Foundation of Business Ethics	2
MGT 60100, Statistics	2
MGT 60300, Organizational Behavior	2

<i>First Semester, Interterm Week:</i>	
Professional Development Seminar	1

<i>First Semester, Module 2:</i>	
ACCT 60200, Cost Accounting	2
FIN 60400, Finance I	2
FIN 60210, Microeconomic Analysis	2
MARK 60100, Marketing Management	2

<i>Second Semester, Module 3:</i>	
FIN 70600, Finance II	2
FIN 60220, Macroeconomic Analysis	2
MGT 60900, Strategic Decision Making	2
Free Elective	2

<i>Second Semester, Interterm Week:</i>	
Values in Decision Making	1
Required Course (TBD)	1

<i>Second Semester, Module 4:</i>	
MGT 60400, Leadership and Teams	2
MGT 60700, Operations Management	2
Free Elective	2

<b>Fifth Year</b>	
<i>First Semester, Module 1:</i>	
MGT 60200, Problem Solving	2
Management Communication Elective I (Floating Optional Elective*)	2

\*Students have the option to take one additional two-credit-hour elective now or in any remaining module.

## DUAL DEGREE PROGRAMS

*First Semester, Module 2:*

Ethics Elective	2
Management Communication Elective	2
(Floating Optional Elective	2)

*Second Semester, Module 3:*

Free Elective	2
Free Elective	2
(Floating Optional Elective	2)

*Second Semester, Interterm Week:*

(OPTIONAL: Two one-credit-hour electives OR Corporate Case Studies OR Offshore Program: China or Brussels	2)
--	----

*Second Semester, Module 4:*

Free Elective	2
Free Elective	2
(Floating Optional Elective	2)

*\*See "Arts and Letters Core" on the first page of the College of Engineering section.*

*\*\*Special one/two-week courses. All other M.B.A. courses are seven weeks in length.*

*\*Occurs during August Orientation*

Total for both degrees: 126–132 undergraduate, 48 M.B.A.

One M.B.A. course will be accepted as an elective or technical elective by each College of Engineering program. No more than two M.B.A. courses may be accepted toward an undergraduate degree from the College of Engineering. Students are advised to check specific program requirements.

# College of Science

The University of Notre Dame awarded its first bachelor of science degree in 1865. Before that time, courses had been taught in mathematics (from 1842), in biology (from 1844), and in chemistry (from 1850). In 1867, a program in general science was formulated. Subsequently, specialized programs were added, leading to the degree of bachelor of science in botany and in zoology (both now covered by one degree in biological sciences), in environmental sciences, in biochemistry, in chemistry, in physics, in mathematics, and in preprofessional studies.

## Departments of the College of Science

**The Department of Biological Sciences**, located in the Galvin Life Science Center, has well-equipped laboratories for undergraduate and graduate research. The facilities include controlled-environment rooms; an optics facility containing confocal microscopes, scanning and transmission electron microscopes; molecular analysis facilities for DNA sequencing, microarrays, cell sorting; and extensive data storage and retrieval equipment.

The Hank Center for Environmental Science provides more than 20,000 square feet of state-of-the-art research space for aquatic, terrestrial, and environmental studies that includes greenhouses, wet laboratories, and a field sample processing room.

The Freimann Life Science Center provides additional laboratories, vertebrate animal care, and associated specialized modern research facilities to serve the expanding needs of life science research at Notre Dame.

The Jordan Hall of Science contains 16 state-of-the-art laboratories for teaching undergraduate and graduate life science laboratory courses. In addition, the collections of museum specimens, including the Greene-Nieuwland Herbarium, are available for research and teaching, housed in superb museum facilities in Jordan Hall.

**The Department of Chemistry and Biochemistry**, located in Nieuwland Science Hall and Stepan Hall of Chemistry and Biochemistry, has laboratories devoted to research in several areas of chemistry: physical, inorganic, organic, and biochemistry. The laboratories are equipped with all necessary facilities for undergraduate students, graduate students, postdoctoral investigators, and faculty. Undergraduate researchers have access to seven high-field NMR spectrometers and three state-of-the-art single crystal X-ray diffractometers, plus many pieces of equipment such as infrared, ultraviolet, Raman, mass spectrometer; photoelectron spectroscopy; potentiostats; analytical and preparative HPLC

and GC equipment; special apparatus for studying mechanisms and rates of reactions; and cell culture facilities. For theoretical work, two large parallel cluster supercomputers are available. The facilities of the Radiation Research Laboratory are used by some faculty of the chemistry department for research in physical chemistry.

The new Jordan Hall of Science houses all of the undergraduate teaching laboratories for chemistry and biochemistry. Included are spacious facilities for introductory and organic chemistry; analytical, physical, and inorganic chemistry; and biochemistry. The building also contains a new NMR spectrometer. Also within Jordan Hall are two large lecture rooms specially designed for teaching introductory science courses, along with a 150-seat multimedia visualization center.

**The Department of Mathematics** is housed in Hayes-Healy Center/Hurley Hall, conveniently located in central campus. The facilities for undergraduate and graduate instruction and research in mathematics include a first-rate research library; a faculty room; offices for the faculty, postdoctoral investigators, and other visitors, graduate students, and staff; several research seminar and conference rooms; and several large classrooms with state-of-the-art media capability.

**The Department of Physics**, located in Nieuwland Science Hall, has classrooms and laboratories for both undergraduate and graduate research. There are facilities for experimental work in astrophysics, biophysics, condensed-matter physics, elementary particle physics, and nuclear physics. There are three atomic spectroscopy laboratories, and some additional use is made of facilities at Argonne National Laboratory. Elementary particle experiments are done at the Stanford and Fermi national laboratories, and at CERN in Geneva, Switzerland. Detector development for the major accelerators is also being done in the department. The Nuclear Structure Laboratory has a tandem accelerator with a heavy ion capacity and all necessary detection equipment. A variety of solid state facilities are available for the study of metals, high  $T_c$  superconductors, and semiconductors. Off-site facilities at Argonne, the National High Magnetic Field Laboratory, and the National Institutes of Standards and Technology are also heavily used. Notre Dame is a partner in the Large Binocular Telescope project, nearing completion. This will be one of the most capable facilities in the world for cutting-edge cosmology and astrophysics research. Research is conducted in many major areas of theoretical physics, including all of the above areas as well as statistical mechanics, field theory, general relativity, and astrophysics. The

department has a substantial machine shop and research library and a variety of staff technicians. Many faculty members and research groups have computing facilities, and all have access to the Office of Information Technologies' very large computers.

The new Jordan Hall of Science houses all of the undergraduate teaching laboratories for physics, including spacious facilities for introductory mechanics, electricity and magnetism, and modern physics. Within Jordan Hall are also a laser and optics lab and an advanced laboratory for physics majors. The building also hosts a rooftop observatory equipped with a dozen small telescopes for introductory astronomy courses, along with a separate dome housing a large, research-quality telescope for physics and astronomy students. Jordan Hall is also home to a 150-seat digital visualization theatre that serves as a planetarium for a variety of astronomy and astrophysics courses.

**The Department of Preprofessional Studies** is located in the Center for Health Sciences Advising in the Jordan Hall of Science. The new center will centralize the advising process for all University students interested in the health professions. All courses for students enrolled in the preprofessional program and collegiate sequence programs are provided by the other departments of the College of Science and the other colleges of the University.

## Undergraduate Education

The aim of the program of undergraduate education in the College of Science is to produce intellectually able graduates who are grounded in the broad fundamental principles of the basic sciences, versed in the advanced concepts of their chosen scientific discipline and educated in the humanistic and social studies, including theology. Each graduate should be a good scientist in his or her own field, a fully developed person, aware of his or her responsibilities to society and prepared to participate fruitfully in the affairs of society.

Education in science at Notre Dame is a coordinated program involving the basic sciences, the chosen advanced science, and the humanistic and social studies, including theology and philosophy. In this education, the student should acquire a thorough, integrated, and broad understanding of the fundamental knowledge in his or her field, a competence in orderly analytical thinking, and the capacity to communicate ideas to others, orally and in writing. This system of education is so arranged to develop in each student the desire and habit of continuing to learn after graduation, advancing over the years to higher levels of professional and personal stature

## CURRICULA AND DEGREES

and keeping abreast of the changing knowledge and problems of his or her profession.

Emphasis is placed on fundamental principles so that the students can develop abilities to apply these principles to the solution of new problems never before encountered by society, to the discovery of new things and to the invention of devices not learned about in books. Notre Dame stresses basic concepts useful in later learning rather than masses of particular facts and data that can better be found in books at the time of need.

### Curricula and Degrees

The College of Science offers curricula leading to the degree of bachelor of science in each of five undergraduate departments:

Biological Sciences  
Chemistry and Biochemistry  
Mathematics  
Physics  
Preprofessional Studies

The following are degree programs offered by these departments:

Biochemistry  
Biological Sciences  
Chemistry  
Chemistry combined with Business  
Chemistry combined with Computing  
Environmental Sciences  
Mathematics  
Mathematics (combined with other programs)  
Physics  
Physics (combined with other programs)  
Preprofessional Studies  
Science-Business  
Science-Computing  
Science-Education

These degree programs are described in detail in later sections of this *Bulletin*.

See also the bachelor of science degree programs offered by the College of Engineering:

Computer Science  
Environmental Geosciences

Each College of Science student must enroll in the department of his or her major beginning with the sophomore year. However, a student may freely change primary majors in the College of Science at any point up until the last drop day of the fall semester of the senior year. Concentrations, second and supplementary majors, and minors may be changed at any time.

The College of Science maintains a website at [science.nd.edu](http://science.nd.edu). Further information related to programs offered by the college may be found at that location.

Listed below are the allowed options for students interested in double science majors, double majors

between colleges, second majors in the College of Science, and supplementary majors and minors in the College of Arts and Letters.

Students pursuing one of these combination programs must have superior scholastic ability and be formally accepted by the dean of both colleges involved. Approval will not be granted if there is substantial overlap between the two programs.

*Note:* Courses taken toward the completion of another major or supplementary major or minor or concentration requirement may not also be counted toward the student's other majors or minors or concentrations or University requirements.

**Double Science Majors.** In certain instances, students will have the option of pursuing majors in two departments of the College of Science. Details on the double science major option and lists of combinations that are normally approved are found under "Special Programs," later in this section of the *Bulletin*.

**Dual Degree.** Notre Dame students pursuing majors in two of the undergraduate colleges may qualify for a five-year dual-degree program.

The requirements for a dual degree generally are as follows: The student completes all of the university requirements, all of the requirements for both colleges, all of the requirements for both majors, and the total number of degree credits specified for a dual degree in the two colleges. While the total number of hours required does depend on the two major programs, the minimum required total number of degree credits is set to be 30 degree credits beyond the college total for the college with the greatest required number of degree credits. For students completing a dual degree in the College of Science and the College of Arts and Letters, the minimum number is thus 154 hours.

**Double Majors in Two Colleges.** Qualified Notre Dame students pursuing majors in one of the other undergraduate colleges or schools may add another major in the College of Science. Additionally, qualified Notre Dame students pursuing a major in the College of Science may also add another major in one of the other undergraduate colleges or schools.

The requirements for a double major between colleges generally are as follows: The student completes all the University requirements, the requirements of his or her college or school, and the requirements of both majors. In general, a single course may not satisfy requirements for both majors.

**Supplementary Majors and Minors.** Qualified Notre Dame students pursuing majors in the College of Science may add a supplementary major or minor. Options include programs offered through the College of Arts and Letters and the Environmental Geosciences minor offered through the College of Engineering.

Not all supplementary major programs are open to science students; e.g., science students may not add

the Arts and Letters Preprofessional Studies supplementary major nor the Computer Applications supplementary major.

**Supplementary Majors, Minors, and Concentrations in the College of Science.** In the College of Science, the term "second major" is used for a supplementary major. Three departments offer a second major program specifically for students in the other colleges: Mathematics as a second major, physics as a second major, and environmental sciences as a second major. For details, see the departmental sections of this *Bulletin*.

There are no minor programs in the College of Science.

Two departments in the College of Science offer concentration programs: Mathematics and Physics. For details, see the departmental sections of this *Bulletin*.

**Combination Five-Year Program with the Mendoza College of Business.** The College of Science and the Mendoza College of Business have established a competitive cooperative program in which a student may simultaneously earn a bachelor of science and a master of business administration degree. The program is structured so that the student who has completed the three years of a science bachelor's degree program, if accepted, completes the master of business administration and the bachelor of science in a major in the College of Science in a summer session and two subsequent academic years.

Students who wish to pursue this program should have a superior scholastic record in their major program and must make application to, and be accepted by, the M.B.A. program.

The general sequence of courses in the five-year Science-M.B.A. program may be found under "Dual Degree Program with the Mendoza College of Business," later in this section of the *Bulletin*.

### University and College Requirements

A minimum of 124 credit hours is required for graduation from the College of Science. A minimum of 60 credit hours must be in science; however, each department may specify more than 60 credit hours for any of its programs.

All College of Science majors must fulfill University requirements, which include:

FYC 13100	3 hours
*Theology	6 hours
*Philosophy	6 hours
*History	3 hours
*Social Science	3 hours
*Fine Arts or Literature	3 hours
<i>* One of these courses must be a University seminar.</i>	

## STUDENT AWARDS AND PRIZES

In addition, all College of Science majors must take courses in:

Chemistry (10171 and (10172 or 10122) or 10181, 10182)

Mathematics (10350, 10360 or 10550, 10560 or 10850, 10860)

Physics (10310, 10320 or 10411, 20435 or 30210, 30220).

The appropriate sequence for a student depends on the student's major.

The College of Science requires language proficiency through intermediate level in one of the following languages: Arabic, Chinese, French, German, Greek, Irish, Italian, Japanese, Latin, Portuguese, Russian, and Spanish. Students may complete the language requirement by either completing a course taught at intermediate level or by demonstrating proficiency through placement examination. The college office maintains a list of language courses at intermediate level. (See the college website, science.nd.edu.)

Students with no previous background in a language should start with a beginning-level course. They take typically either nine credits over a three-semester period or two semesters of an intensive language sequence (8–10 credits total). Placement for students with some background in French, Spanish, Latin or German will be made only by examination (1) through the Advanced Placement test, (2) through the SAT II Subject test (French and Spanish), (3) through the International Baccalaureate Program or (4) through the Notre Dame departmental placement examinations. A maximum of six credits of placement can be granted for previous study in a given language. Thus, typically, College of Science students who have completed the language requirement will count from six to 10 credits in language toward the 124 credits required for graduation.

The College of Science will count a maximum of three credit hours from the following types of activity courses:

Band (Marching and Concert)  
Orchestra  
Chorale  
Glee Club  
Liturgical Choir  
Folk Choir  
Music Lessons and Ensembles  
Dance  
Debate  
Science in the Classroom

No more than one credit hour total from any of these courses may be counted toward the degree per semester. Additionally, a maximum of six credit hours of upper-level (30000- or 40000-level) ROTC courses can be counted toward the 124-credit-hour requirement. These courses will be counted as free electives.

The College of Science works with the Center for Social Concerns (see page 23 of the *Bulletin*) to develop relevant, community-based opportunities.

Science majors may count as general electives up to 3 credits for approved Summer Service Learning Program courses (e.g., THEO 33936) or Social Concerns Seminars (e.g., CSC 33951).

Not all science courses will count toward degree credit or science elective credit for science majors. The survey science courses offered as options for non-science majors for their University science requirement will not count as a science elective or toward the minimum science credit hour requirement. Because of overlap in content with required courses for science majors, many of these courses will also not count toward the degree credit requirement (see "Science Degree Credit," later in this section of the *Bulletin*).

Some major programs have a science elective requirement. Recommended science electives for particular science majors are found on the college's website, science.nd.edu. For a course to be a science elective, it must meet the following rules: (1) It is offered through one of the departments of the College of Science or through the college itself. (2) It is major's level; that is, other science majors are required to take this course to meet a major requirement or it has a prerequisite course that is offered for science majors, or the *Bulletin* description for the course states that it is a science elective in the College of Science. Finally, the departments may place additional restrictions on allowed science electives, e.g., in the Department of Biological Sciences, a science elective must be a non-biology course.

All College of Science courses offered by a major program must be taken at the University of Notre Dame. If a student wants to take a course outside Notre Dame for credit toward the Notre Dame degree, prior approval of the dean's office must be obtained. This does not apply to the courses taken by a transfer student prior to attending Notre Dame.

**Advising.** All Notre Dame science majors have been assigned an advisor in the department of their major. All advisors are members of the faculty of the College of Science. In some departments, the director of undergraduate studies for the department advises all students. In others, the director of undergraduate studies or the department office may be contacted to find out the name of the student's advisor. A complete list of names of advisors is kept on the science website.

Notre Dame students who have questions concerning the choice of a major or considering a change of major are urged to make appointments with the advisors of the departments involved. Students needing help choosing from similar majors may request an advising appointment with the associate dean of the College of Science, 174 Hurley Hall.

## Student Organizations and Activities

In addition to participation in University-wide student activities, the undergraduate students of the College of Science may participate in activities directly related to science, including the undergraduate departmental science organizations: the Biology Club, the Notre Dame Chapter of Student Affiliates of the American Chemical Society, the Mathematics Club, the Society of Physics Students, the Premed Club (preprofessional), the Prevet Club, the Science-Business Club, and the Notre Dame Chapter of Alpha Epsilon Delta (premedical honorary fraternity).

**Student Council.** The Student Council of the College of Science is composed of representatives of the majors of the College of Science. The student council serves as the official body representing the undergraduate students before the administration of the College of Science.

## Student Awards and Prizes

*The Dean's Award.* Presented to the outstanding graduating senior in the College of Science in recognition of exemplary personal character, leadership, service, and outstanding achievement. Selected by the dean and associate dean.

*Outstanding Senior Biological Scientist(s).* To the senior(s) who has/have demonstrated the most promise in the biological sciences as evidenced by both academic performance and research participation.

*American Institute of Chemists Award.* For scholastic achievements, ability, and potential advancement in the chemical profession.

*Merck Index Award.* For outstanding achievements in chemistry or biochemistry.

*Norbert L. Wiech Ph.D. Award.* Given to a chemistry or biochemistry major in the junior year for outstanding achievement in academics and research.

*Outstanding Biochemist Award.* For leadership, academic achievements, research and scholarship in biochemistry.

*Outstanding Chemist Award.* For academic and research achievements in chemistry as an undergraduate.

*William R. Wischerath Outstanding Chemistry Major Award.* For academic achievements of a graduating senior chemistry major.

*Chemistry-Education Award.* For academic achievements in preparation for teaching of chemistry in a secondary education system.

## SPECIAL OPPORTUNITIES

*The General Electric Prizes for Honors Majors in Mathematics.* Awarded to senior honors majors in the Department of Mathematics who, in the opinion of the members of the faculty, excelled in mathematics during their undergraduate career.

*The General Electric Prizes for Majors in Mathematics.* A similar award to senior majors.

*The George Kolettis Award in Mathematics.* An award established by friends of the late Prof. George Kolettis, for a graduating senior who excelled in mathematics and contributed notably to the esprit de corps of the mathematics student body.

*The Aumann Prize for First Year Students in Mathematics.* A prize given by Ms. Monika Caradonna in honor of her father, Prof. George Aumann, awarded on the basis of a competition among First Year honors mathematics students.

*The Norman and Beatrice Haaser Mathematics Scholarships.* These scholarships, made possible by the generosity of Professor and Mrs. Haaser, are awarded to worthy, needy students majoring in mathematics.

*R. Catesby Taliaferro Competition for Sophomore Mathematics Honors Students.* Friends and students of the late Professor Taliaferro established this prize, which is awarded to a sophomore mathematics major on the basis of an essay submitted by the student.

*J & C Sophomore Award in Mathematics.* Exemplary performance in mathematics classes by a non-honors math major sophomore female or minority (African-American, Asian, Hispanic, Native American) student.

*Outstanding Senior Physics Major.* This award is given to the outstanding senior physics major, who, in the judgment of the departmental faculty, shows the most promise for a distinguished career in physics. Course grades, the opinion of those who have taught the candidates, and any research performance are considered in making the award.

*Physics Outstanding Undergraduate Research Award.* A monetary award given for excellence in research to an undergraduate physics major.

*DiNardo Award.* To the outstanding junior preprofessional student.

*Emil T. Hofman Scholarships.* To six outstanding students pursuing premedical studies.

*J.C. Lungren, M.D., Scholarships.* Awarded to three outstanding science preprofessional students.

*The Lawrence H. Baldinger Award.* To seniors in the preprofessional program who excelled in scholarship, leadership, and character.

*The Patrick J. Niland, M.D., Award.* A monetary award given to a preprofessional studies senior to purchase books for the first year of medical school.

*The Samuel Chmell, M.D., Award.* To an outstanding senior in preprofessional studies who exemplifies

high academic achievement and uncompromising integrity within the program.

*The Rev. Joseph L. Walter, C.S.C., Award.* To a senior with a keen social awareness who shows great promise as a concerned physician.

## Special Opportunities

**Glynn Family Honors Program.** In the fall of 1983, the University inaugurated an honors program for a small number of outstanding students in the College of Arts and Letters and the College of Science. A limited number of students with academic intents for each college are identified at the time of admission. Although selection criteria include the promise of outstanding academic performance as demonstrated by standardized test scores and high school performance, the program is looking for more than mere academic ability. It hopes to identify students with a deep intellectual curiosity.

The program offers honors sections to fulfill most of the University and college requirements in the students' freshman and sophomore years. At present, there is the yearlong Honors Seminar (satisfying the writing and literature requirements). Honors Calculus, Honors Philosophy, Honors Theology, Honors Biology, Honors Physics, and an array of Honors Social Science courses. Since these courses are restricted to honors students, they are smaller than non-honors sections and are usually taught in a seminar format. The teachers for honors sections are chosen from the most outstanding teachers in each college. After the first year, each student's academic work will be mainly centered in his or her major field (or fields) of study, but two or more honors electives are also taken during these years. In the fall of the senior year, there is an "Honors Thesis/Research Seminar," which is followed by the "Senior Seminar" in the spring. The fall seminar is intended to be a spur to the students' capstone project, whereas the spring seminar brings the honors students from diverse majors back together for some concluding topical discussions. All honors students will also be expected to complete a special six-hour senior research honors project in their major field of study. In science, this is the culmination of a research project begun earlier, and in arts and letters, it is a two-semester project culminating in a thesis. Those writing senior theses work individually under the direction of a faculty advisor of their choosing in their major field. Funds are available for research projects during summers either at Notre Dame or other universities.

In addition to the more narrowly academic features of the honors program, students will be offered various opportunities for broadening personal, cultural, and spiritual growth. Regular colloquia, informal discussions, and cultural excursions are available.

Further information on the structure and content of the Honors Program may be obtained by contacting Prof. Alex Hahn or Prof. Cornelius Delaney, 323

O'Shaughnessy Hall, Notre Dame, IN 46556, 574-631-5398.

**The Environmental Research Center (UNDERC),** a University facility, is composed of approximately 7,500 acres located primarily in the Upper Peninsula of Michigan. Research is conducted at UNDERC by undergraduate as well as graduate students on a variety of environmental problems, including the manipulation of ecosystems. Internships are available to support student participation in BIOS 30569 at UNDERC each semester.

**International Studies Program.** Students from any of the majors in the College of Science may participate in one of the University of Notre Dame's international study programs. Science students who go abroad generally do so in one of the two semesters of their junior year. Science students interested in international studies should discuss their plans with their advisor and with the associate dean, 248 Nieuwland Science Hall. Further information can be obtained through the Office of International Studies, 109 Hurley Hall.

## BIOLOGICAL SCIENCES

Crislyn D'Souza-Schorey

*Professor and Rev. Howard J. Kenna, C.S.C. Memorial**Director of the Zebrafish Center:*

David R. Hyde

*University of Notre Dame Chair in Biological Sciences:*

Robert A. Schulz

*Professors:*

Harvey A. Bender; Nora J. Besansky; Sunny K. Boyd; Harald E. Esch (emeritus); Jeffrey L. Feder; Malcolm J. Fraser; Morton S. Fuchs (emeritus); Ronald A. Hellenthal; Alan L. Johnson; Charles F. Kulpa Jr.; Gary A. Lamberti; David M. Lodge; Kenneth R. Olson (adjunct); Joseph E. O'Tousa; Morris Pollard (emeritus); David W. Severson; Kristin Shrader-Frechette (concurrent); Kenyon S. Tweedell (emeritus)

*Associate Professors:*

Michael T. Ferdig; Paul R. Grimstad; Hope Hollocher; Lei Li; Rev. James J. McGrath, C.S.C. (emeritus); Edward E. McKee (adjunct); John F. O'Malley (adjunct); Jeanne Romero-Severson; Jeffrey S. Schorey; Kevin T. Vaughan

*Assistant Professors:*

Suzanne Bohlson (adjunct); Giles Duffield; Molly Duman Scheel (adjunct); Kristin M. Hager; Jessica Hellmann; Edward H. Hinchcliffe; Mary Ann McDowell; Jason McLachlan; Tracy Vargo-Gogola (adjunct)

**Program of Studies.** The Department of Biological Sciences offers programs of study leading to the degrees of bachelor of science with a major in biological sciences or bachelor of science with a major in environmental sciences, master of science in biological sciences and doctor of philosophy. Also offered is a second major in environmental sciences for students in the College of Arts and Letters or in the College of Business Administration.

**Program in Biological Sciences.** The biological sciences encompass all aspects of life sciences, including microbial, plant, and animal life. This includes the biochemistry, genetics, development, physiology,

SUMMARY OF REQUIREMENTS FOR GRADUATION FOR ANY BIOLOGICAL SCIENCES MAJOR		
		<i>Year Usual Credits Taken</i>
Biological Sciences*	41	all
Chemistry (10171–10172 or 10181–10182)	8	First year
and (20273–20274 or 20283–20284 with labs)	8	Sophomore
Physics (30210–30220 with labs)	8	Junior
Mathematics (10350–10360 or 10550–10560)	8	First year
<b>Total Science:</b>	<b>73</b>	
History**	3	First year
Social Science**	3	First year
Philosophy**	6	Sophomore/Junior
Theology**	6	Sophomore/Junior
FYC 13100	3	First year
Language	Intermediate Level Competency (3)	Sophomore/Junior
Literature/Fine Arts**	3	Junior/Senior
Free Electives	24+	Sophomore/Senior
Physical Education or ROTC (2 semesters)	0	First year
	<b>124 credits</b>	
* <i>It is essential for prospective biology majors to begin their general biology courses in the first year to schedule all required core curriculum courses within a four-year period.</i>		
** <i>One of these courses must be a University Seminar.</i>		
+ <i>Minimum number of free electives based on the assumption that intermediate-level competency in language was achieved by taking a minimum of one three-credit course.</i>		
<i>Majors with AP course credits and/or language Credit by Exam (CE) often have time to incorporate 20 or more free elective credits (i.e., a second major or minor) into their four-year course selection.</i>		

evolution, and ecology of all living things. Every educated person must have sound knowledge of the fundamental principles and facts of the biological sciences to understand himself or herself and the world in which he or she lives. In addition biologists, through their research, contribute to the development of theories and methods required for the solution of humanity's problems in the fields of health, agriculture, industry, and the preservation of the environment.

An undergraduate major in biological sciences prepares a student for graduate study (M.S., Ph.D., MD/Ph.D.) leading to a research career, and also for admission to medical, veterinary, and other professional schools. Graduates with a bachelor's degree may enter careers in industry, government, or health-related research laboratories. Those who wish to teach at the elementary or secondary level should be sure to include required education courses such as those offered through Saint Mary's College. College and university teaching requires the Ph.D. degree.

*The goal of the Department of Biological Sciences is to educate its majors first as scientists prepared for the challenges of modern biology and second for any specialty area(s) in which they develop an interest, especially if that interest is directed-- toward graduate school and research. Also, for the approximately 70 percent of biology majors who initially express an interest in going to medical school or other health-related graduate programs, the key topic areas of modern biology emphasized in the core curriculum are also very relevant to their training as "medical biologists."*

*Students majoring in biological sciences are required to follow a core curriculum. This core not only provides exposure to most areas of modern biology but also includes courses representative of all the levels of biological organization, i.e., from atoms and molecules through ecosystems. Students unsure of which area of biology most appeals to their interests will more easily arrive at that decision through the completion of the core.*

*Policy Statement on the Use of Organisms in Biological Sciences Teaching Laboratories. Some*

## BIOLOGICAL SCIENCES

laboratory courses offered by the Department of Biological Sciences may involve the use of *living or preserved organisms*. Instructors use these *animal specimens* in cases where this is deemed necessary for teaching important biological concepts and principles. *Students who have concerns about the use of organisms in classes must, prior to registering, submit a request for alternate materials to the course instructor.* It is up to the discretion of the instructor(s) as to whether and how non-organism alternatives may be substituted for biological materials in classes. *Students permitted to use alternate materials are responsible for the same knowledge and application as their classmates and may be required to complete examinations that involve the inspection or handling of biological specimens.*

**Biology Courses.** The biology courses included in this *Bulletin* are those reasonably expected to be offered several times to every semester during the next four years. However, changes may occur as faculty add new courses or drop those with little demand. Courses without laboratories are indicated as lecture only. With the move into the new Jordan Hall of Science in fall 2006, biology faculty have begun the creation of new laboratory courses that will count toward the major laboratory requirements.

**Biology Survey Courses (10101–10118)** have a prerequisite of one year of high school chemistry and biology and are designed for first-year students needing to satisfy the University science requirements. These courses will address fundamental aspects of modern biology ranging from genetics to wildlife biology. There will generally be as many as six sections of biology courses available each year; any course may have multiple sections. The listed courses and new courses are offered when demand warrants, allowing subject matter to change depending on students' interests and needs and emerging or changing areas of life sciences. These survey courses are generally recommended University electives and are *not* open to science majors.

*These 101xx-level survey courses satisfy the science requirement for non-science majors at Notre Dame. They do not satisfy the science requirements for science majors at Notre Dame or elsewhere.* Students may not take courses with overlapping or similar lecture material such as BIOS 10101 and 10110 or BIOS 10107 and 10118, for example. A table listing these overlapping courses is on the final pages of the College of Science section of this *Bulletin*.

### BACHELOR OF SCIENCE WITH A MAJOR IN BIOLOGICAL SCIENCES

The biological sciences majors take the following basic sequence of courses in the College of Science:

General Chemistry (CHEM 10171 and 20274)  
Organic Chemistry (CHEM 10172 and 20273)  
Physics (PHYS 30210–30220)<sup>1</sup>  
Calculus (MATH 10350–10360 or 10550–10560)

The requirements in biological sciences include courses from a basic six core sequence and sufficient numbers of BIOS electives to complete the 41-credit-hour requirement. All majors are strongly encouraged to complete the sequence Biological Sciences I and II (BIOS 10161–10162) in their first year to ensure the completion of all requirements in four years. Students may begin the core with General Biology A and B (BIOS 20201–20202); however, they will be at a considerable *disadvantage* in scheduling requirements in the two remaining years; they also will have one year less to explore their interests in biology.

There are seven components to the biology core requirement, consisting of courses in the following areas:

#### Core I: Introductory Biology

- a. Metabolism and Genetics
- b. Ecology, Diversity, and Physiology

Students choose from either:

- Biological Sciences I and II (BIOS 10161–10162) (includes two labs)<sup>2</sup> or
- General Biology A and B (BIOS 20201–20202) (includes two labs)<sup>2</sup>

These labs are designated Lab #1 and Lab #2 of the six required for the major.

#### Core II: Genetics

Students choose from either:

- a. Classical and Molecular Genetics (BIOS 20250 and 21250; lab #3)<sup>3</sup> or
- b. Fundamentals of Genetics (BIOS 20303 and 21303; alternate lab #3)

#### Core III: Cellular Biology

Students choose from either:

- a. Molecular Cell Biology (BIOS 20241)<sup>3</sup> or
  - b. Cellular Biology (BIOS 30341)
- Optional labs available are BIOS 21241, a research-orientated 2-credit laboratory<sup>3</sup>, or BIOS 31341, a basic 1-credit cell biology laboratory primarily for pre-professional students. Students *may not* take both cell labs.

#### Core IV: Physiology

Students choose from either:

- a. Vertebrate (Human) Physiology (BIOS 30344)<sup>4</sup> or
- b. Integrative Comparative Physiology (BIOS 30421).

Optional labs available are BIOS 41344 and BIOS 31421. Students may take both labs if they choose.

#### Core V: Evolutionary Biology

Students choose from either:

- a. Evolution (BIOS 30305) or The History of Life (BIOS 30310) or Vertebrate Biology (BIOS 30404)
- b. Other courses as designated in the future, prior to the Class of 2012 graduation.

#### Core VI: Ecology

Students choose from either:

- a. General Ecology (BIOS 30312; optional lab BIOS 31312 is offered fall semesters only)
- b. Aquatic Ecology (BIOS 30420 and required lab BIOS 31420—offered fall only).

### BIOS ELECTIVES

The minimum required credits in the core including labs is 27. An additional 14 credits of electives in biological sciences are chosen to complete the required total of 41 credits.<sup>5–8</sup> All biological sciences majors are encouraged to include non-science among their “free electives.”

#### Notes:

1. Alternatively, students may select the physics sequences PHYS 10310–10320 or PHYS 10411, 20435.
2. Students are required to take a total of six laboratories; three of the six labs will be part of the Core (Core I(a,b), II, and the remaining three of the six laboratories are chosen among the core III through Core VI and/or BIOS electives, including 50000- and 60000-level courses. Thus, there are three *required* “named” BIOS labs and three additional elective BIOS labs. As an option, students who conduct a minimum of three semesters of undergraduate research (BIOS 48498) in the same laboratory or research group at Notre Dame and earn a minimum of 3 credits (i.e., 3 x 1.0 credit), may substitute those research semesters for *one* of the six required labs.
3. Career-oriented majors in biological sciences, as well as those considering a professional school (medicine, veterinary science, others), are urged to select the courses Molecular Cell Biology (BIOS 20241) and Classical and Molecular Genetics (BIOS 20250). These should be taken in the sophomore year but no later than the junior year. The two-credit cell research lab (BIOS 27241) is especially ideal for those interested in obtaining summer research internships, doing undergraduate research at Notre Dame or elsewhere, and is *especially* critical to any graduate research career.
4. Physiology should be completed by the end of the junior year for students planning to take the MCAT exam or the seventh semester for students planning to take the GRE biology subjects exam.
5. Most graduate (60000-level) courses (through 60579) are open to eligible juniors and seniors; often the majority of students in these advanced courses are undergraduates.
6. Students may choose additional courses in the Core areas III through VI or among courses not assigned to the core (e.g., BIOS 40411, Biostatistics, or BIOS 48498, Undergraduate Research), or 60000-level courses as BIOS electives, to meet the required total of 41 credit hours in biological science courses.
7. Select non-BIOS major-level College of Science courses (i.e., those taken to meet science-major

## BIOLOGICAL SCIENCES

requirements and not among those designated as “Recommended University electives”) that are not being used to fulfill other specific graduation requirements can be chosen with the consent of the director of undergraduate studies for the Department of Biological Sciences and counted toward the BIOS elective credits. While majors are allowed to take one 3-credit, non-BIOS lecture course and have that count toward the 41 required credits, students may also include one non-BIOS lab *if* it is required for that non-BIOS lecture and have that laboratory satisfy one of the six required laboratories. For example, Physical Geology (SC 20110, ENVG 10110/20110) has a required laboratory, and majors who choose BIOS electives based on their environmental or ecological interests may elect to take Physical Geology for a total of 4 credits toward the 41 required credits. Majors who might have transferred into BIOS from BCHM and had taken the required biochemistry (CHEM 30341) lecture and laboratory course will be allowed to count both the lecture and laboratory toward the 41 credits. The same would be true of other relevant science courses (e.g., analytical chemistry, physical chemistry) as approved by the director of their major and the associate dean of the College of Science.

8. Undergraduate Research (BIOS 48498) and Directed Readings (BIOS 46497) count toward the 41-credit biological sciences requirement; however, only a maximum of two credits per semester per course and a combined total of six credits from these two courses may be counted in fulfilling the 41-credit requirement. A maximum of two credits of BIOS 37495 (Teaching Practicum) may be included in any combination of these six credits. A maximum of only nine credits in these courses may be used toward graduation; however, additional credits do remain on a student’s permanent transcript record.

### RECOMMENDED COURSE GROUPINGS

After consultation with the director of undergraduate studies or other faculty advisors including research mentors, each student is encouraged to select the curriculum which best fits his or her career goals. A great deal of flexibility is permitted in designing each individual’s projected course schedule, within the context of the core curriculum. *In essence, each student will be able to design his or her unique biology curriculum in the context of the core requirements and additional biology electives to reflect individual career intent or life science interests.* For students wishing to emphasize specific areas of biology in their curricula, the following four course groupings are *provided as guides* that have proved to be appropriate for most of our previous graduates. Students may wish to consider these and others that are available as the equivalent of a “concentration in a specific area of biology or simply view these as examples of how a particular interest or career goal can be supported by a structure set of courses.

**General Biosciences:** This grouping gives the student a broad foundation in biological sciences

by requiring electives from each of its major areas. This grouping may be designed as preparation for the Graduate Record Examination (GRE) in biology, or the Medical College Admission Test (MCAT). Students considering graduate school or secondary science education, or those without a clear career goal, should consider these courses.

Here, students follow the core curriculum, making choices in Cores III through VI. For MCAT preparation, it is essential for students to complete one semester of genetics (BIOS 20250 or BIOS 20303), one semester of cell biology (BIOS 20241 or BIOS 30341), and one semester of physiology (BIOS 30344 or BIOS 30421) prior to taking that exam. Majors are strongly encouraged to take additional biology courses such as developmental biology (BIOS 30342) as additional MCAT coursework preparation.

Also recommended for electives in biological sciences is a course in either vertebrate or invertebrate biology (e.g., BIOS 30404, Vertebrate Biology, or BIOS 30406, General Entomology). Dependent on the credits associated with the choice of courses made in the core, students will be required to pick three to five more electives in biological sciences to complete the requirement of 41 credits.

**Premedicine/Pre-Health:** In addition to the core requirements in genetics, cell biology, and physiology, biology premed/pre-health majors are advised to include developmental biology (BIOS 30342), one or more courses in infectious diseases or disease mechanisms, biostatistics, and additional relevant electives (neurobiology, tumor cell biology, etc.), and biochemistry (CHEM 40420) as BIOS electives to reach the required 41 credits in biology.

Majors intending to go on for an MD/Ph.D. should include multiple semesters of undergraduate research and/or summer research internships in their overall program.

**Cellular and Subcellular:** This grouping was designed for students considering graduate study in any of the many areas of cellular biology and biochemistry. It is also appropriate for premedical students.

For this grouping, students follow the core curriculum, making choices in Cores III through VI. In the area of Core IV, Physiology, students should consider taking both courses listed. The courses Introduction to Microbiology (BIOS 30401) and Virology (BIOS 40416) are recommended. For electives in biological sciences, a course in Immunology (BIOS 40419), Genomics (BIOS 30423), or Advanced Cell Biology (BIOS 60539) is recommended. Dependent on the credits associated with the choice of courses made in the core, students will generally be required to pick two more electives in biological sciences to complete the requirement of 41 credits.

**Organismal and Community:** This grouping is primarily intended for students planning careers in ecology, environmental biology and related areas and

allows students to develop considerable expertise during their undergraduate years. It may include electives in biological sciences beyond the 41 credits required of the major. Individual interests may be accommodated by judicious choice of biological science courses and of the science elective.

Students interested in this area of biological sciences may wish to take advantage of the University of Notre Dame Environmental Research Center (UNDERC), a University facility which comprises about 7,000 acres, including more than 20 lakes, in the Upper Peninsula of Michigan. Biological research (including whole-ecosystem experiments), graduate studies and undergraduate course work take place at the center. Paid internships are available to support student participation in BIOS 30502 at UNDERC each summer.

In this grouping, students follow the core curriculum, making choices in Cores III through VI. In the area of Core VI, Ecology, students should consider taking both courses listed. Students are encouraged to take Plant Science (BIOS 30325). Also recommended are Vertebrate Biology (BIOS 30404) and/or General Entomology (BIOS 30406) and Animal Behavior (BIOS 30407).

**Microbiology and Infectious Disease:** This grouping is intended for students interested in microorganisms and molecular biology and who are considering graduate study in these areas. It is also appropriate for premedical students. It requires electives in biological sciences beyond the 41 credits required of the major.

Here, students follow the core curriculum, making choices in Cores III through VI. Students should take Principles of Microbiology (BIOS 30401) and the lab BIOS 31401; Virology (BIOS 40416); or Medical and Veterinary Parasitology (BIOS 40415); Immunology (BIOS 40419); Cellular and Molecular Basis of Human Disease (BIOS 40435); and/or AIDS (BIOS 40440).

**Sample Curriculum:** The sample curriculum for the four-year program listed below *is only one of a number of ways* a student can complete all the requirements for a biology major. Students should discuss their specific interests with their departmental advisor and plan their semesters accordingly. Alternative sample curricula can be developed with the assistance of the biology advisor.

**Note that this sample curriculum assumes that no AP or language CE credits are included.**

#### First Year

Fall Semester	
BIOS 10161 (Core Ia: Principles) (Lab #1)	4

Spring Semester	
BIOS Elective	3
BIOS Elective	3
Free Elective	3
Free Elective	3
Elective BIOS Lab #6	-/1
	12/13
TOTAL: 124 minimum	

<sup>1</sup> Students who begin with the CHEM 10181–10182 sequence and select BIOS as their major would complete the four-semester sequence with CHEM 20273–20274.

<sup>2</sup> One of these courses must be a University seminar.

<sup>3</sup> For premedical students, it is strongly recommended that the student take a 20000-level English literature course. This ensures that the student will be able to meet the standard medical-school admission requirement of two English courses. Medical ethics and biochemistry are also generally required.

<sup>4</sup> While not required, many students choose to take a supporting 3-credit non-BIOS science course that counts toward the required 41 credits in their major.

Also, Biostatistics (BIOS 40411/42411) is highly recommended for all students planning on a health-related professional program or a graduate program, especially in ecology, environmental biology, or other field of life science. A non-BIOS/Science elective can be any 30000- 50000-level course other than those required, and approved by the director of undergraduate studies for the Department of Biological Sciences. Biochemistry (e.g., CHEM 40420) is especially recommended.

In addition to the undergraduate curriculum, the Department of Biological Sciences offers programs of graduate study leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

The following undergraduate courses have been offered periodically as demand dictates:

10102. Plants, Food, and Society  
 10105. Parasitism, Disease, and Public Health  
 10111. Biological Basis of Human Behavior  
 10112. The Marine Environment  
 10113. Understanding Viruses  
 10114. Avian Biology  
 10115. Microbes and Man  
 40402. Microbial Physiology  
 30403. Invertebrate Biology  
 30409. Plant Taxonomy  
 40413. Cytology  
 30422. Marine Biology  
 40430. Advanced Animal Physiology  
 40455. Infection and Immunity  
 30460. Plant Ecology  
 40462. Applied Environmental Microbiology  
 40463. Aquatic Botany

### UNDERC FIELD BIOLOGY PROGRAMS

Seven-credit programs for undergraduates that emphasize field biology are offered at the University's Environmental Research Centers (Michigan, Montana, and Puerto Rico). The programs entail course work, group research projects, and an independent research project. Application to the programs occurs in the fall of the sophomore and junior years and enrollment is limited by housing at each location. If selected, students enroll in BIOS 30501 during the spring semester and BIOS 30502 during the summer. To participate in the Montana or Puerto Rico programs, one must first participate in the Michigan program.

### SELECT GRADUATE-LEVEL COURSES

Many 60000-level courses in biological sciences are open to qualified undergraduates, subject to the approval of the course instructors and the director of undergraduate studies. Graduate-level courses generally include a majority of upper-class students and are recommended to undergraduate majors. These include:

60508. Population Genetics  
 60515. Vector Genetics  
 60523. Practicum in Environmental Biology  
 60527. Stream Ecology  
 60529. Population and Disease Ecology  
 60530. Immunobiology of Infectious Diseases  
 60531. Molecular Biology I  
 60532. Molecular Biology II  
 60558. Biological Electron Microscopy  
 60562. Aquatic Insects  
 60570–60579. Topics Courses

Additional undergraduate and graduate-level courses are expected to be added during the next four years.

The above 60000-level courses are described in the *Graduate School Bulletin of Information*.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Biological Sciences](#) heading.

## CHEMISTRY AND BIOCHEMISTRY

## Chemistry and Biochemistry

### Chair:

A. Graham Lappin

### George and Winifred Clark Professor of Chemistry:

Marvin J. Miller

### Emil T. Hofman Professor of Chemistry:

Bradley D. Smith

### Charles L. Huisking Professor of Chemistry:

Xavier Creary

### Kleiderer/Pezold Professor of Biochemistry:

Francis J. Castellino

### Navari Family Professor of Life Sciences:

Shahriar Mobashery

### William K. Warren Professor of Chemistry:

W. Robert Scheidt

### Professors:

Subhash C. Basu; Ian Carmichael; Gregory

V. Hartland; Paul Helquist; Kenneth W.

Henderson; Paul W. Huber; Dennis C. Jacobs;

Prashant V. Kamat; A. Graham Lappin; Joseph

P. Marino; Dan Meisel; Thomas L. Nowak;

Anthony Serianni; Slavi Sevov; Richard E.

Taylor; Olaf G. Wiest

### Associate Professors:

Brian M. Baker; Seth Brown; Patricia L. Clark; J.

Daniel Gezelter; Holly V. Goodson; S. Alexander

Kandel; Marya Lieberman

### Assistant Professors:

Brandon L. Ashfeld; Steven A. Corcelli; Jennifer

DuBois; Masaru Kenneth Kuno; Jeffrey W. Peng

### Emeriti:

Roger K. Bretthauer; Thomas P. Fehlner; Richard

W. Fessenden; Jeremiah P. Freeman; Robert G.

Hayes; Emil T. Hofman; Robert H. Schuler;

J. Kerry Thomas; Anthony M. Trozzolo; Rev.

Joseph L. Walter, C.S.C.

**Program of Studies.** Chemistry is the science of substances that comprise the world about us and is concerned with their structure, their properties and the reactions that change them into other substances. Chemists and biochemists practice their profession in many ways—in educational institutions, government laboratories, private research institutions and foundations and in many commercial areas, including the chemical, drug, health, biotechnology, pharmaceutical and food industries.

The Department of Chemistry and Biochemistry has a strong undergraduate program together with a strong graduate education and research program. The graduate program greatly benefits undergraduate education by attracting highly qualified faculty and results in the availability of excellent research facilities and modern instrumentation necessary to train the scientists of tomorrow. This department is able to provide an excellent program of undergraduate research to complement regular course work. Student participation in research is highly encouraged as a key part of the education of chemistry and biochemistry majors.

The programs in chemistry and biochemistry described in the following pages prepare students for graduate studies and professional work in the chemical and biochemical sciences, as well as in interdisciplinary areas that rely heavily on chemistry. Bachelor of science degrees are offered with a major in chemistry or a major in biochemistry. At the graduate level, the Department of Chemistry and Biochemistry offers programs leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

### BACHELOR OF SCIENCE WITH A MAJOR IN CHEMISTRY

The chemistry curriculum at Notre Dame includes two programs: the Chemistry Career Program, designed for students interested in a professional career in chemistry, and the Chemistry Combination Program, designed for those students who are interested in combining chemistry with business or with computing.

All chemistry majors take the following basic sequence of courses:

General Chemistry (CHEM 10181, 11181 recommended; or optionally, CHEM 10171, 11171)	
Organic Chemistry (CHEM 10182, 11182, 20283, 21283) <sup>1</sup>	
Inorganic Chemistry (CHEM 20284, 21284, 40443, 41443)	
Physical Chemistry (CHEM 30321, 31321, 30322, 31322)	
Analytical Chemistry (CHEM 30333, 31333)	
Physical Methods of Chemistry (CHEM 40434)	
Principles of Biochemistry (CHEM 40420)	
Chemistry Seminars (CHEM 23201, CHEM 23202), three semesters	
Physics (PHYS 10310, 10320) <sup>1</sup>	
Calculus (MATH 10550, 10560, and CHEM 20262)	

In addition to this basic sequence, the following courses are required for each program.

#### Chemistry Career Program

Science Electives (six credit hours)<sup>2</sup>

#### Combination Program

Program Electives (15 credit hours)

Science Electives (three credit hours)<sup>2</sup>

The program electives for the Chemistry Combination Program are from either the area of business or from the area of computing and are the same as those in the corresponding Collegiate Sequence programs:

#### Chemistry with Business

Accounting and Accountancy I (ACCT 20100)

Accounting and Accountancy II (ACCT 20200)

Business Finance (FIN 20100)

Introduction to Management (MGT 20200)

Introduction to Marketing (MARK 20100)

Introduction to Economics (ECON 10010 or 12101) is suggested, as a non-program elective, as a prerequisite to MARK 20100 and meets the University social science requirement.

#### Chemistry with Computing

Each student selects 15 credit hours of computer science and engineering and chemistry courses in consultation with a departmental advisor. Program electives require careful scheduling.

## CHEMISTRY AND BIOCHEMISTRY

## Notes:

1. Substitution with permission only.
2. Undergraduate research, CHEM 48498, is a recommended science elective.
3. The student should take three general requirement courses during the first year, including one course that is designated a University Seminar. Economics is required for the Chemistry with Business program.
4. One course in theology and philosophy should be completed by the end of the sophomore year. These courses may be taken in either semester of the first or second year.
5. In all the programs, one chemistry seminar is generally taken in each of the sophomore, junior and senior years.

**BACHELOR OF SCIENCE WITH A MAJOR IN BIOCHEMISTRY**

The biochemistry curriculum emphasizes the chemical basis of biological processes. All biochemistry majors are required to take the following courses:

- General Chemistry (CHEM 10181 AND 11181 recommended; or optionally CHEM 10171, 11171)
- Organic Chemistry (CHEM 10182, 11182, 20283, 21283)<sup>1</sup>
- Inorganic Chemistry (CHEM 20284, 21284)
- Physical Chemistry (CHEM 30321–30322)
- Analytical Chemistry (CHEM 30333, 31333)
- Chemistry Seminars (CHEM 23201, 23202), three semesters
- Biochemistry Seminar (CHEM 23212)
- Biochemistry (CHEM 30341, 31341, 30342)
- Calculus (MATH 10550, 10560, and CHEM 20262)
- Physics (PHYS 30210–30220 or PHYS 10310, 10320)
- General Biology (BIOS 10161–10162 or 20201, 21201, 20202, 21202)
- Genetics (BIOS 20303, 21303)
- Cell Biology (BIOS 30341, 31341)
- Molecular Biology (BIOS/CHEM 50531)

**Sample Curriculum (Biochemistry Program):****First Year**

12

## Notes:

- <sup>1</sup>Substitution with permission only.
- <sup>2</sup>Linear Algebra/Differential Equations (MATH 20580) is a recommended science elective.
- <sup>3</sup>Undergraduate research, CHEM 48498, is a recommended science elective in all programs beginning in the sophomore year with typically one or two credits per semester.
- <sup>4</sup>The student should take three general requirement courses during the first year, including one course that is designated a University Seminar. Economics is required for the Chemistry with Business program.
- <sup>5</sup>One course in theology and philosophy should be completed by the end of the sophomore year. These courses may be taken in either semester of the first or second year.
- <sup>6</sup>In all the programs, one chemistry seminar is generally taken in each of the sophomore, junior and senior years.
- <sup>7</sup>Note: Program electives in computing require careful scheduling, and some sequences may require more than two years to complete.

**COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Chemistry and Biochemistry](#) heading.

Graduate courses in chemistry are open to qualified advanced undergraduate students, subject to the approval of the departmental advisor. These courses are listed in the *Graduate School Bulletin of Information*.

## ENVIRONMENTAL SCIENCES

## Environmental Sciences

*Director, Associate Professor of Biological Sciences:*  
Paul R. Grimstad

**Program in Environmental Sciences.** The form and function of planet Earth have been changed as a result of the activities of humans. Current concerns, such as environmental pollution and global warming, are the results of complex processes. It is now important for people in all walks of life to be aware of how we interact with the Earth and how environmental changes will affect us in the future.

The environmental sciences major is an interdisciplinary program designed to build sensitivity and breadth in environmental areas. The curriculum is designed to expose students to a scientific view of our environment from biological, chemical and geological perspectives. Particular emphasis is placed on understanding how humans interact chemically and biologically with the environment. Material and energy resource limitations, chemical and thermal pollution, and effects of environmental pollution on public health are major considerations within the environmental sciences curriculum. Emphasis is also placed on understanding interactions between human societies and the environment from social, ethical, economic, anthropological, and governmental points of view. Students are also encouraged to strengthen their mathematical and computational skills and to participate voluntarily in environmentally oriented research projects or summer internships.

**The First Major.** College of Science students who major in Environmental Sciences will earn the degree of bachelor of science. Students following the Environmental Sciences first major program complete a total of 69 credits of science. A second major in Environmental Science is also offered to students in the College of Arts and Letters or in the Mendoza College of Business.

**The Second Major for Arts and Letters and Business:** Most students in the College of Arts and Letters or in the Mendoza College of Business may participate in the Environmental Sciences Program as a second major. Second majors are required to complete a minimum of 37 credits of science. Students considering this program should investigate options brought to a first major by adding course work in environmental sciences. For example, students majoring in government and in environmental sciences could consider postgraduate study or careers in *public policy*. Students majoring in economics and in environmental sciences would have a good background for the developing field of *environmental economics*. A second major in Environmental Sciences also complements majors in the other sociological fields of anthropology, psychology, or sociology. Similarly, business students will likely find environmental sciences to be useful background when working with local or federal governments on issues of *environmental compliance* or when considering the impact of business decisions

on the environment (*environmental assessment*). All students are urged to discuss their long-range career plans with advisors in both majors.

**Relationship with Other Programs:** The Environmental Sciences Major Program has a special collaborative relationship with the Science, Technology, and Values (STV) Concentration program housed in the Reilly Center in O'Shaughnessy Hall. Select courses required of environmental sciences first majors are also cross-listed as STV courses. Thus, students in the STV program from across the university are expected to benefit in the curricular endeavors of the Environmental Sciences Program. Environmental sciences first majors often enroll in the STV program. (Environmental science students with flexibility in their program often have room to complete an STV concentration by taking STV courses beyond those required by the first major or university requirements.) However, arts and letters students with second majors in environmental

science will be encouraged to participate in further interdisciplinary course work through the STV concentration. Second majors are especially encouraged to take the capstone course, SC 40491, Current Topics in Environmental Science, provided it completes that second program.

**Related Options:** A similar bachelor's degree program, Environmental Geosciences (ENVG), is offered by the College of Engineering.

Also available through the College of Engineering is the Environmental Geosciences minor. Note, for students in ES (or SCBU, SCCO, and SCED): the College of Science will allow the course SC/ENVG 20110 to count toward both the science major and this minor. Any courses taken for completion of this minor may not also be counted as science electives or science requirements for a science major.

### SUMMARY OF REQUIREMENTS FOR GRADUATION FOR ENVIRONMENTAL SCIENCES MAJOR

## ENVIRONMENTAL SCIENCES

**BACHELOR OF SCIENCE WITH A MAJOR IN ENVIRONMENTAL SCIENCES**

All environmental sciences first majors take the following courses in science:

Introductory Biology (BIOS 10161–10162 and 11161–11162) or (20201–20202 and 21201–21202)  
 General Chemistry (CHEM 10171 and 10172)  
 Calculus (MATH 10350–10360) or (10550–10560)<sup>1,2,3</sup>  
 Physical Geology (SC 20110/21110)  
 Physics (PHYS 10310–10320 or 30210–30220)  
 Biostatistics (BIOS 40411)<sup>4</sup>  
 Ecology (BIOS 30312 and 31312)<sup>5</sup>  
 Chemistry Elective<sup>6</sup>  
 Current Topics in Environmental Science (SC 40491)

Students also will choose science electives chosen from an approved list,<sup>7</sup> completing a required minimum total of 69 credits in science.

Also required for the major are the following non-science courses:

An ethics course with emphasis on environmental biology or life science issues, i.e., Environmental Ethics or Science, Technology, and Society, or other approved arts and letters courses.<sup>8</sup>

Introduction to Microeconomics (ECON 10010 or 20010)<sup>9,10</sup>

Students are also urged to choose their electives from a recommended list of arts and letters courses.<sup>11</sup>

Requirements for the program are summarized in the table in this section.

**Notes:**

1. *Equivalent or higher-level sequences in science may be substituted, e.g., MATH 10850–10860 for MATH 10350–10360.*

2. *Students interested in the area of ecological modeling are strongly urged to take MATH 10550–10560 for their mathematics requirement. Other mathematics courses should be taken as science electives.*

3. *Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350–10360 or MATH 10550–10560. Students having taken MATH 10250, 10110 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found later in this section of the Bulletin.)*

4. *Students transferring into the ES or ES2 major, or transfer students who have previously taken a statistics course equivalent to MATH 20340, are not required to take BIOS 40411 (Biostatistics). Students will be allowed to substitute MATH 20340, or an equivalent statistics course (e.g., PSY 30100) as ES or ES2 majors in exceptional cases with the permission of the director*

*of their major and the associate dean of the College of Science.*

5. *While General Ecology (BIOS 30312 and BIOS 31312) is normally required for ES and ES2 majors, students may substitute an alternative ecology lecture and laboratory course (e.g., BIOS 30420 Aquatic Ecology) when their career interests indicate the alternative is a more appropriate introductory ecology course as determined by the director of their major and approved by the associate dean of the College of Science.*

6. *The 4-credit chemistry elective requirement is satisfied by either one additional course in organic chemistry (CHEM 20273) or Inorganic Chemistry (CHEM 20243) or by Analytical Chemistry (CHEM 30333, 31333) or by an alternative 4-credit CHEM course as approved by the director of their major and by the associate dean of the College of Science. Students are also allowed to take the 3-credit CHEM 10122 lecture with the understanding that if/when a laboratory is established for that course, they will be required to take that lab prior to graduation.*

7. *The following are examples of many approved science electives for this program:*

Botany (BIOS 30304) or at St. Mary's  
 Evolution (BIOS 30305)  
 The History of Life (BIOS 30310)  
 Genetics (BIOS 20250 or 20303)  
 Principles of Microbiology (BIOS 30401)  
 Animal Behavior (BIOS 30407)  
 Aquatic Ecology (BIOS 30420)  
 Stream Ecology (BIOS 60527)  
 Numerous other BIOS courses as designated by the ES director, including 60000-level graduate courses are accepted.  
 Environmental Chemistry (CHEM 20204)  
 Further chemistry electives (from Note 6 above)  
 Second course in general chemistry (CHEM 20274)  
 Principles of Biochemistry (CHEM 40420)  
 Computer Programming and Problem Solving (MATH 20210)  
 Calculus III (MATH 20550)  
 Introduction to Linear Algebra and Differential Equations (MATH 20580)  
 Differential Equations (MATH 30650)  
 Topics in Computing  
 Historical Geology (SC 20120)  
 Environmental Geosciences (SC 10100 or 20100)  
 Mineralogy and Optical Mineralogy (SC 20220)  
 Environmental Geology (SC 30111)  
 Sedimentation and Stratigraphy (SC 30230)  
 Geochemistry  
 Paleontology (SC 40350)

*Other SC courses as approved by the ES director may be included as they become available. Select courses offered in International Studies Programs (UC-Dublin, UWA-Perth) also may be counted toward the ES science electives as well as select ENVG courses not cross-listed with SC, with permission of the ES director.*

*Students interested in attending graduate school in environmental sciences should consider taking science*

*electives beyond requirements of this major. For example, for admission into some graduate programs, a year of organic chemistry would be a requirement. Deviations from the approved list of science electives must be approved by the advisor for the major.*

8. *For this major, the University requirement of a second philosophy or theology or other University-required course may be fulfilled by one of these courses.*

9. *The economics requirement for this major is fulfilled by taking Introduction to Economics (Microeconomics) either in the first year (ECON 10010) or in the second through fourth years (ECON 20010). Note, the course ECON 13181 (Social Science University Seminar) will not fulfill the economics requirement for this major.*

10. *For this major, the University social science requirement will be fulfilled by the required microeconomics course.*

11. *Numerous STV courses are recommended as electives, including Environment and Environmentalism in History (STV 30175); Self, Society and the Environment (STV 40319) and others as approved by the ES director. The STV courses may be taken either under the STV label or from the primary departmental cross-list.*

*\*Ideally, students who decide to major in environmental sciences before beginning their first year should take BIOS 10161–10162. This will allow for an additional year of relevant science and other electives to be included in their total curriculum. See notes accompanying BIOS 10161–10162 and BIOS 20201–20202 for additional information.*

*\*\* One of these must be a University Seminar (13180–18189).*

## ENVIRONMENTAL SCIENCES AS A SECOND MAJOR

Most students in the College of Arts and Letters or in the Mendoza College of Business may participate in the Environmental Sciences Program as second majors. Students who are considering the environmental sciences second major must have a first major in one of the departments of the College of Arts and Letters or the Mendoza College of Business. Because of the sizable overlap in requirements, students in the College of Arts and Letters who have a second major in preprofessional studies will not be allowed to add this second major program.

The requirements for second majors consist of the following science courses:<sup>12</sup>

General Biology (BIOS 10161, 11161 and 10162, 11162 or BIOS 20201–20202 and 21201, 21201 and 21202, 21202)
Ecology (BIOS 30312, 31312) <sup>5</sup>
Chemistry (CHEM 10171, 10172)
Environmental Chemistry (CHEM 20204) or approved alternative
Geology (SC 20100)
Physics <sup>13</sup>
Biostatistics (BIOS 40411) <sup>14</sup>
Biology or Geology elective (3 or 4 credits) <sup>15</sup>

*The total required course work requires a minimum total of 37 credits in science beyond the University math requirement.*

Note, the same policy applies for Environmental Sciences first and second majors: All College of Science courses specified by the major program must be taken at the University of Notre Dame. (An exception is made for any science courses taken for this major through an approved Notre Dame International Studies Program.)

**Notes** (a continuation from above):

*12. As is the case for science first majors, six credits of the science course work in this program will also be counted toward the student's university science requirement.*

*13. This requirement is satisfied by either one first course in physics (PHYS 10111 or 10310 or 10411 or 30210) or an approved survey course: Concepts of Energy and the Environment (PHYS 10052) or Energy and Society (PHYS 20051) and others as designated.*

*14. Although mathematics course work is not specifically required of this program, several required courses (BIOS 40411 or some of the first courses in physics) do have a prerequisite of one year of calculus (MATH 10350–10360 or equivalent). For all students in the College of Arts and Letters or the Mendoza College of Business, the mathematics sequence MATH 10350–10360 is acceptable for completion of the university mathematics requirement; thus, this sequence is recommended for students considering Environmental Sciences as a second major. Students lacking this mathematics background may have to take further course work in mathematics to meet the prerequisites in mathematics of courses in this program.*

*15. Chosen from approved biology or geology electives listed in note 7 above.*

## Sample Curriculum (Second Majors):

Students should remember that all science major programs require course work that builds upon prerequisites and thus require careful planning. A *sample curriculum* for second majors is given below. *Note: Only the courses for the second major are listed.*

## First Year\*

## First Semester

CHEM 10171. Chemical Principles and Lab	4
---	---

## Second Semester

CHEM 10172. Organic Structures and Lab	4
--	---

## Sophomore Year

**Program of Studies.** Mathematics has had a profound effect upon civilization since ancient times, when the legend originally inscribed on the entrance to Plato's academy was "Let no one ignorant of geometry enter here." It was equally true during the medieval period, when arithmetic and geometry constituted two of the seven subjects considered essential for a liberal education. It has been said that the second most influential book in the span of

Western civilization—after the Bible—is Euclid's *Elements*. Although mathematics is usually associated with science and technology in the modern mind, it seems apparent from the writings of the great mathematicians of the 17th and 18th centuries that religious belief played a great role in their pursuit of mathematics. They saw the "system of the world" obeying mathematical laws and as a consequence felt impelled to study mathematics so as to better appreciate the world's Creator.

Mathematics continues to have a profound influence in our century. From the theory of relativity, with its applications to the study of the large-scale structure of the universe, to the development of the modern computer, with its manifold applications in science, technology and business, mathematics has played a fundamental role. It is surely the most universal of all scientific tools, and the student equipped with a strong mathematical background will be in the enviable position of being able to employ his or her expertise in any area in which rigorous thought and precision of results are mandated.

The department is dedicated to the development of undergraduate studies, to the teaching of mathematics to scientists, engineers and teachers, to graduate education and research, and to the discovery of new mathematics. The entire faculty is involved with undergraduate affairs, and students have the opportunity of associating with scholars of international repute. Mathematics at Notre Dame provides students with a discipline of the mind and a stimulation of the imagination par excellence.

Programs in mathematics prepare students for graduate studies or for professional work in fields in which mathematics plays a dominant role. They provide an excellent preparation for law school, medical school, business school and secondary school teaching. Graduates may enter careers in research institutes or industrial or government positions.

In addition to its undergraduate programs, the department offers programs of graduate study leading to the degree of doctor of philosophy, as described in the Graduate School *Bulletin of Information*.

The department recognizes that, besides those students who wish to pursue a career devoted primarily to mathematical research and teaching, many will wish to take positions in business, industry or government where they will be using their mathematical skills in close collaboration with engineers as well as biological, physical and social scientists. These students will find among the listed programs one well suited to their needs. Besides these programs a student may, in consultation with the director of undergraduate studies and the department chair, create a program especially tailored to his or her career goals.

### BACHELOR OF SCIENCE WITH A MAJOR IN MATHEMATICS

The mathematics curriculum at Notre Dame includes nine course sequences or areas of concentration within the College of Science. These programs are designed to accommodate the academic and professional interests of all mathematics majors. Brief descriptions are given below, and more detailed descriptions of these programs are available on request from the Department of Mathematics.

**College Requirements.** All must take the following College of Science courses: (CHEM 10171, 10172) or (CHEM 10171, 10122); PHYS 10310, 10320; and an additional science elective.

A student who takes two semesters of organic chemistry or two semesters of general biology is only required to take PHYS 30210-30220.

#### Mathematics Honors Program

This program is suited to students who are interested in graduate work in one of the mathematical sciences and to those whose career plans require a strong background in modern mathematics.

Honors Calculus I (MATH 10850)  
 Honors Calculus II (MATH 10860)  
 Honors Calculus III (MATH 20850)  
 Honors Calculus IV (MATH 20860)  
 Honors Algebra I (MATH 20810)  
 Honors Algebra II (MATH 20820)  
 Honors Algebra III (MATH 30810)  
 Honors Algebra IV (MATH 30820)  
 Honors Analysis I (MATH 30850)  
 Honors Analysis II (MATH 30860)  
 Electives (12 credit hours with six at the 40000 level)  
**Mathematics Courses for the Other Programs**  
 All other mathematics programs (except the computing program) require the following mathematics core courses:

Calculus I (MATH 10550)  
 Calculus II (MATH 10560)  
 Calculus III (MATH 20550)  
 Ordinary Differential Equations (MATH 20750)  
 Linear Algebra (MATH 20610)  
 Introduction to Math Reasoning (MATH 20630)  
 Algebra (MATH 30710)  
 Real Analysis (MATH 30750)  
 Computer Programming (MATH 20210)  
 In addition to this basic sequence, the following courses are required for each program:

#### Mathematics Career Program

This program is designed to give students a general background in mathematics. In addition to the basic sequence of courses listed above, 12 hours of mathematics electives are required, at least three of which are at the 40000 level.

#### Applied Mathematics Program

This program is designed for students interested in the broader area of applied mathematics. In addition to taking the core mathematics courses, the student

## MATHEMATICS

is required to take 15 credits from the following list of courses, six credits of which must be at the 40000 level: MATH 30210, MATH 30390, MATH 30530, MATH 30540; MATH 40210, MATH 40390, MATH 40480, MATH 40730, MATH 40750, and MATH 40710.

### Mathematics and Life Sciences Program

This program is designed for mathematics majors who are interested in life-science-oriented careers.

The following mathematics courses are required in addition to the basic sequence of courses listed above:

Introduction to Probability (MATH 30530)  
Mathematical Statistics (MATH 30540)  
Elective in Mathematics (three credit hours at the 40000 level)

The following College of Science courses are required:

Chemistry (CHEM 10171, 10172, 20273, 20274)  
General Biology (BIOS 20201, 21201; 20202, 21202)  
Genetics (BIOS 20303, 21303)

### Mathematics and Computing Program

This program is designed for students who plan to pursue graduate study or industrial careers in computing science. All of the mathematics core courses listed above except MATH 20210 are required, as well as 15 hours of mathematics electives, at least three hours of which are at the 40000 level.

In addition, the student must complete one of the following sequences of computing courses:

Software design option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 30246, fourth elective  
Theory option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 30151, CSE 40113  
Theory and compilers option: CSE 20211, CSE 20212, CSE 20110, CSE 30331, CSE 301351, CSE 40243  
Computer architecture option: CSE 20211, CSE 20212, CSE 20221, CSE 30321, CSE 30322, fourth elective

### Mathematics Education Program

This program is designed for students who plan a career in secondary education. The following mathematics courses are required in addition to the basic sequence listed above:

Introduction to Probability (MATH 30530)  
Mathematical Statistics (MATH 30540)  
Elective in Geometry (three credit hours)  
Elective in Mathematics (three credit hours)  
(One of these classes must be at the 40000 level)

The following education courses are to be taken at Saint Mary's College: EDUC 201, 220, 340, 350, 356, 404, 451, and 475.

### Mathematics and Business Administration Program

This program is designed to prepare students for a career in business or in the actuarial profession.

The following mathematics courses are required in addition to the basic sequence:

Introduction to Probability (MATH 30530)  
Mathematical Statistics (MATH 30540)  
Introduction to Operations Research (MATH 30210)  
Elective in Mathematics (three credits at the 40000 level)  
Also required are ECON 20010 or its equivalent and the following courses from the College of Business: ACCT 20100, FIN 20100, MARK 20100, MGT 20200, and one course from the following list: ACCT 20200, FIN 30210, FIN 30220, FIN 30600, MGT 30610, MGT 40750, MARK 30110.

### Mathematics and Engineering Science Program

This program is designed for students interested in applied or industrial mathematics. In addition to the mathematics core courses, the student is required to take one of MATH 40480, MATH 40390 or MATH 40750, and nine more credits of mathematics electives. The student must also complete one of the following two sequences of engineering classes:

Thermal option: AME 20221, AME 20222, AME 30031, AME 20231, AME 30334  
Structures and design option: AME 20221, CE 20170, AME 20231, CE 30200, CE 30356

### Mathematics and Social Science Program

This program is designed for students planning graduate school or a career in one of the social sciences with a strong mathematics and statistics background. In addition to the basic sequence, the following mathematics courses are required:

Introduction to Probability (MATH 30530)  
Mathematical Statistics (MATH 30540)  
Introduction to Operations Research (MATH 30210)

Elective in Mathematics (three credits at the 40000-level)

Moreover, the student must elect introductory courses in three of the social sciences, SOC 30902 and two courses at the 30000 or 40000 level in one of the social sciences.

### Mathematics as a Second Major

Students in the Mendoza College of Business or the College of Arts and Letters may pursue a second major in mathematics by completing all mathematics courses required for the career mathematics concentration. See the list below. To list mathematics as a second major on the transcript, the student must satisfy all of the requirements for a major in some department of the Mendoza College of Business or the College of Arts and Letters.

MATH 10550–10560–20550. Calculus I-III	11.5
MATH 20750. Ordinary Differential Equations	3.5
MATH 20210. Computer Programming and Problem Solving	3
MATH 20610. Linear Algebra	3
MATH 20630. Introduction to Abstract Math	3
MATH 30710. Algebra	3
MATH 30750. Real Analysis	3
Mathematics Electives	9*
Mathematics Elective at the 40000 Level	3*

42 credits

*\* Students majoring in finance and business economics may reduce the number of mathematics electives to nine credits total by taking the following courses: MATH 30530, MATH 30540, and MATH 60850.*

### Sample Curriculum

#### (Mathematics Career Program):

<sup>1</sup> The student should take three general requirement courses during the first year, including one course that is designated a University Seminar. It is recommended that one course in history or social science be taken in the first year and one philosophy and one theology course be taken by the end of the sophomore year.

## The Senior Thesis for Mathematics Majors

Students in the mathematics program have the option of writing a thesis on a subject in mathematics, or in an interdisciplinary area connected to mathematics. Such a thesis is strongly encouraged for math honors students and required of students in the SUMR program. This project is intended to give the student a better sense of how mathematics is done and used, and to develop in the student the habit of learning mathematics and its applications in an independent setting. In most cases, this work would be expected to be expository, but based on advanced-level readings. It should represent an effort that goes beyond what is found in an undergraduate course. It is especially desirable for a student to present a somewhat novel approach to an established subject, or to explore one of the many interesting connections that mathematics has with other disciplines.

During the second semester of the junior year and the first semester of the senior year, the student will work closely with a faculty advisor on a program of readings in preparation for the thesis, receiving 1 credit for each of these two semesters of work, under MATH 48800.

The thesis is to be crafted during the second semester of the senior year. The thesis must be submitted to the director of undergraduate studies by April 15 of the senior year. If the thesis is approved, the student will receive 1 credit under MATH 48900 and the

citation of "Graduation with Senior Thesis" will appear on the transcript.

Students interested in writing a senior thesis should contact the director of undergraduate studies in the Department of Mathematics.

## COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Mathematics](#) heading.

Certain graduate courses in mathematics are open to qualified advanced undergraduates, subject to the approval of the director of undergraduate studies. Other graduate courses are described in the *Graduate School Bulletin of Information*.

## Physics

## Chair:

Mitchell R. Wayne

## Director of Graduate Studies:

Kathie E. Newman

## Director of Undergraduate Studies:

Christopher F. Kolda

## Frank M. Freimann Professor of Physics:

Michael C.F. Wiescher

## Aurora and Tom Marquez Professor of Physics:

Jacek K. Furdyna

## Grace-Rupley II Professor of Physics:

Ikaros I. Bigi

## Professors:

Mark Alber; Ani Aprahamian; Gerald B. Arnold; H. Gordon Berry; Howard A. Blackstead; Samir K. Bose (emeritus); Cornelius P. Browne (emeritus); Bruce A. Bunker; Neal M. Cason (emeritus); Paul R. Chagnon (emeritus); Sperry E. Darden (emeritus); Margaret Dobrowolska-Furdyna; Stefan G. Frauendorf; Emerson G. Funk (emeritus); Umesh Garg; Anthony K. Hyder; Boldizsar Jankó; Walter R. Johnson (emeritus); Gerald L. Jones (emeritus); V. Paul Kenney (emeritus); James J. Kolata; A. Eugene Livingston; John M. LoSecco; Eugene R. Marshalek (emeritus); Grant Mathews; William D. McClinn (emeritus); James Merz; John W. Mihelich (emeritus); Kathie E. Newman; John A. Poirier (emeritus); Terrence W. Rettig; Randal C. Ruchti; Steven T. Ruggiero; Jonathan R. Sapirstein; William D. Shephard (emeritus); Carol E. Tanner; Walter J. Tomasch (emeritus); Mitchell R. Wayne

## Associate Professors:

Dinshaw Balsara; Peter M. Garnavich; Michael D. Hildreth; Colin Jessop; Christopher F. Kolda; Paul E. Shanley (emeritus); Zoltan Toroczka

## Assistant Professors:

Mark A. Caprio; Philippe Collon; Antonio Delgado; Morten Eskildsen; J. Christopher Howk; Xiaodong Tang

**Program of Studies.** Physics is the study and description of the structure and behavior of the physical universe. As such, it is fundamental to all physical sciences, pure and applied. A knowledge of physics is basic to an understanding of astronomy, chemistry, geology and even biology in that physics contributes to the interpretation and detailed description of many of the natural phenomena which constitute the proper subjects of investigation in these sciences.

In addition to the undergraduate curricula, the Department of Physics offers programs for graduate study leading to the degrees of master of science and doctor of philosophy, as described in the *Graduate School Bulletin of Information*.

## PHYSICS

**BACHELOR OF SCIENCE WITH A MAJOR IN PHYSICS**

Science undergraduates may choose from three different majors within the Department of Physics: **physics**, **physics-in-medicine**, and **physics education**. The course sequences in these three programs are designed to accommodate the academic and professional interests of the majority of physics majors.

The basic **physics** major is a particularly flexible option for students, and is the one that will be chosen by the majority of undergraduates majoring in the department. Students following the physics major program will gain a broad understanding of physics. Depth is gained through the addition of one or more supplemental concentration programs offered through the department. Two of these concentration programs, **advanced physics** and **astrophysics**, help to prepare the student for graduate work in physics and astronomy or astrophysics. The **computing** concentration prepares the student for professions requiring working knowledge of various computer languages and experience using current computer technology. Students with interests in other areas have time to explore second-major, minor, or concentration options offered through departments in the College of Arts and Letters. The department expects to develop more concentration options as needed; students with alternative interests are encouraged to discuss these with the director of undergraduate studies.

The **physics-in-medicine** major is designed for those students planning to attend medical school after completion of their degree, or who intend to work or study in the fields of biophysics or biomedical technology. The degree contains a core set of requirements in physics, augmented with courses in organic chemistry, biochemistry, biology, and biophysics.

The **physics education** major is primarily intended for students wishing to pursue careers in secondary science education, and combines courses in physics with other general sciences, as well as education courses and student teaching through the Education Department at Saint Mary's College.

No supplemental concentration is required of **physics** majors, but interested students are allowed and encouraged to follow as many concentrations as their schedules and interests allow. Students following either the **physics-in-medicine** or **physics education** major programs are not allowed to add concentrations; their major programs are designed to accommodate the special interests of students intending careers in medicine, medical technology, or high school teaching.

**Physics as a second major** is an option for students in the colleges of engineering, arts and letters, or business.

**Requirements for the Physics Major**

A total of 60.5 credits in science and mathematics is required for the **physics** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 10411<sup>1</sup>, 10424, 20435<sup>2</sup>)  
Intro to Chemical Principles (CHEM 10171<sup>3</sup>) and General Chemistry Biological Processes (CHEM 10122<sup>3</sup>)  
Calculus I, II, III (MATH 10550,<sup>4</sup> 10560,<sup>4</sup> 20550<sup>4</sup>)  
Sophomore Seminar (PHYS 23411)  
Mathematical Methods in Physics I, II (PHYS 20451, 20452)  
Intermediate Mechanics (PHYS 20454)  
Electricity and Magnetism (PHYS 30471)  
Modern Physics I (PHYS 20464)  
Topics in Modern Physics II (PHYS 30465)  
Modern Physics I Laboratory (PHYS 40441) or 40000-level Math elective  
Thermal Physics (PHYS 30461)  
Quantum Mechanics I (PHYS 40454)

Physics majors may add as many of the following concentrations as their interests and schedules allow. Completion of these concentrations is indicated on the student's final transcript.

**Concentration in Advanced Physics**

The following outlines the course requirements (totaling 14 credits) for the **advanced physics** concentration:

Junior Seminar (PHYS 33411)  
Electromagnetic Waves (PHYS 30472)  
Quantum Mechanics II (PHYS 40544)  
Senior Seminar (PHYS 43411)  
Modern Physics II Laboratory (PHYS 40442) or 40000-level math elective  
Physics Elective<sup>5</sup>

**Concentration in Astrophysics**

The following outlines the course requirements (totaling 14 credits) for the **astrophysics** concentration:

Junior Seminar (PHYS 33411)  
Intro. Astronomy and Astrophysics M (PHYS 20481)  
Modern Observational Techniques (PHYS 30481)  
Senior Seminar (PHYS 43411)  
Astrophysics (PHYS 50445)  
Relativity: Special and General (PHYS 50472)

**Concentration in Computing**

The requirements are that the student completes 14-15 credits of computer science engineering courses, chosen with the aid of the Director of Undergraduate Studies.

**Requirements for the Physics-in-Medicine Major**

A total of 77.5 credits in science and mathematics is required for the **physics-in-medicine** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 10411<sup>1</sup>, 10424, 20435<sup>2</sup>)

General Chemistry I-IV (CHEM 10171, 10172, 20273, 21273, 20274, 21274)<sup>13</sup>  
Calculus I, II, III (MATH 10550<sup>4</sup>, 10560<sup>4</sup>, 20550<sup>4</sup>)  
Sophomore Seminar (PHYS 23411)  
Mathematical Methods in Physics I, II (PHYS 20451, 20452)  
Intermediate Mechanics (PHYS 20454)  
Electricity and Magnetism (PHYS 30471)  
Modern Physics I (PHYS 20464)  
Topics in Modern Physics II (PHYS 30465)  
General Biology A, B (BIOS 20201<sup>6</sup>, 21201, 20202<sup>6</sup>, 21202)  
Three science electives (9 credits total)<sup>7</sup>

**Requirements for the Physics Education Major**

A total of 61.5 credits in science and mathematics and 27 credits in education are required for the **physics education** major. The following outlines the course requirements:

General Physics A-M, B-M, C-M (PHYS 10411<sup>1</sup>, 10424, 20435<sup>2</sup>)  
Intro to Chemical Principles (CHEM 10171<sup>3</sup>) and (General Chemistry Biological Processes (CHEM 10122<sup>3</sup>) or Organic Structures and Reactivity (CHEM 10172))  
Calculus I, II, III (MATH 10550<sup>4</sup>, 10560<sup>4</sup>, 20550<sup>4</sup>)  
Mathematical Methods in Physics I, II (PHYS 20451, 20452)  
Intro Astronomy & Astrophysics M (PHYS 20481)  
Intermediate Mechanics (PHYS 20454)  
Electricity and Magnetism (PHYS 30471)  
Modern Physics I (PHYS 20464)  
Topics in Modern Physics II (PHYS 30465)  
Advanced physics laboratory<sup>8</sup>  
Science elective (4 credits)<sup>9</sup>  
Teaching in a Multicultural Society (EDUC 201F)<sup>10</sup>  
Applied Media and Instructional Technology (EDUC 220)  
Curriculum and Assessment in the High School Setting (EDUC 345)  
Instructional Strategies and Classroom Management in the High School Setting (EDUC 346)  
Educational Psychology: Human Growth and the Development of the Adolescent (EDUC 350)  
Educational Psychology: Educating Exceptional Learners (EDUC 356)  
Teaching Science in the Middle School and High School (EDUC 475)

**Requirements for Physics as a Second Major**

The requirements for physics as a second major, for students in the colleges of engineering, arts and letters or business, consists of the physics and mathematics courses listed above for the **physics** major, except the chemistry sequence. To list physics as a second major on the transcript, the student must satisfy all of the requirements for a major in some department and college of the university.

## PREPROFESSIONAL STUDIES

5. Options include PHYS 20421 (*Scientific Programming*), PHYS 20481 (*Introduction to Astronomy and Astrophysics*), PHYS 30481 (*Modern Observational Techniques*), PHYS 30405 (*Numerical Methods*), PHYS 30432 (*Lasers and Modern Optics*), PHYS 48480 (*Undergraduate Research: The student must take at least 3 credits in research with one advisor and the credits taken must be distributed over at least two semesters*), PHYS 50445 (*Astrophysics*), PHYS 50472 (*Relativity: Special and General*), MATH 40480 (*Complex Variables*). *Physics electives cannot be double counted with requirements for the Astrophysics concentration.*

6. BIOS 10161, 11161, 10162, 11162 may substitute for BIOS 20201, 21201, 20202, 21202.

7. Students take three from the following: CHEM 40420 (*Principles of Biochemistry*), BIOS 20303 (*Fundamentals of Genetics*), BIOS 30344 (*Vertebrate Physiology*), BIOS 30341 (*Cellular Biology*), PHYS 40371 (*Medical Physics*), PHYS 40432 (*Biological Physics*).

8. Students choose one course from PHYS 30432, 31432 (*Lasers and Modern Optics*), PHYS 30481 (*Modern Observational Techniques*), and PHYS 40441, 41441 (*Modern Physics I Laboratory*).

9. The 4-credit science elective is a biology or geology course which includes a laboratory. Allowed choices include BIOS 20201, 21201 (*General Biology A and its lab*) or SC 20110, 21110 (*Physical Geology and its lab*). See the Director of Undergraduate Studies to discuss alternative choices.

10. All Education courses are taken through the co-exchange agreement with Saint Mary's College.

11. One of these courses must be a University Seminar.

12. PHYS 20481 (*Introduction to Astronomy and Astrophysics*) is offered in the fall of even years; PHYS 30481 (*Modern Observational Techniques*) is offered in the fall of odd years.

13. Alternatives for CHEM 10171–10172 and 20273–20274 are CHEM 10181–10182 and CHEM 20283–20284.

### COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Department of Physics](#) heading.

## Preprofessional Studies

*Chair and Assistant Dean:*

Rev. James K. Foster, C.S.C., M.D.

*Associate Dean:*

Sr. Kathleen Cannon, O.P.

*Assistant Dean:*

Kathleen J.S. Kolberg, Ph.D.

**Program of Studies.** The Department of Preprofessional Studies offers several programs in the two major sequences, namely the program sequence in premedical science studies and the programs in the Collegiate Sequence.

All of the programs are quite flexible and allow the student to design a curriculum, in consultation with the chair or the associate dean in the College of Science, to enable the student to enter the profession best suited for his or her talents. The program in premedical science studies enables the student to obtain an excellent preparation to enter any of the professions of medicine, dentistry or the other ancillary fields of the healing professions. The interdisciplinary programs of the collegiate sequence have been designed to offer significant flexibility to prepare students for the professions of science-education, science-business, and science-computing. All of the programs allow for a strong science background while also allowing a diverse background in the arts and humanities for individuals with a desire to obtain a broad educational background.

The major goal of this department is to provide an education in the best of liberal traditions of scientific thought and analysis, which the student can utilize for career opportunities in a variety of fields.

The program sequence in premedical science studies is a special program within the Department of Preprofessional Studies for students preparing to enter the professions of medicine, dentistry, osteopathy, veterinary medicine, podiatry, optometry, or other allied-health professions.

Notre Dame has been recognized as an accredited institution for premedical studies for more than 100 years. A proper selection of courses leading to the degree of bachelor of science will qualify the student for admission to any medical or dental school. The year before his or her expected entrance to medical school, the student takes the Medical College Admission Test or Dental Admission Test. Students taking this test should have completed the basic courses in chemistry, biology and physics. The curricula leading to the degree of bachelor of science in other departments in the College of Science also satisfy the requirements for admission to medical or dental school.

Information concerning the requirements for admission to schools of medicine, dentistry, osteopathy, veterinary medicine, optometry and podiatry, as well as information on several ancillary health careers, is available from the new office in the Center for Health Science Advising, 219 Jordan Hall of Science.

## BACHELOR OF SCIENCE WITH A MAJOR IN PREPROFESSIONAL STUDIES

	<hr/>
	13

\* One of these courses must be a University Seminar; the literature University Seminar in English 13186 is recommended (see note 6).

\*\* See note 3.

## Notes:

1. Most of the course instruction in the curricula of the Department of Preprofessional Studies is provided by other departments in the College of Science and other colleges of the University.

2. The elective courses in the senior year may include a thesis based on laboratory work performed in a registered course in a given department with the approval of the head of that department, who will specify the number of credits assigned to the thesis.

\*\* 3. The choice by the student of elective courses in science for the program in preprofessional studies will be based upon the requirements of the professional schools and upon the lists of courses suggested or recommended by those schools in which the student is interested; the choice will be based also upon the advice and counseling of the chair of the department. From the Medical and Dental School Requirements Books, the following courses would be the most highly recommended in addition to the five basic science courses, giving the student applicant the best science background to be a most attractive candidate to any school to which he or she wishes to apply: biochemistry, genetics, physiology, cell biology, developmental biology, and microbiology. Additional courses in higher mathematics, statistics and computer science are recommended for qualified students. Students not only must fulfill their requirements but, in the case of the sciences (mathematics, chemistry, biology and physics), also are strongly encouraged to follow the sequence of courses as listed. This sequence is designed in the light of health-related professional school requirements so that one course builds on knowledge gained from a prior course, even one from a different department; it is also structured to maintain a rigorous course load of at least two such courses per semester, with some adjustment possible in the senior year. Summer sessions, transfer credits and other modification in the regular curriculum should not be allowed to disturb this sequence of courses in the sciences without good reason.

4. For the selection of non-science electives for the programs, students should know that medicine and the other healing professions need individuals with a diversity of educational backgrounds and a wide variety of talents and interests. All of these schools recognize the desirability of a broad education—a good foundation in the sciences (mathematics, chemistry, biology and physics), highly developed communication skills and a solid background in the social sciences and humanities.

5. Recommendation 1 of the recent Report of the Association of American Medical Colleges titled "Physicians for the 21st Century" encourages a broadening of preparation. The department continues to encourage students to follow that recommendation by using the requirements of history and social science, English and the general elective credits "to be an informed participant in contemporary society by understanding its politics, history and economics. To appreciate the many dimensions of human experience requires informed reflection upon the literature, the philosophy and the arts... of all people in our society."

6. To fulfill the medical school requirements of two semesters of English, students are required to take FYC 32000-level composition and one literature course taught in English. The literature course can be either a literature University Seminar in English 13186 or an upper-level literature course offered by the English Department and approved by the Department of Preprofessional Studies. Thus, if a student's University Seminar requirement is met by one of the literature options (in English), then the student will not be required to take upper-level English literature. Note, for this major only, a course in fine arts is not acceptable for the University literature/fine arts requirement. (A fine arts course will count as a general elective.)

7. In the curriculum for the program, there are listed the several courses required for the degree, including one semester each of history and social science, a course in literature, two courses in philosophy and two courses in theology. Students should remember that none of the required courses can be taken as a pass-fail option.

8. Students who have completed only six hours of mathematics in the first year of studies may transfer into the program but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360, or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. Those students should see also the discussion on degree credit found later in this section of the Bulletin.

9. PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–31210.

10. Undergraduate Research (BIOS 48498 or SC 48100), Teaching Practicum (BIOS 37495), and Directed Readings (BIOS 48497) count toward the 64-hour preprofessional studies major science requirement; however, a maximum of two credits per semester and a combined total of six credit hours may be counted in fulfilling the 64-credit-hour science requirement as well as the maximum credit hours counted toward graduation. Directed Readings (SCPP 46397) counts as general elective credit.

11. All students are welcome to join the Preprofessional, Premedical or Predental Societies. In addition, premedical students are encouraged to join AMSA, the American Medical Student Association.

12. All students who have had previous exposure to language will be required to take a placement examination in that language for placement in the proper course if the student wishes to continue in that language for the college requirement. If a student wishes to take a new language, of course, he or she must start from the beginning.

13. Interested parties may obtain additional information including various statistics from the department Web page. See [preprofessional.nd.edu](http://preprofessional.nd.edu).

## Summary of Requirements for the Degree of Bachelor of Science in Preprofessional Studies

	Credits
Biological Sciences	8
Chemistry	16
Mathematics	8
Physics	8
FYC 13000 level	3
Language, Intermediate-level Competency	**11
Philosophy*	6
Theology*	6
History*	3
Social Science*	3
Literature (University Seminar 13186 or upper-level English literature; see note 6)	3

General Electives	**25
	<hr/>
	124

\* One of these courses must be a University Seminar.

\*\* Assumes Intermediate-level Competency in Language was achieved by taking two four-credit and one three-credit courses.

## COURSE DESCRIPTIONS

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Preprofessional Studies](#) heading.

## PREPROFESSIONAL STUDIES

## COLLEGIATE SEQUENCE PROGRAMS

The three collegiate sequence programs, science-business, science-computing, and science-education, were instituted in 1987. These three programs allow students to obtain a strong science background while simultaneously preparing them for professions in health care, business, computing or education.

## SCIENCE-BUSINESS COLLEGIATE SEQUENCE

The Science-Business Collegiate Sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates courses from the basic areas of business along with the four basic areas of science. This approach enables students to attain a diversified background to enter an M.B.A. program, leading to a position primarily in the scientific or health professions business areas. It is also a complete and sufficient program to enable the B.S. graduate of the sequence to enter the scientific business market immediately upon graduation.

Information on the areas of public health and hospital administration, as well as the business needs of the pharmaceutical, biological and chemical industries are available in the office of the Department of Health Professions, 219 Jordan Hall of Science.

The other departments in the College of Science as well as the colleges of arts and letters and business administration provide all course instruction in the curricula of the Science-Business Collegiate Sequence.

## BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-BUSINESS

All science-business majors take the following basic sequence of science courses:

General Biology (BIOS 20201–20202 and 21201 and 21202)<sup>1</sup>  
 CHEM 10171, 10172, 20273, and (CHEM 20274 or SC 20110)  
 Calculus (MATH 10350–10360 or 10550–10560)<sup>1,2</sup>  
 Physics (PHYS 30210–30220)<sup>3</sup>  
 Statistics (MATH 20340 or BIOS 40411)

They also are required to take 20–21 credits of science electives,<sup>4</sup> completing a minimum of 64 credits of science courses.

Also required for the major are the following business and economics courses:

Introduction to Economics (ECON 10010 or 20010)<sup>5,6</sup>  
 Accounting and Accountancy I (ACCT 20100)  
 Business Finance (FIN 20100)  
 Introduction to Management (MGT 20200)  
 Introduction to Marketing (MARK 20100)  
 One business elective

Requirements for the program are summarized in the table on the following page.

## Notes:

1. *Equivalent or higher-level sequences in science may be substituted, e.g., BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.*

2. *Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250, (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit, found later in this section of the Bulletin.)*

3. *PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.*

4. *The choice by the student of the elective courses in science for the program will be discussed with the student and will be based on the future industrial or health professions business interests of the student. Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as “Recommended University electives”) and that are not being used to fulfill other specific graduation requirements can be used to satisfy the “Science Elective” requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits per semester (six total) for science credit and three credits per semester (nine total) for graduation credit of courses such as Undergraduate Research or Directed Readings.*

5. *The economics requirement for this major is fulfilled by taking Principles of Microeconomics either in the first year (ECON 10010) or in the sophomore year (ECON 20010). Note: The course ECON 13181 (Social Science University Seminar) will not fulfill the economics requirement for this major.*

6. *For this major, the University social science requirement will be fulfilled by the required economics course. Additional social science courses are recommended and will count toward the student’s general electives.*

## Suggested Curriculum for the Degree of Bachelor of Science in the Science-Business Collegiate Sequence (124 semester hour credits: 64 science hour credits, minimum)

## First Year

<i>First Semester</i>	
CHEM 10171	4

## PREPROFESSIONAL STUDIES

## SCIENCE-COMPUTING COLLEGIATE SEQUENCE

The science-computing collegiate sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates courses from the four basic areas of science along with a sequence of computing courses. The program will give the student working knowledge of various computer languages and experience using current computer technology. By choosing science electives appropriately, the student has the option of focusing in an area in science of particular interest. Graduates of this program earn a B.S. degree and are able to enter the scientific computing job market immediately upon graduation.

The other departments in the College of Science as well as the colleges of arts and letters and engineering provide all course instruction in the curricula of the Science-Computing Collegiate Sequence.

## BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-COMPUTING

All science-computing majors take the following basic sequence of science courses:

General Biology (BIOS 20201–20202 and 21201 and 21202)<sup>1</sup>  
 CHEM 10171 AND 10172 AND [CHEM 20273, CHEM 20274] OR (CHEM 20273, ENVG 20110) OR (ENVG 20110, ENVG 20120)<sup>1,2</sup>  
 Calculus (MATH 10350–10360 or 10550–10560)<sup>1,2</sup>  
 Physics (PHYS 30210–30220 and 31210–31220)<sup>3</sup>  
 Statistics (MATH 20340 or BIOS 40411)

They also are required to take 20–21 credits of science elective,<sup>4</sup> completing a minimum of 64 credits of science courses.

Please see advisor for information on possible sequences in computing.

Requirements for the program are summarized in the table on the following page.

## Notes:

1. Equivalent or higher-level sequences in science may be substituted, e.g., BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.

2. Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 103600 or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found later in this section of the Bulletin.)

3. PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.

4. The choice by the student of the elective courses in science for the Science-computing program will be based on the student's scientific interest as developed during his or her studies of the four basic areas of science. Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as "Recommended University electives") and that are not being used to fulfill other specific graduation requirements can be used to satisfy the "Science Elective" requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits of courses such as Undergraduate Research or Directed Readings in the science elective total.

Suggested Curriculum for the Degree of Bachelor of Science in the Science-Computing Collegiate Sequence (124 semester hour credits: 64 science hour credits, minimum)

## SCIENCE-EDUCATION COLLEGIATE SEQUENCE

The science-education collegiate sequence in the Department of Preprofessional Studies is an individualized course of study which incorporates many courses from the four basic areas of science along with education courses that most states require to give the student the background necessary to receive a certificate to teach in a secondary education system. Information concerning the requirements for secondary education in the various states, as well as the general course requirements for a certificate necessary to teach science in a secondary education

program, is available in the College of Science office, 174 Hurley Hall.

The other departments in the College of Science and the other colleges of the University, as well as the Education Department at Saint Mary's College, provide all course instruction in the curricula of the Science-Education Collegiate Sequence.

## BACHELOR OF SCIENCE WITH A MAJOR IN SCIENCE-EDUCATION

All science-education majors take the following basic sequence of science courses:

General Biology (BIOS 20201–20202 and 21201 and 21202)<sup>1</sup>

CHEM 10171, 10172, and [(CHEM 20273, CHEM 20274) or (CHEM 20273, ENVG 20110) or (ENVG 20110, ENVG 20120)]

Calculus (MATH 10350–10360 or 10550–10560)<sup>1,2</sup>

Physics (PHYS 30210–30220)<sup>3</sup>

They also are required to take 20 credits of science electives,<sup>4,5</sup> completing a minimum of 60 credits of science courses.

Also required for the major are the following education courses taught by Saint Mary's College:

EDUC 201 Teaching in a Multicultural Society

EDUC 220 Applied Media and Instructional Technology

EDUC 345 Curriculum and Assessment in the High School Setting

EDUC 346 Instructional Strategies and Classroom Management in the High School Setting

EDUC 350 Educational Psychology: Human Growth and Development of the Adolescent

EDUC 356 Educational Psychology: Educating Exceptional Learners

EDUC 449 Teaching Science in the Secondary School

EDUC 475 Student Teaching in the Secondary School (spring of senior year)

The education courses are those required in the State of Indiana but are also those that are required most often by the educational accrediting agencies of most states. The practical teaching experience which is required will also be arranged through the Education Department at Saint Mary's College.

Requirements for the program are summarized in the table found two pages back.

## Notes:

1. *Equivalent or higher-level sequences in science may be substituted, e.g., BIOS 10161–10162 for BIOS 20201–20202 or MATH 10850–10860 for MATH 10550–10560.*

2. *Students who have completed only six hours of mathematics in their first year may transfer into the program, but they will be required to complete a mathematics sequence equivalent to MATH 10350, 10360 or MATH 10550, 10560. Students having taken MATH 10250 (or 10260 or 10270) may do this by taking MATH 10360, while those who have taken*

*only one semester of lower-level calculus should take both MATH 10350, 10360. (See also the discussion on science degree credit found in this section.)*

3. *PHYS 10310–10320 or PHYS 10411, 20435 may be substituted for PHYS 30210–30220.*

4. *The choice by the student of the elective courses in science for the Science-education program will be based upon the requirements and list of courses suggested by the various state educational systems. Since the timing of the course work is particularly constrained for this major, the student should work closely with his or her advisors: an associate dean in the College of Science and an assigned advisor in the Education Department at Saint Mary's College.*

5. *Any major-level College of Science courses (i.e., those taken to meet science-major requirements and not those designated as "Recommended University electives") and that are not being used to fulfill other specific graduation requirements can be used to satisfy the "Science Elective" requirement. Major-level geology courses cross-listed as science courses may be taken as science electives. Students are restricted to no more than two credits of courses such as Undergraduate Research or Directed Readings in the science elective total.*

## Special Programs

### DOUBLE MAJORS IN SCIENCE

In certain instances, students have the option of pursuing majors in two departments in the College of Science. Combinations that are normally approved include: Biological Sciences with Chemistry, Biological Sciences with Mathematics, Biological Sciences with Physics, Biochemistry with Mathematics, Biochemistry with Physics, Chemistry with Mathematics, Chemistry with Physics, Environmental Sciences (first major) with Mathematics, and Mathematics with Physics. Examples of combinations that are normally forbidden include: Preprofessional Studies and any of the Collegiate Sequence majors with one another or with any other science major, parallel subprograms such as Mathematics and Life Sciences with Physics-in-Medicine and either of those with Biological Sciences or Biochemistry. All requirements of each major must be met, with no exceptions. Failing to complete a required course terminates that major for a student. Every student who wishes to major in two departments in the College of Science must prepare an agenda of specific courses to be taken, which both advisors and the dean must approve. This should be done as early as possible, but absolutely no later than the seventh day of the senior year. In certain instances, a student may possibly receive approval of a normally forbidden combination of majors, but only if a specific program has been set up by the seventh day of the sophomore year.

All double major programs in science are extremely challenging programs that require that the student take four or five science courses at a time. Thus, only students of superior scholastic ability should consider this as an option.

Students are warned that it is almost certain that completing a double major in two sciences will require total credits well over the college minimum of 124. Conflicts in scheduling of required courses may occur; neither the college nor the departments undertake to reschedule courses for the sake of double majors. For these reasons, it must be emphasized that completing a double major may well require more than four years. Only one degree is awarded (degrees in science do not specify a field).

## Dual Degree Program with the Mendoza College of Business

### *Coordinators:*

Mary Goss

*Director of Admissions*

*Master of Business Administration Program*

Steven Buechler

Associate Dean, College of Science

**Program of Studies.** The dual degree five-year program in the Mendoza College of Business and the College of Science enables the student to earn the master of business administration and bachelor of science degrees in a major in one of the five undergraduate departments in the College of Science.

This program, instituted in 1994, offers students the opportunity to better integrate studies in science and in management. The student completing this program will have a background in management as well as the first professional degree in one of the undergraduate majors of the College of Science. Because it is a demanding program, only those students of superior scholastic ability who have the aptitude, motivation and maturity necessary for the combined graduate and undergraduate program should apply. Those with outstanding internship experiences in business will be looked upon favorably. Advisors for the program are available for consultation about the advisability of applying for the program and about meeting the particular needs of students pursuing this program.

The program is open only to those currently enrolled Notre Dame students who have completed three years of an undergraduate science first major. Students interested in making application for the M.B.A./Science program should apply to the M.B.A. program during their junior year. They should take the GMAT by December of their junior year. All candidates must schedule a personal interview as a part of the M.B.A. admissions process. Students must also declare their intentions to the dean's office in the College of Science and request that a dean's eligibility letter be sent to the M.B.A. Office for them.

An applicant who is not admitted to the dual degree M.B.A./Science program continues in the undergraduate program and completes his or her science major in the usual four-year period.

As a general guide, it is expected that a student accepted to this program will take two courses for the undergraduate degree during the summer session following his or her junior year. Every dual-degree student is also expected to participate in the orientation for the M.B.A. program. This program will occupy the entire day for the two weeks prior to the first day of classes. Orientation is mandatory for all students beginning the M.B.A. program.

## SCIENCE DEGREE CREDIT

Students in the five-year science/M.B.A. program are also required to:

- (1) Complete a minimum of 48 M.B.A. credit hours and maintain a GPA of at least 3.0 to successfully complete the program.
- (2) Take all M.B.A. courses in their fourth year.
- (3) Maintain full-time student status (minimum course load of 12 credit hours per semester). Credit hours can come from science or M.B.A. programs.

*The M.B.A. curriculum divides each semester into two modules. In addition to the courses required to complete undergraduate and University requirements, students must complete the following M.B.A. course work:*

**Summer Session Following Junior Year:**

Math Review Workshop*	0
Acc't Review Workshop*	0
( <i>Science Undergraduate Requirements</i> )	6)

**Senior Year—(Science Undergraduate Requirements Each Semester 3–7)**

<i>First Semester, Module 1:</i>	
ACCT 60100. Financial Accounting	2
MBET 60340. Conceptual Foundation of Business Ethics	2
MGT 60100. Statistics	2
MGT 60300. Organizational Behavior	2

*First Semester, Interterm Week:*

Professional Development Seminar	0
Communications Seminar**	1

*First Semester, Module 2:*

ACCT 60200. Cost Accounting	2
FIN 60400. Finance I	2
FIN 60210. Microeconomic Analysis	2
MARK 60100. Marketing Management	2

*Second Semester, Module 3:*

FIN 70600. Finance II	2
FIN 60220. Macroeconomic Analysis	2
MGT 60900. Strategic Decision Making	2
Free Elective	2

*Second Semester, Interterm Week:*

Values in Decision Making	1
Elective Course	1

*Second Semester, Module 4:*

MGT 60400. Leadership and Teams	2
MGT 60700. Operations Management	2

**Fifth Year—(Science Undergraduate Requirements Each Semester 3–7)**

<i>First Semester, Module 1:</i>	
MGT 60200. Problem Solving	2
Management Communication Elective I	2
Free Elective*	2

*Interterm Week:*

OPTIONAL: Two one-credit-hour electives (TBD) OR Corporate Case Studies OR Offshore Program: China or Brussels	2
--	---

*First Semester, Module 2:*

Ethics Elective	2
Management Communication Elective II	2

*Second Semester, Module 3:*

Free Electives	4
(Floating Optional Elective)	2)

\*Students have the option to take one additional two-credit-hour elective now or in any remaining module.

*Second Semester, Interterm Week:*

(OPTIONAL: Two one-credit-hour electives OR Corporate Case Studies OR Offshore Program: China or Brussels)	2)
--	----

*Second Semester, Module 4:*

Free Electives	4
(Floating Optional Elective)	2)

\*See "Arts and Letters Core" on the first page of the *College of Engineering* section.

\*\*Special one/two-week courses. All other M.B.A. courses are seven weeks in length.

*\*Occurs during August Orientation*

Total for both degrees: 126–132 undergraduate, 48 M.B.A.

Students involved in the M.B.A./Science program will complete their undergraduate program while completing M.B.A. requirements. M.B.A. course work will not apply to the undergraduate degree. Sample schedules for particular majors are available from advisors or the dean's office. Students who are behind in the completion of their major requirements are strongly recommended to obtain permission and advising *before* applying to the joint program.

## Nondepartmental Courses

*Director:*

TBA  
Associate Dean, College of Science

**COURSE DESCRIPTIONS**

The complete descriptions for all of the courses associated with this academic program can be found on the enclosed compact disc within the [College of Science](#) section under the [Nondepartmental](#) heading.

## Science Degree Credit

Courses are generally taken in the College of Science for one of three reasons: (1) for students in either the College of Arts and Letters, or the Mendoza College of Business, or the School of Architecture, to fulfill a University requirement; (2) for students in either the College of Engineering or the College of Science to fulfill a college requirement; and (3) for students in the College of Science, to fulfill a major requirement. As a result, the College of Science offers different sequences of courses which overlap considerably in content but not level. Thus it is possible for a student who has changed his or her college or major to have taken two courses which overlap in content. Both courses will appear on the student's transcript, but only one will count for degree credit.

As a guideline for the student and the student's advisors, listed below are the groups of courses that overlap considerably in content. (Courses within the same group are shown in the same row and are also enclosed within parentheses; courses listed within the same column generally show a typical normal progression through course work.) In every case, only one course per group should be counted for degree credit. Generally, only the course taken last should be counted. Students and advisors are warned not to use these groups when moving between course sequences but rather to seek advice from the offering department or the College of Science office.

For overlap with courses no longer taught in the year of publication of this *Bulletin*, please refer to previous editions of this *Bulletin*.

KATHLEEN J.S. KOLBERG, Ph.D.

*Assistant Dean of the College of Science*

### In the Departments and Programs

GARY A. LAMBERTI, Ph.D.

*Chair of the Department of Biological Sciences*

A. GRAHAM LAPPIN, Ph.D.

*Chair of the Department of Chemistry and Biochemistry*

BEI HU, Ph.D.

*Chair of the Department of Mathematics*

MITCHELL R. WAYNE, Ph.D.

*Chair of the Department of Physics*

REV. JAMES K. FOSTER, C.S.C., MD

*Chair, Preprofessional Studies*

MORRIS POLLARD, Ph.D.

*Director of the Lobund Laboratory*

IAN CARMICHAEL, Ph.D.

*Director of the Radiation Laboratory*

ANDREW J. SOMMESE, Ph.D.

*Director of the Center for Applied Mathematics*

MARK S. ALBER, Ph.D.

*Director of the Center for Study of Biocomplexity*

FRANK H. COLLINS, Ph.D.

*Director of the Center for Tropical Disease Research and Training*

DAVID R. HYDE, Ph.D.

*Kenna Director of the Center for Zebrafish Research*

MARK A. SUCKOW, D.V.M.

*Director of the Freimann Life Sciences Center*

RUDOLPH M. NAVARI, M.D., Ph.D.

*Director of the Walther Cancer Research Center*

FRANCIS J. CASTELLINO, Ph.D.

*Director of the W.M. Keck Center for Transgene Research*

## ADVISORY COUNCIL

## Advisory Council

## FACULTY

## Faculty

The following is the official faculty roster for the 2007–08 academic year. This roster includes faculty members who are on leave during the academic year. The date in parentheses at the close of each entry is the year the individual joined the Notre Dame family.

**Ruth M. Abbey**, *Associate Professor of Political Science and Notre Dame Collegiate Fellow*. B.A., Monash University, 1984; M.A., McGill University, 1989; Ph.D., *ibid.*, 1995 (2005)

**Carl B. Ackermann**, *Associate Professional Specialist in Finance*. A.B., Amherst College, 1984; Ph.D., Univ. of North Carolina at Chapel Hill, 2000 (1998)

**Mary Jo Adams Kocovski**, *Assistant Professional Specialist in Alliance for Catholic Education, Fellow of the Institute for Educational Initiatives, and Senior Associate Director of the ACE Program*. B.F.A., Saint Mary's College, 1994; B.F.A., Univ. of Notre Dame, 1997 (1999)

**Steven G. Affeldt**, *Assistant Professor in the Program of Liberal Studies and Fellow of the Nanovic Institute for European Studies*. A.B., Univ. of California Berkeley, 1984; Ph.D., Harvard University, 1996 (2000)

**John F. Affleck-Graves**, *Executive Vice President and the Notre Dame Professor of Finance*. B.Sc., Univ. of Cape Town, South Africa, 1972; M.Sc., *ibid.*, 1974; Ph.D., *ibid.*, 1977; B.Comm., *ibid.*, 1982 (1986)

**Asma Afsaruddin**, *Associate Professor of the Classics and Fellow of the Joan B. Kroc Institute for International Peace Studies*. A.B., Oberlin College, 1982; M.A., Johns Hopkins University, 1985; Ph.D., *ibid.*, 1993 (1996)

**Terrence J. Akai**, *Associate Dean, Vice President of the Graduate School and Concurrent Associate Professor of Mathematics*. B.S., Univ. of Washington, 1971; B.A., *ibid.*, 1971; M.S., Univ. of Illinois Urbana-Champaign, 1973; Ph.D., *ibid.*, 1976 (1976)

**Mark S. Alber**, *Professor of Mathematics, Concurrent Professor of Physics, Director of the Center for Biocomplexity, and the Notre Dame Chair in Applied Mathematics*. M.S., Moscow Institute of Technology, 1983; Ph.D., Univ. of Pennsylvania, 1990 (1990)

**Joan Aldous**, *Professor of Sociology and the William R. Kenan Jr., Chair*. B.S., Kansas State University, 1948; M.A., Univ. of Texas-Austin, 1949; Ph.D., Univ. of Minnesota at Duluth, 1963 (1976)

**Samuel Amago**, *Assistant Professor of Romance Languages and Literatures, Fellow of the Nanovic Institute for European Studies, and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Univ. California San Diego, 1996; M.A., Univ. of Virginia, 1999; Ph.D., *ibid.*, 2003 (2003)

**Joseph P. Amar**, *Professor of the Classics and Concurrent Professor of Theology*. B.A., Catholic Univ. of America, 1970; S.T.B., *ibid.*, 1973; S.T.L., *ibid.*, 1974; M.A., *ibid.*, 1983; Ph.D., *ibid.*, 1988 (1988)

**Geraldine A. Ameriks**, *Associate Professional Specialist in Romance Languages and Literatures*. B.A., Smith College, 1969; M.A., Stanford University, 1971 (1980)

**Karl P. Ameriks**, *Professor of Philosophy, Fellow of the Nanovic Institute for European Studies, and the McMabon-Hank Chair in Philosophy*. B.A., Yale University, 1969; Ph.D., *ibid.*, 1973 (1973)

**Robert L. Amico**, *Professor of Architecture*. B.Arch., Univ. of Illinois Urbana-Champaign, 1961; M.Arch., Harvard University, 1965 (1978)

**José Anadón**, *Professor of Romance Languages and Literatures*. B.A., Albion College, 1968; M.A., Univ. of Michigan, 1970; Ph.D., *ibid.*, 1974 (1975)

**Gary A. Anderson**, *Professor of Theology*. B.A., Albion College, 1977; M.Div., Duke University, 1981; Ph.D., Harvard University, 1985 (2003)

**Thomas F. Anderson**, *Associate Professor of Romance Languages and Literatures, Fellow of the Institute for Latino Studies, and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Bowdoin College, 1992; M.A., Univ. of Pennsylvania, 1994; Ph.D., *ibid.*, 1998 (1998)

**Corey M. Angst**, *Assistant Professor of Management*. B.S.M.E., Western Michigan University, 2001; M.B.A., Univ. of Delaware, 2006; Ph.D., Univ. of Maryland, 2007 (2007)

**Panos J. Antsaklis**, *Professor of Electrical Engineering, Concurrent Professor of Computer Science and Engineering, and H. Clifford and Evelyn A. Brosey II Chair*. Dipl., National Technical Univ. of Athens, 1972; M.S., Brown University, 1974; Ph.D., *ibid.*, 1977 (1980)

**Robert S. Appleby**, *Professor of History, Fellow of the Helen Kellogg Institute for International Studies, the John M. Regan Jr. Directorship, Fellow of the Joan B. Kroc Institute for International Peace Studies, and Director of the Joan B. Kroc Institute for International Peace Studies*. B.A., Univ. of Notre Dame, 1978; M.A., Univ. of Chicago, 1979; Ph.D., *ibid.*, 1985; Ph.D., *ibid.*, 1985 (1994)

**Ani Aprahamian**, *Professor of Physics*. B.A., Clark Univ., 1980; Ph.D., *ibid.*, 1986 (1989)

**Francisco J. Aragon**, *Assistant Professional Specialist in the Institute for Latino Studies*. B.A., Univ. of California Berkeley, 1989; M.A., New York University, 1990; M.A., Univ. California Davis, 2000; M.F.A., Univ. of Notre Dame, 2003 (2003)

**J. Douglas Archer**, *Librarian, University Libraries*. B.A., Duke University, 1968; M.Div., Colgate Rochester Divinity School, 1972; M.L.S., Western Michigan University, 1981 (1978)

**Heidi L. Ardizzone**, *Assistant Professor of American Studies and Concurrent Assistant Professor of History*. B.A., Cornell University, 1989; M.A., Univ. of Michigan, 1991; Ph.D., *ibid.*, 1997 (1999)

**Gerald B. Arnold**, *Professor of Physics*. B.A., Northwestern University, 1969; M.S., Univ. of California at Los Angeles, 1972; Ph.D., *ibid.*, 1977 (1978)

**Peri E. Arnold**, *Professor of Political Science*. B.A., Roosevelt University, 1964; M.A., Univ. of Chicago, 1967; Ph.D., *ibid.*, 1972 (1972)

**Julie E. Arnott**, *Librarian, University Libraries*. B.A., Univ. of Missouri-St. Lou, 1976; M.L.S., Univ. of Illinois Urbana-Champaign, 1986 (2005)

**Carolina Arroyo**, *Associate Professional Specialist in Political Science*. B.A., State Univ. of New York at Buffalo, 1983; M.A., Stanford University, 1990 (1996)

**Imdat As**, *Assistant Professor of Architecture and the James A. and Louise F. Nolan Chair in Architecture*. B.Arch., Middle East Technical University, 2000; M.Arch., Massachusetts Institute of Technology, 2002; Ph.D., Harvard University, 2005 (2005)

**Brandon L. Ashfield**, *Assistant Professor of Chemistry and Biochemistry*. B.S., Univ. of Minnesota, 1998; Ph.D., Univ. of Texas-Austin, 2004 (2007)

**James M. Ashley**, *Associate Professor of Theology and Fellow of the Center for Social Concerns*. B.S., Saint Louis University, 1982; M.A., Weston School of Theology, 1988; Ph.D., Univ. of Chicago, 1993 (1993)

**Ann W. Astell**, *Professor of Theology*. B.S., Marquette University, 1974; M.A., *ibid.*, 1981; Ph.D., Univ. of Wisconsin-Madison, 1987 (2007)

**Hafiz M. Atassi**, *Professor of Aerospace and Mechanical Engineering and the Viola D. Hank Chair in Aerospace and Mechanical Engineering*. Ph.D., Univ. of Paris I, 1966 (1969)

**Robert Audi**, *Professor of Management and the David E. Gallo Chair in Business Ethics*. B.A., Colgate University, 1963; M.A., Univ. of Michigan, 1965; Ph.D., *ibid.*, 1967 (1987)

**David E. Aune**, *Professor of Theology*. B.A., Wheaton College, 1961; M.A., *ibid.*, 1963; M.A., Univ. of Minnesota, 1965; Ph.D., Univ. of Chicago, 1970 (1999)

**Louis J. Ayala**, *Assistant Professor of Political Science*. A.B., Princeton University, 1995; Ph.D., Stanford University, 2001 (2001)

**Brad A. Badertscher**, *Assistant Professor of Accountancy*. B.A., Univ. of Nebraska at Kearney, 2001; M.B.A., Univ. of Iowa, 2003; Ph.D., *ibid.*, 2007 (2007)

**Brian M. Baker**, *Associate Professor of Chemistry and Biochemistry*. B.S., New Mexico State Univ. Park, 1992; Ph.D., Univ. of Iowa, 1997 (2001)

## FACULTY

**Harriet E. Baldwin**, *Associate Professional Specialist in Dean's Office-Arts and Letters*. B.S., Kansas State University, 1966 (1980)

**Aaron B. Bales**, *Assistant Librarian, University Libraries*. B.A., Harvard University, 1988; M.A., Indiana Univ-Bloomington, 2001 (1992)

**Dinshaw S. Balsara**, *Associate Professor of Physics*. M.S., Indian Institute of Tech Kangpur, 1982; M.S., Univ. of Chicago, 1989; Ph.D., Univ. of Illinois Urbana-Champaign, 1990 (2001)

**Rashna D. Balsara**, *Research Assistant Professor of Chemistry and Biochemistry*. B.S., Univ. of Bombay, 1985; M.S., *ibid.*, 1991; Ph.D., *ibid.*, 1998 (2007)

**Albert-László Barábasi**, *Professor of Physics, Concurrent Professor of Computer Science and Engineering, and the Emil T. Hofman Chair in Physics*. M.A., Eotvos Lorand University, 1991; Ph.D., Boston University, 1994 (1995)

**Charles E. Barber**, *Associate Professor of Art, Art History, and Design*. B.A., Courtauld Institute of Art, 1986; Ph.D., *ibid.*, 1989 (1996)

**Sotirios A. Barber**, *Professor of Political Science*. B.A., Univ. of Illinois Urbana-Champaign, 1964; M.A., Univ. of Chicago, 1967; Ph.D., *ibid.*, 1973 (1986)

**Christopher A. Baron**, *Assistant Professor of the Classics*. A.B., Illinois Wesleyan University, 1995; Ph.D., Univ. of Pennsylvania, 2000; M.A., Univ. of Chicago, (2006)

**Amy C. Barrett**, *Associate Professor of Law*. B.A., Rhodes College, 1994; J.D., Univ. of Notre Dame, 1997 (2002)

**Matthew J. Barrett**, *Professor of Law*. B.B.A., Univ. of Notre Dame, 1982; J.D., *ibid.*, 1985 (1990)

**Katrina D. Barron**, *Assistant Professor of Mathematics*. B.S., Univ. of Chicago, 1986; B.S., *ibid.*, 1987; Ph.D., Rutgers University, 1996 (2001)

**Kevin Barry**, *Associate Professional Specialist in Kaneb Center for Teaching and Learning and Associate Director of the Kaneb Center for Teaching and Learning*. B.S., Florida Institute of Technology, 1988; M.S., *ibid.*, 1990 (1994)

**David M. Bartels**, *Professional Specialist in Radiation Laboratory and Concurrent Professor of Chemistry and Biochemistry*. B.S., Hope College, 1977; Ph.D., Northwestern University, 1982 (2003)

**Viva O. Bartkus**, *Associate Professor of Management, Fellow of the Nanovic Institute for European Studies, and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Yale University, 1989; M.A., *ibid.*, 1989; M.A., Univ. of Oxford, 1991; Ph.D., *ibid.*, 1993 (2004)

**Subhash C. Basu**, *Professor of Chemistry and Biochemistry*. B.S., Univ. of Calcutta, 1958; M.S., *ibid.*, 1960; Ph.D., Univ. of Michigan, 1966; Ph.D., Univ. of Calcutta, 1976 (1970)

**Stephen M. Batill**, *Professor of Aerospace and Mechanical Engineering and Department Chair*. B.S., Univ. of Notre Dame, 1969; M.S., *ibid.*, 1970; Ph.D., *ibid.*, 1972 (1978)

**Robert H. Battalio**, *Professor of Finance*. B.S., Texas A&M University, 1988; Ph.D., Indiana Univ-Bloomington, 1995 (2000)

**Joseph P. Bauer**, *Professor of Law*. B.A., Univ. of Pennsylvania, 1965; J.D., Harvard University, 1969 (1973)

**Peter H. Bauer**, *Professor of Electrical Engineering*. Dipl.Engin.E.E. Technische Univ. Muenchen, 1984; Ph.D., Univ. of Miami, 1987 (1988)

**Gerard F. Baumbach**, *Professional Specialist in the Institute for Church Life and Concurrent Professor of Theology*. B.S., Saint Michael's College, 1968; M.A., Univ. of Maryland Baltimore, 1975; Ed.D., New York Univ., 1989 (2003)

**Barry W. Baumbaugh**, *Professional Specialist in Physics*. B.S., Indiana Institute of Technology, 1976 (1978)

**Laura A. Bayard**, *Librarian, University Libraries*. M.A., Univ. of Pittsburgh, 1974 (1989)

**Terri L. Bays**, *Assistant Professional Specialist in Kaneb Center for Teaching and Learning, Director of the Kaneb Center for Teaching and Learning-Opencourseware, and Concurrent Assistant Professional Specialist in English*. B.A., Northwestern University, 1989; Ph.D., Univ. of California at Los Angeles, 2000 (2000)

**Timothy J. Bays**, *Associate Professor of Philosophy*. B.A., Northwestern University, 1988; Ph.D., Univ. of California at Los Angeles, 1994; Ph.D., *ibid.*, 1999 (1999)

**Edward N. Beatty**, *Associate Professor of History, Fellow and Interim Director of the Helen Kellogg Institute for International Studies*. B.A., Princeton University, 1983; M.A., Univ. of New Mexico Main, 1992; Ph.D., Stanford University, 1996 (2000)

**Christine A. Becker**, *Assistant Professor of Film, Television, and Theatre; and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Illinois Urbana-Champaign, 1993; M.A., Univ. of Wisconsin-Madison, 1995; Ph.D., *ibid.*, 2001 (2000)

**Mary P. Beckman**, *Professional Specialist in the Center for Social Concerns and Concurrent Associate Professor of Economics and Policy Studies*. B.A., Univ. of Notre Dame, 1975; M.A., *ibid.*, 1984; Ph.D., *ibid.*, 1986 (2001)

**Gail Bederman**, *Associate Professor of History*. B.A., New York University, 1978; M.A., Brown University, 1984; Ph.D., *ibid.*, 1993 (1992)

**Anthony J. Bellia Jr.**, *Professor of Law*. B.A., Canisius College, 1991; J.D., Univ. of Notre Dame, 1994 (2000)

**Patricia L. Bellia**, *Professor of Law*. A.B., Harvard University, 1991; J.D., Yale University, 1995 (2000)

**James O. Bellis**, *Associate Professor of Anthropology*. B.A., Indiana Univ-Bloomington, 1964; M.A., *ibid.*, 1965; Ph.D., *ibid.*, 1972 (1970)

**Gary E. Belovsky**, *Professor of Biological Sciences, the Martin J. Gillen Director of the Environmental Research Center, and Director of the UNDERC*. B.B.A., Univ. of Notre Dame, 1972; M.S., Yale University, 1974; Ph.D., Harvard University, 1977 (2001)

**Harvey A. Bender**, *Professor of Biological Sciences*. B.A., Case Western Reserve Univ., 1954; M.S., Northwestern University, 1957; Ph.D., *ibid.*, 1959 (1960)

**Matthew F. Benedict**, *Associate Professional Specialist in English*. B.A., Univ. of Massachusetts, 1986; M.F.A., Univ. of Notre Dame, 1994 (1998)

**David P. Bennett**, *Research Associate Professor of Physics*. B.S., Case Western Reserve Univ., 1981; M.S., Stanford University, 1983; Ph.D., *ibid.*, 1986 (1996)

**Geoffrey J. Bennett**, *Professor of Law, London Concurrent Professor, and Director of the London Law Program*. M.A., Univ. of Cambridge, 1978 (1995)

**John J. Bentley**, *Associate Professional Specialist in the Radiation Laboratory*. B.S., College of the Holy Cross, 1967; M.S., Carnegie Mellon University, 1970; Ph.D., *ibid.*, 1975 (1978)

**Cindy S. Bergeman**, *Professor of Psychology and Department Chair, Psychology*. B.S., Univ. of Idaho, 1979; M.S., Pennsylvania State Univ., 1987; Ph.D., *ibid.*, 1989 (1990)

**Jeffrey H. Bergstrand**, *Professor of Finance and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Northwestern University, 1974; M.A., Univ. of Wisconsin-Madison, 1979; Ph.D., *ibid.*, 1981 (1986)

**Tracy C. Bergstrom**, *Assistant Librarian, University Libraries*. B.A., Smith College, 1998; M.A., Yale University, 2002; M.L.S., Southern Connecticut State Col, 2007 (2007)

**Jeffrey A. Bernel**, *Professional Specialist in Management*. M.B.A., Univ. of Notre Dame, 1994 (2007)

**Robert J. Bernhard**, *Professor of Aerospace and Mechanical Engineering and Vice President for Research, Office of Research*. B.S.M.E., Iowa State University, 1976; M.S.M.E., Univ. of Maryland, 1976; Ph.D., Iowa State University, 1982 (2007)

**Gary H. Bernstein**, *Professor of Electrical Engineering and Associate Chair, Electrical Engineering*. B.S.E.E., Univ. of Connecticut, 1979; M.S.E.E., Purdue University, 1981; Ph.D., Arizona State University, 1987 (1988)

**H. Gordon Berry**, *Professor of Physics*. B.A., University College Oxford, 1962; M.S., Univ. of Wisconsin the Center, 1963; Ph.D., *ibid.*, 1967 (1994)

## FACULTY

- Louis J. Berzai**, *Associate Professional Specialist in Computer Applications Programs*. B.A., Indiana Univ. South Bend, 1985; M.A., *ibid.*, 1995 (1984)
- Nora J. Besansky**, *Professor of Biological Sciences*. B.S., Oberlin College, 1982; M.Phil., Yale University, 1987; M.S., *ibid.*, 1987; Ph.D., *ibid.*, 1990 (1997)
- Philip H. Bess**, *Professor of Architecture*. B.A., Whittier College, 1973; M.T.S., Harvard University, 1976; M.A., Univ. of Virginia, 1981 (2004)
- Joanne M. Bessler**, *Librarian, University Libraries*. B.A., Univ. of Cincinnati, 1971; M.A., Univ. of Kentucky, 1972 (1984)
- David M. Betson**, *Associate Professor of Economics, and Policy Studies*. B.A., Kalamazoo College, 1972; M.A., Univ. of Wisconsin-Madison, 1975; Ph.D., *ibid.*, 1980 (1982)
- Mark C. Beudert**, *Professional Specialist in Music*. Ph.D., Univ. of Michigan, 1982; B.A., Columbia University, 1982; M.A., Univ. of Michigan, 1991 (2007)
- Ikaros I. Bigi**, *Professor of Physics and the Grace-Rupley Chair in Physics*. M.S., MaxPlanck-Gesellschaft, 1973; Ph.D., *ibid.*, 1976 (1988)
- Alexander Blachly**, *Professor of Music*. B.A., Haverford College, 1967; M.A., Columbia University, 1972; Ph.D., *ibid.*, 1995 (1993)
- John A. Blacklow**, *Assistant Professor of Music*. B.Mus., Harvard University, 1987; M.Mus., the Juilliard School, 1989; Ph.D., Univ. of Southern California, 1996 (2002)
- Howard A. Blackstead**, *Professor of Physics*. B.S., North Dakota State University, 1962; M.A., Dartmouth College, 1964; Ph.D., Rice University, 1967 (1969)
- Katharina J. Blackstead**, *Librarian, University Libraries*. B.A., Univ. of Illinois Urbana-Champaign, 1969; M.A., *ibid.*, 1970; M.S.A., Univ. of Notre Dame, 1979 (1973)
- G. Robert Blakey**, *Professor of Law and the William J. and Dorothy K. O'Neill Chair in Law*. B.A., Univ. of Notre Dame, 1957; J.D., *ibid.*, 1960 (1980)
- Patricia A. Blanchette**, *Associate Professor of Philosophy*. B.A., Univ. California San Diego, 1983; Ph.D., Stanford University, 1990 (1993)
- Katherine A. Bland**, *Assistant Professor of Philosophy*. B.S., Univ. of London, 1992; B.Phil., Univ. of Oxford, 1996; Ph.D., *ibid.*, 2001 (2004)
- Marina Blanton**, *Assistant Professor of Computer Science and Engineering*. M.S., Ohio University, 2004; M.S., Purdue University, 2005; Ph.D., *ibid.*, 2007 (2007)
- Rev. Thomas E. Blantz, C.S.C.**, *Professor of History*. B.A., Univ. of Notre Dame, 1957; S.T.L., Pontifical Gregorian Univ., 1961; M.A., Univ. of Notre Dame, 1963; Ph.D., Columbia Univ., 1968 (1968)
- Matthew Bloom**, *Associate Professor of Management*. B.S., Baker University, 1983; M.A., Univ. of Kansas, 1989; Ph.D., Cornell University, 1996 (1996)
- W. Martin Bloomer**, *Associate Professor of the Classics*. B.A., Yale University, 1982; M.A., *ibid.*, 1983; M.Phil., *ibid.*, 1984; Ph.D., *ibid.*, 1987 (1998)
- Susan D. Blum**, *Associate Professor of Anthropology, Fellow of the Helen Kellogg Institute for International Studies, and Director of the Center for Asian Studies*. A.B., Stanford University, 1980; M.A., Univ. of Michigan, 1986; M.A., *ibid.*, 1988; Ph.D., *ibid.*, 1994 (2000)
- Theresa Bly**, *Assistant Professor of Naval Science*. M.S., Naval Postgraduate School, 2002 (2007)
- Joseph G. Bock**, *Professional Specialist in the Joan B. Kroc Institute for International Peace Studies*. B.S.W., Univ. of Missouri-Columbia, 1980; M.S., *ibid.*, 1981; Ph.D., American University, 1985 (2007)
- Tobias Boes**, *Assistant Professor of German and Russian Languages and Literatures*. B.A., Reed College, 1999; M.Phil., Yale University, 2003; Ph.D., *ibid.*, 2006 (2007)
- William C. Boggess**, *Professional Specialist in Chemistry and Biochemistry, and Assistant Chair*. B.S., Davis, and Elkins College, 1988; Ph.D., Univ. of Tennessee Knoxville, 1994 (1994)
- Paul W. Bohn**, *Professor of Chemical and Biomolecular Engineering and Concurrent Professor of Chemistry and Biochemistry*. B.S., Univ. of Notre Dame, 1977; Ph.D., Univ. of Wisconsin-Madison, 1981 (2006)
- Frank J. Bonello**, *Associate Professor of Economics and Policy Studies*. B.S., Univ. of Detroit, 1961; M.A., *ibid.*, 1963; Ph.D., Michigan State Univ., 1968 (1968)
- John G. Borkowski**, *Professor of Psychology, Fellow of the Institute for Educational Initiatives, and the Andrew J. McKenna Family Chair in Psychology*. B.A., Benedict College, 1960; M.A., Ohio University, 1962; Ph.D., Univ. of Iowa, 1965 (1967)
- Eileen H. Botting**, *Associate Professor of Political Science, Director of the Gender Studies, and Rolf's TJ & RT*. B.A., Bowdoin College, 1993; B.A., Univ. of Cambridge, 1995; M.A., Yale University, 1996; M.A., *ibid.*, 1997; M.Phil., *ibid.*, 1998; M.Phil., *ibid.*, 1998; M.A., Univ. of Cambridge, 1999; Ph.D., Yale University, 2001 (2001)
- D'Arcy J. Boulton**, *Professional Specialist in the Medieval Institute*. B.A., Univ. of Trinity College-Toronto, 1969; M.A., Univ. of Pennsylvania, 1970; Ph.D., Univ. of Oxford, 1976; Ph.D., Univ. of Pennsylvania, 1978 (1989)
- Maureen B. Boulton**, *Professor of Romance Languages and Literatures*. B.A., College of New Rochelle, 1970; M.A., Univ. of Pennsylvania, 1972; Ph.D., *ibid.*, 1976; M.A., Univ. of Oxford, 1980 (1985)
- Alan P. Bowling**, *Assistant Professor of Aerospace and Mechanical Engineering*. B.S., Univ. of Texas-Austin, 1988; M.S., Stanford University, 1992; Ph.D., *ibid.*, 1998 (2001)
- Kevin W. Bowyer**, *Professor of Computer Science and Engineering, Concurrent Professor of Electrical Engineering, the Schubmehl-Prein Family Chair in Computer Science and Engineering, and Department Chair*. B.S., George Mason Univ., 1976; Ph.D., Duke Univ., 1980 (2001)
- Sunny K. Boyd**, *Professor of Biological Sciences*. A.B., Princeton Univ., 1981; M.S., Oregon State Univ., 1984; Ph.D., *ibid.*, 1987 (1987)
- Patricio E. Boyer**, *Assistant Professor of Romance Languages and Literatures and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Yale Univ., 1998; M.Phil., *ibid.*, 2001; Ph.D., *ibid.*, 2005 (2005)
- Fernandre D. Boze**, *Associate Librarian, University Libraries*. B.A., Univ. of Illinois Urbana-Champaign, 1977; M.S., *ibid.*, 1989 (1991)
- Carol A. Brach**, *Associate Librarian, University Libraries*. B.A., Duquesne Univ., 1974; M.A., Univ. of Pittsburgh, 1975 (1991)
- Kevin D. Bradford**, *Assistant Professor of Marketing*. B.A., Univ. of Northern Iowa, 1984; M.B.A., Univ. of Notre Dame, 1991; Ph.D., Univ. of Florida, 2000 (1999)
- Tonya P. Bradford**, *Assistant Professor of Marketing*. B.A., Northwestern Univ., 1986; M.A., *ibid.*, 1991; Ph.D., *ibid.*, 2007 (2007)
- Douglas E. Bradley**, *Professional Specialist in the Snite Museum and Concurrent Associate Professor of Anthropology*. B.A., Univ. of Notre Dame, 1971; M.A., Univ. of Michigan, 1976 (1979)
- Gerard V. Bradley**, *Professor of Law*. B.A., Cornell Univ., 1976; J.D., *ibid.*, 1980 (1992)
- Keith R. Bradley**, *Professor of the Classics, the Eli J. Shabeen Chair in Classics, and Concurrent Professor of History*. B.A., Univ. of Sheffield, 1967; M.A., *ibid.*, 1968; CZ, University College Oxford, 1970; Ph.D., Univ. of Sheffield, 1980 (2001)
- Paul F. Bradshaw**, *Professor of Theology, and Director of the London Program, Undergraduate Studies*. B.A., Clare College Cambridge, 1966; M.A., *ibid.*, 1970; Ph.D., King's College Cambridge, 1971; Ph.D., Oriel College Oxford, 1994 (1985)
- Steven J. Brady**, *Assistant Professional Specialist in the Dean's Office—First Year of Studies, and Fellow of the Nanovic Institute*. B.A., Roosevelt Univ., 1989; M.A., Univ. of Notre Dame, 1992; Ph.D., *ibid.*, 1998 (1998)
- Jay W. Brandenberger**, *Professional Specialist in the Center for Social Concerns, Fellow of the Institute for Educational Initiatives, and Concurrent Associate Professor of Psychology*. B.A., Univ. of Notre Dame, 1978; M.A., Univ. of Pittsburgh, 1987; Ph.D., *ibid.*, 1990 (1991)

## FACULTY

- Robert J. Brandt**, *Professional Specialist in Architecture*. B.S., Univ. of Southern Indiana, 1986; M.F.A., Indiana State Univ. Main, 1989 (1992)
- Shawn P. Braue**, *Assistant Professor of Air Science*. M.B.A., Golden Gate Univ., 1993 (2007)
- John M. Brauer**, *Associate Professional Specialist in the Dean's Office—Engineering*. B.S., State Univ. of New York-Buffalo, 1967; M.S., *ibid.*, 1969 (2003)
- Julia M. Braungart-Rieker**, *Professor of Psychology and Associate Dean, Arts and Letters*. B.S., Syracuse Univ., 1987; M.S., Pennsylvania State Univ., 1990; Ph.D., *ibid.*, 1992; Ph.D., Pennsylvania State Univ., 1992 (1992)
- Joan F. Brennecke**, *Professor of Chemical and Biomolecular Engineering and the Bernard Keating-Crawford Chair in Engineering*. B.S., Univ. of Texas, 1984; M.S., Univ. of Illinois, 1987; Ph.D., Univ. of Illinois Urbana-Champaign, 1989 (1989)
- Sarah E. Brenner**, *Assistant Professional Specialist in the Dean's Office—First Year of Studies*. B.A., Univ. of Notre Dame, 1998; M.A., Ohio State Univ., 2003; M.S.W., *ibid.*, 2003 (1995)
- Robert D. Bretz Jr.**, *Professor of Management, Joe and Jane Giovanini Chair in Management, and Department Chair*. B.A., Bethany College, 1980; M.B.A., Univ. of Kansas, 1984; Ph.D., *ibid.*, 1988 (1997)
- Margaret Brinig**, *Professor of Law, the Fritz Duda Family Chair in Law, and Associate Dean, Law School*. B.A., Duke Univ., 1970; J.D., Seton Hall Univ., 1973; M.A., George Mason Univ., 1993; Ph.D., *ibid.*, 1994 (2006)
- Jay B. Brockman**, *Associate Professor of Computer Science and Engineering*. B.S., Brown Univ., 1982; M.Eng., Carnegie Mellon Univ., 1988; Ph.D., *ibid.*, 1992 (1992)
- Jacqueline V. Brogan**, *Professor of English*. B.A., Southern Methodist Univ., 1974; M.A., *ibid.*, 1975; Ph.D., Univ. of Texas-Austin, 1982 (1986)
- Nyame O. Brown**, *Assistant Professor of Art, Art History, and Design*. B.F.A., School of the Art Institute of Chicago, 1993; M.F.A., Yale Univ., 1997 (2002)
- Seth N. Brown**, *Associate Professor of Chemistry and Biochemistry*. B.S., Massachusetts Institute of Technology, 1988; Ph.D., Univ. of Washington, 1994 (1996)
- Allert R. Brown-Gort**, *Associate Professional Specialist in the Institute for Latino Studies, Fellow of the Helen Kellogg Institute for International Studies, and Associate Director of the Institute for Latino Studies*. B.A., Univ. of Texas at Austin, 1982; M.P.A., Univ. of Texas-Austin, 1998 (1999)
- Michael C. Brownstein**, *Associate Professor of East Asian Languages & Cultures and Fellow of the Nanovic Institute for European Studies*. B.A., California St. Univ.-Northridge, 1972; B.A., Monterey Institute International, 1973; M.A., Columbia Univ., 1978; Ph.D., *ibid.*, 1981 (1982)
- Gerald L. Bruns**, *Professor of English, Fellow of the Nanovic Institute for European Studies, and the William P. and Hazel B. White Chair in English (I)*. B.A., Marquette Univ., 1960; M.A., *ibid.*, 1962; Ph.D., Univ. of Virginia, 1966 (1985)
- Ramzi K. Bualuan**, *Associate Professional Specialist in Computer Science and Engineering*. B.S., American Univ. of Beirut, 1983; M.S.E.E., Univ. of Notre Dame, 1986 (1990)
- Kasey S. Buckles**, *Assistant Professor of Economics and Econometrics*. B.A., Univ. of Kentucky, 2000; M.A., Boston Univ., 2003; Ph.D., *ibid.*, 2005 (2005)
- Nero Budur**, *Assistant Professor of Mathematics and the Rev. Howard J. Kenna, C.S.C., Memorial Director of the Zebrafish Research Center*. B.S., Univ. of Illinois-Chicago, 1998; M.S., *ibid.*, 1999; Ph.D., *ibid.*, 2003 (2006)
- Steven A. Buechler**, *Professor of Mathematics and Associate Dean for Undergraduate Affairs*. B.A., Eastern Illinois Univ., 1977; Ph.D., Univ. of Maryland Univ., 1981 (1987)
- Rev. Richard S. Bullene, C.S.C.**, *Associate Professional Specialist in Architecture and Assistant Dean, Architecture*. B.Arch., Univ. of Notre Dame, 1976; M.Div., *ibid.*, 1981; M.Div., *ibid.*, 1981; M.S., Univ. of Pennsylvania, 1992; Ph.D., *ibid.*, 1994 (1993)
- Bruce A. Bunker**, *Professor of Physics*. B.S., Univ. of Washington, 1974; Ph.D., *ibid.*, 1980 (1983)
- Karen L. Buranskas**, *Associate Professor of Music*. B.Mus., Indiana Univ.-Bloomington, 1973; M.Mus., Yale Univ., 1977 (1979)
- Thomas G. Burish**, *Professor of Psychology and Provost*. B.A., Univ. of Notre Dame, 1972; M.A., Univ. of Kansas, 1975; Ph.D., Univ. of Kansas Medical Center, 1976 (2005)
- Bartley A. Burk**, *Associate Librarian, University Libraries*. B.S., Brigham Young Univ., 1978; M.A., *ibid.*, 1990 (1990)
- Leo F. Burke**, *Professional Specialist in Executive M.B.A. and Associate Dean, Mendoza College of Business*. B.A., Univ. of Notre Dame, 1970; M.A., Indiana Univ.-Bloomington, 1979; M.B.A., Aurora Univ., 1988 (2007)
- Jeffrey J. Burks**, *Assistant Professor of Accountancy*. B.B.A., Univ. of Notre Dame, 1997; M.B.A., Creighton Univ., 2002; Ph.D., Univ. of Iowa, 2007 (2007)
- Peter C. Burns**, *Professor of Civil Engineering and Geological Sciences, the Henry Massman Chair in Civil Engineering (Collegiate Chair) II, Concurrent Professor of Chemistry and Biochemistry, and Department Chair, Civil Engineering and Geological Sciences*. B.S., Univ. of New Brunswick, 1988; M.S., Univ. of Western Ontario, 1990; Ph.D., Univ. of Manitoba, 1994 (1997)
- Jorge A. Bustamante**, *Professor of Sociology, Fellow of the Helen Kellogg Institute for International Studies, and the Eugene P. and Helen Conley Chair in Sociology*. M.A., Univ. of Notre Dame, 1970; Ph.D., *ibid.*, 1975 (1986)
- Joseph A. Buttigieg**, *Professor of English, the William R. Kenan Jr. Chair in English, and Fellow of the Nanovic Institute for European Studies*. Ph.D., State Univ. of New York-Binghamton, 1976 (1980)
- Sondra Byrnes**, *Associate Professional Specialist in Management*. B.A., Univ. of North Dakota Main, 1967; J.D., Univ. of Detroit, 1986 (2006)
- Theodore J. Cachey**, *Professor of Romance Languages and Literatures, Fellow of the Nanovic Institute for European Studies, Department Chair, Romance Languages and Literatures, and Ravarino Directorship*. Ph.D., Univ. of California at Los Angeles, 1986 (1990)
- Pascal V. Calarco**, *Associate Librarian, University Libraries*. B.A., Univ. of Western Ontario, 1991; M.A., McGill Univ., 1995 (2004)
- Alejandro E. Camacho**, *Associate Professor of Law*. B.A., Univ. California Irvine, 1995; LB, Univ. of California Riverside, 1995; J.D., Harvard Univ., 1998 (2005)
- David E. Campbell**, *Associate Professor of Political Science and Fellow of the Institute for Educational Initiatives*. B.A., Brigham Young Univ., 1996; Ph.D., Harvard Univ., 2002 (2002)
- Luis A. Canales**, *Assistant Professional Specialist in Kellogg Institute for International Studies and Assistant Director*. A.B., Univ. of Louisville, 2006 (2006)
- Sr. Kathleen Cannon, O.P.**, *Professional Specialist in the Dean's Office—Science, and Concurrent Associate Professor of Theology*. B.A., Ohio Dominican College, 1965; M.A., Providence College, 1975; R.H., Catholic Univ. of America, 1982 (1990)
- Jianguo Cao**, *Professor of Mathematics*. B.S., Nanjing Univ., 1982; M.S., *ibid.*, 1985; Ph.D., Univ. of Pennsylvania, 1989 (1996)
- Mark A. Caprio**, *Assistant Professor of Physics*. B.S., Oglethorpe Univ., 1998; M.S., Yale Univ., 1998; Ph.D., *ibid.*, 2003 (2007)
- William J. Carbonaro**, *Associate Professor of Sociology and Fellow of the Institute for Educational Initiatives*. B.A., Washington Univ., 1990; M.A., *ibid.*, 1991; M.A., Univ. of Wisconsin-Madison, 1996; Ph.D., *ibid.*, 2000 (2000)
- Gilberto Cárdenas**, *Professor of Sociology, Fellow of the Helen Kellogg Institute for International Studies, the Julian Samora Chair in Latino Studies, and Director of the Institute for Latino Studies*. M.A., Univ. of Notre Dame, 1972; Ph.D., *ibid.*, 1977 (1999)
- Laura A. Carlson**, *Associate Professor of Psychology*. B.A., Dartmouth College, 1987; M.A., Michigan State Univ., 1991; Ph.D., Univ. of Illinois Urbana-Champaign, 1994 (1994)

## FACULTY

- Ian C. Carmichael**, *Professor of Chemistry and Biochemistry and Director of the Radiation Laboratory*. B.S., Univ. of Glasgow, 1971, Ph.D., *ibid.*, 1975 (1976)
- Paolo G. Carozza**, *Associate Professor of Law, Fellow of the Nanovic Institute for European Studies, Fellow of the Helen Kellogg Institute for International Studies, and Fellow of the Joan B. Kroc Institute for International Peace Studies*. A.B., Harvard Univ., 1985, J.D., *ibid.*, 1989 (1996)
- Bridgette A. Carr**, *Associate Professional Specialist in Law School*. B.A., Univ. of Notre Dame, 1998, J.D., Univ. of Michigan, 2002 (2007)
- Lisa L. Casey**, *Associate Professor of Law*. A.B., Stanford Univ., 1984, J.D., *ibid.*, 1987 (2001)
- Douglass W. Cassel**, *Professor of Law, Fellow of the Helen Kellogg Institute for International Studies, and Director of the Center for Civil and Human Rights*. B.A., Yale Univ., 1969, J.D., Harvard Univ., 1972 (2005)
- Francis J. Castellino**, *Professor of Chemistry and Biochemistry, the Kleiderer-Pezold Chair in Biochemistry and Director of the W.M. Keck Center for Transgene Research*. B.S., Univ. of Scranton, 1964, M.S., Univ. of Iowa, 1966, Ph.D., *ibid.*, 1968 (1970)
- John C. Cavadini**, *Associate Professor of Theology, Director of the Institute for Church Life, and Department Chair, Theology*. B.A., Wesleyan Univ., 1975, M.A., Marquette Univ., 1979, M.A., Yale Univ., 1980, M.Phil., *ibid.*, 1983, Ph.D., *ibid.*, 1988 (1990)
- David Cavalieri**, *Research Specialist in Aerospace and Mechanical Engineering*. B.S., Illinois Institute of Technology, 1992, B.A., *ibid.*, 1992, M.A., *ibid.*, 1995, M.S., *ibid.*, 1996 (2003)
- Jessica Chalmers**, *Assistant Professor of Film, Television, and Theatre*. B.A., Barnard College, 1984, M.A., City College of New York, 1990, Ph.D., New York Univ., 1999 (1999)
- Dominic T. Chaloner**, *Research Assistant Professor of Biological Sciences and Woodrow Wilson Fellowship*. B.S., Univ. of London, 1991, Ph.D., *ibid.*, 1995 (2001)
- Angie R. Chamblee**, *Associate Professional Specialist in the Dean's Office—First Year of Studies*. B.A., Univ. of Notre Dame, 1973, M.A., Michigan State Univ., 1974 (1976)
- Surendar Chandra**, *Assistant Professor of Computer Science and Engineering*. B.E., Anna Univ., 1988, M.S., Worcester Polytechnic Institute, 1993, Ph.D., Duke Univ., 2000 (2002)
- Hsueh-Chia Chang**, *Professor of Chemical and Biomolecular Engineering and the Bayer Corporation Chair in Engineering*. B.S., California Institute of Technology, 1976, Ph.D., Princeton Univ., 1980 (1987)
- Mayland Chang**, *Professional Specialist in Chemistry and Biochemistry*. B.S., Sorbonne Univ., 1977, B.S., Univ. of Southern California, 1981, Ph.D., Univ. of Chicago, 1985 (2003)
- Yu-Chi Chang**, *Associate Professor of Management*. B.A., National Taiwan Univ., 1955, M.A., Univ. of California Berkeley, 1963, Ph.D., Univ. of Wisconsin-Madison, 1972 (1971)
- Vandhana M. Chari**, *Research Assistant Professor of Biological Sciences*. B.S., Stella Maris College, 1991, M.S., Madras Univ., 1993, Ph.D., Hahnemann Univ., 1999 (2000)
- Amitabh Chaudhary**, *Assistant Professor of Computer Science and Engineering*. B.Tech., Indian Institute of Technology, Khargpur, India, 1992; M.S., Indian Institute of Technology-Mumbai, 1996, Ph.D., Johns Hopkins Univ., 2002 (2004)
- Nitesh V. Chawla**, *Assistant Professor of Computer Science and Engineering*. B.S., Maharashtra Institute of Technology, 1997, M.S., Univ. of South Florida, 2000, Ph.D., *ibid.*, 2002 (2004)
- Danny Z. Chen**, *Professor of Computer Science and Engineering*. B.S., Univ. of San Francisco, 1985, M.S., Purdue Univ., 1988, Ph.D., *ibid.*, 1992 (1992)
- Meredith S. Chesson**, *Associate Professor of Anthropology*. B.A., Brown Univ., 1989, M.A., Harvard Univ., 1993, Ph.D., *ibid.*, 1997 (2000)
- Bakshy A. Chibber**, *Research Associate Professor of Chemistry and Biochemistry*. Ph.D., Univ. of Waterloo, 1972 (1982)
- Daniel M. Chipman**, *Professional Specialist in the Radiation Laboratory and Concurrent Professor of Chemistry and Biochemistry*. B.S., Iowa State Univ., 1967, Ph.D., Univ. of Wisconsin-Madison, 1972 (1976)
- Peter A. Cholak**, *Professor of Mathematics*. B.A., Union College Univ., 1984, M.A., Univ. of Wisconsin-Madison, 1988, M.S., *ibid.*, 1988, Ph.D., Univ. of Wisconsin in the Center, 1991 (1994)
- Kevin J. Christiano**, *Associate Professor of Sociology*. B.A., Coll of William and Mary, 1977, M.A., Princeton Univ., 1980, Ph.D., *ibid.*, 1983 (1983)
- Mathew A. Chrystal**, *Assistant Professional Specialist in Science Computing*. B.S., California State Polytechnic, 1983, M.S., Univ. of Minnesota, 1997, Ph.D., *ibid.*, 2001 (2001)
- David A. Clairmont**, *Assistant Professor of Theology*. B.B.A., Univ. of Notre Dame, 1996, M.A., Univ. of Chicago School Divinity, 2000, Ph.D., *ibid.*, 2005 (1994)
- G. Christopher Clark**, *Associate Professional Specialist in Kaneb Center for Teaching and Learning and Assistant Director of Learning Technology*. B.A., Cornell Univ., 1975, M.A., Univ. of Rochester, 1980 (1997)
- Patricia L. Clark**, *Assistant Professor of Chemistry and Biochemistry*. B.S., Georgia Institute of Technology, 1991, Ph.D., University Texas Medical School, 1997 (2001)
- Ryan K. Clark**, *Assistant Professional Specialist in Alliance for Catholic Education*. B.A., Univ. of Notre Dame, 1995, M.A., Univ. of Portland, 1998, Ph.D., Univ. of Oregon, 2007 (2006)
- Aedin N. Clements**, *Associate Librarian, University Libraries*. B.A., University College Dublin, 1980, M.L.S., *ibid.*, 1982 (2005)
- Paul M. Cobb**, *Associate Professor of History and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Univ. of Massachusetts-Boston, 1989, M.A., Univ. of Chicago, 1991, Ph.D., *ibid.*, 1997 (1999)
- Laurel P. Cochrane**, *Associate Librarian, Law Library*. B.A., Indiana Univ-Bloomington, 1979, M.A., *ibid.*, 1988 (2002)
- Clayton K. Cole**, *Associate Professional Specialist in Film, Television, and Theatre*. B.A., College of William and Mary, 1986, M.F.A., Yale Univ., 1991 (2003)
- Jon T. Coleman**, *Assistant Professor of History*. B.A., Univ. of Colorado-Boulder, 1992, M.A., Harvey Mudd College, 1997, Ph.D., Yale Univ., 2003 (2004)
- Robert R. Coleman**, *Associate Professor of Art, Art History, and Design, and Fellow of the Nanovic Institute for European Studies*. B.A., State Univ. College New Paltz, 1970, M.A., Univ. of Chicago, 1973, Ph.D., *ibid.*, 1988 (1982)
- Jessica Collett**, *Assistant Professor of Sociology*. M.A., Univ. of Arizona, 2006, Ph.D., *ibid.*, 2006 (2006)
- Austin I. Collins**, *Professor of Art, Art History, and Design*. B.A., Univ. of Notre Dame, 1977, M.Div., Graduate Theological Union, 1981, M.F.A., Claremont Graduate School, 1985 (1986)
- Frank H. Collins**, *Professor of Biological Sciences, the George and Winifred Clark Chair in Biological Sciences (I), and Director of the Center for Global Health and Infectious Diseases and Department of Computer Science and Engineering*. B.A., Johns Hopkins Univ., 1966, M.A., Univ. of East Anglia, 1973, Ph.D., Univ. California Davis, 1981 (1997)
- James M. Collins**, *Professor of Film, Television, and Theatre and Concurrent Professor English and Acting Chair, Film Television, and Theatre*. Ph.D., Univ. of Iowa, 1984 (1985)
- Oliver M. Collins**, *Professor of Electrical Engineering*. B.S., California Institute of Technology, 1986, M.S., *ibid.*, 1987, Ph.D., *ibid.*, 1989 (1995)
- Sandra D. Collins**, *Associate Professional Specialist in Management and Concurrent Assistant Professor of Psychology*. B.A., Indiana Univ. South Bend, 1994, M.A., Univ. of Notre Dame, 1997, Ph.D., *ibid.*, 1999 (1994)

## FACULTY

- Philippe A. Collon**, *Assistant Professor of Physics*. B.S., Univ. Catholique De Louva, 1993, Ph.D., Wirtschaftsuniversitat Wien, 1999 (2003)
- Maria S. Coloma**, *Assistant Professional Specialist in Romance Languages and Literatures*. B.A., National Univ. of San Marcos, 1984, M.A., Univ. of Pittsburgh, 1998 (2000)
- Edward J. Conlon**, *Professor of Management, Associate Dean of the Mendoza College of Business, and Edward Frederick Sorin Society Professor of Management*. B.S., Pennsylvania State Univ., 1972, M.S., Carnegie Mellon Univ., 1975, Ph.D., *ibid.*, 1978 (1992)
- Barbara M. Connolly**, *Assistant Professor of Political Science and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Brown Univ., 1988, M.A., Univ. of California Berkeley, 1990, Ph.D., *ibid.*, 1997 (2001)
- Francis X. Connolly**, *Professor of Mathematics*. B.S., Fordham Univ., 1961, M.S., *ibid.*, 1963, Ph.D., Univ. of Rochester, 1965 (1971)
- Rev. Michael E. Connors, C.S.C.**, *Associate Professional Specialist in Theology*. B.A., Illinois College, 1977, M.Div., Univ. of Notre Dame, 1983, Ph.D., Univ. of Toronto, 1997 (1997)
- Ann-Marie Conrado**, *Associate Professional Specialist in Art, Art History, and Design*. B.A., Univ. of Notre Dame, 1993, M.A., Univ. of Chicago, 2003 (2007)
- Olivia R. Constable**, *Professor of History*. B.A., Yale Univ., 1983, Ph.D., Princeton Univ., 1989 (1995)
- Michael J. Coppedge**, *Associate Professor of Political Science and Fellow of the Helen Kellogg Institute for International Studies*. B.S., Randolph-Macon Woman's College, 1979, M.A., Yale Univ., 1982, Ph.D., *ibid.*, 1988 (1995)
- Steven A. Corcelli**, *Assistant Professor of Chemistry and Biochemistry*. B.S., Brown Univ., 1997, Ph.D., Yale Univ., 2002 (2005)
- Thomas C. Corke**, *Professor of Aerospace and Mechanical Engineering and the Clark Equipment Chair in Engineering*. B.S., Illinois Institute of Technology, 1974, M.S., *ibid.*, 1976, Ph.D., *ibid.*, 1981 (1999)
- Alexandra F. Corning**, *Assistant Professor of Psychology*. B.S., Univ. of Florida, 1988, M.S., Loyola University Chicago, 1990; Ph.D., Ohio State Univ., 1994 (2000)
- Edmundo Corona**, *Associate Professor of Aerospace and Mechanical Engineering*. B.S., Univ. of Texas, Austin, 1983; M.S., *ibid.*, 1981; Ph.D., Univ. of Texas-Austin, 1991 (1991)
- Shane A. Corwin**, *Associate Professor of Finance and Bernard J. Hank Professor*. B.S., Mankato State Univ., 1990, M.B.A., *ibid.*, 1992, Ph.D., Ohio State Univ., 1996 (2000)
- Thomas F. Cosimano**, *Professor of Finance and Concurrent Professor of Economics and Econometrics*. B.S., State Univ. of New York-Buffalo, 1974, M.A., *ibid.*, 1977, Ph.D., *ibid.*, 1979 (1987)
- Daniel J. Costello**, *Professor of Electrical Engineering and Leonard Bettex Chair in Electrical Engineering*. B.S.E.E., Seattle Univ., 1964, M.S., Univ. of Notre Dame, 1966, Ph.D., *ibid.*, 1970 (1985)
- Rev. John J. Coughlin, O.F.M.**, *Professor of Law*. B.A., Niagara Univ., 1976, M.A., Columbia University Teachers College, 1982, Th.M., Princeton Theological Seminary, 1984, J.D., Harvard Univ., 1987, J.D., Pontifical Gregorian Univ., 1990, J.C.D., *ibid.*, 1994 (2003)
- Donald Crafton**, *Professor of Film, Television, and Theatre, Fellow of the Nanovic Institute for European Studies, and Endowed Chair, Notre Dame Professor of Film and Culture*. B.A., Univ. of Michigan, 1969, M.A., Univ. of Iowa, 1970, M.A., Yale Univ., 1974, Ph.D., *ibid.*, 1977 (1997)
- Craig J. Cramer**, *Professor of Music*. B.Mus., Westminster Choir College, 1976, M.Mus., Eastman School Music, 1977, Ph.D., *ibid.*, 1983 (1981)
- Michael J. Cramer**, *Assistant Professional Specialist in Biological Sciences*. B.A., Earlham College, 1998, T.B., Texas Technical Univ., 1998, Ph.D., Univ. of Cincinnati, 2006 (2007)
- J. Michael Crant**, *Professor of Management*. B.B.A., Univ. of Florida, 1983; M.B.A., *ibid.*, 1985; Ph.D., Univ. of North Carolina at Chapel Hill, 1990 (1990)
- Xavier Creary**, *Professor of Chemistry and Biochemistry and the Charles L. Huisiking Chair*. B.S., Seton Hall Univ., 1968, Ph.D., Ohio State Univ., 1973 (1974)
- Jon R. Crist**, *Professor of Army Science*. B.S., U.S. Military Academy, 1991, M.B.A., Embry-Riddle Aeronautical Univ., 2003 (2007)
- Richard Cross**, *Professor of Philosophy and the Rev. John A. O'Brien Chair in Philosophy (11)*. B.A. Theology, Univ. of Oxford, 1986, D.Phil., *ibid.*, 1991, M.A., *ibid.*, 1992 (2007)
- Norman A. Crowe**, *Professor of Architecture*. B.Arch., Univ. of Oregon, 1964, M.Arch., Cornell Univ., 1970 (1974)
- Charles R. Crowell**, *Associate Professor of Psychology*. B.A., Univ. of Notre Dame, 1970, M.A., Univ. of Iowa, 1972, Ph.D., *ibid.*, 1973 (1974)
- Hal R. Culbertson**, *Professional Specialist in the Joan B. Kroc Institute for International Peace Studies*. B.A., Wheaton College, 1986, M.Phil., Univ. of Illinois Urbana-Champaign, 1990, J.D., *ibid.*, 1991, M.A., Univ. of Notre Dame, 1996 (1997)
- E. Mark Cummings**, *Professor of Psychology, the Notre Dame Chair in Psychology, Fellow of the Nanovic Institute for European Studies, and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Johns Hopkins Univ., 1972, M.A., Univ. of California at Los Angeles, 1973, Ph.D., *ibid.*, 1977 (1996)
- Kathleen S. Cummings**, *Professional Specialist in the Cushman Center for the Study American Catholicism, Concurrent Assistant Professor of History, and Concurrent Professional Specialist*. M.A., Univ. of Scranton, 1993, B.A., *ibid.*, 1993, M.A., Univ. of Notre Dame, 1995, Ph.D., *ibid.*, 1999 (2001)
- Lawrence S. Cunningham**, *Professor of Theology and the Rev. John A. O'Brien Chair in Theology*. S.T.L., Pontifical Gregorian Univ., 1961, M.A., Florida State Univ., 1963, Ph.D., *ibid.*, 1969 (1987)
- Mary R. D'Angelo**, *Associate Professor of Theology*. B.A., Fordham Univ., 1969, M.A., Yale Univ., 1972, Ph.D., *ibid.*, 1976 (1993)
- John P. D'Arcy**, *Assistant Professor of Management*. B.S., Pennsylvania State Univ., 1997, M.B.A., La Salle Univ., 2000, Ph.D., Temple Univ., 2005 (2007)
- Crislyn D'Souza-Schorey**, *Associate Professor of Biological Sciences and Walther Cancer Institute Chair I*. B.S., Univ. of Bombay, 1986, M.S., *ibid.*, 1988, Ph.D., Univ. of Texas-San Antonio, 1992 (1998)
- Zhi Da**, *Assistant Professor of Finance*. B.A., National Univ. of Singapore, 1999, M1, *ibid.*, 2001, Ph.D., Northwestern Univ., 2006 (2006)
- Brian E. Daley**, *Professor of Theology and the Catherine F. Huisiking Chair in Theology*. B.A., Fordham Univ., 1961, M.A., Merton College Oxford, 1964, B.A., *ibid.*, 1964, Ph.L., Loyola Univ.-Chicago, 1966, S.T.L., Philosophisch-Theologische, 1972, Ph.D., Univ. of Oxford, 1978 (1996)
- Gay N. Dannelly**, *Librarian, University Libraries*. B.A., Univ. of Denver, 1965, M.A., Univ. of Wisconsin-Madison, 1970 (2000)
- John Darby**, *Professional Specialist in the Joan B. Kroc Institute for International Peace Studies*. B.A., Queens Univ. of Belfast, 1962, Ph.D., New Univ. of Ulster, 1985 (2000)
- Jaleh M. Dashti-Gibson**, *Associate Professional Specialist in the Joan B. Kroc Institute for International Peace Studies and Director of the Academic Programs*. B.A., Texas A&M Univ., 1990, M.A., Univ. of Notre Dame, 1992, Ph.D., *ibid.*, 1998 (1998)
- Marian A. David**, *Professor of Philosophy*. M.A., Univ. of Arizona, 1989, Ph.D., *ibid.*, 1990 (1989)
- Darren W. Davis**, *Professor of Political Science*. B.S., Lamar Univ., 1988, M.A., Louisiana State Univ., 1990, Ph.D., Univ. Texas Houston, 1994 (2007)
- James H. Davis**, *Associate Professor of Management and Director and the Gigot Stegfred II and O'Shaughnessy Chair in Family Business*. Ph.D., Univ. of Iowa, 1991 (1991)
- Keith W. Davis**, *Assistant Professional Specialist in Science Computing and Director of the the Digital Visualization Theatre*. B.S., Univ. of Tulsa, 1999, M.S., Clemson Univ., 2003, Ph.D., *ibid.*, 2007 (2008)

## FACULTY

- Maureen Gillespie Dawson**, *Assistant Professional Specialist in the Dean's Office—First Year of Studies*. B.S., Rutgers Univ. Cook College, 1984, M.A., Middlebury College, 1987, Ph.D., New York Univ., 1996 (2005)
- Jeanne D. Day**, *Professor of Psychology and Fellow of the Institute for Educational Initiatives*. B.A., Univ. California San Diego, 1974, B.E., Univ. of Illinois Urbana-Champaign, 1977, M.A., *ibid.*, 1977, Ph.D., *ibid.*, 1980 (1980)
- Martine M. De Ridder**, *Associate Professional Specialist in College Seminar—Arts and Letters, Director of the Hesburgh Program in Public Service, and Concurrent Associate Professional Specialist, the College Seminar*. Ph.D., Univ. of Tennessee Knoxville, 1980 (1986)
- Kenneth J. DeBoer**, *Associate Professional Specialist in the Dean's Office—First Year of Studies and Assistant Dean, Dean—First Year of Studies*. B.A., Hope College, 1974, M.A., Univ. of Notre Dame, 1976 (1978)
- Melanie E. Deford**, *Associate Professional Specialist in the Center for Transgene Research*. A.S., Lake Michigan College, 1984, B.A., Wright State Univ., 1987, M.S.A., Univ. of Notre Dame, 2002 (1988)
- Alan R. DeFrees**, *Associate Professional Specialist in Architecture*. B.Arch., Univ. of Notre Dame, 1974 (1996)
- Michael R. DePaul**, *Professor of Philosophy*. B.A., Univ. of Notre Dame, 1976, M.A., Ohio State Univ., 1979, Ph.D., Brown Univ., 1983 (1982)
- Seamus F. Deane**, *Professor of English, the Donald R. Keough Family Chair in Irish Studies, and Fellow of the Keough-Naughton Institute for Irish Studies*. B.A., Queens Univ. of Belfast, 1961, M.A., *ibid.*, 1963, Ph.D., Univ. of Cambridge, 1966 (1993)
- Noreen Deane-Moran**, *Associate Professional Specialist in English and Associate Professional Specialist, Graduate School*. B.A., College of New Rochelle, 1963, M.A., Univ. of Notre Dame, 1964, M.A., *ibid.*, 1968, Ph.D., *ibid.*, 1982 (1982)
- Mark Dehmlo**, *Assistant Librarian, University Libraries*. B.A., Univ. of Maine at Orono, 2000, B.S., *ibid.*, 2000, M.L.S., Univ. of Illinois-Chicago, 2004 (2001)
- Cornelius F. Delaney**, *Professor of Philosophy and Director of the Arts and Letters Honors Program*. B.A., St. John's Seminary, 1961, M.A., Boston College, 1962, Ph.D., Saint Louis Univ., 1967 (1967)
- Antonio Delgado**, *Assistant Professor of Physics*. B.S., Universidad Autonoma, 1997, Ph.D., *ibid.*, 2001 (2007)
- Andrew B. Deliyannides**, *Associate Professional Specialist in the Office of Latino Studies*. B.A., Calvin College, 1989, M.A., Univ. of Notre Dame, 1993, Ph.D., *ibid.*, 2000, Ph.D., *ibid.*, 2000 (2007)
- Jo Ann DellaNeve**, *Associate Professor of Romance Languages and Literatures and Fellow of the Nanovic Institute*. B.A., Bryn Mawr College, 1976, M.A., Univ. of Pennsylvania, 1978, M.A., Princeton Univ., 1980, Ph.D., *ibid.*, 1982 (1982)
- Denise M. DellaRossa**, *Associate Professional Specialist in German and Russian Languages and Literatures and Fellow of the Nanovic Institute*. A.B., Montana State Univ., 1989, M.A., Mississippi St Univ., 1991, Ph.D., Univ. of Wisconsin-Madison, 2002 (2006)
- Debra M. Desrochers**, *Assistant Professor of Marketing*. B.S., Bates College, 1979, M.B.A., Univ. of Rochester, 1996, Ph.D., *ibid.*, 2000 (1999)
- Michael Detlefsen**, *Professor of Philosophy and Concurrent Assistant Professor of Arts and Letters College Seminar*. A.B., Wheaton College, 1971, Ph.D., Johns Hopkins Univ., 1976 (1983)
- Sarvanan Devaraj**, *Associate Professor of Management and Bernard J. Hank Professor*. B.S., Bangalore Univ., 1989, M.S., Univ. of Alabama, 1991, Ph.D., Univ. of Minnesota, 1997 (1996)
- David P. Devine**, *Assistant Professional Specialist in Civil Engineering and Geological Sciences*. B.S., Univ. of Notre Dame, 1990, M.S., Purdue Univ., 2000 (2007)
- Jean A. Dibble**, *Associate Professor of Art, Art History, and Design*. B.S., Univ. of Wisconsin-Madison, 1979, M.A., Univ. of New Mexico Main, 1981, M.A., Univ. of Wisconsin-Milwaukee, 1988 (1989)
- Jeffrey A. Diller**, *Associate Professor of Mathematics*. B.S., Univ. of Dayton, 1988, Ph.D., Univ. of Michigan, 1993 (1998)
- Malgorzata Dobrowolska-Furdyna**, *Professor of Physics*. M.S., Warsaw Univ., 1972, Ph.D., Polish Academy of Science, 1980 (1987)
- Elizabeth J. Doering**, *Associate Professional Specialist in College Seminar—Arts and Letters, and Concurrent Associate Professor of College Seminar*. B.A., Douglas College, 1954, M.Ed., Goucher College, 1955, M.A., Univ. of Notre Dame, 1969, Ph.D., Northwestern Univ., 1992 (1993)
- Caroline J. Domingo**, *Associate Professional Specialist in the Institute for Latino Studies*. M.A., Univ. of Cambridge, 1974 (1984)
- Deborah L. Donahue**, *Associate Professional Specialist in the Center for Transgene Research*. A.A., Columbia Greene Community College, 1994, B.S., Cornell Univ., 1996 (2001)
- William L. Donaruma**, *Associate Professional Specialist in Film, Television, and Theatre*. B.A., Univ. of Notre Dame, 1989 (1998)
- Richard E. Donnelly**, *Professional Specialist in Film, Television, and Theatre and Fellow of the Nanovic Institute*. B.F.A., Univ. of Wisconsin the Center, 1974, M.F.A., School of the Art Institute of Chicago, 1975 (1991)
- Margaret A. Doody**, *Professor of English, the John and Barbara Glynn Family Chair in Literature, and Director of the Ph.D. in Literature Program*. B.A., Dalhousie University Halifax, 1960, B.A., Lady Margaret Hall Oxford, 1962, M.A., *ibid.*, 1967, Ph.D., Univ. of Oxford, 1968 (2000)
- Dennis Doordan**, *Professor of Architecture, Department Chair, Art, Art History, and Design, and Fellow of the Nanovic Institute*. Ph.D., Columbia Univ., 1983 (1990)
- Matthew J. Doppke**, *Assistant Professional Specialist in College Seminar—Arts and Letters*. B.A., Oakland Univ., 1988, Ph.D., Washington Univ., 1999 (1997)
- Kirk B. Doran**, *Instructor of Economics and Econometrics and Fellow of the the Helen Kellogg Institute for International Studies*. Ph.D., Princeton Univ., 2007, M.S., Harvard Univ., B.A., *ibid.* (2007)
- Erika Doss**, *Professor of American Studies and Department Chair, American Studies*. B.A., Ripon College, 1978, M.A., Univ. of Minnesota, 1981, Ph.D., *ibid.*, 1983 (2007)
- Julia V. Douthwaite**, *Professor of Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Washington, 1981; Cert. de Maitrise, Univ. de Naples, France, 1984; M.A., Princeton Univ., 1986; Ph.D., *ibid.*, 1990 (1991)
- Rev. Robert A. Dowd, C.S.C.**, *Assistant Professor of Political Science*. B.A., Univ. of Notre Dame, 1987, Ph.D., American College for the Appli, 2003 (2001)
- Paul A. Down**, *Associate Professor of Art, Art History, and Design*. B.A., Andrews Univ., 1969, M.F.A., Univ. of Notre Dame, 1982 (1983)
- Thomas L. Doyle**, *Professional Specialist in the Alliance for Catholic Education, Fellow of the Institute for Educational Initiatives, and Director of the Master of Education Program*. Ph.D., Univ. of Notre Dame, 1973 (2001)
- Robert A. Dreves**, *Associate Professional Specialist in Marketing*. B.B.A., Univ. of Notre Dame, 1966, M.B.A., Northwestern Univ., 1967 (1993)
- Kevin C. Dreyer**, *Associate Professor of Film, Television, and Theatre*. B.F.A., Carnegie Mellon Univ., 1975 (1989)
- Rev. Michael S. Driscoll**, *Associate Professor of Theology*. S.T.L., Pontifica Universita Gregorian, 1977, S.T.L., Pontificum Athenaeum Anselmian, 1980, Ph.D., Catholic Institute of Paris, 1986, Ph.D., Univ. de Paris-Sorbonne, 1986 (1994)
- Jennifer DuBois**, *Assistant Professor of Chemistry and Biochemistry*. B.S., Cornell College, 1995, B.S., Cornell Univ., 1995, Ph.D., Stanford Univ., 2000 (2004)
- Elizabeth A. Dube**, *Associate Librarian, University Libraries*. B.A., Univ. of Connecticut, 1993 (1998)

## FACULTY

- J. Christophe Ducom**, *Associate Professional Specialist in Science Computing*. M.S., Univ. of Bordeaux I, 1991, Ph.D., Univ. of Aix-Marseilles I, 1997 (2001)
- Giles E. Duffield**, *Assistant Professor of Biological Sciences*. B.S., Univ. of Nottingham, 1992, Ph.D., Univ. of Cambridge, 1998 (2006)
- John M. Duffy**, *Francis O'Malley Director of the University Writing Program and O'Neill Family Chair*. B.A., Boston College, 1977, M.A., University College Dublin, 1979, M.A., Columbia University Teachers College, 1982, Ph.D., Univ. of Wisconsin-Madison, 2000 (1998)
- Timothy L. Dukeman**, *Assistant Professor of Army Science*. B.S., U.S. Military Academy, 1990, M.S., Sam Houston State Univ., 1997 (2006)
- John G. Duman**, *Professor of Biological Sciences and the Martin J. Gillen Chair in Biological Sciences*. B.S., Pennsylvania St Univ., 1968, Ph.D., Univ. California San Diego, 1974 (1974)
- Stephen D. Dumont**, *Professor of Philosophy and Department Chair, Philosophy*. B.A., Wabash College, 1974, M.A., Univ. of Toronto, 1976, Ph.D., *ibid.*, 1983 (2001)
- Ian B. Duncanson**, *Staff Professional Specialist in the Radiation Laboratory*. A.B., Dartmouth College, 1972, B.S., Univ. of Nebraska at Omaha, 1979 (1985)
- Patrick F. Dunn**, *Professor of Aerospace and Mechanical Engineering*. B.S., Purdue Univ., 1970, M.S., *ibid.*, 1971, Ph.D., *ibid.*, 1974 (1985)
- Robert M. Dunn**, *Professional Specialist in the Dean's Office—Engineering*. B.S., Univ. of Notre Dame, 1965, M.S., Pennsylvania State Univ., 1967, Ph.D., Univ. of Illinois Urbana-Champaign, 1971 (2001)
- Rev. John S. Dunne, C.S.C.**, *Professor of Theology and the John A. O'Brien Chair in Theology*. B.A., Univ. of Notre Dame, 1951, Ph.D., Pontifical Gregorian University, 1958 (1957)
- Fernand N. Dutilleul**, *Professor of Law*. B.A., Assumption College, 1962, J.D., Univ. of Notre Dame, 1965 (1971)
- Amitava K. Dutt**, *Professor of Economics and Policy Studies and Fellow of the Institute for International Peace Studies*. Ph.D., Massachusetts Institute of Technology, 1983 (1988)
- Lawrence H. Dwyer**, *Associate Professional Specialist in Music and Assistant Director of the Music*. B.A., Univ. of Notre Dame, 1966, M.S., Univ. of Illinois Urbana-Champaign, 1967 (2001)
- William G. Dwyer**, *Professor of Mathematics, the William J. Hank Family Chair in Mathematics, and Department Chair, Mathematics*. B.A., Boston College, 1969, Ph.D., Massachusetts Institute of Technology, 1973 (1980)
- Kenneth W. Dye**, *Professor of Music, Concurrent Professor of Computer Applications, and Director of the Band*. B.Mus., Univ. of Southern California, 1974, M.A., California State Univ., Long Beach, 1980, M.B.A., Univ. of Houston, Ed.D., Univ. of Houston, 1983 (1998)
- Matthew J. Dyer**, *Associate Professor of Mathematics*. B.A., Sydney Univ., 1983, M.S., *ibid.*, 1985, Ph.D., Univ. of Sydney, 1988 (1989)
- Cornelius R. Eady**, *Associate Professor of English*. B.A., State Univ. of New York Empire College, 1986, M.F.A., Warren Wilson College, 1986 (2005)
- Robert F. Easley**, *Associate Professor of Management*. B.A., Univ. of Illinois Urbana-Champaign, 1976, M.B.A., Pennsylvania State Univ., 1989, Ph.D., Indiana Univ-Bloomington, 1996 (1994)
- Peter Easton**, *Professor of Accountancy and Andersen Alumni Professor of Accountancy*. B.E., Univ. of Adelaide, 1973, Ph.D., Univ. of California Berkeley, 1984 (2003)
- Kathleen M. Eberhard**, *Associate Professor of Psychology*. B.A., Univ. of Rochester, 1987, M.A., Michigan State Univ., 1991, Ph.D., *ibid.*, 1993 (1996)
- Richard M. Economakis**, *Associate Professor of Architecture*. B.Arch., Cornell Univ., 1983, M.Arch., *ibid.*, 1995 (1996)
- Edmund P. Edmonds**, *Professor of Law and Director of the Law Library*. B.A., Univ. of Notre Dame, 1973, J.D., University Toledo, 1978 (2006)
- Michael T. Edwards**, *Assistant Vice President, Office of Research, Associate Professional Specialist, and Concurrent Instructor, Business Ethics*. B.S.B.A., Xavier Univ., 1977, M.P.A., Golden Gate Univ., 1981, M.S.A., Univ. of Notre Dame., 1989, M.B.A., *ibid.*, 2005 (1997)
- Virgilio P. Elizondo**, *Professor of Theology, the Notre Dame Chair in Pastoral and Hispanic Theology, and Fellow of the Helen Kellogg Institute for International Studies*. B.S., St. Mary's Univ., 1957, M.A., Ateneo de Manila Univ., 1969, Ph.D., Institutet Catholique de Paris, 1978 (2000)
- Maud Ellmann**, *Professor of English and the Donald and Marilyn Keough Chair in Irish Studies*. B.A., King's College Cambridge, 1975, Ph.D., St Anne's College Oxford, 1978 (2004)
- Kent Emery**, *Professor in the Program of Liberal Studies and Fellow of the Medieval Institute*. B.A., Univ. of Virginia, 1966, M.A., Univ. of Toronto, 1968, Ph.D., *ibid.*, 1976 (1985)
- Scott Emrich**, *Assistant Professor of Computer Science and Engineering*. B.S., Loyola College Maryland, 2002, Ph.D., Iowa State Univ., 2007 (2007)
- Georges Enderle**, *Professor of Marketing, Fellow of the Nanovic Institute for European Studies, Fellow of the Helen Kellogg Institute for International Studies, and the John T. Ryan Jr. Professor of International Business Ethics*. Ph.D., Univ. of Fribourg, 1982 (1992)
- Nahid A. Erfan**, *Associate Professional Specialist in the Dean's Office—First Year of Studies*. B.S., Purdue Univ., 1979, M.S., *ibid.*, 1981, M1, *ibid.*, 1985 (1991)
- Marie-Christin M. Escoda-Risto**, *Associate Professional Specialist in Romance Languages and Literatures*. B.A., Central Michigan Univ., 1976, M.A., Univ. of Notre Dame, 1992, M.A., Western Michigan Univ., (1991)
- Morten R. Eskildsen**, *Assistant Professor of Physics*. B.S., Univ. of Copenhagen, 1993, M.S., *ibid.*, 1994, Ph.D., *ibid.*, 1998 (2003)
- Linda N. Espahbodi**, *Associate Professional Specialist in Master of Accountancy*. B.A., Florida International University, 1985 (1999)
- Michael J. Etzel**, *Professor of Marketing*. B.B.A., Univ. of Portland, 1964, M.B.A., Kent State Univ., 1966, DB, Univ. of Colorado-Boulder, 1970 (1980)
- William N. Evans**, *Professor of Economics and Econometrics*. B.A., Wake forest Univ., 1983, M.A., Duke Univ., 1985, Ph.D., *ibid.*, 1987, Ph.D., *ibid.*, 1987 (2007)
- Samuel R. Evens**, *Associate Professor of Mathematics*. B.A., Haverford College, 1984, Ph.D., Massachusetts Institute of Technology, 1998 (1999)
- David W. Fagerberg**, *Associate Professor of Theology and Director of the Center for Pastoral Liturgy*. B.A., Augsburg College, 1973, M.Div., Luther Theological Seminary, 1977, M.A., St. John's Univ., 1982, S.T.L., Yale Univ. Divinity School, 1983, M.A., Yale Univ., 1990, Ph.D., *ibid.*, 1991 (2003)
- Stephen M. Fallon**, *Professor in the Program of Liberal Studies, Concurrent Professor of English, Department Chair in the Program of Liberal Studies, and Fellow of the Nanovic Institute*. B.A., Princeton Univ., 1976, M.A., McGill Univ., 1978, Ph.D., Univ. of Virginia, 1985 (1985)
- Larissa A. Fast**, *Assistant Professor of Sociology*. B.A., Bethel College, 1992, M.A., Univ. of Notre Dame, 1995, Ph.D., George Mason Univ., 2002 (2007)
- Patrick J. Fay**, *Associate Professor of Electrical Engineering*. B.S.E.E., Univ. of Notre Dame, 1991, M.S., Univ. of Illinois Urbana-Champaign, 1993, Ph.D., *ibid.*, 1996 (1997)
- Leonid Faybusovich**, *Professor of Mathematics*. M.S., Leningrad State Univ., 1971, Ph.D., Harvard Univ., 1991 (1991)
- Jeffrey L. Feder**, *Professor of Biological Sciences*. B.S., Pomona College, 1980, Ph.D., Michigan State Univ., 1989 (1993)
- Jeremy B. Fein**, *Professor of Civil Engineering and Geological Sciences*. B.A., Univ. of Chicago, 1983, M.S., Northwestern Univ., 1986, Ph.D., *ibid.*, 1989 (1996)
- Michael T. Ferdig**, *Assistant Professor of Biological Sciences*. B.S., Univ. of Nebraska-Lincoln, 1987, M.S., *ibid.*, 1990, Ph.D., Univ. of Wisconsin-Madison, 1997 (2001)

## FACULTY

**Guillermo J. Ferraudi**, *Professional Specialist in the Radiation Laboratory*. M.S., Univ. of Buenos Aires, 1967, Ph.D., Univ. of Chile, 1972 (1976)

**Isabel A. Ferreira Gould**, *Assistant Professor of Romance Languages and Literatures, Fellow of the Nanovic Institute for European Studies, and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Rhode Island College, 1994, M.A., Brown Univ., 1997, Ph.D., *ibid.*, 2003 (2001)

**Barbara J. Fick**, *Associate Professor of Law and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Creighton Univ., 1972, J.D., Univ. of Pennsylvania, 1976 (1983)

**Kenneth E. Filchak**, *Assistant Professional Specialist in Biological Sciences*. B.S., Michigan State Univ., 1994, Ph.D., Univ. of Notre Dame, 2001 (2001)

**John M. Finnis**, *Professor of Law, Concurrent Professor of Philosophy, and the Biolchini Family Chair in Law*. L.L.B., Univ. of Adelaide, 1961, Ph.D., University College Oxford, 1965 (1995)

**Jed F. Fisher**, *Professional Specialist in Chemistry and Biochemistry*. B.S., State Univ. of New York at Stony Brook, 1972, Ph.D., Massachusetts Institute of Technology, 1976 (2004)

**Janet Fisher-McPeak**, *Associate Professional Specialist in Romance Languages and Literatures*. M.A., Middlebury College, 1976, M.A., *ibid.*, 1979, B.A., *ibid.*, 1987, Ph.D., *ibid.*, 1997 (1989)

**Robert M. Fishman**, *Professor of Sociology, Fellow of the Helen Kellogg Institute for International Studies, and Fellow of the Nanovic Institute for European Studies*. B.A., Yale Univ., 1977, M.A., *ibid.*, 1979, M.Phil., *ibid.*, 1980, Ph.D., *ibid.*, 1985 (1992)

**Rev. James F. Flanagan, C.S.C.**, *Associate Professor of Art, Art History, and Design*. B.A., Univ. of Notre Dame, 1958, M.A., *ibid.*, 1963, M.F.A., George Washington Univ., 1965 (1965)

**Thomas P. Flint**, *Professor of Philosophy*. B.A., Saint Ambrose College, 1975, Ph.D., Univ. of Notre Dame, 1980 (1982)

**Patrick J. Flynn**, *Professor of Computer Science and Engineering and Concurrent Professor of Electrical Engineering*. B.S.E.E., Michigan State Univ., 1985, M.S., *ibid.*, 1986, Ph.D., *ibid.*, 1990 (2001)

**Margaret M. Forster**, *Associate Professional Specialist in Finance*. B.S., Univ. of Sao Paulo, 1982, M.B.A., Cornell Univ., 1985, M.S., *ibid.*, 1987, Ph.D., *ibid.*, 1990 (2005)

**James K. Foster**, *Associate Professional Specialist in Preprofessional Studies and Baldinger Endowment*. B.S., Univ. of Notre Dame, 1977, Ph.D., Univ. of Illinois Urbana-Champaign, 1981, Ph.D., Univ. of Illinois Medical, 1981, M.Div., Univ. of Notre Dame, 1994 (1997)

**Christopher Fox**, *Professor of English, the John and Jean Oesterle Chair in Thomistic Studies, Director of the Keough-Naughton Institute for Irish Studies, Fellow of the Nanovic Institute, and Department Chair, Irish Language and Literature*. B.A., Cleveland State Univ., 1971, M.A., State Univ. of New York-Binghamton, 1974, Ph.D., *ibid.*, 1978 (1986)

**Judith L. Fox**, *Associate Professional Specialist in Legal Aid Clinic*. B.S., Wilkes College, 1985, J.D., Univ. of Notre Dame, 1993 (1997)

**James M. Frabutt**, *Associate Professional Specialist in the Alliance for Catholic Education and Concurrent Associate Professor of Psychology*. B.A., Univ. of Notre Dame, 1995, M.S., Univ. of North Carolina at Greensboro, 1998, Ph.D., *ibid.*, 2000 (2007)

**Mary E. Frandsen**, *Associate Professor of Music*. B.Mus., State Univ. of New York College at Potsdam, 1980, M.A., Univ. of Rochester, 1985, Ph.D., *ibid.*, 1997 (1997)

**Curtis D. Franks**, *Assistant Professor of Philosophy*. B.S., Rice Univ., 2000, Ph.D., Univ. California Irvine, 2006 (2006)

**Malcolm J. Fraser**, *Professor of Biological Sciences*. B.S., Wheeling College, 1975, M.S., Ohio State Univ., 1979, Ph.D., *ibid.*, 1981 (1983)

**Stefan G. Frauendorf**, *Professor of Physics*. M.S., Technical Univ. of Dresden, 1968, Ph.D., *ibid.*, 1971 (1998)

**Thomas J. Frecka**, *Professor of Accountancy and the Vincent and Rose Lizzadro Professor of Accountancy*. M.S., Ohio Univ., 1966, Ph.D., Syracuse Univ., 1978 (1990)

**Alfred J. Freddoso**, *Professor of Philosophy and J.A. Oesterle Chair*. B.A., St John Vianney Minor Seminary, 1968, Ph.D., Univ. of Notre Dame, 1976 (1979)

**Stephen A. Fredman**, *Professor of English*. B.F.A., California Institute of Arts, 1971, M.A., California State College Sonoma, 1976, Ph.D., Stanford Univ., 1980 (1980)

**Joseph C. Freeland**, *Associate Professional Specialist in Computer Science and Engineering*. B.S., Purdue Univ., 1985 (1995)

**Dolores W. Frese**, *Professor of English*. B.A., College of Notre Dame of Maryland, 1958, M.A., Univ. of Iowa, 1962, Ph.D., *ibid.*, 1972, Ph.D., *ibid.*, 1972, M.T.S., Univ. of Notre Dame, 2005 (1973)

**Laura S. Fuderer**, *Librarian, University Libraries, and Fellow of the Nanovic Institute for European Studies*. B.A., College of Wooster, 1969, M.L.S., Kent State Univ., 1971; M.A., Fairleigh Dickinson Univ., 1979 (1982)

**James L. Fuehrmeyer**, *Associate Professional Specialist in Accountancy*. B.S., U.S. Military Academy, 1973, M.B.A., Chicago State Univ., 1980 (2007)

**Agustin Fuentes**, *Associate Professor of Anthropology, Nancy O'Neil Chair in Anthropology, Fellow of the Institute for Latino Studies, Fellow of the Center for Social Concerns, Flatley Director of the Office for Undergraduate Fellowships, and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Univ. of California Berkeley, 1989, M.A., *ibid.*, 1991, Ph.D., *ibid.*, 1994 (2002)

**Thomas E. Fuja**, *Professor of Electrical Engineering and Department Chair, Electrical Engineering*. B.S., Univ. of Michigan, 1981, B.S.E.E., *ibid.*, 1981, Ph.D., Cornell Univ., 1987 (1998)

**Jacek K. Furdyna**, *Professor of Physics, the Aurora and Thomas Marquez Chair in Information Theory and Computer Technology, and Fellow of the Nanovic Institute for European Studies*. B.S., Loyola University Chicago, 1955, Ph.D., Northwestern Univ., 1960 (1986)

**Rev. Patrick D. Gaffney, C.S.C.**, *Associate Professor of Anthropology, the Joseph E. Morahan III Chair, Fellow of the Joan B. Kroc Institute for International Peace Studies, and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Univ. of Notre Dame, 1969, M.A., *ibid.*, 1970, M.A., *ibid.*, 1973, M.A., Univ. of Chicago, 1977, Ph.D., *ibid.*, 1982 (1980)

**Samuel S. Gaglio**, *Professional Specialist in Management, Concurrent Instructor in Management, and Assistant Dean, Mendoza College of Business*. B.A., Troy State Univ., 1979, M.S., Univ. of Southern California, 1982 (1989)

**David Galvin**, *Assistant Professor of Mathematics*. B.S., Univ. of Cambridge, 1995, Ph.D., Rutgers Univ., 2002 (2007)

**Pengjie Gao**, *Assistant Professor of Finance*. B.A., Qingdao Univ., 1998, M.S., Univ. of Tennessee Knoxville, 2002, Ph.D., Northwestern Univ., 2007 (2007)

**Kenneth N. Garcia**, *Professional Specialist in the Dean's Office—Arts and Letters, and Associate Director of the Arts and Letters*. B.A., Old College School Humanities, 1983, M.A., Catholic Univ. of America, 1997 (1996)

**Umesh Garg**, *Professor of Physics*. B.S., Birla Institute of Technology, 1972, M.S., *ibid.*, 1974, M.S., State Univ. of New York at Stony Brook, 1975, Ph.D., *ibid.*, 1978 (1982)

**Peter M. Garnavich**, *Professor of Physics*. B.S., Univ. of Maryland, 1980, M.S., Massachusetts Institute of Technology, 1983, Ph.D., Univ. of Washington, 1991 (2000)

**Nicole S. Garnett**, *Associate Professor of Law and Fellow of the Institute for Educational Initiatives*. A.B., Stanford Univ., 1992, J.D., Yale Univ., 1995 (1999)

**Richard Garnett**, *Associate Professor of Law and Fellow of the Institute for Educational Initiatives*. B.A., Duke Univ., 1990, J.D., Yale Univ., 1995 (1999)

## FACULTY

- John F. Gaski**, *Associate Professor of Marketing*. B.B.A., Univ. of Notre Dame, 1971, M.B.A., *ibid.*, 1973, M.B.A., Univ. of Wisconsin-Madison, 1979, Ph.D., *ibid.*, 1982 (1980)
- David W. Gasperetti**, *Associate Professor of German and Russian Languages and Literatures and Department Chair, German and Russian Languages and Literatures*. Ph.D., Univ. of California at Los Angeles, 1985 (1989)
- Liangyan Ge**, *Associate Professor of East Asian Languages & Cultures*. B.A., Hefei Polytechnic Univ., 1982, M.A., Nanjing Univ., 1984, Ph.D., Indiana Univ.-Bloomington, 1995 (1995)
- Michael Gekhtman**, *Professor of Mathematics*. B.S., Kiev State Univ., 1985, M.S., *ibid.*, 1985, Ph.D., National Academy of Science, 1990 (1998)
- Michele Gelfman**, *Associate Professional Specialist in Physical Education*. B.S.E., Northeast Missouri State Univ., 1976, M.S., Indiana Univ.-Bloomington, 1977 (1985)
- Gretchen A. Gerrish**, *Assistant Professional Specialist in Biological Sciences*. B.A., Lawrence Univ., 1998, M.S., Univ. of Illinois Urbana-Champaign, 2001 (2007)
- Stephen E. Gersh**, *Professor of Philosophy and Concurrent Professor of Philosophy*. B.A., Univ. of Cambridge, 1969, M.A., *ibid.*, 1973 (1977)
- J. Daniel Gezelter**, *Associate Professor of Chemistry and Biochemistry*. B.S., Duke Univ., 1989, M.A., Univ. of Cambridge, 1990, Ph.D., Univ. of California Berkeley, 1995 (1999)
- Nasir Ghiaseddin**, *Associate Professor of Management*. B.S., Arya-Mehr Univ. of Technology, 1970, M.S., Purdue Univ., 1975, Ph.D., *ibid.*, 1982 (1982)
- Roya R. Ghiaseddin**, *Associate Professional Specialist in Management and Concurrent Associate Professor of Psychology*. B.S., Arya-Mehr Univ. of Technology, 1977, M.S.A., Univ. of Notre Dame, 1989, M.A., *ibid.*, 1991, Ph.D., *ibid.*, 1995 (1995)
- Benedict F. Giamo**, *Associate Professor of American Studies*. B.A., Baldwin Wallace College, 1976, M.A., New School for Social Research, 1978, Ph.D., Emory Univ., 1987 (1990)
- Luke C. Gibbons**, *Professor of English, the Donald R. Keough Family Chair in Irish Studies, Fellow of the Keough-Naughton Institute for Irish Studies, and Fellow of the Nanovic Institute for European Studies*. B.A., University College Galway, 1972, M.A., *ibid.*, 1976, Ph.D., Trinity College, 1989 (2000)
- Bradley S. Gibson**, *Associate Professor of Psychology*. B.S., Colorado State Univ., 1982, Ph.D., Univ. of Arizona, 1992 (1994)
- Marisa L. Gift**, *Assistant Professional Specialist in the Dean's Office—First Year of Studies*. B.A., Drake Univ., 2002, M.A., Purdue Univ., 2006 (2006)
- Timothy J. Gilbride**, *Assistant Professor of Marketing*. B.B.A., Univ. of Dayton, 1988, M.B.A., Ohio State Univ., 1993, Ph.D., *ibid.*, 2004 (2004)
- Alyssa W. Gillespie**, *Associate Professor of German and Russian Languages and Literatures, Fellow of the Nanovic Institute for European Studies, and Notre Dame Chair in Russian Language and Literature*. B.A., Brandeis Univ., 1990, M.A., Univ. of Wisconsin-Madison, 1992, Ph.D., *ibid.*, 1998 (1999)
- Robert M. Gimello**, *Research Professor of Theology*. B.A., Seton Hall Univ., 1964, M.A., *ibid.*, 1965, Ph.D., Columbia Univ., 1976 (2006)
- Donna M. Glowacki**, *Assistant Professor of Anthropology*. B.A., Miami Univ., 1992, M.A., Univ. of Missouri-Columbia, 1995, Ph.D., Arizona State Univ., 2006 (2007)
- Jill Godmilow**, *Professor of Film, Television, and Theatre*. B.A., Univ. of Wisconsin-Madison, 1965 (1992)
- Bernd Goehring**, *Assistant Professor in the Program of Liberal Studies*. M.Phil., Univ. of Bonn, 1999, M.A., Cornell Univ., 2003, Ph.D., *ibid.*, 2006 (2006)
- Joachim Görres**, *Research Professor of Physics*. B.S., Univ. of Munster, 1974; Dipl., *ibid.*, 1979; Ph.D., *ibid.*, 1983 (1987)
- Dawn M. Gondoli**, *Associate Professor of Psychology*. B.A., State Univ. of New York-Buffalo, 1986, M.S., Univ. of Arizona, 1991, Ph.D., *ibid.*, 1994 (1994)
- Jarren T. Gonzales**, *Assistant Professional Specialist in the Office of Vice President—Graduate School, Assistant Dean, Graduate Recruitment and Retention, and Concurrent Assistant Professional Specialist, Psychology*. B.A., Univ. of Portland, 1999, M.A., Univ. of Notre Dame, 2003, Ph.D., *ibid.*, 2006 (2006)
- DeeAnne M. Goodenough-Lashua**, *Assistant Professional Specialist in Chemistry and Biochemistry*. B.S., Valparaiso Univ., 1994, Ph.D., Univ. of Michigan, 2001 (2001)
- Holly V. Goodson**, *Associate Professor of Chemistry and Biochemistry*. A.B., Princeton Univ., 1988, Ph.D., Stanford Univ., 1995 (2000)
- John W. Goodwine Jr.**, *Associate Professor of Aerospace and Mechanical Engineering*. B.S.M.E., Univ. of Notre Dame, 1988, J.D., Harvard Univ., 1991, M.S., California Institute of Technology, 1993, Ph.D., *ibid.*, 1997 (1998)
- Denise M. Goralski**, *Associate Professional Specialist in Physical Education*. M.S., Southern Illinois Univ. at Carbondale, 1985 (1988)
- Stanislav V. Gordeyev**, *Research Assistant Professor of Aerospace and Mechanical Engineering*. M.S., Moscow Institute. Physics and Technology., 1991, B.A., Moscow Institute. of Physics and Technology, 1991, Ph.D., Univ. of Notre Dame, 1999 (1999)
- Eugene F. Gorski**, *Professional Specialist in Theology*. B.Phil., Univ. of Notre Dame, 1953, M.Mus., *ibid.*, 1955, S.T.L., Pontifical Gregorian University, 1961, Ph.D., Catholic Institute of Paris, 1971 (1986)
- Andrew C. Gould**, *Associate Professor of Political Science, Fellow of the Nanovic Institute for European Studies, and Fellow of the Helen Kellogg Institute for International Studies*. A.B., Harvard Univ., 1985, M.A., Univ. of California Berkeley, 1986, Ph.D., *ibid.*, 1992 (1993)
- Robert D. Goulding**, *Assistant Professor in the Program of Liberal Studies and Concurrent Assistant Professor of History*. B.S., Univ. of Canterbury, 1989, B.A., *ibid.*, 1990, M.A., the Warburg Institute, 1992, Ph.D., *ibid.*, 1999 (2003)
- Daniel A. Graff**, *Associate Professional Specialist in History*. B.A., Univ. of Illinois Urbana-Champaign, 1990, M.A., Univ. of Wisconsin-Madison, 1993, Ph.D., *ibid.*, 2004 (2001)
- Karen Graubart**, *Associate Professor of History and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Barnard College, 1984, Ph.D., Univ. of Massachusetts, 2000 (2007)
- Richard L. Gray**, *Associate Professor of Art, Art History, and Design*. B.S., Illinois State Univ., 1976, M.F.A., Rochester Institute of Technology, 1982 (1982)
- Barbara J. Green**, *Associate Professor of English*. B.A., Univ. of Chicago, 1983, M.A., Univ. of Virginia, 1985, Ph.D., Univ. of Virginia, 1991 (1991)
- Christy D. Greene**, *Associate Professional Specialist in the Dean's Office—First Year of Studies*. B.A., Univ. of Notre Dame, 1996, M.S., Univ. of Pennsylvania, 2001 (2001)
- Stuart Greene**, *Associate Professor of English, Fellow of the Institute for Educational Initiatives, the O'Malley Director of the University Writing Program, and Associate Dean, Arts and Letters*. B.A., State Univ. of New York-Binghamton, 1978, M.A., *ibid.*, 1980, Ph.D., Carnegie Mellon Univ., 1990 (1997)
- Brad S. Gregory**, *Associate Professor of History, Fellow of the Nanovic Institute for European Studies, and Dorothy G. Griffin Associate Professor of Early Modern European History*. B.A., Univ. Catholique De Louva, 1984, B.S., Utah State Univ., 1985, M.A., Univ. of Arizona, 1987, Ph.D., Princeton Univ., 1996 (2003)
- Thomas A. Gresik**, *Professor of Economics and Econometrics and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Northwestern Univ., 1981, M.S., California Institute of Technology, 1982, Ph.D., Northwestern Univ., 1987 (2000)
- John D. Griffin**, *Assistant Professor of Political Science*. B.A., Boston College, 1990, J.D., Univ. of Colorado-Boulder, 1995, Ph.D., Duke Univ., 2002 (2002)
- Paul R. Grimstad**, *Associate Professor of Biological Sciences*. B.S., Concordia College at Moorhead, 1967, M.S., Univ. of Wisconsin-Madison, 1972, Ph.D., *ibid.*, 1973 (1974)

## FACULTY

- Rev. Daniel G. Groody, C.S.C.**, *Assistant Professor of Theology and Fellow of the Nanovic Institute*. B.A., Univ. of Notre Dame, 1986, M.Div., Jesuit School of Theology, 1992, Ph.D., Graduate Theological Union, 2000, S.T.L., Jesuit School of Theology, 2001 (2000)
- Karsten Grove**, *Professor of Mathematics and the Rev. Howard J. Kenna, C.S.C., Memorial Chair in Mathematics*. Ph.D., Univ. of Aarhus, 1974, M.S., *ibid.*, 1974 (2007)
- Joseph P. Guiltinan**, *Professor of Marketing*. B.B.A., Univ. of Notre Dame, 1966, M.B.A., Indiana Univ., 1967, DB, Indiana Univ. Bloomington, 1969 (1987)
- Alexandra Guisinger**, *Assistant Professor of Political Science and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Harvard Univ., 1994, M.A., Yale Univ., 2004, Ph.D., *ibid.*, 2005 (2004)
- Li Guo**, *Associate Professor of the Classics*. B.A., Shanghai International Studies, 1979, Ph.D., Yale Univ., 1994 (1999)
- Vijay Gupta**, *Assistant Professor of Electrical Engineering*. B.S., Indian Institute of Technology-Delhi, 2001, M.S., California Institute of Technology, 2002, Ph.D., *ibid.*, 2006 (2008)
- Matthew J. Gursky**, *Professor of Mathematics*. B.S., Univ. of Michigan, 1986, Ph.D., California Institute of Technology, 1991 (2001)
- Jimmy Gurulé**, *Professor of Law*. B.A., Univ. of Utah, 1974, J.D., *ibid.*, 1980 (1989)
- Sandra M. Gustafson**, *Associate Professor of English*. B.A., Cornell Univ., 1985, Ph.D., Univ. of California Berkeley, 1993 (1993)
- Rev. Gustavo A. Gutierrez, O.P.**, *Professor of Theology, Fellow of the Helen Kellogg Institute for International Studies, and the John Cardinal O'Hara Chair in Theology*. S.T.L., Univ. Catholique de Lyon, 1959, Ph.D., *ibid.*, 1985 (2001)
- Anastasia F. Gutting**, *Professional Specialist in Philosophy and Fellow of the Nanovic Institute for European Studies*. B.A., Saint Louis Univ., 1965, Ph.D., *ibid.*, 1978 (1980)
- Gary M. Gutting**, *Professor of Philosophy, Fellow of the Nanovic Institute for European Studies, and the Notre Dame Chair in Philosophy*. B.A., Saint Louis Univ., 1964, Ph.D., *ibid.*, 1968 (1969)
- David S. Hachen**, *Associate Professor of Sociology and Fellow of the Institute for Educational Initiatives*. B.A., Lake forest College, 1974, M.A., Univ. of Wisconsin-Madison, 1978, Ph.D., *ibid.*, 1983 (1987)
- Gerald Haefel**, *Assistant Professor of Psychology*. A.B., Lawrence Univ., 1997, Ph.D., Univ. of Wisconsin-Madison, 2005 (2006)
- Martin Haenggi**, *Associate Professor of Electrical Engineering*. Ph.D., Univ. of Zurich, 1999 (2001)
- Jan L. Hagens**, *Associate Professional Specialist in College Seminar-Arts and Letters and Fellow of the Nanovic Institute for European Studies*. M.A., Univ. of Virginia, 1983, M.A., Princeton Univ., 1990, Ph.D., *ibid.*, 1993 (1997)
- Kristin M. Hager**, *Assistant Professor of Biological Sciences*. B.S., Univ. of Illinois Urbana-Champaign, 1989, Ph.D., Univ. of Alabama-Birmingham, 1996 (2000)
- Frances Hagopian**, *Associate Professor of Political Science, Fellow of the Helen Kellogg Institute for International Studies, and Michael P. Grace II Chair in Latin American Studies*. B.A., Brandeis Univ., 1975, Ph.D., Massachusetts Institute of Technology, 1986 (1985)
- Alexander J. Hahn**, *Professor of Mathematics, Director of the Kaneb Center for Teaching and Learning, and Fellow of the Nanovic Institute for European Studies*. B.S., Loyola Univ. New Orleans, 1965, M.S., Univ. of Notre Dame, 1968, Ph.D., *ibid.*, 1970 (1972)
- Ethan T. Haimo**, *Professor of Music*. A.B., Univ. of Chicago, 1972, M.F.A., Princeton Univ., 1974, Ph.D., *ibid.*, 1978 (1976)
- Brian C. Hall**, *Associate Professor of Mathematics*. B.S., Cornell Univ., 1988, B.A., *ibid.*, 1988, Ph.D., *ibid.*, 1993 (1999)
- Douglas C. Hall**, *Associate Professor of Electrical Engineering*. B.S., Miami Univ., 1985, M.S., Univ. of Illinois Urbana-Champaign, 1988, Ph.D., *ibid.*, 1991 (1994)
- Thomas N. Hall**, *Associate Professor of English*. A.B., Baylor Univ., 1982, M.A., *ibid.*, 1985, Ph.D., Univ. of Illinois Urbana-Champaign, 1990 (2006)
- Maureen T. Hallinan**, *Professor of Sociology, Fellow of the Institute for Educational Initiatives, Director of the Center for Research on Educational Opportunities, and the William P. and Hazel B. White Chair in English (I)*. B.A., Marymount College, 1961, M.S., Univ. of Notre Dame, 1968, Ph.D., Univ. of Chicago, 1972 (1984)
- John A. Halloran**, *Associate Professor of Finance*. B.S., Saint Louis Univ., 1968, M.B.A., Washington Univ., 1970, Ph.D., *ibid.*, 1976 (1976)
- Eugene W. Halton**, *Professor of Sociology*. B.A., Princeton Univ., 1972, Ph.D., Univ. of Chicago, 1979 (1982)
- Christopher S. Hamlin**, *Professor of History and Fellow of the Nanovic Institute for European Studies*. B.A., Antioch Univ., 1974, M.A., Univ. of Wisconsin-Madison, 1977, Ph.D., *ibid.*, 1982 (1985)
- Graham L. Hammill**, *Associate Professor of English*. B.A., Louisiana State Univ., 1986, Ph.D., Duke Univ., 1992 (1995)
- Qing Han**, *Professor of Mathematics*. B.S., Beijing Univ., 1986, M.S., New York Univ., 1991, Ph.D., *ibid.*, 1993 (1994)
- Noriko Hanabusa**, *Associate Professional Specialist in East Asian Languages & Cultures*. B.A., Keio Univ., 1988, M.A., Univ. of Wisconsin-Madison, 1994 (1994)
- Barbara J. Hanrahan**, *Associate Professional Specialist in University Press and Director of the University Press*. B.A., Wheaton College, 1969, M.A., Univ. of Chicago, 1970 (1999)
- Sandra J. Harmatiuk**, *Professional Specialist in the Dean's Office-First Year of Studies*. B.A., College of Saint Rose, 1963, M.A., *ibid.*, 1970, Ph.D., Univ. of Notre Dame, 1975 (1976)
- Susan C. Harris**, *Associate Professor of English, Fellow of the Nanovic Institute for European Studies, and Fellow of the Keough-Naughton Institute for Irish Studies*. B.A., Yale Univ., 1991, M.A., Univ. of North Carolina at Chapel Hill, 1993, Ph.D., Univ. of Texas-Austin, 1998 (1998)
- Gregory V. Hartland**, *Professor of Chemistry and Biochemistry*. B.S., Univ. of Melbourne, 1985, Ph.D., Univ. of California at Los Angeles, 1991 (1994)
- David B. Hartvigsen**, *Professor of Management*. B.A., Colgate Univ., 1979, M.S., Carnegie Mellon Univ., 1980, Ph.D., *ibid.*, 1984 (1993)
- Mandy L. Havert**, *Assistant Librarian, University Libraries*. B.A., Ball State Univ., 1996, M.L.S., Indiana-Purdue Univ. Indianapolis, 2007 (1997)
- H. David Hayes**, *Professional Specialist in College of Business Gigot Center and the Nolan Chair*. E.M.B.A., Univ. of Notre Dame, 1987 (2000)
- Stephen M. Hayes**, *Librarian, University Libraries*. B.S., Michigan State Univ., 1972, M.A., Western Michigan Univ., 1974, M.S.A., Univ. of Notre Dame, 1979 (1974)
- Anne E. Hayner**, *Assistant Professional Specialist in the Joan B. Kroc Institute for International Peace Studies*. B.A., Univ. of Michigan, 1981, M.A., Earlham College, 1985 (1987)
- Barbara J. Hellenthal**, *Assistant Professional Specialist in Biological Sciences*. B.S., Univ. of Minnesota, 1974 (1980)
- Ronald A. Hellenthal**, *Professor of Biological Sciences*. A.A., Los Angeles Valley College, 1965, B.A., California St. Univ.-Northridge, 1967, Ph.D., Univ. of Minnesota of Minneapolis, 1977 (1977)
- Ben A. Heller**, *Associate Professor of Romance Languages and Literatures and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Univ. of Pennsylvania, 1981, Ph.D., Washington Univ., 1990, M.A., *ibid.*, 1990 (2000)
- Jessica J. Hellmann**, *Assistant Professor of Biological Sciences*. B.S., Univ. of Michigan, 1996, Ph.D., Stanford Univ., 2000 (2003)
- Paul Helquist**, *Professor of Chemistry and Biochemistry*. B.A., Univ. of Minnesota at Duluth, 1969, M.S., Cornell Univ., 1971, Ph.D., *ibid.*, 1972 (1984)

## FACULTY

- Michael L. Hemler**, *Associate Professor of Finance*. B.S., Univ. of Dayton, 1974, Ph.D., Washington Univ., 1980, M.B.A., Univ. of Chicago, 1985, Ph.D., *ibid.*, 1988 (1992)

- Richard K. Hind**, *Associate Professor of Mathematics*. B.A., Univ. of Cambridge, 1993, Ph.D., Stanford Univ., 1997 (2000)
- Peter D. Holland**, *Professor of Film, Television, and Theatre, Fellow of the Nanovic Institute for European Studies, Concurrent Professor of English, McMeel Chair Shakespeare Studies, and Acting Dean, the Graduate School*. B.A., Trinity Hall Cambridge, 1972, Ph.D., *ibid.*, 1977, Ph.D., *ibid.*, 1977 (2002)
- Hope Hollocher**, *Associate Professor of Biological Sciences*. B.A., Univ. of Pennsylvania, 1982, Ph.D., Washington Univ., 1991 (2000)
- Montey G. Holloway**, *Professional Specialist in Philosophy*. B.A., Huntington College, 1972, Ph.D., Univ. of Notre Dame, 1981 (1982)
- Laura G. Holt**, *Professional Specialist in London-On Site, Concurrent Associate Professional Specialist in Theology, and Deputy Director of the London Program*. B.A., Vassar College, 1968, A.B., *ibid.*, 1968, M.A., Univ. of Notre Dame, 1992, Ph.D., *ibid.*, 1999 (1999)
- Joseph E. Holtermann**, *Assistant Librarian, University Libraries*. B.A., Univ. of Notre Dame, 1984, M.A., Middlebury College, 1988, M.A., Univ. of Illinois Urbana-Champaign, 1992 (2005)
- Sallie A. Hood**, *Associate Professor of Architecture*. B.A., Carleton College, 1966, M.Arch., Univ. of Illinois at Chicago, 1979 (2001)
- Vittorio G. Hösele**, *Professor of German and Russian Languages and Literatures, Fellow of the Nanovic Institute for European Studies, Concurrent Professor of Philosophy, Concurrent Professor of Political Science, and the Paul G. Kimball Chair in Arts and Letters*. Ph.D., Eberhard Karl Univ. of Tübingen, 1982 (1999)
- Don A. Howard**, *Professor of Philosophy, Fellow of the Nanovic Institute for European Studies, and Director of History and Philosophy of Science*. B.S., Michigan State Univ., 1971, M.Phil., Boston Univ., 1973, Ph.D., *ibid.*, 1979 (1997)
- George S. Howard**, *Professor of Psychology, Fellow of the Joan B. Kroc Institute for International Peace Studies, and Fellow of the Institute for Educational Initiatives*. B.A., Marist College, 1970, M.A., Southern Illinois Univ. at Carb, 1972, Ph.D., *ibid.*, 1975 (1981)
- Jay C. Howk**, *Assistant Professor of Physics*. B.S., Hanover College, 1994, Ph.D., Univ. of Wisconsin Madison, 1999 (2005)
- Robert A. Howland**, *Associate Professor of Aerospace and Mechanical Engineering*. B.A., Yale Univ., 1965, M.S., *ibid.*, 1966, Ph.D., North Carolina State Univ., 1974 (1981)
- Bei Hu**, *Professor of Mathematics*. B.S., East China Normal Univ., 1982, M.S., *ibid.*, 1984, Ph.D., Univ. of Minnesota, 1990 (1990)
- Chuanjiang Hu**, *Research Assistant Professor of Chemistry and Biochemistry*. B.S., Nanjing Univ., 1991, Ph.D., *ibid.*, 2000 (2003)
- Xiaobo Hu**, *Associate Professor of Computer Science and Engineering and Concurrent Associate Professor of Electrical Engineering*. B.S., Tianjin Univ., 1982, M.S., Polytechnic Institute of New York, 1984, Ph.D., Purdue Univ., 1989 (1996)
- Roger D. Huang**, *Professor of Finance, the Kenneth R. Meyer Chair in Global Investment Management, and Department Chair, Finance*. B.S., Purdue Univ., 1975, M.A., Univ. of Pennsylvania, 1978, Ph.D., *ibid.*, 1980 (2000)
- Yih-Fang Huang**, *Professor of Electrical Engineering and Concurrent Professor of Computer Science and Engineering*. B.S.E.E., National Taiwan Univ., 1976, M.S., Univ. of Notre Dame, 1979, Ph.D., Princeton Univ., 1982 (1982)
- Paul W. Huber**, *Professor of Chemistry and Biochemistry*. B.S., Boston College, 1973, Ph.D., Purdue Univ., 1978 (1985)
- Tin-bor V. Hui**, *Assistant Professor of Political Science and Visiting Fellow of the Helen Kellogg Institute for International Studies*. B.S., Chinese Univ. of Hong Kong, 1990, M.A., Columbia Univ., 1995, M.Phil., *ibid.*, 1997, Ph.D., *ibid.*, 2000 (2004)
- Romana C. Huk**, *Associate Professor of English and Fellow of the Nanovic Institute for European Studies*. B.A., College of William and Mary, 1981, Ph.D., Univ. of Notre Dame, 1987 (2002)
- Edward F. Hums**, *Assistant Professional Specialist in Accountancy*. B.B.A., Univ. of Notre Dame, 1975, M.S., Indiana Univ. South Bend, 1979, M.B.A., *ibid.*, 1989 (1975)
- Daniel M. Hungerman**, *Assistant Professor of Economics and Econometrics*. B.A., Miami Univ., 2000, Ph.D., Duke Univ., 2005 (2005)
- Bro. Louis Hurcik, C.S.C.**, *Associate Professional Specialist in Physical Education* (1970)
- David R. Hyde**, *Professor of Biological Sciences, the Rev. Howard J. Kenna, C.S.C., Memorial Director of the Zebrafish Research Center, and Director of the Center for Zebrafish Research*. B.S., Michigan State Univ., 1980, Ph.D., Pennsylvania State Univ., 1985 (1988)
- Anthony K. Hyder**, *Professor of Physics*. B.S., Univ. of Notre Dame, 1962, M.S., Air Force Institute Technology, 1964, Ph.D., *ibid.*, 1971 (1991)
- Kristine L. Ibsen**, *Professor of Romance Languages and Literatures and Fellow of the Helen Kellogg Institute for International Studies*. B.A., California State College, 1983, M.A., Univ. of California at Los Angeles, 1984, Ph.D., *ibid.*, 1991 (1992)
- Frank P. Incropera**, *Professor of Aerospace and Mechanical Engineering and the H. Clifford and Evelyn A. Brosey Chair in Engineering*. B.S.M.E., Massachusetts Institute of Technology, 1961, M.S.M.E., Stanford Univ., 1962, Ph.D., *ibid.*, 1966 (1998)
- Antonette K. Irving**, *Assistant Professor of English*. B.A., Univ. of Virginia, 1992, M.A., Univ. of Kent at Canterbury, 1996, Ph.D., New York Univ., 2001 (2000)
- Takayuki Iwaki**, *Research Assistant Professor in the Center for Transgene Research*. M.D., Hamamatsu Univ. School of Medicine, 1996, Ph.D., *ibid.*, 2001 (2000)
- Jesus A. Izaguirre**, *Associate Professor of Computer Science and Engineering*. B.S., Univ. of Monterrey, 1991, M.S., Univ. of Illinois Urbana-Champaign, 1996, Ph.D., *ibid.*, 1999 (1999)
- Pamela E. Jackson**, *Associate Professional Specialist in Notre Dame Center for Liturgy*. B.A., Yale Univ., 1972, M.Div., Yale University-Divinity School, 1980, M.A., Yale Univ., 1981, Ph.D., *ibid.*, 1987 (2000)

## FACULTY

- Dennis C. Jacobs**, *Professor of Chemistry and Biochemistry and Vice President and Associate Provost*. B.S., Univ. California Irvine, 1981; B.S., *ibid.*, 1982; Ph.D., Stanford Univ., 1988 (1988)
- Ireneusz Janik**, *Research Assistant Professor in the Radiation Laboratory*. M.S., Univ. of Lodz, 1995, Ph.D., Technical Univ. of Lodz, 2001, Ph.D., Univ. of Lodz, 2001 (2004)
- Boldizsár Jankó**, *Associate Professor of Physics*. Dipl., Eotvos Lorand Univ., 1991, Ph.D., Cornell Univ., 1996 (2000)
- Anja Jauernig**, *Assistant Professor of Philosophy and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Bonn, 1995, B.S., *ibid.*, 1995, M.A., *ibid.*, 1997, M.A., Princeton Univ., 1999, Ph.D., *ibid.*, 2004 (2002)
- Debra Javeline**, *Assistant Professor of Political Science and Fellow of the Nanovic Institute*. B.S., Brown Univ., 1989, Ph.D., *ibid.*, 1997 (2004)
- Debdeep Jena**, *Associate Professor of Electrical Engineering*. B.S., Indian Institute of Technology-Kangpur, 1998, Ph.D., Univ. of California Santa Barbara, 2002 (2003)
- David T. Jenkins**, *Associate Librarian, University Libraries*. B.A., Univ. of Minnesota, 1983, M.T.S., Harvard Univ., 1990, M.L.S., Simmons College, 1997 (1999)
- Rev. John I. Jenkins, C.S.C.**, *President of the University and Associate Professor of Philosophy*. B.A., Univ. of Notre Dame, 1976, M.A., *ibid.*, 1978, B.Phil., Oxford Univ., 1987, M.Div., Jesuit School of Tehology at Berkeley, 1988, S.T.L., *ibid.*, 1988, D.Phil., Oxford Univ., 1989 (1988)
- Lionel M. Jensen**, *Associate Professor of East Asian Languages & Cultures, Fellow of the Helen Kellogg Institute for International Studies, and Concurrent Assistant Professor of History*. B.A., Williams College, 1976, M.A., Washington Univ., 1980, Ph.D., Univ. of California Berkeley, 1992 (2000)
- Richard A. Jensen**, *Professor of Economics and Econometrics, Fellow of the Helen Kellogg Institute for International Studies, Concurrent Professor of Finance, and Department Chair, Economics and Econometrics*. B.A., Univ. of Kansas, 1971, Ph.D., Northwestern Univ., 1980 (2000)
- Michael J. Jenuwine**, *Associate Professional Specialist in Law School*. B.S., Univ. of Michigan, 1988, M.A., Univ. of Chicago, 1990, Ph.D., *ibid.*, 2000, J.D., Loyola Univ.Chicago, 2000 (2005)
- Carlos Jerez-Farrán**, *Professor of Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Sheffield, 1980, M.A., Univ. of Massachusetts, 1983, Ph.D., *ibid.*, 1987 (1986)
- Colin P. Jessop**, *Associate Professor of Physics*. B.A., Trinity College Cambridge, 1986, M.A., *ibid.*, 1987, Ph.D., Harvard Univ., 1993 (2004)
- Diana Jimeno-Ingrum**, *Assistant Professor of Management*. M.A., California State Univ.-Northridge, 2000, B.A., Colorado State Univ., 2000, Ph.D., Univ. of Illinois Urbana-Champaign, 2007 (2007)
- Robert C. Johansen**, *Professor of Political Science, Fellow of the Helen Kellogg Institute for International Studies, and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Manchester College, 1962, M.A., Columbia Univ., 1963, Ph.D., *ibid.*, 1968 (1986)
- Alan L. Johnson**, *Professor of Biological Sciences*. B.A., Univ. of Vermont, 1972, M.S., *ibid.*, 1975, Ph.D., Cornell Univ., 1979 (1993)
- James F. Johnson**, *Associate Professional Specialist in Chemistry and Biochemistry*. B.A., Univ. of St. Francis, 1970, M.S., Univ. of Notre Dame, 1975 (1975)
- Maxwell E. Johnson**, *Professor of Theology*. B.A., Augustana College, 1974, M.Div., Wartburg Theological Seminary, 1978, M.A., Saint John's Univ., 1982, S.T.L., St. John's Univ., 1982, M.A., Univ. of Notre Dame, 1989, Ph.D., *ibid.*, 1992 (1997)
- Paul G. Johnson**, *Associate Professor of Music*. B.Mus., Northwestern Univ., 1976, M.F.A., Princeton Univ., 1980, Ph.D., *ibid.*, 1981 (1981)
- Walter R. Johnson**, *Professor of Physics and the Frank M. Freimann Chair in Physics (I)*. B.S., Univ. of Michigan, 1952, M.S., *ibid.*, 1953, Ph.D., *ibid.*, 1957 (1958)
- Cyraina E. Johnson-Roullier**, *Associate Professor of English*. M.A., State Univ. of New York at Albany, 1990, Ph.D., State Univ. of New York-Buffalo, 1992 (1991)
- Joyce V. Johnstone**, *Professional Specialist in the Alliance for Catholic Education, Director of the Alliance for Catholic Education, and Ryan Chair*. B.A., Catholic Univ. of America, 1961, M.S., Butler Univ., 1973, Ph.D., Indiana Univ.-Bloomington, 1994 (1998)
- Robert L. Jones**, *Professional Specialist in Law and Director of the Legal Aid Clinic*. B.A., Univ. of Notre Dame, 1980, J.D., Harvard Univ., 1984 (2002)
- Sherri L. Jones**, *Librarian, University Libraries*. B.A., Marshall Univ., 1975, M.A., *ibid.*, 1979, M.A., Kent State Univ., 1988 (2000)
- Louis E. Jordan**, *Librarian, University Libraries*. B.A., Univ. of Massachusetts Boston, 1972, M.A., Univ. of Chicago, 1974; Univ. of Notre Dame, 1980, M.A., Indiana Univ.-Bloomington, 1981 (1980)
- Essaka Joshua**, *Professional Specialist in College Seminar-Arts and Letters*. B.A., Somerville College Oxford, 1991, M.A., *ibid.*, 1995, Ph.D., Birmingham Southern College, 1995 (2008)
- Lynn S. Joy**, *Professor of Philosophy*. A.B., Harvard Univ., 1971; A.M., *ibid.*, 1981; Ph.D., *ibid.*, 1982 (2000)
- Michelle V. Joyce**, *Assistant Professional Specialist in Chemistry and Biochemistry*. B.S., Univ. of Notre Dame, 1999, Ph.D., Duke Univ., 2003 (2004)
- Danielle B. Joyner**, *Assistant Professor of Art, Art History, and Design*. B.A., Univ. of Utah, 1994, M.A., *ibid.*, 1998, Ph.D., Harvard Univ., 2007 (2007)
- Anthony Juan**, *Professor of Film, Television, and Theatre*. Ph.D., Univ. of Athens, 1990 (2005)
- Encarnación Juárez-Almendros**, *Associate Professor of Romance Languages and Literatures and Fellow of the the Nanovic Institute for European Studies*. M.A., Univ. of California Berkeley, 1981, Ph.D., *ibid.*, 1987 (1995)
- Eric J. Jumper**, *Professor of Aerospace and Mechanical Engineering*. B.S., Univ. of New Mexico, 1968, M.S., Univ. of Wyoming, 1969, Ph.D., Air Force Institute of Technology, 1975 (1989)
- James W. Kaiser**, *Professional Specialist in Physics*. B.S., Univ. of Dayton, 1965, M.A., Univ. of Notre Dame, 1967, M.S., *ibid.*, 1978 (1969)
- Prashant V. Kamat**, *Professor of Chemistry and Biochemistry and Concurrent Professor of Chemical Engineering*. B.S., Karnatak Univ., 1972, M.S., Univ. of Bombay, 1974, Ph.D., *ibid.*, 1979 (1983)
- S. Alex Kandel**, *Associate Professor of Chemistry and Biochemistry*. B.S., Yale Univ., 1993, Ph.D., Harvard Univ., 1999 (2001)
- Jeffrey C. Kantor**, *Professor of Chemical and Biomolecular Engineering*. B.S., Univ. of Minnesota of Minneapolis, 1976, M.A., Princeton Univ., 1977, Ph.D., *ibid.*, 1981 (1981)
- Joshua B. Kaplan**, *Associate Professional Specialist in Political Science*. A.B., Univ. California Santa Cruz, 1974, M.A., Univ. of Chicago, 1977 (1987)
- Ahsan Kareem**, *Professor of Civil Engineering and Geological Sciences and the Robert M. Moran Chair in Engineering*. Ph.D., Colorado State Univ., 1978 (1990)
- Daniel J. Karmgard**, *Research Assistant Professor of Physics*. B.S., Univ. of California at Los Angeles, 1993, M.S., California State Univ.-Long Beach, 1995, Ph.D., Florida State Univ., 1999 (1999)
- Thomas J. Karnowski**, *Assistant Professor of Naval Science*. B.A., Univ. of Oklahoma, 2001 (2006)
- Asher Kaufman**, *Assistant Professor of History*. B.A., Hebrew Univ. of Jerusalem, 1989, M.A., *ibid.*, 1994, Ph.D., Brandeis Univ., 2000 (2005)
- M. Cathleen Kaveny**, *Professor of Law and the John P. Murphy Foundation Chair in Law*. A.B., Princeton Univ., 1984, M.A., Yale Univ., 1986, J.D., *ibid.*, 1990, Ph.D., *ibid.*, 1991 (1995)
- Jessica N. Kayongo**, *Assistant Librarian, University Libraries*. B.A., South Dakota State Univ., 1996, J.D., Univ. of Nebraska at Omaha, 1998, M.L.S., Univ. of Wisconsin-Madison, 2002 (2002)

## FACULTY

**John G. Keane**, *Professor of Management and the Howard J. and Geraldine F. Korth Chair in Strategic Management*. B.S., Univ. of Notre Dame, 1952, Ph.D., Univ. of Pittsburgh, 1965 (1989)

**Barry P. Keating**, *Professor of Finance*. B.B.A., Univ. of Notre Dame, 1967, M.A., Lehigh Univ., 1968, Ph.D., Univ. of Notre Dame, 1974 (1978)

**Gregory J. Keigher**, *Assistant Professor of Naval Science*. M.A., Univ. of Central Florida, 1999 (2005)

**Thomas M. Kellenberg**, *Professional Specialist in Washington, D.C., Concurrent Associate Professor of Washington, D.C. Program, and Director of the Washington, D.C. Program*. B.A., Univ. of Notre Dame, 1980, J.D., Harvard Univ., 1986 (1997)

**William K. Kelley**, *Associate Professor of Law*. B.A., Marquette Univ., 1984, J.D., Harvard Univ., 1987 (1995)

**Anita E. Kelly**, *Professor of Psychology*. B.A., Northwestern Univ., 1986, M.S., Univ. of Florida, 1988, Ph.D., *ibid.*, 1991 (1994)

**Sean P. Kelly**, *Assistant Professor of Sociology*. B.A., Univ. of North Carolina at Chapel Hill, 1998, M.S., Univ. of Wisconsin-Madison, 2001, Ph.D., *ibid.*, 2005 (2005)

**Andrew B. Kennedy**, *Assistant Professor of Civil Engineering and Geological Sciences*. B.S., Queen's Univ., 1991, M.S., Univ. of British Columbia, 1993, Ph.D., Monash Univ., 1998 (2008)

**John J. Kennedy**, *Professor of Marketing*. B.S., Newark College of Engineering, 1955, M.B.A., Ohio State Univ., 1957, Ph.D., *ibid.*, 1962 (1963)

**Kathryn E. Kerby-Fulton**, *Professor of English and Notre Dame Chair in English*. B.A., York Univ.-Toronto, 1977, M.Phil., Univ. of Oxford, 1979, Ph.D., Univ. of York, 1986 (2004)

**Mary M. Keys**, *Associate Professor of Political Science and Fellow of the Nanovic Institute for European Studies*. B.A., Boston College, 1988, M.A., Univ. of Toronto, 1989, Ph.D., *ibid.*, 1997 (1994)

**Tracy L. Kijewski-Correa**, *Assistant Professor of Civil Engineering and Geological Sciences and the Rooney Family Chair in Engineering (Collegiate Chair)*. B.S., Univ. of Notre Dame, 1997, B.S.C.E., *ibid.*, 1997, M.S.C.E., *ibid.*, 2000, Ph.D., *ibid.*, 2003 (2003)

**Peter K. Kilpatrick**, *Professor of Chemical and Biomolecular Engineering and Dean of the College of Engineering*. B.A., Occidental College, 1978, Ph.D., Univ. of Minnesota, 1983 (2008)

**Kwan S. Kim**, *Professor of Economics and Policy Studies and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Seoul National Univ., 1959, M.A., Univ. of Minnesota of Minneapolis, 1961, Ph.D., *ibid.*, 1967 (1967)

**Dwight B. King Jr.**, *Librarian, Law Library*. B.A., Univ. of Michigan, 1977, J.D., *ibid.*, 1980, M.A., *ibid.*, 1981 (1986)

**Carmela R. Kinslow**, *Associate Librarian, Law Library*. B.S., Indiana Univ. Bloomington, 1986, M.A., *ibid.*, 1989, M.S.A., Univ. of Notre Dame, 1991 (1974)

**Elizabeth R. Kirk**, *Assistant Professional Specialist in the Center for Ethics and Culture*. B.A., Univ. of Missouri-Columbia, 1993, J.D., Univ. of Notre Dame, 1996 (2005)

**David J. Kirkner**, *Associate Professor of Civil Engineering and Geological Sciences and Associate Chair, Civil Engineering and Geological Sciences*. B.S.C.E., Youngstown State Univ., 1971, Ph.D., Case Western Reserve Univ., 1979 (1979)

**Michael S. Kirsch**, *Associate Professor of Law*. A.B., Cornell Univ., 1985, J.D., Harvard Univ., 1988, L.L.M., New York Univ., 1989 (2001)

**David M. Klein**, *Associate Professor of Sociology*. B.A., Univ. of Washington, 1967, Ph.D., Univ. of Minnesota of Minneapolis, 1978 (1976)

**Sandra S. Klein**, *Associate Librarian, Law Library*. B.A., Univ. of Illinois Urbana-Champaign, 1981, M.Ed., *ibid.*, 1983, M.L.S., *ibid.*, 1988 (1998)

**Julia F. Knight**, *Professor of Mathematics and the Charles L. Huisking Chair*. B.A., Utah State Univ., 1964, Ph.D., Univ. of California Berkeley, 1972 (1977)

**Peter M. Kogge**, *Professor of Computer Science and Engineering, Concurrent Professor of Electrical Engineering, and the Ted H. McCourtney Chair in Computer Science and Engineering*. B.S., Univ. of Notre Dame, 1968, M.S., Syracuse Univ., 1970, Ph.D., Stanford Univ., 1972 (1994)

**Kristin M. Kohrt**, *Associate Professional Specialist in the Dean's Office—First Year of Studies*. B.S., Univ. of Wisconsin-Oshkosh, 1979, M.S., Cardinal Stritch College, 1996 (1998)

**James J. Kolata**, *Professor of Physics*. B.S., Marquette Univ., 1964, M.S., Michigan State Univ., 1966, Ph.D., *ibid.*, 1969 (1977)

**Kathleen J. Kolberg**, *Professional Specialist in Preprofessional Studies*. B.A., Albion College, 1980, Ph.D., Univ. of Notre Dame, 1989 (1993)

**Christopher F. Kolda**, *Associate Professor of Physics*. B.A., Johns Hopkins Univ., 1990, M.A., Univ. of Michigan, 1992, Ph.D., *ibid.*, 1995 (2003)

**Rev. Paul V. Kollman**, C.S.C., *Assistant Professor of Theology, Fellow of the Nanovic Institute for European Studies, Fellow of the Helen Kellogg Institute for International Studies, and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Univ. of Notre Dame, 1984, M.Div., *ibid.*, 1990, Ph.D., Univ. of Chicago, 2001 (2001)

**Donald P. Kommers**, *Professor of Political Science and Fellow of the Nanovic Institute for European Studies, Concurrent Professor of Law, and the Joseph and Elizabeth Robbie Chair in Political Science*. B.A., Catholic Univ. of America, 1954, M.A., Univ. of Wisconsin-Madison, 1957, Ph.D., *ibid.*, 1962 (1963)

**Thomas H. Kosel**, *Associate Professor of Electrical Engineering*. B.S., Univ. of California Berkeley, 1967, M.S., *ibid.*, 1970, Ph.D., *ibid.*, 1975 (1978)

**Janet A. Kourany**, *Associate Professor of Philosophy*. B.S., Columbia Univ., 1965, Ph.D., *ibid.*, 1977 (1998)

**LeRoy J. Krajewski**, *Professor of Management and the William and Cassie Daley Professor of Manufacturing Strategy*. B.S., Univ. of Wisconsin-Milwaukee, 1964, M.S., *ibid.*, 1966, Ph.D., *ibid.*, 1969 (1995)

**Viktor Krchnak**, *Research Professor of Chemistry and Biochemistry*. Ph.D., Prague Institute. Chem. Tech, 1974 (2003)

**William J. Kremer Jr.**, *Professor of Art, Art History, and Design*. B.F.A., Univ. of Wisconsin-Superior, 1969, M.S., Univ. of Wisconsin-Madison, 1971, M.F.A., *ibid.*, 1971 (1973)

**Robert A. Krieg**, *Professor of Theology and Fellow of the Nanovic Institute for European Studies*. B.A., Stonehill College, 1969, Ph.D., Univ. of Notre Dame, 1976 (1977)

**Alan D. Krieger**, *Associate Librarian, University Libraries*. B.A., Columbia Univ., 1972, B.A., Columbia Univ. Teachers College, 1972, M.A., Univ. of Chicago, 1974, B.S., *ibid.*, 1974, M.A., Univ. of Arizona, 1983 (1983)

**William J. Krier**, *Associate Professor of English*. B.A., Univ. of Notre Dame, 1965, M.A., Univ. of Michigan, 1966, Ph.D., Indiana Univ.-Bloomington, 1973 (1969)

**Brian A. Krostenko**, *Associate Professor of the Classics*. B.A., Princeton Univ., 1986, M.A., Harvard Univ., 1989, Ph.D., *ibid.*, 1993 (2001)

**Claudia Kselman**, *Professional Specialist in Off-Campus Programs*. B.A., Univ. of California Berkeley, 1970, M.A., Univ. of Michigan, 1972, Ph.D., *ibid.*, 1980 (1985)

**Thomas A. Kselman**, *Professor of History and Fellow of the Nanovic Institute for European Studies*. B.A., St. Joseph's Univ., 1970, B.S., *ibid.*, 1970, M.A., Univ. of Michigan, 1972, Ph.D., *ibid.*, 1978 (1979)

**Warren N. Kubitschek**, *Associate Professional Specialist in the Center for Research on Education Opportunities*. B.A., Grinnell College, 1976, M.A., Univ. of Akron, 1980 (1987)

**Gregory P. Kucich**, *Professor of English and Fellow of the Nanovic Institute for European Studies*. B.A., San Francisco State Univ., 1978, M.A., Univ. of Michigan, 1979, Ph.D., *ibid.*, 1983 (1983)

**Ian Kuijt**, *Associate Professor of Anthropology*. B.A., Univ. of Lethbridge, 1984, M.A., Simon Fraser Univ., 1988, AM, Harvard Univ., 1991, Ph.D., *ibid.*, 1995 (2000)

**Charles F. Kulpa Jr.**, *Professor of Biological Sciences and Department Chair, Biological Sciences*. B.S., Univ. of Michigan, 1966, M.S., *ibid.*, 1968, Ph.D., *ibid.*, 1970 (1972)

## FACULTY

- Mikolaj S. Kunicki**, *Assistant Professor of History and Fellow of the Nanovic Institute for European Studies*. M.A., Central European Univ., 1994, M.A., Univ. of London, 1996, M.A., Warsaw Univ., 2003, Ph.D., Stanford Univ., 2004 (2007)
- Masaru K. Kuno**, *Assistant Professor of Chemistry and Biochemistry*. B.A., Washington Univ., 1993, Ph.D., Massachusetts Institute of Technology, 1998 (2003)
- Yahya C. Kurama**, *Associate Professor of Civil Engineering and Geological Sciences*. B.S., Bogazici Univ., 1990, M.S., Lehigh Univ., 1993, Ph.D., *ibid.*, 1997 (1998)
- Robert L. Kusmer**, *Associate Librarian, University Libraries, and Fellow of the Nanovic Institute for European Studies*. B.A., Cleveland State Univ., 1972, M.A., Northwestern Univ., 1977, Ph.D., *ibid.*, 1983, M.A., Kent State Univ., 1988 (1997)
- Jay A. LaVerne**, *Professional Specialist in the Radiation Laboratory and Concurrent Research Professor of Physics*. B.S., Lamar Univ., 1972, Ph.D., Univ. of Nebraska-Lincoln, 1981 (1978)
- David J. Ladouceur**, *Associate Professor of the Classics*. B.A., Cornell Univ., 1970, Ph.D., Brown Univ., 1977 (1976)
- J.P. Ladwig**, *Associate Librarian, University Libraries*. B.S., U.S. Naval Academy, 1987, M.A., Univ. of Texas-Austin, 1995 (2000)
- Gary A. Lamberti**, *Professor of Biological Sciences*. B.S., Univ. California Davis, 1975, Ph.D., Univ. of California Berkeley, 1983 (1989)
- Larry O. Lamm**, *Research Professor of Physics*. B.S., East Carolina Univ., 1978, B.S., *ibid.*, 1981, M.A., *ibid.*, 1983, M.A., *ibid.*, 1983, Ph.D., Univ. of Notre Dame, 1989 (1994)
- Jesse M. Lander**, *Associate Professor of English and Fellow of the Nanovic Institute for European Studies*. B.A., Columbia College, 1988, B.A., University College Oxford, 1991, Ph.D., Columbia Univ., 1998 (1999)
- J. Nicholas Laneman**, *Assistant Professor of Electrical Engineering*. B.S.E.E., Washington Univ., 1995, B.S.C.S., *ibid.*, 1995, M.S.E.E., Massachusetts Institute of Technology, 1997, Ph.D., *ibid.*, 2002 (2002)
- Jerry G. Langley**, *Professional Specialist in Finance*. B.S., Univ. of Illinois at Chicago, 1969, M.B.A., Northwestern Univ., 1971 (1999)
- Howard P. Lanser**, *Associate Professor of Finance*. B.S., Univ. of Notre Dame, 1965, M.S., Purdue Univ., 1968, Ph.D., *ibid.*, 1971 (1971)
- Alexander G. Lappin**, *Professor of Chemistry and Biochemistry and Department Chair, Chemistry and Biochemistry*. B.S., Univ. of Glasgow, 1972, Ph.D., *ibid.*, 1975 (1982)
- Daniel K. Lapsley**, *Professor of Psychology and Notre Dame Chair in Catholic Education*. B.A., Indiana Univ. of Pennsylvania, 1977, M.S., Univ. of New Orleans, 1979, Ph.D., Univ. of Wisconsin-Madison, 1982 (2005)
- Dewitt A. Latimer**, *Professional Specialist, Assistant Provost—Office of Information Technologies, Assistant Vice President—Office of Information Technologies, Chief Technology Officer, and Deputy Chief Information Officer—Office of Information Technologies*. B.S., Clemson Univ., 1984, M.S., *ibid.*, 1987, Ed.D., Univ. of Tennessee Knoxville, 2001 (2002)
- James Leady**, *Assistant Professional Specialist in Finance*. B.S., U.S. Military Academy, 1991, M.A., Univ. of Michigan, 1997, Ph.D., *ibid.*, 2006 (2006)
- William H. Leahy**, *Professor of Economics and Policy Studies*. B.A., Univ. of Notre Dame, 1956, M.A., *ibid.*, 1960, Ph.D., *ibid.*, 1966 (1963)
- John P. Lederach**, *Professional Specialist in the Joan B. Kroc Institute for International Peace Studies*. B.A., Bethel College, 1980, Ph.D., Univ. of Colorado-Denver, 1988 (2000)
- Francois M. Ledrappier**, *Professor of Mathematics, Fellow of the Nanovic Institute for European Studies, and the John and Margaret McAndrews Chair in Mathematics*. M.A., Univ. of Paris Vi, 1970, Ph.D., *ibid.*, 1975 (2002)
- Byung-Joo Lee**, *Associate Professor of Economics and Econometrics*. B.S., Seoul National Univ., 1982, M.A., Pennsylvania State Univ., 1984, M.S., Univ. of Wisconsin-Madison, 1986, Ph.D., *ibid.*, 1988 (1996)
- Mijoon Lee**, *Assistant Professional Specialist in Chemistry and Biochemistry*. B.S., Pohang Institute of Science and Technology, 1995, Ph.D., *ibid.*, 2001 (2003)
- Jennifer E. Lefever**, *Research Assistant Professor of Psychology*. B.A., Illinois State Univ., 1994, M.A., Univ. of Notre Dame, 1998, Ph.D., *ibid.*, 2000 (2000)
- Thomas E. Lehman**, *Associate Librarian, University Libraries*. B.A., Goshen College, 1969, M.A., Indiana Univ.-Bloomington, 1974 (1985)
- Nicolas Lehner**, *Research Assistant Professor of Physics*. B.S., Louis Pasteur Univ. Strasbourg, 1994, M.S., *ibid.*, 1995, Ph.D., Queens Univ. of Belfast, 2000 (2005)
- David T. Leighton Jr.**, *Professor of Chemical and Biomolecular Engineering*. B.S.E., Princeton Univ., 1980, M.S., Stanford Univ., 1981, Ph.D., *ibid.*, 1985 (1986)
- Michael D. Lemmon**, *Professor of Electrical Engineering*. B.S., Stanford Univ., 1988, Ph.D., Carnegie Mellon Univ., 1990 (1990)
- Daniel H. Lende**, *Assistant Professor of Anthropology and Fellow of the Helen Kellogg Institute for International Peace Studies*. B.S., Harvard Univ., 1991, Ph.D., Emory Univ., 2003 (2004)
- Craig S. Lent**, *Professor of Electrical Engineering and the Frank M. Freimann Chair in Engineering (IV)*. B.A., Univ. of California Berkeley, 1978, Ph.D., Univ. of Minnesota of Minneapolis, 1984 (1985)
- Giovanna Lenzi-Sandusky**, *Assistant Professional Specialist in Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. Laurea in Lettere, Univ. of Florence, 1979 (1990)
- Brian R. Levey**, *Associate Professional Specialist in Accountancy*. B.A., Univ. of Notre Dame, 1984, J.D., Catholic Univ. of America, 1987, M.A., George Washington Univ., 1992 (2007)
- Robert Lewandowski**, *Assistant Professional Specialist in Management*. L.B., Purdue Univ., 1999, M.A., *ibid.*, 2002 (2004)
- Kristin M. Lewis**, *Associate Professional Specialist in Biological Sciences*. B.S., Univ. of Notre Dame, 1991, M.S., *ibid.*, 1997 (1997)
- Blake Leyerle**, *Associate Professor of Theology and Concurrent Associate Professor of the Classics*. B.A., Yale Univ., 1982, M.A., Duke Univ., 1988, Ph.D., *ibid.*, 1991 (1990)
- Lei Li**, *Associate Professor of Biological Sciences*. B.S., Shandong Medical Univ., 1985, Ph.D., Georgia State Univ., 1995 (2003)
- Keir A. Lieber**, *Assistant Professor of Political Science, Fellow of the Joan B. Kroc Institute for International Peace Studies, and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Wisconsin-Madison, 1992, M.A., Univ. of Chicago, 1996, Ph.D., *ibid.*, 2000 (2001)
- Marya Lieberman**, *Associate Professor of Chemistry and Biochemistry*. B.S., Massachusetts Institute of Technology, 1989, Ph.D., Univ. of Washington, 1994 (1996)
- Rev. William M. Lies, C.S.C.**, *Associate Professional Specialist in Political Science, Concurrent Associate SPF—Political Science, Director of the Center for Social Concerns, and Fellow of the the Joan B. Kroc Institute for International Peace Studies*. A.A., Crosier Seminary Junior College, 1982, B.A., Saint John's Univ., 1984, M.Div., Univ. of Notre Dame, 1993, M.A., Univ. of Pittsburgh, 1998, Ph.D., *ibid.*, 2003 (2001)
- Chong Keat A. Lim**, *Assistant Professional Specialist in Mathematics*. B.S., National Univ. of Singapore, 1993, M.A., *ibid.*, 1994, M.A., Univ. of Utah, 1996, Ph.D., *ibid.*, 2001 (2006)
- Sylvia L. Lin**, *Assistant Professor of East Asian Languages & Cultures and Notre Dame Chair in Chinese*. B.A., Tamkang Univ., 1984, M.A., *ibid.*, 1987, M.A., St. John's Univ., 1988, M.A., Univ. of Oregon, 1991, Ph.D., Univ. of California Berkeley, 1998 (2002)
- Daniel A. Lindley**, *Associate Professor of Political Science and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Tufts Univ., 1983, Ph.D., Massachusetts Institute of Technology, 1998 (1999)

## FACULTY

- Michael R. Lipke**, *Assistant Professor of Naval Science*. B.A., Marquette Univ., 2001 (2006)
- David A. Lippel**, *Research Assistant Professor of Mathematics*. B.S., Haverford College, 1994, Ph.D., Univ. of California Berkeley, 2001 (2004)
- Chao-Shin Liu**, *Associate Professor of Accountancy*. B.B.A., National Taiwan Univ., 1979; M.B.A., National Cheng-Chi Univ., 1983; Ph.D., Univ. of Illinois Urbana-Champaign, 1992 (1992)
- Xiaobo Liu**, *Professor of Mathematics*. B.S., Tsinghua Univ., 1987, Ph.D., Univ. of Pennsylvania, 1994 (1999)
- Xinyu Liu**, *Research Assistant Professor of Physics*. B.S., Univ. of Science and Technology of China, 1993, M.S., *ibid.*, 1996, Ph.D., Univ. of Notre Dame, 2003 (2002)
- A. Eugene Livingston**, *Professor of Physics*. B.S., Univ. of Alberta, 1969, M.S., *ibid.*, 1970, Ph.D., *ibid.*, 1974 (1978)
- Omar A. Lizardo**, *Assistant Professor of Sociology*. B.S., Brooklyn College, 1997, M.A., Univ. of Arizona, 2002, Ph.D., *ibid.*, 2006 (2006)
- John M. LoSecco**, *Professor of Physics*. B.S., Cooper Union, 1972, M.A., Harvard Univ., 1973, Ph.D., *ibid.*, 1976 (1985)
- Neil F. Lobo**, *Research Assistant Professor of Biological Sciences*. B.S., Bangalore Univ., 1995, B.S., St. Joseph's College, 1995, Ph.D., Univ. of Illinois Urbana-Champaign, 2000, Ph.D., Univ. of Notre Dame, 2001 (2000)
- David M. Lodge**, *Professor of Biological Sciences*. B.S., the Univ. of the South, 1979, Ph.D., Univ. of Oxford, 1982 (1985)
- Patricia A. Loghry**, *Associate Librarian, University Libraries*. B.A., Univ. of Wisconsin-Madison, 1986, M.A., *ibid.*, 1991 (2000)
- George A. Lopez**, *Professor of Political Science, Fellow of the Joan B. Kroc Institute for International Peace Studies, and Rev. Theodore M. Hesburgh, C.S.C., Professor of Peace Studies*. B.A., Saint John Fisher College, 1972, Ph.D., Syracuse Univ., 1975 (1986)
- Martina A. Lopez**, *Associate Professor of Art, Art History, and Design*. B.F.A., Univ. of Washington, 1985, M.F.A., School of the Art Institute of Chicago, 1990 (1993)
- Thomas J. Loughran**, *Professional Specialist in Electrical Engineering*. B.S., Univ. of Notre Dame, 1980, M.A., *ibid.*, 1983, Ph.D., *ibid.*, 1986 (2005)
- Timothy J. Loughran**, *Professor of Finance and the C.R. Smith II Director of the Institute for Ethical Business Worldwide*. B.A., Univ. of Illinois Urbana-Champaign, 1985, M.B.A., Indiana Univ.-Bloomington, 1989, Ph.D., Univ. of Illinois Urbana-Champaign, 1993 (1999)
- Michael J. Loux**, *the Professor of the George N. Shuster Chair in Philosophy*. B.A., Univ. of St. Thomas, 1964, M.A., Univ. of Chicago, 1965, Ph.D., *ibid.*, 1968 (1968)
- Gitta H. Lubke**, *Assistant Professor of Psychology*. B.S., Johann W. Goethe Univ. of Frankfurt, 1979, M.S., Univ. of Amsterdam, 1997, Ph.D., Free Univ. of Amsterdam, 2002 (2004)
- Michael A. Lutes**, *Associate Librarian, University Libraries*. M.A., Indiana Univ. Bloomington, 1988 (1986)
- Natalia Lyandres**, *Associate Librarian, University Libraries*. B.A., Moscow State Univ., 1990, M.L.S., San Jose State Univ., 1993 (2001)
- Semion Lyandres**, *Associate Professor of History, Fellow of the Nanovic Institute for European Studies, and Fellow of the Helen Kellogg Institute for International Studies*. B.A., St. Petersburg Univ., 1980, M.A., Boston Univ., 1987, M.A., Stanford Univ., 1988, Ph.D., *ibid.*, 1992 (2001)
- Michael N. Lykoudis**, *Professor of Architecture and Dean—Architecture*. B.Arch., Cornell Univ., 1979, M.Arch., Univ. of Illinois Urbana-Champaign, 1983 (1991)
- Breandán A. Mac Suibhne**, *Assistant Professional Specialist in Keough-Naughton Institute for Irish Studies*. B.A., University College Dublin, 1989, M.A., *ibid.*, 1991, M.A., Carnegie Mellon Univ., 1994, Ph.D., *ibid.*, 1999 (2000)
- Sabine G. MacCormack**, *Professor of History and Fellow of the Helen Kellogg Institute for International Studies and the Rev. Theodore M. Hesburgh, C.S.C., Chair in Arts and Letters*. B.A., Univ. of Oxford, 1964, Ph.D., *ibid.*, 1974 (2003)
- Alasdair C. MacIntyre**, *Research Professor of Philosophy and the McMabon-Hank Chair in Philosophy*. M.A., Univ. of Oxford, 1961 (1988)
- Louis MacKenzie Jr.**, *Associate Professor of Romance Languages and Literatures and Department Chair—Music*. B.A., Univ. of Notre Dame, 1969, M.A., Middlebury College, 1972, Ph.D., Cornell Univ., 1977 (1983)
- Nicole R. MacLaughlin**, *Assistant Professional Specialist in University Writing Program*. B.A., Univ. of Illinois Urbana-Champaign, 1992, M.A., *ibid.*, 1995, M.A., *ibid.*, 1995 (2007)
- Joanne M. Mack**, *Associate Professional Specialist in the Snite Museum and Concurrent Associate Professor of Anthropology*. A.A., College of Marin, 1962, B.A., San Francisco State Univ., 1964, M.A., Univ. of Wyoming, 1971, Ph.D., Univ. of Oregon, 1979 (1997)
- Tara A. Macleod**, *Assistant Professional Specialist in Irish Language and Literature*. B.S., University College Dublin, 1991, M.S., University College Cork, 1997 (2005)
- Keith P. Madden**, *Associate Professional Specialist in the Radiation Laboratory*. B.A., Cornell Univ., 1974, M.S., Univ. of Rochester, 1977, Ph.D., *ibid.*, 1979 (1980)
- Gregory R. Madey**, *Professional Specialist in Computer Science and Engineering*. B.S., Cleveland State Univ., 1974, M.S., *ibid.*, 1975, M.S., Case Western Reserve Univ., 1979, Ph.D., *ibid.*, 1984 (2000)
- Edward J. Maginn**, *Professor of Chemical and Biomolecular Engineering*. B.S., Iowa State Univ., 1987, Ph.D., Univ. of California Berkeley, 1995 (1995)
- Aaron H. Magnan-Park**, *Assistant Professor of Film, Television, and Theatre and Fellow of the Nanovic Institute for European Studies*. B.S., Univ. of Michigan-Flint, 1990, M.S., Univ. of Iowa, 1994, Ph.D., *ibid.*, 2002 (2004)
- Cynthia K. Mahmood**, *Associate Professor of Anthropology and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., New College Univ. of South Florida, 1977, M.A., Tulane Univ., 1981, Ph.D., *ibid.*, 1986 (2001)
- Scott P. Mainwaring**, *Professor of Political Science, Fellow of the Helen Kellogg Institute for International Studies, Director of the Helen Kellogg Institute for International Studies, the Eugene P. and Helen Conley Chair in Political Science (Departmental Chair), and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Yale Univ., 1976, M.A., *ibid.*, 1976, Ph.D., Stanford Univ., 1983 (1983)
- Linda J. Major**, *Assistant Professional Specialist in the Medieval Institute*. B.A., Univ. of St. Francis, 1973, M.A., Univ. of Notre Dame, 1983 (1998)
- Bradley J. Malkovsky**, *Associate Professor of Theology*. M.A., Eberhard Karl Univ. of Tübingen, 1983, Ph.D., *ibid.*, 1994 (1992)
- Rev. Edward A. Malloy, C.S.C.**, *President Emeritus, Professor of Theology, and Concurrent Professor of English*. B.A., Univ. of Notre Dame, 1963, M.A., *ibid.*, 1967, M.A., *ibid.*, 1969, Ph.D., Vanderbilt Univ., 1975 (1974)
- Theodore E. Mandell**, *Associate Professional Specialist in Film, Television, and Theatre*. B.A., Univ. of Notre Dame, 1986, M.A., Univ. of Iowa, 1989 (1988)
- Elena M. Mangione-Lora**, *Assistant Professional Specialist in Romance Languages and Literatures*. B.A., Saint Mary's College, 1990, M.A., Univ. of Notre Dame, 1998 (1998)
- Joseph P. Marino**, *Professor of Chemistry and Biochemistry, the W.K. Warren II Chair, and Dean, College of Science*. B.S., Pennsylvania State Univ., 1963, M.A., Harvard Univ., 1965, Ph.D., *ibid.*, 1967 (2002)
- Yolanda L. Marino**, *Assistant Professional Specialist in the Institute for Latino Studies*. B.S., Inter American Univ.-Puerto Rico, 1965, M.S., Pennsylvania State Univ., 1967 (2002)

## FACULTY

- Nelson Mark**, *Professor of Economics and Econometrics, Fellow of the Helen Kellogg Institute for International Studies, Concurrent Professor of Finance, and the Alfred C. DeCrane Jr. Chair in International Economics*. B.A., Univ. of California Santa Barbara, 1978, Ph.D., Univ. of Chicago, 1983 (2002)
- Dan K. Marmion**, *Librarian, University Libraries*. B.A., Univ. of North Texas, 1978, M.S., *ibid.*, 1985 (2000)
- George M. Marsden**, *Professor of History and the Francis A. McAnaney Chair in History*. B.A., Haverford College, 1959, M.A., Yale Univ., 1960, B.A., Westminster Theological Seminary, 1963, Ph.D., Yale Univ., 1966 (1992)
- Alexander Martin**, *Associate Professor of History and Fellow of the Nanovic Institute for European Studies*. B.A., Cornell Univ., 1985, M.A., Columbia Univ., 1986, Ph.D., Univ. of Pennsylvania, 1993 (2006)
- Holly E. Martin**, *Professional Specialist in the Dean's Office—First Year of Studies and Assistant Dean, First Year of Studies*. B.A., Saint Olaf College, 1978, M.A., Univ. of Notre Dame, 1979, Ph.D., *ibid.*, 1983 (1983)
- Patrick I. Martin**, *Associate Professional Specialist in Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Notre Dame, 1974, M.A., Columbia Univ., 1975, M.Phil., *ibid.*, 1977 (1986)
- Thomas G. Marullo**, *Professor of German and Russian Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. B.A., College of the Holy Cross, 1970, M.A., Cornell Univ., 1971, Ph.D., *ibid.*, 1975, M.B.A., Indiana Univ. South Bend, 1989 (1975)
- Julia J. Marvin**, *Associate Professor in the Program of Liberal Studies*. B.A., Princeton Univ., 1988, M.A., *ibid.*, 1992, Ph.D., *ibid.*, 1997 (1997)
- Gary V. Masapollo**, *Assistant Professor of Army Science*. B.A., Norwich University Main Campus, 1986, M.S., Salve Regina Univ., 1995 (2000)
- Nancy Masters**, *Assistant Professional Specialist in the Alliance for Catholic Education*. M.A., Indiana Univ. Bloomington, 1979 (2001)
- Grant J. Mathews**, *Professor of Physics*. B.S., Michigan State Univ., 1972, Ph.D., Univ. of Maryland Univ., 1977 (1994)
- Timothy M. Matovina**, *Professor of Theology, Fellow of the Institute for Latino Studies, and Director of the Cushwa Center for the Study of American Catholicism*. B.A., Indiana Univ.-Bloomington, 1978, M.Div., Univ. of St/ Michaels College, 1983, Ph.D., Catholic Univ. of America, 1993 (2000)
- Khalil F. Matta**, *Professor of Management*. B.S., West Virginia Institute of Technology, 1978, M.S., Univ. of Notre Dame, 1980, Ph.D., *ibid.*, 1982 (1982)
- Jennifer C. Matthews**, *Assistant Librarian, University Libraries*. B.Mus., Ball State Univ., 1996, M.A., Univ. of Kentucky, 1999 (2007)
- Diana C. Matthias**, *Associate Professional Specialist in the Snite Museum and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Notre Dame, 1979, M.A., Indiana Univ., 1990 (1990)
- Sara L. Maurer**, *Assistant Professor of English*. B.A., Rice Univ., 1995, M.A., Indiana Univ.-Bloomington, 1997, Ph.D., *ibid.*, 2003 (2003)
- Patricia A. Maurice**, *Professor of Civil Engineering and Geological Sciences*. B.A., Johns Hopkins Univ., 1982, M.S., Dartmouth College, 1985, Ph.D., Stanford Univ., 1994 (2000)
- Scott E. Maxwell**, *Professor of Psychology, Fellow of the Institute for Educational Initiatives, and the Mathew A. Fitzsimons Chair in Psychology*. B.S., Duke Univ., 1972, M.A., Univ. of North Carolina at Chapel Hill, 1974, Ph.D., *ibid.*, 1977 (1982)
- Lloyd H. Mayer**, *Associate Professor of Law*. L.B., Stanford Univ., 1989, J.D., Yale Univ., 1994 (2005)
- David T. Mayernik**, *Associate Professor of Architecture*. B.Arch., Univ. of Notre Dame, 1983 (2002)
- Julliet N. Mayinja**, *Associate Professional Specialist in Off-Campus Programs and Associate Director of Off-Campus Programs*. B.A., Makerere Univ., 1989, B.S., *ibid.*, 1989, M.A., Univ. of Notre Dame, 1994, M.S.A., *ibid.*, 1997 (1993)
- Gail A. Mayotte**, *Assistant Professional Specialist in the Alliance for Catholic Education and Fellow of the Institute for Educational Initiatives*. B.S., Univ. of Lowell, 1983, M.A., Boston College, 1991, Ph.D., *ibid.*, 2001 (2004)
- Christine M. Maziar**, *Professor of Electrical Engineering and Vice President and Senior Associate Provost*. B.S.E.E., Purdue Univ., 1981, M.S.E.E., *ibid.*, 1984, Ph.D., *ibid.*, 1986 (2004)
- Elizabeth F. Mazurek**, *Associate Professor of the Classics and Department Chair, Classics*. B.A., Dickinson College, 1983, Ph.D., Univ. of North Carolina at Chapel Hill, 1988 (1990)
- Tadeusz R. Mazurek**, *Assistant Professional Specialist in the Classics*. B.A., Yale Univ., 1985, Ph.D., Univ. of North Carolina at Chapel Hill, 1997 (1997)
- A. James McAdams**, *Professor of Political Science, Fellow of the Helen Kellogg Institute for International Studies, Fellow of the Joan B. Kroc Institute for International Peace Studies, Director of the Nanovic Institute for European Studies, and the Dr. Scholl Chair in International Affairs*. B.A., Earlham College, 1976, M.A., Univ. of California Berkeley, 1977, Ph.D., *ibid.*, 1983 (1992)
- Jennifer M. McAward**, *Associate Professor of Law*. B.A., Univ. of Notre Dame, 1994, J.D., New York Univ., 1998 (2006)
- Rev. Richard P. McBrien, C.S.C.**, *Professor of Theology and the Crowley-O'Brien Chair in Roman Catholic Theology*. A.A., Saint Thomas Seminary, 1956, B.A., St. John's Seminary, 1958, M.A., *ibid.*, 1962, Ph.D., Pontifical Gregorian Univ., 1967 (1980)
- Francis J. McCann**, *Associate Professional Specialist in Physical Education*. B.S., Oklahoma State Univ., 1965, M.S., Saint Cloud State Univ., 1967 (1984)
- Anita McChesney**, *Assistant Professor of German and Russian Languages and Literatures*. B.A., Walla Walla College, 1997, M.A., Bowling Green State Univ., 1999, Ph.D., Johns Hopkins Univ., 2005 (2006)
- Rodney L. McClain**, *Associate Professional Specialist in Aerospace and Mechanical Engineering*. B.S.M.E., Purdue Univ., 1972, M.S.M.E., Univ. of Notre Dame, 1982 (1980)
- Mark J. McCready**, *Professor of Chemical and Biomolecular Engineering, and Department Chair, Chemical and Biomolecular Engineering*. B.S.C.E., Univ. of Delaware, 1979, M.S., Univ. of Illinois Urbana-Champaign, 1981, Ph.D., *ibid.*, 1984 (1984)
- Bill D. McDonald**, *Professor of Finance*. B.S., Central Missouri State Univ., 1975, M.B.A., Arizona State Univ., 1976, Ph.D., *ibid.*, 1979 (1979)
- Mary A. McDowell**, *Assistant Professor of Biological Sciences*. B.S., Univ. of Nebraska-Lincoln, 1988, M.S., *ibid.*, 1990, Ph.D., Univ. of Wisconsin-Madison, 1995 (2001)
- Paul R. McDowell**, *Associate Professional Specialist in Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. B.A., Northern Illinois Univ., 1988, M.A., Univ. of Pennsylvania, 1991 (1991)
- Paul J. McGinn**, *Professor of Chemical and Biomolecular Engineering*. B.S., Univ. of Notre Dame, 1980, B.S., *ibid.*, 1980, M8, *ibid.*, 1983, Ph.D., *ibid.*, 1984 (1987)
- John T. McGreevy**, *Professor of History and Department Chair, History*. B.A., Univ. of Notre Dame, 1986, M.A., Stanford Univ., 1987, Ph.D., *ibid.*, 1992 (1997)
- Daniel McInerny**, *Professional Specialist in the Center for Ethics and Culture and Concurrent Professional Specialist in Philosophy*. B.A., Univ. of Notre Dame, 1986, M.A., Catholic Univ. of America, 1989, Ph.D., *ibid.*, 1994 (2003)
- Ralph M. McInerny**, *Professor of Philosophy and the Michael P. Grace II Chair in the Medieval Studies*. B.A., Saint Paul Seminary, 1951, M.A., Univ. of Minnesota, 1952, Ph.L., Univ. Laval Quebec, 1953, Ph.D., *ibid.*, 1954 (1955)
- James J. McKenna**, *Professor of Anthropology and the Rev. Edmund P. Joyce, C.S.C., Chair in Anthropology*. A.B., Univ. of California Berkeley, 1970, M.A., San Diego State Univ., 1972, Ph.D., Univ. of Oregon, 1975 (1997)
- Gerald P. McKenny**, *Associate Professor of Theology, Fellow of the Nanovic Institute for European Studies, and Director of the Reilly Center for Science, Technology, and Values*. B.A., Wheaton College, 1979, M.Div., Princeton Theological Seminary, 1982, Ph.D., Univ. of Chicago, 1989 (2001)

## FACULTY

- Mary C. McKeown**, *Associate Librarian, University Libraries*. B.A., Univ. of Toronto, 1977, M.A., *ibid.*, 1989 (1990)
- Sarah E. McKibben**, *Assistant Professor of Irish Language and Literature, Fellow of the Nanovic Institute for European Studies, and Fellow of the Keough-Naughton Institute for Irish Studies*. B.A., Univ. of California Berkeley, 1973, M.A., Cornell Univ., 2000, Ph.D., *ibid.*, 2002 (2002)
- Vaughn R. McKim**, *Associate Professor of Philosophy*. B.A., Oberlin College, 1962, M.A., Yale Univ., 1964, Ph.D., *ibid.*, 1966 (1966)
- Jason S. McLachlan**, *Assistant Professor of Biological Sciences*. B.S., Columbia Univ.–Main Division, 1989, M.S., Univ. of Washington, 1994, Ph.D., Duke Univ., 2003 (2006)
- Jean C. McManus**, *Associate Librarian, University Libraries*. A.B., Bryn Mawr College, 1985, M.A., Univ. of Chicago, 1989 (1997)
- Nicole M. McNeil**, *Assistant Professor of Psychology*. B.S., Carnegie Mellon Univ., 1999, Ph.D., Univ. of Wisconsin-Madison, 2005 (2006)
- Rev. Donald P. McNeill, C.S.C.**, *Professional Specialist in the Institute for Latino Studies and Senior Fellow of the Institute for Latino Studies*. B.B.A., Univ. of Notre Dame, 1958, S.T.L., Pontifical Gregorian Univ., 1966, Ph.D., Princeton Theological Seminary, 1971 (1971)
- Peter T. McQuillan**, *Associate Professor of Irish Language and Literature and Fellow of the Keough-Naughton Institute for Irish Studies*. B.A., University College Dublin, 1981, M.A., *ibid.*, 1983, Ph.D., Harvard Univ., 1991 (1994)
- Joyelle McSweeney**, *Assistant Professor of English*. A.B., Harvard Univ., 1997, M.Phil., Univ. of Oxford, 1999, M.F.A., Univ. of Iowa, 2001 (2006)
- Rory M. McVeigh**, *Associate Professor of Sociology and Department Chair, Sociology*. B.A., Univ. of Arizona, 1991, M.A., Univ. of North Carolina at Chapel Hill, 1993, Ph.D., *ibid.*, 1996 (2002)
- Leo H. McWilliams**, *Associate Professional Specialist in the Dean's Office—Engineering*. B.A., Univ. of Notre Dame, 1981, B.S., *ibid.*, 1982, B.S.E.E., *ibid.*, 1982, M.S.E.E., *ibid.*, 1985, M.S.E.E., *ibid.*, 1985, Ph.D., *ibid.*, 1993 (2001)
- Rev. John P. Meier, C.S.C.**, *Professor of Theology and the William K. Warren Foundation Chair in Theology*. B.A., Saint Joseph's Seminary and College, 1964, S.T.L., Pontifical Gregorian Univ., 1968, Ph.D., Univ. of Rome, 1976 (1998)
- Dan Meisel**, *Professor of Chemistry and Biochemistry*. B.S., Hebrew Univ. of Jerusalem, 1967, M.S., *ibid.*, 1969, Ph.D., *ibid.*, 1974 (1998)
- Collin Meissner**, *Assistant Professor of American Studies*. B.A., Univ. of British Columbia, 1985, M.A., Univ. of Notre Dame, 1987, Ph.D., *ibid.*, 1995 (1995)
- Rev. John A. Melloh, S.M.**, *Professional Specialist in Theology*. B.A., Univ. of Dayton, 1965, SD, *ibid.*, 1966, M.A., Univ. of Notre Dame, 1972, Ph.D., Saint Louis Univ., 1974 (1977)
- Richard R. Mendenhall**, *Professor of Finance*. B.S., U.S. Naval Academy, 1974, M.B.A., Indiana Univ.–Bloomington, 1981, Ph.D., *ibid.*, 1986 (1985)
- Ivis Menes**, *Assistant Professional Specialist in Romance Languages and Literatures*. AA, Miami-Dade Community College, 1993, B.A., Florida International University, 1994, M.A., Loyola Univ.–Chicago, 1996 (2000)
- Orlando R. Menes**, *Associate Professor of English and Fellow of the Institute for Latino Studies*. B.A., Univ. of Florida, 1980, M.A., *ibid.*, 1982, Ph.D., Univ. of Illinois at Chicago, 1998 (2000)
- Odette M. Menyard**, *Assistant Professional Specialist in Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. M.A., Univ. of Orleans, 1969, Dipl., *ibid.*, 1969, M.A., Univ. of Notre Dame, 1995 (1995)
- Thomas V. Merluzzi**, *Professor of Psychology*. A.A., Saint Thomas Seminary, 1966, B.A., Central Connecticut State College, 1969, M.A., Ohio State Univ., 1971, Ph.D., *ibid.*, 1975 (1974)
- James L. Merz**, *Professor of Electrical Engineering, Concurrent Professor of Physics, the Frank M. Freimann Chair in Engineering (III), and Fellow of the Nanovic Institute for European Studies*. B.S., Univ. of Notre Dame, 1959, M.A., Harvard Univ., 1961, Ph.D., *ibid.*, 1967 (1994)
- Margaret H. Meserve**, *Assistant Professor of History and Fellow of the Nanovic Institute*. A.B., Harvard Univ., 1992, M.A., the Warburg Institute, 1993, Ph.D., *ibid.*, 2001 (2003)
- Anthony M. Messina**, *Associate Professor of Political Science, Fellow of the Nanovic Institute for European Studies, and Fellow of the Helen Kellogg Institute of International Studies*. B.A., Assumption College, 1975, M.A., Drew Univ., 1977, Ph.D., Massachusetts Institute of Technology, 1984 (1999)
- Kerry L. Meyers**, *Associate Professional Specialist in the Dean's Office—Engineering*. M1, Oakland Univ., 1998, M.S., Purdue Univ., 1999 (2005)
- Connie L. Mick**, *Assistant Professional Specialist in the University Writing Program*. B.A., Manchester College, 1994, M.A., Boston College, 1997 (2000)
- Juan C. Migliore**, *Professor of Mathematics*. B.A., Haverford College, 1978, Ph.D., Brown Univ., 1983 (1989)
- Kenneth W. Milani**, *Professor of Accountancy*. B.S., Bradley Univ., 1962, M.B.A., *ibid.*, 1967, Ph.D., Univ. of Iowa, 1972 (1972)
- Douglas A. Miller**, *Assistant Professional Specialist in Chemistry and Biochemistry*. B.A., Drew Univ., 1981, Ph.D., Pennsylvania St Univ., 1989 (1997)
- Jeffrey S. Miller**, *Associate Professor of Accountancy*. B.S., Ohio State Univ., 1982, M.B.A., Univ. of Michigan, 1988, Ph.D., Univ. of Texas-Austin, 2000 (2000)
- Marvin J. Miller**, *Professor of Chemistry and Biochemistry and the George and Winifred Clark Chair in Chemistry (II)*. B.S., North Dakota State Univ., 1971, M.S., Cornell Univ., 1974, Ph.D., *ibid.*, 1976 (1977)
- Thurston D. Miller**, *Associate Librarian, University Libraries*. B.A., Univ. of Washington, 1987, M.A., *ibid.*, 1989 (1992)
- Alexander Mintairov**, *Research Associate Professor of Electrical Engineering*. Ph.D., St Petersburg Univ., 1987 (2000)
- Philip E. Mirowski**, *Professor of Economics and Policy Studies and the Carl E. Koch Chair in Economics*. Ph.D., Univ. of Michigan, 1979 (1990)
- Rev. Wilson D. Miscamble, C.S.C.**, *Professor of History*. B.A., Univ. of Queensland, 1974, M.A., *ibid.*, 1976, M.A., Univ. of Notre Dame, 1978, Ph.D., *ibid.*, 1980, Ph.D., *ibid.*, 1980, M.Div., *ibid.*, 1987 (1986)
- Kevin M. Misiewicz**, *Associate Professor of Accountancy*. B.B.A., Western Michigan Univ., 1970, Ph.D., Michigan State Univ., 1974 (1978)
- Gerard K. Misiolek**, *Associate Professor of Mathematics*. M.S., Technical Univ. of Warsaw, 1987, M.A., Univ. of Warsaw, 1988, Ph.D., State Univ. of New York at Stony Brook, 1992 (1993)
- Dennis R. Mitchell**, *Professor of Air Science*. B.S., Embry-Riddle Aeronautical Univ., 1980, M.S., *ibid.*, 2001 (2007)
- Nathan D. Mitchell**, *Professional Specialist in Theology and Concurrent Professional Specialist, Center for Pastoral Liturgy*. B.A., Saint Meinrad College, 1966, M.Div., Saint Meinrad School of Theology, 1970, M.A., Indiana Univ.–Bloomington, 1971, Ph.D., Univ. of Notre Dame, 1978 (1990)
- H.F. Mittelstaedt**, *Professor of Accountancy and Department Chair, Accountancy*. B.S., Illinois State Univ., 1979, M.S., *ibid.*, 1982, Ph.D., Univ. of Illinois Urbana-Champaign, 1987 (1992)
- Shahriar Mobashery**, *Professor of Chemistry and Biochemistry and Navari Family Chair in Life Sciences*. B.S., Univ. of Southern California, 1980, B.S., *ibid.*, 1981, Ph.D., Univ. of Chicago, 1985 (2003)
- Christian R. Moevs**, *Associate Professor of Romance Languages and Literatures*. B.A., Harvard Univ., 1980, M.A., Columbia Univ., 1989, Ph.D., *ibid.*, 1994 (1994)
- Kevin J. Mongrain**, *Assistant Professor in the Program of Liberal Studies and Concurrent Assistant Professor of Theology*. B.S., Saint John's Univ., 1989, M.S., *ibid.*, 1992, Ph.D., Yale Univ., 1999 (2004)

## FACULTY

**Scott M. Monroe**, *Professor of Psychology and the William K. Warren Foundation Chair in Theology*. B.S., Saint Olaf College, 1972, M.A., Southern Illinois Univ. at Carbondale, 1975, Ph.D., State Univ. of New York College at Buffalo, 1979 (2006)

**Susannah B. Monta**, *Associate Professor of English*. B.A., Urbana Univ., 1992, B.S., *ibid.*, 1992, M.A., Univ. of Wisconsin-Madison, 1993, Ph.D., *ibid.*, 1998 (2007)

**J. Anne Montgomery**, *Associate Professional Specialist in English*. B.A., Univ. of Texas-Austin, 1967, B.A., Univ. of Texas at El Paso, 1967, M.A., *ibid.*, 1969, M.A., Univ. of Texas-Austin, 1969, Ph.D., *ibid.*, 1976, Ph.D., *ibid.*, 1976, M.F.A., Univ. of Notre Dame, 1991 (1994)

**Peter R. Moody**, *Professor of Political Science*. B.A., Vanderbilt Univ., 1965, M.A., Yale Univ., 1967, Ph.D., *ibid.*, 1971 (1971)

**Patrick J. Mooney**, *Professional Specialist in Physics*. B.S., Univ. of Notre Dame, 1978, Ph.D., *ibid.*, 1986 (1998)

**Elizabeth S. Moore**, *Associate Professor of Marketing and Notre Dame Chair in Business*. B.A., Mount Holyoke College, 1980, M.Ed., Univ. of Florida, 1989, Ph.D., *ibid.*, 1994 (1999)

**Dennis W. Moran**, *Professional Specialist in Review of Politics*. B.A., Youngstown State Univ., 1966, Ph.D., Univ. of Notre Dame, 1976 (1976)

**Marisel C. Moreno**, *Assistant Professor of Romance Languages and Literatures and Fellow of the Institute for Latino Studies*. B.A., Univ. of Pennsylvania, 1995, Ph.D., Georgetown Univ., 2004 (2007)

**Rachel S. Moreno**, *Associate Professional Specialist in the Alliance for Catholic Education and Fellow of the Institute for Educational Initiatives*. B.S., Univ. of Arizona, 1969, M.Ed., *ibid.*, 1977, Ed.D., Northern Arizona Univ., 1994 (1999)

**Eric L. Morgan**, *Librarian, University Libraries*. B.A., Bethany College, 1982, M.L.S., Drexel Univ., 1987 (2001)

**Leslie L. Morgan**, *Assistant Librarian, University Libraries*. B.A., Mercy College of Detroit, 2001, M.A., Wayne State Univ., 2005 (2007)

**Stephen R. Moriarty**, *Associate Professional Specialist in the Sniite Museum and Concurrent Associate Professor of Art*. B.A., Univ. of Notre Dame, 1969, M.A., *ibid.*, 1980 (1990)

**Karen M. Morris**, *Assistant Professional Specialist in Chemistry and Biochemistry*. B.S., Purdue Univ., 1986, M.A., Andrews Univ., 1993 (2008)

**Michael H. Morris**, *Professor of Accountancy*. B.S., Case Western Reserve Univ., 1972, M.B.A., Univ. of Cincinnati, 1974, Ph.D., *ibid.*, 1980 (1979)

**Scott C. Morris**, *Assistant Professor of Aerospace and Mechanical Engineering*. B.S.M.E., Michigan State Univ., 1994, M.S.M.E., *ibid.*, 1997, M.A., *ibid.*, 2001, M.S., *ibid.*, 2002 (2002)

**Alexander S. Mukasyan**, *Research Professor of Chemistry and Biochemistry*. M.S., Moscow Physical-Technical Institute, 1980, Ph.D., Moscow Institute of Chemical Technology, 1986 (2007)

**Subhanan Mukherjee**, *Assistant Professor of Political Science and Concurrent Assistant Professor of Econometrics*. B.B.A., Univ. of Delhi, 1996, M.S., Univ. of Chicago, 1997, M.Phil., Univ. of Cambridge, 1997, Ph.D., Columbia Univ., 2004 (2006)

**G. Felicitas Munzel**, *Associate Professor in the Program of Liberal Studies, Fellow of the Nanovic Institute for European Studies, Concurrent Associate Professor of Philosophy, and Director of the Institute for Scholarship in Liberal Arts*. B.A., Mercer Univ.-Main Campus, 1983, M.A., Emory Univ., 1988, Ph.D., *ibid.*, 1990 (1992)

**Patrick E. Murphy**, *Professor of Marketing, Fellow of the Nanovic Institute for European Studies, and the C.R. Smith II Director of the Institute for Ethical Business Worldwide*. B.B.A., Univ. of Notre Dame, 1970, M.B.A., Bradley Univ., 1971, Ph.D., Univ. of Houston, 1975 (1984)

**Tonia H. Murphy**, *Associate Professional Specialist in Accountancy*. B.A., Univ. of Notre Dame, 1984, J.D., Univ. of Michigan, 1987 (1992)

**Dian H. Murray**, *Professor of History and Department Chair, East Asian Languages & Cultures*. B.A., Cornell College, 1971, M.A., Cornell Univ., 1974, Ph.D., *ibid.*, 1979 (1984)

**Daniel J. Myers**, *Professor of Sociology and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Ohio State Univ., 1988, M.A., *ibid.*, 1991, M.S., Univ. of Wisconsin-Madison, 1995, Ph.D., *ibid.*, 1997 (1998)

**John C. Nagle**, *Professor of Law and the John N. Mathews Chair in Law*. B.A., Indiana Univ.-Bloomington, 1982, J.D., Univ. of Michigan, 1986 (1998)

**Darcia F. Narvaez**, *Associate Professor of Psychology, Fellow of the Institute for Latino Studies, Fellow of the Institute for Educational Initiatives, Concurrent Associate Professor of Institute for Educational Initiatives, and Fellow of the Center for Social Concerns*. B.A., Univ. of Northern Colorado, 1976, M.Div., Lutheran School of Theology, 1984, Ph.D., Univ. of Minnesota, 1993 (2000)

**Clive R. Neal**, *Professor of Civil Engineering and Geological Sciences*. Ph.D., Univ. of Leeds, 1985, B.S., Univ. of Leicester, (1990)

**Dale M. Nees**, *Professor of Naval Science*. M.S., Naval Postgraduate School, 1986 (2007)

**Alven M. Neiman**, *Professional Specialist in Philosophy*. B.A., Univ. of Akron, 1973, Ph.D., Univ. of Notre Dame, 1978 (1978)

**Robert C. Nelson**, *Professor of Aerospace and Mechanical Engineering*. B.S., Univ. of Notre Dame, 1964, M.S., *ibid.*, 1966, Ph.D., Pennsylvania State Univ., 1974 (1975)

**Jennifer E. Nemecek**, *Associate Professional Specialist in the Office of Arts and Letters Undergraduate Studies*. B.A., Gettysburg College, 1990, M.A., Georgetown Univ., 1993 (1999)

**Robert Nerenberg**, *Assistant Professor of Civil Engineering and Geological Sciences*. B.A., Univ. de Buenos Aires, 1990, M.S.C.E., Wayne State Univ., 1992, Ph.D., Northwestern Univ., 2003 (2004)

**Samuel Newlands**, *Assistant Professor of Philosophy*. B.Phil., Wake forest Univ., 2000, M.A., Yale Univ., 2001, M.Phil., *ibid.*, 2003, Ph.D., *ibid.*, 2006 (2006)

**Kathie E. Newman**, *Professor of Physics*. B.S., Michigan State Univ., 1974, Ph.D., Univ. of Washington, 1981 (1983)

**Rev. Martin Lam Nguyen, C.S.C.**, *Associate Professor of Art, Art History, and Design*. B.A., Univ. of Portland, 1982, M.Div., Univ. of Notre Dame, 1988, M.A., Yale Univ., 1993, M.F.A., Univ. of California Berkeley, 1995 (1995)

**Walter J. Nicgoriski**, *Professor in the Program of Liberal Studies and Concurrent Professor of Political Science*. B.A., Georgetown Univ., 1960, M.A., Univ. of Chicago, 1962, Ph.D., *ibid.*, 1966 (1964)

**William D. Nichols**, *Professor of Accountancy and Associate Dean, Mendoza College of Business*. B.B.A., Western Michigan Univ., 1969, M.B.A., *ibid.*, 1973, Ph.D., Florida State Univ., 1978 (1977)

**David Nickerson**, *Assistant Professor of Political Science*. B.A., Williams College, 1997, Ph.D., Yale Univ., 2004 (2005)

**Liviu Nicolaescu**, *Associate Professor of Mathematics*. B.S., Al Icuza Univ., 1987, Ph.D., Michigan State Univ., 1994 (1998)

**Glen L. Niebur**, *Associate Professor of Aerospace and Mechanical Engineering*. B.S.M.E., Univ. of Minnesota, 1986, M.A., *ibid.*, 1995, Ph.D., Univ. of California Berkeley, 2000 (2000)

**Michael T. Niemier**, *Research Assistant Professor of Computer Science and Engineering*. B.S., Univ. of Notre Dame, 1998, B.S., *ibid.*, 1998, M.S., *ibid.*, 2000, Ph.D., *ibid.*, 2004 (2005)

**Jonathan Noble**, *Associate Professional Specialist in Provost Office and Advisor, Asia Initiatives*. B.A., College of William and Mary, 1994, M.A., Ohio State Univ., 1996 (2007)

**Thomas F.X. Noble**, *Professor of History, Fellow of the Nanovic Institute for European Studies, Director of the Medieval Institute, and the Robert Conway Director of the Medieval Institute*. B.A., Ohio Univ., 1969, M.A., Michigan State Univ., 1971, Ph.D., *ibid.*, 1974 (2001)

**Bruce C. Noll**, *Research Associate Professor of Chemistry and Biochemistry*. B.S., Metropolitan State College, 1988, Ph.D., Univ. of California Davis, 1999 (2003)

## FACULTY

- Mark Noll**, *Professor of History and Endowed Chair, History*. A.B., Wheaton College, 1968, M.A., Univ. of Iowa, 1970, M.A., Trinity Evangelical Divinity School, 1972, M.A., Vanderbilt Univ., 1974, Ph.D., *ibid.*, 1975 (2006)
- Carolyn R. Nordstrom**, *Professor of Anthropology and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Univ. of Colorado, 1978, M.A., Univ. of California Berkeley, 1980, Ph.D., *ibid.*, 1986 (1997)
- Robert E. Norton**, *Professor of German and Russian Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of California Santa Barbara, 1982, M.A., Princeton Univ., 1985, Ph.D., *ibid.*, 1988 (1998)
- Thomas Nowak**, *Professor of Chemistry and Biochemistry*. B.S., Case Western Reserve Univ., 1964, Ph.D., Univ. of Kansas, 1969 (1972)
- Ronald J. Nuzzi**, *Professional Specialist in the Alliance for Catholic Education*. B.A., Saint Gregory's Seminary, 1979, M.A., Athenaeum of Ohio, 1984, M.S., Ursuline College, 1991, Ph.D., Univ. of Dayton, 1995 (2002)
- Brian Ó Conchubhair**, *Assistant Professor of Irish Language and Literature and Fellow of the Keough-Naughton Institute for Irish Studies*. B.Ed., Mary Immaculate College, 1991, M.A., University College Galway, 1995, M.A., Boston College, 1999, Ph.D., National Univ. of Ireland Galway, 2002 (2004)

- Kathleen C. Opel**, *Associate Professional Specialist in Off-Campus Programs and Associate Director of Off-Campus Programs*. B.A., Pennsylvania State Univ., 1973, M.A., Fairfield Univ., 1977 (1999)
- Alexei Orlov**, *Research Associate Professor of Electrical Engineering*. M.S., Moscow State Univ., 1983, Ph.D., Moscow Institute. Radioengineering, 1990 (1994)
- John L. Ott**, *Associate Professional Specialist in Aerospace and Mechanical Engineering*. B.S.E.E., Tri-State Univ., 1980, M.S.E.E., Univ. of Notre Dame, 1998 (1984)
- Warren G. Outlaw**, *Associate Professional Specialist in TRIO Programs and Director of the Educational Talent Search*. B.S., Lincoln Univ., 1974, M.S., Indiana Univ. South Bend, 1981 (1980)
- Timothy C. Ovaert**, *Professor of Aerospace and Mechanical Engineering*. B.S., Univ. of Illinois Urbana-Champaign, 1981, M.E.M., Northwestern Univ., 1985, Ph.D., *ibid.*, 1989 (2000)
- Harold L. Pace**, *Registrar*. B.S., Southern Arkansas Univ., 1970, M.S., East Texas State Univ., 1971, Ph.D., Texas A&M Univ., 1984 (1991)
- Rev. Hugh R. Page Jr.**, *Associate Professor of Theology, the Walter Chair in Theology of the New Testament, and Dean, First Year of Studies*. B.A., Hampton Univ., 1977, M.Div., General Theological Seminary, 1980, S.T.M., *ibid.*, 1983, M.A., Harvard Univ., 1988, Ph.D., *ibid.*, 1990 (1992)
- Benjamin D. Panciera**, *Assistant Librarian, University Libraries*. B.A., Univ. of Chicago, 1992, M.A., Univ. of Notre Dame, 1994, M.L.S., Indiana-Purdue Univ. Indianapolis, 2002 (1999)
- Gerard J. Pannekoek**, *Associate Professional Specialist in Management*. M.B.A., Northwestern Univ., 1993 (2006)
- Samuel Paolucci**, *Professor of Aerospace and Mechanical Engineering*. B.E., Drexel Univ., 1975, Ph.D., Cornell Univ., 1979 (1989)
- Irene J. Park**, *Assistant Professor of Psychology*. B.A., Wesleyan Univ., 1993, M.A., Univ. of California Santa Barbara, 1998, Ph.D., *ibid.*, 2001 (2003)

## FACULTY

- Dianne Patnaude**, *Associate Professional Specialist in Physical Education*. B.S., Indiana Univ., 1972, M.S.A., Univ. of Notre Dame, 1990 (1978)
- Rev. Robert S. Pelton, C.S.C.**, *Associate Professional Specialist Emeritus of Helen Kellogg Institute for International Studies, Fellow of the Helen Kellogg Institute for International Studies, Concurrent Professor of Theology, and Lanacc Director*. B.A., Univ. of Notre Dame, 1945, Ph.D., Univ. of Rome, 1952, S.T.L., *ibid.*, 1952 (1975)
- Adela Penagos**, *Assistant Professional Specialist in Romance Languages and Literatures*. B.A., Knox College, 1989, M.A., Univ. of Notre Dame, 1992, Ph.D., Boston Univ., 2007 (1998)
- Jeffrey W. Peng**, *Assistant Professor of Chemistry and Biochemistry*. B.S., Cornell Univ., 1987, Ph.D., Univ. of Michigan, 1993 (2003)
- Catherine Perry**, *Associate Professor of Romance Languages and Literatures, Fellow of the Nanovic Institute for European Studies, and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Indiana Univ.-Bloomington, 1987, M.A., *ibid.*, 1989, M.A., Princeton Univ., 1992, Ph.D., *ibid.*, 1995 (1993)
- Kathleen A. Peterson**, *Associate Professional Specialist in Chemistry and Biochemistry*. B.A., St. Xavier's College, 1965, M.S., Univ. of Chicago, 1967 (1980)
- Margaret R. Pfeil**, *Assistant Professor of Theology*. B.A., Univ. of Notre Dame, 1987, Th.M., Weston School of Theology, 1994, M.T.S., *ibid.*, 1994, M.A., Univ. of Notre Dame, 1997, Ph.D., *ibid.*, 2000 (2002)
- Dianne T. Phillips**, *Assistant Professional Specialist and Associate Director of the Erasmus Institute*. B.A., Univ. of Manitoba, 1979, M.A., Yale Univ., 1982, M.Phil., *ibid.*, 1984 (1999)
- Joan M. Phillips**, *Assistant Professor of Marketing*. B.A., State Univ. of New York at Albany, 1984, M.B.A., Univ. of Virginia, 1992, Ph.D., Univ. of Illinois Urbana-Champaign, 1996 (2000)
- James D. Philpott**, *Associate Professor of Political Science and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Virginia, 1989, M.A., Harvard Univ., 1991, Ph.D., *ibid.*, 1996 (2001)
- Richard B. Pierce II**, *Associate Professor of History, Fellow of the Joan B. Kroc Institute for International Peace Studies, Department Chair—Africana Studies, and Endowed John Cardinal O'Hara C.S.C., Associate Professor*. B.A., Valparaiso Univ., 1985, M.A., Univ. of Wisconsin-Milwaukee, 1988, Ph.D., Indiana Univ.-Bloomington, 1996 (1996)
- Anne B. Pilkington**, *Assistant Professional Specialist in Mathematics*. B.A., University College Dublin, 1984, M.A., *ibid.*, 1985, M.A., *ibid.*, 1985, M.S., Univ. of Notre Dame, 1989, Ph.D., *ibid.*, 1991 (1998)
- Carole Pilkinton**, *Associate Librarian, University Libraries*. B.A., Coe College, 1964, M.A., Indiana Univ.-Bloomington, 1968, M.A., *ibid.*, 1991 (1996)
- Mark C. Pilkinton**, *Professor of Film, Television, and Theatre*. B.S., Univ. of Memphis, 1969, M.A., Univ. of Virginia, 1971, Ph.D., Univ. of Bristol, 1975 (1984)
- Dianne M. Pinderhughes**, *Professor of Africana Studies, Fellow of the Helen Kellogg Institute for International Studies, and Concurrent Professor of Political Science*. A.B., Albertus Magnus College, 1969, M.A., Univ. of Chicago, 1973, Ph.D., *ibid.*, 1977 (2006)
- Alvin Plantinga**, *Professor of Philosophy and the Rev. John A. O'Brien Chair in Philosophy (I)*. B.A., Calvin College, 1954, M.A., Univ. of Michigan, 1955, Ph.D., Yale Univ., 1958 (1977)
- Victoria A. Ploplis**, *Research Professor in the Center for Transgene Research*. B.A., Rosary College, 1975, Ph.D., Univ. of Notre Dame, 1981 (1998)
- Carolyn R. Plummer**, *Associate Professor of Music*. B.Mus., Indiana Univ.-Bloomington, 1970, M.Mus., New England Conservatory of Music, 1973 (1989)
- Christian H. Poehlmann**, *Assistant Librarian, University Libraries*. B.A., Indiana Univ.-Bloomington, 1985, M.S., *ibid.*, 1985 (1999)
- Christian Poellabauer**, *Assistant Professor of Computer Science and Engineering*. Ph.D., Georgia Institute of Technology, 2004 (2004)
- Claudia Polini**, *Associate Professor of Mathematics*. B.S., Univ. degli Studi di Padova (Italy), 1990, Ph.D., Rutgers Univ., 1995 (2001)
- Pierpaolo Polzonetti**, *Assistant Professor in the Program of Liberal Studies*. A.B., Univ. of Rome, 1995, M.A., Cornell Univ., 2001, Ph.D., *ibid.*, 2003 (2006)
- Janice M. Poorman**, *Professional Specialist in Theology*. B.S., Southern Illinois Univ. at Carbondale, 1976, M.A., Univ. of Notre Dame, 1988, Ph.D., *ibid.*, 1996 (1993)
- Rev. Mark L. Poorman, C.S.C.**, *Vice President for Student Affairs and Associate Professor of Theology*. A.B., Univ. of Illinois, 1976, M.Div., Univ. of Notre Dame, 1980, Ph.D., Graduate Theological Union, 1990 (1985, 1990)
- Donald B. Pope-Davis**, *Professor of Psychology, Fellow of the Institute for Educational Initiatives, Fellow of the Center for Social Concerns, and Vice President and Associate Provost*. B.A., Benedictine Univ., 1976, M.S., Indiana Univ.-Bloomington, 1978, Ph.D., Stanford Univ., 1989 (2000)
- Wolfgang Porod**, *Professor of Electrical Engineering and the Frank M. Freimann Chair in Electrical and Computer Engineering (II)*. M.S., Univ. of Graz, 1979, Ph.D., *ibid.*, 1981 (1986)
- Constance E. Porter**, *Assistant Professor of Marketing*. B.S., Bloomsburg Univ. Pennsylvania, 1988, M.B.A., Univ. of Michigan, 1992, Ph.D., Georgia State Univ., 2004 (2004)
- G. Margaret Porter**, *Librarian, University Libraries*. B.A., Indiana Univ. South Bend, 1975, B.A., Indiana Univ.-Bloomington, 1975, M.A., Western Michigan Univ., 1977, M.A., *ibid.*, 1977 (1981)
- Jean Porter**, *Professor of Theology and the Rev. John A. O'Brien Chair of Theology*. B.A., Univ. of Texas Austin, 1976, M.Div., Weston School of Theology, 1980, M.A., Yale Univ., 1981. Ph.D., Yale Univ., 1984 (1990)
- Vincent J. Powell**, *Assistant Professor of Air Science*. B.B.A., Univ. of North Texas, 1989, M.B.A., Webster Univ., 2001 (2005)
- AnnMarie R. Power**, *Assistant Professional Specialist in Sociology*. B.S., West Chester Univ., 1974, M.Ed., Boston Univ., 1977, M.A., Univ. of Notre Dame, 1993, Ph.D., *ibid.*, 1999 (1999)
- Clark Power**, *Professor in the Program of Liberal Studies, Fellow of the Institute for Educational Initiatives, Concurrent Professor of Psychology, and Program Director of Play Like a Champion Today*. B.A., Villanova Univ., 1970, M.A., Washington Theological Coalition, 1974, C.A.S., Harvard Univ., 1976, Ed.D., *ibid.*, 1979 (1982)
- Gerard F. Powers**, *Professional Specialist in the Joan B. Kroc Institute for International Peace Studies, and Director of the Policy Studies*. A.B., Princeton Univ., 1980, J.D., Univ. of Notre Dame, 1986, M.A., *ibid.*, 1988 (2004)
- Joseph M. Powers**, *Associate Professor of Aerospace and Mechanical Engineering and Concurrent Associate Professor of Mathematics*. B.S., Univ. of Illinois Urbana-Champaign, 1983, M.S., *ibid.*, 1985, Ph.D., *ibid.*, 1988 (1989)
- Ava Preacher**, *Associate Professional Specialist in the Office of Arts and Letters Undergraduate Study, and Associate Director of the Office of Dean of Arts and Letters*. B.A., Univ. of Iowa, 1975, M.A., *ibid.*, 1981 (1989)
- Michael J. Pries**, *Associate Professor of Economics and Econometrics*. B.A., Univ. of Notre Dame, 1993, Ph.D., Stanford Univ., 1999 (2007)
- Vera B. Profit**, *Professor of German and Russian Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. B.A., Alverno College, 1967, M.A., Univ. of Rochester, 1969, Ph.D., *ibid.*, 1974 (1975)
- MaryFrances E. Prorok**, *Research Associate Professor in the Center for Transgene Research*. B.S., State Univ. of New York at Buffalo, 1982, Ph.D., *ibid.*, 1991 (1993)
- Thomas J. Prügl**, *Associate Professor of Theology and the Tisch Family Chair in Theology (Collegiate Chair)*. Ph.D., Ludwig Maximilian Univ. of Munich, 1984, B.A., *ibid.*, 1984 (2001)

## FACULTY

- Linda Przybyszewski**, *Associate Professor of History*. B.S., Northwestern Univ., 1984, M.A., Stanford Univ., 1986, Ph.D., *ibid.*, 1989 (2005)
- William J. Purcell**, *Assistant Professional Specialist in the Center for Social Concerns and Associate Director of Catholic Social Teaching*. B.A., Univ. of Notre Dame, 1986, M.Div., *ibid.*, 1992 (2005)
- Kathleen A. Pyne**, *Professor of Art, Art History, and Design*. B.A., Univ. of Michigan, 1971, M.A., *ibid.*, 1975, Ph.D., *ibid.*, 1988 (1988)
- Carolyn C. Queenan**, *Assistant Professor of Management*. B.S., Virginia Polytechnic Institute, 1994, M.B.A., Georgia Institute of Technology, 1999, Ph.D., *ibid.*, 2007 (2007)
- Benjamin Radcliff**, *Professor of Political Science*. B.A., Univ. of Illinois Urbana-Champaign, 1984, M.A., *ibid.*, 1986, Ph.D., *ibid.*, 1991 (1991)
- Gabriel A. Radvansky**, *Associate Professor of Psychology*. B.A., Cleveland State Univ., 1987, M.A., Michigan State Univ., 1989, Ph.D., *ibid.*, 1992 (1993)
- James J. Rakowski**, *Associate Professor of Economics and Policy Studies*. B.A., Creighton Univ., 1963, Ph.D., Univ. of Minnesota of Minneapolis, 1968 (1967)
- Jose Marcelo Ramalho-Ortigao**, *Research Assistant Professor of Biological Sciences*. B.S., University Research Institute, 1986 (2005)
- Ramachandran Ramanam**, *Professor of Accountancy*. B.S., Annamalai Univ., 1971, Ph.D., Northwestern Univ., 1986 (1991)
- Grant A. Ramsey**, *Assistant Professor of Philosophy*. B.S., Evergreen State College, 1997, Ph.D., Duke Univ., 2007 (2007)
- Kali P. Rath**, *Associate Professor of Economics and Econometrics*. B.A., Utkal Univ., 1977, M.A., Johns Hopkins Univ., 1988, Ph.D., *ibid.*, 1992 (1990)
- Michael C. Rea**, *Associate Professor of Philosophy and Associate Director of the Center for Philosophy of Religion*. B.Phil., California State Univ. Los Angeles, 1991, B.E., *ibid.*, 1991, B.A., Univ. of California at Los Angeles, 1991, M.A., Univ. of Notre Dame, 1994, Ph.D., *ibid.*, 1996 (2000)
- Warren D. Rees**, *Librarian, Law Library*. B.A., Minnesota Bible College, 1978, J.D., Southern Illinois Univ. at Carbondale, 1985, M.A., Univ. of Michigan, 1986 (1997)
- Frank K. Reilly**, *Professor of Finance and Bernard J. Hank Professor of Business Administration*. B.A., Univ. of Notre Dame, 1957, M.B.A., Northwestern Univ., 1961, M.B.A., Univ. of Chicago, 1964, Ph.D., *ibid.*, 1968 (1981)
- John E. Renaud**, *Professor of Aerospace and Mechanical Engineering*. B.S., Univ. of Maine at Orono, 1982, M.S., Rensselaer Polytechnic Institute, 1989, Ph.D., *ibid.*, 1992 (1992)
- Georgine Resick**, *Professor of Music and Fellow of the Nanovic Institute for European Studies*. B.Mus., American Univ., 1973, Dipl. in Art, Peabody Institute of John Hopkins, 1975 (1990)
- Terrence W. Rettig**, *Professor of Physics*. B.A., Defiance College, 1968, M.S., Ball State Univ., 1970, Ph.D., Indiana Univ. Bloomington, 1976 (1983)
- Luc H. Reydams**, *Assistant Professional Specialist in Political Science, Fellow of the Joan B. Kroc Institute for International Peace Studies, and Fellow of the Nanovic Institute for European Studies*. L.L.M., Univ. of Notre Dame, 1995, J.S.D., *ibid.*, 2001 (1997)
- Gretchen J. Reydams-Schils**, *Professor in the Program of Liberal Studies, Fellow of the Nanovic Institute for European Studies, Concurrent Associate Professor of Philosophy, and Associate Dean of Research, Graduate Studies and Centers*. B.A., Katholieke Univ. Te Leuven, 1987, M.A., Univ. of Cincinnati, 1989, Ph.D., Univ. of California Berkeley, 1994 (1994)
- Gabriel S. Reynolds**, *Assistant Professor of Theology*. B.A., Columbia Univ., 1994, M.A., Yale Univ., 2001, Ph.D., *ibid.*, 2003 (2003)
- Robin F. Rhodes**, *Associate Professor of Art, Art History, and Design and Concurrent Associate Professor of the Classics*. B.A., Univ. of North Carolina at Chapel Hill, 1974, Ph.D., *ibid.*, 1984 (1996)
- David N. Ricchiute**, *Professor of Accountancy and the Deloitte & Touche Professor of Accountancy*. B.S., Bryant College, 1970, M.S., Univ. of Kentucky, 1974, Ph.D., *ibid.*, 1977 (1977)
- Alison Rice**, *Assistant Professor of Romance Languages and Literatures*. B.A., Loma Linda Univ. La Sierra, 1996, M.A., California State Univ. Los Angeles, 1999, Ph.D., Univ. of California at Los Angeles, 2003 (2005)
- Karen E. Richman**, *Associate Professional Specialist in the Institute for Latino Studies and Director of Border and InterAmerican Affairs*. B.A., Wesleyan Univ., 1978, M.A., Univ. of Virginia, 1981, Ph.D., *ibid.*, 1992 (1997)
- J. Keith Rigby**, *Associate Professor of Civil Engineering and Geological Sciences*. B.S., Brigham Young Univ., 1971, M.Phil., Columbia Univ., 1974, Ph.D., *ibid.*, 1977 (1982)
- Kenneth F. Ripple**, *Professor of Law*. B.A., Fordham Univ., 1965, J.D., Univ. of Virginia, 1968, L.L.M., George Washington Univ., 1972 (1977)
- Juan M. Rivera**, *Associate Professor of Accountancy and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Institute of Technology Monterrey, 1966, M.A., Univ. of Illinois Urbana-Champaign, 1969, Ph.D., *ibid.*, 1975 (1983)
- John H. Robinson**, *Associate Professor of Law and Associate Dean, Law School*. B.A., Boston College, 1967, M.A., Univ. of Notre Dame, 1972, Ph.D., *ibid.*, 1975, J.D., Univ. of California Berkeley, 1979 (1981)
- Mark W. Roche**, *Professor of German and Russian Languages and Literatures, Fellow of the Nanovic Institute for European Studies, the I.A. O'Shaughnessy Dean of the College of Arts and Letters, the Rev. Edmund P. Joyce, C.S.C., Chair in German Language and Literature, Concurrent Professor of Philosophy, and Dean, Arts and Letters*. B.A., Williams College, 1978, M.A., Eberhard Karl Univ. of Tübingen, 1980, Ph.D., Princeton Univ., 1984 (1996)
- Robert E. Rodes Jr.**, *Professor of Law and the Paul J. Schierl/Fort Howard Corporation Chair in Legal Ethics*. B.A., Brown Univ., 1947, L.L.B., Harvard Univ., 1952 (1956)
- Jaime J. Rodriguez**, *Assistant Professor of English*. B.A., North Texas State Univ., 1981, A.M., Harvard Univ., 1994, Ph.D., *ibid.*, 2000 (2002)
- Marc S. Rodriguez**, *Assistant Professor of History, Fellow of the Institute for Latino Studies, and Concurrent Assistant Professor of Law*. B.A., Univ. of Wisconsin-Milwaukee, 1993, B.A., Univ. of Wisconsin-Madison, 1993, M.A., Northwestern Univ., 1994, M.A., *ibid.*, 1994, Ph.D., *ibid.*, 2000, Ph.D., *ibid.*, 2000, J.D., Univ. of Wisconsin-Madison, 2001 (2003)
- Ryan K. Roeder**, *Associate Professor of Aerospace and Mechanical Engineering*. B.S., Purdue Univ., 1994, Ph.D., *ibid.*, 1999 (2001)
- Jeanne Romero-Severson**, *Associate Professor of Biological Sciences*. B.S., Univ. of Wisconsin-Madison, 1974, M.S., *ibid.*, 1975, Ph.D., *ibid.*, 1984 (1997)
- Kevin M. Rooney**, *Associate Professional Specialist in the Dean's Office—First Year of Studies and Associate Dean, First Year of Studies*. B.A., Univ. of Notre Dame, 1970, M.S., State Univ. of New York at Albany, 1973 (1984)
- Leon J. Roos**, *Professor of Political Science*. B.A., Univ. of Notre Dame, 1965, M.A., Univ. of Chicago, 1968, Ph.D., *ibid.*, 1971 (1970)
- Jaime Ros**, *Professor of Economics and Policy Studies and Fellow of the Helen Kellogg Institute for International Studies*. M.A., National Autonomous Univ. of Mexico, 1974, Ph.D., Univ. of Cambridge, 1978 (1990)
- Sebastian Rosato**, *Assistant Professor of Political Science and Fellow of the Nanovic Institute*. B.A., Univ. of Cambridge, 1994, M.Phil., Univ. of Oxford, 1996, M.A., Univ. of Chicago, 2000, Ph.D., *ibid.*, 2005 (2006)
- Charles M. Rosenberg**, *Professor of Art, Art History, and Design*. B.A., Swarthmore College, 1967, M.A., Univ. of Michigan, 1969, Ph.D., *ibid.*, 1974 (1980)
- Joseph T. Ross**, *Assistant Librarian, University Libraries*. B.A., Lycoming College, 1973, M.T.S., Harvard Univ., 1977, M.A., Univ. of Notre Dame, 1991, M.A., Indiana Univ.-Bloomington, 1993 (1996)

## FACULTY

- Deborah L. Rotman**, *Assistant Professional Specialist in Anthropology*. B.A., Grand Valley State Univ., 1993, M.A., Western Michigan Univ., 1995, Ph.D., Univ. of Massachusetts, 2001 (2006)
- Vincent D. Rougeau**, *Associate Professor of Law and T. J. White Chair*. B.A., Brown Univ., 1985, J.D., Harvard Univ., 1988 (1997)
- Ingrid D. Rowland**, *Professor of Architecture*. B.A., Pomona College, 1974, M.A., Bryn Mawr College, 1976, Ph.D., *ibid.*, 1980 (2005)
- David F. Ruccio**, *Professor of Economics and Policy Studies*. B.A., Bowdoin College, 1976, Ph.D., Univ. of Massachusetts, 1984 (1982)
- Randal C. Ruchti**, *Professor of Physics*. B.S., Univ. of Wisconsin-Madison, 1968, M.S., Univ. of Illinois Urbana-Champaign, 1970, Ph.D., Michigan State Univ., 1973 (1977)
- Steven T. Ruggiero**, *Professor of Physics*. B.S., Rensselaer Polytechnic Institute, 1975, M.S., Stanford Univ., 1977, Ph.D., *ibid.*, 1981 (1983)
- Fred L. Rush**, *Associate Professor of Philosophy and Fellow of the Nanovic Institute for European Studies*. B.A., Washington & Lee Univ., 1978, Ph.D., Columbia Univ., 1996 (2001)
- Maura A. Ryan**, *Associate Professor of Theology and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., St. Bonaventure Univ., 1979, M.A., Boston College, 1987, M.Phil., Yale Univ., 1990, Ph.D., *ibid.*, 1993 (1993)
- Abdul M. Saadi**, *Assistant Professional Specialist in the Classics*. B.S.C.E., Aleppo Univ., 1984, B.B.A., Damascus Univ., 1990, M.A., Lutheran School of Theology, 1993, Th.M., *ibid.*, 1995, Ph.D., *ibid.*, 1999 (2002)
- Salma Saddawi**, *Professional Specialist in Chemical and Biomolecular Engineering*. B.S., Univ. of Baghdad, 1977, M.S., Technical Univ. of Warsaw, 1984, Ph.D., *ibid.*, 1989 (1996)
- Shafa Saddawi**, *Professional Specialist in Physics*. B.S., Univ. of Baghdad, 1969, M.S., Warsaw Univ., 1985, Ph.D., *ibid.*, 1989 (1997)
- Michael K. Sain**, *Professor of Electrical Engineering and the Frank M. Freimann Chair in Electrical Engineering (I)*. B.S., Saint Louis Univ., 1959, M.S., *ibid.*, 1962, Ph.D., Univ. of Illinois Urbana-Champaign, 1965 (1965)
- Ronald J. Sakal**, *Professional Specialist in Architecture*. B.A., Univ. of Illinois at Chicago, 1971, B.Arch., *ibid.*, 1975 (2005)
- Philip J. Sakimoto**, *Professional Specialist in Physics*. B.S., California State Polytechnical Univ. Pomona, 1976, M.S., Univ. of Southern California, 1979, Ph.D., *ibid.*, 1985 (2005)
- Susan E. Sakimoto**, *Assistant Professor of Civil Engineering and Geological Sciences*. B.A., Whitman College, 1989, M.S., Johns Hopkins Univ., 1991, Ph.D., *ibid.*, 1995 (2004)
- Mayra J. Sandoval-Cooper**, *Associate Professional Specialist in the Center for Transgene Research*. B.S., Trinity College Burlington, 1984, HT. Dipl., Hartford State Technical College, 1987 (1999)
- Jonathan R. Sapirstein**, *Professor of Physics*. B.S., Stanford Univ., 1973, Ph.D., *ibid.*, 1979 (1984)
- Daniel J. Saracino**, *Assistant Provost for Enrollment, Admissions*. B.A., Univ. of Notre Dame, 1969, M.A., *ibid.*, 1975 (1997)
- Koshala Sarveswaran**, *Research Assistant Professor of Chemistry and Biochemistry*. B.S., Univ. of Jaffna, 1992, Ph.D., Univ. of Cambridge, 1999 (2001)
- Ken D. Sauer**, *Associate Professor of Electrical Engineering*. B.S.E.E., Purdue Univ., 1984, M.S.E.E., *ibid.*, 1985, M.A., Princeton Univ., 1987, Ph.D., *ibid.*, 1989 (1989)
- Valerie L. Sayers**, *Professor of English*. B.A., Fordham Univ., 1973, M.F.A., Columbia Univ., 1976 (1993)
- Kenneth M. Sayre**, *Professor of Philosophy*. B.A., Grinnell College, 1952, M.A., Harvard Univ., 1954, Ph.D., *ibid.*, 1958 (1958)
- Kevin P. Scanlon**, *Associate Professional Specialist in Finance*. B.A., Univ. of Florida, 1975, M.B.A., *ibid.*, 1976, Ph.D., *ibid.*, 1985 (1985)
- Thomas F. Schaefer**, *Professor of Accountancy and the KPMG Chair in Accountancy*. B.A., Northern Illinois Univ., 1974, M.A., Univ. of Illinois Urbana-Champaign, 1976, Ph.D., *ibid.*, 1982 (1998)
- R. Michael Schafer**, *Professional Specialist in Electrical Engineering*. B.S., Univ. of Notre Dame, 1975, M.S., *ibid.*, 1977, Ph.D., *ibid.*, 1980 (1991)
- W. Robert Scheidt**, *Professor of Chemistry and Biochemistry and the William K. Warren (III) Foundation Chair in Science*. B.S., Univ. of Missouri-Columbia, 1964, M.S., Univ. of Michigan, 1966, Ph.D., *ibid.*, 1968 (1970)
- Michael G. Schellinger**, *Assistant Professor of Army Science*. B.A., Univ. of Notre Dame, M.S., Embury-Riddle Aeronautical Univ., (2006)
- Diane M. Scherzer**, *Associate Professional Specialist in Physical Education*. B.S., University Wisconsin La Crosse, 1979, M.S., Univ. of North Carolina at Greensboro, 1986 (1991)
- Sharon K. Schierling**, *Professional Specialist in the Kellogg Institute for International Studies and Associate Director of the Kellogg Institute for International Studies*. B.S., Louisiana State Univ., 1985, M.A., *ibid.*, 1988 (1999)
- Catherine M. Schlegel**, *Associate Professor of the Classics and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Chicago, 1978, M.A., *ibid.*, 1983, Ph.D., Univ. of California at Los Angeles, 1994 (1996)
- Thomas J. Schlereth**, *Professor of American Studies*. B.A., Univ. of Notre Dame, 1963, M.A., Univ. of Wisconsin-Madison, 1965, Ph.D., Univ. of Iowa, 1969 (1972)
- Wendy C. Schlereth**, *University Archivist*. B.A., Saint Olaf College, 1970, M.A., Univ. of Iowa, 1972, Ph.D., *ibid.*, 1980 (1973)
- Steven R. Schmid**, *Associate Professor of Aerospace and Mechanical Engineering*. B.S., Illinois Institute of Technology, 1986, M.S., Northwestern Univ., 1989, Ph.D., *ibid.*, 1993 (1993)
- Marisha D. Schmidt**, *Associate Professional Specialist in Physical Education*. B.A., Purdue Univ., 1993, M.A., Western Michigan Univ., 1999 (1999)
- Robert P. Schmuhl**, *Professor of American Studies and Annenberg-Joyce Chair in Journalism*. B.A., Univ. of Notre Dame, 1970, M.A., Indiana Univ.-Bloomington, 1978, Ph.D., *ibid.*, 1978 (1980)
- William J. Schmuhl**, *Associate Professional Specialist in Accountancy*. B.B.A., Univ. of Notre Dame, 1965, J.D., *ibid.*, 1967, M.B.A., Univ. of Chicago, 1972 (2001)
- William F. Schneider**, *Associate Professor of Chemical and Biomolecular Engineering and Concurrent Associate Professor of Chemistry and Biochemistry*. B.S., Univ. of Michigan-Dearborn, 1986, Ph.D., Ohio State Univ.-Newark, 1991 (2004)
- Jeffrey S. Schorey**, *Associate Professor of Biological Sciences*. B.S., Southeast Missouri State Univ., 1985, Ph.D., Univ. of Texas-San Antonio, 1991 (1998)

- Robert P. Sedlack**, *Associate Professor of Art, Art History, and Design*. B.F.A., Univ. of Notre Dame, 1989, M.F.A., Indiana Univ.-Bloomington, 1993, A.A., *ibid.*, (1998)

## FACULTY

**James A. Seida**, *Associate Professor of Accountancy and Bernard J. Hank Professor*. B.S., Arizona State Univ., 1989, M.S., Univ. of Illinois Urbana-Champaign, 1990, Ph.D., Texas A&M Univ., 1997 (2001)

**Dayle Seidenspinner-Núñez**, *Professor of Romance Languages and Literatures, Fellow of the Nanovic Institute for European Studies, and Associate Dean, Arts and Letters*. B.A., Univ. of California Berkeley, 1968, M.A., *ibid.*, 1971, Ph.D., Stanford Univ., 1977 (1997)

**Steven W. Semes**, *Associate Professor of Architecture and the Francis and Kathleen Rooney Chair of Architecture*. B.S., Univ. of Virginia, 1975, M.Arch., Columbia Univ., 1980 (2005)

**Mihir Sen**, *Professor of Aerospace and Mechanical Engineering*. B.S., Indian Institute of Technology-Madras, 1968, Ph.D., Massachusetts Institute of Technology, 1975 (1986)

**Jayanta Sengupta**, *Assistant Professor of History*. B.A., Univ. of Calcutta, 1982, M.A., *ibid.*, 1987, Ph.D., Univ. of Cambridge, 1995 (2007)

**Raymond G. Sepeta**, *Professional Specialist in the Dean's Office—First Year of Studies, Concurrent Assistant Professor of Computer Science and Engineering, and Concurrent Assistant Professor of Computer Applications*. B.S., U.S. Military Academy, 1966, Ph.D., Univ. of Notre Dame, 1975 (1975)

**Karolina Serafin**, *Assistant Professional Specialist in Romance Languages and Literatures*. M.A., Univ. of Warsaw, 2001, M.A., Univ. of Notre Dame, 2006, Ph.D., Warsaw Univ., 2006 (2007)

**Anthony S. Serianni**, *Professor of Chemistry and Biochemistry*. B.S., Albright College, 1975, Ph.D., Michigan State Univ., 1980 (1982)

**David W. Severson**, *Professor of Biological Sciences*. A.A., Rochester Community College, 1970, B.A., Winona State Univ., 1975, M.S., University Wisconsin La Crosse, 1978, Ph.D., Univ. of Wisconsin-Madison, 1983 (1997)

**Slavi C. Sevov**, *Professor of Chemistry and Biochemistry*. B.S., Univ. of Sofia, 1983, M.S., *ibid.*, 1985, Ph.D., Iowa State Univ., 1993 (1995)

**William P. Sexton**, *Professor of Management*. B.S., Ohio State Univ., 1960, M.B.A., *ibid.*, 1964, Ph.D., *ibid.*, 1966, DL, Univ. of Notre Dame, 2002 (1966)

**John T. Shafer**, *Research Assistant Professor of Civil Engineering and Geological Sciences*. B.S., Univ. of Kansas, 2001 (2007)

**Jindal K. Shah**, *Research Assistant Professor of Chemical and Biomolecular Engineering*. M.S., Univ. of Cincinnati, 1999, Ph.D., Univ. of Notre Dame, 2005 (2007)

**Deborah M. Shamon**, *Assistant Professor of East Asian Langs and Literatures*. B.A., Univ. of Michigan, 1994, M.A., Univ. of Washington, 1999, Ph.D., Univ. of California Berkeley, 2005 (2006)

**Andrea S. Shappell**, *Associate Professional Specialist in the Center for Social Concerns and Concurrent Instructor, Theology*. B.A., Univ. of Notre Dame, 1979, M.A., *ibid.*, 1985 (1997)

**Linda A. Sharp**, *Associate Librarian, University Libraries*. B.A., Univ. of Illinois Urbana-Champaign, 1977, M.A., Indiana Univ.-Bloomington, 1988 (1988)

**Mei-Chi Shaw**, *Professor of Mathematics*. B.S., National Taiwan Univ., 1977, M.S., Princeton Univ., 1978, Ph.D., *ibid.*, 1981 (1987)

**Richard G. Sheehan**, *Professor of Finance and Fellow of the Institute for Educational Initiatives*. B.S., Holy Cross College, 1971, Ph.D., Boston College, 1978 (1987)

**Susan G. Sheridan**, *Associate Professor of Anthropology*. B.A., Univ. of Maryland, 1984, M.A., *ibid.*, 1986, Ph.D., Univ. of Colorado-Boulder, 1992 (1992)

**John F. Sherman**, *Associate Professional Specialist in Art, Art History, and Design*. B.S., Ball State Univ., 1979, M.F.A., Indiana Univ.-Bloomington, 1981 (1986)

**John F. Sherry**, *Professor of Marketing, the Ray W. and Kenneth G. Herrick Chair in Marketing, and Department Chair, Marketing*. B.A., Univ. of Notre Dame, 1974, M.A., Univ. of Illinois Urbana-Champaign, 1978, Ph.D., *ibid.*, 1983 (2005)

**Setsuko Shiga**, *Associate Professional Specialist in East Asian Languages & Cultures*. B.A., Nanzan Univ., 1987, M.A., Univ. of Iowa, 1992 (1996)

**Sophie A. Shive**, *Assistant Professor of Finance*. B.S., Cornell Univ., 1998, M.S., *ibid.*, 2000, Ph.D., Univ. of Michigan, 2006 (2005)

**Kristin Shrader-Frechette**, *Professor of Philosophy, Fellow of the Joan B. Kroc Institute for International Peace Studies, Concurrent Professor of Biological Sciences, and the O'Neill Family Chair in Philosophy*. B.A., Xavier Univ., 1967, Ph.D., Univ. of Notre Dame, 1971 (1998)

**Gina V. Shropshire**, *Assistant Professional Specialist in Management*. B.A., Univ. of Notre Dame, 1983, M.A., Purdue Univ., 1993, Ph.D., *ibid.*, 1999 (1998)

**Joshua Shrout**, *Assistant Professor of Civil Engineering and Geological Sciences*. B.S., Northwestern Univ., 1994, M.S., Marquette Univ., 1998, Ph.D., Univ. of Iowa, 2002 (2007)

**Michael A. Signer**, *Professor of Theology, the Abrams Chair in Jewish Thought and Culture, and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of California at Los Angeles, 1966, M.A., Hebrew Union College California, 1970, Ph.D., Univ. of Toronto, 1978 (1992)

**David H. Sikkink**, *Associate Professor of Sociology, Fellow of the Institute for Educational Initiatives, and Fellow of the Center for Research and Educational Opportunities*. B.A., Bethel College, 1985, M.A., Univ. of North Carolina at Chapel Hill, 1994, Ph.D., *ibid.*, 1998 (1999)

**Stephen E. Silliman**, *Professor of Civil Engineering and Geological Sciences and Fellow of the Center for Social Concerns*. B.S.E., Princeton Univ., 1979, M.S., Univ. of Arizona, 1981, Ph.D., *ibid.*, 1986 (1986)

**Naunihal Singh**, *Assistant Professor of Political Science and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Yale Univ., 1992, Ph.D., Harvard Univ., 2005 (2004)

**John Sitter**, *Professor of English and Notre Dame Chair in English*. B.S., Harvard College, 1966, Ph.D., Univ. of Minnesota, 1969 (2004)

**Steven B. Skaar**, *Professor of Aerospace and Mechanical Engineering*. A.B., Cornell Univ., 1975, Ph.D., Virginia Polytechnic Institute, 1982 (1989)

**Gerald P. Skelton**, *Assistant Professor of Film, Television, and Theatre*. B.S., Babson College, 1987, M.F.A., DePaul Univ., 1993 (2004)

**Josh Skube**, *Assistant Professional Specialist in Physical Education*. B.S., Indiana Univ. Bloomington, 1998 (2001)

**Thomas P. Slaughter**, *Professor of History and the Andrew V. Tackes Chair in History*. B.A., Univ. of Maryland, 1976, M.A., *ibid.*, 1978, M.A., Princeton Univ., 1980, Ph.D., *ibid.*, 1983 (2001)

**Phillip R. Sloan**, *Professor in the Program of Liberal Studies and Fellow of the Nanovic Institute for European Studies*. B.S., Univ. of Utah, 1960, M.S., Scripps College, 1964, M.A., Univ. California San Diego, 1967, Ph.D., *ibid.*, 1970 (1974)

**Bradley D. Smith**, *Professor of Chemistry and Biochemistry*. B.S., Univ. of Melbourne, 1983, Ph.D., Pennsylvania State Univ., 1988 (1991)

**Cheryl S. Smith**, *Assistant Librarian, University Libraries*. B.A., Earlham College, 1988, M.A., Indiana Univ.-Bloomington, 1997 (2000)

**Christian Smith**, *Professor of Sociology and the William R. Kenan Jr. Endowed Chair*. B.A., Gordon College, 1983, M.A., Harvard Univ., 1987, Ph.D., *ibid.*, 1990 (2006)

**David A. Smith**, *Associate Professor of Psychology*. B.A., Univ. of Minnesota, 1983, M.A., *ibid.*, 1986, Ph.D., State Univ. of New York at Stony Brook, 1991 (1997)

**Felicia A. Smith**, *Assistant Librarian, University Libraries*. B.A., Univ. of Illinois at Chicago, 1994, M.L.S., Dominican Univ., 2004 (2007)

**Jackie G. Smith**, *Associate Professor of Sociology*. B.A., Catholic Univ. of America, 1990, M.A., Univ. of Notre Dame, 1995, Ph.D., *ibid.*, 1996 (1996)

## FACULTY

- Peter H. Smith**, *Associate Professor of Music*. B.Mus., the Juilliard School, 1986, M.Mus., *ibid.*, 1986, M.A., Yale Univ., 1987, M.Phil., *ibid.*, 1989, Ph.D., *ibid.*, 1992 (1991)

- Darin J. Thomas**, *Assistant Professional Specialist in Physical Education*. B.S.E., State Univ. of New York College at Cortland, 1995, M.S., *ibid.*, 1996 (2005)
- David W. Thomas**, *Associate Professor of English*. B.Phil., Univ. of North Dakota Main, 1988, M.A., Univ. California Davis, 1991, Ph.D., *ibid.*, 1996 (2005)
- Flint O. Thomas**, *Professor of Aerospace and Mechanical Engineering*. B.S., Indiana State University Main, Ph.D., Purdue Univ., 1983 (1988)
- Joseph W. Thomas**, *Librarian, Law Library*. B.A., Univ. of Kentucky, 1980, M.A., Univ. of Chicago, 1983 (1989)
- Julia A. Thomas**, *Associate Professor of History*. A.B., Princeton Univ., 1981, M.A., Univ. of Chicago, 1984, Ph.D., *ibid.*, 1993 (2001)
- Ryan Thummel**, *Research Assistant Professor of Biological Sciences*. B.A., Univ. of Notre Dame, 1998, Ph.D., Univ. of Kansas Medical Center, 2004 (2007)
- Jay H. Tidmarsh**, *Professor of Law*. B.A., Univ. of Notre Dame, 1979, J.D., Harvard Univ., 1982 (1989)
- Giuseppe Tinaglia**, *Research Assistant Professor of Mathematics*. B.S., Univ. of Bologna, 2001, Ph.D., Johns Hopkins Univ., 2005 (2006)
- Tsuyoshi Tokusumi**, *Research Assistant Professor of Biological Sciences*. B.A., Univ. of Tsukuba, 1991, Ph.D., *ibid.*, 1997 (2007)
- Vikas Tomar**, *Assistant Professor of Aerospace and Mechanical Engineering*. B.A., Regional Engineering College, 1998, M.A., Univ. of Stuttgart, 2001, Ph.D., Georgia Institute of Technology, 2005 (2006)
- Maria C. Tomasula**, *Professor of Art, Art History, and Design, and the Michael P. Grace II Chair in Arts and Letters (Collegiate Chair)*. B.F.A., Univ. of Illinois-Chicago, 1987, M.F.A., Northwestern Univ., 1989 (1994)
- Steve A. Tomasula**, *Associate Professor of English*. B.S., Purdue Univ., 1976, M.A., Univ. of Illinois-Chicago, 1982, Ph.D., *ibid.*, 1995 (1996)
- Andrea L. Topash-Rios**, *Assistant Professional Specialist in Romance Languages and Literatures*. B.A., Univ. of Notre Dame, 1995, M.A., *ibid.*, 1996 (2000)
- Zoltan Toroczka**, *Professor of Physics*. M.S., Babes Bolyai Univ., 1992, Ph.D., Virginia Polytechnic Institute, 1997 (2006)
- Isabelle C. Torrance**, *Assistant Professor of the Classics*. B.A., Trinity College, Ph.D., *ibid.*, 2004 (2007)
- Marta Toth**, *Assistant Professional Specialist in Chemistry and Biochemistry*. B.S., Jozsef Attila Univ., 1979, M.S., *ibid.*, 1980, M.S., *ibid.*, 1986, Ph.D., *ibid.*, 1986 (2003)
- Alain P. Toumayan**, *Associate Professor of Romance Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. Ph.D., Yale Univ., 1982, B.A., Univ. of Pennsylvania, (1989)
- Vicki M. Toumayan**, *Assistant Professional Specialist in the Office of Arts and Letters Undergraduate Study, and Assistant Dean, Office of Arts and Letters Undergraduate Study*. M.Phil., Yale Univ., 1987 (1995)
- Vassiliki Tsitsopoulou**, *Assistant Professional Specialist in the Kaneb Center for Teaching and Learning, Fellow of the Nanovic Institute for European Studies, and Assistant Director of the Kaneb Center for Teaching and Learning*. B.A., Univ. of Athens, 1991, M.A., Univ. of Iowa, 1994, Ph.D., *ibid.*, 2003 (2005)
- James C. Turner**, *Professor of History, Fellow of the Nanovic Institute for European Studies, and the Rev. John J.avanaugh, C.S.C., Chair in the Humanities*. B.A., Harvard Univ., 1968, M.A., *ibid.*, 1971, Ph.D., *ibid.*, 1975 (1995)
- Julianne C. Turner**, *Associate Professor of Psychology and Fellow of the Institute for Educational Initiatives*. B.S., College of New Rochelle, 1968, M.Ed., Boston Univ., 1975, Ph.D., Boston College, 1984, Ph.D., Univ. of Michigan, 1992 (1995)
- Barbara M. Turpin**, *Associate Professional Specialist and Associate Dean of the Graduate School*. A.B., Emmanuel College, 1972, M.A., Univ. of Wisconsin-Madison, 1974, M.A., Univ. of Notre Dame, 1977, Ph.D., *ibid.*, 1980 (1980)

## FACULTY

- Eugene C. Ulrich**, *Professor of Theology and the Rev. John A. O'Brien Chair in Theology (IV)*. Ph.L., Loyola University Chicago, 1964, M.A., Harvard Univ., 1967, Ph.D., *ibid.*, 1975 (1973)
- Krupali A. Uplekar**, *Assistant Professor of Architecture*. Ph.D., Technical Univ. of Dresden, 2005 (2005)
- Joel E. Urbany**, *Professor of Marketing*. B.S., Ohio State Univ., 1980, M.S., *ibid.*, 1983, Ph.D., *ibid.*, 1984 (1994)
- Sergei Vakulenko**, *Research Associate Professor of Chemistry and Biochemistry*. M.D., Pavlov State Medical Univ., 1976, Ph.D., National Research Center. of Antibiotics, 1981 (2003)
- Jacqueline P. Valadez**, *Assistant Professional Specialist in the Alliance for Catholic Education and Fellow of the Institute for Educational Initiatives*. B.S., Texas State Univ.–San Marcos, 1988, M.A., *ibid.*, 1994, Ed.D., Texas A&M Univ., 1998 (2004)
- J. Samuel Valenzuela**, *Professor of Sociology and Fellow of the Helen Kellogg Institute for International Studies*. Ph.D., Columbia Univ., 1979 (1986)
- Barry J. Van Dyck**, *Professional Specialist in Executive M.B.A. Program*. B.S., Univ. of Cincinnati, 1970, M.A., Univ. of North Dakota Main, 1977, Ph.D., Indiana State Univ. Main, 1980, M.B.A., Univ. of Notre Dame, 1986 (1991)
- John H. Van Engen**, *Professor of History and the Andrew V. Tackes Chair in History*. B.A., Calvin College, 1969, Ph.D., Univ. of California Berkeley, 1976 (1977)
- Peter van Inwagen**, *Professor of Philosophy, Fellow of the Nanovic Institute for European Studies, and the John Cardinal O'Hara Chair in Philosophy*. B.S., Rensselaer Polytechnic Institute, 1965, Ph.D., Univ. of Rochester, 1969 (1995)
- Scott J. Van Jacob**, *Librarian, University Libraries*. B.A., Western Oregon State College, 1980, M.S., *ibid.*, 1983, M.A., Univ. of Illinois Urbana-Champaign, 1987 (1995)
- Chris R. Vanden Bossche**, *Professor of English and Fellow of the Nanovic Institute for European Studies*. B.A., Univ. of Notre Dame, 1972, Ph.D., Univ. California Santa Cruz, 1982 (1984)
- James C. VanderKam**, *Professor of Theology and the Rev. John A. O'Brien Chair in Theology (V)*. B.A., Calvin Theological Seminary, 1971, Ph.D., Harvard Univ., 1976 (1991)
- Kevin T. Vaughan**, *Associate Professor of Biological Sciences*. B.A., Hamilton College, 1984, M.S., State Univ. of New York-Buffalo, 1986, Ph.D., Cornell University Medical Cen., 1992 (1998)
- Patricia S. Vaughan**, *Research Assistant Professor of Biological Sciences*. B.S., State Univ. of New York at Albany, 1984, Ph.D., Cornell Univ., 1991 (1998)
- Robert P. Vecchio**, *Professor of Management and the Franklin D. Schurz Chair in Management*. B.S., DePaul Univ., 1972, M.A., Univ. of Illinois Urbana-Champaign, 1974, Ph.D., *ibid.*, 1976 (1976)
- Julian Velasco**, *Associate Professor of Law*. B.Phil., Georgetown Univ., 1991, B.S., *ibid.*, 1991, J.D., Columbia Univ., 1994 (2001)
- Anre Venter**, *Associate Professional Specialist in Psychology*. B.A., Univ. of Cape Town, 1980, M.A., Pepperdine Univ., 1990, M.A., Univ. of Notre Dame, 1994, Ph.D., *ibid.*, 1996 (1996)
- Sandra C. Vera-Muñoz**, *Associate Professor of Accountancy*. B.B.A., Univ. Puerto Rico Ponce, 1981, M.B.A., Pennsylvania State Univ., 1985, Ph.D., Univ. of Texas-Austin, 1994 (1994)
- Hugo Verani**, *Research Professor of Romance Languages and Literatures*. B.A., Phillips Univ., 1966, M.A., Univ. of Wisconsin-Madison, 1967, Ph.D., *ibid.*, 1973 (2001)
- Igor N. Veretennikov**, *Research Assistant Professor of Chemistry and Biochemistry*. M.S., Moscow Institute of Physics and Technology, 1989, M.S., *ibid.*, 1989, Ph.D., Univ. of Notre Dame, 1998 (1997)
- Thomas S. Vihtelic**, *Research Associate Professor of Biological Sciences*. B.S., Michigan State Univ., 1978, D.V.M., *ibid.*, 1982, Ph.D., Univ. of Notre Dame, 1993 (1995)
- Dana R. Villa**, *Professor of Political Science and the Packey J. Dee Chair*. B.A., Amherst College, 1980, M.A., Princeton Univ., 1982, Ph.D., *ibid.*, 1987 (2006)
- Michael A. Villano**, *Research Assistant Professor of Psychology*. B.A., Univ. of Notre Dame, 1983, M.A., New York Univ., 1986, Ph.D., *ibid.*, 1991 (2006)
- Juan M. Vitulli**, *Assistant Professor of Romance Languages and Literatures*. B.A., National Univ. of Rosario, 2000, M.A., Vanderbilt Univ., 2005, Ph.D., *ibid.*, 2007 (2007)
- Patrick L. Vivirito**, *Assistant Professional Specialist in Romance Languages and Literatures*. B.A., Loyola Univ. Chicago, 1997, B.S., *ibid.*, 1997, M.A., Univ. of Notre Dame, 2002 (2002)
- Diane R. Wagner**, *Assistant Professor of Aerospace and Mechanical Engineering*. B.S.M.E., Univ. of Michigan, 1989, M.S., Univ. of California Berkeley, 2002 (2005)
- Peter N. Wallensteen**, *Research Professor in the Joan B. Kroc Institute for International Peace Studies and Starmann Senior Research Chair in Peace Studies*. Ph.D., Uppsala Univ., 1969, M.A., *ibid.*, 1976 (2006)
- Christopher J. Waller**, *Professor of Economics and Econometrics, the Gilbert F. Schaefer Chair in Economics, Fellow of the Nanovic Institute for European Studies, and Fellow of the Helen Kellogg Institute for International Studies*. B.A., Bemidji State Univ., 1981, M.A., Washington State Univ., 1984, Ph.D., *ibid.*, 1985 (2003)
- A.P. Walshe**, *Professor of Political Science and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Wadham College Oxford, 1956, M.A., Univ. of Oxford, 1959, Ph.D., *ibid.*, 1968 (1966)
- Chao Wang**, *Research Assistant Professor of Computer Science and Engineering*. B.S., Tsinghua Univ., 1998 (2007)
- Meng Wang**, *Associate Professor of Aerospace and Mechanical Engineering*. B.S., Zhejiang Univ., 1982, M.S.M.E., Univ. of Colorado-Boulder, 1985, M.S., *ibid.*, 1989 (2006)
- Jadwiga Warchol**, *Research Professor of Physics*. B.S., Univ. of Warsaw, 1962, M.S., *ibid.*, 1963, Ph.D., *ibid.*, 1969 (1984)
- Ted A. Warfield**, *Professor of Philosophy*. B.A., Univ. of Arkansas Fayetteville, 1991, Ph.D., Rutgers Univ. Douglass College, 1995 (1994)
- Jennifer L. Warlick**, *Associate Professor of Economics and Policy Studies, Fellow of the Joan B. Kroc Institute for International Peace Studies, and Department Chair, Economics and Policy Studies*. B.A., Duke Univ., 1972, M.A., Univ. of Wisconsin-Madison, 1975, Ph.D., *ibid.*, 1979 (1982)
- Stephen H. Watson**, *Professor of Philosophy and Fellow of the Nanovic Institute for European Studies*. B.A., Carroll College, 1972, M.A., Duquesne Univ., 1975, Ph.D., *ibid.*, 1980 (1983)
- Joseph P. Wawrykow**, *Associate Professor of Theology*. B.A., Univ. of Manitoba, 1978, M.A., *ibid.*, 1980, M.A., Yale Univ., 1981, M.Phil., *ibid.*, 1985, Ph.D., *ibid.*, 1988 (1986)
- Michael E. Wawrzyniak**, *Professor of Army Science*. B.B.A., Marion Military Institute, 1992, M.B.A., Syracuse Univ., 2000 (2007)
- Mitchell R. Wayne**, *Professor of Physics and Department Chair, Physics*. Ph.D., Univ. of California at Los Angeles, 1985 (1991)
- Hannelore H. Weber**, *Associate Professional Specialist in German and Russian Languages and Literatures*. B.A., Mount Mary College, 1968, M.A., Univ. of Notre Dame, 1994 (1991)
- John A. Weber**, *Associate Professor of Marketing*. B.A., Marquette Univ., 1964, Ph.D., Univ. of Wisconsin-Madison, 1970 (1969)
- Jerry C. Wei**, *Associate Professor of Management*. B.S., National Tsing Hua Univ., 1979, M.Eng., Rochester Institute of Technology, 1983, Ph.D., Texas A&M Univ., 1987 (1987)
- Andrew J. Weigert**, *Professor of Sociology and Fellow of the Joan B. Kroc Institute for International Peace Studies*. M.A., Saint Louis Univ., 1960, Ph.D., Univ. of Minnesota, 1968 (1968)
- Henry M. Weinfield**, *Professor in the Program of Liberal Studies, Concurrent Professor of English, and Fellow of the Nanovic Institute for European Studies*. B.A., City College of New York, 1970, M.A., State Univ. of New York-Binghamton, 1973, Ph.D., City Univ. of New York, 1985 (1991)

## FACULTY

- Terri Weissman**, *Assistant Professor of Art, Art History, and Design*. B.A., Oberlin College, 1991, M.F.A., State Univ. of New York College at Purchase, 1994, M.A., Columbia Univ.–Main Division, 1996, M.Phil., *ibid.*, 1998, Ph.D., *ibid.*, 2005 (2006)
- Paul J. Weithman**, *Professor of Philosophy*. B.A., Univ. of Notre Dame, 1981, M.A., Harvard Univ., 1986, Ph.D., Harvard Univ., 1988 (1990)
- Michael R. Welch**, *Professor of Sociology*. B.A., Le Moyne College, 1972, M.A., Univ. of North Carolina at Chapel Hill, 1975, Ph.D., *ibid.*, 1980 (1981)
- John P. Welle**, *Professor of Romance Languages and Literatures, Fellow of the Nanovic Institute for European Studies, and Concurrent Professor of Film, Television, and Theatre*. B.A., Saint John's Univ., 1974, M.A.T., St Thomas College, 1975, M.A., Indiana Univ.–Bloomington, 1980, Ph.D., *ibid.*, 1983 (1983)
- Thomas A. Werge**, *Professor of English*. B.A., Hope College, 1963, M.A., Cornell Univ., 1964, Ph.D., *ibid.*, 1967 (1967)
- Sarah E. West**, *Assistant Professional Specialist in Chemistry and Biochemistry*. B.A., Augustana College, 1996 (1998)
- Joannes J. Westerink**, *Professor of Civil Engineering and Geological Sciences and Concurrent Associate Professor of Mathematics*. Ph.D., Massachusetts Institute of Technology, 1984, M.S., State Univ. of New York–Buffalo, B.S., *ibid.*, (1990)
- Carroll W. Westfall**, *Professor of Architecture and the Francesco Montana Chair in Architecture*. B.A., Univ. of California Berkeley, 1961, M.Arch., Univ. of Manchester, 1963, Ph.D., Columbia Univ., 1967 (1998)
- Michelle A. Whaley**, *Associate Professional Specialist in Biological Sciences*. B.A., Scripps College, 1987, Ph.D., Univ. of Notre Dame, 1993 (1993)
- Kevin Whelan**, *Professional Specialist in Dublin and the Smurfit Director of the Keough–Notre Dame Study Centre, Ireland*. B.A., University College Dublin, 1978, Ph.D., National Univ. of Ireland Dublin, 1981 (1998)
- Jane M. White**, *Assistant Professional Specialist in Physical Education*. B.A., Saint Joseph's College, 1973, M.A., Central Michigan Univ., 1977 (2007)
- Sophie K. White**, *Assistant Professor of American Studies*. M.A., Courtauld Institute of Art, 1993, Ph.D., *ibid.*, 2000 (2001)
- Thomas L. Whitman**, *Professor of Psychology*. B.S., St. Norbert College, 1962, M.A., Univ. of Illinois Urbana-Champaign, 1965, Ph.D., *ibid.*, 1967 (1967)
- Todd D. Whitmore**, *Associate Professor of Theology, Fellow of the Joan B. Kroc Institute for International Peace Studies, Concurrent Associate Professor of M.N.A. Program*. B.A., Wabash College, 1979; M.Div., *ibid.*, 1985; Ph.D., Univ. of Chicago, 1990 (1990)
- Michael C. Wiescher**, *Professor of Physics, Fellow of the Center for Social Concerns, the Frank M. Freimann Chair in Physics (II), and Director of the Joint Institute for Nuclear Astrophysics*. B.A., Univ. of Munster, 1972, M.A., *ibid.*, 1975, Ph.D., *ibid.*, 1980 (1986)
- Olaf G. Wiest**, *Professor of Chemistry and Biochemistry*. Dipl., Univ. of Bonn, 1991, Ph.D., *ibid.*, 1993 (1995)
- Steven M. Wietstock**, *Assistant Professional Specialist in Chemistry and Biochemistry*. B.S., Alma College, 1982, Ph.D., Uniformed Services Health Sciences, 1988 (2005)
- William L. Wilkie**, *Professor of Marketing and the Aloysius and Eleanor Nathe Chair in Marketing Strategy*. B.B.A., Univ. of Notre Dame, 1966, M.B.A., Stanford Univ., 1969, Ph.D., *ibid.*, 1971 (1987)
- John Wilkinson**, *Research Professor of English*. B.A., Univ. of Cambridge, 1975, M.A., *ibid.*, 1978 (2007)
- Edward B. Williams**, *Professor of Mathematics*. B.S., Massachusetts Institute of Technology, 1967, Ph.D., *ibid.*, 1972 (1975)
- Rev. Oliver F. Williams, C.S.C.**, *Associate Professor of Management and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.S., Univ. of Notre Dame, 1961, M.A., *ibid.*, 1969, Ph.D., Vanderbilt Univ., 1974 (1973)
- Richard A. Williams**, *Associate Professor of Sociology*. B.A., Creighton Univ., 1977, M.S., Univ. of Wisconsin-Madison, 1981, Ph.D., *ibid.*, 1986 (1986)
- Sauna L. Williams**, *Assistant Professional Specialist in Romance Languages and Literatures*. B.A., Evangel College, 1989, M.A., Indiana Univ. South Bend, 2002 (2004)
- Ivy Wilson**, *Assistant Professor of English*. B.A., Stanford Univ., 1995, M.A., Yale Univ., 1998, M.Phil., *ibid.*, 1999, Ph.D., *ibid.*, 2002 (2002)
- Albert K. Wimmer**, *Associate Professor of German and Russian Languages and Literatures and Fellow of the Nanovic Institute for European Studies*. M.A., Univ. of Notre Dame, 1964, M.A., *ibid.*, 1967, Ph.D., Indiana Univ.–Bloomington, 1975 (1964)
- Gordon D. Wishon**, *Chief Information Officer, Associate Vice President—Office of Information Technologies, and Associate Provost—Office of Information Technologies*. B.S., West Virginia Univ., 1977, M.S., Wright State Univ., 1990 (2001)
- James L. Wittenbach**, *Professor of Accountancy*. B.S., Ferris State Univ., 1965, M.B.A., Michigan State Univ., 1967, Ph.D., Univ. of Oklahoma–Norman, 1972 (1972)
- Pamela Wojcik**, *Associate Professor of Film, Television, and Theatre*. B.A., Wellesley College, 1986, M.A., Univ. of Chicago, 1988, Ph.D., *ibid.*, 1993 (1998)
- Christina K. Wolbrecht**, *Associate Professor of Political Science*. B.A., Pacific Lutheran Univ., 1992, M.A., Washington Univ., 1994, Ph.D., *ibid.*, 1997 (1997)
- Eduardo E. Wolf**, *Professor of Chemical and Biomolecular Engineering*. B.S., Univ. of Chile, 1969, M.S., Univ. California Davis, 1972, Ph.D., Univ. of California Berkeley, 1975 (1975)
- Martin H. Wolfson**, *Associate Professor of Economics and Policy Studies and Fellow of the Joan B. Kroc Institute for International Peace Studies*. B.A., Swarthmore College, 1966, M.A., American Univ., 1975, Ph.D., *ibid.*, 1984 (1989)
- Pit-Mann Wong**, *Professor of Mathematics*. B.S., National Taiwan Univ., 1971, Ph.D., Univ. of Notre Dame, 1976 (1980)
- Carolyn Y. Woo**, *Professor of Management, Dean, Mendoza College of Business, and Martin J. Gillen Dean and Ray and Milann Siegfried Chair in Entrepreneurial Studies*. B.S., Purdue Univ., 1975, M.S., *ibid.*, 1976, Ph.D., *ibid.*, 1979 (1997)
- Charles A. Wood**, *Assistant Professor of Management*. B.S., Ball State Univ., 1986, M.B.A., Butler Univ., 1997, Ph.D., Univ. of Minnesota, 2002 (2001)
- Abigail K. Wozniak**, *Assistant Professor of Economics and Econometrics*. A.B., Univ. of Chicago, 1998, M.A., Harvard Univ., 2003, Ph.D., *ibid.*, 2005 (2005)
- Frederico J. Xavier**, *Professor of Mathematics*. B.S., Fed Univ. of Pernambuco Recife, 1971, M.S., *ibid.*, 1973, Ph.D., Univ. of Rochester, 1977 (1985)
- Huili Xing**, *Assistant Professor of Electrical Engineering*. B.S.E.E., Peking Univ., 1996, M.S.E.E., Lehigh Univ., 1998, M.S., Univ. of California Sta Barbara, 2003 (2004)
- Zhiliang Xu**, *Assistant Professor of Mathematics*. B.S.M.E., Beijing Univ., 1994, M.S.M.E., *ibid.*, 1997, Ph.D., State Univ. of New York at Stony Brook, 2002 (2006)
- Vineeta Yadav**, *Assistant Professor of Political Science*. B.S., Univ. of Wisconsin-Madison, 1995, M.S., *ibid.*, 1999, Ph.D., Yale Univ., 2006 (2007)
- Xiaoshan Yang**, *Associate Professor of East Asian Languages & Cultures*. B.A., Anhui Normal Univ., 1982, M.A., Peking Univ., 1985, Ph.D., Harvard Univ., 1994 (1997)
- Chengxu Yin**, *Assistant Professional Specialist in East Asian Languages & Cultures*. B.A., Peking Univ., 1984, M.A., Univ. of Massachusetts, 1990 (2000)
- Susan L. Youens**, *Professor of Music and J.W. Van Gorkom Professor of Music*. B.Mus., Southwestern Univ., 1969, M.A., Harvard Univ., 1971, Ph.D., *ibid.*, 1975 (1984)
- Samir Younes**, *Associate Professor of Architecture*. B.S., Univ. of Texas at Dallas, 1981, M.Arch., *ibid.*, 1984 (1991)
- Robin D. Young**, *Associate Professor of Theology*. B.A., Mary Washington College, 1972, M.A., Univ. of Chicago, 1975, Ph.D., *ibid.*, 1981 (2002)

## FACULTY

**Jennifer A. Younge**, *Librarian, University Libraries, and Edward H. Arnold Director of Libraries*. B.A., Univ. of Wisconsin-Madison, 1969, M.A., *ibid.*, 1971, Ph.D., *ibid.*, 1990 (1997)

**Ke-Hai Yuan**, *Associate Professor of Psychology and the William J. and Dorothy*

*K. O'Neill Chair in Arts and Letters*. B.S., Beijing Institute of Technology, 1985, M.A., *ibid.*, 1988, Ph.D., Univ. of California at Los Angeles, 1995 (2001)

**Hayong Yun**, *Assistant Professor of Finance*. B.S.M.E., Seoul National Univ., 1991, M.S.M.E., Massachusetts Institute of Technology, 1993, Ph.D., *ibid.*, 1995, M.Phil., Columbia Univ., 2004, Ph.D., *ibid.*, 2006 (2006)

**Randall C. Zachman**, *Professor of Theology*. B.A., Colgate Univ., 1975; M.Div., Yale Divinity School, 1980; Ph.D., Univ. of Chicago, 1990 (1991)

**Jaroslav Zajicek**, *Professional Specialist in Chemistry and Biochemistry*. B.S., Czech Technical Univ. of Prague, 1970, Ph.D., Charles University Praha, 1980 (1995)

**Guangjian Zhang**, *Assistant Professor of Psychology*. B.Sc., Tianjin Medical College, 1994, M.Ed., Beijing Univ., 1999, M.S., Ohio State Univ., 2004, Ph.D., *ibid.*, 2006 (2006)

**Yongtao Zhang**, *Assistant Professor of Mathematics*. B.S., Nankai Univ., 1996, M.S., *ibid.*, 1999, Ph.D., Brown Univ., 2003 (2006)

**Xuying Zhao**, *Assistant Professor of Management*. B.S., Zhejiang Univ., 2000, M.S., Univ. of Texas at Dallas, 2005, Ph.D., Zhejiang Univ., 2007 (2007)

**Bo Zhou**, *Research Assistant Professor of Computer Science and Engineering*. SS, Harbin Engineering Univ., 2000, M.S., *ibid.*, 2003, Ph.D., Fudan Univ., 2006 (2007)

**Yingxi E. Zhu**, *Assistant Professor of Chemical and Biomolecular Engineering*. B.S., Tsinghua Univ., 1997, Ph.D., Univ. of Illinois-Springfield, 2001 (2004)

**Katherine G. Ziemann**, *Assistant Professor of English*. A.B., Oberlin College, 1989, B.Mus., *ibid.*, 1989, Ph.D., Univ. of California Berkeley, 1997 (2006)

**Catherine H. Zuckert**, *Professor of Political Science, Fellow of the Nanovic Institute for European Studies, and the Nancy Reeves Dreux Chair in Political Science*. A.B., Cornell Univ., 1964, M.A., Univ. of Chicago, 1967, Ph.D., *ibid.*, 1970 (1998)

**Michael P. Zuckert**, *Professor of Political Science, Fellow of the Nanovic Institute for European Studies, the Nancy Reeves Dreux Chair in Political Science, and Department Chair, Political Science*. B.A., Cornell Univ., 1964, Ph.D., Univ. of Chicago, 1974 (1998)

**Matthew C. Zyniewicz**, *Associate Professional Specialist in Theology and Assistant Chair*. B.A., Univ. of Notre Dame, 1990, M.Div., *ibid.*, 1993, M.A., *ibid.*, 1996, Ph.D., *ibid.*, 2000 (2001)

## EMERITI

**Charles W. Allen**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1958)

**Adam S. Arnold**, *Associate Professor Emeritus of Finance* (1957)

**Charlotte A. Ames**, *Librarian Emerita of University Libraries* (1969)

**Klaus-Dieter Asmus**, *Professor Emeritus of Chemistry and Biochemistry* (1995)

**Yves L. Auriol**, *Associate Professional Specialist Emeritus of Physical Education* (1985)

**Robert J. Austgen**, *Professional Specialist Emeritus of Political Science* (1983)

**Nicholas R. Ayo**, *Professor Emeritus of Theology* (1981)

**Reginald F. Bain**, *Associate Professor Emeritus of Film, Television, and Theatre* (1966)

**Larry G. Ballinger**, *Associate Professional Specialist Emeritus in the Mendoza College of Business* (1966)

**Rev. Leonard N. Banas**, *CSC, Assistant Professor Emeritus of The Classics* (1960)

**Rev. Ernest J. Bartell**, *C.S.C., Professor Emeritus of Economics and Emeritus Fellow, Kellogg Institute for International Studies* (1979)

**Steven C. Bass**, *Professor Emeritus of Computer Science and Engineering* (1991)

**Frederick S. Beckman**, *Professor Emeritus of Art, Art History, and Design* (1946)

**Alfons J. Beitzinger**, *Professor Emeritus of Political Science* (1966)

**Salvatore J. Bella**, *Professor Emeritus of Management* (1958)

**Jaime J. Bellalta**, *Professor Emeritus of Architecture* (1976)

**Edgar D. Berners**, *Research Professor Emeritus of Physics* (1967)

**William B. Berry**, *Professor Emeritus of Electrical Engineering* (1963)

**John G. Beverly**, *Associate Professor Emeritus of Accountancy* (1967)

**Otto A. Bird**, *Professor Emeritus in the Program of Liberal Studies* (1984)

**James M. Bishop**, *Research Professor Emeritus of Physics* (1972)

**Joseph Blenkinsopp**, *Professor Emeritus of Theology* (1970)

**Joseph Bobik**, *Professor Emeritus of Philosophy* (1955)

**Mario Borelli**, *Associate Professor Emeritus of Mathematics* (1965)

**Paul F. Bosco**, *Associate Professor Emeritus of Romance Languages and Literature* (1947)

**Samir K. Bose**, *Professor Emeritus of Physics* (1966)

**Raymond M. Brach**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1965)

**Joseph X. Brennan**, *Professor Emeritus of English* (1955)

**Sheilah O. Brennan**, *Associate Professor Emerita of Philosophy* (1971)

**Roger K. Bretthauer**, *Professor Emeritus of Chemistry and Biochemistry* (1964)

**George A. Brinkley**, *Professor Emeritus of Political Science* (1963)

**Thomas F. Broden**, *Professor Emeritus of Law School* (1950)

**Edith M. Bruckner-Kardoss**, *Associate Professional Specialist Emerita of Biological Sciences* (1952)

**Robert E. Burns**, *Professor Emeritus of History* (1957)

**Neal M. Cason**, *Professor Emeritus of Physics and Emeritus* (1965)

**William J. Cerny**, *Professor Emeritus of Music* (1972)

**Paul R. Chagnon**, *Professor Emeritus of Physics* (1963)

**Elizabeth A. Christman**, *Associate Professor Emerita of American Studies* (1976)

**Granville E. Cleveland**, *Assistant Librarian Emeritus of Library Law* (1969)

**Dorothy Coil**, *Associate Librarian Emerita of University Libraries* (1973)

**Sr. Regina A. Coll**, *C.S.J., Professional Specialist Emerita of Theology* (1984)

**Paul F. Conway**, *Associate Professor Emeritus of Finance* (1956)

**Donald P. Costello**, *Professor Emeritus of English* (1960)

**Charles Craypo**, *Professor Emeritus of Economics* (1979)

**Frederick J. Crosson**, *Professor Emeritus of Program of Liberal Studies* (1953)

**Michael J. Crowe**, *Professor Emeritus of Program of Liberal Studies and Professor Emeritus* (1961)

**Gregory L. Curme**, *Professor Emeritus of Economics* (1963)

**Roberto A. DaMatta**, *Professor Emeritus of Anthropology and Fellow, Helen Kellogg Institute for International Studies* (1987)

**Fred R. Dallmayr**, *Professor Emeritus of Political Science and Fellow, the Joan B. Kroc Institute for International Peace Studies and Fellow, Nanovic Institute for European Studies* (1978)

**Sperry E. Darden**, *Professor Emeritus of Physics* (1957)

**Fabio B. Dasilva**, *Professor Emeritus of Sociology* (1967)

**William E. Dawson**, *Associate Professor of Psychology* (1969)

**Vincent P. DeSantis**, *Professor Emeritus of History* (1982)

## FACULTY

- John E. Derwent**, *Associate Professor Emeritus of Mathematics* (1960)
- Leo A. Despres**, *Professor Emeritus of Anthropology* (1974)
- Bernard E. Doering**, *Professor Emeritus of Romance Languages and Literature* (1965)
- Jay P. Dolan**, *Professor Emeritus of History* (1971)
- James P. Dougherty**, *Professor Emeritus of English* (1966)
- Alan K. Dowty**, *Professor Emeritus of Political Science* (1975)
- Clarence R. Durbin**, *Assistant Professor Emeritus of Economics* (1601)
- William F. Eagan**, *Associate Professor Emeritus of Management* (1956)
- Rev. Carl F. Ebey, C.S.C.**, *Emeritus Faculty* (1997)
- Norbert Engels**, *Professor Emeritus of English* (1986)
- Harald E. Esch**, *Professor Emeritus of Biological Sciences* (1964)
- William M. Fairley**, *Associate Professor Emeritus of Civil Engineering/Geological Sciences* (1958)
- Kenneth Featherstone**, *Professor Emeritus of Architecture* (1961)
- Richard W. Fessenden**, *Professor Emeritus of Chemistry and Biochemistry* (1976)
- Josephine M. Ford**, *Professor Emerita of Theology* (1965)
- Michael J. Francis**, *Professor Emeritus of Political Science* (1966)
- Jeremiah P. Freeman**, *Professor Emeritus of Chemistry and Biochemistry* (1964)
- Morton S. Fuchs**, *Professor Emeritus of Biological Sciences* (1966)
- Emerson G. Funk**, *Professor Emeritus of Physics* (1958)
- Yusaku Furuhashi**, *Professor Emeritus of Marketing* (1961)
- Joseph A. Gatto**, *Associate Professor Emeritus of The Classics* (1963)
- John J. Gilligan**, *Professor Emeritus of Law School* (1979)
- J. Philip Gleason**, *Professor Emeritus of History* (1959)
- Edward A. Goerner**, *Professor Emeritus of Political Science* (1960)
- Abraham Goetz**, *Associate Professor Emeritus of Mathematics* (1965)
- Alan Gunn**, *Professor Emeritus of Law School* (1989)
- Robert J. Havlik**, *Librarian Emeritus of University Libraries* (1973)
- Robert G. Hayes**, *Professor Emeritus of Chemistry and Biochemistry* (1961)
- W. Phillip Helman**, *Associate Professional Specialist Emeritus in the Radiation Laboratory* (1966)
- Eugene W. Henry**, *Professor Emeritus of Computer Science and Engineering* (1960)
- Rev. Theodore M. Hesburgh, C.S.C.**, *President Emeritus and Professor Emeritus of Theology* (1945)
- Emil T. Hofman**, *Professor Emeritus of Chemistry and Biochemistry* (1953)
- Joseph C. Hogan**, *Professor Emeritus of Electrical Engineering* (1967)
- Patrick Horsbrugh**, *Professor Emeritus of Architecture* (1984)
- James E. Houghton**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1952)
- Alan Howard**, *Professor Emeritus of Mathematics* (1968)
- Nai-Chien Huang**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1969)
- Joseph H. Huebner**, *Librarian Emeritus of University Libraries* (1967)
- J.W. Hunt**, *Associate Professor Emeritus of The Classics* (1971)
- Robert L. Irvine**, *Professor Emeritus of Civil Engineering/Geological Sciences* (1974)
- Roger F. Jacobs**, *Associate Dean for Library and Information Services and Professor Emeritus of Law*, (1985)
- Thomas J. Jemielity**, *Professor Emeritus of English* (1963)
- Edward W. Jerger**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1955)
- Gerald L. Jones**, *Professor Emeritus of Physics* (1963)
- Richard E. Jones**, *Librarian Emeritus of University Libraries* (1993)
- John G. Keane**, *the Howard J. and Geraldine F. Korth Professor of Strategic Management and Gillen Dean Emeritus*. (1989)
- Conrad L. Kellenberg**, *Professor Emeritus of Law School* (1955)
- Vincent P. Kenney**, *Professor Emeritus of Physics* (1963)
- Robert L. Kerby**, *Professor Emeritus of History* (1972)
- Lloyd H. Ketchum Jr.**, *Associate Professor Emeritus of Civil Engineering and Geological Sciences*, (1973)
- Douglas Kinsey**, *Professor Emeritus of Art, Art History, and Design* (1968)
- Randolph J. Klawiter**, *Professor Emeritus of German/Russian Language and Literature* (1961)
- Edward A. Kline**, *Professor Emeritus of English* (1966)
- Francis M. Kobayashi**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1948)
- Eileen M. Kolman**, *Dean Emerita of the First Year of Studies* (1989)
- Richard A. Lamanna**, *Associate Professor Emeritus of Sociology* (1964)
- James R. Langford**, *Assistant Professor Emeritus of University Press* (1974)
- Klaus Lanzinger**, *Professor Emeritus of German/Russian Language and Literature* (1967)
- Kenneth R. Lauer**, *Professor Emeritus of Civil Engineering/Geological Sciences* (1956)
- Trai T. Le**, *Professor Emeritus of Law School* (1976)
- Eugene J. Leahy**, *Professor Emeritus of Music* (1952)
- David C. Leege**, *Professor Emeritus of Political Science* (1976)
- David T. Link**, *the Joseph A. Matson Dean Emeritus of the Law School and Professor Emeritus of Law* (1970)
- Louise Litzinger**, *Professional Specialist Emerita of Dean's Office—First Year of Studies*(1990)
- Ruey-Wen Liu**, *Professor Emeritus of Electrical Engineering* (1960)
- Gilbert D. Loescher**, *Professor Emeritus of Political Science* (1975)
- Clara A. Lonie**, *Librarian Emerita of University Libraries* (1965)
- Robert J. Lordi**, *Professor Emeritus of English* (1958)
- John W. Lucey**, *Assistant Professor Emeritus* (1965)
- Phyllis H. Luckert**, *Associate Prof Specialist Emerita of Biological Sciences* (1962)
- Rev. Patrick H. Maloney, C.S.C.**, *Associate Professor Emeritus of Music* (1956)
- Jerry J. Marley**, *Professor Emeritus of Civil Engineering/Geological Sciences* (1969)
- Lawrence C. Marsh**, *Professor Emeritus of Economics and Econometrics* (1975)
- Eugene R. Marshalek**, *Professor Emeritus of Physics* (1965)
- Ward C. Martin**, *Professor Emeritus of English* (1966)
- Cecil B. Mast**, *Associate Professor Emeritus of Mathematics* (1959)
- John E. Matthias**, *Professor Emeritus of English and Fellow, Nanovic Inst for European Studies* (1967)
- Sheridan P. McCabe**, *Associate Professor Emeritus of Psychology* (1967)
- Stuart T. McComas**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1964)
- William D. McGlinn**, *Professor Emeritus of Physics* (1965)
- James J. McGrath**, *Professor Emeritus of Biological Sciences* (1965)
- Robert P. McIntosh**, *Professor Emeritus of Biological Sciences* (1958)
- William O. McLean**, *Professor Emeritus of Law School* (1975)
- Ernan McMullin**, *Professor Emeritus of Philosophy* (1954)

## FACULTY

- W.T. McNeill**, *Associate Professional Specialist Emeritus of Dean's Office, First Year of Studies* (1978)
- Rev. Matthew M. Miceli, C.S.C.**, *Associate Professor Emeritus of Theology* (1954)
- Anthony N. Michel**, *Professor Emeritus of Electrical Engineering* (1984)
- John W. Mihelich**, *Professor Emeritus of Physics* (1954)
- Kenneth E. Moore**, *Associate Professor Emeritus of Anthropology* (1970)
- Thomas J. Mueller**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1965)
- Rev. Michael J. Murphy, C.S.C.**, *Associate Professor Emeritus of Civil Engineering/ Geological Sciences* (1981)
- Victor W. Nee**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1965)
- Lewis E. Nicholson**, *Associate Professor Emeritus of English* (1958)
- Walter Nugent**, *Professor Emeritus of History* (1984)
- Rev. Marvin R. O'Connell, C.S.C.**, *Professor Emeritus of History* (1972)

- O. Timothy O'Meara**, *Professor Emeritus of Mathematics* (1962)
- Rev. Thomas F. O'Meara, O.P.**, *Professor Emeritus of Theology* (1981)
- Carl W. O'Neil**, *Professor Emeritus of Anthropology* (1967)
- Richard R. Otter**, *Professor Emeritus of Mathematics* (1947)
- Larry K. Patterson**, *Research Professor Emeritus of Radiation Laboratory* (1976)
- James S. Phillips**, *Associate Professor Emeritus of Music* (1965)
- Fredrick B. Pike**, *Professor Emeritus of History* (1953)
- Julian R. Pleasants**, *Associate Professor Emeritus of Biological Sciences* (1983)
- John A. Poirier**, *Professor Emeritus of Physics* (1964)
- Barth Pollak**, *Professor Emeritus of Mathematics* (1963)
- Morris Pollard**, *the Coleman Director of the LOBUND Laboratory and Professor Emeritus of Biological Sciences.* (1961)
- Dean A. Porter**, *Professor Emeritus of Art, Art History, and Design* (1966)
- Ray M. Powell**, *Professor Emeritus of Accountancy* (1959)
- Irwin Press**, *Professor Emeritus of Anthropology* (1965)
- Karamjit S. Rai**, *Professor Emeritus of Biological Sciences* (1962)
- Paul A. Rathburn**, *Professor Emeritus of English and Director, Summer Shakespeare Program* (1965)
- Charles E. Rice**, *Professor Emeritus of Law School* (1969)
- Alberta B. Ross**, *Professional Specialist Emerita of Radiation Laboratory* (1978)
- John F. Santos**, *Professor Emeritus of Psychology* (1965)
- Konrad J. Schaum**, *Professor Emeritus of German/ Russian Language and Literature* (1974)
- Allan H. Schell**, *Associate Librarian Emeritus of University Libraries* (1963)
- Roger A. Schmitz**, *Professor Emeritus of Chemical and Biomolecular Engineering* (1979)
- Robert H. Schuler**, *Professor Emeritus of Chemistry and Biochemistry* (1976)
- Maurice E. Schwartz**, *Professor Emeritus of Chemistry and Biochemistry* (1968)
- C.J. Sequin**, *Associate Professor Emeritus of Management* (1959)
- Thomas L. Shaffer**, *Professor Emeritus of Law School.*
- Paul E. Shanley**, *Associate Professor Emeritus of Physics* (1968)
- William D. Shephard**, *Professor Emeritus of Physics* (1963)
- Herbert E. Sim**, *Professor Emeritus of Finance* (1958)
- Daniel T. Simon**, *Professor Emeritus of Accountancy* (1989)
- Roger B. Skurski**, *Professor Emeritus of Economics* (1968)
- Luther M. Snavely**, *Professor Emeritus of Music* (1987)
- Donald C. Sniegowski**, *Associate Professor Emeritus of English* (1961)
- Donald E. Sporleder**, *Professor Emeritus of Architecture* (1963)
- Dennis J. Stark**, *Assistant Professor Emeritus of Physical Education* (1956)
- Richard Stevens**, *Associate Professor Emeritus of Art, Art History, and Design* (1955)
- Wilhelm F. Stoll**, *Professor Emeritus of Mathematics* (1960)
- William G. Storey**, *Professor Emeritus of Theology* (1967)
- Thomas R. Swartz**, *Professor Emeritus of Economics* (1965)
- Frederic W. Syburg**, *Associate Professor Emeritus of Film, Television, and Theatre* (1954)
- Albin A. Szweczyk**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1962)
- William F. Tageson**, *Associate Professor Emeritus of Psychology* (1969)
- Dolores W. Tantoco-Stauder**, *Librarian Emerita of University Libraries* (1957)
- Lee A. Tavis**, *Professor Emeritus of Finance and Fellow, Joan B. Kroc Institute for Int'l. Peace* (1976)
- James I. Taylor**, *Professor Emeritus of Civil Engineering/Geological Sciences* (1976)
- John K. Thomas**, *Professor Emeritus of Chemistry and Biochemistry* (1970)
- Peter W. Thornton**, *Professor Emeritus of Law School* (1976)
- Mary Katherine Tillman**, *Professor Emerita of Program of Liberal Studies* (1973)
- Walter J. Tomasch**, *Professor Emeritus of Physics* (1968)
- Elaine W. Tracy**, *Associate Professional Specialist Emerita of Dean's Office—First Year of Studies*(1988)
- Anthony M. Trozzolo**, *Professor Emeritus of Chemistry and Biochemistry* (1975)
- Edward R. Trubac**, *Associate Professor Emeritus of Finance* (1960)
- Kenyon S. Tweedell**, *Professor Emeritus of Biological Sciences* (1958)
- John J. Uhran**, *Professor of Computer Science and Engineering and Associate Dean, College of Engineering* (1966)
- Edward A. Ulicny**, *Staff Professional Specialist Emeritus of Radiation Laboratory* (1976)
- Edward Vasta**, *Professor Emeritus of English* (1958)
- Donald G. Vogl**, *Associate Professor Emeritus of Art, Art History, and Design* (1963)
- Vladeta D. Vuckovic**, *Associate Professor Emeritus of Mathematics* (1963)
- Andrzej S. Walicki**, *Professor Emeritus of History* (1986)
- Rev. Joseph L. Walter, C.S.C.**, *Associate Professor Emeritus of Chemistry and Biochemistry* (1961)
- James H. Walton**, *Professor Emeritus of English* (1963)
- F. Ellen Weaver-Laporte**, *Professor Emerita of Theology* (1976)
- H. Ronald Weber**, *Professor Emeritus of American Studies* (1963)
- Charles F. Weiher**, *Assistant Professor Emeritus of Philosophy* (1982)
- Charles K. Wilber**, *Professor Emeritus of Economics and Policy Studies and Emeritus Professor, Economics and Emeritus Fellow, Inst for International Peace Studies* (1975)
- Robert W. Williamson**, *Professor Emeritus of Accountancy* (1967)
- Warren J. Wong**, *Professor Emeritus of Mathematics* (1964)
- Stephen T. Worland**, *Professor Emeritus of Economics* (1957)
- Kwang-Tzu Yang**, *Professor Emeritus of Aerospace and Mechanical Engineering* (1955)

## ARCH 01110. Career Discovery: Architecture at Notre Dame

(3-6-0)

Two-week summer program for high school students interested in architecture.

## ARCH 10311. Analysis of Architectural Writing

(4-0-4) Economakis

This course examines concepts of architecture within writings about architecture. It explores universal issues of function, strength, and beauty, along with the interactions between theory and practice and the tensions between tradition and innovation. The course work consists of analytical drawings, design exercises, and exams. It is open to all students. Required for those intending to enter the architecture program. Spring.

## ARCH 11011. Graphics I: Drawing

(3-0-3)

*Corequisite:* ARCH 12011

Instruction and practice in drawing as a means of exploring and communicating formal and theoretical concepts. Aspects of freehand drawing in pencil, charcoal, and watercolor are taught with subjects from buildings, nature, and the human figure. The course is open to all students. Studio format. Strongly recommended for those entering the architecture program. Fall.

## ARCH 11021. Graphics II: Drafting

(3-0-3)

Instruction and practice in the skills necessary to draw and think as an architect. The course emphasizes mechanical drawing with exercises that include descriptive geometry, perspective, and other means of representing three-dimensional architectural problems with two-dimensional techniques, including those using computers. The course is open to all students. Studio format. Required for those intending to enter the architecture program. Spring.

## ARCH 12011. Graphics I: Drawing—Tutorial

(0-1-0)

Tutorial supplement to ARCH 11011

## ARCH 20111. Architectural History I

(3-0-3) Stamper

This course provides a survey of architectural history from the Egyptian, Greek, and Roman civilizations to Europe during the Romanesque and Gothic periods. Also included are Islamic, pre-Columbian, and Far Eastern building traditions. Each period is studied in relation to physical determinants, such as climate, materials, technology, and geography, and historical determinants such as economics, religion, politics, society, and culture. Fall.

## ARCH 20221. Architectural History II

(3-0-3) Doordan

*Prerequisite:* (ARCH 20111 OR ARCH 247)

This course continues the history survey, beginning with Renaissance and baroque Europe and continuing to the 18th and 19th centuries in Europe and the United States. It extends to the modern movement as it affected countries as far-reaching as Japan and Australia.

## ARCH 20411. Building Technology I

(3-0-3)

Exploration and application of qualitative principles and theory of building construction to the design process. Fall.

## ARCH 20511. Principles of Structural Engineering

(3-0-3) DeFrees

Principles of statics, force, and moment equilibrium; area properties; stress and strain; beam and column analysis. Spring.

## ARCH 21111. Design I

(0-12-6)

This studio and lecture course introduces students to design beginning with the classical elements of architecture. It proceeds to the design of components of buildings. Fall.

## ARCH 21121. Design II

(0-12-6)

*Prerequisite:* (ARCH 21111 OR ARCH 243)

Principles of planning, design, and construction are developed in urban contexts and in complex building programs. The concentration on classical paradigms as a basis for architecture and urban design is continued. Spring.

## ARCH 30211. Etruscan and Roman Art and Architecture

(3-0-3)

Roman art of the republic and the empire is one focus of this course, but other early cultures of the Italian peninsula and their rich artistic production are also considered. In particular, the arts of the Villanovans and the Etruscans are examined and evaluated as both unique expressions of discrete cultures and as ancestors of and influences on Rome. The origins and development of monumental architecture, painting, portraiture, and historical relief sculpture are isolated and traced from the early first millennium B.C.E. through the early fourth century of the modern era.

## ARCH 34012. Graphics III: Freehand Drawing

(3-0-3)

Freehand graphic communication with pencil, pen, and charcoal, drawing exteriors and interiors of architecture. Consideration of light, shade, and form. Fall.

## ARCH 34022. Graphics IV: Watercolor

(3-0-3)

Freehand graphic communication with watercolor, painting still lifes, and exteriors and interiors of architecture.

## ARCH 34112. Design III

(0-12-6)

Architectural design relating to the urban environment of Rome. Fall.

## ARCH 34122. Design IV

(0-12-6)

Architectural and urban design relating to the regional implications of the context of Rome and the environs.

## ARCH 34212. Roman Urbanism and Architecture I

(3-0-3)

Examines the essential elements of Roman urbanism, architectural composition, and tectonic considerations over time, through extensive analysis and direct on-site experience focusing on ancient Rome.

## ARCH 34222. Roman Urbanism and Architecture II

(3-0-3)

Examines the essential elements of Roman urbanism, architectural composition, and tectonic considerations over time, through extensive analysis and direct on-site experience focusing on 20th-century Rome.

## ARCH 34223. Seeing Power in Rome: Exploring the Pagan, Christian, and Modern City

(3-0-3)

The course is an investigation of Rome as an illustration of the way in which buildings and their role in the physical form of cities both serve and represent the power

of the government they serve. The course will run from pagan antiquity through the Christian medieval, Renaissance, and baroque periods and the succession of secular states since Italian unification in 1870.

**ARCH 34312. Architectural History III**

(3-0-3)

Structured field study and lecture presentations analyzing buildings and urban complexes in Italy from the Renaissance through the 16th century.

**ARCH 34322. Architectural History IV**

(3-0-3)

Structured field study and lecture presentations analyzing buildings and urban complexes in Italy from the 17th through 19th centuries.

**ARCH 35413. Seminar: Mexico Service Project**

(1-0-1)

Spring break service project, house construction in Mexico. The academic portion of this project will be treated as a building technology course. The students will collectively document the technologies used in the construction and explore possible improvements.

**ARCH 36111. Directed Readings**

(3-0-3)

Directed readings on a topic serving the student's particular academic project.

**ARCH 37011. Special Studies: Drawing**

(0-3-3)

Freehand drawing and watercolor.

**ARCH 37211. Research Assistance—Graphic Documentation of Historic Buildings**

(V-0-V)

Student assists instructor in academic research of historic buildings through graphic documentation.

**ARCH 37411. Directed Research in Building Technology**

(3-0-3)

Research on a topic in building technology, proposed by the student and agreed with the instructor and dean.

**ARCH 40211. Greek Architecture**

(3-0-3)

Cross-listing of ARHI 40121

**ARCH 40221. Survey: Greek Art/Architecture**

(3-0-3)

Open to all students. This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period from the 8th through 2nd century B.C., with some consideration of prehistoric Greek forebears of the Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes toward the gods, human achievement, and the relationship between the divine and the human.

**ARCH 40411. Environmental Systems I**

(3-0-3) DeFrees

This course investigates the relationship between architecture and environmental systems. Lectures, readings, and exercises probe topics that include passive energy design, safety systems, water conservation and usage, vertical transportation, heating, ventilating, and air conditioning. Special emphasis is placed on sustainability issues, energy conservation, and public health and safety.

**ARCH 40421. Building Technology II**

(3-0-3) DeFrees

A study of building construction methods and materials.

**ARCH 40511. Structural Design for Architects**

(3-0-3) DeFrees

*Prerequisite:* (ARCH 20511 OR ARCH 256)

The application of the principles of mechanics to the stress and deformation analysis and design of reinforced concrete structural elements and framing systems. Fall.

**ARCH 40521. Applied Structural Systems**

(3-0-3) Lowing

*Prerequisites:* (ARCH 40511 OR ARCH 446) AND (ARCH 20511 OR ARCH 256)

Application of structural systems in relation to architectural concepts meeting economic and building-code requirements. Spring.

**ARCH 41011. Graphics V: Computers**

(3-0-3)

*Corequisite:* ARCH 42011

Study of basic skills necessary for the analysis and representation of architectural form through the medium of the computer. Students will study drafting as well as three-dimensional modeling.

**ARCH 41111. Design V**

(0-12-6)

*Prerequisite:* ARCH 34122

Design V involves the design of buildings within urban settings, with a special emphasis on building types in relation to cultural, ethnic, and civic priorities.

**ARCH 41121. Design VI**

(0-12-6)

*Prerequisite:* (ARCH 41111 OR ARCH 443)

Design VI presents students with the opportunity to select one among a number of studio options. Specific focus of studios varies from year to year and is designed to address needs and specific to each fourth-year class.

**ARCH 41811. Beginning Furniture**

(3-0-3)

Students gain an understanding of scale, proportion, and construction of furniture. Lectures and demonstrations expose students to the history of furniture, properties of wood, and the use of woodworking equipment. Fall.

**ARCH 41821. Advanced Furniture**

(3-0-3)

*Prerequisite:* (ARCH 41811 OR ARCH 481)

Students construct furniture of original design. They learn to understand furniture's relationship to architectural context. Spring.

**ARCH 41831. Introduction to Carving Classical Elements**

(3-0-3)

In this introductory course, students are instructed in the fundamental issues of woodworking power equipment, hand tools, carving tools and the physical properties of wood. The emphasis is on design and shaping of classical architectural elements and ornamentation. Working as a team, students will construct a full-scale architectural element, such as the corner condition of a Doric entablature.

**ARCH 41841. Advanced Carving of Classical Elements**

(0-6-3)

*Prerequisite:* ARCH 41831

Continuation of ARCH 41831.

**ARCH 42011. Graphics V: Computers—Tutorial**

(0-0-0)

*Corequisite:* ARCH 41011

Tutorial for ARCH 41011.

**ARCH 43211. Topics in Greek and/or Roman Art**

(3-0-3)

Topics course on special areas of Greek and/or Roman art.

**ARCH 43221. The Effect Christianity has had on Architecture**

(3-0-3)

A survey of the effect Christianity has had on architecture, including its spatial, representational, symbolic, and moral content, from architecture's theoretical foundations in Vitruvius to the present day.

**ARCH 47211. Japanese and Chinese Architecture and Urbanism: Traditional and Modern**

(3-0-3)

Exploration of traditional and modern Japanese and Chinese architecture and urbanism, including gardens. The program begins in Japan with visits to Kyoto, Takayama, Shiragawa, and Tokyo. The 3-week visit in China will concentrate on Hong Kong, Nanjing, and Beijing with visits to Shanghai and the water towns and gardens in the Yangtze River basin. The program's principal activities will involve looking, listening, drawing, and sketching. There will be a brief design segment. This is the third year the School has conducted this program. The program's host institution is the Graduated School of Architecture at the University of Nanjing, which will supply members of its faculty to present lectures in Nanjing, and graduate architecture students who will accompany us on our post Hong Kong itinerary. Tentatively, the program begins with students arriving in Japan on June 7 and ends in China on July 1. Architecture students enrolling in the summer session course must attend all of the class meetings of ARCH 46211 during the spring semester 2007. Students enrolled only in this summer session course will be required to complete a special study project based on work done in China and approved during the spring semester. A minimum number of students is required if the program is to be conducted; the maximum number is 8–10. The cost of the program is \$4,500, not including the cost of travel to and from China and the cost of visas (approximately \$50 per person). This figure includes all lodging, most meals, and air and mini-bus transportation within Japan and China during the program as well as most admission fees to sites being visited, etc., but excludes incidental personal expenses. Architecture students must commit to their going by making a deposit (non-refundable to students canceling) of \$500 by April 2 with the final balance due May 4, 2007. Norman Crowe will direct the program in Japan and Michael Lykoudis and Zhao Chen will direct the China portion of the program.

**ARCH 50211. Grecian Architecture and Furniture I**

(3-0-3) Smith

Students explore Notre Dame's holdings of British and American architectural books that introduced "Greek" architecture to the English-speaking world.

**ARCH 50218. Teaching Concepts/History of Architecture I**

(3-0-3) Stamper

Teaching assistants aid professor in grading examinations and preparing lectures for ARCH 20211. Fall.

**ARCH 50221. Architecture—Twentieth Century**

(3-0-3)

This course continues the history survey, beginning with Renaissance and baroque Europe and continuing to the 18th and 19th centuries in Europe and the United States. It extends to the modern movement as it affected countries as far-reaching as Japan and Australia.

**ARCH 50228. Teaching Concepts/History of Architecture II**

(3-0-3) Doordan

Teaching assistants aid professor in grading examinations and preparing lectures for ARCH 20221. Spring.

**ARCH 50318. Teaching Concepts/Reading Architectural Writings**

(3-0-3) Economakis

Teaching assistants aid in seminar sessions and provide guidance in drawing for ARCH 10311. Spring.

**ARCH 50411. Restoration and Historic Preservation**

(3-0-3)

America is slowly developing the taste for saving old heritage and increasing interest is being placed on restoration and preservation of buildings. This is a relatively new field and advance methods are being generated every day that could help in betterment of preservation of old structures. This type of course is needed to help architectural students understand the need of preserving traditional architecture and, in some cases, studying the art of restoration of traditional buildings that have degenerated due to various reasons. The course provides a detailed reference to the recording methods and techniques that are fundamental tools for examining any existing structure. It also includes information on recent technological advances such as laser scanning, new case studies, and material on the documentation of historic monuments.

**ARCH 50418. Teaching Concepts/Building Technology I**

(3-0-3)

Teaching assistants guide second-year students taking ARCH 20411 in developing technical solutions to architectural studies. They assist in evaluation of submitted work and prepare and deliver short presentations on current building techniques. Fall.

**ARCH 50419. Environmental Systems II**

(3-0-3) DeFrees

Study of the basic concepts that lead to the design of the mechanical, acoustical, and illumination services for the control of the architectural environment.

**ARCH 50428. Teaching Concepts/Building Technology II**

(3-0-3) DeFrees

Teaching assistants guide second-year students taking ARCH 20419 and students in ARCH 20411 in developing technical solutions to architectural studies. They assist in evaluation of submitted work and prepare and deliver short presentations on current building techniques. Spring.

**ARCH 50518. Teaching Concepts/Structural Design**

(3-0-3) DeFrees

Teaching assistants aid professor in grading examinations, assigning homework, and preparing lectures for ARCH 40511. Fall.

**ARCH 50528. Teaching Concepts/Structural Mechanics**

(3-0-3) DeFrees

Teaching assistances in structures.

**ARCH 50711. Professional Practice**

(3-0-3) Eide

Lecture and assignments covering professional services, marketing, economics of practice, programming, design drawing development, contracts, and project management. Spring.

**ARCH 50811. History/Design: Forms, Values, and Technology**

(3-0-3)

This course will provide a historical perspective on the development of industrial, product, and graphic design in the 19th and 20th centuries.

**ARCH 51011. Advanced Classical Drawing**

(3-0-3)

Topics covered will include composition (of subject and sheet) traditional techniques (ink and wash sketching, pencil, etching and engraving), ink and water color wash, wash sketches, and the analytique.

**ARCH 51018. Teaching Concepts/Drawing**

(3-1-3)

Assist professor in demonstrating techniques and critiquing student work for ARCH 11011. Fall.

**ARCH 51028. Teaching Concepts/Graphics II**

(0-6-3)

Teaching assistant in the first-year drafting course.

**ARCH 51058. Teaching Concepts/Graphics V**

(3-0-3)

Teaching assistants for ARCH 41011 provide instructional support to students in the computer cluster during class and help with grading.

**ARCH 51068. Teaching Concepts/Computers**

(3-0-3)

Teaching assistant for advanced computer drawing.

**ARCH 51111. Design VII**

(0-12-6)

*Prerequisite:* ARCH 41121

Integrates the students' previous study of building design and construction in thematic studios.

**ARCH 51121. Design VIII Thesis**

(0-12-6)

*Prerequisite:* (ARCH 51111 OR ARCH 543)

Required of all students in architecture. Students devote the semester to the preparation and presentation of an independent architectural project fulfilling the NAAB criteria of a "comprehensive project." Spring.

**ARCH 51368. Teaching Concepts: Introduction to CAD**

(3-0-3)

*Prerequisite:* ARCH 41011 OR ARCH 445

Teaching assistance for ARCH 61021 Introduction to CAD.

**ARCH 51411. Research and Documentation of Historical Buildings**

(0-3-3)

The course provides a detailed reference to the recording methods and techniques that are fundamental tools for examining any existing structure. It also includes information on recent technological advances such as laser scanning, new case studies, and material on the documentation of historic monuments. The students will get to work on a live project and help serve in saving a historic building in the city of South Bend.

**ARCH 51818. Teaching Concepts/Advanced Furniture**

(0-6-3)

Teaching assistant in advanced furniture design

**ARCH 51828. Teaching Concepts: Beginning Furniture**

(–6-3)

*Prerequisite:* ARCH 41811

Teaching assistant in beginning furniture design

**ARCH 53111. The Classical Interior**

(3-0-3)

The aim of the course is to direct the same sort of attention to the design of interior spaces that is typically directed to the design of building exteriors. The principles of designing classical rooms have historically not been emphasized in the literature of classical architecture; for example, these issues have received scattered and secondary attention from the treatises. Since the ascendancy of modernism, our understanding of classical design has had to be reconstructed in terms relevant to our contemporary experience, and this course aims to provide a suitable theoretical framework for the specific issues raised by the design of interior spaces. The class explores the design of rooms in the classical tradition, ranging historically from antiquity to the present, and typologically from private residences to public monuments.

**ARCH 53221. Chicago Architecture**

(3-0-3) Keegan

This lecture/seminar on Chicago architecture will introduce the built environment of America's third largest city, commonly referred to as the "Birthplace of Modern Architecture." Weekly class sessions will comprise three parts—an art historical slide lecture unfolding the chronological development of Chicago's architecture and urban habitat, a short critical exposition that links material from the lecture to contemporary work in Chicago, and a seminar discussion relating the historical topics to the practical and theoretical concerns of today. Readings will supplement the class presentations with architectural, political, and literary writings that demonstrate Chicago's unique self-identity.

**ARCH 53311. Issues in Sacred Architecture**

(3-0-3) Stroik

An upper-level seminar exploring themes related to issues in sacred architecture. The course is open to architecture students and students in other disciplines.

**ARCH 53321. Principles of Architectural Composition**

(3-0-3)

Seminar format with studio component. The objective is to identify a theory of composition applicable to traditional and classical architecture and urbanism, with emphasis on paired principles like symmetry and asymmetry, repetitions and punctuation, alternation and juxtaposition, framing and bookending, repose and contraposition, foregrounding and backgrounding, figure-ground relationships, etc.

**ARCH 53331. Architectural Journalism**

(3-0-3) Keegan

In a weekly lecture, discussion, and workshop, this course will survey architectural journalism as it developed in the past century; consider the different media that have defined architecture and urban design for the public; and introduce some vocabulary and communication skills toward the end of improving the quality of contemporary architectural criticism and analysis.

**ARCH 53341. Architectural Theory**

(3-0-3) Westfall

This course reviews, through lectures, discussions, analysis of assigned texts, and the writing of research papers, what theories of architecture from antiquity to the present day say about the intersection of the religious, civil, architectural, and urban characteristics of the built world within the Western tradition.

**ARCH 53411. History of American Architecture 1630–1915**

(3-0-3) Stamper

*Prerequisite:* (ARCH 20211 OR ARCH 20221) OR (ARCH 60211 OR ARCH 60221)

This course is seminar on the history of architecture in the United States from the colonial period in the 1600s until World War I. The purpose of this course is to introduce some of the formative ideas, major monuments, and characteristic experiences of different building cultures in the United States and to investigate various problems of interpretation raised by the material under review. Architecture will be defined in the broadest possible terms to include vernacular as well as high architecture examples of buildings, distinctive urban configurations, and landscape design. Architectural History will be defined as the record of the rich diversity of human experiences evident in the different ways Americans have shaped the built environment to pursue social, civil, and religious ends. By the end of the semester, students should have an understanding of the cultural and historical factors that shaped American architecture from 1630 to 1915 and should have the ability to identify and distinguish between the different styles and periods of architecture from this period. They should have the research skills to prepare scholarly and theoretical papers and essays on the subject, and they will have experience with in-class presentations on topics related to their research. Course requirements consist of attendance at seminars, completion of required readings and writing assignments.

**ARCH 54113. Summer Program at the Tuscan Classical Academy**  
(3-0-3)

This program focuses on three themes: (1) the history and theory of Florentine humanism; (2) Tuscan classical architecture and its regional variants; and (3) drawing and painting. The history and theory component consists of a series of lectures on Renaissance humanism and site visits to important cities and buildings throughout Tuscany. These will center primarily on Florence and the Mugello Valley. The study of Tuscan classical architecture and its regional variants examines the rediscovery of classical architecture in quattrocento Florence and its creative interpretations throughout Tuscany. The drawing and painting component introduces students to the basics of landscape drawing and painting based on observations from nature.

**ARCH 57011. Advanced Studies in Computers**

(3-0-3)

*Prerequisite:* (ARCH 41011)

In ARCH 57011, students pursue specific interests in computer applications to architecture. Spring.

**ARCH 57021. Advanced Wash Rendering**

(0-1-3)

Independent study, using a single large, formal wash as subject, of the composition and techniques of architectural wash rendering.

**ARCH 57121. Special Studies**

(0-6-3)

Special studies in high-rise building design.

**ARCH 57141. Competitions and Independent Studio**

(3-0-3)

Students have the option of selecting either a national or international design competition or a design project of special interest to them. Spring.

**ARCH 57211. Research on an Architectural Element**

(0-0-3)

Research into the canons for and variations on a traditional architectural element, chosen by the student and the instructor, and the design of an example of the element.

**ARCH 57319. Topics in Design Studies**

(0-0-3)

Special studies in design issues.

**ARCH 57421. Special Studies: Building Documentation and Preservation**

(3-0-3)

Special studies in documenting and preserving of historical buildings.

**ARCH 57611. Special Studies: Historical Approaches to Environmental Issues in Architecture**

(3-0-3)

Special studies of approaches to environmental issues in historical architecture and their application to current conditions.

**ARCH 57811. Special Projects in Furniture I**

(3-0-3)

*Prerequisite:* (ARCH 41821 OR ARCH 482 OR ARCH 484)

Students pursue specific interests in design and construction of furniture. Fall.

**ARCH 57821. Special Studies in Furniture Design II**

(3-0-3)

*Prerequisite:* (ARCH 57811)

Continuation of ARCH 57811. Spring.

**ARCH 57831. Special Projects in the Carving of Classical Elements**

(3-0-3)

*Prerequisite:* ARCH 41841

Carving of classical elements selected by instructor and student.

**ARCH 57841. Special Projects in the Carving of Classical Elements II**

(3-0-3)

*Prerequisite:* ARCH 57831

Carving of classical elements selected by instructor and students, level 2.

# College of Arts and Letters

## Department of Africana Studies

### AFST 10401. Introduction to Jazz

(3-0-3) Dwyer

A music appreciation course requiring no musical background and no prerequisites. General coverage of the history, various styles, and major performers of jazz, with an emphasis on current practice.

### AFST 10402. Modern Jazz

(3-0-3) Dwyer

A study of the jazz performers and practices of today and of the preceding decade—the roots, stylistic developments, and directions of individual artists, small combos, and big bands.

### AFST 20080. Music and World Religions

(3-0-3)

Through this ethnomusicology course, students will learn the roles music occupies in world religions. More than a world music course, we will examine the creative expression of the divine through the universal language of organized sound as music, as music plays a major role in the practice of most religions worldwide. This study involves all the major continents, highlighting new perspectives as to the confluence between religious culture and musical expression. Knowledge of music beneficial but not required; just ears and minds open to the diverse ontological understandings comprising various worldviews.

### AFST 20081. Music of Africa and the African Diaspora

(3-0-3)

Students explore music from West Africa, Southern Africa, East Africa, and the Caribbean, South America, and the United States, paying close attention to how their reception and performance inform and influence each other historically and contextually. The seminar emphasizes an interdisciplinary approach to the subject, drawing from ethnomusicology, African and African American studies, anthropology, and colonial and post-colonial studies.

### AFST 20082. Introduction to Africana Studies

(3-0-3) Page

Through a multidisciplinary and cross-cultural exploration, this course will (1) introduce students to key concepts, themes, and theories in the field of Africana Studies; and (2) introduce students to the identities and experiences of black populations throughout the global African diaspora. Over the course of the semester, we will tackle the following questions: What is Africana Studies? What are the historical, intellectual, and political origins of Africana Studies? What are race and ethnicity? What is blackness? What roles do class, culture, gender, nationality, and religion play in blackness? What is the African diaspora? What role does Africa play in blackness? How do the arts humanities, and social sciences help us investigate, analyze, conceptualize, represent, and understand this thing we refer to as “blackness?” What are some of the historical geographical, sociopolitical, and cultural points of divergence observable between populations of African descent throughout the diaspora and what, if any, are the points of commonality that unite these dispersed populations?

### AFST 20100. Introduction to African American Literature

(3-0-3)

A survey of 300 years of African American literature.

### AFST 20101. Harlem Renaissance

(3-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African American literature in the '20s and early '30s and the writers it fostered: Hughes, Hurston, Toomer, Redmon Fauset, Larson, and Thurman.

### AFST 20102. Women in the Americas

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

### AFST 20103. African American Literature and the Bible

(3-0-0)

An examination of the Bible, from Genesis to the Gospel writers' parables of Jesus, and how these Hebrew and Christian stories inspired African American artists.

### AFST 20104. Passing in Twentieth-Century American Literature

(3-0-3)

Interracial relationships as depicted in the writings of black and white American writers.

### AFST 20105. African American Migration Narratives

(3-0-3)

Life writings and issues of self-representation in the African American expressive cultural tradition in the 19th and 20th centuries.

### AFST 20106. Introduction to Post-Colonial Literature

(3-0-3)

Traces the development of literatures from the former colonies of various empires, but principally the British and French.

### AFST 20107. Tropical Heat Waves: Contemporary Latino/a and Caribbean Literature

(3-0-3)

A review of selected contemporary Latino/a and Caribbean novels.

### AFST 20108. Writing Harlem's Americas

(3-0-3)

This course will serve as an introduction to writers of the Harlem Renaissance, with an emphasis on how black writers viewed “the Black Experience” in both within the black community and the larger American culture.

### AFST 20109. Literature of Sport

(3-0-3) Benedict

Sports and athletics have held prominent roles in human societies since the beginnings of civilization. Across centuries, nation states have used athletic competition for a variety of purposes, from paying homage to distant gods to demonstrating superiority over neighboring tribes/cultures. And the individuals, the “warriors” who excel on those “fields of battle” are venerated as heroes, champions, “gods”. In this course, we'll look at a variety of literature (fiction, nonfiction, poetry, film, broadcasts of athletic events, etc.) related to sports and athletics. From depictions of wrestlers on temple walls in Ancient Egypt to Grantland Rice's *New York Herald Tribune* “Four Horsemen” article to podcasts of ESPN's *SportsCenter*, our investigation of the literature of sport will cover a range of topics—race, gender, class, globalization, and the purposes and functions of athletic competition, to name a few—including the rise of the “super star” athlete as a “god.” Required work: quizzes, two essays, midterm, final examination.

**AFST 20110. The Real Contemporary Novel: American Fiction 2000–Present**

(3-0-3) Hess

Many “contemporary fiction” classes conclude with works published around the time that you were born in the mid to late 1980s. This course focuses on novels published during the decade in which you are living and examines the interpretive difficulties raised by such works. Without being able to rely on an established history of scholarly criticism or their place among the so-called “great books” of civilization, the reader of contemporary novels must actively consider why these works are worth studying, as well as how they function. The major aims of this course are to introduce you to these exciting novels and to provide you with the critical and interpretive framework for determining what contemporary literature is and why it matters. We will focus on eight novels and novellas examining the intersections between self and society and between literary art and the popular cultures of film, television, hip-hop, rock, and comic books. Readings include novels and novellas by Paul Auster, Don DeLillo, Dave Eggers, Jonathan Safran Foer, Nicole Krauss, Jonathan Lethem, David Markson, and Toni Morrison. The course also includes a screening of the film adaptation of Foer’s *Everything is Illuminated*. Because this course is intended for non-majors, each unit will include introductions to the basic tools of literary study including close reading, how to write a literary argument, how to incorporate secondary criticism and theory, and the basic principles of film and television. Course requirements include two 5–7 page papers and one 7–10 page paper.

**AFST 20111. Chicago in Words**

(3-0-3) Thorpe

Early 20th-century Chicago was famous for its railways and stockyards, jazz, and gangsters. The city saw the creation of great industrial fortunes and the birth in 1905 of the Industrial Workers of the World. The literature taken up in this class brings the dynamic contradictions of the Chicago experience to life. We will look at work by Jane Addams, Nelson Algren, Sherwood Anderson, Gwendolyn Brooks, John Dos Passos, Carl Sandburg, Upton Sinclair, Theodore Ward, and Richard Wright covering a range of literary expression from impassioned journalism, to poetry, novels, and drama. We will consider the relation of modernism to realism. We will look at the ways in which Chicago capitalism altered nature, challenged traditional forms of identity, and created new forms of urban community. We will spend a week exploring Chicago’s jazz and blues, while we will also look at the 1932 gangster film *Scarface* screenplay by Chicago journalist and Oscar winner Ben Hecht. Chicago is a city of tremendous vitality and shocking brutality that has reinvented itself time and again, and the writers we will read have taken up this task of urban invention with a shared urgency and a wide range of voices. Course requirements: Active class participation, short response papers, creative responses (poems), a class presentation of a scene from *Big White Fog* by Theodore Ward, and an 8–10 page paper.

**AFST 20112. American Novel**

(3-0-3) Staud

We will read, discuss, and study selected novels of significant importance within the American literary tradition. As we explore these novels within their historical and cultural context, we will consider the various reasons for their place within the canon of American literature. Indeed, we will scrutinize the very nature of this literary canon and self-consciously reflect on the inevitably arbitrary nature of this, or any, reading list. Even so, we will see, I hope, that these authors share deep engagement with ideas and themes common to American literature and do so, through their art, in ways that both teach and delight. Required Texts: *Moby-Dick*, *The Adventures of Huckleberry Finn*, *The Awakening*, *The Great Gatsby*, *Invisible Man*, *The Old Man and the Sea*, and *The Bluest Eye*.

**AFST 20175. Ethnic Identities**

(3-0-3)

An exploration of the interconnectedness among literatures of prominent authors from the Americas, Africa, England, and the Caribbean.

**AFST 20201. American Men, American Women**

(3-0-3) Ardizzone

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, ‘50s television families, and ‘60s youth culture; and into recent shifts with women’s rights, extreme sports, and talk shows.

**AFST 20275. Some Other Mess: The Role of Black Outsiders in the African Diaspora**

(3-0-3) Page

They go by many names: bohos, artists, radicals, intellectuals, TRAs, mixies, and punks. They are members of the African diaspora who defy the stereotypical construction of black people that the media and a history of marginalization by the “mainstream” culture have created. People who look like them and with whom they share the same politicized racial identity often ostracize them. Are these individuals dangerous outsiders, who by eschewing the communal traditions that led to the securing of civil rights for a united African American population are imperiling black identity with a quest for individual freedom? Or, are they renegades whose explorations outside of accepted constructions of black identity challenge entrenched ideas of race, class, sexuality, and gender, not only for African Americans, but for everyone living in a post-modern multicultural world? Are they part of a long and illustrious history of identity exploration by African Americans who helped to shape and change American culture? These are some of the questions we will explore in this course. It is an investigation into the lives, work, and legacies of members of the African diaspora who are clearly into “some other mess” that is, those who insist on doing their own thing in a world that still takes issue with individual freedom of expression for some marginalized peoples. The assertion of the right to individual expression raises questions that are at the heart of the American ideal of integration and the African American construct of community.

**AFST 20367. Islamic Societies of the Middle East and North Africa: Religion, History, and Culture**

(3-0-3)

This course is an introductory survey of the Islamic societies of the Middle East and North Africa from their origins to the present day. It will deal with the history and expansion of Islam, both as a world religion and civilization, from its birth in the Arabian Peninsula in the seventh century to its subsequent spread to other parts of western Asia and North Africa. Issues of religious and social ethics, political governance, gender, social relations, and cultural practices will be explored in relation to a number of Muslim societies in the region, such as in Egypt, Morocco, and Iran. The course foregrounds the diversity and complexities present in a critical area of what we call the Islamic world today.

**AFST 20382. Societies and Cultures of Africa**

(3-0-3)

Sub-Saharan Africa is a geographically massive territory distinguished by a tremendous diversity of cultures, customs, languages, histories, identities, and experiences. In this course, we explore this wealth of diversity, alongside a survey of some of the broad historical and contemporary trends and movements that have characterized the subcontinent. A brief introduction to African geography is followed by an overview of African history in the pre-colonial, colonial, and post-colonial eras. The remainder of the course is devoted to the study of present-day Africa, including readings on social organization, religion, music, art, popular culture, politics, economics, as well as on the contemporary crises and challenges of warfare, poverty, and HIV/AIDS and other diseases. Readings will include historical, ethnographic, literary, and autobiographical texts, and will be supplemented by a number of African-directed films.

**AFST 20475. Black Music, World Market**

(3-0-3)

Slavery and the coerced migration of Africans to the New World left a multitude of popular musical styles from black peoples (and others) on both sides of the Atlantic. This course is an examination of the diversity of black popular musics on a global scale.

**AFST 20550. African Philosophy**

(3-0-3)

This course explores such issues as myth and its relationship to philosophy, reality as a whole as a principle that underlies the African universe, the question of ancestors, and being and knowing. It will explore the development of African philosophy through three periods: the traditional/classical, the colonial, and the contemporary/post-colonial.

**AFST 20575. Ways of Peacemaking: Gandhi/King**

(3-0-3)

An intensive study of the philosophy and spirituality of two of the greatest activists and peace educators of our century, M. Gandhi and M. Luther King. We will be especially concerned with the way each of these men came to construct new, yet quite ancient, images or controlling myths that they hoped would lead us to think and act in revolutionary ways.

**AFST 20583. Islam: Religion and Culture**

(1.15-0-3)

This introductory course will discuss the rise of Islam in the Arabian peninsula in the seventh century of the Common Era and its subsequent establishment as a major world religion and civilization. Lectures and readings will deal with the life of the Prophet Muhammad, the Qur'an and its role in worship and society, early Islamic history, community formation, law and religious practices, theology, mysticism, and literature. Emphasis will be on the core beliefs and institutions of Islam and on its religious and political thought from the Middle Ages until our own time. The latter part of the course will deal with the spread of Islam to the West, resurgent trends within Islam, both in their reformist and extremist forms, and contemporary Muslim engagements with modernity.

**AFST 20600. Comparative Politics**

(3-0-3) Gould

*Corequisite:* POLS 22400

In this course, students learn to think more clearly about politics, especially about how and why political life takes place as it does around the world. We study why nation-states are the dominant form of political organization today and why nation-states differ, especially in their economic and political development. Why are some countries democracies? Why are others dictatorships? Why do political movements participate in elections, start civil wars, or engage in terrorism? We develop answers to these questions by focusing on the experiences of Britain, France, Germany, Japan, Russia, China, Iran, India, Mexico, and South Africa.

**AFST 20675. Societies and Cultures of Latin America**

(7.5-0-3)

This course introduces students to the diverse cultures and societies of Latin America through historical, ethnographic, and literary study. Contemporary issues of globalization, violence, and migration will preoccupy the discussion of Central and South America and the Caribbean today.

**AFST 20702. Sociology of Race and Ethnicity**

(3-0-3)

This course provides an overview of some of the classic and contemporary sociological understandings and perspectives of race and ethnicity. We will focus particular attention on the racial/ethnic groups common to the United States, broadly categorized as African, Asian, European, and Hispanic Americans. The course will cover areas of identity and culture and will address issues such as racism, immigration, assimilation, segregation, and affirmative action. We will use printed texts as well as film clips; some assignments may include movie viewing.

**AFST 20703. Introduction to Social Problems**

(3-0-3) Thomas

Analysis of selected problems in American society such as crime, narcotic addiction, alcoholism, delinquency, racial and ethnic conflict, prostitution, and others. Discussions, debates, films, tapes, and readings.

**AFST 20750. Witchcraft and Magic in the Contemporary World**

(3-0-3)

Witchcraft and the ritualistic use of magic for shaping the future and controlling the present have been a part of human development from the earliest times. The advent of science and technology has only modified or altered the role and significance of witchcraft in contemporary societies, as witchcraft and magic services and their providers have gone online. Anthropological studies on witchcraft in contemporary societies have pointed out the relationship between the development of witchcraft and the prevailing economy, politics, public health, culture, and the environment. This course will explore the role and evolution of witchcraft in modern societies of Africa, Asia, and Latin America. Through assigned readings, in-class discussions, movies, documentaries, and ethnographic projects, we will seek to understand why witchcraft and magic and associated beliefs are universal phenomena in human societies and how these practices themselves adapt to the changing world.

**AFST 20801. Intensive Language Study: Uganda**

(2-0-2) Pierce

Working with Prof. Richard Pierce in the Department of Africana Studies, this course offers students the opportunity to research and study the language of Uganda. At the University of Notre Dame, the Department of Africana Studies stands at the center of the study of the African American experience, Africa, and the African diaspora—the global dispersion of peoples of African descent.

**AFST 23701. Topics on Race in the Americas**

(1-0-1)

This course takes an interdisciplinary approach to a range of historical, literary, religious, and social science topics important to the understanding of the experiences of Latino and African American people in American society. The mini-course will focus, among other topics, on human rights, race relations, mestizaje, racism, ethnicity, social justice, and media images. Mandatory lecture series/seminar (six to seven dates). Participation is required. In addition, students will write a short paper. Students interested in this course must attend a short organizational meeting at the beginning of the semester.

**AFST 27600. U.S. Civil Rights Movement**

(3-0-3)

This course will trace the struggle for equal rights undertaken by various marginalized groups in the 20th-century United States, focusing particularly on the experience of African Americans. We will examine in detail the Civil Rights Movement of the 1950s and 1960s, considering its contesting visions for African American liberation and the meaning of American freedom and democracy. This will be put in context of the “long” struggle, going back to early efforts to fight Jim Crow and moving forward to current debates over issues such as affirmative action and reparations, with a consideration of conservative white backlash. We will also look briefly at other traditionally marginalized groups’ struggles to achieve a full measure of constitutional rights and cultural acceptance. All of this will provide opportunities to discuss normative questions such as the nature of a just society and the means by which violence and injustice should be confronted. With so many powerful voices available to us from participants in these struggles, much of our study will be done through the reading and analysis of primary sources.

**AFST 30085. Post Nineteenth-Century Music—Africa and the Diaspora: Its Influences on Religious and Social Change**

(3-0-3)

Students explore music from North, East, Central, Southern, and West Africa in the contexts of both 19th- and 20th-century colonialism and post-colonialism. Additionally, students will be exposed to the music of the African diaspora in South America, the Caribbean, the United States, and Europe, paying close atten-

tion to how religious and sociopolitical themes infuse and inform performance practices as well as societal change. Many musical genres—from reggae to rap and salsa to funk—will be covered. The course emphasizes an interdisciplinary approach to the subject, drawing from ethnomusicology, African and African American studies, diaspora studies, anthropology, history, religious, colonial and post-colonial studies. Although not a prerequisite, this is a continuation of Music of Africa and the Diaspora (MUS 20147). Preparation for lectures include select readings and optional listening. Please bring open ears as much listening will be done in class.

### **AFST 30101. Contemporary Black Literature**

(3-0-3)

A survey of late 20th-century black literature in the United States and its relation to other ethnic literatures.

### **AFST 30201. African American History I**

(3-0-3)

This course is a survey of the history of African Americans, beginning with an examination of their West African origins and ending with the Civil War era. We will discuss the 14th and 15th centuries, West African kingdoms, forms of domestic slavery and West African cultures, the Atlantic slave trade, early slave societies in the Caribbean, slavery in colonial America, the beginnings of African American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery and resulting sectional disputes, and the significance of “bloody Kansas” and the Civil War.

### **AFST 30202. Survey of African American History II**

(3-0-3)

This course will survey the history of African Americans from 1865 to 1980. Specifically, this course will focus on the problems of Reconstruction in the South after the Civil War, the adjustments and reactions of African Americans to freedom, the economic exploitation of sharecropping, northern black communities at the end of the 19th century, the migration of black Southerners to northern urban areas, black political leadership, the Civil Rights Movement, current examples of institutional racism, and affirmative action in America.

### **AFST 30203. Colonial America**

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of English North America.

### **AFST 30204. U.S. Civil War and Reconstruction, 1848–77**

(3-0-3) DeGruccio

Through intensive reading and writing, students will explore the social and cultural history of America’s most costly war. We will focus on various topics as they relate to the war: antebellum origins, religion, gender, Lincoln’s reasons for waging war, dead bodies, freedmen’s families, black soldiers, and the uses of war memory. This will not be a guns-and-generals-smell-the-smoke course, though knowledge of military matters can be helpful. We will ask and try to answer who really “won” and “lost” the war.

### **AFST 30205. United States Labor History**

(3-0-3) Graff

*Corequisite:* HIST 32618

This course will examine the history of paid and unpaid labor in the United States from the American Revolution to the near present. We will seek to understand how working people both shaped—and were shaped by—the American Revolution, early industrialization, the debates over slavery and free labor culmi-

nating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the cold war-era repression of the left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers themselves created to advance their own interests, namely the unions and affiliated institutions that have made up the labor movement. We will also pay special attention to the crucial connections between work and identities of class, race, and gender as they evolved over the past two centuries.

### **AFST 30206. The United States Since WWII**

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of George H.W. Bush. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the cold war, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson’s Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this post-war era, and the presidencies of Gerald Ford through George H.W. Bush. There will be a required reading list of approximately six books, two smaller writing assignments, and three examinations.

### **AFST 30207. Race in American Culture**

(3-0-3)

This course will explore the history of American society—its culture, politics, and people—through an in-depth look at the defining issue of race.

### **AFST 30208. U.S. Gilded Age/Progressive Era**

(3-0-3)

Through discussion and lectures, students examine the emergence of a recognizably modern United States. Topics examined will include the emergence of the corporation, progressive reforms, the changing contours of American religion, the character of the New South, the battle for women’s suffrage, developments in the arts, and American involvement in the First World War.

### **AFST 30209. Jacksonian America: Politics, Culture, and Society, 1815–48**

(3-0-3)

This course explores the early 19th-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–48). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and antislavery, changing gender roles and the rise of feminism, evangelical religion and reform, and Native American resistance and removal.

### **AFST 30210. American Political Traditions Since 1865**

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy’s character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of the character of Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

### **AFST 30211. History of U.S. South to 1877**

(3-0-3)

This course will provide a survey of the American South through Reconstruction. We will briefly describe Native American societies and early Spanish settlements in Florida and the Southwest before addressing in greater detail the political, cultural,

and social history of the region as it was settled beginning in the Southeast. We will examine how ideas like honor, freedom, patriarchy, and religious beliefs were forged and evolved in the context of a slave economy, and how they shaped the day's political questions. We will also consider the Confederate experience and Reconstruction. There will be one paper (30 percent), two exams (25 percent each), reading reports (10 percent) and class participation (10 percent).

### **AFST 30212. African-American Politics, 1900–50**

(3-0-3)

This course examines the diverse struggles for full citizenship and human rights on the part of African Americans from 1900 to 1950. The topics to be studied include the Great Migration, the New Negro Movement and Harlem Renaissance, the Marcus Garvey Movement, the rise of A. Philip Randolph's Brotherhood of Sleeping Car Porters, the involvement of blacks in the Communist Party, and the transformations in black culture and politics brought about by the two World Wars. This course will examine the efforts of liberal-integrationist, socialist, communist, and Black Nationalist organizations to combat white racism and qualitatively improve the lives of blacks in various regions of the United States. It hopes to convey blacks' diverse thoughts on complex issues such as identity, politics, class, gender, race, and nationality.

### **AFST 30213. American Social Movements**

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black Civil Rights Movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

### **AFST 30214. Labor and America Since 1945**

(3-0-3)

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8 percent of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the Civil Rights Movement, feminism, and modern conservatism? What is "globalization" and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies or mass culture are particularly welcome.

### **AFST 30215. Witnessing the Sixties**

(3-0-3) Giamo

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the sixties, on the one hand, and on the other to explore the various journalistic representations of events, movements, and transformation. Much that was written during the period was ephemeral. There are, however, certain lasting accounts of the sixties by authors who command respect today, writers whose new publications or publications about them get front-page reviews in the *New York Times* Book Review section. We will focus on the manner in which each writer witnessed the sixties as well as the unique

interaction between personal expression, social event, and cultural meaning. We will focus on fresh styles of writing, such as the new journalism popularized by Tom Wolfe, as well as writing that is aimed toward protest, resistance, dislocation, solipsism, and reportage. Major topics for consideration include the counterculture and the movement—a combination of civil rights and anti-war protest. These topics will sharpen our interest in social history, cultural change, politics, foreign affairs, music, literature, documentary film.

### **AFST 30216. The United States, 1900–45**

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. Major topics will include the background for Progressive reform, the New Nationalism and New Freedom administrations of Theodore Roosevelt and Woodrow Wilson, the diplomacy of the early 20th century, the causes and results of World War I, the Republican administrations of the 1920s, the New Deal administration of Franklin D. Roosevelt, isolationism and neutrality in the inter-war period, and the American home front during World War II. There will be a required reading list of approximately seven books, two shorter writing assignments, and three major examinations, including the final.

### **AFST 30217. Sport in American History**

(3-0-3) Soares

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse racing and games of chance in the colonial period through the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender and class. Given Notre Dame's tradition in athletics, we will explore the university's involvement in this historical process.

### **AFST 30218. Slavery, Captivity, and the Company Store in American History**

(3-0-3)

What does it mean to be a slave in America? Were African Americans the only slaves in America? Are indentured servants, captives, or laborers in company towns free? Are they slaves? This course examines slavery and other forms of unfree labor in the United States. Through lectures and discussions, the class will investigate unfree labor in American history—chattel slavery in the South and New England, Puritan captives in French Canada, Indian slave trade in the South and Southwest, indentured servants in Virginia, and company towns in the post-war South and West. By the end of the course, students will be equipped to explore how chattel slavery in America fit into a global context, how modernity was related to slavery, and how the experiences of African-American slaves differed by time and region in the United States. After a broad survey of slavery and unfree labor in the United States, students will be prepared to tackle the following questions: What does it mean to be free in America? What was the impact of slavery and unfree labor on American politics and society?

### **AFST 30219. Race and Culture in the American South to 1865**

(3-0-3) Miller

This course traces the roots of southern American culture by exploring the centrality of the relationships between sex, manliness, and slavery in the development of the U.S. South from 1619 to 1865. By examining how European men viewed their own sexuality and that of European women in contrast to that of African men and women, this course seeks to examine the complex racial and gendered identities at the center of southern culture. The underlying current of the class is to understand the complexity with which racial and gendered identities defined all relationships and culture in the South. Using primary and secondary sources, we will critically engage the debates about slavery, racism, gender, and class in southern culture. We will reevaluate the historiographic arguments on American racism. We will take the notion of "southern gentlemen" to task, juxtaposing

their responsibility as patriarchs to the ugly underbelly of slavery, race, and sexual exploitation. Our efforts in this class will be to understand the contours of the relationships between sexual control, manliness, and racism. We will explore the daily lives of men and women who lived during the time. A variety of perspectives will constitute our sources about slavery, including those of blacks, free and enslaved, as well as planters, abolitionists, women, and yeomen.

### **AFST 30220. Women in the U.S. South**

(3-0-3)

This course introduces students to the historical study of women in the U.S. South. It will cover topics such as women in slavery, the transition to freedom, race relations, and social movements. Through student-centered discussions, presentations, and a variety of different writing assignments, students will analyze how race, class, and gender structured the experiences of women in southern society. At the end of the semester, students will be prepared to pursue more advanced research in the field of women's history.

### **AFST 30250. African History I**

(3-0-3)

*Corequisite:* HIST 32050

This course introduces students to major themes in African history to 1800. It investigates agricultural and iron revolutions, states and empires, religious movements, and patterns of migration and labor exploitation. The latter part of the course focuses on Africa in the era of trans-Atlantic slave trade. Questions to explore include: What was the effect of the slave trade on Africa? How did the slave trade shape the formation and destruction of African states? How did the slave trade influence social systems, gender relations, cultural practices, religious beliefs, and demographics in Africa?

### **AFST 30251. African History Since 1800**

(3-0-3) Roos

This course will focus on African history from 1800 to the independence movements of the 1960s. In the 19th century, new states, economies, and societies emerged in Africa as African peoples developed new relations among themselves and with the rest of the world. With the "scramble for Africa" of the 1880s, European powers colonized Africa and suppressed many of these processes. In the 1960s, however, self-rule resurged as Africans helped throw off the yoke of colonial rule and form independent nation-states. This course will consider the social, economic, and political history of Africa by using case studies from the Democratic Republic of Congo (Congo-Zaire), Nigeria, Sierra Leone, and South Africa.

### **AFST 30253. History of South Africa**

(3-0-3) Roos

This course offers an overview of modern South Africa from the perspective of radical social history, a major intellectual tradition in South African studies. It will begin by identifying processes of dispossession, urbanization, and proletarianization set in train by South Africa's mineral revolution. It will then look at the clash between imperial and Boer interests, and the South African war. The Union of South Africa in 1910 represented a re-organization of white power, and the course will turn to the experiences of Union for both black and white, including the emergence of African nationalism and other, culturally-located, forms of resistance. The apartheid state was inaugurated in 1948, and the course will examine the consolidation of the state, how it sought to control black and white citizens and subjects, and the accelerating politics of defiance. There will be particular emphasis on Black Consciousness and its role in the 1976 Soweto revolt. By way of conclusion the course will turn to the culture and politics of resistance in the 1980s, up to the initial dismantling of apartheid in 1990.

### **AFST 30274. Slavery in the Atlantic World**

(3-0-3) Challenger

This survey course explores the nature and meaning of the Atlantic world. Covering the 15th century to the 19th century, it interrogates the role of coerced African labor in the birth of the Atlantic world. Created as a consequence of the Columbian encounter, a main focus will be on the ways in which the common historical thread of trans-Atlantic slavery connected the economies, cultures and

societies that bordered the Atlantic Ocean. Thematically, this course explores, in a variety of geographical sites, the varied and nuanced claims to humanity that Afro-descended peoples displayed against the systematic attempts to dehumanize and exploit their bodies. Africans throughout various communities in West Africa, North America, Brazil, and the British Caribbean are the primary focal points of this course.

### **AFST 30275. History of Brazil**

(3-0-3)

This course surveys the history of Brazil, Latin America's largest nation, from its pre-Columbian roots to the present, with particular emphasis on social, economic, and political developments during that time. Topics will include indigenous people, the formation of colonial societies and economies, independence, slavery, abolition and post-emancipation society, immigration, the emergence of populist politics, industrialization, and efforts to develop the Amazon, military rule, and democratization.

### **AFST 30276. African American Women's History**

(2.7-0-3)

This course will trace the cultural, economic and political history of African American women in the United States from slavery to the present. Through a combination of books, primary sources, and film we will explore how African American women have addressed what is often referred to as the "double burden" of sexism and racism while seeking to define their own identities as individuals, wives, mothers, workers, and citizens. Major themes will include labor, family social movements, and civil rights.

### **AFST 30277. Mixed-Race America**

(3-0-3) Ardizzone

Despite popular images of American as a "melting" both of races and ethnicities, our institutions, values, and practices have often tried to create or maintain spatial and social distance between groups defined as racially different. This course will explore that ways in which Americans have transgressed those boundaries or found other ways of interacting across cultural lines, primarily in the 19th and 20th centuries. We will examine popular cultural perceptions of people of mixed ancestry, their social experiences, the development of various mixed-ancestry communities, and historical attempts to limit interracial socializing, relationships, and marriage. These issues were and are deeply imbedded in debates over the meaning of race, gender expectations, and ideas about sex and sexuality. We will also pay close attention to how minority communities have understood people of mixed ancestry in the United States, and how mixed-race identities intersect with African American, Native American, Asian, white, and Latino identities.

### **AFST 30330. Race, Class, and Nation in the Black Intellectual Tradition**

(3-0-3)

This course will be a survey of the way black political and social thinkers—from David Walker to Derrick Bell—have theorized these concepts and their relevance for black life in America. In short, the course asks the following two questions: (1) Is there a unified black intellectual tradition on these questions? (2) How has black thought on the questions differed from mainstream intellectual currents?

### **AFST 30358. Societies and Cultures of Africa**

(3-0-3)

Sub-Saharan Africa is a geographically massive territory distinguished by a tremendous diversity of cultures, customs, languages, histories, identities, and experiences. In this course, we explore this wealth of diversity, alongside a survey of some of the broad historical and contemporary trends and movements that have characterized the subcontinent. A brief introduction to African geography is followed by an overview of African history in the pre-colonial, colonial, and post-colonial eras. The remainder of the course is devoted to the study of present-day Africa, including readings on social organization, religion, music, art, popular culture, politics, economics, as well as on the contemporary crises and challenges of warfare, poverty, and HIV/AIDS and other diseases. Readings will include historical,

ethnographic, literary, and autobiographical texts, and will be supplemented by a number of African-directed films.

### AFST 30410. Topics in African-American Cinema

(3-2-3)

*Corequisite:* AFST 31410

An investigation of selected topics concerning theory, history, and research in film, television, the media, or cultural studies.

### AFST 30411. Black Power at the Movies: African American Cinema in the Twentieth Century

(3-0-3)

This course provides a corrective to the misconception that American film history is solely the history of the mainstream. Specifically, it examines the cultural and industrial factors affecting the production of movies made for (or of special interest to) black American audiences, from the early silent era up through the 1990s. We will explore a variety of trends, movements, and approaches within African American film history. This designation covers a large number of films with a range of production backgrounds: from black-cast musicals of the studio system era (e.g., *Cabin in the Sky*), to the work of the Los Angeles School of completely independent African American filmmakers (e.g., *Daughters of the Dust*); from the “race movies” produced for black-only movie theaters in the 1920s, ‘30s, and ‘40s (e.g., the films of Oscar Micheaux) to the so-called “blaxploitation” cycle of the 1970s (e.g., the films of Pam Grier). We will pay particular attention to the influence of social factors on African American cinema. Specifically, we will ask how the “Black Power” idea—loosely defined as the notion, adopted by assimilationists and nationalists alike, that people of African descent should free themselves from the trappings of colonialism and white supremacy and take control of their own destinies—was negotiated and reflected in the products of 20th-century American cinema.

### AFST 30476. African Cinema: Black Gazes/White Camera

(3-0-3)

A course exploring the image of black Africa through the lens of white cinematographers.

### AFST 30501. Canon and Literature of Islam

(3-0-3)

This course is an introduction to the religious literature of the Arab-Islamic world. Emphasis is on works from the classical and medieval periods of Islam, roughly from the seventh to the 14th century of the Common Era. We will read selections from the Qur’an (the sacred scripture of Islam), the Hadith literature (sayings attributed to the prophet Muhammed), the biography of the Prophet, commentaries on the Qur’an, historical and philosophical texts, and mystical poetry. All texts will be read in English translation. No prior knowledge of Islam and its civilization is assumed, although helpful.

### AFST 30575. Islam and Modernity

(1.15-0-3) Afsaruddin

Islam and its compatibility with modernity is a much-debated issue in the contemporary period. The course will address this timely topic and discuss the most important “hot-button” issues involved: political Islam, democracy, pluralism, rights of women, and secularism. The historical contexts in which these issues have been debated will also receive attention. What internal resources exist within Islamic thought which are being drawn upon by modernists to make a strong case for an essential compatibility between Islam, modernity, and democracy, for example? Is democracy (or Islam, for that matter) a monolithic concept? Students will be expected to actively take part in discussions centered around such questions, the assigned readings, and class lectures. Prior exposure to at least one class on Islam or the Middle East is strongly recommended.

### AFST 30576. Short Fiction of the Portuguese-Speaking World

(3-0-3)

This is a comparative study of short prose fiction in the Portuguese-speaking world, with special emphasis on theoretical issues related to this literary genre. Authors studied include Machado de Assis, Joao Guimaraes Rosa, Clarice Lispector, Mario deCarneiro, Miguel Torga, and Luandino Vieira. Texts and discussions in English.

### AFST 30577. *Literature issue de l’immigration*

(3-0-3)

An introduction to the literary productions by African, Caribbean, and Asian immigrants to France. Students will acquire a detailed understanding of the relevant strands of current theoretical thinking, and through a close analysis of the texts themselves, will examine recurrent themes and forms in immigrant literature, including the representation of identity; the concepts of origins; the intersection of race, class, and gender; and the textual strategies underpinning these considerations. Finally, we will examine the different ways in which these authors are redefining French literature with their singular voices and styles. Writers to be studied include Farida Belghoul, Azouz Beggag, Soraya Nini, Calixthe Beyala, Bolya Baenga, Gisele Pineau, and Linda Li. The course will be taught in French.

### AFST 30601. Race/Ethnicity and American Politics

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions (the Congress, presidency, judiciary, state and local governments, etc.) play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

### AFST 30602. Race and Political Equality

(3-0-3)

This course will describe and seek to explain racial differences in public opinion, political participation, party affiliation, representation, and policy outcomes.

### AFST 30603. Contentious Politics and Resistance Movements

(3-0-3) Hui

This course analyzes prominent resistance movements in the 20th and 21st centuries. We first examine the conceptual tools of contentious politics, domination and resistance, state-society relations, and violent vs. nonviolent strategies of resistance. We then examine various nationalist independence movements, revolutionary movements, communist insurgencies, civil wars, and peaceful democracy movements. To better understand resistance movements from the perspectives of leaders and participants, we will watch a series of documentaries and read the (auto) biographies of Mahatma Gandhi, Nelson Mandela, Aung San Suu Kyi, the Dalai Lama, Wei Jingshen, and others. In analyzing democracy movements, we will further examine what the third wave of democracy entails, why some movements succeed while others fail, how new democracies should reconcile with past dictators, to what extent constitutional engineering can solve past problems and facilitate successful transitions, and why some new democracies remain fragile.

### AFST 30604. Modern Political Thought

(3-0-3) Botting

In this course, students will study the focal ideas and arguments that helped shape the development of Western modernity—and its notions of freedom, equality, citizenship, rights, democracy, nationality, justice, and cosmopolitanism—through close readings of classic texts of European and American political thought. Hobbes’ *Leviathan*, Locke’s *Second Treatise of Government*, Rousseau’s *First Discourse*, *Second Discourse*, and *Social Contract*, plus several historical and political essays by Kant will offer students the opportunity to understand the evolution of the

vastly influential “social contract” tradition and the variants of democracy that have sprung from it. In addition, we will read contemporary works of political theory by John Rawls, Anthony Appiah, and Martha Nussbaum that both build on and move beyond the early modern social contract tradition in order to engage pressing issues of global justice that are inflected by race, ethnicity, nationality, class, sex, and gender. Students will participate in an on-campus conference on “Cosmopolitanism: Gender, Race, Class and the Quest for Global Justice,” which will feature Appiah and Nussbaum as keynote speakers.

### **AFST 30605. Social Movements**

(3-0-3)

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course, we will consider the ways in which different sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

### **AFST 30606. Black Chicago Politics**

(3-0-3) Pinderhughes

This course introduces students to the vast, complex and exciting dimensions of black Chicago politics. First, institutional structures, geographic distribution and population characteristics will inform students about the sociodemographic background of the African American population in the city. Second, the course explores varying types of political expression that have developed over more than a century, including electoral politics, mass movements, partisan politics; it will also examine the impact of the Chicago machine, and of the Washington era on the political and economic status of African Americans in the city. Third, public policy developments in housing, education, and criminal justice will be discussed. Fourth, the course also compares black political standing with other racial and ethnic groups in the city. Finally, the course will introduce students to the long tradition of social science research centered on the city of Chicago.

### **AFST 30650. Politics of Southern Africa**

(3-0-3) Walshe

Having opened with a survey of the region and the political transitions that brought South Africa's neighboring territories to independence, the course focuses on the dominant regime—the Republic of South Africa. After outlining the political history of apartheid, the phenomenon of Afrikaner nationalism, the rise of African nationalism and the liberation movements, attention turns to the country's escalating turmoil in the 1980s and resulting political transition of the 1990s. The semester closes with an analysis of South Africa's post-apartheid political and economic prospects within the broader context of globalization.

### **AFST 30651. Politics of Tropical Africa**

(3-0-3)

Following an introduction to traditional political institutions, the colonial inheritance, and the rise of African nationalism, the course concentrates on the current economic and political problems of tropical Africa. This includes case studies of political organizations, ideologies, and government institutions in Ghana, Nigeria, and Tanzania.

### **AFST 30652. Democracy, Development, and Conflict in Africa**

(3-0-3)

This course surveys African politics through the lens of the “big themes” in comparative politics—democratization, economic development, and internal conflict. Each theme is approached through both broad theories and specific case studies, so that students will learn about Africa in general and concrete ways. Students will consider the nature of Africa's challenges, what conditions distinguish Africa's successes from its failures, and what can be realistically accomplished in the future.

### **AFST 30675. Introduction to Comparative Government**

(3-0-3)

This course poses three questions in the study of politics: (1) Why are some countries democratic and others authoritarian? (2) In what ways do democratic regimes vary from one another? (3) What constitutes “good” government? In answering

these questions, we study two different types of mobilization (nationalist and developmental) and four countries: the United States, Russia, China, and Great Britain. This course cannot be taken if you have already taken POLS 20400.

### **AFST 30677. Political Psychology**

(3-0-3)

Political psychology is a multidisciplinary field of study concerned with how psychological processes are influenced by and inform political behavior of individual citizens, groups, political leaders, and behavior within political institutions. This class explores some of the major lines of political psychology theory and research, and their application to political life. These applications include the role of personality in the formation of political attitudes and democratic values; racism, stereotyping, ethnocentrism, and nationalism; the influences of emotion and cognition on voting decisions; social identity theory; information processing and political decision making; inter-group conflict; political intolerance; and methodological approaches in political psychology. This course will attempt to answer the following questions: What is racism, and where does it come from? Is political intolerance an automatic response to objective stimuli, or is intolerance functional? To what extent are political attitudes and values ingrained in personality? Is the support for democracy, political trust, and support for the political system linked to personality? How do individuals utilize and process information in political campaigns? Is negative campaigning effective? How did a heightened sense of fear and anxiety, following the September 11 terrorist attacks on America, influence political decisions, the support for President Bush's policies, and intolerance toward social groups? How does social group identity form? Does linking or identifying with one group leads to the rejection of other groups? What motivates George Bush? To what extent are personality theories useful in explaining the behavior of presidents and other political leaders? What are the political psychological underpinnings of inter-group conflict, mass violence, and genocide? Is the truth and reconciliation movement an effective means of recovering from genocide and violence?

### **AFST 30678. New Urbanism Applied: Community and Diversity in South Bend**

(3-0-3)

This course is intended to introduce students to the social problems connected with the death of city centers in the United States by examining the city of South Bend and the recent efforts by its mayor and city council to restore the city. Students will examine transportation, jobs, housing, and access to culture. The class will conduct field studies of the South Bend city center to determine how well these needs are currently being met.

### **AFST 30701. Fundamentals to Human Evolution**

(3-0-3)

This course deals with human evolution in both biological and cultural terms. Topics covered will include primate behavior, the mechanisms of evolution, the fossil record, and the characteristics of prehistoric cultures.

### **AFST 30702. Human Diversity**

(3-0-3)

Issues concerning the nature of human diversity (race, intelligence, sex, gender, etc.) are a continuing source of social and scientific debate. This course is designed to present the issues and methods used by physical anthropologists to study both the biological basis of human differences, as well as the ongoing process of human adaptation and evolution in response to climate, nutrition, and disease. Integration of the social, biological, and medical sciences will be employed to investigate modern human variation.

### **AFST 30703. Fashioning Identity in American History**

(3-0-3)

This course will focus on dress and material/visual culture in American history starting with the colonial period. It will introduce methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies.

**AFST 30704. Home Fronts During War**

(3-0-3)

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include: critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, anti-nuclear movements; cold war politics and fears of American communism; debates over the draft, just war, racism at home, and U.S. policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

**AFST 30705. Poverty/Inequality/Social Stratification**

(3-0-3)

Social inequality is a prominent and persistent feature of modern society. Social stratification theory attempts to explain the causes of inequality and the reasons for its persistence. This course will address such questions as: Why are some people rich and some people poor? Why does inequality persist? Who gets ahead? Can men and women get the same jobs? Do different races have the same opportunities? Is inequality necessary? Potential topics include inner-city and rural poverty, welfare dependency, homelessness, status attainment and occupational mobility, racial and ethnic stratification, and gender stratification and class theory.

**AFST 30706. Criminology**

(3-0-3)

The course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization, and goals of the clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to a car is necessary.

**AFST 30720. Cultural Aspects of Clinical Medicine**

(4-0-4)

This course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization, and goals of clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to a car is necessary.

**AFST 30721. Critical Approaches to the Anthropology of Race**

(3-0-3) Hauser

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle the anthropology of race from a critical perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

**AFST 30749. Anthropology of Race**

(3-0-3) Fuentes

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle what race is and what it is not from an anthropological perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

**AFST 30750. Peoples of Africa**

(3-0-3)

An introduction to the societies of Sub-Saharan Africa. It examines cultures in present-day Africa, as well as in the past, in order to lend an understanding to the developmental processes that led to their modern forms, emphasizing the relationship between a culture and its physical environment.

**AFST 30775. Caribbean Diasporas**

(3-0-3) Richman

This course examines the development of Creole societies in the French, Spanish, Dutch, and British Caribbean in response to colonialism, slavery, migration, nationalism and, most recently, transnationalism. The recent exodus of as much as 20 percent of Caribbean populations to North America and Europe has afforded the rise of new transnational modes of existence. This course will explore the consciousness and experience of Caribbean diasporas through ethnography and history, religion, literature, music, and culinary arts.

**AFST 30776. Francophone Cultures of Africa and Caribbeans**

(3-0-3)

This course examines the historical formation of Francophone culture in Africa and the Caribbeans. It familiarizes students with the colonial and post-colonial cultures of Africa and the Caribbeans. Readings in African and Caribbean studies, histories, literature, and sociology are utilized to emphasize similarities between the societies such as a shared colonial history. Furthermore, this course will enhance one's cross-cultural understanding and, therefore, facilitate the students' cross-cultural thinking and dialogue.

**AFST 30777. Intermediate Creole Language and Culture**

(1.5-0-1.5) Richman

This intermediate-level course is intended for students who have taken beginning-level Creole. In small-group teaching sessions, students will be prepared for conversational fluency with basic reading and writing skills, emphasizing communicative competence as well as grammatical and phonetic techniques. Our study of Kreyòl is closely linked to our exploration of how the language is tied to Caribbean society and culture. Evaluation of student achievement and proficiency will be conducted both informally and formally during and at the conclusion of the course. Those looking to develop or improve their language skills are welcome to the class. The program is designed to meet the needs of those who plan to conduct research in Haiti or in the Haitian diaspora, or who intend to work in a volunteer or professional capacity either in Haiti or with Haitians abroad.

**AFST 30778. Creole Conversation**

(1-0-1)

This course introduces students to the vivid, sonorous language of Kreyòl, or Creole, the vernacular language of Haiti, Martinique, and Guadeloupe. The program is primarily designed to meet the needs of those who plan to conduct research among Haitians in Haiti, the United States, or other parts of the Haitian diaspora, and for those looking to develop or improve their language skills.

**AFST 30779. African Diaspora in the Americas**

(3-0-3)

This course will introduce students to black populations in different parts of Latin America and the Caribbean. Students will gain familiarity with elements of the history, social context, and culture of the particular populations covered, and, through the course's comparative scope, come to better understand race, ethnicity, culture, nation, and Diaspora as concepts and as salient experiences contributing to the formation of group identities within and beyond the African diaspora. Students will also learn about different theoretical approaches to blackness and about some of the different forms of social and political activism associated with black populations. Haiti, Mexico, Brazil, and Bolivia will be among the national contexts considered in course readings, and students will have opportunities to explore other contexts in accordance with their individual interests.

**AFST 30780. Social Movements in the African Diaspora**

(1.1-0-3)

This course will introduce students to organizations and movements arising from and on behalf of black populations in the Diaspora, including the United States and various nations in Latin America and the Caribbean. “Movements” is defined broadly in this course to include both historical and contemporary instances of collective activism and organizing around artistic, cultural, social, intellectual, political, and/or religious agendas aimed at bringing about black liberation, social justice, and cultural/ethnic/racial awareness and pride. Among the topics to be considered are varying expressions of black nationalism within the United States, Rastafarianism in Jamaica, black identity groups in Brazil, and black organizational presence and community building on the Internet. Readings and class discussions will encourage students to think about blackness (and identity and mobilization more generally) in global terms, searching for points of connection across international borders along with points of disconnect based on differing historical, cultural, and sociopolitical realities and differing local understandings of race and ethnicity.

**AFST 30781. Religion, Myth, and Magic**

(3-0-3)

The study of religious beliefs and practices in tribal and peasant societies emphasizing myths, ritual, symbolism, and magic as ways of explaining man's place in the universe. Concepts of purity and pollution, the sacred and the profane, and types of ritual specialists and their relationship to social structure will also be examined.

**AFST 30783. Anthropology of Africa**

(1.15-0-3) Oka

Africa is known as the cradle of humanity and has the longest record of “human” activity of any continent. Yet it is also the least understood in terms of its past. The discipline of anthropology has the primary field of study used to understand the development of societies and cultures of Africa. In this course, students will learn and critically apply techniques drawn from biological anthropology, archaeology, ethnography, history, and linguistic anthropology for understanding the evolution of human societies within Africa, and the inter-connections between Africa and the rest of the world from the earliest times to the present era. Topics covered in the readings, lectures, practical laboratory work, and assignments will include the beginnings of cultural development (tool-making and social networks), the interactive development of agriculture, pastoralism and foraging, the rise of social complexity, urbanism and states within Africa, colonialism, and post-colonial African states.

**AFST 30784. Archaeology of the African Diaspora**

(3-0-3)

This course is designed to serve as an in-depth undergraduate level introduction to archaeological perspectives on the African Diaspora. In this course, we examine the formation and transformation of the Black Atlantic World beginning with the transatlantic slave trade to the middle of the 19th century through the study of archaeological and historical sources. The emphasis in this course is on English-speaking African America, where the vast majority of archaeological investigations have been undertaken. A major objective of this course is to understand the material world of communities of the African diaspora within the context of the history and historiography of the black Atlantic. This course is organized around the following themes: (1) diaspora and the Atlantic world, (2) material life of the diaspora, (3) diverse communities of the diaspora, and (4) intersections of race, class, gender, and representation.

**AFST 30785. Caribbean Historiography**

(3-0-3) Hauser

This class will introduce students to major events in Caribbean history and the various ways in which these histories have been represented. This course will present a picture of the Caribbean very different from that held by many North Americans. For 500 years, this region has been the site of encounters and clashes among Native Americans, Europeans, Africans, and Asians. For three centuries, Europe's leading states fought each other to control these islands, which were the

most valuable real estate in the Atlantic world. At the same time Dutch, English, French, and Spanish colonists imported millions of enslaved men, women, and children from Africa to work on the sugar and coffee plantations that made the region so profitable for its masters. Supported by racism and colonialism, plantation slavery left its mark on the Caribbean long after emancipation and independence. We will be emphasizing recent, representative texts, monographs and essays but placing them in the context of early research.

**AFST 30786. Archaeology of the African Diaspora**

(3-0-3)

This course will introduce students to organizations and movements arising from and on behalf of black populations in the diaspora, including the United States and various nations in Latin America and the Caribbean. “Movements” is defined broadly in this course to include both historical and contemporary instances of collective resistance, revolt, and rebellion as well as sustained collective activism and organizing around artistic, cultural, social, intellectual, political, and/or religious agendas aimed at bringing about black liberation, social justice, and cultural/ethnic/racial awareness and pride. Among the topics to be considered are varying expressions of black nationalism within the United States, Rastafarianism in Jamaica, black identity groups in Brazil, and black organizational presence and community building on the Internet. Readings and class discussions will encourage students to think about blackness (and identity and mobilization more generally) in global terms, searching for points of connection across international borders along with points of disconnect based on differing historical, cultural, and sociopolitical realities and differing local understandings of race and ethnicity.

**AFST 31410. Topics: African American Cinema Lab**

(0-1-0)

*Corequisite:* AFST 30410

During the lab times, certain films will be viewed for further discussion in class.

**AFST 33001. Civil Rights in America: Freedom Tour**

(V-0-1)

This seminar exposes students to issues fundamental to the Civil Rights Movement. Through contact (in Birmingham and Atlanta) with communities, leaders, and religious institutions that shaped the ideology and development of the movement, students explore historical and current challenges in race relations and collaboration.

**AFST 33130. Historical Novels of the Black Diaspora**

(3-0-3)

This course provides an introduction to contemporary literature of the black diaspora through the genre of the historical novel. We will evaluate strategies of narration, the significance of differing representations of single events, and the relationship between literature and history. Literary analysis will be supplemented by an examination of the historical and political issues central to the novels. Authors may include, but are not limited to Toni Morrison, Caryl Phillips, Edwidge Danticat, Charles Johnson, and Andrea Levy. In addition, we will draw on selected critical essays, films, and documentaries. Requirements include reading quizzes, short response papers, small group presentations, a short research paper (6–8 pages), and a final exam.

**AFST 33302. Faith and the African American Experience**

(1-0-1)

This course will introduce students to the African American faith experience, with particular attention being given to the historical development of spiritualities of liberation in the American diaspora. Guest lecturers and seminar leaders will offer perspective on this rich and heterogeneous tradition from several vantage points within the humanities, social sciences, and theological disciplines. In addition to a course pack of selected readings, the PBS series, *This Far by Faith: African American Spiritual Journeys*, and its companion volume will constitute the required texts for the course. There will be seven class meetings of two hours each. The course will meet on Wednesday evenings from 6:00 p.m. to 8:00 p.m. Attendance at all class sessions, active participation in seminar discussions, completion of six short (i.e., 2–3 pages in length) weekly reflection papers, and a final examination are required.

**AFST 33601. Social Concerns Seminar: Environmental Justice and Human Rights in the Aftermath of Katrina**

(1-0-1)

Set in the wake of Hurricane Katrina, and centered on a journey to Louisiana during spring break, this seminar explores domestic environmental issues from the perspective of minority communities that suffered due to Hurricane Katrina. Examines historical, political, and economic issues that created a culture of poverty in such areas. After defining key concepts such as environmental racism, culture of poverty, justice, and equality, students will consider specific issues of waste pollution and exposure to toxic substances emitted from chemical plants built in disadvantaged neighborhoods. Apply through the Center for Social Concerns.

**AFST 33602. Sophomore Seminar**

(3-0-3)

Writing seminars are devoted to a specialized topic and give students a chance to take a writing-intensive course in a seminar setting, with an emphasis on research skills and discussion.

**AFST 33730. Race and the History of Jim Crow Segregation**

(3-0-3)

This course will examine the rise of racial segregation sanctioned by law and racial custom from 1865 to 1965. Equally important, we will explore the multiple ways African Americans negotiated and resisted segregation in the private and public sphere. Topics will include disfranchisement, labor and domesticity, urbanization, public space, housing, education, history and memory, and the lasting effects of sanctioned segregation. Music and film will supplement classroom discussions. This course aims toward an understanding of the work that race does, with or without laws, to order society based race, class and gender.

**AFST 35775. Creole Language and Culture**

(1.5-0-1.5)

This course introduces students to the vivid, sonorous language of Kreyòl, or Creole, and to the fascinating culture of its speakers. This intensive, beginning-level course is intended for students with no knowledge of Creole. In small-group teaching sessions, students will be prepared for conversational fluency with basic reading and writing skills, emphasizing communicative competence as well as grammatical and phonetic techniques. Our study of Kreyòl is closely linked to our anthropological exploration of how the language is tied to Caribbean society and culture. The course takes a holistic, anthropological approach to the history, political economy, and religion of Haiti. In addition to class work, audio tapes, music and film enhance the study of the Haitian language and culture. Evaluation of student achievement and proficiency will be conducted both informally and formally during and at the conclusion of the course. To give participants additional immersion in the Haitian-speaking environment they will have an opportunity to participate in a Haitian meal and in activities of Notre Dame's Haiti Working Group, including Haiti Awareness Week in February. Those looking to develop or improve their language skills are welcome to the class. The program is designed to meet the needs of those who plan to conduct research in Haiti or in the Haitian diaspora, or who intend to work in a volunteer or professional capacity either in Haiti or with Haitians abroad.

**AFST 38090. Research in Africana Studies**

(1-0-1)

Students will be provided with the opportunity to learn how to become competent scholarly researchers as well as general information seekers relating to Africana Studies. An information literacy approach to obtaining and synthesizing relevant information currently available will be the underlying focus of this course. This will be accomplished by actively learning the University of Notre Dame library system's resources pertaining to a critical examination and discovery of research study in Africana Studies. Students will begin to develop an understanding of research techniques from the perspective of producer and consumer.

**AFST 40101. American Modernisms**

(1.15-0-3)

Discussions of the late 19th-, early 20th-century literary and cultural movement of modernism often center on those qualities of the movement described in the work of early modernist literary critics, such as Harry Levin or Edmund Wilson. Such examinations emphasize the modern movement's experiments in form, structure, linguistic representation, characterization, etc., while paying much less attention to the role of the modernist movement in the larger context of a given culture. In this course, we will explore the significance of the modern movement from the perspective of American culture, as well as the manner and meaning of American literary participation in the movement. To that end, we will consider not only the work of authors generally accepted as modernists, such as F. Scott Fitzgerald, Ernest Hemingway and Gertrude Stein; we will also consider the role of authors such as Sherwood Anderson and Waldo Frank, of the early Chicago Renaissance (1910–25), and a number of authors from the Harlem Renaissance. We will examine the work of these authors not only in the context of modernism, but also as it relates to many issues of the day, including progressivism, primitivism, race and ethnicity, immigration, cosmopolitanism vs. regionalism, and the importance of the vernacular, in addition to the question of "American-ness" and its importance to an understanding of American literature during this time. Considering these different vantage points in American literary modernism, we will try to imagine the contours of "American modernisms," and draw some conclusions about their significance within the larger modernist context. In so doing, we'll seek to arrive at a more comprehensive, more nuanced perspective on the meaning of the modern in American literature and culture. Course Texts: Edith Wharton, *Age of Innocence*; Willa Cather, *O Pioneers!*; Sherwood Anderson, *Dark Laughter*; Waldo Frank, *Holiday*; Theodore Dreiser, *Sister Carrie*; and others.

**AFST 40102. Passing and Fictions of Race**

(3-0-3)

A close analysis of how notions of "race" are explored in Anglo and Anglo-Irish literature.

**AFST 40103. Women's Autobiography**

(3-0-3)

A close analysis of women's life narratives and poetry, based on the following questions: How do women's narratives affirm or challenge cultural norms? How do concepts such as "high" and "low" art affect the reading of women's autobiographical literature? And can lines be drawn between fiction and nonfiction when studying autobiography?

**AFST 40104. Homeland Security: Surveillance, Terror, and Citizenship in America**

(1.15-0-3) Irving

This course explores the relationship between popular myths about the American experience and the actual experience of marginalized subjects in American society. It serves to make concrete a theoretical discussion of citizenship in the context of American Individualism and explores the relationships among social stratification, institutional coercion, and national narratives. As a long view of the last century, Homeland Security considers old forms of terror and surveillance evident in African American literature that anticipates and mimics the fear and anxiety in the nation after September 11. We will consider themes such as space, place, border, home, community, protection, and nationalism. The literature and critical essays under consideration straddle regional, class, gender, and social boundaries to facilitate our understanding of how African Americans within the nation create narratives of cultural fragmentation, exile, and alienation. In the process we will explore the condition of African American migration—from early-20th-century movements to urban centers, to early- 21st-century migrations as a result of Katrina—and consider the way mobility may inform new landscapes of hope and displacement. Some of the texts we will read are *Passing*, *The Street*, *Invisible Man*, *I Know Why The Caged Bird Sings*, *The Color Purple*, and *Eva's Man*. These texts may be considered counter-narratives in the way that they stress exploitation, failure, disillusionment, and exile, but they intervene in formative debates about how to define a national identity and, to echo Langston Hughes, they too sing America.

Course requirements: one oral presentation (15 percent); three -page response papers (10 percent each); one paper proposal; one 10–12 page essay (35 percent); and class participation (20 percent).

**AFST 40105. African American Poetry and Poetics**

(3-0-3) Wilson

An examination of poetry and poetics by black Americans from the beginnings to the present.

**AFST 40106. Race, Gender, and Women of Color**

(3-0-3) Ardizzone

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the United States. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color, as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

**AFST 40107. African American Literature**

(3-0-3) Irving

A survey of selected seminal works of African American literature.

**AFST 40108. “Our America”: Exploring the Hyphen in African-American Literature**

(3-0-3) Irving

Close readings of various 20th-century African-American literatures, with foci on how “black subjectivity” is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

**AFST 40109. Writing Harlem: Race, Renaissance, and the Modern**

(5-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African American literature in Harlem in the 1920s and 1930s.

**AFST 40110. Constituting Americans**

(3-0-3)

This course will explore life writings and issues of self-representation in the African American expressive cultural tradition from 1850 to 1905. This course is concerned with the concept of citizenship, its implied universalism, and the necessity of critiquing this universalism that maintains a unified notion of democracy.

**AFST 40111. Southern Fiction**

(3-0-3) Sayers

Readings in 20th-century southern fiction from 1900 to 1960, including Kate Chopin, Jean Toomer, William Faulkner, Richard Wright, Zora Neale Hurston, Ralph Ellison, Flannery O’Connor, and Eudora Welty. We will examine both the recurring subjects of the Jim Crow era—“sin, sex, and segregation,” in the old Southern phrase—and the stylistic innovations of the writers. We’ll pay special attention to contemporary criticism that explores the period from historical, political, and cultural perspectives.

**AFST 40112. Crossing Color Lines**

(3-0-3)

This literature course explores the conflicted and contradictory ways in which racial and ethnic identities have been constructed and mediated in American culture.

**AFST 40113. African American Poetry**

(3-0-3)

Close readings of selected contemporary African American poets.

**AFST 40150. Literature of Southern Africa**

(3-0-3)

A study of the literary culture of Southern Africa in the last 25 years of the 20th century, specifically the ways in which individual writers confronted the apartheid regime and their responses to the new South Africa in the post-apartheid period.

**AFST 40151. Masterpieces\Literature from Africa**

(3-0-3)

This course offers an introduction to the diversity of literatures from the African continent. Readings are in English and some are translated from French, Arabic, and African languages, including several recorded from the oral tradition. Literature from different parts of Africa are composed in a variety of forms like novels, dramas, epics, and poetry.

**AFST 40174. Caribbean Voices**

(3-0-3)

An introduction to the literature of Anglophone Caribbean.

**AFST 40175. Caribbean Voices**

(3-0-3)

An introduction to the literature of Anglophone Caribbean.

**AFST 40201. Religion and Women’s Rights**

(3-0-3)

This course focuses on religious aspects of the women’s rights movement and women’s movements within religious communities. Focusing primarily on the Protestant, Catholic, and Jewish traditions, we will examine how women have understood the relationship between their religious beliefs and their interest in expanding women’s roles. From this beginning, we will explore several historical and contemporary examples of the influence of religion on the women’s rights movement and, by the 20th century, the influence of the women’s movement in American religion.

**AFST 40202. Jacksonian United States: Political/Social/Cultural**

(3-0-3)

This course explores the early 19th-century history of the United States, from the close of the War of 1812 to the coming of the Civil War (1815–50). Although the era and course take their name from President Andrew Jackson, we will cover much more than national politics and affairs of state. We will explore the birth of mass political parties, conflicts between nationalism and sectionalism, early industrialization and the rise of class conflict, the development of slavery and antislavery, changing gender roles and the rise of feminism, evangelical religion, and reform, and Native-American resistance and removal. The course will emphasize active participation by students through regular discussion and frequent writing assignments.

**AFST 40204. Culture Wars: 1960s America**

(3-0-3)

America remains divided over the legacy of the 1960s. We worry about whether our President inhaled marijuana or served in Vietnam; we debate abortion and the extent of the welfare state; we continue to have serious problems with racial relations and the aftermath of the sexual revolution; and we wonder how our culture broke so clearly along religious lines. The 1960s continue to be a controversial part of America’s historical memory because many of our current debates can be traced to that decade. How can we understand a time so recently in America’s past that it is both the source of new freedoms and frustrations? This course will explore the nature of American society—its culture, politics, and people—through an in-depth look at the 1960s. By studying primary sources, biography, architecture, films, and the work of historians students will be able to locate and describe the basic divisions, main events, actors, and culture of 1960s, and be able to relate them to our present society. Cross-listed with AMST 30313.

**AFST 40205. Labor Movements in Twentieth-Century United States**

(3-0-3)

This course explores American workers' collective efforts in their search for economic security, political power, and social and cultural autonomy from the 1890s to the near present. For the most part, this course will focus on the unions and related organizations forged by workers throughout the past century—from major umbrella groups like the American Federation of Labor, the Industrial Workers of the World, and the Congress of Industrial Organizations, to important sectoral actors like the Brotherhood of Sleeping Car Porters, the United Automobile Workers, the American Federation of Teachers, and the United Farm Workers. The central questions of the course will be when, where, and why have US workers organized collectively in the 20th century—and how successful have they been? What has been the response of employers, the government, and the public-at-large to these collective efforts of workers, and how and why have those responses changed over time? What has been the relationship between organized labor and racial and gender discrimination, as well as the causes of racial and gender equality? And how have Americans generally, and workers in particular, understood the labor movement in relation to capitalism, freedom, and democracy? Students will be expected to write several short papers, engage in regular classroom discussion, and screen several films outside of class.

**AFST 40208. Men, Women, and Work**

(3-0-3) Giamo

The purpose of this interdisciplinary seminar is to examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw upon insights from literature, history, documentary nonfiction, and the social sciences. We will focus on the degree of permanence and change in our approach to both traditional and contemporary forms of the social problem. In addition, the causes of extreme poverty and homelessness will be explored, as well as the various cultural representations that work to organize social perceptions of the situation. There will be an experiential or community service learning dimension to the seminar as well. All students are required to make at least 10 weekly visits to either the Center for the Homeless or the Hope Rescue Mission in South Bend (30 hours), and complete a systematic documentary journal.

**AFST 40250. Prophets/Protest in African History**

(3-0-3)

This dialogue-intensive seminar focuses on men and women who led political, religious, and social movements in Africa in the 19th and 20th centuries. The Islamic Mouride brotherhood in Senegal, the Women's Wars of Nigeria, and the Mau Mau uprising in colonial Kenya will introduce students to important episodes in African history and to the intellectual debates of the field. Students are expected to read a variety of texts, participate vigorously in class discussion, make oral presentations, and complete written assignments.

**AFST 40275. Gandhi's India**

(3-0-3) Sengupta

The dominant figure in India's nationalist movement for nearly 30 years, M. K. "Mahatma" Gandhi has also been the 20th-century's most famous pacifist, and a figure of inspiration for peace and civil rights movements throughout the world. This course offers an examination of Gandhi and the nature of his unconventional and often controversial politics. It charts Gandhi's career against the background of events in London, South Africa, and India. Examines the evolution and practical application of his ideas and techniques of non-violent resistance, and his attitudes toward the economy, society and state. Gandhi's influence on Indian politics and society is critically assessed and his reputation as the "apostle of nonviolent revolution" examined in the light of developments since his death in 1948. Some of the questions that will be discussed are: How far did the distinctive character of Gandhian politics derive from his absolute commitment to India's nationalist struggle? Was his success due to the force and originality of his political ideas and his advocacy of nonviolent action? Can his achievements be explained by political wiliness and pragmatism, or by willingness to embark on new experiments with

the truth? Though helpful, a prior knowledge of Indian history is not required for this course.

**AFST 40276. Moving New Directions: African Diaspora**

(3-0-3)

Migration and the emergence of new identities have defined the formation and evolution of the African diaspora in the modern era. This course is designed to introduce students of African-American studies to the concept of African diaspora and to provide a framework for understanding how it has changed over time. What constitutes the African diaspora? How was it formed? How have people of African descent forged new identities in the Atlantic World and what are the implications of identity construction for people of African descent in the future? These questions form the basis of our historical study of the African diaspora. We examine themes of migration and cultural change through comparative case studies of black communities in the United States, the Caribbean, Africa, and Latin America. The first half of the course will focus on the Atlantic slave trade, the middle passage, and slavery in the Americas. We will examine identity and culture for people of African descent in South Carolina, Louisiana, and Jamaica. The second half of the course will deal with the problem of freedom in the 19th century Atlantic World. We will direct our attention to free black populations and Creole communities in Louisiana, Brazil, and Sierra Leone, West Africa. We will also consider the impact of emancipation at the end of the 19th-century through an examination of black American emigration movements, "back to Africa" and to the U.S. West, and Afro-Brazilian identity in a post-emancipation society. This course will conclude with a discussion of the state of the African diaspora today and its implications for future transformations in African American identity.

**AFST 40301. Race Relations in the United States**

(3-0-3)

This course focuses on race and ethnic relations in the United States. The course will begin by discussing basic concepts, issues, and theories of race and ethnic relations and stratification. We will then examine the extent of race and ethnic inequality in the United States, with some attention toward similarities and differences in the experiences of race and ethnic groups. We will discuss contemporary racial tensions in the United States and their expressions in racial attitudes, beliefs, and behaviors. Finally, the course will address remedies for race and ethnic inequality. The course requires a demanding reading load and intensive student participation in class discussions of the readings.

**AFST 40351. Christianity in Africa**

(3-0-3)

Soon nearly half the world's Christians will be Africans. This course will explore the history of Christianity in Africa beginning with the early church, but with heightened attention to the more recent growth of Christianity on the continent. We will also participate in a conference held in September here at Notre Dame titled "A Call to Solidarity with Africa," organized to respond to the US Catholic Bishops' letter of the same title. Particular topics to be addressed in the class include the dynamics of missionary activity before, during, and after the colonial period; the rise of African Independent Churches; the interaction between Christianity and Islam in the past and present; and contemporary issues surrounding Christianity and the African nation-state. We will also investigate theological questions surrounding the relationship between Christianity and culture. In addition to a final exam, students will write three 5-page papers.

**AFST 40477. Third Cinema**

(3-2-3)

*Corequisite:* AFST 41477

"Third Cinema" is the terms for a wide, multicultural range of films from the Third World. The films' stylistic and thematic practices differentiate them from the Hollywood and European traditions that have dominated world cinema. We will not study these films merely as isolated masterpieces, but rather in relation to their larger cultural, historical, and theoretical contexts. To this end, the course readings will include essays concerning not only the films themselves but also the theoretical

and political issues they engage: colonialism and post-colonialism, cultural, ethnic, racial, and sexual difference, and questions of otherness and multiculturalism.

#### **AFST 40601. Introduction to American Politics**

(3-0-3)

This course surveys the basic institutions and practices of American politics. It examines the institutional and constitutional framework of American politics and identifies the key ideas needed to understand the subject and develop a basis for evaluating American politics today.

#### **AFST 40700. African American Resistance**

(3-0-3)

An exploration of a series of cases of African American resistance throughout U.S. history.

#### **AFST 40701. Multiculturalism**

(3-0-3)

The course explores the economic, state, and national conditions of multiculturalism as a social relation and semiotic form. Seminal questions include the issues of difference deployed in debates over multiculturalism and anthropology's location in them as a study of human diversity.

#### **AFST 40702. Race, Ethnicity, and Power**

(3-0-3)

Presents a review and discussion of social scientific research concerning the nature of race and ethnicity and their expression as social and cultural forces in the organization of multiethnic societies. The focus is multidisciplinary.

#### **AFST 40705. Men, Women and Work**

(3-0-3) White

Why do Wal-Mart's current advertising campaigns idealize the "stay-at-home mom"? Conversely, why does Congress require that mothers on welfare be sent out to work? This course will introduce students to a broad view of American social history that foregrounds the gendered aspects of work and asks students to examine the meaning of work in American history from the colonial period to the 21st century. This broad historical perspective is especially crucial to the examination of the construction of current beliefs about work in the United States since changing gender ideologies dictated the work experiences of large race- and class-defined segments of the population. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies, including their work activities within the household. Male work practices will be similarly illuminated through a gender studies approach. Hence, an overarching purpose of the course will be to explore the fluidity and instability of those conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to white versus non-white, free versus enslaved, and public versus domestic activities.

#### **AFST 40778. Society and Culture through Films**

(3-0-3)

This course will deal with a variety of social issues as they are perceived, conceptualized, represented, and understood by the movies. The focus of this course will not be on the cinema history, cinema structure, or movie-making processes, but on how important human problems such as cultural diversity, race relations, the crafting of national identity and national heroes, urban life, class conflict, family structure, war, and some ideological values such as success, love happiness, fairness, misfortune, destiny, honesty, faith, and the like are depicted and treated by the movies.

#### **AFST 40780. Comparative Slavery**

(3-0-3) Hauser

For many Americans, the history of slavery is synonymous with plantations in the Atlantic world. This course seeks to expand our view of Atlantic slavery by looking to the Ancient World, Africa, Asia, and Europe in historic and contemporary contexts. This course examines slavery as a labor system and a social form intimately connected with the political economies and cultural groups within

which it arose. It will also examine debates about contemporary forms of bonded labor and slavery emerging from global encounters today. By examining different types of bonded and unfree labor, such as chattel, domestic, and wage slavery, we will form an inquiry about slavery's relationship to the following: person-hood and social death; the emergence of market economies; systems of differentiation used to maintain the social condition of the enslaved; and power and violence. This course will take an interdisciplinary approach relying on archaeology, anthropology and history for our case studies in understanding this particular social form.

#### **AFST 41477. Third Cinema Lab**

(0-0-0)

*Corequisite:* AFST 40477

During the lab times, certain films will be viewed for further discussion in class.

#### **AFST 43075. Social Concerns Seminar: Gullah People**

(1-0-1)

This seminar will examine the rich history and culture of the Gullah people, many of whom are descendants of slaves brought over from West Africa. Because of their geographic isolation, the Gullah people have been able to retain more of their African heritage than other African Americans. Through service and cultural opportunities, participants will learn about the rich history and culture of the Gullah people as well as learn about current pressures facing the residents of the Sea Islands.

#### **AFST 43201. Harlem Renaissance: History and Culture**

(3-0-3)

This course focuses on the broad questions that have emerged as a part of the contemporary study of the Harlem Renaissance. How did the phenomenal array of black cultural production from literature to music emerge within this section of New York City? To what degree did the Great Migration, religion, and politics influence this creativity? And how do we understand the impact of the Renaissance on African American culture outside of New York? Discussion begins with the many works written directly about Harlem in the 1920s as well as those materials on broader African American life that emerged from Harlem in the 1930s and early '40s. Further, while exploring the question of black Harlem and its cultural vitality, we will also deal with the interplay of white and black American artists within the New York setting. Readings include many of the traditional writers from James Weldon Johnson to Claude McKay to Zora Neale Hurston, in addition to later writers who made Harlem their focus, such as James Baldwin. To best understand the context of these works, we will discuss histories of African Americans in Harlem and New York City, as well as theoretical work on the making of black cultural expression within urban life.

#### **AFST 43202. Race, Gender, and Women of Color**

(3-0-3)

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the United States. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

#### **AFST 43204. Immigration, Ethnicity, Race in the United States**

(3-0-3)

Examining monographs, novels, film, photography, poetry, government records, and court cases, we will explore a variety of immigrant groups and time periods—from the Irish of the mid-19th century to Jamaicans, Mexicans, and the Vietnamese today. We will focus on questions of identity—how immigrants have come to understand themselves racially and ethnically over time—and questions of power—where immigrants have been located within America's developing racial order and what difference this has made in their everyday lives—their jobs, homes, families, and opportunities.

**AFST 43205. Whiteness Studies**

(3-0-3)

Over the last decade, “whiteness studies” has been all the rage in academic disciplines as diverse as law and literature, anthropology and art. This course will be a high-level introduction to and critical appraisal of this burgeoning literature—particularly as it relates to American studies. We will examine some of its key texts from its earliest roots among African-American scholars, to its more recent incarnations in U.S. history, literary criticism, critical race and legal studies, sociology, anthropology, and more. We will also examine recent attempts—both scholarly and popular—to make sense of this literature. Along the way, we will focus on the following key questions: What is “whiteness studies”? Where did it come from? What is it so popular now? What are some of its contributions and limitations? What is its future?

**AFST 43216. Between Nature and Culture: The Transformation of American Life**

(3-0-3) Meissner

All her life Edith Wharton sat on the edge of change. All her life she had one foot in the past and one firmly in the present. Her vision looked ahead to America’s trans-national and cosmopolitan future as much as it found comforts and recognitions in the country’s more provincial past. In her autobiography *A Backward Glance* (1934), Wharton suggested that the “small society into which [she] was born was ‘good’ in the most prosaic sense of the term, and its only interest, for the generality of readers, lies in the fact of its total extinction, and for the imaginative few, in the recognition of the moral treasures that went with it.” A rather ambiguous statement to be sure. Wharton’s elegiac lament for the past is always conflicted, both in her fiction and in how she lived her own life—like her friend Henry James and a number of her other acquaintances, Wharton became one of those trans-national, cosmopolitan, expatriates who helped shape twentieth-century America. She sat in the midst of a broad and influential group of cultural and intellectual figures whose works addressed, contested, fomented, resisted, and embraced the sweeping social changes America underwent in the period following the conclusion of the Civil War and leading up to the onset of World War I. Topics for discussion will include the idea of cosmopolitanism; constructions of citizenship, of race, of nation; the notion of home and exile; emerging trans-nationalism—both individual and national; and political imperialism, particularly through the “new” politics of Theodore Roosevelt. This is not a course on Edith Wharton, but an investigation that will use Wharton’s writings as a medium through which we will examine some of those cultural changes that revolutionized modern America and changed the world. Readings: selected novels, short stories, and writings of Edith Wharton; selected works of Henry James; selections from Benjamin Franklin, Sigmund Freud, John Dewey, William James, and others.

**AFST 43644. Black Politics in Multiracial America**

(3-0-3) Pinderhughes

This course undertakes a broad examination of black politics in multiracial America. Racial issues have provoked crises in American politics; changes in racial status have prompted American political institutions to operate in distinctive ways. The course examines the interface of Black Politics with and within the American political system. How successful have Blacks been as they attempted to penetrate the electoral system in the post civil rights era. What conflicts and controversies have arisen as African Americans have sought to integrate the American system of power. Now that the laws have been changed to permit limited integration, should African Americans integrate politically, that is should they attempt to “deracialize” their political appeals and strategy, with an effort to “crossover politically”; are some approaches such as those of Illinois Senator Barack Obama “not black enough”? What internal political challenges do African Americans face; some such as the increasing importance of class and socioeconomic factors, as well as gender and sexuality may reshape the definition of the black community. Finally how stable will the past patterns and political organizations and institutions of African American politics be, as America and American politics becomes increasingly multiracial.

**AFST 43701. Psychology of Race**

(3-0-3) Pope-Davis

The purpose of this course is to examine the psychological aspects of racial and ethnic identity development in the United States. This course will look at the general ideas of identity development from a psychological basis as well as the personal identities of American groups. The main course objectives are: To increase students’ cultural awareness of their own and others’ racial and ethnic identities; To develop relevant knowledge of about identity constructs in understanding different populations; and, To develop critical thinking skills in studying and evaluating research on the role of racial and ethnic identity development in psychological processes and human behavior.

**AFST 43702. The Social World and Adolescents’ Achievements**

(3-0-3)

This course examines the impact of the social world on the educational performances of adolescents. The relationship between social contexts, such as the family, neighborhood, school, peer network and religion, and adolescent achievement will be explored. Theoretical and empirical research on the impact of these social contexts will also be explored. Finally, how all the contexts work simultaneously to influence the educational performance of adolescents will be discussed.

**AFST 43703. Theoretical Criminology**

(3-0-3)

This course will introduce you to theoretical interpretations of criminal behavior, empirical research on crime in diverse contexts, and policy debates on crime control and punishment. Our intent will be to raise critical questions and to challenge commonly held views about the nature of crime and punishment in the United States today. As students of sociology, we will operate under the assumption that crime and punishment are social phenomena; they can only be understood by analyzing their relationship to the broader social, political, and cultural context in which they exist. We shall explore a variety of theoretical perspectives, both classical and contemporary, that attempt to uncover the causes, etiology, and solutions of the problem of criminal behavior. This class cannot be taken if the student has previously taken SOC 30732 because of content overlap.

**AFST 43704. Ethnicity in America**

(3-0-3)

A study of the dynamic process of formation and development of the society of the United States and its cultural, religious, and racial pluralism; a review of the history and theory of interethnic relations, and their manifestation in the basic institutions of family, education, religion, economics, and government.

**AFST 43705. Social Demography of U.S. Minorities**

(3-0-3)

The intent of this demography course is to familiarize students with basic statistical methods and techniques that are applied to the study of population data. The course will offer students an opportunity to gain “hands-on” experience with manipulating quantitative data and generating results. The backdrop for the class is ethnic status. Because we will have access to social data for major ethnic categories (e.g., white, African American, Hispanic, Asian, and Native American), one of the by-products of learning the methods and techniques of demographic analysis will be a comparative study of ethnic groups across several social dimensions. The first topic will be population growth. This will include discussions about birth rates, mortality rates, immigration, emigration, and how to generate population estimates. Another topic will be a broader discussion of rates that will distinguish incidence rates from prevalence rates, and show how they are applied to generate indicators of health, crime, school enrollment, service usage, and other social statistics. A review of direct and indirect standardization techniques, plus a review of how to analyze changing rates, will follow this discussion. Most rate changes can be attributable to either change in behaviors or population, or changes in both. How you decompose crude differences into their component parts is an essential step in understanding the dynamics of social phenomenon. This will be followed by a review of how we collect and study such social attainments as education, occupation, and income. Here we will examine issues of measurement (e.g., do

we count years of attendance or credential earned) and various ways to generate difference measure (e.g., Gini index, index of dissimilarity, mean differences). This discussion will also include ways to decompose observed differences and generate hypothetical estimates of attainment via regression and discrete Markov processes.

### **AFST 45100. Internship**

(3-0-3)

A capstone of the AFAM supplementary major is the senior project, which may be either a senior internship or senior thesis. Either option provides seniors with an opportunity to reflect upon the larger implications of their course work and, should they desire, to incorporate a service-learning component. A written proposal describing the intended internship must be submitted to the AFAM director for formal approval. If accepted, the student will be assigned a supervisor/advisor and required to write a 10–15 page project summation. The final version of the senior project is due at the end of the term. An oral presentation on the senior project must also be made to the director and advisory committee during the week of final examinations in order to complete degree requirements.

### **AFST 46100. Directed Readings**

(3-0-3)

This is a specialized opportunity for a student to design a readings course with a professor on a specific topic of academic interest. A research paper is required at the end of the semester. The professor directing the readings will establish lectures and other meeting arrangements.

### **AFST 47701. Subversive Culture/Social Protest**

(3-0-3)

The course will explore anti-structures of society using anthropological perspectives and analyze forms of creative resistance and social protest in art, performance, literature, and popular culture, using case studies from various cultures around the world.

### **AFST 48100. Thesis**

(V-0-V)

A capstone of the AFAM supplementary major is the senior project, which may be either a senior internship or senior thesis. Either option provides seniors with an opportunity to reflect upon the larger implications of their course work and, should they desire, to incorporate a service learning component. A written proposal describing the intended thesis must be submitted to the AFAM director for formal approval. If accepted, the student will be assigned a supervisor/advisor and required to write a 30- to 40- page paper for the senior thesis. The final version of the senior project is due at the end of the term. An oral presentation on the senior project must also be made to the director and advisory committee during the week of final examinations in order to complete degree requirements.

### **AFST 53200. Jim Crow America**

(2.15-0-3) Pierce

*Prerequisite:* AFAM 30202 OR AMST 30341 OR ESS 30306 OR HESB 30458 OR HIST 30800

“Jim Crow” laws barred African Americans from access to employment and to public places such as restaurants, hotels, and other facilities. In the South especially, blacks lived in fear of racially motivated violence. The history of Jim Crow encompassed every part of American life, from politics to education to sports. The emergence of segregation in the South began immediately after the Civil War when the formerly enslaved people acted to establish their own churches and schools separate from whites. Many southern states tried to limit the economic and physical freedom of the formerly enslaved by adopting laws known as Black Codes. In Jim Crow America, we will study the vast literature that encompasses the origination, sustenance, resistance, and eventual defeat of Jim Crow along with the lingering effects of the organized infrastructure of inequality in America.

## Arts and Letters Nondepartmental

### AL 23001. Professional Development Seminar

(1-0-1) Rees

Career development is a lifelong process involving self-assessment, exploration, and career management techniques. Designed for seniors, the seminar allows students to explore self and develop skills they will use as they transition from the undergraduate experience. Topics include assessing your preferences, values, and skills; career exploration; the art of being new; managing expectations in the workplace; managing ambiguity; ethics in the workplace; professional etiquette; and business communication.

### AL 23002. Career Development Seminar

(1-0-1) Ferguson

This introductory and experiential seminar is designed to meet the career development needs of first-year, sophomore, and junior students interested in self-assessment, career exploration, career decision making, and conducting an effective internship search. Topics include self-assessment inventories; internships search; résumé and cover letter writing; career trends; alumni networking; informational interviewing; developing an action plan; interviewing skills; and career research.

### AL 23101. Philosophy/Literature Colloquium

(1-0-1) O'Connor

A colloquium devoted to the critical reading of one or two major works, which builds on the esprit de corps and intellectual common ground established in the Studies in Literature and Philosophy core course for the minor.

### AL 25001. Internship

(0-0-V)

For internships taken during the regular semester. Credit toward graduation for up to two internships are available for arts and letters students upon approval by a dean in the Office for Undergraduate Studies. Students are required to provide a goals and objectives statement and to obtain a letter of offer for the internship in advance of beginning the internship, to keep a daily journal over the course of the internship, to have a letter of evaluation provided upon completion of duties, and to write a reflection paper.

### AL 25002. Internship: Reflection

(0-0-V)

For internships taken prior to the semester of registration for the internship. Credit toward graduation for up to two internships are available for arts and letters students upon approval by a dean in the Office for Undergraduate Studies. Students are required to provide a goals and objectives statement and to obtain a letter of offer for the internship in advance of beginning the internship, to keep a daily journal over the course of the internship, to have a letter of evaluation provided upon completion of duties, and to write a reflection paper.

### AL 25003. Internship: Social Entrepreneurship

(0-0-3)

An internship specially designed for and available only to students who are in the international studies exchange program with PUC in Brazil.

### AL 25004. Internship Business Practices

(V-0-V)

The purpose of this course is to combine three areas of knowledge and experience, then present them in an academic format, following a summer internship opportunity. The course is designed for arts and letters students who have secured an internship opportunity that is congruent to their respective majors. Students must meet with the program coordinator before starting the internship. (Up to two 3-credit internships apply toward graduation.)

### AL 27001. Special Studies

(V-0-V)

A zero-credit course for students engaged in independent research or working with a faculty member or a member of the University staff on a special project. Registration requires a brief description of the research or project to be pursued and the permission of the director of the summer session.

### AL 37001. Special Studies

(V-0-V)

Special Studies offers students the opportunity to pursue an independent reading or research project under the direction of a faculty member. The subject matter must not be duplicated in the regular curriculum.

### AL 40700. Heroism in Western Culture

(3-0-3) Evans

Starting with the heroic quest paradigm that originated in Greek mythology, we will explore the attributes and evolution of heroism from ancient to modern times. Bearing in mind that the heroes of history have often been more destructive than benevolent, we will explore why heroes have had such a firm grip on their followers and the generations that followed. Then we will discuss what can be appropriated from the competing models of the hero for personal strength of character and the common good.

### AL 43001. Interviewing Technique Practicum

(3-0-3) Brenner

This course is designed for seniors, acting as peer advisors, to meet with first-year students in an attempt to determine how the students are adjusting and progressing. These meetings enable first-year students to engage in discussions with reliable and informed upper-class students. The peer advisors try to identify problems, provide information, and exchange knowledge on matters pertaining to academics, study habits, campus life, and dormitory activities while gaining experience with interview skills.

### AL 43002. Great Questions and the Liberal Arts

(2-0-2) Roche

This course, designed primarily for graduating seniors, will revisit and expand some of the great questions explored in the College Seminar on Faith, Doubt, and Reason, and it will encourage broad reflection on the value of a liberal arts education. The course will be student-centered, with considerable focus on discussion. Readings in the humanities will be taken from such works and authors as Plato, Goethe, Hegel, Kafka, and Benedict. Readings from the social sciences will be taken from works by Neil Postman, Christian Smith, and Richard Light. The arts will be included via a campus performance of Marlowe's *Doctor Faustus*; films by Alfred Hitchcock, John Ford, and Woody Allen; and engagement with the works of a contemporary painter, Maria Tomasula. Permission of instructor required.

### AL 43101. PPE Colloquium

(1-0-1) Roos

A required colloquium devoted to the critical reading and discussion of one or two major works normally taken in the three semesters following the Justice Seminar.

### AL 43102. PPE Colloquium

(1-0-1) Roche

A 1-credit colloquium required for the PPE minor devoted to the critical reading and discussion of one or two major works, normally taken each semester for three semesters following the Justice Seminar for a total of 3 credits.

### AL 48001. Area Studies Essay: Africa

(0-0-3)

A research course for the capstone essay for the minor in African Studies. May not be double-counted for thesis credit in a major.

**AL 48002. Area Studies Essay: Asia**

(0-0-3)

A research course for the capstone essay for the minor in Asian Studies. May not be double-counted for thesis credit in a major.

**AL 48003. Area Studies Essay: Latin America**

(0-0-3)

A research course for the capstone essay for the minor in Latin American Studies. May not be double-counted for thesis credit in a major.

**AL 48004. Area Studies Essay: Russia and East Europe**

(0-0-3)

A research course for the capstone essay for the minor in Russian and East European studies. May not be double-counted for thesis credit in a major.

**AL 48005. Area Studies Essay: Mediterranean Middle East**

(0-0-3)

A research course for the capstone essay for the minor in Mediterranean/Middle Eastern Studies. May not be double-counted for thesis credit in a major.

**AL 48006. Area Studies Essay: Irish**

(0-0-3)

A research course for the capstone essay for the minor in Irish Studies. May not be double-counted for thesis credit in a major.

**AL 48007. Area Studies Essay: Europe**

(0-0-3)

A research course for the capstone essay for the minor in European Studies. May not be double-counted for thesis credit in a major.

**AL 48999. Visiting Scholar Studies**

(0-0-0)

This is a zero-credit course for students engaged in independent research for working with a faculty member or a member of the University staff on a special project. Registration requires a brief description of the research or project to be pursued and the permission of the director of the summer session. This course is taken as an indication of the student's status on campus and is meant to allow the registered student to use the University facilities as the summer session permits. No coursework is required.

**ALHN 13950. Honors Seminar**

(3-0-3)

This is a year-long, writing-intensive humanities seminar involving challenging cross-disciplinary readings running from ancient Greece to yesterday. There is an emphasis on critical thinking and informed constructive discussion.

**ALHN 13951. Honors Seminar**

(3-0-3)

*Prerequisite:* ALHN 13950

This is a year-long, writing-intensive humanities seminar involving challenging cross-disciplinary readings running from ancient Greece to yesterday. There is an emphasis on critical thinking and informed constructive discussion.

**ALHN 43950. Senior Honor Thesis Colloquium**

(1-0-1) Delaney; Hahn

*Prerequisite:* ALHN 13950

This is a one-credit seminar consisting of presentations of ongoing thesis research as a spur to the successful completion of the senior thesis or research project.

**ALHN 43951. Senior Moral Problems Colloquium**

(1-0-1) Delaney; Hahn

*Prerequisite:* ALHN 13950

This is a discussion course on selected reading materials.

**ALHN 46980. Directed Reading**

(0-0-3)

Directed reading honors program senior thesis.

**ALHN 48980. Senior Honors Thesis**

(0-0-3)

*Prerequisite:* ALHN 13950

The capstone requirement for the arts and letters honors students is a substantive, two-semester thesis to be completed in April. This project is accorded 3 credits in the fall for the completion of a rough draft and 3 credits in the spring for the polished, finished project.

**CSEM 23101. College Seminar**

(3-0-3)

The College Seminar is a unique, one-semester course experience shared by all sophomores majoring in the College of Arts and Letters. The course offers students an introduction to the diversity and distinctive focus of arts and letters at the University of Notre Dame. Specific sections of the College Seminar vary in their topics and texts (i.e., there will not be a shared reading list across sections), but all feature an interdisciplinary approach, commitment to engaging important questions, employment of major works, and emphasis on the development of oral skills. Every College Seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the college: the arts, humanities, and social sciences. To learn more about the course and to read specific course descriptions, please visit [nd.edu/~csem](http://nd.edu/~csem).

**CSEM 23102. College Seminar**

(3-0-3)

The College Seminar is a unique, one-semester course experience shared by all sophomores majoring in the College of Arts and Letters. The course offers students an introduction to the diversity and distinctive focus of arts and letters at the University of Notre Dame. Specific sections of the College Seminar vary in their topics and texts (i.e., there will not be a shared reading list across sections), but all feature an interdisciplinary approach, commitment to engaging important questions, employment of major works, and emphasis on the development of oral skills. Every College Seminar syllabus will include works that approach the topic from the perspective of each of the three divisions of the college: the arts, humanities, and social sciences. ## Department of American Studies

### AMST 13120. American Culture and Community

(3-0-3)

Freshman seminar in American culture and community.

### AMST 13184. History University Seminar

(3-0-3)

An introduction to the seminar method of instruction that explores the major methodologies of the historical discipline and accents the organization and expression of arguments suggested by readings in historical topics.

### AMST 13186. Literature University Seminar

(3-0-3)

This seminar will explore the representations of homelessness in American literature from the 1890s to the 1990s. Although we will initially focus on the urban and rural conditions of extreme poverty and homelessness, our interests will broaden to other conceptions—and realities—of what it means to be homeless (whether the foundation is laid by class, race, or existential and spiritual matters). Throughout, we will pay attention to the interaction between text and context, critically examining the strategies employed by an author to encompass a situation—to size it up, define its larger meaning, juggle with the factors of identity, and convey a particular social attitude that relates the individual and group to the dominant culture.

### AMST 20100. Introduction to American Studies

(3-0-3)

This course introduces the interdisciplinary field of American studies, emphasizing key texts and methods for critically understanding what “America” means (and to whom), and what it means to be “American.” How have ideas about race, gender, religion, sexuality, ethnicity, and class shaped the making and meaning of America and Americans? What are the dominant myths and values that Americans seem to share? What is the American Dream? In particular, this class considers the ways in which concepts of “America” and “American” are performed: how notions of citizenship and national identity are constructed through particular acts and actions from reciting the Pledge of Allegiance to watching football, going shopping, marching on Washington, and touring America’s National Parks.

### AMST 30100. Fundamentals of Journalism

(3-0-3) Ciccone

What is news? What are the most effective ways of presenting news to the public? What ethical decisions are involved in gathering and reporting news? These are a few of the questions addressed in this course.

### AMST 30101. Home Fronts During War

(3-0-3)

How have Americans responded at home to war and threats of war throughout the 20th century and into the 21st? What internal divisions and shared identities has war inspired or revealed? We will examine not the battles and factors that determined the military outcomes, but the domestic struggles that have defined our national experience and informed many of our responses to current events. Topics will include critiques of democracy and civil rights inclusion during WWI; treatment of Japanese Americans during WWII; development of peace movements, and antinuclear movements; cold war politics and fears of American communism; and debates over the draft, just-war, racism at home, and U.S. policies abroad in the wake of Vietnam. The final unit will focus on the Gulf War, terrorism, and developments since September 11, 2001.

### AMST 30102. American Utopias

(3-0-3)

From our colonial roots to the present day, from the Puritans’ “City Upon a Hill” to the Branch Davidians and the Waco compound, Americans have been trying to create ideal communities based on their particular version of the truth. In this course, we will survey a wide variety of utopian communities, some based on

protection from the world, others based on free love and/or perfection of human relations, some now considered cults, and others mainstream religions. We will examine how they were supposed to work versus how they worked in reality, and the dreams and beliefs upon which they were based. We will explore the ways these experiments in living were created by American culture and have, in turn, transformed it.

### AMST 30104. The American Scene

(3-0-3)

“To make much so much money that you won’t, that you don’t mind, don’t mind anything that is absolutely, I think, the main American formula.” Henry James, *The American Scene*, 1907. “Greed, for lack of a better word, is good, is right, it works, and it will save that malfunctioning corporation called the U.S.A.,” Gordon Gecko, *Wall Street*, 1987. After a 20-year absence, Henry James returns to America to examine the country of his birth. His tour brought him to the above quote and dismaying conclusion. This course tries to contextualize and understand James’s remark by placing it within a broader atmosphere of late 19th- and early 20th-century American culture. We will look at works that predate, are contemporary with, and follow James’s American tour. We will look at works of literature and biography, of politics and philosophy, and of theology and economics. Throughout, we will keep circling around and back to James’s notion of “The Main American Formula” and asking not only what exactly he meant, but how other major thinkers of the age understood or conceived of an “American Formula,” and how that “formula” could be measured at the level of the individual, the corporation, the country, and, with Conrad’s *Nostromo*, the world. Readings will include works of Joseph Conrad, Theodore Dreissner, Henry Ford, Henry James, Theodore Roosevelt, Thorstein Veblen, and Edith Wharton. In addition, we will view several movies, the focus of which is directly related to the course’s central questions.

### AMST 30107. World War II America: History and Memory

(3-0-3)

Exploring a wide range of primary and secondary sources from the 1940s and today (e.g., novels, films, ads, posters, poetry, art, museum exhibitions, and memorials), this course will examine the history of America’s World War II experience and how this history is remembered and memorialized today. Areas of study will include D-Day and Pearl Harbor; the bombing of Hiroshima and Nagasaki; the Holocaust; the emerging African American and Mexican American civil rights movements; the Americanization of European immigrants; Japanese American internment and redress; and “Rosie the Riveter” and other women’s experiences as paid workers.

### AMST 30108. American Social Movements

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black civil rights movements, labor organizing, and women’s rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

### AMST 30109. News in American Life

(3-0-3) Storin

What difference does journalism make? This lecture course traces the impact of news on public policy since the start of World War II. In addition to that period, this course studies the impact of coverage on the Civil Rights movement of the ’50s and ’60s, the era of Sen. Joseph McCarthy’s crusade against communism, the war in Vietnam, the investigation of the Watergate scandal and, finally, the impact of media on the local 2006 Congressional election. Taught by the former editor of *The Boston Globe*.

**AMST 30112. Witnessing the '60s**

(3-0-3)

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the '60s, on the one hand, and on the other to explore the various journalistic and aesthetic representations of events, movements, and transformations. We will focus on the manner in which each writer or artist witnessed the '60s and explore fresh styles of writing and cultural expression, such as the new journalism popularized by Tom Wolfe and the music/lyrics performed by Bob Dylan. Major topics for consideration include the counterculture and the movement—a combination of civil rights and anti-war protest.

**AMST 30118. The Craft of Journalism**

(3-0-3) Schmuhl

This class will focus on how print and broadcast journalists work—how they think and act as well as the dilemmas they face in delivering news, analysis, and commentary. Several sessions will be devoted to presentations by visiting correspondents, editors, and producers, explaining their approaches to specific stories and circumstances. In addition, students will discuss the issues and questions raised in a few books.

**AMST 30119. Perspectives on Nature and Environment in America**

(3-0-3)

Throughout American history, those who took a hand to alter nature—or raised one to preserve it—have rarely been concerned exclusively with the continent's ecosystems. Rather, they saw themselves as advancing lofty ideals, such as progress or freedom. After a general introduction to American environmental history, this course examines how 19th- and 20th-century American explorers, activists, and writers have understood our alterations to landscape and river, and what the stakes are for modern environmentalists who seek to preserve what wilderness remains.

**AMST 30132. Men, Women, and Work in American History**

(3-0-3)

Why do Wal-Mart's current advertising campaigns idealize the "stay-at-home mom"? Conversely, why does Congress require that mothers on welfare be sent out to work? This course will introduce students to a broad view of American social history that foregrounds the gendered aspects of work and asks students to examine the meaning of work in American history from the colonial period to the 21st century. This broad historical perspective is especially crucial to the examination of the construction of current beliefs about work in the United States since changing gender ideologies dictated the work experiences of large race- and class-defined segments of the population. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies, including their work activities within the household. Male work practices will be similarly illuminated through a gender studies approach. Hence, an overarching purpose of the course will be to explore the fluidity and instability of those conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to white versus non-white, free versus enslaved, and public versus domestic activities.

**AMST 30137. Media Criticism**

(3-0-3) Wycliff

This course will explore the work of such seminal American media critics as A.J. Liebling and Walter Lippmann, as well as the plethora of contemporary critics in newspapers, magazines, television, and Web publications. It will examine the philosophical principles against which journalism in the American democracy ought to be measured. It also will explore the phenomenon of the ombudsman, or reader representative, in modern American media, with a particular focus on whether ombudsmen have been able to build or buttress the credibility of news organizations. Moreover, it will challenge students to write on a regular basis their own media criticism.

**AMST 30138. Advanced Reporting**

(3-0-3) Colwell

This is an advanced course in journalistic reporting and writing devoted to learning how to prepare, in a professional manner, in-depth articles on issues and events of community interest for Notre Dame and in this area. Emphasis will be on the techniques, ethics, and responsibilities of conducting interviews and research and crafting pieces for newspapers and other publications.

**AMST 30140. Multimedia Journalism**

(3-0-3)

The 21st-century journalist needs to be comfortable with what is called "writing across the media" and can no longer be selective about which form of communication around which to build a career. In many newsrooms, print journalists are now expected to perform on radio or in front of TV cameras, while the bylines of electronic journalists are turning up in newspapers and magazines. Such media "convergence" is already more the norm than the exception. On top of that, the Internet has become a major medium in its own right, encompassing different styles of communication. While the focus of this course will be on writing, it will expose students to a variety of media in an effort to prepare them for the reality of modern communications careers.

**AMST 30142. Media Ethics**

(3-0-3) Storin

This course will examine the journalistic and ethical challenges that newsroom managers face, as well as the issues that reporters in the field must tackle on a daily basis. Roughly half of the course will deal with case studies of ethical dilemmas and the other half will involve students in making choices for the front of the mythical newspaper. Although there will be readings from books on the topics, students will be expected to read *The New York Times*, *The South Bend Tribune*, and *The Observer* on a regular basis, especially on the class days when the front-page decisions will be made. The stories in those newspapers will provide the basis for those decisions. We will also consider how television deals with news on local and network levels.

**AMST 30143. Fashioning Bodies**

(3-0-3)

Did Puritans only wear black and white, or did they wear fashionable lace, silk ribbons, and bright colors? Did early settlers wash their bodies to get clean? What role did fashion play in the making of the American Revolution? And how did slaves and Native Americans adorn their bodies? This course will address such questions by focusing on dress and material culture. We will consider the role of dress in the construction of colonial identities, and examine the ways that bodies operated as sites for negotiating class and ethnic encounters.

**AMST 30144. Women and Work in Early America**

(3-0-3)

What did shopping, tavern keeping, and midwifery have in common in early America? They could all be considered legitimate forms of "women's work." This course introduces students to early American social history (from colonial settlement to 1820) by considering the dynamic relationship of women and work. We will consider the ways that girls and women helped make the world of pre-Industrial America through their contributions both inside and outside of the home. The course will consider different forms of labor: skilled and unskilled, free and enslaved, and paid and unpaid. It will also pay special attention to the ways that women of European, African, and Indian descent wove their own cultural beliefs and social practices into the broader laboring regimes of early America. Throughout, we will explore the changing meanings of "women's work" and "men's work" and assess how these definitions helped to shape boundaries of race and class. We will cover a range of sites from New England to Charleston, Louisiana to Jamaica, and analyze topics such as the gendering of agricultural work; African women's market activities in the New World; women and politics in Washington; and shopping as skilled work.

**AMST 30145. Writing for Publication**

(3-0-3) Schmuhl

This course is designed to improve and extend student skills in writing nonfiction articles, with emphasis on writing for magazines. It will touch on freelancing, researching markets, understanding audience, finding salable topics, writing query letters, and working with editors. But the major emphasis of the course will be on writing: Students will be expected to write several short articles and one major one, and they will be responsible for developing a marketing plan for the long article. The instructor of this course is the editor emeritus of *Notre Dame Magazine*. Open to American studies majors and journalism, ethics, and democracy minors by permission. Other applicants must submit writing samples for review.

**AMST 30146. Persuasion, Commentary, and Criticism**

(3-0-3) Colwell

This course will consider the roles of persuasion, commentary, and criticism in contemporary American culture and will explore the techniques of these forms of expression. Students will prepare and discuss their own writing assignments, including opinion columns, editorials, and critical reviews of performances or books. Ethics and responsibilities in contemporary American journalism in expression of opinions also will be explored. Assignments will serve as the examinations in this course, which is taught by a political columnist for the *South Bend Tribune*, who also serves as host of public affairs programs on WNIT-TV, Public Broadcasting. Open to American studies majors and journalism, ethics, and Democracy minors by permission. Other applicants must submit writing samples for review.

**AMST 30147. American Art and Culture 1945–70**

(3-0-3)

This course covers art and culture in the United States of America from pre-World War II through the early 1970s, focusing on art styles and movements ranging from regionalism and abstract expressionism to Earthworks and early feminist art. The “triumph of American painting” in the post-World War II era, links between art and politics, development of American art theory, intersections between the avant-garde, popular culture, consumer culture, and institutionalization of art museums and markets will be analyzed in detail.

**AMST 30148. Culture and Society in the Great Depression**

(3-0-3)

This course explores the culture and society of one of the most turbulent periods in American history. The economic collapse and ensuing national crisis altered the political, social, and symbolic landscape of the country. We will examine the historical context and social activism of this period (1929–41), including the conditions and responses of those affected by various hardships. Also, we will be concerned with the cultural expression and representation of Depression America. How was the crisis confronted? What ways of seeing and understanding the events, and the people who lived through them, provided value, merit, and worth? In what ways did social positions and cultural values clash? In order to answer these and related questions, we will study the role and importance of documentary expression (letters, photographs, reportage), the art of urban social realism, literature, and film.

**AMST 30151. We the People**

(3-0-3)

The United States Constitution was created to provide governmental stability and to define individual liberties. In this course, we will study the original intent of its words and the ways in which its applications and additions have been defining moments in American culture.

**AMST 30152. Visualizing America: Survey of American Art and Culture**

(3-0-3)

This course examines American visual and material cultures from the pre-colonial era to the present day. Providing a broad, historical account and considering a variety of media from paintings and sculptures to quilts, photographs, world's fairs, and fashion styles, this survey explores American art within the context of

cultural, social, economic, political, and philosophical developments. In particular, it considers the role that American art has played in the formation of national identity and understandings of class, race, gender, and ethnicity.

**AMST 30153. “Mixed-Race America”**

(3-0-3)

Despite popular images of American as a “melting” both of races and ethnicities, our institutions, values, and practices have often tried to create or maintain spatial and social distance between groups defined as racially different. This course will explore that ways in which Americans have transgressed those boundaries or found other ways of interacting across cultural lines, primarily in the 19th and 20th centuries. We will examine popular cultural perceptions of people of mixed ancestry, their social experiences, the development of various mixed-ancestry communities, and historical attempts to limit interracial socializing, relationships, and marriage. These issues were and are deeply imbedded in debates over the meaning of race, gender expectations, and ideas about sex and sexuality. We will also pay close attention to how minority communities have understood people of mixed ancestry in the United States, and how mixed-race identities intersect with African American, Native American, Asian, white, and Latino identities.

**AMST 30154. The Craft of Journalism**

(3-0-3) Schmuhl

This class will focus on how print and broadcast journalists work—how they think and act as well as the dilemmas they face in delivering news, analysis, and commentary. Several sessions will be devoted to presentations by visiting correspondents, editors, and producers, explaining their approaches to specific stories and circumstances. In addition, students will discuss the issues and questions raised in a few books.

**AMST 30155. American Men, American Women**

(3-0-3)

What does it mean to be male or female in America? How different are our ideas about gender from those of other cultures? This course will focus on the 20th century and look at the origins and development of masculine and feminine roles in the United States. How much have they changed over time, and what aspects have been retained? We will explore the ways that cultural images, political changes, and economic needs have shaped the definition of acceptable behavior and life choices based on gender. Topics will range from Victorian ideals through the Jazz Age and war literature to movie Westerns, '50s television families, and '60s youth culture; and into recent shifts with women's rights, extreme sports, and talk shows.

**AMST 30156. The City in American Culture**

(3-0-3)

Jane Jacobs wrote in *The Death and Life of Great American Cities* that all cities are governed by a marvelous and complex order. This order, she said, is composed of movement and change, and though it is life, not art, we may call it the form of the city, and liken it to the dance. This class looks closely at the origins and continuation of that dance as it analyzes some of the forces that have shaped and continue to shape America's cities and their surrounding metropolitan areas. The course will center on a number of literary and nonliterary texts and be guided by a series of questions such as: Does urbanization thrive on a culture of poverty? Are 20th-century gated communities a continuation of the brownstone mansion? Does the American Dream require vivid urban poverty? Is there such a thing as enough? Who lives in cities today? How are societal changes and the goals of urban development rewriting the role of cities? How has gentrification and evolving patterns of metropolitanism/cosmopolitanism effected the modern city and its composite neighborhoods. Why and how do cities compete for target communities such as arts, gay/lesbian, minority, young, urban, and professional? The course will have a written, research, and a practical/experiential component.

**AMST 30157. Popular Culture and the U.S.-Mexico Border**

(3-0-3)

Drawing upon critical work in history, cultural studies, and American studies, this course will explore the history and meanings of the U.S.-Mexican border since 1848. We will pay special attention to American popular culture (located in film,

literature, art, music, and even dime novels) to understand the myriad—often contradictory—roles that the border has played in the popular imagination of the United States.

### AMST 30158. Gender and American Catholicism

(3-0-3)

This course surveys gender and American Catholicism, focusing on the following themes: the role of religious belief and practice in shaping Catholics' understanding of gender differences; gender in the context of family and religious life; masculinity, sport, and American culture; embodiment; gender, education, and work; gender and sainthood; and Catholicism and feminism. The class format will involve discussion of assigned primary and secondary sources, supplemented by occasional background lectures. We will take several field trips, including a visit to the Notre Dame Archives for a presentation on Catholic material culture, a tour of the Basilica of the Sacred Heart to enhance our understanding of church architecture and devotional life before the Second Vatican Council, an evening at South Bend's Catholic Worker House, and a visit to Catholic Chicago, an interactive exhibit at the Chicago History Museum.

### AMST 30200. Literary Outsiders

(3-0-3)

A close study of the motif of the outsider, in his and her various guises, primarily from literary but also philosophical, sociological, and psychological perspectives, with the goals of identifying what historical literary spaces outsiders inhabit and whether these spaces are still available to literary expression in the 21st century.

### AMST 30201. American Women Writers to 1930

(3-0-3)

A close reading of "major" and "minor" American women writers of the 18th, 19th, and early 20th centuries.

### AMST 30202. Latino Poetry

(3-0-3)

This course will focus on several prominent contemporary Latino poets whose work has enriched and diversified the canon of American poetry in the last 20 years. Among them are such established and acclaimed authors as Gary Soto, Lorna Dee Cervantes, Pat Mora, Martín Espada, and Victor Hernández Cruz. Because Latinos are not homogeneous, emphasis will be given to these poets' diverse ethnic and cultural origins. In this regard, one important component of the course is the various ways that Latino poets respond to the spiritual and the sacred. Other topics to be discussed include social justice, the family, identity (in its multiple forms), and, of course, poetics. Readings will be assigned in individual poetry collections and in one anthology. Assignments include group presentations, response papers, three short academic papers, and regular attendance.

### AMST 30203. The City in American Literature

(3-0-3)

Literary representations of the city and social identity in American texts from the 1890s to the present, including Riis, Dreiser, Wharton, Sinclair, Yezierska, Wright, Paley, and Cisneros, as well as contemporaneous nonfiction and films.

### AMST 30204. Latin American Images of the United States

(3-0-3)

Drawing upon a wide variety of sources—novels, essays, poems, travel literature, social science texts, film, art, etc.—a survey of Latin American views of North American society, customs, politics, and individual character, with a particular emphasis on United States interventionism.

### AMST 30205. Harlem Renaissance

(3-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African American literature in the '20s and early '30s and the writers it fostered: Hughes, Hurston, Toomer, Redmon Fauset, Larson, Thurman.

### AMST 30206. Icons and Action Figures in Latino/a Literature

(3-0-3)

Understanding U.S. Latino/Latina literature, art, and film through its many allusions to and reinterpretations of traditional icons and historic figures as well as legends, myths, popular figures, and action heroes/heroines of the Americas (including those with origins in Native American, Latino/Latina, African, Asian, and European cultures).

### AMST 30207. Readings in American Novel

(3-0-3)

Novels from Hawthorne to Morrison.

### AMST 30208. American Literature: Varieties of Religious Experience

(3-0-3)

Many American authors are skeptical toward religion, yet they are, nonetheless, preoccupied with the religious experience. This course explores the relationship between these attitudes in American literature.

### AMST 30209. Women in the Americas

(3-0-3)

A study of short stories and novellas written in the last half of the 20th century.

### AMST 30210. African American Migration Narratives

(3-0-3)

This course will explore life writings and issues of self-representation in the African American expressive cultural tradition in the 19th and 20th centuries. We will pay special attention to questions of gender, audience, authenticity, and competing feminist and nationalist ideologies. How do we define freedom, and what role do art and culture play? What does it mean to be a black intellectual? Can aesthetics stand in for activism? What does it mean to be a race champion? Is feminism relevant for black women in America? To what extent is self-fashioning synonymous with public responsibility? These are a few of the questions that will drive the semester.

### AMST 30211. Latino/Latina American Literature

(3-0-3)

Studies of Latino and Latina authors, including Chicano, Caribbean, or South American.

### AMST 30212. Twentieth-Century Ethnic American Novels

(3-0-3)

In this class, we will explore several ethnic American novels by focusing on the theme of memory, specifically on the ways in which remembering one's own or one's ancestors' past becomes part of one's self-identification as an ethnic American. Since the ties between past and present are rarely straightforward, remembering one's family history is often a painful, haunting experience. Yet facing the ghosts of one's past can be a liberating process, too, allowing for self-invention. The question of memory will also highlight how the promises of the "American Dream" continue to be problematic for immigrants. What does it mean to become American? Can one be fully free in the "land of freedom"? Readings will include F. Scott Fitzgerald, *The Great Gatsby*; Anzia Yezierska, *Bread Givers*; James T. Farrell, *Young Lonigan*; John Okada, *No-No Boy*; Toni Morrison, *Beloved*; Art Spiegelman, *Maus I* and *Maus II*; Maxine Hong Kingston, *The Woman Warrior*; Louise Erdrich, *Love Medicine*; and Julia Alvarez, *How the Garcia Girls Lost Their Accents*. Requirements: Regular attendance and participation, group presentation, several response papers, one final (5-page) paper, and a final exam.

### AMST 30213. Introduction to Post-Colonial Literature

(3-0-3)

Traces the development of literatures from the former colonies of various empires, but principally the British and French. An essential concern of the materials is how individual identities or (neo)national subjectivities remain continually in a state of formation. Major regions include Africa, India, the Caribbean, and Southeast Asia. Authors may include Chinua Achebe, Mariama Ba, Buchi Emecheta, Anita Desai,

Bessie Head, George Lamming, Salman Rushdie, Wole Soyinka, Vikram Chandra, and Derek Walcott among others. Theorists include Frantz Fanon, Edward Said, Gayatri Spivak, and Ngũgĩ wa Thiong'o.

### AMST 30214. Early Modern American Fiction

(3-0-3)

This course explores literature written between the Civil War and World War II. This is, of course, a dynamic century of American (not to mention world) history; the result is an equally dynamic century of American fiction. Our course will examine how this fiction shows the impact of economic and technological transformations on religious beliefs, conceptions of human identity, work environments (and men's and women's places in them), etc. We will not only read several important 20th-century novels, but will also come to a better understanding of our own capitalist and technology-driven culture. In addition to a few short stories and critical essays, which will be collected in a course packet, we will read the following: Herman Melville, "Bartleby, the Scrivener"; Theodore Dreiser, *Sister Carrie*; Edith Wharton, *The House of Mirth*; Frank Norris, *The Octopus*; Upton Sinclair, *The Jungle*; John Dos Passos, *The Big Money*; and Ralph Ellison, *Invisible Man*. Course Requirements: Several brief response papers, one short (4–6-page) paper, one longer (10-page) research paper, an oral presentation, and midterm and final exams.

### AMST 30215. Border Crossings: Mexican and Canadian Literature

(3-0-3)

Mexican and Canadian literature emphasizing cultural interaction between the United States and its southern and northern neighbors.

### AMST 30216. African American Literature

(3-0-3)

This course is designed to familiarize students with the diverse concerns of black women's writing from the first novel written in 1854 through the present.

### AMST 30217. Readings in Nineteenth-Century American Literature

(3-0-3)

Long before the automobile became a symbol of American life, travel has been a defining aspect of many sorts of American experience. For the slave seeking freedom, the settler in search of fertile land, or the Native American forced from his ancestral home, travel has necessitated fundamental transformations in the individual and the community. Often travel and mobility are identified with the freedom and social flexibility that historically have distinguished the "new" world from Europe. But travel can be punishing rather than liberating when it is undertaken out of desperation or under force. We will begin the course with a careful reading of Jack Kerouac's classic travel novel, *On the Road*. Kerouac's work develops a range of themes and concerns that we will then trace through American literature from the Puritans to the present. These will include the meaning of wilderness; pilgrimage as a search for a higher truth; the experience of freedom; the problems of identity raised by the confidence man; the relationship to the other; the search for the father. Our readings will include Mary Rowlandson's captivity narrative; selections from the journals of Lewis and Clark; Caroline Kirkland's *A New Home, Who'll Follow?*; the autobiographies of William Apess and Frederick Douglass; Thoreau's *Walden*; Melville's *Confidence Man*; Morrison's *Beloved*; and a short story by Sherman Alexis. We will also view several films. Course requirements include regular attendance and active participation, two short (5-page) papers, and a final exam.

### AMST 30218. Travel in American Literature

(3-0-3)

Long before the automobile became a symbol of American life, travel has been a defining aspect of many sorts of American experience. For the slave seeking freedom, the settler in search of fertile land, or the native American forced from his ancestral home, travel has necessitated fundamental transformations in the individual and the community. Often travel and mobility are identified with the freedom and social flexibility that historically have distinguished the "new" world from Europe. But travel can be punishing rather than liberating when it

is undertaken out of desperation or under force. We will begin the course with a careful reading of Jack Kerouac's classic travel novel, *On the Road*. Kerouac's work develops a range of themes and concerns that we will then trace through American literature from the Puritans to the present. These will include the meaning of wilderness; pilgrimage as a search for a higher truth; the experience of freedom; the problems of identity raised by the confidence man; the relationship to the other; the search for the father. Our readings will include Mary Rowlandson's captivity narrative; selections from the journals of Lewis and Clark; Caroline Kirkland's *A New Home, Who'll Follow?*; the autobiographies of William Apess and Frederick Douglass; Thoreau's *Walden*; Melville's *Confidence Man*; Morrison's *Beloved*; and a short story by Sherman Alexis. We will also view several films. Course requirements include regular attendance and active participation, two short (5-page) papers, and a final exam.

### AMST 30219. Contemporary Black Literature

(3-0-3)

A survey of late 20th-century Black Literature in the United States and its relation to other ethnic literatures.

### AMST 30220. Latino Literatures

(3-0-3)

A survey of Latino fiction, poetry, and other literary works.

### AMST 30221. Tropical Heat Waves: Contemporary Latino/a and Caribbean Literature

(3-0-3)

A review of selected contemporary Latino/a and Caribbean novels.

### AMST 30222. Twentieth-Century American Feminist Fiction

(3-0-3)

Close readings of major 20th-century novels, written by both men and women, which may be accurately described as "feminist."

### AMST 30223. Beats, Rhymes, and Life: An Introduction to Cultural Studies

(3-0-3)

An introduction to cultural studies using a variety of media: literature, film, and music.

### AMST 30224. Modernism to Punk

(3-0-3)

In this course, we will be focusing on the significance poetic communities have had on poetry in the 20th century. From the Modernists until today, poetic communities have been the primary center of writing, publication, collaboration, and theorizing. We will start from the premise that poets do not work alone, but cultivate a community of poets and artists with whom they write. When we look at poetry through the lens of community, rather than through individual poets, we are able to understand the art worlds they inhabited and the ways in which collaboration with painters, filmmakers, and musicians helped to create a poetry that addressed the needs and ambitions of a particular group. Poetic communities are politically engaged groups that often function as sites of resistance, critique, and exploration. With each poetic community we study, from Modernism, to Black Mountain, to the New York School, to minimalism, to the Beat Generation, to Punk rock, we will be asking what particular historical circumstances enabled the formation of the community, what challenge does each community address, how does one community's concerns differ politically or historically from another community, and how do these group affiliations condition their poetry. By focusing on poetry that is created within and between poetic communities we will examine how their writing is able to engage the construction of self and other, how modern poetry challenges artistic and academic institutions, and how modern poetry interacts with various media, such as painting, music, and film.

**AMST 30225. Women in the Americas**

(3-0-3)

A survey of a wide variety of literature (fiction, poetry, testimonio, personal essay, autobiography, critical essay, and oral history) and film written by and about women in the Americas from the time of conquest/encounter to the present.

**AMST 30226. Latino/a Poetry**

(3-0-3)

This course will focus on several prominent contemporary Latino poets whose work has enriched and diversified the canon of American poetry in the last 20 years. Among them are such established and acclaimed authors as Gary Soto, Lorna Dee Cervantes, Pat Mora, Martín Espada, and Victor Hernández Cruz. Because Latinos are not homogeneous, emphasis will be given to these poets' diverse ethnic and cultural origins. In this regard, one important component of the course is the various ways in which Latino poets respond to the spiritual and the sacred. Other topics to be discussed include social justice, the family, identity (in its multiple forms), and, of course, poetics. Readings will be assigned in individual poetry collections and in one anthology.

**AMST 30227. Writing Harlem's Americas**

(3-0-3)

This course will serve as an introduction to writers of the Harlem Renaissance, with an emphasis on how black writers viewed "the black experience" in both within the black community and the larger American culture.

**AMST 30228. Asian American Sexuality**

(3-0-3)

This course will introduce students to major works of Asian American Literature while exploring issues of sexuality and gender in this body of literature. We will focus on race/ethnicity, authenticity, and representation as contested sites in Asian American Literature and how these contested sites produce inter/intracultural tensions about the Asian body as it is viewed from within Asian American literature and from without. Primary texts will include novels, short fiction, poetry, film, drama, the graphic novel, and critical essays.

**AMST 30229. Hemingway and Walker**

(3-0-3)

A comparative study of the fiction of Ernest Hemingway and Alice Walker, with particular emphasis on gender, class, and historical issues explored in each author's works.

**AMST 30230. Caribbean Women Writers**

(3-0-3)

A sampling of novels written by Caribbean writers, with a particular emphasis on such themes as colonization, madness, childhood, and memory.

**AMST 30231. Outcasts and Misfits in American Literature**

(3-0-3)

Representations of "black sheep" in selected 20th-century American novels.

**AMST 30232. Native American Perspectives in American Literatures**

(3-0-3)

A survey of Native American "perspectives" in selected works of American literature, written by Caucasians and non-Caucasians, dating from the 17th to the 20th centuries.

**AMST 30233. The Stranger in American Literature**

(3-0-3)

Fictional representations of "strangers" and "outsiders" in American literature from the 18th to 21st centuries.

**AMST 30234. Literatures of Immigration**

(3-0-3)

Close reading of recent literature that explores the immigration between Mexico, Latin America, and the United States.

**AMST 30235. American Poetry after 1945**

(3-0-3)

A survey of American poets and poetry after World War II.

**AMST 30237. Literature of the Early Americas**

(3-0-3) Rodriguez

Close examination of selected works written by Americans from the 17th century through the Civil War.

**AMST 30238. African American Literature**

(3-0-3) Irving

A survey of selected seminal works of African American literature.

**AMST 30239. Religious Imagination in American Literature**

(3-0-3) Werge

A consideration of the forms, ideas, and preoccupations of the religious imagination in literature and of the historical relationships between religious faith and traditions and particular literary works.

**AMST 30240. Contemporary American Literature**

(3-0-3) Benedict

What does it mean to write fiction in the "Naughts" (2000–10)? In the age of MySpace, RSS feeds, *American Idol*, and YouTube, is the term "fiction" even valid anymore? Or, for that matter, books? In this class, we will read several novels published since January 2001. In addition to covering the "usual" topics (plot, character relationships, themes, etc.), we'll also think about what it means to write "fictions," to write "novels," in a world, in an "America," that is increasingly being parsed into smaller and smaller pieces. A partial list of texts include (subject to change): Mark Danielewski, *Only Revolutions: A Novel*; Jennifer Egan, *Look at Me*; Joshua Ferris, *Then We Came to the End*; Dinaw Menegstu, *The Beautiful Things This Heaven Bears*; and Dana Spiotta, *Eat the Document: A Novel*. We'll also view excerpts of television shows, movies, and other media, as well as attend some campus literary events. Required work: two short essays, midterm, final, occasional quizzes.

**AMST 30241. Homeland Security: Surveillance, Terror, and Citizenship in America**

(3-0-3) Irving

This course explores the relationship between popular myths about the American experience and the actual experience of marginalized subjects in American society. It serves to make concrete a theoretical discussion of citizenship in the context of American Individualism and explores the relationships among social stratification, institutional coercion, and national narratives. As along view of the last century, Homeland Security considers old forms of terror and surveillance evident in African American literature that anticipates and mimics the fear and anxiety in the nation after September 11. We will consider themes such as space, place, border, home, community, protection, and nationalism. The literature and critical essays under consideration straddle regional, class, gender, and social boundaries to facilitate our understanding of how African Americans within the nation create narratives of cultural fragmentation, exile, and alienation. In the process, we will explore the condition of African American migration—from early-20th-century movements to urban centers, to early-21st-century migrations as a result of Katrina—and consider the way mobility may inform new landscapes of hope and displacement. Some of the texts we will read are *Passing*, *The Street*, *Invisible Man*, *I Know Why the Caged Bird Sings*, *The Color Purple*, and *Eva's Man*. These texts may be considered counter-narratives in the way that they stress exploitation, failure, disillusionment, and exile, but they intervene in formative debates about how to define a national identity and, to echo Langston Hughes, they, too, sing America. Course requirements: one oral presentation (15 percent); three 2-page response

papers (10 percent each); one paper proposal; one 10–12 page essay (35 percent); and class participation (20 percent).

### AMST 30242. Literature of Sport

(3-0-3) Benedict

Sports and athletics have held prominent roles in human societies since the beginnings of civilization. Across centuries, nation states have used athletic competition for a variety of purposes, from paying homage to distant gods to demonstrating superiority over neighboring tribes/cultures. And the individuals, the “warriors” who excel on those “fields of battle” are venerated as heroes, champions, and “gods.” In this course, we’ll look at a variety of literature (fiction, nonfiction, poetry, film, broadcasts of athletic events, etc.) related to sports and athletics. From depictions of wrestlers on temple walls in Ancient Egypt to Grantland Rice’s *New York Herald Tribune* “Four Horsemen” article to podcasts of ESPN’s *SportsCenter*, our investigation of the literature of sport will cover a range of topics—race, gender, class, globalization, and the purposes and functions of athletic competition, to name a few—including the rise of the “super star” athlete as a “god.” Required work: quizzes, two essays, midterm, final examination.

### AMST 30244. The Real Contemporary Novel: American Fiction 2000–Present

(3-0-3) Hess

Many “contemporary fiction” classes conclude with works published around the time that you were born in the mid- to late-1980s. This course focuses on novels published during the decade in which you are living and examines the interpretive difficulties raised by such works. Without being able to rely on an established history of scholarly criticism or their place among the so-called “great books” of civilization, the reader of contemporary novels must actively consider why these works are worth studying, as well as how they function. The major aims of this course are to introduce you to these exciting novels and to provide you with the critical and interpretive framework for determining what contemporary literature is and why it matters. We will focus on eight novels and novellas examining the intersections between self and society and between literary art and the popular cultures of film, television, hip-hop, rock, and comic books. Readings include novels and novellas by Paul Auster, Don DeLillo, Dave Eggers, Jonathan Safran Foer, Nicole Krauss, Jonathan Lethem, David Markson, and Toni Morrison. The course also includes a screening of the film adaptation of Foer’s *Everything is Illuminated*. Because this course is intended for non-majors, each unit will include introductions to the basic tools of literary study, including close reading, how to write a literary argument, how to incorporate secondary criticism and theory, and the basic principles of film and television. Course requirements include two 5–7-page papers and one 7–10-page paper.

### AMST 30245. Chicago in Words

(3-0-3) Thorpe

Early 20th-century Chicago was famous for its railways and stockyards, jazz, and gangsters. The city saw the creation of great industrial fortunes and the birth, in 1905, of the Industrial Workers of the World. The literature taken up in this class brings the dynamic contradictions of the Chicago experience to life. We will look at work by Jane Addams, Nelson Algren, Sherwood Anderson, Gwendolyn Brooks, John Dos Passos, Carl Sandburg, Upton Sinclair, Theodore Ward, and Richard Wright, covering a range of literary expression from impassioned journalism, to poetry, novels, and drama. We will consider the relation of modernism to realism. We will look at the ways in which Chicago capitalism altered nature, challenged traditional forms of identity, and created new forms of urban community. We will spend a week exploring Chicago’s jazz and blues, while we will also look at the 1932 gangster film *Scarface*, screenplay by Chicago journalist and Oscar winner Ben Hecht. Chicago is a city of tremendous vitality and shocking brutality that has reinvented itself time and again, and the writers we will read have taken up this task of urban invention with a shared urgency and a wide range of voices. Course requirements: Active class participation, short response papers, creative responses (poems), a class presentation of a scene from *Big White Fog* by Theodore Ward, and an 8–10 page paper.

### AMST 30246. American Novel

(3-0-3) Staud

We will read, discuss, and study selected novels of significant importance within the American literary tradition. As we explore these novels within their historical and cultural context, we will consider the various reasons for their place within the canon of American literature. Indeed, we will scrutinize the very nature of this literary canon and self-consciously reflect on the inevitably arbitrary nature of this, or any reading list. Even so, we will see, I hope, that these authors share deep engagement with ideas and themes common to American literature and do so, through their art, in ways that both teach and delight. Required Texts: *Moby-Dick*, *The Adventures of Huckleberry Finn*, *The Awakening*, *The Great Gatsby*, *Invisible Man*, *The Old Man and the Sea*, *The Bluest Eye*.

### AMST 30247. God and Evil in Modern Literature

(3-0-3) Werge

A study of selected modern writers whose concern with God and evil, faith and despair, and the reality and significance of suffering animates their writings.

### AMST 30248. Twentieth-Century American Drama

(3-0-3) Ulin

This class is designed to fulfill the University’s literature requirement. It will focus on key works of modern and contemporary American drama from three plays by Eugene O’Neill (*Desire Under the Elms*, *The Iceman Cometh*, *Long Day’s Journey into Night*) to Nilo Cruz’s Pulitzer Prize winning 2003 play *Anna in the Tropics*. In addition to critical readings and selected European plays on reserve, focal playwrights include Edward Albee, Sam Shepherd, Paula Vogel, Amiri Baraka, Luis Valdez, David Mamet, August Wilson, Josefina López, Yellow Robe, Anna Devere Smith, Eve Ensler, and Moisés Kaufmann. Requirements will include group staged scenes, journal entries on selected plays, and three 4-page papers. In addition, students are required to attend one campus play over the course of the semester and write a written critique of the production and performance.

### AMST 30249. American Modernism

(3-0-3) Johnson-Roullier

Discussions of the late-19th-, early -20th-century literary and cultural movement of modernism often center on those qualities of the movement described in the work of early modernist literary critics, such as Harry Levin or Edmund Wilson. Such examinations emphasize the modern movement’s experiments in form, structure, linguistic representation, characterization, etc., while paying much less attention to the role of the modernist movement in the larger context of a given culture. In this course, we will explore the significance of the modern movement from the perspective of American culture, as well as the manner and meaning of American literary participation in the movement. To that end, we will consider not only the work of authors generally accepted as modernists, such as F. Scott Fitzgerald, Ernest Hemingway, and Gertrude Stein, but also the role of authors such as Sherwood Anderson and Waldo Frank, of the early Chicago Renaissance (1910–25), and a number of authors from the Harlem Renaissance. We will examine the work of these authors not only in the context of modernism, but also as it relates to many issues of the day, including progressivism, primitivism, race and ethnicity, immigration, cosmopolitanism vs. regionalism, and the importance of the vernacular, in addition to the question of “American-ness” and its importance to an understanding of American literature during this time. Considering these different vantage points in American literary modernism, we will try to imagine the contours of “American modernisms,” and draw some conclusions about their significance within the larger modernist context. In so doing, we’ll seek to arrive at a more comprehensive, more nuanced perspective on the meaning of the modern in American literature and culture. Course Texts: Edith Wharton, *Age of Innocence*; Willa Cather, *O Pioneers!*; Sherwood Anderson, *Dark Laughter*; Waldo Frank, *Holiday*; Theodore Dreiser, *Sister Carrie*.

### AMST 30300. Latino/a History

(3-0-3)

This is an interdisciplinary history course examining the Latino experience in the United States after 1848. We will examine the major demographic, social,

economic, and political trends of the past 150 years with an eye to understanding Latino/a America. Necessarily a large portion of the subject matter will focus on the history of Mexican Americans, and Mexican immigrants in the Southwest, and Midwestern United States, but we will also explore the histories of Puerto Ricans, Cubans, and Latin Americans within the larger Latino/a community. Latinos are U.S. citizens, and the course will spend significant time on the status of these groups before the law and their relations with the state, at the federal, local, and community level. To explore these issues within the various Latino communities of the United States, we will explore the following key topics: historical roots of “Latinos/as” in the United States; the evolution of a Latino/a ethnicity and identity within the United States; immigration, transmigration, and the shaping of Latino/a communities; Latino/a labor history; segregation; civil rights; nationalism and transnationalism; the Chicano Civil Rights Movement; Latinos in film; and post-1965 changes in Latino/a life.

### **AMST 30301. Violence in U.S. History**

(3-9-3)

In the late 1960s, black militant H. Rap Brown exclaimed, “Violence is as American as apple pie.” It might be said that the purpose of this entire course will be to evaluate the truth of Brown’s statement. This will be accomplished in two ways: first, by surveying of some of the major episodes and themes of violence in American history, from its colonial origins through contemporary foreign policy and domestic debates; and second, by assessing the meaning of that violence as it simultaneously reflects and shapes American society, culture, and values. This course will include significant reading and writing components, as well as a group project.

### **AMST 30302. Era of U.S. Civil War 1846–77**

(3-0-3)

In the mid-19th century, the American political system collapsed. Divergent visions of the American ideal plunged North and South into the bloodiest war in the Republic’s history. This lecture course examines the roots of the nation’s sectional division, the disintegration of mechanisms for political compromise, the structures and policies of the wartime Confederate and Union governments, the strategic conduct of the armed conflict, the societies at war, and the Union’s first hesitant steps toward reconstruction and recovery.

### **AMST 30303. African American History I**

(3-0-3)

This course is a survey of the history of African Americans, beginning with an examination of their West African origins and ending with the Civil War era. We will discuss the 14th and 15th centuries, West African kingdoms, forms of domestic slavery and West African cultures, the Atlantic slave trade, early slave societies in the Caribbean, slavery in colonial America, the beginnings of African American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery and resulting sectional disputes, and the significance of “bloody Kansas” and the Civil War.

### **AMST 30304. U.S. Presidents: FDR to Clinton**

(3-0-3)

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

### **AMST 30305. British-American Intellectual History, 1650–1900**

(3-0-3)

A survey of the intellectual history of Britain and English-speaking America from around 1600 to the mid-19th century, including European backgrounds and contexts. Emphasis on writings about religion, government, natural science, education, and human nature.

### **AMST 30306. Women and American Catholicism**

(3-0-3)

The course is a survey of women and religion in America during the 19th and 20th centuries. Among others, we will consider the following themes: how religion

shaped women’s participation in reform movements such as abolition, temperance, and civil rights; how religious ideology affected women’s work, both paid and unpaid; the relationship of religion, race, and ethnicity in women’s lives; female religious leaders; and feminist critiques of religion. We will examine women’s role within institutional churches in the Protestant, Catholic, and Jewish traditions, as well as raise broader questions about gender and religious belief. How did religious belief affect women both as individuals and in community? How could religion be used to both reinforce and subvert prevailing gender ideology? Course requirements include a midterm and final examination, several short writing assignments, and a final paper (10–12 pages) on a subject of the students’ choice.

### **AMST 30307. Fashioning Identity in American History**

(3-0-3)

This course will focus on dress and material/visual culture in colonial North America. It will introduce methodology, and offer an overview of key themes in the history of dress and consumerism within the framework of gender studies. In our focus on the colonial period (especially in the 18th century), we will analyze the economics of dress (the production, marketing, and acquisition of cloth and clothing) and will assess the importance of fashion and commerce and politics. We will evaluate the role of dress in the construction of colonial identities, and we will examine the ways that dress operated as a visual locus for racial, class, and ethnic encounters.

### **AMST 30308. Women and Religion in U.S. History**

(3-0-3)

The course is a survey of women and religion in America during the 19th and 20th centuries. Among others, we will consider the following themes: how religion shaped women’s participation in reform movements such as abolition, temperance, and civil rights; how religious ideology affected women’s work, both paid and unpaid; the relationship of religion, race, and ethnicity in women’s lives; female religious leaders; and feminist critiques of religion. We will examine women’s role within institutional churches in the Protestant, Catholic, and Jewish traditions, as well as raise broader questions about gender and religious belief. How did religious belief affect women both as individuals and in community? How could religion be used to both reinforce and subvert prevailing gender ideology?

### **AMST 30309. U.S. Labor History**

(3-0-3)

This course will examine the history of paid and unpaid labor in the United States from colonial times to the near present. We will seek to understand how working people both shaped—and were shaped by—the American Revolution, the debates over slavery and free labor culminating in the Civil War and Reconstruction, the rise of big business, the creation of a national welfare state, the Cold War-era repression of the Left, and continuing debates over the meanings of work, citizenship, and democracy. Throughout the course, we will devote considerable time to the organizations workers created to advance their own interests, namely the labor movement. We will also pay special attention to the complicated yet crucial connections between work and racial and gender identities. Specific topics may include slavery, farm labor, women’s domestic work, trade unions, questions of industrial democracy, the role of radicalism, and the challenges confronting workers in the current era of corporate globalization and anti-sweatshop activism.

### **AMST 30310. American Peace Movement Since World War II**

(3-0-3)

This course examines the emergence of the modern American peace movement between the two World Wars and its development in the Nuclear Age since World War II. It examines the shifting patterns of support for the peace movement, the curious ways Americans have searched and worked for peace, and some of the important peace groups and leaders.

### **AMST 30311. Survey of African American History II**

(3-0-3)

*Corequisite:* HIST 32800

This course will survey the history of African Americans from 1865 to 1980. Specifically, this course will focus on the problems of Reconstruction in the South

after the Civil War, the adjustments and reactions of African Americans to freedom, the economic exploitation of sharecropping, northern black communities at the end of the 19th century, the migration of black Southerners to northern urban areas, black political leadership, the Civil Rights Movement, current examples of institutional racism, and affirmative action in America.

### AMST 30312. The United States Since WWII

(3-0-3)

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of Ronald Reagan. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this postwar era, and the presidencies of Jimmy Carter and Ronald Reagan.

### AMST 30313. U.S. Gilded Age/Progressive Era

(3-0-3)

Through discussion and lectures, students examine the emergence of a recognizably modern United States. Topics examined will include the emergence of the corporation, progressive reforms, the changing contours of American religion, the character of the New South, the battle for women's suffrage, developments in the arts, and American involvement in the First World War.

### AMST 30314. Jacksonian United States: Political/Cultural/Social

(3-0-3)

This course examines the myths and realities of media in the American past and present, paying particular attention to the ways in which old media and new have combined to change our lives, and the ways different groups of Americans have used various media to make history.

### AMST 30315. American Political Traditions since 1865

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy's character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation, which also constitute an important part of political history. The course will begin with discussion of the character of Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

### AMST 30316. U.S. Foreign Policy Since 1945

(3-0-3)

This course covers the main developments in American foreign policy from World War II through the Bush presidency. The principal topics of investigation will be wartime diplomacy and the origins of the Cold War; the Cold War and containment in Europe and Asia: Eisenhower/Dulles diplomacy; Kennedy-Johnson and Vietnam; Nixon-Kissinger and detente; Carter and the diplomacy of Human Rights; Reagan and the revival of containment; Bush and the end of the Cold War.

### AMST 30317. Southern History, 1876 to the Present

(3-0-3)

This survey relies on cultural, social, and political analysis to develop an understanding of the region and its identity. Circumstances and events unique to the South will be evaluated in context of the common experiences of the United States.

### AMST 30318. Race in American Culture

(3-0-3)

Although it seems counterintuitive, a person's race is not a biological fact, but, rather, a socially constructed idea. However, for all its genetic invisibility, race and racial identity have produced visible consequences for people in the United States. This class will examine why race has played such an important role in American culture from 1877 to the present. Throughout this class, we will examine how race and racial identity have come to define the legal, social, and economic status of American men and women. The requirements for this class include a midterm, final, and a paper.

### AMST 30319. Environmental History

(3-0-3)

This course is an introduction to the new field of environmental history. In recent decades, historians have begun to actively explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course of history: the effects of the distribution of water, wood, and minerals and of changes in climate or endemic disease. This course ranges widely in methodology from the history of ideas to paleoclimatology, geographically from the ancient Near East to modern America, topically from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th-century American West.

### AMST 30320. U.S.-Native American Relations: Revolution to Removal

(3-0-3)

Native Americans in the Eastern United States remain obscure in the historical imaginations of most Americans. Theirs is not the story of riding horseback across rolling plains, hunting buffalo, or shooting at John Wayne in movies about the Old West. Neither are the romanticized tales of suffering like in the *Trail of Tears* their only American experience. Theirs is rather the story of persistence through change in their ever-shrinking, yet increasingly crowded, woodland homes. This course is designed to expose students to the peoples of the Trans-Appalachian West—in particular, how they initiated, engaged, manipulated, and/or accommodated the policies, practices, and presence of the Euro-Americans and United States, from European colonization to the 1840s.

### AMST 30321. Environmental History

(3-0-3)

This course is an introduction to the new field of environmental history. While many people think “The Environment” suddenly became important with the first “Earth Day” in 1970 (or a few years earlier), environmental issues have, in fact, long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course history: the effects of the distribution of water, foodstuffs, wood, minerals, and of changes in climate or endemic disease. This course will range widely—in methodology from the history of ideas to paleoclimatology, geographically from the ancient near east to modern America, and topically from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th-century American west. Lecture/discussion format.

### AMST 30322. Colonial America

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th century to the 18th century. It examines the process of

colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Indians, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of English North America.

### **AMST 30323. American Legal History**

(3-0-3)

This seminar style course deals with the interaction between the legal system and social change in the United States from the 1600s to the 1980s. Primary emphasis is given to the 19th century and 20th century, two periods where American legal culture took on much of its fundamental character and adjusted to significant social change. Main themes include the relationships between law and development; individual rights in the public and private spheres; the development of the legal profession; the post-New Deal state; and the various U.S. “rights” movements. Reading consists of primary sources documents and a short survey text. Grades will be based on a series of short papers and classroom discussion. Prior knowledge of American history is helpful but not required.

### **AMST 30324. History of the American West**

(3-0-3) Coleman

Few American regions have generated as many cultural narratives, myths, and icons as the trans-Mississippi West. This course takes both the reality and the romance of the West seriously, asking students to examine how the American conquest of the West inspired storytelling traditions that distorted and shaped the region’s history. To get at this interaction, we will read novels, histories, and first-hand accounts, as well as view several Hollywood westerns. The class is reading and discussion intensive. Students will write several short papers as well as a longer final essay.

### **AMST 30325. U.S. Foreign Policy to 1945**

(3-0-3) Miscamble

This course covers the main developments in American foreign relations from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in the two world wars. A recurring theme will be the major traditions in America foreign policy and the ways in which these traditions influenced policy makers in the early years of the “American Century.”

### **AMST 30327. American Political Traditions Since 1865**

(3-0-3)

Students will investigate the political debates—and simultaneous examinations of democracy’s character—that have animated American reformers and intellectuals since the Civil War. The focus will be on these political traditions, not the studies of voter behavior or policy implementation that also constitute an important part of political history. The course will begin with discussion of the debate over slavery and Reconstruction, and move through the “social question” of the late 19th century, Progressive reform in the early 20th century, the New Deal, the origins of modern conservatism, and various post-World War II social reform movements. Readings will include court cases, memoirs, speeches, and a sampling of the philosophical and historical literature.

### **AMST 30328. American Intellectual History I**

(3-0-3)

This lecture course will survey major developments in American thought from the first English contacts with North America to the mid-19th century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our own ways of thinking. Especially in the first weeks of the course, European backgrounds will also receive attention. Students will write a midterm and a final exam, as well as a 10-page research paper.

### **AMST 30329. Sport in American History**

(3-0-3) Soares

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse-racing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of race, gender, and class. Given Notre Dame’s tradition in athletics, we will explore the University’s involvement in this historical process.

### **AMST 30330. Morality and Social Change in U.S. History**

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war and citizenship, and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

### **AMST 30331. U.S. Civil War and Reconstruction, 1848–77**

(3-0-3) Przybylszewski

This course examines the social, political, and cultural history of the United States from the ratification of the Constitution to the beginnings of the political crisis over expansion and slavery. It covers the democratization of politics and the problems of national independence in the wake of the Revolution; territorial expansion; economic change; the development of regional, class, religious, racial, ethnic, and gendered subcultures; slavery and resistance to slavery; and the new political and reform movements that responded to the era’s deep and lasting changes.

### **AMST 30332. Crime, Heredity, and Insanity in American History**

(3-0-3)

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

### **AMST 30334. U.S. Civil War Era**

(3-0-3)

Arguably, the study of the American Civil War is a suitable training ground for novice historians, for traditionally, a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the War, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

**AMST 30335. The United States Since WWII**

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1945 through the presidency of George H.W. Bush. Although the military and diplomatic history of World War II will be considered by way of background, the principal topics of investigation will be the Fair Deal Program of President Truman, the Cold War, the Korean Conflict, the Eisenhower Presidency, the New Frontier, Vietnam, President Johnson's Great Society, the Civil Rights Movement, the Nixon years, the social and intellectual climate of this post-war era, and the presidencies of Gerald Ford through George H.W. Bush. There will be a required reading list of approximately six books, two smaller writing assignments, and three examinations.

**AMST 30336. Mexican American History**

(3-0-3) Rodriguez

*Corequisite:* HIST 32621

This course is an introductory survey of Mexican American history in the United States. Primarily focused on events after the Texas Revolution and annexation of the American Southwest, we will consider the problems the Spanish and Mexican settlers faced in their new homeland, as well as the mass migration of Anglo-Americans into the region following the annexation. Throughout the course, we will explore the changing nature of Mexican American U.S. citizenship. Other themes and topics examined will include immigration, the growth of agriculture in Texas and California, internal migration, urbanization, discrimination, segregation, language and cultural maintenance, and the development of a U.S.-based Mexican American politics and culture. Although primarily focused on the American Southwest and California, this course also highlights the long history of Mexican American life and work in the Great Lakes and Midwestern United States. We will conclude with the recent history of Mexican and Latin American migration to the United States after 1965, and the changing nature of Mexican American identity and citizenship within this context.

**AMST 30337. History of American West**

(3-0-3)

Few American regions have generated as many cultural narratives, myths, and icons as the trans-Mississippi West. This course takes both the reality and the romance of the West seriously, asking students to examine how the American conquest of the West inspired storytelling traditions that distorted and shaped the region's history. To get at this interaction, we will read novels, histories, and first-hand accounts, as well as view several Hollywood westerns. The class is reading- and discussion-intensive. Students will write several short papers as well as a longer final essay.

**AMST 30338. Morality and Social Change in U.S. History**

(3-0-3)

How do we explain sweeping moral changes in society? Why did so many people support legal slavery for so long, and what motivated others to turn against it? What is the relationship between social change and moral theory? The purpose of this class is to examine the moral frameworks that Americans have used to understand—and to change—their society. We will focus on hotly debated issues in American history, looking at the way that Americans thought about issues such as slavery, animal cruelty, sex, family roles, labor, economics, war, and citizenship and civil rights. We will look at both sides of debates to understand the values and beliefs that shaped traditions of social change and resistance to that change.

**AMST 30339. Sport in American History**

(3-0-3) Soares

Sport, a major part of American entertainment and culture today, has roots that extend back to the colonial period. This course will provide an introduction to the development of American sport, from the horse-racing and games of chance in the colonial period through to the rise of contemporary sport as a highly commercialized entertainment spectacle. Using a variety of primary and secondary sources, we will explore the ways that American sport has influenced and been influenced by economics, politics, popular culture, and society, including issues of

race, gender, and class. Given Notre Dame's tradition in athletics, we will explore the university's involvement in this historical process.

**AMST 30340. U.S. Environmental History**

(3-0-3)

This course is an introduction to the new field of environmental history. While many people think "The Environment" suddenly became important with the first "Earth Day" in 1970 (or a few years earlier), environmental issues have, in fact, long been of central importance. In recent decades historians have begun actively to explore the past sensibilities of various groups toward the quality of their air, water, and land; the passionate discussions of philosophers, theologians, and social and natural scientists about resource use, the safety of the environment, and long-term prospects for humanity; and the customs, laws, and managerial systems that guided use of the environment. Historians have also increasingly paid attention to the ways environmental factors have affected the course history: the effects of the distribution of water, foodstuffs, wood, minerals, and of changes in climate or endemic disease. This course will range widely—in methodology from the history of ideas to paleoclimatology, geographically from the ancient near east to modern America, and topically from wood-cutting rights in medieval France to the rise of the organic farming movement and water-allocation laws in the 20th-century American west. Lecture discussion format.

**AMST 30341. African American History II**

(3-0-3)

*Corequisite:* HIST 32800

This course examines the broad range of problems and experiences of African Americans from the close of the American Civil War to the 1980s. We will explore both the relationship of blacks to the larger society and the inner dynamics of the black community. We will devote particular attention to Reconstruction, the migration of African Americans from the rural south to the urban north, and the political machinations of the African American community. We will also examine the political impact of cultural exhibitions. The course will utilize historical documents in the form of primary sources, scholarly articles, and other secondary sources. Classes will be conducted as lecture-discussions. Students enrolled in HIST 30800 must also take HIST 32800, a tutorial.

**AMST 30342. U.S. Foreign Policy Since 1945**

(3-0-3)

This course offers an overview of U.S. foreign policy since World War II, focusing on the major crises and conflicts that have occurred since then: United States and Soviet Union, Korea, Vietnam, Gulf War, and Kosovo.

**AMST 30344. American Intellectual History II**

(3-0-3)

This lecture course will survey major developments in American thought from the later-19th century to the end of the 20th century. Emphasis will fall on ideas about religion, society, politics, and natural science and on the institutions and social contexts of intellectual life, with an eye toward understanding the roots of our present ways of thinking.

**AMST 30345. Twentieth-Century American Military Experience**

(3-0-3)

Is America, as historian Geoffrey Perret contends, a "country made by war"? Regardless of one's opinion, a systematic study of America's wars is essential to either confirm or refute the above statement and obtain a more complete understanding of the nation. There have certainly been ample historical occurrences to support Perret's assertion over the last century, and this course will investigate the validity of the question by examining the modern American military experience from after the Franco-Prussian War of 1871 to the present. We will explore the causes, conduct, and consequences of the major military conflicts of the 20th century in which the United States was involved or that had a significant impact on the United States, using traditional historical materials. We will also read several battlefield memoirs to further examine the conflicts at the tactical level and also explore the human dimension of war. Using a fundamental thesis to address war at the political, strategic, operational, and tactical levels, the goal of the course

will be to gain a better understanding of the relationship among the different levels as well as the importance of each. As a part of their discovery process, students will take three essay exams and write a research paper assessing the combat effectiveness of a particular unit that existed during this period to assist them in determining, developing, and delivering a response to Perret's statement.

### **AMST 30348. U.S. South Since 1865**

(3-0-3)

Popular notions of the South tend to portray it as a region lost in time, trapped within backwards traditions and a hostile view of the modern world. Yet, no region of the country has experienced such sweeping social, cultural, and economic changes as the American South between the Civil War and the 1980s. Over the course of that period, southerners witnessed rapid economic transformation from plantation economy to Sunbelt industrialism; the rise and fall of Jim Crow and the tremendous racial strife that accompanied these changes; a literary flourishing brought on by what writers called the region's unique sense of tragedy and loss; the movement of southern folk life away from the farms and mill towns into urban areas; and the rising appeal of southern politics and culture to a larger national community in the modern day. This course will examine these and other developments in the context of American history, casting a comparative eye toward how other societies have sought to embrace modernization while clinging to a variety of traditions, real and imagined.

### **AMST 30350. Technology of War and Peace**

(3-0-3)

This course surveys the impact of military technologies on world history from the 16th century onward. Topics include the rise of gunpowder weaponry and the fortification revolution in the early modern period, navalism, particularly in the 19th century, the role of military technologies in European colonial expansion, and the science-based military of the 20th century, chemical and biological (and so-called "soft-kill") weapons, leading up to the age of nuclear weapons. The course considers also military technologies as deterrents, military technologies as expressions of culture, and the issue of warfare as a stimulus to technological development.

### **AMST 30351. U.S. Civil War Era**

(3-0-3) DeGruccio

Arguably, the study of the American Civil War is a suitable training ground for novice historians, for traditionally, a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the War, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

### **AMST 30352. The United States, 1900–45**

(3-0-3) Blantz

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. Major topics will include the background for Progressive reform, the New Nationalism and New Freedom administrations of Theodore Roosevelt and Woodrow Wilson, the diplomacy of the early 20th century, the causes and results of World War I, the Republican administrations of the 1920s, the New Deal administration of Franklin D. Roosevelt, isolationism and neutrality in the inter-war period, and the American home front during World War II. There will be a required reading list of approximately seven books, two shorter writing assignments, and three major examinations, including the final.

### **AMST 30353. Women and American Catholicism**

(3-0-3)

This course is a survey of the history of American Catholic women from the colonial period to the present. Through a combination of lectures, reading, and

discussion, we will explore the following themes and topics: the role of religious belief and practice in shaping Catholics' understanding of gender differences; the experience of women in religious communities and in family life; women's involvement in education and social reform; ethnic and racial diversity among Catholic women; devotional life; the development of feminist theology; and the emergence of the "new feminism" as articulated by Pope John Paul II. We will seek to understand how Catholic women, both lay and religious, contributed to the development of Church and nation, and examine how encounters with the broader American society have shaped Catholic women's relationship to the institutional church over the last three centuries.

### **AMST 30356. American Religious History**

(3-0-3)

This course will examine religion in American life from the encounter between Europeans and Native Americans in the 16th century to the present. We will explore the ways in which religion has shaped American society, culture, and politics, and in turn, how the U. S. setting has shaped religious expression. Themes will include the rise of religious diversity and ideas of religious freedom; the interactions between the American religious "mainstream" and minority religious traditions; the relationship between religion in the United States and its international setting; and the diversity and persistence of religion in American culture.

### **AMST 30358. African American History to 1877**

(3-0-3)

This African American history survey begins with an examination of West African origins and ends with the Civil War era. We will discuss the Atlantic slave trade, slavery in colonial America, the beginnings of African American cultures in the North and South during and after the revolutionary era, slave resistance and rebellions, the political economy of slavery, and resulting sectional disputes. Particular attention will be paid to northern free blacks.

### **AMST 30359. Sex, Sexuality, and Gender in the United States to 1900**

(3-0-3)

Sexuality, like other areas of social life, has a history. Yet, historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions' attitudes toward sexuality (the Puritans were not anti-sex!); how different cultures' views of sex shaped relations between colonists and Indians; why sex was an important factor in establishing laws about slavery in Virginia; birth control and abortion practices; changing patterns of courtship; men who loved men and women who loved women; and why the average number of children in American families fell by 50 percent between 1790 and 1890. Over the course of the semester, students will also design a small research proposal on some aspect of the history of American sexuality before 1890. Written assignments will include a weekly journal, midterm and final examinations; a book review; and a small research project.

### **AMST 30360. American Intelligence I**

(3-0-3)

The first half of a two-semester sequence surveying the American intellectual history.

### **AMST 30361. U.S./ Presidents, FDR to Clinton**

(3-0-3)

A study of the personalities, style, policies, and performances of American presidents from Franklin D. Roosevelt to Bill Clinton as they developed the modern American presidency and made it the most important elective office in the world.

**AMST 30362. Labor and America Since 1945**

(3-0-3) Graff

This course explores the relationship between workers and the labor movement to American politics and culture since 1945. The United States emerged from World War II as the strongest global power, and its citizens subsequently enjoyed a long postwar economic boom that created what we might call the first truly middle-class society in world history. At the heart of that new society was the American labor movement, those unions like the United Auto Workers and the United Steel Workers who ensured that at least some of the postwar profits made it into the wallets of workers and their families. Today, however, unions represent only 8 percent of workers in the private sector. What accounts for the decline of organized labor since the 1950s? What has the decline of the labor movement meant for workers specifically, and the American economy and politics more broadly? How and why have popular perceptions of unions changed over time? What has been the relationship of organized labor to the civil rights movement, feminism, and modern conservatism? What is “globalization,” and what has been its impact upon American workers and their unions? Through an exploration of historical scholarship, memoirs, polemical writings, and Hollywood films, this course will try to answer these questions. Students interested in politics, economic development, international relations, social justice, human rights, peace studies, or mass culture are particularly welcome.

**AMST 30363. Imagining America: Encounters, Expectations, and Perceptions in Early America**

(3-0-3)

The European encounter with America brought the peoples of Africa, America, and Europe into close contact and intertwined their fates. What happened to Europeans’ conceptions of the world and their place in it as they became aware of the existence of America? How did they view the land and the peoples of Africa and America? Conversely, how did the Africans and the Indians perceive the Europeans? This course surveys the responses of Africans, Indians, and Europeans to the social, economic, and intellectual changes wrought by their mutual encounter from their first contact to the 18th century. Europeans projected their best hopes and worst nightmares on to the New World. Some imagined it to be a paradise populated by noble savages. Others believed Indians and Africans were barbaric pagans, devoid of humanity. The close contact between Europeans, Africans, and Indians prompted new discussions of the differences between what we now call “races.” Many Europeans came to the Americas for economic profit. Yet others saw the new world as a mission field or a land in which they could build a new, pristine, Christian civilization, free from the corruptions of Europe. The course will be divided into three broad categories: empire, anthropology, and religion.

**AMST 30364. Early American Empires**

(3-0-3)

Between 1400 and 1750, a fierce battle for empire was waged between and among the Spanish, French, and British nations and the peoples they sought to control, particularly Africans and Amerindians. The result of this fateful encounter would determine the political, economic, cultural, racial, and ecological character of what became the United States of America. Students will engage with this momentous event in several ways: through select readings in the theoretical and historiographical literature; by using primary sources written by the colonizers and the colonized; and by reading important secondary works. The themes we will explore include: the symbols used by the various empires to establish rights to the land; the different patterns of settlement; the various European interactions with Africans and Amerindians; the effect that contestants for empire had upon the land; and the response of Africans and Amerindians to European attempts at subjugation.

**AMST 30365. Religion and American Politics**

(3-0-3)

Since the early 1950s, religion has been an obviously major factor in American political life, driven first by the African American leaders of the Civil Rights Movement and then, in more recent decades, by the concerns of the religious right. Especially after the election of John F. Kennedy in 1960, Catholics have also

been fully recognized participants in the nation’s political uses of religion—as well as in debates over whether and how religion should be used politically. This class tries to show that modern political-religious connections are but new instances of what has always gone on in the American past. The shape of contests over religion and politics may have changed considerably over time, but not the fact of dense connections between the two spheres. Readings for the course include primary and secondary accounts that treat notable incidents, problems, debates, and controversies from the colonial period to the present. Lectures spotlight major issues of historical interpretation, like religion and the Constitution, religion and antebellum debates over slavery, religion and Reconstruction, Catholic versus Protestant understandings of liberty, civil rights and the New Christian Right.

**AMST 30366. Consumerism in Twentieth-Century United States**

(3-0-3)

By 1900, the development of mass production made the possibility of consumption for private enjoyment available to increasing numbers of Americans. This course will explore the creation of contemporary consumer culture beginning with the advent of mass production and mass marketing in the 19th century, including the rise of advertising and the growth of department stores. We will then examine how the ideas and institutions associated with consumerism changed throughout the 20th century during times of depression, war, and into the present. Additional topics will include how consumers have used consumption to fashion individual and group identities, as well as how American have embraced or challenged consumerism over time.

**AMST 30367. New U.S. Nation, 1787–1848**

(3-0-3) Grow

This course examines the social, political, and cultural history of the United States from the ratification of the Constitution to the beginnings of the political crisis over expansion and slavery. It covers the democratization of politics and the problems of national independence in the wake of the Revolution; territorial expansion; economic change; the development of regional, class, religious, racial, ethnic, and gendered subcultures; slavery and resistance to slavery; and the new political and reform movements that responded to the era’s deep and lasting changes.

**AMST 30369. African American Women’s History**

(3-0-3)

This course will trace the cultural, economic, and political history of African American women in the United States from slavery to the present. Through a combination of books, primary sources and film we will explore how African American women have addressed what is referred to as the “double burden” of sexism and racism while seeking to define their own identities as individuals, wives, mothers, workers and citizens. Major themes will include labor, family, social movements, and civil rights.

**AMST 30372. Medicine and Public Health in U.S. History**

(3-0-3)

This course examines health as a unifying concept in American history. It follows several themes: how class, race, and gender—as well as age, lifestyle, and place—have manifested themselves in differential health experience; the ongoing conflict between personal liberty and the interests of the state, the remarkable diversity of American medical systems and their close relation to religious and social diversity; the place of medicine in Americanization campaigns; the changing political economy of American medicine; and finally, the emergence of health as the core concern of the American Dream. In short, by the end of the course, you should have a good understanding of the uniqueness of American medicine and its central place in America’s history. You should have acquired an historical and critical context that will be of use in your own encounters with matters of health and medicine—as intelligent citizens and about issues of public health and questions of medical ethics, and as creative thinkers, about more satisfactory modes of medical practice and health improvement and protection. The course will use three to five texts, and require exams, project, and presentation.

**AMST 30373. The American Revolution**

(3-0-3) Slaughter

*Corequisite:* HIST 32602

When speaking of the American Revolution, many writers reach for a comment made by John Adams in 1818 that, “[T]he Revolution was effected before the war commenced. The Revolution was in the minds and hearts of the people . . . .” Whether this assertion is true historically or not, it still does not adequately describe what that revolution was. The American Revolution obviously had its political elements, primarily the formation of the United States. To reach its political goals, military means were necessary. Without a successful war for independence, there would have been no revolution. To leave matters there, however, would be insufficient. A fuller understanding of the revolution would need to address how it affected the whole spectrum of American life. It would consider the revolution as a social movement that challenged the political and social hierarchies of the day. It would also ask how the revolution affected those who were not white males, especially women, slaves, and Native Americans. Without considering the possible negative implications of the revolution, any telling would be incomplete. This class will take up these challenges and attempt to make a full-orbed presentation of the events surrounding the American Revolution. It will introduce students both to elites and to those whom the popular narrative glosses over. It will attempt to count the losses, as well as the gains, which flowed from the move to independence from Britain. Finally, it will attempt to describe the many changes through this period, which resulted, not only in a new political nation, but in a new society and culture—changes that in varying degrees are still with us today and of which contemporary Americans are the inheritors.

**AMST 30374. Caribbean Historiography**

(3-0-3) Hauser

This class will introduce students to major events in Caribbean histories and the various ways in which these histories have been represented. This course will present a picture of the Caribbean very different from that held by many North Americans. For 500 years, this region has been the site of encounters and clashes among Native Americans, Europeans, Africans, and Asians. For three centuries, Europe’s leading states fought each other to control these islands, which were the most valuable real estate in the Atlantic world. At the same time Dutch, English, French, and Spanish colonists imported millions of enslaved men, women, and children from Africa to work on the sugar and coffee plantations that made the region so profitable for its masters. Supported by racism and colonialism, plantation slavery left its mark on the Caribbean long after emancipation and independence. We will be emphasizing recent, representative texts, monographs and essays but placing them in the context of early research.

**AMST 30375. Archaeology of the African Diaspora**

(3-0-3)

This course will introduce students to organizations and movements arising from and on behalf of black populations in the diaspora, including the United States and various nations in Latin America and the Caribbean. “Movements” is defined broadly in this course to include both historical and contemporary instances of collective resistance, revolt, and rebellion, as well as sustained collective activism and organizing around artistic, cultural, social, intellectual, political, and/or religious agendas aimed at bringing about black liberation, social justice, and cultural/ethnic/racial awareness and pride. Among the topics to be considered are varying expressions of black nationalism within the United States, Rastafarianism in Jamaica, black identity groups in Brazil, and black organizational presence and community building on the Internet. Readings and class discussions will encourage students to think about blackness (and identity and mobilization more generally) in global terms, searching for points of connection across international borders along with points of disconnect based on differing historical, cultural, and sociopolitical realities and differing local understandings of race and ethnicity.

**AMST 30376. What’s Love Got to Do with It? Marriage and the Family in American History**

(3-0-3)

From the heated trenches of America’s “culture wars,” few things are as polarizing as marriage and the family. At the extremes, some hearken back to less troubled days when one man and one woman made enduring commitments to each other; others imagine a narrative of progress with women throwing off the shackles of patriarchy, as both men and women forged new kinds of relationships informed by individual needs. Through intensive reading and writing, students will grapple with these conflicting narratives of decline and triumph. We will explore Native American families, polygamy, free-love communities, Cold War homemakers, the black family, and gay marriage. In all of these, we will flesh out the ways in which defining “the family” has always been entangled with citizenship, national politics, and religious intolerance.

**AMST 30377. The United States in the 1960s**

(3-0-3)

Few periods in American history have been as controversial as the 1960s. Sometimes called the “Long ’60s,” it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the United States, the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a combination of readings, videos, mini-lectures, and class discussions. Toward the second, they will be exposed to four different approaches: (1) discussing primary documents and writing a paper on some of them; (2) studying three small-scale case studies; (3) examining the large-scale phenomenon of protest; and (4) reading the memoirs of a Cabinet member, hence gaining an insider’s view of the life and activities in the White House.

**AMST 30378. The U.S. Civil War Era, 1848–77**

(3-0-3)

Arguably, the study of the American Civil War is a suitable training ground for novice historians, for traditionally, a historian must learn to examine events and issues from varying perspectives. Indeed, in this course, emphasis lies not only on the events of the period, but also on the interpretation of those events by different interest groups. Students are expected not only to learn the facts of the era, but also to think about the consequences of events on different sections and different peoples. This course divides the period into three sections: the coming of the Civil War, the War, and Reconstruction. A test follows the end of each section; half of the final exam will be on the Reconstruction section and the rest will be comprehensive. In addition to the tests, students will write a short paper and a short book review.

**AMST 30379. American Catholic Experience**

(3-0-3) Cummings

*Corequisite:* HIST 32615

This course is a survey of the history of Roman Catholicism in the United States from colonial times to the present. We will consider, among others, the following topics: immigrant and ethnic Catholicism, women in the Church, Catholic social reform, devotional and parish life, and the relationship between Catholicism and American democracy.

**AMST 30380. U.S. Labor History**

(3-0-3) Graff

*Corequisite:* HIST 32618

The labor questions “Who does the work? Who reaps the rewards? And who makes the decisions?” are central to any society, and this course explores how those questions have been answered throughout the history of the United States

of America. This course will introduce you to the major themes, events, organizations, individuals, and scholarly controversies in American labor history, from 1776 to the present. We will study the diversity of the working-class experience in the United States by exploring the past from multiple perspectives, and we will analyze competing interpretations put forth by labor historians over the past half-century. The workers, workplaces, communities, institutions, and issues will range widely over the semester, but we will investigate some core themes for the duration: issues of power, structure, and agency, from the workplace to Washington, D.C.; workers' wide-ranging efforts to forge organizations, namely labor unions, to represent their collective interests; intersections between class, race, and gender at work, at home, at play, and in politics; and tensions between capitalism, industrialization, and democracy in U.S. history.

### **AMST 30381. The Religious Factor in American Culture**

(3-0-3) Marsden

This course is about understanding American culture and its history, taking religion into account as one important factor among many—but one often neglected. Subjects include how religion has interacted with just about everything else in the culture, from politics and warfare to intellectual life, ideals, morality, science, schooling, race, immigration, ethnicity, family, sexuality, and so forth.

### **AMST 30382. Slavery, Captivity, and the Company Store in American History**

(3-0-3)

What does it mean to be a slave in America? Were African Americans the only slaves in America? Are indentured servants, captives, or laborers in company towns free? Are they slaves? This course examines slavery and other forms of unfree labor in the United States. Through lectures and discussions, the class will investigate unfree labor in American history—chattel slavery in the South and New England, Puritan captives in French Canada, Indian slave trade in the South and Southwest, indentured servants in Virginia, and company towns in the post-war South and West. By the end of the course, students will be equipped to explore how chattel slavery in America fit into a global context, how modernity was related to slavery, and how the experiences of African American slaves differed by time and region in the United States. After a broad survey of slavery and unfree labor in the United States, students will be prepared to tackle the following questions: What does it mean to be free in America? What was the impact of slavery and unfree labor on American politics and society?

### **AMST 30383. Race and Culture in the American South to 1865**

(3-0-3) Miller

This course traces the roots of southern, antebellum culture by exploring the centrality of the relationships between sex, manliness, and slavery in the development of the South from 1619 to 1865. By examining how European men viewed their own sexuality and that of European women in contrast to that of African men and women, this course seeks to examine the complex racial and gendered identities at the center of southern culture. The underlying current of the class is to understand the complexity with which racial and gendered identities defined relationships and culture in the South. Using primary and secondary sources, we will critically engage the debates about slavery, racism, gender, and class in southern culture. We will reevaluate the historiographic arguments on American racism. We will take the notion of “southern gentlemen” to task, juxtaposing their responsibility as patriarchs to the ugly underbelly of slavery, race, and sexual exploitation. Our efforts in this class will be to understand the contours of the relationships between sexual control, manliness, and racism. We will explore the daily lives of men and women who lived during the time. A variety of perspectives will constitute our sources about slavery, including those of blacks, free and enslaved, as well as planters, abolitionists, women, and yeomen.

### **AMST 30384. The Great Depression in the United States**

(3-0-3) Gloege

This course explores the political, economic, cultural, and social history of the Great Depression and New Deal years in the United States, from the stock market crash of 1929 to the beginning of World War II in 1941.

### **AMST 30386. United States in the 1960s**

(3-0-3) Swartz

Few periods in American history have been as controversial as the 1960s. Sometimes called the “Long ’60s,” it runs conceptually from the mid-1950s to the early 1970s, and was a turbulent time. Concentrating on politics and society, this course explores the major personalities and events, including Martin Luther King, John F. Kennedy, Lyndon Johnson, Richard Nixon, the New Frontier, the Great Society, the Vietnam War, the breakdown of the liberal consensus, the rebirth of the conservative movement, and national movements led by youths, women, and African Americans. Although the emphasis is on the United States, the course also visits several major international issues. There are two goals for students: acquiring knowledge about the period, and developing analytical tools to form their own judgments about it. Toward the first goal, students will encounter a combination of readings, videos, mini-lectures, and class discussions. Toward the second, they will be exposed to four different approaches: (1) discussing primary documents and writing a paper on some of them; (2) studying three small-scale case studies; (3) examining the large-scale phenomenon of protest; and (4) reading the memoirs of a Cabinet member, hence gaining an insider's view of the life and activities in the White House.

### **AMST 30387. History of Consumerism in the Modern United States, 1880s to the Present**

(3-0-3) Gloege

This course will explore the creation of contemporary consumer culture in the United States. Beginning in the late 1880s, the nature of buying, selling, and consuming was fundamentally transformed in the United States. After a brief examination of the broader history of consumption, this course will explore the changes in production, marketing, retailing, and consumption from the Gilded Age to the present. Next, it will trace the ways in which those changes have influenced broader cultural, institutional, and political developments throughout the 20th century. A particular emphasis will be placed on the ways in which patterns of consumption helped define and redefine categories of race, class, and gender.

### **AMST 30388. Slavery in the Atlantic World**

(3-0-3) Challenger

This survey course explores the nature and meaning of the Atlantic world. Covering the 15th century to the 19th century, it interrogates the role of coerced African labor in the birth of the Atlantic world. Created as a consequence of the Columbian encounter, a main focus will be on the ways in which the common historical thread of trans-Atlantic slavery connected the economies, cultures, and societies that bordered the Atlantic Ocean. Thematically, this course explores, in a variety of geographical sites, the varied and nuanced claims to humanity that Afro-descended peoples displayed against the systematic attempts to dehumanize and exploit their bodies. Africans throughout various communities in West Africa, North America, Brazil, and the British Caribbean are the primary focal points of this course.

### **AMST 30401. American Congress**

(3-0-3) Griffin

This class will expose the student to the practical workings of the U.S. Congress, some major theories attempting to explain those workings, and some of the methods and materials needed to do research on Congress. It will place the study of Congress in the context of democratic theory, and in particular, the problem of the way in which the institution across time grapples with the problem of the common good.

### **AMST 30402. Race/Ethnicity and American Politics**

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like

gender and class? What role do American political institutions—the Congress, the presidency, the judiciary, state and local governments, etc.—play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

### **AMST 30403. Constitutional Interpretation**

(3-0-3)

*Prerequisite:* (POLS 10100 OR POLS 140 OR POLS 140A) OR (POLS 20100 OR POLS 240 OR POLS 240A) OR (GOVT 10100 OR GOVT 140) OR (GOVT 20100 OR GOVT 240 OR GOVT 240A)

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

### **AMST 30405. American Voting and Elections**

(3-0-3)

This course will examine voting and opinions, and the linkage between political leaders and the mass public. Possible topics include an introduction to electoral analysis; the history of recent electoral politics; the nature of political participation, especially the rationality of voting turnout and non-electoral specialization; party identification and opinions, attitudes and ideology; social groups and cultural identities; mass media and image campaigns; and differences between presidential and congressional elections.

### **AMST 30407. Political Participation**

(3-0-3)

This course is intended to explore some of the causes of citizens' differentiated rates of political participation in American politics, as well as the impact that this has on the representational relationship between constituents and legislators. We will begin with a theoretical overview of some of the unique aspects of our representational system. Next, we will analyze the factors that influence the formation of individuals' political preferences, and their propensity to undertake various forms of political participation. Then we will turn to an analysis of the formation and uses of public opinion. Finally, the class will investigate the consequences of using institutional reforms geared toward "direct democracy" to increase political participation and/or the weight of public opinion on the legislative process.

### **AMST 30409. Latin American International Relations**

(3-0-3)

This course examines the international relations of Latin America with an emphasis on what determines U.S. policy toward Latin America, and the policies of Latin American states toward the United States, other regions of the world, and each other. It analyzes recurring themes in U.S.-Latin American relations, including the response of the United States to dictatorships, expropriations of U.S.-owned property, and revolution. It also studies new directions and issues in Latin America's international relations, e.g., trade policy, the environment, migration, and drugs in a post-Cold War world.

### **AMST 30410. American Political Thought**

(3-0-3)

This course will examine different ideas, approaches, and issues within feminist political thought. The first part of the course will compare different theoretical perspectives, from liberalism to Marxism, that have been employed by contemporary feminists. The course will pay particular attention to the meanings ascribed to "woman" and her roles in society. The second part of the course will examine how women have been represented throughout Western political thought, and the values ascribed to them by political theorists. Finally, in the last part of the course, we will turn to an examination of several contemporary political issues particularly relevant to feminist thought.

### **AMST 30413. Presidential Leadership**

(3-0-3)

This course examines the role of the presidency in the American regime and its change over time. Particular attention will be given to expectations about presidential leadership through the course of American political history. Beginning with questions about the original design and role of the presidency, the course turns to consideration of the role of leadership styles for change and continuity in American politics. Finally, cases of presidential leadership are studied to comprehend the way leadership and political context interact.

### **AMST 30414. Religion and Politics**

(3-0-3)

Voters hear increasing amounts of religious discourse in American political campaigns and administrations are turning to religious institutions for social service delivery. The linkages between religion and politics, however, are very complex and constitutionally delicate. This course utilizes a burgeoning body of empirical studies, drawn from political science, sociology, and psychology, that address relationships among religious beliefs and organizations on the one hand, and political attitudes and actions, on the other. Topics include the meaning and measurement of religiosity; linkages between religion and politics at the level of the individual, the local community of faith, and the policy maker; foundational beliefs, images of God, conceptions of human nature, and their consequences for the political order; religious values embedded in the American political system; religion and the state, as seen in selected court cases; and denominational bodies, interest groups, and religious movements in American politics. Students will be responsible for one or two exams, oral presentations, and an original research paper. Depending on class size, either a lecture-discussion or a seminar-tutorial mode of teaching will be used. Students will read books by Wald, Benson and Williams, and several other authors, and

### **AMST 30415. Latino Politics**

(3-0-3)

This course provides a careful and "critical" analysis of the political status, conditions, and the political activities of the major Latino (or "Hispanic") groups in the United States—Mexican Americans, Puerto Ricans, and Cuban Americans. To provide a context and grounding, various theoretical perspectives are first considered, followed by discussions of the historical experiences and contemporary socioeconomic situations of the several Latino groups. Attention then turns to a number of issues concerning political attitudes, behaviors, and activities. Assessments of Latino influence on the major local, state, and national institutions of the political system, and vice versa, are then considered. Policy areas particularly significant for Latinos are also examined. Finally, the major issues, questions, and themes considered throughout the semester are "revisited" and reconsidered.

### **AMST 30418. Introduction to Public Policy**

(3-0-3)

The objective of this course is to introduce students to the process of public policy formation in American politics. The course will be divided into three parts. The first section will encompass a brief review of some of the more important mechanisms of American politics that impact on the legislative process (i.e., political participation, interest groups, congressional elections, etc.). We will then engage in a general review of how such factors have impacted the direction and tone of federal public policy over the last 30 years. The final two sections of the course will be devoted to detailed analysis of two public policy areas of particular interest to younger voters, education reform and drug laws. Building on the earlier readings and the analytical tools developed, we will examine the current debates and prospects for reform in these policy areas, with an eye toward understanding the political realities of public policy formation.

### **AMST 30420. Political Participation**

(3-0-3)

This course is intended to explore some of the causes of citizens' differentiated rates of political participation in American politics, as well as the impact that this has on the representational relationship between constituents and legislators.

We will begin with a theoretical overview of some of the unique aspects of our representational system. After analyzing the factors that influence the formation of individuals' political preferences, and their propensity to undertake various forms of political participation, we will focus on the historical developments and reforms that have fundamentally shaped the institutions that connect constituents to their government representatives. We will also review the uses of public opinion polls, and end the class by discussing the consequences of using institutional reforms geared toward "direct democracy" to increase political participation and/or the weight of public opinion on the legislative process.

#### **AMST 30425. American Voting and Elections**

(3-0-3) Mueller

This course will examine voting and opinions, and the linkage between political leaders and the mass public. Possible topics include an introduction to electoral analysis; the history of recent electoral politics; the nature of political participation, especially the rationality of voting turnout and non-electoral specialization; party identification and opinions, attitudes, and ideology; social groups and cultural identities; mass media and image campaigns; and differences between presidential and congressional elections.

#### **AMST 30426. Constitutional Law**

(3-0-3)

This course examines the main principles of American Constitutional law, the process of constitutional interpretation, and the role of the Supreme Court in the American political system. Topics covered are presidential war powers, congressional-executive relations, free speech, church-state relations, the right to life (abortion, right to die, and death penalty), race and gender discrimination, and the American federal system. A good deal of attention is given over to recent personnel changes on the Supreme Court and the extent to which these changes are reflected in the Court's opinions. A background in American national government is desirable.

#### **AMST 30427. American Foreign Policy**

(3-0-3)

The United States is the most powerful state in the world today. Its actions are important not just for U.S. citizens, but they also affect whether others go to war, whether they will win their wars, whether they receive economic aid, whether they will go broke, or whether they will starve. What determines U.S. foreign policy? What is the national interest? When do we go to war? Would you send U.S. soldiers into war? If so, into which wars and for what reasons? How do our economic policies affect others? Does trade help or hurt the U.S. economy and its citizens? We first study several theories about foreign policy. We then examine the US foreign policy process, including the President, Congress, the bureaucracy, the media, and public opinion. To see how this all works, we turn to the history of U.S. foreign policy, from Washington's farewell address through the World Wars and the Cold War to the Gulf War. We then study several major issue areas, including weapons of mass destruction, trade and economics, and the environment. Finally, we develop and debate forecasts and strategies for the future.

#### **AMST 30428. Introduction to U.S. Foreign Policy**

(3-0-3)

The United States is the most powerful state in the world today. Its actions are important not just for U.S. citizens, but they also affect whether others go to war, whether they will win their wars, whether they receive economic aid, whether they will go broke, or whether they will starve. What determines U.S. foreign policy? What is the national interest? When do we go to war? Would you send U.S. soldiers into war? If so, into which wars and for what reasons? How do our economic policies affect others? Does trade help or hurt the U.S. economy and its citizens? We first study several theories about foreign policy. We then examine the U.S. foreign policy process, including the President, Congress, the bureaucracy, the media, and public opinion. To see how this all works, we turn to the history of U.S. foreign policy, from Washington's farewell address through the world wars and the Cold War to the Gulf War. We then study several major issue areas, including weapons of mass destruction, trade and economics, and the environ-

ment. Finally, we develop and debate forecasts and strategies for the future. This course requires papers about the history of American foreign policy and about a current policy problem, as well as a comprehensive final. Participation, debate, and oral presentation skills are also important.

#### **AMST 30429. Black Chicago Politics**

(3-0-3) Pinderhughes

This course introduces students to the vast, complex, and exciting dimensions of black Chicago politics. First, institutional structures, geographic distribution and population characteristics will inform students about the sociodemographic background of the African American population in the city. Second, the course explores varying types of political expression that have developed over more than a century, including electoral politics, mass movements, partisan politics; it will also examine the impact of the Chicago machine, and of the Washington era on the political and economic status of African Americans in the city. Third, public policy developments in housing, education, and criminal justice will be discussed. Fourth, the course also compares black political standing with other racial and ethnic groups in the city. Finally, the course will introduce students to the long tradition of social science research centered on the city of Chicago.

#### **AMST 30431. Race and Ethnicity in American Politics**

(3-0-3)

This course introduces students to the dynamics of the social and historical construction of race and ethnicity in American political life. The course explores the following core questions: What are race and ethnicity? What are the best ways to think about the impact of race and ethnicity on American citizens? What is the history of racial and ethnic formation in American political life? How do race and ethnicity link up with other identities animating political actions like gender and class? What role do American political institutions the Congress, the presidency, the judiciary, state and local governments, etc. play in constructing and maintaining these identity categories? Can these institutions ever be used to overcome the points of division in American society?

#### **AMST 30432. American Foreign Policy in Middle East**

(3-0-3)

This course provides an in-depth analysis of the causes, conduct, and consequences of American foreign policy toward the Middle East since World War II. We will look at the origins of the American foreign policy, and explore the domestic and international factors that shape the policy making process toward this region, including the roles of several American policy institutions such as the Departments of State and Defense, the Central Intelligence Agency. We will specifically focus on the evolution of American policy toward a number of major countries in the region, including Israel, Iran, Turkey, Saudi Arabia, Egypt, and Lebanon.

#### **AMST 30433. Latino Politics**

(3-0-3)

This course will examine the history and diversity of Latinos in the United States and how Latinos related to the U.S. political system. We will review the extent to which Latinos are incorporated into the political landscape and the degree to which they are adequately represented in the U.S. government. The course will emphasize the multiple pathways of Latino political assimilation and the ways in which Latinos become involved in politics, including electoral and non-electoral participation and partisanship acquisition.

#### **AMST 30434. Public Opinion and Political Behavior**

(3-0-3) Davis

A principle tenet underlying democratic governance is the belief that public opinion or the "will of the people" should dictate governmental behavior. To the extent this belief is a realistic consideration, difficult questions remain concerning the capacity for citizens to develop reasoned opinions and how to conceptualize and measure opinion. This course explores the foundations of political and social attitudes and the methodology used to observe what people think about politics.

**AMST 30435. Political Psychology**

(3-0-3)

Political psychology is a multidisciplinary field of study concerned with how psychological processes are influenced by and inform political behavior of individual citizens, groups, political leaders, and behavior within political institutions. This class explores some of the major lines of political psychology theory and research, and their application to political life. These applications include the role of personality in the formation of political attitudes and democratic values; racism, stereotyping, ethnocentrism, and nationalism; the influences of emotion and cognition on voting decisions; social identity theory; information processing and political decision making; inter-group conflict; political intolerance; and methodological approaches in political psychology. This course will attempt to answer the following questions: What is racism, and where does it come from? Is political intolerance an automatic response to objective stimuli, or is intolerance functional? To what extent are political attitudes and values ingrained in personality? Is the support for democracy, political trust, and support for the political system linked to personality? How do individuals utilize and process information in political campaigns? Is negative campaigning effective? How did a heightened sense of fear and anxiety, following the September 11 terrorist attacks on America, influence political decisions, the support for President Bush's policies, and intolerance toward social groups? How does social group identity form? Does linking or identifying with one group leads to the rejection of other groups? What motivates George Bush? To what extent are personality theories useful in explaining the behavior of presidents and other political leaders? What are the political psychological underpinnings of inter-group conflict, mass violence, and genocide? Is the truth and reconciliation movement an effective means of recovering from genocide and violence?

**AMST 30436. State of American States**

(3-0-3) Hero

This course provides a "critical" and comprehensive examination of politics in the states of the United States, and does so by analyzing topics from several theoretical perspectives. States are major policy makers concerning such central public policies as education, welfare, and criminal justice, among a host of others. There is tremendous variation, yet, at the same time, there are similarities between and among the 50 states in their political processes and governmental institutions as well as in their public policy concerns and outcomes. The focus of the course is on understanding why the states vary as they do and the consequences of that variation for such core American values as democracy and equality, and how states have different conceptualizations, or different visions or versions, of those core values.

**AMST 30500. Race and Ethnicity**

(3-0-3)

This course focuses on race and ethnic relations in the United States. Current cases involving racial and ethnic issues will be presented and discussed in class. Readings and materials will present three approaches to the study of majority-minority group relations, the emergence and maintenance of group dominance, and minority-group adaptations to modes of dominance, including separation, accommodation, acculturation, and assimilation. Class participation and students' experiences will be emphasized.

**AMST 30501. Social Movements**

(3-0-3)

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course, we will consider the ways in which difference sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

**AMST 30502. Catholicism in Contemporary America**

(3-0-3)

This course offers a sociological overview of the Roman Catholic Church in the United States since World War II. Recent trends will be examined at the societal, organization, and individual levels of analysis. Topics include the involvement of

the Church in public life, the causes and consequences of the priest shortage, and increasing individualism and personalism among lay Catholics.

**AMST 30503. Social Deviance**

(3-0-3)

In this course, students will discuss deviant people and activities with special attention paid to the process whereby deviance is defined. Discussions will focus on issues of social power, moral entrepreneurship, and human variation.

**AMST 30504. Poverty, Inequality, and Social Stratification**

(3-0-3)

Social inequality is a prominent and persistent feature of modern society. Social stratification theory attempts to explain the causes of inequality and the reasons for its persistence. This course will address such questions as: Why are some people rich and some people poor? Why does inequality persist? Who gets ahead? Can men and women get the same jobs? Do different races have the same opportunities? Is inequality necessary? Potential topics include inner-city and rural poverty, welfare dependency, homelessness, status attainment and occupational mobility, racial and ethnic stratification, gender stratification, and class theory.

**AMST 30506. Criminology**

(3-0-3)

This course will introduce you to theoretical interpretations of criminal behavior, empirical research on crime in diverse contexts, and policy debates on crime control and punishment. Our intent will be to raise critical questions and to challenge commonly held views about the nature of crime and punishment in the United States today. As students of sociology, we will operate under the assumption that crime and punishment are social phenomena; they can only be understood by analyzing their relationship to the broader social, political, and cultural context in which they exist. With a particular emphasis on race, class, and gender, we will explore crime and practices of punishment in three social contexts: "the street," paid work settings, and intimate and family relations. Cannot take if previously taken SOC 43752; content overlap.

**AMST 30507. Religion and Social Life**

(3-0-3) Christiano

How does social life influence religion? How does religion influence society? What is religion's social significance in a complex society like ours? Is religion's significance declining? This course will consider these and other questions by exploring the great variety in social expressions of religion. The course examines the social bases of churches, sects, and cults, and it focuses on contemporary religion in the United States.

**AMST 30508. Sociology of Deviance**

(3-0-3)

This course is concerned primarily with the sociological conceptions and theories of deviance. At the onset, deviance is differentiated from those phenomena designated as social problems and social disorganization and the remainder of the course focuses on deviant acts and deviants. Various responses are explored to such questions as who are deviants? What does it mean to be a deviant—to the deviant himself, as well as to others? What common social processes and experiences do most deviants undergo? Various theories or models of delinquency, crime, suicide, sex deviation, and drug use are utilized to aid in constructing a sociological understanding of deviance, the analysis of deviant acts and the formation of deviant careers or roles.

**AMST 30509. Race and Ethnicity**

(3-0-3)

This course has three objectives. First, the course will help you to think critically about issues related to race and ethnicity in American society. These issues include the meaning of race and ethnicity; the extent of racial and ethnic inequality in the United States, the nature of racism, discrimination, and racial stereotyping; the pros and cons of affirmative action; the development of racial identity; differences between assimilation, amalgamation, and multiculturalism; and social and individual change with respect to race relations. The second objective is to foster a

dialogue between you and other students about racist and ethnocentric attitudes and actions. The third objective is to encourage you to explore your own racial and ethnic identity and to understand how this identity reflects and shapes your life experiences.

### **AMST 30510. Polish Americans**

(3-0-3)

A study of the cultural and racial pluralism of American society through the focus of the Polish American experience; a review of the social and historical background, the immigration experience, and adaptation to the American experiment in terms of family, religion, education, work, and government.

### **AMST 30511. Social Movements**

(3-0-3)

How is social change possible? This is one of the central questions for the study of social movements, as well as the organizing theme of this course. In this course, we will consider the ways in which difference sociological theories of social movements have asked and answered this question, paying particular attention to theories of identity, emotion, and networks.

### **AMST 30513. Critical Issues in Criminology**

(3-0-3)

In this course, students will discuss deviant people and activities with special attention paid to the process whereby deviance is defined. Discussions will focus on issues of social power, moral entrepreneurship, and human variation.

### **AMST 30514. Popular Culture**

(3-0-3)

The first half of the course will introduce a variety of theoretical perspectives, presented as a historical overview of popular cultural studies, both in the United States and Britain. The theories to be considered include mass culture theory, Marxism, the Frankfurt Schools (critical theory), structuralism, semiotics, feminism, and post-modernism. During this first half of the course, students will be required to write a paper in which they analyze an aspect of popular culture utilizing one or more of the theoretical perspectives. The second half of the course is devoted to a historical analysis, using the perspectives already addressed, of the social impact and meaning systems of rock 'n roll music. The exegesis will begin with a study of African music, using recordings of chants and celebratory music, and will explore the music of American slaves, chain gangs, and spirituals, toward the goal of identifying elements exhibited by those genres that eventually evolved into rock 'n roll. Students will be required to write a research paper on some aspect, personality, group, or historical development of rock 'n roll. This course is not recommended for students who have taken SOC 451, as the content will overlap.

### **AMST 30600. Prehistory of Western North America**

(3-0-3)

Archaeological data and cultural life of prehistoric Western North America over the last 20,000 years will be covered. This course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated, diverse cultures of Native Americans.

### **AMST 30601. Prehistory of Western North America**

(3-0-3)

Tremendous variation exists between the cultures of the peoples of North America. This course will offer an opportunity to glimpse this variation, which occurs in technology, social organization, economic, political, and religious systems, and in the arts. A brief introduction of the archaeological and linguistic evidence will provide information on the debate as to when and by what means people entered America and spread throughout its vast area. The course will then move on to consider the many different cultural adaptations to the various environments of North America. The comparative approach will be used to discuss the similarities and differences between specific cultures. The readings will focus upon particular groups (i.e., Eskimo, Cahuilla, Dakota, Navajo, etc.). The course will also be concerned with the cultural changes that occurred within Native American cultures

during the colonial and expansion periods of Euro-American cultures. The course will end with consideration of the current issues significant to Native-American cultures. Lectures, film, discussions of readings, and research will allow students a range of learning experiences. Both exams and short papers, as well as a research paper provide students with an opportunity to demonstrate their understanding of the basic information and issues.

### **AMST 30602. American Social Movements**

(3-0-3)

This interdisciplinary survey of civil rights and social protest movements in the United States examines suffrage inclusion, abolitionism and black civil rights movements, labor organizing, and women's rights in the 19th and 20th centuries, as well as several contemporary protest movements. These movements certainly question selected American ideologies, but they also draw on American values and practices. We will use history, film, fiction, journalism, and autobiographies to trace a tradition of protest that both depends on and offers challenges to a democratic society.

### **AMST 30606. Prehistory of the American Southwest**

(3-0-3)

This course uses archaeological data and theory to explore the cultural life of prehistoric Southwest Americans over the last 12,000 years. The course emphasizes origins and cultural development from an early pioneer stage to the later, sophisticated and diverse cultures of the American Southwest. The descendants of these cultures include the Pueblo peoples, the Dene, and the O'odham peoples. In the course students will explore cultural change, land-use patterns, economics, and political complexity, using information on environmental relationships, technology, and other aspects of material culture.

### **AMST 30607. Native Peoples of North America**

(3-0-3) Mack

Tremendous variation exists between the cultures of the peoples of North America, both in the past and today. This course will offer an opportunity to glimpse at this variation, which occurs in technology, social organization, economic, political, and religious systems, and in the arts. A brief introduction of the archaeological and linguistic evidence will provide information on the debate as to when and by what means people entered America and spread throughout its vast area. The course will then move on to consider the many different cultural adaptations to the various environments of North America. The comparative approach will be used to discuss the similarities and differences between specific cultures. The readings will focus upon particular groups (i.e., Eskimo, Cahuilla, Dakota, Navajo, etc.). The course will also be concerned with the cultural changes that occurred within Native American cultures during the colonial and expansion periods of Euro-American cultures. The course will end with consideration of the current issues significant to Native American cultures. Lectures, films, discussions of readings, and research will allow students a range of learning experiences. Both exams and short papers, as well as a research paper provide students with an opportunity to demonstrate their understanding of the basic information and issues.

### **AMST 30608. Infancy: Evolution, History, and Development**

(3-0-3)

This course explores aspects of infant biology and socio-emotional development in relationship to Western child care practices and parenting. Western pediatric approaches to infancy and parenting are evaluated in light of Western cultural history and cross-cultural, human evolutionary, and developmental data. A variety of mammals is included as a comparative background to explore the relationships between infant physiology, mental and physical health, and contemporary infant care giving concepts.

### **AMST 30609. Caribbean Diasporas**

(3-0-3) Richman

This course examines the development of Creole societies in the French, Spanish, Dutch, and British Caribbean in response to colonialism, slavery, migration, nationalism and, most recently, transnationalism. The recent exodus of as much as 20 percent of Caribbean populations to North America and Europe has afforded

the rise of new transnational modes of existence. This course will explore the consciousness and experience of Caribbean diasporas through ethnography and history, religion, literature, music, and culinary arts.

### AMST 30610. Immigration in Comparative Perspective

(3-0-3) Albahari

How do people in immigrant-receiving countries form their attitudes toward immigrants? What are the unintended consequences of increased governmental investments in border and immigration control? What are the differences between refugees and other migrants? How is immigration related to the 2005 riots in France? In this course, we will be able to examine such questions, and more generally to understand the causes, experiences, and consequences of transnational migration. We will acquire a sound interdisciplinary understanding of migration in its historical, social, political, and cultural facets. Diverse aspects of immigration history, policy implementation and migrants' lives will be examined, with fieldwork accounts from countries of origin and from the United States, Europe, and Japan. Issues to be addressed include ethnic neighborhood formation; gender and class differences in migration and settlement; religion; identity formation; border enforcement; racism; and mass-media representation.

### AMST 30611. Intermediate Creole Language and Culture

(1.5-0-1.5) Richman

This intermediate-level course is intended for students who have taken beginning-level Creole. In small-group teaching sessions, students will be prepared for conversational fluency with basic reading and writing skills, emphasizing communicative competence as well as grammatical and phonetic techniques. Our study of Kreyòl is closely linked to our exploration of how the language is tied to Caribbean society and culture. Evaluation of student achievement and proficiency will be conducted both informally and formally during and at the conclusion of the course. Those looking to develop or improve their language skills are welcome to the class. The program is designed to meet the needs of those who plan to conduct research in Haiti or in the Haitian diaspora, or who intend to work in a volunteer or professional capacity either in Haiti or with Haitians abroad.

### AMST 30612. Mestizo Stories

(2-0-2) Ybarra-Frausto

Mestizaje (racial-cultural blending) is a foundational paradigm for understanding Latino history, culture and politics. The course *Mestizo Stories* provides students a wide-ranging, inter-discipline introduction to the subject of Mestizaje. Jose Vasconcelor influential book *La Raza Còsmica* (*The Cosmic Races*) will be the conceptual anchor for analysis and interpretation. The book will be augmented by films, videos, recordings and assigned readings exploring three core areas of concerns: (1) the historical origins of mestizo/a identity and cultural production; (2) the experience and narratives of Mestizaje in the United States; and (3) the global implications of Mestizaje as a transcendent social and cultural manifestation. Students are expected to be critical readers of the assigned texts, which will be primarily in English though some will be in Spanish or bilingual. Active participation in class discussions is also essential. Students are also expected to present a PowerPoint presentation on a selected aspect of Mestizaje from a wide range of humanities and social science topics to be investigated. The oral-visual presentation will become the basis for a written research paper. *Mestizo Stories* will explore visual, musical, literary, and performative texts of human agency, resistance, and survival.

### AMST 30615. Anthropology of Race

(3-0-3) Fuentes

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle what race is and what it is not from an anthropological perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how

our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

### AMST 30616. Critical Approaches to the Anthropology of Race

(3-0-3) Hauser

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle the anthropology of race from a critical perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

### AMST 30701. Media and the Presidency

(3-0-3) Ohmer

As the brouhaha over Howard Dean's "yell" illustrates, media have come to play a key role in the coverage of presidential elections. This course examines how print and broadcast media have functioned in U.S. elections since the way we choose a President was first established. After a brief overview of changing relationships between journalists and presidential candidates in the 19th century, we will focus on elections since the 1920s, when radio first broadcast election updates. We will analyze how candidates have used radio, television, and the Internet to construct images of themselves and their platforms, and how journalists have become an active force in representing the political process. Rather than see electronic media as neutral or "objective," we will assess the narrative strategies and visual and verbal codes by which media present politics to us, the voters.

### AMST 40100. Writing Nonfiction

(5-0-3)

The techniques of nonfiction writing from the basic journalistic news story to the magazine feature to the personal essay. Students will complete a wide range of assignments and also discuss examples of various kinds of nonfiction prose.

### AMST 40200. African American Literature

(3-0-3)

A historical and thematic account of the rise and achievement of African American authors over several centuries.

### AMST 40201. American War Literature

(3-0-3)

American war literature is multifaceted and highly charged with personal agonies and national interrogations. Viewed as a broad field, these texts offer opportunities for diverse research into national ideology, the views and interpretations of the enemy, the accounts of interior conflicts, and the historical moments that shape these tales. How should we read works that contemplate collective and individual violence? What kinds of analysis and historical recovery bring us to points of understanding and meaning? Our panoramic explorations will include the canonically familiar such as Mary Rowlandson's captivity narrative; the Civil War poetry of Whitman and Melville, *The Red Badge of Courage* by Stephen Crane, the more recent such as Kurt Vonnegut's *Slaughterhouse Five*, and Tim O'Brien's *The Things They Carried*; and the ongoing such as writings from the wars in Iraq. Our texts will serve as entry points for aesthetic, historical, and theoretical studies aimed at illuminating the functions and values of war writing in the United States. This course will require several short papers, a long final essay, and active student participation.

### AMST 40202. Crossing Color Lines

(3-0-3)

This class will explore the conflicted and contradictory ways in which racial and ethnic identities have been constructed and mediated in American culture. We will specifically focus on what the psychology and performance of "passing" reveal about the limitations and possibilities of what we often generically understand as "American" identity. We will thus be able to question essentialist notions of "white-

ness” and “race,” and raise questions such as: Who gets to be American? Who doesn’t? How does popular culture construct and perpetuate racist stereotypes, and how can it at other moments resist, critique, and deconstruct such practices? Readings may include *The Autobiography of an Ex-Colored Man* (James Weldon Johnson), *The Great Gatsby* (F. Scott Fitzgerald), *Passing* (Nella Larsen), *Absalom, Absalom!* (William Faulkner), *George Washington Gomez* (Americo Paredes), *Black Like Me* (John Griffin), and *Caucasia* (Danzon Senna). Films may include *The Jazz Singer*, *Six Degrees of Separation*, *Imitation of Life*, and *Bamboozled*. Requirements: active participation, group presentation, short paper (5–6 pages), final exam, and final research paper (10 pages).

#### **AMST 40203. African American Poetry and Poetics** (3-0-3)

An examination of poetry and poetics by black Americans from the beginnings to the present. The aesthetics of poetry are considered within their historical and intellectual contexts. Poets include Phillis Wheatley, Paul Laurence Dunbar, Claude McKay, Langston Hughes, Robert Hayden, Gwendolyn Brooks, LeRoi Jones, Audre Lorde, Michael Harper, Yusef Komunyakaa, and Rita Dove.

#### **AMST 40204. Shakespeare and Melville** (3-0-3)

Using concepts of tragedy as a linking principle, this course reads several Shakespearean plays and then *Moby-Dick*, noting Shakespeare’s influence on the American novelist.

#### **AMST 40205. American Film** (3-0-3) Krier

Presentations and discussions of the several genres of film produced in America since the early 1900s.

#### **AMST 40206. Constituting Americans** (3-0-3)

This course will explore life writings and issues of self-representation in the African American expressive cultural tradition from 1850 to 1905. This course is concerned with the concept of citizenship, its implied universalism, and the necessity of critiquing this universalism that maintains a unified notion of democracy.

#### **AMST 40207. The City in American Literature** (3-0-3)

An exploration of the connections between literary representations of the city and social identity in a variety of American literary texts from the 1890s to the present.

#### **AMST 40208. Mark Twain** (3-0-3) Werge

A study of Twain’s life and writings in light of the history of ideas and the literary, political, philosophical, and religious currents of 19th-century American culture. We will also consider such figures as Harte, Stowe, Douglass, and Lincoln, who illuminate Twain’s style and social and moral preoccupations as well as compelling questions centering on the nature of an American identity. Special concerns: Twain’s place in the tensions between conventional literary forms and the emerging American vernacular; his vision and critique of American democracy, slavery, “exceptionalism,” and later geopolitical expansionism; his medievalism, including *Joan of Arc*, and larger interpretations of history; his treatment of women, individualism, and the family; and the later gnosticism of #44, *The Mysterious Stranger*. We will also address the current (and perennial) discussions of unity and pluralism in American culture, as in Garry Wills’ delineation of an underlying American identity in *Under God* and Arthur Schlesinger Jr.’s fear of “Balkanization” in *The Disuniting of America*. Readings: selected shorter works, including *Diary of Adam and Eve*, *Innocents Abroad*, *Life on the Mississippi*; *Tom Sawyer*; *Huckleberry Finn*; *A Connecticut Yankee*; *Pudd’nhead Wilson*; #44, *The Mysterious Stranger*; and selections from the *Autobiography*.

#### **AMST 40209. Our America/African American Literature** (3-0-3)

This course is interested in the shaping of national identity and the historical, cultural, and moral assumptions about America that facilitate such a shaping. How does one become American? We will read 20th-century African American literature with focus on how “black subjectivity” is created. How does an author’s literary imagination construct a character and hail a reader? We will explore the relationship between literature, history, and cultural mythology; the American obsession with race; sexual ideology and competing representations of domesticity. In light of the way blackness is often construed as the ultimate sign of race in America, how do these texts approach the American political landscape to offer a critique of power, identity, and social subjectivity in a manner that interrogates whiteness and its ascribed universality?

#### **AMST 40210. Native American Literature** (3-0-3)

This course serves as an introductory exploration of the literatures written by Native American authors—oral literatures, transitional literatures (a combination of oral and written expression), and contemporary poetry and prose.

#### **AMST 40211. American Fiction** (3-0-3)

A close examination of major mid-20th-century American novelists.

#### **AMST 40212. Our America/African American Literature** (3-0-3)

“I will tell you something about stories, [he said] They aren’t just entertainment. Don’t be fooled. They are all we have, you see, all we have to fight off illness and death. You don’t have anything if you don’t have the stories. Their evil is mighty but it can’t stand up to our stories. So they try to destroy the stories let the stories be confused or forgotten. They would like that they would be happy because we would be defenseless then.”——Leslie Marmon Silko, *Ceremony*. Autobiography and biography are modes of narrative discourse, and certain marginalized groups—women and people of color—use narratives to define questions of identity, to question power relations, to explore their own voices as writers and as learners in hegemonic institutions, like schools. And while we might critique these narratives for their “locality”—that is, these narratives are often critiqued on the basis of telling a story about an individual at a specific point in history, saying little about their ability to tell a “total story”—as the epigraph opening this description suggests, stories are much more and are sometimes “all we have” to face a world that is hostile, painful, and unjust. In other words, individual stories do often reflect the sociopolitical contexts from which they emerge. In this course, we will explore the tensions raised above by examining the ways in which narratives/stories, specifically autobiographical and biographical ones, tell an individual as well as a total story. What do the Latino/a writers say about their own identities and cultures as Chicanos/Mexicanos, as Cubanos, Puertorriquenos, and as women? How and in what ways are ethnic identities within a Latino diaspora constructed, and what issues cut across ethnic and racial lines? How do Latinos construct race/ethnicity vis-à-vis whiteness? In other words, how do we frame ourselves and how are we framed in relation to the dominant constructions of race in this country?

#### **AMST 40213. Nature in America** (3-0-3)

This course examines the central and changing role of nature in American literature, from the topological eschatology of the Puritans to the pop-culture apocalypticism of Don DeLillo’s *White Noise*.

#### **AMST 40214. Voices of American Renaissance** (3-0-3)

The human voice manifested tremendous cultural, spiritual, and political power for antebellum Americans. *Vox populi, vox dei* (“The voice of the people is the voice of God”) proclaimed the popular political slogan. Transcendentalist writers such as Emerson considered the written word to be merely the dead letter of inspired speech. Vernacular literatures, Native American and African American oral

traditions, and sacred and political oratory all contributed distinctive models of voice to the antebellum Babel. In this course, we will focus on the trope of voice as it shaped the literatures of the American renaissance period and explore the cluster of meanings that antebellum Americans attached to it. Our readings will include works by Emerson, Thoreau, Poe, Dickinson, Whitman, Douglass, Melville, Stowe, Hawthorne, and a number of lesser known authors and oral performers. Requirements include active class participation (25 percent); one short (5-page) essay (15 percent) and two longer (8–10 page) essays (20 percent each); and a final exam (20 percent).

**AMST 40215. Realism and Naturalism in American Literature**  
(3-0-3)

This course will consider American literature between the Civil War and World War I in relation to the literary movements known as realism and naturalism. We will start out by making an effort to define these terms, looking at the statements of writers and critics from those years as well as recent critical and theoretical essays on realism and naturalism. We will then read a wide range of texts from the period, discussing their relations to these literary movements. We will ask questions such as: What distinguishes novels usually referred to as realist, such as Henry James's *Portrait of a Lady*, from those seen as naturalist, such as Frank Norris' *McTeague*? Is it useful to apply the concepts of realism and naturalism to the 1890s' explosion of writings by black women like Frances Harper (*Lola Leroy*) and Pauline Hopkins (*Contending Forces*)? How were new forms of nonfiction writing about social problems—books like Jacob Riis' *How the Other Half Lives*, Jane Addams' *Twenty Years at Hull House*, W.E.B. DuBois' *The Souls of Black Folk*, and Thorstein Veblen's *Theory of the Leisure Class*—related to realist novels dealing with similar issues, such as Stephen Crane's *Maggie: A Girl of the Streets*, Charles Chesnut's *The Marrow of Tradition*, Theodore Dreiser's *Sister Carrie*, James Weldon Johnson's Autobiography of an Ex-Colored Man, and Edith Wharton's *The House of Mirth*? Does the "reality" or "nature" represented in realism and naturalism look different depending on the perspective of writers who differ along lines of race, gender, ethnicity, and class, as well as in other ways? Evaluation will be based heavily on class participation in discussions of these and other questions, but also on short papers engaging with the critical essays that will supplement our literary readings, as well as on a final essay due at the end of the term.

**AMST 40216. African American Women**  
(3-0-3)

At the end of the millennium, at a time of great anxiety for at least a portion of our society, we have also witnessed a great explosion of African American women writers. This course will seek to understand the relation of these women to the larger American culture and what they have to say about our collective vision and future. At the same time, we will engage in an in-depth study of two of our most prominent writers within this group—specifically Alice Walker and Toni Morrison. The purpose here will be to understand individual works and the individual authors, as well as the significant ways these writers both converge and diverge. Finally, we will place these writers in the context of both poetry and essays by other African American writers, particularly Audre Lorde and June Jordan.

**AMST 40217. Literature and Democracy in Nineteenth-Century United States**  
(3-0-3)

A survey of 19th-century American literature, emphasizing the efforts of American writers to identify and define "democracy" and the "democratic citizen."

**AMST 40219. Writing Harlem: Race, Renaissance, and the Modern**  
(5-0-3)

A study of the historical, cultural, and political circumstances that led to the flowering of African American literature in Harlem in the 1920s and 1930s.

**AMST 40220. Poetry and Painting in Manhattan 1950–60**  
(3-0-3)

An examination of the vibrant Manhattan art community in the 1950s and 1960s, with a particular emphasis on the intersections of poets and painters.

**AMST 40221. Great American Novels**  
(3-0-3)

Close readings of selected classic American novels.

**AMST 40222. Class, Labor, and Narrative**  
(3-0-3)

This course explores the works of selected American writers addressing class and labor.

**AMST 40223. American War Literature**  
(3-0-3)

Beginning with Mary Rowlandson's captivity narrative and ending with Tim O'Brien's *The Things They Carried*, an exploration of the aesthetic, historical, and theoretical functions and values of war writing in the United States.

**AMST 40224. Tragedy: Shakespeare and Melville**  
(3-0-3)

Using concepts of tragedy as a linking principle, this course reads several Shakespearean plays and then *Moby-Dick*, noting Shakespeare's influence on the American novelist.

**AMST 40225. "Our America": Exploring the Hyphen in African-American Literature**  
(3-0-3) Irving

Close readings of various 20th-century African-American literatures, with foci on how "black subjectivity" is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

**AMST 40226. Strains in Twentieth-Century American Fiction**  
(3-0-3)

Beginning with F. Scott Fitzgerald's "Jazz Age" and ending with Toni Morrison's *Jazz*, a study of thematic commonalities and dissonances in selected 20th-century American novels.

**AMST 40227. Latino/a Poetry**  
(3-0-3)

A study of prominent contemporary Latino/a poets whose work has enriched and diversified the canon of American poetry in the last 20 years.

**AMST 40228. American Literature and Visual Culture**  
(3-0-3)

From early national fiction and portraiture to American modernist poetry and painting, an exploration of the relationships between American literature and the visual arts.

**AMST 40229. African American Poetry**  
(3-0-3)

Close readings of selected contemporary African American poets.

**AMST 40230. Grand Collage: California Poetry, Arts and Culture at Mid-Century**  
(3-0-3)

An exploration of the ways that poetry took a leading role among the arts in California, creating a California culture that through the Beats and the Hippies became a national and international phenomenon.

**AMST 40231. American Novel**  
(3-0-3)

A survey of selected 19th- and 20th-century American novels.

**AMST 40232. Early American Literature**  
(3-0-3)

Close readings of selected 17th- and 18th-century American literature.

**AMST 40233. Our America: African American Literature**

(3-0-3)

Close readings of selected classic American novels.

**AMST 40235. Great American Novels**

(3-0-3)

Close readings of selected classic American novels.

**AMST 40236. The Fictions of Nonfiction and Fiction**

(3-0-3)

An advanced course in fiction and nonfiction prose.

**AMST 40237. Literature across the Americas**

(3-0-3)

National borders mark our Americas today, but for the first European explorers, the landscapes of their “new world” were uncharted and unbounded. The newly encountered land seemed to invite utopian dreams even as it became the arena for genocidal violence. It also invited the act of writing as one mode of inscribing narratives of order and cultural continuity, texts that today retain their power to convey scenes of intense emotional and existential crisis. To reconsider these moments of violence and possibility, we will approach early American literature intrahemispherically, primarily in English and English translation, although bilingual students participating in the Language Across the Curriculum Program will read selected texts in Spanish. We will read comparatively in order to ask trans-American questions. For example, what do we learn when we juxtapose Cortés’ invasion of the Mexican empire to King Philip’s War in the New England colonies? What comparisons arise between the poetry of Anne Bradstreet and Sor Juana Inés de La Cruz; between the captivity adventures of Cabeza de Vaca and Mary Rowlandson? How have Native Nations across the Americas written or spoken the loss of worlds? How have revolutionaries imagined new ones in Latin America and in the United States? At what point do separate histories and literatures reveal commonality and when and how do they point to distinctions? Perhaps most crucially, how might such cross-cultural readings intimate a new dissolution, or re-alignment, of national boundaries in the American hemisphere? The authors and subjects noted above will serve as key markers, but we will also read primary works by William Bradford, Gaspar Pérez de Villagrà, El Inca Garcilaso de la Vega, Sarah Kemble Knight, William Apess, and others as we reconsider the literatures and histories of the Americas in a cross-national paradigm.

**AMST 40238. Class, Labor, and Narrative**

(3-0-3)

This course explores the works of selected American writers addressing class and labor.

**AMST 40239. American Novel**

(3-0-3)

A survey of selected 19th- and 20th-century American novels.

**AMST 40241. Latino/a Literature and Visual Culture**

(3-0-3)

In this course, students will study traditional, folkloric, biographic, and religious texts alongside contemporary Latino/a visual and literary texts that offer new versions of old tales. In thinking about how texts exist in relation to other texts, students will consider the “newness” and “Latino/a-ness” of Latino/a literature as well as its emergence amidst the social, cultural, artistic, and political shifts in the latter half of the 20th century.

**AMST 40242. War, Peace, and the Literary Imagination**

(3-0-3)

In this seminar-style course we will investigate the nature of war and peace through literature, principally 20th-century fiction and poetry. Through texts drawn from various regions of the world, we will (1) examine the metaphors and themes which unmask the realities of war and present struggles for peace, (2) explore the ways the literary works themselves—through language, rhythms, and images—become battlegrounds, as it were, on which the human imagination creates individual

identities, links individuals to communities, constructs, deconstructs, and reconstructs cultural ideologies, and (3) consider the role human imagination plays in moral and civic life. In addition to the literary works, participants in the class become a rich resource for our investigation.

**AMST 40243. Twentieth-Century American Novel**

(3-0-3) Ulin

This course is a close analysis of 20th-century American novels.

**AMST 40244. Our America: African American Literature**

(3-0-3)

Close readings of various 20th-century African American literatures, with foci on how “black subjectivity” is created; the relationship between literature, history, and cultural mythology; the dialectic of freedom and slavery in American rhetoric; the American obsession with race; and the sexual ideology and competing representations of domesticity.

**AMST 40245. African American Poetry and Poetics**

(3-0-3) Wilson

An examination of poetry and poetics by black Americans from the beginnings to the present.

**AMST 40247. Homes and Haunts in Twentieth-Century American Literature**

(3-0-3) Ulin

This course is designed for English majors. It will examine plays, novels, short stories, and poetry set in tenements, asylums, prisons, boarding houses, and haunted houses, and will attend to these texts alongside contemporaneous U.S. social and political ideologies of home. Focal authors include Crane, James, Wharton, Hemingway, Faulkner, Nabokov, Morrison, O’Neill, Plath, Kesey, Welty, McCullers, Malamud, Brooks, Cunningham, Alexie, and Alvarez. Students will write one 5–6 page paper and one 12–15 page research paper, which will be designed in consultation with me over the course of the semester.

**AMST 40248. Caribbean Voices**

(3-0-3)

An introduction to the literature of Anglophone Caribbean.

**AMST 40300. American Thought, Belief, and Values Since 1865**

(3-0-3)

A study of Americans’ most characteristic American intellectual, moral, and religious beliefs, especially as expressed by leading thinkers, and of why these beliefs have flourished in the American cultural setting. Topics will include questions such as the competing authorities of faith and science, the search for truth in a pluralistic society, professional and popular philosophies including pragmatism and post-modernism, moral authority in democratic culture, social science and law, the relation of individuals to communities, the relation of American materialism to American beliefs, the outlooks of diverse sub-cultures, African American outlooks, feminist perspectives, competing religious and secular faiths, and roles of various forms of Christianity and other religious beliefs in American life.

**AMST 40301. Women and Work in Early America**

(3-0-3)

This course will introduce students to a broad view of early American social history that foregrounds the gendered aspects of work in Early America—defined loosely as the period from colonial settlement to 1820. On one level, this approach allows for the recovery of women and girls’ contributions to the formal and informal economies of pre-Industrial early America, including their work activities within the household. This perspective is especially crucial to the examination of white, Native American, and African servitude and/or slavery since gender ideologies dictated the work experiences of large race- and class-defined segments of the population. Yet, cultural retention also played a part, and this course will invite students to investigate the impact of derivative work practices (for example, examining African women’s dominance of market activities in the New World through the lens of West African work practices). Further, while the course title emphasizes

women's experiences, the class and race implications of male work practices in early America will be similarly illuminated by a gender studies approach. Thus, an overarching purpose of the course will be to highlight the fluid and instable conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to European versus non-European, free versus enslaved, and public versus private spheres.

#### **AMST 40302. United States 1900–45**

(3-0-3)

The purpose of this course is to study the political, diplomatic, economic, social, and cultural development of the United States from 1900 to 1945. The principal topics to be investigated will be the Progressive Period legislation of Presidents Theodore Roosevelt, William Taft, and Woodrow Wilson, the causes and effects of World War I, the cultural developments of the 1920s, the causes of the Wall Street Crash and Great Depression, the New Deal legislation of President Franklin Roosevelt, the diplomacy of the interwar period, and the home front during World War II.

#### **AMST 40303. Women in the U.S. South**

(3-0-3)

This course introduces students to the historical study of women in the U.S. South. It will cover topics such as women in slavery, the transition freedom, race relations, and social movements. Through student-centered discussions, presentations, and a variety of different writing assignments, students will analyze how race, class, and gender structured the experiences of women in southern society. At the end of the semester students will be prepared to pursue more advanced research in the field of Women's history. All are welcome.

#### **AMST 40304. Labor Movements in Twentieth-Century United States**

(3-0-3)

This course explores American workers' collective efforts as workers in their search for economic security, political power, and social and cultural autonomy from the 1890s to the near present. For the most part, this course will focus on the unions and related organizations forged by workers throughout the past century—from major umbrella groups like the American Federation of Labor, the Industrial Workers of the World, and the Congress of Industrial Organizations, to important sectoral actors like the Brotherhood of Sleeping Car Porters, the United Automobile Workers, the American Federation of Teachers, and the United Farm Workers. The central questions of the course will be: When, where, and why have U.S. workers organized collectively in the 20th century? And how successful have they been? What has been the response of employers, the government, and the public at large to these collective efforts of workers, and how and why have those responses changed over time? What has been the relationship between organized labor and racial and gender discrimination, as well as the causes of racial and gender equality? And how have Americans generally, and workers in particular, understood the labor movement in relation to capitalism, freedom, and democracy? Students will be expected to write several short papers, engage in regular classroom discussion, and screen several films outside of class.

#### **AMST 40305. Colonial America**

(3-0-3)

This course considers the history of New World exploration and settlement by Europeans from the 15th to the 18th century. It examines the process of colonization in a wide variety of cultural and geographic settings. It explores the perspectives of Native Americans, Europeans, and slaves with a particular emphasis on the consequences of interracial contacts. We will discuss the goals and perceptions of different groups and individuals as keys to understanding the violent conflict that became a central part of the American experience. Lectures, class discussions, readings, and films will address gender, racial, class, and geographic variables in the peopling (and de-peopling) of English North America.

#### **AMST 40306. Catholicism in Twentieth-Century America**

(3-0-3)

The course examines the patterns of Catholic intellectual life, religious culture, social engagement, and public presence in the United States throughout the 20th century. Themes receiving special attention in the lectures and class discussions will include the U.S. Catholic response to the theory of evolution and to the social sciences, the rise and decline of Thomism as the philosophical framework of Catholic thought and education, Catholic participation in the labor movement and the Civil Rights Movement, the new theologies and social ethics of the '60s, the impact of the Second Vatican Council, shifting modes of public Catholicism, and the Catholic culture wars of the 1980s and 1990s.

#### **AMST 40307. Sex, Sexuality, and Gender in the United States to 1890**

(3-0-3)

*Corequisite:* HIST 32706

Sexuality, like other areas of social life, has a history. Yet historians have only written about the history of sex for the last 40 years or so. This course will both introduce students to a variety of current themes in the history of sexuality and invite them to consider how they themselves might research and write that history. The class will survey recent topics in the history of sexuality from first colonial settlement to the end of the Victorian era. Issues we may consider include different religions' attitudes toward sexuality (the Puritans were not anti-sex!), how different cultures' views of sex shaped relations between colonists and Indians, why sex was an important factor in establishing laws about slavery in Virginia, birth control and abortion practices, changing patterns of courtship, men who loved men and women who loved women, and why the average number of children in American families fell by 50 percent between 1790 and 1890.

#### **AMST 40308. Latinos and Religion**

(3-0-3)

This course examines the unique religious history of U.S. Latinos/as, starting with the Spanish and Latin American colonial origins and outlining the rise of parishes and congregations north of Mexico. Readings and lectures will present historical, sociological, and theological methods for examining contemporary issues facing Latino Catholics and Protestants, such as social justice movements, religion in the thought of prominent Latino/a writers and commentators, and ecumenical trends in Latin American and U.S. Latino Christianity. Other important themes include the changing role of Latinos in the U.S. immigrant church, the impact of Latin American liberation theology on U.S. Latinos, and the linkages between religion and cultural identity among peoples with roots in Mexico, the Hispanic Caribbean, and Central and South America presently living in the United States. Lectures and discussions will be supplemented with visual material. Grading will be based on midterm essay exams, class discussion, and a final research paper (12 pages).

#### **AMST 40309. U.S. Foreign Policy Before 1945**

(3-0-3)

This course covers the main developments in American foreign policy from the Spanish-American War in 1898 through World War II. It traces the emergence of the United States as a major world power and examines in some detail how the United States became involved in two world wars.

#### **AMST 40310. Medicine and Public Health in U.S. History**

(3-0-3)

An exploration of themes in European and American medicine. This course integrates the perspectives and issues of social history—Who were the medical practitioners? Who were their patients? What relations existed between these groups? How have the realities of illness and death figured in the lives of ordinary people in different places and times—with the perspectives and issues of the history or medicine as a science? What understandings of the human body and its ills have practitioners had? What tools have they developed and used for intervening in illnesses? Topics include the humoral pathology, epidemics as social crises, the rise of pathological anatomy, the germ theory and public health, the transforma-

tion of the hospital, the history of nursing, changing modes of health care, finance and administration, and relations between “regular” doctors and sectarian medical traditions such as homeopathy and osteopathy.

#### **AMST 40311. Moving New Directions: African Diaspora**

(3-0-3)

Migration and the emergence of new identities have defined the formation and evolution of the African diaspora in the modern era. This course is designed to introduce students of African American studies to the concept of African diaspora and to provide a framework for understanding how it has changed over time. What constitutes the African diaspora? How was it formed? How have people of African descent forged new identities in the Atlantic World and what are the implications of identity construction for people of African descent in the future? These questions form the basis of our historical study of the African diaspora. We examine themes of migration and cultural change through comparative case studies of black communities in the United States, the Caribbean, Africa, and Latin America. The first half of the course will focus on the Atlantic slave trade, the middle passage, and slavery in the Americas. We will examine identity and culture for people of African descent in South Carolina, Louisiana, and Jamaica. The second half of the course will deal with the problem of freedom in the 19th-century Atlantic world. We will direct our attention to free black populations and Creole communities in Louisiana, Brazil, and Sierra Leone and West Africa. We will also consider the impact of emancipation at the end of the 19th century through an examination of black American emigration movements, “back to Africa” and to the U.S. West, and Afro-Brazilian identity in a post-emancipation society. This course will conclude with a discussion of the state of the African diaspora today and its implications for future transformations in African American identity.

#### **AMST 40312. Consumers and Culture in U.S. History**

(3-0-3)

This course will explore the emergence of modern consumer society in the United States. From the vantage point of the close of the 20th century, American culture seems to be defined by the conspicuous consumption of goods. It is important to remember, however, that phenomena like mass marketing, advertising, and mass distribution were not always so entrenched. A historical approach allows us to explore the changing relationship of Americans to consumer goods and the cultural transformation that went along with this change. The course is roughly chronological, with readings organized around a specific theme each week. The course will consist of both lectures and class discussions. Topics covered include the evolution of the American economy, advertising, retailing, gender and consumption, leisure, and consumer protest. There will be two short written assignments and one longer research paper.

#### **AMST 40313. Revolutionary America**

(3-0-3)

This course examines the American Revolution as both a process of change and an event with profound consequences for the history of the American people. It emphasizes conditions and consequences of the Revolution for common people and for those living at the fringes of economic subsistence and political power—laborers, women, slaves, and Native Americans—in addition to the ambitions of the founding fathers. The long-term preconditions for revolution are considered within the contexts of domestic and international politics. We will focus on the conflict that was the heart of the Revolutionary experience and that was the fundamental legacy of the war for American society.

#### **AMST 40314. History of the American Woman II**

(3-0-3)

This course surveys women’s relationship to the social, cultural, and political developments shaping American society from 1890 to the present, concentrating on developments in women’s activism and in popular culture. Topics include the new woman and progressivism, the transformation of feminism in the 1920s, women’s paid and unpaid labor, the “feminine mystique,” the women’s liberation movement of the 1960s, and changing gender roles in recent decades. Particular attention will be paid to the impact of class, race, and ethnicity on issues of gender.

#### **AMST 40315. African American Politics, 1900–50**

(3-0-3)

This course examines the diverse struggles for full citizenship and human rights on the part of African Americans from 1900 to 1950. The topics to be studied include the Great Migration, the New Negro Movement and Harlem Renaissance, the Marcus Garvey Movement, the rise of A. Philip Randolph’s Brotherhood of Sleeping Car Porters, the involvement of blacks in the Communist Party, and the transformations in black culture and politics brought about by the two World Wars. This course will examine the efforts of liberal-integrationist, socialist, communist, and Black Nationalist organizations to combat white racism and qualitatively improve the lives of blacks in various regions of the United States. It hopes to convey blacks’ diverse thoughts on complex issues such as identity, politics, class, gender, race, and nationality.

#### **AMST 40316. Women and War in U.S. History**

(3-0-3)

This course will explore new perspectives on wars fought by Americans and will provide an overview of American conflicts from the colonists’ wars with Native Americans to the current war on terrorism. By looking at the various roles women play in war and examining the ways in which women’s lives can be shaped by war, the course will also introduce students to important themes in women’s history and to new methodologies influential in the study of history. Films and documentaries, and primary and secondary readings will be used.

#### **AMST 40319. History of Cubans in the United States**

(3-0-3)

Cuba’s national hero, Jose Martí, spent most of his adult life in the United States, from 1880 until shortly before his death fighting in Cuba in 1895. Ironically, his most influential writings on Cuban nationalism, still used today by the Cuban government to justify many of their political positions, were written in the United States. Despite the deeply conflictive relationship between Cuba and the United States since 1959, Cubans have always had “ties of singular intimacy” with their neighbors to the north, which explains their northward migrations. For two centuries Cubans have lived in the United States, mostly in Florida but also in many of the nation’s largest cities including New York, Chicago, Los Angeles, Dallas, Houston, and New Orleans. This course will examine the Cuban experience in the United States, especially through the concept of exile. As early as 1820, Cuban exiles arrived in the United States to promote Cuban independence from Spain and, since that time, Cuban communities have consistently influenced political and socioeconomic developments in their homeland. The course will examine the history of Cuban immigration, community formation, socioeconomic integration, political development, expressions of exile and national identity, the emergence of Cuban American identity and impact of Cuban exiles on U.S. foreign policy toward Cuba. The course will also explore those aspects of Cuban history that have contributed historically to the creation of exile communities in the United States, including Cuba’s 19th-century wars of independence against Spain, early 20th-century efforts at political stability, and the Cuban Revolution of 1959.

#### **AMST 40320. History of American Women I**

(3-0-3)

This course surveys the social, cultural, and political developments that shaped American women’s lives from the colonial period to 1890. It will analyze both the ways American culture defined women’s place during different historical periods and the ways women themselves worked to comply with or to resist those definitions. Topics include pre-industrial society, transformations in work and family life, industrialism and class formation, slavery, women’s culture, and the emergence of a woman’s movement. Throughout, stress will be laid on the importance of class, race, and ethnicity in shaping women’s historical experience.

#### **AMST 40321. America Between the World Wars**

(3-0-3)

This course will examine the social, cultural, and political developments that occurred between the United States’ entrance into World War I and the conclusion of the Second World War. Topics to be considered include the post-World War I

resurgence of nativism, the changing social norms and gender roles of the 1920s, the rise of mass culture, the Great Depression, the New Deal, and of course, American involvement in both world wars, with an emphasis on the home front.

### AMST 40322. Chicano History

(3-0-3)

This course will trace the history of Mexican Americans from colonial times to the present. After examining Hispanic colonial origins in 16th-century New Spain, the course will trace the development of Spanish/Mexican colonial communities in what is now the U.S. Southwest, follow their conquest and incorporation into the United States, and explore the development of a Mexican American identity in the 19th century. Themes to be examined for the 20th century include immigration, community growth and formation, exclusion and the Civil Rights Movement, cultural expressions, and the nationalizing of the Mexican American experience.

### AMST 40323. American Indian History

(3-0-3)

This course examines the complicated history of American Indian relations with the British North American colonies and the United States. Beginning with a brief survey of American Indian cultures, we will focus on relations along the moving frontier between the two peoples. Topics include mutual adaptation and exchange, invasion and resistance, environment and economics, and racism and ethnic identity. Covering almost half a millennium, the course will give roughly equal time to the four centuries that followed the first serious attempt at British colonization (1585). Almost two-thirds of the course will, therefore, deal with peoples east of the Mississippi River in the years before 1838.

### AMST 40324. The United States and the Vietnam War

(3-0-3) Hoang

This course examines the participation of the United States in its “longest war”—the conflict in Vietnam. The course is taught primarily from an “American” as opposed to a “Vietnamese” perspective. Broad topics to be covered include Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–75; how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture AND a discussion course. Attendance at BOTH is required. Approximately six books will be assigned.

### AMST 40325. Technology in History

(3-0-3)

A thematic survey of the history of technology from the Neolithic discovery of agriculture to the information age. Topics include the chemistry and metallurgy of antiquity (high tech c. 1000 B.C.E.), technology in Christian theology, the power revolution of 1200, arms races from the 15th century onward, the marriage of art and science, the industrial, agricultural, transport, and communications revolutions, the American system of manufactures, the evolution of the engineering profession, and modern efforts to plan the technological future. These topics form the basis for exploring the following themes: How does technology change? How did we get where we are? Do we have the technology now that we must have, should have, or need to have? What guides technical creativity? How have social effects of technologies been assessed and dealt with? How have technologies fundamentally changed ordinary life and societal organization? This course format includes lectures, two exams, exercises, and a paper.

### AMST 40326. African American Resistance

(3-0-3)

An exploration of a series of cases of African American resistance throughout U.S. history.

### AMST 40327. Crime, Heredity, and Insanity in American History

(3-0-3)

The 19th century witnessed a transformation in the understanding of the origins of criminal behavior in the United States. For many, a religious emphasis on humankind as sinful gave way to a belief in its inherent goodness. But if humans were naturally good, how could their evil actions be explained? Drawing on studies

done here and abroad, American doctors, preachers, and lawyers debated whether environment, heredity, or free will determined the actions of the criminal. By the early 20th century, lawyers and doctors had largely succeeded in medicalizing criminality. Psychiatrists treated criminals as patients; judges invoked hereditary eugenics in sentencing criminals. Science, not sin, had apparently become the preferred mode of explanation for the origins of crime. But was this a better explanation than what had come before? Discussion will be the primary form of instruction.

### AMST 40328. History of Sport and the Cold War

(3-0-3)

This course will explore the ways that sport reflected the political, ideological, social, economic and military struggle known as the Cold War. Sport permitted opportunities to defeat hated rivals or to develop competition more peacefully. It reflected the internal politics and societies in nations, and also illuminated relations among allies. Using a variety of readings, media accounts and film clips, this course will look at a number of crucial teams, athletes, and events from the Cold War, including the 1980 U.S. Olympic hockey team, the controversial 1972 Olympic basketball final, “ping pong diplomacy,” Olympic boycotts, Martina Navratilova and other Eastern European tennis stars, East German figure skater Katarina Witt, Romanian gymnast Nadia Comaneci, the ferocious Soviet-Czechoslovakian hockey rivalry following the Soviet invasion of 1968, and more.

### AMST 40401. American Political Parties

(3-0-3)

Political parties play many vital roles in American politics: They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices—candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, how they have changed over time—have consequences for the working of the American political system. This class explores the contribution of political parties to the functioning of American democracy.

### AMST 40402. Public Policy and Bureaucracy

(3-0-3)

This course explores the process, substance, and efficacy of public policy making and policy implementation in the United States. We begin by asking: Why do some problems become public issues while others do not? Attention is given to how government identifies problems and formulates policies meant to address them. Then we ask, once formulated, how policies are implemented. The course will examine government’s “menu” of options for policy implementation. Student research papers will focus on the evolution over time of a specific policy, examining how that policy’s implementation affected its impact. Requirements for the course include a midterm exam, a research paper, and a final exam. During the semester, students will be required to prepare several shorter papers as progress reports on their research papers. Students taking this course already should have taken POLS 10100 or 20100, Introduction to American Government. It also will be helpful to have had an Introduction to Economics course.

### AMST 40403. Field Seminar in American Politics

(3-0-3)

This is the “core” seminar in American politics, designed to provide a survey of the most important literature in the field. The seminar is intended to present the student with a broad, eclectic view of the current state of the literature in American politics. The readings attempt to provide a sampling of classic and recent theory and substance in the hope of suggesting where scholars stand, and where they seem to be headed, with respect to some major topics in the American subfield.

**AMST 40404. First Amendment**

(3-0-3)

This seminar offers an advanced exploration of Supreme Court jurisprudence involving freedom of speech and expression, freedom of the press, freedom of association, and freedom of religion and religious establishment. We examine the reasoning and assumptions behind these opinions, and we assess the foundations and implications of competing interpretations of cherished constitutional principles. We conclude by evaluating the effects of these decisions on American politics and American society. Requirements include midterm and final exams, a research paper, and active class participation. Enrollment is limited to students with previous course work in constitutional law or constitutional interpretation.

**AMST 40405. American Constitutional Law**

(3-0-3)

The focus of this course is the Constitution as interpreted by the United States Supreme Court. It covers landmark constitutional cases in leading topical areas such as abortion, death penalty, freedom of speech, church-state relations, equal protection, and the war powers of president and congress. The main goals of the course are three: (1) to introduce students to the leading principles and policies of American constitutional law; (2) to acquaint them with the process of constitutional interpretation; and (3) to explore with them the role of the federal judiciary, and most particularly the Supreme Court, in the American political system.

**AMST 40406. Federalism and the Constitution**

(3-0-3)

Beginning in 1995, the Rehnquist Court has sought to restore some of the immunities from federal power that the states had enjoyed prior to the late 1930s. These cases reflect the view that “federalism” is a fundamental feature of the American constitutional order, an institutional principle dear to the framers of the Constitution and integral to the values of “limited government” and “liberty.” Critics of this view contend that the framers’ first priority was a strong national government and that advances in personal and civil liberties in America historically have come at the expense of “states’ rights.” This course asks what “federalism” is in the American context, whether “federalism” in any sense is a genuine constitutional principle, and if so, for what textual, historical, or moral reasons. The first part of the course will be concerned with questions of constitutional interpretation and the decisions of the Supreme Court in the principal areas of federal-state conflict: commerce clause, civil rights, and criminal justice. The second part of the course will turn to what statesmen and philosophers have said about our subject and related matters. In addition to around 30 Supreme Court cases, readings will include selections from *The Federalist Papers* and writings by Tocqueville, Calhoun, Lincoln, Martin Diamond, Herbert Storing, Charles Taylor, and John Rawls. Grades will be based on an objective exam covering the Supreme Court cases, optional oral reports in class, and a term paper. This course is available for graduate credit (as a reading course), with the instructor’s approval.

**AMST 40407. Constitutional Interpretation**

(3-0-3)

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to familiarize students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

**AMST 40408. Comparative Constitutional Liberties**

(3-0-3)

This course is offered in the London Program. The course focuses on the civil liberties jurisprudence of England and the United States. It compares American constitutional cases with English judicial decisions and statutory policies on church-state relations, freedom of speech, political representation, sex and racial discrimination, and privacy and personhood (dealing mainly with abortion, death penalty, and assisted suicide). A major question prompted by these readings—one we will periodically explore—is whether civil liberties or fundamental rights are more effectively secured under England’s unwritten or America’s written

Constitution. Still another question the class will explore is the manner in which English judges and parliamentarians seek to reconcile the principles of parliamentary supremacy and constitutionalism in the face of the recently enacted Human Rights Act (incorporating the European Convention on Human Rights into English law).

**AMST 40409. Comparative Government**

(3-0-3)

This course is offered in the London Program. Its purpose is to assess the integrity and validity of American governmental institutions and political processes in the light of the German and English models of constitutional governance. The seminar plans to focus on executive power arrangements, executive-legislative relations, judicial review, relations between levels of government, electoral and party systems, and selected areas of public policy.

**AMST 40410. Interest Group Politics**

(3-0-3)

Interest groups have long been considered central to an understanding of the working of American politics. As mediating institutions, interest groups sit at the intersection between the public and the political decision makers who govern them. Examining if and how interest groups facilitate effective representation thus tells us a great deal about the functioning and quality of American democracy. In this course, we will consider the historical development of interest group politics, the current shape of the interest group universe, potential bias in representation and function, membership and group maintenance, strategies and tactics, and above all, the influence and role of interest groups on democratic policy making and practice in the United States. We will explore broad theoretical issues, grounded in substantive cases from the current and historic experience of American group politics.

**AMST 40411. Civil Liberties and the Constitution**

(3-0-3)

Most courses in constitutional law narrate the Supreme Court’s evolving positions on constitutional rights and institutions. This course starts not with the Supreme Court but with *The Federalist Papers*, from which it develops a general theory of the social and economic goals or ends of constitutional government in America. It then uses this theory as a framework for assessing the Supreme Court’s position on property rights, race relations, personal privacy, and the place of religion in American life. This exercise can yield results that make for lively class discussion, not only about the Court, but also about the adequacy of the Constitution itself. Grades will be based on a midterm and a final exam, with a paper option in lieu of the final.

**AMST 40412. Schools and Democracy**

(3-0-3) Campbell

Education sits high on the public policy agenda. We are living in an era of innovations in education policy, with heated discussion surrounding issues such as vouchers, charter schools, and the No Child Left Behind Act. This course introduces students to the arguments for and against these and other educational innovations, and does so through the lens of how schools affect the civic health of the nation. Often forgotten amidst debates over school choice and standardized testing is the fact that America’s schools have a civic mandate to teach young people how to be engaged citizens. Students in this course will grapple with the civic implications of America’s educational landscape, and have an opportunity to propose ways to improve the civic education provided to young people.

**AMST 40413. Race and the Constitution**

(3-0-3)

This course will cover the decisions of the Supreme Court in the area of race relations, from the 19th-century problem of fugitive slaves to current problems involving school desegregation, affirmative action, and “private” acts of race discrimination. Class will focus not only on court cases, but also on the broader constitutional and philosophical implications.

**AMST 40414. Diplomacy of American Foreign Policy**

(3-0-3)

The United States emerged from World War II in a new peacetime role as a superpower. We had to discover for ourselves how to combine diplomacy and military power in a manner consistent with our democratic principles. While the policy choices were stark in the days of the Cold War, they have become more complex in recent years. Presented by a career diplomat who headed U.S. overseas missions in four countries, the course emphasizes case studies and the practical problems that have confronted U.S. leaders from the end of World War II to the present. The issues treated will illustrate the height of tensions in the Cold War, the emergence of detente and deterrence, and the challenges of the global agenda after the end of the Cold War. The course aims to help the student understand current foreign policy issues, which will be discussed briefly in class. A research paper (10 pages), a midterm exam, and a final exam are required.

**AMST 40415. Religion and Politics: Comparative Perspective**

(3-0-3)

An examination of the linkage among religious beliefs, world views, group identifications, political attitudes and behavior, based on literature in political science, sociology, psychology, and theology. Topics include the meaning and measurement of religiosity; religious and anti-religious values embedded in American political institutions; religious world views and political philosophy; cue giving and political mobilization by religious groups, denominational traditions, partisanship and issue positions; religious movements, social conflict, and political coalitions.

**AMST 40416. Constitutional Interpretation**

(3-0-3) Barber

Americans have always debated Supreme Court opinions on specific constitutional questions involving the powers of government and the rights of individuals and minorities. The leading objective of this course is to acquaint students with the basic issues of constitutional interpretation and to show how they influence questions involving constitutional rights and powers and the scope of judicial review.

**AMST 40418. Development of American Political Institution**

(3-0-3)

The U.S. Constitution has remained essentially intact since 1787, yet contemporary political institutions and practices would hardly be recognizable to a citizen of the 19th century. Thus, the history of our political institutions is one of change and reform, as well as stability and persistence. This course will focus on the development of the U.S. political system from the late 18th to the early 20th century. Of particular interest will be the evolution of the legislative, executive, and electoral institutions.

**AMST 40419. Civil Liberties**

(3-0-3)

Most courses in constitutional law narrate the Supreme Court's evolving positions on constitutional rights and institutions. This course starts not with the Supreme Court but with the *Federalist Papers*, from which it develops a general theory of the social and economic goals or ends of constitutional government in America. It then uses this theory as a framework for assessing the Supreme Court's position on property rights, race relations, personal privacy, and the place of religion in American life. This exercise can yield results that make for lively class discussion, not only about the Court, but also about the adequacy of the Constitution itself. Grades will be based on a midterm and a final exam, with a paper option in lieu of the final.

**AMST 40420. Black Politics in Multiracial America**

(3-0-3) Pinderhughes

This course undertakes a broad examination of black politics in multiracial America. Racial issues have provoked crises in American politics; changes in racial status have prompted American political institutions to operate in distinctive ways. The course examines the interface of black politics with and within the American political system. How successful have blacks been as they attempted to penetrate the electoral system in the post civil rights era. What conflicts and controversies

have arisen as African Americans have sought to integrate the American system of power? Now that the laws have been changed to permit limited integration, should African Americans integrate politically; that is, should they attempt to "deracialize" their political appeals and strategy, with an effort to "cross over politically"? Are some approaches, such as those of Illinois Senator Barack Obama "not black enough"? What internal political challenges do African Americans face? Some, such as the increasing importance of class and socioeconomic factors, as well as gender and sexuality, may reshape the definition of the black community. Finally, how stable will the past patterns and political organizations and institutions of African American politics be, as America and American politics becomes increasingly multiracial?

**AMST 40421. American Political Parties**

(3-0-3) Wolbrecht

Political parties play many vital roles in American politics: They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices—candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, how they have changed over time—have consequences for the working of the American political system.

**AMST 40500. Ethnicity in America**

(3-0-3)

A study of the ethnic and racial formation of American society and cultural pluralism; a review of the theory and history of ethnicity, its policy implications for family, education, economics, religion, government, and international relations; and in-depth study of one ethnic group of choice.

**AMST 40501. Theorizing Popular Culture**

(3-0-3)

The first half of the course is designed to introduce a variety of theoretical perspectives to the students. We develop a historical overview of popular cultural theory and the several iterations it has taken, to include mass culture theory, Marxism, the Frankfurt Schools, structuralism, semiotics, feminism, and postmodernism. During the first section of the course, students will be required to write a paper using one of the theories to analyze a popular culture phenomenon of the instructor's choice. The second half of the semester is devoted to a historical analysis of the social impact and meaning of rock 'n roll. I begin with a demonstration of African music, using recordings of early chants and celebratory music, and then give the class some example of known slave songs, indicating the presence, as early as 1750, of elements that eventually became R and B, then rock 'n roll. This course is not recommended for students who have taken SOC 34151, as the content will overlap.

**AMST 40502. Deviant Behavior**

(3-0-3)

This course is concerned primarily with the sociological conceptions and theories of deviance. At the onset, deviance is differentiated from those phenomena designated as social problems and social disorganization. The remainder of the course focuses on deviant acts and deviants. Various responses are explored to questions such as: Who are deviants? What does it mean to be a deviant—to the deviant himself, as well as to others? What common social processes and experiences do most deviants undergo? Various theories or models of delinquency, crime, suicide, sex deviation, and drug use are used to aid in constructing a sociological understanding of deviance, the analysis of deviant acts, and the formation of deviant careers or roles.

**AMST 40503. Theoretical Criminology**

(3-0-3)

This course will introduce theoretical interpretations of criminal behavior, empirical research on crime in diverse contexts, and policy debates on crime control

and punishment. Our intent will be to raise critical questions and to challenge commonly held views about the nature of crime and punishment in the United States today. As students of sociology, we will operate under the assumption that crime and punishment are social phenomena; they can only be understood by analyzing their relationship to the broader social, political, and cultural context in which they exist. We shall explore a variety of theoretical perspectives, both classical and contemporary, that attempt to uncover the causes, etiology, and solutions of the problem of criminal behavior. This class cannot be taken if the student has previously taken SOC 30732, because of content overlap.

#### **AMST 40504. Meaning and Materialism in Modern Life**

(3-0-3)

In the 20th century, the twin problems of meaning and materialism have come to the forefront of modern civilization, forming the basis of variety of philosophies and social theories, animating revolutionary movements in art, looming as the silent specter behind mass society and its dramas of consumption. It is by no means clear that the massive technological advances and material gains in advanced industrial societies have contributed to a better way of life—many would say increased meaningfulness is the actual result.

#### **AMST 40505. Social Demography of the U.S. Latin Population**

(2-0-2)

This course is an introduction to the social demography of Latino or Hispanic populations in the United States as to historical background, sociological fields, and current statistics and studies. First, in exploring the demographic perspective on the Latino population, a strikingly young and increasing segment of the U.S. population, the processes of fertility, mortality, and migration are presented. Next to be addressed is the literature on conceptualizing and quantifying the U.S. Latino population, legal frameworks for residence status of migrants, and Latinos in the context of social institutions of family, education, and government. In the future, the changing Latino population is expected to contribute to a U.S. population profile different from the U.S. population of the past century. Thus, the course is relevant in contemporary discussions of immigration policy, globalization, and environment.

#### **AMST 40506. Sociology of the Body**

(3-0-3)

The human body, that extraordinary organic basis of the self and its sign-making abilities, remains very much present in human communication and culture. Though many of our cognitive beliefs may have been developed in civilized societies and their cultural conventions, the self reaches deep into the human body, and that body was refined over many tens of thousands of years of hunter-gatherer life, and developed over an even longer period of hominid, primate, and mammalian evolution. This course aims to focus directly on the organic human body itself as a center of self and society. We will explore a variety of readings related to the human body as organic matrix of meaning, and that reveal bodily bases of social life, such as Ashley Montagu's *Touching: On the Significance of Skin*, or issues of human development. We will also explore the body as a source of self-originated experience through class "practice" sessions, and ways contemporary technoculture seems to seek to displace bodily-based experience.

#### **AMST 40507. Religion in Post-War America**

(3-0-3)

This course surveys the major developments in religious life in the United States since the 1950s through an in-depth examination of several of the most important recent books on the subject, such as Wade Clark Roof's *Spiritual Marketplace*, Tom Beaudoin's *Virtual Faith*, Christian Smith's *American Evangelicalism*, and Helen Berger's *A Community of Witches*. With these works as the backdrop, each student will research and write his or her family's religious history across three generations.

#### **AMST 40508. Latino Image in American Films**

(3-0-3)

This course traces the historical depiction of Chicanos, Mexicanos, Puerto Ricans, Cubans, and other Latinos in Hollywood-made movies. Cinematic plots, roles, and motifs, from the earliest of silent films through the onset of the 1980s, are

examined to explore the changing physical, social, and cultural definitions of Latinos in the United States. All films and filmmakers are considered within their historical context. Though the main object of study is the Latino image, the course also surveys corresponding images for other ethnic minority groups.

#### **AMST 40509. Social Demography of the U.S. Latino Population**

(3-0-3)

This course is an introduction to the social demography of Latino or Hispanic populations in the United States as to historical background, sociological fields, and current statistics and studies. First, in exploring the demographic perspective on the Latino population, a strikingly young and increasing segment of the U.S. population, the processes of fertility, mortality, and migration are presented. Next to be addressed is the literature on conceptualizing and quantifying the U.S. Latino population, legal frameworks for residence status of migrants, and Latinos in the context of social institutions of family, education, and government. In the future, the changing Latino population is expected to contribute to a U.S. population profile different from the U.S. population of the past century. Thus, the course is relevant in contemporary discussions of immigration policy, globalization, and environment.

#### **AMST 40510. Race Relations in the United States**

(3-0-3)

This course focuses on racism and race relations in the United States. Current cases involving racial issues will be presented and discussed in class. Readings, discussion, and lectures will examine the background and current status of the dominant ethnic minority groups in the United States today. The issue of race will also be viewed in relationship to police practices, housing patterns, economic opportunities, gender relations, and politics. Class participation and student experiences will be emphasized.

#### **AMST 40511. Aesthetics of Latino Culture**

(3-0-3) Cardenas

This course will analyze the philosophy and principles underlying the social and political aspects of Latino art. We will approach this by examining a range of topics, including Chicano and Puerto Rican poster art, muralism, Latina aesthetics, and border art. The readings will enable us to survey a number of important exhibitions of Latino art and to explore new possibilities for exhibition and representation. We will examine descriptive material and critical writings concerning issues pertaining to the representation and interpretation of Latino culture and art as well as how these questions surface in a national museum context.

#### **AMST 40512. Building Democratic Institutions**

(3-0-3)

Elements of democratic regimes emerged long before the regimes as such can be identified as being minimally in place. Beginning with a brief discussion of the essential features of democracies, the course examines how and why such institutions emerged, and the critical moments in which the actual transitions to the new democratic regimes occurred. The course focuses on democratizations that took place before the Second World War, and will examine key European and Latin American cases.

#### **AMST 40513. Theorizing Popular Culture**

(3-0-3)

The first third of the course will introduce a variety of theoretical perspectives, presented as a historical overview of popular culture studies, both in the United States and Britain. The theories to be considered are similar to those of SOC 34151, although somewhat more time and effort will be spent with theories associated with post-modernism. Next, students will use a specifically post-modern, deconstructive approach as they examine the meaning systems and messages present in the animated films produced by Disney since 1989, e.g., *The Little Mermaid*, *Aladdin*, *The Lion King*, *The Hunchback of Notre Dame*, and *Mulan*. Students will prepare an analytical paper in which they apply a theory from the course to another of the movies in the Disney oeuvre. Finally, the course will address the social history of rock 'n roll, as noted above. In this section, however, we shall also explore the comparisons of meanings and values, whether in common

or in conflict, of both Disney films and rock 'n roll music. To complete this section, students will write a research paper in which they examine some aspect of the American rock revolution. This course is not open to students who have taken SOC 34151, as the content will overlap substantially.

**AMST 40514. Ethnicity in American Society**  
(3-0-3)

A study of the dynamic process of formation and development of the society of the United States and its cultural, religious, and racial pluralism; a review of the history and theory of interethnic relations, and their manifestation in the basic institutions of family, education, religion, economics, and government.

**AMST 40515. Population Dynamics**  
(3-0-3) Williams

Demography, the science of population, is concerned with virtually everything that influences, or can be influenced by, population size, distribution, processes, structure, or characteristics. This course pays particular attention to the causes and consequences of population change. Changes in fertility, mortality, migration, technology, lifestyle, and culture have dramatically affected the United States and the other nations of the world. These changes have implications for a number of areas: hunger, the spread of illness and disease, environmental degradation, health services, household formation, the labor force, marriage and divorce, care for the elderly, birth control, poverty, urbanization, business marketing strategies, and political power. An understanding of these is important as business, government, and individuals attempt to deal with the demands of the changing population.

**AMST 40516. Cultural Sociology**  
(3-0-3)

In this class, we will examine cultural dimensions of important social processes, and we will survey contemporary sociological approaches to analyzing culture. Examples will include readings on home and work, social hierarchies, political culture, media and the arts, and social change. This class cannot be taken if SOC 30009 has previously been taken; course content may overlap.

**AMST 40518. Materializations of America**  
(3-0-3) Halton

Industrialization in the 20th century resulted in a megatechnic America problematically related to materialism and to earlier visions of the New World. The course will consider a variety of materializations of America.

**AMST 40600. Film and Society**  
(3-0-3)

Students will contextualize the films via a reader packet drawing on articles from anthropology, film studies, basic film production, and culture theory. Course work will include research papers and the production of a short visual narrative piece representing students' conceptualizations of a theme.

**AMST 40601. American Political Parties**  
(3-0-3)

Political parties play many vital roles in American politics: They educate potential voters about political processes, policy issues, and civic duties. They mobilize citizens into political activity and involvement. They provide vital information about public debates. They control the choices—candidates and platforms that voters face at the ballot box. They influence and organize the activities of government officials. Most importantly, by providing a link between government and the governed, they are a central mechanism of representation. These roles—how well they are performed, what bias exists, how they shape outcomes, how they have changed over time—have consequences for the working of the American political system.

**AMST 40602. Native Americans Fact/Fiction**  
(3-0-3)

This course focuses on our images of Native Americans and how popular and scientific writing and film may have shaped these images. The course uses books

and film displaying Indian stereotypes and compares them to ethnographic studies that reveal more realistically the diversity of Native American culture.

**AMST 40603. Global Crime and Corruption**  
(3-0-3)

This class will look at what constitutes the illegal today; who is engaged in crime and corruption; and what kinds of economic, political, and social powers they wield. It will also look at the societies and cultures of “out-laws.”

**AMST 40604. Terrorism**  
(3-0-3)

This course questions basic assumptions of the “war on terror,” using ethnographic literature to challenge conceptions and policies on terrorism today. Is “terrorism” in fact a definable term? How can we use the experience-near methods of anthropology to study people cognitively and politically placed as irretrievably distant? Differences among terrorism, crime, and revolution are explored through examination of specific cases. Building peace in a climate of violence is the ultimate aim of our study.

**AMST 40605. Native North American Art**  
(3-0-3)

Native North American art existed for thousands of years and continues to be created today. Its original context was often sacred (both public and private) and/or political or decorative. Contact with Western Europeans and their art traditions along with the art traditions of Africans, Asians and South Americans beginning about 1600 A.D. and thereafter modified form, technique, and context of Native North American art. However, traditional form, techniques, and context continued through the centuries since 1600. The perception of this art also changed. Most frequently until into the 20th century, the art of Native North Americans was viewed as craft by non-native North Americans and Europeans, but during the 20th century, that view was modified. Native American artists also began to view their own art differently. This change occurred among artists working in traditional mediums as well as those producing art using nontraditional mediums. The collections of Native North American art curated at the Snite Museum exemplify the changing content, techniques, and contexts of this art. This course will allow students to work with our collections under direct supervision. The use of our collections will permit students to observe some of the changes in art which have occurred in the last 150 years. The students' final projects will include a visual presentation of a particular change in material, context, or technique that they have determined through research and direct examination of selected pieces from our collections. For this reason, the course will be limited to 15 students and will be sometimes held in the Snite Museum during hours when the museum is not usually open to the public. The culminating activity will be to create a small exhibit, which will be displayed at the Snite opening some time at the end of the semester.

**AMST 40606. Documentary: Critical Analysis and Method**  
(3-0-3)

We see documentaries in many different forms every day via journalism, reality television, the Discovery channel, and non fiction film. This course turns a critical, anthropological, and methodological eye toward interpreting, constructing, and contextualizing the documentary.

**AMST 40607. Cultures of Fear: Horror Film**  
(3-0-3) Snively

This course will examine the construction and application of central themes in the scope of international horror cinema and how they reveal salient aspects of cultural similarities and differences including gender, sexuality, violence, and sociopolitical climates.

**AMST 40608. Historical Archaeology**  
(3-0-3)

Horror and fear play seminal roles in the construction of cultural mythos and practice. In the modern and post-modern eras, the horror film and a culture of fear have come to prominence as core elements of cinematic expression. In this

course we will examine the construction and application of central themes in the scope of international horror cinema and how they reveal salient aspects of cultural similarities and differences including gender, sexuality, violence, and sociopolitical climates. Students will contextualize the films via texts drawing from anthropology, film studies, basic film production and culture theory. Course work will include research papers and the production of a short visual video piece representing the students' interpretations of "What is scary?"

#### **AMST 40609. Native Americans in Fact and Fiction**

(3-0-3)

*Prerequisite:* (ANTH 10109 OR ANTH 109) OR (ANTH 10195 OR ANTH 195) OR (ANTH 30104 OR ANTH 326 OR ANTH 326A) OR (ANTH 30102 OR ANTH 327 OR ANTH 327A) OR (ANTH 30103 OR ANTH 328 OR ANTH 328A) OR (ANTH 30101 OR ANTH 329 OR ANTH 329A)

This course focuses on our images of Native Americans and how popular and scientific writing and film may have shaped these images. The course uses books and film displaying Native American stereotypes and compares them to ethnographic studies that reveal more realistically the diversity of Native American culture.

#### **AMST 40611. Prehistory of the American Southwest**

(3-0-3) Albahari

This course introduces students to the diversity of cultures living in the American Southwest from the earliest Paleoindians (11,500 years ago) to European contact, the establishment of Spanish Missions, and the Pueblo Revolt of 1680–92. Most of the course is devoted to learning about the complex cultural developments in the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Phoenix Basin. Class work and discussions will focus on important issues such as the adoption of agriculture, the development of villages, the transformation of ideological beliefs and political organization, the importance of migration, and the impact of warfare using information on environmental relationships, technology, and other aspects of material culture. Students will also learn about descendant populations living in the Southwest today including the Pueblo peoples (e.g., Hopi, Santa Clara, Acoma) and Tohono O'odham.

#### **AMST 40612. Genocide, Witness, and Memory**

(3-0-3) Mahmood

How are episodes of mass killing experienced, survived, and remembered? In this course we consider political, social, and cultural trauma as expressed in memoir, documentary, fiction, and academic text. Witness as an ethical stance is examined; the role of memory in shaping morality is questioned. (Does "Never Again" actually work?) We also look at the perpetrators of genocidal killing: Who are they? What prompts their actions? Moreover, are any of us incapable of this kind of violence?

#### **AMST 43100. Immigration, Ethnicity, and Race in the United States, 1840s to the Present**

(3-0-3)

Examining monographs, novels, film, photography, poetry, government records, and court cases, we will explore a variety of immigrant groups and time periods—from the Irish of the mid-19th century to Jamaicans, Mexicans, and the Vietnamese today. We will focus on questions of identity—how immigrants have come to understand themselves racially and ethnically over time—and questions of power—where immigrants have been located within America's developing racial order and what difference this has made in their everyday lives—their jobs, homes, families, and opportunities.

#### **AMST 43102. Confronting Homelessness in American Culture and Society**

(3-0-3)

The purpose of this seminar is to examine the conditions of extreme poverty and homelessness within the broader context of American culture and society. In order to confront the nature of these conditions, this seminar will draw on insights from history, literature, documentary film and photography, and the social sciences. We will focus on the degree of permanence and change in our approach to both

traditional and modern forms of the social problem. There will be an experiential component to the seminar as well.

#### **AMST 43103. Race, Gender, and Women of Color**

(3-0-3)

This seminar analyzes dominant American beliefs about the significance of race and gender primarily through the focusing lens of the experiences of women of color in the United States. How did intersecting ideologies of race and gender attempt to define and limit the lives of women of color as well as other Americans? How have women of color responded to and reinterpreted white American ideas about their identity to develop their own self-defenses and ideologies?

#### **AMST 43109. Material America: Creating, Collecting, Consuming**

(3-0-3)

A seminar exploring how historians, archaeologists, art historians, folklorists, geographers, and cultural anthropologists use material culture as important evidence in interpreting the American historical and contemporary experience. Research fieldwork in area museums and historical agencies such as the Snite Museum, the Northern Indiana Center For History, National Studebaker Museum, and Copsaholm/Oliver Mansion will be part of the seminar.

#### **AMST 43121. American Spaces**

(3-0-3)

A comparative survey of the multiple histories of several natural and human-made environments created in America, from the New England common to the Los Angeles freeway. Using specific cases studies, the course will analyze sites such as the Mesa Verde pueblo, Rockefeller Center, the Southern plantation, the Midwest Main Street, the Prairie-style residence, the Brooklyn Bridge, New Harmony (Indiana), U.S. Route 40, the American college campus, Pullman (Illinois), the skyscraper, Spring Grove Cemetery (Cincinnati), the Victorian suburb, Grand Central Station, Golden Gate Park, Coney Island, Yosemite National Park, Chautauqua (New York), and the 1939 New York World's Fair.

#### **AMST 43123. Jack Kerouac, the Beats, and Dylan**

(3-0-3)

This seminar will re-examine Kerouac and his prose in relation to Beat subculture and the larger context of post-World War II American society. Although the work of other Beat writers, such as William S. Burroughs, Allen Ginsberg, and Gary Snyder will be considered, the primary focus will be on Kerouac. Moreover, the seminar will question the cultural codification of Kerouac as "King of the Beats" and advance the notion that he was a prose artist on a spiritual quest. Or, as Ginsberg aptly put it—an "American lonely Prose Trumpeter of drunken Buddha Sacred Heart."

#### **AMST 43124. Comparative Cultural Studies**

(3-0-3)

The purpose of this seminar is to introduce students to comparative dimensions of American studies. International perspectives will be explored and approaches that compare American culture with another national culture will be encouraged. Intranational comparative topics will also be welcome (example: Asian American studies). Concepts, methods, and materials related to comparative studies will be examined. Students will work on selecting appropriate comparative topics, organizing information and ideas, developing themes, and designing an interdisciplinary framework for their projects.

#### **AMST 43125. Writing and Editing**

(3-0-3)

This course takes students beyond the basics of reporting the news to work on longer journalistic projects and the editing process involved in completing more extended features and pieces of analysis. Students will review assignments completed for the class and act as editors to make suggestions for improving individual efforts. Several projects will make up the principal work of the semester.

**AMST 43128. Limitless Desire: Literature and the Creation of Consumer Culture in America**

(3-0-3)

This course traces the social changes that accompanied America's movement from early retailing to a full-blown consumer culture. Beginning with representations from the later part of the nineteenth century, particularly of the development of Chicago as a mail order capital of the world and moving into the present through an examination of television shopping networks, this course will use material from a variety of perspectives and disciplines to examine what became a wholesale transformation of American life. In attempting to trace the trajectory of change from a country often identified by its rural isolation to a country of relentless publicity, from the farm to Paris Hilton, (who returned to *The Simple Life*), we will look at a series of linkages each of which played a specific and contributory role in the cultural shift toward a fully saturated consumerism. For instance, the early mail order catalogue empires of Aaron Montgomery Ward and Richard Warren Sears depended on the capacity of the railroad and postal service to transport their goods from shopping catalogues to country kitchens, goods which went beyond kitchen utensils, clothes, ornaments and shoes to include assembly-ready homes. South Bend has several Sears and Roebuck homes and part of our class time will be spent in looking at these houses in the context of the course themes. All of our discussion will take place against the backdrop of a larger question about the democratization of desire, about whiter American culture became more or less democratic after the introduction of the mail order catalogue. Thus the linkage between the catalogue, the home shopping network, and the notion that freedom to desire goods is a measure of democratic freedom. Of course, the possibilities for manipulation and control are also limitless.

**AMST 43129. Images of Women in American Cinema**

(3-0-3)

In viewing any film, we must ask ourselves what the filmmakers want us to think. To answer that question for a specific genre, we will be studying portrayals of 20th-century women in film and how these images have evolved in reaction to, and as a backlash against, the modern feminist movement.

**AMST 43135. Women and Work in Early America**

(3-0-3)

This course will introduce students to a broad view of early American social history that foregrounds the gendered aspects of work in Early America—defined loosely as the period from colonial settlement to 1820. On one level, this approach allows for the recovery of women and girls' contributions to the formal and informal economies of pre-Industrial early America, including their work activities within the household. This perspective is especially crucial to the examination of white, Indian, and African servitude and/or slavery since gender ideologies dictated the work experiences of large race- and class-defined segments of the population. Yet cultural retention also played a part, and this course will invite students to investigate the impact of derivative work practices (for example examining African women's dominance of market activities in the New World through the lens of West African work practices). Further, while the course title emphasizes women's experiences, the class and race implications of male work practices in early America will be similarly illuminated by a gender studies approach. Thus, an overarching purpose of the course will be to highlight the fluid and instable conceptions of work that were applied alternately to masculine as opposed to feminine occupations, just as they were alternately applied to European versus non-European, free versus enslaved, and public versus private spheres. This course fulfills the humanities requirement and the diversity requirement for second majors.

**AMST 43137. The Meaning of Things**

(3-0-3)

This course asks how objects as diverse as an ND class ring, a pair of jeans, a Lava Lamp, or an iPod acquire meaning and value. This seminar will introduce students to a range of practices relating to consumption in American history. We will investigate the gendered aspects of production, marketing, buying, and using goods as these impact not only on gender, but also on the construction of a

range of identities. This will lay the foundation for students to write substantive individual research papers on a "thing" of their choice.

**AMST 43139. Between Nature and Culture: the Transformation of American Culture**

(3-0-3)

All her life Edith Wharton sat on the edge of change. All her life she had one foot in the past and one firmly in the present. Her vision looked ahead to America's transnational and cosmopolitan future as much as it found comforts and recognitions in the country's more provincial past. In her autobiography *A Backward Glance* (1934), Wharton suggested that the "small society into which [she] was born was 'good' in the most prosaic sense of the term, and its only interest, for the generality of readers, lies in the fact of its total extinction, and for the imaginative few, in the recognition of the moral treasures that went with it." A rather ambiguous statement to be sure. Wharton's elegiac lament for the past is always conflicted, both in her fiction and in how she lived her own life—like her friend Henry James and a number of her other acquaintances—Wharton became one of those transnational, cosmopolitan, America expatriates who helped shape twentieth-century America. She sat in the midst of a broad and influential group of cultural and intellectual figures whose works addressed, contested, fomented, resisted, and embraced the sweeping social changes America underwent in the period following the conclusion of the Civil War and leading up to the onset of World War I. Topics for discussion will include the idea of cosmopolitanism; constructions of citizenship, of race, of nation; the notion of home and exile; emerging transnationalism both individual and national; and political imperialism. This is not a course on Edith Wharton, but an investigation that will use Wharton's writings as a medium through which we will examine some of those cultural changes which revolutionized modern America and changed the world.

**AMST 43140. Post-9/11 American Fiction and Culture**

(3-0-3)

In speaking of the after-effects of the first World War, the American novelist Henry James said: "The war has used up words; they have weakened, they have deteriorated like motor car tires; they have, like millions of other things, been more overstrained and knocked about and voided of the happy semblance during the last six months than in all the long ages before, and we are now confronted with a depreciation of all our terms, or, otherwise speaking, with a loss of expression through increase of limpness, that may well make us wonder what ghosts will be left to walk." Writers such as Don DeLillo, Cormac McCarthy, and Phillip Roth, the authors of the 9/11 Commission Report, filmmakers, politicians, and intellectuals have all portrayed the post-9/11 world in language similar to James' post-apocalyptic vision. This course looks at contemporary American culture and society and asks whether or not there is a definable post-9/11 narrative and aesthetic. We'll address the ways in which the world has changed since 9/11 and how those changes have impacted daily life, local communities, the national consciousness, and global affairs. Discussion of these changes will be situated in our examination of major, post-9/11 novels, works of art, film and other media, formal governmental publication and policies, and religious writings. This course will have some short writing assignments, class presentation, and a final research paper.

**AMST 43141. Oral History I: Memory and Truth**

(3-0-3)

This is the first of a two-semester senior seminar in oral history theory and methods. By surveying the current field, students will learn how oral history is uniquely suited to both contribute to historical knowledge and challenge dominant narratives. The final project will prepare students to engage in collecting oral histories during the spring semester if they register in Oral History II: Practicum.

**AMST 45900. Publishing Internship**

(3-0-3)

Apprentice training with *Notre Dame Magazine*.

**AMST 45901. Community Service Internship**

(3-0-3)

Apprentice training with community social service organizations. Satisfactory/unsatisfactory credit only.

**AMST 45902. Historical Research Internship**

(3-0-3)

Apprentice training in archives or museums or historical preservation with local organizations. Satisfactory/unsatisfactory credit only.

**AMST 45903. News Internship**

(3-0-3)

Apprentice training with newspapers. Satisfactory/unsatisfactory credit only.

**AMST 45905. News Internship**

(3-0-3)

Apprentice training with newspapers. Satisfactory/unsatisfactory credit only.

**AMST 46920. Directed Readings**

(3-0-3)

Directed readings taught by individual faculty members. Permission required.

**AMST 47910. Senior Honors**

(0-0-3)

Senior Honors Program

**AMST 47930. Special Studies: Reading and Research**

(V-0-V)

Special studies offers students the opportunity to pursue an independent, semester-long reading or research project under the direction of a faculty member. The subject matter of special studies must not be duplicated in the regular curriculum.

**Gallivan Program in Journalism, Ethics, and Democracy****JED 30100. Fundamentals of Journalism**

(3-0-3) Ciccone

What is news? What are the most effective ways of presenting news to the public? What ethical decisions are involved in gathering and reporting news? These are a few of the questions addressed in this class.

**JED 30101. Broadcast Journalism**

(3-0-3) Sieber

*Prerequisite:* JED 30100

Four major topics are covered: (1) Writing for broadcast: Emphasis on developing the student's understanding of grammar and style in the construction of effective news stories; (2) newsroom structure: understanding who does what in today's broadcast newsroom and how economics affects the flow of information. (3) journalism ethics: analysis of personal values, ethical principles, and journalistic duties that influence newsroom decisions; and (4) legal considerations in news gathering with special attention paid to libel laws and invasion of privacy.

**JED 30102. News in American Life**

(3-0-3) Storin

*Prerequisite:* JED 30100

This course seeks to promote an understanding of modern media by examining the goals and motivations of news makers, the power of instant information, the future of news delivery and an examination of how the traditional principles of fairness, privacy and ethics are treated. Students will read several books and newspaper articles dealing with the history and the business of the media, and will use daily newspapers throughout the course.

**JED 30105. The Craft of Journalism**

(3-0-3) Schmuhl

This class focuses on how print and broadcast journalists work—how they think and act as well as the problems they face in delivering news, analysis, and commentary. Several sessions will be devoted to presentations by visiting correspondents, editors, and producers, explaining their approaches to specific stories and circumstances. In addition, students will discuss the issues and questions raised in several books and other readings.

**JED 30106. Witnessing the '60s**

(3-0-3)

*Prerequisite:* (AMST 30100 OR AMST 301)

The purpose of this interdisciplinary course is twofold: to examine the social context and cultural change of the '60s, on the one hand, and on the other to explore the various journalistic representations of events, movements, and transformation. Much that was written during the period was ephemeral. There are, however, certain lasting accounts of the '60s by authors who command respect today, writers whose new publications or publications about them get front-page reviews in the *New York Times Book Review* section. We will focus on the manner in which each writer witnessed the '60s as well as the unique interaction between personal expression, social event, and cultural meaning. We will focus on fresh styles of writing, such as the new journalism popularized by Tom Wolfe, as well as writing that is aimed toward protest, resistance, dislocation, solipsism, and reportage. Major topics for consideration include the counterculture and the movement—a combination of civil rights and anti-war protest. These topics will sharpen our interest in social history, cultural change, politics, foreign affairs, music, literature, and documentary film.

**JED 30107. Media Ethics**

(3-0-3) Storin

This course will examine the journalistic and ethical challenges that newsroom managers face as well as the issues that reporters in the field must tackle on a daily basis. Roughly half of the course will deal with case studies of ethical dilemmas

and the other half will involve students in making choices for the front of the mythical newspaper. Although there will be readings from books on the topics, students will be expected to read *The New York Times*, *The South Bend Tribune*, and *The Observer* on a regular basis, especially on the class days when the front-page decisions will be made. The stories in those newspapers will provide the basis for those decisions. We will also consider how television deals with news on local and network levels.

### JED 30108. Advanced Reporting

(3-0-3) Colwell

This is an advanced course in journalistic reporting and writing devoted to learning how to prepare, in a professional manner, in-depth articles on issues and events of community interest for Notre Dame and in this area. Emphasis will be on the techniques, ethics, and responsibilities of conducting interviews and research and crafting pieces for newspapers and other publications. Open to American studies majors and journalism, ethics, and democracy minors by permission. Other applicants must submit writing samples for review.

### JED 30109. Multimedia Journalism

(3-0-3) Schmitt

The 21st-century journalist needs to be comfortable with what is called “writing across the media” and can no longer be selective about which form of communication to build a career around. In many newsrooms, print journalists are now expected to perform on radio or in front of TV cameras, while the bylines of electronic journalists are turning up in newspapers and magazines. Such media “convergence” is already more the norm than the exception. On top of that, the Internet has become a major medium in its own right, encompassing different styles of communication. While the focus of this course will be on writing, it will expose students to a variety of media in an effort to prepare them for the reality of modern communications careers.

### JED 30110. Media Criticism

(3-0-3) Wycliff

*Prerequisite:* JED 30100

This course will explore the work of such seminal American media critics as A.J. Liebling and Walter Lippmann, as well as the plethora of contemporary critics in newspapers, magazines, television, and Web publications. It will examine the philosophical principles against which journalism in the American democracy ought to be measured. It also will explore the phenomenon of the ombudsman, or reader representative, in modern American media, with a particular focus on whether ombudsmen have been able to build or buttress the credibility of news organizations. And it will challenge students to write on a regular basis their own media criticism.

### JED 30112. Persuasion, Commentary, and Criticism

(3-0-3) Colwell

*Prerequisite:* JED 30100

This course will consider the roles of persuasion, commentary, and criticism in contemporary American culture and will explore the techniques of these forms of expression. Students will prepare and discuss their own writing assignments, including opinion columns, editorials, and critical reviews of performances or books. Ethics and responsibilities in contemporary American journalism in expression of opinions also will be explored. Assignments will serve as the examinations in this course, which is taught by a political columnist for the *South Bend Tribune* who also serves as host of public affairs programs on WNIT-TV, Public Broadcasting. Open to American studies majors and journalism, ethics, and democracy minors by permission. Other applicants must submit writing samples for review.

### JED 30114. Narrative Nonfiction for the Popular Audience

(3-0-3) Manley

*Prerequisite:* JED 30111

Most of what’s being read by Americans in the fields of politics, sports, and the rest of popular culture isn’t written for scholars and doesn’t “prove” its case in a formal sense. Most essays and books rely on the humanizing effects of personal

narratives—in either the first or third person—for their persuasive power. How does a story about a single case serve to convince a broad audience to feel a certain way or take a course of action? We can learn these skills by studying the rhetorical qualities of popular nonfiction. This course will develop skills in producing and critiquing such pieces, both structurally and, more importantly, at the level of the building block of communication, the individual sentence. We’ll use the seminar and workshop formats to discuss each other’s work along with published work. Students will produce a few guided short pieces and two longer essays on topics of their choosing.

### JED 30116. Media and the Presidency

(3-0-3) Ohmer

*Prerequisite:* JED 30100

As the brouhaha over Howard Dean’s “yell” illustrates, media have come to play a key role in the coverage of presidential elections. This course examines how print and broadcast media have functioned in U.S. elections since the way we choose a President was first established. After a brief overview of changing relationships between journalists and presidential candidates in the 19th century, we will focus on elections since the 1920s, when radio first broadcast election updates. We will analyze how candidates have used radio, television, and the Internet to construct images of themselves and their platforms, and how journalists have become an active force in representing the political process. Rather than see electronic media as neutral or “objective,” we will assess the narrative strategies and visual and verbal codes by which media present politics to us, the voters.

### JED 40301. News Internship

(3-0-3)

Apprentice training with newspapers. Satisfactory/unsatisfactory credit only.

## Department of Anthropology

### ANTH 10109. Introduction to Anthropology

(3-0-3) Kuijit; Lende

This course deals with the nature of anthropology as a broad and diverse area of study. The anthropological study of humankind will be approached from the perspectives of physical anthropology, prehistory and archaeology, and linguistic anthropology and sociocultural anthropology. The diversity of humankind will be explored in all its aspects from times past to the present.

### ANTH 10195. Introduction to Anthropology Honors

(3-0-3) McKenna

*Prerequisite:* (ALHN 13950 OR ALHN 195)

Anthropology moves forward from the classification of our species in biological terms to explore, in theory and by empirical investigation, the particular forms of cultural expression that characterize the development of human societies and account for their richness and their remarkable variety. It addresses evolution and genetics, ecological adaptation, and the emergence of complex societies. It looks into language and other symbolic systems. It studies the vast domain of social and cultural life, from kinship to kingship and from cyborgs to shamans. Seminar format.

### ANTH 13181. Social Science University Seminar

(3-0-3) Nordstrom; Rotman

Anthropology, the holistic study of humans and their societies and cultures, is the focus of this seminar course. Through discussion and analysis of a variety of anthropology texts, this seminar course aims to develop writing skills among first-year students while exposing them to some central problems and issues within anthropology. Adopting an approach that reflects the four-field character of anthropology, the seminar will encourage students to explore topics such as (1) anthropology as a way of knowing; (2) anthropology as an encounter with, and effort to explain, human diversity; (3) anthropology as a discipline that uniquely contributes to our understanding of the symbolic dimensions of human behavior and communication; (4) anthropology as a discipline that uniquely contributes to our understanding of human strategies for subsistence and survival; and (5) anthropology as a discipline that uniquely contributes to our understanding of human biological and cultural origins.

### ANTH 20051. Globalization and Social Movements

(3-0-3) Smith

In what ways does an increasingly global political, economic, and cultural system affect our lives? Has globalization led to increased peace and justice, or to new types of conflict and inequality? How has globalization affected national and transnational social movements? This course examines the ways in which changes in the global economic and political system affect politics within countries. First, we will briefly review the broader research literature on the sociology of social movements. Readings will cover a range of different movements, such as those working to protect the environment, advocating for economic justice, addressing social problems such as extreme poverty and public health, and fighting for the rights of women and working people. Then, we will look at how globalization has affected social movements. This course is particularly applicable to students majoring in business, political science, economics, peace studies, anthropology, sociology, and any foreign language. Students planning to study abroad may also be interested.

### ANTH 20105. Introduction to Human Ethology

(3-0-3)

This course explores the cultural and evolutionary origins of language, nonverbal communication, infant behavior, parenting, human aggression, sexual behavior, gender development, and human courtship rituals. Each subject is examined from a cross-species, cross-cultural, evolutionary, and developmental (including historical) perspective.

### ANTH 20111. Anthropology of Human Sexuality

(3-0-3) Fuentes

*Prerequisite:* (ALHN 13950)

Sexuality is a complex and multi-faceted suite of biological and cultural/behavioral components. It is an important part of the human existence, especially in modern-day North American society. This course seeks to examine human sexuality in an anthropological context. We will review sexuality in an evolutionary perspective via a comparison of nonhuman primate sexual behavior and the theoretical constructs surrounding adaptive explanations for human sexuality. The physiology of sex and the development of the reproductive tract will also be covered. The remainder of the course will consist of the evaluation of data sets regarding aspects of human sexual practice, sexual preference, mate choice, gendered sexuality, and related issues of human sexuality.

### ANTH 20120. Current Topics in Bioanthropology

(3-0-3)

This course explores the latest developments in biological anthropology such as, but not limited to, aggression and cooperation in human and nonhuman primates, population genetics, human diversity, the concept of race, primate evolution and behavior, patterns of adaptation, and evolutionary medicine. Emphasis will be on the role of biological systems and evolutionary theory.

### ANTH 20220. Alcohol and Drugs: Anthropology of Substance Use and Abuse

(3-0-3) Lende

*Prerequisite:* (ALHN 13950)

This class will cover biological, cultural and applied aspects of how anthropology approaches the diversity of substance use practices around the world, as well as resultant social problems and social reactions. The course will draw on both historical and ethnographic analyses to situate alcohol and drug use in the realm of human behavior and experience. Addiction as a concept will be critically analyzed from both biological and cultural perspectives. Policy implications of an anthropological understanding of substance use and abuse will be developed in the later part of the course.

### ANTH 20305. Political Anthropology

(3-0-3)

This course explores how anthropologists approach the study of political phenomena. What exactly constitutes “the political” will be one of our initial concerns. First, we will review the intellectual history of political anthropology in order to contextualize current paradigms. Second, we will read key texts that have influenced how anthropologists think about the state, nation, and political struggles. Finally, we will explore how anthropological analyses can help us reframe contemporary political debates by scrutinizing the assumptions that political actors make about sociopolitical orders. Throughout the course, we will read various ethnographies that illustrate current trends and future possibilities in the field of political anthropology.

### ANTH 20520. Archaeology of Egypt

(3-0-3) Chesson

The course focuses on key anthropological concepts such as kinship, ritual, political economy, mortuary practices, cultural contact, and the future of Egyptian archaeology, by exploring case studies that highlight the extraordinary archaeological heritage of Egypt.

### ANTH 30001. Mesoamerican Art: Olmec and Their Legacy

(3-0-3)

This course will introduce the student to the Mesoamerican world view by tracing the origins of Mexican art, religion, and culture from the development of the Olmec civilization up to Aztec times. Examination of the iconography and function of art objects through slide lectures, as well as hands-on, in-depth study of individual pieces of sculpture. A good visual memory is helpful.

**ANTH 30021. Critical Approaches to the Anthropology of Race**

(3-0-3) Hauser

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle the anthropology of race from a critical perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

**ANTH 30023. Introduction to Irish Folklore**

(3-0-3)

This course will discuss the 19th-century concept of folklore and its application in Ireland. "Irish folklore" is usually understood in terms of three main and related domains: "folk narrative" (or oral literature), "folk belief" (or popular religion) and "material folk culture." These will be examined with special emphasis placed on narrative. Representative oral narrative texts from the Gaelic tradition will be studied in translation.

**ANTH 30101. Fundamentals of Biological Anthropology**

(3-0-3) Sheridan

This course approaches human evolution from a theoretical point of view that combines both biological and cultural processes into a cohesive biocultural model. It begins by tracing the development of modern evolutionary theory and the place of evolutionary studies in anthropology, especially in the subfield of bioanthropology. These concepts provide the framework for understanding the many lines of evidence that anthropologists use to explore and explain human evolution. These include studies of our primate relatives, through the intricacies of the fossil record, to archaeological evidence for the invention of material culture from the simplest stone tools to the complex cultural world that we live in today. Modern human variation can only be explained as the result of evolutionary forces acting on the complex interplay of biology and culture over millions of years. We continue to be affected by these forces, and this course not only provides information about where we came from, it also provides the scientific backgrounds to help us understand where we might be going as our species continues to evolve.

**ANTH 30102. Fundamentals of Archaeology**

(3-0-3) Chesson; Glowacki

This course is an introduction to the methods, goals, and theoretical concepts of archaeology, with a primary focus on anthropological archaeology practiced in the Middle East, North America, and Europe. The field of archaeology is broadly concerned with material culture (at times combined with textual information) that can be employed to generate interpretations about past human societies. The challenge of this social science is to interpret past societies and anthropological behavior using the fragmentary, but nonetheless rich and complex, database of the archaeological record. Lecture topics will include the methods and goals of archaeological excavation; analytical techniques employed in material studies; and the problems and challenges in the interpretation of past human behavior. Case studies of survey, excavation, and analytical techniques will focus on recent or ongoing investigations of archaeological sites in North America, Central America, Europe, Africa, and the Middle East.

**ANTH 30103. Fundamentals of Social and Cultural Anthropology**

(3-0-3) Albahari; Smith-Oka

This course introduces students to the field of social-cultural anthropology. Cultural anthropologists are primarily interested in exploring issues of human cultural diversity across cultures and through time. This course will explore key theoretical, topical, and ethical issues of interest to cultural anthropologists. We will examine diverse ways in which people around the globe have constructed social organizations (such as kinship, and political and economic systems) and cultural identities (such as gender, ethnicity, nationality, race, and class) and we will consider the impact of increasing globalization on such processes. Throughout

the course, we will consider how different anthropologists go about their work as they engage in research and as they represent others through the writing of ethnographies.

**ANTH 30104. Fundamentals of Linguistic Anthropology**

(3-0-3) Blum

Language is fully embedded in human culture and society. It has both meaning and efficacy; that is, it both means things and does things. Our goal in this course is to become aware of some of the ways language functions in social life, often below the level of awareness of its users. Students will engage in a number of practical exercises that demonstrate some of the more astonishing features of language all around us. Topics include the nature of language; ethnographic approaches to language; conversational analysis; language, identity, and power; and language, culture, and thought.

**ANTH 30160. Anthropology of Race**

(3-0-3) Fuentes

*Prerequisite:* ANTH 30101 OR ANTH 30102 OR ANTH 30103 OR ANTH 30104

While issues of race and racism are pervasive in our society, most people know surprisingly little about the social, biological, political, and historical factors at play. Race is simultaneously a very real social construct and a very artificial biological one. How can this be? Why do we care so much about classifications/divisions of humanity? This course will tackle what race is and what it is not from an anthropological perspective. We will learn about the biology of human difference and similarity, how societies view such similarities and differences, how our social and scientific histories create these structures, and why this knowledge is both extremely important and too infrequently discussed.

**ANTH 30190. Infancy: Evolution, History, and Development**

(3-0-3) McKenna

Explores aspects of infant biology and socio-emotional development in relationship to western child care practices and parenting. Western pediatric approaches to infancy and parenting are evaluated in light of western cultural history and cross-cultural, human evolutionary and developmental data. A variety of mammals is included as a comparative background to explore the relationships between infant physiology, mental and physical health and contemporary infant care giving concepts. Not open to students who have had ANTH 30194.

**ANTH 30305. Immigration in Global Perspective**

(3-0-3) Albahari

How do people in immigrant-receiving countries form their attitudes toward immigrants? What are the unintended consequences of increased governmental investments in border and immigration control? What are the differences between refugees and other migrants? How is immigration related to the 2005 riots in France? In this course, we will be able to examine such questions, and more generally to understand the causes, experiences, and consequences of transnational migration. We will acquire a sound interdisciplinary understanding of migration in its historical, social, political, and cultural facets. Diverse aspects of immigration history, policy implementation, and migrants' lives will be examined, with fieldwork accounts from countries of origin and from the United States, Europe, and Japan. Issues to be addressed include ethnic neighborhood formation; gender and class differences in migration and settlement; religion; identity formation; border enforcement; racism; and mass-media representation.

**ANTH 30320. Native Peoples of North America**

(3-0-3) Mack

This course offers a survey of the major groups with an emphasis on their forms of social organization; their political and economic patterns; and their technological, religious, and artistic realms. Beginning with archaeological and linguistic evidence that traces the process by which the American Indians came to occupy the continent, the presentation of material will then follow the classical "culture area" paradigm. This overview recognizes a set of 11 basic divisions such as Eastern Woodlands, the Great Plains, and the Northwest Coast.

**ANTH 30330. Religion, Myth, and Magic**

(3-0-3) Gaffney

The study of religious beliefs and practices in tribal and peasant societies emphasizing myths, ritual, symbolism, and magic as ways of explaining man's place in the universe. Concepts of purity and pollution, the sacred and the profane, and types of ritual specialists and their relation to social structure will also be examined.

**ANTH 30395. Russian Realms: Societies/Cultures of Eastern Europe and Beyond**

(3-0-3)

This course explores the social structures, the historical contexts, and the symbolic universes of the peoples who either identify themselves as Russian or whose way of life has come to be deeply affected by the Russian tradition.

**ANTH 30580. The Forager/Farmer Transition**

(3-0-3) Kuijt

*Prerequisite:* ANTH 30102 OR ANTH 30101

This course explores the transition from hunting and gathering ways of life to agricultural societies and systems of food production in the Old and New Worlds and the origins of food production in diverse areas as a long-term social, conceptual, and economic process.

**ANTH 30592. Prehistory of the American Southwest**

(3-0-3) Glowacki

This course introduces students to the diversity of cultures living in the American Southwest from the earliest Paleoindians (11,500 years ago) to European contact, the establishment of Spanish missions, and the Pueblo Revolt of 1680–92. Most of the course is devoted to learning about the complex cultural developments in the Mimbres Valley, Chaco Canyon, Mesa Verde, the Rio Grande, and the Phoenix Basin. Classwork and discussions will focus on important issues such as the adoption of agriculture, the development of villages, the transformation of ideological beliefs and political organization, the importance of migration, and the impact of warfare using information on environmental relationships, technology, and other aspects of material culture. Students will also learn about descendant populations living in the Southwest today, including the Pueblo peoples (e.g., Hopi, Santa Clara, Acoma) and Tohono O'odham.

**ANTH 30610. Kinship and Comparative Social Organization**

(3-0-3) Rotman

The course uses a broad cross-cultural comparative perspective to identify and analyze the major forms of human social organization. Emphasis is on kinship terminology, descent, marriage, residence units, economic exchange, political structure, and social inequality, among other topics.

**ANTH 30620. Mortuary Practices across Cultures**

(3-0-3)

This course explores how death is treated or has been treated in diverse world cultures and time periods, including how culture affects our beliefs and experiences of death. A central theme of this course is the dynamic relationship between the deceased and the community of the living. Topics to be covered include material manifestations of status, class, gender, and ethnicity as reflected in funerary treatment; symbolic dimensions of dead bodies and mortuary ritual; ancestors and kinship; emotions, mourning, and commemoration; and ritual violence (e.g., cannibalism, sacrifice).

**ANTH 33100. Career Skills Professional Seminar**

(3-0-3) Kuijt

The goal of this proseminar is to engage students in their own professional development, be it either toward a traditional academic career or some other applied career. There are two key components to this course: individual projects and group projects of their own choosing. Individual projects center on technical development (such as the use of PowerPoint and graphics programs), and the development of other professional skills. This includes practical skills such as creating résumés, applying for employment, writing statements of purpose for graduate school or some other professional organization, writing abstracts for professional

meetings, and writing grant applications. Group projects vary with the interest of class members, but can include attending professional meetings, presenting group papers and organizing departmental or university events. This might include organizing speakers and international visits.

**ANTH 33300. Social Concerns Seminar: Introduction to Community-Based Participatory Research Methods**

(1-0-1) Penney

This interdisciplinary seminar focuses on the ways in which researchers and community members collaborate to conduct research that leads to community change and improvement in the quality of community life. The purpose of this seminar is to introduce students to community-based participatory research as a means to examine community challenges through quantitative and qualitative research methods. The seminar is offered through the collaboration of the Center for Social Concerns and the Department of Anthropology.

**ANTH 35110. Primate Behavior and Ecology**

(3-0-3) Fuentes

This course will give students an understanding of primate social systems and the factors that influence their maintenance and evolution. The course will begin with a brief overview of primate natural history (taxonomy of major primate groups and primate evolution). The remainder of the course will use various primate examples to explore the core topics of primate behavior and ecology, including diet and nutrition, predation, social structure, kinship, mating behavior, social dominance, and cognition. Students will also have the opportunity to learn some of the basic data collection techniques used when studying non-human primate behavior, and a trip to the zoo will be scheduled so that they can practice these techniques. Throughout the semester, the students will be asked to read several relevant books/articles (primate case studies) and write reaction papers on their readings.

**ANTH 35210. Health, Healing, and Culture**

(3-0-3) Lende

This course introduces the field of medical anthropology. Medical anthropology examines beliefs, practices, and experiences of illness, health, and healing from a cross-cultural perspective to show that illness, health, medicine, and the body are shaped by social relationships and cultural values from the local level of the family and community to the global level of international development and transnational capitalism. This course will consider the ways in which medical anthropology has historically been influenced by debates within the discipline of anthropology as well as by broader social and political movements. Particular emphasis will be placed on the importance of viewing biomedicine as one among many culturally constructed systems of medicine. Some of the key issues we will explore are medical pluralism and therapeutic choice; biocultural studies; medicalization; the political economy of health and disease; the anthropology of the body; the role of medicine and disease in colonialism and postcolonial movements; and applied medical anthropology.

**ANTH 35250. Cultural Aspects of Clinical Medicine**

(3-1-4) Wolosin

The course examines popular medical concepts and expectations patients bring with them to the clinical or hospital setting, as well as the attitudes, organization, and goals of the clinical medical care. Students divide their time between classroom and service as patient/family liaisons in an area emergency room. Student access to transportation is necessary.

**ANTH 35588. Archaeology Field School**

(3-0-3)

Three weeks of practical instruction in the methods and theory of archaeological survey, excavation, and laboratory analysis. Students learn field techniques and apply them to investigations of both prehistoric and historic archaeological materials by working with artifacts collected during the field course. In addition to the basic archaeological techniques, the class will introduce modern remote sensing methods, including lessons on how to use a total station (laser transit) and equipment for magnetic and resistivity surveys. Student teams will learn how to operate the geophysical survey instruments and will use the instruments to conduct

geomagnetic and soil resistivity surveys of a portion of the archaeological features present, and the field school excavations will be designed to evaluate their theories. There are no prerequisites for this course, but prior exposure to an introductory course in anthropology or archaeology is helpful. In addition to tuition, this course requires payment of a laboratory/transportation fee.

**ANTH 40016. Folklore, Literature, and Irish National Culture**  
(3-0-3)

The ideological character of the 19th-century concept of folklore allowed it to transcend the social category of peasants from whom it was largely recorded. This course will look at the role of folklore in the building of an Irish national culture from the time of the Gaelic Revival. Programmatic texts in Irish and in English by Douglas Hyde, first president of the Gaelic League, and by Séamus Delargy, director of the Irish Folklore Commission, will be discussed. It will also look at a later polemical text of the Gaelic writer Máirtín Ó Cadhain directed at what he perceived as the essentialism of Irish folklorists.

**ANTH 40333. Gender and Violence**  
(3-0-3) Mahmood

*Prerequisite:* ANTH 30103

This seminar interrogates the intersections among male, female, violence, and nonviolence. How is gender related to war and peace across cultures? We explore the biological, psychological, ritual, spiritual, social, political, and military entanglements of sex, gender, and aggression in this course. We examine the lived realities of women and men in zones of conflict as both survivors and perpetrators of violence, and consider the potential of each as peace builders.

**ANTH 40370. Anthropology of the Muslim World**  
(3-0-3) Borbieva

This course will be a survey examination of ethnographic work on the Muslim world appropriate for students with all levels of background in anthropology and Islam. The course will look at the Muslim world broadly defined, including ethnographic work on the Middle East, Central Asia, South Asia, Southeast Asia, Europe, Africa, and North America. The course will consider many aspects of life in Muslim societies, not just religion, including trade, travel, identity, literature, and politics. Because of its relevance to current events, a significant portion of the course will deal with gender relations and constructions of masculinity/femininity in the Muslim context. We will consider such questions as the impact of religion on gender relations, negotiations between textual traditions and “popular” traditions in determining gender relations, and the circumstances in which gender constructions in the Muslim world attract attention from the “West.” The aim of this course is to give students an understanding of a wide array of approaches to ethnography. Lectures and supplementary reading material will situate the central texts in the dominant theories and assumptions of the discipline.

**ANTH 40400. Perspectives in Anthropological Analysis**  
(3-0-3) Mahmood; Oka

*Prerequisite:* (ANTH 30103) OR (ANTH 30104)

Anthropology attempts to make sense of an infinitely complicated world by organizing its observations, inquiries, and explanations. Some of these are grand, while others are modest. Still, all anthropological work involves some kind of analysis. All analysis stems from a view of what is basic and of what is related most centrally. This course introduces the most powerful analytic perspectives in the four subdisciplines of anthropology, preparing students to encounter and situate anthropological works of all sorts. The seminar format encourages student involvement, not only in reading and writing, but also in discussion and analysis of the works under consideration. Written and spoken assignments will permit students to try their hand at a wide range of anthropological practice. **REQUIRED OF ALL ANTHROPOLOGY MAJORS.**

**ANTH 40805. Humans and the Global Environment: Coevolution or Mutual Destruction?**

(3-0-3) Hellmann; Schurr

*Prerequisite:* ANTH 30101 OR ANTH 30102 OR ANTH 30103 OR ANTH 30104

All human populations, from the simplest to the most complex, interact with their natural environment. Humans alter the environment and are, in turn, altered by it through biological or cultural adaptations. Global environmental changes helped to create and shape our species, and modern industrial societies are capable of altering the environment on scales that have never been seen before, creating many questions about the future of human-environmental coexistence. This course explores the ways that humans are altering the global environment and the ways that global environmental changes alter humans in return. Four major topics are examined: global climate change, alterations of global nutrient cycles, biodiversity and habitat loss, and ecosystem reconstruction. Students will complete the course with an understanding of the metrics and physical science associated with each type of change, their ecological implications, and the ways in which environmental changes continually reshape human biology and culture. This course is for graduate students and upper-division undergraduates. This course meets a core requirement for GLOBES students.

**ANTH 40810. Human Diversity**  
(3-0-3)

*Prerequisite:* ANTH 30101

Issues concerning the nature of human diversity (race, intelligence, sex, gender, etc.) are a continuing source of social and scientific debate. This course is designed to present the issues and methods used by physical anthropologists to study both the biological basis of human differences, as well as the ongoing process of human adaptation and evolution in response to climate, nutrition, and disease. Integration of the social, biological, and medical sciences will be employed to investigate modern human variation.

**ANTH 40825. Gender and Health**  
(3-0-3)

*Prerequisite:* ANTH 30103

This course looks at the intersection of gender, health policy, and health care organization around the world. Some of the issues to be discussed include medicalization of the female body; critical medical anthropology; the politics of reproduction; social production of illness and healing; politics, poverty, and health; and national and international health and development policies.

**ANTH 40855. Cultural Difference and Social Change**  
(3-0-3) Smith-Oka

Research or service in the developing world can generate questions about our own role as “the elite” and “privileged” in contexts where our very presence marks us as “outsiders.” In such situations, we frequently grapple with balancing our research objectivity with the oftentimes stark realities we have witnessed and experienced. This course is designed especially for students returning from service projects or study-abroad programs in the developing world to help make sense of these experiences. This process will be achieved through additional scholarly research (frequently self-directed) to better understand the sites that the students visited during their overseas projects, orienting them in relation to broader global, regional, and national patterns; the eventual outcome will be the analysis of each student’s data that is framed by the larger context. Course readings will cover such topics as world systems theory, globalization, development, NGOs, various understandings of “human rights,” applied anthropology, activism, and the relation between cultural relativism and service. Through discussions, readings, presentations, and writing, students will develop an analysis based on their overseas experience, and will focus on the site where they worked, a problem that they observed in cross-cultural perspective, and an examination of strategies for redressing this sort of problem. The overall goal of the course will be for students to gain an understanding of how social science analysis might help to understand and confront problems in cross-cultural contexts. Students can only enroll with the permission of the instructor.

**ANTH 40860. Genocide, Witness, and Memory**

(3-0-3) Mahmood

*Prerequisite:* ANTH 30103 OR ANTH 30104

How are episodes of mass killing experienced, survived, and remembered? In this course, we consider political, social, and cultural trauma as expressed in memoir, documentary, fiction, and academic text. Witness as an ethical stance is examined; the role of memory in shaping morality is questioned. (Does “Never Again” actually work?) We also look at the perpetrators of genocidal killing: Who are they? What prompts their actions? Moreover, are any of us incapable of this kind of violence?

**ANTH 40870. Indian Ocean: Trade and Interaction**

(3-0-3)

*Prerequisite:* ANTH 10109 OR ANTH 10195 OR ANTH 30102 OR ANTH 30103

This course offers an multidisciplinary approach to studying one of the oldest forums for intercontinental trade and interactions: the Indian Ocean. This geographical entity has linked peoples of Africa, Europe, and Asia through the exchange of technology, ideas, goods, and peoples from the dawn of the first systematic intercontinental trade between the Bronze Age polities of Egypt, Mesopotamia, and India-Pakistan, (c. 4th millennium B.C.) to the present era. The class has two objectives: (1) to understand the nature of trade and exchange mechanisms in the Indian Ocean world from both temporal and spatial perspectives; and (2) to underscore the interdependency between trade/exchange and political-economy, climate, society, and history. The required readings include works from various disciplines, including economics, history, political sciences, and geography, as well as archaeology and cultural anthropology. Students will be encouraged to add to the broader understanding of Indian Ocean trade provided by the course by undertaking comparative research projects that examine two periods, two areas or two processes within this larger interactional complex.

**ANTH 40885. Environmental Archaeology**

(3-0-3) Glowacki

Environments and human use of them have both changed dramatically over time. This course explores the relationships between past societies and the ecosystems they inhabited and constructed. It will show how archaeologists investigate the relations between past societies and their environments using concepts from settlement archaeology, human geography, and paleoecology (the study of ancient ecosystems). We will review theories and techniques used in environmental archaeology and will learn about new approaches for the study of prehistoric human ecology. Modern data processing techniques (such as geographical information systems, database software, spatial statistics, and computer-aided mapping programs) will be introduced along with new theoretical approaches that attempt to decode the social meanings of built environments. The materials will be presented through a mixture of lectures, demonstrations, and assignments designed to introduce you to the basic concepts and techniques presented in the course. The term paper will explore some aspects of environmental archaeology of interest to the student.

**ANTH 45308. Native North American Art**

(3-0-3)

*Prerequisite:* ANTH 30101 OR ANTH 30102 OR ANTH 30103 OR ANTH 30104

Traditional Native North American art will be studied through form, technique, and context, as well as the perception of this art as exemplified through changing content, technique, and context. Students will work with the collections in the Snite Museum of Art.

**ANTH 45390. Ethnographic Method and Writing for Change**

(3-0-3) Mahmood

*Prerequisite:* ANTH 30103

The notion that a written text can itself be a “site of resistance,” a location where political commitment and rigorous scholarship intersect, undergirds this course on ethnographic method. We study the construction and interpretation of field notes, subjectivity and objectivity in research, ethical issues in fieldwork, feminist

and postcolonial critiques of ethnographic practice, “voice” and oral history, and aspects of ethnographic inquiry that impact on change processes.

**ANTH 45510. Historical Archaeology**

(3-0-3) Rotman

*Prerequisite:* ANTH 30102 OR ANTH 30103

This course examines the methodological and theoretical foundations for the archaeology of European colonization and the post-colonial material world. Course materials focus on material life and the diversity of sociocultural experiences in North America since 1492. The class examines how historical archaeologists have interpreted life in the world of global capitalism and colonization over the last half millennium and how archaeological insights can be used to understand and critique our own world. The distinctive analytical techniques of historical archaeology will be studied, including documentary research, artifact analysis methods, and field excavation techniques. The course will probe the interdisciplinary nature of historical archaeology, assess the social significance of archaeological knowledge, and scrutinize cultural, class, and gendered influences on archaeological interpretation.

**ANTH 45817. Human Osteology**

(3-1-4)

*Prerequisite:* ANTH 30101 OR ANTH 30102

This lab-intensive course explores the methods used in physical anthropology for studying individual human skeletal remains, as well as those employed to establish biocultural connections at the population level. Forensic techniques utilized in individual identification will be developed in the first third of the course.

**ANTH 45820. Researching Disease: Methods in Medical Anthropology**

(3-0-3)

*Prerequisite:* ANTH 30103 OR ANTH 30104 OR ANTH 35210

This class will provide extensive classroom and hands-on training in research methods for medical anthropology. It will place slightly greater emphasis on qualitative methods, such as participant observation and interviewing, but will provide an overview of quantitative methods (including building surveys and some basic statistical analysis). Students will learn by doing, conducting original research on contemporary health issues in the local community (such as HIV/AIDS and substance abuse).

**ANTH 45832. Anthropology of War and Peace**

(3-0-3) Nordstrom

*Prerequisites:* ANTH 30103 AND (ANTH 30101 OR ANTH 30102 OR ANTH 30104)

This class will explore the human capacity for war and for peace. The course will explore the many forms of war, from tribal conflicts through guerrilla warfare to conventional and nuclear war. It will also study societies without war, the place of war and peace in human society, whether violence is inherent in human nature or learned, and what the future of war and peace is likely to be on our planet.

**ANTH 45833. Global Crime and Corruption**

(3-0-3)

*Prerequisite:* ANTH 30101 OR ANTH 30102 OR ANTH 30103 OR ANTH 30104

This class will look at what constitutes the illegal today; who is engaged in crime and corruption; and what kinds of economic, political, and social powers they wield. It will also look at the societies and cultures of “out-laws.”

**ANTH 45842. Doing Things with Words**

(3-0-3) Blum

*Prerequisite:* (ANTH 30104) OR (ANTH 30103)

This course looks at some of the ways humans do things with words. Topics include religious language; silence; politeness and sincerity; truth, deception, lying, and cheating; linguistic variety; identity, and stereotypes; moral evaluations made of language; and language used for power and solidarity.

**ANTH 45850. Archaeology of Everyday Life**

(3-0-3)

While archaeology is most famous for investigating the temples and tombs of “lost civilizations,” the vast majority of the archaeological record encompasses the material traces of ordinary people in their everyday lives. In this course, students will explore the archaeological remains of peoples’ houses, daily tasks, deaths, jobs, communities, and religions. We will pay particular attention to how archaeologists reconstruct the social, economic, ritual, and political fabric of daily life in the archaeological past, and thus will be drawing on anthropological frameworks for understanding issues of identity, gender, sexuality, race, mortuary practices, constructing communities, and social differentiation.

**ANTH 45854. Museum Anthropology: An Introduction**

(3-0-3) Mack

*Prerequisite:* ANTH 30101 OR ANTH 30102 OR ANTH 30103 OR ANTH 30104

An introduction to the history, philosophy, and professional practices of museums. It includes an examination of the ethical and practical issues of museum work through readings, discussions, and hands-on experience.

**ANTH 45855. Archaeology and Material Culture**

(3-0-3)

*Prerequisite:* ANTH 30101 OR ANTH 30102 OR ANTH 30103

This will be an archaeology lab class that will provide an activity-based setting to explore the meanings and interpretations of archaeological artifacts. It will introduce basic laboratory methods for the organization, curation, and analysis of artifacts such as pottery, stone tools, metals, soil samples, and floral and faunal remains. Lab exercises will introduce course concepts that students will use to analyze a small collection of artifacts from an archaeological site.

**ANTH 45856. Pottery in Archaeology**

(3-0-3)

*Prerequisite:* ANTH 10109 OR ANTH 10195 OR ANTH 30101 OR ANTH 30102 OR ANTH 30103 OR ANTH 30104

In many archaeological sites, pottery is the most common type of artifact recovered. The analysis and interpretation of ceramic remains allow archaeologists to accomplish several goals: establish a chronological sequence, track interaction between different areas, and suggest what types of activities people may have conducted at the site. This course will focus on the ways that archaeologists bridge the gap between the analysis and the interpretation of ceramic data.

**ANTH 45857. Archaeological Materials Analysis: Lithic Technology**

(1-3-4) Kuijt

*Prerequisite:* ANTH 10109 OR ANTH 10195 OR ANTH 30101 OR ANTH 30102

This course will cover laboratory procedures and techniques used in the analysis of a range of excavated chipped stone artifacts from prehistoric contexts. Students will participate in flintknapping practice and work intensively with several archaeological collections.

**ANTH 45858. Archaeological Field School**

(6-0-6)

Six weeks of practical instruction in the methods and theory of archaeological survey, excavation, and laboratory analysis. Students learn field techniques and apply them to investigations of both prehistoric and historic archaeological materials by working with artifacts collected during the field course. There are no prerequisites for this course, but prior exposure to an introductory course in anthropology or archaeology is helpful.

**ANTH 45860. Food and Culture**

(3-0-3) Blum

*Prerequisite:* ANTH 30101 OR ANTH 30102 OR ANTH 30103 OR ANTH 30104

This course examines the many roles of food played in a variety of cultures. We consider food choices and taboos, religious and symbolic meanings of food, dining and social interactions, obesity and thinness, and the political and industrial issues of fast food and the slow food movement. There will be practical and field studies associated with the course. Materials fee: \$30.

**ANTH 45875. Anthropology of Poverty**

(3-0-3)

What is poverty? What does it mean to be poor, destitute, and powerless? Does poverty in the developed world refer to the same conditions and factors that determine poverty in developing and undeveloped countries? What does genteel poverty mean? Does the ability to possess material goods and to consume indicate lack of poverty? What is the cycle of poverty? Can one break out of it? This course will address these and other questions on poverty through anthropological analysis. The course is divided into two parts: (1) poverty in the pre-industrial era, and (2) poverty in contemporary societies. Topics covered in Part 1 include the beginnings of poverty and social inequality in the earliest complex urban societies of the Middle East, Africa, and South Asia; urbanism, production, distribution and poverty in various time periods, including classical Greece and Rome, the Middle Ages and the Early Modern Era; and slavery, colonialism and poverty. Part 2 will address issues such as the relationship between industrialism, colonialism, and poverty in 19th and 20th centuries; instituted poverty in post-colonial and post-industrial societies; and global manifestations of poverty in the 21st century. The course materials include readings from anthropology (archaeology, cultural anthropology, and biological anthropology), history, economics, theology, and political science, as well as documentaries and films.

**ANTH 45880. Archaeology of Gender**

(3-0-3)

*Prerequisite:* ANTH 30101 OR ANTH 30102 OR ANTH 30103 OR ANTH 30104

In this course, students will explore the potential for studying and reconstructing a prehistory of people through archaeology. We will consider the historical and theoretical foundations of creating an engendered past, the methodological and practical aspects of “doing” engendered archaeology, and the intersection between political feminism, archaeological knowledge production, and the politics of an engendered archaeology. Topics for consideration include feminist perspectives on science, anthropology, and archaeology; concepts of gender in prehistory and the present; women’s and men’s relations to craft production, state formation, and space; and the complex relationship between feminism, archaeology, and the politics of women and men in archaeology and the archaeological past. Under the broad theoretical, political, and historical umbrella of feminism, archaeologists today are negotiating their own paths toward an engendered past from multiple directions, and this course will explore the diversity of these approaches toward creating a prehistory of people.

**ANTH 46100. Directed Readings in Biological Anthropology**

(V-0-V)

Intensive independent readings on a special problem area in biological anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 46200. Directed Readings—Medical Anthropology**

(V-V-V)

Intensive independent readings on a special problem area in medical anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 46300. Directed Readings—Sociocultural Anthropology**  
(V-0-V)

Intensive independent readings on a special problem area in sociocultural anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 46400. Directed Readings—Linguistic Anthropology**  
(V-V-V)

Intensive independent readings on a special problem area in linguistic anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 46500. Directed Readings—Archaeology**  
(V-0-V)

Intensive independent readings on a special problem area in archaeology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 48100. Directed Research—Biological Anthropology**  
(V-0-V)

Intensive independent research on a special problem area in biological anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 48110. Directed Research—Bioarchaeology**  
(V-0-V)

Intensive independent research on a special problem area in biological anthropology and/or archaeology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 48120. Directed Research—Sleep Lab**  
(V-0-V)

Intensive independent research at the Mother-Baby Behavioral Sleep Laboratory, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 48200. Directed Research—Medical Anthropology**  
(V-V-V)

Intensive independent research on a special problem area in medical anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 48300. Directed Research—Sociocultural Anthropology**  
(V-0-V)

Intensive independent research on a special problem area in sociocultural anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 48310. Directed Research—Visual Anthropology**  
(V-V-V)

Intensive independent research on a special problem area in visual anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper or produce a video.

**ANTH 48400. Directed Research—Linguistic Anthropology**  
(V-V-V)

Intensive independent research on a special problem area in linguistic anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 48500. Directed Research—Archaeology**  
(V-0-V)

Intensive independent research on a special problem area in archaeology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

**ANTH 48900. Anthropology Senior Thesis**  
(3-0-3)

This course provides the student with the opportunity for independent study and the development of skills in research and writing. The effort is the student's own, from the choosing of a topic to the conclusion presented in the final paper. A thesis director is chosen to guide the student and provide assistance.

**ANTH 56100. Directed Readings—Biological Anthropology**  
(V-V-V)

Intensive independent readings on a special problem area in biological anthropology, about which the student will be expected to produce a detailed, annotated bibliography and write a scholarly paper.

## Department of Art, Art History, and Design

### ARHI 13182. Fine Arts University Seminar

(3-0-3) Pyne; Rhodes

University seminars will address a variety of topics in the history of art depending on the interests of the professor. These courses require several short papers and a final written exercise appropriate to the material.

### ARHI 20100. Introduction to Ancient Greece, Rome, and Egypt

(3-0-3) Ricciardi

This course will examine the origins of Western art and architecture, beginning with a brief look at the Bronze Age cultures of the Near East and Egypt, then focusing in detail on Greece and Rome, from the Minoan and Mycenaean world of the second millennium B.C.E. to the rule of the Roman emperor Constantine in the fourth century C.E. Among the monuments to be considered are ziggurats, palaces, and the luxuriously furnished royal graves of Mesopotamia; the pyramids at Giza in Egypt and their funerary sculpture; the immense processional temple of Amon at Luxor; the Bronze Age palaces of Minos on Crete—the home of the monstrous Minotaur—and Agamemnon at Aycanae, with their colorful frescoes and processional approaches; the great funerary pots of early Athens and the subsequent traditions of Red and black figure vase painting; architectural and freestanding sculpture of the archaic and classical periods; the Periclean Acropolis in Athens, with its monumental gateway and shining centerpiece, the Parthenon; and finally, among the cultural riches of Rome, the painted houses and villas of Pompeii; the tradition of republican and imperial portraiture; the Imperial fora; the exquisitely carved Altar of Peace of Augustus; the Colosseum; and the Pantheon of the Philhellene Emperor Hadrian.

### ARHI 20200. Introduction to Medieval Art

(3-0-3) Joyner

The 10 centuries designated as the Middle Ages span regions of land that are as diverse as the many cultures that existed during this millennium. From late antique Rome to Anglo-Norman England, and from Mozarabic Spain to the Kingdom of Bohemia, these thriving and evolving cultures bestowed upon Western culture a tremendous visual legacy. This class will introduce students to the exciting wealth of monuments, objects, and images that survive from the Middle Ages, as well as to current scholarly debates on this material.

### ARHI 20250. Introduction to Early Christian and Byzantine Art

(3-0-3)

This course will introduce students to the visual arts of the period c. A.D. 200 to c. 1600. Our work will take us from the first fashioning of an identifiable Christian art through to the remarkable poetics of late Byzantine painting. In so doing, the student will be introduced to the full array of issues that arise around the question of there being a Christian art. Working from individual objects and texts, we will construct a variety of narratives that will reveal a vital, complex, and rich culture that, in a continuing tradition, has done so much to shape the visual imagination of Christianity.

### ARHI 20300. Introduction to Renaissance Art

(3-0-3)

This course will survey the major trends in the art of Italy and northern Europe from roughly 1300 to 1575. It will concentrate on such major figures as Giotto, Donatello, Masaccio, Botticelli, Raphael, Michelangelo, and Titian in Italy, and the Limbourg Brothers, Jan van Eyck, Rogier van der Weyden, Hieronymus Bosch, Albrecht Dürer, Mathias Grunewald, and Pieter Brueghel in the north. It will consider such themes as artistic production and technique, public and private spirituality, naturalism, narrative, and the changing status of the artist.

### ARHI 20310. Survey of Italian Renaissance Art

(3-0-3)

Open to all students. This course will examine the painting, sculpture, and architecture produced in Italy from the very end of the 12th through the beginning of the 16th century, from Giotto's Franciscan spirituality to Michelangelo's heroic vision of man and God. A wide variety of questions will be considered in the context of this chronological survey, including changing conventions of representation, the social function of art, and the impact of the Renaissance ideology of individual achievement on the production of art and the role of the artist.

### ARHI 20362. European Art and Architecture of the Seventeenth and Eighteenth Centuries

(1-0-3)

This course will survey major stylistic trends in 17th- and 18th-century painting, sculpture, and architecture in Italy, Spain, France, the Low Countries, England, and Germany. The course will begin with the art of the Counter-Reformation in Italy and will end with the Age of Enlightenment, encompassing the reigns of Pope Urban VIII to the death of Louis XVI. Stylistic trends such as the baroque, rococo, and the origins of neoclassicism will be discussed through the works of such diverse artistic personalities as Bernini, Caravaggio, Gentileschi, Velasquez, Poussin, Rembrandt, Rubens, Wren, Hogarth, Reynolds, Watteau, Boucher, Fragonard, Robert Adam, Neumann, Tiepolo, and Zimmermann. Discussion will also focus on the impact on art and artists by religious orders, emerging modern European states, capitalism, and global expansionism.

### ARHI 20420. Nineteenth-Century European Art and Architecture

(3-0-3)

This course will survey the major monuments of painting, sculpture, and architecture that were produced in the dynamic 100 years following the French Revolution. We will investigate how artists and architects envisioned a new modern society, at the same time that the old social structures and supports crumbled around them. We also will consider how new materials and experimental techniques contributed to ways of representing the experience of modern life.

### ARHI 20440. Introduction to Modern Art

(3-0-3) Weissman

This course introduces art, aesthetic philosophy, art criticism, and cultural politics from 1900 to the present. European and American art are the primary focus. Rather than a mere chronological survey of artistic movements, the course addresses a range of conceptual problems to engage students in different modern methods (Marxist, psychoanalytic, formal, feminist and so forth) for interpreting art and its history. Painting, sculpture, photography, video, and graphic design are among the media analyzed. Among the artists studied are Henri Matisse, Pablo Picasso, Georgia O'Keeffe, Alexander Rodchenko, Max Ernst, Jackson Pollock, Andy Warhol, Judy Chicago, Cindy Sherman, and others. Lectures, class discussions of assigned readings, and museum visits are key components of the course.

### ARHI 20441. Twentieth-Century Art I: 1900–55

(3-0-3) Speaks

This course will introduce students to major developments in 20th-century art, primarily in Europe and the United States. Emphasis will be placed on modernist and avant-garde practices and their relevance for art up to the present. The first half of the course will trace modernism's unfolding in the avant-garde practices of the late 19th and early 20th centuries, ending with modernism's eventual destruction in the authoritarian politics of the '30s, of World War II and the Holocaust. The second half of the course will address art production after this chasm: the neo-avant-gardes in Europe and the United States will be considered in their attempts to construct continuity and repetitions of the heroic modernist legacies of the past. Among the movements analyzed: cubism, Dada and surrealism, Russian constructivism, abstract expressionism, pop art, minimalism, and conceptual art.

### ARHI 20500. Introduction to Art and Catholicism

(3-0-3)

This undergraduate lecture/discussion course will give students the opportunity to analyze and discuss the history of Catholic doctrine as it pertains to the visual

arts. From the Council of Elvira in A.D. 306 to John Paul II's "Letter to Artists" of 1999, Catholicism has engaged with and debated the role of the arts as a legitimate vehicle for spiritual experience and theological knowledge. In this course, we will examine the changing, complex, and various ideas that have been brought to the question of the function of art in the Church. It will become clear that Catholic attitudes to the arts have been subject to a range of influences that have helped shape a still fluid and potential relationship between Catholicism and art. Among other topics, we will examine the accommodation of traditional pagan practices in Late Antiquity; the impact of Byzantine and Carolingian theological discourse on the arts; Mendicant thought and practice regarding the arts; lay piety in the later Middle Ages; issues raised by the Reformation; the Council of Trent, and the Counter-Reformation; the implications of modernism; neo-Thomist aesthetics; and the aftermath of Vatican II. In all instances, the course will be shaped by the discussions of primary readings (in translation when necessary) that will set these texts in a context that is social, intellectual, theological, and cultural. Each reading will then lead to an examination of the artistic environment that preceded and succeeded the ideas shaped by these texts. It is expected that students will leave this course with a rich knowledge of the central ideas and works of art that have come to shape the continuing dialogue between Catholicism and art.

#### **ARHI 20510. Understanding Museums** (3-0-3)

This course is designed to present the museum as a resource from the past, present, and future for learning and enjoyment. It introduces the student to the issues that challenge art museums in general and the Smithe Museum of Art in particular. It provides the tools that make a museum visit more meaningful and immediate.

#### **ARHI 30101. Hellenistic and Roman Art and Architecture** (3-0-3)

This course explores the architecture, urban planning, sculpture, and painting of Hellenistic Greece and Rome, from the time of Alexander the Great in the fourth century B.C.E. to the reign of the Roman emperor Constantine in the fourth century C.E. The art and architecture of Greece and Rome will be analyzed as expressions of their culture and time and as tools for understanding these cultures more completely. A variety of themes will be addressed, including changing conceptions of monumentality in art and architecture; imperial propaganda in art, architecture, and religion; technology as inspiration for new conceptions of art and architecture; the contrasting natures of Greek and Roman art and culture; the influence of Greek culture on Rome; and the nature and significance of the ever-changing mixture of Greek and native Italic elements in Roman art and architecture.

#### **ARHI 30120. Survey of Greek Art and Architecture** (3-0-3)

This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period, from the eighth through the second centuries B.C., with some consideration of prehistoric Greek forebears of the Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes towards the gods, human achievement, and the relationship between the divine and the human.

#### **ARHI 30130. Etruscan and Roman Art and Architecture** (3-0-3)

Open to all students. Roman art of the republic and empire is one focus of this course, but other early cultures of the Italian peninsula and their rich artistic production are also considered. In particular, the arts of the Villanovans and the Etruscans are examined and evaluated as both unique expressions of discrete cultures and as ancestors of and influence on Rome. The origins and development of monumental architecture, painting, portraiture, and historical relief sculpture are isolated and traced from the early first millennium B.C. through the early fourth century of the modern era.

#### **ARHI 30202. The Contest of Word and Image in Early Medieval Art**

(3-0-3)

This course will introduce students to the architecture of the Middle Ages (c. 300–1400). This introductory course will begin with early Christian architecture and culminates in the great Gothic Cathedrals of northern Europe. Students will not only be invited to consider the development of the architectural forms of the church building, but will also be able to consider the degree to which the changing nature of the church building reflects broader issues in the history of Christianity in the Middle Ages.

#### **ARHI 30213. Art into History: Byzantine**

(3-0-3)

Byzantine art has often been opposed to the traditions of Western naturalism, and as such, has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material, we will examine the art produced in Byzantium in the period from the ninth to the 12th century, a period that marks the high point of Byzantine artistic production and influence. Stress will be placed on the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear on our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue in this course.

#### **ARHI 30220. Kingdom, Empire, and Devotion: Art in Anglo-Saxon, Ottonian, and Romanesque Europe**

(3-0-3) Joyner

Although the Anglo-Saxon Kingdom and Ottonian Empire overlap in time during the 10th and 11th centuries, the images and objects produced by both cultures manifest the different political, social, and religious identities being deliberately constructed. By the mid-11th century, the Normans had invaded England, the Salian emperors had succeeded the Ottonians, and European art is more cohesively and problematically labeled as Romanesque. This class will examine Anglo-Saxon and Ottonian art as individual visual traditions and trace their impact on images, objects, and monuments of the more loosely defined Romanesque era.

#### **ARHI 30240. Romanesque Art**

(3-0-3)

This course examines sculpture, architecture, manuscript illumination, and mural painting along with the arts produced for church and court treasuries in Western Europe during the 11th and 12th centuries. Pilgrimage to the holy shrines, the veneration of saints, and crusades to Jerusalem are among the issues discussed in relation to the arts. Monastic and ecclesiastical reform, heresy, and renewed interest in antiquity are also considered.

#### **ARHI 30250. Gothic Art and Architecture**

(3-0-3) Joyner

It was during the Gothic period, stretching approximately from the 12th to the 15th centuries, that artists raised their social status to a higher level and produced a greater quantity of works than ever before seen in the Christian West. The architectural forms that we identify as characterizing the Gothic style, such as pointed arches, flying buttresses, pinnacles, and quatrefoils were applied not only to buildings, but to altarpieces, illuminated manuscripts, liturgical objects, and even to domestic items such as spoons, beds, and chests. This style has a powerful legacy, and has been frequently revived to various purposes in the modern era. In this course, we analyze representative examples of Gothic art and architecture in light of their production at a time of great social, intellectual, religious, and political dynamism and upheaval.

#### **ARHI 30311. Fifteenth-Century Italian Renaissance Art**

(3-0-3)

This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and

audience, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

### **ARHI 30312. Venetian and Northern Italian Renaissance Art**

(3-0-3) Coleman

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan, and Parma also provide insight into the traditions of the local schools and their patronage.

### **ARHI 30313. High Renaissance and Mannerist Art**

(3-0-3)

Leonardo, Michelangelo, Bramante, and Raphael provide the basis of study of one of the most impressive periods of artistic activity in Italy—the High Renaissance in Rome and Florence. The course also investigates the origins of Mannerism in the excessive achievements of Jacopo Pontormo, Rosso Fiorentino, and the succeeding generation of late-Renaissance maniera artists who helped to formulate a new courtly style.

### **ARHI 30320. Northern Renaissance Art**

(3-0-3) Rosenberg

This course traces the development of painting in Northern Europe (France, Germany, and Flanders) from approximately 1300 to 1500. Special attention is given to the art of Jan van Eyck, Rogier van der Weyden, Hieronymus Bosch, and Albrecht Dürer. Through the consideration of the history of manuscript and oil painting and the graphic media, students will be introduced to the special wedding of nature, art, and spirituality that defines the achievement of the northern Renaissance.

### **ARHI 30340. Survey of Baroque Art**

(3-0-3)

This course will examine the art of Europe during the 17th century. The first third of the semester will be devoted to the work of Counter-Reformation Italy and the work of individual artists such as Caravaggio and Gian Lorenzo Bernini. The second third of the term will focus on Spanish painting, particularly the work of Francisco Zurbaran and Diego Velazquez. The final section of the course will consider painting in the Low Countries looking at the art of Rubens, Rembrandt, Vermeer, and others. Among the issues that will be addressed are art and spirituality, shifting modes of patronage, art and politics, and definitions of gender.

### **ARHI 30350. Survey of Italian Baroque Art: From Caravaggio to Tiepolo**

(3-0-3) Coleman

This course surveys Italian painting, sculpture, and architecture of the 17th and 18th centuries, a period that also witnessed the foundation and suppression of the Jesuit Order, the Counter-Reformation, absolute monarchy, and democratic nations. Thus, the course begins with the “new Rome” of Pope Sixtus V, which attracted pilgrims and artists from all over Europe, and ends with the early years of Enlightenment. From Northern Italy came Caravaggio and the Carracci, artists who were responsible for creating a new style based upon High Renaissance principles and a new kind of naturalism derived from the study of life. There was Bernini, whose architectural and sculptural monuments almost single-handedly gave Rome its baroque character. Other artists and architects of this era under discussion include such diverse personalities as Borromini, Guarini, Algardi, Artemisia Gentileschi, and the great ceiling painters Pietro da Cortona, Baciccio, Pozzo, and Tiepolo.

### **ARHI 30360. The Age of Rembrandt: Northern Baroque Painting**

(3-0-3)

Epitomized by the self-conscious art of Rembrandt, northern baroque painting and print making not only became a domestic commodity sold in a more modern-looking marketplace, it also continued to serve its traditional political, moral, and

spiritual functions. This course will concentrate on paintings and prints produced in Flanders, Spain, and the Dutch Republics during the 17th century, an era of extraordinary invention. The work of artists such as Rubens, van Dyck, Velazquez, Zurbaran, Leyster, Hals, and Rembrandt will be considered in the context of a number of interrelated themes, including the business of art, the status of the artist, art in service of the state, the rise of genre, gender stereotypes, allegory, and art and religion and spirituality.

### **ARHI 30417. English Art and Society**

(3-0-3) Pyne

This course focuses on the dynamic between art and society in the period in which the Industrial Revolution shaped the face of modern Britain. We will examine paintings and architectural monuments that register the devastating human consequences of modernization during this 100-year period. As we survey the response of British society to the forces of industrialization, our themes will be the worship of science and progress; the Romantic discovery of nature, the imagination, and the exotic; images of the rural and urban poor; the new constructions of masculinity and femininity; the return to the Middle Ages for sources of national identity and social reform. The principal artists discussed will be Joseph Wright of Derby, William Blake, John Constable, Joseph Mallord William Turner, Edwin Landseer, the Pre-Raphaelites, and William Morris.

### **ARHI 30420. Nineteenth-Century European Painting**

(3-0-3)

This survey of 19th-century painting treats the major figures of the period within the context of the social, political, and intellectual ferment that shaped the culture—primarily, the numerous political revolution and the rise of industrial capitalism and the middle class in France, England, and Germany. Among the artistic movements discussed are neoclassicism, romanticism, realism, pre-Raphaelitism, impressionism, and symbolism. Some of the major themes addressed are the relationships between tradition and innovation, between the artist and public, and between gender and representation, as well as the multiple meanings of “modern” and “modernism.” The class will visit the Snite Museum of Art on occasion to discuss special exhibitions related to topics in the course.

### **ARHI 30441. Twentieth-Century Art I: 1900–55**

(3-0-3)

This course focuses on early 20th-century art and cultural politics in Europe, Russia, and the United States. In the early modern period, many of the most ambitious and innovative artists strove to destroy old models of art, often replacing them with models that advocate revolutionary forms for a new, imaginary society. At other times, artists have employed art to undermine accepted norms of bourgeois culture and to liberate art and experience from convention. These are themes addressed in this course, along with the contradictory reality in which the art arose: an era defined by massive wars, racist ideologies, and violent suppressions. Among the selected artists analyzed are Pablo Picasso, Henri Matisse, Piet Mondrian, Marcel Duchamp, Hannah Hoch, Lyubov Popova, Salvador Dali, Walter Gropius, Diego Rivera, and Jackson Pollock.

### **ARHI 30480. Topics in Contemporary Art: Art Now**

(3-0-3)

This course will examine contemporary artistic developments in order to begin to address the multifaceted, international field that is contemporary art. Focused on a series of case studies that stretch across the diverse media used today—digital film, installation, painting, photography, video, and sculpture—this course will address those themes that gained currency as the driving forces of modernism waned, such as aesthetic activism, pastiche, simulation, the return of the ready-made, and the reinterpretation of genre. Special attention will be paid to the way that new formats and media change the scope, audience, and reception of art now.

### **ARHI 30485. American Art and Culture 1945–1970**

(3-0-3)

This course covers art and culture in the United States of America from pre-World War II through the early 1970s, focusing on art styles and movements ranging from regionalism and abstract expressionism to Earthworks and early feminist art.

The “triumph of American painting” in the post World-War II era, links between art and politics, development of American art theory, intersections between the avant-garde, popular culture, consumer culture, and institutionalization of art museums and markets will be analyzed in detail.

### **ARHI 30550. History of Photography**

(3-0-3)

Open to all students. This course deals with the development and use of photography as an artistic medium from time of its invention in the mid-19th century up to the present moment. Besides viewing slides, the student will be able to view a large number of original photographs from the Snite Museum of Art.

### **ARHI 30551. History and Photography**

(3-0-3) Thomas

Both history and photography were practices invented and developed in the 19th century, and they share a capacity to illuminate events in the past. Both history and photography can depict human suffering and point to political practices that might alleviate that suffering. Both must grapple with the nature of time. Both, in odd ways, transcend, but also cement, the finality of death. Both promise a form of truthfulness which they do not always achieve. Given these similarities, it is no wonder that so many writers have considered them together. Often however, when compared, the distinctive qualities of each come to the fore. By reading about photography and history and by looking at images, students in this course will explore the limits and possibilities of each modern pursuit.

### **ARHI 30555. History of Photography: The Nineteenth Century**

(3-0-3)

This course deals with the development and use of photography as an artistic medium from time of its invention in the mid-19th century up to the present moment. Besides viewing slides, the student will be able to view a large number of original photographs from the Snite Museum of Art.

### **ARHI 30560. History and Theory of Twentieth-Century Photography**

(3-0-3)

This course seeks to introduce students to the difficulties of writing the history and criticism of photography as a separate discipline that operates simultaneously outside and inside the history of modernism: since photographic practices are defined by an extraordinary diversity of social functions and institutions (e.g., fashion and political documentary, advertisement, and avant-garde art), the impossibility of such a cohesive approach clearly poses a central methodological problem. This condition has been confronted by photographers, artists, and photography historians and critics with a wide range of responses.

### **ARHI 30565. Visualizing America: Survey of American Art and Culture**

(3-0-3) Doss

This course examines American visual and material cultures from the pre-colonial era to the present day. Providing a broad, historical account and considering a variety of media from paintings and sculptures to quilts, photographs, world's fairs, and fashion styles, this survey explores American art within the context of cultural, social, economic, political, and philosophical developments. In particular, it considers the role that American art has played in the formation of national identity and understandings of class, race, gender, and ethnicity.

### **ARHI 30801. Mesoamerican Art: Olmec and Their Legacy**

(3-0-3)

The Olmec civilization was the mother culture of Mesoamerica, and beginning in 1500 B.C. This course will introduce the student to the Mesoamerican world view by tracing the origins of Mexican art, religion, and culture from the development of the Olmec civilization up to Aztec times.

### **ARHI 33312. Venetian and Northern Italian Renaissance Art**

(3-0-3)

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan, and Parma also provide insight into the traditions of the local schools and their patronage.

### **ARHI 40121. Greek Architecture**

(3-0-3) Rhodes

Open to all students. In this course the development of Greek monumental architecture, and the major problems that define it, will be traced from the eighth to the 2nd centuries B.C., from the late geometric through the archaic, classical, and Hellenistic periods. Among themes to be related are the relationship between landscape and religious architecture, the humanization of temple divinities, the architectural expression of religious tradition and even specific history, architectural procession and hieratic direction, emblem and narration in architectural sculpture, symbolism and allusion through architectural order, religious revival and archaism, and the breaking of architectural and religious canon.

### **ARHI 40311. Fifteenth-Century Italian Art**

(3-0-3)

Open to all students. This course investigates the century most fully identified with the Early Renaissance in Italy. Individual works by artists such as Brunelleschi, Donatello, Ghiberti, Botticelli, and Alberti are set into their social, political, and religious context. Special attention is paid to topics such as the origins of art theory, art and audience, Medician patronage, and art for the Renaissance courts of northern Italy and Naples.

### **ARHI 40312. Venetian and Northern Italian Renaissance Art**

(3-0-3)

This course focuses on significant artistic developments of the 16th century in Venice with brief excursions to Lombardy and Piedmont. Giorgione, Titian, and Palladio, the formulators of the High Renaissance style in Venice, and subsequent artists such as Tintoretto and Veronese are examined. An investigation of the art produced in important provincial and urban centers such as Brescia, Cremona, Milan, Parma, Varallo, and Vercelli also provide insight into the traditions of the local schools and their patronage.

### **ARHI 40313. High Renaissance in Rome and Florence**

(3-0-3) Coleman

Leonardo, Michelangelo, Bramante, and Raphael provide the basis of study of one of the most impressive periods of artistic activity in Italy—the High Renaissance in Rome and Florence. The course also investigates the origins of mannerism in the excessive achievements of Jacopo Pontormo, Rosso Fiorentino, and the succeeding generation of late-Renaissance maniera artists who helped to formulate a new courtly style.

### **ARHI 40320. Northern Renaissance Art**

(3-0-3)

This course traces the development of painting in Northern Europe (France, Germany, and Flanders) from approximately 1300 to 1500. Special attention is given to the art of Jan Van Eyck, Rogier van der Weyden, Hieronymus Bosch, and Albrecht Dürer. Through the consideration of the history of manuscript and oil painting and the graphic media, students will be introduced to the special wedding of nature, art, and spirituality that defines the achievement of the northern Renaissance.

### **ARHI 40360. Age of Rembrandt: North Baroque**

(3-0-3) Rosenberg

Open to all students. Epitomized by the self-conscious art of Rembrandt, northern baroque painting and print making not only became a domestic commodity sold in a more modern-looking marketplace, it also continued to serve its traditional

political, moral, and spiritual functions. This course will concentrate on paintings and prints produced in Flanders, Spain, and the Dutch Republics during the 17th century, an era of extraordinary invention. The work of artists such as Rubens, van Dyck, Velázquez, Zurbarán, Leyster, Hals, and Rembrandt will be considered in the context of a number of interrelated themes, including the business of art, the status of the artist, art in service of the state, the rise of genre, gender stereotypes, allegory, and art, religion, and spirituality.

**ARHI 40361. Eighteenth-Century European Art**  
(3-0-3)

Profound and universal inquiry into all aspects of knowledge marked the history of the century of Enlightenment and the Grand Tour. The rise of the collective idea of nature, the study and instrumentality of the antique, the foundations of religion, the state, morality and reason, the relationship of the arts to the state, the philosophy of aesthetic, were all critically analyzed and questioned. This course investigates various stylistic trends in 18th-century art in Italy, France, and England with a focus on the institutionalization of art through the academies. Discussion also centers on classical art theory and its relationship to the academies in light of the social, political, and religious climate of the period. We will also consider the aesthetical, art historical, and social consequences of the writings of Kant, Burke, and Winckelmann. The course begins with the late baroque paintings of Carlo Maratti and his followers, and then moves to subsequent stylistic trends as neoclassicism, Egyptian revival, and the rococo. Attention is also given to the vedute painters, and such diverse personalities as Piranesi, Mengs, Kauffmann, Tiepolo, Watteau, and Chardin.

**ARHI 40416. American Art**  
(3-0-3) Pyne

This course examines American painting, architecture, and sculpture from Puritan culture to the World War I. The approach is to examine the development of American art under the impact of social and philosophical forces in each historical era. The course explores the way in which artists and architects give expression to the tensions and sensibilities of each period. Among major themes of the course are the problem of America's self-definition, the impact of religious and scientific thought on American culture, Americans' changing attitudes toward European art, and the American contribution to modernism.

**ARHI 40470. Architecture of the Twentieth Century**  
(3-0-3)

This course is a survey of the significant themes, movements, buildings, and architects in 20th-century architecture. Rather than validate a single design ideology such as modernism, postmodernism, or classicism, this account portrays the history of architecture as the manifestation—in design terms—of a continuing debate concerning what constitutes an appropriate architecture for this century. Topics include developments in building technologies, attempts to integrate political and architectural ideologies, the evolution of design theories, modern urbanism, and important building types in modern architecture such as factories, skyscrapers, and housing. Class format consists of lecture and discussion with assigned readings, one midterm exam, a final exam, and one written assignment.

**ARHI 40490. Architecture Now: Trends in Contemporary Architecture**  
(3-0-3)

This is a survey of contemporary trends in global architecture with a focus on recent developments in design theory and building technologies. The course will examine a broad spectrum of architecture produced in the past decade.

**ARHI 40580. History of Design: Form, Values, and Technology**  
(3-0-3)

This course will provide a historical perspective on the development of industrial, product, and graphic design in the 19th and 20th centuries. More than the aesthetic styling of products, design mediates the intersection of technology and cultural values in the modern era. The role of the modern designer as both a facilitator and a critic of industrial technology will be examined.

**ARHI 43105. Seminar: Topics in Ancient Art**  
(3-0-3) Ricciardi

Topics course on special areas of Greek and/or Roman art.

**ARHI 43122. Seminar in Greek and/or Roman Art**  
(3-0-3)

Seminar on specific subjects in Greek and/or Roman art.

**ARHI 43123. Athenian Acropolis in Context**  
(3-0-3)

Permission required. The monumental elaboration of the Athenian Acropolis did not begin with Pericles and Pheidias in the mid-fifth century B.C. Greek monumental art and architecture were spawned in the context of religion, and by the early archaic period, the Acropolis was the center of Athenian religion. Almost immediately, religious awe and piety were expressed in the form of impressive free-standing sculptural dedications and in large and meticulously wrought stone buildings, elaborately decorated with carved and painted designs and, most impressively, with figural relief sculpture. The monuments of the Athenian Acropolis must be understood first in this context—as the embodiment of religious concepts—and then in the context of Greek art and culture as a whole. An ultimate goal of the seminar will be to arrive at an understanding of the evolving meaning of the Greek temple and monumental form, and how they find unique expression in the fifth-century Acropolis building program of Pericles. Among the themes that will be treated to one degree or another are the relationship between landscape and religious architecture, the humanization of temple divinities, the monumental expression of religious tradition and even specific history, architectural procession and hieratic direction, emblem and narration in architectural sculpture, symbolism and allusion through architectural order, religious revival and archaism, and the breaking of architectural and religious canon. Taken together, they constitute the specific architectural narrative of the Periclean Acropolis.

**ARHI 43200. Seminar: Topics in Early Christian and Byzantine Art**  
(3-0-3) Barber

Topics course in special areas of early Christian and Byzantine art.

**ARHI 43205. Seminar: Topics in Medieval Art**  
(3-0-3) Joyner

The topic and format of this course will vary from year to year.

**ARHI 43305. Seminar: Topics in Renaissance and Baroque Art**  
(3-0-3) Coleman; Rosenberg

Topics course on special areas of Renaissance art.

**ARHI 43312. Seminar: Venetian and Northern Italian Art**  
(3-0-3)

Seminar on specific subjects in Venetian and Northern Italian Renaissance Art.

**ARHI 43314. Seminar: Mannerism/Painting and Sculpture**  
(3-0-3)

This course will explore the artistic trends in Italy after the High Renaissance (c. 1520) and before the baroque (c. 1580), and will begin with definitions of terminology and a brief historiographic survey. Our attention will then turn to the Roman art of Raphael's heirs, Giulio Romano, Perino del Vaga, and Polidoro da Caravaggio, and the emerging Tuscan painters Pontormo, Rosso Fiorentino, and Domenico Beccafumi. We will also investigate the dispersal of the Roman school: Giulio Romano to the Gonzaga court in Mantua, in 1524, and following the Sack of Rome by imperial troops in 1527, other maniera artists to Genoa, Bologna, Parma, and as far as the French royal chateau at Fontainebleau. Rome consequently experienced a revival at the end of the reign of Clement VII, and under the pontificate of Paul III, notably, the arts, politics, and theology flourished. This period may be marked by such diverse works and Michelangelo's monumental *Last Judgment* (1536–41) and his frescoes (1542–45) in the Pauline Chapel, Vatican Palace; the decorations (1536–51) by various mannerist artists in San Giovanni Decollato; Perino's elegant frescoes in the Sala Paolina (1545–47); Castel Sant' Angelo, Giorgio Vasari's fantastic murals in the

Palazzo Cancelleria (1546); and Francesco Salviati's beautiful, secular frescoes in the Palazzo Ricci-Sacchetti (c. 1553–54). Attention will also be given to the art of the Counter-Reformation in Rome, and to painting and sculpture by Bronzino, Salviati, Cellini, Bandinelli, Vasari, Giambologna, and others at the Florentine courts of Dukes Cosimo I and Francesco I.

**ARHI 43315. Seminar: Courts of Renaissance Italy**

(3-0-3)

Seminar on specific subjects in Renaissance art.

**ARHI 43340. Topics in Baroque Art**

(3-0-3)

Topics course on special areas of baroque art.

**ARHI 43351. Seminar: Rome in the Age of Bernini**

(3-0-3)

Permission required. Seminar on specific subjects in baroque art.

**ARHI 43404. Seminar: Narratives of Modern Art**

(3-0-3)

Permission required. Seminar on specific subjects in 19th-century and 20th-century art.

**ARHI 43405. Topics in Modern Art**

(3-0-3)

Topics course on special areas of modern art.

**ARHI 43416. Seminar: Topics in American Art**

(3-0-3) Pyne

Topic courses on special areas of American art.

**ARHI 43480. Seminar: Topics in Contemporary Art**

(3-0-3) Speaks

Topic courses on special areas of contemporary art.

**ARHI 43512. Seminar: Museums and Collecting**

(3-0-3) Rosenberg

This seminar will focus on the history of collecting and the origins and nature of the modern museum. In the course of our discussions, we will address a number of issues, including, why do people collect; who is the museum's audience; what role does authenticity play in the philosophy of collecting and display; are museums bound rules of public decorum; what impact has the Internet had on art museums and their audiences; and what are the museum's rights and obligations in matters of cultural patrimony.

**ARHI 43576. Theories of Art**

(3-0-3) Barber

Required of all art history majors. This seminar is a survey of the historiography of art history with special attention paid to the various types of methodology that have been applied to the analysis of art. Special attention is given to 19th-century and 20th-century art historical methods, including connoisseurship, biography, iconology, psychoanalysis, semiotic, and feminist approaches.

**ARHI 46572. Directed Readings**

(V-0-V)

Permission required. Specialized reading related to the student's area of study.

**ARHI 47171. Special Studies—Ancient Art History**

(V-0-V)

Independent study in ancient art history under the direction of an individual faculty member.

**ARHI 47271. Special Studies—Medieval Art History**

(V-0-V)

Independent study in medieval art history under the direction of an individual faculty member.

**ARHI 47272. Special Studies: Early Christian and Byzantine Art**

(V-0-V)

Independent study in early Christian and Byzantine art history under the direction of an individual faculty member.

**ARHI 47371. Special Studies—Renaissance/Baroque**

(V-0-V)

Independent study in Renaissance/baroque art history under the direction of an individual faculty member.

**ARHI 47372. Special Studies—Renaissance/Baroque**

(V-0-V)

Independent study in Renaissance or baroque art history under the direction of an individual faculty member.

**ARHI 47431. Special Studies—Nineteenth Century**

(V-0-V)

Independent study in 19th-century art history under the direction of an individual faculty member.

**ARHI 47471. Special Studies—Modern Art History**

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

**ARHI 47472. Special Studies—Modern**

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

**ARHI 47473. Special Studies—Modern**

(V-0-V)

Independent study in modern art history under the direction of an individual faculty member.

**ARHI 47571. Special Studies**

(V-0-V)

Permission required. Independent study in art history under the direction of an individual faculty member.

**ARHI 48573. Honors Thesis Direction**

(V-0-V)

The honors thesis, normally between 20 and 30 pages in length, is done under the direction of one of the regular art history faculty, who serves as an advisor. It is expected to demonstrate the student's ability to treat an important historical topic in a manner that shows his or her writing skills and methodological training. It is expected that the thesis will be suitable for submission as a writing sample for those students intending to apply to art history graduate programs.

**ARST 11201. Drawing I**

(3-0-3)

This course deals with form depiction in its many aspects and modes and is intended for beginning students as well as advanced students who need additional experience in drawing. Lab fee: \$30.

**ARST 11301. Painting I**

(0-6-3)

Open to all students. This course is an introduction to oil painting techniques and to stretcher and canvas preparation. The emphasis is on finding a personal direction. Lab fee.

**ARST 11601. 3-D Foundations**

(0-6-3)

This required core course for all art majors introduces the student to three-dimensional art by producing sculptures (both figurative and abstract) in a variety

of media. Contemporary movements in sculpture are examined through slide lectures and attendance at visiting artist lectures and visits to exhibitions. Lab fee.

**ARST 21101. Ceramics I**

(0-6-3)

Open to all students. This course examines basic techniques of wheel-thrown and hand-built clay structures for sculpture and pottery. Lab fee.

**ARST 21303. Watercolor I**

(0-6-3)

Open to all students. This course is an introduction to the watercolor medium and deals with a variety of methods, materials, and techniques (both realistic and abstract) with special emphasis on color and composition. Lab fee.

**ARST 21401. Photography I**

(3-0-3)

This course is an introduction to the tools, materials, and processes of black-and-white photography. Lectures and demonstrations expose students to both traditional and contemporary practices in photography. Critiques of ongoing work encourage students to begin discovering and developing their individual strengths and interests in the medium. A 35mm camera with manual shutter speed and "F" stop is needed. Lab fee: \$50.

**ARST 21501. Silkscreen I**

(0-6-3)

Open to all students. This course is an introduction to stencil processes and printing. Hand-drawn and photographic stencil-making techniques are explored. Mono-printing and discovery of unique aspects of serigraphy are encouraged. Emphasis is on exploration of color and development of student's ideas and methodologies. Lab fee.

**ARST 21503. Etching I**

(0-6-3)

Open to all students. This basic studio class introduces techniques of intaglio (etching). Students learn basic platemaking and printing techniques while learning to incorporate their own drawing skills and points of view. Historical and contemporary prints are reviewed. Emphasis is on development of the student's own ideas and methodology. Lab fee.

**ARST 21505. Artists Books and Papermaking**

(0-6-3)

Open to all students. This introductory course explores the making of artists' books and papermaking. Students learn basic bookbinding techniques for books and printing techniques for stationery and posters. They also learn how to make handmade papers. Part of the focus is on historical books as well as on what contemporary artists are doing with books. Lab fee.

**ARST 21507. Relief and Collography**

(3-0-3)

This course investigates various relief methods of print making, including linocut, woodcut, and collograph. Emphasis is on experimentation and combining media.

**ARST 21508. Experimental Printing Without the Press**

(0-6-3)

This course examines the many ways to make prints without using a press; from potato prints and relief to digital transfers. It is designed to introduce the student to methods of constructing prints ranging from traditional forms to collage and beyond to layering media. It is a course that encourages creativity and teaches students to make unique images on paper.

**ARST 21509. Print Business and Photogravure**

(3-0-3)

This course is concerned with learning the business of the contract printing for photogravure prints. These prints look exactly like photographs, but are printed onto soft print making papers. The class will invite a photographer to produce a

suite of six black-and-white photographic prints that the class will convert into photogravure prints. The class will learn the business of production, including costs, while engaging in the scheduling, platemaking, printing, packaging, and sales of a suite of photogravures.

**ARST 21510. Lithography**

(0-6-3)

This is an introduction to planographic print techniques including drawing, painting, photographic, and transfer on stone and metal plate. Basic black and white and color printing techniques are practiced. Contemporary and historical prints are reviewed. Emphasis is on development of the student's own ideas and methodology.

**ARST 21512. Photolithography**

(0-6-3)

Photolithography is a method of print making utilizing a metal plate that is photosensitive. Hand-drawn and computer-generated images as well as traditional photographs are used to create prints that reflect an individual's creativity. Emphasis is placed on the student developing his or her own vision and its expression. Lab fee.

**ARST 21602. Wood Sculpture**

(0-6-3)

Open to all students. This course uses wood as a primary medium. Emphasis is placed on individual concept and design. Students learn the use of hand and power tools as well as techniques of joining, laminating, fabricating, and carving. Lab fee.

**ARST 21603. Metal Foundry**

(0-6-3)

Open to all students. The course focuses on work in cast aluminum and cast bronze sculptures. Students learn basic welding techniques using oxygen and acetylene, arc, and heliarc welding. Mold making, work in wax, and metal finishing techniques are also explored. Lab fee.

**ARST 21604. Metal Sculpture I**

(0-6-3)

Open to all students. Metal is the medium of choice in this course designed to explore three-dimensional design with a variety of projects grounded in historical precedents. Students become familiar with as many metalworking techniques as time and safety allow, such as gas and arc welding, basic forge work, and several methods of piercing, cutting, and alternative joinery. Lab fee.

**ARST 21606. Figure Sculpture**

(0-6-3)

Open to all students. This course concentrates on modeling from the figure. Work is predominantly in clay, but mold-making and casting techniques are also explored. Lab fee.

**ARST 31102. Ceramics II**

(0-6-3)

*Prerequisite:* (ARST 21101 OR ARST 209S OR ARST 210S)

This course explores advanced processes in clay for pottery and sculpture as well as techniques of glazing. Lab fee.

**ARST 31202. Figure Drawing**

(0-6-3)

Open to all students. The emphasis is on drawing in all its aspects: materials, methods, techniques, composition, design, and personal expression. The human figure is the subject matter. While anatomy is studied, the course is not an anatomy class. Male and female models, clothed and nude, are used. Lab fee.

**ARST 31302. Painting II**

(0-6-3)

*Prerequisite:* (ARST 11301 OR ARST 133S OR ARST 134S)

This course extends and develops the skills and concepts initiated in Painting I. Students are engaged in projects that allow them to hone their technical skills while they define and develop their individual concerns as well as the formal means through which to communicate those concerns. Lab fee.

**ARST 31315. Scene Design and Techniques**

(3-0-3)

This is a beginner's course in basic scenic design techniques and hand drafting for the stage. This course will take the student through the process of design, from how to read a script, research, presentation, rendering, basic drafting and, if time allows, model building. No previous experience necessary. Offered fall only. Materials fee TBA.

**ARST 31316. Scenic Painting**

(3-0-3)

An introduction to the tools and techniques used in painted and textured scenery for the stage and screen. Students will learn and apply the variety of methods used in creating a wide range of painted effects; from the basic wood treatments to the advanced marbling and faux finishes. Outside-of-class painting time will be required.

**ARST 31402. Photography II**

(0-6-3)

*Prerequisite:* (ARST 21401 OR ARST 285 OR ARST 285S)

This course extends and develops the skills and concepts initiated in Photography I. Students also are introduced to a variety of photographic possibilities outside traditional black-and-white printing. Techniques explored include darkroom manipulations, photo-constructions, Polaroid transfers, installations, and non-silver processes. Projects encourage students to continue defining their own areas of interest and to locate their own concerns within the broad range of photographic issues. Lab fee.

**ARST 31405. Digital Color Photography**

(0-6-3)

*Prerequisite:* (ARST 21401 OR ARST 285 OR ARST 285S)

This course is an introduction to technical and aesthetic issues in color photography with an emphasis on the development of personal imagery and the history of color picture making. Lab fee.

**ARST 31415. Introduction to Film and Video Production**

(4-0-4)

*Prerequisite:* (FTT 10101 OR FTT 104) OR (FTT 20101 OR FTT 204)

An introductory course in the fundamentals of shooting, editing, and writing for film and video productions. This is a hands-on production course emphasizing aesthetics, creativity, and technical expertise. The course requires significant amounts of shooting and editing outside class. Students produce short video projects using digital video and Super 8mm film cameras and edit digitally on computer workstations. The principles of three-camera studio production are also covered.

**ARST 31421. Performance Art: History, Theory, and Practice**

(3-0-3)

Performance art is anti-art. Performance art is art that contradicts tradition—that aims to shock. This class will equip the student with an overview of its offenses. Class content may include: Dada's early 20th-century assaults on the audience; absurdist experimental performance works by Yoko Ono, Lygia Clark, John Cage, and Nam June Paik from the 1960s; performance art addressing racism by Adrian Piper and William Pope L. from the 1980s; and current performance works by Internet artists and others. Discussions will focus on the aesthetics and politics of marginality. In other words, why shock? Why experiment? Is there any market for such work today? We will also look at critical and theoretical texts about performance, modernism, and the avant-garde and consider their relation to the works themselves. These may include manifestos by performers and artists;

debates about the autonomy of art; poststructuralist writings on art and aesthetics; and theories of performativity. Finally, students will be expected to create one or more performance art pieces themselves. Students should expect to be asked to participate in other students' pieces as well as in their own.

**ARST 31502. Poster Shop**

(0-3-3)

Students will create posters and broadsides using relief, silkscreen, and inkjet printing. These media offer powerful imaging techniques that range from hand-drawn/cut stencils to digital impressions. A variety of surfaces and applications will be explored. Art historical sources such as propaganda and political posters, concert promotions and urban graphics will propel creative projects.

**ARST 41103. Ceramics—Studio**

(0-6-V)

This advanced course is for students pursuing an individual direction in ceramics. Emphasis is on individual concepts and techniques.

**ARST 41203. Figure Drawing, Multilevel**

(3-0-3)

*Prerequisite:* (ARST 31202 OR ARST 325S)

Open to all students. The emphasis is on drawing in all its aspects: materials, methods, techniques, composition, design, and personal expression. The human figure is the subject matter. While anatomy is studied, the course is not an anatomy class. Male and female models, clothed and nude, are used. Lab fee.

**ARST 41304. Watercolor, Multilevel**

(3-0-3)

*Prerequisite:* (ARST 21303 OR ARST 231S OR ARST 232S)

This course is a continuation of the watercolor medium and deals with a variety of methods, materials, and techniques (both realistic and abstract) with special emphasis on color and composition.

**ARST 41305. Painting Studio**

(0-6-V)

This course is devoted to defining personal painting directions (oil/acrylic). Students gain experience in criticism and in exhibition techniques.

**ARST 41307. Painting, Multilevel**

(3-0-3)

*Prerequisite:* (ARST 11301 OR ARST 133S OR ARST 134S) OR (ARST 31302 OR ARST 334S)

This course extends and develops the skills and concepts initiated in Painting I and II. Students are engaged in projects that allow them to hone their technical skills while they define and develop their individual concerns as well as the formal means through which to communicate those concerns. Lab fee.

**ARST 41402. Advanced Photography**

(0-6-3)

*Prerequisite:* (ARST 31405 OR ARST 375S) OR (ARST 31402 OR ARST 366S)

This is an advanced photography course that allows students to explore their own areas of interest while learning about a broad range of contemporary photographic issues. Students may work in any photo medium (black-and-white, color, digital, etc.) they choose. Emphasis is on creating a portfolio of images.

**ARST 41403. Advanced Digital Photography**

(0-6-3)

*Prerequisite:* (ARST 31402 OR ARST 366S) OR (ARST 31405 OR ARST 375S)

This course uses computers for creative image making. Students are introduced to the practices and procedures of digital imaging with an emphasis on exploring their own personal work. Lab fee.

**ARST 41407. Studio Photography**

(0-6-3)

*Prerequisite:* ARST 21401 OR ARST 285S

This course introduces the student to the fundamentals of studio photography. Included are lighting skills and the basics of medium- and large-format cameras. The course serves as an introduction to both commercial illustration and methods for personal work with the view camera.

**ARST 41408. The Photographic Portrait**

(0-3-3)

*Prerequisites:* (ARST 21401 OR ARST 285 OR ARST 285S) AND (ARST 31402 OR ARST 366S OR ARST 31405 OR ARST 375S)

The representation of human identity has been one of the most significant and sustaining subjects within the history of images. This course examines the various styles and thematic approaches to the photographic portrait from historical practice to contemporary artworks. Lectures provide an overview of the discipline. Students work on their own portrait projects in the lighting studio and on location outside the studio. Students must have previous studio lighting experience.

**ARST 41416. Intermediate Film Production**

(3-0-3)

*Prerequisite:* (FTT 30410 OR FTT 361)

This film production course will focus on 16mm black-and-white silent narrative filmmaking. We will explore the technical use and aesthetic application of the film camera and related equipment as well as the development of the short film narrative script. Students will shoot a short film lighting and composition exercise and in-class film test, and ultimately produce, shoot, and edit one 4–6-minute, 16mm B/W film in teams of two. The projects will be edited digitally, but there will be NO effects, fades, dissolves, titles, or sound. The filmmaking process requires a lot of field work on locations and transporting heavy equipment. In addition to the projects there will be a midterm and a few papers required. Materials fee required.

**ARST 41417. Advanced Film Production**

(3-0-3)

*Prerequisite:* (FTT 40410 OR FTT 448A)

This production workshop encourages the development of short scripts (including casting, pre-production, and storyboarding) for fiction, nonfiction, or formal film projects by pairs of students. It stresses writing skills with an emphasis on the development of innovations that expand the existing traditions of and boundaries between fiction and nonfiction practices. Application may be obtained from [nd.edu/~ftt](http://nd.edu/~ftt) or in 230 DeBartolo Performing Arts Center.

**ARST 41418. Professional Video Production**

(4-0-4)

PA course for the advanced production student interested in the techniques and technology of the broadcast video industry, utilizing the following post-production software: Avid Media Composer, Adobe After Effects, Lightwave 3D, and Digidesign Pro Tools. Students produce projects using BetacamSP and DV video equipment while learning the basics of nonlinear editing, digital audio sweetening, 2-D compositing, and 3-D animation techniques.

**ARST 41506. Multilevel Books and Print making**

(0-6-3)

*Prerequisite:* (ARST 21501 OR ARST 489S) OR (ARST 21503 OR ARST 292S) OR (ARST 21505 OR ARST 297S) OR (ARST 21507 OR ARST 287S) OR (ARST 21509 OR ARST 291S)

This course offers advanced experience in making artist's books, lithography, photolithography, etching, silkscreen, and relief. Emphasis is on developing personal work and imagery. Lab fee.

**ARST 41608. Sculpture Studio**

(0-6-3)

*Prerequisite:* (ARST 11601 OR ARST 149S)

This advanced sculpture course offers serious students an opportunity to pursue a sculptural direction and to carry that direction to a professional level of

competence. It also develops the student's awareness of definitions and criticism of sculpture. The work may be done in any three-dimensional medium.

**ARST 43406. Undergraduate Photography Seminar**

(3-0-3)

*Prerequisite:* (ARST 31402 OR ARST 366S) OR (ARST 31405 OR ARST 375S)

This is a topics course for advanced photography students. Students are engaged in critical issues involving contemporary studio practice through slide lectures, discussions, visiting artist interviews, gallery visits, and student presentations. Directed readings and critical writings will be assigned during the semester. Students will concurrently develop a creative project. Lab fee.

**ARST 43702. B.F.A. Seminar**

(3-0-3) Collins

B.F.A. majors only. Required of all B.F.A. studio and design majors. This course is designed to broaden the context of the student's chosen major in the department by introducing the student to alternative and integrated points of view from all areas of study that are represented by the studio and design field. This course will help first semester senior B.F.A. majors to orient toward their chosen direction and project for the B.F.A. thesis. Critical writing and directed readings will be assigned throughout the semester. Slide lectures, visiting artist interviews, gallery visits, student presentations, portfolio preparation, and graduate school application procedures will supplement the course.

**ARST 47171. Special Studies—Ceramics**

(0-V-V)

Independent study in ceramics: research or creative projects.

**ARST 47271. Special Studies—Painting/Drawing**

(0-V-V)

Independent study in painting or drawing: research or creative projects.

**ARST 47272. Special Studies—Painting/Drawing**

(0-V-V)

Independent study in painting/drawing under the direction of an individual faculty member.

**ARST 47273. Special Studies—Painting/Drawing**

(0-V-V)

Independent study in painting/drawing under the direction of an individual faculty member.

**ARST 47471. Special Studies—Photography**

(0-V-V)

Independent study in photography: research or creative projects. Open to upper-level students with permission of the instructor.

**ARST 47472. Special Studies—Photography**

(V-0-V)

Independent study in photography under the direction of an individual faculty member.

**ARST 47571. Special Studies—Print making**

(0-3-3)

Independent study in print making: research or creative projects.

**ARST 47671. Special Studies—Sculpture**

(0-V-V)

Independent study in sculpture: research or creative projects.

**ARST 47672. Special Studies—Sculpture**

(0-V-V)

Independent study in sculpture under the direction of an individual faculty member.

**ARST 47771. Special Studies**

(V-0-V)

Independent study in art studio: research or creative projects.

**ARST 48103. B.F.A. Thesis—Ceramics**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The B.F.A. thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a B.F.A. thesis exhibition. The student signs up with a faculty member working in ceramics, who serves as an advisor for the thesis project.

**ARST 48203. B.F.A. Thesis—Painting/Drawing**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a B.F.A. thesis exhibition. The student signs up with a faculty member working in painting or drawing, who serves as an advisor for the thesis project.

**ARST 48204. B.F.A. Thesis—Painting/Drawing**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The B.F.A. thesis is a personal visual statement that is the culmination of a student's collective development within the department. The B.F.A. thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a B.F.A. thesis exhibition. The B.F.A. thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

**ARST 48205. B.F.A. Thesis—Painting/Drawing**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The B.F.A. thesis is a personal visual statement that is the culmination of a student's collective development within the department. The B.F.A. thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a B.F.A. thesis exhibition. The B.F.A. thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

**ARST 48305. B.F.A. Thesis—ARST**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The B.F.A. thesis is a personal visual statement that is the culmination of a student's collective development within the department. The B.F.A. thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a B.F.A. thesis exhibition. The B.F.A. thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

**ARST 48403. B.F.A. Thesis—Photography**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in photography, who serves as an advisor for the thesis project.

**ARST 48404. B.F.A. Thesis—Photography**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The B.F.A. thesis is a personal visual statement that is the culmination of a student's collective development within the department. The B.F.A. thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a B.F.A. thesis exhibition. The B.F.A. thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

**ARST 48503. B.F.A. Thesis—Print making**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in print making, who serves as an advisor for the thesis project.

**ARST 48603. B.F.A. Thesis—Sculpture**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in sculpture, who serves as an advisor for the thesis project.

**ARST 48703. B.F.A. Thesis**

(3-0-3)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

**DESN 11100. 2-D Foundations**

(0-6-3)

Art majors only. This course deals with fundamentals of two-dimensional design and is intended for students entering studio practice for the first time. The course is also open to more advanced students who wish to increase their knowledge of the elements and principles of design. The course is project-oriented. Studio practice in the basic principles of design employing color theory, form, and space

organization, as well as materials and processes used in the design process, are emphasized. Lab fee.

### **DESN 21101. Graphic Design I**

(0-6-3)

*Prerequisite:* (DESN 11100 OR DESN 111S)

*Corequisite:* DESN 32107

This introductory course explores the origins, concepts, and processes affecting traditional and contemporary graphic design. Laboratory activities introduce and implement computer and print technology for the creation of original design projects. Lab fee.

### **DESN 21200. Visual Dialogue**

(0-6-3)

Open to all students. This cross-disciplinary course in rapid sketching and rendering technique serves studio art, design, and architecture. The course is intended for students entering studio practice for the first time, as well as for advanced students who wish to deepen their visualization and illustration skills. Lab fee.

### **DESN 21201. Product Design I**

(0-6-3)

This foundation 3-D design studio begins as a natural extension of basic design. Students are encouraged to think and work in three-dimensional media. A series of fundamental design problems are assigned during the course of the semester. Emphasis is placed on the transformation of imagination from mind to paper to model. Computer-aided design (CAD) is also introduced into assignments. Lab fee.

### **DESN 30104. Building the Modern Web**

(3-0-3) Smith

Building the Modern Web is designed to cut through the technology involved in the website creation process and get to the core meaning and goals of a Web project. Technological concepts will be covered, but in no real depth. Instead, you will be instructed on how certain technologies, languages, and concepts add pieces to the puzzle of a modern website, and how you can have a knowledgeable part in every step. It is suggested that this class be taken concurrently with Graphic Design II or after Graphic Design II has been completed.

### **DESN 30105. Applied Multimedia Technology**

(3-0-3) Clark

The goal of this course is to explore the use of multimedia in communicating information and solving problems. Using Macromedia Flash and other tools, students create interactive multimedia applications that incorporate text, animation, images, sound, and video. They also learn how to evaluate the aesthetics, functionality, and usability of a website. Finally, the course equips students with strategies for enhancing their skills after the semester ends. It is suggested that this class be taken concurrently with Graphic Design II or after Graphic Design II has been completed.

### **DESN 31203. Product Design Research Project**

(0-6-3)

*Prerequisite:* (DESN 21200 OR DESN 217S) OR (DESN 21201 OR DESN 218S)

This course exposes art and design students to common low- and high-production manufacturing processes. Students use these methods to execute their own original designs. Students are introduced to plastic thermoforming, injection molding, sheet and profile extrusion, blow-molding, rotational molding, reaction-injection molding, and open mold laminating. Metal processes include roll forming, foundry sand casting, die-casting, extrusion, stamping, anodizing, and plating.

### **DESN 31204. Advanced Product Design**

(0-6-3)

*Prerequisite:* (DESN 21200 OR DESN 217S) OR (DESN 21201 OR DESN 218S)

This advanced-level studio is directed toward the product design student who is preparing to enter either graduate school or professional practice. Fulfillment of this studio requires the completion of one research and design project. In addition, portfolios and résumés are prepared. Emphasis is placed on knowledge, analytical skills, logic, creativity, and excellence in visual communication.

### **DESN 31205. Digital 3-D**

(0-6-3)

*Prerequisite:* (DESN 21201 OR DESN 218S)

This course introduces students to Alias Wavefront software, a powerful conceptual tool for modeling and animating complex objects. In this digital exploration, computer technology will be used to generate, modify, and present design ideas. Lab fee.

### **DESN 31208. Furniture Design I**

(0-6-3)

This course is an introduction to furniture design encompassing the study of modern designers and contemporary design issues. A series of furniture design problems are assigned that serve as focus for investigations into contemporary and non-traditional applications of design principles. Full-scale furniture is produced for each project. Lab fee.

### **DESN 31316. Theatrical Production**

(3-0-3)

A practical introduction to techniques, processes, and materials. The student will explore traditional and modern stagecraft methods: carpentry, rigging, basic scenic painting as well as basic technical drafting, design ideas, equipment use, safety, material handling, and problem solving. Students will gain practical experience participating on realized projects and productions.

### **DESN 32107. Adobe CS3 Design Tutorial**

(0-2-1)

*Corequisite:* DESN 21101

This one-credit course will focus on Adobe Creative Suite 3 (CS3) software. The class will meet one evening per week throughout the course of the semester. Programs and topics to be covered will be Adobe Photoshop, InDesign, Adobe Illustrator, proper file preparation, font access, and usage.

### **DESN 41102. Graphic Design II**

(0-6-3)

*Prerequisite:* (DESN 21101 OR DESN 281S)

This advanced course in visual communication is for students interested in the art of typography, its history, and the use of type as a critical element in the world of graphic design. Lab fee.

### **DESN 41103. Graphic Design III**

(0-6-3)

*Prerequisite:* (DESN 41102 OR DESN 415S)

This advanced course in visual communication is for students who intend to pursue the field of graphic design after graduation. The class will help prepare students both technically and creatively for professional practice by focusing on research-based projects. Lab fee.

### **DESN 41104. Graphic Design IV**

(0-6-3)

*Prerequisite:* (DESN 41103 OR DESN 416S)

This senior-level, research-based course will explore the contemporary practice of professional design through client-based projects created in both print and multimedia forms.

**DESN 41105. Multimedia Web Design**

(0-6-3)

*Prerequisite:* (DESN 21101 OR DESN 281S)

This advanced digital image-making course gives the studio or design major the opportunity to pursue research and development in an advanced area of technology. In some semesters, a topic is announced as a focus for the course such as Postscript programming or hypermedia design.

**DESN 41106. Web Page Design**

(0-3-3)

This course will cover the design considerations for the internet including techniques of graphic production and Web page efficiency. Design with Macromedia Dreamweaver, Flash, and the use and creation of style sheets will be also be covered. Experience with Macintosh graphics programs needed. Work outside of class is expected.

**DESN 41209. Furniture Design Studio**

(0-V-V)

*Prerequisite:* (DESN 31208 OR DESN 330S)

This course offers advanced students an opportunity to develop a personal direction, using wood as a material of expression. Lab fee.

**DESN 41301. Multimedia Motion Graphics**

(0-3-3)

This advanced multimedia course will give the studio, design, or CAPP major an introduction to the design of motion graphics. Students will develop short information movies, movie trailers, or movie opening sequences. The course will use Apple's Motion software and cover basic DVD and QuickTime movie development. Skill with various graphics software useful, with expertise in Adobe Photoshop being very important.

**DESN 41419. CAD for the Stage**

(0-3-3)

The study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design and progress to 2-D and then 3-D design techniques. A basic understanding of computer systems is necessary, and significant computer work is required outside class.

**DESN 41420. Advanced Technical Production**

(0-3-3)

Advanced coursework in the tools, materials, and processes used in the creation of theatrical scenery. Topics may include (but not limited to) scenic welding, advanced rigging techniques, electronic controls, pneumatics, hydraulics, structural design for the stage, CAD, and other state-of-the-art technologies. Laboratory required.

**DESN 45310. Design Internship**

(V-0-V)

Permission required. This course provides an opportunity for the design student to earn credit at an approved design office.

**DESN 47171. Special Studies—Graphic Design**

(V-0-V)

Independent study in graphic design: research or creative projects.

**DESN 47172. Special Studies—Graphic Design**

(0-V-V)

Independent study in product design under the direction of an individual faculty member.

**DESN 47173. Special Studies—Graphic Design**

(0-V-V)

Independent study in design: research or creative projects. Open to upper level/graduate students with permission of the instructor.

**DESN 47271. Special Studies—Product Design**

(V-0-V)

Independent study in product design: research or creative projects.

**DESN 47272. Special Studies—Product Design**

(0-V-V)

Independent study in product design under the direction of an individual faculty member.

**DESN 47371. Special Studies**

(V-0-V)

Permission required. Independent study in design.

**DESN 48103. B.F.A. Thesis—Graphic Design**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The thesis is a personal visual statement that is the culmination of a student's collective development within the department and can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a thesis exhibition. The student signs up with a faculty member working in graphic design, who serves as an advisor for the thesis project.

**DESN 48104. B.F.A. Thesis—Graphic Design**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The B.F.A. thesis is a personal visual statement that is the culmination of a student's collective development within the department. The B.F.A. thesis can be the extension of an ongoing body of work or a defining project. The thesis project is supported by a written statement defining the project, which is due at the end of the first senior semester. The thesis project culminates in the second senior semester with a B.F.A. thesis exhibition. The B.F.A. thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

**DESN 48105. B.F.A. Thesis—Graphic Design**

(0-V-V)

The B.F.A. thesis is defined by an independent thesis project, continuing for two semesters during the senior year. The B.F.A. thesis is a personal visual statement that is the culmination of a student's collective development within the department. The B.F.A. thesis can be the extension of an ongoing body of work or a defining project. The thesis project culminates in the second senior semester with a B.F.A. thesis exhibition. The B.F.A. thesis student signs up with a faculty member working in the student's area of interest, who serves as an advisor for the thesis project.

## Center for Asian Studies

### **ASIA 20101. Introduction to Chinese Culture and Civilization**

(3-0-3)

*Prerequisite:* (EALC 10102 OR EALC 102)

This is a survey course that introduces the students with little or no knowledge of the Chinese language or culture to the major aspects of Chinese cultural tradition from the dawn of its civilization to the present time. Readings (in English translation) include traditional Chinese historical, philosophical, political, religious, and literary texts, as well as modern scholarship. Students are encouraged to bring in their experience, living or reading, of Western culture in order to approach the Chinese texts from a comparative perspective. Course Procedures and Requirements: This course will use a combination of lectures, discussion, and presentation by students. Movie documentaries will also be used from time to time. Reading assignments should be done before the lectures and in the sequence as they are given in the course schedule for each class so that the students may be ready for discussion in class. Whereas their amount and level of difficulty vary, the texts always demand careful and thoughtful reading.

### **ASIA 20102. Culture, Media, and Entertainment in China Today**

(3-0-3)

This course is designed to provide students with an introduction to aspects of contemporary Chinese culture, media, and entertainment. The class focuses on the development of China's media and entertainment industries, including the online industry, the music industry, advertising, television, and the film industry. Students will learn to critically analyze authentic cultural products, study their cultural and literary dimensions, and discuss how culture affects the political and economic aspects of these industries. This class aims to be interdisciplinary and is designed to accommodate students from a large range of academic interests, including business, marketing, political science, economics, communication, media studies, music, sociology, literature, film, cultural studies, and Asian studies. No prior knowledge of China or the Chinese language is required.

### **ASIA 20105. Introduction to Korea and Korean Culture**

(3-0-3)

This introductory course is designed for students without extensive prior knowledge of Korea or Korean culture. Diverse aspects of Korea such as natural environment, history, religion, family relations, thought, literature and arts will be surveyed. Through this course, students will gain a greater appreciation and knowledge of Korean culture and literature, allowing them to engage in more advanced, in-depth study in subsequent semesters. The contemporary culture of Korea will be an important focus of the course, enriching students understanding of Korean society and culture today.

### **ASIA 20106. Introduction to Modern South Asia**

(3-0-3)

More than one-fifth of the world's population lives in South Asia, a region comprised of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan, and the Maldives. This introductory course will provide a survey of issues and events in South Asian history from the establishment of British East India Company rule in 1757 to the decolonization of South Asia in 1947. The course will explore the following themes: the rise of a trading company, the East India Company, and its transition into a colonial power; the emergence of a colonial economy; colonial production of knowledge; 19th- and 20th-century cultural, religious, and political movements and formations of new identities; the emergence of elite and popular nationalisms; independence; and the partition of the subcontinent.

### **ASIA 20146. Music and Globalization in Asia**

(3-0-3) Ng

This course explores musical production in India and China, the "new cultural cores" that are gradually replacing the United States and Western Europe in cultural influence in Asia and the Asian diaspora. Taking into account these countries' colonial and semi-colonial histories, their political and economic

development, and the increasing transnational movement of their citizens, this course charts the development of commercially successful music from these countries— bhangra; Bollywood; Chinese pop; and fusion music popularized by bands like Twelve Girl Band and composers like Tan Dun in films like *Crouching Tiger, Hidden Dragon*— that have not only captured Asia, but the West as well, and shaped the imagination of what Indian-ness and Chinese-ness are, both to the Chinese/Indians and non-Chinese/Indians. In addition, this course examines Filipino entertainers, a group of musicians who provide live entertainment of a transnational capacity throughout Asia. They represent important channels for the dissemination of Indian and Chinese popular music in that region. Globalization and cosmopolitanism theories will be discussed in this course.

#### ASIA 20148. Music and World Religions

(3-0-3)

Through this ethnomusicology course, students will learn the roles music occupies in world religions. More than a world music course, we will examine the creative expression of the divine through the universal language of organized sound as music, as music plays a major role in the practice of most religions worldwide. This study involves all the major continents, highlighting new perspectives as to the confluence between religious culture and musical expression. Knowledge of music beneficial but not required; just open ears and minds to the diverse ontological understandings comprising various world views.

#### ASIA 20301. Chinese Society and Culture

(3-0-3)

This course introduces students to the complexities of contemporary Chinese society in the context of the past. Topics covered include food, family and gender, political activity, ethnicity and identity, urban and rural life, work and unemployment, economic complexity, multilingualism, arts, religion, medicine and the body, and literature.

#### ASIA 20304. Societies and Cultures of South Asia

(3-0-3)

This course introduces societies and cultures of South Asia (including India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, and the Maldives). Emphasis will be on the Indian subcontinent.

#### ASIA 20825. World Religion and Catholicism in Dialogue

(3-0-3) Gorskii

A theological exploration of Hinduism, Buddhism, Taoism, Judaism, Islam, and the relationship of Christianity to those religions. The goal of this exploration is, specifically, (1) to set forth the essential characteristics of the world's great religions; (2) to disengage the essential differences between Christianity and the other world religions; (3) to identify the distinctiveness of Catholicism within the family of Christian traditions; and (4) to examine historically and systematically the Christian theological appraisal of other world religions. The ultimate goal of this course is to enable the students to gain a deeper understanding of Christianity by "passing over" into and experiencing, as well as appraising, the different major religious traditions of the world. To enhance the learning experience, the course will make abundant use of films. The students are required to attend class regularly and punctually. Indeed, strong emphasis is placed on the requirement to attend class faithfully. Students are allowed but one single absence during the semester.

#### ASIA 20828. Christianity and World Religions

(3-0-3) Malkovsky

The purpose of this course is to introduce the student to the basic teachings and spiritualities of Hinduism, Buddhism, and Islam. We will approach these religions both historically and theologically, seeking to determine where they converge and differ from Christianity on such perennial issues as death, meaning, the nature of the ultimate Mystery, the overcoming of suffering, etc. We will also examine some traditional and contemporary Catholic and Protestant approaches to religious pluralism. Our own search to know how the truth and experience of other faiths is related to Christian faith will be guided by the insights of important Catholic contemplatives who have entered deeply in the spirituality of other traditions. By course end, we ought to have a greater understanding of what is essential to

Christian faith and practice, as well as a greater appreciation of the spiritual paths of others. Requirements: Short papers, midterm exam, and final exam.

#### ASIA 23101. Chinese Literary Traditions

(3-0-3)

A survey course introducing students to the major themes and genres of Chinese literature through selected readings of representative texts.

#### ASIA 23301. Masterpieces of Japanese Literature

(3-0-3)

This course is a survey of Japanese poetry, fiction, and drama from the earliest times through the 20th century. All texts are in English, and no special knowledge of Japan or Japanese is required. The course is divided into four units. We will begin with the development of court poetry (*waka*) as found in the *Manyōshū* (*Collection of Ten Thousand Leaves*) and the first Imperial Anthologies, followed by episodes from the *Tales of Ise*, and selected chapters from Murasaki Shikibu's masterpiece of courtly love, *The Tale of Genji* (c. A.D. 1000). In addition to social and historical factors influencing the development of a courtly aesthetic, we will also consider the influential role played by Buddhism and Chinese literature. In the second unit, we will look at how Japanese literature developed under the patronage of the Samurai aristocracy during Japan's "medieval" period (12th–16th centuries) with readings of Noh plays, linked verse (*renga*) and philosophical essays such as *An Account of My Hut* and *Essays in Idleness*. For the third unit, we move to the Early Modern Period with the haiku poetry of Basho, short stories by Saikaku ("Five Women Who Loved Love"), and *The Love Suicides at Amijima*, a play by Chikamatsu Monzaemon. For the last unit, we will read a selection of modern stories and plays.

#### ASIA 27463. Anti-Social Behaviors in Modern Chinese Fiction

(3-0-3)

Chinese society is often characterized as highly conformative and lacking in individuality. Is this true? What kind of behaviors then would be considered antisocial, and what are their moral, social, and political consequences? In this course, we will read fictional works depicting behaviors and attitudes that are considered by society in general as antisocial, anti-conventional, and sometimes anti-Party. We will investigate the contexts of these behaviors and their political implications. For instance, are these behaviors justified? Are different standards applied to women? What are the temporal and spatial factors in people's conception of an antisocial behavior? To what extent are these behaviors culturally determined? No prior knowledge of the Chinese languages or China is required.

#### ASIA 30011. Asian American Literature

(3-0-3)

This course will explore the development of Asian American Literature from the 1800s to the present, focusing on writers of Chinese, Filipino, Indian, Hmong, Japanese, and Korean descent. Discussions will focus on questions of race/ethnicity, identity/representation, nation, and exile. Primary texts, including novels, short fiction, poetry, theory, and film, will be supplemented by critical articles. Some works to be discussed will include Carlos Bulosan's *America Is In the Heart*, Jessica Hagedorn's *Dogeaters*, Maxine Hong Kingston's *The Woman Warrior*, Faye Ng's *Bone*, John Okada's *No-No Boy*, in addition to other texts.

#### ASIA 30101. Chinese Ways of Thought

(3-0-3) Jensen

This lecture and discussion course on the religion, philosophy, and intellectual history of China that introduces the student to the world view and life experience of Chinese as they have been drawn from local traditions, as well as worship and sacrifice to heroes, and the cult of the dead. Through a close reading of primary texts in translation, it also surveys China's grand philosophical legacy of Daoism, Buddhism, "Confucianism" and "Neo-Confucianism," and the later religious accommodation of Christianity and Islam.

**ASIA 30106. Modern South Asia**

(3-0-3) Sengupta

Home to over a billion people, just over 23 percent of humanity, the South Asian subcontinent is a fascinating laboratory in which to analyze the unfolding of such themes in modern history as colonialism, nationalism, partition, decolonization, post-colonial democracies, the modern state, economic development, center-region problems, and relations between Asia and the West. The course will consider critical themes in social, political, economic, and cultural history, which will include imperialism, capitalism, nationalism, religious politics, regionalism, ethnicity, globalization, diaspora, ecology, social inequality and gender, development, and democracy. It will not only provide a lively historical narrative told through lectures based on scholarly research and primary texts, but will also seek to embellish this narrative with the perception and articulation of vision and sound, as well as with readings from representative genres of South Asian literature.

**ASIA 30107. Debating Empire: Themes from Modern South Asian History**

(3-0-3)

This course introduces undergraduates to contentious themes in the history of British Empire in South Asia through a close examination of historiography. By focusing on the centrality of colonialism in instituting change and fundamentally transforming South Asian society, the course traces the emergence of dominant schools of South Asian (particularly Indian) historiography. Historical approaches to be examined include imperial and colonial historical writing, the Cambridge School, several forms of nationalist historiography (including secular and religious), Marxist perspectives, and the more recent Subaltern Studies collective, as well as critiques of these. Topics of analysis will include (1) de-industrialization and the colonial economy; (2) agriculture and the idea of private property; (3) the 1857 rebellion or Sepoy Mutiny; (4) continuity and change in 18th-century India; (5) colonialism and its impact on knowledge production; (6) gender and colonial law; (7) the construction of religious identities and communal violence in colonial India; (8) capitalist development or socialist planning; (9) affirmative action; and (10) environment and development. These debatable themes in South Asian history have generated an enormous corpus of literature, enabling us to problematize the relationship of the historian to “facts” by drawing attention to the ways in which diverse positions and perspectives privilege different categories, actors, and modes of analysis. The course also looks at the role of history within the development of colonial governance and the rise of nationalist movements, and examines the relationship of different segments of the population to history and to the nation.

**ASIA 30110. Ancient Japan**

(3-0-3) Thomas

This course provides training in understanding and engaging history as a series of wide-ranging debates. The class will examine three issues: first, the politically charged question of Japan's origins in myth and archeology; second, the question of whether the forces of Chinese culture or nature as disease and environmental degradation defined the Yamato state from the sixth to the ninth century; and, third, whether Heian court power until about 1200 rested on economic, political, military, judicial, or aesthetic grounds. The second purpose of the course, the development of the disciplined imagination necessary to enter another culture and another time, relies on the reading of primary texts in translation. There will be three tests and several classroom assignments.

**ASIA 30115. Japan's Imperial House**

(3-0-3)

Japan boasts the longest, unbroken imperial line extant today, but what does this continuity really mean? This course looks at Japan's emperors and empresses from antiquity to the present, raising questions about the nature of power, the idea of good government, gender, divinity, war responsibility, and the liberty of the family now called upon to symbolize a purportedly democratic nation. Although most of the course will focus on modern emperors, it begins with Japan's earliest political structures in order to ask such questions as: Was the Imperial House an indigenous idea, or was it an imitation of Chinese ideas of power? Why were there

so many powerful women leaders in ancient Japan, and why did Japan stop having empresses on the throne? What is the relationship between the imperial house and the various religions of Japan? The course will then consider the medieval and Tokugawa periods, asking why powerful Samurai failed to overthrow the militarily impotent emperors. Finally, the course will turn to the modern period, beginning in the middle of the 19th century with the elevation of the Meiji Emperor to unprecedented prominence. Why was the ancient imperial house used to modernize Japan? Even though sex of emperors has been male for centuries, why were ancient emperors female, and why is the imperial gender (and Japan as a whole) in the modern period often regarded as female? Was Hirohito guilty of fomenting war? What is the function of the Imperial House today? This course sweeps through myth and 1500 years of Japanese history, tracing the permutations, continuities, and discontinuities of the imperial line.

**ASIA 30120. Modern Japan**

(3-0-3)

This introduction to modern Japanese history focuses on political, social, economic, and military affairs in Japan from around 1600 to the early post-WWII period. It considers such paradoxes as Samurai bureaucrats, entrepreneurial peasants, upper-class revolutionaries, and Asian fascists. The course has two purposes: (1) to provide a chronological and structural framework for understanding the debates over modern Japanese history; and (2) to develop the skill of reading texts analytically to discover the argument being made. The assumption operating both in the selection of readings and in the lectures is that Japanese history, as with all histories, is the site of controversy. Our efforts at this introductory level will be dedicated to understanding the contours of some of the most important of these controversies and judging, as far as possible, the evidence brought to bear in them.

**ASIA 30125. Japan Through the Camera Lens**

(3-0-3) Thomas

Japanese culture embraced the camera almost as soon as it was invented in Europe. Even while the Japanese government rigorously controlled contact with outside nations, this new device for recording and exploring the world entered a Japanese port and was put to use by Japanese and, eventually, by foreigners to document Japan's opening to the West, its military adventures, its transformation into an industrial and consumer society, and its erotic longing. This course uses photography, film, and writing about art and politics as a way of exploring key issues in Japanese society.

**ASIA 30150. Modern China**

(3-0-3)

The course will provide a general survey of Chinese history from 1644 (the establishment of the Qing dynasty) to the present. It will highlight China's evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–49, back to a period of strength under the Communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

**ASIA 30189. South Asia: Colonialism and Nationalism**

(3-0-3) Sengupta

This course will examine the colonial encounter in the Indian subcontinent; i.e. the period of the advent, establishment, and collapse of British colonial power during the period roughly between 1750 and 1950. It will explore the nature of this encounter and its impact on the subcontinent, particularly the emergence of modern nationalisms and the making of the modern South Asian nation-states of India and Pakistan. Recent scholarship on British colonialism and Indian nationalism has been rich and diverse, examining areas ranging from the nature of “anti-colonial” nationalism to the impact on the economy, on state practices, social structures such as caste, peasant resistance, gender relations and modern history writing itself. One of the objectives of the course is to introduce students to some of the major historical debates in South Asian history through the concepts of “nationalism,” “colonialism,” and “modernity.” Another is to think about the ways

in which this encounter has been represented in different kinds of texts ranging from scholarly texts to fiction and films.

### **ASIA 30280. International Relations in East Asia**

(3-0-3) Moody

This course explores the interactions of the states and societies in the East Asian region, focusing mainly on the relationships of China and Japan, their interactions with each other and with the outside “Asian” powers, the United States, and Russia (Soviet Union). The first set of class discussions examines the China-centered system in East Asia prior to the intrusion of the new world system carried by Western imperialism. The course then turns to a discussion of this Western impact: the colonization of most of the Southeast Asian societies; the reduction of China to a “semi-colony” and the subsequent process of revolution, both nationalist and communist, in that country; and Japan’s turn to “defensive modernization” and its own imperialism to ward off the West and claim status as a great power on a par with the Western countries.

### **ASIA 30301. Human Rights in the Age of Terrorism: The View from South Asia**

(3-0-3)

This course will look at human rights and its continued relevance in the age of terrorism. Recent developments have shown the need for states to protect themselves and their populations from acts of terror while at the same time maintaining respect for human rights and the rule of law. This course examines how to uphold that balance and draws from the experience of Pakistan’s involvement in the global fight against terror. It examines both the misuse of prevention of terrorism laws as well as the minimum safeguards and remedies that must be guaranteed and provided if human rights are not to become the first casualty in the war on terror. There is no exam. Grades based 75 percent on research paper; 25 percent on class participation. Students are expected to have completed readings before the class.

### **ASIA 30302. Culture and Conflict in the Pacific**

(3-0-3)

In recent years, many Pacific societies have been unsettled by conflict, military coups, crises of law and order, struggles for land rights, and battles over nuclear testing. This course introduces students to the diverse cultures of the Pacific by examining some of these contemporary conflicts in historical perspective. Topics of particular interest are indigenous rights, relations between indigenous people and migrants, and the role of outside powers in Pacific Island states. In addition to examining the indigenous cultures of the Pacific, we will compare and contrast societies in which indigenous islanders are disenfranchised minorities (as in Hawaii, New Zealand, and Australia) and those societies in which they are the dominant majority (as they are in Fiji and Solomon Islands).

### **ASIA 30305. Immigration in Global Perspective**

(3-0-3) Albahari

How do people in immigrant-receiving countries shape their attitudes toward immigrants? What are the differences between refugees and other migrants? How is immigration related to urban “immigrant riots”? And what can anthropological studies of borders and national policies tell us about the transnational world in which we live? We will examine these and related questions, and more generally the causes, lived experiences, and consequences of migration. We will acquire a sound understanding of migration in its social, political, legal, and cultural facets. Fieldwork accounts from countries of origin and from the United States, Europe, Australia, and Japan will enable us to appreciate both global and US distinctive trends. Rather than merely learning a collection of facts about immigrants, we will address how migration intersects with gender and class; the mass media; border enforcement; racism; the economy; territory and identity formation; and religion.

### **ASIA 30376. Place, Environment, and Society in Australia and Melanesia**

(3-0-3)

Aboriginal Australian and Melanesian approaches to place have long intrigued and puzzled outsiders, challenging commonly held assumptions about the division between nature and culture or between human societies and their physical

environments. This course introduces students to some of these exotic approaches to place and encourages them to see their own environment in a new way. It also considers how indigenous Melanesian and Australian conceptualizations of place are being transformed through engagement with a global capitalist economy and in the context of modern nation states. How do notions of place change when land becomes a commodity? How are shifting connections to place transformed into legal ownership? What happens when kin networks are divided by national boundaries? Students will read several ethnographic monographs that convey a holistic sense of social life in particular locales. Topics that may be of particular interest include mythic and ritual relationships to the land, connections between language, place, and cultural identity, the ways that modern states enforce geographic boundaries, legal battles for land rights, and the relationship between global environmentalism and indigenous people.

### **ASIA 30465. Chinese Politics**

(3-0-3) Moody

Study of the contemporary Chinese political system and process in the light of Chinese history and culture. Some of the topics treated include the traditional political order; the revolutionary movements; the rise of communism; Maoism and the rejection of Maoism; the political structure; leadership, personalities, and power struggles; economic policy; social policy and movements; problems of corruption and instability; and prospects for democratic development. There will be some attention to Taiwan and to Hong Kong as special Chinese societies.

### **ASIA 30467. Introduction to South Asian Politics**

(3-0-3) Yadav

This course will present an overview of the politics of modern South Asia focusing on Afghanistan, Bangladesh, India, and Pakistan. We will begin by studying the impact of the British colonial experience, the rise of nationalism, and the emergence of independent nation states. To develop a broad understanding of the political and economic experience of the region, we will spend time analyzing the four countries individually before moving on to explore four important themes in political science. First, regime choice and regime survival in the four countries. Second, the role of women in the development experience. Third, identity politics and the emergence of violent domestic and international movements. Fourth, international relations focusing on the role of three key actors—the United States, China, and the Middle East in regional politics.

### **ASIA 30476. Political Movements in Asia**

(3-0-3) Hui

This course analyzes a wide range of political movements including nationalist and revolutionary movements, guerrilla insurgencies, terrorist organizations, democracy movements, and peace movements. The regional scope covers East Asia, Southeast Asia, and South Asia. To understand various movements, we will study global trends, human rights values, cultural differences, religious doctrines, historical legacies, state-society relations, leadership skills, mobilization strategies, and violent vs. nonviolent trajectories. In addition to analytical readings, we will also watch a series of documentaries and read a number of prominent (auto) biographies.

### **ASIA 30609. Buddhism in China**

(3-0-3) Gimello

Buddhism is the only one of the major religions traditionally regarded as Chinese that did not originate in China. China is arguably the Asian civilization in which Buddhism underwent its most extensive development and its most thoroughgoing transformations. This course is designed to be a thematic and historical overview of the development of Buddhist thought and practice in China with special emphasis on the process of mutual influence by which Buddhism, without ceasing to be Buddhist, became also a Chinese religion, while China, without abandoning its indigenous religious heritage, became also a Buddhist culture. As such, the course will serve a threefold purpose: It will introduce students to fundamental Buddhist beliefs and values as they took shape in China; it will acquaint them with essential elements of Chinese civilization attributable to Buddhism’s presence; and it will

provide an opportunity to study what may well be world history's most remarkable instance of successful cross-cultural religious communication.

### ASIA 30611. Buddhist Meditation Traditions

(3-0-3) Gimello

Relying chiefly on English translations of primary, mostly East Asian canonical sources, this course will examine varieties of Buddhist meditation practice while also posing theoretical questions about the nature of meditation as a form of religious life; its ethical implications; its relations with other elements of Buddhism like doctrine, ritual, art, institutions; etc.— all considered against the background of theological and philosophical concern with the role of contemplative experience in the religious life.

### ASIA 31316. Introduction to Japanese Popular Culture Lab

(0-0-0)

*Corequisite:* ASIA 33316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasizing the theoretical distinctions between those media. Rather than chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity to the postwar? What was the role of foreign influences, most importantly, American pop culture? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? Knowledge of Japanese is not required.

### ASIA 33101. Heroism and Eroticism in Chinese Fiction

(3-0-3) Ge

In this course, we will read works in Chinese fiction from the late imperial periods. We will discuss the aesthetic features of such works and their cultural underpinnings, especially the infusion of Confucian Taoist, and Buddhist meanings. Particularly, we will focus on heroism and eroticism as two major themes in Chinese fiction and their specific expressions in each work. We will consider the transition from heroism to eroticism as a shift of narrative paradigm, which coincided with a general trend of “domestication” in traditional Chinese fiction. Through the readings and discussions, the students are expected to become familiar with pre-modern Chinese narrative tradition and acquainted with some aspects of Chinese culture. All the readings are in English translation, and no prior knowledge of China or the Chinese language is required.

### ASIA 33103. Twentieth-Century Chinese Literature

(3-0-3) Ge

In this course, we will read English translations of works in 20th-century Chinese literature, especially short stories and plays written from the May 4th Movement in 1919 to the beginning of the Reform in the early eighties. We will discuss the literary expressions of China's weal and woe in modern times and of the Chinese people's frustrations and aspirations when their country was experiencing unprecedented social changes. No prior knowledge of the Chinese language or Chinese culture is required for taking the course.

### ASIA 33110. New Chinese Cinema

(3-0-3)

This class explores “underground” films produced in Mainland China since the 1980s. Many films that were produced illegally or banned in China have garnered awards in prestigious international film festivals—Cannes, Berlin, Venice, Toronto, Tribeca (and the list runs on). How and in what ways were the films subversive? What is the role of China as a nation and state in the production of film today and in the past? How do these films play to the international film festival circuit and international market? Is commercialization bringing about less government control of film and other media in China? The class will view both feature films and documentaries, including those unavailable in the United States (but all with

English subtitles). No prior knowledge of Chinese language, culture, or history is required.

### ASIA 33111. Chinese Literary Dreams and Dream in the Red Chamber

(3-0-3) Ge

Dreams have long been objects of fascination for people in all cultures, including the Chinese. Focusing on the 18th-century Chinese masterwork *Dream of the Red Chamber*, this course examines the literary functions of dreams in the Chinese context. Dreams will be discussed as a catalyst in the process of fiction making, serving as a master trope for the “complementary oppositions” between truth and falsehood, between history and literature, between reality and fictionality, and between the sublunary and the supernatural. The goal of the course is to familiarize students with a novel that is generally considered the pinnacle of Chinese fictional literature and with some of the cultural convictions that underscore Chinese literary dreams. The primary text of the course is the 5-volume English translation of *Dream of the Red Chamber*. Supplementary readings include scholarship on the novel and modern theories on dream and the unconscious. Prior knowledge in Chinese language and culture not required.

### ASIA 33112. Readings in Chinese Drama

(3-0-3)

This course studies a number of works in Chinese dramatic traditions from the premodern times up to the 20th century. While attention will be paid to Chinese theater as performing art, the plays selected for this course will be studied primarily as literary texts. The purpose of the course is to familiarize students with some of the most outstanding formulations in Chinese drama and their underpinning cultural meanings. All readings are in English translations, and no prior knowledge of Chinese culture or language is required.

### ASIA 33155. Multi-cultural China

(3-0-3)

This course showcases the multifaceted aspects of China not only in the ethnic sense but also in the political sense. We will read literary works by writers of different ethnic backgrounds (e.g., Han, Tibetan, the Atayal tribe from Taiwan) and geographical origins (the PRC, Taiwan, and Hong Kong). The objective of this course is to help students to gain a deeper understanding of the notion of “Greater China” and the concept of “Chinese-ness.” Through analyzing works by different ethnic writers, we will learn to appreciate the diversity of Chinese culture that is often overshadowed by a misconception about Chinese homogeneity. Likewise, fictional creation by writers from the three regions will give us a broader knowledge of Chinese culture that is constantly threatened by a political need for unity. This course is taught in English and no prior knowledge of the Chinese languages is required.

### ASIA 33240. Political Economy of Development

(3-0-3)

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, failed state and market failure, market and democracy, income-distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

### ASIA 33301. Love and Death in Classical Japanese Drama

(3-0-3) Brownstein

Love, death, and revenge were major themes in Noh, Kabuki, and Bunraku, the three main forms of traditional Japanese drama. During the first weeks of this

course, we will read plays from the Noh theater, which evolved out of a variety of performing arts and reached maturity in the 15th century under the patronage of the Samurai aristocracy. In an effort to create an atmosphere of mystery and beauty, the plays transformed episodes from folk tales, courtly romances, and military epics into highly stylized dance-dramas imbued with the austere aesthetic of Zen Buddhism. In the play *Atsumori*, for example, we witness a confrontation between the ghost of Taira Atsumori, a young warrior, and Kumagai no Jiro Naozane, the man who killed him in battle. In another play, *Dojoji*, a young woman turns into a giant serpent to kill the man who deceived her.

### ASIA 33302. Human Rights Environment and Development in South Asia

(3-0-3)

The course, with the help of real world cases, will identify that the issues of development, human rights, and the protection of the environment are of great importance to all of human society. They assume critical importance in South Asian countries where the issues are intricately linked to complex sociopolitical and economic factors. At first glance, development would appear to be instrumental, the prime vehicle for promoting the realization of human rights, in particular economic rights such as the right to an adequate standard of living, the right to work, the right to social security, right to education, the right to food, and to the right to housing. Environmental preservation and rehabilitation also should be achieved through development. It is a sad fact, however, that the development projects in the South Asian countries have overtaken poverty as the single largest cause of human rights violations and environmental degradation. Many development projects that should have brought well-being to local populations have, in fact, brought violations of human rights and environmental degradation.

### ASIA 33309. Japanese Literature in the 1990's

(3-0-3)

Japanese Literature in the 1990s looks at the Japanese literary boom of the '90s as a literary project of re-remembering the past and intervening in the present. In the last decade-and-a-half, Japan has undergone a transformation from the economic miracle of the '60s and '70s to economic recession, and with the recession, many of the values that helped to sustain high economic growth have come to be questioned: strict gender differentiation, dedication to the company for men and to the home for women, frugality, sacrifice of the personal for the social, emphasis on high growth policies at the risk of the environment, a resurgence in narratives of national homogeneity, etc. In this course, we will look at work by Japanese writers from the beginning of the recession until today, thinking about the way that writers are problematizing previous homogenous notions of gender, ethnicity and race; raising questions about the costs of high economic growth on society's subalterns; rethinking the emblem of that growth, the salary man, who has lately become a favorite butt of dissatisfaction; rethinking the as-of-yet unresolved significance of an ambitious and often cruel imperialist war on the Asian mainland; and finally, we will think about the significance of globalization and nationalism in Japanese literature.

### ASIA 33310. The Japanese Empire and Literature

(3-0-3)

Japan emerged on the global stage as an imperialist power with the defeat of China in 1895 (over Korea) and the defeat of Russia in 1905 (again, over Korea). By the end of the First World War, the "Japanese Empire" included Taiwan, Korea, the south Pacific islands called Nan-yang, and the southern half of Sakhalin, not to mention the late 19th-century acquisitions Okinawa and Hokkaido. Hardly a static referent from 1895 until its dismantling upon defeat in 1945, the "Japanese Empire" must have meant something terribly different, depending on whether you were a Japanese national or colonial subject; a man or a woman; in the military or a man of letters; a domestic worker or colonial settler; businessman or maid. Even within the Japanese archipelago—indeed, even at the height of government censorship on cultural production in the early to mid-40s—the meaning of the "Japanese Empire" was a site of cultural contestation. This class looks at the literary and artistic production—fiction, memoirs, poetry, film, visual arts, and drama of the 50-year rise and fall of the Japanese Empire. A current of this class deals with

the inter-Asian, Bolshevik-inspired organizations that looked to Japanese radicals, with no little irony, for solidarity in the fight against Japanese imperialism.

### ASIA 33311. Reading the Japanese Woman in Literature

(3-0-3)

The Japanese woman is a favorite site of fantasy and anxiety, both in Japan and abroad. From the famously demure Madame Chrysantheme of Pierre Loti's late 20th-century novel to the sassy Modern Girl of the roaring '20s to contemporary busy-bartlin' babes, the Japanese woman has been available as a site of cultural imagination, and those images often tell us less about real Japanese women than they do about the dreams and nightmares of those doing the imagining. This class focuses on important works that variously glorify, Orientalize, and/or trouble the idea of the Japanese woman in literature—both in Japan and in the West—over the past centuries. Readings will also include theoretical, historical, anthropological, sociological, and popular sources.

### ASIA 33312. Labor and Literature in Modern Japan

(3-0-3)

The modernization project begun in the late 19th century relied on new and changing labor relations and roles in order to transform Japan into a modern nation-state in a short 50 years. Central to the way men and women relate to their society, labor consequently figured prominently, albeit quite differently in the literature of the early 20th-century elite as well as in the labor-conscious literature that emerged in the '20s and '30s. With "labor" as the organizing principle then, we'll think about the intersections of gender/sex, class, and subjectivity; theories of the transformation from a "feudal" society to a "modern" one; a "bourgeois" and a "proletarian" class ethos; politically engendered "proletarian literature;" the significance of agrarian versus urban labor; Marxist/Socialist critiques of the exploitation of labor by capital; the relationship of nation-state to empire to labor; and the place of literature and its relationship to labor in Japan.

### ASIA 33313. Japanese Literature in the 1990s: Lost and Found in Contemporary Japan

(3-0-3)

The bursting of the high-growth "economic bubble" in Japan in 1991 revealed that some of the costs of high economic growth—such as socially prescribed gender differentiation, which urged dedication to the company for men and to the home for women, tremendous pressure put on children to achieve academically at ever younger ages, and emphasis on high growth policies at the risk of the environment—were simply too great to bear unreflectively any longer. The '90s, then, knows itself as a "lost" decade, a decade in which an American, Alex Kerr, won a prestigious literary prize for his non-fictional *Lost Japan* (originally written in Japanese); a decade in which international best-seller Murakami Haruki continuously rejects the tenets of the past decades—family and company—for a fluffy lyricism of loneliness; a decade in which the resurgence of millenarian cults captivated readers and writers; a decade featuring apocalyptic animation and adult comics; a decade well-suited to the noir detective novel, with its seamy underside and lack of redemption; a decade in which even the awarding of the Nobel Prize for Literature to Oe Kenzabur in 1994 served ironically to question whether Japan has lost its tradition of high literature. As the "lost" narratives multiply, however, so too do the "found" narratives, whether they take the forms of neo-nationalism, personal memoir, post-national globalism, estheticized alienation, or other. As the most salient features of the '90s continue, this class is also about the way that the present knows the past.

### ASIA 33314. Cruel Stories of Youth: Children and Teens in Japanese Film

(3-0-3) Shamoto

From the wide-eyed children of anime to the crazy street fashions of Harajuku, images of kids and teens in Japanese popular culture are now distributed and consumed around the world. How then are those young audiences depicted and addressed within Japanese popular culture? What aspects of childhood or teen identity are repeated across generations? In order to answer these questions, we will look at Japanese films, including animation, from across the 20th century, that represent children and teens from a variety of perspectives, from the celebration

of innocence to the threat of juvenile delinquency. In addition to analyzing representations of children and teens, students will also gain familiarity with Japanese film history and genres, and develop the critical vocabulary of film analysis. Films will include *I Was Born But, Crazy Fruit, A Cruel Story of Youth, Battle Royale, All About Lily Chou Chou, Nobody Knows, Grave of the Fireflies*, and *Akira*. All films will be subtitled. There will also be secondary readings in cultural studies and film studies, relating to the films we watch in class. Assignments will include an oral presentation, several short writing assignments, a film viewing journal, and a longer paper.

### ASIA 33315. Men and Women in Modern Japanese Literature

(3-0-3) Shamoon

In 20th-century Japan, as old roles such as Samurai and Geisha waned, both men and women had to redefine the characteristics and meaning of masculinity and femininity. This course will look at constructions of gender in modern Japanese literature by both female and male authors. As we discuss both normative and deviant depictions of male and female roles, some topics we will address include men and women at work and at war, marriage and family life, and homosociality and homosexuality. Students will also gain familiarity with some of the major authors, genres, and literary movements of modern Japanese literature. Texts will include *Kokoro* by Natsume Soseki, *Confessions of a Mask* by Mishima Yukio, *Diary of a Vagabond* by Hayashi Fumiko, and short stories by Higuchi Ichiyo, Kono Taeko, and Oe Kenzaburo. This course is taught in English, and no knowledge of the Japanese language is required.

### ASIA 33316. Introduction to Japanese Pop Culture

(3-0-3) Shamoon

*Corequisite:* ASIA 31316

This course will examine postwar Japanese popular culture using the theories and methods of cultural studies, media studies, and gender studies. We will explore some of the primary sites of postwar popular culture across media, as well as emphasize the theoretical distinctions between those media. Rather than following a chronological order, the course will be grouped into sections by media, including novels, film, television, manga, and anime. As we discuss issues specific to each of these media and across genres, however, our discussion will be framed by some key questions: What was the role of popular culture in defining a national identity in the postwar? What role did foreign influences, most importantly, American pop culture play? How have popular culture texts spoken to and defined specific audiences (for instance, teenagers, women, non-Japanese)? This course is taught in English, and no knowledge of the Japanese language is required.

### ASIA 33317. The Samurai in Classical Japanese Literature

(3-0-3) Brownstein

The sword-wielding Samurai warrior is perhaps the most familiar icon of pre-modern Japan, one that continues to influence how Japanese think of themselves (and how others think of them) even in modern times. Who were the Samurai? How did they see themselves? How did other members of Japanese society see them? How did the role (and the image) of the Samurai change over time? To answer these questions, we will explore at the way Samurai were depicted in historical chronicles, fiction, and drama, primarily from the 13th century through the 18th centuries. All readings will be English translation, and no previous knowledge of Japan is required.

### ASIA 40123. American Occupation of Japan

(3-0-3)

After years of fierce fighting in the Pacific, the victorious Allies occupied Japan from August 1945 until 1952. The “Basic Initial Post-Surrender Directive” charged military occupiers and their civilian auxiliaries with democratizing the former enemy empire. This course examines three aspects of this effort, namely the political, economic, and cultural restructuring of Japan. We will explore the goals, methods, and mix-ups of the (mostly) American attempt to recast Japanese society in a democratic mold and the Japanese response. The Big Question— one that we will return to repeatedly in our discussions— is what is democracy, and how is it created and sustained?

### ASIA 40180. Gandhi’s India

(3-0-3) Sengupta

The dominant figure in India’s nationalist movement for nearly 30 years, M. K. “Mahatma” Gandhi has also been the 20th-century’s most famous pacifist, and a figure of inspiration for peace and civil rights movements throughout the world. This course offers an examination of Gandhi and the nature of his unconventional and often controversial politics. It charts Gandhi’s career against the background of events in London, South Africa, and India, and examines the evolution and practical application of his ideas and techniques of nonviolent resistance, and his attitudes toward the economy, society, and state. Gandhi’s influence on Indian politics and society is critically assessed and his reputation as the “apostle of nonviolent revolution” examined in the light of developments since his death in 1948. Some of the questions that will be discussed are: How far did the distinctive character of Gandhian politics derive from his absolute commitment to India’s nationalist struggle? Was his success due to the force and originality of his political ideas and his advocacy of nonviolent action? Can his achievements be explained by political wiliness and pragmatism, or by willingness to embark on new experiments with the truth? Though helpful, a prior knowledge of Indian history is not required for this course.

### ASIA 40185. History from Below: Colonialism, Nationalism, and Subalterns

(3-0-3)

This course introduces advanced undergraduates and graduate students to methods of doing and writing history that intervene within dominant historical narratives and frameworks by redefining historians’ relationships with sources and the questions asked of them. The Subaltern Studies collective that emerged from South Asia in the 1980s and 1990s is now recognized as one of the more important historical interventions in recent years. Subaltern Studies’ historiographic writing has questioned dominant nationalist narratives by arguing that they represent only the history of elites. The objective of the course is to draw attention to differing understandings of colonialism and nationalism by laying out the perspectives of “subalterns”—untouchables, tribals, peasants, workers, women, and other marginalized groups. In addition, “subaltern” perspective would also be extended to studying themes like democracy, politics, modernity, development, cities, environment, films, and television in South Asia. The interventions by the Subaltern Studies collective will be situated in relationship to developments in European historiography, with special attention to the unique departures of this new school. Debates within and critiques of the collective’s approach will also be examined. A background in South Asian history or culture is not a prerequisite.

### ASIA 40241. Hong Kong Action Cinema

(3-0-3) Magnan-Park

*Corequisite:* ASIA 41241

This course addresses the global significance of the *gong fu vague* [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation, but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supersedes Hollywood’s dominance in the genre? Is this purely a “Chinese” phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic, and economic significance within a larger framework, or must they be critically dismissed outright? What does it mean that “everybody was kung fu fighting” and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English. Fulfills FTT international requirements.

**ASIA 40242. Contemporary Korean Cinema**

(3-0-3) Magnan-Park

*Corequisite:* ASIA 41242

This course provides a historical, cultural, and aesthetic appraisal of South Korean cinema as it evolved from a Korean-centric film industry to a globally engaged film industry as evidenced by the current *hallyu* (Korea fever) phenomenon. Aspects of cultural continuity as well as cultural transformations and the forces that are involved in this dynamic cultural arena will be addressed. Some of film under analysis will include *Obaltan: Aimless Bullet*, *Sopyonje*, *Peppermint Candy*, *Shiri*, *Bungee Jumping of Their Own*, *My Sassy Girl*, and *JSA*. No knowledge of Korean is required.

**ASIA 40426. Asian Americans Writing Sexuality**

(3-0-3)

This course will introduce students to major works of Asian American literature while exploring issues of sexuality and gender in this body of literature. We will focus on race/ethnicity, authenticity, and representation as contested sites in Asian American literature and how these contested sites produce inter/intracultural tensions about the Asian body as it is viewed from within Asian American literature and from without. Primary texts will include novels, short fiction, poetry, film, drama, the graphic novel, and critical essays.

**ASIA 40606. History of Modern China**

(3-0-3) Jensen

The course will provide a general survey of Chinese history from 1644 (the establishment of Qing dynasty) to the present. It will highlight China's evolution from a period of strength and unity during the last dynasty to a period of disunity and weakness during the revolutionary period 1911–49, back to a period of strength under the Communist government from 1949 to the present. Special attention will be given to the problems of economic modernization, the role that foreigners have played in this process, and the relationship of both to cultural development.

**ASIA 40710. International Trade**

(3-0-3)

The objective of this course is to provide the students with the basics of theory, institution, and practices of global trade and investment, with special references to economic integration at the regional and global levels. By mastering the basic concepts and analytical skills, you will gain a better understanding of complex economic relations in today's global economy. The course at the same time emphasizes the application of basic theories and tools you have learned in analyzing contemporary issues. The level of the course is designed to be accessible to the students with a background in microeconomic theory at an intermediate level. Some classes (as such occasions call for) will begin with a discussion of current developments in global economic relations. You are urged to have access to *The Wall Street Journal* and/or other international news media (such as *The New York Times*, *Economists*, *Business Week*, the World Bank's *World Development Report*, or even listening to NPR as lectures attempt to link theories to events out in the world. The assigned textbook is largely to complement and supplement lectures. Given the time constraint, lectures will focus on a broad, analytical overview of policy-related global issues. Detailed points and other issues are left behind for you to read the relevant textbook chapters and reference readings.

**ASIA 40843. The United States and the Vietnam War**

(3-0-3)

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an "American" as opposed to a "Vietnamese" perspective. Broad topics to be covered include Vietnamese background (land, people, history, culture); American political and diplomatic decision making; 1950–75: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture AND a discussion course. Attendance at BOTH is required. Approximately six books will be assigned.

**ASIA 40853. The United States and the Vietnam War**

(3-0-3) Hoang

This course examines the participation of the United States in its "longest war"—the conflict in Vietnam. The course is taught primarily from an "American" as opposed to a "Vietnamese" perspective. Broad topics to be covered include Vietnamese background (land, people, history, culture); American political and diplomatic decision making 1950–75: how the war was fought; debating the war; the war at home; the aftermath of war; and lessons of the war. This is a lecture AND a discussion course.

**ASIA 40860. Genocide, Witness and Memory**

(3-0-3) Mahmood

How are episodes of mass killing experienced, survived, and remembered? In this course, we consider political, social, and cultural trauma as expressed in memoir, documentary, fiction, and academic text. Witness as an ethical stance is examined; the role of memory in shaping morality is questioned. (Does "Never Again" actually work?) We also look at the perpetrators of genocidal killing: Who are they? What prompts their actions? Moreover, are any of us incapable of this kind of violence?

**ASIA 40870. Indian Ocean: Trade and Interaction**

(3-0-3)

This course offers a multidisciplinary approach to studying one of the oldest forums for intercontinental trade and interactions: the Indian Ocean. This geographical entity has linked peoples of Africa, Europe, and Asia through the exchange of technology, ideas, goods, and peoples from the dawn of the first systematic intercontinental trade between the Bronze Age polities of Egypt, Mesopotamia, and India-Pakistan, c. (4th millennium B.C.) to the present era. The class has two objectives: (a) to understand the nature of trade and exchange mechanisms in the Indian Ocean world from both temporal and spatial perspectives; and (b) to underscore the interdependency between trade/exchange and political-economy, climate, society, and history. The required readings include works from various disciplines, including economics, history, political sciences, and geography, as well as archaeology and cultural anthropology. Students will be encouraged to add to the broader understanding of Indian Ocean trade provided by the course by undertaking comparative research projects that examine two periods, two areas, or two processes within this larger interactional complex.

**ASIA 40875. Archaeology of South Asia**

(3-0-3)

This course will survey the rich and varied past of South Asian societies and cultures including those of India, Pakistan, Afghanistan, Nepal, Bangladesh, and Sri Lanka from an archaeological perspective. The topics surveyed and discussed through lectures, readings, films, and group projects will include the rise and fall of the Bronze Age Civilizations of South Asia, the emergence of Buddhism, and the invasion of Alexander the Great during the Imperial period in the 4th century B.C. This course will also cover recent archaeological efforts to understand the historical period in South Asia, from the Indo-Roman trade to the rise and decline of the Mogul (*Mughal*) Empire.

**ASIA 41201. Hong Kong Cinema**

(0-1-0)

*Corequisite:* ASIA 40241

Certain films will be viewed for further discussion in class.

**ASIA 41241. Hong Kong Action Cinema in a Global Context - LAB**

(0-2-0)

This is a laboratory in addition to ASIA 40241 that addresses the global significance of the *gong fu vague* [kung fu new wave] that hit world cinema in the early 1970s and its ripple effects up to the present. As the signature genre of the Hong Kong film industry, it does not stand in global isolation but is rather a product of careful market research in developing a distinctive genre that could have global popularity outside of its traditional regionalized domestic market (HK and Southeast Asia) and its overseas ethnic Chinese enclaves in numerous Chinatowns

across the world. Some of the key issues that we will cover include: How does a small non-national population sustain a commercially viable film industry? How can a film industry create a version of action cinema that supersedes Hollywood's dominance in the genre? Is this purely a "Chinese" phenomenon or one that is inherently dependent on non-Chinese participation? Do these films have ideological, aesthetic and economic significance within a larger framework or must they be critically dismissed outright? What does it mean that "everybody was kung fu fighting" and continuing to do so? Taught in English. No knowledge of Mandarin or Cantonese is required. Whenever possible, we will view the films in their original language with English subtitles. A few films will be dubbed in English.

#### ASIA 41242. Contemporary Korean Cinema

(0-2-0)

*Corequisite:* ASIA 40242

This course provides a historical, cultural, and aesthetic appraisal of South Korean cinema as it evolved from a Korean-centric film industry to a globally engaged film industry as evidenced by the current *halhyu* (Korea fever) phenomenon. Aspects of cultural continuity as well as cultural transformations and the forces that are involved in this dynamic cultural arena will be addressed. Some of the films under analysis will include *Obaltan: Aimless Bullet*, *Sopyonje*, *Peppermint Candy*, *Shiri*, *Bungee Jumping of Their Own*, *My Sassy Girl*, and *JSA*. No knowledge of Korean is required.

#### ASIA 53001. Senior Seminar: Chinese Political Thought

(3-0-3)

Readings in translation from the works of major classical Chinese thinkers and schools, and completion of several short discussion/research/analytic essays based on those works, with the aim of understanding Chinese political thinking in its own context, for the general insights it may give into life and politics, and in comparison with other traditions of political thought, especially the classical and modern West.

## Department of Computer Applications

### CAPP 20505. Introduction to Computer Systems

(3-0-3) Berzai

As an introduction to information processing, this is a literacy course that explains computer systems, including hardware, software, systems analysis, and other related topics. The class learns some computer programming, logic, design, and documentation using the BASIC language. The students also work on teams to learn some phase of the IS environment, learn multimedia software, and make presentations to the class.

### CAPP 20506. Introduction to Computer Systems

(3-0-3) Berzai

As an introduction to information processing, this is a literacy course that explains computer systems including hardware, software, systems analysis, and other related topics. The class learns some computer programming, logic, design, and documentation using the BASIC language. The students also work on teams to learn some phase of the IS environment, learn multimedia software, and make presentations to the class. First-year students only.

### CAPP 23507. *La telenovela: historia, el significado cultural y produccion estudiantil*

(3-0-3) Barry

*Prerequisite:* (ROSP 20202 OR ROSP 201 OR ROSP 202E)

The goal of this course is to facilitate student exploration of the genre of the telenovela. Students will sharpen oral and written language skills through exposure to authentic telenovelas from Latin America, reading of authentic texts, and through the creation and production of their own telenovela. They will hone their oral and written proficiency and learn the idiosyncrasies of Hispanic culture as they write, direct, act in, tape, and edit a telenovela. During this process, students will also learn and apply basic videography and nonlinear video and audio editing techniques.

### CAPP 30310. Introduction to C++ Programming

(3-0-3) Treacy

With today's information technology stressing the object-oriented paradigm and code reuse, there is a strong demand for programming in C++ and (C#) to solve real world application challenges. In addition to addressing the basic procedural programming concepts and their application, the use of existing code and classes will allow students to develop marketable skills for entry into the work force. In addition to extensive "hands-on" learning exercises, students will have the opportunity to choose projects that best apply to their interests and/or their first major field of study.

### CAPP 30320. Introduction to Scheme Programming

(3-0-3) Sepeta

Scheme is a modern programming language that is both powerful and easy to learn. Scheme teaches many important programming ideas and, with a knowledge of scheme, students can readily learn other languages like C++ and Java. The scheme course will be a beginning course and will not require programming experience. The course will emphasize problem-solving skills and it will demonstrate how data drives program development.

### CAPP 30350. Visual Basic Programming

(3-0-3) Irmiger

*Prerequisite:* CAPP 20505

The course will investigate object-oriented data processing concepts using Microsoft's Visual Basic Programming language. Terminology and technique will be combined to explore the object-oriented paradigm. Object-oriented will be compared to traditional procedural paradigms wherever appropriate.

**CAPP 30380. Web Development: XHTML and JavaScript**

(5-0-3) Barger

Students will study materials necessary to construct and maintain World Wide Web pages. They will learn the basics of the Extensible Hypertext Markup Language (XHTML), a scripting language for formatting Web pages. They will also learn JavaScript, a scripting language that can provide client-side processing within Web pages. Learning activities will be done online. These activities will include laboratory assignments, a Web page project, and XHTML and JavaScript examinations. The object of the course is not to produce expert-level programmers in XHTML and JavaScript, but to provide a basic level of skills in these languages so that graduates of the course will be able to work knowledgeably with future clients, corporate analysts, and professional programmers.

**CAPP 30510. Management Information Systems**

(3-0-3) Berzai

Students are introduced to leadership and management skills in the information processing environment. Discussions on why and how management makes decisions are an important part of the course, as are discussions of current problems of management in the business world related to computer applications.

**CAPP 30515. Systems Analysis and Design**

(3-0-3) Berzai

Administered in two major segments, this course first exposes students to the full scope of analyzing and designing computer systems by covering problem definition, data collection, documentation of existing systems, and definition of new systems requirements. We use the methodology of Systems Development Life Cycle (SDLC). The second segment deals first with students working on genuine business projects. A part of this segment gets into object-oriented systems analysis, that is a new concept in systems analysis and design.

**CAPP 30521. E-Business Strategies**

(3-0-3)

E-business employs the use of the Internet and the Web to transact business, creating electronic markets where prices are transparent, markets are global, and trading is highly efficient. E-business has a direct impact on a firm's relationship with suppliers, customers, competitors, and partners, as well as the method it uses to advertise, sell, and use products. In this course, students will analyze the business models and strategies of online companies, explore failed e-business ventures, understand the strategic, financial, marketing, and organizational challenges facing e-business firms, and consider the societal impact of e-business development.

**CAPP 30523. Applied Multimedia Technology**

(3-0-3) Clark

The goal of this course is to explore ways multimedia can be used to communicate information and solve problems. Students use a variety of tools, including Adobe Flash, to complete projects in the areas of animation, audio, image editing, and scripting. They also evaluate existing media for content, aesthetics, functionality, and usability. Students will often begin to learn material before class by completing tutorials. Follow-up activities in class then apply the concepts without step-by-step instruction. The course also equips students with strategies for enhancing their skills after the semester ends.

**CAPP 30527. Building the Modern Web**

(3-0-3) Smith

Building the Modern Web is designed to cut through the technology involved in the website creation process and get to the core meaning and goals of a Web project. Technological concepts will be covered, but in no real depth. Instead, you will be instructed on how certain technologies, languages, and concepts add pieces to the puzzle of a modern website, and how you can have a knowledgeable part in every step.

**CAPP 30530. Web Development with CSS**

(3-0-3) Smith

Learn the techniques used by today's top professionals to construct Web pages with XHTML and CSS. At the end of this class, you will be able to take a graphical

representation of a Web page, and construct it to work in all modern browsers using valid, semantic markup and presentation.

**CAPP 40140. Computer Ethics**

(3-0-3) Barger

The course concentrates on the theory and practice of computer ethics. The aim of the course is to study the basis for ethical decision making and the methodology for reaching ethical decisions concerning computing matters. Methodologies used in the course include lectures by the instructor, lectures by visiting lecturers, in-class discussions, in-class writing assignments, individual class presentations, individual case analyses, and examinations. The course is open only to Notre Dame students who have a second major in computer applications (CAPP) or a minor in technology, business, and society (TBS). Seniors only.

**CAPP 40150. Current Trends in Computer Applications**

(3-0-3) Berzai

The Current Trends course allows the students to think about and discuss issues openly that pertain to computer ethics, business ethics, and some social ethical issues. We start out by having an understanding of the distinction between the terms moral and ethical. The class works through the generally accepted theories for resolving moral and ethical conflicts. These are egoism, natural law, utilitarianism, and respect for persons. We also discuss the reasons businesses exist and what they think their responsibility toward society is now and how it might change in the future. The students also debate several business ethical issues. In the area of information technology, there is discussion about what the student sees as right or wrong, ethical or not ethical in the many issues of discussion that are presented. Restriction: CAPP/TBS Seniors only

**CAPP 40210. The Internet and Society**

(3-0-3) Monaghan

This course will spend the semester studying the impact the World Wide Web has had on several key areas of our society, including communications, commerce, marketing, productivity, education, collaboration, and our sense of community. Through a combination of discussion, group presentation, guest lectures, and out of class research, students will be exposed to some of the profound effects this medium has had on our culture. In spite of the bursting of the dot com bubble, the Web has left all of the above mentioned areas substantially changed, many for the long term. The positive and negative forces brought on by this technology must be recognized, studied, and dealt with if we are to truly embrace the momentous opportunities brought about by the World Wide Web.

**CAPP 40260. Information Security**

(3-0-3) Chapple

This course provides students with a working knowledge of information security topics through a focus on best practices, applications, and implementation strategies. Students will learn the fundamental principles of information security and explore contemporary topics in the field, including access control methodologies, business continuity/disaster recovery planning, fire walls, network security, operating system security, intrusion detection, cryptography, and incident handling.

**CAPP 40540. CAD for the Stage**

(3-0-3) Cole

The study of the use of the computer to design scenery and lighting for the stage. The course will begin at a rudimentary level of understanding of computer-aided design and progress to 2-D and then 3-D design techniques. A basic understanding of the Macintosh computer system is necessary, and significant computer work is required outside class.

**CAPP 40545. Computers in Psychological Research and Education (PSY)**

(3-0-3) Crowell

This course and its counterpart in psychology (PSY 20671) is project-oriented. It is not an introductory course on computer applications. Students need to already have (or learn during the semester) the skills needed to complete whatever project is defined. Generally, projects are applications or systems that fit into the broad

spectrum of the instructor's interests, which students can determine by consulting the instructor's Web page (New projects are defined each semester. Some recent projects have involved: (1) Developing a multimedia presentation on management and coaching using PowerPoint slides and audio files. (2) Creating a visual basic application to administer surveys on disk. (3) Exploring the capabilities of WebCT/Concourse as a teaching tool. (4) Developing a website for student advising in the Psychology Department. (5) Completing a database application in Microsoft Access for tracking and reporting manager coaching sessions. Students are expected to plan and develop a functional application.

#### **CAPP 40547. Multimedia Motion Graphics**

(3-0-3) Sherman

This advanced multimedia course will give the studio, design, or CAPP major an introduction to the design of motion graphics. Students will develop short information movies, movie trailers, or movie opening sequences. The course will use Apple's Motion software and cover basic DVD and QuickTime movie development. Skill with various graphics software useful, with expertise in Adobe Photoshop very important.

#### **CAPP 40550. Digital 3-D Modeling (Design)**

(3-0-3) Carvalho

This is an introductory course to Rhinoceros. The focus of this class is to learn how to use the software to generate 3-D virtual models with an emphasis on industrial design concerns as well as creating manufacturable data for rapid prototyping. The class will be devoted to learning tools, interface, modeling, and rendering methods. This will be achieved by completing specific assignments and tutorials. The final assignment will be to virtually model and render a product or scene from a concurrent class or personal interest.

#### **CAPP 40553. Music Through Technology (Music)**

(3-0-3) Dye

Music through Technology is a lecture/lab course open primarily to CAPP majors and musicians with consideration of other interested students. Lecture topics include the historical evolution of technology in music, surveying the influence that technology has had on the music world, from a creative standpoint to the accessibility and distribution of music to the masses. Other examples of technology's influence in music may include the development of multi-track recording on popular music, synthesizer, and midi technology; technology's applications for musical composition and the adaptation of CD and mp3 formats to musical performers. The historical influence of technology is an illuminating foundation to current developments in the creative processes of music. Lab topics cover an introduction to current music technology, including digital audio recording and editing, midi technology (sound and notation), and the digital management and distribution of music. Students will experience all of these technologies on an introductory level, but focus their interests on a technology-based final project to develop and display their acquired skills.

#### **CAPP 40555. Introduction to Relational Databases using Oracle**

(3-0-3) Miller

This course provides the student a working knowledge of enterprise relational database systems and how they can be used in the development of applications. The course includes discussion of the role of the database in the contemporary Internet networking environment and the inherent communications and networking protocols. The course will utilize the Oracle enterprise relational database, but the principles and skills learned in this course will apply to other relational database systems. The student will learn the terminology and fundamental concepts of relational database design and Structured Query language (SQL) and develop a relational database for an application including principles of authentication and authorization in a Web application.

#### **CAPP 40610. Foundations of Business Thinking**

(3-0-3) Succi

This course is designed to provide an integrated understanding of the foundational business disciplines of accounting, finance, marketing, and management, especially for CAPP majors planning a career in business. Fundamental leadership and

consulting skills will also be addressed. Case analysis, coupled with a highly interactive format, will be employed to ensure practical exposure to today's business environment. Primary areas of focus will address the critical elements for success in the corporate environment, the knowledge and preparation necessary to facilitate your interviewing process, and the business fundamentals for those with entrepreneurial aspirations.

#### **CAPP 45565. Internship**

(3-0-3)

This encompasses working with various civic, public, and/or private organizations using acquired computer applications knowledge and skills. Credit is given only if work is done in the information systems area of an organization.

#### **CAPP 47567. Special Studies**

(V-0-V)

Individually designed coursework between a student and the advisor in his/her first major or in the Computer Applications Program constitute a special topic. This involves working with a faculty member, ND department, or an outside firm to do either programming or working with multimedia software. Permission required.

## Center for Social Concerns

### CSC 20629. War, Law, and Ethics

(3-0-3)

This course is designed to explore the ethical and legal considerations related to war and the use of force. Beginning with a historical overview of Christian thinking on war and peace, we will develop an account of various ethical positions on the use of force, including views rooted in the just war tradition and in pacifism. We will also consider the ethical implications of contemporary issues related to the use of force, e.g., sanctions, war crimes, humanitarian intervention, and terrorism. In collaboration with the Center for Social Concerns and La Casa de Amistad, students will have the opportunity to engage in service learning by working with students from Washington High School to collect stories from local war veterans as part of the Library of Congress' "Veterans History Project."

### CSC 20635. The Ethics of Energy Conservation

(3-0-3)

This is a joint theology and engineering course exploring the ethics of energy conservation by using the method of community-based learning. Students will begin by using the university campus as a "trial laboratory" for measuring energy efficiency and thinking creatively about possible energy conservation measures. We will then ask them to conduct a limited energy efficiency and conservation study for selected nonprofit organizations in the South Bend community. This course will fulfill a number of civic learning goals, including the cultivation of theological and scientific competence in environmental ethics; the identification of leadership skills necessary to address the concrete concerns facing nonprofit organizations as they strive to meet pressing human needs in an environmentally sound manner; and formation of consciences sensitive to the social responsibility of caring for the environment. Maximum enrollment: 20 students. By permission only.

### CSC 23090. Social Concerns Seminar: Children and Poverty

(1-0-1) Brandenberger

This seminar focuses on concerns that affect the youth of our nation, especially poverty and violence, and examines efforts to foster positive youth development. Immersion in New York City. Participants read Catholic social teaching focused on youth/family issues.

### CSC 23855. Social Concerns Seminar: Take Ten

(0-0-1) Caponigro

Take Ten is a research-based violence prevention program and curriculum designed at the Robinson Community Learning Center. Volunteers work on a weekly basis with schoolchildren of all grades to teach them the skills needed to resolve conflict peacefully. Take Ten's mission is to provide youth with positive alternatives to violence and to build their capacity to make more informed choices when faced with conflict. Students participating in the Take Ten seminar will serve as volunteers during the semester (February through April with training in January), being part of a team that works at a school in the area one time per week. Additionally, the readings and reflections will allow students to focus on understanding issues of youth and violence from various perspectives. Approval required. Apply at Robinson Community Learning Center.

### CSC 33300. Introduction to Community-Based Participatory Research Methods

(0-0-1) Penney

This interdisciplinary seminar focuses on the ways in which researchers and community members collaborate to conduct research that leads to community change and improvement in the quality of community life. The purpose of this Seminar is to introduce students to community-based participatory research as a means to examine community challenges through quantitative and qualitative research methods. The seminar is offered through the collaboration of the Center for Social Concerns and the Department of Anthropology.

### CSC 33401. Animal Welfare and the Human-Animal Bond: Community Based Learning Seminar

(1-0-1) Whaley

Consider the fact that in six short years, one female dog and her offspring can give birth to 67,000 puppies. In seven years, one cat and her young can produce 420,000 kittens. Three to four million dogs and cats are euthanized each year. It is estimated that there are 60 million feral cats in the United States. In a society that considers pets as part of their family, watches *Animal Planet*, and spends millions of dollars on pet products, it is imperative that we acknowledge and educate ourselves on the issues of over population of pets in our society. What is our responsibility to these animals, and how can we solve these pressing problems? The focus of this course will be on animal behavior from an evolutionary perspective. The students will learn to recognize both desirable and undesirable behaviors in pets. They will learn how to use evolutionary behavior training methods to alter detrimental behaviors and reinforce those that are advantageous. This course will also cover animal welfare issues, and will intimately and meaningfully connect the state of humans to that of animals. The students will carry out community research projects of their choice and will immerse themselves in an important issue and generate a product that can help the plight of animals (and therefore humans) in our community.

### CSC 33601. Exploring Authentic Ways to Learn Amidst a Myriad of Educational Challenges

(2-0-2) Burish

This course will focus on various aspects that affect a school setting that is undergoing reflections of its teaching and learning practices. After a discussion of current trends and practices in education, students will explore the reality gap; between current curriculum and its preparation of future students to thrive in a global economy. Throughout the course, students will be challenged to think about new ways to enhance student learning in the following areas: literacy, creativity, critical thinking, and problem solving. Students will be presented issues through research and guest speakers that affect educational settings, e.g., cultural diversity, gender equity, special student populations such as children with autism, health related concerns such as childhood obesity, and poverty. After understanding the culture of a local school and weaving together the educational challenges and innovations presented at seminar, students will create, implement, and evaluate an authentic learning experience that could be used by other mentors or volunteers in K–8 schools. Requirements include approximately two hours per week of community service at St. Adalbert's School.

### CSC 33858. Social Concerns Seminar: International Issues

(1-0-1) Tomas Morgan

This course revolves around international experiential learning opportunities, examining the culture, community, and life of the people encountered, including the poor. Students participate in preparation and follow-up sessions.

### CSC 33931. Summer Service Learning: ACCION

(1-0-1) Shappell

The ACCION Internships run 10–12 weeks in micro-lending offices across the country. For junior business majors only.

### CSC 33932. Summer Service Learning: African American

(3-0-3) Shappell

This is a leadership internship for African American students who work 10–12 weeks in an African American area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 33932 and work with the Center for Social Concerns to build partnerships with the agencies and people involved. An application and interview are necessary for participation.

### CSC 33933. Summer Service Learning: Latino Leadership Intern Program

(3-0-3) McDowell

This is a leadership internship for Hispanic studies working 10–12 weeks in a Hispanic/Latino area with organizations dedicated to empowering local communities. Students will complete the requirements of THEO 359 and work with the

Center for Social Concerns to build partnerships with the agencies and people involved. Application and interview necessary for participation.

**CSC 33934. Summer Service Learning: Worker Justice**

(3-0-3)

Many of the 32 million people who live in poverty in our country hold full time jobs. Immigrant workers often make \$6an hour with no health benefits, working under dangerous conditions. In a recent Department of Labor study, 100 percent of poultry plants, 60 percent of nursing homes, 50 percent of restaurants, and 90 percent of farms were found to be violating wage and hour laws. In this internship, students from Notre Dame and other Catholic colleges and universities will work for 10 weeks during the summer with one of 60 interfaith committees around the country through the National Interfaith Committee for Worker Justice (NICWJ). They will assist local staff on a wide range of worker issues, including access to affordable health care, immigrant worker rights, and worker rights to organize. They will explore how economic theory, trends and policy inform the experience of workers in this country and gain a solid introduction to Catholic social teaching on labor issues.

**CSC 33936. Summer Service Learning: Confronting Social Issues**

(3-0-3) Shappell

This 3-credit service-learning course takes place before, during, and after student participation in 8-week "Summer Service Projects" sponsored by the Center for Social Concerns. The goals of the course are to reflect on the meaning and dynamics of Christian service, compassion and Catholic social teaching through readings and writing, along with discussion and reflection with site supervisors and alumni, and scheduled group discussions upon return to campus. Writing assignments include a journal, reflection paper of six to eight pages and responses to study questions related to the course packet. This course is completed during the first five weeks of fall semester and is graded Satisfactory or Unsatisfactory. Acceptance is based on the student's application and interview.

**CSC 33938. Summer Service Learning: International**

(3-0-3) Tomas Morgan

This 3-credit course provides students the opportunity to encounter international realities through work with poor and marginalized people. Same academic requirements as THEO 33938 with the addition of area/country specific readings and meetings.

**CSC 33939. Summer Service Learning: NYSP**

(3-0-V)

The National Youth Sports Program runs for six weeks on the Notre Dame campus. Students work with low-income children from the South Bend area in educational enrichment and recreation. Same requirements as THEO 33939.

**CSC 33950. Social Concerns Seminar: Appalachia**

(1-0-1) Staff

This seminar involves experiential learning during the semester break. The course is centered on a service-learning immersion in the region of Appalachia and provides preparation for and follow-up to that experience. Students may focus on particular themes (e.g., rural health care, environmental issues) at various sites while learning about the region and rural issues.

**CSC 33951. Social Concerns Seminar: Washington, D.C.**

(1-0-1) Toms Smedley

This course centers on a trip to Washington, D.C., over semester break, during which time students analyze a significant social issue through contact with various agencies, government offices, and church organizations. Students participate in preparation and follow-up sessions. Themes (e.g., educational reform, violence in America) vary each year.

**CSC 33953. Social Concerns Seminar: Contemporary Issues**

(1-0-1) Tomas Morgan

This seminar allows students to participate in an experiential opportunity designed to examine contemporary social problems. Emphasis will be placed on understand-

ing issues/conflicts from the perspective of the various participants. Preparation and follow-up sessions are tailored to the specific opportunity.

**CSC 33954. Social Concerns Seminar: Leadership Issues**

(1-0-1) McDowell

This course is open to student leaders of various campus organizations focused on community service and social action (e.g., student groups affiliated with the Center for Social Concerns, social concerns commissioners of dorms, etc.). This seminar will examine leadership and empowerment issues from a multi-disciplinary perspective, focusing on the role of the leader within organizations promoting community service, social awareness, and action for justice and peace.

**CSC 33957. Conscience in the Crossfire: Ethics and the Environment**

(1-0-1) Pfeil

Where do you stand on the issues and candidates during this election season? How do you make a judgment in regards to voting and participating in American society? This 1-credit course will explore issues central to the 2008 elections with a focus on how citizens, in particular those who bring a faith perspective, may address social concerns in their voting and political participation. The goals of the course are (1) to address the process of the formation of conscience in political contexts; (2) to explore issues, in an interdisciplinary context, relevant to the current national elections; and (3) to explore creating the conditions for peace, justice, and the common good.

**CSC 33959. Social Concerns Seminar: Cultural Diversity**

(1-0-1) Brandenberger

The purpose of this course is to begin to analyze the positive aspects of ethnic and cultural diversity as well as related tensions, including racism. Students will participate in a 5-day program during break at selected sites that provides an orientation to culturally diverse communities and allows students to engage in discussions on relevant issues with local residents and community leaders. Students participate in preparation and follow-up sessions.

**CSC 33960. Social Concerns Seminar: Mexico Service Learning**

(1-0-1) Tomas Morgan

This seminar involves three weeks of service learning in Oaxaca, Mexico. It is designed to expose students to the reality of Latin America through intercultural exchange, shared work experience, and faith reflection. Students examine the social, cultural, and international forces operative in the region through discussion, relevant readings, and written reflection.

**CSC 33961. Social Concerns Seminar: Discernment**

(1-0-1) Mackenzie

This seminar focuses on senior students discerning and envisioning the integration of faith/theology and social concerns into their lives beyond Notre Dame. The objective is to provide students the opportunity to integrate their experience with the insights of speakers and authors, emphasizing the Catholic social tradition, in written and oral expression.

**CSC 33962. Social Concerns Seminar: Gospel of Life**

(1-0-1) Toms Smedley

The Gospel of Life Seminar provides opportunities to read, reflect, and be of service on a variety of life issues through service and experiential learning. Exploration begins in orientation classes where students will become familiar with the issues through reading Church documents such as *The Gospel of Life* and through meeting people of the South Bend and Notre Dame communities that work on pro-life issues. During the week of service and experiential learning in Washington D.C., over fall break, the seminar participants will learn from Church and government leaders, various agencies, and individuals. The follow-up classes facilitate analysis and synthesis of insights gained during the week in Washington, D.C.

**CSC 33963. Social Concerns Seminar: Church and Social Action**  
(0-0-1) Purcell

This course centers on a 48-hour immersion (colloquially known as the Urban Plunge) in an urban setting during the winter break (prior to return to campus). The course includes a preparation workshop in the fall semester, readings, two reflection papers, and follow-up educational meetings.

**CSC 33964. Social Concerns Seminar: Education**  
(0-0-1) Purcell

This seminar focuses on the educational and outreach endeavors of St. John Vianney Catholic Parish in Goodyear, Ariz., and builds upon Notre Dame's relationships with the Congregation of Holy Cross. Participants are hosted by parish families and spend several days in the classroom with a mentor teacher. Participants also visit organizations in Phoenix doing outreach to people who are homeless and to pregnant women.

**CSC 33965. Social Concerns Seminar: Organizing Power and Hope**  
(0-0-1) Brandenberger

This seminar focuses on diverse church, school, leadership, and community-organizing initiatives to improve life in Chicago neighborhoods. Participants will be challenged to examine perceptions of power, service, and social action.

**CSC 33966. Social Concerns Seminar: Border Issues**  
(0-0-1) Paladino

The seminar examines immigration and related issues that exist between the United States and Mexico. Participants travel to El Paso, Tex., and Ciudad Juarez, Mexico, to meet with refugees, Border Patrol, parish organizations, and families who live in "squatter" villages. Participants also analyze and discuss policy issues. The immersion is in partnership with Annunciation House.

**CSC 33967. Social Concerns Seminar: Migrant Experience**  
(0-0-1) Toms Smedley

This seminar offers a unique immersion into the lives of migrant farm workers in Florida during the spring harvest. Students pick tomatoes in the fields (donating their wages), live with migrant families, assist church and social agencies that serve migrants, and meet with community leaders, never again to take food for granted.

**CSC 33968. Social Concerns Seminar: L'Arche Community**  
(0-0-1) Toms Smedley

This seminar centers on travel to a L'Arche community (e.g., Toronto, Canada) to share community life with developmentally challenged persons. Students draw from the philosophy of Jean Vanier, the works of theologian Henri Nouwen, and other spiritual writings to augment this participatory learning experience.

**CSC 33969. Social Concerns Seminar: Hispanic Ministry**  
(0-0-1) Purcell

This seminar gives participants the opportunity to experience the Church's option for the poor through an immersion into the spirituality, culture, and economy of the rural Southern California valley community of Coachella. Students work with the members of the Congregation of Holy Cross who are in ministry there.

**CSC 33970. Social Concerns Seminar: International Issues**  
(0-0-1) Tomas Morgan

This seminar serves as the required orientation course for all THEO 33938 International Service Learning Program participants. It will provide students with an introduction to international issues in developing countries through the lens of Catholic social tradition, guidance in independent country/area study, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the seminar with permission from the instructor.

**CSC 33975. Social Concerns Seminar: Poverty and Development in Chile**

(1-0-1) Cahill Kelly

This seminar serves as the required orientation course for all participants in the international study program in Chile. It will provide an introduction to international issues in developing countries through the lens of Catholic social tradition, preparation and tools for cross-cultural service, opportunities for theological reflection, logistical information necessary for international programs and travel, and general support within the context of a community of colleagues. Other students doing summer internships in developing countries may take the seminar with permission from the Instructor.

**CSC 33976. Social Concerns Seminar: Environmental Justice and Human Rights in the Aftermath of Katrina**

(1-0-1) Toms Smedley

Set in the wake of Hurricane Katrina, and centered on a journey to Louisiana during spring break, this seminar explores domestic environmental issues from the perspective of minority communities that suffered due to Hurricane Katrina. Examines historical, political, and economic issues that created a culture of poverty in such areas. After defining key concepts such as environmental racism, culture of poverty, justice, and equality, students will consider specific issues of waste pollution and exposure to toxic substances emitted from chemical plants built in disadvantaged neighborhoods. Apply through the Center for Social Concerns.

**CSC 33980. Lives in the Balance: Youth, Violence, and Society**  
(0-0-1) Brandenberger

This seminar examines the world of youth impacted by violence, either as victims or as perpetrators, with a focus on Indiana. It is the result of a partnership between the Center for Social Concerns and the Indianapolis Peace Institute. The class will meet for three sessions before leaving for Indianapolis. During the week of immersion, you will be residing at the Peace House—the residential component of the Indianapolis Peace Institute situated in downtown Indianapolis—and visiting with various youth-related organizations, government entities and officials, and schools. Topics you will explore include the juvenile justice system, the education system, illegal immigration, human trafficking and slavery, the impact of violence on the development of youth, and the role of irresponsible environmental practices on youth. Central throughout these topics will be advocacy work that is being done in these areas and what role participants could play in bringing about change. Participants will also be looking at various solutions that are already in place around these issues. Readings and written analyses will augment the direct learning experience.

**CSC 33985. Energy Policy, the Environment, and Social Change**  
(0-0-1) Toms Smedley

This course examines the role of energy in society and the impact of current energy use on the environment. Upon reviewing the benefits and problems associated with America's dependence on fossil fuels, attention is directed to the opportunities and challenges of transitioning to a more sustainable energy model. During an immersion in Washington, D.C., students will meet with industry leaders, government officials, regulatory agencies, and environmental advocacy groups in their efforts to resolve contemporary energy and environmental issues.

**CSC 33990. Social Concerns Seminar: Winter Service Learning Seminar**

(0-0-1) Brandenberger

Only for students who applied to and were accepted into a winter Social Concerns Seminar and who study abroad that spring semester immediately following the winter immersion.

**CSC 38801. From Power to Communion**  
(3-0-3)

*Prerequisite:* Six hours of theology. This seminar explores the present and the future of the Catholic Church, placing emphasis on how its future is foreshadowed in the growing ecclesial interdependence that exists between the Churches of North and Latin America. Emphasis is placed on the growing involvement of the laity

in Latin America and where this may lead the North American Church. In a particular way, attention is given to the role of small Christian communities.

**CSC 43705. Addiction, Science, and Values**

(3-0-3)

Students will be introduced to topics in the ethics of care for the indigent; to alternative therapies for recovery and maintenance; and to current brain models of addiction. They will be placed as volunteers (for 14 weeks) with institutions serving indigent recovering addicts in St. Joseph and Elkhart counties.

## Department of Classics

**CLAS 10100. Ancient Greece and Rome**

(3-0-3) Mazurek

This first-year course introduces the general history and culture of ancient Greece and Rome to students coming to the subject for the first time. Literary texts central to the ancient Greek and Roman traditions receive prime attention, including works by Homer, Plato, Cicero, and Virgil, but students are also exposed to the importance of learning from documentary texts, archeology, and art history. Topics discussed include concepts of divinity and humanity, heroism and virtue, gender, democracy, empire, and civic identity, and how they changed in meaning over time. The course allows students to develop a rich appreciation for the Greek and Roman roots of their own lives, and prepares them to study the Greco-Roman past at more advanced levels. Offered annually.

**CLAS 10200. Introduction to Greco-Roman Mythology**

(3-0-3) Mazurek

This first-year course introduces the mythologies of Greece and Rome—some of the foundational narratives of the Western literary and artistic tradition—and traces their transmission and influence over two-and-a-half thousand years from ancient to modern times. The course is particularly valuable as an initial course in the humanities because it pays special attention to such current interpretative theories as structuralism, psychoanalysis, feminism, and post-modernism that allow the many meanings of myths to be deciphered and understood. Offered annually.

**CLAS 13186. Literature University Seminar**

(3-0-3) Bloomer

Introduces first-year students to the study of classical literature on a comparative basis, with readings from Greco-Roman and Arabic literature.

**CLAS 20100. Words in Time: Greek, Latin, and the History of English**

(3-0-3)

Greek and Latin language and literature exercised a profound influence on the growth and development of English, affecting everything from vocabulary to literary structure. This course examines that influence. Topics to be covered include the phonological and morphological development of Greek, Latin, and English from Indo-European; Greek, Latin, and Romance borrowings into English; borrowings as a sign of cultural interaction; the mechanics of semantic change; and the translation of literary style. Illustrative readings will include Chaucer, Milton, Shakespeare, and Tennyson. Knowledge of Greek and Latin not required.

**CLAS 20400. Introduction to Ancient Art of Greece, Rome, and Egypt**

(3-0-3) Ricciardi

This course will examine the origins of Western art and architecture, beginning with a brief look at the Bronze Age cultures of the Near East and Egypt, then focusing in detail on Greece and Rome, from the Minoan and Mycenaean world of the second millennium B.C.E. to the rule of the Roman emperor Constantine in the fourth century C.E. Among the monuments to be considered are ziggurats, palaces, and the luxuriously furnished royal graves of Mesopotamia; the pyramids at Giza in Egypt and their funerary sculpture; the immense processional temple of Amon at Luxor; the Bronze Age palaces of Minos on Crete—the home of the monstrous Minotaur and Agamemnon at Mycenae, with colorful frescoes and processional approaches; the great funerary pots of early Athens and the subsequent traditions of Red and Black Figure vase painting; architectural and freestanding sculpture of the Archaic and Classical periods; the Periclean Acropolis in Athens, with its monumental gateway and shining centerpiece, the Parthenon; and finally, among the cultural riches of Rome, the painted houses and villas of Pompeii; the tradition of republican and Imperial portraiture; the Imperial fora; the exquisitely carved Altar of Peace of Augustus; the Colosseum; and the Pantheon of the Philhellene emperor Hadrian.

**CLAS 20410. Introduction to Early Christian and Byzantine Art**

(3-0-3) Barber

This course will introduce students to the visual arts of the period c. A.D. 200 to c. A.D. 1600. Our work will take us from the first fashioning of an identifiable Christian art through to the remarkable poetics of Late Byzantine painting. In so doing, the student will be introduced to the full array of issues that arise around the question of there being a Christian art. Working from individual objects and texts, we will construct a variety of narratives that will reveal a vital, complex, and rich culture that, in a continuing tradition, has done so much to shape the visual imagination of Christianity.

**CLAS 20500. Introduction to Early Christian and Byzantine Art**

(3-0-3) Barber

This course will introduce students to the visual arts of the period c. A.D. 200 to c. A.D. 1600. Our work will take us from the first fashioning of an identifiable Christian art through to the remarkable poetics of Late Byzantine painting. In so doing, the student will be introduced to the full array of issues that arise around the question of there being a Christian art. Working from individual objects and texts, we will construct a variety of narratives that will reveal a vital, complex, and rich culture that, in a continuing tradition, has done so much to shape the visual imagination of Christianity.

**CLAS 30021. Greek Literature and Culture**

(3-0-3)

This course surveys the leading works of ancient Greek literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from a thousand years of extraordinary literary creativity. Among the authors introduced are Homer, Sappho, Aeschylus, Herodotus, Aristophanes, Plato, Theocritus, Plutarch, Lucian, and Longus. Special attention is paid to the formal structures of Greek literary works, the cultural issues they raise, and the lasting value of Greek literature to the modern age. The course prepares students for more advanced work in classical literature and culture. Offered biennially.

**CLAS 30022. Roman Literature and Culture**

(3-0-3)

This course surveys the leading works of ancient Roman literature and examines the cultural contexts in which they were written, received, and transmitted. Students read poetry and prose from many genres, and sample works from six hundred years of literary versatility that combined enormous originality with a literary tradition inherited from the Greeks. Among the authors introduced are Plautus, Lucretius, Catullus, Cicero, Horace, Livy, Lucan, Tacitus, Apuleius, Ammianus, and Augustine. Special attention is paid the formal structures of Roman literary works, the cultural issues they raise, and the lasting value of Latin literature to the modern age. The course prepares students for more advanced study in classical literature and culture. Offered biennially.

**CLAS 30105. The History of Ancient Greece**

(3-0-3) Baron

*Corequisite:* CLAS 32105

An outline introduction to the history of ancient Greece from the Bronze Age to the Roman conquest. The topics covered include the rise of the distinctive Greek city-state (the *polis*); Greek relations with Persia; Greek experiments with democracy, oligarchy, and empire; the great war between Athens and Sparta; the rise to power of Philip and Alexander of Macedon; and the Greeks' eventual submission to Rome. Readings include narrative, documentary, and archaeological sources. The course prepares students for advanced study in ancient history. Offered biennially.

**CLAS 30110. Democracy and the Greeks**

(3-0-3)

This course builds on CLAS 30105, The History of Ancient Greece, and examines the theory, practice, and development of ancient Greek, especially Athenian, democracy. Particular attention is devoted to comparing ancient with modern

forms of democracy. Among the special topics studied are the origins of democracy, its advantages and disadvantages as a form of government, Greek ideas of alternatives to democracy, and democracy as an abiding legacy of Greek civilization to the modern world. Offered biennially.

**CLAS 30112. Alexander the Great**

(3-0-3)

This course examines the military achievements of Alexander of Macedon (356–323 B.C.) and their far-reaching political, social, cultural, and religious consequences. Topics covered include the Greek, Macedonian, Persian, and other cultural contexts of the time; Alexander's attitude toward divinity (including his own); his concept of empire; his generalship; and his legacy for Greco-Roman antiquity. Particular attention is devoted to representations of Alexander through the ages, beginning during his own lifetime with the accounts of ancient writers "historians and others" down to novels and films of the present day. Ancient authors and documents are read in translation.

**CLAS 30120. The Greeks and Their Gods**

(3-0-3) Torrance

An introduction to the varied and unique religious beliefs and practices of the ancient Greeks. With the aid of anthropological and comparative material on religion from other cultures and societies, the course stresses the intersection of religious conventions with politics, gender, and class in the Greek city-states, and gives special attention to the religious life of the best documented Greek community of all, ancient Athens.

**CLAS 30205. The History of Ancient Rome**

(3-0-3)

An outline introduction to the history of ancient Rome from Romulus to Constantine. The topics covered include the meteoric spread of Roman rule in the ancient Mediterranean, the brilliance of a republican form of government tragically swept away by destructive civil war, the rise of repressive autocracy under the Caesars, and the threats to empire in late antiquity posed inside by the rise of Christianity and outside by hostile invaders. Readings include narrative, documentary, and archaeological sources. The course prepares students for advanced study in ancient history. Offered biennially.

**CLAS 30210. Roman Law and Governance**

(3-0-3) Mazurek

An introduction to the nature and influence of Roman law, one of the most celebrated and distinctive elements of ancient Roman culture. The course surveys the development of Roman civil and criminal law from the very early and enigmatic Twelve Tables to the very late and amazingly great Digest of Justinian. Topics covered include legal procedures, the creation of law, and Roman jurisprudence, all of which are studied in the broad context of Roman government and administration. The lasting effects of Roman law on modern legal systems are also considered.

**CLAS 30214. Cicero and Political Tradition**

(3-0-3)

The life and writings of Marcus Tullius Cicero (106–43 B.C.) have been studied in light of the different aspects of his eventful career as a lawyer and advocate, orator, politician, statesman, and philosopher. His surviving writings—political and judicial speeches; treatises on religion, law, ethics, political philosophy and rhetoric; and also many personal letters shed light on the diverse successes and reversals of his public and private life. Those who study Cicero tend to focus on one or two aspects of his achievement to the exclusion of others. In this course, we will try to understand how the different branches of Cicero's life and work fit together; why he thought that philosophy, law and religion were relevant to politics; and why and how ethical considerations should condition one's private and public life. In pursuing these issues, we will think about Cicero's intellectual and political predecessors, both Greek and Roman, before reading a selection of his own writings. By way of understanding some aspect of Cicero's enormous influence we will conclude with reading part of The Federalist Papers.

**CLAS 30215. The Roman Revolution**

(3-0-3)

This course builds on the work of CLAS 30012 and CLAS 30022 and examines the climactic events in Roman history of the late first century B.C. and early first century A.D. that changed Rome from an open republic to a repressive military monarchy. Chronologically, the course begins with the appearance on the Roman political stage of the unabashedly ambitious Julius Caesar, and ends with the accession of an hereditary autocrat in the person of the morose ruler Tiberius. Exploring a variety of sources, the course focuses on the political tensions and civil commotions of the revolutionary era associated with warlords like Pompey, Crassus, Caesar, and Antony, and concentrates especially on the rise to power of Augustus, the most ruthless warlord of all, and his creation of a personal political regime that was to last in style for centuries.

**CLAS 30220. The Romans and Their Gods**

(3-0-3)

An introduction to the way in which the Romans conceived of, worshipped, and communicated with the myriad gods of their pantheon. The course focuses first on conventional religious rituals and their cultural meaning, and secondly on the success of Roman polytheism in adapting to changing historical and social conditions. Particular attention is paid to the so-called “mystery religions,” including Christianity, and their relationship to conventional forms of Roman religious behavior.

**CLAS 30225. Romans and Christians**

(3-0-3)

The early development of the Christian religion in its historical Roman context. The course surveys the political, social, and administrative structures of the Roman Empire, examines the complexity of Rome’s religious life, and analyzes the rise of the Jesus movement and Rome’s reaction to it. Particular topics studied include pagan and Christian magic and miracle working, the sectarian and subversive character of early Christianity, martyrdom and persecution, and Constantine’s emergence as Rome’s first Christian emperor.

**CLAS 30315. Sex and Gender in Greco-Roman Antiquity**

(3-0-3)

This course examines the differing roles and stereotypes, forms of behavior, and values associated with women and men in Greco-Roman antiquity. Special attention is given to the preoccupations of the Greeks and Romans with the categories of “female” and “male” and to the dynamics of relations and relationships between women and men. The course both deepens knowledge of Greco-Roman society and provides an informed background for contemporary gender debates.

**CLAS 30320. Family and Household in Greco-Roman Antiquity**

(3-0-3)

A survey of the life-course in Roman antiquity. Topics studied will include marriage, divorce, child rearing, old age, the way in which family and household were conceptualized by the Romans, and the demography of the Roman world.

**CLAS 30323. Sport and Spectacle in the Ancient World**

(3-0-3)

This course introduces students to the centrality of athletics and spectacle in Ancient Greece and Rome. Beginning with a survey of sport practices in Mesopotamia and Egypt, the course moves on to discuss the role of athletics in Greek culture, including studies of the ancient Panhellenic games like the Olympia, Homeric sport, Athenian citizen-athletes, and Spartan soldier-athletes. The latter part of the class concentrates on contests in the Roman Empire, to include an examination of the origin and development of the ultimate spectacle: the gladiatorial combats. We will also examine chariot racing in the Roman Empire—both the racers and the fans—who became the first sport fanatics in the world. The course will also discuss the role of sport in society, sport and gender in the ancient world, and modern (mis)conceptions of ancient athletics. The course materials will be multimedia, with readings in English.

**CLAS 30328. War and Society in the Ancient World**

(3-0-3)

The political structures, societal practices, and artistic productions of Greece and Rome were profoundly shaped by military activity. This course surveys the practice of war and its effects on art and society from Homeric Greece to the end of Roman hegemony in Western Europe. Questions to be considered include: What were the strategy and tactics of ancient armies? How did military organization affect and reflect social organization and political and economic policy? What is the ideology of war? How did the experience of war affect the attitudes of different generations? Texts to be read include Homer, Aeschylus, Thucydides, Plutarch, Caesar, Horace, Vergil, Josephus, Frontinus, and Tacitus.

**CLAS 30329. Self and Society in the Ancient World**

(3-0-3)

This course seeks to answer the question, “Who am I and how should I present myself?” through an investigation of self and society in the ancient world. Surveying the literature of the Ancient Near East, with special emphasis on biblical texts and classical texts from Greece and Rome, students will explore how ancient peoples defined themselves, and to what extent the methods of self-defining have changed (or not changed) up to the present. Students will read and analyze a variety of ancient texts as they explore how ancient societies conceptualized individual and group identity in ethnic, national, and religious aspects. Students will also read classic and recent historical and anthropological scholarship, which will place the texts in a greater context and invite the students to think about the problems of ethnic, national, religious, and political identities in the modern world.

**CLAS 30330. The Greek and Latin Origins of Medical Terminology**

(3-0-3) Ladouceur

This course offers an introduction to the ancient Greek and Latin languages that enables students to decipher the arcane and often perplexing vocabulary of modern medicine. Basic linguistic concepts are explained, the manner in which medical terms are constructed from Greek and Latin roots is analyzed, and appropriate contextual material on ancient medicine is provided. This is a course of great practical value, not least for the attention it pays to human anatomy.

**CLAS 30335. The History of Ancient Medicine**

(3-0-3)

This course traces the development of medicine in the ancient Mediterranean world, concentrating on the medical beliefs, theories, and practices of the Egyptians, Greeks, and Romans. The course emphasizes the value of studying written sources such as the Hippocratic treatises and the works of Galen with artistic evidence and human remains. A connection between ancient and modern medicine is made by considering two contrasting models of disease, the biomedical and the biopsychosocial, that figure as the focus of a contemporary debate on health care.

**CLAS 30360. Words and/of Power: The Theory and Practice of Persuasive Speech in Greece and Rome**

(3-0-3)

Rhetoric occupied a prominent place in the democracy of the Athenians and in the republican era of Roman history. This course examines the theory, practice, and context of ancient rhetoric, and pays special attention to developments caused by radical changes in the political character of the Athenian and Roman civic communities. Representative readings from Greek and Roman orators and writers on rhetorical theory.

**CLAS 30365. The Art and Literature of Metamorphosis**

(3-0-3)

This course begins with a critical study of Ovid’s great poem, the *Metamorphoses*. The poem itself became a subject of metamorphosis in poetry and art in the hands of such figures as Statius, Dante, Botticelli, Bernini, Rembrandt, Hughes, and Heaney. The course addresses the modeling of transformation within the literary text by examining first, Ovid and his sources, and second, adaptations of his poem by writers such as Shakespeare and Kafka. Connections with folklore, magic, and religion are explored. The graphic arts receive equal consideration as the course

explores how Ovid's ideas of the transformation of the body, the capacity of the human body for allegory, and the fragility of identity have influenced later artists and authors.

**CLAS 30405. Survey: Greek Art/Architecture**

(3-0-3)

This course analyzes and traces the development of Greek architecture, painting, and sculpture in the historical period from the eighth through second century B.C., with some consideration of prehistoric Greek forebears of the Mycenaean Age. Particular emphasis is placed upon monumental art, its historical and cultural contexts, and how it reflects changing attitudes toward the gods, human achievement, and the relationship between the divine and the human.

**CLAS 30410. Hellenistic and Roman Art and Architecture**

(3-0-3)

This course explores the architecture, urban planning, sculpture, and painting of Hellenistic Greece and Rome, from the time of Alexander the Great in the fourth century B.C.E. to the reign of the Roman emperor Constantine in the fourth century C.E. The art and architecture of Greece and Rome will be analyzed as expressions of their culture and time and as tools for understanding those cultures more completely. A variety of themes will be addressed, including changing conceptions of monumentality in art and architecture; imperial propaganda in art, architecture, and religion; technology as inspiration for new conceptions of art and architecture; the contrasting natures of Greek and Roman art and culture; the influence of Greek culture upon Rome; and the nature and significance of the ever-changing mixture of Greek and native Italic elements in Roman art and architecture.

**CLAS 30415. Etruscan and Roman Art and Architecture**

(3-0-3)

Roman art of the republic and the empire is one focus of this course, but other early cultures of the Italian peninsula and their rich artistic production are also considered. In particular, the arts of the Villanovans and the Etruscans are examined and evaluated as both unique expressions of discrete cultures and as ancestors of and influences on Rome. The origins and development of monumental architecture, painting, portraiture, and historical relief sculpture are isolated and traced from the early first millennium B.C.E. through the early fourth century of the modern era.

**CLAS 30420. Late Antique/Early Christian Art**

(3-0-3)

Art in late antiquity has traditionally been characterized as an art in decline, but this judgment is relative, relying on standards formulated for art of other periods. Challenging this assumption, we will examine the distinct and powerful transformations within the visual culture of the period between the third and sixth centuries A.D. This period witnesses the mutation of the institutions of the Roman Empire into those of the Christian Byzantine Empire. Parallel to these social changes, we can identify the emergence of a Christian art that defines our basic assumptions about the role of art in a Christian society. The fundamental change in religious identity that was the basis for this development had a direct impact upon the visual material that survives from this period. This course examines the underlying conditions that made images so central to cultural identity at this period.

**CLAS 30431. The Art of Mythology**

(3-0-3)

This cross-disciplinary course explores representations of classical myth in Western literature and art from the seventh century B.C. to the 18th century of the modern era. Literary and visual narratives are compared and contrasted, and the procedures of poets, philosophers, artists, sculptors, and architects in selecting and adapting mythological subjects are analyzed. The course raises questions about the connections between myth and political power, and about such major concepts as heroism, metamorphosis, and earthly and divine love. Readings from classical sources on Greek myths, and special attention to such works of art as Raphael's Roman cycles and Bernini's sculpted dramas.

**CLAS 30799. Hieroglyphs and History**

(3-0-3) Ladouceur

This course will focus on Egyptian hieroglyphs, both as a means to reconstruct Egyptian history and culture, and as a reflection of that culture. Students will be taught to translate and interpret primary sources, especially on monuments and archaeological finds. Material from the tomb of Tutankhamen will be read and analyzed in detail. In addition, there will be lectures and discussions on specific historical topics and also on developing chronologies, understanding color symbolism, recognizing the numerous Egyptian deities, and interpreting Pharaonic names.

**CLAS 30802. Death and the Afterlife in Ancient Egypt**

(3-0-3)

*Prerequisite:* (CLAS 30799)

After an initial survey of historical sources, this course will focus on a wide range of texts, archaeological artifacts, and architectural remains associated with Egyptian funerary practice and conceptions of the otherworld.

**CLAS 32105. The History of Ancient Greece Tutorial**

(1-0-0)

A weekly tutorial required for those registered for CLAS 30105, The History of Ancient Greece, or its cross-lists.

**CLAS 40125. Classical Greek Tragedy**

(3-0-3)

This advanced course in literature provides detailed study of the theory and practice of classical Greek tragedy. The structures and sensibilities that inform tragedy are assessed, with special attention to plays written by the three great tragedians, Aeschylus, Sophocles, and Euripides. The Greeks' own responses to tragedy, as represented by Aristophanes, Plato, and Aristotle, are also discussed. The form and function of Greek tragic plays, their place in classical culture, and their distinctive approach to issues of human life are key topics of the course.

**CLAS 40130. Socrates and Athens**

(3-0-3)

This course examines the moral upheaval evident in classical Athens during the Peloponnesian War, the great fifth-century struggle between Athens and Sparta and their respective satellites. The history of Thucydides, the comedies of Aristophanes, and the tragedies of Euripides and Sophocles provide the basic reading. The course also draws on some of Plato's writings to assess Socrates' reaction to the Athenian moral crisis.

**CLAS 40340. The Roman Empire: Governance, Society and Culture**

(3-0-3)

This advanced course in ancient history examines the Roman Empire from Augustus to Constantine. It deals with the establishment of the Augustan Principate and the progression of autocracy at Rome in the first two centuries of the imperial age, leading to discussion of what is generally called the third-century crisis and the new monarchy of Diocletian and Constantine. It investigates how the Roman Empire as a geopolitical unit was governed and administered (paying particular attention to the all-powerful figure of the Roman emperor), and how the diverse regional cultures of the greater Mediterranean world were affected by Roman rule. Among topics studied are contemporary debates on Roman society, economy, demography, and culture.

**CLAS 40342. Rome, the Christians, and Early Europe**

(3-0-3)

The course studies continuity and discontinuity in the Mediterranean world during a formative period, the transition from Roman Empire to early medieval European kingdoms. Christianity played a vital role during this transformation, but not the only one. Beginning with a review of Roman institutions, law, culture, and religion, we will observe the changes they underwent between c. 150 CE and c. 750 CE. At this latter point in time, some people were still thinking of themselves as living within the Roman Empire, even though the local potentate was a non-Roman king. Also, Roman law had become Christian law, and Latin

was beginning to generate the languages now collectively described as “Romance.” On the fringes of Europe, in England and Ireland, meanwhile, missionaries shared with their converts not just Christianity, but also the Latin language and Latin literature along with certain Roman concepts of culture and political organization.

#### **CLAS 40343. Augustine and the CITY OF GOD**

(3-0-3)

The aim of the course is to gain a detailed understanding of one of the world’s important works of historical and political theology. Writing in response to the destruction of the City of Rome by Visigothic invaders in 410 A.D., Augustine devoted the first half of this “long and difficult work” to a refutation of Roman religion and ancient philosophy (Books I–X). In the second half (Books XI–XXII) he explained what he meant by City of God and Terrestrial City and traced the evolution through time of the two cities in relation to each other. We will study the City of God in light of the sources Augustine engaged with. For the first part, these include the philosophers Plato, Apuleius, Plotinus, and Porphyry; the historians Sallust and Livy; and also the statesman Cicero and the poet Vergil. In the second part, Augustine builds on biblical theology, history, and chronology. To conclude, we will devote some time to the influence of this very long book. It will be studied in English, but those with viable Latin will be encouraged to use it.

#### **CLAS 40350. The Myths of the Greeks and Romans**

(3-0-3) Torrance

This advanced course investigates the mythologies of Greece and Rome and traces their transmission to and influence on modern literature and art. Special attention is given to the wide range of media in which ancient stories about gods and heroes were expressed and communicated, and to the process by which these marvelous stories survived in later literature and the visual arts, inspiring writers and artists to adapt them to their own purposes. Current interpretative theories at the forefront of scholarship in the humanities are explored for their value in interpreting myths.

#### **CLAS 40355. Greek and Roman Epic Poetry**

(3-0-3) Schlegel

This advanced course in literature provides detailed study of the major epic poems of the classical literary tradition: the *Iliad* and *Odyssey* of Homer, the *Aeneid* of Virgil, and the *Metamorphoses* of Ovid. Discussion centers on the cultural contexts in which the works were written or produced, and the literary conventions on which they rely for their ever-appealing aesthetic and emotional power.

#### **CLAS 40358. The Roman World of Apuleius**

(3-0-3)

An advanced course in Roman history and literature that investigates the Latin author Apuleius in his sociocultural context. The course begins with the Romano-African setting into which Apuleius was born, recreates the educational travels to Carthage, Athens, and Rome that occupied his early life, and focuses especially on his trial for magic in Sabratha in Tripolitania before following him back to Carthage where he spent the remainder of his life. Notice will be taken of all Apuleius’ writings, but special attention will be paid to the “Apology,” a version of the speech of defense made at his trial, and to the sociocultural significance of his work of imaginative fiction, the *Metamorphoses*. The course is open to students with or without Latin.

#### **CLAS 40407. Seminar: Greek and/or Roman Art**

(3-0-3)

Seminar on specific subjects in Greek and/or Roman art. Variable content.

#### **CLAS 40410. Greek Architecture**

(3-0-3)

Open to all students. In this course the development of Greek monumental architecture, and the major problems that define it, will be traced from the 8th to the 2nd centuries B.C., from the late Geometric through the Archaic, Classical, and Hellenistic periods. Among themes to be related are the relationship between landscape and religious architecture; the humanization of temple divinities; the architectural expression of religious tradition and even specific history, architectural procession, and hieratic direction’ emblem and narration in architectural

sculpture, symbolism and allusion through architectural order’ religious revival and archaism’ and the breaking of architectural and religious canon.

#### **CLAS 40420. Art into History: Reading the Art of Medieval Byzantium**

(3-0-3)

Byzantine art has often been opposed to the traditions of Western naturalism, and as such has been an undervalued or little known adjunct to the story of medieval art. In order to develop a more sophisticated understanding of this material, we will examine the art produced in Byzantium in the period from the ninth to the 12th century, a period that marks the high point of Byzantine artistic production and influence. Stress will be placed upon the function of this art within the broader setting of this society. Art theory, the notions of empire and holiness, the burdens of the past, and the realities of contemporary praxis will be brought to bear upon our various analyses of material from all media. How we, as art historians, can write the history of this rich culture will be a central issue of this course.

#### **CLAS 43140. Plato**

(3-0-3) O’Connor

A detailed and systematic reading, in translation, of the fragments of the pre-Socratics and of the following Platonic dialogues: *Euthyphro*, *Apology*, *Crito*, *Meno*, *Protagoras*, *Phaedo*, *Republic*, *Phaedrus*, *Symposium*, and *Theaetetus*.

#### **CLAS 43357. The Age of Hadrian**

(3-0-3) Bradley

This advanced seminar in ancient history and literature examines the life and reign of the Roman emperor Hadrian, who is remembered as one of the most complex and enigmatic of Roman rulers: the builder of the Wall in Britain and the Pantheon and Castel Sant’Angelo in Rome; an inveterate traveler across the ancient Mediterranean world; a devotee of Greek culture; a reformer of Roman law; a poet who mused about his soul on his death-bed; a creator of new gods; and the first Roman emperor to wear a beard. A principal theme of the course is the question of how historical experience can be recovered, and readings from original sources (in English translation) are studied in conjunction with documentary and iconographic evidence. The course also considers how modern historians, biographers, and novelists have recreated this mysterious figure, Ronald Syme and Marguerite Yourcenar included.

#### **CLAS 47801. Special Studies**

(3-0-3)

Individual or small group study under the direction of a faculty member. Permission of the department required.

#### **CLAS 50400. Topics in Greek and/or Roman Art**

(3-0-3) Ricciardi

Topics course on special areas of Greek and/or Roman art.

#### **CLAS 53100. Honors Seminar**

(3-0-3) Schlegel

This course is offered each fall semester and is a requirement for all majors in Classics and Greek and Roman civilization who wish to receive an honors degree. The specific content of the seminar varies from year to year, but its broad purpose is to introduce students to scholarly methods of research, and through research to reflect on the value of studying classical antiquity.

#### **CLGR 10001. Beginning Greek I**

(4-0-4) Mazurek

This two-semester sequence of courses introduces students to the language of the ancient Greeks for the first time. It emphasizes the fundamentals of ancient Greek grammar and vocabulary and prepares students to read original Greek texts. An appreciation for ancient Greek culture is also fostered through secondary readings and class discussion. CLGR 10001 is offered each fall semester and CLGR 10002 is offered each spring semester.

**CLGR 10002. Beginning Greek II**

(4-0-4) Baron

*Prerequisite:* (CLGR 10001 OR CLGR 101)

This two-semester sequence of courses introduces students to the language of the ancient Greeks for the first time. It emphasizes the fundamentals of ancient Greek grammar and vocabulary and prepares students to read original Greek texts. An appreciation for ancient Greek culture is also fostered through secondary readings and class discussion. CLGR 10001 is offered each fall semester and CLGR 10002 is offered each spring semester.

**CLGR 20003. Intermediate Greek**

(3-0-3) Baron

*Prerequisite:* (CLGR 10002 OR CLGR 102) OR (CLGR 10111 OR CLGR 200)

This second-year language course builds on the work of Beginning Greek I and II. It combines a review of grammar with careful reading of classical Greek authors such as Homer and Plato. The course improves students' translating skills, introduces methods for studying Greek literature in its historical and cultural contexts, and prepares students for more advanced work in the rich literature of the ancient Greeks. Offered each fall semester.

**CLGR 20004. Reading and Writing Greek Prose**

(3-0-3) Torrance

*Prerequisite:* (CLGR 20003 OR CLGR 103 OR CLGR 20103)

This second-year language course continues the review of grammar begun in CLGR 20003 and introduces students to stylistic analysis through close readings of classical Greek prose authors such as Herodotus and Xenophon. A special feature of the course is that students learn how to write classical Greek for themselves. Offered each spring semester.

**CLGR 30011. Homer**(3-0-3) *Prerequisite:* (CLGR 20004 OR CLGR 202) OR (CLGR 20103 OR CLGR 203)

This third-year course builds on CLGR 20003 and CLGR 20004, and offers close reading of passages from the *Iliad* and *Odyssey*. Homer's epic poems stand at the head of the tradition of European literature; their themes and poetic style have substantially influenced the works of Dante, Milton, and many other European writers. The poems are discussed in their cultural context, and features of poetic oral composition are examined. The course prepares students for advanced offerings in Greek literature, especially CLGR 40021 and CLGR 40031. Offered in fall semester, alternate years.

**CLGR 30012. Herodotus**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325 OR CLGR 202)

This third-year course builds on the work of CLGR 20003 and CLGR 20004 and offers close reading of passages from the *Histories* of Herodotus. The *Histories* tells of the momentous wars between the Greeks and the Persians in the early classical era, and is the earliest surviving narrative of the Western historical tradition. The political, social, and cultural conditions of fifth-century Greece that inspired Herodotus are discussed, and the development of Greek history writing is examined. The course prepares students for advanced offerings in Greek literature, especially CLGR 40022, CLGR 40032, and CLGR 40042. Offered in spring semester, alternate years.

**CLGR 30013. Greek Tragedy**

(3-0-3) Torrance

*Prerequisite:* (CLGR 20004 OR CLGR 325 OR CLGR 202)

This third-year course builds on the work of CLGR 20003 and CLGR 20004 and offers close reading of passages from the tragedies of Sophocles and Euripides. These plays illustrate the Athenian invention and development of tragedy that took place when Athens dominated Greece politically between the Persian Wars and the Peloponnesian War, the great fifth-century war against Sparta. The ways in which the plays reveal and address the city's ideological, political, and sexual tensions are key themes for discussion in the course, and matters of style are appropriately

examined. The course prepares students for advanced offerings in Greek literature, especially CLGR 40023. Offered in fall semester, alternate years.

**CLGR 30014. Athenian Oratory**

(3-0-3) Baron

*Prerequisite:* CLGR 20004 OR CLGR 20103

This third-year course builds on the work of CLGR 20003 and CLGR 20004 and offers close reading of passages from the speeches of Lysias and Isocrates. Athenian oratory provides valuable information on fifth- and fourth-century Greek politics and society, and on the Greek system of rhetorical education, which it reflects. Lysias' and Isocrates' speeches are discussed in their historical and cultural context, and their variations in rhetorical style are examined. This course prepares students for advanced offerings in Greek literature, especially CLGR 40024, CLGR 40034, and CLGR 40044. Offered in spring semester, alternate years.

**CLGR 30095. Socratic Literature**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325)

This course will study the character and philosophical significance of Socrates within the context of the intellectual ferment of late fifth-century Athens. The Greek primary texts that constitute the heart of the course are Plato's *Laches* and *Lysis* and sections of Xenophon's *Memorabilia*. Issues that arise from those texts, like the ideal of rational character and Socrates' great interest in Eros, will provide opportunities for student research and classroom discussions.

**CLGR 40020. Greek Epic Poetry**

(3-0-3)

*Prerequisite:* (CLGR 30011 AND CLGR 30012 AND CLGR 30013 AND CLGR 30014 AND CLGR 30095)

This advanced course includes readings from the epic poems of Homer (*Iliad* and *Odyssey*), Hesiod (*Theogony* and *Works and Days*), and Apollonius of Rhodes (*Argonautica*). It introduces students to the genre of Greek epic poetry, narratives composed in hexameters that tell of the mighty deeds of gods, heroes, and men. The course concentrates on explaining why epic was regarded in antiquity as the greatest of Greek literary forms.

**CLGR 40021. Hesiod**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325)

This advanced course introduces students to the poetry of Hesiod through close reading and detailed study of the *Theogony* and the *Works and Days*. Both works represent an early poetic tradition in Greek literature parallel to but separate from that of Homer, which focuses on the human condition in a cosmos controlled by all-powerful and vengeful gods. The relationship of these central works of archaic Greek literature to other archaic texts is a key theme for discussion in the course.

**CLGR 40022. Thucydides**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325)

This advanced course introduces students to the historical writing of Thucydides through close reading and detailed study of the *History of the Peloponnesian War*. Often considered the most accurate and methodical of the ancient historians, Thucydides brought to Greek history writing a high level of precision in both language and analysis. His uniquely candid accounts of the history, politics, and social effects of the great war between Athens and Sparta, and the connection between content and literary style are key themes for discussion in the course.

**CLGR 40023. Greek Comedy**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325) OR (CLGR 20103 OR CLGR 203)

This advanced course introduces students to Greek comedy through close reading and detailed study of the comic plays of Aristophanes. The object of intense study and scholarship even in antiquity, Aristophanes' plays were composed in Athens and combine biting social satire with delightful and sometimes farcical wit. The fifth-century Athenian context in which the plays were written and the ways in

which they reveal and address the city's ideological, political, and sexual tensions are key themes for discussion in the course. The role of Aristophanes in the development of Greco-Roman comedy is also considered.

#### **CLGR 40024. Demosthenes**

(3-0-3) Baron

*Prerequisite:* CLGR 30010 OR CLGR 30011 OR CLGR 30012 OR CLGR 30013 OR CLGR 30014 OR CLGR 30095

This advanced course offers accelerated reading and detailed study of the speeches of Demosthenes, one of the major orators of late Classical Greece. Demosthenes' speeches provide invaluable information on Athens' response to the rise of Philip of Macedon and his son Alexander the Great, and also on the theory and practice of Greek rhetoric. The speeches are discussed in their historical and cultural context, and the main features of Demosthenes' rhetorical style are examined.

#### **CLGR 40026. The Age of Alexander**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325)

Alexander the Great (356–323 B.C.) had a stunning impact on the ancient Mediterranean world. Leading a Panhellenic crusade against the Persians, he created an empire of enormous proportions that included his native Macedonia, Greece, Egypt, and much of the ancient Near East. In so doing, he laid the foundations for the dispersal of Greek ideas and practices over a huge area. This course examines Alexander's meteoric and ruthless career through careful study of two Greek authors who wrote extensively about him: Arrian and Plutarch.

#### **CLGR 40031. Greek Lyric Poetry**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325 OR CLGR 202)

This advanced course includes readings from Archilochus' iambic and elegiac poems, Sappho's monodies, and Pindar's choral works. It introduces students to archaic and classical Greek lyric poetry, which represents a literary tradition that drew inspiration from religious ritual, contemporary politics, and private experience. Its authors experimented with diction, style, and meter in ways distinct from those of the epic poets. The manner in which they wrote and the ways in which they responded to the epic tradition are key themes for discussion in the course.

#### **CLGR 40034. Plato**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325)

This advanced course offers accelerated reading and detailed study of the philosophical dialogues of Plato, whose writings, often radical and challenging, represent a cornerstone in the Western intellectual tradition. The development of Plato's philosophical ideas in their historical context is a key theme for discussion in the course, and attention is paid to the main features of his prose style in selections of his works.

#### **CLGR 40042. Plutarch**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 325)

This advanced course introduces students to the most famous biographical literature from antiquity, Plutarch's *Parallel Lives*. Illuminating the virtues and vices of famous and infamous men from Greek and Roman history, the *Parallel Lives* offers an important guide to understanding the ethical imperatives of the Greco-Roman world. Plutarch's literary style, his conception of biography, and the Roman imperial context in which he wrote are key themes for discussion in this course.

#### **CLGR 40063. Euripides**

(3-0-3) Torrance

*Prerequisite:* (CLGR 20004 OR CLGR 325)

This advanced course offers accelerated reading and detailed study of the tragic plays of Euripides, the last of the great tragedians of classical Athens and the object of ridicule from the comic writer Aristophanes. Euripides' plays depart from those of his predecessors, first because of their escapist and romantic plots, and secondly because of their fierce engagement with contemporary Athenian politics and

society. The course dwells on this development and also considers why Euripides is sometimes considered the most radical of the Athenian tragedians.

#### **CLGR 40071. Greek Wisdom Literature**

(3-0-3)

*Prerequisite:* (CLGR 20004 OR CLGR 202)

In this course, we will read samples of one of the oldest and most enduring forms of literature: wisdom or sapiential literature. The wise man instructs his audience through fables, proverbs, traditional tales, and accounts of the universe in the right way to live. The texts read in Greek range from the archaic period (*Hesiod*) to collections of wise sayings from the Hellenistic period, the *Life of Aesop*, Lucian's account of a trip to the moon, and the *Wisdom of Ben Sirach*. The Near Eastern origins and the Jewish and Christian traditions will also be considered (in translation and some in the original Greek).

#### **CLGR 42091. LAC: Reading Plato's PHAEDRUS**

(1-0-1)

A one-credit reading course in Greek of the *Phaedrus*, with a special emphasis on the problems of creating a readable English translation.

#### **CLGR 46801. Directed Readings**

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

#### **CLGR 47801. Special Studies**

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

#### **CLLA 10001. Beginning Latin I**

(4-0-4) Mazurek

This two-semester sequence of courses introduces students to the language of the ancient Romans for the first time. It emphasizes the fundamentals of Latin grammar and vocabulary, and prepares students to read original Latin texts. An appreciation for ancient Roman culture is also fostered through secondary readings and class discussion. CLLA 10001 is offered each fall semester, and CLLA 10002 is offered each spring semester.

#### **CLLA 10002. Beginning Latin II**

(4-0-4)

*Prerequisite:* (CLLA 10001 OR CLLA 101) OR (CLLA 10111 OR CLLA 200)

This two-semester sequence of courses introduces students to the language of the ancient Romans for the first time. It emphasizes the fundamentals of Latin grammar and vocabulary, and prepares students to read original Latin texts. An appreciation for ancient Roman culture is also fostered through secondary readings and class discussion. CLLA 10001 is offered each fall semester, and CLLA 10002 is offered each spring semester.

#### **CLLA 20003. Intermediate Latin**

(3-0-3) Mazurek

*Prerequisite:* (CLLA 10002 OR CLLA 102) OR (CLLA 10111 OR CLLA 200)

This second-year language course builds on the work of Beginning Latin I and II. It combines a review of grammar with careful reading of classical Latin authors such as Cornelius Nepos, and Ovid. The course improves students' translating skills, introduces methods for studying Latin literature in its historical and cultural contexts, and prepares students for more advanced work in the sophisticated literature of the ancient Romans. Offered each fall semester.

#### **CLLA 20004. Reading and Writing Latin Prose**

(3-0-3)

*Prerequisite:* (CLLA 20003 OR CLLA 103 OR CLLA 103A)

This second-year language course continues the review of grammar begun in CLLA 20003 and introduces students to stylistic analysis through close readings of Latin prose authors such as Cicero and the younger Pliny. A special feature of the

course is that students learn to write classical Latin for themselves. Offered each spring semester.

### CLLA 30011. Virgil

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 202)

This third-year course builds on CLLA 20003 and CLLA 20004, and offers close reading of passages from the *Aeneid*. Virgil's inspired adaptation of Homer's epic poems traces the story of the flight of Aeneas from Troy to Italy, where Rome, a new Troy, will be founded. The place of Virgil's epic in the Emperor Augustus' cultural program, and various critical approaches to the poem and its compositional techniques provide subjects for discussion. The course prepares students for advanced study in Latin literature, especially CLLA 40021, CLLA 40031, CLLA 40041, and CLLA 40051. Offered in fall semester, alternate years.

### CLLA 30012. Latin History-Writing

(3-0-3) MacCormack

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This third-year course builds on CLLA 20003 and CLLA 20004, and offers close reading of passages from the works of the historical writers Caesar and Sallust. Latin historiography is a sophisticated instrument for narrating past events, for showing how notions of cause and effect and change over time develop in historical thinking, and for indicating the relevance of the past to the present. The political and social conditions of Rome that informed the writings of Caesar and Sallust are discussed, and the compositional techniques of their works are examined. The course prepares students for advanced offerings in Latin literature, especially CLLA 40022, CLLA 40032, and CLLA 40052. Offered in spring semester, alternate years.

### CLLA 30013. Roman Lyric Poetry

(3-0-3) Bloomer

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This third-year course builds on CLLA 20023 and CLLA 20024, and offers close reading of passages from the lyric poetry of such authors as Catullus and Horace. The lyric form gives precise and economical expression to a wide range of human thoughts and emotions, from the highly personal to the grandly patriotic. The range of Roman lyric, the technique of its practitioners, and the place of lyric poetry in Roman life are themes that receive special attention. This course prepares students for advanced offerings in Latin literature, especially CLLA 40023, CLLA 40033, CLLA 40043, and CLLA 40053. Offered in fall semester, alternate years.

### CLLA 30014. Cicero's Speeches

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325 OR CLLA 202)

This third-year course builds on the work of CLLA 20003 and CLLA 20004, and offers close reading of select speeches of Rome's greatest orator, Cicero. The art of persuasion was an essential requirement for success in Roman public life, and no one was more persuasive than Cicero. The flexibility and complexity of Cicero's grammatical expression, the range of his styles, and the political contexts in which his speeches were delivered are all given careful treatment. The course prepares students for advanced offerings in Latin prose, especially Latin CLLA 40024, CLLA 40034, and CLLA 40054.

### CLLA 30025. The Age of Nero

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325 OR CLLA 202)

The reign of the Emperor Nero (AD 54–68) witnessed a remarkable efflorescence of Latin literature. Nero's mentor, Seneca, was a prolific author of moral philosophy and drama. Seneca's nephew Lucan wrote a stirring and strange epic about civil war (the *Pharsalia*), the enigmatic Persius composed brilliant satires, and the senator Petronius, a member of Nero's court, authored the famous comic novel, the *Satyricon*. Even Nero, a devotee of the arts at-large, was an aspiring poet. This third-year course introduces students to this special age of Latin letters through close reading of excerpts from the major works mentioned, and also from the technical writing of the contemporary expert on farming, Columella. Whether

a distinctive character to the literature of Nero's age can be discovered is the main theme for discussion.

### CLLA 30070. Introduction to the Latin Vulgate

(3-0-3) Ladouceur

*Prerequisite:* (CLLA 20003 OR CLLA 20103)

Readings in the prose and poetry of the Latin Bible. The peculiarities of its Latin, influenced by Greek and Hebrew, will be analyzed from an historical linguistic perspective and also interpreted according to Christian exegetical tradition. Special stress on the Psalms with accompanying readings in Augustine's *Enarrationes*. No knowledge of Hebrew or Greek required.

### CLLA 40016. Introduction to Christian Latin Texts

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This class has two goals: to improve the student's all-around facility in dealing with Latin texts and to introduce the student to the varieties of Christian Latin texts. Medieval Latin II, a survey of medieval Latin texts, follows this course in the spring term.

### CLLA 40017. Medieval Latin Survey

(3-0-3) Bloomer

*Prerequisite:* (CLLA 40016 OR CLLA 475) OR (MI 40003 OR MI 475)

The aim of this course is to experience a broad spectrum of Medieval Latin texts. Readings representative of a variety of genres (literary and subliterate), eras, and regions will be selected. Students planning to enroll in this course should be completing Introduction to Christian Latin Texts or they must secure the permission of the instructor. Those with interests in particular text types should inform the instructor well in advance so that he can try to accommodate their interests.

### CLLA 40018. Introduction to Paleography

(3-0-3)

Although paleography, study of the history of letter forms, has been called "a science of the very small," it can play a very large role: it equips philologists with otherwise unavailable resources for their studies; it furnishes historians of culture and the arts with abundant new data and comparanda; and it is a source of delight to anyone who loves books and calligraphy. This course is an introduction: it will provide an overview of the history of Latin letters and writing from the first century B.C. through the 15th century A.D., considered as products of the cultures that produced them; special attention will be given to developing facility in reading the principal script types used for the transmission of texts (bookhands) and in transcribing and editing texts so transmitted, but students will also develop a good acquaintance, a basis for future study, with the more obscure script types, display scripts, and letter forms employed on coins, inscriptions, and seals.

### CLLA 40021. Lucretius

(3-0-3) Schlegel

*Prerequisite:* CLLA 30011 OR CLLA 30012 OR CLLA 30013 OR CLLA 30014 OR CLLA 30025 OR CLLA 30095

This advanced course introduces students to Lucretius' epic poem, *De rerum natura*, whose subject is Epicurean philosophy. Close reading of passages from the poem reveals its didactic character and highlights important topics: the atomic nature of matter, the mortality of the soul, the vanity of religion, and the importance of achieving intellectual tranquility. Lucretius' contribution to defining Epicureanism and the place of philosophy in the cultural life of Rome's elite citizens are key themes for discussion in the course.

### CLLA 40022. Caesar

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This advanced course introduces students to the highly stylized historical writings of Julius Caesar through close reading of excerpts from the Gallic War, a commentary on Caesar's dramatic extension of Roman power in northern Europe, and the Civil Wars, a work on the destructive conflict between Caesar and his rival Pompey the Great. The central questions Caesar's works raise are whether an objec-

tive history can be composed by someone who participated in the events narrated, whether a record of contemporary events is real history, and why warfare was such an attractive topic to a Roman audience. These questions form the main themes of the course, which are considered in the light of Caesar's style and compositional methods.

### CLLA 40023. Roman Elegiac Poetry

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This advanced course introduces students to Latin elegy, a form of verse that served Roman poets as a vehicle for expressing and exploring personal feelings, especially those associated with love. Readings from Catullus, Propertius, Tibullus, and Ovid expose how Roman poets adapted and experimented with the elegiac form to express highly charged personal emotions often at odds with conventional Roman values.

### CLLA 40024. Roman Rhetoric

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This advanced course introduces students to Roman writings on rhetoric, a vital art in Roman public and cultural life. Readings from the *Rhetorica ad herennium*, Cicero, the elder Seneca, Quintilian, and Tacitus allow differing concepts of rhetoric to be seen, the relationship between rhetorical theory and practice to be understood, and the lasting value of Roman efforts to theorize the power of speech to be appreciated.

### CLLA 40025. Cicero and the Ideal and Reality of Friendship

(3-0-3)

Cicero wrote the dialogue *de Amicitia*, which we will be reading, in 44 B.C.E., just before and after the assassination of Caesar. Recalling his youth, when he was a student of Mucius Scaevola the augur, Cicero imagined, in this dialogue, an episode from his favorite period, the second century B.C.E., by way of having C. Laelius, the friend of the Younger Scipio, speak about the joys this friendship brought him. Cicero described an ideal, the shared pursuit of virtue and virtuous desires, but he also thought that this ideal could and should find scope in public life. By way of comparing ideal and reality, we will be reading, alongside *de Amicitia*, a selection of Cicero's letters that shed light on the practical aspects of friendship as pursued by Cicero himself. Time allowing, we will also read Cicero's *Somnium Scipionis* and some letters of the humanist Francesco Petrarca.

### CLLA 40026. The Vulgate and Related Texts

(3-0-3)

*Prerequisite:* (CLLA 20003 OR CLLA 103 OR CLLA 103A OR CLLA 201) OR (CLLA 20004 OR CLLA 325) OR (CLLA 20103 OR CLLA 203)

Introduction to a wide range of texts drawn from Jerome's Vulgate Bible with focus on understanding the peculiarities of this Hebraizing-Hellenizing Latin within its original historical linguistic context. No knowledge of Greek or Hebrew required. Special emphasis on the Book of Psalms, which will be carefully read along with modern and ancient Christian commentaries including Augustine's *Enarrationes in Psalmos*.

### CLLA 40027. Medieval Latin Texts

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 202 OR CLLA 325)

A survey of medieval Latin texts, designed to introduce intermediate students to medieval Latin literature and to help them progress in translation skills.

### CLLA 40028. Introduction to Meister Eckhart

(3-0-3) Gersh

This course will attempt to introduce Eckhart's thought by reading a selection of his most important Latin works. This close textual study will demonstrate the extent to which Eckhart presents a possibly unique combination of extreme technical exactitude and exegetical flexibility and how, thanks to these skills, he is able to develop a radically Neoplatonic (*Diomysian*) philosophy within the context of Augustinian readings and a methodology responsive to the demands of the

Aristotelian or Scholastic traditions. Selections will be from works including the Exposition of Genesis, the Book of the Parables of Genesis, the Exposition of John, the Parisian Questions, the Prologue to the Tripartite Work, and the Prologue to the Work of Propositions. Although the works to be selected for study are available at least in German and sometimes also in French or English translations, a reading of knowledge of Latin is essential for this course. Requirements: regular translation exercises (written and oral) and one short oral presentation.

### CLLA 40031. Virgil

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This advanced course deals with the full corpus of Virgil's poetry, and explores the creative history of Rome's greatest poet through close readings of passages from his pastoral poetry, the *Georgics* and *Eclogues*, and his masterpiece the *Aeneid*. Special attention is given to the settings in which Virgil composed his works, and current and traditional critical interpretations of his poetry are considered.

### CLLA 40032. Livy

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This advanced course introduces students to the historian Livy through close reading and detailed study of passages from his grand narrative of Rome's history from the founding of the city to the age of Augustus. Aeneas' flight from Troy, Rome's conquest of Italy, and Hannibal's dramatic invasion of Italy across the Alps are some of the stirring topics to which attention is given. Livy's artistic and historical methods and his position in the emperor Augustus' cultural program are key themes for discussion in the course.

### CLLA 40033. Roman Satire

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325 OR CLLA 202)

This advanced course introduces students to the genre of satire, a distinctively Roman creation in which poets express reflections on contemporary life and morals grounded in personal experience. Readings from such authors as Lucilius, Horace, Persius, and Juvenal reveal a wide range of literary tone, from the self-deprecating to the brutally acerbic. The relationship of satiric poetry to its social, cultural, and political context is a key theme for discussion in the course.

### CLLA 40034. Seneca's Philosophical Works

(3-0-3)

*Prerequisite:* (CLLA 30011) OR (CLLA 30012 OR CLLA 410) OR (CLLA 30013 OR CLLA 352) OR (CLLA 30014 OR CLLA 350) OR (CLLA 30025) OR (CLLA 30095 OR CLLA 362)

This advanced course provides an introduction to Seneca's philosophical letters and treatises. Seneca was a Stoic, subscribing to a philosophy that emphasized such virtues as self-control and self-sufficiency, for which many upper-class Romans had high regard. Readings from the Moral Epistles and essays such as "On Anger" show how Seneca understood the workings of the soul, and how he developed practical strategies for psychological self-management. The role of stoicism in Roman cultural life is an important theme for discussion in the course.

### CLLA 40040. Roman History-Writing: The younger Pliny's 'Letters'

(3-0-3) Bradley

*Prerequisite:* (CLLA 20003 OR CLLA 20004 OR CLLA 20103)

This advanced course in Latin prose literature begins with an introduction to the genre of history writing in classical antiquity, and examines representative readings from the major Roman historians Sallust, Livy, Tacitus, and Ammianus Marcellinus. It concentrates, however, on alternative modes of preserving memory in Latin prose writing, and takes as its primary text the "Letters" of the younger Pliny, which are studied from two points of view: first as a self-conscious portrait for posterity of a prominent Roman senator of the early Antonine age, and secondly as a set of documents exposing features of Roman social, political, economic, and cultural life. The biographical *Lives of the Twelve Caesars* by Pliny's contemporary Suetonius are also considered.

**CLLA 40041. Ovid**

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This advanced course provides an introduction to the poetry of the prolific author Ovid. It explores the creative history of the one writer who can truly be called a poet of the Augustan age through close reading of passages from his love poetry (the *Amores* and the *Ars Amatoria*, a handbook on seduction), his great mythological poem, the *Metamorphoses*, and the poems written after Ovid was exiled by Augustus to a remote spot on the shores of the Black Sea (the *Tristia* and *Epistulae Ex Ponto*). Special attention is paid to the contexts in which Ovid composed his works, and current and traditional interpretations of his poetry are considered.

**CLLA 40043. Roman Comedy**

(3-0-3)

This advanced course introduces students to Latin comic drama. Comic plays were a popular attraction at Roman religious festivals, and Rome produced two outstanding comic writers of completely opposite temperament, the boisterous and broad Plautus, and the wry and elegant Terence. Both continue to influence Western dramatic forms. Readings from Plautus and Terence reveal the conventions of comic drama and its use as a distinctive instrument to reflect upon the concerns of Roman life.

**CLLA 40044. The Roman Novel**

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This advanced course offers close reading and detailed study of excerpts from Petronius' *Satyricon* and Apuleius' *The Golden Ass*. Ribald and full of comic adventures, these works have much in common with modern picaresque novels. Petronius' Trimalchio, an ex-slave buffoon, and Apuleius' Lucius, a young aristocrat magically transformed into an ass, are two of Latin literature's most memorable creations. Narrative technique, critical interpretation, and the special perspective on Roman life the works present, are major subjects for discussion in the course.

**CLLA 40054. Augustine's Confessions**

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This advanced course introduces students to the thought and manner of writing of Augustine through close reading and detailed study of excerpts from his highly self-reflective autobiography, the *Confessions*. Augustine's extended analysis of his spiritual development combines in a masterful way the language and habits of thought of the Christian tradition with those of classical philosophy and literature. The style of the *Confessions*, the significance of the work, and its relation to Augustinian thought at-large are major topics for discussion in the course.

**CLLA 40055. Creation, Time, and City of God in Augustine of Hippo**

(3-0-3)

In his youth, Augustine (A.D. 354–430) received an excellent education in the Latin classics, the benefits of which remained with him throughout his life. Later, he also read philosophical writings, and, after his conversion, works by Christian authors. The book he quoted most frequently was the Bible. From his childhood, Augustine was endowed with a most unusual ability to ask awkward questions. Initially targeting his teachers, he later addressed his questions to the authors whose books he read, and to God. His writings, therefore, tend to take a dialogic form where the interlocutors include not only the reader but God, and among human beings, Cicero, Vergil, and other Romans, and also Augustine's Christian contemporaries, including Jerome, Paulinus of Nola, and Count Marcellinus, to whom he addressed the *City of God*. In following these dialogues, we will read not just Augustine's best known writings (*Confessions* and *City of God*), but also his commentaries on Genesis, and some of his letters and sermons. The purpose is to arrive at an understanding of Augustine's ideas about creation and time, and about the nature of human society and its goals. We will also ask what can be learned from Augustine's dialogic and sometimes disputatious way of thinking, explaining,

and debating. Almost all of Augustine's writings have been translated into English, but an ability to read Latin will be most useful.

**CLLA 40094. Augustan Poets**

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

With an initial glance back to Catullus and Lucretius, this course will concentrate on the Roman poets who flourished under the aegis of Augustus. The focus of the course, alongside the basic literary and stylistic marvels of this poetry, will be the poets' use of emotion and its consequent destabilizing effects. We will look at the complexities of the poetry that belongs to this era of social and political upheaval. Our readings in Latin will consist of selections from Catullus and Lucretius, the last three books of Virgil's *Aeneid* (the whole of which students should know in translation), and readings from Horace's *Odes* and Propertius' *Elegies*. We will also look at some modern critical views of Augustan poetry. Students' mastery of the Latin texts, and their ability to speak and write about these, will be evaluated.

**CLLA 40095. Ovid's METAMORPHOSES**

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

In this course, we translate and discuss selected passages from the *Metamorphoses*, Ovid's idiosyncratic poetic history of the world. Topics for our discussions include the spiritual, moral, religious, political, and physical transformations portrayed between the creation story at the beginning and the deification of Caesar at the end of the text; the tension between Ovid's adherence to Roman traditions and his irreverent, sometimes subversive, artistic originality; the poem's narrative techniques, poetic style, and structure; the significance of intertextual allusions to Greek drama, Virgilian epic, and Ovid's own love poetry; the instability of gender; portraits of the poet within the work; and the innumerable faces of love, as presented through characters who are pious, raging with passion, inseparable, violent, infatuated, lovesick, devoted, and much more. Above all, this course aims at clarifying how Ovid's inexhaustible playfulness and delightful wit contributed to shaping a work of both epic grandeur and lyric intimacy that continues to inspire poets, composers, novelists, painters, and at least one playwright whose version recently made it all the way to Broadway. Daily preparation and active participation in class are essential components of the course; brief written assignments, one midterm exam, one brief project, and a final exam also count toward the final grade.

**CLLA 40096. Postclassical Satire**

(3-0-3)

*Prerequisite:* (CLLA 20004 OR CLLA 325)

This survey will begin with introductory readings in classical satire and satiric invective and narrative, and then move on to consider specimens of a variety of late antique and medieval texts written in a satiric mode: satire, invective, parody, mock epic, etc. A sound knowledge of Latin is required. Course requirements include in-class reports, an annotated translation, and an interpretative essay.

**CLLA 47801. Special Studies**

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

**CLSS 43221. Undergraduate Seminar: Advanced Syriac**

(3-0-3)

Syriac is a form of Aramaic that was the literary language of Jews and pagans in western Asia before becoming the common dialect of Aramaic-speaking Christians in the region. Christianity had its matrix in Judaism, and early literature in Syriac preserves the only surviving sustained evidence of the distinctive character of Aramaic-speaking Christianity that is largely unHellenized and that reflects the linguistic and cultural milieu of first-century Palestine. Because of the shared literary culture of Judaism and early Syriac Christianity, examination of the intertextuality of early Syriac literature reveals a deep acquaintance with the thought and culture of Late Second Temple Judaism and the intertestamental period. A full appreciation for the dependence of Syriac literature on Jewish literary and

intellectual models requires an interdisciplinary focus that takes into account a full range of issues; among the most important are hermeneutical questions related to Jewish and Christian interpretations of scripture. Participants in the seminar will investigate a range of questions based on the following: (1) In what sense may particular texts be called Christian (Jewish, Manichaean, Gnostic)? (2) What evidence is there for intertextuality, i.e. to what extent can texts be shown to occupy “the space between” Judaism and Christianity? (3) From what social and cultural milieu did the texts emerge? (4) What evidence do the texts retain of possible oral or non-literary origins? (5) In what sense are the texts literary? Do peculiarities of language, diction, or genre in any way distinguish the texts? Can the texts be shown to be typical of the time and circumstances from which they emerged? (6) How are the texts to be read? Is it enough to evaluate them as historical documents, relating them to the historical circumstances in which they were generated, and the literary culture to which they originally belonged? These questions will be based on a deep reading of Syriac texts.

### MEAR 10001. First-Year Arabic I

(4-0-4)

This two-semester sequence of courses is a basic introduction to all aspects of the Arabic language through a comprehensive and integrated method. The focus is on language proficiency in all areas of the language, including speaking, reading, and writing. The course also introduces students to aspects of Arabic culture and everyday life in the Middle East. MEAR 10001 is offered each fall semester, and MEAR 10002 is offered each spring semester.

### MEAR 10002. First Year Arabic II

(3-0-3) Bualuan; Saadi

*Prerequisite:* (MEAR 10001 OR MEAR 101)

This two-semester sequence of courses is a basic introduction to all aspects of the Arabic language through a comprehensive and integrated method. The focus is on language proficiency in all areas of the language, including speaking, reading, and writing. The course also introduces students to aspects of Arabic culture and everyday life in the Middle East. MEAR 10001 is offered each fall semester, and MEAR 10002 is offered each spring semester.

### MEAR 13186. *The Arabian Nights* and World Literature

(3-0-3)

This course has as its focal point the famous collection of tales, the Thousand and One Nights (better known as *The Arabian Nights*). We examine issues of provenance. We study the stories as literary texts as well as historical documents. We examine how these tales have been interpreted by later societies. Finally, we use this course to introduce us to the study of the Middle East, its languages, history, literature, and peoples.

### MEAR 20003. Second Year Arabic I

(3-0-3) Amar; Saadi

*Prerequisite:* (MEAR 10002 OR MEAR 102) OR (MEAR 10101 OR MEAR 200)

This second-year Arabic course builds on the previous two semesters. The emphasis is on speaking and writing for self-expression with continued study of the basic grammatical structures. Proficiency remains the focus through readings and conversations in the language. Students develop skill in the use of the Arabic dictionary.

### MEAR 20004. Second-Year Arabic II

(3-0-3)

*Prerequisite:* (MEAR 20003 OR MEAR 103)

This course is geared to consolidating skills gained in the previous three semesters while enhancing the ability to converse and conduct oneself in Arabic. Reading skills are enhanced by exposure to more sophisticated examples of literature. Original written expression is encouraged through the composition of short essays.

### MEAR 30005. Third-Year Arabic I

(3-0-3) Saadi

*Prerequisite:* (MEAR 20004 OR MEAR 104)

This third-year Arabic course emphasis is on developing listening, speaking, reading, and writing skills in interactive settings. Vocabulary building will be the focus of drills; we will cover basic vocabulary in various authentic uses of the language. Special attention will also be given to media Arabic. Basic Arabic grammar should be completed by the end of the year. We will continue with part 2 of the KITAAAB sequence. Supplementary materials, mainly from Arabic media (BBC Arabic News, newspapers, magazines), will be provided. Tests, both oral and written, will cover the textbook materials, in addition to the basic grammar and the cumulative vocabulary.

### MEAR 30006. Third-Year Arabic II

(3-0-3) Saadi

*Prerequisite:* (MEAR 30005 OR MEAR 105 OR MEAR 301 OR MEAR 410)

This third-year Arabic course emphasis is on developing listening, speaking, reading, and writing skills in interactive settings. Vocabulary building will be the focus of drills; we will cover basic vocabulary in various authentic uses of the language. Special attention will also be given to media Arabic. Basic Arabic grammar should be completed by the end of the year. We will continue with Part 2 of the KITAAAB sequence. Supplementary materials, mainly from Arabic media (BBC Arabic News, newspapers, magazines), will be provided. Tests, both oral and written, will cover the textbook materials, in addition to the basic grammar and the cumulative vocabulary.

### MEAR 30007. Media Arabic/Arabic Media

(3-0-3)

*Prerequisite:* MEAR 20004

The goal of this course is twofold: it consists of an overview of contemporary Arabic media and an introduction to media Arabic. Simply put, it's a survey course on Arabic media with a language component. In addition to printed texts (newspapers, magazines, journals), a substantial portion of the material, of written, audio, and visual texts, is drawn from major Arabic Internet sites (al-Jazeera, al-Arabiyya, BBC Arabic, etc.) and TV programs. Texts vary according to interests of students. Some suggested topics: the social, political and institutional context of media production, the role media plays in the present debates in the Arab world of problems such as cultural identity, the position of Islam in society, secularism, Nationalism, development, illiteracy, women and gender, sexuality, pop culture, etc. Taught in English with extensive readings and some discussion in Arabic. The course fulfills the third-year Arabic requirement for Arabic majors.

### MEAR 32300. Language Across the Curriculum Arabic Discussion Group

(1-0-1)

A 1-credit reading course on reading the Qur'an in Arabic. Students will develop both their understanding of Arabic grammar and their recitation of the Qur'an as they discuss the issues raised by the text.

### MEAR 47801. Special Studies

(V-0-V)

Individual or small group study under the direction of a departmental faculty member.

### MEHE 10001. Elementary Hebrew I

(3-0-3) Winitzer

This is a two-semester introductory course in biblical Hebrew; under normal circumstances, the student must complete the first to enroll in the second. The fall semester will be devoted to learning the grammar of biblical Hebrew. The spring semester will be divided into two parts. For the first six weeks, we will finish and review the grammar. In the remaining part of the course, we will read and translate texts from the Hebrew Bible, Qumran, and Rabbinic literature. The course will focus on developing reading and comprehension skills in biblical Hebrew through the study of biblical texts. In addition, students will learn how to use reference grammars, concordances, and apparatus to the *Biblia Hebraica*. The course

encourages students to think about the grammatical forms and their implications for biblical interpretation.

### **MEHE 10002. Elementary Hebrew II**

(3-0-3) Winitzer

*Prerequisite:* (MEHE 10001 OR MEHE 481)

This is a two-semester introductory course in biblical Hebrew; under normal circumstances, the student must complete the first to enroll in the second. The fall semester will be devoted to learning the grammar of biblical Hebrew. The spring semester will be divided into two parts. For the first six weeks, we will finish and review the grammar. In the remaining part of the course we will read and translate texts from the Hebrew Bible, Qumran, and Rabbinic literature. The course will focus on developing reading and comprehension skills in biblical Hebrew through the study of biblical texts. In addition, students will learn how to use reference grammars, concordances, and apparatus to the *Biblia Hebraica*. The course encourages students to think about the grammatical forms and their implications for biblical interpretation.

### **MELC 10101. Introduction to Arabic Culture and Civilization**

(3-0-3)

This course is an introductory survey of Arabic culture and civilization from the pre-Islamic era to the conquest of Constantinople in 1453. The course will trace the origins of the Arab people and their distinctive culture and literature. The revelation of the Qur'an to the Prophet Muhammad and subsequent development of Islam will be treated in detail. Following this, the course will focus on the spread of Islamic civilization, its interactions with other cultures, and its contributions to scholarship in the areas of literature, art, and architecture.

### **MELC 13186. Literature University Seminar in English**

(3-0-3) Guo

Introduces first-year students to the study of classical literature on a comparative basis, with readings from Greco-Roman and Arabic literature.

### **MELC 20010. Arabic Fiction in Translation**

(3-0-3)

The object of this course is to introduce the student to Arabic literature—a major world literature that remains largely unexplored in the West—from its beginning to the present. The course will read and discuss, in a seminar context and from a comparative perspective, key works of medieval Arabic narrative prose, the *Arabian Nights* and the *Maqamat*, and selected works of modern Arabic fiction by the Nobel laureate Naguib Mahfouz (Egypt), among others. There will also be several screenings of the film adaptations. Some of the issues to be discussed are: the influence of the *Arabian Nights* in Western literature, representation and interpretation, and literary compositional strategies in “domesticating” an “imported” genre—fiction—used by modern Arab writers.

### **MELC 20020. Revelation to Revolution: Arabic Literature in a Global Context**

(3-0-3) Amar

This basic introduction to Arabic literature links the phenomenon of “literature” to the larger world of Islamic studies. The course emphasizes connections between Arabic literature, the Classics, and contemporary Western literary tradition from a broadly comparative perspective. Topics include early Arabic mytho-poetics; the idea of scripture; philosophy, science, and the Renaissance; the literature of empire; and Arab Spain. No knowledge of Arabic is required.

### **MELC 20040. Islamic Societies of the Middle East and North Africa: Religion, History, and Culture**

(3-0-3)

This course is an introductory survey of the Islamic societies of the Middle East and North Africa from their origins to the present day. It will deal with the history and expansion of Islam, both as a world religion and civilization, from its birth in the Arabian Peninsula in the seventh century to its subsequent spread to other parts of western Asia and North Africa. Issues of religious and social ethics, political governance, gender, social relations, and cultural practices will be explored in

relation to a number of Muslim societies in the region such as in Egypt, Morocco, and Iran. The course foregrounds the diversity and complexities present in a critical area of what we call the Islamic world today.

### **MELC 20050. The Ancient Middle East**

(3-0-3)

The origins of human civilization, the first written languages, and the myths that revolutionized religion: this course introduces students to the civilizations of Mesopotamia and western Asia that form the basis of the way much of the world today thinks, sees reality, believes, and expresses itself. Topics include the history of God: religions, myths; life and literature of the Sumerians, Akkadians, and Babylonians; and Phoenician and Aramaic contributions to written language, law, literature, and legend.

### **MELC 20060. Islam: Religion and Culture**

(3-0-3)

This introductory course will discuss the rise of Islam in the Arabian Peninsula in the seventh century of the Common Era and its subsequent growth as a major world religion and civilization. Lectures and readings will deal with the life of the Prophet Muhammad, the Qur'an and its role in worship and society, early Islamic history, community formation, law and religious practices, theology, mysticism, and literature. Emphasis will be on the core beliefs and institutions of Islam and on its religious and political thought from the Middle Ages until our own time. The latter part of the course will deal with the spread of Islam to the West, resurgent trends within Islam, both in their reformist and extremist forms, and contemporary Muslim engagements with modernity.

### **MELC 20070. Introduction to Islamic Civilization**

(3-0-3)

This course is designed to introduce students to Islamic civilization and Muslim culture and societies. The course will cover the foundations of Islamic belief, worship, and institutions, along with the evolution of sacred law (*Al-shari'a*) and theology, as well as various aspects of intellectual activities. The Qur'an and the life of the Prophet Muhammad will be examined in detail. Both Sunni and Shi'i perspectives will be considered. Major Sufi personalities will be discussed to illuminate the mystical and popular tradition in Islam. Topics on arts, architecture, literary culture, and sciences will be covered. Although the course is concerned more with the history of ideas than with modern Islam as such, it has great relevance for understanding contemporary Muslim attitudes and political, social, and cultural trends in the Muslim world today.

### **MELC 20080. Women in Islamic Societies**

(3-0-3) Afsaruddin

This course serves as a broad survey of women's and gender issues within the contexts of multiple societies what is usually termed the Islamic world. The first half of the semester will concentrate on the historical presentation of the position of women in Islamic societies, defined by the normative values of Islam and by cultural traditions and norms that are sometimes at odds with religious prescriptions. We will discuss how the interpretation of these values in diverse circumstances and who gets to do the interpreting have important repercussions for women's societal roles. The second half of the course will privilege women's voices in articulating their gendered identities and roles in a number of mainly contemporary Islamic societies in different historical circumstances as expressed in memoirs, fiction, magazine articles, and public speeches. As part of the historical contextualization of such works, we will focus on how modern phenomena like Western colonialism, nationalist liberation movements, and civil and other forms of war have fostered women's organized movements, and their sociopolitical empowerment in some cases and marginalization in others, with lasting implications for these developing societies.

### **MELC 30030. Love, Death, and Exile in Arabic Literature and Cinema**

(3-0-3)

This course explores literary and artistic presentation of the themes of “love, death, and exile” in Arabic literature and popular culture from pre-Islamic era to the pres-

ent day. Through close readings of Arabic poetry, essays, short stories, and novels (in English translation), and analyzing a number of Arabic movies (with English subtitles), we discuss the following issues: themes and genres of classical Arabic love poetry; gender, eroticism, and sexuality in Arabic literary discourse; alienation, fatalism, and the motif of *Al-Hanin Ila Al-Watan* (nostalgia for one's homeland) in modern Arabic poetry and fiction.

### **MELC 30035. Medieval Middle East**

(3-0-3)

This course offers a survey of Middle Eastern history from the rise of Islam in the seventh century C.E. until the rise of Mongol successor polities in the 15th century. The course is structured to cover political and cultural developments and their relationship with broader changes in society during the formative centuries of Islamic civilization. Specific topics include the career of the Prophet Muhammad and the origins of the earliest Muslim polity; the creation and breakup of the Islamic unitary state (the Caliphate); the impact of Turkic migrations on the Middle East; social practices surrounding the transmission of learning in the Middle Ages; the diversity of approaches to Muslim piety and their social and political expression; popular culture; non-Muslims in Islamic society; and the creation of the medieval Islamic "international" cultural order. Among the more important themes will be long-term cultural and social continuities with the Islamic and ancient Near East, and concepts of religious and political authority.

### **MELC 30040. Christianity in the Middle East**

(3-0-3) Amar

The spread of Christianity from Palestine to the West is well-documented. Less well-known is the development of Christianity in the lands of its origin, the Middle East. This course introduces students to the largely untold story of Christianity that expresses itself in the native Aramaic language and culture of the Semitic East. Topics include the origins of the indigenous Christian churches of Syria, Lebanon, Palestine, Armenia, Iraq, and Iran; and the development of these traditions will be viewed in relation to Western/European forms of Christianity that have come to dominate and that are viewed as "mainstream" and "normative." The course concludes with an assessment of the impact of religious "fundamentalisms," the diaspora of Middle Eastern Christians throughout Europe and the United States, and the contemporary state of Christianity in the Middle East.

### **MELC 30050. Canon and Literature of Islam**

(3-0-3)

This course is an introduction to the fundamental religious texts and literature of Islam. The list includes the Qur'an (the central, sacred scripture of Islam), the Hadith (record of the speech and actions of the Prophet Muhammad), biography of the Prophet, exegetical literature, historical texts, and mystical and devotional literature. Students will read primary texts in English translation with a focused discussion and analysis of form, content, historical background, religious significance, and literary allusions of the various texts. Themes such as "the unity and majesty of God," "prophecy and revelation," "good and evil," and "this world and the hereafter" will be dealt with in the lectures and conversation in class. The course lays heavy emphasis on class discussion and student preparedness.

### **MELC 30060. Historical Survey of the Arab Middle East**

(3-0-3)

This course will chart the history of the Arab Middle East from the formative period of the emergence of Islam in the seventh century through the fall of Constantinople in 1453 and the creation of the Ottoman Turkish Empire. Intended to be broad in its coverage and comprehensive in its scope, the course will introduce students to the social, cultural, and religious crosscurrents that came to define the Arab life and culture in the region.

### **MELC 30070. Islam and Modernity**

(3-0-3) Afsaruddin

Islam and its compatibility with modernity is a much-debated issue in the contemporary period. The course will engage this timely topic and discuss the most important "hot-button" issues involved in these debates: political Islam, democracy, pluralism, rights of women, and secularism. The historical contexts

that provide the backdrop for the range of responses to the phenomenon of modernity and its attendant issues will also receive attention. What internal resources exist within Islamic thought that are being drawn upon by modernists to make a strong case for an essential compatibility between Islam and democracy, for example? Is democracy (or Islam, for that matter) a monolithic concept? Students will be expected to actively take part in discussions centered around such questions, the assigned readings, and class lectures. Prior exposure to at least one class on Islam or the Middle East is strongly recommended.

### **MELC 30080. Anthropology of the Muslim World**

(3-0-3) Borbieva

This course will be a survey examination of ethnographic work on the Muslim world appropriate for students with all levels of background in anthropology and Islam. The course will look at the Muslim world broadly defined, including ethnographic work on the Middle East, Central Asia, South Asia, Southeast Asia, Europe, Africa, and North America. The course will consider many aspects of life in Muslim societies, not just religion, including trade, travel, identity, literature, and politics. Because of its relevance to current events, a significant portion of the course will deal with gender relations and constructions of masculinity/femininity in the Muslim context. We will consider such questions as the impact of religion on gender relations, negotiations between textual traditions and "popular" traditions in determining gender relations, and the circumstances in which gender constructions in the Muslim world attract attention from the "West." The aim of this course is to give students an understanding of a wide array of approaches to ethnography. Lectures and supplementary reading material will situate the central texts in the dominant theories and assumptions of the discipline.

### **MELC 30160. Middle East and the West**

(3-0-3) Kaufman

This course explores the complicated relationships between the Middle East and the Western world as they evolved over the past several centuries.

### **MELC 46801. Directed Readings**

(3-0-3)

Individual or small group study under the direction of a faculty member. Permission of the department required.

## Economics

### ECON 10010. Principles of Microeconomics

(3-0-3)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

### ECON 10011. Principles of Microeconomics

(3-0-3)

*Prerequisite:* (MATH 10240 OR MATH 10250 OR MATH 10350 OR MATH 10550 OR MATH 10850)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

### ECON 10020. Principles of Macroeconomics

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010

A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, fiscal and monetary policy.

### ECON 13181. Social Science University Seminar

(3-0-3) Leahy; Rakowski; Waller

Economics sections will deal with different aspects of economic analysis and policy issues. The focus will be on understanding how economists think about theoretical issues and how they apply their analytical tools to real-world economic problems and policies. No background in economics is assumed.

### ECON 13191. Honors Seminar

(3-0-3)

*Prerequisite:* ALHN 13950

The primary lesson of economics is that incentives matter: economic agents alter their behavior in predictable ways when faced with changing costs and benefits. Over the past 30 years, the power of economics as a predictive social science has been demonstrated time and time again as scholars have shown that seemingly uneconomic decisions can be modeled from an economic perspective. In this seminar, we will use academic readings and popular books such as *Freakonomics* to indicate the breadth and scope of questions that can be analyzed from an economic perspective. A sample of topics that will be covered include why AIDS is more prevalent in Africa than in the United States, how to efficiently combat global warming, the theory behind nuclear deterrence strategies, why obesity is on the rise, and why there is cheating in sumo wrestling.

### ECON 20010. Principles of Microeconomics

(3-0-3)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

### ECON 20011. Principles of Microeconomics

(3-0-3)

An introduction to economics, with particular attention to the pricing mechanism, competitive and monopolistic markets, government regulation of the economy, labor-management relations and programs, income determination and public policy, trade and the international economy.

### ECON 20020. Principles of Macroeconomics

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

A continuation of introduction to economics with emphasis on the measurement of national economic performance, alternative explanations of short-run economic fluctuations and long-run economic growth, money and credit, and fiscal and monetary policy.

### ECON 20501. Poverty in Rural America

(1-0-1)

This 1-credit course examines poverty in rural America to determine in what ways it is similar and in what ways it is distinct from poverty in urban American settings.

### ECON 20502. Poverty and the Bishop's Pastoral Letter

(1-0-1) Wilber

*Prerequisite:* (ECON 10010 OR ECON 10011) OR (ECON 20010 OR ECON 20011)

This class is designed to rewrite the poverty section of Chapter 3 in the Bishops' 1986 letter, "Economic Justice for All." There will be hearings with groups of economists, theologians, community activists, et al. The idea is to simulate the process the bishops went through in writing the original document and to update the material in light of changes in the economy over the past 19 years. Each student will prepare a paper (8–10 pages) that rewrites the poverty section.

### ECON 20503. Wal-Mart: Structure, Behavior, and Performance

(1-0-1) Craypo

Wal-Mart has greater sales revenue and more employees than any other corporation. As such, it is both a determinant of and a window on the way that Americans shop and work in the new economy. This course examines how Wal-Mart is structured, how it behaves, and how it performs compared with other dominant firms now and in the past. Wal-Mart says it gives us low prices every day; its critics say it does so, but at too high a price in social costs. Who is right?

### ECON 20504. Distributivism: Economics of the Catholic Worker Movement

(1-0-1)

This course seeks to understand "distributivism," an approach to economics based upon the medieval guilds and developed by G.K. Chesterton, Hilaire Belloc, and Arthur Penty, among others. It was embraced by Dorothy Day, Peter Maurin, and the Catholic Worker Movement.

### ECON 23210. Economics and Ethics

(1-0-1)

This course is the seminar version of ECON 20210. This course will focus on the interaction between ethics and economics, both in economic theory and economic policy. There are three ways in which ethics are important in economics: (1) Economists have ethical values that help shape the way they do economics. (2) Economic actors have ethical values that help shape their behavior. (3) Economic institutions and policies impact people differentially and thus ethical evaluations must be applied in addition to economic evaluations.

### ECON 30010. Intermediate Economic Theory—Micro

(3-0-3) Rakowski; Sullivan

*Prerequisites:* (ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011) AND (ECON 10020 OR ECON 20020)

An examination of the language and analytical tools of microeconomics, emphasizing the functional relationship between the factor and product markets and resource allocation.

**ECON 30020. Intermediate Economic Theory—Macro**

(3-0-3) Dutt; Mark

*Prerequisite:* (ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011) AND (ECON 10020 OR ECON 20020)

An intensive examination of macroeconomics with particular reference to the determination of economic growth, national income, employment, and the general price level.

**ECON 30200. Introduction to Political Economy**

(3-0-3)

*Prerequisite:* ((ECON 10010 OR ECON 10011) OR (ECON 10020) OR (ECON 20010 OR ECON 20011)) OR ((ECON 20020))

The course is an introduction to the “other” side of economics: heterodox economics or political economy. Political economy perspectives include Marxian, post-Keynesian, radical, institutionalist, feminist, and other approaches. The course will also investigate the theoretical and social consequences of different approaches, and how policies and institutional changes that promote social justice and human dignity can be formulated in our current economic environment.

**ECON 30220. Marxian Economics**

(3-0-3) Ruccio

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

An introduction to Marxian economic analysis. Topics include the differences between mainstream and Marxian economics, general philosophy and methodology, Marxian value theory, and critical appraisals and current relevance of Marx’s “critique of political economy.”

**ECON 30260. Political Economy of Development**

(3-0-3) Kim

*Prerequisite:* ((ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021)) OR ((ECON 20010 OR ECON 20011) OR (ECON 20020))

The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include; rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, failed state and market failure, market and democracy, income distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

**ECON 30330. Statistics for Economics**

(3-0-3) Betson; Kim

This course seeks to introduce the student to the principles of probability and statistical theory appropriate for the study of economics. The emphasis of the course will be on hypothesis testing and regression analysis.

**ECON 30331. Econometrics**

(3-0-3) Evans

*Prerequisite:* (ECON 30330 OR BAMG 20100)

Provides students with an understanding of when and how to use basic econometric methods in their work as an economist, including the ability to recognize which econometric technique is appropriate in a given situation as well as what explicit and implicit assumptions are being made using the method. Topics covered include estimation and hypothesis testing using basic regression analysis, problems with basic regression analysis, alternative econometric methods, limited dependent variables, and simultaneous equation models.

**ECON 30400. Labor Economics**

(3-0-3)

*Prerequisites:* (ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011) AND (ECON 10020 OR ECON 20010)

A survey course covering the economics of employment and unemployment; wages and income distribution; poverty, education and discrimination; unions and labor and industrial relations systems; and comparative labor systems.

**ECON 30460. Economics of Gender and Ethnic Discrimination**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

Women and ethnic minorities have the lowest incomes, worst jobs, and highest levels of unemployment and poverty in the United States today. This course examines the role of racism and sexism in the U.S. economy.

**ECON 30490. Economics of Aging**

(3-0-3)

*Prerequisite:* ((ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011) OR (ECON 20020))

The course covers how the risks of work and the conflict between labor and capital have been handled by welfare capitalism and government policy. We will pay attention to worker response and demands in retirement security—a touchstone for the debate on security and risk. We are concerned with how labor force institutions will respond in the next century given the aging of the workforce. We look especially at two issues: the emergence of women workers into a more secure labor market, and the debate about Social Security reform and privatization. We also examine issues of intergenerational equity. There are three readings where the students will be asked to apply abstract neoclassical theory (but they are not highly mathematical). This is an ambitious class mixing current policy issues with history and economic theory.

**ECON 30500. Introduction to Poverty Studies**

(3-0-3) Warlick

*Prerequisite:* ((ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011) OR (ECON 20020))

An examination of the extent and causes of poverty in the United States. The current system of government programs to combat poverty is analyzed. Reforms of this system are also considered.

**ECON 30530. Environmental Economics**

(3-0-3) Jensen

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

An analysis of the welfare economics of environmental problems, emphasizing market failures due to negative environmental externalities. Air, water, and land pollution are classic examples of these externalities, which occur when third parties bear costs resulting from the transactions of the two primary market participants. The theory and practice of environmental policy to promote efficiency at the U.S. local, state, and federal levels and in other countries is explored. International problems such as transboundary pollution and global warming are also studied.

**ECON 30800. Development Economics**

(3-0-3)

*Prerequisite:* ((ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011) OR (ECON 20020))

The current problems of Third World countries are analyzed in a historical context, with attention given to competing theoretical explanations and policy prescriptions. The course will combine the study of the experiences of Latin American, African, and Asian countries with the use of the analytical tools of economics.

**ECON 30810. Regional Economic Development**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

The course looks at the spatial dimensions of economics with major emphasis on where economic activity takes place and why. Theories and methods of regional analysis and regional programs will be stressed with reference to selected regions in the United States and elsewhere. A major part of this class will be a major research project, paper, and presentations by you on a selected region. Research presentations and discussions by you will be a regular feature of the class as your research proceeds.

**ECON 30840. European Economic Development**

(3-0-3)

This course provides an account of the policies adopted in the former socialist states of Eastern and Central Europe during their transition from planned to market economies. It seeks to identify the economic problems faced by socialist and post-socialist governments; to set out the theoretical analysis underlying the policies adopted to deal with them; to assess their impact on economic performance and the welfare of the population.

**ECON 32510. Addressing U.S. Poverty at the Local Level**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

This course focuses on four arenas where poverty manifests itself: homelessness, education, health care, and jobs. Writing-intensive.

**ECON 33100. Philosophy of Economics**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

This course is the seminar version of ECON 30100. What does it mean to do good work in economics? If you thought the answer to this question was straightforward, you will be in for a surprise! The intention of the course is to problematize such notions as “prediction is the goal of economics” or “there is progress in economics” or “assumptions in economics should be (un)realistic.” To do this, we will explore literature on philosophy of science, sociology of scientific knowledge, and economic theory.

**ECON 33120. Seminar in the History of Economic Thought**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

This course is the seminar version of ECON 30120. The course explores literature on philosophy of economics, history of economic thought, and new directions in economic methodology.

**ECON 33200. Introduction to Political Economy**

(3-0-3) Wolfson

*Prerequisite:* (ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011) OR ECON 20020

This course is the seminar version of ECON 30200. The course is an introduction to the “other” side of economics: heterodox economics or political economy. Political economy perspectives include Marxian, post-Keynesian, radical, institutionalist, feminist, and other approaches. The course will also investigate the theoretical and social consequences of different approaches, and how policies and institutional changes that promote social justice and human dignity can be formulated in our current economic environment.

**ECON 33220. Marxian Economics**

(3-0-3)

*Prerequisite:* (ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011) OR ECON 20020

This course is the seminar version of ECON 30220. An introduction to Marx’s most significant work, *Capital*, with particular attention to the initial steps of Marx’s value theory presented in Volume I of *Capital*.

**ECON 33240. Economics of War and Peace**

(3-0-3)

*Prerequisite:* ((ECON 10010 OR ECON 10011) OR (ECON 20010 OR ECON 20011)) AND ((ECON 10020 OR ECON 10021) OR ECON 20020)

This course is the seminar version of ECON 30240. The course examines the consequences of wars, including international wars, civil wars, and terrorism. It also examines approaches to peace building and post-war reconstruction. While it focuses mainly on economic factors at work and makes us use the tools of economic analysis, it adopts a broader political economy framework.

**ECON 33250. Justice Seminar**

(3-0-3) Roos

This course is the seminar version of ECON 30250. An examination of major theories of justice, both ancient and modern. Readings include representatives of liberal theorists of right, such as John Rawls, as well as perfectionist alternatives. The course also serves as the core seminar for the philosophy, politics, and economics concentration.

**ECON 33260. Political Economy of Development**

(3-0-3)

*Prerequisite:* (ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011) OR ECON 20020

This course is the seminar version of ECON 30260. The course is divided into two parts. The first part provides an overview of the institutional and empirical features of the developing world, followed by a survey and critical evaluation of the conventional development theories. The second part looks into the selected topics evoking the critical, controversial stakes in Third World development debates today. The topics include rent-seeking activities, land tenure and peasantry, micro-financing, corporate governance, state and market failure, market and democracy, income distribution and poverty, feminism in development, ethnic conflicts in resource use, and population pressures. The approach taken in this course is a political-economy perspective with references to the historical, cross-cultural, and empirical materials. The course aims at providing the students with intellectual spaces for alternative development paradigms and strategies. Where appropriate, the tools used in economic analysis will be reviewed at an elementary and accessible level.

**ECON 33270. Economics of Science**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

This course is the seminar version of ECON 30270. This course describes the changing history of the organization and subsidy of scientific research, then surveys the different methods of economic theories and applied scientific process.

**ECON 33280. Political Economy of Southern Africa**

(3-0-3)

*Prerequisite:* (ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011) OR ECON 20020

This course is the seminar version of ECON 30280. Southern Africa has long been considered an economic and political basket case. Poverty, famine, AIDS, environmental degradation, and capacity deprivation, have all been considered corollaries to the region’s colonial legacies, and postcolonial struggles of identities and policies. Yet scholars and activists argue that the region, indeed the continent, is capable of transcending its blighted history, but this requires collective conscientious will and actions of institutions and individuals within the African continent,

as well as in the West. This seminar-based course, through theories, literary works, case studies, and direct interviews of Southern Africans, makes intelligible the major perspectives that attempt to explain, predict, and effect transformative change in Southern Africa, and in those who study the region.

### **ECON 33410. Labor Relations Law**

(3-0-3) Leahy

*Prerequisite:* ((ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011)) AND ECON 20020

This course is the seminar version of ECON 30410. A study of the development of common and statutory law with reference to industrial relations in the United States with emphasis on the case method.

### **ECON 33420. Employee Relations Law and Human Resources Practices**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

This course is the seminar version of ECON 30420. A case approach using primarily U.S. Supreme Court cases of the various federal laws that are encountered in personnel management. The course will cover the impact of law in such areas of the personnel function as recruitment and selection of employees, training, promotion, affirmative action, testing, evaluation of wages, fringe benefits, and safety and health.

### **ECON 33430. Collective Bargaining: Private Sector**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

This course is the seminar version of ECON 30430. The analysis of the procedures and economic implications of collective bargaining as it now operates in the United States. Emphasizes a game theory approach resulting in the negotiation of a labor contract

### **ECON 33440. Collective Bargaining: Public Sector**

(3-0-3) Leahy

*Prerequisite:* (ECON 10010 OR ECON 10011) OR (ECON 10020 OR ECON 10021) OR (ECON 20010 OR ECON 20011) OR ECON 20020

This course is the seminar version of ECON 30440. This course will examine the relevant state and federal laws covering the public-sector collective bargaining. It will examine the various issues and techniques covering collective bargaining in government. The major part of this course will be a game theory in which an actual contract will be bargained.

### **ECON 33470. Labor Arbitration**

(3-0-3)

*Prerequisite:* ((ECON 10010 OR ECON 10011) OR (ECON 20010 OR ECON 20011)) AND ((ECON 10020 OR ECON 10021) OR ECON 20020)

This course is the seminar version of ECON 30470. Analysis of the practice and procedures of arbitration in labor grievances with emphasis on rights and interest issues in both public and private sector employment. Course stresses an analysis of arbitral awards.

### **ECON 33480. Migration, Education, and Assimilation: Three Forces that Built America**

(3-0-3) Wozniak

This course is the seminar version of ECON 30480. This course uses the tools of economics to understand driving trends and episodes of migration, education, and assimilation throughout America's history. Readings will apply economic concepts in various historical contexts, from the settling of the country by Europeans to the present day. Examples of course topics include the major waves of European migration to the United States, including waves of Irish immigration; the development and rise of the high school in America; important trends in educational attainment particularly of women and minorities; the economic effects of civil rights legislation; and the English-language-only debate. Economics knowledge at

the level of Principles of Microeconomics would be helpful but is not required. A research paper is required.

### **ECON 33500. Economics of Poverty**

(3-0-3)

*Prerequisite:* ECON 10010 OR ECON 10011 OR ECON 20010 OR ECON 20011

This course is the seminar version of ECON 30500. An examination of the extent and causes of poverty in the United States. The current system of government programs to combat poverty is analyzed. Reforms of this system are also considered.

### **ECON 33530. Environmental Economics**

(3-0-3)

*Prerequisite:* (ECON 10010 OR ECON 10011) OR (ECON 20010 OR ECON 20011)

This course is the seminar version of ECON 30530. An analysis of the welfare economics of environmental problems, emphasizing market failures due to negative environmental externalities. Air, water, and land pollution are classic examples of these externalities, which occur when third parties bear costs resulting from the transactions of the two primary market participants. The theory and practice of environmental policy to promote efficiency at the U.S. local, state, and federal levels and in other countries is explored. International problems such as transboundary pollution and global warming are also studied.

### **ECON 33540. Restoring Economic Vitality to the Inner City: What Works, What Doesn't, and Why**

(3-0-3)
